

PESTICIDE DISCLOSURE NOTICE

Crane Pest Control has dedicated itself to providing pest control protection with the maximum degree of safety to the public and the environment. We were early subscribers to the concept of integrated urban pest management, seeking pest control methods which do not rely primarily upon the use of pesticides to achieve an acceptable level of protection from pests. However, insecticides, rodenticides, and other agents are still a component of most pest control programs. We recommend that you carefully read the following information now required by law.

“State law requires that you be given the following information: CAUTION – PESTICIDES ARE TOXIC CHEMICALS. Structural Pest Control Companies are registered and regulated by the Structural Pest Control Board and apply pesticides which are registered and approved for use by the California Department of Pesticide Regulation and United States Environmental Protection Agency. Registration is granted when the state finds that based on existing scientific evidence there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.”

“If within 24 hours following application you experience symptoms similar to common seasonal illness comparable to the flu, contact your physician or poison control center (800-523-2222) and your pest control company immediately.”

“For further information, contact any of the following: Crane Pest Control (415-922-1666) or appropriate agency listed on the reverse side.

The pesticides utilized on your property are specifically listed on a receipt form left after each application. For your information, they come from the following list: (Active ingredients are underlined, and common insecticide names follow.) Service is performed after an inspection and as necessary. *Refer to service contract for covered pests.*
