

Design Challenges in Assistive Technology

Doug Schwandt

ENGR110/210 - January 18, 2011

Perspectives in Assistive Technology

Outline...

- Design Process
- Project Examples:
 - Handbike/Sunburst – arm-powered bikes
 - Inter-Limb Resistance – space exercise
 - Kine-Assist – robot assist for physical therapy
 - DARPA Revolutionizing Prosthetics - bionic arm
 - Alter-G, M300 G-Trainer – defy gravity
- Perspective

Design Process

- Need (create one if necessary; be passionate)
- State-of-the-Art (it may already exist)
- Conceptual Design (this is the fun phase)
- Select Preferred Concept (tools/intuition)
- Detail Design/Analysis (don't give up!)
- Working Prototypes (make it work, sleep deprivation)
- Testing (does it really work?)
- Final Device (deliver something good)
- Documentation (you'll build on it; share the credit)
- Technology Transfer (get it out there!)

Principal Designer:
Doug Schwandt, MS

Bicycle Frame Builders/Designers:
Keith Bontrager
Gary Hale
Peter Johnson
Tim Paterek
Chris Schwandt

Other Significant Design Contributions:

Gordon Abraham, MS
Jim Anderson, JEM
Peter Axelson*, MS
Phil Barkan, PhD
Irv Housinger
Larry Leifer, PhD
Candy Mintz, PhD
Fred Tatch

***Project Envision/Creation**

Handbike Arm-Powered Bicycle

Features

- **Arm-Powered Bike for People with Lower Limb Disability**
- **Adjustable Side-Wheels up for Two-Wheeling and Fastened Down for Transfer**
- **Multiple Gears**
- **Folding Crank Tower for Easy Access**
- **Steer to Balance**

Applications

- **Recreation, Transportation, Competition, Exercise**

Commercialization

- **Recreational Mobility Inc. (1983-1984)**
- **New Dimensions Design, Inc. (1992-1996)**
- **Mobility Engineering, Inc. (1996 - present) www.mobilityeng.com**

Principal Designer:
Doug Schwandt, MS

Sunburst & Handbike Tandem

Bicycle Frame Builders/Designers:
Gary Hale
Keith Bontrager

Gary Hale, builder & co-designer, with young cycling enthusiasts.

Significant Design Contributions:
Jim Anderson, JEM

British Columbia Collaborators:
Marshal Smith, Provincial Prog
Admin, Disabled Athlete
Kate Hunter-Zaworski, PhD
Shayna Hornstein, PT

Features

- Arm/Foot-Powered Bike for Able-Bodied and Disabled to Share
- Separate Gearing for Recumbent Front Rider
- Upright Rider in Back Steers
- Not Only for Disabled Riders
- Easy to Communicate and See Ahead

Applications

- Recreation, Transportation, Competition, Exercise

Collaboration

- British Columbia Provincial Program for 1981 International Year of the Disabled Program thru Univ BC

Unrelated Commercialization

- CounterPoint Conveyance, Inc.
 - Jim Weaver
- Viewpoint Tandem
 - Bilenky's Cycle Works Ltd. ViewPoint
 - <http://www.bilenky.com/index.htm>

Inter-Limb Resistance Exercise Device

NASA-VA Collaboration:

- Space Exercise (NASA)
- Rehab Exercise Potential (VA)

Investigators:
Scott Parazynski, MD (Astronaut)
Alan Hargens, PhD

Design/Fabrication:
Doug Schwandt, MS
Jim Anderson, JEM
Donna Hooker (JSC Contractor)
Maurice LeBlanc, MS CPO
Lin Liang, PhD
Russ Hays

On-Board STS-66 space shuttle launch

Jim machines ILR flight hardware

Tests On-Board NASA's KC-135 Parabolic Flight Microgravity Simulator

Principals:

David Brown, PhD

Edward Colgate, PhD

Michael Peshkin, PhD

Clinical/Marketing:

Ela Lewis, MSPT, NCS

James Patton, PhD

Rehab Institute of Chicago

Engineering/Design:

Julio Santos-Munne'

Director of Engineering

Alex Makhlin, MS

Tom Moyer, MS

Douglas Schwandt, MS

Concept Development & Human

Interface Design:

IDEO (Evanston)

KineAssist™ -- Assistive Device for Physical Therapy

Features

- Assist clinicians in gait & balance training, in a functional context.
- Challenge clients to their maximum limits without increasing the risk of falls.
- Maintain consistency with current practice and infrastructure.
- Allow more therapy, by minimizing set up time.
- Will be used during transition, standing balance, ambulation and dynamic balance therapy.

DARPA- Revolutionizing Prosthetics Bionic Arm

Features

- Mimic sensory-motor capabilities of natural hand
- Fingertip sensors return the sense of touch to amputees.
- Haptic tactor interface; neural integration or EMG
- Over 80 sensors, 10-13 controlled axes of motion in hand alone.

KineaDesign part of RP 2009 team, led by Johns Hopkins Applied Physics Laboratory (JHU/APL) under the direction of HDT Engineering Technologies (formerly new World Associates).

Differential Pressure Walking Assist

Investigators/Therapists:

Charles Burgar, MD

Robert Whalen, PhD, inventor

Yang Cao, MD (China)

Ellie Buckley, MS PT

Design/Fabrication:

Doug Schwandt, MS

Jim Anderson, JEM

Greg Breit, PhD

Christine Diraghi, MS

Josh Beach, MS

Monroe Postman, BEE ProEng

Features

**Adjustable (Low) Pressure
for Comfortable Lift**

Variable Speed Treadmill

Therapist Arm Ports

Design Prevents Falling

**Advantages over Water Therapy
or Overhead Harness**

Applications

Walking Retraining

- Stroke
- Incomplete Spinal Cord Injury
- Hip/Knee Surgery Rehab

Exercise Therapy

- Obesity
- Neuropathy
- Balance Disorders

Commercial

Alter-G Inc (<http://www.alter-g.com/alterg/ad.aspx>)

G-Trainer, Alter-G Inc.

M300 Features

- Control unweighting from 100% to as low as 20% in 1% increments
- Allows full range of motion for upper and lower body
- Natural gait mechanics promote improved balance and strengthening
- Keeps user in place, supports laterally and prevents falls
- Highly comfortable at any level of partial weight-bearing for prolonged exercise
- Accommodates a wide range of body types (90 – 400 lbs)
- Easy-to-use controls for decrease/increase in body weight, speed and incline.

www.alter-g.com

Perspective

- Involve the client throughout the design process!
- Use the tools (SolidWorks, Skype, Internet, etc.).
- Review your notes and continue to learn.
- Work in a team – stay flexible - consult the experts.
- “Don’t bite off too much.”
- “Mt. Everest is climbed one step at a time.”
- “Never enough time to do it right – always enough time to do it over again.”
- “No quick and dirty – the *quick* is soon forgotten, and the *dirty* lives on and on.”
- Quotes mostly from Jim Anderson, Journeyman Experimental Machinist, champion rehab machinist.

Jim Anderson, Dave Jaffe, and Doug Schwandt with Ralph.
