(Same as GERGEN 267.) Intersections between Freud's psychoanalysis of society and Paul's political theology. Emphasis is on the issues of law, love, justice, community, and language. Readings include Freud and Paul, and theoretical essays by Taubes, Badiou, Santner, Agamben, Assmann, Zizek, and Boyarin.

3-5 units, not given this year

OVERSEAS STUDIES COURSES IN GERMAN GENERAL

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BERLIN GERMAN GENERAL COURSES

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective

5 units, Spr (Junghanns, W)

OSPBER 177A. Culture and Politics in Modern Germany

4-5 units, Aut (Kramer, K)

GERMAN LANGUAGE (GERLANG) COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 17, 2008. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN GERMAN LANGUAGE

GERLANG 1. First-Year German, First Quarter
Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.
5 units, Aut (Nissler, P), Win (Strachota, K), Spr (Gruen, I)

GERLANG 2. First-Year German, Second Quarter
Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.
5 units, Aut (Nissler, P), Win (Nissler, P), Spr (Strachota, K)

GERLANG 3. First-Year German, Third Quarter
Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.
5 units, Aut (Gruen, I), Win (Nissler, P), Spr (Nissler, P)

GERLANG 5A. Intensive First-Year German, Part A
Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.
5 units, Sum (Petig, W)

GERLANG 5B. Intensive First-Year German, Part B
Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.
5 units, Sum (McQueen, K)

GERLANG 10. Elementary German for Seniors and Graduate Students
Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.
4 units, Win (Petig, W), Sum (Petig, W)

GERLANG 11P. Individually Programmed Beginning German
For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.
1-12 units, Aut (Petig, W), Win (Strachota, K), Spr (Strachota, K)

GERLANG 20A. Beginning German Conversation (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20B. Intermediate German Conversation (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20C. Advanced German Conversation (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20E. Fun Facts about Europe (AU)
1 unit, Win (McQueen, K)

GERLANG 20K. Küche Mitt (German Cooking Class) (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20M. Mitt Movie Series (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20P. Theme Projects (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 20T. Teaching German Conversation (AU)
1 unit, Aut (McQueen, K), Win (McQueen, K), Spr (McQueen, K)

GERLANG 21. Intermediate German I
Reading short stories, and review of German structure. Discussions in German, short compositions, videos.
4 units, Aut (Petig, W)

GERLANG 21S. Intermediate German
Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German; or equivalent of GERLANG 4; or AP German.
4 units, Sum (Petig, W)

GERLANG 21W. Intermediate German I: German for Business and International Relations
Equivalent to 21, but focus is on business and the political and economic geography of Germany. For students planning to do a business internship in a German-speaking country. Prerequisite: 3.
4 units, Aut (Petig, W)

GERLANG 22. Intermediate German II
Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context.
4 units, Win (Petig, W)

GERLANG 22W. Intermediate German II: German for Business and International Relations
Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W.
4 units, alternate years, not given this year

GERLANG 52. Readings in Humanities
For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.
4 units, Spr (Petig, W)

GERLANG 99. Language Specials
Prerequisite: consent of instructor.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years
Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit.
3-4 units, Spr (Strachota, K)

GERLANG 101. Advanced Language Study I
Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.
3-4 units, Aut (Tsui, C)

GERLANG 102. Advanced Language Study II
Continuation of 101.
3-4 units, Spr (Lee, S)

GERLANG 105. Advanced Business German
For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent.
4 units, Spr (Petig, W)

GERLANG 110. German Newspapers
For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit
3-4 units, not given this year

GERLANG 199. Individual Reading
Prerequisite: consent of instructor.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN GERMAN LANGUAGE

For graduate students only.

GERLANG 205A. Intensive First-Year German
Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units may take both courses for a total of 9 units.
4-5 units, Sum (Staff)

GERLANG 210. Elementary German for Graduate Students
Restricted to Stanford graduate students. Prerequisite: consent of instructor.
3-4 units, Sum (Staff)

GERLANG 395. Graduate Studies in German
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

GERLANG 399. Independent Study
Prerequisite: consent of instructor.
1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OVERSEAS STUDIES COURSES IN GERMAN LANGUAGE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BERLIN GERMAN LANGUAGE COURSES

OSPBER 1Z. Accelerated German: First and Second Quarters
8 units, Aut, Win (Splettstoesser, J; Wohlfeil, J)

OSPBER 2Z. Accelerated German, Second and Third Quarters
8 units, Spr (Wohlfeil, J)

OSPBER 21B. Intermediate German
5 units, Aut (Friesel, D), Win (Friesel, D), Spr (Friesel, D)

OSPBER 100B. Aktives Deutsch
2 units, Aut (Friesel, D), Win (Friesel, D), Spr (Strube, F)

OSPBER 101B. Advanced German
5 units, Aut (Biege, M), Win (Biege, M), Spr (Biege, M)

GERMAN LITERATURE (GERLIT) COURSES

These courses typically require knowledge of German. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in German, see the "German" section of this bulletin. For courses in German language instruction, see "German Language" courses section of this bulletin.

UNDERGRADUATE COURSES IN GERMAN LITERATURE

GERLIT 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings
(F,Sem Same as MUSIC 16N.) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom
3 units, Spr (Grey, T)

GERLIT 121. Hannah Arendt
One of the most important political thinkers on the epochal events in the 20th century. Her central concepts and ideas such as her notion of totalitarianism and its origins, the banality of evil, the life of the mind, and the idea of revolution. Her reflections on art, literature, and history. GER:DB-Hum
3-5 units, Win (Engel, A)

GERLIT 127. Uncanny Literature in the Nineteenth Century
From ghost children and animated statues, the walking dead to machine women and doppelgangers, 19th-century German literature teems with things that go bump in the night. The history of this tradition of fantastic literature in Germany, its origins, main authors, and defining features. Authors include E.T.A. Hoffmann, Wilhelm Hauff, Friedrich Schiller, Joseph von Eichendorff and Jeremias Gotthelf. Readings and writing in German. GER:DB-Hum, WIM
4 units, Win (Daub, A)

GERLIT 127A. German Sports Movies
How sports movies represent changing body cultures and conceptions of sports and media, and allow a glimpse into the life of German societies and history since the 20s. Sports include alpinism, boxing, cycling, football (soccer), gymnastics, track and field, and volleyball. Movies in German.
3 units, Aut (Junghanns, W)

GERLIT 130A. Pop Literature in the Federal Republic of Germany
Peter Handke's protest against Gruppe 47's defining power; Rolf Dieter. Brinkmann's connection with Leslie Fiedler (acceptance of mass culture) and the aesthetic orientation of the beat generation. The establishment of a counter-counterculture in the 80s, pop music as a German version of new journalism, the narrative tradition in the wake of Raymond Chandler, the impact of disk jockey culture in the 90s, and the cataloging and archiving of media and youth culture. GER:DB-Hum
4 units, Spr (Staff)

GERLIT 131. Goethe: Poetic Vision and Vocation in the Age of Reason
Introduction to Goethe's major works, reading across genres of poetry, drama, the novel, and autobiography; critical writings on art, nature, and aesthetics. Central trends in Goethe's thought; the interrelatedness of poetic vision and philosophical thinking in his works. Goethe in relation to other intellectual and philosophical movements of the period, including romanticism. GER:DB-Hum
3-5 units, Win (Shamel, M)

GERLIT 131A. Immigrant/Minority Literature and the Emergence of Multiculturalism in Germany
Immigrant culture and literature in Germany across genres, including stories, drama, memoirs, and film. What do immigrants in Germany write about? What role does immigrant literary culture play in the formation of notions of cultural difference and dialogue? How do the dynamics of ethnic and cultural diversity influence concepts and notions of culture and nationhood in Germany? GER:DB-Hum
3 units, Aut (Shamel, M)

GERLIT 131B. German Lyric and the Oriental Tradition
How the translation of Oriental poetry and poetics into German in the late 18th and early 29th centuries inspired poetry incorporating Oriental models by writers such as Goethe, Rückert, Platen, and Heine. German translations of Oriental poets and writers. Poetry as a transcultural and crosstemporal phenomenon.The lyric's relationship to music in the context of Germany and the Orient. GER:DB-Hum
3-5 units, Spr (Shamel, M)

GERLIT 132. German Sports Culture
Peculiarities of sports in Germany as a point of access to past and present German culture. Concepts of competition and performance; relations between sports and politics in different periods of modern German history. Sources include theoretical and literary texts in English and German, and media representations of athletic contests. GER:DB-Hum
5 units, Aut (Junghanns, W)

GERLIT 133C. German Romanticism
(Same as GERLIT 233.) The literary and theoretical innovations of early Romanticism, and works from the later phase. In German. GER:DB-Hum
3-5 units, not given this year

GERLIT 133F. German Self-Understandings: Between Culture and Civilization
(Same as GERLIT 233F.) German-language writers' attempts to come to terms with German culture from 1800. Visions of a national *Kultur* in opposition to the universalistic civilization of modernity; the role of language and the arts in this ideal; the emergence of militant nationalism and attempts to counter this tendency with enlightened patriotism; and the quandaries of postwar and post-1989 German self-understanding. GER:DB-Hum
3-5 units, not given this year

GERLIT 135. Literature and the Limits of Self-Determination: Introduction to 19th-Century German Prose
Works registering a heightened sense of the precarious position of the modern individual including Goethe, Kleist, Buechner, Nietzsche, Freud, Mann, and Kafka. In German; attention to improvement of linguistic skills. WIM GER:DB-Hum
4 units, not given this year

GERLIT 136. Berlin Topographies in the 20th Century
Development of Berlin's spatial imaginaries from the boulevards of the late 19th century to the Weimar Republic's urban agendas, and to the repeated reconstructions by the Nazis, the GDR and Berlin Republic. Sources: Walter Benjamin, Siegfried Kracauer, Berthold Brecht, Peter Weiss, Mascha Kaleko, Peter Schneider, Blixa Bargeld, Wolf Biermann, Christoph Hein, Monika Maron, Thomas Hettche, and Wim Wenders. In German. GER:DB-Hum
4 units, Aut (Daub, A)

GERLIT 137. Introduction to German Poetry
Major poets writing in German including Gryphius, Goethe, Hölderlin, Novalis, Eichendorff, Heine, Rilke, Lasker-Schüler, Trakl, Benn, Celan, Brecht, Enzensberger, and Falkner. Close reading technique. Interpretive tools and theoretical concepts. Poetic form, voice, figural language, and the interaction of sensory registers. In German. GER:DB-Hum, WIM
4 units, Aut (Dornbach, M)

GERLIT 138. Introduction to Germanic Languages
(Same as GERGEN 38A.) The oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and literature. GER:DB-Hum
4 units, Win (Robinson, O)

GERLIT 139. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries
(Same as GERLIT 339.) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German. GER:DB-Hum
3-5 units, not given this year

GERLIT 140. Postcolonialism and German Literature
Goal is to re-read texts without the constraints of political correctness. Colonial and gender discourse, ambivalence towards foreigners from outside Europe: between desire and fear (Heinrich von Kleist, Theodore Storm, Theodore Fontane); colonialism as a system of repression (Franz Kafka); the third world and the literary left (Peter Weiss, Heiner Müller); drawing parallels between colonial history and National Socialism (Sebald); post-Communist migration discourse (Hans Magnus Enzensberger) and German-Turkish literature (Feridun Zaimoglu). GER:DB-Hum
4 units, Spr (Staff)

GERLIT 147. The Avant Garde
(Same as GERLIT 247.) What happens to art in an age of movies, machines, and two world wars? Who is still making it, and why? What does the avant garde actually mean, and to whom? What are the techniques that distinguish it, in the minds of its most revolutionary practitioners, from all that came before? And why should people care about these techniques today? German materials explored in a wider European context, with emphasis on the avant garde movements of France and Russia. GER:DB-Hum
3-5 units, Win (Pourciau, S)

GERLIT 148. Heart to Heart: Theories of Expression at the Turns of Two Centuries
(Same as GERLIT 248.) Paradigms of expression around 1800 and 1900, from Empfindsamkeit (sensibility) to German Expressionism. The heart that overflows into speech in the works of Klopstock, Goethe, Tieck, and Kleist, and the reformulation a century later of this idea as avant garde practice and modernist credo. Readings of poets, philosophers, and artists on relationships between inside and out, heart and voice, emotion and language, and self and art. Discussion in English. GER:DB-Hum
3-5 units, not given this year

GERLIT 151. German Underworlds
(Same as GERLIT 251.) German theories about what lies beneath: is it hell or the subterranean foundations that keep the world from collapsing? Cosmic architecture and the question of the inferno in Kant, Novalis, Wagner, Marx, Freud, Kafka, and the films of Fritz Lang.
3-5 units, not given this year

GERLIT 163. Readings in 19th-Century German Literature
(Same as GERLIT 263.) Works by Goethe, Tieck, Kleist, Hoffmann, Heine, Büchner, Grillparzer, Droste-Hülshoff, Stifter, and Keller. Their divergent responses to artistic, ethical, and political challenges of modernity. Prerequisite: GERLANG 3 or equivalent. In German. GER:DB-Hum
4 units, not given this year

GERLIT 189A. Honors Research
Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

GERLIT 189B. Honors Research
Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

GERLIT 195. The Culture of Reason and its Discontents: Introduction to Modern German Intellectual History
(Same as GERLIT 295.) Characteristics of modernity such as rational self-legislation, growing separation of spheres of life, and liberating and disorienting loss of traditional frameworks of meaning. Texts include Kant, Schiller, Marx, Nietzsche, Weber, Adorno, and Horkheimer. Discussion and written work in English. Students may read texts in translation; assistance provided to those reading in German. GER:DB-Hum
4 units, not given this year

GERLIT 197. Theories of Art after Idealism
(Same as GERLIT 297.) Key responses to the failure of idealism to integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.
3-5 units, not given this year

GERLIT 199. Independent Reading
36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GERLIT 206. Narrative, Visuality, Memory
(Same as GERLIT 306.) Moments in the history of the relationship between verbal and visual: the classical ars memoriae; the ekphrasis debates of the 18th century; and the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winkelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, and Proust. GER:DB-Hum
3-5 units, not given this year

GERLIT 241. Deutsche Geistesgeschichte I: German Aesthetic Thought, 1790-1872
The seminal tradition of writing about art including the German idealists (Kant, Schelling, Hegel, and Schiller), romantics (Schlegel, Novalis, and Hoffmann), and Schopenhauer, Kierkegaard, and Nietzsche. In English. GER:DB-Hum
4 units, not given this year

GRADUATE COURSES IN GERMAN LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

GERLIT 158. German Dialects
(Same as GERLIT 258.) Linguistic characteristics of dialect areas. History of the study of language variation in Germany; traditional dialect grammars; dialect-geographical revolution; and insights of modern sociolinguistics. Sources include native speakers, professionally-made tapes with transcripts, and secondary readings.
3-4 units, not given this year

GERLIT 215. Gottfried Benn and Francis Ponge: Mid-20th-Century European Poetry and the Problem of the Referent
(Same as COMPLIT 215A, FRENGEN 215.) Comparative readings of the two poets in their respective national contexts, with attention to biographical and poetological frameworks. Canonic status and scholarly reception histories. Renewed interest in their work with

regard to their distinctive practices of connecting prosodic form and extra textual referents. Prerequisite: reading knowledge of German or French.

3-5 units, Aut (Gumbrecht, H)

GERLIT 233. German Romanticism
(Same as GERLIT 133C.) The literary and theoretical innovations of early Romanticism, and works from the later phase. In German.

3-5 units, not given this year

GERLIT 233F. German Self-Understandings: Between Culture and Civilization
(Same as GERLIT 133F.) German-language writers' attempts to come to terms with German culture from 1800. Visions of a national *Kultur* in opposition to the universalistic civilization of modernity; the role of language and the arts in this ideal; the emergence of militant nationalism and attempts to counter this tendency with enlightened patriotism; and the quandaries of postwar and post-1989 German self-understanding.

3-5 units, not given this year

GERLIT 246. Memory, History, and the Contemporary Novel
(Same as COMPLIT 221.) How the watershed events of the 20th century, the philosophic linguistic turn, and the debate regarding the end of history left their mark on the novel. How does the contemporary novel engage with the past? How does its interest in memory and history relate to late- or postmodern culture of time or to political and ethical concerns? Novels by Toni Morrison, W. G. Sebald, J. M. Coetzee, Kazuo Ishiguro, and A. B. Yehoshua; theoretical works by Nietzsche, Freud, Heidegger, Hannah Arendt, Walter Benjamin, Fredric Jameson, Paul Ricoeur Awishai Margalit, and Walter Benn Michaels.

3-5 units, Spr (Eshel, A; White, H)

GERLIT 247. The Avant Garde
(Same as GERLIT 147.) What happens to art in an age of movies, machines, and two world wars? Who is still making it, and why? What does the avant garde actually mean, and to whom? What are the techniques that distinguish it, in the minds of its most revolutionary practitioners, from all that came before? And why should people care about these techniques today? German materials explored in a wider European context, with emphasis on the avant garde movements of France and Russia.

3-5 units, Win (Pourciau, S)

GERLIT 248. Heart to Heart: Theories of Expression at the Turns of Two Centuries
(Same as GERLIT 148.) Paradigms of expression around 1800 and 1900, from Empfindsamkeit (sensibility) to German Expressionism. The heart that overflows into speech in the works of Klopstock, Goethe, Tieck, and Kleist, and the reformulation a century later of this idea as avant garde practice and modernist credo. Readings of poets, philosophers, and artists on relationships between inside and out, heart and voice, emotion and language, and self and art. Discussion in English.

3-5 units, not given this year

GERLIT 250A. Modern Drama
Problems of drama as genre, especially in relationship to problems of modernism. Transitions from classical and popular theater. New structures of action and conflict; epic theater; competition with film; transformed theatrical practices. Authors: Nestroy, Hauptmann, Hofmannsthal, Brecht, and Horvath. (Satisfied by enrollment in GERLIT 369 in 2008-09.)

3-5 units, not given this year

GERLIT 250B. German Romanticism and Its Repercussions
Works by Novalis, the Schlegel brothers, Tieck, Wackenroder, Hoffmann, Klingemann. Theory of the subject; transformative politics and conservative-religious retreat into inwardness; the fragment form and the novel; reflection, play, irony; the productive self-movement of language; the hieroglyph of nature; animating effects of Romantic desire and its impasses; interactions among literature, music, and painting. Ambivalent and critical responses to Romanticism (Hegel, Heine, Nietzsche) and recent revivals (Benjamin, Lacoue-Labarthe, Nancy, and Frank). Readings in German, discussion in English.

3-5 units, Win (Dornbach, M)

GERLIT 250C. Postwar German Culture and Thought: 1945 to the Present
How German culture and thought confronted the legacy of National Socialism, German guilt, and the possibility of a new beginning. German culture and the memory of communism (the German Democratic Republic) after 1989. Fiction of Thomas Mann, Gunter Grass, Alexander Kluge, and Hans Ulrich Treichel; poetry of Paul Celan and Ingeborg Bachmann; philosophical essays of Martin Heidegger, Theodor Adorno, Jürgen Habermas; films of Rainer Werner Fassbinder, Florian Henkel (*The Life of Others*), and Oliver Hirschbiegel (*Downfall*).

3-5 units, Spr (Eshel, A)

GERLIT 251. German Underworlds
(Same as GERLIT 151.) German theories about what lies beneath: is it hell or the subterranean foundations that keep the world from collapsing? Cosmic architecture and the question of the inferno in Kant, Novalis, Wagner, Marx, Freud, Kafka, and the films of Fritz Lang.

3-5 units, not given this year

GERLIT 255. Middle High German
Introduction to medieval German language and culture. Readings include Hartmann von Aue and Gottfried von Strassburg; genres include Minnesang, epic, and romance. Grammar review; emphasis is on rapid and accurate reading.

3-5 units, Win (Robinson, O)

GERLIT 256. Old High German
Introduction to the grammar and the texts of the earliest attested stage of high German

3-4 units, not given this year

GERLIT 257. Gothic
Introduction to the grammar, texts, and history of this earliest extensively-documented Germanic language, a relative of German and English. Issues surrounding the Germanic parent language.

4 units, not given this year

GERLIT 258. German Dialects
(Same as GERLIT 158.) Linguistic characteristics of dialect areas. History of the study of language variation in Germany; traditional dialect grammars; dialect-geographical revolution; and insights of modern sociolinguistics. Sources include native speakers, professionally-made tapes with transcripts, and secondary readings.

3-4 units, not given this year

GERLIT 263. Readings in 19th-Century German Literature
(Same as GERLIT 163.) Works by Goethe, Tieck, Kleist, Hoffmann, Heine, Büchner, Grillparzer, Droste-Hülshoff, Stifter, and Keller. Their divergent responses to artistic, ethical, and political challenges of modernity. Prerequisite: GERLANG 3 or equivalent. In German.

4 units, not given this year

GERLIT 295. The Culture of Reason and its Discontents: Introduction to Modern German Intellectual History
(Same as GERLIT 195.) Characteristics of modernity such as rational self-legislation, growing separation of spheres of life, and liberating and disorienting loss of traditional frameworks of meaning. Texts include Kant, Schiller, Marx, Nietzsche, Weber, Adorno, and Horkheimer. Discussion and written work in English. Students may read texts in translation; assistance provided to those reading in German.

4 units, not given this year

GERLIT 297. Theories of Art after Idealism
(Same as GERLIT 197.) Key responses to the failure of idealism to integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.

3-5 units, not given this year

GERLIT 298. Individual Work
Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GERLIT 306. Narrative, Visuality, Memory
(Same as GERLIT 206.) Moments in the history of the relationship between verbal and visual: the classical ars memoriae; the ekphrasis debates of the 18th century; and the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winkelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, and Proust.

3-5 units, not given this year

GERLIT 310. Theorizing Experience
The theoretical relevance of the category of experience (*Erfahring*). Key articulations including Hegel, Benjamin, Gadamer, and more recent authors. Topics such as: negativity in experience; the tension between internal and external standpoints; contrast between lived and interiorized experience; the character of aesthetic experience and its power to confront audiences with, or compensate them for, the experiential poverty brought on by modernity. In English.
3-5 units, not given this year

GERLIT 339. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries
(Same as GERLIT 139.) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German.
3-5 units, not given this year

GERLIT 369. Introduction to Graduate Studies: Criticism as Profession
(Same as COMPLIT 369, FRENGEN 369, ITALGEN 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.
5 units, Aut (Berman, R)

GERLIT 399. Independent Study
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GERLIT 400. Dissertation Research
For graduate students in German working on dissertations only.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OVERSEAS STUDIES COURSES IN GERMAN LITERATURE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BERLIN GERMAN LITERATURE COURSES

OSPBER 53. The Brothers Grimm and their Fairy Tales
4 units, Spr (Robinson, O)

OSPBER 101A. Contemporary Theater
5 units, Spr (Kramer, K)

GRADUATE SCHOOL OF BUSINESS (GSBGEN) COURSES

Only Stanford Introductory Seminars open to undergraduates are listed. See http://www.gsb.stanford.edu/ for additional information on the Graduate School of Business.

UNDERGRADUATE COURSES IN GRADUATE SCHOOL OF BUSINESS

GSBGEN 111Q. Seminar in Entrepreneurial Communication
Stanford Introductory Seminar. College campuses have been the incubators for thousands of new business ventures. What makes the difference between a successful entrepreneur and an initial failure: often not the quality of the idea, but rather the ability of the entrepreneurs to successfully communicate their vision to potential investors, employees, and customers. Successful and failed entrepreneurial communication. Basics of persuasive oral and written communication.
3 units, Spr (Schramm, J)

HEALTH RESEARCH AND POLICY (HRP) COURSES

For information on graduate programs in Health Research and Policy, see the "Health Research and Policy" section of this bulletin. Course and laboratory instruction in the Department of Health Research and Policy conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN HEALTH RESEARCH AND POLICY

HRP 89Q. Introduction to Crosscultural Issues in Medicine
Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Focus is on culturally unique and non-English speaking populations and developing interpersonal and communication skills with diverse ethnic groups. GER:EC-AmerCul
3 units, Win (Corso, I)

HRP 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN HEALTH RESEARCH AND POLICY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

HRP 207. Introduction to Concepts and Methods in Health Services and Policy Research I
Primarily for medical students in the Health Services and Policy Research scholarly concentration. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines.
2 units, Aut (Haberland, C)

HRP 208. Introduction to Concepts and Methods in Health Services and Policy Research II
Primarily for medical students in the Health Services and Policy Research scholarly concentration; continuation of 207. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines. Recommended: 207.
2 units, Win (Haberland, C)

HRP 209. FDA's Regulation of Health Care
(Same as LAW 458) Open to law and medical students; other graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.
2-3 units, Aut (Greely, H)

HRP 210. Health Law and Policy I
Open to Law and medical students and undergraduates by consent of instructor. Introduction to the American health care system; its legal and policy problems. Topics: special characteristics of medical care compared to other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.
3 units, alternate years, not given this year

HRP 211. Law and the Biosciences
(Same as LAW 368) Open to law and medical students; other graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in neuroscience, including effects upon law and society through improvements in predicting illnesses and behaviors, reading minds through neuroimaging, understanding responsibility and consciousness, treating criminal behavior, and cognitive enhancement. May be repeated for credit. (Semester schedule.)
3 units, Win (Greely, H)

HRP 212. Crosscultural Medicine
Interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Explicit and implicit cultural influences operating in formal and informal medical contexts.

3 units, Spr (Corso, I)

HRP 213. Research Protocol Development for Clinical and Translational Research
Primarily for medical students in the Clinical Research Scholarly concentration; open to graduate students except Epidemiology graduate students. Development of research questions and plans for statistical analysis. Study design, sample size and power calculations, and statistical analysis of study data. Analytic methods to carry out statistical power and sample size calculations. Prerequisites: 225, and 258 or 259, or consent of instructor.

2-3 units, not given this year

HRP 214. Scientific Writing
Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.

2-3 units, Win (Sainani, K)

HRP 215. Scientific Writing for Basic and Translational Scientists
Teaches students in the basic sciences how to write clearly, concisely, and effectively. Focuses on the process of writing and publishing a scientific manuscript. Not intended for epidemiology graduate students.

2-3 units, Aut (Sainani, K)

HRP 216. Analytical and Practical Issues in the Conduct of Clinical and Epidemiologic Research
Topics include: advanced aspects of study design and data analyses; development of health measurement instruments; methods of summarizing literature and quantifying effect sizes; and multivariable nature of health events in human populations. 3 units requires a term paper. Prerequisites: 225, and 258 or 259, or consent of instructor.

2-3 units, not given this year

HRP 220. Health Law and Policy II
(Same as LAW 314) Open to law and medical students; other graduate students by consent of instructor. Continuing survey of the American health care system; its legal and policy problems. Topics include end of life, reproductive rights, research ethics, the food and drug administration, and public health law. Prerequisite: Health Law and Policy I recommended.

3-4 units, not given this year

HRP 223. Epidemiologic Analysis: Data Management and Statistical Programming
The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required. (Balise)

2-3 units, Aut (Balise, R)

HRP 225. Design and Conduct of Clinical and Epidemiologic Studies
Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: 159/259 or equivalent, or consent of instructor.

3-4 units, Aut (Popat, R)

HRP 226. Advanced Epidemiologic and Clinical Research Methods
The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor. (Nelson)

3-4 units, Win (Nelson, L)

HRP 228. Genetic and Molecular Epidemiology
Design, analysis, and interpretation of studies of genetic risk factors for common diseases in human populations. Topics: heritability, detecting disease genes using family and population-based study designs, gene-environment interactions, pharmacogenetics, and genomics. Prerequisite: 225 or consent of instructor.

2 units, Sum (Sieh, W)

HRP 229. Chronic Disease Epidemiology
Descriptive epidemiology and sources of incidence and mortality data; biological bases of neurological, musculoskeletal, cardiovascular, and other chronic diseases except cancer; methodological issues relevant to chronic epidemiologic research; causal inference; major environmental risk factors; genetic susceptibility; and examples of current research and critiques of literature. Prerequisite: 225 or consent of instructor.

2-3 units, Spr (Popat, R)

HRP 230. Cancer Epidemiology
Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.

2-3 units, alternate years, not given this year

HRP 231. Epidemiology of Infectious Diseases
Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.

3 units. Win (Maldonado, Y; Parsonnet, J), alternate years, not given next year

HRP 236. Epidemiology Research Seminar
Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.

1 unit, Aut (Henderson, V), Win (Friedman, G), Spr (West, D)

HRP 238. Genes and Environment in Disease Causation: Implications for Medicine and Public Health
(Same as HUMBIO 159.) The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

2-3 units, Win (Popat, R)

HRP 239. Understanding Statistical Models and their Social Science Applications
(Same as EDUC 260X, STATS 209.) Statistical modeling in experimental and non-experimental settings, including misconceptions in social science applications such as causal models. Text is Statistical Models: Theory and Practice, by David Freedman. See http://www-stat.stanford.edu/~rag/stat209. Prerequisite: intermediate-level statistical methods including multiple regression, logistic regression, and log-linear models.

3 units, Win (Rogosa, D)

HRP 240. Rethinking International Health
(Same as MED 230.) Issues and players that shape international health today. How to develop a road map for thoughtful, responsible action. Topics include: the role of the physician and health care worker; health as a human right; successful interventions; children's and women's health; issues in immunization; economic development; and NGOs. Online interviews with influential leaders in international health.

2-3 units, Spr (Parsonnet, J)

HRP 251. Design and Conduct of Clinical Trials
The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and

endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.

3 units, Spr (Henderson, V; Lavori, P)

HRP 252. Outcomes Analysis
(Same as BIOMEDIN 251.) Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

3 units, Spr (Bhattacharya, J)

HRP 256. Economics of Health and Medical Care
(Same as BIOMEDIN 156, BIOMEDIN 256, ECON 126.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisites: ECON 50 and ECON 102A or equivalent statistics. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

HRP 258. Introduction to Probability and Statistics for Clinical Research
Open to medical and graduate students; required of medical students in the Clinical Research Scholarly Concentration. Tools to evaluate medical literature. Topics include random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis.

3 units, Spr (Sainani, K)

HRP 259. Introduction to Probability and Statistics for Epidemiology
Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.

4-5 units, Aut (Sainani, K)

HRP 260A. Workshop in Biostatistics
(Same as STATS 260A.) Applications of statistical techniques to current problems in medical science.

1-2 units, Aut (Olshen, R)

HRP 260B. Workshop in Biostatistics
(Same as STATS 260B.) Applications of statistical techniques to current problems in medical science.

1-2 units, Win (Olshen, R)

HRP 260C. Workshop in Biostatistics
(Same as STATS 260C.) Applications of statistical techniques to current problems in medical science.

1-2 units, Spr (Olshen, R)

HRP 261. Intermediate Biostatistics: Analysis of Discrete Data
(Same as BIOMEDIN 233, STATS 261.) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis
(Same as STATS 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Sainani, K)

HRP 280. Spanish for Medical Students
(Same as SPANLANG 121M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Aut (Staff)

HRP 281. Spanish for Medical Students
(Same as SPANLANG 122M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Win (Corso, I)

HRP 282. Spanish for Medical Students
(Same as SPANLANG 123M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, Spr (Corso, I)

HRP 283. Health Services Research Core Seminar
Presentation of research in progress and tutorials in the field of health services research.

1 unit, Aut (Haberland, C), Win (Haberland, C), Spr (Haberland, C)

HRP 290. Advanced Spanish Conversation
Oral language skills covering pediatric, gynecological, and other specialty exams; patient health education and counseling; and diseases such as diabetes, asthma, and TB. Prerequisite: Spanish proficiency or consent of instructor.

3 units, Aut (Corso, I), Win (Corso, I), Spr (Corso, I)

HRP 299. Directed Reading in Health Research and Policy
Epidemiology, health services research, preventive medicine, medical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HRP 351. Health Care Technology: From Innovators to Providers to Patients
(Same as GSBGEN 351.) How health care businesses use biotechnology, medical technology and information technology to improve patient outcomes and manage costs. New technologies commercialized by innovator biotech and pharmaceutical companies, device manufacturers, diagnostics developers, and health IT companies, and adopted by hospitals and physicians in patient care and paid for by third-party payers. Case studies: how innovators finance and manage new product development; clinical trial management and gaining regulatory approval; strategies to drive product adoption; business models to drive innovation; clinical and business models for adopting new technology; organizational change; criteria for reimbursement and coverage decisions; selective provider network design to manage added costs; and IT-intensive business models. Guest speakers and panelists.

4 units, Win (Zenios, S; Chess, R)

HRP 391. Political Economy of Health Care in the United States
(Same as MGTECON 331, PUBLPOL 231.) The economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients' bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries' health care systems evolved, and what the U.S. can learn from their experiences.

4 units, Spr (Kessler, D; Bundorf, M)

HRP 392. Analysis of Costs, Risks, and Benefits of Health Care
(Same as BIOMEDIN 432, MGTECON 332.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and

decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber, A; Owens, D)

HRP 399. Graduate Research
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HISTORY (HISTORY) COURSES

For information on undergraduate and graduate programs in the Department of History, see the "History" section of this bulletin.

HISTORY COURSE CATALOG NUMBERING SYSTEM

International Global, Thematic
Introductory Seminars: Freshmen, Sophomores: 95N
Lectures: 103E, 104,106A,B, 107
Colloquia: 201, 201A, 202, 205B, 206, 208B, 208S, 299X, 301, 304, 305, 305B, 306E, 307A, 308B, 309A, 337C, 399A
Research Seminars and Workshops: 209S, 401A,B

Ancient and Medieval Europe
Introductory Seminars: Freshmen, Sophomores: 12N
Sources and Methods Seminars: 16S
Lectures: 110A
Colloquia: 217A,B, 218A, 311F,G, 317A,B, 318A

Early Modern and Modern Europe
Introductory Seminars: Freshmen, Sophomores: 34N, 36N
Sources and Methods Seminars: 15S, 18S, 32S, 33S, 35S, 85S
Lectures: 110C, 132, 132A, 133B, 137, 137A, 138A,B, 140A
Colloquia: 225A, 227B, 230F, 232D, 233, 233B,G, 234A, 236A, 238K, 325A, 327B, 330, 330A, 331B, 332D, 332F, 333, 333B, 337
Research Seminars and Workshops: 430, 438

Eastern Europe, Russia, Eurasia
Introductory Seminars: Freshmen, Sophomores: 20Q, 22N
Sources and Methods Seminars: 21S
Lectures: 120A,B, 125
Colloquia: 221B, 223, 224B, 229, 321C, 322, 323, 323B, 324B,F, 329
Research Seminars and Workshops: 421A, 424C

History of Science
Introductory Seminars: Freshmen, Sophomores: 44N, 46N
Lectures: 140A
Colloquia: 242G, 243C, 243G, 243K, 332F, 343C, 343G

Africa
Introductory Seminars: Freshmen, Sophomores: 48Q
Sources and Methods Seminars: 48S
Lectures: 145B
Colloquia: 248S, 249, 345B, 346, 349
Research Seminars and Workshops: 448A,B

United States
Introductory Seminars: Freshmen, Sophomores: 36N, 38N, 52N, 54N
Sources and Methods Seminars: 56S, 57S
Lectures: 107, 150A,B,C, 151, 154, 163, 166
Colloquia: 201, 243K, 251G, 254, 255B,D, 256, 258, 260, 261, 265, 267E, 268E, 351A,C,E,F, 352B, 355D, 356, 358, 368E
Research Seminars and Workshops: 401A,B, 461A,B

Latin America
Lectures: 70, 170
Colloquia: 205B, 273B, 274A, 275F, 279A, 305B, 373B, 374A, 375F, 378A, 379A

Middle East
Introductory Seminars: Freshmen, Sophomores: xx
Sources and Methods Seminars: 49S
Lectures: 181B, 182
Colloquia: 281A,B, 282, 282A,B, 283, 287B, 381B, 382, 382 A,B, 387B

Jewish History
Sources and Methods Seminars: 85S
Lectures: 137
Colloquia: 287B, 337, 387B

Asia
Introductory Seminars: Freshmen, Sophomores: 90Q, 95N
Lectures: 193, 194B, 195, 196, 197, 198
Colloquia: 291D,E, 292, 293B,D, 294, 295F,J, 296, 296E, 390A, 391E, 392, 392F, 393A,B,D, 396E
Research Seminars and Workshops: 497A,B

UNDERGRADUATE COURSES IN HISTORY

HISTORY 12N. The Early Roman Emperors: HIstory, Biography, and Fiction
(F,Sem Same as CLASSHIS 37N.) Stanford Introductory Seminar. Preference to freshmen. The politics, drama, and characters of the period after the fall of the Roman Republic in 49 B.C.E. Issues of liberty and autocracy explored by Roman writers through history and biography. The nature of history writing, how expectations about literary genres shape the materials, the line between biography and fiction,and senatorial ideology of liberty. Readings include: Tacitus' *Annals*, Suetonius' *Lives of the Caesers*, and Robert Graves' *I Claudius* and episodes from the BBC series of the same title. GER:DB-Hum

3 units, Aut (Saller, R)

HISTORY 15S. Understanding Machiavelli: War, Women, and Politics
Focus is on the central works of Machiavelli including *The Discourses, The Prince, The Art of War,* and *The Mandragola*. Topics include: the rise of the Medici; the politics of Italian city states; the use of the classics in the Renaissance; humanism; the birth of the individual; Savonarola; torture in early modern Europe; gender and women in the writings of Machiavelli; and the Italian wars.

5 units, Aut (Bouley, B)

HISTORY 16S. Vikings, Crusaders, Kings: The Normans and the Expansion of Latin Christendom
Seafaring raiders became lords, princes, and crusaders during pivotal centuries in European history. Who were the Normans? How much did they retain a sense of their Viking roots? What kind of relationship did these warrior-aristocrats have with Christianity? How did the idea of Christendom develop through Western European encounters with the non-Latin peoples (Greeks, Muslims) of the Mediterranean? Sources include Beowulf, pro- and anti-Norman histories, Bayeux tapestry, Domesday book, crusading texts, saints' lives, and papal letters.

5 units, Spr (Miner, J)

HISTORY 18S. Mobility in France and the Self: People, Products, and Ideas in Motion
Development of the introspective self and the unity of the idea of France through transformations in movement. Early modern to contemporary. Topics include: the journeyman's tour de France; roads; war; the Enlightenment; early modern ocean transport; rural life; cartography; surrealist tourism; and protests. Texts and non-texts, including maps, posters, travel journals, statistics, and fictional works.

5 units, Spr (McDonough, K)

HISTORY 20Q. Russia in the Early Modern European Imagination
Stanford Introductory Seminar. Preference to sophomores. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. Prerequisite: PWR 1. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Kollmann, N)

HISTORY 21S. Nationalism and Communism in Eastern Europe, 1944-1953
E. European politics, cultures, and societies between WW II and the

death of Joseph Stalin. Topics: ethnic cleansing; retribution against Nazi collaborators; Communist seizures of power; the relationship between nationalism and communism; ways in which E. European societies were susceptible to communism; and whether it was inevitable that the region would form a Soviet-dominated, Communist bloc hostile to the West. Sources include photographs, newspapers, diplomatic records, memoirs, and film.

5 units, Win (Perez, D)

HISTORY 22N. Images and Practices of Violence in Early Modern Russian Art and Law

Stanford Introductory Seminar. Preference to freshmen. Myths and realities about violence in 15th-17th century Russia. While Muscovy is often considered a brutal and violent state, political ideology stressed piety, judicial practice routinely mitigated sentences, and artistic imagery never depicted graphic violence. Theories of iconography, ritual, and imagery and their reception by beholders; judicial and political practice; political ideology; social behavior; and comparisons to early modern Europe in art, violence, and the law. GER:DB-Hum

5 units, Spr (Kollmann, N)

HISTORY 32S. Discipline and Dirt: Urban Environments and Social Control in Modern Britain, 1800-1900

The disciplinary underbelly of liberal freedom in the modern world's first democracy. How is dirt a political problem, and what are its racial, sexual, and class dimensions? How do sewers, drains, and water closets function as disciplinary devices? How are urban environments rendered safe for democracy? How does power and social control operate in free societies? What are the connections among cultural practices, material environments, and political power? Focus is on Britain, with diversions into Europe and the Empire.

5 units, Win (Forth, A)

HISTORY 33S. The France of Louis XIV

Louis XIV's reign as the foundation of France's modern global eminence despite the imposition of governing practices that undermined France's chance of effective modernization. Sources include 17th-century documents and a computer simulation in game format to define the problems faced by the Sun King and his contemporaries in an era of economic, political, and social change. GER:DB-Hum, WIM

5 units, Win (Lougee Chappell, C)

HISTORY 34N. The European Witch Hunts

Stanford Introductory Seminar. Preference to freshmen. Witch trials, early modern demonology, and historians' interpretations. What was it about early modernity that fueled witch hunting? Forms of the supernatural in history, whether from the ordered world of organized religion, or frightening, uncontrolled, and dangerous. The idea of witchcraft; the fear that some people harm others supernaturally. Reformation era witch hunts conducted in a period of state building and scientific discovery and in violation of extant laws and procedures. GER:DB-Hum

4 units, Win (Stokes, L)

HISTORY 35S. The Specter of Female Power: Harpies, Harlots, and Hysterics in Revolutionary France, 1770-1871

How gender shaped French revolutionary events from the the Enlightenment to the Paris Commune. How feminine norms operated, and how real women fared, as salonnières, republican mothers, and Communard combatants. Sources include novels, cartoons, paintings, and memoirs. Cautionary tales about disordered feminity abounded, featuring harpies hungry for bread and blood, ennobled harlots plotting their next boudoir triumph, and religious hysterics conspiring against the Revolution.

5 units, Win (Summers, K)

HISTORY 36N. Gay Autobiography

Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender

4 units, Spr (Robinson, P)

HISTORY 38N. The Body

Stanford Introductory Seminar. Preference to freshmen. Cultural and social meanings of the body. How medicine, media, law, and culture construct changing ideals of the body. How to apply historical and feminist analyses to understand change and the difference that gender makes in the social and cultural construction of the body. Emphasis is on shifting historical ideals for female and male bodies, and the changing importance of body image in popular culture. Readings include girls' diaries, women's sports, masculinity in the media, sexual violence, and performing the body. GER:DB-Hum, EC-Gender

5 units, Spr (Freedman, E)

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering

Stanford Introductory Seminar. Preference to freshmen. Women's participation in science; women as objects of scientific research; gender in the culture of the sciences; and how gender analysis has changed science theory and practice. GER:DB-Hum, EC-Gender

4 units, Win (Schiebinger, L)

HISTORY 46N. Science and Magic

Stanford Introductory Seminar. Preference to freshmen. Key episodes in the intertwined histories of natural science and magic from the early modern period, and questions these episodes raise regarding the nature of scientific knowledge, its public image, and the modern role of magic in society. GER:DB-Hum

5 units, Win (Riskin, J)

HISTORY 48Q. South Africa: Contested Transitions

Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum

3 units, Win (Samoff, J)

HISTORY 48S. South Africa for Whom?: Nationalisms in 20th-Century South Africa

How did nationalist movements shape 20th-century S. Africa, and how did these movements relate to and inform each other? What were the limits of these nationalist projects? S. Africa as a laboratory for the development of nationalistic ideologies in the 20th century, focusing on the most significant nationalist movements (African, Afrikaner, and Zulu).

5 units, Spr (Jarvis, L)

HISTORY 49S. Slavery, Race, and Society in Islamic Africa and the Middle East from the 7th to 20th Centuries

Questions involving slavery and community identity in the Middle East and sub-Saharan Africa. Why are there still reports of slavery in some Muslim majority countries? How does slavery and race overlap in Muslim societies? During the rapid expansion of Islam from the Arabian Peninsula to Asia, Africa, and parts of Europe, Islamic concepts of universal brotherhood united ethnic groups and social classes; but the Muslim world experienced slave revolts and ethnic conflicts.

5 units, Aut (Hill, M)

HISTORY 52N. The Harlem Renaissance

Stanford Introductory Seminar. Preference to freshmen. The literary and artistic movement of the Harlem Renaissance in the context of broader transformations in American and African American culture in the 20s. Novels, poetry, plays, and critical essays by writers such as Langston Hughes, Zora Neale Hurston, Nella Larsen, Claude McKay, Wallace Thurman, and Alain Locke. The work of contemporary musicians, dancers, and visual artists. GER:DB-Hum

5 units, Win (Campbell, J)

HISTORY 54N. African American Women's Lives

Stanford Introductory Seminar. Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and

leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum

4-5 units, Aut (Hobbs, A)

HISTORY 56S. Crime Waves and Panics in the U.S. from Reconstruction to the War on Terror

Crime waves, real or imagined, have sparked the popular imagination throughout American history, but particularly after the Civil War. How debates over crime have shaped the boundaries of the nation and defined who can or cannot be a legitimate member of the national community. Topics include lynching, labor radicalism, the red scare, and the current War on Terror. Sources include speeches, newspaper articles, pamphlets, congressional testimony, movies, and popular literature.

5 units, Aut (Ponomarenko, M)

HISTORY 57S. Reconstructions: Nation Building in U.S. Foreign Policy, 1865-2009

U.S. campaigns to reconstruct foreign nations during and after wars in the American South, the Philippines, Japan, and Iraq. Topics include: ideas that shaped American policies; the influence of military capabilities, race, economics, culture, and the international system; why some reconstructions worked and some did not; experiences of the occupier and the occupied; how Americans applied lessons from one reconstruction to others; the significance of historical interpretation of foreign policy debates.

5 units, Win (Wilkins, C)

HISTORY 59. Introduction to Asian American History

The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

HISTORY 65. Introduction to Comparative Studies in Race and Ethnicity

(Same as CSRE 196C, ENGLISH 172D, PSYCH 155, SOC 146.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, given next year

HISTORY 70. Culture, Politics, and Society in Latin America

Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Staff)

HISTORY 85S. Jews, Christians and Muslims in a Mediterranean Port City: Salonica, 1821-1945

Ethnicity, identity, and urban space in Salonica during transformation from Ottoman Empire to Greek nation state. Sources include travel accounts, imperial edicts, treaties, consular reports, memoirs, fiction, newspapers, folktales, postcards, photographs, film, maps, songs, and recipes.

5 units, Aut (Naar, D)

HISTORY 90Q. Buddhist Political and Social Theory

Stanford Introductory Seminar. Preference to sophomores. Historical and textual roots, emphasizing Tibetan, Bhutanese, and Thai Buddhism. Society and polity in Buddhist thought, Buddhist spiritual, social, and political practice. The state, sovereignty, and the individual and society. Law. Buddhist economic theory, Gross National Happiness, and sustainable economy. The Buddhist critique of neoliberalism. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Mancall, M)

HISTORY 92A. The Historical Roots of Modern East Asia

(Same as HISTORY 392E.) Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire. GER:DB-SocSci, EC-GlobalCom

4-5 units, not given this year

HISTORY 95N. Mapping the World: Cartography and the Modern Imagination

Stanford Introductory Seminar. Preference to freshmen. Focus is on cutting-edge research. Topics: the challenge of grasping the globe as a whole; geography's roots in empire; maps as propaganda and as commodities; the cultural production of scale; and the cartography of imaginery worlds.Sources include resources in the Green Library Special Collections and in the Stanford Spatial History Lab. GER:DB-SocSci

5 units, Aut (Wigen, K)

HISTORY 102. The History of the International System

World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. WIM GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

HISTORY 103E. History of Nuclear Weapons

(Same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (Holloway, D)

HISTORY 104. Trials that Made History: Courtroom Martyrs and Villains from the Classical to Modern Period

Socrates, the Knights Templar, Galileo, Salem witchcraft, and the Scopes (monkey) trials. How trials reflect cultural conflicts and political climate. Tensions between individuals and the state and between science and religion that are evident in trials. The role of trials in public discourse. Trial as drama. Reading assignments are interdisciplinary and range from surviving trial transcripts to the work of literary scholars and filmmakers. GER:DB-Hum

5 units, Spr (Miller, K)

HISTORY 105. Gandhi, King, and Nonviolence

(Same as RELIGST 118.) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today. GER:DB-Hum

4 units, not given this year

HISTORY 106A. Global Human Geography: Asia and Africa

Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Lewis, M)

HISTORY 106B. Global Human Geography: Europe and Americas

Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Lewis, M)

HISTORY 107. Introduction to Feminist Studies

(Same as FEMST 101.) What is feminism and why does it matter today? Debates over the status and meaning of feminism in the 21st century. Feminist theories and practices across topics that intersect with gender inequality such as race, health, socioeconomics, sexual orientation, international perspectives, new media, civil rights, and political change. Perspectives from philosophy, education, visual culture, literary and ethnic studies, performance and expressive arts, and social sciences. GER:DB-SocSci, EC-Gender

5 units, Aut (Freedman, E)

HISTORY 110A. Europe from Late Antiquity to 1500

Focus is on religion and politics. Issues include: the rise of Christianity and its impact on Rome; transformations of Catholicism and its institutions including the impact of barbarian tribes and the struggle between church and state; antisemitism, heresy, Crusades, and inquisition; courtly love; and scholasticism. GER:DB-Hum, WIM

5 units, Win (Buc, P)

HISTORY 201. Introduction to Public History in the U.S.,19th Century to the Present
(Same as HISTORY 301.) Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. GER:DB-SocSci
4-5 units, Aut (McKibben, C)

HISTORY 201A. Spatial History: Concepts, Methods, Problems
(Same as HISTORY 401A.) Technical training in GIS, with modules taught by Stanford Spatial History Lab staff; conceptual work in the use of these techniques in spatial historical analysis. Students develop their own spatial history projects and produce beta versions of dynamic visualizations. GER:DB-SocSci
4-5 units, Aut (White, R; Frank, Z)

HISTORY 202. International History and International Relations Theory
(Same as HISTORY 306E, POLISCI 216E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci
5 units, Aut (Holloway, D)

HISTORY 203A. Theories of the State from the Ancient World to the Present
(Same as HISTORY 303A.) The development and contemporary condition of thinking about the state. Philosophic, rhetorical, and historical contexts. Aristotle's Politics; early modern theorists such as Machiavelli, Hobbes, and Rousseau; transformations of the idea through the French Revolution by Sieyes and Hegel; and problematizations of the ideas in the last century by Schmidt and Foucault. GER:DB-Hum
4-5 units, not given this year

HISTORY 204G. War, Culture, and Society in the Modern Age
(Same as HISTORY 304G.) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial

prejudice; the theory of just war and its practical implementation; and how wars are commemorated. GER:DB-SocSci

5 units, not given this year

HISTORY 205B. Quantitative Methods in Historical Research
(Same as HISTORY 305B.) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required. GER:DB-SocSci

4-5 units, Aut (Klein, H)

HISTORY 206. History and Geography of Contemporary Global Issues
The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations. WIM GER:DB-SocSci, WIM

5 units, Spr (Lewis, M)

HISTORY 208A. Science and Law in History
(Same as HISTORY 308A.) How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof.

4-5 units, not given this year

HISTORY 208B. Women Activists' Response to War
(Same as HISTORY 308B.) Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina. GER:DB-Hum, EC-Gender

4-5 units, Spr (Jolluck, K)

HISTORY 208S. The Politics of Retrospective Justice
Forms of injustice in history including slavery, genocide, ethnic cleansing, mass rape, forced religious conversion, and torture of prisoners. Mechanisms eveloped over the last century to define, deter, and alleviate the effects of such offenses, including war crimes tribunals, truth commissions, national apologies, and monetary reparations. Case studies chart the international field of retrospective justice, exploring the legal, political, and moral implications of confronting traumatic pasts. GER:DB-SocSci, WIM

5 units, Spr (Campbell, J)

HISTORY 209S. Research Seminar for Majors
Required of History majors. How to conduct original, historical research and analysis, including methods such as using the libraries and archives at Stanford and elsewhere, and working collaboratively to frame topics, identify sources, and develop analyses. Research paper. WIM

5 units, Spr (Riskin, J)

HISTORY 212. Holy Wars: Medieval Perspectives
(Same as HISTORY 312.) Cultural and societal factors at play in Christian holy war from late antiquity to the early modern era. Topics include: the Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor. GER:DB-Hum

4-5 units, not given this year

HISTORY 216A. Muslims and Infidels: Islam and the Crusades
(Same as HISTORY 316A.) The impact of the Crusades on the Muslim world and consciousness from the Middle Ages and to the present. Primary and secondary sources. Themes include: jihad; cultural interaction between Muslims and Christians in the Holy Land; and military, political, and ideological developments in the 12th and 13th centuries. Modern interpretations and debates about jihadist theology and global jihad. GER:DB-Hum

4-5 units, not given this year

HISTORY 217A. Poverty and Charity in Medieval Christianity, Judaism, and Islam
(Same as HISTORY 317A.) Topics include: Jewish, Christian, and Islamic theoretical discussions of poverty and charity; normative law versus actual practice; the voice of the poor in available source; and formal and informal institutions of charity in the medieval Mediterranean region. GER:DB-Hum

4-5 units, Aut (Miller, K)

HISTORY 217B. Land of Three Religions: Medieval Spain
(Same as HISTORY 317B.) The history of the Iberian peninsula from the Islamic conquest of 711 to the Christian expulsion of the Jews in 1492. Focus is on forms of confrontation, confluence, and hostile indifference among medieval Jews, Christians, and Muslims. What were undercurrents of aggression that gave rise to persecution of the other; what elements of commonality among groups gave rise to intellectual advancements? WIM

4-5 units, Win (Miller, K)

HISTORY 218A. Muslim Minorities in History
(Same as HISTORY 318A.) Muslim minorities under non-Muslim rule in different historical contexts configurationssuch as enclaves and diasporas, from the Middle Ages to the present. GER:DB-SocSci

4-5 units, Win (Miller, K)

HISTORY 221B. The Woman Question in Modern Russia
Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:DB-SocSci, EC-Gender

5 units, Win (Jolluck, K)

HISTORY 222. Honor, Law, and Modernity
How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state's relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment. GER:DB-Hum

5 units, not given this year

HISTORY 223. Art and Ideas in Imperial Russia
(Same as HISTORY 323.) Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia. GER:DB-Hum

4-5 units, Win (Crews, R)

HISTORY 224B. Modern Afghanistan
(Same as HISTORY 324B.) Politics, society, and culture in Afghanistan from the 19th century to the present. Topics include state building, tribal politics, Islamic law, geopolitics, the Taliban, and the post-Taliban disorder. GER:DB-SocSci

4-5 units, Aut (Crews, R)

HISTORY 227. East European Women and War in the 20th Century
(Same as HISTORY 327.) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation. GER:DB-SocSci, EC-Gender

5 units, not given this year

HISTORY 227B. Imperialism, the Media, and the Public Sphere
(Same as HISTORY 327B.) Focus is on late 19th and 20th centuries, including the postcolonial period. The role of journalists and other members of the media in creating the image of empire, in defending its legitimacy, and undermining its foundations. Topics include the technologies of communication that allowed information to flow between Europe and its imperial territories, and the relationships among imperial propoganda, colonial reportage, and anticolonial media campaigns. GER:DB-SocSci

4-5 units, Aut (Naranch, B)

HISTORY 228. Circles of Hell: Poland in World War II
(Same as HISTORY 328.) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society. GER:DB-SocSci

5 units, not given this year

HISTORY 229. Poles and Jews
(Same as HISTORY 329.) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today. GER:DB-Hum, DB-Hum, EC-GlobalCom

4-5 units, Spr (Jolluck, K)

HISTORY 230F. Self-Policing, Denunciation, and Surveillance in Modern Europe
How individual actions impact state machineries of power. The motives, pressures, and consequences of everyday collaboration from the French Revolution to Nazi Germany and Soviet bloc police states; popular outrage over such practices in the aftermath of these regimes. The phenomenon of anticipatory compliance, as people tended to perceive less freedom of action than actually existed, and the reciprocal intensification of real and imagined restrictions. The malleability of personal values and interests as represented in diaries, memoirs, secondary sources, and film; variety of individual and national responses.

