\* See "Senate Reapportionment Review," Registrar's Office (1996-97 data)

\*\* Senate Charter mandates that no school have fewer than 2 seats, and that SLAC and the Special Unit have 1 seat.

\*\*\* School of Engineering could be rounded up to 11 seats, increasing total Senate seats to 56. The Senate XXX Steering Committee believes that this does not constitute "a major reason for change" and recommends that the present apportionment continue until the 10-year reapportionment review in 2003.
