Side View

Side View, Arms Up

Arms Up

Rear red lights on both sides when turned on. Left front control, blue lights - five when fully charged, with more use less lights lit

Both arms swing up for easy access. This shows one arm up

Front view, both arms down.

Front view, one arm up.

3 speeds & seat slide control on top, blue lights show battery strength

Right side with arm up showing the attachment used in vans, etc...

Foot plate comes up when not in use or for smaller storage needs, I put it up in my van.

Closer view of left control.

Right side with ergonomic control.

Closer view of front wheel.

There is a seat belt that is shown for placement here.

Closer view of rear lights, it is all red, but does not photograph that way when lit.

Nathan & the Whill

Abby Tamara

I have just gotten a new power chair. It is called a WHILL model M. WHILL is a Japanese company with the US headquarters in San Carlos, CA, about 10 miles from my home. Today the engineer from WHILL came over to fix something. We needed to take a few pictures of me on the WHILL. The temperature outside was 106° so we were only outside for a few minutes. The WHILL is 4 wheel drive, and will operate on most terrains.

Photos of the Whill Model M

Abby Tamara

The back of the WHILL Model M does have a hole in the plate that is attached to the seat. In the first picture of the back it shows part of the hole in white. That was a warranty when I first got the WHILL. I think that attachments go easier and stronger on the 2 side pieces attached to the back, but that is just my guess.

Buckles on My Service Dog, Nathan

Abby Tamara

The Service Dog provides balance and support by the recipient holding on to the harness. With arthritis, or different hand difficulties, the buckles that hold the harness on the Service Dog are difficult to work. The buckles attach by pinching one of the parts to fit in the other part. There are two buckles on the front piece, and one under the belly that attaches on the left side.

Flexi Attachment on a Power Wheelchair