5 units, Spr (Sheffer, E)

HISTORY 232D. Rome: The City and the World, 1350-1750
(Same as HISTORY 332D.) What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners. GER:DB-Hum, WIM

4-5 units, Win (Findlen, P)

HISTORY 232G. When Worlds Collide: The Trial of Galileo
(Same as HISTORY 332G.) Gateway course for History of Science and Medicine track. The 1633 condemnation by the Catholic Church of Galileo for believing the sun to be the center of the Universe, and its 1992 admission that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo's life and trial and related literature on Renaissance Italy. Historians' interpretations of the trial in relation to its documentation. WIM GER:DB-Hum

4-5 units, not given this year

HISTORY 233. Reformation, Political Culture, and the Origins of the English Civil War
(Same as HISTORY 333.) English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War. GER:DB-Hum

4-5 units, Spr (Como, D)

HISTORY 233B. Early Modern Sexualities
(Same as HISTORY 333B.) History of sexuality in early modern Europe. Normative sexuality, heterosexual transgressions, and minority sexualities. Theoretical approaches to and debates about the history of sexuality, in particular prior to the 19th century. Tools for critiquing the heteronormativity of early modern sources and for reading those sources for evidence of sexual diversity. Readings include monographs and primary sources. GER:DB-SocSci, WIM

4-5 units, Spr (Stokes, L)

HISTORY 233C. Two British Revolutions
(Same as HISTORY 333C.) Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II. GER:DB-Hum

4-5 units, not given this year

HISTORY 233F. Political Thought in Early Modern Britain
1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum

5 units, not given this year

HISTORY 233G. Catholic Politics in Europe, 1789-1992
What led to the creation of a specifically Catholic mass politics? How did these parties and movements interact with the Vatican and the wider Church? What accounts for political Catholicism's involvement in clerical-fascist states and its important role in shaping the EU? Sources focus on monographs. Research paper using primary sources. GER:DB-SocSci

5 units, Win (Ward, J)

HISTORY 234. Paris and Politics, 1600-2006
The emergence of the modern city of lights. Paris as a mirror of French politics: top down, capi-tal to country, center to periphery, noble to bourgeois to people. Sources include maps, art, music, essays, and memoirs.

5 units, not given this year

HISTORY 234A. Marie Antoinette on Trial
From her arrival at Versailles until the present. Her 1793 trial as merely the formal phase of the judgmental public scrutiny she endured. Historical and contemporary controversies over the character and symbolism of Marie Antoinette, and the insights they offer into the changing politics and culture of the 18th century. Sources include letters and memoirs, paintings, caricatures, celebrations, and libels. GER:DB-SocSci

5 units, Win (Lougee Chappell, C)

HISTORY 236. The Ethics of Imperialism
The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies. GER:DB-Hum

5 units, not given this year

HISTORY 236A. Nationalism, 1600 to the Present
Theory and practice of nationalism. What is the nation and how is it built? What is its relationship to the state? How do national movements adapt to changing ideological and geopolitical contexts? Case studies from nationalism's birthplace, Europe, and other regions. Sources include classic and recent scholarship, and primary sources by nationalists. GER:DB-SocSci

5 units, Aut (Ward, J)

HISTORY 238K. European Collaboration, Resistance, and Retribution: 1938-1948
Experiences of European populations under occupation or suzerainty during WW II. How did populations respond to an invader or hegemonic power such as Nazi Germany? What other options were open to them? How and why did postwar Europe judge their choices? Topics include high politics and individiual lives; sources include shcolarship and original documents. GER:DB-SocSci

5 units, Win (Ward, J)

HISTORY 239D. Capital and Empire
(Same as HISTORY 339D, HUMNTIES 191S.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development. GER:DB-SocSci

4-5 units, not given this year

HISTORY 239F. Empire and Information
(Same as HISTORY 339F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

HISTORY 241F. History of the Modern Fact
(Same as HISTORY 341F.) The early modern emergence and subsequent development and transformation of notions such as fact, evidence, experiment, demonstration, and objectivity that operate at the crux of modern science. Recent historical writing on the history of evidence, objectivity, and the modern fact. GER:DB-SocSci

4-5 units, not given this year

HISTORY 241G. History of the Senses
(Same as HISTORY 341G, STS 134, STS 234.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci

4-5 units, not given this year

HISTORY 241S. Science and Culture Wars
Social, cultural, and political conflicts over scientific theories, beginning with the trial of Galileo, often presented as clashes between modern science and religious or political ideology. The cultural engagement of the sciences through such moments of conflict.

5 units, not given this year

HISTORY 242A. What is Life? The History of a Question
(Same as HISTORY 342A, HUMNTIES 191R.) History of attempts to understand the nature of life and mind by comparing living creatures with artificial machines and material arrangements. Imitations of animal life and human thought and discussions of relations between creatures and contraptions from antiquity onward, with an eye toward providing historical depth to current attempts to simulate life and mind. GER:DB-Hum

4-5 units, not given this year

HISTORY 242G. Representing the World: Maps, Statistics, and Photography
How individuals, groups, and governments sought to understand and describe the world around them, and how to transmit that information to others. Sources include various forms of information technology. Recommended: background in modern European and Atlantic history. GER:DB-SocSci

5 units, Spr (Wolfenstein, G)

HISTORY 243C. 18th-Century Colonial Science and Medicine
(Same as HISTORY 343C.) The exchange of knowledge, technologies, plants, peoples, disease, and medicines. Focus is on French, British, and Dutch interests in the West Indies; examples from elsewhere. Sources include primary and secondary texts on voyaging, colonialism, slavery, and environmental exchange. GER:DB-SocSci

4-5 units, Spr (Schiebinger, L)

HISTORY 243G. Tobacco and Health in World History
(Same as HISTORY 343G.) GER:DB-SocSci

4-5 units, Aut (Proctor, R)

HISTORY 243K. Endangered Species
During the past four centuries, more than 700 species of plants and animals have gone extinct throughout the world. The political, scientific, legal, and environmental histories of endangered and extinct species. Focus is on examples from fish and wildlife in the American West, including the grizzly bear, California condor, Pacific salmon, and desert tortoise.

5 units, Win (Staff)

HISTORY 243S. Human Origins: History, Evidence, and Controversy
(Same as HISTORY 443A.) Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required. GER:DB-SocSci

4-5 units, not given this year

HISTORY 244C. The History of the Body in Science, Medicine, and Culture
(Same as HISTORY 444C.) The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic. GER:DB-SocSci, EC-Gender

4-5 units, not given this year

HISTORY 245E. Health and Society in Africa
(Same as HISTORY 347E.) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease. GER:DB-SocSci, EC-GlobalCom

4-5 units, not given this year

HISTORY 245G. Law and Colonialism in Africa
(Same as HISTORY 348D.) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases are a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority. WIM GER:DB-SocSci

4-5 units, not given this year

HISTORY 246S. Research Seminar: African Nationalism and Beyond
(Same as HISTORY 446A.) African intellectual, political, social and cultural institutions confronting issues of sovereignty, authority, heterarchy, and power during the 19th and 20th centuries. GER:DB-SocSci

4-5 units, not given this year

HISTORY 248. Islam in Africa
(Same as HISTORY 348.) Relations between African Muslims and the broader Islamic tradition over the last 1200 years. The roots of the Islamic tradition, its adoption, endogenization, and elaboration by African Muslims. The interplay of religion, politics, culture and society, and how tradition exercises influence even while being transformed. The worldviews and lives of African Muslims; how and why those worldviews and experiences changed. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

HISTORY 248S. African Societies and Colonial States
(Same as HISTORY 448A.) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter. GER:DB-SocSci, WIM

4-5 units, Win (Roberts, R)

HISTORY 249. History without Documents
(Same as HISTORY 349.) Can history be written about places and times for which are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art. GER:DB-Hum

4-5 units, Spr (Hanretta, S)

HISTORY 251. Creating the American Republic
Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.
5 units, not given this year

HISTORY 251G. Topics in Constitutional History
(Same as POLISCI 222S.) Ideas of rights in American history emphasizing the problem of defining constitutional rights, the free exercise of religion, freedom of expression, and the contemporary debate over rights talk and the idiom of human rights. GER:DB-SocSci, EC-AmerCul
5 units, Spr (Rakove, J)

HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
(Same as HISTORY 355.) For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis. GER:DB-SocSci
4-5 units, not given this year

HISTORY 254. Popular Culture and American Nature
Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum, WIM
5 units, Aut (White, R)

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice
The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*. GER:DB-Hum
5 units, not given this year

HISTORY 255B. Introduction to African and African American Studies
(Same as AFRICAAM 105, ENGLISH 143E.) Interdisciplinary. Central themes in African American culture and history related to race as a definitive American phenomenon. African survivals and interpretations of slavery in the New World, contrasting interpretations of the Black family, African American literature, and art. Possible readings: Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B. DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcolm X, Alice Walker, and bell hooks. Focus may vary each year. GER:DB-Hum, EC-AmerCul
5 units, Win (Elam, M; Carson, C)

HISTORY 255D. Racial Identity in the American Imagination
(Same as HISTORY 355D.) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. GER:DB-SocSci
4-5 units, Win (Hobbs, A)

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen
(Same as HISTORY 356.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. WIM GER:DB-SocSci, EC-GlobalCom
4-5 units, Win (Chang, G)

HISTORY 257. The Politics and Ethics of Modern Science and Technology
(Same as HISTORY 347, STS 221.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
4-5 units, not given this year

HISTORY 258. History of Sexuality in the U.S.
(Same as HISTORY 358. Formerly 265A.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Recent historical interpretations of sexual violence, emphasizing the intersections of gender and race in the construction of rape in early America and in Canada, the racialization of rape in the U.S., lynching and anti-lynching in the U.S., and feminist responses to sexual violence. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
4-5 units, Spr (Freedman, E)

HISTORY 259A. Poverty and Homelessness in America
Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. GER:DB-SocSci
5 units, not given this year

HISTORY 259B. Poverty and Homelessness in America II
Students participate in an internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through readings and discussions. Prerequisite: interview with instructor. Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Prerequisite: 259A.
3 units, not given this year

HISTORY 260. California's Minority-Majority Cities
Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. GER:DB-SocSci, EC-AmerCul
5 units, Spr (McKibben, C)

HISTORY 261. Race, Gender, and Class in Jim Crow America
How African American life and labor were redefined from 1890-1954. Topics include family life, work, leisure patterns, transnational relations, cultural expressions emphasizing literature and music, resistance and social activisim. Primary sources including visual materials, literature, and film; historical interpretations of the period. GER:DB-SocSci
5 units, Win (Hobbs, A)

HISTORY 264X. Chicana/o History
(Same as CHICANST 165A, CSRE 165A.) The history of Mexican-origin people in the U.S. from 1848 to the present. Mexican American experiences as integral to American history. Tthemes include the effects of conquest, patterns of migration, labor and the formation of social classes, racialization, gender roles, ideology, and political activism.
5 units, Aut (Staff)

HISTORY 265. Writing Asian American History
Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper. GER:DB-SocSci, EC-AmerCul
5 units, Win (Chang, G)

HISTORY 267E. Twentieth-Century American Politics
The intellectual underpinnings of movements such as progressivism, New Deal liberalism, and modern conservatism; how each translated belief into action. Focus is on primary sources. GER:DB-SocSci
5 units, Aut (Herzog, J)

HISTORY 268E. American Foreign Policy and International History, 1941-2009
(Same as HISTORY 368E.) Major events and interpretations from WW II to the war in Iraq. Issues of race, expansionism and power; nuclear weapons; and war. GER:DB-SocSci
4-5 units, Spr (Bernstein, B)

HISTORY 273. The European Expansion
(Same as HISTORY 373A.) The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
4-5 units, not given this year

HISTORY 273B. Latin American Societies The Public and the Domestic Domain
(Same as HISTORY 373B.) How Peru, Mexico, and Brazil experience the relationships between the public institutions and symbols (such as the state, church, and the private realm of house, family, and sexuality) and emotional culture. Central aspects of Latin American culture such as honor, paternalism, and servitude, and how they were related to different forms of social stratification, ethnic conflicts, marriage, kinship, and power.
4-5 units, Spr (Staff), given once only

HISTORY 274A. Representing Revolution: The Mexican Revolution in Crossdisciplinary Perspective
(Same as HISTORY 374A.) History and historiography of the Mexican Revolution and its aftermath, from interlocking disciplinary perspectives. The relationship between race, class, gender, and state formation in 20th-century Mexico. How the revolution has been studied by historians and represented in film and photography. GER:DB-SocSci
4-5 units, Spr (Staff)

HISTORY 275F. Social Change in Latin America Since 1900
(Same as HISTORY 375F, LATINAM 201, LATINAM 301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci
4-5 units, Aut (Klein, H)

HISTORY 279. Latin American Development: Economy and Society, 1800-2000
(Same as HISTORY 379.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom
4-5 units, not given this year

HISTORY 279A. Visual and Urban Culture of Modern Latin America
(Same as HISTORY 379A.) Historical and social construction of vision and urban culture in 19th- and 20th-century Latin America. Changes in visual practice over time; the relationship between the production and consumption of images; and the shifting ways in which social relations have been structured by visual practices in modern Latin America. Topics: the transition from colonial society to postcolonial republic; urbanization; the rise of the modern metropolis; modern ways of seeing; the building of and relationship between projects of power, accommodation, and resistance in a comparative and transnational perspective. GER:DB-SocSci
4-5 units, Spr (Staff)

HISTORY 281A. Twentieth-Century Iraq: A Political and Social History
The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context. GER:DB-SocSci
5 units, Spr (Kadhim, A)

HISTORY 281B. Modern Egypt
(Same as HISTORY 381B.) From just before the Napoleonic expedition of 1798 to the present. European imperialism, the political economy of cotton, rise of nationalism, gender and the nation, minorities, the coup of 1952, positive neutralism and the Cold War, and the neo-liberal reconstruction of Egypt. GER:DB-SocSci
4-5 units, Win (Beinin, J)

HISTORY 282. The United States and the Middle East since 1945
(Same as HISTORY 382.) Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself? GER:DB-SocSci, EC-GlobalCom
4-5 units, Aut (Beinin, J)

HISTORY 282A. State and Society in Modern Turkey
(Same as HISTORY 382A.) Turkey as a disputed successor to the Ottoman Empire, a buffer zone during the Cold War, an unsettled country between Europe and the Middle East, and a frequently interrupted fragile democracy. Themes: state-run developmentalism, modernization projects, social engineering, the dialectics between democracy and authoritarianism, invented national identities and histories, and secularism. Topics include transition from an empire to a nation state, political identities and ideologies, ethnic and religious conflicts, economic and social transformation, cultural formations, and foreign relations. GER:DB-SocSci
4-5 units, Aut (Yilmaz, H)

HISTORY 282B. Islamic Thought and Culture in the Premodern Middle East, 800-1800
(Same as HISTORY 382B.) Major intellectual and cultural currents across political, philosophical, literary, and religious traditions in social contexts from the rise of Islam to the advent of modernity. Focus is on the period when canons of Islamic thought and learning formed; Islamic diversity and universalism as sources of conflict and mediation in ideological conflicts; origins of lingering controversies and their social consequences; formation and defining features of disciplines and schools of thought; modes of production and transmission of knowledge; limits of intellectual freedom; and interaction with non-Islamic cultures. GER:DB-Hum
4-5 units, Win (Yilmaz, H)

HISTORY 282C. Environmental History of the Middle East
(Same as HISTORY 382C.) What can Middle East environmental history learn from a consideration of other regions? Major problems of the field, available sources, and directions for future research. Topics include Islam and the environment, animals, environmentalism, gardens, colonialism, disease, water and irrigation, and science and technology.
4-5 units, Spr (Mikhail, A)

HISTORY 283. The New Global Economy, Oil, and Islamic Movements in the Middle East
(Same as HISTORY 383.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci
4-5 units, Win (Beinin, J)

HISTORY 287B. International Law and the Palestinian-Israeli Conflict
(Same as HISTORY 387B.) Topics include international legal recognition of the right of Jews for a state; legal implications of defining Israel as a Jewish state; Arab-Palestinians and the right of return; practices of land expropriation within 1948 Israel; norms of international law applicable in the West Bank and Gaza; the legality of Jewish settlements in the West Bank and Gaza; the status of Jerusalem after 1967; international law and the Palestinian uprisings; the separation fence; legal status of the Gaza Strip after the disengagement. Background in Israeli or international law not required. GER:DB-SocSci
4-5 units, Aut (Holzman-Gazit, Y), given once only

HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times
(Same as HISTORY 391A.) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts. GER:DB-SocSci
4-5 units, not given this year

HISTORY 291B. The City in Imperial China
(Same as HISTORY 391B.) The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.
3-5 units, not given this year

HISTORY 291D. Traitors and Collaborators in Colonial History
The roles and problems of collaboration in the rise, sustenance, and fall of empires. Themes include conceptual definitions of collaboration and empire, collaboration of traditional elites, accommodation of religious communities, assimilation and collaboration, local intermediaries, and class and empire. Regional focus is East Asia; also cases from other colonial situations.
5 units, Aut (Moon, Y)

HISTORY 291E. Maps, Borders, and Conflict in East Asia
(Same as HISTORY 391E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci
4-5 units, Win (Wigen, K)

HISTORY 292. The Two Koreas
(Same as HISTORY 392.) Themes include historical and ideological origins of the division, the impact of the Japanese colonial rule, the Korean War, the ideas of key N. and S. Korean leaders, and the consolidation of the two different states after the Korean War. GER:DB-SocSci
4-5 units, Win (Moon, Y)

HISTORY 292D. Japan in Asia, Asia in Japan
(Same as HISTORY 392D.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia. GER:DB-SocSci, DB-SocSci, EC-GlobalCom
4-5 units, not given this year

HISTORY 293. Law and Society in Late Imperial China
(Same as HISTORY 392B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum
4-5 units, not given this year

HISTORY 293B. Homosexuality in Historical and Comparative Perspective
(Same as HISTORY 393B.) Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S.
4-5 units, Spr (Sommer, M)

HISTORY 293D. Empire and Cosmopolitanism: Traveling Ideas in Global Political Thought
(Same as HISTORY 393D.) GER:DB-SocSci
4-5 units, Spr (Kumar, A)

HISTORY 294. Liberalism and Violence: A Conceptual History
What place does violence have in modern political thought? Liberalism eschews violence, yet condones moral war. Marxism justifies revolutionary violence. Anticolonialism invokes insurgency. Gandhi seeks truth in nonviolent suffering. Can modern politics and life be grasped without reference to violence? How is violence related to law and justice? Is there a theology of violence? Liberalism and its critics: Agamben, Arendt, Benjamin, Derrida, Fanon, Foucault, Gandhi, Heidegger, Nietzche, Schmitt, and Sorel. Biopolitics, civil society, friend/enemy, sovereignty, terror, and strikes. GER:EC-EthicReas
5 units, Win (Kumar, A)

HISTORY 295F. Race and Ethnicity in East Asia
(Same as HISTORY 395F.) Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science. GER:DB-SocSci
4-5 units, Win (Mullaney, T)

HISTORY 295J. Chinese Women's History
The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women's studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? GER:DB-Hum, EC-Gender
5 units, Spr (Sommer, M)

HISTORY 296. Communism and Revolution in China
From the formation of the Chinese Communist Party (CCP) in 1921 through the 1949 founding of the People's Republic of China (PRC). Topics include: early theories of socialism in China; the relationship between Chinese communism and the Communist International and Soviet Union; agrarian reformulation of communism by Mao; the communist-nationalist civil war; the Communist Revolution of 1949; and the consolidation of communist power in the PRC. GER:DB-Hum, WIM
5 units, Spr (Mullaney, T)

HISTORY 296E. Contentious Identities: The Formation of Race, Ethnicity, and Nationhood in Modern Japan
(Same as HISTORY 396E.) Exclusion and assimilation of minority groups including Ainu, Burakumin, Okinawans, Koreans, and Taiwanese; how this process was related to the construction of national, racial, and ethnic self-understanding in modern Japan. Ethno-racial formation and nationalism in Japanese society. GER:DB-SocSci
4-5 units, Spr (Staff)

HISTORY 297J. Introduction to Bhutan Studies
Required of students enrolled in the Bing Overseas Studies seminar in Bhutan in June/July, 2008; open to others. History, society, and culture of Bhutan including Bhutanese Buddhism. Sources include films. Student research projects.
1-5 units, not given this year

HISTORY 299A. Senior Research I
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

HISTORY 299B. Senior Research II
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

HISTORY 299C. Senior Research III
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

HISTORY 299H. Junior Honors Colloquium
Required of junior History majors planning to write a History honors thesis during senior year.
1 unit, Win (Staff)

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute
May be repeated for credit.
1-4 units, Aut (Carson, C), Win (Carson, C), Spr (Carson, C)

HISTORY 299S. Undergraduate Directed Research and Writing
May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HISTORY 299W. Undergraduate Directed Writing
May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HISTORY 299X. Design and Methodology for International Field Research
(Same as HISTORY 399A.)
1 unit, Spr (Kollmann, N; Roberts, R)

GRADUATE COURSES IN HISTORY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

HISTORY 237B. Teaching the Unteachable: Teaching and Representing the Holocaust
(Same as EDUC 253X.) Theodore Adorno asked whether it was possible to write poetry after Auschwitz; whatever the answer, each year witnesses exponential growth in state-sponsored mandates to teach the Holocaust. How and to what end does catastrophe become curriculum? How to assess what students learn from these efforts. The Nazis' efforts to teach for hate, and contemporary parallels. Historical and educational sources, especially films and memoirs.
3-5 units, not given this year

HISTORY 301. Introduction to Public History in the U.S.,19th Century to the Present
(Same as HISTORY 201.) Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions.
4-5 units, Aut (McKibben, C)

HISTORY 303A. Theories of the State from the Ancient World to the Present
(Same as HISTORY 203A.) The development and contemporary condition of thinking about the state. Philosophic, rhetorical, and historical contexts. Aristotle's Politics; early modern theorists such as Machiavelli, Hobbes, and Rousseau; transformations of the idea through the French Revolution by Sieyes and Hegel; and problematizations of the ideas in the last century by Schmidt and Foucault.
4-5 units, not given this year

HISTORY 304. Approaches to History
Required of first-year History Ph.D. students.
4-5 units, Aut (Baker, K)

HISTORY 304G. War, Culture, and Society in the Modern Age
(Same as HISTORY 204G.) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated.
5 units, not given this year

HISTORY 305. Graduate Workshop in Teaching
Required of first-year Anthropology Ph.D. students. Teaching, lecturing, and curriculum development.
1 unit, Spr (Kollmann, N)

HISTORY 305B. Quantitative Methods in Historical Research
(Same as HISTORY 205B.) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required.
4-5 units, Aut (Klein, H)

HISTORY 306E. International History and International Relations Theory
(Same as HISTORY 202, POLISCI 216E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.
5 units, Aut (Holloway, D)

HISTORY 307A. Legal History Workshop
Faculty and students from the Law school and the History department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker's research. Undergraduates require consent of instructor.
4-5 units, Win (Kessler, A)

HISTORY 308A. Science and Law in History
(Same as HISTORY 208A.) How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof.
4-5 units, not given this year

HISTORY 308B. Women Activists' Response to War
(Same as HISTORY 208B.) Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.
4-5 units, Spr (Jolluck, K)

HISTORY 309A. Postcolonial Readings: History and Modernity after Europe
Where is the postcolony? How does it come to terms with empire and modernity, its fragmented speech and bodies? Can postcolonial histories be rearranged to critique empire and yet reclaim europe as an ethical other? How postcolonial readings change the ethics and politics of a critique of modernity. Theories of resistance, power, language, archive, and allegory. Tensions among nation, myth, community, and the subject. Eurocentrism in modern thought. What it means to purge Europe from modern consciousness.
4-5 units, Win (Kumar, A)

HISTORY 309E. History Meets Geography
Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.
4-5 units, not given this year

HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World
The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.
3-5 units, not given this year

HISTORY 311A. Family, Gender, and Production in Ancient Rome
(Same as CLASSGEN 220.) Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.
4-5 units, not given this year

HISTORY 311G. Big Ancient History
(Same as CLASSHIS 312.) How the shift away from thinking about European history in terms of a western civilization model toward embedding it in stories of how global history affects research and teaching on ancient Greece and Rome. Conventional, evolutionary, and global history narratives of the past 5,000 to 15,000 years and some new ideas about how Greco-Roman history might fit into different storylines.
4-5 units, Spr (Morris, I)

HISTORY 312. Holy Wars: Medieval Perspectives
(Same as HISTORY 212.) Cultural and societal factors at play in Christian holy war from late antiquity to the early modern era. The Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor.
4-5 units, not given this year

HISTORY 313. Core Colloquium in Medieval European History
4-5 units, not given this year

HISTORY 314. Graduate Core Colloquium in Medieval European History
4-5 units, not given this year

HISTORY 316A. Muslims and Infidels: Islam and the Crusades
(Same as HISTORY 216A.) The impact of the Crusades on the Muslim world and consciousness from the Middle Ages and to the present. Primary and secondary sources. Themes include: jihad; cultural interaction between Muslims and Christians in the Holy Land; and military, political, and ideological developments in the 12th and 13th centuries. Modern interpretations and debates about jihadist theology and global jihad.
4-5 units, not given this year

HISTORY 317. Medieval Seminar: Classics and Key Works
(Same as HUMNTIES 322.) Colloquium focused on key primary sources that allow entry into Medieval European culture. Readings include: Augustine, *On Christian Doctrine;* Gregory the Great, *Moralia on the Book of Job; Beowulf; the Song of Roland;* and Aquinas, *Summa Theologica*.
3-5 units, Spr (Buc, P)

HISTORY 317A. Poverty and Charity in Medieval Christianity, Judaism, and Islam
(Same as HISTORY 217A.) Topics include: Jewish, Christian, and Islamic theoretical discussions of poverty and charity; normative law versus actual practice; the voice of the poor in available source; and formal and informal institutions of charity in the medieval Mediterranean region.
4-5 units, Aut (Miller, K)

HISTORY 317B. Land of Three Religions: Medieval Spain
(Same as HISTORY 217B.) The history of the Iberian peninsula from the Islamic conquest of 711 to the Christian expulsion of the Jews in 1492. Focus is on forms of confrontation, confluence, and hostile indifference among medieval Jews, Christians, and Muslims. What were undercurrents of aggression that gave rise to persecution of the other; what elements of commonality among groups gave rise to intellectual advancements?
4-5 units, Win (Miller, K)

HISTORY 318A. Muslim Minorities in History
(Same as HISTORY 218A.) Muslim minorities under non-Muslim rule in different historical contexts configurationssuch as enclaves and diasporas, from the Middle Ages to the present.
4-5 units, Win (Miller, K)

HISTORY 321B. Imperial Russian Historiography
4-5 units, not given this year

HISTORY 321C. Historiography of the Soviet Union
Major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to postmodernist theories.
4-5 units, Win (Weiner, A)

HISTORY 322. Topics in Early Modern Russian History
4-5 units, Aut (Kollmann, N)

HISTORY 323. Art and Ideas in Imperial Russia
(Same as HISTORY 223.) Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.
4-5 units, Win (Crews, R)

HISTORY 323B. Research Methodologies in Early Modern Russian History
4-5 units, Win (Kollmann, N)

HISTORY 324B. Modern Afghanistan
(Same as HISTORY 224B.) Politics, society, and culture in Afghanistan from the 19th century to the present. Topics include state building, tribal politics, Islamic law, geopolitics, the Taliban, and the post-Taliban disorder.
4-5 units, Aut (Crews, R)

HISTORY 324F. The Caucasus and the Muslim World
The linkages connecting the societies of the Caucasus to Muslim communities in Iran, Russia, the Ottoman Empire and Turkey, S. Asia, and the Middle East.
4-5 units, Spr (Crews, R)

HISTORY 327. East European Women and War in the 20th Century
(Same as HISTORY 227.) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.
5 units, not given this year

HISTORY 327B. Imperialism, the Media, and the Public Sphere
(Same as HISTORY 227B.) Focus is on late 19th and 20th centuries, including the postcolonial period. The role of journalists and other members of the media in creating the image of empire, in defending its legitimacy, and undermining its foundations. Topics include the technologies of communication that allowed information to flow between Europe and its imperial territories, and the relationships among imperial propoganda, colonial reportage, and anticolonial media campaigns.
4-5 units, Aut (Naranch, B)

HISTORY 328. Circles of Hell: Poland in World War II
(Same as HISTORY 228.) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society.
5 units, not given this year

HISTORY 329. Poles and Jews
(Same as HISTORY 229.) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today.
4-5 units, Spr (Jolluck, K)

HISTORY 330. Core Colloquium on Early Modern Europe: Ancien Regime
Topics in the social, political, and religious history of Western Europe, 1550-1789, with an emphasis on France. May be repeated for credit.
4-5 units, Spr (Lougee Chappell, C)

HISTORY 330A. Core Colloquium on Early Modern Europe
Historiographical survey from the Renaissance to the Enlightenment. Topics include the Reformations, European expansion, state and nation building, invention and scientific discovery, intellectual history, and gender. In-depth reviews determined by student interests.
4-5 units, Aut (Stokes, L)

HISTORY 331B. Core Colloquium on Modern Europe: The 19th Century
The major historical events and historiographical debates of the long 19th century from the French Revolution to WW I.
4-5 units, Win (Sheehan, J)

HISTORY 331C. Core Colloquium on Modern Europe
The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.
4-5 units, not given this year

HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History

4-5 units, not given this year

HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy

Defining features of the world of Leonardo, Machiavelli, and Michelangelo. Intersections of history, politics, art, and literature. The relationship between the Renaissance and the Reformation.

4-5 units, not given this year

HISTORY 332D. Rome: The City and the World, 1350-1750

(Same as HISTORY 232D.) What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners.

4-5 units, Win (Findlen, P)

HISTORY 332F. The Scientific Revolution

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

4-5 units, Aut (Riskin, J)

HISTORY 332G. When Worlds Collide: The Trial of Galileo

(Same as HISTORY 232G.) Gateway course for History of Science and Medicine track. The 1633 condemnation by the Catholic Church of Galileo for believing the sun to be the center of the Universe, and its 1992 admission that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo's life and trial and related literature on Renaissance Italy. Historians' interpretations of the trial in relation to its documentation. WIM

4-5 units, not given this year

HISTORY 333. Reformation, Political Culture, and the Origins of the English Civil War

(Same as HISTORY 233.) English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War.

4-5 units, Spr (Como, D)

HISTORY 333B. Early Modern Sexualities

(Same as HISTORY 233B.) History of sexuality in early modern Europe. Normative sexuality, heterosexual transgressions, and minority sexualities. Theoretical approaches to and debates about the history of sexuality, in particular prior to the 19th century. Tools for critiquing the heteronormativity of early modern sources and for reading those sources for evidence of sexual diversity. Readings include monographs and primary sources.

4-5 units, Spr (Stokes, L)

HISTORY 333C. Two British Revolutions

(Same as HISTORY 233C.) Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.

4-5 units, not given this year

HISTORY 334. Enlightenment Seminar

(Same as HUMNTIES 324.) The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

3-5 units, Win (Baker, K)

HISTORY 335. History of European Law, Medieval to Contemporary

(Same as HISTORY 135.) From the fall of the Roman Empire to the establishment of the EU. How law changed over time. Sources and nature of law, organization of legal systems, and relationships between law and society, law and lawmaker, law and the legal professions.

5 units, not given this year

HISTORY 336. Modern France

(Daughton)

4-5 units, not given this year

HISTORY 336E. Violence in History and Theory

Methodological challenges associated with defining and analyzing violence in late-19th- and 20th-century contexts. How people witnessed, coped with, and survived violent episodes. Cases of state violence, ethnic and religious conflict, warfare, genocide, and decolonization. The notion of everyday suffering in the contemporary world. Sources include anthropology, sociology, and history.

4-5 units, not given this year

HISTORY 337. The Holocaust

(Same as HISTORY 137.) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.

4-5 units, Spr (Felstiner, M)

HISTORY 337C. Memory, History, and Education

(Same as EDUC 356.) Interdisciplinary. Since Herodotus, history and memory have competed to shape minds: history cultivates doubt and demands interpretation; memory seeks certainty and detests that which thwarts its aims. History and memory collide in modern society, often violently. How do young people become historical amidst these forces; how do school, family, nation, and mass media contribute to the process?

3-5 units, Spr (Wineburg, S)

HISTORY 338A. Modern Britain: Facing Europe and Empire, Part I

Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

4-5 units, not given this year

HISTORY 338B. Modern Britain, Part II

Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.

4-5 units, not given this year

HISTORY 339D. Capital and Empire

(Same as HISTORY 239D, HUMNTIES 191S.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.

4-5 units, not given this year

HISTORY 339F. Empire and Information

(Same as HISTORY 239F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

4-5 units, not given this year

HISTORY 341F. History of the Modern Fact

(Same as HISTORY 241F.) The early modern emergence and subsequent development and transformation of notions such as fact, evidence, experiment, demonstration, and objectivity that operate at

the crux of modern science. Recent historical writing on the history of evidence, objectivity, and the modern fact.

4-5 units, not given this year

HISTORY 341G. History of the Senses
(Same as HISTORY 241G, STS 134, STS 234.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation.

4-5 units, not given this year

HISTORY 342A. What is Life? The History of a Question
(Same as HISTORY 242A, HUMNTIES 191R.) History of attempts to understand the nature of life and mind by comparing living creatures with artificial machines and material arrangements. Imitations of animal life and human thought and discussions of relations between creatures and contraptions from antiquity onward, with an eye toward providing historical depth to current attempts to simulate life and mind.

4-5 units, not given this year

HISTORY 343C. 18th-Century Colonial Science and Medicine
(Same as HISTORY 243C.) The exchange of knowledge, technologies, plants, peoples, disease, and medicines. Focus is on French, British, and Dutch interests in the West Indies; examples from elsewhere. Sources include primary and secondary texts on voyaging, colonialism, slavery, and environmental exchange.

4-5 units, Spr (Schiebinger, L)

HISTORY 343G. Tobacco and Health in World History
(Same as HISTORY 243G.)

4-5 units, Aut (Proctor, R)

HISTORY 345A. Core Colloquium: Precolonial Africa

4-5 units, not given this year

HISTORY 345B. African Encounters with Colonialism

4-5 units, Aut (Roberts, R)

HISTORY 346. The Dynamics of Change in Africa
(Same as AFRICAST 301A.) Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Addresses critical issues in African Studies by exploring intersections of the organization of power, structure of the economy, and patterns of social stratification. Interpretive debates on Africa's engagement with the slave trade, impact of colonialism, decolonization, democratization and civil wars, health and society, and Africa's engagement with globalization. The process of knowledge production and its social location, and the current state of knowledge.

4-5 units, Aut (Roberts, R)

HISTORY 347. The Politics and Ethics of Modern Science and Technology
(Same as HISTORY 257, STS 221.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university.

4-5 units, not given this year

HISTORY 347E. Health and Society in Africa
(Same as HISTORY 245E.) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease.

4-5 units, not given this year

HISTORY 348. Islam in Africa
(Same as HISTORY 248.) Relations between African Muslims and the broader Islamic tradition over the last 1200 years. The roots of the Islamic tradition, its adoption, endogenization, and elaboration by African Muslims. The interplay of religion, politics, culture and society, and how tradition exercises influence even while being transformed. The worldviews and lives of African Muslims; how and why those worldviews and experiences changed.

4-5 units, not given this year

HISTORY 348D. Law and Colonialism in Africa
(Same as HISTORY 245G.) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases are a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.

4-5 units, not given this year

HISTORY 349. History without Documents
(Same as HISTORY 249.) Can history be written about places and times for which are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art.

4-5 units, Spr (Hanretta, S)

HISTORY 351A. Core in American History, Part I

4-5 units, Aut (Rakove, J)

HISTORY 351B. Core in American History, Part II

4-5 units, not given this year

HISTORY 351C. Core in American History, Part III

4-5 units, Win (Campbell, J)

HISTORY 351D. Core in American History, Part IV

4-5 units, not given this year

HISTORY 351E. Core in American History, Part V

4-5 units, Spr (Camarillo, A)

HISTORY 351F. Core in American History, Part VI

4-5 units, Spr (Bernstein, B)

HISTORY 352B. History of American Law
(Same as LAW 318.) Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society.

5 units, Win (Gordon, R)

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
(Same as HISTORY 252.) For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis.

4-5 units, not given this year

HISTORY 355D. Racial Identity in the American Imagination
(Same as HISTORY 255D.) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music.

4-5 units, Win (Hobbs, A)

HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen
(Same as HISTORY 256.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. WIM

4-5 units, Win (Chang, G)

HISTORY 358. History of Sexuality in the U.S.
(Same as HISTORY 258. Formerly 265A.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Recent historical interpretations of sexual violence, emphasizing the intersections of gender and race in the construction of rape in early America and in Canada, the racialization of rape in

the U.S., lynching and anti-lynching in the U.S., and feminist responses to sexual violence. Prerequisite: consent of instructor.

4-5 units, Spr (Freedman, E)

HISTORY 368E. American Foreign Policy and International History, 1941-2009

(Same as HISTORY 268E.) Major events and interpretations from WW II to the war in Iraq. Issues of race, expansionism and power; nuclear weapons; and war.

4-5 units, Spr (Bernstein, B)

HISTORY 373A. The European Expansion

(Same as HISTORY 273.) The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

4-5 units, not given this year

HISTORY 373B. Latin American Societies The Public and the Domestic Domain

(Same as HISTORY 273B.) How Peru, Mexico, and Brazil experience the relationships between the public institutions and symbols (such as the state, church, and the private realm of house, family, and sexuality) and emotional culture. Central aspects of Latin American culture such as honor, paternalism, and servitude, and how they were related to different forms of social stratification, ethnic conflicts, marriage, kinship, and power.

4-5 units, Spr (Staff), given once only

HISTORY 374A. Representing Revolution: The Mexican Revolution in Crossdisciplinary Perspective

(Same as HISTORY 274A.) History and historiography of the Mexican Revolution and its aftermath, from interlocking disciplinary perspectives. The relationship between race, class, gender, and state formation in 20th-century Mexico. How the revolution has been studied by historians and represented in film and photography.

4-5 units, Spr (Staff)

HISTORY 375F. Social Change in Latin America Since 1900

(Same as HISTORY 275F, LATINAM 201, LATINAM 301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students.

4-5 units, Aut (Klein, H)

HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern

(Same as POLISCI 346S.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, not given this year

HISTORY 378E. Political Economy of Development

(Same as POLISCI 440B.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000

(Same as HISTORY 279.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice.

4-5 units, not given this year

HISTORY 379A. Visual and Urban Culture of Modern Latin America

(Same as HISTORY 279A.) Historical and social construction of vision and urban culture in 19th- and 20th-century Latin America. Changes in visual practice over time; the relationship between the production and consumption of images; and the shifting ways in which social relations have been structured by visual practices in modern Latin America. Topics: the transition from colonial society to postcolonial republic; urbanization; the rise of the modern metropolis; modern ways of seeing; the building of and relationship between projects of power, accommodation, and resistance in a comparative and transnational perspective.

4-5 units, Spr (Staff)

HISTORY 381B. Modern Egypt

(Same as HISTORY 281B.) From just before the Napoleonic expedition of 1798 to the present. Topics: European imperialism, the political economy of cotton, rise of nationalism, gender and the nation, minorities, the coup of 1952, positive neutralism and the Cold War, and the neo-liberal reconstruction of Egypt.

4-5 units, Win (Beinin, J)

HISTORY 382. The United States and the Middle East since 1945

(Same as HISTORY 282.) Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?

4-5 units, Aut (Beinin, J)

HISTORY 382A. State and Society in Modern Turkey

(Same as HISTORY 282A.) Turkey as a disputed successor to the Ottoman Empire, a buffer zone during the Cold War, an unsettled country between Europe and the Middle East, and a frequently interrupted fragile democracy. Themes: state-run developmentalism, modernization projects, social engineering, the dialectics between democracy and authoritarianism, invented national identities and histories, and secularism. Topics include transition from an empire to a nation state, political identities and ideologies, ethnic and religious conflicts, economic and social transformation, cultural formations, and foreign relations.

4-5 units, Aut (Yilmaz, H)

HISTORY 382B. Islamic Thought and Culture in the Premodern Middle East, 800-1800

(Same as HISTORY 282B.) Major intellectual and cultural currents across political, philosophical, literary, and religious traditions in social contexts from the rise of Islam to the advent of modernity. Focus is on the period when canons of Islamic thought and learning formed; Islamic diversity and universalism as sources of conflict and mediation in ideological conflicts; origins of lingering controversies and their social consequences; formation and defining features of disciplines and schools of thought; modes of production and transmission of knowledge; limits of intellectual freedom; and interaction with non-Islamic cultures.

4-5 units, Win (Yilmaz, H)

HISTORY 382C. Environmental History of the Middle East

(Same as HISTORY 282C.) What can Middle East environmental history learn from a consideration of other regions? Major problems of the field, available sources, and directions for future research. Topics include Islam and the environment, animals, environmentalism, gardens, colonialism, disease, water and irrigation, and science and technology.

4-5 units, Spr (Mikhail, A)

HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East

(Same as HISTORY 283.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.

4-5 units, Win (Beinin, J)

HISTORY 385A. Core in Jewish History, 17th-19th Centuries

4-5 units, not given this year

HISTORY 385B. Core in Jewish History, 20th Century
4-5 units, not given this year

HISTORY 387B. International Law and the Palestinian-Israeli Conflict
(Same as HISTORY 287B.) Topics include international legal recognition of the right of Jews for a state; legal implications of defining Israel as a Jewish state; Arab-Palestinians and the right of return; practices of land expropriation within 1948 Israel; norms of international law applicable in the West Bank and Gaza; the legality of Jewish settlements in the West Bank and Gaza; the status of Jerusalem after 1967; international law and the Palestinian uprisings; the separation fence; legal status of the Gaza Strip after the disengagement. Background in Israeli or international law not required.
4-5 units, Aut (Holzman-Gazit, Y), given once only

HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West
4-5 units, not given this year

HISTORY 390A. Major Topics in Modern Chinese History: Qing/Republican Transition
Continuities and discontinuities in society, economy, politics, culture, and thought during the transition from the Qing dynasty to the republic. May be repeated for credit.
4-5 units, Spr (Mullaney, T)

HISTORY 391. East Asia in the Early Buddhist Age
(Same as HISTORY 191.) Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history.
4-5 units, not given this year

HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times
(Same as HISTORY 291A.) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.
4-5 units, not given this year

HISTORY 391B. The City in Imperial China
(Same as HISTORY 291B.) The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.
3-5 units, not given this year

HISTORY 391E. Maps, Borders, and Conflict in East Asia
(Same as HISTORY 291E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone.
4-5 units, Win (Wigen, K)

HISTORY 392. The Two Koreas
(Same as HISTORY 292.) Themes include historical and ideological origins of the division, the impact of the Japanese colonial rule, the Korean War, the ideas of key N. and S. Korean leaders, and the consolidation of the two different states after the Korean War.
4-5 units, Win (Moon, Y)

HISTORY 392B. Law and Society in Late Imperial China
(Same as HISTORY 293.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history.
4-5 units, not given this year

HISTORY 392D. Japan in Asia, Asia in Japan
(Same as HISTORY 292D.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.
4-5 units, not given this year

HISTORY 392E. The Historical Roots of Modern East Asia
(Same as HISTORY 92A.) Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.
4-5 units, not given this year

HISTORY 392F. Readings in Korean History
Topics: the characteristics of the Choson dynasty, the reform movements and rebellions in the 19th century, Korean nationalism, the debates on modernity in colonial Korea, and decolonization and the Korean War. Comparative perspective concerning how Korea's path to modernity differed from those of China and Japan.
4-5 units, Aut (Moon, Y)

HISTORY 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire
The legacy of the Qing dynasty in the territorial boundaries claimed by the People's Republic of China including the frontier zones that lie outside China proper. How the Qing acquired and ruled its frontier territories. Growth and migration of the Han Chinese population. How the dynasty's Manchu rulers managed ethnic difference. Consequences of Qing expansionism and ethnic statecraft for subject peoples and for the dynasty itself. At what point and by what processes did the Qing become China.
4-5 units, not given this year

HISTORY 393A. State, Society, and Economy in Qing Dynasty China
Historical scholarship on China during the Qing period, including the gentry, civil examinations, and the debate about social mobility; merchants, cities, and the debate about civil society/public sphere; taxation, local security, and famine relief; heterodoxy, collective violence, and rebellion; and rival approaches (neo-Malthusian, neo-conservative, and neo-Marxist) to understanding the high Qing economy.
4-5 units, Aut (Sommer, M)

HISTORY 393B. Homosexuality in Historical and Comparative Perspective
(Same as HISTORY 293B.) Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S.
4-5 units, Spr (Sommer, M)

HISTORY 393D. Empire and Cosmopolitanism: Traveling Ideas in Global Political Thought
(Same as HISTORY 293D.)
4-5 units, Spr (Kumar, A)

HISTORY 395F. Race and Ethnicity in East Asia
(Same as HISTORY 295F.) Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science.
4-5 units, Win (Mullaney, T)

HISTORY 396D. Modern Japan
Major historical problems and historiographic trends in from the Meiji period to the present. Themes include late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian

society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.

4-5 units, not given this year

HISTORY 396E. Contentious Identities: The Formation of Race, Ethnicity, and Nationhood in Modern Japan

(Same as HISTORY 296E.) Exclusion and assimilation of minority groups including Ainu, Burakumin, Okinawans, Koreans, and Taiwanese; how this process was related to the construction of national, racial, and ethnic self-understanding in modern Japan. Ethno-racial formation and nationalism in Japanese society.

4-5 units, Spr (Staff)

HISTORY 399A. Design and Methodology for International Field Research

(Same as HISTORY 299X.)

1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 399W. Graduate Directed Reading

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HISTORY 401A. Spatial History: Concepts, Methods, Problems

(Same as HISTORY 201A.) Technical training in GIS, with modules taught by Stanford Spatial History Lab staff; conceptual work in the use of these techniques in spatial historical analysis. Students develop their own spatial history projects and produce beta versions of dynamic visualizations.

4-5 units, Aut (White, R; Frank, Z)

HISTORY 401B. Spatial History, Part II

Prerequisite: 401A.

4-5 units, Win (White, R; Frank, Z)

HISTORY 414A. Medieval History

4-5 units, not given this year

HISTORY 414B. Medieval History

4-5 units, not given this year

HISTORY 421A. Early Modern Russia

4-5 units, Win (Kollmann, N), Spr (Kollmann, N)

HISTORY 422A. Research Seminar on the History of the Russian Empire

4-5 units, not given this year

HISTORY 422B. Research Seminar in Imperial Russia

4-5 units, not given this year

HISTORY 424A. The Soviet Civilization

Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.

4-5 units, not given this year

HISTORY 424B. The Soviet Civilization

4-5 units, not given this year

HISTORY 424C. The End of Communism in Europe

Causes, course, and consequences.

4-5 units, Spr (Weiner, A)

HISTORY 430. Graduate Research Seminar: Early Modern Europe, 1400-1800

Prerequisite: 332D or 332H.

4-5 units, Spr (Findlen, P)

HISTORY 433A. European History

4-5 units, Aut (Sheehan, J)

HISTORY 433B. European History

4-5 units, Win (Sheehan, J)

HISTORY 438. European History Workshop

All European history graduate students in residence register for this workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.

1 unit, Spr (Robinson, P)

HISTORY 439A. Graduate Research Seminar: Modern Britain and the British Empire

4-5 units, not given this year

HISTORY 439B. Graduate Research Seminar: Modern Britain and the British Empire II

4-5 units, not given this year

HISTORY 443A. Human Origins: History, Evidence, and Controversy

(Same as HISTORY 243S.) Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.

4-5 units, not given this year

HISTORY 444C. The History of the Body in Science, Medicine, and Culture

(Same as HISTORY 244C.) The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.

4-5 units, not given this year

HISTORY 445A. Research Seminar in African History

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

4-5 units, not given this year

HISTORY 445B. Research Seminar in African History

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

4-5 units, not given this year

HISTORY 446A. Research Seminar: African Nationalism and Beyond

(Same as HISTORY 246S.) African intellectual, political, social and cultural institutions confronting issues of sovereignty, authority, heterarchy, and power during the 19th and 20th centuries.

4-5 units, not given this year

HISTORY 446B. Research Seminar: African Nationalism and Beyond

Prerequisite: 446A and consent of instructor.

4-5 units, not given this year

HISTORY 448A. African Societies and Colonial States

(Same as HISTORY 248S.) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter.

4-5 units, Win (Roberts, R)

HISTORY 448B. African Socieities and Colonial States

4-5 units, Spr (Roberts, R)

HISTORY 461A. U.S. Women's Family and Sexual History

Research, design, research methods, and historical writing on topics in the history of women, the family, or sexuality in the U.S. Prepares graduate students for dissertation work. Workshop model involves exchanging preliminary prospectus, outline, writing sample, and draft for peer responses. Article-length original paper based on primary sources, to be completed by the end of Spring Quarter.

4-5 units, Win (Freedman, E)

HISTORY 461B. U.S. Women's Family and Sexual History, Part II

Prerequisite: 461A.

4-5 units, Spr (Freedman, E)

HISTORY 470A. Research Seminar in Latin American Social History

How to use primary sources such as government records, estate inventories, and parish records for social history. 470A: methodological readings in social history and the development of a research project. 470B: research and writing of a seminar paper. Prerequisite: consent of instructor.

4-5 units, not given this year

HISTORY 470B. Research Seminar in Latin American Social History II
How to use primary sources such as government records, estate inventories, and parish records for social history. 470A: methodological readings in social history and the development of a research project. 470B: research and writing of a seminar paper. Prerequisite: consent of instructor.
4-5 units, not given this year

HISTORY 486A. Graduate Research Seminar in Jewish History
4-5 units, not given this year

HISTORY 486B. Graduate Research Seminar in Jewish History
4-5 units, not given this year

HISTORY 492. Society in Ancient and Medieval China
Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.
5 units, not given this year

HISTORY 495A. Qing Legal Documents
How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.
4-5 units, not given this year

HISTORY 497A. Maps and Gazetteers as Sources for East Asian History
For graduate students of early modern or modern East Asia. Includes weekend workshop on Chinese historical GIS with Harvard's Peter Bol. Students work with the Stanford Spatial History Lab to develop analytical techniques. Prerequisite: background in GIS.
4-5 units, Win (Wigen, K)

HISTORY 497B. Maps and Gazetters as Sources for East Asian History, Part 2
Prerequisite: HISTORY 497A.
4-5 units, Spr (Wigen, K)

HISTORY 499X. Graduate Research
Units by arrangement. May be repeated for credit.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OVERSEAS STUDIES COURSES IN HISTORY

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BERLIN HISTORY COURSES

OSPBER 70. The Long Way to the West: German History from the 18th Century to the Present
5 units, Spr (Jander, M)

FLORENCE HISTORY COURSES

OSPFLOR 33. The Americanization of Italy
4 units, Spr (Scarpellini, E)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
5 units, Win (Campani, E)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society
4 units, Aut (Mammarella, G)

MADRID HISTORY COURSES

OSPMADRD 25. European Legal History
5 units, Aut (Herzog, T)

OSPMADRD 26. Issues in European Law
4 units, Aut (Herzog, T)

OSPMADRD 34. Modern Spain
5 units, Win (Herzog, T)

OSPMADRD 35. Issues in Spanish History
4 units, Win (Herzog, T)

OSPMADRD 67. Women in Spain: From Tradition to Postmodernity
5 units, Spr (Botella Ordinas, E)

MOSCOW HISTORY COURSES

OSPMOSC 75. Soviet and Post-Soviet Leaders
5 units, Aut (Weiner, A)

OSPMOSC 76. Soviet History in Present-Day Russian Media
3 units, Aut (Weiner, A)

OXFORD HISTORY COURSES

OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850
4-5 units, Aut (Tyack, G)

OSPOXFRD 66. Oxford: The Culture of the City
3 units, Aut (Chance, H), Win (Chance, H)

OSPOXFRD 70. The History of London
5 units, Spr (Tyack, G)

OSPOXFRD 221Y. Art and Society in Britain
4-5 units, Win (Tyack, G)

PARIS HISTORY COURSES

OSPPARIS 81. France During the Second World War: Between History and Memory
5 units, Win (Virgili, F)

SANTIAGO HISTORY COURSES

OSPSANTG 62. Topics in Chilean History
4-5 units, Win (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America
4-5 units, Aut (Jaksic, I), Spr (Jaksic, I)

HISTORY AND PHILOSOPHY OF SCIENCE (HPS) COURSES

For information on the Program in History and Philosophy of Science, see the "History and Philosophy of Science" section of this bulletin.

UNDERGRADUATE COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE

HPS 60. Introduction to Philosophy of Science
(Same as PHIL 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerbend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
5 units, Aut (Ryckman, T)

HPS 61. Science, Religion, and the Birth of Modern Philosophy
(Same as PHIL 61.) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
5 units, not given this year

HPS 154. What is Science? Explaining Nature from Pythagoras to Popper
How many great changes in science were accompanied by changes in method. Case studies of scientific practice from ancient Greece to the 20th century; how theory and practice have influenced each other. What kinds of science and technology emerged under different methods; how science influenced ideas about knowledge, discovery, and truth. What is or is not science, such as the debate over intelligent design. GER:DB-Hum
5 units, Win (McCaskey, J)

HPS 156. History of Women and Medicine in the United States
Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical contstruction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing. GER:EC-Gender

5 units, Aut (Horn, M)

HPS 199. Directed Reading

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

HPS 299. Graduate Individual Work
May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OVERSEAS STUDIES COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

FLORENCE HISTORY AND PHILOSOPHY OF SCIENCE COURSES

OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought

5 units, Win (Galluzzi, P)

HUMAN BIOLOGY (HUMBIO) COURSES

For information on the undergraduate program in Human Biology, see the "Human Biology" section of this bulletin. The faculty and staff of Human Biology prepare a student handbook, on the web at http://humbio.stanford.edu/, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for Human Biology majors.

UNDERGRADUATE COURSES IN HUMAN BIOLOGY

Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses. Courses numbered 100 through 189 fulfill the Human Biology upper-division requirement. These course are open to non-majors with the proper prerequisites; Human Biology majors have preference when enrollment is restricted.

HUMBIO 2A. Genetics, Evolution, and Ecology
Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER:DB-NatSci

5 units, Aut (Boggs, C; Durham, W; Francke, U)

HUMBIO 2B. Culture, Evolution, and Society
Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:DB-SocSci

5 units, Aut (Klein, R; Brown, M)

HUMBIO 2C. Introductory Chemistry Seminar
Preparation for biochemistry in the Human Biology core. Limited to students who have not previously enrolled in college chemistry classes or passed the Human Biology core chemistry exam.

1 unit, Aut (Wandless, T)

HUMBIO 3A. Cell and Developmental Biology
The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. Prerequisite: college chemistry, a passing grade on the Human Biology core chemistry exam, or HUMBIO 2C. GER:DB-NatSci

5 units, Win (Fuller, M; Kaiser, A; Nusse, R; Scott, M; Talbot, W)

HUMBIO 3B. Behavior, Health, and Development
Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. GER:DB-SocSci

5 units, Win (Lyons, D; Fernald, A)

HUMBIO 3Y. Practicum in Child Development
Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 3B. (AU)

1 unit, Win (Winters, J)

HUMBIO 4A. The Human Organism
Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER:DB-NatSci

5 units, Spr (Heller, C; Fernald, R)

HUMBIO 4B. Environmental and Health Policy Analysis
Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy GER:DB-SocSci

5 units, Spr (Goulder, L; Barr, D)

HUMBIO 6. Human Origins
(Same as ANTHRO 6, ANTHRO 206, BIO 106.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER:DB-NatSci

5 units, Win (Klein, R)

HUMBIO 14. Introduction to Anthropological Genetics
(Same as ANTHRO 14.) How genetic methods address anthropological questions. Examples include the evolutionary relationships between humans and the apes, the place of the Neanderthals in human evolution, the peopling of the New World, ancient DNA, the genetics of ethnicity, forensic genetics, genomics, behavioral genetics, and hereditary diseases. GER:DB-NatSci

3-5 units, not given this year

HUMBIO 21. Introduction to Brain and Behavior
(Same as BIO 20.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER:DB-NatSci

3 units, Aut (Fernald, R), alternate years, not given next year

HUMBIO 27. Traditional Chinese Medicine
The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such

as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

1 unit, Win (Golianu, B)

HUMBIO 82A. Qualitative Research Methodology

Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

3 units, Win (Wolf, J), Spr (Wolf, J)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research

For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

3 units, Aut (Wolf, J)

HUMBIO 84Q. Social Justice, Responsibility, Health

Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an overarching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

HUMBIO 86Q. Love as a Force for Social Change

Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Win (Murray, A)

HUMBIO 87Q. Women and Aging

(S,Sem Same as MED 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior

Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER:DB-NatSci

3 units, Aut (Fernald, R)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine

(S,Sem Same as ORTHO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Aut (Matheson, G), Spr (Matheson, G)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice

Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.

