Lab Assignment 6:
Haplink Assembly

In this week's lab assignment, you will do assembly of the two-degree-of-freedom Haplink. By now, you have received all your Haplink components. (Note: If you were unable to print your Hapkit handle earlier, our Makerbot is once again available for printing. Please speak to Allison to arrange printing. This will not affect your Haplink assembly.)

Verify that you have all the parts listed at:
http://web.stanford.edu/class/me20n/labmaterials/HaplinkPartsList.pdf

Then, assemble your Haplink according to the instructions:
http://web.stanford.edu/class/me20n/labmaterials/haplink2-assembly.pdf

Please show your assembled Hapkit to Allison for check-off by the end of class on Thursday 11/2.
