

Chem 31A Sections

Section provides hands-on and guided-inquiry activities to build your conceptual understanding and problem solving skills through small-group learning. Sections will be held in labs and you will be using potentially hazardous chemicals, therefore you must complete the safety training course on STARS (on your axes.stanford.edu account) and print **the Safety Acknowledgment Form before the first section. Submit this form to your TA** when you arrive at the first section. For EVERY section, you must come to lab in proper attire (closed toed shoes, long pants and long sleeve shirt). Students coming to section without a signed safety form and proper lab attire will be sent home.

Section Grading

Section participation:

Worth 4 pts per week. Because sections are based on participation in groups, it is critical to you and your fellow group members that you arrive on time. Students more than 5 minutes late (cell phone time) will not receive their participation points for that section.

Lab Write-Ups:

There will be three short reports (1-3 pages) over the course of the quarter on activities in section. You are allowed and indeed encouraged to discuss the activities with others prior to writing your report, but **the actual report must be solely of your own composition**. You or a friend should submit your report by 2:30pm (cell phone time) on the day listed in the calendar. Each report will be graded for content and composition and will be worth 10 pts. Reports must be submitted in the **labeled receptacles opposite Mudd 287**. The boxes will be removed at exactly **2:35 pm (cell phone time)**. Any write-ups not turned in at this time will not receive credit.