3 units, Aut (Zaroff, L)

HUMBIO 112. Conservation Biology

(Same as BIO 144.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. 4 units if taken with a service learning component. Prerequisite: BIO 101, or BIO 43 or HUMBIO 2A with consent of instructor. GER:DB-NatSci

3-4 units, Win (Boggs, C; Launer, A)

HUMBIO 114. Environmental Change and Emerging Infectious Diseases

(Same as ANTHRO 177, ANTHRO 277.) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. (HEF III; DA-C) GER:DB-SocSci

3-5 units, not given this year

HUMBIO 115. Long-Term Human Interaction with Environment

(Same as ANTHRO 115A.) The effects and consequences of long-term human interaction with the environment. How and why past societies adapted, or failed to adapt, to changing environmental conditions and relevance to current environmental problems. Demographic, archaeological, and environmental data assessed using case studies from around the world since the late Pleistocene. Development of agriculture, societal collapse, sustainability, and policy response. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Spr (Truncer, J)

HUMBIO 116. Controlling Climate Change in the 21st Century

(Same as BIO 147, BIO 247, EARTHSYS 147, EARTHSYS 247.) Global climate change science, impacts, and response strategies. Topics: scientific understanding of the climate system; modeling future climate change; global and regional climate impacts and vulnerability; mitigation and adaptation approaches; the international climate policy challenge; and decarbonization of energy and transportation systems. GER:DB-NatSci

3 units, Win (Schneider, S; Mastrandrea, M), alternate years, not given next year

HUMBIO 117. Human Behavioral Ecology

(Same as ANTHRO 361.) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci

3-5 units, not given this year

HUMBIO 118. Theory of Ecological and Environmental Anthropology

(Same as ANTHRO 90C.) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER:DB-SocSci

3-5 units, Win (Bird, R)

HUMBIO 119. Demography: Health, Development, Environment

(Same as BIO 102.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biology or Human Biology core; or consent of instructor. GER:DB-SocSci

3 units, Spr (Tuljapurkar, S)

HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape the Health Care System
Health policy and health care delivery. Options for health care reform. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Aut (Barr, D)

HUMBIO 120A. Health Policy and Health Care System Design
The design of health care systems and their ability to improve the health of the population successfully. Concepts related to health care systems and components. Focus is on the health care systems of the U.S. and UK.

4 units, Spr (Baker, L)

HUMBIO 121A. Providing and Evaluating Health Education for Underserved Children
(Same as INDE 262A.) A service learning experience in community health. Students participate in developing health education materials for underserved middle school students based on principles of human biology and health science ; become knowledgeable about logic modes and other evaluation tools available for evaluating health education modules and community intervnetions; develop an implementation and evaluation plan. Prequisite for undergraduates: Human Biology core or equivalent or consent of instructor.

3 units, Aut (Rodriguez, E; Morioka-Douglas, N)

HUMBIO 121B. Providing and Evaluating Health Education for Underserved Children
(Same as INDE 262B.) Students implement the health education activities/modules developed in INDE 262A/HUMBIO 121A, solicit evaluative feedback, and present the outcomes.

3 units, Win (Rodriguez, E; Morioka-Douglas, N)

HUMBIO 122. Beyond Health Care--Seeking Health in Society
(Same as PEDS 222.) Available evidence both at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Prerequisites: 4B or equivalent and background in research methods and statistics.

3 units, Win (Rodriguez, E)

HUMBIO 122S. Social Class, Race, Ethnicity, Health
(Same as SOC 141A.) Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:DB-SocSci, EC-AmerCul

5 units, Win (Barr, D)

HUMBIO 123. Obesity in America: Clinical and Public Health Implications
Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Win (Kiernan, M; Stafford, R)

HUMBIO 124. Fat Nutrition and Current Health Concerns
Relationships between dietary fats and heart disease, cancer, obesity, diabetes, and fitness. Proposed benefits of omega-3 fats and antioxidants. Historical and economic influences on fat nutrition. Prerequisite: 3A; pre- or corequisite: 4A; preference to students who have completed 4A. Recommended: 130.

4 units, Spr (Endemann, G)

HUMBIO 125. Current Controversies in Women's Health
(Same as OBGYN 256, INDE 256.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Jacobson, M; Stefanick, M)

HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives
Disease prevention and health promotion topics pertinent to different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; obesity, nutrition, and stress; young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness programs; and environmental and international issues. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Stefanick, M; Alles, W)

HUMBIO 127A. Community Health: Assessment and Planning I
Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques. Prerequisite: 4B or equivalent, or consent of instructor.

4 units, Win (Heaney, C), alternate years, not given next year

HUMBIO 127B. Community Health: Assessment and Planning II
Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Prerequisite: 4B or equivalent, 127A, or consent of instructor.

4 units, Spr (Heaney, C), alternate years, not given next year

HUMBIO 128. Community Health Psychology
(Same as PSYCH 101.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

HUMBIO 129. Critical Issues in International Women's Health
Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. Prerequisites: Human Biology core or equivalent or consent of instructor. GER:EC-Gender

4 units, Aut (Murray, A), Win (Murray, A)

HUMBIO 129S. International Health
Concepts of health and wellness and major descriptors and determinants of health status. International organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of current and previous programs and projects. Cultural, economic, and political contexts in international health. Prerequisites: Human Biology core or equivalent or consent of instructor.

4 units, not given this year

HUMBIO 130. Human Nutrition
The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.

4 units, Spr (Staff)

HUMBIO 131. Interdisciplinary Design for Agile Aging
(Same as CS 379Y, MED 279Y.) Offered by the d.school. Perspectives from computer science, design, social and behavioral sciences, physiology, geriatrics, and biodesign to develop projects that address the potential of people to maintain vitality and mobility as they age. New ways to integrate computer and device technologies with behavioral and social interventions. Focus is on small-group projects based on real-world need finding. Prerequisite: background in one of design, computing, medicine, behavioral sciences, communications, or business.

3-4 units, Win (Winograd, C; Winograd, T; Friedlander, A; Yock, P)

HUMBIO 132. Functional Anatomy of Exercise
Interdisciplinary: physiology, pathology, and biomechanics. Anatomy of the body's major joints in the context of exercise and movement emphasizing adaptations that occur with intensity and nature of exercise, age, and disease. Students work in cooperative groups with students at the Gothenburg School of Sports Science in Sweden to produce original research on an aspect of biomechanics and sport. Sources include the Stanford Human Performance Laboratory. Enrollment limited to 40. Prerequisites: 139 or consent of instructor.

4 units, Spr (Garza, D)

HUMBIO 133. Human Physiology
(Same as BIO 112, BIO 212.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biology or Human Biology core. GER:DB-NatSci

4 units, Win (Garza, D)

HUMBIO 135. Exercise Physiology
How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology core, Biology core, or equivalent, or consent of instructor.

4 units, not given this year

HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism
Scientific research on topics related to exercise physiology, aging and mobility. Exercise physiology lab and field work experience. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: Human Biology core or equivalent; preference to those who have taken 135.

3 units, Spr (Friedlander, A)

HUMBIO 139. Sports Medicine
Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise; and the use of technology in modern sports science. Sources include physiology, nutrition, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, drugs in sport, and aging. Prerequisite: Biology or Human Biology core, or consent of instructor. GER:DB-NatSci

4 units, Aut (Garza, D)

HUMBIO 141. Human Developmental Biology and Medicine
(Same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biology core, or consent of instructor.

4 units, not given this year

HUMBIO 142. Adolescent Development
Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisite: 3B or PSYCH 1, or consent of instructor.

4 units, Aut (Medoff, L)

HUMBIO 143. Adolescent Sexuality
Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Spr (Medoff, L)

HUMBIO 144. Boys' Psychosocial Development
(Same as EDUC 143.) From early childhood through adolescence. Emphasis is on how boys' lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender

4 units, not given this year

HUMBIO 145. Birds to Words: Cognition, Communication, and Language
(Same as PSYCH 137, PSYCH 239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

4 units, Aut (Fernald, A; Ramscar, M)

HUMBIO 146. Culture and Mental Illness
(Same as ANTHRO 181.) Interdisciplinary. Culture and social context on the identification, course, and outcome of psychiatric illness. What is known from psychiatry about the nature of illness as a biomedical process and from anthropology about the life course of illness within particular settings. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Spr (Luhrmann, T)

HUMBIO 147. Population and Environment in China
Population movement and its environmental consequences from late imperial times to the present, analyzed as part of the social landscape created by radical social change. Topics include the causes of rapid population growth in late imperial times, environmental consequences, and reasons for and results of birth control programs undertaken by the Peoples' Republic. Prerequisite: Human Biology core or equivalent or consent of instructor.

5 units, Spr (Wolf, A)

HUMBIO 152. Viral Lifestyles
Contemporary topics related to microorganism. Relevance of microorganisms to disciplines beyond molecular biology and medicine. Public health implications of human/viral interactions, and the human behaviors that bring about such interactions. The ecological role played by viruses and their role in environmental health. Prerequisite: familiarity with biological systems, evolutionary biology, and microbiology.

3 units, Aut (Wolfe, N)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges
Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context. Public health policy initiatives aimed at halting

disease transmission. World Health Organization tropical disease targets including river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiais, and intestinal helminthes. Guest lecturers with expertise in disease control. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Win (Smith, D)

HUMBIO 154. Cancer Epidemiology
Epidemiological methods relevant to human research in cancer. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Win (Fisher, P)

HUMBIO 155B. The Vaccine Revolution
(Same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisites: HUMBIO 155H, MI 155V.

6 units, Aut (Siegel, R)

HUMBIO 155H. Humans and Viruses I
(Same as MI 155H.) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, not given this year

HUMBIO 156. Global HIV/AIDS
(Same as MED 256.) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:DB-NatSci

3 units, Spr (Katzenstein, D)

HUMBIO 157. The Biology of Stem Cells
(Same as DBIO 257.) The role of stem cells in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisites: 2A,B, or consent of instructor.

3 units, Spr (Nusse, R; Fuller, M)

HUMBIO 158. The Human Genome and Disease
(Same as BIO 109A, BIO 209A.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER:DB-NatSci

3 units, Win (Heller, R)

HUMBIO 159. Genes and Environment in Disease Causation: Implications for Medicine and Public Health
(Same as HRP 238.) The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

2-3 units, Win (Popat, R)

HUMBIO 160. Human Behavioral Biology
(Same as BIO 150, BIO 250.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER:DB-NatSci

5 units, alternate years, not given this year

HUMBIO 161. The Neurobiology of Sleep
(Same as BIO 149, BIO 249. Graduate students register for 249.) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER:DB-NatSci

4 units, Win (Heller, C)

HUMBIO 162. Clinical Neuroscience in Women's Health
Mental health from the perspectives of neuroscience, psychology, human physiology, and feminist studies. Major depression, bipolar, and obsessive compulsive disorders; how the female reproductive system affects the clinical presentation and course of these disorders. Eating disorders, substance abuse and dependence, and sexual trauma within a biopsychosocial model. Pharmacologic and therapeutic treatment of illnesses. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender

4 units, Win (Williams, K; Rasgon, N; Zappert, L)

HUMBIO 163. Neural Systems and Behavior
(Same as BIO 163, BIO 263.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIO 42, HUMBIO 4A, or equivalents. GER:DB-NatSci

4 units, alternate years, not given this year

HUMBIO 164. Critical Implications of Human Memory Research
Concepts in human memory research, emphasizing most recent debates and advances in methodology. Applications to other fields. Focus is on evaluating scientific findings and becoming critical consumers of scientific research. Topics include eyewitness memory, mood disorders, aging, testing effects, childhood amnesia, psychopharmacology, fMRI, and everyday instances of forgetting. How memory research may inform medical, educational, and legal policy.

4 units, Win (Kuhl, N)

HUMBIO 165. Promoting Behavior Change
(Same as EARTHSYS 165.) How to apply principles of behavioral change to a real world public health problem: climate change and environmental sustainability. Sources include theory, research, and practice from perspectives such as social and cognitive psychology, media and communication, education, behavioral medicine, social marketing, and consumer behavior. Student groups create an intervention to help elementary school students reduce their environmental footprint. Research performed in local high schools to develop optimally feasible, acceptable, and effective interventions. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Spr (Robinson, T)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy
Combines academic study with student participation in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Abrams, W)

HUMBIO 172A. Children, Youth, and the Law
How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal

interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, Win (Abrams, W), alternate years, not given next year

HUMBIO 172B. Children, Youth, and the Law

How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, alternate years, not given this year

HUMBIO 173. Science, Business, Law: How Scientific Discovery and Innovation are Protected and Brought to Market

The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; and how ideas are commercialized and brought to market. What kinds of research, discovery, and innovation are protected; who has rights that can be protected; what kinds of rights can be protected, and the kinds of protections that apply; how inventions are commercialized; and the success and failure of businesses based on scientific discovery. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Abrams, W)

HUMBIO 174. Foundations of Bioethics

Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-EthicReas

3 units, Win (Magnus, D)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts

The differences between disease as pathology and as the patient's experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Aut (Zaroff, L)

HUMBIO 175S. Novels and Theater of Illness

Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state. Prerequisite: Human Biology core or equivalent or consent of instructor.

3 units, Spr (Zaroff, L)

HUMBIO 180. Human Osteology

(Same as ANTHRO 175, ANTHRO 275.) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER:DB-NatSci

5 units, Win (DeGusta, D)

HUMBIO 182. Biology, Culture, and Human Behavior

The debate between those who argue that human behavior is best understood as the product of biological evolution and those who contend that it is largely the creation of particular cultures. Is there a human nature, and, if so, what is it? Prerequisite: HUMBIO 2A, 2B or equivalent. GER:DB-SocSci

5 units, Win (Wolf, A)

HUMBIO 183. Astrobiology and Space Exploration

Evolution in the context of space and time, focusing on the emergence of life in a planetary context on Earth and possibly elsewhere. The evolution of intelligence and the search for it elsewhere. The biological, psychological, sociological, and philosophical issues of human space exploration. Integrates information from astronautics, astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Guest lectures by scientists and astronauts from NASA, Stanford, SETI, and other universities. Prerequisite: two college-level science courses such as Human Biology core, or consent of instructor. GER:DB-NatSci

3-4 units, Win (Rothschild, L)

HUMBIO 184. Darwin's Legacy

(Same as ANTHRO 163D.) New understandings that have followed on Darwinian principles; remaining frontiers of research; areas of controversy.His legacy in anthropology, biology, religion, medicine, psychology, philosophy, and literature. 3 units requires discussion section and term paper.

1-3 units, Aut (Durham, W; Boggs, C; Dirzo, R; Siegel, R)

HUMBIO 186. Biological Clocks

(Same as BIO 135.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biology or Human Biology core, or consent of instructor. GER:DB-NatSci

3 units, not given this year

HUMBIO 187. Human Diversity: A Linguistic Perspective

(Same as ANTHRO 123A.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom

3 units, Spr (Ruhlen, M)

HUMBIO 193. Research in Human Biology

Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be repeated for credit; petition required for more than 5 units. Prerequisite: application available in student services office.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMBIO 194. Honors

Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMBIO 197. Human Biology Internship

Limited to and required of Human Biology majors. A supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. Participation in a poster session on the internship experience is required during the first quarter that the student is in residence at Stanford after completion of the internship. May be repeated for credit. Prerequisite: Human Biology core.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMBIO 198. Senior Tutorial in Human Biology

Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.

1-5 units, Aut (Boggs, C; Cacciari, L), Win (Boggs, C; Cacciari, L), Spr (Staff)

HUMBIO 199. Directed Reading/Special Projects

Human Biology majors must obtain a sponsor from the Human

Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMBIO 200. Teaching of Human Biology
For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN HUMAN BIOLOGY

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUSTRALIA HUMAN BIOLOGY COURSES

OSPAUSTL 10. Coral Reef Ecosystems
3 units, Aut (Hoegh-Guldberg, O; Ward, S; Arrigo, K)

OSPAUSTL 20. Coastal Resource Management
3 units, Aut (Johnstone, R)

OSPAUSTL 30. Coastal Forest Ecosystems
3 units, Aut (Hall, J)

BERLIN HUMAN BIOLOGY COURSES

OSPBER 47. Ethics in Medicine and Everyday Life
4 units, Aut (Casper, R)

MADRID HUMAN BIOLOGY COURSES

OSPMADRD 72. Issues in Bioethics Across Cultures
5 units, Win (de Lora del Toro, P)

PARIS HUMAN BIOLOGY COURSES

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
4-5 units, Win (Fessler, J)

SANTIAGO HUMAN BIOLOGY COURSES

OSPSANTG 44. Human Genetic Diversity in Individuals and Populations
4-5 units, Win (Francke, U)

HUMANITIES AND SCIENCES (HUMSCI) COURSES

These courses are offered by the School of Humanities and Sciences.

UNDERGRADUATE COURSES IN HUMANITIES AND SCIENCES

HUMSCI 190. Individually Designed Major Honor's Thesis
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

GRADUATE COURSES IN HUMANITIES AND SCIENCES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

HUMSCI 201. Graduate Environment of Support
Psychosocial, financial, and career issues in adapting graduate students to Stanford; how these issues relate to diversity, resources, policies, and procedures. Discussions among faculty, advanced graduate students, campus resource people, and the dean's office. (Thomas)

1 unit, Aut (Thomas, A)

IMMUNOLOGY (IMMUNOL) COURSES

For information on graduate programs in Immunology, see the "Immunology" section of this bulletin. Course and laboratory instruction in the Immunology Program conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN IMMUNOLOGY

IMMUNOL 185. Brain and the Immune System
(Same as IMMUNOL 285.) For advanced undergraduates, coterminal students, and graduate students. Molecular and cellular interactions between the nervous and immune systems. Focus is on the role of immune molecules in neural development, the bi-directional mechanisms by which the brain and immune system communicate with each other, and the role of the immune system in the diseased and infected brain. Topics include: molecular basis of fever, stress and inflammation, gender differences in autoimmune diseases, inflammation in neurodegenerative diseases, central nervous system infections, and the immune system in psychiatric disorders. Expert guest lectures, weekly discussion sections, and student presentations. Prerequisite: Biology or Human Biology core.

3 units, Win (Steinman, L; Brownell, S; Price, J)

GRADUATE COURSES IN IMMUNOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

IMMUNOL 201. Advanced Immunology I
(Same as MI 211.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

IMMUNOL 202. Advanced Immunology II
(Same as MCP 202.) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201.

3 units, Spr (Garcia, K)

IMMUNOL 203. Advanced Immunology III
Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MCP 202.

3 units, Win (Utz, P)

IMMUNOL 205. Immunology in Health and Disease
Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease and vaccination, hematpoietic and solid organ transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.

2-4 units, Win (Lewis, D)

IMMUNOL 215. Principles of Biological Technologies
(Same as MI 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.

3 units, Spr (Kirkegaard, K)

IMMUNOL 240. Professional and Leadership Development
Foundational skills for professional and leadership development. How to communicate, resolve conflict, negotiate, and present. Workshop format integrating intellectual and experiential learning.
2 units, Spr (Radermacher, A; Allen, J; Krams, S)

IMMUNOL 285. Brain and the Immune System
(Same as IMMUNOL 185.) For advanced undergraduates, coterminal students, and graduate students. Molecular and cellular interactions between the nervous and immune systems. Focus is on the role of immune molecules in neural development, the bi-directional mechanisms by which the brain and immune system communicate with each other, and the role of the immune system in the diseased and infected brain. Topics include: molecular basis of fever, stress and inflammation, gender differences in autoimmune diseases, inflammation in neurodegenerative diseases, central nervous system infections, and the immune system in psychiatric disorders. Expert guest lectures, weekly discussion sections, and student presentations. Prerequisite: Biology or Human Biology core.
3 units, Win (Steinman, L; Brownell, S; Price, J)

IMMUNOL 290. Teaching in Immunology
Practical experience in teaching by serving as a teaching assistant in an immunology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student. May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IMMUNOL 299. Directed Reading in Immunology
Prerequisite: consent of instructor.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IMMUNOL 305. Immunology Journal Club
Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.
1 unit, Aut (Steinman, L), Win (Steinman, L), Spr (Steinman, L)

IMMUNOL 311. Seminar in Immunology
Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in Immunology. Current research topics.
1 unit, Aut (Steinman, L; Fathman, C), Win (Steinman, L; Fathman, C), Spr (Steinman, L; Fathman, C)

IMMUNOL 311A. Discussions in Immunology
Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.
1 unit, Aut (Steinman, L; Fathman, C), Win (Steinman, L; Fathman, C), Spr (Steinman, L; Fathman, C)

IMMUNOL 399. Graduate Research
For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in Immunology.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

INSTITUTE FOR INTERNATIONAL STUDIES (FREEMAN SPOGLI) (IIS) COURSES

For information on the Freeman Spogli Institute for International Studies, see the "Institute for International Studies" section of this bulletin.

UNDERGRADUATE COURSES IN INSTITUTE FOR INTERNATIONAL STUDIES (FREEMAN SPOGLI)

IIS 195. Interschool Honors Program in Environmental Science, Technology, and Policy
Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study. May be repeated for credit.
1-9 units, Aut (Staff), Win (Staff), Spr (Staff)

IIS 199. Interschool Honors Program in International Security Studies
Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.
1-5 units, Aut (Staff), Win (Stedman, S), Spr (Kapur, S; Cuellar, M)

INTERDISCIPLINARY PROGRAM IN ENVIRONMENT AND RESOURCES (IPER) COURSES

For information on graduate programs in the Interdisciplinary Program in Environment and Resources, including lists of courses which fulfill breadth requirements, see the " Interdisciplinary Graduate Program in Environment and Resources" section of this bulletin.

GRADUATE COURSES IN INTERDISCIPLINARY PROGRAM IN ENVIRONMENT AND RESOURCES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

IPER 200. Going Green: Research, Writing, and Reporting to the Public
Preference to graduate students. Focus is on environmental, economic, and cultural consequences of day-to-day behavioral choices such as computers on at all times versus only when used, or biodegradable versus metal forks at cafés. Sources include scientific and technical literature from disciplines such as energy, biology, and economics. How to write summaries that integrate relevant information for a lay audience. Prerequisite: consent of instructor.
3 units, Aut (Staff), Spr (Staff)

IPER 210. Communication and Leadership Skills
(Same as BIO 388.) Focus is on delivering information to policy makers and the lay public. How to speak to the media, Congress, and the general public; how to write op-eds and articles; how to package ideas including titles, abstracts, and CVs; how to survive peer review, the promotion process, and give a job talk; and how to be a responsible science advocate.
2 units, Spr (Root, T)

IPER 220. Special Topics Seminar
For IPER Ph.D. and joint degree M.S. students; other graduate students with consent of instructor. Challenges of interdisciplinary research; collaborations across disciplines. Topical or methodological focus depending on faculty and student interests. May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPER 220A. Special Topics Seminar
For IPER Ph.D. and joint degree M.S. students; other graduate students with consent of instructor. Challenges of interdisciplinary research; collaborations across disciplines. Topical or methodological focus depending on faculty and student interests. May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPER 220B. Special Topics Seminar
For IPER Ph.D. and joint degree M.S. students; other graduate students with consent of instructor. Challenges of interdisciplinary

research; collaborations across disciplines. Topical or methodological focus depending on faculty and student interests. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

IPER 220C. Special Topics Seminar
For IPER Ph.D. and joint degree M.S. students; other graduate students with consent of instructor. Challenges of interdisciplinary research; collaborations across disciplines. Topical or methodological focus depending on faculty and student interests. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

IPER 243. Energy and Environmental Policy Analysis
(Same as MS&E 243.) Concepts, methods, and applications. Energy/environmental policy issues such as automobile fuel economy regulation, global climate change, research and development policy, and environmental benefit assessment. Group project. Prerequisite: 241 or ECON 50, 51.

3 units, Spr (Sweeney, J)

IPER 250. Ecological Principles for Environmental Problem Solving
For joint degree M.S. students in Law, Business, or Medicine, or IPER Ph.D. or other graduate students with limited biology background. Topics include field methods, climate, biogeography, biogeochemical cycles, physiology, population genetics, and environmental ethics.

3 units, Spr (Staff)

IPER 260. The Social Sciences and Environmental Problem Solving
For students with little background in the social sciences interested in incorporating them into their research. Focus is on the contribution that the social sciences of international relations, political science, anthropology, and sociology make to environmental problem solving. Case studies from international regime building, inter-agency politics, organizational behavior, and cultural dynamics.

2-3 units, not given this year

IPER 270. Graduate Practicum in Environment and Resources
Opportunity for IPER students to pursue areas of specialization in an institutional setting such as a laboratory, clinic, research institute, governmental agency, non-governmental organization, or multilateral organization. Meets US CIS requirements for off-campus employment with endorsement from designated school official.

1-9 units, Aut (Daily, G), Win (Daily, G), Spr (Daily, G), Sum (Daily, G)

IPER 300. Earth Sciences Seminar
(Crosslisted in each department in the School of Earth Sciences.) Required for incoming graduate students except coterms. Research questions, tools, and approaches of faculty members from all departments in the School of Earth Sciences. Goals are: to inform new graduate students about the school's range of scientific interests and expertise; and introduce them to each other across departments and research groups. Two faculty members present work at each meeting. May be repeated for credit.

1 unit, Aut (Harris, J)

IPER 310. Environmental Forum Seminar
Required IPER core course for first year Ph.D. and joint and dual M.S. students. Conceptual framework, analytical approaches, validity of conclusions from an interdisciplinary perspective, and alternative approaches. Autumn Quarter: participants attend the Woods Institute's Environmental Forum series or other seminar on campus selected by faculty and students. Winter Quarter: guest Stanford faculty discuss environment and sustainability research. May be repeated for credit. Prerequisite for non-IPER graduate students: application.

1-2 units, Aut (Schneider, S; Root, T), Win (Oleson, K)

IPER 320. Designing Environmental Research
Required IPER core course restricted to first year IPER Ph.D. students. Research design options for environmentally related research. Major philosophies of knowledge and how they relate to research objectives and design choices. Evaluation of strengths and weaknesses of alternative research designs, emphasizing methods, data, and argument. Development of individual research design proposals, including description and justification understandable to a non-specialist.

4 units, Win (Davis, J; Scruggs, C)

IPER 330. Research Approaches for Environmental Problem Solving
Required IPER core course restricted to first year IPER Ph.D. students. How to identify good research questions and implement interdisciplinary research in environment and resources. Student presentations of work in progress; peer critique of written work. Corequisite: 398 with the faculty member chosen to explore a possible dissertation topic.

3 units, Spr (Ortolano, L; Schaffer, H)

IPER 333. Water Policy Colloquium
(Same as CEE 333, GES 333.) Student-organized interdisciplinary colloquium. Creation, implementation, and analysis of policy affecting the use and management of water resources. Weekly speakers from academia and local, state, national, and international agencies and organizations.

1 unit, Spr (Freyberg, D)

IPER 335. Environmental Science for Managers and Policy Makers
(Same as LAW 608, OIT 338.) Core course for joint J.D., M.B.A., or M.D. with M.S. in Environment and Resources; open to first-year Law and GSB students; recommended for those who plan to apply to the joint degree program. Fundamentals of earth and environmental science, spreadsheet modeling, optimization, and Monte Carlo simulation. Applications in resource management and environmental policy.

4 units, Win (Plambeck, E; Daily, G; Field, C; Masters, G; Palumbi, S)

IPER 339. Environmental Entrepreneurship
(Same as GSBGEN 339.) The potential of markets for solving environmental problems, and for environmental entrepreneurs to invent those solutions. How to apply business principles of finance, marketing, economics, operations, and accounting to the provision of environmental goods and services. Case studies include innovation in materials and energy, conservation of land and wildlife, environmental product differentiation and supply chain management, investing under regulatory risk, and partnership between nonprofit and for-profit organizations. Guest speakers include environmental entrepreneurs, venture capitalists, corporate executives, and nonprofit leaders. Students develop their own business plans in environmental entrepreneurship.

4 units, Aut (Plambeck, E)

IPER 398. Directed Individual Study in Environment and Resources
Under supervision of an IPER faculty member on a subject of mutual interest.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPER 399. Directed Research in Environment and Resources
For advanced graduate students.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPER 410. Ph.D. Qualifying Tutorial
For Ph.D. students only.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPER 460. Proposal Writing Tutorial
Practical training in grant writing methods. Students draft research proposals relevant to individual interests with supervision from IPER faculty.

1-2 units, Aut (Staff), Win (Staff), Spr (Staff)

IPER 480. Dissertation Writing Tutorial in Environment and Resources
For students who have completed the oral qualifying examination.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

INTERDISCIPLINARY STUDIES IN HUMANITIES (HUMNTIES) COURSES

For information on undergraduate and graduate programs in Interdisciplinary Studies in Humanities, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

UNDERGRADUATE COURSES IN INTERDISCIPLINARY STUDIES IN HUMANITIES

HUMNTIES 100. Text and Context in Humanities
Required of students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of theoretical approaches to major texts. Textual analysis and writing assignments to prepare students to write honors essays. GER:DB-Hum

3 units, Win (Freidin, G; Staveley, A)

HUMNTIES 161. Texts in History: Classics from Greece to Rome
(Same as CLASSGEN 163, DRAMA 161R.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's *Iliad* and *Odyssey*, plays of Aeschylus, Sophocles' *Antigone*, Euripides' *Medea*, Thucydides *Peloponnesian War*, Plato's *Symposium*, Aristotle's *Poetics*, Virgil's *Aeneid*, Seneca's *Trojan Women* and *Agamemnon*, and Augustine's *On Christian Doctrine*. GER:DB-Hum

5 units, Win (Rehm, R)

HUMNTIES 162. Texts in History: Medieval to Early Modern
(Same as ENGLISH 184C.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, self, divine, and the physical universe. Interdisciplinary methods of interpretation. Texts include: Aristotle, On the Soul; Attar,The Conference of the Birds; Dante, nferno; Chaucer, Canterbury Tales; Christine de Pizan, The Book of the City of Ladies; Letters of Columbus; Machiavelli, The Prince; Luther, The Bondage of the Will; Montaigne, Essays; Marlowe, Doctor Faustus; poems by John Donne and Lady Mary Wroth; Shakespeare, Othello; and works of art. GER:DB-Hum

5 units, Spr (Brooks, H)

HUMNTIES 163. Texts in History: Enlightenment to the Modern
(Same as ENGLISH 184D.) Priority to students in the Humanities honors program and English majors. The relationship between intellectual, political, and cultural history, and imaginative literature in the modern period. Rousseau, Kant, Austen, Mary Wollstonecraft, Marx, Dostoevsky, Nietzsche, Mill, Virginia Woolf, T.S. Eliot, Beckett. GER:DB-Hum

5 units, Aut (Staveley, A)

HUMNTIES 170. Media Studies Internship
Practical experience working with a film or media company for six to eight weeks. Students make arrangements with companies individually and receive the consent of the director of the Humanities honors program. Credit awarded for submitting a paper after completing the internship, focused on a topic relevant to the student's studies.

2-3 units, Aut (Freidin, G), Win (Freidin, G), Spr (Freidin, G), Sum (Staff)

HUMNTIES 175. Individual Work

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HUMNTIES 181. Philosophy and Literature
Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Vermeule, B)

HUMNTIES 192G. Musical Shakespeare: Theater, Song, Opera, and Film
(Same as MUSIC 148, MUSIC 248.) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night's Dream, and Twelfth Night*. May be repeated for credit. Pre- or corequisite: 23.

4-5 units, Win (Grey, T)

HUMNTIES 193H. The Art of the Movies: Story, Drama, and Image
(Same as PHIL 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock.

4 units, Aut (Hills, D)

HUMNTIES 196S. Contemporary Religious Reflection
(Same as RELIGST 240, RELIGST 340.) Focus is on normative and prescriptive proposals by recent and contemporary philosophers and theologians, as opposed to the domination of Religious Studies by textual, historical, cultural, and other largely descriptive and interpretive approaches. Do such normative and prescriptive proposals belong in the academy? Has Religious Studies exorcised its theological nimbus only to find contemporary religious reflection reappearing elsewhere in the university?

3-5 units, Aut (Sockness, B)

HUMNTIES 197F. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought
(Same as SLAVGEN 190, SLAVGEN 290.) Themes: institutions of the family and gender; debate about the female body, church, and religion; the decline of privilege and the rise of capital and industry; the meaning of art and the artist; conflicts of law and custom, country and city, andnationalism and cosmopolitanism; and the ascetic rejection of the world. Authors include Marx, Mill, Nietzsche, Dostoevsky, Weber, and Freud. GER:DB-Hum, DB-Hum, EC-EthicReas

3-4 units, Spr (Freidin, G)

HUMNTIES 198J. Digital Humanities: Beyond the Book
(Same as ENGLISH 153H.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline. GER:DB-Hum

5 units, Aut (Jockers, M)

HUMNTIES 198W. Digital Humanities Workshop
(Same as COMPLIT 198.) Post-print models of research and scholarship in humanities fields. Toolkits being employed in such work from wikis to interactive media to virtual worlds; and theories and practices in the digital humanities field. Focus is on student projects.

4 units, Spr (Schnapp, J)

HUMNTIES 199A. Honors Essay Writing Workshop
Two quarter sequence. Students discuss progress on research and writing the senior honors essay. Required for seniors in the Humanities honors program.

1 unit, Aut (Batuman, E)

HUMNTIES 199B. Honors Essay Writing Workshop
Two quarter sequence. Students discuss progress on research and writing the senior honors essay. Required for seniors in the Humanities honors program.

1 unit, Win (Batuman, E)

HUMNTIES 200A. Research Proposal
Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. (WIM)

1-2 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMNTIES 200B. Senior Research
Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

HUMNTIES 200C. Senior Research
Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HUMNTIES 201. Digital Humanities Practicum
For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

GRADUATE COURSES IN INTERDISCIPLINARY STUDIES IN HUMANITIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

HUMNTIES 275. Individual Work

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

HUMNTIES 298. Graduate Program in Humanities Symposium
Required of GPH doctoral and master's students. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.

1-3 units, Spr (Freidin, G)

HUMNTIES 299. Interdisciplinary Teaching
For doctoral students in the GPH. Supervised interdisciplinary teaching to satisfy the program teaching requirement.

1-2 units, Aut (Freidin, G), Win (Freidin, G), Spr (Freidin, G)

HUMNTIES 301. The Graduate Student and Faculty Colloquium: Mimesis and History
Required for M.A. and Ph.D. students in the Graduate Program in Humanities who have not yet completed the course requirements for the program. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Freidin, G)

HUMNTIES 321. Classical Seminar: Origins of Political Thought
(Same as CLASSHIS 133, CLASSHIS 333, POLISCI 230A, POLISCI 330A.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

5 units, Win (Ober, J)

HUMNTIES 322. Medieval Seminar: Classics and Key Works
(Same as HISTORY 317.) Colloquium focused on key primary sources that allow entry into Medieval European culture. Readings include: Augustine, On Christian Doctrine; Gregory the Great, Moralia on the Book of Job; Beowulf; the Song of Roland; and Aquinas, Summa Theologica.

3-5 units, Spr (Buc, P)

HUMNTIES 323. Renaissance/Early Modern Seminar
(Same as SPANLIT 323.) Focus is on this period as it records the impact of major historical forces: the advent of printing; the reappropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, the world, and the heavens; and the rise of historiography. Authors: Attar, de Pizan, Pico della Mirandola, Columbus, De Las Casas, Machiavelli, Luther, Montaigne, Marlowe, Donne, Shakespeare, and Galileo.

3-5 units, Spr (Barletta, V)

HUMNTIES 324. Enlightenment Seminar
(Same as HISTORY 334.) The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

3-5 units, Win (Baker, K)

HUMNTIES 325. Modern Seminar
(Same as PHIL 325.) Modern anxieties about the place of human concerns within a disenchanted natural world, focusing on texts of philosophy, social theory, and imaginative literature. Cultural and psychological consequences of perceived decline in and threats to religious faith. Authors may include Schiller, Schopenhauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, Weber, Eliot, Woolf, Sartre, and Camus.

3-5 units, Spr (Anderson, L)

INTERNATIONAL POLICY STUDIES (IPS) COURSES

For information on graduate programs in International Policy Studies, see the "International Policy Studies" section of this bulletin.

GRADUATE COURSES IN INTERNATIONAL POLICY STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

IPS 201. Managing Global Complexity
(Same as POLISCI 312S.) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.

3 units, Spr (Krasner, S; Stedman, S)

IPS 202. Topics in International Macroeconomics
Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.

5 units, Aut (Aturupane, C)

IPS 203. Issues in International Economics
Topics in international trade and international trade policy: trade and growth, regionalism versus multilateralism, the political economy of trade policy, trade and labor, trade and the environment, and trade policies for developing and transition economies. Prerequisite: ECON 165.

5 units, Win (Aturupane, C)

IPS 204A. Microeconomics
(Same as PUBLPOL 201A.) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.

4 units, Aut (Bulow, J)

IPS 204B. Cost-Benefit Analysis and Evaluation
(Same as PUBLPOL 201B.) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Behavioral economics: psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.
4 units, Spr (Kessler, D)

IPS 205A. Principles of Research Design and Analysis: Methods
(Same as PUBLPOL 203A.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis using popular statistical packages. Goal is to analyze empirical studies, conduct empirical research, and to crossexamine or work with statistical experts.
2 units, Aut (Hensler, D)

IPS 205B. Principles of Research Design and Analysis: Tools
(Same as PUBLPOL 203B, LAW 366.) Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. The construction and use of models for analyzing economic and social phenomena. Bayesian analysis. Univariate and bivariate analysis. Simple regression model. Multiple regression model. Inference and heteroskedasticity. Linear probability model. Instrumental variables. Maximum likelihood methods. Measurement of social and political attitudes and ideologies. Statistical analysis of large data sets.
4 units, Win (Strnad, J)

IPS 205C. Foundations of Statistical Inference
(Same as PUBLPOL 203C, LAW 362.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis via computer exercises using statistical packages; how to analyze empirical studies, conduct empirical research, and cross-examine or work with statistical experts.
2 units, Aut (Strnad, J)

IPS 206A. Politics and Collective Action
(Same as POLISCI 331S, PUBLPOL 204A.) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applicable to collective action problems in any realm, but focus is on practical examples from environmental management.
4 units, Spr (Oleson, K)

IPS 206B. Organizations
(Same as PUBLPOL 204B.) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.
4 units, Spr (Stedman, S; Eden, L)

IPS 207. Governance, Growth, and Development
The role of governance in the growth and development experience across countries emphasizing the economies of corruption. The concept and measurement of governance. Theory and evidence on the impact of governance, and relationships between it and growth, development, investment, human capital, and outcomes such as poverty and income inequality. The cultural, economic, and political determinants of governance; policy implications. Prerequisites: ECON 50 and 102B.
5 units, Spr (Aturupane, C)

IPS 207A. Judgment and Decision Making
(Same as PUBLPOL 205A. Same as LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.
4 units, Win (Brest, P)

IPS 207B. Public Policy and Social Psychology: Implications and Applications
(Same as PSYCH 216, PUBLPOL 205B.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.
4 units, Spr (Ross, L)

IPS 208. Justice
(Same as ETHICSOC 171, PHIL 171, PHIL 271, POLISCI 136S, PUBLPOL 207.) The ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.
4-5 units, Aut (Cohen, J)

IPS 209. Practicum
(Same as PUBLPOL 209.) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.
5 units, Aut, Win (Sprague, M; Oleson, K)

IPS 210. The Politics of International Humanitarian Action
The relationship between humanitarianism and politics in international responses to civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Case studies include northern Iraq (Kurdistan), Bosnia, Rwanda, Kosovo, and Darfur.
5 units, Aut (Morris, E)

IPS 211. The Transition from War to Peace: Peacebuilding Strategies
How to find sustainable solutions to intractable internal conflicts that lead to peace settlements. How institutions such as the UN, regional organizations, and international financial agencies attempt to support a peace process. Case studies include Bosnia, East Timor, Kosovo, Burundi, Liberia, and Afghanistan.
5 units, Win (Morris, E)

IPS 219. The Role of Intelligence in U.S. Foreign Policy
How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.
5 units, Aut (Hansen, K)

IPS 220. The United States, Europe, and the World
Different approaches toward sovereignty, the debate on unilateralism and multilateralism, and hard and soft power. Case studies on Iraq, the Israeli-Palestinian conflict, and Iran.The transatlantic security relationship focusing on nonproliferation, the fight against terrorism, democracy building, the development of a EU foreign and security policy and European Defense Force, the changing role of NATO,

and Russia and the Balkans. U.S.-EU trade, investment, and economic issues. Global governance topics include the world trading system, global warming, and the International Criminal Court.

5 units, Spr (Staff)

IPS 221A. Globalization and Its Discontents: An Introduction to International Political Economy

What is globalization? Its impacts on different countries and population including those that multilateral organizations such as the World Bank, International Monetary Fund, and World Trade Organization have on the economic policies of member states and the functioning of the global economy. Topics include: political economy of trade; exchange rate policy; the liberalization of trade and finance; the global move to openness; development, debt and aid; and the role of international organizations.

5 units, Win (Gould, E)

IPS 221B. Citizenship and Immigration

How people define and delineate nations. How states define their citizens. Different models of citizenship. Historical and political review of immigration in the U. S., W. Europe, Asia, and Australia. Political and economic effects of immigration. The economic impact of immigration, refugees and asylum seekers, public opinion, nationalist parties, and immigrant rights.

5 units, Spr (Staff)

IPS 222. Economic Development

Focus is on development policies. Agriculture, industrialization, role of financial development, income distribution, human resource development, international relations, and economic aid.

5 units, Spr (Staff)

IPS 230. Democracy, Development, and the Rule of Law

(Same as INTNLREL 114D, POLISCI 114D, POLISCI 314D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Stoner-Weiss, K; McFaul, M)

IPS 231. Law, Democracy, and Development

(Same as LAW 302.) How do growing efforts of national agencies, multilateral development organizations, and NGOs foster economic growth, the rule of law, and democracy around the globe? The relationship between regime type and peace and prosperity by drawing on international legal scholarship, democratization studies, international relations theory, and development economics. Actual and potential international efforts at state building, development aid, and democracy promotion.

3 units, Aut (Staff)

IPS 232. Law and Policy of the European Union

(Same as LAW 539.) European legal and institutional integration, the nature and sources of EU law, the evolution of the single market, and the building of a supranational judicial system. General principles of EU law, the scope of Community powers and their application in the national legal systems of the member states, EU legislation and adjudication, the four freedoms of the single market, corporate and competition policy, and human rights law. U.S.-EU trade and anti-trust issues, cooperation in defense, development assistance, promotion of democracy, and relations in the context of the new challenges to global governance.

4 units, Win (Morningstar, R; Magen, A)

IPS 241. International Security in a Changing World

(Same as POLISCI 114S.) The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries.

5 units, Win (Blacker, C; Crenshaw, M)

IPS 243. The History, Science, Technology, and Politics of Missile Defense

The science and engineering of anti-ballistic missile defense systems in the context of political decisions, including the ABM Treaty, Reagan's Strategic Defense Initiative, and current policy debates.

3-5 units, Spr (Holloway, D; Postol, T)

IPS 244. U.S. Policy toward Northeast Asia

Case study approach to the study of contemporary U.S. policy towards Japan, Korea, and China. Historical evolution of U.S. foreign policy and the impact of issues such as democratization, human rights, trade, security relations, military modernization, and rising nationalism on U.S. policy. Case studies include U.S.-Japan trade tensions, anti-Americanism in Korea, and cross-straits relations between China and Taiwan.

5 units, Win (Armacost, M)

IPS 250. International Conflict: Management and Resolution

(Same as POLISCI 210R, POLISCI 310R. Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

5 units, Win (Weiner, A; Holloway, D)

IPS 260. Halving World Hunger by 2015: A Feasible Goal?

5 units, not given this year

IPS 261. Pathways Out of Rural Poverty

(Same as EARTHSYS 152, EARTHSYS 252, ECON 155B.) Determinants of rural poverty and historical pathways that have led the rural poor out of it. Policy perspectives: the macro level concerning overall economic growth and structural transformation; the sectoral level focusing on the role of agriculture in poverty reduction; and the household level focusing on individual characteristics and asset holdings, including human capital. The impact of globalization on pathways out of poverty and on agriculture and structural transformation in developing countries. Prerequisite: ECON 106 or 118 or EARTHSYS 180.

5 units, Spr (Timmer, C)

IPS 262. Contemporary Issues in Nuclear Energy Policy

Current nuclear energy trends related to economic growth and carbon-free energy production to reduce global warming. Topics include: trends, promise, and perils; environment; proliferation; and international security. Policy considerations for nuclear safety and safeguards, environmentally responsible management from raw uranium to spent fuel, international security and nonproliferation, economic competition with other energy sources, domestic and foreign politics, and international law and treaties. International guest expert lecturers.

5 units, Win (Staff)

IPS 263. Energy Cooperation in the Western Hemisphere

(Same as EARTHSYS 132, EARTHSYS 232.) Current political dynamics in major western hemisphere fossil fuel producers in N. America, the Andean region, the Southern Cone of S. America, and Trinidad and Tobago. The potential for developing sustainable alternative energy resources in the western hemisphere for export particularly biofuels, and its impact on agricultural policy, environmental protection, and food prices. The feasibility of creating regional energy security rings such as the proposed N. American Energy Security and Prosperity Partnership.

4 units, Spr (O'Keefe, T)

IPS 299. Directed Reading

IPS students only. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

IPS 300. Public Policy Colloquium

Presentations of techniques and applications of policy analysis by students, faculty, and guests, including policy analysis practitioners. May be repeated for credit.

1 unit, Aut (Stedman, S)

IPS 314S. Decision Making in U.S. Foreign Policy

(Same as POLISCI 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

INTERNATIONAL RELATIONS (INTNLREL) COURSES

For information on undergraduate programs in International Relations, including courses applicable to Comparative Political and Historical Analysis (CPHA), Comparative Culture and Society (CCAS), and Comparative and International Political Economy (CIPE) functional specifications, see the "International Relations" section of this bulletin.

UNDERGRADUATE COURSES IN INTERNATIONAL RELATIONS

INTNLREL 114D. Democracy, Development, and the Rule of Law
(Same as IPS 230, POLISCI 114D, POLISCI 314D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. GER:DB-SocSci
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 122A. The Political Economy of the European Union
EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.
5 units, Win (Crombez, C)

INTNLREL 130. Science, Technology, and Development
Global and sociological perspectives on science and technology expansion, comparing nations and regions. Social features such as gender equity; and social impact economic development strategies such as tech incubators, the triple helix model, and UN initiatives. Democratization, human rights, welfare of local populations, and national security. Policy issues, the digital divide, development debates, commodification of the public good, and notions of social change.
5 units, Spr (Drori, G)

INTNLREL 136R. Introduction to Global Justice
(Same as ETHICSOC 136R, POLISCI 136R, POLISCI 336.) Recent work in political theory on the ethics of international relations. Topics include human rights, global economic justice, and the problem of global poverty.
5 units, Spr (Staff)

INTNLREL 140A. International Law and International Relations
What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations. WIM
5 units, Aut (Lutomski, P)

INTNLREL 140B. Theories of International Law
Competing theories of international law, including approaches based on natural law, positivism, the Grotian tradition, realism, rational institutionalism, liberalism, social construction, and critical theory; evaluations based upon explanatory power, parsimony, and prescriptive implications. How international legal arguments are made through each theoretical perspective. Primary and secondary materials by international law theorists and political scientists. Term paper.
5 units, Spr (Steinberg, R)

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.
5 units, Spr (Patenaude, B)

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries
Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum
5 units, Aut (Bojic, J)

INTNLREL 147. The Political Economy of the Southern Cone of South America
Argentina, Brazil, Paraguay, Uruguay, Bolivia, and Chile. Post-WW II political economy developments and political relations. Impacts of military rule from the 60s into the 80s. Regional and international political developments that led to MERCOSUR in 1991, and subsequent expansion.
5 units, Aut (O'Keefe, T)

INTNLREL 148. Economic Integration of the Americas
Current attempts at economic integration throughout the Western Hemisphere, including the Andean Community, the Caribbean Common Market (CARICOM), the Latin American Integration Association (ALADI), MERCOSUR, the North American Free Trade Area (NAFTA), and the Central American Integration System (SICA). Emphasis is on practical applications of integration efforts and nuts-and-bolts issues of how integration efforts function.
5 units, Win (O'Keefe, T)

INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System
The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.
5 units, Win (Josling, T)

INTNLREL 150. The Arab-Palestinian Minority in Israeli Society
The ethnic and religious composition of Israel. Recent challenges to the primacy of the Jewish core of Israeli society; the status of the Arab-Palestinian minority in Israel. Issues include: the status of the Arabic language; the right to vote and run for office; allocation of state funds to minority projects and local governments; representation in decision making institutions; military service; and the Arab educational system. Political and legal dimensions of the minority status of Arab-Palestinians; impact of domestic Jewish/Palestinian politics on the Israeli/Arab international conflict.
5 units, Aut (Holzman-Gazit, Y)

INTNLREL 155. Counter Terrorism
Practical and theoretical perspectives. Topics include: coping with the threat on an offensive, preemptive, and defensive level; intelligence gathering; deterrence; and the challenges of international cooperation. Targeted killings, the boomerang effect, the democratic dilemma of counter-terrorism, and how to balance military measures with counter-motivation activities in preventing and thwarting terrorism.
5 units, Aut (Staff)

INTNLREL 156. Modern Terrorist Strategies
The nature and characteristics of the terrorism phenomenon and the modus operandi of international terrorist organizations, including Al Qaeda and its proxies. The definition of terrorism, terrorism as a

means of political violence, the suicide attack phenomenon, psychological warfare, media and public opinion, and terrorism and public resilience.
5 units, Win (Staff)

INTNLREL 191. IR Journal
1 unit, Aut (Schultz, K), Win (Schultz, K), Spr (Schultz, K)

INTNLREL 197. Directed Reading in International Relations
Open only to declared International Relations majors.
3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

INTNLREL 198. Senior Thesis
Open only to declared International Relations majors with approved senior thesis proposals.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries
Restricted to students in the CDDRL option of the International Relations honors program. Goal is to prepare students to do research and/or fieldwork to complete their thesis research. Main currents in democracy and development literature concerning how economic growth and democratization are related; how the rule of law supports these processes in countries undergoing change. Student presentations of thesis questions; student groups develop research problems and designs. May be repeated for credit.
3-5 units, Spr (Stoner-Weiss, K)

INTNLREL 200A. International Relations Honors Field Research
For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.
3 units, Spr (Drori, G)

INTNLREL 200B. International Relations Honors Seminar
Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.
3 units, Aut (Drori, G)

INTNLREL 206. Palestinian Nationalism, Past and Present
The Palestinian national movement and its role in the Arab-Israeli conflict. The roots of the movement in the Ottoman Empire, its growth through the British Mandate, the 1948 and1967 wars, the Intifada, and the Israeli-Palestinian peace process. Emphasis is on components which contributed to or delayed the growth of a distinct Palestinian identity, including Zionism.
5 units, Spr (Teitelbaum, J)

INTNLREL 207. Tribe, State, and Society in the Modern Middle East
The staying power of tribal identities and values in the Middle East. Examples include the Iraqi Sunni tribal insurgency against the U.S. The role of tribes in the formation of Middle Eastern states and how tribal values continue to impact social, political, and economic issues today.
5 units, Spr (Teitelbaum, J)

OVERSEAS STUDIES COURSES IN INTERNATIONAL RELATIONS

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BEIJING INTERNATIONAL RELATIONS COURSES

OSPBEIJ 11. Chinese Society in the Post-Mao Era
5 units, Aut (Walder, A)

OSPBEIJ 19. Population and Society in East Asia
4 units, Spr (Zhou, Y)

OSPBEIJ 24. China's Economic Development
5 units, Spr (Rozelle, S)

OSPBEIJ 43. Constitutional and Legal Reforms in Contemporary China
5 units, Spr (Wang, X)

OSPBEIJ 46. Introduction to Chinese Economy
5 units, Aut (Chen, D)

5 units, Aut (Micco, S)

INTRODUCTION TO THE HUMANITIES (IHUM) COURSES

For information on Introduction to the Humanities, see the "Introduction to the Humanities" section of this bulletin.

UNDERGRADUATE COURSES IN INTRODUCTION TO THE HUMANITIES

IHUM 2. Epic Journeys, Modern Quests
First of a twoquarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds. Compares conceptions of the afterlife. How traditions about the afterlife are created. GER:IHUM-2
4 units, Win (Harrison, R; Galvez, M)

IHUM 3. Epic Journeys, Modern Quests
Second of a two quarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the transformations or abandonment of the epic tradition in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-3
4 units, Spr (Harrison, R; Apostolides, J)

IHUM 4A. Mass Violence from Crusades to Genocides
First of a two quarter sequence. The evolution, varieties, causes, and logic of mass violence in premodern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions and ethnicity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER:IHUM-2
4 units, Win (Buc, P)

IHUM 4B. Mass Violence from Crusades to Genocides
Second of a two quarter sequence. The evolution, varieties, causes, and logic of mass violence in modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER:IHUM-3
4 units, Spr (Weiner, A)

IHUM 6A. World History of Science
Second of a two quarter sequence. The broad sweep of global science, from the Scientific Revolution throught recent triumphs in the physical and life sciences. The historicity of life and how science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER:IHUM-2
4 units, Win (Proctor, R)

IHUM 6B. World History of Science
First of a two quarter sequence. The broad sweep of global science, from the prehistoric roots of the oldest known technologies through the Scientific Revolution. The historicity of life and how science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER:IHUM-3
4 units, Spr (Proctor, R)

IHUM 7A. Rebellious Daughters and Filial Sons of the Chinese Family: Present and Past
First in a two quarter sequence. The family in its enduring role in shaping members of a community and citizens of society. The Chinese family as a case study. How family has been revolted against, broken up, critiqued, and transformed through social and political changes. The authority of the father, care of the mother, supportive or antagonistic relations of siblings, and the extension of these relations in kinship community and society. How notions of love, emotion, and gender play into the formation of the family and how family connects with interpersonal and social relations. GER:IHUM-2
4 units, Win (Wang, B)

IHUM 7B. Rebellious Daughters and Filial Sons of the Chinese Family: Present and Past
Second in a two quarter sequence. The family in its enduring role in shaping members of a community and citizens of society. The Chinese family as a case study. How family has been revolted against, broken up, critiqued, and transformed through social and political changes. The stern authority of the father, nourishing care of the mother, supportive or antagonistic relations of siblings, and the extension of these relations in kinship community and society. How notions of love, emotion, and gender play into the formation of the family and how family connects with interpersonal and social relations. GER:IHUM-3
4 units, Spr (Zhou, Y)

IHUM 10A. Humanistic Perspectives on Science
First in a two quarter sequence. A humanistic perspective views science itself as an essential part of human culture and explores the many relationships between scientific activity and religion, philosophy, society, politics, and the arts. Exploration of these relationships from a philosophical point of view, across a large part of the development of Western science from ancient Greece and the medieval period, through the scientific revolution of the 16th and 17th centuries, and up to recent times. GER:IHUM-2
4 units, Win (Friedman, M)

IHUM 10B. Humanistic Perspectives on Science
Second in a two quarter sequence. A humanistic perspective views science itself as an essential part of human culture and explores the many relationships between scientific activity and religion, philosophy, society, politics, and the arts. Exploration of these relationships from a philosophical point of view, across a large part of the development of Western science from ancient Greece and the medieval period, through the scientific revolution of the 16th and 17th centuries, and up to recent times. GER:IHUM-3
4 units, Spr (Longino, H)

IHUM 11A. Origins of the Modern World: Europe and Latin America
First in a two quarter sequence. The emergence of modernity from 1300 to the present. Demographic and religious transformations in Europe. The development of ideologies, social formations, and political institutions as they eventually crossed the Atlantic and were modified in the Americas. 20th-century shocks of social revolution and authoritarianism throughout Latin America. The creative/destructive tensions inherent in this long transformation. GER:IHUM-2
4 units, Win (Como, D)

IHUM 11B. Origins of the Modern World: Europe and Latin America
Second in a two quarter sequence. The emergence of modernity from 1300 to the present. Demographic and religious transformations in Europe. The development of ideologies, social formations, and political institutions as they eventually crossed the Atlantic and were modified in the Americas. 20th-century shocks of social revolution and authoritarianism throughout Latin America. The creative/destructive tensions inherent in this long transformation. GER:IHUM-3
4 units, Spr (Frank, Z)

IHUM 23A. The Fate of Reason
Two quarter sequence. The historical fate of Socrates' proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER:IHUM-2
4 units, not given this year

IHUM 23B. The Fate of Reason
Two quarter sequence. The historical fate of Socrates' proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER:IHUM-3
4 units, not given this year

IHUM 25A. Art and Ideas
First in a two quarter sequence. Art forms of theatre and dance explore fundamental questions about cultural, political and aesthetic issues surrounding the use of the body as an art medium. Examples of global performance from 19th to 21st centuries ranging from Romantic ballet to athletic experimental theatre. History and evolution of representing life through performance in a range of live and digital examples. GER:IHUM-2
4 units, Win (Ross, J; Rayner, A)

IHUM 25B. Art and Ideas
Second in a two quarter sequence. Art forms of theatre and danceexplore fundamental questions about cultural, political and aesthetic issues surrounding the use of the body as an art medium. Global performance from 19th to 21st centuries ranging from Romantic ballet to athletic experimental theatre. History and evolution of representing life through performance in a range of live and digital examples. GER:IHUM-3
4 units, Spr (Rayner, A; Ross, J)

IHUM 31A. Ancient Empires
First in a wo quarter sequence. A decisive place and period in world history: the Mediterranean basin from 800 B.C.E. to 400 C.E. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER:IHUM-2
4 units, Win (Morris, I)

IHUM 31B. Ancient Empires
Second in a two quarter sequence. A decisive place and period in world history: the Mediterranean basin from 800 B.C.E. to 400 C.E. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER:IHUM-3
4 units, Spr (Scheidel, W)

IHUM 34A. A Life of Contemplation or Action? Debates in Western Literature and Philosophy
First in a two quarter sequence. Literary treatments of the debate over the active versus the contemplative life from the classical to the modern era. Changing literary, historical and philosophical contexts. GER:IHUM-2
4 units, Win (Summit, J)

IHUM 34B. A Life of Contemplation or Action? Debates in Western Literature and Philosophy
Second in a two quarter sequence. Literary treatments of the debate over the active versus the contemplative life from the classical to the modern era. Changing literary, historical and philosophical contexts. GER:IHUM-3
4 units, Spr (Vermeule, B)

IHUM 39A. Inventing Classics: Greek and Roman Literature in Its Mediterranean Context
First in a two quarter sequence. The ancient Mediterranean world was as consumed with questions about the nature of human society and human existence as is present-day society. Sources include influential literary texts from Greece and Rome, and from other

cultures in the Mediterranean and the Near East, organized by literary genre. The origins of such genres. GER:IHUM-2
4 units, Win (McCall, M)

IHUM 39B. Inventing Classics: Greek and Roman Literature in Its Mediterranean Context
Second in a two quarter sequence. The ancient Mediterranean world was as consumed with questions about the nature of human society and human existence as is present-day society. Sources include influential literary texts from Greece and Rome, and from other cultures in the Mediterranean and the Near East, organized by literary genre. The origins of such genres. GER:IHUM-3
4 units, Spr (Staff)

IHUM 40A. World Archaeology and Global Heritage
First in a two quarter sequence. The impact of the past on the present, and of the present on the past: the role of the past in contemporary society, and of present-day archaeological research, management, and conservation in approaching the past. Topics include debates about the peopling of the New World, religious conflicts over heritage sites, and archaeology's roles in heritage and conflicts. Sources include archaeological sites, landscapes, architecture, objects, literary works, religious texts, films, political essays, and scientific articles. GER:IHUM-2
4 units, Win (Hodder, I)

IHUM 40B. World Archaeology and Global Heritage
Second in a two quarter sequence. The impact of the past on the present, and of the present on the past: the role of the past in contemporary society, and of present-day archaeological research, management, and conservation in approaching the past. Topics include debates about the peopling of the New World, religious conflicts over heritage sites, and archaeology's roles in heritage and conflicts. Sources include archaeological sites, landscapes, architecture, objects, literary works, religious texts, films, political essays, and scientific articles. GER:IHUM-3
4 units, Spr (Voss, B)

IHUM 57. Humans and Machines
Shifting boundaries between mechanical and human: how humans interact with machines, and how they may be conceived, designed, and manipulated as machines; how machines in turn reflect upon their human creators. What it means to think of the human body as a machine or as not a machine: what is a machine; what forms can machinery take; what is a living body; what have concepts such as machine, human, alive, and intelligent meant in different times and places; and how have their meanings changed? GER:IHUM-1
4 units, Aut (Lowood, H; Bukatman, S)

IHUM 58. Technological Visions of Utopia
How changes since Thomas More's Utopia was written, including advances in science and technology, have opened new possibilities for the good society. Focus is on works that consider how literary visions of society have evolved with the progress of science and technology. Readings include More and technologically determined visions of the late 20th century. GER:IHUM-1
4 units, Aut (Roberts, E; Robinson, O)

IHUM 58Q. Technology and Utopia: Refining the Vision
Stanford Introductory Seminar. Preference to sophomores. Students read utopian literature more broadly than in IHUM 58 including texts such as Edward Bellamy's Looking Backward and texts that offer greater diversity of vision. The nature of utopia. Students develop their own imaginative visions of the ideal society. Prerequisite: IHUM 58.
3 units, Aut (Robinson, O; Roberts, E)

IHUM 63. Freedom, Equality, Difference
Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER:IHUM-1
4 units, Aut (Palumbo-Liu, D; Koski, W; Reich, R)

IHUM 64. Journeys
Works spanning 2,300 years, diverse cultural and historical situations, and different forms and genres, which present essential aspects of the journey from birth to death. These texts trace moral, spiritual, and emotional passages within that one great journey, passages that challenge and transform people as they advance toward what poet Thomas Gray called the inevitable hour. GER:IHUM-1
4 units, Aut (Wolff, T; Yearley, L)

IHUM 65. Race and Reunion: American Memory and the Civil War
The place of slavery and the war in American cultural memory; its representation in literature, visual arts, music, high art, popular culture, and film. How the battle shifted from real to imagined locations. How stories told by writers and artists are shaped by memories and narratives of the past. Themes include competing ideas of race and nation, freedom and citizenship, personal and collective identity, and the purpose of literature and the arts. GER:IHUM-1
4 units, Aut (Wolf, B; Fishkin, S)

IHUM 66. Laws and Orders
The roles of law as a vehicle to establish order and as a tool with which customary order can be called into question. How norms may or may not apply equally in different cultural traditions. Five key texts represent watershed moments in the history of law as a force of regulation, order and normalization, but also as a source of emancipation: sometimes law imposes order, but the law can demand that we resist orders as well. GER:IHUM-1
4 units, Aut (Berman, R; Stacy, H)

IHUM 67. Truth and Morality
Investigates whether there is one truth or many; whether truth is in some way relative to particular groups of people, cultures, societies, or traditions in particular places and times; whether, as some philosophers have argued, human beings are not capable of knowing any truth whatsoever. Descriptive truths, the kinds of things physics, chemistry, biology, psychology, and economics claim to reveal, and normative or evaluative truths, the purported truths of morality, values, and rationality. GER:IHUM-1
4 units, Aut (Bobonich, C; Hussain, N)

IHUM 68A. Performing Religion
First in a two quarter sequence. Religion as a process of constructing meaning. Sources include philosophical texts, stories, rituals, dramatic performances, and other forms of religious expression. Historical contingency in the development of ideas and practices. Examples from Hinduism and Islam. GER:IHUM-2
4 units, Win (Hess, L; Bashir, S)

IHUM 68B. Performing Religion
Second in a two quarter sequence. Religion as a process of constructing meaning. Sources include philosophical texts, stories, rituals, dramatic performances, and other forms of religious expression. Historical contingency in the development of ideas and practices. Examples from Judaism and Buddhism. GER:IHUM-3
4 units, Spr (Fonrobert, C; Bielefeldt, C)

ITALIAN GENERAL (ITALGEN) COURSES

These courses are open to all undergraduates and graduate students, are taught in English, and do not require a knowledge of Italian. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in Italian, see the "French and Italian" section of this bulletin. For courses in Italian language instruction, see "Italian Language" courses section of this bulletin.

UNDERGRADUATE COURSES IN ITALIAN GENERAL

ITALGEN 41N. Imagining Italy
Stanford Introductory Seminar. Preference to freshmen. Literary responses to Italy by writers in English during the past hundred years

and how they continue to constuct myths of Italy. How these myths have been transformed into commodities in consumer culture, making Italy a profitable fiction. Authors include Hawthorne, Howells, James, Wharton, Forster, Unsworth, Hellenga, and Mayes. GER:DB-Hum

3-4 units, Spr (Springer, C)

ITALGEN 149. New Frontiers in Italian Cinema
A new generation of Italian filmmakers who examine the contradictory encounters between Italians and the migrant others in contemporary Italy. Critical texts from film studies, gender studies, ethnic and cultural studies, psychoanalysis, and history. I English; films, in Italian with English subtitles, by Amelio, Ozpetek, Munzi, Garrone, Melliti, Tornatore, and Giordana.

3-5 units, Spr (Nathan, V)

ITALGEN 181. Philosophy and Literature
Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Vermeule, B)

GRADUATE COURSES IN ITALIAN GENERAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

ITALGEN 204. Love Songs
(Same as FRENGEN 204.) Medieval love lyric in the old Occitan, Italian, middle high German, and Galician-Portuguese traditions, focusing on deictic address, corporeal and metaphysical subjectivity, the female voice, dialogue songs of ambivalent gender, and the modern translation and reception of the troubadour tradition. Poets include Sappho, Bernart de Ventadorn, La Comtessa de Dia, Walther von der Vogelweide, Dante, Petrarch, Pound, Larkin, and Neruda.

3-5 units, Aut (Galvez, M)

ITALGEN 232. Time of Latency: Western Cultures in the Decade After 1945
(Same as COMPLIT 232A, FRENGEN 232.) Retrospective accounts and contemporary experience converge in the description of the decade following 1945 as a period of quietude that seemed to repress an unknown trauma. Goal is to reconstruct the mood of this historical moment and its relationship to the early 21st century. Sources include canonical texts and everyday documents from different national and cultural contexts. Advanced undergrads require consent of instructor.

3-5 units, Aut (Gumbrecht, H)

ITALGEN 238. Futurisms
(Same as ARTHIST 248, COMPLIT 238.) From its foundation in 1909 through WW II, futurism developed into the first truly international cultural-political avant garde. Its aim was the revolutionary transformation of all spheres of life. The movement's manifestations in Italy, Russia, France, Spain, Latin America, and Eastern Europe. Topics: machines and culture; visual poetics and war; futurism's complex ties to bolshevism and fascism. Media: poetry, performance, music, painting, photography, radio, and film. Writers include: Marinetti, Mayakovsky. Visual artists include: Boccioni, Bragaglia, Russolo, Malevich, Lissitzky.

5 units, Win (Schnapp, J; Gough, M)

ITALGEN 264E. Petrarch and Petrarchism
(Same as COMPLIT 216.) The works of Petrarch (1304-1374), acknowledged as the founder of Renaissance humanism, and a bibliophile, collector of manuscripts, and devotee of erudition. How he dedicated his life to harmonizing the Christian faith with classical learning. Sources include his Latin moral works, epistles, epics, and treatises on illustrious men, and the Triumphs and Canzoniere .

5 units, Aut (Schnapp, J)

ITALGEN 288. Decadence and Modernism from Mallarmé to Marinetti
(Same as FRENGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of symbolism and modernism. Readings include theories of decadence and examples of symbolist and modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, Spr (Wittman, L)

ITALGEN 369. Introduction to Graduate Studies: Criticism as Profession
(Same as COMPLIT 369, FRENGEN 369, GERLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, Aut (Berman, R)

ITALGEN 395. Philosophical Reading Group
(Same as COMPLIT 359A, FRENGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut (Gumbrecht, H), Win (Gumbrecht, H), Spr (Gumbrecht, H)

OVERSEAS STUDIES COURSES IN ITALIAN GENERAL

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

FLORENCE ITALIAN GENERAL COURSES

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema

5 units, Win (Campani, E)

OSPFLOR 54. High Renaissance and Maniera

5 units, Spr (Verdon, T)

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image

4 units, Spr (Campani, E)

OSPFLOR 134F. Modernist Italian Cinema

5 units, Aut (Campani, E)

ITALIAN LANGUAGE (ITALLANG) COURSES

Students who have never studied Italian before should enroll in ITALLANG 1.Students who have had some training in Italian before entering Stanford must take a placement test. Part I (written) of the placement test must be taken online during the summer, followed by Part II (oral), to be administered on campus September 17, 2008. Consult the Language Center or http://language.stanford.edu/ for further information. Completion of ITALLANG 2A, 3, or 5C fulfills the University foreign language requirement. Students may continue with second-year Italian (20, 21, or 21A) or other higher level courses upon recommendation of the coordinator. A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN ITALIAN LANGUAGE

ITALLANG 1. First-Year Italian, First Quarter
All-in-Italian communicative and interactive approach. Emphasis is on the development of authentic discourse in appropriate cultural contexts. Reading and listening to authentic materials, written and oral presentations, and conversational practice. Language lab, multimedia, and online activities. 3 fulfills the University language requirement.
5 units, Aut (Tennen, D), Win (Tempesta, G), Spr (Gelmetti, S)

ITALLANG 1A. Accelerated First-Year Italian, Part A
Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: placement tests or consent of instructor.
5 units, Aut (Baldocchi, M), Win (Cellinese, A)

ITALLANG 2. First-Year Italian, Second Quarter
Continuation of 1. Prerequisite: 2 or equivalent.
5 units, Aut (Cellinese, A), Win (Tennen, D), Spr (Tempesta, G)

ITALLANG 2A. Accelerated First-Year Italian, Part B
Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: placement tests and consent of instructor.
5 units, Win (Baldocchi, M), Spr (Cellinese, A)

ITALLANG 3. First-Year Italian, Third Quarter
Continuation of 2. Prerequisite: 2 or equivalent.
5 units, Aut (Tempesta, G), Win (Cellinese, A), Spr (Tennen, D)

ITALLANG 5A. Intensive First-Year Italian, Part A
Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
5 units, Sum (Devine, M)

ITALLANG 5B. Intensive First-Year Italian, Part B
Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
5 units, Sum (Staff)

ITALLANG 5C. Intensive First-Year Italian, Part C
Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
5 units, Sum (Lopez, N)

ITALLANG 20. Intermediate Oral Communication: Italy Today
Second-year conversation based on movie clips, slide shows, and other authentic materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: first-vear Italian or consent of coordinator.
3 units, Aut (Tempesta, G), Win (Tempesta, G), Spr (Tempesta, G)

ITALLANG 21. Second Year Italian, First Quarter
Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking competence based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.
4 units, Aut (McCarty, A)

ITALLANG 21A. Accelerated Second-Year Italian, Part A
Completes second-year sequence in two rather than three quarters. Prerequisite: 2A, 3, or consent of coordinator.
5 units, Win (Coggeshall, E), Spr (Baldocchi, M)

ITALLANG 22. Second-Year Italian, Second Quarter
Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking competence based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.
4 units, Win (McCarty, A)

ITALLANG 22A. Accelerated Second-Year Italian, Part B
Continuation of 21A. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 21A or equivalent, or consent of coordinator.
5 units, Aut (Baldocchi, M), Spr (Baldocchi, M)

ITALLANG 23. Second-Year Italian, Third Quarter
Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking competence based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.
4 units, Spr (McCarty, A)

ITALLANG 99. Language Specials
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ITALLANG 101. Advanced Oral Communication: Italian Language Through Opera
For Florence returnees or those who have completed second-year Italian. Use of opera excerpts by Leoncavallo, Puccini, Rossini, and Verdi to improve communication skills and review language functions. Emphasis is on listening, speaking, conversation, and debate. Prerequisites: second-year Italian and OSPFLOR 66, or consent of coordinator.
3 units, Aut (Cellinese, A)

ITALLANG 102. Advanced Oral Communication: Italian Contemporaty Cinema
For Florence returnees or those who have completed second-year Italian. Use of movie sequences by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on speaking, conversation, and debate. Prerequisites: second-year Italian and OSPFLOR 66, or consent of coordinator.
3 units, Win (Gelmetti, S)

ITALLANG 103. Advanced Oral Communication: Italian Classic Cinema
For Florence returnees or those who have completed second-year Italian. Use of classical movie sequences by Italian film directors such as Antonioni, De Sica, Fellini, Rossellini, and Visconti to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisites: second-year Italian or OSPFLOR 21F, 22F or 31F, or consent of coordinator.
3 units, Spr (Cellinese, A)

ITALLANG 113. Italian Cultural Studies
Literature, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or consent of coordinator.
3-4 units, Aut (Gelmetti, S)

ITALLANG 114. Advanced Stylistics and Composition
Goal is proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: second-year Italian or consent of coordinator.
3-4 units, Win (Baldocchi, M)

ITALLANG 115. Academic and Creative Writing
Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: second-vear Italian or consent of coordinator. WIM
3-4 units, Spr (Baldocchi, M)

ITALLANG 126. Italy and Italians Today
May be repeated once for credit.
2 units, Aut (Coggeshall, E), Win (Coggeshall, E), Spr (Coggeshall, E)

GRADUATE COURSES IN ITALIAN LANGUAGE

For graduate students only.

ITALLANG 50. Reading Italian
Accelerated. For graduate students seeking to meet the University reading requirement for advanced degrees; seniors require consent of instructor. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.
3 units, Win (Gelmetti, S)

ITALLANG 205A. Intensive First-Year Italian
For Stanford graduate students restricted to 9 units. Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
3-5 units, not given this year

ITALLANG 205C. Intensive First-Year Italian
For Stanford graduate students restricted to 9 units. Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
3-5 units, not given this year

ITALLANG 394. Graduate Studies in Italian Conversation
Prerequisite: consent of instructor.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

ITALLANG 395. Graduate Studies in Italian
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN ITALIAN LANGUAGE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

FLORENCE ITALIAN LANGUAGE COURSES

OSPFLOR 21F. Second-Year Italian, First Quarter
4 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

OSPFLOR 22F. Second-Year Italian, Second Quarter
4 units, Win (Quercioli, F)

OSPFLOR 31F. Advanced Italian Conversation
4 units, Aut (Quercioli, F), Spr (Quercioli, F)

ITALIAN LITERATURE (ITALLIT) COURSES

These courses typically require knowledge of Italian. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in Italian, see the "Italian" section of this bulletin. For courses in Italian language instruction, see "Italian Language" courses section of this bulletin.

UNDERGRADUATE COURSES IN ITALIAN LITERATURE

ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca
The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante's *Vita Nuova*, and Petrarca's *Canzoniere*; prose such as stories from Boccaccio's *Decameron*. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM
4 units, Aut (Webb, H)

ITALLIT 128. The Italian Renaissance and the Path to Modernity
The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM
4 units, Win (Ferri, S)

ITALLIT 129. Modern Italian History and Literature
The history of the Italian nation and national literary identity in the 19th and 20th centuries. The relationship between literary texts and their historical context from the Risorgimento to the Resistance. Focus is on the romantic lyric, futurism, fascism, and the changing status of women. Authors include Foscolo, Leopardi, D'Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: ITALLANG 22A or equivalent. GER:DB-Hum, WIM
4 units, Spr (Springer, C)

ITALLIT 189A. Honors Research
Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

ITALLIT 189B. Honors Research
Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

ITALLIT 199. Individual Work
1-12 units, Aut (Staff), Win (Staff), Spr (Staff)

GRADUATE COURSES IN ITALIAN LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

ITALLIT 275. Politics and Religion in Modern Italian Fiction and Film
How do modern Italian fiction and film reflect Italy's 19th-century unification as a nation which coincided with a radical change in the Catholic Church's power? WW I, fascism, postwar reconstruction, the economic miracle, and current disillusionment and their connections to secularization and the search for a modern Italian culture and aesthetic. Authors include d'Annunzio, Borgese, Silone, Calvino, Pasolini, Tabucchi, and Bellocchio.
3-5 units, Win (Wittman, L)

ITALLIT 281. Italian Poetry Across the Ages
Poets include Dante, Cavalcanti, Petrarch, Michelangelo, Marino, Foscolo, Leopardi, Pascoli, Carducci, D'Annunzio, Ungaretti, Montale, Zanzotto, and Magrelli.
3-5 units, Aut (Harrison, R)

ITALLIT 289. Italian Postmodernism
Was there an epochal change in the history of Italian society as in other countries in the course of the 20th century? How should scholars name and describe this new cultural landscape? Multidisciplinary perspective with readings in the history of culture, sociology, and literary and art history. Writers include Eco, Calvino, and Tabucchi. In Italian.
3-5 units, Win (Ceserani, R)

ITALLIT 299. Individual Work
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ITALLIT 399. Individual Work
For graduate students working on a special project or predissertation research. May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANESE GENERAL (JAPANGEN) COURSES

These courses are open to all undergraduates and graduate students, are taught in English, and do not require a knowledge of an Asian language. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For possible future offerings, see http://www.stanford.edu/dept/asianlang/courses/. For information on undergraduate and graduate programs in Japanese and other programs in the Department of Asian Languages, see the "Asian Languages" section of this bulletin. For courses in Japanese language instruction, see "Japanese Language" courses section of this bulletin.

UNDERGRADUATE COURSES IN JAPANESE GENERAL

JAPANGEN 51. Japanese Business Culture
(Same as JAPANGEN 251.) Japanese group dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Strategies for managing intercultural differences.
3-5 units, not given this year

JAPANGEN 71N. Language and Gender in Japan: Myths and Reality
Stanford Introductory Seminar. Preference to freshmen. Ideology and practice of gender in the Japanese society as reflected in and created by stylistic choices in the Japanese language. Past and present speech styles of women and men, speech situations, age, class, identities of the individual speakers and their relationships with others. How belief and reality are refracted through mass media and fictional representations. Comparisons with similar phenomena in other cultures. GER:DB-SocSci, EC-Gender
4 units, Spr (Matsumoto, Y)

JAPANGEN 87. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868
(Same as ARTHIST 187, ARTHIST 387.) Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan. GER:DB-Hum, EC-GlobalCom
4 units, Win (Takeuchi, M)

JAPANGEN 92. Traditional East Asian Culture: Japan
Required for Chinese and Japanese majors. Introduction to Japanese culture in historical context. Previous topics include:shifting paradigms of gender relations and performance, ancient mythology, court poetry and romance, medieval war tales, and the theaters of Noh, Bunraku, and Kabuki. GER:DB-Hum, EC-GlobalCom
5 units, Aut (Takeuchi, M)

JAPANGEN 120. Imperial Japan Between East and West: Cultural History of Japanese Imperialism
From the mid 19th century to the present. The emergence of modern Japanese culture and identity in the context of Western aggression and Japan's overseas expansion in Asia. Topics include representations of colonial others in literature and popular culture, construction of national and imperial identity between Asia and the West, and the postwar legacy of Japanese imperialism. Sources include novels, essays, popular culture, film, comics, and woodblock prints.
4 units, Win (Haag, A)

JAPANGEN 138. Survey of Modern Japanese Literature in Translation
(Same as JAPANGEN 238.) Required for Japanese majors. Japanese literature since 1868. Authors include Futabatei Shimei, Higuchi Ichiyo, Natsume Soseki, and Yoshimoto Banana. GER:DB-Hum, EC-GlobalCom, WIM
2-4 units, Spr (Reichert, J)

JAPANGEN 149. Screening Japan: Issues in Crosscultural Interpretation
(Same as JAPANGEN 249.) Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required. GER:DB-Hum
3-4 units, not given this year

JAPANGEN 160. Early Modern Japan: The Floating World of Chikamatsu
(Same as JAPANGEN 260.) Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.
4 units, Spr (Cook, A)

GRADUATE COURSES IN JAPANESE GENERAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

JAPANGEN 200. Directed Reading in Asian Languages
For Japanese literature. Prerequisite: consent of instructor.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANGEN 201. Teaching Japanese Humanities
Prepares graduate students to teach humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.
1 unit, Aut (Takeuchi, M)

JAPANGEN 220. The Situation of the Artist in Traditional Japan
(Same as ARTHIST 485.) Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons' desires and artists' modes of production.
5 units, not given this year

JAPANGEN 238. Survey of Modern Japanese Literature in Translation
(Same as JAPANGEN 138.) Required for Japanese majors. Japanese literature since 1868. Authors include Futabatei Shimei, Higuchi Ichiyo, Natsume Soseki, and Yoshimoto Banana.
2-4 units, Spr (Reichert, J)

JAPANGEN 249. Screening Japan: Issues in Crosscultural Interpretation
(Same as JAPANGEN 149.) Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required. GER:DB-Hum
3-4 units, not given this year

JAPANGEN 251. Japanese Business Culture
(Same as JAPANGEN 51.) Japanese group dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Strategies for managing intercultural differences.
3-5 units, not given this year

JAPANGEN 260. Early Modern Japan: The Floating World of Chikamatsu
(Same as JAPANGEN 160.) Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.
4 units, Spr (Cook, A)

JAPANESE LANGUAGE (JAPANLNG) COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written and listening) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 17, 2008. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN JAPANESE LANGUAGE

JAPANLNG 1. First-Year Modern Japanese
Foundation in grammar, reading, and composition. 150 Kanji characters introduced.
5 units, Aut (Busbin, K)

JAPANLNG 2. First-Year Modern Japanese
Foundation in grammar, reading, and composition. 150 Kanji characters introduced.
5 units, Win (Busbin, K)

JAPANLNG 3. First-Year Modern Japanese
Foundation in grammar, reading, and composition. 150 Kanji characters introduced.
5 units, Spr (Busbin, K)

JAPANLNG 5. Intensive First-Year Japanese Language
Equivalent to 7B, 8B, and 9B combined. See http://www.stanford.edu/group/japanese/summer.
7-8 units, Sum (Yasumoto Magnani, E)

JAPANLNG 7A. First-Year Japanese Language, Culture, and Communication A, First Quarter
For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji tutorials. See http://www.stanford.edu/group/japanese/jlcca.htm.
3 units, Aut (Yasumoto Magnani, E)

JAPANLNG 7B. First-Year Japanese Language, Culture, and Communication B, First Quarter
First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See http://www.stanford.edu/group/japanese/1stB.htm.
5 units, Aut (Lipton, H)

JAPANLNG 8A. First-Year Japanese Language, Culture, and Communication A, Second Quarter
For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji tutorials. See http://www.stanford.edu/group/japanese/jlcca.htm.
3 units, Win (Yasumoto Magnani, E)

JAPANLNG 8B. First-Year Japanese Language, Culture, and Communication B, Second Quarter
First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See http://www.stanford.edu/group/japanese/1stB.htm.
5 units, Win (Lipton, H; Yasumoto Magnani, E)

JAPANLNG 9A. First-Year Japanese Language, Culture, and Communication A, Third Quarter
For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji tutorials. See http://www.stanford.edu/group/japanese/jlcca.htm.
3 units, Spr (Yasumoto Magnani, E)

JAPANLNG 9B. First-Year Japanese Language, Culture, and Communication B, Third Quarter
First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See http://www.stanford.edu/group/japanese/1stB.htm.
5 units, Spr (Lipton, H; Yasumoto Magnani, E)

JAPANLNG 17A. Second-Year Japanese Language, Culture, and Communication A, First Quarter
Continuation of 9A. For students who want to build communication skills in limited time. Prerequisite: 9A or equivalent.
3 units, Aut (Nakamura, K)

JAPANLNG 17B. Second-Year Japanese Language, Culture, and Communication B, First Quarter
Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 9B. See http://www.stanford.edu/group/japanese/2ndB2.htm.
5 units, Aut (Lowdermilk, M; Nakamura, K)

JAPANLNG 18A. Second-Year Japanese Language, Culture, and Communication A
Continuation of 9A. For students who want to build communication skills in limited time. See http://www.stanford.edu/group/ll/jlcc/2ndB2.htm. Prerequisite: 9A or equivalent.
3 units, Win (Arao, F)

JAPANLNG 18B. Second-Year Japanese Language, Culture, and Communication B, Second Quarter
Goal is spoken and written expression of advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 9B. See http://www.stanford.edu/group/japanese/2ndB2.htm.
5 units, Win (Lowdermilk, M; Nakamura, K)

JAPANLNG 19A. Second-Year Japanese Language, Culture, and Communication A
Continuation of 18A. See http://www.stanford.edu/group/ll/jlcc/2ndB2.htm. Prerequisite: 9A or equivalent.
3 units, Spr (Arao, F)

JAPANLNG 19B. Second-Year Japanese Language, Culture, and Communication B, Third Quarter
Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 19A. See http://www.stanford.edu/group/japanese/2ndB2.htm.
5 units, Spr (Lowdermilk, M; Nakamura, K)

JAPANLNG 20. Intensive Second-Year Japanese
(Same as JAPANLNG 20G.) Equivalent to 17B,18B,19B combined. Prerequisite 9B or equivalent. See http://www.stanford.edu/group/japanese/summer.
7-8 units, not given this year

JAPANLNG 21. Second-Year Modern Japanese, First Quarter
Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.
5 units, Aut (Arao, F)

JAPANLNG 22. Second-Year Modern Japanese, Second Quarter
Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent
5 units, Win (Arao, F)

JAPANLNG 23. Second-Year Modern Japanese
Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.
5 units, Spr (Arao, F)

JAPANLNG 27. Intermediate Japanese Conversation
Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.
2 units, Aut (Busbin, K)

JAPANLNG 28. Intermediate Japanese Conversation
Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.
2 units, Win (Busbin, K)

JAPANLNG 29. Intermediate Japanese Conversation
Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.
2 units, Spr (Busbin, K)

JAPANLNG 51. Intermediate to Advanced Japanese Conversation
Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program May be able to take concurrently with 17B, 18B, and 19B. Prerequisite: 9K, 19B, or consent of instructor.
2 units, Aut (Lowdermilk, M)

JAPANLNG 52. Intermediate to Advanced Japanese Conversation
Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program May be able to take concurrently with 17B, 18B, and 19B. Prerequisite: 9K, 19B, or consent of instructor.
2 units, Win (Lowdermilk, M)

JAPANLNG 53. Intermediate to Advanced Japanese Conversation
Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program May be able to take concurrently with 17B, 18B, and 19B. Prerequisite: 9K, 19B, or consent of instructor.
2 units, Spr (Lowdermilk, M)

JAPANLNG 99. Language Specials
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANLNG 121. Advanced Japanese Conversation, First Quarter
Focus is on improving speaking skills to narrate and describe things in detail. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.
2 units, Aut (Lipton, H)

JAPANLNG 122. Advanced Japanese Conversation, Second Quarter
Focus is on improving speaking skills to narrate and describe things in detail. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.
2 units, Win (Lipton, H)

JAPANLNG 123. Advanced Japanese Conversation, Third Quarter
Focus is on improving speaking skills to narrate and describe things in detail. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor
2 units, Spr (Lipton, H)

JAPANLNG 127B. Third-Year Japanese Language, Culture, and Communication B, First Quarter
Emphasis is on spontaneous conversations and expressing abstract thoughts. Materials include Japanese media, literature, and TV. Cultural and social topics related to Japan and its people. Prerequisite: 19B. See http://www.stanford.edu/group/japanese/3rdB.htm.
5 units, Aut (Tomiyama, Y; Lowdermilk, M)

JAPANLNG 128B. Third-Year Japanese Language, Culture, and Communication B, Second Quarter
Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. See http://www.stanford.edu/group/japanese/3rdB.htm. Prerequisite: 19B.
5 units, Win (Tomiyama, Y)

JAPANLNG 129B. Third-Year Japanese Language, Culture, and Communication B, Third Quarter
Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. See http://www.stanford.edu/group/japanese/3rdB.htm. Prerequisite: 19B.
5 units, Spr (Tomiyama, Y)

GRADUATE COURSES IN JAPANESE LANGUAGE

For graduate students only.

JAPANLNG 20G. Intensive Second-Year Japanese
(Same as JAPANLNG 20.) Equivalent to 17B,18B,19B combined. Prerequisite 9B or equivalent. See http://www.stanford.edu/group/japanese/summer.
7-8 units, not given this year

JAPANLNG 32G. Accelerated Beginning Business Japanese II
For GSB students only. Limited enrollment.
4 units, Spr (Staff)

JAPANLNG 33G. Accelerated Beginning Business Japanese III
For GSB students only. Limited enrollment.
4 units, Aut (Staff)

JAPANLNG 200. Directed Reading
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

JAPANLNG 211. Advanced Japanese, First Quarter
Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.
3-5 units, Aut (Nakamura, K)

JAPANLNG 212. Advanced Japanese, Second Quarter
Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.
3-5 units, Win (Nakamura, K)

JAPANLNG 213. Advanced Japanese, Third Quarter
Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.
3-5 units, Spr (Nakamura, K)

JAPANLNG 394. Graduate Studies in Japanese Conversation
Prerequisite: consent of instructor.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

JAPANLNG 395. Graduate Studies in Japanese
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN JAPANESE LANGUAGE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

KYOTO JAPANESE LANGUAGE COURSES

OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B
5 units, Spr (Staff)

OSPKYOTO 17K. Second-Year Japanese Language, Culture, and Communication B
5 units, Spr (Staff)

OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B
5 units, Spr (Staff)

OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B
5 units, Spr (Staff)

JAPANESE LITERATURE (JAPANLIT) COURSES

These courses typically require knowledge of Japanese. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For possible future offerings, see http://www.stanford.edu/dept/asianlang/courses/. For information on undergraduate and graduate programs in Japanese and other programs in the Department of Asian Languages, see the "Asian Languages" section of this bulletin. For courses in Japanese language instruction, see "Japanese Language Courses" section of this bulletin.

UNDERGRADUATE COURSES IN JAPANESE LITERATURE

JAPANLIT 146. Introduction to Premodern Japanese
(Same as JAPANLIT 246.) Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
3-5 units, Win (Carey, C)

JAPANLIT 157. Points in Japanese Grammar
(Same as JAPANLIT 257.) Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent. GER:DB-SocSci
4 units, Win (Matsumoto, Y)

JAPANLIT 170. The Tale of Genji and Its Historical Reception
(Same as JAPANLIT 270.) Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent. GER:DB-Hum
4 units, not given this year

JAPANLIT 189A. Honors Research
Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

JAPANLIT 189B. Honors Research
Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

JAPANLIT 199. Individual Reading in Japanese
Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.
1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN JAPANESE LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

JAPANLIT 200. Directed Reading in Japanese
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANLIT 202. Bibliographic and Research Methods in Japanese
The use of library and online resources for the study of Japanese literature, language, and culture. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.
5 units, Win (Kotas, F)

JAPANLIT 210. Orientalism, Occidentalism, Crossculturalism: Japan, China, and the West, Theory and Visual Culture
The relationship between China and Japan with reference to the hegemonic presence of the West. Texts that relate, re-read, negate, expand or diversify the concept of Orientalism. Readings include theoretical texts in postcolonial studies, gender issues, and visual culture. Sources include literature, film, and the arts.
4 units, Spr (Zohar, A)

JAPANLIT 235. Academic Readings in Japanese I
Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.
2-4 units, Aut (Matsumoto, Y)

JAPANLIT 246. Introduction to Premodern Japanese
(Same as JAPANLIT 146.) Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
3-5 units, Win (Carey, C)

JAPANLIT 247. Readings in Premodern Japanese
Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.
2-5 units, Spr (Reichert, J)

JAPANLIT 257. Points in Japanese Grammar
(Same as JAPANLIT 157.) Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent.
4 units, Win (Matsumoto, Y)

JAPANLIT 267. Readings in Sino-Japanese
Readings in Sino-Japanese (kambun) texts of the Edo and Meiji periods, with focus on grammar and reading comprehension. Prerequisite: 264 or equivalent.
2-4 units, Aut (Reichert, J)

JAPANLIT 270. The Tale of Genji and Its Historical Reception
(Same as JAPANLIT 170.) Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.
4 units, not given this year

JAPANLIT 287. Pictures of the Floating World: Images from Japanese Popular Culture
(Same as ARTHIST 287.) Printed objects produced during the Edo period (1600-1868), including the *Ukiyo-e* (pictures of the floating world) and lesser-studied genres such as printed books (*ehon*) and popular broadsheets (*kawaraban*). How a society constructs itself

through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles. Prerequisites: 2, 186, 187, 188.
5 units, Spr (Takeuchi, M)

JAPANLIT 296. Readings in Modern Japanese Literature
Works and topics vary each year. May be repeated for credit. Prerequisite: fourth-year Japanese or consent of instructor.
2-4 units, Win (Reichert, J)

JAPANLIT 299. Master's Thesis or Translation
A total of 5 units, taken in one or more quarters.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANLIT 381. Topics in Pragmatics and Discourse Analysis
Naturally occurring discourse (conversational, narrative, or written) and theoretical implications. Discourse of different age groups, expressions of identity and persona, and individual styles. May be repeated for credit.
2-4 units, Aut (Matsumoto, Y)

JAPANLIT 395. Early Modern Japanese Literature
May be repeated for credit. Prerequisite: 247.
3-5 units, not given this year

JAPANLIT 396. Modern Japanese Literature
May be repeated for credit. Prerequisite: JAPANLNG 213.
3-5 units, not given this year

JAPANLIT 399. Dissertation Research
For doctoral students in Japanese working on dissertations.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

JAPANLIT 400. Advanced Language Training
For students at the Yokohama Center. For more information, see the program description under the "Inter-University Center for Japanese Studies in Yokohama" section in the Stanford Bulletin.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

JEWISH STUDIES (JEWISHST) COURSES

For information on undergraduate programs in Jewish Studies, including a list of cognate courses applicable to an Individually Designed Major in Jewish Studies, see the "Jewish Studies" section of this bulletin.

GRADUATE COURSES IN JEWISH STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

JEWISHST 299A. Directed Reading in Yiddish, First Quarter
1-5 units, Aut (Staff)

KOREAN LANGUAGE (KORLANG) COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 17, 2008. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN KOREAN LANGUAGE

KORLANG 1. First-Year Korean, First Quarter
Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.
5 units, Aut (Kim, H)

KORLANG 2. First-Year Korean, Second Quarter
Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.
5 units, Win (Kim, H)

KORLANG 3. First-Year Korean, Third Quarter
Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.
5 units, Spr (Kim, H)

KORLANG 21. Second-Year Korean, First Quarter
More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.
3-5 units, Aut (Kim, H)

KORLANG 22. Second-Year Korean, Second Quarter
More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.
3-5 units, Win (Kim, H)

KORLANG 23. Second-Year Korean, Third Quarter
More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.
3-5 units, Spr (Kim, H)

KORLANG 101. Third-Year Korean, First Quarter
Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.
2-3 units, Aut (Staff)

KORLANG 102. Third-Year Korean, Second Quarter
Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.
2-3 units, Win (Staff)

KORLANG 103. Third-Year Korean, Third Quarter
Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.
2-3 units, Spr (Staff)

KORLANG 110. Korean Pronunciation and Intonation
Goal is intelligibility and fluency. Lab assignments. Prerequisite: 3 or consent of instructor.
1-2 units, Win (Kim, H)

KORLANG 130. Reading Korean
Contemporary literature and academic texts. Prerequisite: 103 or consent of instructor.
1-3 units, Aut (Kim, H)

KORLANG 141. Business Korean
Business-related vocabulary and cultural etiquette. Business letters, mock interviews, and resumes. May be repeated for credit. Prerequisite: 103 or consent of instructor.
2-3 units, Spr (Kim, H)

GRADUATE COURSES IN KOREAN LANGUAGE

For graduate students only.

KORLANG 200. Directed Reading in Korean
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

KORLANG 395. Graduate Studies in Korean
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

LATIN AMERICAN STUDIES (LATINAM) COURSES

For information on graduate programs in Latin American Studies, including a list of applicable cognate courses, see the "Latin American Studies" section of this bulletin.

UNDERGRADUATE COURSES IN LATIN AMERICAN STUDIES

LATINAM 197. Directed Individual Research
For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

LATINAM 198. Honors Thesis
Restricted to those writing an honors thesis in Latin American Studies.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

LATINAM 200. Seminar on Contemporary Issues in Latin American Studies
Required of Latin American Studies master's students each quarter. Guest scholars present analyses of major Latin American themes and topics. May be repeated for credit.
1 unit, Aut (Klein, H), Win (Klein, H), Spr (Klein, H)

LATINAM 201. Social Change in Latin America Since 1900
(Same as HISTORY 275F, HISTORY 375F, LATINAM 301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci
4-5 units, Aut (Klein, H)

GRADUATE COURSES IN LATIN AMERICAN STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

LATINAM 301. Social Change in Latin America Since 1900
(Same as HISTORY 275F, HISTORY 375F, LATINAM 201.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students.
4-5 units, Aut (Klein, H)

LATINAM 398. Master's Thesis
Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN LATIN AMERICAN STUDIES

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

MADRID LATIN AMERICAN STUDIES COURSES

OSPMADRD 22. Spain on Stage: Theater and Performance in 2009
5 units, Spr (Surwillo, L)

OSPMADRD 24. Spain and Africa through the Ages
3 units, Spr (Surwillo, L)

OSPMADRD 25. European Legal History
5 units, Aut (Herzog, T)

OSPMADRD 26. Issues in European Law
4 units, Aut (Herzog, T)

OSPMADRD 34. Modern Spain
5 units, Win (Herzog, T)

OSPMADRD 35. Issues in Spanish History
4 units, Win (Herzog, T)

OSPMADRD 40. Introduction to Literary and Cultural Analysis in the Spanish World
4 units, Aut (Tejerina-Canal, S)

OSPMADRD 41. Dissidence and Continuity: Spanish Theater, 1907 to the Present
4 units, Win (Tejerina-Canal, S)

OSPMADRD 42. A European Model of Democracy: The Case of Spain
5 units, Win (Bobillo de la Peña, F)

OSPMADRD 43. The Jacobean Star Way and Europe: Society, Politics and Culture
5 units, Spr (Larrañaga Zulueta, M)

OSPMADRD 45. Women in Art: Case Study in the Madrid Museums
4 units, Win (Doménech López, J)

OSPMADRD 67. Women in Spain: From Tradition to Postmodernity
5 units, Spr (Botella Ordinas, E)

OSPMADRD 72. Issues in Bioethics Across Cultures
5 units, Win (de Lora del Toro, P)

SANTIAGO LATIN AMERICAN STUDIES COURSES

OSPSANTG 10. Borges and Argentina
4-5 units, Win (Missana, S)

OSPSANTG 14. Women Writers of Latin America in the 20th Century
4-5 units, Aut (Missana, S)

OSPSANTG 17. Chilean Fiction of the 20th Century
4-5 units, Spr (Missana, S)

OSPSANTG 17. Chilean Fiction of the 20th Century
4-5 units, Spr (Missana, S)

OSPSANTG 45. The Cinema of the Chilean Transition (1990-2007)
3-5 units, Aut (Ruffinelli, J)

OSPSANTG 46. Topics in Chilean Cultural Expressions
3-5 units, Aut (Ruffinelli, J)

OSPSANTG 58. Living Chile: A Land of Extremes
5 units, Aut (Reid, S), Win (Reid, S)

OSPSANTG 62. Topics in Chilean History
4-5 units, Win (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America
4-5 units, Aut (Jaksic, I), Spr (Jaksic, I)

OSPSANTG 85. Marine Ecology of Chile and the South Pacific
5 units, Spr (Palma, A)

OSPSANTG 104X. Modernization and Culture in Latin America
5 units, Aut (Subercaseaux, B)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
5 units, Spr (Correa, G)

OSPSANTG 118X. Artistic Expression in Latin America
5 units, Win (Albornoz, C)

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
5 units, Spr (Munoz, O)

OSPSANTG 129X. Latin America in the International System
4-5 units, Win (Fuentes, C)

OSPSANTG 141X. Politics and Culture in Chile
5 units, Spr (Subercaseaux, B)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
5 units, Aut (Micco, S)

LAW (LAW) COURSES

Courses listed in the courses section under the LAW subject code are open to Stanford non-Law students with consent of instructor.

Each course indicates whether it is on the quarter or semester schedule. Non-Law students who register for courses with a LAW subject code are awarded quarter units upon completion of the course; semester unit values are converted into quarter unit values for non-Law students at the time of enrollment. Courses with non-LAW subject codes that are crosslisted with LAW courses have quarter-based units, and no conversion is performed for undergraduates or graduate students. See the respective department's section of this bulletin for such unit values.

Students intending to enroll in any course with a LAW subject code must consult the School of Law Registrar's Office in the Stanford Law School Administration Building, room 100, or see http://www.law.stanford.edu/school/offices/registrar. For additional detailed course information, see the Office of the Law School web site at http://www.law.stanford.edu/program/courses. For information on the School of Law, see the "Law" section of this bulletin.

GRADUATE COURSES IN LAW

The following School of Law courses are open to qualified graduate students in other departments of the University with consent of instructor.

LAW 222. Legal Research: Advanced
Open to Law and Stanford graduate students. Preparation for research in practice and clerkships. Emphasis is on cost-effective research, legislative analysis, administrative law research, and open-access resources. How to evaluate sources and use them effectively, expand skills in primary and secondary U.S. legal sources, develop skills for effective online research, and use non-legal information resources. Final project.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Wayne, E; Lomio, J; Wilko, K; Wilson, G), Win quarter schedule (Lomio, J; Wilko, K; Wayne, E; Wilson, G)

LAW 227. The Political Economy of Energy Policy
Theories of political economy that explain policy choices and behavior in energy markets in the U.S. and overseas. Topics include: collective action and public choice; state behavior and sovereignty; international political economy; behavior of complex organizations; monopoly and regulation.Case study applications, such as U.S. policy on ethanol, safety regulation at nuclear power plants, and international collective efforts to manage global warming. Prerequisite: familiarity with energy systems and policies.

2.5 semester units (3.75 quarter units), Win quarter schedule (Victor, D)

LAW 233. Antitrust
Legal and economic concepts of competition and monopoly; policy and judicial interpretations of the Sherman and Clayton acts and their applications to business practices and industrial structure. Ethical considerations.

3.4 semester units (5.1 quarter units), Aut quarter schedule (Koob, C)

LAW 236. Art and the Law
International law and the fate of works of art in wartime. International trade in stolen and illegally exported art and antiquities. Artist rights such as moral right, copyright, and resale right. Artistic freedom and its limits. Artist relationships with dealers, commissions, live-work space, toxic hazards, taxes, estate planning, and legal services . The collector. Counterfeit art. The legal character and obligations of museums, and their trustees, directors, and staff. The National Endowment for the Arts and Humanities.

2.5 semester units (3.75 quarter units), Win quarter schedule (Merryman, J)

LAW 238. Administrative Law
Administrative agencies interpret statutes, promulgate regulations, and adjudicate disputes, thereby affecting employment, food and drug safety, the environment, energy markets, telecommunications, and immigration. Surveys the law of the administrative state, considering rationales for delegation to administrative agencies, procedural and substantive constraints of agency decision-making, and the judicial review of agency actions.

3.4 semester units (5.1 quarter units), Aut quarter schedule (Ho, D)

LAW 243. Bayesian Statistics and Econometrics
Linear and nonlinear regression, covariance structures, panel data, qualitative variable models, nonparametric and semiparametric methods, time series, Bayesian model averaging and variable selection. Bayesian methodology including Markov chain Monte Carlo methods, hierarchical models, model checking, mixture models, empirical Bayes approaches, approximations, and computational issues and foundations. Prerequisite: graduate-level econometrics or equivalent.

2-6 semester units (3-9 quarter units), Aut quarter schedule (Strnad, J)

LAW 248. Corporate Reorganization
Reorganization of a fictitious, financially distressed company under chapter 11 of the Bankruptcy Code, including: out-of-court workout; chapter 11 filing; chapter 11 operating issues; and the negotiation, formulation, and confirmation of a plan of reorganization. Developments in actual pending chapter 11 cases, through media reports.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Ray, S)

LAW 262. Corporate Finance I
For those with little background in finance; not open to J.D. or M.B.A. students. Financial concepts and analytical tools needed to make financial decisions and value securities. Capital structures, the design of corporate securities, corporate transactions, executive compensation, and bankruptcy proceedings. Focus is on problem solving.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Ishii, J)

LAW 269. Foreign Affairs and the Constitution
Focus is on issues of separation of powers and federalism. Topics such as the treaty power, war powers, and customary international law. Current controversies, including those arising from the war on terrorism, Supreme Court cases related to the death penalty and the Vienna Convention on Consular Relations, the Alien Tort Claims Act, and international trade agreements such as the WTO and NAFTA. Recommended: LAW 283.

2.5 semester units (3.75 quarter units), Win quarter schedule (Martinez, J)

LAW 277. Economic Analysis of Law
(Same as PUBLPOL 202B.) Core course for Public Policy master's students. How legal rules and institutions can correct market failures.The economic function of contracts; role of legal remedies to resolve disputes when contracts fail. The choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors such as regulatory authorities. Economics of litigation; how private incentives to bring lawsuits differ from the social value of litigation. Economic motives to commit crimes; optimal governmental response to crime. Prerequisites: intermediate-level microeconomics; some calculus.

3.4 semester units (5.1 quarter units), Win quarter schedule (Polinsky, M)

LAW 283. Federal Courts
The role of the federal courts in the American system of federalism and separation of powers, and their role in the development of substantive federal law and constitutional rights. Historical context, especially the social, political, and legal movements, in response to which the federal courts have developed. Traditional aspects of federal court jurisprudence. Interdisciplinary readings.

3.4 semester units (5.1 quarter units), Win quarter schedule (Spaulding, N)

LAW 285. International Trade Regulation
Law and policy of the WTO system and related national laws. Topics include the relationship between international and domestic law, the international dispute resolution system, legal restrictions on traditional barriers to trade, nondiscrimination obligations in international trade, trade and the environment, technical barriers to trade, safeguards and adjustment mechanisms, antidumping and countervailing duty law, and trade services.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Sykes, A)

LAW 288. Governance and Ethics: Anti-Corruption Law, Compliance and Enforcement
Laws and regulations in the U.S. governing ethical conduct of public and industry officials and the extent to which they reflect the moral values of the community and the principles central to a democratic government. Alternative approaches to ethical conduct based on principles and values rather than compliance. Emerging global ethical and governance standards, reporting principles, and their application to emerging markets. How cultural, religious, and moral differences might impact the effectiveness of these standards.

2.5 semester units (3.75 quarter units), Win quarter schedule (Abramov, I)

LAW 291. Evidence, Advanced
Goal is to develop witness interrogation skills. Direct and cross examination of lay and expert witnesses, introduction of documentary evidence, and use of illustrative evidence in California and federal courts. The art of examining friendly and hostile witnesses. Enrollment limited to six. Prerequisite: 290, application

2.5 semester units (3.75 quarter units), Win quarter schedule (Mendez, M)

LAW 293. Family Law
Rules regarding the making and breaking of legally recognized relationships, especially those between marital partners and parents and children. Focus is on the institution of marriage.

3.4 semester units (5.1 quarter units), Win quarter schedule (Banks, R)

LAW 304. Law and the Rhetorical Tradition
(Same as PWR 194.) The rhetorical underpinnings of legal argument. Elements of the rhetorical tradition; how to analyze written and oral legal and non-legal texts with an eye to the use and function of rhetorical principles. How form and content are mutually constitutive. Understanding of rhetoric as readers and interpreters of legal texts and development of skills as writers and speakers.

2.5 semester units (3.75 quarter units), Win quarter schedule (Sassoubre, T)

LAW 307. Gender, Law, and Public Policy
Open to non-Law students with consent of instructor. Topics include equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family. (Semester schedule.)

3 semester units (4.5 quarter units), Win semester schedule (Rhode, D)

LAW 308. Cultural Heritage Law and Policy
Preference to students who have taken LAW 236 or comparable preparation. Seminar. Focus is on national and international attention to law and policy concerning works of art, antiques, architectural monuments, archives, and intangible cultural heritage. Research paper.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Merryman, J)

LAW 311. Comparative Law
Issues of convergence of national legal systems, and American exceptionalism. Sources include contemporary Western European legal systems. Legal education, the role of judges and judging, the function and meaning of codes versus precedent, private law/public law distinction, constitutional courts, judicial review, and approaches to contract. Public law questions on racial equality and affirmative action, gender equality and sexual harassment, citizenship, and church and state.

1.7 semester units (2.55 quarter units), Win quarter schedule (Kessler, A)

LAW 318. History of American Law
(Same as HISTORY 352B). Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society.

2.5 semester units (3.75 quarter units), Win semester schedule (Gordon, R)

LAW 321. Patent Prosecution
(Same as ME 238.) Stages of the patent application process: identifying, capturing, and evaluating inventions; performing a patentability investigation, analyzing the documents, and the scope of the patent protection; composing claims that broadly cover the invention; creating a specification that supports the claims; filing a patent application with the U.S. Patent and Trademark Office; and analyzing an office action and preparing an appropriate response. Current rules and case law. Strategic decisions within each stage, such as: how a patent application advances the patent portfolio; and in what countries a patent application should be filed.

1.33 semester units (2 quarter units), Win quarter schedule (Schox, J)

LAW 322. Patent Litigation Workshop
Simulations of the strategy and pretrial preparation of a patent lawsuit. Materials include information typical to a patent lawsuit: a patent, file history, prior art, and information regarding the accused product. Students represent either the patentee or the accused infringer. Students plan litigation strategy, meet with and advise a client, conduct written discovery, take and defend depositions, and brief and argue claim construction and motions for summary judgment. Some knowledge of patent law is presumed. Pre- or corequisite: LAW 326.

2.5 semester units (3.75 quarter units), Win quarter schedule (Galloway, M)

LAW 325. Comparative and International Employment Discrimination
Comparison of laws prohibiting employment discrimination in the U.S. with those of other countries. Differences between regimes in social context; how differing histories, demographics, economic institutions, and political commitments have produced various approaches to employment discrimination. How and why laws prohibiting discrimination have become widespread, looking to international and local influences. Prerequisite: LAW 349 or consent of instructor.

2.5 semester units (3.75 quarter units), Not given this year (Ford, R)

LAW 326. Intellectual Property: Patents
Major aspects of patent law, primarily as applied in the US; patentability, including novelty, nonobviousness, enablement, infringement, and remedies. Focus is on essential legal principles and a policy analysis of the patent system. Goal is to provide background for non-patent specialists and those planning a career in the field.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Lemley, M)

LAW 330. International Human Rights
Contemporary system of international human rights, including civil, political, social, and economic rights. Women's and children's rights, indigenous rights, rights to democratic governance, and rights to cultural practices that differ from Western notions of human rights. Structure and role of international, regional and domestic bodies that report and adjudicate human rights claims. Normative justifications for human rights, and the challenges to these justifications posed by arguments for cultural relativism, and the forces of globalization. Recommended: international public law or equivalent.

2.5 semester units (3.75 quarter units), Win quarter schedule (Stacy, H)

LAW 332. International Development
Current research. How political institutions determine economic policy choices, and economic structures affect political processes. Bridges theory and practice to investigate micro- and macro-level political and economic processes shaping the prospects for development. Case studies on market function, why seemingly inefficient institutions survive, and why governments adopt policies detrimental to development. Topics include: the political economy of corruption, the role of foreign aid, the efficacy of governance reforms, and the relationship between democracy and development.

2.5 semester units (3.75 quarter units), Win quarter schedule (Singh, S)

LAW 333. Judgment and Decision Making
(Same as PUBLPOL 205A, IPS 207A.) Theories and research on heuristics and biases in human inference, judgement, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action. Prerequisites.

3.0 semester units (4.5 quarter units), Win quarter schedule (Brest, P)

LAW 343. Scientific Evidence and Expert Testimony: Patent Litigation
How to explain science to judge and jury; how litigators determine which legal issues to argue. Patent and expert testimony law. Student teams choose patents for final simulation projects, prepare claim charts, devise a design-around, and present oral arguments.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Morris, R)

LAW 344. Law and Economics Seminar I
.Current research by lawyers and economists on topics in law and economics. Guest speakers. Topics may include contribution among antitrust defendants, the philosophical foundations of the economic analysis of law, compensation for government regulations and takings, liability rules for controlling accidents, and the corporate tax treatment of nonprofit institutions. Prerequisite: LAW 275 or introductory microeconomics course.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Polinsky, M)

LAW 344. Law and Economics Seminar II
Current research by lawyers and economists on topics in law and economics. Guest speakers from other universities present current research. Topics include contribution among antitrust defendants, the philosophical foundations of the economic analysis of law, compensation for government regulations and takings, liability rules for controlling accidents, and the corporate tax treatment of nonprofit institutions.

1.7 semester units (2.55 quarter units), Win quarter schedule (Polinsky, M)

LAW 345. Law and Culture in American Fiction
How literary texts register changes in property law, the law of contracts, intellectual property and legal constructions of race, gender, and privacy, as they relate to the maintenance of personal identity, community stability, and linguistic meaning. A novel or story is paired with relevant legal and historical readings, considering the points of contact between literary narrative and narrative in law. Authors include James Fenimore Cooper, Herman Melville, Henry James, Theodore Dreiser, Nella Larsen, William Faulkner, and Sherman Alexie.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Sassoubre, T)

LAW 347. Law and Culture in American Film
Representations of law in 20th-century American film, particularly Westerns, gangster films, and courtroom dramas. Themes include the asymmetry of law and justice, the relationship between law and social change, the public and private identities of lawyers, anxiety that the rule of law fails individuals and minorities, and the disciplinary modes of law and culture. Convergence of narrative, visual, aural, and dramatic practices in legal proceedings and cinematic productions.

2.5 semester units (3.75 quarter units), Win quarter schedule (Sassoubre, T)

LAW 356. Dispute Resolution in International Economic Law
(Same as POLISCI 404.) Topics include: theoretical work on international trade and investment disputes; empirical work on WTO dispute resolution and the efficacy of developing country participation; and legal analysis of current, prominent disputes in the WTO and under international investment treaties.

1 semester unit (1.5 quarter units), Aut quarter schedule (Goldstein, J; Sykes, A), Win quarter schedule (Goldstein, J; Sykes, A)

LAW 359. Tax Policy
Issues in tax policy, progressivity, income versus consumption tax, property tax and school finance, tax simplification, tax compliance and tax shelters. Possible tax initiatives of the new administration in Washington.

2.5 semester units (3.75 quarter units), Win quarter schedule (Bankman, J)

LAW 361. Economic and Social Organization of the Legal Profession
(Same as SOC 133/333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Student groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms.

2.5 semester units (3.75 quarter units), Win quarter schedule (Dauber, M)

LAW 362. Foundations of Statistical Inference
(Same as IPS 205C, PUBLPOL 203C.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis via computer exercises using statistical packages; how to analyze empirical studies, conduct empirical research, and cross-examine or work with statistical experts.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Strnad, J)

LAW 366. Principles of Research Design and Analysis: Tools
(Same as PUBLPOL 203B, IPS 205B.) Review of statistical background material. Statistical research for public policy analysis, including multiple regression analysis, multilevel modeling, and Bayesian analysis. Policy analysis in government, research institutes, and academia, complex empirical issues in litigation, investment banking, consulting and finance. Topics include hypothesis testing, regression specification, logistic regression, probit, serial correlation, errors in variables, instrumental variables, simultaneous equations, generalized linear models, simulation, causal inference, and missing data imputation. Empirical analysis via computer exercises using popular statistical packages. Prerequisite: basic statistics .

3 semester units (4.5 quarter units), Win quarter schedule (Strnad, J)

LAW 367. Principles of Research Design and Analysis: Advanced Mathematical & Computational Methods
Adjunct to 366 for students who wish to work at a deeper mathematical level. Corequisite: 366.

1 semester unit (1.5 quarter units), Win quarter schedule (Strnad, J)

LAW 368. Law and the Biosciences: Neuroscience
(Same as HRP 211.) Legal, social, and ethical issues arising from advances in neuroscience, including effects upon law and society through improvements in predicting illnesses and behaviors, reading minds through neuroimaging, understanding responsibility and consciousness, treating criminal behavior, and cognitive enhancement. May be repeated for credit. (Semester schedule.)

2 semester units (3 quarter units), Win Semester schedule (Greely, H)

LAW 372. Legal History Workshop
(Same as HISTORY 307A.) Faculty and students from the Law school and the History department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker's research.

2.5 semester units (3.75 quarter units), Win quarter schedule (Kessler, A)

LAW 383. Research Design for Public Policy Analysis
(Same as IPS 205A, PUBLPOL 203A.) Translate the questions of policy controversies to questions that are susceptible to empirical research. How to select the most appropriate research strategy for different types of questions. Requirements for designing sample surveys, case studies, and experiments, and methods for conducting

interviews with individuals and groups, observational studies and textual analysis. Final paper is a research design for investigating a policy question of the student's choice.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Hensler, D)

LAW 407. International Deal Making: Legal and Business Aspects

The application of legal and business knowledge to real world international transactions. Topics include deal structuring, identifying and resolving legal and business concerns, negotiations, documentation, deal closing, legal issues in cross-border transactions, importance of legal documents in business transactions, and the role of the legal advisor. Case studies. Students strategize, structure, and negotiate real world, substantive, international business deals.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Franklin, L)

LAW 409. Introduction to Intellectual Property

Patents, copyrights, trademarks, and trade secrets. Commonalities and differences among systems of intellectual property protection.

3.4 semester units (5.1 quarter units), Win quarter schedule (Lemley, M)

LAW 440. Biotechnology Law and Policy

Legal and policy issues raised by the biotechnology industry. Issues include patenting, corporate organization and financing, conflicts of interest, regulatory approvals, health care financing issues, and tort liability. Prospects for and implications of the biotechnology revolution. Organized around hypothetical problems. Undergraduates require consent of instructor.

1.7 semester units (2.55 quarter units), Win quarter schedule (Greely, H)

LAW 447. Communications Law

Comprehensive overview of current communications law as it has emerged over the past 100 years, in the form of industry-specific laws and through related areas of law such as antitrust and first amendment law. Existing pressures on the system, available solutions, and the broader economic and political implications of the legal and technical choices that communications law is facing today. Focus is on the U.S.; attention to developments elsewhere.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Van Schewick, B)

LAW 458. FDA's Regulation of Health Care

(Same as HRP 209.) Open to law or medical students; graduate students by consent of instructor. Focus on the FDA's regulation of drugs, biologics, medical devices, nutritional supplements, and its jurisdiction over food, legal, social, and eithical issues arising from advances in the biosciences.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Greely, H)

LAW 467. Quantitative Methods: Finance

The time value of money. Present and future value analysis; discounting; net present value; IRR; bond valuations; and a critique of other project valuation methods. Diversification, the risk-return trade-off, portfolio performance measurement, and market efficiency. Arbitrage and tax considerations. Emphasis is on applications in legal settings.

1.7 semester units (2.55 quarter units), Win quarter schedule (Siciliano, F)

LAW 468. Statistical Inference in Law

Tools, concepts, and framework to become consumers of quantitative evidence and social science. Case law as a springboard for considering quantitative evidence.

2.5 semester units (3.75 quarter units), Win quarter schedule (Ho, D)

LAW 470. Originalism's Alternatives

Competing methods for interpreting constitutional text. Alternatives within originalist methodology and alternatives to originalism, such as common-law reasoning, moral readings, democratic themes, foreign sources, and judicial minimalism. Focus on judicial decision making. Justifications for treating ancient constitutional text as law, the formal amendment process, defenses of judicial review, and influences on judicial behavior aside from interpretive method.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Samaha, A)

LAW 471. Constitutional Law II: Free Speech

Speech, press, and associational rights under the First Amendment. Focus is on case law; attention to normative theory, emerging controversies, and empirical questions. Topics include sedition and suspected sleeper cells, government secrets and journalist privileges, personal privacy and reputational injury, communications network access and FCC indecency regulation, racist and sexist speech and associations, commercial advertising and trade secret protection, campaign financing, and Internet regulation.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Samaha, A)

LAW 483. Deal Litigation Seminar

Practical and doctrinal perspective on mergers and acquisitions litigation. Case studies from practice in the Delaware courts where much contemporary deal litigation occurs; students apply cases and legal principles in practical situations that may arise in a transactional litigation practice. The litigator's role in the transactional setting. Prerequisite: familiarity with basic corporate law principles.

1.7 semester units (2.55 quarter units), Win quarter schedule (Silverberg, R)

LAW 513. California Climate Change Law and Policy

The California Global Warming Solutions Act of 2006, the clean cars and trucks bill, and the greenhouse gas emissions performance standard. Complementary and subsidiary regulations such as the renewable portfolio standard, the low Carbon fuel standard, land use law, and energy efficiency and decoupling. Focus is on the draft scoping plan to outline California's policies for economy-wide reductions in greenhouse gas emissions. The Western Climate Initiative. History, details, and current status of California's efforts.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Grenfell, K)

LAW 514. The California Coast: Science, Policy, and Law

(Same as EARTHSYS 175, EARTHSYS 275, CEE 175A, CEE 275A.) Interdisciplinary. The legal, science, and policy dimensions of managing California's coastal resources. Coastal land use and marine resource decision making. The physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and the institutional framework that shapes public and private decision making. Field work: how experts from different disciplines work to resolve coastal policy questions.

3.4 semester units (5.1 quarter units), Win quarter schedule (Boehm, A; Sivas, D; Caldwell, M)

LAW 539. Law and Policy of the European Union

(Same as IPS 232.) European legal and institutional integration, the nature and sources of EU law, the evolution of the single market, and the building of a supranational judicial system. General principles of EU law, the scope of Community powers and their application in the national legal systems of the member states, EU legislation and adjudication, the four freedoms of the single market, corporate and competition policy, and human rights law. U.S.-EU trade and anti-trust issues, cooperation in defense, development assistance, promotion of democracy, and relations in the context of the new challenges to global governance.

2.5 semester units (3.75 quarter units), Win quarter schedule (Morningstar, R; Magen, A)

LAW 549. Chinese Legal System: Introduction to the

Legal institutions, major areas of substantive and procedural law, and the gap between law on the books and in action. Topics include the World Trade Organization, the Communist Party's recognition of private property, and reforms of financial system and human rights protection mechanisms.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Gechlik, M)

LAW 550. Uses of Policy Analysis in the Law

Uses of policy analysis in substantive and procedural law reform and the practical and political constraints that limit its usefulness. Case study approach, including examples of policy analyses that played a role in recent policy debates, in the legislative arena, and in key court decisions. Previous topics include capital punishment, school vouchers, class actions, racial profiling, three-strikes laws, gun control, and gays in the military. Final paper. Prerequisite: LAW 383.

1.7 semester units (2.55 quarter units), Win quarter schedule (Hensler, D)

LAW 565. Immigration Law: Current Constitutional and Civil Rights Issues
Issues related to the constitutional and civil rights of immigrants. Focus is on the statutory framework regulating the admission of non-citizens and the constitutional principles that govern immigration law and policy. Issues may include restrictions on federal court jurisdiction over immigration matters, detention of non-citizens, public and private discrimination on the basis of alienage, labor and workplace rights of immigrant workers, refugee and asylum law, post 9/11 issues, local and state laws targeting immigrants, and matters pending in the Supreme Court. Guest lecturers.

1.7 semester units (2.55 quarter units), Aut quarter schedule (Guttentag, L)

LAW 569. Religion and the Constitution
(Same as POLISCI 336T.) Issues of religious toleration in political theory and in American constitutional law. Topics include: whether religion merits the special constitutional solicitude provided by the First Amendment's religion clauses; religion as distinct from culture, morality, and philosophy as understood for constitutional purposes; the tensions between ensuring free exercise and avoiding religious establishment; cases for and against free exercise exemptions; and whether the religion clauses can be understood as serving a single fundamental value such as liberty, equality, or neutrality. Readings from political and constitutional theory including Bodin, Locke, Madison, Jefferson, Rawls, Nussbaum, McConnell, Okin, Choper, Hamburger, and constitutional cases.

2.5 semester units (3.75 quarter units), Win quarter schedule (Cohen, J; Sullivan, K)

LAW 576. Sexual Orientation and The Law
How the law addresses contested contemporary issues concerning sexual orientation. Constitutional, criminal, family, and anti-discrimination law. Regulation of sexual conduct, discrimination in the military and Boy Scouts, the law concerning sexual minorities as parents, conflicts between sexual and religious freedom, and the role of direct democracy in shaping sexual orientation law. Debate over same-sex marriage. Emerging sexual identities such as transsexuality and intersexuality. Interdisciplinary focus on how social, cultural and political forces shape, and are shaped by, legal doctrine. How gender structures sexual orientation debates.

1.7 semester units (2.55 quarter units), Win quarter schedule (Schacter, J)

LAW 581. Workshop in Sociology of Law
(Same as SOC 338.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. Topics such as the relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

1-3 semester units (1.5-4.5 quarter units), Win quarter schedule (Dauber, M; Sandefur, R)

LAW 585. Introduction to Transnational Law
International aspects of modern legal practice. Public and private international law, and comparative law. Case studies focus on human rights, environment, trade, and commercial law. National sovereignty in the era of globalization, the democratic deficit of international institutions, theories about why nations obey or disobey international law, how nations internalize or reject international norms, how international institutions interact with national legal systems, and the role of non-state actors in the international system.

2.5 semester units (3.75 quarter units), Win quarter schedule (Martinez, J)

LAW 599. Climate Change Workshop
Students prepare papers to be used as technical support for problems that arise in the negotiations for the new global climate change agreement. Examples of paper subjects include analyzing the performance of proposed financial mechanisms in support of climate favoring technologies, the roles of intellectual property in facilitating or impeding technology diffusion, and the effectiveness of existing or past efforts to influence technology innovation at national or international levels. Focus is on output to those questions framed by the negotiation issues where bottlenecks may be avoided through improved technical support. (Semester schedule)

3 semester units (4.5 quarter units), Aut semester schedule (Heller, T), Win semester schedule (Heller, T)

LAW 603. Environmental Law and Policy
Federal environmental laws, regulatory structures. and environmental policies. The property law roots of environmental law and current primary analytical frameworks of use in understanding environmental law and policy. Federal statutes including the Clean Air Act, the Clean Water Act, the Endangered Species Act, the National Environmental Policy Act, Superfund (CERCLA), and the Resource Recovery and Conservation Act. Case studies from environmental cases and controversies.

2.5 semester units (3.75 quarter units), Win quarter schedule (Wara, M)

LAW 604. Environmental Law Workshop: Clean Technology
Current research and work in environmental and natural resources field focused on clean technologies. Academics, policy makers, and business leaders from various disciplines present current research or work. May be repeated for credit.

2.5 semester units (3.75 quarter units), Win quarter schedule (Caldwell, M; Thompson, B)

LAW 608. Environmental Science for Managers and Policy Makers
(Same as IPER 335, OIT 338.) Core course for joint J.D. or M.B.A. and M.S. in Environment and Resources. How to apply scientific understanding to business operations, strategy, and the design of market-based environmental policy. Fundamentals of earth systems and environmental science. Spreadsheet modeling, optimization, and Monte Carlo simulation.

2.66 semester units (3.99 quarter units), Win quarter schedule (Plambeck, E; Daily, G; Masters, G; Palumbi, S)

LAW 611. International Conflict Resolution Colloquium
(Same as PSYCH 283, POLISCI 403.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

1 semester unit (1.5 quarter units), Win quarter schedule (Weiner, A; Holloway, D; Ross, L)

LAW 615. Negotiation
Tools and concepts for analyzing and preparing for negotiations. Role play. Issues of representation, ethics, and the place of negotiation in the legal system. Autumn section 615-04; Winter section 615-01. (Semester schedule.)

4 semester units (6 quarter units), Aut semester schedule (Netsch, L), Win semester schedule (Avila, S)

LAW 643. Medical-Legal Issues in Children's Health
(Same as PEDS 211.) Collaboration of medical and legal fields, such as between future physicians and attorneys, to improve health outcomes for low-income children. Focus is on the effects of poverty on children's health. Topics such as asthma, immigration, and health insurance. Service learning including intake interviews with patient families and analysis of their medical-legal issues. Group project on local or state medical-legal policy issue. Final paper.

4 semester units (6 quarter units), Win quarter schedule (Rodgers, M; Weintraub, D)

LAW 656. International Conflict: Management and Resolution
(Same as IPS 250, POLISCI 210R/310R.) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN).

2 semester units (3 quarter units), Win quarter schedule (Weiner, A; Holloway, D)

LAW 671. Critical Theory
Developments in critical theory as it relates to law and jurisprudence. The critical tradition in Western philosophy including thinkers such as Friedrich Nietzsche, Karl Marx, Max Weber, Jean Paul Sartre, and Michel Foucault. Influence of this critical tradition in American legal theory, tracing the critical turn through the Americal legal realists, critical legal studies, and the emergence of identity-based critical movements such as critical race theory, critical feminist theory, and critical approaches to sexual orientation.

2.5 semester units (3.75 quarter units), Aut quarter schedule (Ford, R)

LAW, NONPROFESSIONAL (LAWGEN) COURSES

The following courses, offered by the School of Law, may not be counted toward professional degrees in Law. Unit values listed in LAWGEN courses are quarter-based.

UNDERGRADUATE COURSES IN LAW, NONPROFESSIONAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

LAWGEN 106. Introduction to American Law
(Same as AMSTUD 179, POLISCI 122.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.

3-5 quarter units, Aut quarter schedule (Friedman, L)

LAWGEN 110Q. Criminal Justice and the Criminal Courts
Focus is on the structures and theories at play in the criminal court system, emphasizing court procedures, structures, constitutional guarantees, and the trial process. The roles of individual agents, including the police, prosecutors, defense attorneys, judges, probation officers, and corrections officials.

3 quarter units, Spr quarter schedule (Dansky, K)

GRADUATE COURSES IN LAW, NONPROFESSIONAL

LAWGEN 206. Thinking Like a Lawyer
(Same as GSBGEN 382.) Open to all graduate students. An analytical framework for understanding the core concepts of the law; how lawyers analyze and structure their work. Foundational principles of law. Topics such as contracts, litigation, intellectual property, securities, and employment law.

3-4 quarter units, Win quarter schedule (Kelman, M; Kramer, L)

LAWGEN 209. Stanford Community Police Academy
Open to all students. Practical experience. The duties, responsibilities, decisions, and constraints that face law enforcement officers. Prerequisites: miminum 18 years of age; valid driver's license; background check.

1 quarter unit, Win quarter schedule (Dubois, M; Wilson, L)

LINGUISTICS (LINGUIST) COURSES

For information on undergraduate and graduate programs in the Department of Linguistics, see the "Linguistics" section of this bulletin.

LINGUISTICS COURSE CATALOG NUMBERING SYSTEM

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

00-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-61	Sociolinguistics, Language Variation, Change
62-73	Language and Culture, Structure of a Language
74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-93	Applied Linguistics
94-99	Directed Work, Theses, Dissertations

UNDERGRADUATE COURSES IN LINGUISTICS

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics.

LINGUIST 1. Introduction to Linguistics
The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER:DB-SocSci

4 units, Aut (Eckert, P; Sag, I), Spr (Pereltsvaig, A)

LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics
Stanford Introductory Seminar. Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat. GER:DB-SocSci

3 units, Aut (Sumner, M)

LINGUIST 62N. The Language of Food
Stanford Introductory Seminar. Preference to freshmen. The relationship between food and language around the globe. The vocabulary of food and prepared dishes, and crosslinguistic similarities and differences, historical origins, forms and meanings, and relationship to cultural and social variables. The structure of cuisines viewed as meta-languages with their own vocabularies and grammatical structure. The language of menus; their historical development and crosslinguistic differences.

3 units, Aut (Jurafsky, D)

LINGUIST 63N. Translation
Stanford Introductory Seminar. Preference to freshmen. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some

of this work be done by machines? Are there things that cannot be said in some languages? GER:DB-SocSci

3 units, Aut (Kay, M)

LINGUIST 65. African American Vernacular English
(Same as LINGUIST 265.) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. GER:DB-SocSci, EC-AmerCul

3-5 units, Spr (Rickford, J)

LINGUIST 90. Teaching Spoken English
Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

3-4 units, Spr (Streichler, S)

LINGUIST 105. Phonetics
(Same as LINGUIST 205A.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor. GER:DB-SocSci

4 units, Spr (Sumner, M)

LINGUIST 110. Introduction to Phonetics and Phonology
Differences in the sounds of the world's languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci

4 units, Win (Sumner, M)

LINGUIST 112. Seminar in Phonology
(Same as LINGUIST 212A.) Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

2-4 units, not given this year

LINGUIST 116. Morphology
A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

4 units, not given this year

LINGUIST 120. Introduction to Syntax
Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci

4 units, Aut (Wasow, T)

LINGUIST 124A. Introduction to Formal Universal Grammar
(Same as LINGUIST 224A.) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci

4 units, not given this year

LINGUIST 130A. Introduction to Linguistic Meaning
Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, or consent of instructor. GER:DB-SocSci

4 units, Spr (Staff)

LINGUIST 130B. Introduction to Lexical Semantics
Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci

4 units, not given this year

LINGUIST 130C. Logic Laboratory
Typically taken in conjunction with 130A/230A.

1 unit, Spr (Staff)

LINGUIST 133. Introduction to Formal Pragmatics
(Same as LINGUIST 233. Graduate students register for 233.) Mechanism underlying language use and felicity intuitions. Formal models of discourse that incorporate many aspects of pragmatics such as presuppositions, speech acts, implicatures, relevance, optimality, and utility. Discussion of common ground, illocutionary acts, Gricean maxims and Neo-Gricean analysis, game and decision theory.

3-4 units, Aut (Staff)

LINGUIST 140. Language Acquisition I
(Same as LINGUIST 240.) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. GER:DB-SocSci

4 units, Aut (Clark, E)

LINGUIST 142. Bilingualism, Language Attrition, and Heritage Languages
Linguistic and sociolinguistic aspects of first language loss among emigrants; consequences for language teaching. GER:DB-SocSci

3-4 units, not given this year

LINGUIST 144. Introduction to Cognitive and Information Sciences
(Same as PHIL 190, PSYCH 132, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; Roberts, E)

LINGUIST 150. Language in Society
How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:DB-SocSci, WIM

4 units, Win (Hall-Lew, L)

LINGUIST 152. Sociolinguistics and Pidgin Creole Studies
(Same as LINGUIST 252.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portugese, Chinook, Motu, and Sango.

2-4 units, not given this year

LINGUIST 156. Language and Gender
The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER:DB-SocSci, EC-Gender

4 units, Spr (Eckert, P)

LINGUIST 160. Introduction to Language Change
(Same as ANTHRO 120.) Principles of historical linguistics:, the nature of language change. Kinds and causes of change, variation and diffusion of changes through populations, differentiation of dialects and languages, determination and classification of historical relationships among languages, rates of change, the reconstruction of ancestral languages and intermediate changes, parallels with cultural and genetic evolutionary theory, and implications of variation and change for the description and explanation of language in general. Prerequisite: introductory course in linguistics or evolutionary theory. GER:DB-SocSci

4-5 units, Aut (Fox, J)

LINGUIST 167. Languages of the World
The diversity of human languages, their sound systems, vocabularies, and grammars. Tracing historical relationships between languages and language families. Parallels with genetic evolutionary theory. Language policy, endangered languages and heritage languages. Classification of sign languages. GER:DB-SocSci

3-4 units, Win (Pereltsvaig, A)

LINGUIST 173. The Structure of Russian
(Same as LINGUIST 273.) A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

2-4 units, Aut (Pereltsvaig, A)

LINGUIST 180. From Languages to Information
(Same as CS 124.) Automated processing of less structured information: human language text and speech, web pages, social networks, genome sequences, with goal of automatically extracting meaning and structure. Methods include: string algorithms, automata and transducers, hidden Markov models, graph algorithms, XML processing. Applications such as information retrieval, text classification, social network models, machine translation, genomic sequence alignment, word meaning extraction, and speech recognition.

3-4 units, Win (Jurafsky, D)

LINGUIST 182. Human and Machine Translation
(Same as LINGUIST 282.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:DB-EngrAppSci

4 units, not given this year

LINGUIST 183. Computational Theories of Syntax
(Same as LINGUIST 283.) Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

3-4 units, Win (Kay, M)

LINGUIST 187. Grammar Engineering
(Same as LINGUIST 287.) Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

1-4 units, Win (King, T; Kaplan, R)

LINGUIST 188. Natural Language Understanding
(Same as CS 224U, LINGUIST 288.) Machine understanding of human language. Computational semantics (determination of sense, event structure, thematic role, time, aspect, synonymy/meronymy, causation, compositional semantics, treatment of scopal operators), and computational pragmatics and discourse (coherence relations, anaphora resolution, information packaging, generation). Theoretical issues, online resources, and relevance to applications including question answering, summarization, and textual inference. Prerequisites: one of LINGUIST 180, CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).

2-4 units, alternate years, not given this year

LINGUIST 191. Linguistics and the Teaching of English as a Second/Foreign Language
(Same as LINGUIST 291.) Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning. GER:DB-SocSci

4-5 units, Win (Hubbard, P)

LINGUIST 197. Undergraduate Research Seminar
Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.

2 units, Win (Clark, E)

LINGUIST 198. Honors Research

1-15 units, Win (Staff), Spr (Staff)

LINGUIST 199. Independent Study

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN LINGUISTICS

Courses numbered 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates.

LINGUIST 200. Foundations of Linguistic Theory
Theories that have shaped contemporary linguistics; recurrent themes and descriptive practice.

4 units, Aut (Kiparsky, P)

LINGUIST 201. Advanced Introduction to Linguistics
Primarily for graduate students. The leading ideas of linguistic description and argumentation. Fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.

4 units, not given this year

LINGUIST 205A. Phonetics
(Same as LINGUIST 105.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor.

4 units, Spr (Sumner, M)

LINGUIST 205B. Advanced Phonetics
Prerequisite: LINGUIST 205A.

2-4 units, not given this year

LINGUIST 207. Seminar in Phonetics
Topics vary. Previous topics include ow variation is accommodated in current models of speech perception, and how perceptual models need to be altered to accommodate phonetic variation encountered by listeners. May be repeated for credit.

2-4 units, not given this year

LINGUIST 210A. Phonology
Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals; optimality theory.

4 units, Aut (Kiparsky, P)

LINGUIST 210B. Advanced Phonology
The phonological organization of the lexicon. Topics include lexical phonology, phonological subregularities, gradient phonotactics, and lexical frequency effects.

4 units, not given this year

LINGUIST 211. Metrics
Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. The ideology of normative prosodic discourse in relation to changing poetic practice.

1-4 units, Win (Kiparsky, P)

LINGUIST 212A. Seminar in Phonology
(Same as LINGUIST 112.) Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

2-4 units, not given this year

LINGUIST 212B. Seminar in Phonology
May be repeated for credit.

1-4 units, not given this year

LINGUIST 214. Phonology Workshop
May be repeated for credit.

1-2 units, not given this year

LINGUIST 216. Morphology
How morphology fits into the lexicon and how the lexicon fits into grammar. Inflection and word-formation: blocking, productivity, analogy. Morphological categories. The interaction of morphology with phonology within the lexicon: level-ordering, prosodic morphology. Review of English morphology and analysis of representative material from languages with richer morphologies.
2-4 units, not given this year

LINGUIST 217. Morphosyntax
The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.
2-4 units, not given this year

LINGUIST 218. Seminar in Morphosyntax
May be repeated for credit.
2-4 units, not given this year

LINGUIST 221A. Foundations of English Grammar
A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.
1-4 units, Spr (Sag, I)

LINGUIST 221B. Studies in Universal Grammar
Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.
1-4 units, not given this year

LINGUIST 222A. Empirical Foundations of Syntactic Theory I
Core phenomena of modern syntactic theories from a critical perspective: the role of the verb and lexicon in the determination of sentence syntax. The argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction. Readings from classic papers and crosslinguistic perspectives.
2-4 units, Aut (Bresnan, J)

LINGUIST 222B. Foundations of Syntactic Theory II
The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.
2-4 units, Win (Sag, I)

LINGUIST 223. Introduction to Minimalist Syntax
Focus is on phrase structure, movement, functional categories, features, the nature of economy conditions, and parametric differences. More general issues of the architecture of the grammar and the nature of crosslinguistic variation.
2-4 units, Win (Pereltsvaig, A)

LINGUIST 224A. Introduction to Formal Universal Grammar
(Same as LINGUIST 124A.) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor.
4 units, not given this year

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar
May be repeated for credit.
1-4 units, not given this year

LINGUIST 225A. Seminar in Syntax
1-2 units, not given this year

LINGUIST 226. Binding
Comparison of three analyses of binding relations: index analysis, combinator analysis, and copy based analysis. Topics include syntactic binding theory, syntax-semantics interface, scope and binding, reciprocity, ellipsis, de re/de se, agreement, and focus.
1-4 units, Spr (Staff)

LINGUIST 227C. Projects in Syntax
Group research projects using quantitative syntactic data from texts, recordings, experiments, or historical records. Skills in extracting, graphically exploring, and analyzing naturalistic syntactic data, and in presenting results. May be repeated for credit. Prerequisite: 229A, B, or D, or equivalent.
2-4 units, not given this year

LINGUIST 229A. Laboratory Syntax I
Critiques of the empirical foundations of syntax. The roles of introspective, usage-based, experimental, and typological evidence. Modern methods of data collection and analysis used in syntax. Hands-on, practical work with data sets. May be repeated for credit.
1-4 units, Win (Bresnan, J)

LINGUIST 229B. Laboratory Syntax II
Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.
1-4 units, not given this year

LINGUIST 229C. Laboratory Syntax III
Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.
1-4 units, not given this year

LINGUIST 229D. Empirical Syntax Research Seminar
Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.
1-2 units, not given this year

LINGUIST 230A. Introduction to Semantics and Pragmatics
Meaning in natural language. Topics: elementary set theory; propositional logic, predicate logic, and lambda calculus, and their relation to semantic analysis; model theoretic characterizations of meaning and semantic properties of English conjunctions and determiners. Grice's theory of implicature, speech acts, Davidson's theories of logical form, and Montague grammar. Recommended: elementary logic and set theory.
2-4 units, Win (Peters, S)

LINGUIST 230B. Semantics and Pragmatics
Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130A and PHIL 150 and 160.
2-4 units, not given this year

LINGUIST 232A. Lexical Semantics
Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.
2-4 units, not given this year

LINGUIST 232B. Seminar in Lexical Semantics
Space and motion in language. May be repeated for credit.
1-4 units, Spr (Clark, E)

LINGUIST 232C. Lexical Semantics Research Seminar
May be repeated for credit. By arrangement.
1-2 units, not given this year

LINGUIST 233. Introduction to Formal Pragmatics
(Same as LINGUIST 133.) Mechanism underlying language use and felicity intuitions. Formal models of discourse that incorporate many aspects of pragmatics such as presuppositions, speech acts, implicatures, relevance, optimality, and utility. Discussion of common ground, illocutionary acts, Gricean maxims and Neo-Gricean analysis, game and decision theory.
3-4 units, Aut (Staff)

LINGUIST 234. Discourse Analysis
The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.
4 units, not given this year

LINGUIST 235. Semantic Fieldwork
Techniques for evidence from less well-studied languages within formal semantic theory. Semantic phenomena, and techniques for investigating them, including scope, quantifiers, pronouns, focus, tense, aspect, mood, evidentiality, and information structure. Practical work on a language.
2-4 units, Win (Staff)

LINGUIST 236. Seminar in Semantics: Indefinites
Topics vary. Previous topics include static and dynamic approaches to indefinites. May be repeated for credit.
1-4 units, not given this year

LINGUIST 237. Seminar in Semantics: Semantics of Questions and Commands
Semantics of interrogatives and imperatives; propositional semantics of declaratives. Research emphasizing the meaning of questions. May be repeated for credit.
1-4 units, Win (Peters, S)

LINGUIST 240. Language Acquisition I
(Same as LINGUIST 140.) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection.
4 units, Aut (Clark, E)

LINGUIST 241. Language Acquisition II
Constructions and the lexicon. May be repeated for credit.
1-4 units, Win (Clark, E)

LINGUIST 242. Methods for Research in Language Acquisition
Research methods in developmental psycholinguistics
4 units, not given this year

LINGUIST 245. Experimental Design for Linguistics
Hypothesis formation, confound avoidance, power, general methods, and analysis of results. Students complete a pilot experiment; write-up; peer review; presentation.
4 units, not given this year

LINGUIST 247. Seminar in Psycholinguistics
(Same as PSYCH 227.) May be repeated for credit.
2-4 units, not given this year

LINGUIST 250. Sociolinguistic Theory and Analysis
Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.
4 units, not given this year

LINGUIST 251. Sociolinguistic Field Methods
Strengths and weaknesses of the principal methods of data collection in sociolinguistics.
4 units, Aut (Rickford, J)

LINGUIST 252. Sociolinguistics and Pidgin Creole Studies
(Same as LINGUIST 152.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portugese, Chinook, Motu, and Sango.
2-4 units, not given this year

LINGUIST 255. Seminar in Sociolinguistics: Variation and Spoken Style
The nature of spoken style. New kinds of variables that play a role in style, the structure of style, and the role of style in the construction of meaning in variation. Project-based. May be repeated for credit.
3-5 units, Win (Eckert, P)

LINGUIST 257. Seminar in Sociolinguistics: Community Studies of Variation
May be repeated for credit.
1-4 units, not given this year

LINGUIST 258. Analysis of Variation
The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.
1-4 units, not given this year

LINGUIST 260A. Historical Morphology and Phonology
Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.
4 units, Spr (Kiparsky, P)

LINGUIST 260B. Historical Morphosyntax
Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.
2-4 units, not given this year

LINGUIST 265. African American Vernacular English
(Same as LINGUIST 65.) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications.
3-5 units, Spr (Rickford, J)

LINGUIST 273. The Structure of Russian
(Same as LINGUIST 173.) A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.
2-4 units, Aut (Pereltsvaig, A)

LINGUIST 274A. Field Methods I
(Same as ANTHRO 71, LINGUIST 174.) Hands-on. The methods by which linguists gather raw linguistic data about a language and begin analyzing its structure. Working with a speaker of a language not previously studied by class participants, students develop a description of key aspects of its grammar and examine methodologies for obtaining, storing, and manipulating data.
2-4 units, not given this year

LINGUIST 274B. Field Methods II
Continuation of 274A, with a focus on phonetic topics in a targeted language. Prerequisite: 274A or consent of instructor.
2-4 units, not given this year

LINGUIST 278. Programming for Linguists
Computer programming techniques for collecting and analyzing data in linguistic research. Introduction to the UNIX environment, Perl programming, and other scripting tools. How to gather, format, and manipulate corpus, field, and experimental data; combine data from multiple sources; and create web surveys. Lab. Knowledge of computer programming not required.
2-4 units, Aut (Coppock, E)

LINGUIST 280. Natural Language Processing
(Same as CS 224N.) Methods for processing human language information and the underlying computational properties of natural languages. Syntactic and semantic processing from linguistic and algorithmic perspectives. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition, translation, and interpretation; and representative systems. Prerequisites: CS 121/221 or CS124/LINGUIST 180, CS103, CS109.
3-4 units, Spr (Manning, C)

LINGUIST 281. Speech Recognition and Synthesis
(Same as CS 224S.) Automatic speech recognition, speech synthesis, and dialogue systems. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: CS 221 or 229.
2-4 units, Win (Jurafsky, D)

LINGUIST 282. Human and Machine Translation
(Same as LINGUIST 182.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language.
4 units, not given this year

LINGUIST 283. Computational Theories of Syntax
(Same as LINGUIST 183.) Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.
3-4 units, Win (Kay, M)

LINGUIST 285. Finite State Methods in Natural Language Processing
Theory and available technology for finite state language processing. Applications include tokenization, phonological and morphological analysis, disambiguation, and shallow parsing.
3-4 units, not given this year

LINGUIST 286. Information Retrieval and Web Search
(Same as CS 276.) Text information retrieval systems; efficient text indexing; Boolean, vector space, and probabilistic retrieval models; ranking and rank aggregation; evaluating IR systems. Text clustering and classification: classification algorithms, latent semantic indexing, taxonomy induction; Web search engines including crawling and indexing, link-based algorithms, and web metadata. Prerequisites: CS 107, CS 109, CS 161.
3 units, Aut (Manning, C; Raghavan, P)

LINGUIST 287. Grammar Engineering
(Same as LINGUIST 187.) Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.
1-4 units, Win (King, T; Kaplan, R)

LINGUIST 288. Natural Language Understanding
(Same as CS 224U, LINGUIST 188.) Machine understanding of human language. Computational semantics (determination of sense, event structure, thematic role, time, aspect, synonymy/meronymy, causation, compositional semantics, treatment of scopal operators), and computational pragmatics and discourse (coherence relations, anaphora resolution, information packaging, generation). Theoretical issues, online resources, and relevance to applications including question answering, summarization, and textual inference. Prerequisites: one of LINGUIST 180, CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).
2-4 units, alternate years, not given this year

LINGUIST 289. Quantitative, Probabilistic, and Optimization-Based Explanation in Linguistics
Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.
3-4 units, not given this year

LINGUIST 291. Linguistics and the Teaching of English as a Second/Foreign Language
(Same as LINGUIST 191.) Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.
4-5 units, Win (Hubbard, P)

LINGUIST 293. Research Seminar in Applied Linguistics
(Same as EDUC 435X.) For graduate students in the schools of Education and Humanities and Sciences who are engaged in research pertaining to applied linguistic topics in original research. Topics: language policies and planning, language and gender, writing and critical thinking, foreign language education, and social applications of linguistic science. (SSPEP)
1-4 units, not given this year

LINGUIST 294. Linguistic Research Discussion Group
Restricted to first-year Linguistics Ph.D. students.
1 unit, Aut (Wasow, T)

LINGUIST 390. M.A. Project
1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

LINGUIST 394. TA Training Workshop
For second-year graduate students in Linguistics
1 unit, Aut (Rickford, J)

LINGUIST 395A. Research Workshop I
Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, Spr (Rickford, J)

LINGUIST 395B. Research Workshop II
Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, Spr (Wasow, T)

LINGUIST 395C. Research Workshop III
Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, Sum (Staff)

LINGUIST 396. Research Projects in Linguistics
Mentored research project for first-year graduate students in linguistics.
2-3 units, Win (Staff)

LINGUIST 397. Directed Reading
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

LINGUIST 398. Directed Research
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

LINGUIST 399. Dissertation Research
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MANAGEMENT SCIENCE AND ENGINEERING (MS&E) COURSES

For information on graduate programs in the Department of Management Science and Engineering, see the "Management Science and Engineering" and "School of Engineering" sections of this bulletin.

UNDERGRADUATE COURSES IN MANAGEMENT SCIENCE AND ENGINEERING

MS&E 41. Financial Literacy
Practical knowledge about personal finance and money management including budgeting, pay checks, credit cards, banking, insurance, taxes, and saving. Class especially appropriate for those soon to be self-supporting. Limited enrollment.
1 unit, Win (Morrison, M), Spr (Morrison, M)

MS&E 92Q. International Environmental Policy
Stanford Introductory Seminar. Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.
4 units, Win (Weyant, J)

MS&E 93Q. Nuclear Weapons, Terrorism, and Energy
Stanford Introductory Seminar. Preference to sophomores. What are nuclear weapons and what do they do? Why do some nations want them? What are the risks of nuclear terrorism? What is radioactivity? What role does nuclear power play? Can it help with global

warming? Emphasis is on policy options in the light of changes in the world. Recommended: a course in international relations, engineering, or physical science. GER:DB-EngrAppSci, DB-EngrAppSci

3 units, Spr (Hecker, S)

MS&E 101. Undergraduate Directed Study
Subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 107. Interactive Management Science
(Same as MS&E 207.) Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures. GER:DB-EngrAppSci

3 units, Aut (Savage, S)

MS&E 108. Senior Project
Restricted to MS&E majors in their senior year. Students carry out a major project in groups of four, applying techniques and concepts learned in the major. Project work includes problem identification and definition, data collection and synthesis, modeling, development of feasible solutions, and presentation of results.

5 units, Win (Bailey, D; Chiu, S; Hausman, W; Katila, R; Shachter, R)

MS&E 111. Introduction to Optimization
(Same as ENGR 62.) Formulation and analysis of linear optimization problems. Solution using Excel solver. Polyhedral geometry and duality theory. Applications to contingent claims analysis, production scheduling, pattern recognition, two-player zero-sum games, and network flows. Prerequisite: MATH 51. GER:DB-EngrAppSci

4 units, Aut (Goel, A), Spr (Van Roy, B)

MS&E 112. Mathematical Programming and Combinatorial Optimization
(Same as MS&E 212.) Combinatorial and mathematical programming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: CS 106A or X; ENGR 62 or MATH 103. GER:DB-EngrAppSci

3 units, Win (Saberi, A)

MS&E 120. Probabilistic Analysis
Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51. Recommended: knowledge of spreadsheets. GER:DB-EngrAppSci

5 units, Aut (Shachter, R)

MS&E 121. Introduction to Stochastic Modeling
Stochastic processes and models in operations research. Discrete and continuous time parameter Markov chains. Queuing theory, inventory theory, simulation. Prerequisite: 120 or Statistics 116. GER:DB-EngrAppSci

4 units, Win (Glynn, P)

MS&E 130. Information Systems and Networks
Technical, social, and economic issues in modern information networks. Introduction to Internet architectures and search technologies. Network economics and the pricing of digital goods. Advertising and marketing models for the Internet. Social interaction in the networked society emphasizing how information systems have altered work and the workplace. Recommendation systems, reputation systems, and information markets. Prequisite: CS 106B or X. GER:DB-EngrAppSci

3 units, Spr (DiPalantino, D)

MS&E 134. Organizations and Information Systems
(Same as MS&E 234.) How information systems impact organizations and how organizations take control of information technology (IT) to gain a competitive edge. Topics include: IT components, architecture, and transformation; the effect of IT on competition; real-time enterprise; leadership; and outsourcing. Student teams perform field studies based on situations in which information technology is creating a significant management problem or business opportunity. Enrollment limited. Prerequisites: CS 106A, 180, or equivalents.

4 units, Win (Tabrizi, B)

MS&E 140. Accounting for Managers and Entrepreneurs
(Same as MS&E 240.) Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career.

3-4 units, Win (Stanton, F), Spr (Stanton, F), Sum (Stanton, F)

MS&E 142. Investment Science
(Undergraduates register for 142.) Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Limited enrollment. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets.

3 units, Aut (Primbs, J)

MS&E 152. Introduction to Decision Analysis
(Same as MS&E 152W.) How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. GER:DB-EngrAppSci

3-4 units, Spr (Shachter, R)

MS&E 152W. Introduction to Decision Analysis
(Same as MS&E 152.) How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. GER:DB-EngrAppSci, WIM

3-4 units, Spr (Shachter, R)

MS&E 153. Introduction to Decision Making in Organizations
Experienced management consultants share lessons and war stories. Case studies, disguised examples from real engagements, and movie clips illustrate theories and concepts of decision analysis. Student teams critique decisions made in actual organizations. Topics include what makes a good decision, how decisions can be made better, framing and structuring techniques, modeling and analysis tools, biases and probability assessment, evaluation and appraisal methods, decision psychology, creativity and organizational leadership, and effective presentation styles. Not intended for MS&E majors. GER:DB-EngrAppSci

3 units, Sum (Holtzman, S; Robinson, B)

MS&E 154. Business Strategy and Public Policy Decision Making
Comparative study of how decision makers should formulate, evaluate, and implement strategy or policy in organizations of all sizes. Student teams apply qualitative and quantitative methods to private sector strategies, such as Internet company growth, entrepreneurial start-up, or corporate R&D portfolio, and public

sector policies, such as nuclear nonproliferation, flu pandemic mitigation, and terrorist attack prevention. Topics: right people doing the right thing in the right way; framing key issues and challenges; crafting doable strategies and policies; capturing uncertainties; resolving value dilemmas; analyzing consequences; testing sensitivities; gathering additional information; and committing to action. Not intended for MS&E majors. Recommended: algebra and probability.

3 units, Sum (Robinson, B)

MS&E 175. Innovation, Creativity, and Change
Problem solving in organizations; creativity and innovation skills; thinking tools; creative organizations, teams, individuals, and communities. (Katila)

3-4 units, Win (Katila, R)

MS&E 180. Organizations: Theory and Management
For undergraduates only; preference to MS&E majors. Classical and contemporary organization theory; the behavior of individuals, groups, and organizations. Limited enrollment. Students must attend first session.

4 units, Aut (Eisenhardt, K), Spr (Siino, R)

MS&E 181. Issues in Technology and Work for a Postindustrial Economy
How changes in technology and organization are altering work and lives. Approaches to studying and designing work. How understanding work and work practices can assist engineers in designing better technologies and organizations. Topics include job design, distributed and virtual organizations, the blurring of boundaries between work and family life, computer supported cooperative work, trends in skill requirements and occupational structures, monitoring and surveillance in the workplace, downsizing and its effects on work systems, project work and project-based lifestyles, the growth of contingent employment, telecommuting, electronic commerce, and the changing nature of labor relations.

3 units, Aut (Companys, Y)

MS&E 184. Technology and Work
Interplay between technology and work, emphasizing technological change and its impact on workers at all levels. Technologies include the assembly line, computer and information systems, cardiac surgery techniques, and advanced computational software. Motivations for and consequences of change, including rationalization, deskilling, reskilling, offshoring, and increasing abstraction of work.

3 units, Spr (Bailey, D)

MS&E 185. Global Work
Issues, challenges, and opportunities facing workers, teams, and organizations working across national boundaries. Topics include geographic distance, time zones, language and cultural differences, technologies to support distant collaboration, team dynamics, and corporate strategy.

4 units, Spr (Hinds, P)

MS&E 190. Methods and Models for Policy and Strategy Analysis
Guest lectures by departmental practitioners. Emphasis is on links among theory, application, and observation. Environmental, national security, and health policy; marketing, new technology, and new business strategy analyses. Comparisons between domains and methods.

3 units, Spr (Hutton, D)

MS&E 193. Technology and National Security
(Same as MS&E 193W, MS&E 293.) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

3 units, Aut (Perry, W; Hecker, S)

MS&E 193W. Technology and National Security
(Same as MS&E 193, MS&E 293.) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W. WIM

3 units, Aut (Perry, W; Hecker, S)

MS&E 197. Ethics and Public Policy
(Same as PUBLPOL 103B, STS 110.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM

5 units, Win (McGinn, R)

MS&E 198. Applied Modeling of Energy and Environmental Markets
Economic principles in models of energy and environmental markets. Spreadsheet examples for developing insights and communicating with decision makers. Market-clearing conditions, controlling emissions through fees, diffusion of new technologies, resource depletion, cartel behavior, and model evaluation. Prerequisites: ECON 50 and spreadsheets, or consent of instructor.

1 unit, Aut (Huntington, H)

GRADUATE COURSES IN MANAGEMENT SCIENCE AND ENGINEERING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MS&E 201. Dynamic Systems
Goal is to think dynamically in decision making, and recognize and analyze dynamic phenomena in diverse situations. Concepts: formulation and analysis; state-space formulation; solutions of linear dynamic systems, equilibria, dynamic diagrams; eigenvalues and eigenvectors of linear systems, the concept of feedback; nonlinear dynamics, phase plane analysis, linearized analysis, Liapunov functions, catastrophe theory. Examples: grabber-holder dynamics, technology innovation dynamics, creation of new game dynamics in business competition, ecosystem dynamics, social dynamics, and stochastic exchange dynamics. Prerequisite: MATH 103 or equivalent.

3-4 units, Spr (Tse, E)

MS&E 206. Art of Mathematical Modeling
Practicum. Students build mathematical models of real-life, ill-framed problems. Emphasis is on framing the issues, articulating modeling components logically (drawing from student's mathematical background), and analyzing the resulting model. Hands-on modeling. Project work in small groups. Prerequisites: basic analysis, calculus and algebra, and probability theory. Recommended: decision analysis, optimization and dynamic systems.

3-4 units, Spr (Kieffel, H)

MS&E 207. Interactive Management Science
(Same as MS&E 107.) Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures.

3 units, Aut (Savage, S)

MS&E 208A. Practical Training
MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 208B. Practical Training
MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 208C. Practical Training
MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Master's students are limited to one quarter of practical training. B.S. and Ph.D. students may take each of A, B, and C once.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 211. Linear and Nonlinear Optimization
Optimization theory and modeling. The role of prices, duality, optimality conditions, and algorithms in finding and recognizing solutions. Perspectives: problem formulation, analytical theory, computational methods, and recent applications in engineering, finance, and economics. Theories: finite dimensional derivatives, convexity, optimality, duality, and sensitivity. Methods: simplex and interior-point, gradient, Newton, and barrier. Prerequisite: MATH 51.

3-4 units, Aut (Ye, Y)

MS&E 212. Mathematical Programming and Combinatorial Optimization
(Same as MS&E 112.) Combinatorial and mathematical programming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: CS 106A or X; ENGR 62 or MATH 103.

3 units, Win (Saberi, A)

MS&E 220. Probabilistic Analysis
Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: the structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51. Recommended: knowledge of spreadsheets.

3-4 units, Aut (Chiu, S)

MS&E 221. Stochastic Modeling
Focus is on time-dependent random phenomena. Topics: discrete and continuous time Markov chains, renewal processes, queueing theory, and applications. Emphasis is on building a framework to formulate and analyze probabilistic systems. Prerequisite: 220 or consent of instructor.

3 units, Win (Johari, R)

MS&E 223. Simulation
Discrete-event systems, generation of uniform and non-uniform random numbers, Monte Carlo methods, programming techniques for simulation, statistical analysis of simulation output, efficiency-improvement techniques, decision making using simulation, applications to systems in computer science, engineering, finance, and operations research. Prerequisites: working knowledge of a programming language such as C, C++, Java, or FORTRAN; probability; and statistical methods.

3 units, Spr (Staff)

MS&E 234. Organizations and Information Systems
(Same as MS&E 134.) How information systems impact organizations and how organizations take control of information technology (IT) to gain a competitive edge. Topics include: IT components, architecture, and transformation; the effect of IT on competition; real-time enterprise; leadership; and outsourcing. Student teams perform field studies based on situations in which information technology is creating a significant management problem or business opportunity. Enrollment limited. Prerequisites: CS 106A, 180, or equivalents.

4 units, Win (Tabrizi, B)

MS&E 235. Internet Commerce
The technology, mathematics, and economics of Internet commerce. Topics include: models of Internet commerce; online advertising; product recommendation systems and personalized marketing; pricing and delivery of digital media; web tools; piracy, copyright, and peer-to-peer networks; rating and reviewing of online businesses; and co-evolution of Internet technology and commerce. Hands-on exercises; group project. Prerequisites: 111 or 211, and CS 106B or X.

3 units, Spr (Goel, A), alternate years, not given next year

MS&E 238. Network Structures and Analysis
The role of networks in social, technological, and economic systems. The impact of network structures on systems such as social networks including LinkedIn and Facebook; web pages and hyperlinks; buyers and sellers connected through a market; and towns connected by roads or airplane routes. Topics: graph and network analysis; epidemics on networks, the spread of fads, and tipping points; six degrees of separation and the small world phenomenon; power laws and their emergence; and network effects and externalities. Prerequisites: 220 and MATH 51.

3 units, alternate years, not given this year

MS&E 240. Accounting for Managers and Entrepreneurs
(Same as MS&E 140.) Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career.

3-4 units, Win (Stanton, F), Spr (Stanton, F), Sum (Stanton, F)

MS&E 241. Economic Analysis
Principal methods of economic analysis of the production activities of firms, including production technologies, cost and profit, and perfect and imperfect competition; individual choice, including preferences and demand; and the market-based system, including price formation, efficiency, and welfare. Practical applications of the methods presented. See 341 for continuation of 241. Recommended: 211, ECON 50.

3-4 units, Win (Weber, T)

MS&E 242. Investment Science
Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets. Limited enrollment.

3 units, Aut (Primbs, J)

MS&E 242H. Investment Science Honors
Concepts of modern quantitative finance and investments. Basic concepts under certainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Enrollment limited. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, ENGR 60, or equivalents. No prior knowledge of finance required.

3 units, Aut (Giesecke, K)

MS&E 242S. Investment Science
Emphasis is on a cash flow approach. Topics include deterministic cash flow analysis (time value of money, present value, internal rate of return, taxes, inflation), fixed income securities, duration and bond portfolio immunization, term structure of interest rates (spot rates, discount factors, forward rates), Fisher-Weill duration and immunization, capital budgeting, dynamic optimization problems, investments under uncertainty, mean-variance portfolio theory, capital asset pricing, and basic options theory. Goal is to create a link between engineering analysis and business decision making.
3 units, Sum (Feinstein, C)

MS&E 243. Energy and Environmental Policy Analysis
(Same as IPER 243.) Concepts, methods, and applications. Energy/environmental policy issues such as automobile fuel economy regulation, global climate change, research and development policy, and environmental benefit assessment. Group project. Prerequisite: 241 or ECON 50, 51.
3 units, Spr (Sweeney, J)

MS&E 245G. Finance for Non-MBAs
(Same as ECON 135, FINANCE 221.) For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Limited enrollment; contact academic_operations@gsb.stanford.edu. Prerequisites: ECON 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.
4 units, Aut (Admati, A)

MS&E 246. Game Theory with Engineering Applications
Strategic interactions among multiple decision makers emphasizing applications to engineering systems. Topics: efficiency and fairness; collective decision making and cooperative games; static and dynamic noncooperative games; and complete and incomplete information models. Competition: Bertrand, Cournot, and Stackelberg models. Mechanism design: auctions, contracts. Examples from engineering problems. Prerequisites: MATH 51 and exposure to probability such as 120 or EE 178. Recommended: 211, concurrent enrollment in 241 or ECON 202.
3 units, Win (Johari, R)

MS&E 247G. International Financial Management
(Same as FINANCE 323.) With a daily volume of more than $1.8tr the foreign exchange market is by far the largest financial market in the world. It is also one of the most important ones as it is impossible to avoid exchange rate risk in the global economy. We will examine various aspects of the foreign exchange market. First, we will examine the role of governments and central banks. We will then focus on the markets for spot exchange, currency forwards, options, swaps, international bonds, and international equities. For each of these markets, the valuation of instruments traded in these markets and, through cases, the application of these instruments to managing exposure to exchange rates, financing in international capital markets, and international capital budgeting.
4 units

MS&E 247S. International Investments
International financial markets, their comparative behavior and interrelations. Focus is on assets traded in liquid markets: currencies, equities, bonds, swaps, and derivatives. Topics: institutional arrangements, taxation and regulation, international arbitrage and parity conditions, valuation of target firms for cross-border acquisitions, direct foreign investment, international diversification and portfolio management, derivative instruments and dynamic investment strategies, international performance analysis, international capital flows and financial crises, and topics of current relevance and importance. Prerequisite: basic finance theory (equivalent to 242 or 245G).
3 units, Sum (Fu, Y)

MS&E 248. Economics of Natural Resources
Intertemporal economic analysis of natural resource use, particularly energy, and including air, water, and other depletable mineral and biological resources. Emphasis is on an integrating theory for depletable and renewable resources. Stock-flow relationships; optimal choices over time; short- and long-run equilibrium conditions; depletion/extinction conditions; market failure mechanisms (common-property, public goods, discount rate distortions, rule-of-capture); policy options. Prerequisite: 241 or ECON 51.
3-4 units, Aut (Sweeney, J)

MS&E 249. Growth and Development
What generates economic growth. Emphasis is on theory accompanied by intuition, illustrated with country cases. Topics: the equation of motion of an economy; optimal growth theory; calculus of variations and optimal control approaches; deriving the Euler and Pontriaguine equations from economic reasoning. Applications: former planned economies in Russia and E. Europe; the financial crises in E. Asia and Argentina; a comparative study of India and China. The links between economic growth and civilization; the causes of the rise and decline of civilizations: lessons for the future.
3 units, Aut (De La Grandville, O), Sum (De La Grandville, O)

MS&E 250A. Engineering Risk Analysis
The techniques of analysis of engineering systems for risk management decisions involving trade-offs (technical, human, environmental aspects). Elements of decision analysis; probabilistic risk analysis (fault trees, event trees, systems dynamics); economic analysis of failure consequences (human safety and long-term economic discounting); and case studies such as space systems, nuclear power plants, and medical systems. Public and private sectors. Prerequisites: ENGR 60 or equivalent, probability, and decision analysis.
2-3 units, Win (Pate-Cornell, E)

MS&E 250B. Project Course in Engineering Risk Analysis
Students, individually or in groups, choose, define, formulate, and resolve a real risk management problem, preferably from a local firm or institution. Oral presentation and report required. Scope of the project is adapted to the number of students involved. Three phases: risk assessment, communication, and management. Emphasis is on the use of probability for the treatment of uncertainties and sensitivity to problem boundaries. Limited enrollment. Prerequisite: 250A, consent of instructor. (Paté-Cornell)
3 units, Spr (Pate-Cornell, E)

MS&E 251. Stochastic Decision Models
Efficient formulation and computational solution of sequential decision problems under uncertainty. Markov decision chains and stochastic programming. Maximum expected present value and rate of return. Optimality of simple policies: myopic, linear, index, acceptance limit, and (s,S). Optimal stationary and periodic infinite-horizon policies. Applications to investment, options, overbooking, inventory, production, purchasing, selling, quality, repair, sequencing, queues, capacity, transportation. MATLAB is used. Prerequisites: probability, linear programming.
3 units, Win (Veinott, A)

MS&E 252. Decision Analysis I: Foundations of Decision Analysis
Coherent approach to decision making, using the metaphor of developing a structured conversation having desirable properties, and producing actional thought that leads to clarity of action. Socratic instruction; computational problem sessions. Emphasis is on creation of distinctions, representation of uncertainty by probability, development of alternatives, specification of preference, and the role of these elements in creating a normative approach to decisions. Information gathering opportunities in terms of a value measure. Relevance and decision diagrams to represent inference and decision. Principles are applied to decisions in business, technology, law, and medicine. See 352 for continuation.
3-4 units, Aut (Howard, R)

MS&E 254. The Ethical Analyst
The ethical responsibility for consequences of professional analysts who use technical knowledge in support of any individual, organization, or government. The means to form ethical judgments; questioning the desirability of physical coercion and deception as a

means to reach any end. Human action and relations in society in the light of previous thought, and research on the desired form of social interactions. Attitudes toward ethical dilemmas through an explicit personal code.

1-3 units, Spr (Howard, R)

MS&E 255A. Decision Systems I

(Formerly MS&E 451.) Professional tools and techniques for designing decision systems that help when facing decisions such as buying a car, bidding on the Internet, hiring NFL players, making charitable donations, or choosing medical treatment. Demonstrations; small project. Topics: automatic decision diagram formulation, decision-class analysis, and dynamic sensitivity analysis. No programming required. Recommended: 252 or equivalent.

2-3 units, Win (Holtzman, S)

MS&E 255B. Decision Systems II

(Formerly MS&E 452.) Students design a system to help business, consumer, medical, or other decision makers. Previous student teams have designed systems for auction bidding, cancer treatment, sailing tactics, automobile purchasing, network design, Mars exploration, flu treatment, platoon tactics, high-tech manufacturing, and oil-and-gas exploration. No programming required. Satisfies MS&E project course requirement. Prerequisite: 252 or equivalent. Recommended: 255A.

3 units, Spr (Holtzman, S)

MS&E 256. Technology Assessment and Regulation of Medical Devices

(Formerly 475.) Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

1-3 units, Spr (Pietzsch, J)

MS&E 260. Analysis of Production and Operating Systems

Businesses add value through production and delivery of products and services; operations managers are responsible for designing, running, and improving systems and processes to meet demand for goods and services. Techniques to analyze an operating system. Topics include determination of optimal facility location, production lot sizing, optimal timing and sizing of capacity expansion, and inventory control. Prerequisites: probability and optimization.

4 units, Aut (Staff)

MS&E 261. Inventory Control and Production Systems

Topics in the planning and control of manufacturing systems. The functions of inventory, determination of order quantities and safety stocks, alternative inventory replenishment systems, item forecasting, production-inventory systems, materials requirements planning (MRP), just-in-time systems, master and operations scheduling, supply chain management, and service operations. Limited enrollment. Prerequisite: 120, or STATS 116, or equivalent.

3 units, Win (Hausman, W)

MS&E 262. Supply Chain Management

Definition of a supply chain; coordination difficulties; pitfalls and opportunities in supply chain management; inventory/service tradeoffs; performance measurement and incentives. Global supply chain management; mass customization; supplier management. Design and redesign of products and processes for supply chain management; tools for analysis; industrial applications; current industry initiatives. Enrollment limited to 50. Prerequisite: 260 or 261.

3 units, Spr (Hausman, W)

MS&E 263. Internet-Enabled Supply Chains

E-businesses have changed traditional supply chain interactions by creating a web-like structure and more flexible relationships, and it is no longer possible operationally or strategically to ignore the information-based virtual value chains for any business. How information technologies advanced supply chain integration; e-markets including auctions and exchanges; dynamic pricing; bundling; strategic implications of lock-in and switching costs; compatibility choices; and standardization efforts.

3 units, not given this year

MS&E 264. Sustainable Product Development and Manufacturing

Strategies and techniques for development of sustainable products and manufacturing processes. Topics: strategic decisions in new product development when environmental and resource externalities are accounted for; effect of regulatory requirements on ability of a firm to achieve its business objectives; contributions of sustainable products/processes to the firm's competitive advantage and operational efficiency and to enabling entrepreneurial opportunities; industrial ecology and life cycle analysis techniques in integrating traditional product development requirements with those of the environment and society.

3 units, Aut (Rafinejad, D)

MS&E 265. Supply Chain Logistics

Student teams redesign the manufacturing and distribution system of a medium-sized manufacturer. Focus is on the transportation system, inventory policies for a regional warehouse, design of a national distribution system, improvements of work flow, and layout of the manufacturing plant. The redesign is at a detailed operational level consistent with a strategy of integrating the functions of manufacturing and distribution. Analytical and game software is used. Knowledge of inventory theory, linear/integer programming, economic analysis, and applied probability is required. Emphasis is on group learning. Limited enrollment. Prerequisites: senior or graduate standing, 160, ENGR 60 and 62, or consent of instructor.

4 units, Spr (Erhun Oguz, F), alternate years, not given next year

MS&E 266. Management of New Product Development

Techniques of managing or leading the process of new product development that have been found effective. How much control is desirable and how that control can be exercised in a setting where creativity has traditionally played a larger role than discipline. Topics: design for manufacturability, assessing the market, imposing discipline on the new product development process, selecting the appropriate portfolio of new product development projects, disruptive technology, product development at internet speed, uncertainty in product development, role of experimentation in new product development, creating an effective development organization, and developing products to hit cost targets.

3-4 units, Win (Rafinejad, D)

MS&E 267. Supply Chain Risk and Flexibility Management

Methods and analytic tools for quantifying and managing the impact of uncertainty in supply and demand on the operating and financial performance of firms and networks of firms. Design and delivery of products and services to provide competitive differentiation by enabling cost, value, risk and flexibility to be balanced and managed across supply networks. Case study applications by leading companies to procurement, manufacturing, outsourcing, and sales relationships. Tools, processes, and internal crossfunctional coordination required to operationalize approaches in core planning and execution systems and processes. Prerequisite: 262.

3-4 units, Spr (Johnson, B)

MS&E 268. Operations Strategy

The development and implementation of the operations functional strategy. The integration of operations strategy with business and corporate strategies of a manufacturing-based firm. Topics: types and characteristics of manufacturing technologies, quality management, capacity planning and facilities choice, organization and control of operations, and operations' role in corporate strategy. Prerequisites: 260 or 261, or equivalent experience.

3 units, Spr (Carlson, R)

MS&E 269. Quality Control and Management

Topics include the cost of quality, inspection, sampling plans, statistical process control, uncertainty in the supply process, Bayesian decision methods, reliability, robust quality, quality function deployment, quality in services, and approaches to quality management. Case studies. Class project involving local industry required for fourth unit. Prerequisites: 120 and STATS 110.

3-4 units, not given this year

MS&E 270. Strategy in Technology-Based Companies

For graduate students only. Concepts of strategy, with emphasis on high technology firms. Topics: competitive positioning, resource-based perspectives, co-opetition and standards setting, and complexity/evolutionary perspectives. Limited enrollment.

3-4 units, Aut (Eisenhardt, K), Win (Katila, R)

MS&E 271. Global Entrepreneurial Marketing
Skills needed to market new technology-based products to customers around the world. Case method discussions. Cases include startups and global high tech firms. Course themes: marketing toolkit, targeting markets and customers, product marketing and management, partners and distribution, sales and negotiation, and outbound marketing. Team-based take-home final exam. Limited enrollment.

4 units, Win (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L), Spr (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L)

MS&E 272. Entrepreneurial Finance
Primarily for graduate engineering students. Introduction to the concepts in and around the financing of entrepreneurial companies. Focus is on teaching future general managers how to use financial perspective to make better decisions in entrepreneurial settings, including selecting financial partners, evaluating financing vehicles, and financing companies through all growth stages, from startup through initial public offering. Limited enrollment. Prerequisites: 140 and ENGR 60, or equivalents. Recommended: 242 or 245G.

3 units, Spr (Dearing, M)

MS&E 273. Technology Venture Formation
Open to graduate students interested in high-technology entrepreneurship.The process of starting venture scale high-tech businesses. Assessing opportunities, sizing markets, evaluating sales channels, developing R&D and operations plans, raising venture capital, managing legal issues, and building a team. Teaching team includes entrepreneurs, venture capitalists, and guest speakers. Student teams write a business plan and make a formal presentation to a group of first tier venture capitalists. Enrollment limited. Recommended: 140, 270, 271, 272, or equivalent.

3-4 units, Aut (Lyons, M; MacLean, A)

MS&E 274. Dynamic Entrepreneurial Strategy
Primarily for graduate students. How entrepreneurial strategy focuses on creating structural change or responding to change induced externally. Grabber-holder dynamics as an analytical framework for developing entrepreneurial strategy to increase success in creating and shaping the diffusion of new technology or product innovation dynamics. Topics: First mover versus follower advantage in an emerging market; latecomer advantage and strategy in a mature market; strategy to break through stagnation; and strategy to turn danger into opportunity. Modeling, case studies, and term project.

3 units, Win (Tse, E)

MS&E 277. Creativity and Innovation
Factors that promote and inhibit creativity of individuals, teams, and organizations. Creativity tools, assessment metrics, and exercises; workshops, field trips, and case studies. Each student completes an individual creativity portfolio and participates in a long-term team project. Enrollment limited to 32. See http://creativity.stanford.edu.

4 units, Spr (Seelig, T)

MS&E 280. Organizational Behavior: Evidence in Action
Organization theory; concepts and functions of management; behavior of the individual, work group, and organization. Emphasis is on cases and related discussion. Enrollment limited; priority to MS&E students.

3-4 units, Win (Sutton, R), Spr (Siino, R)

MS&E 282. Innovation and Implementation in Complex Organizations
The difficulty of moving new ideas through large organizations. Executives from large companies describe cases; student teams analyze the cases and provide recommendations. Final project. Enrollment limited to 12. Prerequisites: master's standing and consent of instructors.

3 units, Win (Sutton, R; Dearing, M)

MS&E 285. Negotiation
(Same as CEE 151, CEE 251, ME 207.) Negotiation styles and processes to help students conduct and review negotiations. Workshop format integrating intellectual and experiential learning. Exercises, presentations, live and field examples, and individual and small group reviews. Application required before first day of class; see Coursework.

3 units, Aut (Christensen, S), Spr (Christensen, S)

MS&E 287. Treating Business Practices as Prototypes
Multidisciplinary. Students work in teams to apply the design process to practices such as talent management, organizational design, or communication with external stakeholders in organizations that may include a software firm, a professional services firm, and an airline, and treat the targeted practices as prototypes. Experience in collaboration and design. Limited enrollment.

3-4 units, Win (Sutton, R; Dunn, D)

MS&E 288. Creating Infectious Action
Offered by the d.school. Teams of master's students from disciplines including engineering, design, business, behavioral sciences, and education attempt to spread positive behavior through projects that include spreading the adoption of the Firefox web browser, applying methods from hip hop to fuel the spread of fads, and spreading financially responsible individual behavior. Industry experts and academics provide guidance.

3-4 units, not given this year

MS&E 292. Health Policy Modeling
Primarily for master's students; also open to undergraduates and doctoral students. The application of mathematical, statistical, economic, and systems models to problems in health policy. Areas include: disease screening, prevention, and treatment; assessment of new technologies; bioterrorism response; and drug control policies.

3 units, Win (Brandeau, M)

MS&E 293. Technology and National Security
(Same as MS&E 193, MS&E 193W.) The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

3 units, Aut (Perry, W; Hecker, S)

MS&E 294. Climate Policy Analysis
Design and application of formal analytical methods in climate policy development. Issues include instrument design, technology development, resource management, multiparty negotiation, and dealing with complexity and uncertainty. Links among art, theory, and practice. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy making application. Recommended: background in economics, optimization, and decision analysis.

3 units, alternate years, not given this year

MS&E 295. Energy Policy Analysis
Design and application of formal analytical methods for policy and technology assessments of energy efficiency and renewable energy options. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy and corporate strategy development. Recommended: background in economics, optimization, and decision analysis.

3 units, Win (Weyant, J)

MS&E 299. Designing A Free Society
Ethical theory, feasibility, and desirability of a social order in which coercion by individuals and government is minimized and people pursue ends on a voluntary basis. Topics: efficacy and ethics; use rights for property; contracts and torts; spontaneous order and free markets; crime and punishment based on restitution; guardian-ward theory for dealing with incompetents; the effects of state action-hypothesis of reverse results; applications to help the needy, armed intervention, victimless crimes, and environmental protection; transition strategies to a voluntary society.

1-3 units, Win (Howard, R)

MS&E 300. Ph.D. Qualifying Tutorial or Paper
Restricted to Ph.D. students assigned tutorials as part of the MS&E Ph.D. qualifying process. Enrollment optional.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 301. Dissertation Research
Prerequisite: doctoral candidacy.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 310. Linear Programming
Formulation of standard linear programming models. Theory of polyhedral convex sets, linear inequalities, alternative theorems, and duality. Variants of the simplex method and the state of art interior-point algorithms. Sensitivity analyses, economic interpretations, and primal-dual methods. Relaxations of harder optimization problems and recent convex conic linear programs. Applications include game equilibrium facility location. Prerequisite: MATH 113 or consent of instructor.

3 units, Aut (Ye, Y)

MS&E 311. Optimization
Applications, theories, and algorithms for finite-dimensional linear and nonlinear optimization problems with continuous variables. Elements of convex analysis, first- and second-order optimality conditions, sensitivity and duality. Algorithms for unconstrained optimization, and linearly and nonlinearly constrained problems. Modern applications in communication, game theory, auction, and economics. Prerequisites: MATH 113, 115, or equivalent.

3 units, alternate years, not given this year

MS&E 312. Advanced Methods in Numerical Optimization
(Same as CME 334.) Topics include interior-point methods, relaxation methods for nonlinear discrete optimization, sequential quadratic programming methods, optimal control and decomposition methods. Topic chosen in first class; different topics possible. Individual or team projects. May be repeated for credit.

3 units, Aut (Murray, W)

MS&E 313. Vector Space Optimization
Optimization theory from the unified framework of vector space theory: treating together problems of mathematical programming, calculus of variations, optimal control, estimation, and other optimization problems. Emphasis is on geometric interpretation. Duality theory. Topics: vector spaces including function spaces; Hilbert space and the projection theorem; dual spaces and the separating hyperplane theorem; linear operators and adjoints; optimization of functionals, including theory of necessary conditions in general spaces, and convex optimization theory; constrained optimization including Fenchel duality theory. Prerequisite: MATH 115.

3 units, Aut (Luenberger, D), alternate years, not given next year

MS&E 314. Linear and Conic Optimization with Applications
(Same as CME 336.) Linear, semidefinite, conic, and convex nonlinear optimization problems as generalizations of classical linear programming. Algorithms include the interior-point, barrier function, and cutting plane methods. Related convex analysis, including the separating hyperplane theorem, Farkas lemma, dual cones, optimality conditions, and conic inequalities. Complexity and/or computation efficiency analysis. Applications to combinatorial optimization, sensor network localization, support vector machine, and graph realization. Prerequisite: MS&E 211 or equivalent.

3 units, Win (Ye, Y), alternate years, not given next year

MS&E 315. Numerical Optimization
(Same as CME 304.) Solution of nonlinear equations; unconstrained optimization; linear programming; quadratic programming; global optimization; general linearly and nonlinearly constrained optimization. Theory and algorithms to solve these problems. Prerequisite: background in analysis and numerical linear algebra.

3 units, Win (Murray, W)

MS&E 316. Discrete Mathematics and Algorithms
(Same as CME 305.) Topics: enumeration such as Cayley's theorem and Prufer codes, SDR, flows and cuts (deterministic and randomized algorithms), probabilistic methods and random graphs, asymptotics (NP-hardness and approximation algorithms). Topics illustrated with EE, CS, and bioinformatics applications. Prerequisites: MATH 51 or 103 or equivalents.

3 units, Win (Saberi, A)

MS&E 318. Large-Scale Numerical Optimization
(Same as CME 338.) The main algorithms and software for constrained optimization emphasizing the sparse-matrix methods needed for their implementation. Iterative methods for linear equations and least squares. Interior methods. The simplex method. Factorization and updates. The reduced-gradient, augmented Lagrangian, and SQP methods. Recommended: MS&E 310, 311, 312, 314, or 315; CME 108 or 302.

3 units, Spr (Saunders, M)

MS&E 319. Approximation Algorithms
Combinatorial and mathematical programming techniques to derive approximation algorithms for NP-hard optimization problems. Possible topics include: greedy algorithms for vertex/set cover; rounding LP relaxations of integer programs; primal-dual algorithms; semidefinite relaxations. May be repeated for credit. Prerequisites: 112 or CS 161.

3 units, alternate years, not given this year

MS&E 321. Stochastic Systems
Topics in stochastic processes, emphasizing applications. Markov chains in discrete and continuous time; Markov processes in general state space; Lyapunov functions; regenerative process theory; renewal theory; martingales, Brownian motion, and diffusion processes. Application to queueing theory, storage theory, reliability, and finance. Prerequisites: 221 or STATS 217; MATH 113, 115. (Glynn)

3 units, Spr (Glynn, P)

MS&E 322. Stochastic Calculus and Control
Ito integral, existence and uniqueness of solutions of stochastic differential equations (SDEs), diffusion approximations, numerical solutions of SDEs, controlled diffusions and the Hamilton-Jacobi-Bellman equation, and statistical inference of SDEs. Applications to finance and queueing theory. Prerequisites: 221 or STATS 217: MATH 113, 115.

3 units, alternate years, not given this year

MS&E 323. Stochastic Simulation
Emphasis is on the theoretical foundations of simulation methodology. Generation of uniform and non-uniform random variables. Discrete-event simulation and generalized semi-Markov processes. Output analysis (autoregressive, regenerative, spectral, and stationary times series methods). Variance reduction techniques (antithetic variables, common random numbers, control variables, discrete-time, conversion, importance sampling). Stochastic optimization (likelihood ratio method, perturbation analysis, stochastic approximation). Simulation in a parallel environment. Prerequisite: MS&E 221 or equivalent.

3 units, Win (Glynn, P), alternate years, not given next year

MS&E 325. Topics in Stochastic Optimization
Algorithms for optimization problems with inputs from a known probability distribution or a known class of probability distributions. Topics: Markov decision processes; optimization with sparse priors; multi-armed bandit problems and the Gittins' index; regret bounds for multi-armed bandit problems; stochastic knapsack and the adaptivity gap; budgeted learning; adversarial queueing theory; stochastic scheduling and routing; stochastic inventory problems; multi-stage and multi-objective stochastic optimization. Prerequisites: MS&E 221 or equivalent; and MS&E 212 or CS 261 or equivalent.

3 units, Win (Goel, A), alternate years, not given next year

MS&E 332. Security and Risk in Computer Networks
Risk management of large scale computing and networking systems with respect to security, data integrity, performance collapse, and service disruption. Qualitative and analytical basis for assessment, modeling, control, and mitigation of network risks. Stochastic risk models. Contact process. Random fields on networks. Virus and worm propagation dynamics and containment. Denial of service attacks. Intruder detection technologies. Distributed network attacks and countermeasures. Disaster recovery networks. Network protection services and resource placement. Autonomic self-defending networks. Economics of risk management. Emphasis is on analytics and quantitative methods.

3 units, Spr (Bambos, N)

MS&E 335. Queuing Systems and Processing Networks
Advanced stochastic modeling and control of systems involving queueing and scheduling operations. Stability analysis of queueing systems. Key results on single queues and queueing networks. Controlled queueing systems. Dynamic routing and scheduling in processing networks. Applications to modeling, analysis and performance engineering of computing systems, communication networks, flexible manufacturing, and service systems. Prerequisite: 221 or equivalent.

3 units, Aut (Bambos, N)

MS&E 336. Topics in Game Theory with Engineering Applications
Seminar. Recent research applying economic methods to engineering problems. Recent topics include: incentives in networked systems; mechanism design in engineered systems; and dynamics and learning in games. Prerequisites: mathematics at the level of MATH 115; game theory at the level of 246 or ECON 203; probability at the level of 220; optimization at the level of 211. May be repeated for credit.
3 units, Spr (Johari, R)

MS&E 337. Information Networks
(Same as CME 337.) Network structure of the Internet and the web. Modeling, scale-free graphs, small-world phenomenon. Algorithmic implications in searching and inter-domain routing; the effect of structure on performance. Game theoretic issues, routing games, and network creation games. Security issues, vulnerability, and robustness. Prerequisite: basic probability and graph theory.
3 units, alternate years, not given this year

MS&E 338. Advanced Topics in Information Science and Technology
Advanced material in this area is sometimes taught for the first time as a topics course. Prerequisite: consent of instructor.
3 units, not given this year

MS&E 339. Approximate Dynamic Programming
Approximation algorithms for large-scale dynamic programming. Real-time dynamic programming and reinforcement learning algorithms. Generalizations of value iteration, policy iteration, and linear programming approaches. Recent research topics. Prerequisite: 251, 351, CS 221, CS 228, or CS 229.
3 units, Spr (Van Roy, B)

MS&E 341. Advanced Economic Analysis
Builds on 241 concepts. Market structure and industrial organization (oligopoly, strategic behavior of firms, game theoretic models); economics of uncertainty; general equilibrium theory and economic efficiency (formulation, Walras' Law, existence, uniqueness, duality between efficiency and general equilibrium; trade); intertemporal equilibrium and asset markets; public goods, externalities. Background for advanced economics. Prerequisite: 241.
3 units, alternate years, not given this year

MS&E 342. Advanced Investment Science
Topics: forwards and futures contracts, continuous and discrete time models of stock price behavior, geometric Brownian motion, Ito's lemma, basic options theory, Black-Scholes equation, advanced options techniques, models and applications of stochastic interest rate processes, and optimal portfolio growth. Computational issues and general theory. Teams work on independent projects. Prerequisite: 242.
3 units, Win (Luenberger, D)

MS&E 343. Optimal Control Theory with Applications in Economics
Classical and nonclassical optimal control applications in economics. Necessary and sufficient optimality conditions: maximum principle and HJB equation. Applications: single-person decision problems such as dynamic pricing, investment, marketing, and harvesting of renewable resources; multi-agent games such as dynamic oligopolies with open and closed-loop equilibria, capital accumulation, and dynamic pricing; and design of economic mechanisms such as screening contracts, regulation, and auctions. Prerequisites: course in dynamic systems and multivariable calculus.
3 units, Spr (Weber, T)

MS&E 344. Applied Information Economics
The strategic acquisition, pricing, transfer, and use of information. Theoretical findings applied to real-world settings. Topics: optimal risk bearing, adverse selection, signaling, screening, nonlinear and state-contingent pricing, design of contests, incentives and organizations, strategic information transmission, long-run relationships, negative information value, research and invention, leakage and espionage, imperfect competition, information sharing, search and advertising, learning, and real-option exercise games. Prerequisites: 211, 220, 241. Recommended: 341.
3 units, not given this year

MS&E 345. Advanced Topics in Financial Engineering
Derivative pricing theory from an engineering perspective. Underlying principles that apply to all derivative securities; general frameworks to model and price derivative securities on equities, interest rates, and credit. Topics in hedging and risk management. Prerequisites: derivative pricing and stochastic differential equations; and 220, 221, 242, 342, or consent of instructor. Recommended: Matlab. (Primbs)
3 units, Win (Primbs, J)

MS&E 347. Credit Risk: Modeling and Management
Credit risk modeling, valuation, and hedging emphasizing underlying economic, probabilistic, and statistical concepts. Point processes and their compensators. Structural, incomplete information and reduced form approaches. Single name products: corporate bonds, equity, equity options, credit and equity default swaps, forwards and swaptions. Multiname modeling: index and tranche swaps and options, collateralized debt obligations. Implementation, calibration and testing of models. Industry and market practice. Data and implementation driven group projects that focus on problems in the financial industry. Prerequisites: stochastic processes at the level of MSE 321, 322 or equivalent, and financial engineering at the level of MSE 342, MATH 180, MATH 240, FINANCE 622 or equivalent
3 units, Spr (Giesecke, K)

MS&E 348. Optimization of Uncertainty and Applications in Finance
How to make optimal decisions in the presence of uncertainty, solution techniques for large-scale systems resulting from decision problems under uncertainty, and applications in finance. Decision trees, utility, two-stage and multi-stage decision problems, approaches to stochastic programming, model formulation; large-scale systems, Benders and Dantzig-Wolfe decomposition, Monte Carlo sampling and variance reduction techniques, risk management, portfolio optimization, asset-liability management, mortgage finance. Projects involving the practical application of optimization under uncertainty to financial planning.
3 units, Win (Infanger, G)

MS&E 349. Capital Deployment
Methods for efficiently allocating capital among alternatives, constructing business plans, determining the value of risky projects, and creating alternatives that enhance value. Prerequisites: 242, 342.
3 units, Spr (Luenberger, D)

MS&E 351. Dynamic Programming and Stochastic Control
Markov population decision chains in discrete and continuous time. Risk posture. Present value and Cesaro overtaking optimality. Optimal stopping. Successive approximation, policy improvement, and linear programming methods. Team decisions and stochastic programs; quadratic costs and certainty equivalents. Maximum principle. Controlled diffusions. Examples from inventory, overbooking, options, investment, queues, reliability, quality, capacity, transportation. MATLAB. Prerequisites: MATH 113, 115; Markov chains; linear programming.
3 units, Spr (Veinott, A)

MS&E 352. Decision Analysis II: Professional Decision Analysis
How to organize the decision conversation, the role of the decision analysis cycle and the model sequence, assessing the quality of decisions, framing decisions, the decision hierarchy, strategy tables for alternative development, creating spare and effective decision diagrams, biases in assessment, knowledge maps, uncertainty about probability. Sensitivity analysis, approximations, value of revelation, joint information, options, flexibility, bidding, assessing and using corporate risk attitude, risk sharing and scaling, and decisions involving health and safety. See 353 for continuation. Prerequisite: 252.
3-4 units, Win (Howard, R)

MS&E 353. Decision Analysis III: Frontiers of Decision Analysis
The concept of decision composite; probabilistic insurance and other challenges to the normative approach; the relationship of decision analysis to classical inference and data analysis procedures; the likelihood and exchangeability principles; inference, decision, and experimentation using conjugate distributions; developing a risk attitude based on general properties; alternative decision aiding practices such as analytic hierarchy and fuzzy approaches. Student presentations on current research. Goal is to prepare doctoral students for research. Prerequisite: 352.
3 units, Spr (Staff)

MS&E 355. Influence Diagrams and Probabilistics Networks
Network representations for reasoning under uncertainty: influence diagrams, belief networks, and Markov networks. Structuring and assessment of decision problems under uncertainty. Learning from evidence. Conditional independence and requisite information. Node reductions. Belief propagation and revision. Simulation. Linear-quadratic-Gaussian decision models and Kalman filters. Dynamic processes. Bayesian meta-analysis. Prerequisites: 220, 252, or equivalents, or consent of instructor.

3 units, alternate years, not given this year

MS&E 361. Supply Chain Optimization
Characterization and computation of optimal and nearly optimal multiperiod supply chain policies with known or uncertain demands using dynamic, lattice, network, and convex and concave programming. Cooperation: sharing benefits of alliances. Competition. Leontief-substitution and network-flow models. Lattice programming: comparison of optima; existence and comparison of equilibria of non-cooperative games. Stochastic comparison. Invariant properties of optimal flows: graphical optimization of supply chains. Optimality of myopic policies. Prerequisites: MATH 115, optimization theory, probability.

3 units, Aut (Veinott, A), alternate years, not given next year

MS&E 362. Advanced Models in Production and Operations
The design and operation of production-inventory systems. Topics include production scheduling, capacity planning, sequencing, assembly-line balancing, dynamic scheduling, and multigoal optimizations. Readings primarily from journal articles. Prerequisite: 260.

3 units, Spr (Carlson, R), alternate years, not given next year

MS&E 364. Multi-echelon Inventory Models
Theoretical treatment of control problems arising in inventory management, production, and distribution systems. Inventory control for single and multi-location systems. Emphasis is on operating characteristics, performance measures, and optimal operating and control policies. Dynamic programming and applications in inventory control. Prerequisite: STATS 217 or equivalent, linear programming.

3 units, alternate years, not given this year

MS&E 365. Game Theoretic Models in Operations Management
Formal analysis of strategic interactions among decision makers such as suppliers, manufacturers, retailers, and consumers; the resulting dynamics in a market environment. Game theory as the main tool of analysis. Readings primarily from journal articles. May be repeated for credit. Prerequisite: 246 or equivalent.

3 units, Spr (Erhun Oguz, F), alternate years, not given next year

MS&E 371. Innovation and Strategic Change
Doctoral research seminar, limited to Ph.D. students. Current research on innovation strategy. Topics: scientific discovery, innovation search, organizational learning, evolutionary approaches, and incremental and radical change. Topics change yearly. Recommended: course in statistics or research methods.

2-3 units, alternate years, not given this year

MS&E 374. Dynamic Corporate Strategy
Restricted to Ph.D. students. Research on the creation and shaping of disruptive industry dynamics and how companies can formulate and implement strategies to excel in such changing environments. Dynamic system model approach; case studies. Prerequisites: 201 or equivalent, 274.

3 units, Win (Tse, E), alternate years, not given next year

MS&E 375. Research on Entrepreneurship
Restricted to Ph.D. students. Organization theory, economics, and strategy perspectives. Limited enrollment. Prerequisites: SOC 360 or equivalent, and consent of instructor.

3 units, Aut (Eisenhardt, K)

MS&E 376. Strategy and Organization Doctoral Research Seminar
Current research at the interface of strategy policy and organization theory. Topics vary annually. Limited enrollment. Prerequisites: SOC 360 or equivalent, and consent of instructor.

3 units, not given this year

MS&E 380. Doctoral Research Seminar in Organizations
Limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

3 units, not given this year

MS&E 381A. Doctoral Research Seminar in Work, Technology, and Organization: Theoretical Underpinnings
Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

2-3 units, not given this year

MS&E 381B. Doctoral Research Seminar in Work, Technology, and Organization: The Study of Work
Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Prerequisite: consent of instructor.

2-3 units, Spr (Bailey, D)

MS&E 381C. Doctoral Research Seminar in Work, Technology, and Organization: The Study of Technology
Enrollment limited to Ph.D. students. Topics from current literature and working papers. Prerequisite: consent of instructor.

2-3 units, not given this year

MS&E 383. Doctoral Seminar on Ethnographic Research
For graduate students; upper-level undergraduates with consent of instructor. Ethnosemantic interviewing and participant observation. Techniques for taking, managing, and analyzing field notes and other qualitative data. 15 hours per week outside class collecting and analyzing own data. Methods texts and ethnographies offer examples of how to analyze and communicate ethnographic data. Prerequisite: consent of instructor. (Barley)

5-6 units, Win (Hinds, P)

MS&E 384. Groups and Teams
Research on groups and teams in organizations from the perspective of organizational behavior and social psychology. Topics include group effectiveness, norms, group composition, diversity, conflict, group dynamics, temporal issues in groups, geographically distributed teams, and intergroup relations.

3 units, alternate years, not given this year

MS&E 406. Mathematical Modeling Seminar
Mathematical modeling issues in participants' current research. Topics such as modularity, variable endogenization, parameter estimation, and orders of effect. Students share their models for discussion. Limited enrollment. Recommended: 206.

1 unit, alternate years, not given this year

MS&E 408. Directed Reading and Research
Directed study and research on a subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MS&E 444. Investment Practice
Theory of real options, soft derivatives, and related ideas. Problems from financial engineering and risk management. Examples from industry. Small group projects formulate and design solutions to actual industry problems. Enrollment limited to 30.

3-4 units, Spr (Giesecke, K)

MS&E 445. Projects in Wealth Management
Recent theory and standard practice in portfolio design for institutions, individuals, and funds. Student projects and case studies derived from the financial industry.

3-4 units, Spr (Woehrmann, P)

MS&E 446. Policy and Economics Research Roundtable (PERR)
Research in progress or contemplated in policy and economics areas. Emphasis depends on research interests of participants, but is likely to include energy, environment, transportation, or technology policy and analysis. May be repeated for credit.

1 unit, Aut (Sweeney, J), Win (Sweeney, J), Spr (Sweeney, J)

MS&E 450. Lessons in Decision Making
Entrepreneurs, senior management consultants, and executives from Fortune 500 companies share real-world stories and insights from their experience in decision making.

1 unit, Spr (Staff)

MS&E 453A. Medical Decision Making Seminar
Decision making models and methods to address complex, uncertain medical decisions. Experts present best practices and research on current topics such as mathematical modeling of bioterrorism, HIV

screening and prevention, flu pandemic interventions, personal medical procedure decisions, and decision support for cancer care delivery.

1 unit, Aut (Robinson, B)

MS&E 453B. Energy Decision Making Seminar
Decision making models and methods to address complex, uncertain energy decisions. Experts present best practices and research on current topics such as traditional versus alternative energy supply, global demand forecasts, mathematical modeling of energy economics, energy policy and consumer behavior, and geopolitical energy considerations.

1 unit, Win (Robinson, B)

MS&E 453C. Environmental Decision Making Seminar
Decision making models and methods to address complex, uncertain environmental decisions. Experts present best practices and research on current topics such as climate change science and policy, mathematical modeling of environmental strategy consequences, marine resource preservation, groundwater contamination, and international agricultural crop decisions.

1 unit, Spr (Robinson, B)

MS&E 454. Decision Analysis Seminar
Current research and related topics presented by doctoral students and invited speakers. May be repeated for credit. Prerequisite: 252.

1 unit, Aut (Howard, R), Win (Howard, R), Spr (Staff)

MS&E 455. Decision Making in Organizations
Lectures and war stories from management consultants experienced in applying decision analysis. Student teams critique decisions from news articles, case studies, and interviews with leaders of local organizations. Topics: roles people play, normative versus descriptive approaches, avoiding traps and failure modes, decision process and content quality, biases, expert judgments, economic analysis, creativity, organizational behavior, leadership styles, decision psychology, mutual learning models, advocacy and inquiry, new venture investing, and portfolio evaluation. Recommended corequisite: 252.

2 units, Aut (Robinson, B)

MS&E 456. Decision Analysis Applications
Management consultants reveal behind-the-scenes insights about how decision analysis models and methods are applied to make technically and organizationally complex decisions for private-sector and public-sector organizations. Student teams apply state-of-the-art tools to frame, structure, model, assess, and analyze real examples. Cases discussed: C5 Corvette design, global competition for HDTV market, DRAM manufacturing, movie studio portfolios, pharmaceutical drug development, oil and gas exploration and production, financial derivatives, litigation strategy, electric power regulation, and marine resource preservation. Recommended: 252, 455. Recommended corequisite: 352.

2 units, Win (Robinson, B)

MS&E 457. Decision Analysis Projects
A virtual consulting firm directed by decision analysts. Student teams receive guidance from a mentor as they help local businesses, governments, or other institutions make a current strategy or policy decision. Projects typically include start-up venture funding, R&D portfolio planning, new product market entry, acquisition or partnering, cost reduction, program design, or regulatory policy decisions. Emphasis is on developing clarity of action and delivering insights to clients. Satisfies MS&E project course requirement Prerequiste: 252 or equivalent. Recommended: 352, 455, 456.

3 units, Spr (Robinson, B)

MS&E 458. Professional Decision Consulting: Marketing Services, Delivering Results, and Balancing Lifestyle
Management consultants share lessons about professional services marketing, pricing to value, leading and managing consulting projects, communicating with diverse audiences, and delivering insights that exceed client expectations. What it looks like from inside a consulting firm, the client's view, and the consulting industry perspective. Student teams develop answers to frequently asked questions, prepare marketing materials, and present proposals for consulting services to decision makers in local organizations.

2 units, Aut (Robinson, B)

MS&E 464. Global Project Coordination
Students engage in projects that are global in nature, and related to the planning, design, and operations of supply chains, marketing, manufacturing, and product development. Project teams from Stanford and an overseas university work on common projects using telephones, faxes, email, Internet, video conferences, and face-to-face meetings. As part of the project, students travel to Hong Kong. Applications due in November. See http://www.stanford.edu/class/msande464/.

3-4 units, not given this year

MS&E 472. Entrepreneurial Thought Leaders' Seminar
Entrepreneurial leaders share lessons from real-world experiences across entrepreneurial settings. ETL speakers include entrepreneurs, leaders from global technology companies, venture capitalists, and best-selling authors. Half-hour talks followed by half hour of class interaction. Required web discussion. May be repeated for credit.

1 unit, Aut (Dearing, M; Seelig, T), Win (Dearing, M; Seelig, T), Spr (Dearing, M; Seelig, T)

MS&E 474. Business and Environmental Issues
(Same as GSBGEN 547.) Overlap and synergies between business and environmental fields. Guest speakers from for-profit and nonprofit sectors. Past speakers have included business executives, alternative energy experts, environmental consultants, and professors. Group assignments.

2 units, Spr (Plambeck, E; Sweeney, J)

MS&E 485A. Introduction to Crosscultural Design
Preparation for 485B. Workshop and initial project work in teams.

1 unit, Win (Hinds, P)

MS&E 485B. Crosscultural Design
The design of products and services for a global world. How to design products or services to be used across cultures; how to design for a culture other than one's own; and how the process of design is approached in different cultures. Prerequisite: 485A.

3-4 units, Spr (Hinds, P)

MS&E 491. Real-World Clean Energy Project Development
Student teams prepare and present a development plan for a clean energy project of their choice, specifying the resource, technology, market, end-use, and policy and regulatory factors. Management plan and financial and economic evaluation. Readings and presentations on topics in clean energy. Guest speakers involved in project development.

3 units, not given this year

MASTER OF LIBERAL ARTS (MLA) COURSES

For information on on the Master of Liberal Arts program, see the "Master of Liberal Arts" section of this bulletin. The MLA program is a unit of the "Continuing Studies Program".

GRADUATE COURSES IN MASTER OF LIBERAL ARTS

Restricted to MLA students.

MLA 9. European Thought and Culture in the 19th Century
Major European thinkers and writers and their intellectual significance from the Enlightenment to modernism. Works by Voltaire, Austen, Wordsworth, Marx, Nietzsche, and Freud.

4 units, Aut (Robinson, P)

MLA 101A. Foundations I
Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

4 units, Aut (Steidle, E)

MLA 101B. Foundations II: the Middle Ages and Renaissance.
Required of and limited to first-year MLA students. Second of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

4 units, Win (Staff)

MLA 101C. Foundations III: the Enlightenment through Modernism
Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.
4 units, Spr (Staff)

MLA 102. The Plague: An Introduction to Interdisciplinary Graduate Study
Limited to and required of second-year MLA students. The historical, literary, artistic, medical, and theological issues raised by the plague in history and the present. Focus is on skills and information needed to pursue MLA graduate work at Stanford: writing a critical, argumentative graduate paper; conducting library research; expectations of seminar participation. Readings include Homer, Thucydides, Camus, Mann, Kushner, and sacred, scientific, and historical writings.
4 units, Aut (Paulson, L)

MLA 258. Rome: The City and the World
4 units, Win (Staff)

MLA 259. Terror and Terrorism
4 units, Win (Staff)

MLA 260. Problems in 19th-Century British History, 1850-1918
4 units, Win (Staff)

MLA 261. Latency: Western Literature and Culture after WW II, 1945-1968
4 units, Spr (Staff)

MLA 262. The Economics of Life and Death
4 units, Spr (Staff)

MLA 263. Historical Crisis and Literary Response
Five novels that treat moments of historical crisis and hone in on the human dimension. How literature can represent dimensions of ethics in a time of crisis. The literary style used in each novel to portray key ethical issues at critical historical junctures. Authors include McEwan, Woolf, and Gordimer.
4 units, Spr (Staff)

MLA 264. Shakespeare in Performance XI
How Shakespeare's works and their style, structure, and power are only fully revealed in performance. Students produce a short version of two plays. How a unified interpretation and theatrical style emerges from the collaborative efforts of an entire production team.
4 units, Sum (Staff)

MLA 265. Is Patriotism a Good Thing?
4 units, Sum (Staff)

MLA 266. The Evolution of Darwin
Intellectual and physical milieux, intellectual foundations, and personal characteristics associated with the development of the theory of evolution. Darwin's travels aboard the Beagle and within the UK and the impact these excursions had on his ideas.
4 units, Aut (Staff)

MLA 267. Wicked Witches of the West
Workshop-style seminar. How powerful women are depicted in classical Greek tragedy and Shakespeare. Comparisons of plays. Thematic, textual, and historical issues; theatrical practice. Sources include films if available. Scene and direction work.
4 units, Win (Staff)

MLA 398. MLA Thesis in Progress
Group meetings provide peer critiques, motivations, and advice under the direction of the Associate Dean.
0 units, Aut (Paulson, L), Win (Staff), Spr (Paulson, L), Sum (Paulson, L)

MLA 399. MLA Thesis Final Quarter
Students write a 75-100 page thesis that evolves out of work they pursued during their MLA studies.
4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Paulson, L)

MATERIALS SCIENCE AND ENGINEERING (MATSCI) COURSES

For information on graduate programs in the Department of Materials Science and Engineering, see the "Materials Science and Engineering" and "School of Engineering" sections of this bulletin.

UNDERGRADUATE COURSES IN MATERIALS SCIENCE AND ENGINEERING

MATSCI 70N. Building the Future: Invention and Innovation with Engineering Materials
Stanford Introductory Seminar. Preference to freshmen. The technological importance of materials in human civilization is captured in historical names such as the Stone, Bronze, and Iron Ages. The present Information Age could rightly be called the Silicon Age. The pivotal roles of materials in the development of new technologies. Quantitative problem sets, field trips, and formal presentations of small-group projects. GER:DB-EngrAppSci
5 units, Spr (Bravman, J)

MATSCI 81N. Bioengineering Materials to Heal the Body
Stanford Introductory Seminar. Preference to freshmen. How scientists and engineers are designing new materials for surgeon to use in replacing body parts such as heart tissue or the spinal cord. How cells, in the body and transplanted stem cells, communicate with implanted materials. Real-world examples of materials developed for tissue engineering and regenerative medicine therapies. Students identify a clinically important disease or injury that requires a better material, research approaches to the problem, and debate possible engineering solutions. GER:DB-EngrAppSci
3 units, Win (Heilshorn, S)

MATSCI 100. Undergraduate Independent Study
Independent study in materials science under supervision of a faculty member.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 150. Undergraduate Research
Participation in a research project.
3-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 151. Microstructure and Mechanical Properties
(Same as MATSCI 251.) Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci
4 units, Aut (Dauskardt, R)

MATSCI 152. Electronic Materials Engineering
Materials science and engineering for electronic device applications. Kinetic molecular theory and thermally activated processes; band structure and electrical conductivity of metals and semiconductors; intrinsic and extrinsic semiconductors; diffusion; elementary p-n junction theory; operating principles of metal-oxide-semiconductor field effect transistors. Semiconductor processing including crystal growth, oxidation kinetics, ion implantation, thin film deposition, etching, and photolithography. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci
4 units, Spr (Han, S)

MATSCI 153. Nanostructure and Characterization
The structure of materials at the nanoscale is in most cases the same crystalline form as the natural phase. Structures of materials such as semiconductors, ceramics, metals, and nanotubes; classification of these materials according to the principles of crystallography. Primary methods of structural characterization, X-ray diffraction, and electron microscopy; their applications to study such nanostructures. GER:DB-EngrAppSci
4 units, Win (Sinclair, R)

MATSCI 154. Solid State Thermodynamics
The principles of thermodynamics and relationships between thermodynamic variables. Equilibrium in thermodynamic systems. Thermodynamics of multicomponent systems. GER:DB-EngrAppSci
4 units, Aut (Barnett, D)

MATSCI 155. Nanomaterials Synthesis
The science of synthesis of nanometer scale materials. Examples including solution phase synthesis of nanoparticles, the vapor-liquid-solid approach to growing nanowires, formation of mesoporous materials from block-copolymer solutions, and formation of photonic crystals. Relationship of the synthesis phenomena to the materials science driving forces and kinetic mechanisms. Materials science concepts including capillarity, Gibbs free energy, phase diagrams, and driving forces. GER:DB-EngrAppSci
4 units, Spr (Clemens, B)

MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. GER:DB-EngrAppSci
4 units, Aut (Clemens, B)

MATSCI 157. Quantum Mechanics of Nanoscale Materials
Introduction to quantum mechanics and its application to the properties of materials. The Schrödinger equation, uncertainty principle, bound states and periodic potentials, angular momentum, quantum statistics, and perturbation theory. Applications to electronic band structure in semiconductors, metals, and nanostructures; vibrational properties of solids; light/matter interaction and lasers; bonding; magnetic materials; nanotechnology. Prerequisites: working knowledge of calculus and high school physics. GER:DB-EngrAppSci
4 units, Win (Lindenberg, A)

MATSCI 159Q. Japanese Companies and Japanese Society
(S,Sem Same as ENGR 159Q.) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci
3 units, Spr (Sinclair, R)

MATSCI 160. Nanomaterials Laboratory
Preference to sophomores and juniors. Hands-on approach to synthesis and characterization of nanoscale materials. How to make, pattern, and analyze the latest nanotech materials, including nanoparticles, nanowires, and self-assembled monolayers. Techniques such as soft lithography, self-assembly, and surface functionalization. The VLS mechanism of nanowire growth, nanoparticle size control, self-assembly mechanisms, and surface energy considerations. Laboratory projects. Enrollment limited to 24. GER:DB-EngrAppSci
4 units, Spr (Melosh, N)

MATSCI 161. Nanocharacterization Laboratory
(Same as MATSCI 171.) The development of standard lab procedures for materials scientists emphasizing microscopy, metallography, and technical writing. Techniques: optical, scanning-electron, atomic-force microscopy; and metallographic specimen preparation. The relationships among microscopic observation, material properties, and processing. Prerequisite: ENGR 50 or equivalent. GER:DB-EngrAppSci, WIM
4 units, Win (Han, S)

MATSCI 162. X-Ray Diffraction Laboratory
(Same as MATSCI 172.) Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphorous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. GER:DB-EngrAppSci
4 units, Win (Vailionis, A)

MATSCI 163. Mechanical Behavior Laboratory
(Same as MATSCI 173.) Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. GER:DB-EngrAppSci
4 units, Aut (Han, S)

MATSCI 164. Electronic and Photonic Materials and Devices Laboratory
Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. GER:DB-EngrAppSci, WIM
4 units, Aut (Salleo, A)

MATSCI 190. Organic and Biological Materials
(Same as MATSCI 210.) Unique physical and chemical properties of organic materials and their uses.The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. GER:DB-EngrAppSci
4 units, Spr (Heilshorn, S)

MATSCI 192. Materials Chemistry
(Same as MATSCI 202.) Chemical principles of materials: atomic and molecular bonding; acid and base chemistry; redox and electrochemistry; colloidal and surface chemistry; materials synthesis; and nanoscale chemistry. GER:DB-EngrAppSci
4 units, Aut (Cui, Y)

MATSCI 193. Atomic Arrangements in Solids
(Same as MATSCI 203.) Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. GER:DB-EngrAppSci
4 units, Aut (Sinclair, R)

MATSCI 194. Thermodynamics and Phase Equilibria
(Same as MATSCI 204.) The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. GER:DB-EngrAppSci
4 units, Win (Salleo, A)

MATSCI 195. Waves and Diffraction in Solids
(Same as MATSCI 205.) The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. GER:DB-EngrAppSci
4 units, Win (Clemens, B)

MATSCI 196. Imperfections in Crystalline Solids
(Same as MATSCI 206.) The relation of lattice defects to the physical and mechanical properties of crystalline solids. Introduction to point imperfections and their relationship to transport properties in metallic, covalent, and ionic crystals. Geometric, crystallographic, elastic, and energetic properties of dislocations. Relations between dislocations and the mechanical properties of crystals. The structure and properties of interfaces in solids. Prerequisite: 193/203. GER:DB-EngrAppSci
4 units, Win (Staff)

MATSCI 197. Rate Processes in Materials
(Same as MATSCI 207.) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. GER:DB-EngrAppSci
4 units, Spr (McIntyre, P)

MATSCI 198. Mechanical Properties of Materials
(Same as MATSCI 208.) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. GER:DB-EngrAppSci
4 units, Win (Dauskardt, R)

MATSCI 199. Electronic and Optical Properties of Solids
(Same as MATSCI 209.) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. GER:DB-EngrAppSci
4 units, Spr (Brongersma, M)

GRADUATE COURSES IN MATERIALS SCIENCE AND ENGINEERING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MATSCI 171. Nanocharacterization Laboratory
(Same as MATSCI 161.) The development of standard lab procedures for materials scientists emphasizing microscopy, metallography, and technical writing. Techniques: optical, scanning-electron, atomic-force microscopy; and metallographic specimen preparation. The relationships among microscopic observation, material properties, and processing. Prerequisite: ENGR 50 or equivalent.
3 units, Win (Han, S)

MATSCI 172. X-Ray Diffraction Laboratory
(Same as MATSCI 162.) Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphorous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20.
3 units, Win (Vailionis, A)

MATSCI 173. Mechanical Behavior Laboratory
(Same as MATSCI 163.) Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50.
3 units, Aut (Han, S)

MATSCI 200. Master's Research
Participation in a research project.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 202. Materials Chemistry
(Same as MATSCI 192.) Chemical principles of materials: atomic and molecular bonding; acid and base chemistry; redox and electrochemistry; colloidal and surface chemistry; materials synthesis; and nanoscale chemistry.
3 units, Aut (Cui, Y)

MATSCI 203. Atomic Arrangements in Solids
(Same as MATSCI 193.) Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups.
3 units, Aut (Sinclair, R)

MATSCI 204. Thermodynamics and Phase Equilibria
(Same as MATSCI 194.) The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids.
3 units, Win (Salleo, A)

MATSCI 205. Waves and Diffraction in Solids
(Same as MATSCI 195.) The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor.
3 units, Win (Clemens, B)

MATSCI 206. Imperfections in Crystalline Solids
(Same as MATSCI 196.) The relation of lattice defects to the physical and mechanical properties of crystalline solids. Introduction to point imperfections and their relationship to transport properties in metallic, covalent, and ionic crystals. Geometric, crystallographic, elastic, and energetic properties of dislocations. Relations between dislocations and the mechanical properties of crystals. The structure and properties of interfaces in solids. Prerequisite: 193/203.
3 units, Win (Staff)

MATSCI 207. Rate Processes in Materials
(Same as MATSCI 197.) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204.
3 units, Spr (McIntyre, P)

MATSCI 208. Mechanical Properties of Materials
(Same as MATSCI 198.) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203.
3 units, Win (Dauskardt, R)

MATSCI 209. Electronic and Optical Properties of Solids
(Same as MATSCI 199.) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent.
3 units, Spr (Brongersma, M)

MATSCI 210. Organic and Biological Materials
(Same as MATSCI 190.) Unique physical and chemical properties of organic materials and their uses.The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA.
3 units, Spr (Heilshorn, S)

MATSCI 230. Materials Science Colloquium
May be repeated for credit.
1 unit, Aut (McGehee, M; Salleo, A), Win (Brongersma, M; Lindenberg, A), Spr (Cui, Y; Heilshorn, S)

MATSCI 251. Microstructure and Mechanical Properties
(Same as MATSCI 151.) Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: ENGR 50 or equivalent.
3 units, Aut (Dauskardt, R)

MATSCI 299. Practical Training
Educational opportunities in high-technology research and development labs in industry. Qualified graduate students engage in internship work and integrate that work into their academic program. Following the internship, students complete a research report outlining their work activity, problems investigated, key results, and any follow-on projects they expect to perform. Student is responsible for arranging own employment. See department student services manager before enrolling.
3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 300. Ph.D. Research
Participation in a research project.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 302. Solar Cells
Theory of conventional p-n junction and excitonic solar cells. Design, fabrication, and characterization of crystalline silicon, amorphous silicon, CdTe, CIGS, and tandem and organic solar cells. Emerging solar cell concepts such as intermediate band gap and bioinspired solar cells. Emphasis is on the materials science aspects of solar cells research. Module design and economic hurdles that must be overcome for solar cell technology to generate a significant fraction of the world's electricity. Group project to explore one solar cell approach in depth. SITN/SCPD televised.
3 units, Spr (McGehee, M)

MATSCI 311. Lasers in Materials Processing
Principles of laser operation. Optically and electrically pumped lasers. Materials for solid-state lasers. Fundamentals of laser/materials interactions. Applications in thin film technology and microfabrication; laser annealing of defects and crystallization of amorphous films. Laser-induced shock waves. Extreme non-equilibrium laser processing; ultra-fast (femtosecond) lasers and their novel uses; micro- and nanofabrication of fluidic and photonic devices; intracellular nano-surgery.
3 units, Spr (Salleo, A)

MATSCI 312. New Methods in Thin Film Synthesis
Materials base for engineering new classes of coatings and devices. Techniques to grow thin films at atomic scale and to fabricate multilayers/superlattices at nanoscale. Vacuum growth techniques including evaporation, molecular beam epitaxy (MBE), sputtering, ion beam assisted deposition, laser ablation, chemical vapor deposition (CVD), and electroplating. Future direction of material synthesis such as nanocluster deposition and nanoparticles self-assembly. Relationships between deposition parameters and film properties. Applications of thin film synthesis in microelectronics, nanotechnology, and biology. SITN/SCPD televised.
3 units, not given this year

MATSCI 316. Nanoscale Science, Engineering, and Technology
Sample application areas: renewable energy including nanoscaled photovoltaic cells, hydrogen storage, fuel cells, and nanoelectronics. Nanofabrication techniques including: self-assembly of amphiphilic molecules, block copolymers, organic-inorganic mesostructures, colloidal crystals, organic monolayers, proteins, DNA and abalone shells; biologically inspired growth of materials; photolithography, electron beam lithography, and scanning probe lithography; and synthesis of carbon nanotubes, nanowire, and nanocrystals. Other nanotechnology topics may be explored through a group project. SITN/SCPD televised.
3 units, Win (Cui, Y)

MATSCI 320. Nanocharacterization of Materials
Current methods of directly examining the microstructure of materials. Topics: optical microscopy, scanning electron and focused ion beam microscopy, field ion microscopy, transmission electron microscopy, scanning probe microscopy, and microanalytical surface science methods. Emphasis is on the electron-optical techniques. Recommended: 193/203.
3 units, alternate years, not given this year

MATSCI 321. Transmission Electron Microscopy
Image formation and interpretation. The contrast phenomena associated with perfect and imperfect crystals from a physical point of view and from a formal treatment of electron diffraction theory. The importance of electron diffraction to systematic analysis and recent imaging developments. Recommended: 193/203, 195/205, or equivalent.
3 units, Win (Sinclair, R), alternate years, not given next year

MATSCI 322. Transmission Electron Microscopy Laboratory
Experimental application of electron microscopy to typical materials science studies. Topics include microscope operation and alignment, diffraction modes and analysis, bright-field/dark-field analysis of defects, high resolution imaging, and analytical techniques for compositional analysis (EDAX). Enrollment limited to 12. Prerequisites: 321, consent of instructor.
3 units, Spr (Marshall, A)

MATSCI 323. Thin Film and Interface Microanalysis
The science and technology of microanalytical techniques, including Auger electron spectroscopy (AES), Rutherford backscattering spectroscopy (RBS), secondary ion mass spectroscopy (SIMS), ion scattering spectroscopy (ISS), and x-ray photoelectron spectroscopy (XPS or ESCA). Generic processes such as sputtering and high-vacuum generation. Prerequisite: some prior exposure to atomic and electronic structure of solids. SITN/SCPD televised.
3 units, not given this year

MATSCI 325. X-Ray Diffraction
Diffraction theory and its relationship to structural determination in solids. Focus is on applications of x-rays; concepts can be applied to neutron and electron diffraction. Topics: Fourier analysis, kinematic theory, Patterson functions, diffraction from layered and amorphous materials, single crystal diffraction, dynamic theory, defect determination, surface diffraction, techniques for data analysis, and determination of particle size and strain. Prerequisites: 193/203, 195/205.
3 units, not given this year

MATSCI 326. X-Ray Science and Techniques
X-ray interaction with matter; diffraction from ordered and disordered materials; x-ray absorption, photoemission, and coherent scattering; x-ray microsocopy. Sources including synchrontrons, high harmonic generation, x-ray lasers. Time-resolved techniques and detector technology.
3 units, not given this year

MATSCI 343. Organic Semiconductors for Electronics and Photonics
The science of organic semiconductors and their use in electronic and photonic devices. Topics: methods for fabricating thin films and devices; relationship between chemical structure and molecular packing on properties such as band gap, charge carrier mobility and luminescence efficiency; doping; field-effect transistors; light-emitting diodes; lasers; biosensors; photodetectors and photovoltaic cells. SITN/SCPD televised.
3 units, Win (McGehee, M; Peumans, P)

MATSCI 346. Nanophotonics
(Same as EE 336.) Recent developments in micro- and nanophotonic materials and devices. Basic concepts of photonic crystals. Integrated photonic circuits. Photonic crystal fibers. Superprism effects. Optical properties of metallic nanostructures. Sub-wavelength phenomena and plasmonic excitations. Meta-materials. Prerequisite: electromagnetic theory at the level of 242.
3 units, Win (Fan, S; Brongersma, M)

MATSCI 347. Introduction to Magnetism and Magnetic Nanostructures
Atomic origins of magnetic moments, magnetic exchange and ferromagnetism, types of magnetic order, magnetic anisotropy, domains, domain walls, hysteresis loops, hard and soft magnetic materials, demagnetization factors, and applications of magnetic materials, especially magnetic nanostructures and nanotechnology. Tools include finite-element and micromagnetic modeling. Design topics include electromagnet and permanent magnet, electronic article surveillance, magnetic inductors, bio-magnetic sensors, and magnetic drug delivery. Design projects, team work, and computer-

aided design. Prerequisites: PHYSICS 29 and 43, or college-level electricity and magnetism.

3 units, Spr (Wang, S; White, R)

MATSCI 352. Stress Analysis in Thin Films and Layered Composite Media

Introduction to methods of stress analysis of layered dissimilar media, including thin films deposited on substrates, composite laminates, and stratified anisotropic elastic materials based on techniques pioneered by Stroh. Stress states generated by thermal and elastic mismatch and local stress concentrations at interfacial cracks or corners, with applications to integrated circuit devices, aircraft materials, and geophysical media. Prerequisites: introductory course on the strength of materials or the theory of elasticity; familiarity with matrix algebra.

3 units, not given this year

MATSCI 353. Mechanical Properties of Thin Films

The mechanical properties of thin films on substrates. The mechanics of thin films and of the atomic processes which cause stresses to develop during thin film growth. Experimental techniques for studying stresses in and mechanical properties of thin films. Elastic, plastic, and diffusional deformation of thin films on substrates as a function of temperature and microstructure. Effects of deformation and fracture on the processing of thin film materials. Prerequisite: 198/208.

3 units, not given this year

MATSCI 358. Fracture and Fatigue of Materials and Thin Film Structures

Linear-elastic and elastic-plastic fracture mechanics from a materials science perspective, emphasizing microstructure and the micromechanisms of fracture. Plane strain fracture toughness and resistance curve behavior. Mechanisms of failure associated with cohesion and adhesion in bulk materials, composites, and thin film structures. Fracture mechanics approaches to toughening and subcritical crack-growth processes, with examples and applications involving cyclic fatigue and environmentally assisted subcritical crack growth. SITN/SCPD televised. Prerequisite: 151/251, 198/208, or equivalent.

3 units, Spr (Dauskardt, R)

MATSCI 359. Crystalline Anisotropy

(Same as ME 336.) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's Physical Properties of Crystals. Homework sets use Mathematica.

3 units, Win (Barnett, D)

MATSCI 380. Nano-Biotechnology

Literature based. Principles that make nanoscale materials unique, applications to biology, and how biological systems can create nanomaterials. Molecular sensing, drug delivery, bio-inspired synthesis, self-assembling systems, and nanomaterial based therapies. Interactions at the nanoscale. Applications and opportunities for new technology.

3 units, Aut (Melosh, N)

MATSCI 381. Biomaterials in Regenerative Medicine

(Same as BIOE 361.) Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry.

3 units, alternate years, not given this year

MATSCI 399. Graduate Independent Study

Under supervision of a faculty member.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATSCI 400. Participation in Materials Science Teaching

May be repeated for credit.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MATSCI 405. Seminar in Applications of Transmission Electron Microscopy

May be repeated for credit.

1 unit, not given this year

MATHEMATICAL AND COMPUTATIONAL SCIENCE (MCS) COURSES

For information on undergraduate programs in Mathematical and Computational Science, including lists of courses applicable to the major, see the "Mathematical and Computational Science" section of this bulletin.

UNDERGRADUATE COURSES IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

MCS 100. Mathematics of Sports

(Same as STATS 50.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

3 units, not given this year

MATHEMATICS (MATH) COURSES

For information on undergraduate and graduate programs in the Department of Mathematics see the "Mathematics" section of this bulletin.

UNDERGRADUATE COURSES IN MATHEMATICS

The department offers two sequences of introductory courses in single variable calculus. MATH 41,42 present single variable calculus; differential calculus is covered in the first quarter, integral calculus in the second. MATH 19,20,21 cover the material in 41,42 in three quarters instead of two. There are two options for studying multivariable mathematics. MATH 51,52,53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is recommended for incoming freshmen with 10 units of advanced placement credit. MATH 51H,52H,53H cover the same material as 51,52,53, but with more emphasis on theory and rigor. The introductory course in linear algebra is 103 or 113. There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51,52,53.

MATH 15. Overview of Mathematics

Broad survey of mathematics; its nature and role in society. GER:DB-Math

3 units, not given this year

MATH 19. Calculus

The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math

3 units, Aut (Butscher, A), Win (Staff), Sum (Staff)

MATH 20. Calculus

Continuation of 19. Prerequisite: 19. GER:DB-Math

3 units, Win (Butscher, A), Spr (Staff)

MATH 21. Calculus

Continuation of 20. Prerequisite: 20. GER:DB-Math

4 units, Spr (Butscher, A)

MATH 41. Calculus
Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math
5 units, Aut (Lucianovic, M)

MATH 41A. Calculus ACE
Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Lucianovic, M)

MATH 42. Calculus
Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math
5 units, Aut (Staff), Win (Lucianovic, M)

MATH 42A. Calculus ACE
Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Staff), Win (Lucianovic, M)

MATH 51. Linear Algebra and Differential Calculus of Several Variables
Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE
Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Staff), Win (Staff), Spr (Staff)

MATH 51H. Honors Multivariable Mathematics
For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut (Simon, L)

MATH 51M. Introduction to MATLAB for Multivariable Mathematics
Corequisite: MATH 51.
1 unit, Aut (Staff)

MATH 52. Integral Calculus of Several Variables
Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51. GER:DB-Math
5 units, Aut (Tzou, L), Win (Kerckhoff, S), Spr (Brumfiel, G)

MATH 52H. Honors Multivariable Mathematics
Continuation of 51H. Prerequisite: 51H. GER:DB-Math
5 units, Win (Simon, L)

MATH 53. Ordinary Differential Equations with Linear Algebra
Linear ordinary differential equations, applications to oscillations, matrix methods including determinants, eigenvalues and eigenvectors, matrix exponentials, systems of linear differential equations with constant coefficients, stability of non-linear systems and phase plane analysis, numerical methods, Laplace transforms. Integrated with topics from linear algebra (103). Prerequisite: 51. GER:DB-Math
5 units, Aut (Lisi, S), Win (Iyer, G), Spr (Staff), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics
Continuation of 52H. Prerequisite: 52H. GER:DB-Math
5 units, Spr (Brendle, S)

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory
Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.
3 units, Win (Finn, R)

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles
Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.
3 units, Spr (Wieczorek, W)

MATH 88Q. The Mathematics of the Rubik's Cube
Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.
3 units, Win (Bump, D)

MATH 100. Mathematics for Elementary School Teachers
Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.
4 units, Spr (Milgram, R)

MATH 104. Applied Matrix Theory
Linear algebra for applications in science and engineering: orthogonality, projections, the four fundamental subspaces of a matrix, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. Prerequisites: MATH 51 and MATH 52 or 53. GER:DB-Math
3 units, Aut (Demanet, L), Win (Liu, T)

MATH 106. Functions of a Complex Variable
Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math
3 units, Win (Nedelec, L), Sum (Brumfiel, G)

MATH 108. Introduction to Combinatorics and Its Applications
Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math
3 units, Spr (Kahle, M)

MATH 109. Applied Group Theory
Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. GER:DB-Math, WIM
3 units, Aut (Ionel, E)

MATH 110. Applied Number Theory and Field Theory
Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. GER:DB-Math
3 units, Spr (Lucianovic, M)

MATH 111. Computational Commutative Algebra
Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger's algorithm,

elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math

3 units, not given this year

MATH 113. Linear Algebra and Matrix Theory

Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math

3 units, Aut (Staff), Win (Cohen, R), Spr (Tzou, L)

MATH 114. Linear Algebra and Matrix Theory II

Advanced topics in linear algebra such as: invariant subspaces; canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; and applications. Prerequisite: 51H or 113. GER:DB-Math

3 units, Spr (Katznelson, Y)

MATH 115. Functions of a Real Variable

The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51. GER:DB-Math

3 units, Aut (Toussaint, A), Win (Katznelson, Y), Sum (Brumfiel, G)

MATH 116. Complex Analysis

Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Prerequisites: 52, and 115 or 171. GER:DB-Math

3 units, Win (Li, J)

MATH 118. Mathematics of Computation

Notions of analysis and algorithms central to modern scientific computing: continuous and discrete Fourier expansions, the fast Fourier transform, orthogonal polynomials, interpolation, quadrature, numerical differentiation, analysis and discretization of initial-value and boundary-value ODE, finite and spectral elements. Prerequisites: MATH 51 and 53. GER:DB-Math

3 units, Win (Demanet, L)

MATH 120. Modern Algebra

Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. GER:DB-Math, WIM

3 units, Aut (Vakil, R), Spr (Soundararajan, K)

MATH 121. Modern Algebra II

Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120. GER:DB-Math

3 units, Win (Staff)

MATH 131M. Partial Differential Equations I

More theoretical version of MATH 131P; suitable for Mathematics majors and mathematically inclined Physics majors . Topics include first order equations, physical and mathematical sources of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, and Fourier series. Introduction to PDE in multiple space dimensions. Emphasis is on a mathematically rigorous treatment of the subject. Students may not take both 131M and 131P. Prerequisite: 53. GER:DB-Math

3 units, Win (Schoen, R)

MATH 131P. Partial Differential Equations I

A more applied version of MATH 131M; suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students may not take both 131M and 131P. Prerequisite: 53. GER:DB-Math

3 units, Aut (Iyer, G)

MATH 132. Partial Differential Equations II

Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131M or 131P (formerly 131). GER:DB-Math

3 units, Spr (Nedelec, L)

MATH 135. Nonlinear Dynamics and Chaos

Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent. GER:DB-Math

3 units, not given this year

MATH 136. Stochastic Processes

(Same as STATS 219.) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. GER:DB-Math

3 units, Aut (Ross, K)

MATH 137. Mathematical Methods of Classical Mechanics

Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 51H, 52H, 53H. GER:DB-Math

3 units, Win (Eliashberg, Y)

MATH 138. Celestial Mechanics

Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math

3 units, not given this year

MATH 143. Differential Geometry

Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces. GER:DB-Math

3 units, Win (Nedelec, L)

MATH 145. Algebraic Geometry

Real algebraic curves, Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116, and 109 or 120. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math

3 units, Spr (Li, J)

MATH 146. Analysis on Manifolds

Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H. GER:DB-Math

3 units, Win (Ionel, E)

MATH 147. Differential Topology

Smooth manifolds, transversality, Sards' theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math

3 units, Spr (Staff), alternate years, not given this year

MATH 148. Algebraic Topology

Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120. GER:DB-Math

3 units, Spr (Diaconis, P), alternate years, not given next year

MATH 151. Introduction to Probability Theory

Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math

3 units, Win (Carlsson, G)

MATH 152. Elementary Theory of Numbers
Euclid's algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange's theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms. GER:DB-Math
3 units, Aut (Soundararajan, K)

MATH 154. Algebraic Number Theory
Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations; introduction to elliptic curves. Prerequisites: 120, 121. GER:DB-Math
3 units, Win (Conrad, B), alternate years, not given next year

MATH 155. Analytic Number Theory
Topics such as the distribution of prime numbers, the prime number theorem, twin primes and Goldbach's conjecture, the theory of quadratic forms, Dirichlet's class number formula, Dirichlet's theorem on primes in arithmetic progressions, and the fifteen theorem. Prerequisite: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity. GER:DB-Math
3 units, alternate years, not given this year

MATH 156. Group Representations
Group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Applications to geometric group actions and to combinatorics. Prerequisites: linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120). GER:DB-Math
3 units, Spr (Staff)

MATH 161. Set Theory
Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. GER:DB-Math
3 units, Spr (Kahle, M)

MATH 162. Philosophy of Mathematics
(Same as PHIL 162, PHIL 262. Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor.
4 units, not given this year

MATH 171. Fundamental Concepts of Analysis
Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. GER:DB-Math, WIM
3 units, Aut (Ryzhik, L), Spr (Vasy, A)

MATH 172. Lebesgue Integration and Fourier Analysis
Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration, L^p spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue differentiation. Prerequisite: 171 or consent of instructor. GER:DB-Math
3 units, Spr (Iyer, G)

MATH 174A. Topics in Analysis and Differential Equations with Applications
For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. Topics may include: geometric theory of ODE's with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math
3 units, not given this year

MATH 174B. Honors Analysis
Continuation of 174A. Topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green's functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 174A. GER:DB-Math
3 units, not given this year

MATH 175. Elementary Functional Analysis
Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math
3 units, Spr (Simon, L)

MATH 180. Introduction to Financial Mathematics
Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116. GER:DB-Math
3 units, Aut (Toussaint, A)

MATH 197. Senior Honors Thesis
1-6 units, Aut (Staff), Win (Staff), Spr (Staff)

MATH 199. Independent Work
Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

GRADUATE COURSES IN MATHEMATICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MATH 205A. Real Analysis
Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.
3 units, Aut (Ryzhik, L)

MATH 205B. Real Analysis
Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.
3 units, Win (Vasy, A)

MATH 205C. Real Analysis
Continuation of 205B.
3 units, Spr (Katznelson, Y)

MATH 210A. Modern Algebra
Groups, rings, and fields; introduction to Galois theory. Prerequisite: 120 or equivalent.
3 units, Aut (Milgram, R)

MATH 210B. Modern Algebra
Galois theory. Ideal theory, introduction to algebraic geometry and algebraic number theory. Prerequisite: 210A.
3 units, Win (Brumfiel, G)

MATH 210C. Modern Algebra
Continuation of 210B. Representations of groups and noncommutative algebras, multilinear algebra.
3 units, Spr (Bump, D)

MATH 215A. Complex Analysis, Geometry, and Topology
Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.
3 units, Aut (Li, J)

MATH 215B. Complex Analysis, Geometry, and Topology
Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.
3 units, Win (Galatius, S)

MATH 215C. Complex Analysis, Geometry, and Topology
Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincare duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

3 units, Spr (Cohen, R)

MATH 216A. Introduction to Algebraic Geometry
Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit.

3 units, not given this year

MATH 216B. Introduction to Algebraic Geometry
Continuation of 216A. May be repeated for credit.

3 units, not given this year

MATH 217A. Differential Geometry
Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 215C or equivalent.

3 units, Win (Schoen, R)

MATH 217B. Differential Geometry
Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.

3 units, Spr (Brendle, S)

MATH 220. Partial Differential Equations of Applied Mathematics
(Same as CME 303.) First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: foundation in multivariable calculus and ordinary differential equations.

3 units, Aut (Nolen, J)

MATH 221. Mathematical Methods of Imaging
Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisite: 220.

3 units, not given this year

MATH 222. Computational Methods for Fronts, Interfaces, and Waves
High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.

3 units, not given this year

MATH 224. Topics in Mathematical Biology
Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.

3 units, not given this year

MATH 227. Partial Differential Equations and Diffusion Processes
Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

3 units, Win (Ryzhik, L)

MATH 228A. Ergodic Theory
Measure preserving transformations and flows, ergodic theorems, mixing properties, spectrum, Kolmogorov automorphisms, entropy theory. Examples. Classical dynamical systems, mostly geodesic and horocycle forms on homogeneous spaces of SL(2,R). May be repeated for credit. Prerequisites: 205A,B.

3 units, not given this year

MATH 230A. Theory of Probability
(Same as STATS 310A.) Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.

2-4 units, Aut (Diaconis, P)

MATH 230B. Theory of Probability
(Same as STATS 310B.) Stopping times, 0-1 laws, Kolmogorov consistency theorem. Uniform integrability. Radon-Nikodym theorem, branching processes, conditional expectation, discrete time martingales. Exchangeability. Large deviations. Laws of the iterated logarithm. Birkhoff's and Kingman's ergodic theorems. Recurrence, entropy. Prerequisite: 310A or MATH 230A.

2-4 units, Win (Dembo, A)

MATH 230C. Theory of Probability
(Same as STATS 310C.) Infinitely divisible laws. Continuous time martingales, random walks and Brownian motion. Invariance principle. Markov and strong Markov property. Processes with stationary independent increments. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

MATH 231A. An Introduction to Random Matrix Theory
(Same as STATS 351A.) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinental point processes.

3 units, Aut (Diaconis, P)

MATH 231B. The Spectrum of Large Random Matrices
Asymptotics of eigenvalues of large random matrices, focusing on Wigner matrices and the Gaussian unitary ensemble: the combinatorics of non-crossing partitions and word graphs, concentration inequalities, Cauchy-Stieltjes transform, Hermite polynomials, Fredholm determinants, Laplace asymptotic method, special functions (Airy, Painleve), and stochastic calculus. Prerequisities: STATS 310A or MATH 205A.

3 units, Win (Dembo, A)

MATH 231C. Free Probability
Background from operator theory, addition and multiplication theorems for operators, spectral properties of infinite-dimensional operators, the free additive and multiplicative convolutions of probability measures and their classical counterparts, asymptotic freeness of large random matrices, and free entropy and free dimension. Prerequisite: STATS 310B or equivalent.

3 units, Spr (Staff)

MATH 232. Topics in Probability: Malliavin Calculus, Fractional Brownian Motion and Applications
Malliavin calculus: derivative and divergence operators, Skorohod integral. Fractional Brownian motion: relavance for financial mathematics, Ito and Tanaka formula, driving force for the heat equation. Ito formula for irregular Gaussian processes and other applications of Malliavin calculus. May be repeated for credit. Prerequisites: MATH 236, STATS 310C or equivalent.

3 units, Win (Staff)

MATH 233. Probabilistic Methods in Analysis
Proofs and constructions in analysis obtained from basic results in Probability Theory and a 'probabilistic way of thinking.' Topics: Rademacher functions, Gaussian processes, entropy.

3 units, Win (Katznelson, Y)

MATH 236. Introduction to Stochastic Differential Equations
Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.
3 units, Win (Papanicolaou, G)

MATH 238. Mathematical Finance
(Same as STATS 250.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.
3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance
Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.
3 units, Spr (Toussaint, A)

MATH 240. Topics in Financial Mathematics: Fixed Income Models
Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.
3 units, Spr (Toussaint, A)

MATH 244. Riemann Surfaces
Compact Riemann surfaces and algebraic curves; cohomology of sheaves; Serre duality; Riemann-Roch theorem and application; Jacobians; Abel's theorem. May be repeated for credit.
3 units, Spr (Kerckhoff, S)

MATH 245A. Topics in Algebraic Geometry: Moduli Theory
Intersection theory on the moduli spaces of stable curves, stable maps, and stable vector bundles. May be repeated for credit.
3 units, not given this year

MATH 245B. Topics in Algebraic Geometry: Dessin d'Enfants
Grothendieck's theory of dessin d'enfants, a study of graphs on surfaces and their connection with the absolute Galois group of the rational numbers. Belyi's theorem, representations of the absolute Galois group as automorphisms of profinite groups, Grothendieck-Teichmuller theory, quadratic differentials, and the combinatorics of moduli spaces of surfaces. May be repeated for credit.
3 units, not given this year

MATH 247. Topics in Group Theory
Topics include the Burnside basis theorem, classification of p-groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.
3 units, Win (Diaconis, P)

MATH 248. Algebraic Number Theory
Introduction to modular forms and L-functions. May be repeated for credit.
1-3 units, not given this year

MATH 248A. Algebraic Number Theory
Structure theory and Galois theory of local and global fields, finiteness theorems for class numbers and units, adelic techniques. Prerequisites: MATH 210A,B.
3 units, Aut (Conrad, B)

MATH 249A. Introduction to Modular Forms
The analytic theory of holomorphic and non-holomorphic modular forms and associated L-functions. Topics include Hecke operators, L-functions, Weil's converse theorem, trace formulas, sub-convexity for L-functions and applications, and Selberg's eigenvalue conjecture. May be repeated for credit. Prerequisites: 205A,B,C, or comparable knowledge of analysis.
3 units, Aut (Soundararajan, K)

MATH 249B. Topics in Number Theory: Class Field Theory
Classification of abelian extensions of local and global fields; classical, adelic, and cohomological formulations; applications to L-functions. May be repeated for credit.
3 units, Win (Conrad, B)

MATH 249C. Topics in Number Theory: Class Field Theory and the Langlands Conjectures
3 units, Spr (Staff)

MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations
Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.
3 units, not given this year

MATH 256A. Partial Differential Equations
The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.
3 units, Spr (Vasy, A)

MATH 256B. Partial Differential Equations
Continuation of 256A.
3 units, Win (Liu, T)

MATH 257A. Symplectic Geometry and Topology
Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.
3 units, Aut (Ionel, E)

MATH 257B. Symplectic Geometry and Topology
Continuation of 257A. May be repeated for credit.
3 units, Win (Ionel, E)

MATH 258. Topics in Geometric Analysis
May be repeated for credit.
3 units, Win (White, B)

MATH 261A. Functional Analysis
Geometry of linear topological spaces. Linear operators and functionals. Spectral theory. Calculus for vector-valued functions. Operational calculus. Banach algebras. Special topics in functional analysis. May be repeated for credit.
3 units, not given this year

MATH 263A. Lie Groups and Lie Algebras
Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent.
3 units, Win (Bump, D)

MATH 263B. Lie Groups and Lie Algebras
Continuation of 263A. May be repeated for credit.
3 units, Spr (Staff)

MATH 264. Matrix Valued Spherical Functions and Orthogonal Polynomials
Theory of spherical functions on locally compact groups and on Lie groups. Families of orthogonal polynomials with respect to a weight matrix function on the real line, and the corresponding algebra of differential operators. Spherical functions associated to the complex projective space as orthogonal polynomials. Topics may include some applications to quasi birth and death processes. My be repeated for credit. Prerequisities: 114, 205A, and 217A.
3 units, Aut (Staff)

MATH 266. Computational Signal Processing and Wavelets
Theoretical and computational aspects of signal processing. Time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.
3 units, not given this year

MATH 269A. Affine Complex Manifolds and Symplectic Geometry
Plurisubharmonic functions and pseudoconvexity: geometric theory. Construction of pseudoconvex shapes. Complex analysis on Stein manifolds. Symplectic geometry of Stein manifolds. Existence theorem for Stein complex manifolds. May be repeated for credit.
3 units, Aut (Eliashberg, Y)

MATH 269B. Affine Complex Manifolds and Symplectic Geometry
Symplectic convexity and Weinstein manifolds. Symplectic topology of subcritical Weinstein manifolds. From Weinstein to Stein structure. Morse-Smale theory for plurisubharmonic functions on Stein manifolds. Deformation theory for Stein complex structures. Symplectic field theory of Weinstein manifolds. May be repeated for credit.
3 units, Win (Eliashberg, Y)

MATH 270. Geometry and Topology of Complex Manifolds
Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.
3 units, Win (Li, J)

MATH 271. The H-Principle
The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generaliazations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper C^1-isometric embedding theorem.
3 units, Spr (Eliashberg, Y)

MATH 272A. Topics in Partial Differential Equations
3 units, Aut (Tzou, L)

MATH 282A. Low Dimensional Topology
The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmuller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.
3 units, Aut (Kerckhoff, S)

MATH 282B. Homotopy Theory
Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.
3 units, Win (Carlsson, G)

MATH 282C. Fiber Bundles and Cobordism
Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit.
3 units, Spr (Milgram, R)

MATH 284A. Geometry and Topology in Dimension 3
The Poincare conjecture and the uniformization of 3-manifolds. May be repeated for credit.
3 units, Win (Staff)

MATH 284B. Geometry and Topology in Dimension 3
The Poincare conjecture and the uniformization of 3-manifolds. May be repeated for credit.
3 units, Spr (Staff)

MATH 286. Topics in Differential Geometry
May be repeated for credit.
3 units, Win (Mazzeo, R), Spr (Schoen, R)

MATH 290B. Finite Model Theory
(Same as PHIL 350B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.
3 units, not given this year

MATH 292A. Set Theory
(Same as PHIL 352A.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, not given this year

MATH 292B. Set Theory
(Same as PHIL 352B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, not given this year

MATH 293A. Proof Theory
(Same as PHIL 353A.) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.
3 units, not given this year

MATH 295. Computation and Algorithms in Mathematics
Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.
3 units, not given this year

MATH 355. Graduate Teaching Seminar
Required of and limited to first-year Mathematics graduate students.
1 unit, Spr (Staff)

MATH 360. Advanced Reading and Research
1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MATH 361. Research Seminar Participation
Participation in a faculty-led seminar which has no specific course number.
1-3 units, Aut (Staff), Win (White, B), Spr (Kerckhoff, S), Sum (Staff)

MATH 380. Seminar in Applied Mathematics
Guest speakers on recent advances in applied mathematics.May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

MATH 381. Seminar in Analysis
1-3 units, by arrangement

MATH 384. Seminar in Geometry
1 unit, by arrangement

MATH 385. Seminar in Topology
1-3 units, by arrangement

MATH 386. Mathematics Colloquium
Guest speakers on recent advances in mathematics. May be repeated for credit.
1 unit, Aut (Staff), Win (Bump, D), Spr (Staff)

MATH 387. Seminar in Number Theory
May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

MATH 388. Seminar in Probability and Stochastic Processes
1-3 units, by arrangement

MATH 389. Seminar in Mathematical Biology
1-3 units, by arrangement

MATH 391. Research Seminar in Logic and the Foundations of Mathematics
(Same as PHIL 391.) Contemporary work. May be repeated a total of three times for credit.
1-3 units, Spr (Mints, G; Feferman, S)

MATH 395. Classics in Geometry and Topology
Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.
3 units, Aut (Brumfiel, G), Win (Staff), Spr (Cohen, R)

MATH 396. Graduate Progress
Results and current research of graduate and postdoctoral students. May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

MATH 397. Physics for Mathematicians
Topics from physics essential for students studying geometry and topology. Topics may include quantum mechanics, quantum field theory, path integral approach and renormalization, statistical mechanics, and string theory. May be repeated for credit.
1 unit, Win (Staff)

MECHANICAL ENGINEERING (ME) COURSES

For information on graduate programs in the Department of Mechanical Engineering, see the "Mechanical Engineering" and "School of Engineering" sections of this bulletin.

MECHANICAL ENGINEERING COURSE CATALOG NUMBERING SYSTEM

The department uses the following course numbering system:

10- 99	Freshman and Sophomore
100-199	Junior and Senior
200-299	Advanced Undergraduate and Beginning Graduate
300-399	Graduate
400-499	Advanced Graduate
500	Ph.D. Thesis

UNDERGRADUATE COURSES IN MECHANICAL ENGINEERING

Lab sections in experimental engineering are assigned in groups. If the lab schedule permits, students are allowed, with due regard to priority of application, to arrange their own sections and lab periods. Enrollment with the instructor concerned, on the day before instruction begins or the first day of University instruction, is essential in order that the lab schedule may be prepared. Enrollment later than the first week is not permitted.

ME 10N. Form and Function of Animal Skeletons
Stanford Introductory Seminar. Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology. Field trips to labs. GER:DB-EngrAppSci
3 units, Win (Carter, D)

ME 17N. Robotics Imitating Nature
Stanford Introductory Seminar. Preference to freshmen. The dream of constructing robots that duplicate the functional abilities of humans and/or other animals has been promulgated primarily by science fiction writers. But biological systems provide models for the designers of robots. Building electromechanical devices that perform locomotory and sensing functions similar to those of an animal as a way of learning about how biological systems function. Walking and running machines, and the problem of giving a robot the capability to respond to its environment. GER:DB-EngrAppSci
3 units, Spr (Waldron, K)

ME 18Q. Teamology: Creative Teams and Individual Development
Stanford Introductory Seminar. Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.
3 units, Aut (Wilde, D)

ME 21N. Renaissance Machine Design
Stanford Introductory Seminar. Preference to freshmen. Technological innovations of the 1400s that accompanied the proliferation of monumental art and architecture by Brunelleschi, da Vinci, and others who designed machines and invented novel construction, fresco, and bronze-casting techniques. The social and political climate, from the perspective of a machine designer, that made possible and demanded engineering expertise from prominent artists. Hands-on projectsto provide a physical understanding of Renaissance-era engineering challenges and introduce the pleasure of creative engineering design. Technical background not required. GER:DB-EngrAppSci
3 units, Spr (Cutkosky, M)

ME 25N. Global Warming and Climate Change: Fact or Fiction
Stanford Introductory Seminar. Preference to freshmen. Scientific arguments concerning debates between the view that anthropogenic activities are not causing global warming versus the view that these activities are responsible for a global warming that results in significant climate change. Consequences of increased demand for energy. Prerequisites: high school physics, chemistry, and biology.
3 units, Win (Bowman, C)

ME 26N. Think Like a Designer
Stanford Introductory Seminar. Preference to freshmen. Techniques designers use to create innovative solutions across domains. Project-based. Emphasis is on approaches to problem identification and problem solving. Topics include need finding, structured brainstorming, synthesis, rapid prototyping, and visual communication. Field trips to a local design firm, a robotics lab, and a machining lab. The pleasures of creative design and hands-on development of tangible solutions.
3 units, Aut (Banerjee, S)

ME 70. Introductory Fluids Engineering
Elements of fluid mechanics as applied to engineering problems. Equations of motion for incompressible ideal flow. Hydrostatics. Control volume laws for mass, momentum, and energy. Bernoulli equation. Dimensional analysis and similarity. Flow in ducts. Boundary layer flows. Lift and drag. Lab experiment demonstrations. Prerequisites: ENGR 14 and 30. GER:DB-EngrAppSci
4 units, Win (Cappelli, M), Spr (Santiago, J)

ME 80. Mechanics of Deformable Bodies
Mechanics of materials and deformation of structural members. Topics include stress and deformation analysis under axial loading, torsion and bending, column buckling and pressure vessels. Introduction to stress transformation and multiaxial loading. Prerequisite: ENGR 14. GER:DB-EngrAppSci
3 units, Aut (Levenston, M), Spr (Pruitt, B)

ME 101. Visual Thinking
Lecture/lab. Visual thinking and language skills are developed and exercised in the context of solving design problems. Exercises for the mind's eye. Rapid visualization and prototyping with emphasis on fluent and flexible idea production. The relationship between visual thinking and the creative process. Enrollment limited to 60. GER:DB-EngrAppSci
3 units, Aut (Staff), Win (Staff), Spr (Staff)

ME 103D. Engineering Drawing and Design
Designed to accompany 203. The fundamentals of engineering drawing including orthographic projection, dimensioning, sectioning, exploded and auxiliary views, and assembly drawings. Homework drawings are of parts fabricated by the student in the lab. Assignments in 203 supported by material in 103D and sequenced on the assumption that the student is enrolled in both courses simultaneously.
1 unit, Aut (Milroy, J), Win (Milroy, J)

ME 104. The Designer's Voice
How to develop a point of view about a design career in order to articulate a design vision, inspire a design studio, or infect a business with a culture of design thinking. Focus is on the integration of work and worldview, professional values, design language, and the

development of the designer's voice. Role play, guest speakers, individual mentoring and coaching, student journals. Restricted to undergraduate Product Design seniors.

1 unit, Aut (Burnett, W)

ME 110. Design Sketching

Freehand sketching, rendering, and design development. Students develop a design sketching portfolio for review by program faculty. May be repeated for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

ME 110B. Advanced Design Sketching

Freehand sketching, rendering, design development, and some computer use, guided by instructors. Concurrent assignments in 116 provide subject matter. Prerequisite: 110A or consent of instructor based on drawing skill.

1 unit, not given this year

ME 112. Mechanical Systems Design

Lecture/lab. Characteristics of machine elements including gears, bearings, and shafts. Design for fatigue life. Electric motor fundamentals. Transmission design for maximizing output power or efficiency. Mechanism types, linkage analysis and kinematic synthesis. Team-based design projects emphasizing the balance of physical with virtual prototyping based on engineering analysis. Lab for dissection of mechanical systems and project design reviews. Prerequisites: 80, 101. Recommended: 203, ENGR 15. GER:DB-EngrAppSci

4 units, Win (Cutkosky, M)

ME 113. Mechanical Engineering Design

Goal is to create designs and models of new mechanical devices. Design is experienced by students as they work on a team design project obtained from industry or other organizations. Prerequisites: 80, 101, 112. GER:DB-EngrAppSci

4 units, Spr (Waldron, K)

ME 115A. Introduction to Design Methods

Lecture/lab. Problem finding and solving, intermediate creativity methods, and effective techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: 101.

3 units, Win (Staff)

ME 115B. Human Values in Design

Lecture/lab. Problem finding, problem solving, intermediate creativity methods, and techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: 115A GER:DB-EngrAppSci

3 units, Spr (Lee, M; Wong, A)

ME 116. Advanced Product Design: Formgiving

Small- and medium-scale design projects are carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: ME 115B, ARTSTUDI 160. GER:DB-EngrAppSci

4 units, Aut (Staff)

ME 120. History and Philosophy of Design

Major schools of 19th- and 20th-century design (Arts-and-Crafts movement, Bauhaus, Industrial Design, and postmodernism) are analyzed in terms of their continuing cultural relevance. The relation of design to art, technology, and politics; readings from principal theorists, practitioners, and critics; recent controversies in industrial and graphic design, architecture, and urbanism. Enrollment limited to 40. GER:DB-EngrAppSci

3-4 units, Spr (Katz, B)

ME 131A. Heat Transfer

The principles of heat transfer by conduction, convection, and radiation with examples from the engineering of practical devices and systems. Topics include transient and steady conduction, conduction by extended surfaces, boundary layer theory for forced and natural convection, boiling, heat exchangers, and graybody radiative exchange. Prerequisites: 70, ENGR 30. Recommended: intermediate calculus, ordinary differential equations. GER:DB-EngrAppSci

3-4 units, Aut (Asheghi, M)

ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery

Engineering applications involving compressible flow: aircraft and rocket propulsion, power generation; application of mass, momentum, energy and entropy balance to compressible flows; variable area isentropic flow, normal shock waves, adiabatic flow with friction, flow with heat addition. Operation of flow systems: the propulsion system. Turbomachinery: pumps, compressors, turbines. Angular momentum analysis of turbomachine performance, centrifugal and axial flow machines, effect of blade geometry, dimensionless performance of turbomachines; hydraulic turbines; steam turbines; wind turbines. Compressible flow turbomachinery: the aircraft engine. Prerequisites: 70, ENGR 30. GER:DB-EngrAppSci

4 units, Win (Lele, S)

ME 140. Advanced Thermal Systems

Capstone course. Thermal analysis and engineering emphasizing integrating heat transfer, fluid mechanics, and thermodynamics into a unified approach to treating complex systems. Mixtures, humidity, chemical and phase equilibrium, and availability. Labs apply principles through hands-on experience with a turbojet engine, PEM fuel cell, and hybrid solid/oxygen rocket motor. Use of MATLAB as a computational tool. Prerequisites: ENGR 30, ME 70, and 131A,B. GER:DB-EngrAppSci

5 units, Spr (Mitchell, R)

ME 150. Internal Combustion Engines

Internal combustion engines including conventional and turbocharged spark ignition, and diesel engines. Lectures: basic engine cycles, engine components, methods of analysis of engine performance, pollutant emissions, and methods of engine testing. Lab involves hands-on experience with engines and test hardware. Limited enrollment. Prerequisites: 140. GER:DB-EngrAppSci

3 units, not given this year

ME 161. Dynamic Systems

(Same as ME 261. Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics. GER:DB-EngrAppSci

3-4 units, Aut (Mitiguy, P)

ME 190. Ethical Issues in Mechanical Engineering

Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; whistle blowing; engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations, and engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies and field research. Enrollment limited to 25 Mechanical Engineering majors.

4 units, Spr (McGinn, R)

ME 191. Engineering Problems and Experimental Investigation

Directed study and research for undergraduates on a subject of mutual interest to student and staff member. Student must find faculty sponsor and have approval of adviser.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 191H. Honors Research

Student must find faculty honors adviser and apply for admission to the honors program.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 196. Design and Manufacturing Forum

(Same as ME 396.) Guest speakers address issues of interest to design and manufacturing engineers. Sponsored by Stanford Engineering Club for Automation and Manufacturing (SECAM). May be repeated for credit

1 unit, Win (Reis, R), Spr (Reis, R)

ME 281. Biomechanics of Movement
(Same as BIOE 281.) Experimental techniques to study human and animal movement including motion capture systems, EMG, force plates, medical imaging, and animation. The mechanical properties of muscle and tendon, and quantitative analysis of musculoskeletal geometry. Projects and demonstrations emphasize applications of mechanics in sports, orthopedics, and rehabilitation. GER:DB-EngrAppSci
3 units, Aut (Delp, S)

ME 338B. Continuum Mechanics
Constitutive theory; equilibrium constitutive relations; material frame indifference and material symmetry; finite elasticity; formulation of the boundary value problem; linearization and well-posedness; symmetries and configurational forces; numerical considerations.
3 units, alternate years, not given this year

GRADUATE COURSES IN MECHANICAL ENGINEERING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

ME 201. Dim Sum of Mechanical Engineering
Introduction to research in mechanical engineering for M.S. students and upper-division undergraduates. Weekly presentations by current ME Ph.D. and second-year fellowship students to show research opportunities across the department. Strategies for getting involved in a research project. (Sheppard)
1 unit, Aut (Kuhl, E; Gardella, I)

ME 203. Design and Manufacturing
Prototype development techniques as an intrinsic part of the design process. Machining, welding, and casting. Manufacturing processes. Design aspects developed in an individual term project chosen, designed, and fabricated by students. Labs, field trips. Undergraduates majoring in Mechanical Engineering or Product Design must take course for 4 units. Limited enrollment with consent of instructor. Corequisite: 103D or CAD experience. Corequisite for WIM for Mechanical Engineering and Product Design majors: ENGR 102M. Recommended: 101.
4 units, Aut (Beach, D), Win (Beach, D)

ME 204. Bicycle Design and Frame-Building
Lecture/lab. The engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs and fabricates a custom bicycle frame. Limited enrollment. Prerequisite: 203 or equivalent.
3 units, Spr (Connolly, R)

ME 206A. Entrepreneurial Design for Extreme Affordability
(Same as OIT 333.) Bass Seminar. Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for challenges faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see http://extreme.stanford.edu.
4 units, Win (Patell, J; Beach, D)

ME 206B. Entrepreneurial Design for Extreme Affordability
(Same as OIT 334.) Bass Seminar. Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for challenges faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see http://extreme.stanford.edu.
4 units, Spr (Patell, J; Beach, D)

ME 207. Negotiation
(Same as CEE 151, CEE 251, MS&E 285.) Negotiation styles and processes to help students conduct and review negotiations. Workshop format integrating intellectual and experiential learning. Exercises, presentations, live and field examples, and individual and small group reviews. Application required before first day of class; see Coursework.
3 units, Aut (Christensen, S), Spr (Christensen, S)

ME 208. Patent Law and Strategy for Innovators and Entrepreneurs
How to build a patent portfolio and avoid patent infringement. How to conduct a patent search. How to file a provisional patent application.
2-3 units, Aut (Schox, J)

ME 210. Introduction to Mechatronics
Technologies involved in mechatronics (intelligent electro-mechanical systems), and techniques to apply this technology to mecatronic system design. Topics include: electronics (A/D, D/A converters, op-amps, filters, power devices); software program design, event-driven programming; hardware and DC stepper motors, solenoids, and robust sensing. Large, open-ended team project. Limited enrollment. Prerequisites: ENGR 40, CS 106, or equivalents.
4 units, Win (Messana, M; Ohline, R)

ME 212. Calibrating the Instrument
For first-year graduate students in the Joint Program in Design. Means for calibrating the designer's mind/body instrument through tools including improvisation, brainstorming, creative imaging, educational kinesiology, and Brain Gym. Current design issues; guest speakers; shared stories; and goal setting.
1 unit, Aut (Edmark, J)

ME 216A. Advanced Product Design: Needfinding
Human needs that lead to the conceptualization of future products, environments, systems, and services. Field work in public and private settings; appraisal of personal values; readings on social ethnographic issues; and needfinding for a corporate client. Emphasis is on developing the flexible thinking skills that enable the designer to navigate the future. Prerequisites for undergraduates: 116 and 203, or consent of the instructor. Prerequisites for graduate students: 203 and 313, or consent of the instructor.
3-4 units, Win (Barry, M; Patnaik, D)

ME 216B. Advanced Product Design: Implementation
Summary project using knowledge, methodology, and skills obtained in Product Design major. Students implement an original design concept and present it to a professional jury. Prerequisite: 216A.
4 units, Spr (Burnett, W; Howard, R)

ME 218A. Smart Product Design Fundamentals
Lecture/lab. Team design project series on programmable electromechanical systems design. Topics: transistors as switches, digital and analog circuits, operational amplifiers, comparators, software design, programming in C. Lab fee. Limited enrollment.
4-5 units, Aut (Carryer, J)

ME 218B. Smart Product Design Applications
Lecture/lab. Second in team design project series on programmable electromechanical systems design. Topics: user I/O, timer systems, interrupts, signal conditioning, software design for embedded systems, sensors, actuators, noise, and power supplies. Lab fee. Limited enrollment. Prerequisite: 218A or passing the smart product design fundamentals proficiency examination.
4-5 units, Win (Carryer, J)

ME 218C. Smart Product Design Practice
Lecture/lab. Advanced level in series on programmable electromechanical systems design. Topics: inter-processor communication, system design with multiple microprocessors, architecture and assembly language programming for the PIC microcontroller, controlling the embedded software tool chain, A/D and D/A techniques, electronic manufacturing technology. Team project. Lab fee. Limited enrollment. Prerequisite: 218B.
4-5 units, Spr (Carryer, J)

ME 218D. Smart Product Design: Projects
Lecture/lab. Industrially sponsored project is the culmination of the Smart Product Design sequence. Student teams take on an industrial

project requiring application and extension of knowledge gained in the prior three quarters, including prototyping of a final solution with hardware, software, and professional documentation and presentation. Lectures on electronic and software design, and electronic manufacturing techniques. Topics: chip level design of microprocessor systems, real time operating systems, alternate microprocessor architectures, and PCB layout and fabrication.

4 units, Aut (Carryer, J)

ME 219. The Magic of Materials and Manufacturing
Lecture/lab. Methods for market-quantity manufacturing of parts and products from a product designer's point of view. Materials including metals, plastics, ceramics, fibers, and foams, and processes that manipulate, exploit, transform, and modify these materials. Visual descriptions of processes, product examples, relevant material details, cost information, and manufacturability rules-of-thumb. Imagining and creating new products. Manufacturing site visits; laboratory projects. Enrollment limited to 20.

3 units, Spr (Beach, D; Johnson, K)

ME 220. Introduction to Sensors
Sensors are widely used in scientific research and as an integral part of commercial products and automated systems. The basic principles for sensing displacement, force, pressure, acceleration, temperature, optical radiation, nuclear radiation, and other physical parameters. Performance, cost, and operating requirements of available sensors. Elementary electronic circuits which are typically used with sensors. Lecture demonstration of a representative sensor from each category elucidates operating principles and typical performance. Lab experiments with off-the-shelf devices.

3-4 units, Spr (Staff)

ME 222. Design for Sustainability
Lecture/lab. Role of design in building a sustainable world. How to include sustainability in the design process considering environmental, cultural, and social impacts. Focus is on a proactive design approach, and the tools and techniques needed to translate theory into artifact.

2-3 units, Spr (Bishop, S; Boyle, D)

ME 227. Vehicle Dynamics and Control
The application of dynamics, kinematics, and control theory to the analysis and design of ground vehicle behavior. Simplified models of ride, handling, and braking, their role in developing intuition, and limitations in engineering design. Suspension design fundamentals. Performance and safety enhancement through automatic control systems. In-car laboratory assignments for model validation and kinesthetic understanding of dynamics. Limited enrollment. Prerequisites: ENGR 105, consent of instructor.

3 units, Spr (Gerdes, C)

ME 233. Making it Big: Crossing the Entrepreneur's Gap
Students take novel designs into entrepreneurial production and prepare for market production. Education, resources, and community to help cross the gap, found ideas and make them real in volume. Topics include entrepreneurial production methods and initiation, vendor selection and engagement, cost, design transfer, quality and testing, and manufacturing planning and execution. Leadership roles in entrepreneurial and large production-oriented companies. Case studies, project reviews, final presentation, industry interaction.

3 units, Aut (Theeuwes, M)

ME 238. Patent Prosecution
(Same as LAW 321.) Stages of the patent application process: identifying, capturing, and evaluating inventions; performing a patentability investigation, analyzing the documents, and the scope of the patent protection; composing claims that broadly cover the invention; creating a specification that supports the claims; filing a patent application with the U.S. Patent and Trademark Office; and analyzing an office action and preparing an appropriate response. Current rules and case law. Strategic decisions within each stage, such as: how does a patent application advance the patent portfolio; and in what countries should a patent application be filed?

2 units, Win (Schox, J)

ME 257. Turbine and Internal Combustion Engines
(Same as ME 357.) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, Win (Pitsch, H)

ME 260. Fuel Cell Science and Technology
Emphasis on proton exchange membrane (PEM) and solid oxide fuel cells (SOFC), and principles of electrochemical energy conversion. Topics in materials science, thermodynamics, and fluid mechanics. Prerequisites: MATH 43, PHYSICS 55, and ENGR 30 or ME 140, or equivalents.

3 units, Spr (Prinz, F)

ME 261. Dynamic Systems
(Same as ME 161. Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics.

3-4 units, Aut (Mitiguy, P)

ME 265. Technology Licencing and Commercialization
How to profit from technology; processes and strategies to commercialize functional or artistic inventions and creations (not limited to mechanical engineering). Business and legal aspects of determining what can be owned and licensed, how to determine commercial value, and what agreements are necessary. Contract and intellectual property law; focus is on provisions of license agreements and their negotiation.

3 units, Spr (Hustein, J)

ME 280. Skeletal Development and Evolution
The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the interactions between mechanical and chemical factors in the regulation of connective tissue biology. Prerequisites: 80, or Human Biology core, or Biology core.

3 units, Spr (Carter, D)

ME 284A. Cardiovascular Bioengineering
(Same as BIOE 284A.) Via Internet. Bioengineering principles applied to the cardiovascular system. Anatomy of human cardiovascular system, comparative anatomy, and allometric scaling principles. Cardiovascular molecular and cell biology. Overview of continuum mechanics. Form and function of blood, blood vessels, and the heart from an engineering perspective. Normal, diseased, and engineered replacement tissues.

3 units, Aut (Taylor, C)

ME 284B. Cardiovascular Bioengineering
(Same as BIOE 284B.) Via Internet. Continuation of ME 284A. Integrative cardiovascular physiology, blood fluid mechanics, and transport in the microcirculation. Sensing, feedback, and control of the circulation. Overview of congenital and adult cardiovascular disease, diagnostic methods, and treatment strategies. Engineering principles to evaluate the performance of cardiovascular devices and the efficacy of treatment strategies.

3 units, Win (Taylor, C)

ME 287. Soft Tissue Mechanics
Structure/function relationships and mechanical properties of soft tissues, including nonlinear elasticity, viscoelasticity, and poroelasticity. Undergraduates require consent of instructor.

3 units, Win (Levenston, M)

ME 289. Biomechanical Engineering Research Semiar
BME research conducted at Stanford for incoming students. Graduate students and postdoctoral fellows present research emphasizing motivation of research questions, project design, methods, and preliminary results.

1 unit, not given this year

ME 294. Medical Device Design
In collaboration with the School of Medicine. Introduction to medical device design for undergraduate and graduate engineering students. Design and prototyping. Labs; medical device

environments may include hands-on device testing; and field trips to operating rooms and local device companies. Limited enrollment. Prerequisite: 203.

3 units, Aut (Staff)

ME 297. Forecasting the Future of Engineering
Goal is to develop a 25-year forecast of the future of engineering including the challenges engineers are likely to be asked to solve, and how engineers can be prepared to meet these challenges. Students prepare a long-range forecast of a specific science/engineering sector and a proposed initiative tying new engineering capabilities with global challenges.

3 units, Win (Saffo, P; Benjamin, C)

ME 298. Silversmithing and Design
Skills involved in working with precious metals at a small scale. Investment casting and fabrication techniques such as reticulation, granulations, filigree, and mokume gane.

3-4 units, Win (Shaughnessy, S; Knox, A)

ME 299A. Practical Training
For master's students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 299B. Practical Training
For Ph.D. students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the student services office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 300A. Linear Algebra with Application to Enginering Computations
(Same as CME 200.) Solving matrix-vector systems. Direct and iterative solvers for non-singular linear systems of equations; their accuracy, convergence properties, and computational efficiency. Under- and over-determined systems, and nonlinear systems of equations. Eigenvalues, eigenvectors, and singular values; their application to engineering problems. Concepts such as basis, linear independence, column space, null space, rank, norms and condition numbers, projections, and matrix properties. Recommended: familiarity with computer programming; mathematics background equivalent to MATH 103, 130.

3 units, Aut (Gerritsen, M)

ME 300B. Partial Differential Equations in Engineering
(Same as CME 204.) Geometric interpretation of partial differential equation (PDE) characteristics; solution of first order PDEs and classification of second-order PDEs; self-similarity; separation of variables as applied to parabolic, hyperbolic, and elliptic PDEs; special functions; eigenfunction expansions; the method of characteristics. If time permits, Fourier integrals and transforms, Laplace transforms. Prerequisite: CME 200/ME 300A, equivalent, or consent of instructor.

3 units, Win (Shaqfeh, E)

ME 300C. Introduction to Numerical Methods for Engineering
(Same as CME 206.) Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B.

3 units, Spr (Moin, P)

ME 304. The Designer's Voice
How to develop a point of view about a design career in order to articulate a design vision, inspire a design studio, or infect a business with a culture of design thinking. Focus is on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Role play, guest speakers, individual mentoring and coaching, student journals. Restricted to Joint Product in Design graduate students.

1 unit, Win (Burnett, W)

ME 308. Spatial Motion
The geometry of motion in Euclidean space. Fundamentals of theory of screws with applications to robotic mechanisms, constraint analysis, and vehicle dynamics. Methods for representing the positions of spatial systems of rigid bodies with their inter-relationships; the formulation of Newton-Euler kinetics applied to serial chain systems such as industrial robotics.

3 units, alternate years, not given this year

ME 309. Finite Element Analysis in Mechanical Design
Basic concepts of finite elements, with applications to problems confronted by mechanical designers. Linear static, modal, and thermal formulations; nonlinear and dynamic formulations. Students implement simple element formulations. Application of a commercial finite element code in analyzing design problems. Issues: solution methods, modeling techniques, features of various commercial codes, basic problem definition. Individual projects focus on the interplay of analysis and testing in product design/development. Prerequisite: MATH 103, or equivalent. Recommended: 80, or equivalent in structural and/or solid mechanics; some exposure to principles of heat transfer.

3 units, Spr (Kuhl, E)

ME 310A. Project-Based Engineering Design, Innovation, and Development
Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

5 units, Aut (Leifer, L; Cutkosky, M)

ME 310B. Project-Based Engineering Design, Innovation, and Development
(Same as ENGR 310B.) Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

5 units, Win (Leifer, L; Cutkosky, M)

ME 310C. Project-Based Engineering Design, Innovation, and Development
Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically

requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

5 units, Spr (Leifer, L; Cutkosky, M)

ME 312. Advanced Product Design: Formgiving
Lecture/lab. Small- and medium-scale design projects carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: 203, 313. Corequisite: ARTSTUDI 160.

3-4 units, Win (Burnett, W)

ME 313. Human Values and Innovation in Design
Introduction to the philosophy, spirit, and tradition of the product design program. Hands-on design projects used as vehicles for design thinking, visualization, and methodology. The relationships among technical, human, aesthetic, and business concerns. Drawing, prototyping, and design skills. Focus is on tenets of design philosophy: point of view, user-centered design, design methodology, and iterative design.

3 units, Aut (Banerjee, S)

ME 314. Good Products, Bad Products
The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips.

3-4 units, Win (Beach, D)

ME 315. The Designer in Society
For graduate students. Career objectives and psychological orientation compared with existing social values and conditions. Emphasis is on assisting individuals in assessing their roles in society. Readings on political, social, and humanistic thought are related to technology and design. Experiential, in-class exercises, and term project. Enrollment limited to 24.

3 units, Spr (Roth, B)

ME 316A. Product Design Master's Project
For graduate Product Design or Design (Art) majors only. Students create and present two master's theses under the supervision of engineering and art faculty. Theses involve the synthesis of aesthetics and technological concerns in the service of human need and possibility. Product Design students register for 4 units; Art students for 2 units. Prerequisites: ME 216B, ME 365 Corequisite: ARTSTUDI 360.

2-4 units, Aut (Banerjee, S; Burnett, W; Kelley, D; Barry, M)

ME 316B. Product Design Master's Project
Continuation of 316A.

2-4 units, Win (Banerjee, S; Burnett, W; Barry, M; Kelley, D)

ME 316C. Product Design Master's Project
Continuation of 316B.

2-4 units, Spr (Banerjee, S; Burnett, W; Kelley, D; Barry, M)

ME 317A. Design for Manufacturability: Product Definition for Market Success
Systematic methodologies to define, develop, and produce world-class products. Student team projects to identify opportunities for improvement and develop a comprehensive product definition. Topics include value engineering, quality function deployment, design for assembly and producibility, design for variety and supply chain, design for life-cycle quality, and concurrent engineering. Students must take 317B to complete the project and obtain a letter grade. On-campus enrollment limited to 20; SCPD class size limited to 50, and each site must have at least 3 students to form a project team.

4 units, Win (Ishii, K)

ME 317B. Design for Manufacturability: Quality by Design for Customer Value
Building on 317A, focus is on the implementation of competitive product design. Student groups apply structured methods to optimize the design of an improved product, and plan for its manufacture, testing, and service. The project deliverable is a comprehensive product and process specification. Topics: concept generation and selection (Pugh's Method), FMEA applied to the manufacturing process, design for robustness, Taguchi Method, SPC and six sigma process, tolerance analysis, flexible manufacturing, product testing, rapid prototyping. Enrollment limited to 40, not including SCPD students. Minimum enrollment of two per SCPD viewing site; single student site by prior consent of instructor. On-campus class limited to 20. For SCPD students, limit is 50 and each site must have a minimum of three students to form a project team and define a project on their own. Prerequisite: 317A.

4 units, Spr (Ishii, K)

ME 318. Computer-Aided Product Creation
Design course focusing on an integrated suite of computer tools: rapid prototyping, solid modeling, computer-aided machining, and computer numerical control manufacturing. Students choose, design, and manufacture individual products, emphasizing individual design process and computer design tools. Field trips demonstrate Stanford Product Realization Lab's relationship to the outside world. Structured lab experiences build a basic CAD/CAM/CNC proficiency. Limited enrollment. Prerequisite: consent of instructor.

4 units, Aut (Staff), Win (Staff), Spr (Staff)

ME 322. Kinematic Synthesis of Mechanisms
The rational design of linkages. Techniques to determine linkage proportions to fulfill design requirements using analytical, graphical, and computer based methods.

3 units, Win (Roth, B)

ME 323. Modeling and Identification of Mechanical Systems for Control
Lecture/Lab. The art and science behind developing mathematical models for control system design. Theoretical and practical system modeling and parameter identification. Frequency domain identification, parametric modeling, and black-box identification. Analytical work and laboratory experience with identification, controller implementation, and the implications of unmodeled dynamics and non-linearities. Prerequisites: linear algebra and system simulation with MATLAB/SIMULINK; ENGR 105.

3 units, Aut (Gerdes, C)

ME 324. Precision Engineering
Advances in engineering are often enabled by more accurate control of manufacturing and measuring tolerances. Concepts and technology enable precision such that the ratio of overall dimensions to uncertainty of measurement is large relative to normal engineering practice. Typical application areas: non-spherical optics, computer information storage devices, and manufacturing metrology systems. Application experience through design and manufacture of a precision engineering project, emphasizing the principles of precision engineering. Structured labs; field trips. Prerequisite: consent of instructors.

4 units, Spr (Beach, D; DeBra, D)

ME 326. Telerobotics and Human-Robot Interactions
Focus is on dynamics and controls. Evaluation and implementation of required control systems. Topics include master-slave systems, kinematic and dynamic similarity; control architecture, force feedback, haptics, sensory substitutions; stability, passivity, sensor resolution, servo rates; time delays, prediction, wave variables. Hardware-based projects encouraged, which may complement ongoing research or inspire new developments. Limited enrollment. Prerequisites: ENGR 205, 320 or CS 223A, or consent of instructor. (Niemever)

3 units, not given this year

ME 329. Physical Solid Mechanics
Quantum mechanics, statistical mechanics, and solid state physics for engineering students. The theory describes physical processes at nanoscale in solid materials. Atomic structures of solids and their electronic structures. Statistical mechanics provides a theoretical framework for thermodynamics to connect the nanoscale processes to macroscopic properties of solids.

3 units, alternate years, not given this year

ME 330. Advanced Kinematics
Kinematics from mathematical viewpoints. Introduction to algebraic geometry of point, line, and plane elements. Emphasis is on basic theories which have potential application to mechanical linkages, computational geometry, and robotics.

3 units, Aut (Roth, B)

ME 331A. Classical Dynamics
(Same as AA 242A.) Accelerating and rotating reference frames. Kinematics of rigid body motion; Euler angles, direction cosines.

D'Alembert's principle, equations of motion. Inertia properties of rigid bodies. Dynamics of coupled rigid bodies. Lagrange's equations and their use. Dynamic behavior, stability, and small departures from equilibrium. Prerequisite: ENGR 15 or equivalent.

3 units, Win (Mitiguy, P)

ME 331B. Advanced Dynamics
(Same as AA 242B.) Formulation of equations of motion with Newton/Euler equations; angular momentum principle; D'Alembert principle; power, work, and energy; Kane's method; and Lagrange's equations. Numerical solutions of nonlinear algebraic and dfferential equations govering the behavior of multiple degree of freedom systems. Computed torque control.

3 units, Spr (Mitiguy, P)

ME 333. Mechanics
Goal is a common basis for advanced mechanics courses. Formulation of the governing equations from a Lagrangian perspective. Examples include systems of particles and linear elastic solids. Waves in discrete and continuous media. Linear elasticity formulation in the static and dynamic cases, and elementary measures of stress and strain. Tensor and variational calculus. (Lew)

3 units, Aut (Lew, A)

ME 335A. Finite Element Analysis
Fundamental concepts and techniques of primal finite element methods. Method of weighted residuals, Galerkin's method, and variational equations. Linear elliptic boundary value problems in one, two, and three space dimensions; applications in structural, solid, and fluid mechanics and heat transfer. Properties of standard element families and numerically integrated elements. Implementation of the finite element method. Active column equation solver, assembly of equations, and element routines. The mathematical theory of finite elements.

3 units, Aut (Pinsky, P)

ME 335B. Finite Element Analysis
Finite element methods for linear dynamic analysis. Eigenvalue, parabolic, and hyperbolic problems. Mathematical properties of semi-discrete (t-continuous) Galerkin approximations. Modal decomposition and direct spectral truncation techniques. Stability, consistency, convergence, and accuracy of ordinary differential equation solvers. Asymptotic stability, over-shoot, and conservation laws for discrete algorithms. Mass reduction. Applications in heat conduction, structural vibrations, and elastic wave propagation. Computer implementation of finite element methods in linear dynamics. Implicit, explicit, and implicit-explicit algorithms and code architectures.

3 units, Win (Pinsky, P)

ME 335C. Introduction to Boundary Element Analysis
The boundary integral equation and boundary element method with applications to potential theory and elastostatics. Green's function methods for transforming partial differential equations to integral equations with boundary conditions built in. Implementation of the method and treatments of weakly and strongly (Cauchy principal values) singular kernels. Coupling with finite element methods. Additional topics may include fracture mechanics, contact mechanics, and transient diffusion.

3 units, Spr (Pinsky, P)

ME 336. Crystalline Anisotropy
(Same as MATSCI 359.) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's Physical Properties of Crystals. Homework sets use Mathematica.

3 units, Win (Barnett, D)

ME 337. Mechanics of Growth
Introdution to continuum theory and numerical solutions or biomechanical problems. Kinematics of finite growth. Balance equations in open system thermodynamics. Constitutive equations for biological tissues. Enhanced finite element models in biomechanics. Analytical solutions for simple model problems. Numerical solutions for more advanced problems such as: bone remodeling; wound healing; muscle regeneration; tumor growth; atherosclerosis; in-stent restenosis; and tissue engineering.

3 units, not given this year

ME 338A. Continuum Mechanics
Nonlinear continuum mechanics for solids and fluids. Kinematics of finite deformations. Measures of strain and stress. Finite rotations. Linearized kinematics and infinitesimal measures of deformations. Rates. Conservation laws for mass, momenta, and energy. Boundary value problem in continuum mechanics. Prerequisites: 333 and 300, or equivalent background with consent of instructor.

3 units, Win (Kuhl, E)

ME 339. Mechanics of the Cell
Kinematical description of basic structural elements used to model parts of the cell: rods, ropes, membranes, and shells. Formulation of constitutive equations: nonlinear elasticity and entropic contributions. Elasticity of polymeric networks. Applications to model basic filaments of the cytoskeleton: actin, microtubules, intermediate filaments, and complete networks. Applications to biological membranes. (Jacobs)

3 units, Aut (Kuhl, E)

ME 340A. Theory and Applications of Elasticity
Elasticity theory and application to material structures at microscale. Theories: stress, strain, and energy; equilibrium and compatibility conditions; boundary value problem. Solution methods: stress function, Green's function, Fourier transformation. Numerical exercises using Matlab. Applications to defects in solids, thin films, and biomembranes.

3 units, Spr (Cai, W)

ME 340B. Elasticity in Microscopic Structures
Elasticity theory and applications to structures in micro devices, material defects, and biological systems. Theoretical basis: stress, strain, and energy; equilibrium and compatibility conditions; boundary value problem formulation. Solution methods: stress function, Green's function, and Fourier transformation; moderate numerical exercises using Matlab. Methods and solutions applied to the elastic behaviors of thin films and MEMS structures, cracks and dislocations, and cell filaments and membranes.

3 units, not given this year

ME 341. Biomechanics of Hearing, Speech, and Balance
Theory and practice of building mathematical models to understand physical phenomena; integration of imaging, physiology, and bio-mechanics. Research literature, examples from hearing science, speech production, and the vestibular system. Dualisms in modeling include: general principles versus detailed models; analytic versus computational models; forward versus inverse approaches; and the interplay between theory and experiments.

3 units, alternate years, not given this year

ME 342A. MEMS Laboratory
Practice and theory of MEMS device design and fabrication, orientation to fabrication facilities, and introduction to techniques for design and evaluation of MEMS devices in the context of designed projects. Emphasis on MEMS design (need finding, brainstorming, evaluation, and design methodology), characterization, and fabrication, including photolithography, etching, oxidation, diffusion, and ion implanation. Limited enrollment. Prerequisite: engineering or science background and consent of instructor.

3-4 units, not given this year

ME 342D. MEMS Laboratory Assignments
Prerequisite: consent of instructor.

1-2 units, not given this year

ME 343. An Introduction to Waves in Elastic Solids
One-dimensional motion of an elastic continuum, the linearized theory of elasticity and elastodynamic theory, elastic waves in an unbounded medium, plane harmonic waves in elastic half-spaces including reflection and refraction, slowness, energy velocity and anisotropic effects. Text is first five chapters of Achenbach's Wave Propagation in Elastic Solids. (Barnett)

3 units, not given this year

ME 344A. Computational Nanotechnology
Atomistic simulations as computational tools to design nanoscale materials and devices. Nanoparticles and nanowires introduced as main classes of nano building blocks. Computational modeling of carbon nanomaterials (fullerenes and nanotubes); nanoparticles and quantum dots; semiconductor and metal nanowires; and molecular wires. Atomistic modeling programs with graphical user interface used to gain hands-on experience of nanomaterials design.

3 units, not given this year

ME 344B. Nanomaterials Modeling
Atomistic and quantum mechanical simulation methods. Focus is quantum simulation of nanomaterials. Review of concepts and practical techniques of atomistic simulations; finite difference algorithms and practical computational issues for molecular dynamics and Monte Carlo simulations. Graphical user interface, designing nanomaterials through analysis and feedback processes, configuration optimization, dynamic mode analysis, and electronic structure analysis. Hands-on experience in computational design of nanomaterials, and fundamentals of simulations.

3 units, not given this year

ME 345. Fatigue Design and Analysis
The mechanism and occurrences of fatigue in service. Methods for predicting fatigue life and for protecting against premature fatigue failure. Use of elastic stress and inelastic strain analyses to predict crack initiation life. Use of linear elastic fracture mechanics to predict crack propagation life. Effects of stress concentrations, manufacturing processes, load sequence, irregular loading, multi-axial loading. Subject is treated from the viewpoints of the engineer seeking up-to-date methods of life prediction and the researcher interested in improving understanding of fatigue behavior. Prerequisite: undergraduate mechanics of materials.

3 units, not given this year

ME 346A. Introduction to Statistical Mechanics
Concepts and tools of classical statistical mechanics and applications to molecular systems. Thermodynamics and probability theory. Statistical ensembles. Information and entropy. Free energy and transition between metastable states. Brownian motion, Langevin dynamics, and Fokker-Planck equation. Non-equilibrium systems: correlation and response functions, fluctuation-dissipation theorem. Applications to self-assembly, thin film growth, and structural transformation.

3 units, Win (Staff)

ME 346B. Introduction to Molecular Simulations
Algorithms of molecular simulations and underlying theories. Molecular dynamics, time integrators, modeling thermodynamic ensembles (NPT, NVT), free energy, constraints. Monte Carlo simulations, parallel tempering. Stochastic equations, Langevin and Brownian dynamics. Applications in solids, liquids, and biomolecules (proteins). Programming in Matlab and C++. Prerequisites: ME 346A or equivalent, Matlab, and C++.

3 units, Spr (Darve, E)

ME 346C. Advanced Techniques for Molecular Simulations
Advanced methods for computer simulation of proteins. Symplectic time integrators, multiple-time stepping, energy conservation. Long-range force calculation, particle mesh Ewald, fast multipole method, multigrid. Free energy methods, umbrella sampling, acceptance ratio, thermodynamic integration, non equilibrium methods, adaptive biasing force. Prerequisites: ME 346A,B or equivalent, Matlab, and C++.

3 units, alternate years, not given this year

ME 347. Mathematical Theory of Dislocations
The mathematical theory of straight and curvilinear dislocations in linear elastic solids. Stress fields, energies, and Peach-Koehler forces associated with these line imperfections. Anisotropic effects, Green's function methods, and the geometrical techniques of Brown and Indenborn-Orlov for computing dislocation fields and for studying dislocation interactions. Continuously distributed dislocations and cracks and inclusions.

3 units, not given this year

ME 348. Experimental Stress Analysis
Theory and applications of photoelasticity, strain gages, and holographic interferometry. Comparison of test results with theoretical predictions of stress and strain. Other methods of stress and strain determination (optical fiber strain sensors, thermoelasticity, Moire, residual stress determination).

3 units, not given this year

ME 351A. Fluid Mechanics
Exact and approximate analysis of fluid flow covering kinematics, global and differential equations of mass, momentum, and energy conservation. Forces and stresses in fluids. Euler's equations and the Bernoulli theorem applied to inviscid flows. Vorticity dynamics. Topics in irrotational flow: stream function and velocity potential for exact and approximate solutions; superposition of solutions; complex potential function; circulation and lift. Some boundary layer concepts.

3 units, Aut (Iaccarino, G)

ME 351B. Fluid Mechanics
Laminar viscous fluid flow. Governing equations, boundary conditions, and constitutive laws. Exact solutions for parallel flows. Creeping flow limit, lubrication theory, and boundary layer theory including free-shear layers and approximate methods of solution; boundary layer separation. Introduction to stability theory and transition to turbulence, and turbulent boundary layers. Prerequisite: 351A.

3 units, Win (Eaton, J)

ME 352A. Radiative Heat Transfer
The fundamentals of thermal radiation heat transfer; blackbody radiation laws; radiative properties of non-black surfaces; analysis of radiative exchange between surfaces and in enclosures; combined radiation, conduction, and convection; radiative transfer in absorbing, emitting, and scattering media. Advanced material for students with interests in heat transfer, as applied in high-temperature energy conversion systems. Take 352B,C for depth in heat transfer. Prerequisites: graduate standing and undergraduate course in heat transfer. Recommended: computer skills.

3 units, Aut (Mitchell, R)

ME 352B. Fundamentals of Heat Conduction
Physical description of heat conduction in solids, liquids, and gases. The heat diffusion equation and its solution using analytical and numerical techniques. Data and microscopic models for the thermal conductivity of solids, liquids, and gases, and for the thermal resistance at solid-solid and solid-liquid boundaries. Introduction to the kinetic theory of heat transport, focusing on applications for composite materials, semiconductor devices, micromachined sensors and actuators, and rarefied gases. Prerequisite: consent of instructor.

3 units, Win (Goodson, K)

ME 352C. Convective Heat Transfer
Prediction of heat and mass transfer rates based on analytical and numerical solutions of the governing partial differential equations. Heat transfer in fully developed pipe and channel flow, pipe entrance flow, laminar boundary layers, and turbulent boundary layers. Superposition methods for handling non-uniform wall boundary conditions. Approximate models for turbulent flows. Comparison of exact and approximate analyses to modern experimental results. General introduction to heat transfer in complex flows. Prerequisite: 351B or equivalent.

3 units, Spr (Eaton, J)

ME 354. Experimental Methods in Fluid Mechanics
Experimental methods associated with the interfacing of laboratory instruments, experimental control, sampling strategies, data analysis, and introductory image processing. Instrumentation including point-wise anemometers and particle image tracking systems. Lab. Prerequisites: previous experience with computer programming and consent of instructor. Limited enrollment.

4 units, not given this year

ME 355. Compressible Flow
Topics include quasi-one-dimensional isentropic flow in variable area ducts, normal shock waves, oblique shock and expansion waves, flow in ducts with friction and heat transfer, unsteady one-dimensional flow, and steady two-dimensional supersonic flow.

3 units, Spr (Bowman, C)

ME 357. Turbine and Internal Combustion Engines
(Same as ME 257.) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, Win (Pitsch, H)

ME 358. Heat Transfer in Microdevices
Application-driven introduction to the thermal design of electronic circuits, sensors, and actuators that have dimensions comparable to or smaller than one micrometer. The impact of thin-layer boundaries

on thermal conduction and radiation. Convection in microchannels and microscopic heat pipes. Thermal property measurements for microdevices. Emphasis is on Si and GaAs semiconductor devices and layers of unusual, technically-promising materials such as chemical-vapor-deposited (CVD) diamond. Final project based on student research interests. Prerequisite: consent of instructor.

3 units, Spr (Asheghi, M)

ME 359A. Advanced Design and Engineering of Space Systems I
The application of advanced theory and concepts to the development of spacecraft and missile subsystems; taught by experts in their fields. Practical aspects of design and integration. Mission analysis, systems design and verification, radiation and space environments, orbital mechanics, space propulsion, electrical power and avionics subsystems, payload communications, and attitude control. Subsystem-oriented design problems focused around a mission to be completed in groups. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related engineering field or consent of instructor.

4 units, not given this year

ME 359B. Advanced Design and Engineering of Space Systems II
Continuation of 359A. Topics include aerospace materials, mechanical environments, structural analysis and design, finite element analysis, mechanisms, thermal control, probability and statistics. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related field, or consent of instructor.

4 units, not given this year

ME 361. Turbulence
Governing equations. Averaging and correlations. Reynolds equations and Reynolds stresses. Free shear flows, turbulent jet, turbulent length and time scales, turbulent kinetic energy and kinetic energy dissipation, and kinetic energy budget. Kolmogorov's hypothesis and energy spectrum. Wall bounded flows, channel flow and boundary layer, viscous scales, and law of the wall. Turbulence modeling, gradient transport and eddy viscosity, mixing length model, two-equation models, Reynolds-stress model, and large-eddy simulation.

3 units, Spr (Pitsch, H)

ME 362A. Physical Gas Dynamics
Concepts and techniques for description of high-temperature and chemically reacting gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics as applied to properties of gases and gas mixtures. Transport and thermodynamic properties, law of mass action, and equilibrium chemical composition. Maxwellian and Boltzmann distributions of velocity and molecular energy. Examples and applications from areas of current interest such as combustion and materials processing.

3 units, Aut (Cappelli, M)

ME 362B. Nonequilibrium Processes in High-Temperature Gases
Chemical kinetics and energy transfer in high-temperature gases. Collision theory, transition state theory, and unimolecular reaction theory. Prerequisie: 362A or consent of instructor.

3 units, Win (Hanson, R)

ME 363. Partially Ionized Plasmas and Gas Discharges
Introduction to partially ionized gases and the nature of gas discharges. Topics: the fundamentals of plasma physics emphasizing collisional and radiative processes, electron and ion transport, ohmic dissipation, oscillations and waves, interaction of electromagnetic waves with plasmas. Applications: plasma diagnostics, plasma propulsion and materials processing. Prerequisite: 362A or consent of instructor.

3 units, Spr (Cappelli, M)

ME 364. Optical Diagnostics and Spectroscopy
The spectroscopy of gases and laser-based diagnostic techniques for measurements of species concentrations, temperature, density, and other flow field properties. Topics: electronic, vibrational, and rotational transitions; spectral lineshapes and broadening mechanisms; absorption, fluorescence, Rayleigh and Raman scattering methods; collisional quenching. Prerequisite: 362A or equivalent.

3 units, not given this year

ME 365. The Structure of Design Research
Restricted to second-year Joint Program in Design graduate students; prerequisite for ME 316A,B,C. How to shape individual research plans, identify tools for design research, and develop a vocabulary for research through design. Students present proposals for master's theses. Case studies.

1-3 units, Spr (Banerjee, S)

ME 367. Optical Diagnostics and Spectroscopy Laboratory
Principles, procedures, and instrumentation associated with optical measurements in gases and plasmas. Absorption, fluorescence and emission, and light-scattering methods. Measurements of temperature, species concentration, and molecular properties. Lab. Enrollment limited to 16. Prerequisite: 362A or 364.

4 units, Spr (Hanson, R)

ME 368A. Biodesign Innovation: Needs Finding and Concept Creation
(Same as BIOE 374A, MED 272A, OIT 581.) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations.

2 units, Win (Yock, P; Zenios, S; Brinton, T; Milroy, C)

ME 368B. Biodesign Innovation: Concept Development and Implementation
(Same as BIOE 374B, MED 272B, OIT 583.) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team.

2 units, Spr (Yock, P; Zenios, S; Brinton, T; Milroy, C)

ME 369A. Biodesign Innovation, Project A
(Same as BIOE 375A, MED 273A, OIT 582.) Interdisciplinary student teams select a medical need, characterize it fully, develop a needs statement, invent potential conceptual approaches to solving the need, and pursue initial prototyping and planning for regulatory and reimbursement pathways. Guest experts. Corequisite: MED 272A/BIOE 374A/ME 368A/OIT 581.

2 units, Win (Yock, P; Zenios, S; Milroy, C; Brinton, T)

ME 369B. Biodesign Innovation, Project B
(Same as BIOE 375B, MED 273B, OIT 584.) Interdisciplinary teams select the most promising invention from BIOE 375A and move into prototyping and project planning. Teams develop strategies for patenting, FDA submission, third-party reimbursement, licensing agreement or launching a start-up, including cash forecasting and business plan. Prerequisites: MED 375A/ME 369A/BIOE 375A/OIT 582. Corequisite: MED 272B/ME 368B/BIOE 374B/OIT 583.

2 units, Spr (Yock, P; Milroy, J; Brinton, T; Zenios, S)

ME 370A. Energy Systems I: Thermodynamics
Thermodynamic analysis of energy systems emphasizing systematic methodology for and application of basic principles to generate quantitative understanding. Availability, mixtures, reacting systems, phase equilibrium, chemical availability, and modern computational methods for analysis. Prerequisites: undergraduate engineering thermodynamics and computer skills such as Matlab.

3 units, Aut (Bowman, C)

ME 370B. Energy Systems II: Modeling and Advanced Concepts
Development of quantitative device models for complex energy systems, including fuel cells, reformers, combustion engines, and electrolyzers, using thermodynamic and transport analysis. Student groups work on energy systems to develop conceptual understanding, and high-level, quantitative and refined models. Advanced topics in thermodynamics and special topics associated with devices under study. Prerequisite: 370A.

4 units, Win (Edwards, C)

ME 370C. Energy Systems III: Projects
Refinement and calibration of energy system models generated in ME 370B carrying the models to maturity and completion. Integration of device models into a larger model of energy systems. Prerequisites: 370A,B, consent of instructor.
4 units, Spr (Edwards, C)

ME 371. Combustion Fundamentals
Heat of reaction, adiabatic flame temperature, and chemical composition of products of combustion; kinetics of combustion and pollutant formation reactions; conservation equations for multi-component reacting flows; propagation of laminar premixed flames and detonations. Prerequisite: 362A or 370A, or consent of instructor.
3 units, Win (Zheng, X)

ME 372. Combustion Applications
The role of chemical and physical processes in combustion; ignition, flammability, and quenching of combustible gas mixtures; premixed turbulent flames; laminar and turbulent diffusion flames; combustion of fuel droplets and sprays. Prerequisite: 371.
3 units, Spr (Zheng, X)

ME 377. Experiences in Innovation and Design Thinking
Lecture/lab. Immersive experiences in innovation and design thinking, blurring the boundaries among technology, business, and human values. Tenets of design thinking including being human-centered, prototype-driven, and mindful of process. Topics include design processes, innovation methodologies, need finding, human factors, rapid prototyping, team dynamics, storytelling, and project management. Hands-on projects, in-class exercises, and guest lectures. Students and faculty from areas including business, earth sciences, education, engineering, humanities and sciences, law, and medicine. Preparation for advanced d.school courses. Limited enrollment. Application required. See http://dschool.stanford.edu/projects/classes/me377.html.
3-4 units, Aut (Kembel, G), Win (Kembel, G), Spr (Kembel, G)

ME 377A. Experiences in Innovation and Design Thinking
Design processes, innovation methodologies, need finding, human factors, rapid prototyping, team dynamics, storytelling, and project management. Preparation for real-world innovation and other d.school projects. Hands-on exercises and team projects focusing on process, frameworks, and methods.
2-3 units, not given this year

ME 377B. Experiences in Innovation and Design Thinking
Design processes, innovation methodologies, need finding, human factors, rapid prototyping, team dynamics, storytelling, and project management. Preparation for real-world innovation and other d.school projects. Hands-on exercises and team projects focusing on process, frameworks, and methods.
2-3 units, not given this year

ME 377C. Experiences in Innovation and Design Thinking
Design processes, innovation methodologies, need finding, human factors, rapid prototyping, team dynamics, storytelling, and project management. Preparation for real-world innovation and other d.school projects. Hands-on exercises and team projects focusing on process, frameworks, and methods.
2-3 units, not given this year

ME 381. Orthopaedic Bioengineering
Engineering approaches applied to the musculoskeletal system in the context of surgical and medical care. Fundamental anatomy and physiology. Material and structural characteristics of hard and soft connective tissues and organ systems, and the role of mechanics in normal development and pathogenesis. Engineering methods used in the evaluation and planning of orthopaedic procedures, surgery, and devices.
3 units, not given this year

ME 382A. Medical Device Design
Real world problems and challenges of biomedical device design and evaluation. Students engage in industry sponsored projects resulting in new designs, physical prototypes, design analyses, computational models, and experimental tests, gaining experience in: the formation of design teams; interdisciplinary communication skills; regulatory issues; biological, anatomical, and physiological considerations; testing standards for medical devices; and intellectual property.
4 units, Win (Andriacchi, T)

ME 382B. Medical Device Design
Continuation of industry sponsored projects from 382A. With the assistance of faculty and expert consultants, students finalize product designs or complete detailed design evaluations of new medical products. Bioethics issues and strtegies for funding new medical ventures.
4 units, Spr (Andriacchi, T)

ME 385. Tissue Engineering Lab
Hands-on experience in the fabrication of living engineered tissues. Techniques include sterile technique, culture of mammalian cells, creation of cell-seeded scaffolds, and the effects of mechanical loading on the metabolism of living engineered tissues. Theory, background, and practical demonstration for each technique. Lab.
1-2 units, not given this year

ME 386. Neuromuscular Biomechanics
(Same as BIOE 386.) The interplay between mechanics and neural control of movement. State of the art assessment through a review of classic and recent journal articles. Emphasis is on the application of dynamics and control to the design of assistive technology for persons with movement disorders.
3 units, not given this year

ME 390. Thermosciences Research Project Seminar
Review of work in a particular research program and presentations of other related work.
1 unit, not given this year

ME 391. Engineering Problems
Directed study for graduate engineering students on subjects of mutual interest to student and staff member. May be used to prepare for experimental research during a later quarter under 392. Faculty sponsor required.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 392. Experimental Investigation of Engineering Problems
Graduate engineering students undertake experimental investigation under guidance of staff member. Previous work under 391 may be required to provide background for experimental program. Faculty sponsor required.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 393. Topics in Biologically Inspired or Human Interactive Robotics
Application of observations from human and animal physiology to robotic systems. Force control of motion including manipulation, haptics, and locomotion. Weekly literature review forum led by student. May be repeated for credit. (Cutkosky, Waldron, Niemeyer)
1 unit, Aut (Staff)

ME 394. Design Forum
Introduction to the design faculty and research labs. Faculty describe their work and research interests followed by open discussion.
1 unit, not given this year

ME 395. Seminar in Solid Mechanics
Required of Ph.D. candidates in solid mechanics. Guest speakers present research topics related to mechanics theory, computational methods, and applications in science and engineering. May be repeated for credit. See http://mc.stanford.edu.
1 unit, Aut (Pruitt, B), Win (Pruitt, B; Kuhl, E), Spr (Kuhl, E)

ME 396. Design and Manufacturing Forum
(Same as ME 196.) Guest speakers address issues of interest to design and manufacturing engineers. Sponsored by Stanford Engineering Club for Automation and Manufacturing (SECAM). May be repeated for credit
1 unit, Win (Reis, R), Spr (Reis, R)

ME 397. Design Theory and Methodology Seminar
What do designers do when they do design? How can their performance be improved? Topics change each quarter. May be repeated for credit.
1-3 units, Aut (Leifer, L; Mabogunje, A; Sonalkar, N), Win (Leifer, L; Mabogunje, A), Spr (Leifer, L; Mabogunje, A)

ME 398. Biomechanical Research Symposium
Guest speakers present contemporary research on experimental and theoretical aspects of biomechanical engineering and bioengineering. May be repeated for credit.
1 unit, Aut, Win, Spr (Levenston, M)

ME 399. Fuel Cell Seminar
Interdisciplinary research in engineering, chemistry, and physics. Talks on fundamentals of fuel cells by speakers from Stanford, other academic and research institutions, and industry. The potential to provide high efficiency and zero emissions energy conversion for transportation and electrical power generation.
1 unit, not given this year

ME 400. Thesis (Engineer Degree)
Investigation of some engineering problems. Required of Engineer degree candidates
2-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 405. Asymptotic Methods and Applications
Asymptotic versus convergent expansions, approximation of integrals, method of matched asymptotics, WKB method and turning points, method of multiple scales. Applications: viscous and potential flow, wave propagation, combustion, and electrostatics. Prerequisites: ME 300B, graduate-level fluid mechanics.
3 units, not given this year

ME 406. Turbulence Physics and Modeling Using Numerical Simulation Data
Prerequisite: consent of instructor.
2 units, Sum (Moin, P)

ME 408. Spectral Methods in Computational Physics
Data analysis, spectra and correlations, sampling theorem, nonperiodic data, and windowing; spectral methods for numerical solution of ordinary and partial differential equations; accuracy and computational cost; fast Fourier transform, Galerkin, collocation, and Tau methods; spectral and pseudospectral methods based on Fourier series and eigenfunctions of singular Sturm-Liouville problems; Chebyshev, Legendre, and Laguerre representations; convergence of eigenfunction expansions; discontinuities and Gibbs phenomenon; aliasing errors and control; efficient implementation of spectral methods; spectral methods for complicated domains; time differencing and numerical stability.
3 units, Win (Moin, P)

ME 410A. Foresight and Innovation
The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research design thinking that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes. Prerequisite: consent of instructor.
1-5 units, Aut (Leifer, L; Cockayne, W)

ME 410B. Foresight and Innovation
The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.
1-5 units, Win (Leifer, L; Cockayne, W)

ME 410C. Foresight and Innovation
The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.
1-5 units, Spr (Leifer, L; Cockayne, W)

ME 410X. Foresight Project Experience with Corporate Partners
Participation in a global foresight research team with real-world industrial partners. Foresight and anticipatory research developed become part of the student's portfolio. May be repeated for credit. Limited enrollment. Prerequisite: consent of instructor.
1-5 units, Aut (Leifer, L; Cockayne, W), Win (Leifer, L; Cockayne, W), Spr (Leifer, L; Cockayne, W), Sum (Leifer, L; Cockayne, W)

ME 412. Engineering Functional Analysis and Finite Elements
(Same as CME 356.) Concepts in functional analysis to understand models and methods used in simulation and design. Topology, measure, and integration theory to introduce Sobolev spaces. Convergence analysis of finite elements for the generalized Poisson problem. Extensions to convection-diffusion-reaction equations and elasticity. Upwinding. Mixed methods and LBB conditions. Analysis of nonlinear and evolution problems. Prerequisites: 335A,B, CME 200, CME 204, or consent of instructor. Recommended: 333, MATH 171.
3 units, Win (Lew, A)

ME 413. Quantum Confinement Structures: Physics and Fabrication
Quantum mechanics principles and the thermodynamics of confinement structures. Focus is on potential applications such as solar cells and catalysis. Student presentations. Lab demonstrations. Prerequisite: background in quantum mechanics and statistical thermodynamics.
3 units, Spr (Prinz, F)

ME 414. Solid State Physics Issues for Mechanical Engineering Experiments
Principles of statistical mechanics, quantum mechanics, and solid-state physics. Provides graduate mechanical engineering students with understanding needed to work on devices or technologies which rely on solid-state physics.
3 units, Sum (Kenny, T)

ME 417. Total Product Integration Engineering
For students aspiring to be product development executives and leaders in research and education. Advanced methods and tools beyond the material covered in 217: quality design across global supply chain, robust product architecture for market variety and technology advances, product development risk management. Small teams or individuals conduct a practical project that produces a case study or enhancement to produce development methods and tools. Enrollment limited to 12. Prerequisites: 317A,B.
4 units, Aut (Ishii, K)

ME 420. Applied Electrochemistry: Micro- and Nanoscale
Concepts of physical chemistry such as thermodynamic equilibrium, reaction kinetics, and mass transport mechanisms from which the fundamentals of electrochemistry are derived. Theory of electrochemical methods for material analyses and modifications with emphasis on scaling behaviors. Electrochemical devices such as sensors, actuators, and probes for scanning microscopes, and their miniaturization concepts. Examples of these devices built, characterized, and applied in labs using technologies such as scanning probe techniques. Projects focus on current problems in biology, material science, microfabrication, and energy conversion.
3 units, not given this year

ME 421. Thought Leaders Seminar for European Entrepreneurship and Innovation
Real-world experiences and challenges in startups, corporations, universities, nonprofit research institutes, and government ministries and agencies. Speakers include entrepreneurs, leaders from global technology companies, university researchers, venture capitalists, legal experts, senior policy makers, and European guests. May be repeated for credit.
1 unit, Win (Leifer, L; Lee, B), Spr (Leifer, L; Lee, B)

ME 438. Computational Molecular Modeling Project
Project-based class. Topics for projects include parallel methods for molecular dynamics, multiple time stepping algorithms, free energy computation, molecular pathways analysis, long-time scale behavior of numerical integrators, and multigrid based fast electrostatic algorithms. Students can propose their own projects. Final report and oral presentation. May be repeated for credit.
3 units, Sum (Darve, E)

ME 450. Advances in Biotechnology
Guest academic and industrial speakers. Latest developments in fields such as bioenergy, green process technology, production of industrial chemicals from renewable resources, protein pharmaceutical production, industrial enzyme production, stem cell applications, medical diagnostics, and medical imaging. Biotechnology ethics, business and patenting issues, and entrepreneurship in biotechnology.
3 units, not given next year

ME 451A. Advanced Fluid Mechanics
Topics: kinematics (analysis of deformation, critical points and flow topology, Helmholtz decomposition); constitutive relations (viscous and visco-elastic flows, non-inertial frames); vortex dynamics; circulation theorems, vortex line stretching and rotation, vorticity

generation mechanisms, vortex filaments and Biot-Savart formula, local induction approximation, impulse and kinetic energy of vortex systems, vorticity in rotating frame. Prerequisite: graduate courses in compressible and viscous flow.

3 units, not given this year

ME 451B. Advanced Fluid Mechanics

Waves in fluids: surface waves, internal waves, inertial and acoustic waves, dispersion and group velocity, wave trains, transport due to waves, propagation in slowly varying medium, wave steepening, solitons and solitary waves, shock waves. Instability of fluid motion: dynamical systems, bifurcations, Kelvin-Helmholtz instability, Rayleigh-Benard convection, energy method, global stability, linear stability of parallel flows, necessary and sufficient conditions for stability, viscosity as a destabilizing factor, convective and absolute instability. Focus is on flow instabilities. Prerequisites: graduate courses in compressible and viscous flow.

3 units, not given this year

ME 451C. Advanced Fluid Mechanics

Compressible flow: governing equations, Crocco-Vazsonyi's equations, creation and destruction of vorticity by compressibility effects, shock waves. Modal decomposition of compressible flow, linear and nonlinear modal interactions, interaction of turbulence with shock waves. Energetics of compressible turbulence, effects of compressibility on free-shear flows, turbulent boundary layers, Van Direst transformation, recovery temperature, and shock/boundary layer interaction. Strong Reynolds analogy, modeling compressible turbulent flows. Prerequisites: 355, 361A, or equivalents.

3 units, Aut (Lele, S)

ME 453A. Finite Element-Based Modeling and Simulation of Linear Fluid/Structure Interaction Problems

Basic physics behind many fluid/structure interaction phenomena. Finite element-based computational approaches for linear modeling and simulation in the frequency domain. Vibrations of elastic structures. Linearized equations of small movements of inviscid fluids. Sloshing modes. Hydroelastic vibrations. Acoustic cavity modes. Structural-acoustic vibrations. Applications to liquid containers and underwater signatures. Prerequisite: graduate course in the finite element method or consent of instructor.

3 units, not given this year

ME 453B. Computational Fluid Dynamics Based Modeling of Nonlinear Fluid/Structure Interaction Problems

Basic physics behind many high-speed flow/structure interaction phenomena. Modern computational approaches for nonlinear modeling and simulation in the time domain. Dynamic equilibrium of restrained and unrestrained elastic structures. Corotational formulation for large structural displacements and rotations. Arbitrary Lagrangian-Eulerian description of inviscid and viscous flows. Time-accurate CFD on moving and deforming grids. Discrete geometric conservation laws. Discretization of transmission conditions on non-matching discrete fluid/structure interfaces. Coupled fluid/mesh-motion/structure time integration schemes. Application to divergence, flutter, and buffeting. Prerequisites: graduate course in the finite element method, and in computational fluid dynamics.

3 units, not given this year

ME 455. Complex Fluids and Non-Newtonian Flows

Definition of a complex liquid and microrheology. Division of complex fluids into suspensions, solutions, and melts. Suspensions as colloidal and non-colloidal. Extra stress and relation to the stresslet. Suspension rheology including Brownian and non-Brownian fibers. Microhydrodynamics and the Fokker-Planck equation. Linear viscoelasticity and the weak flow limit. Polymer solutions including single mode (dumbbell) and multimode models. Nonlinear viscoelasticity. Intermolecular effects in nondilute solutions and melts and the concept of reptation. Prerequisites: low Reynolds number hydrodynamics or consent of instructor.

3 units, not given this year

ME 457. Fluid Flow in Microdevices

Physico-chemical hydrodynamics. Creeping flow, electric double layers, and electrochemical transport such as Nernst-Planck equation; hydrodynamics of solutions of charged and uncharged particles. Device applications include microsystems that perform capillary electrophoresis, drug dispension, and hybridization assays. Emphasis is on bioanalytical applications where electrophoresis, electro-osmosis, and diffusion are important. Prerequisite: consent of instructor.

3 units, Win (Santiago, J)

ME 458. Advanced Topics in Electrokinetics

Electrokinetic theory and electrokinetic separation assays. Electroneutrality approximation and weak electrolyte electrophoresis theory. Capillary zone electrophoresis, field amplified sample stacking, isoelectric focusing, and isotachophoresis. Introduction to general electrohydrodynamics (EHD) theory including the leaky dielectric concept, the Ohmic model formulation, and electrokinetic flow instabilities. Prerequisite: ME 457.

3-5 units, Spr (Santiago, J)

ME 461. Advanced Topics in Turbulence

Turbulence phenomenology; statistical description and the equations governing the mean flow; fluctuations and their energetics; turbulence closure problem, two-equation turbulence models, and second moment closures; non-local effect of pressure; rapid distortion analysis and effect of shear and compression on turbulence; effect of body forces on turbulent flows; buoyancy-generated turbulence; suppression of turbulence by stratification; turbulent flows of variable density; effect of rotation on homogeneous turbulence; turbulent flows with strong vortices. Prerequisites: 351B and 361A, or consent of instructor.

3 units, not given this year

ME 463. Advanced Topics in Plasma Science and Engineering

Research areas such as plasma diagnostics, plasma transport, waves and instabilities, and engineering applications.

3 units, not given this year

ME 468. Experimental Research in Advanced User Interfaces

(Same as COMM 168, COMM 268, COMM 368. Undergraduates register for 168; master's students for 268; doctoral students for 368.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Win (Nass, C), Spr (Nass, C)

ME 469A. Computational Methods in Fluid Mechanics

Finite volume methods on stuctured and unstructured grids. Advanced methods for the solution of systems of equations. ADI schemes, preconditioned conjugate gradient and generalized minimum residual algorithms, multigrid methods, and deferred-correction approaches. Projection, fractional step, and artificial compressibility methods. Turbulent flows: direct numerical simulation, large eddy simulation, and Reynolds-averaged Navier-Stokes methods. Prerequisite: ME 300C/CME 206 or equivalent.

3 units, Win (Iaccarino, G)

ME 469B. Computational Methods in Fluid Mechanics

Advanced CFD codes. Geometry modeling, CAD-CFD conversion. Structured and unstructured mesh generation. Solution methods for steady and unsteady incompressible Navier-Stokes equations. Turbulence modeling. Conjugate (solid/fluid) heat transfer problems. Development of customized physical models. Batch execution for parametric studies. Final project involving solution of a problem of student's choosing. Prerequisite: ME 300C/CME 206.

3 units, not given this year

ME 470. Uncertainty Quantification

Uncertainty analysis in computational science. Probabilistic data representation, propagation techniques and validation under uncertainty. Mathematical and statistical foundations of random variables and processes for uncertainty modeling. Focus is on state-of-the-art propagation schemes, sampling techniques, and stochastic Galerkin methods. The concept of model validation under uncertainty and the determination of confidence bounds estimates. Prerequisite: basic probability and statistics at the level of CME 106 or equivalent.

3 units, Spr (Iaccarino, G)

ME 471. Turbulent Combustion

Basis of turbulent combustion models. Assumption of scale separation between turbulence and combustion, resulting in Reynolds number independence of combustion models. Level-set approach for premixed combustion. Different regimes of premixed turbulent combustion with either kinematic or diffusive flow/chemistry interaction leading to different scaling laws and

unified expression for turbulent velocity in both regimes. Models for non-premixed turbulent combustion based on mixture fraction concept. Analytical predictions for flame length of turbulent jets and NOx formation. Partially premixed combustion. Analytical scaling for lift-off heights of lifted diffusion.

3 units, Aut (Pitsch, H)

ME 484. Computational Methods in Cardiovascular Bioengineering

(Same as BIOE 484.) Lumped parameter, one-dimensional nonlinear and linear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system and evaluate the performance of cardiovascular devices. Construction of anatomic models and extraction of physiologic quantities from medical imaging data. Problems in blood flow within the context of disease research, device design, and surgical planning.

3 units, Spr (Figueroa Alvarez, C)

ME 485. Modeling and Simulation of Human Movement

(Same as BIOE 485.) Direct experience with the computational tools used to create simulations of human movement. Lecture/labs on animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of dynamic simulations; collision detection and contact models. Prerequisite: 281, 331A,B, or equivalent.

3 units, Spr (Delp, S)

ME 491. Ph.D. Teaching Experience

Required of Ph.D. students. May be repeated for credit.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ME 500. Thesis (Ph.D.)

2-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MEDICINE (MED) COURSES

See the "School of Medicine" section of this bulletin for more information. The following courses are available to undergraduates or graduate students. Other courses may be available; see http://www.med.stanford.edu/education for more information.

UNDERGRADUATE COURSES IN MEDICINE

MED 70Q. Cancer and the Immune System

Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

3 units, Spr (Negrin, R)

MED 83Q. Ethical, Legal, and Social Dimensions of Stem Cell Research

Stanford Introductory Seminar. Preference to sophomores. Ethical, legal, social, and economic dimensions of stem cell research such as the discovery of human embryonic stem cells and the international landscape of public policy. How stem cells work, their role in the upkeep of the human body, and current and future uses in medicine. Issues at the intersection of science and society such as human-animal hybrids, notions of justice in intellectual property law, distribution of health care, and the major ethical frameworks defining the debate.

3 units, Spr (Scott, C)

MED 86Q. Seeing the Heart

(F,Dial) Stanford Introductory Seminar. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a cost-effective public screening program. Field trips to Stanford Medical Center imaging centers.

2 units, Win (McConnell, M)

MED 87Q. Women and Aging

(S,Sem Same as HUMBIO 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

MED 88Q. Dilemmas in Current Medical Practice

Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Optional observation of instructors in their medical practices.

3 units, Aut (Croke, J; Jones, H)

MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses

Stanford Introductory Seminar. Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.

3 units, Aut (Katzenstein, D)

MED 94Q. Hormones, Health, and Disease

Preference to sophomores. Hormones' roles in maintaining health; how abnormalities in hormones cause disease. Topics include: the pituitary, the master gland; thyroid hormones and metabolism; insulin and diabetes; adrenal steroids and hypertension; vitamin D, parathyroid hormone, calcium, and osteoporosis; sex hormones, birth control, pregnancy, and menopause; androgens, erectile dysfunction, and athletic performance; cholesterol, obesity, and cardiovascular risk. Recommended: background in human biology and physiology.

3 units, not given this year

MED 108Q. Human Rights and Health

Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. Topics such as: the health status of refugees and internally displaced persons; child labor; trafficking in women and children; torture; poverty, the environment, and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. International conventions on human rights as background for social and political changes that could improve the health of groups and individuals. Optional opportunities to observe at sites where human rights and health are issues.

3 units, Win (Laws, A)

MED 118Q. Pathophysiology of Coronary Heart Disease

Preference to sophomores. Known factors promoting the atherosclerotic process, and the pathologic changes that characterize clinical coronary artery disease. The development of arterial disease and the consequences of coronary occlusion, including heart attack, cardiac rhythm disturbance, and congestive heart failure. Treatment modalities such as cardiac medications, coronary surgery, and angioplasty.

3 units, not given this year

MED 120Q. Pathophysiology and Treatment Aspects of Diseases of the Heart and Blood Vessels

Preference to sophomores. Anatomic, physiologic, and pathologic states that comprise the discipline of cardiovascular medicine. Anatomy and physiology of the heart and blood vessels as an introduction to pathologic states such as heart attack, stroke, congestive heart failure, rhythm disturbances of the heart, and sudden cardiac death. Underlying principles of diagnosis and treatment of the disease.

3 units, not given this year

MED 147. Methods in Community Assessment, Evaluation, and Research
(Same as MED 247.) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.
3 units, Win (Kiernan, M; Fortmann, S)

MED 160. Physician Shadowing: Stanford Immersion in Medicine Series (SIMS)
Undergraduates are paired with a physician mentor at Stanford Hospital and Clinics, Lucile Packard Children's Hospital, or the Veteran's Administration Hospital. May be repeated for credit. Prerequisite: Application and acceptance to the SIMS program.
1 unit, Aut (Gesundheit, N; Fox, E), Win (Gesundheit, N; Fox, E), Spr (Gesundheit, N; Fox, E)

MED 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN MEDICINE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MED 207. History of Medicine
Weekly lectures that trace the development of Western medical tradition from Babylonian, Egyptian, and Greek ancient cultures to the present.
1 unit, Win (Camargo, C)

MED 217. Technological Frontiers in Digestive Diseases
Focused on introducing engineering, bioengineering, and physical sciences students to technologies used in the clinical setting. Topics include: endoscopes to detect and remove cancer; minimally invasive surgery to treat obesity; measurements of propulsion through the intestine; and technologies to detect and stop internal bleeding. Observations in the clinical setting; visits to laboratories engaged in the development of new technologies.
2 units, Spr (Lowe, A; Milroy, J)

MED 227. Bedside Ultrasound
For pre-clinical or clinical medical students, and others with permission. Uses of ultrasound (US) at the bedside. Portable US machines (now the size of laptop computers) are used. How to identify the normal anatomy of the heart, abdomen, and pelvis using US. As proficiency increases, patients with abnormal physical findings are examined at the bedside, enabling students to compare the traditional physical examination with information obtained during US. The syllabus, Introduction to the Physical Examination with Diagnostic Ultrasound (2001), written by Drs. Wolfe and Thompson is used as the students' guide.
1 unit, Aut (Thompson, N; Liang, D), Win (Thompson, N; Liang, D), Spr (Thompson, N; Liang, D)

MED 228. Physicians and Social Responsibility
Social and political context of the roles of physicians and health professionals' role in social change; policy, advocacy, and shaping public attitudes. How physicians have influenced governmental policy on nuclear arms proliferation; environmental health concerns; domestic violence; health and human rights; physicians in government; activism through research; the effects of poverty on health; and gun violence.
1 unit, Aut (Laws, A)

MED 230. Rethinking International Health
(Same as HRP 240.) Issues and players that shape international health today. How to develop a road map for thoughtful, responsible action. Topics include: the role of the physician and health care worker; health as a human right; successful interventions; children's and women's health; issues in immunization; economic development; and NGOs. Online interviews with influential leaders in international health.
2-3 units, Spr (Parsonnet, J)

MED 236. Psychosocial and Behavioral Health Interventions
For medical students, graduate students and undergraduates with senior standing in Human Biology or Psychology. Contemporary theory and conceptual frameworks for psychosocial and behavioral change interventions as applied in contemporary models of community medicine. The trans-theoretical model of behavioral change, contemporary behavioral, cognitive behavioral, social cognitive and acceptance-based models of behavioral change. Current models of emotion regulation, goal setting and attainment, and the impact of personality and characterological features on behavior and behavioral change. Application of theory in practicum based community clinic settings. Prerequisite: Stanford HIPAA training.
1 unit, not given this year

MED 242. Physicians and Human Rights
Weekly lectures on how human rights violations affect health. Topics include torture, domestic violence, regional conflict and health, sweat shops, rape, and war. Guest speakers.
1 unit, Win (Laws, A)

MED 247. Methods in Community Assessment, Evaluation, and Research
(Same as MED 147.) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.
3 units, Win (Kiernan, M; Fortmann, S)

MED 250A. Medical Ethics I
Required for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics, including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Values that arise in different situations and clinical encounters. Issues include: genetics and stem cell research, rationing, ethical issues in care at the end of life, organ transplantation issues.
2 units, Win (Magnus, D)

MED 250B. Medical Ethics II
The integration of ethical theory with applications of theory or conceptual issues in medicine, health care, and the life and social sciences. Topic varies by year. Possible topics include: ethical issues in stem cell research; death and dying; genetics and ethics; concepts of health and disease; the ethics of international research; and ethical implications of new reproductive technology.
2 units, Spr (Magnus, D)

MED 255. The Responsible Conduct of Research
Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.
1 unit, Aut (Karkazis, K), Win (Karkazis, K), Spr (Staff)

MED 256. Global HIV/AIDS
(Same as HUMBIO 156.) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor.
3 units, Spr (Katzenstein, D)

MED 257A. Patient Advocacy in Community Clinics
Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at a course-affiliated clinic site throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: application.
1-4 units, Aut (Garcia, G; Banchoff, A)

MED 257B. Patient Advocacy in Community Clinics
Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: MED 257A

1-4 units, Win (Garcia, G; Banchoff, A)

MED 257C. Patient Advocacy in Community Clinics
Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: 257A,B

1-4 units, Spr (Garcia, G; Banchoff, A)

MED 258. Advanced Patient Advocacy in Community Clinics
Continuation of 257A,B,C for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. May be repeated for credit. Prerequisites: 257A,B,C or consent of instructor.

1-3 units, Aut, Win, Spr , Sum (Garcia, G; Banchoff, A)

MED 259. Oaxacan Health on Both Sides of the Border
Required for students participating in the Community Health in Oaxaca summer program. Health literacy and health-seeking behaviors of Oaxacan and other Mexican migrants; examines the health challenges these groups face. Through discussion and reflection, students prepare for clinical work and community engagement in Oaxaca, while also gaining knowledge and insight to make connections between their experiences in Mexico and their health-related work with Mexican immigrants in the Bay Area. Prerequisite: application and acceptance into the Community Health in Oaxaca Summer Program (http://och.stanford.edu/oaxaca.html).

2 units, Spr (Garcia, G; Banchoff, A)

MED 262. Economics of Health Improvement in Developing Countries
(Same as ECON 127.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: ECON 50 and 102B, and consent of instructor.

5 units, Win (Staff)

MED 272A. Biodesign Innovation: Needs Finding and Concept Creation
(Same as BIOE 374A, ME 368A.) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations.

2 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

MED 272B. Biodesign Innovation: Concept Development and Implementation
(Same as BIOE 374B, ME 368B.) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. Prerequisite: MED 272A/ME 368A/BIOE 374A.

2 units, Spr (Yock, P; Zenios, S; Milroy, J; Brinton,T)

MED 273A. Biodesign Innovation, Project A
(Same as BIOE 375A, ME 369A.) Interdisciplinary student teams select a medical need, characterize it fully, develop a needs statement, invent potential conceptual approaches to solving the need, and pursue initial prototyping and planning for regulatory and reimbursement pathways. Guest experts. Corequisite: MED 272A/BIOE 374A/ME 368A.

2 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

MED 273B. Biodesign Innovation, Project B
(Same as BIOE 375B, ME 369B.) Interdisciplinary teams select the most promising invention from MED 273A/ME 369A/BIOE 375A and move into prototyping and project planning. Teams develop strategies for patenting, FDA submission, third-party reimbursement, licensing agreement or launching a start-up, including cash forecasting and business plan. Prerequisites: MED 375A/ME 369A/BIOE 375A. Corequisite: MED 272B/ME 368B/BIOE 374B.

2 units, Spr (Yock, P; Milroy, J; Brinton, T; Zenios, S)

MED 275. Introduction Biopharmaceutical Innovation
Open to all students. Biotechnology and the pharmaceutical industry. Topics include the biopharmaceutical industry, historical trends, and experiences; research and development; intellectual property; drug approval: regulatory issues and agencies; business development; marketing; manufacturing; capital structure and financing; careers in biopharmaceutical industry. 3 units requires team project and final presentation. May be repeated for credit.

2-3 units, Win (Gardner, P)

MED 276. Careers in Medical Technology
Career tracks in biomedical technology for medical, life science, engineering, business, and law students. Industry professionals describe career tracks, current roles, and industry perspectives.

1 unit, Spr (Gardner, P; Lee, H)

MED 279Y. Interdisciplinary Design for Agile Aging
(Same as CS 379Y, HUMBIO 131.) Offered by the d.school. Perspectives from computer science, design, social and behavioral sciences, physiology, geriatrics, and biodesign to develop projects that address the potential of people to maintain vitality and mobility as they age. New ways to integrate computer and device technologies with behavioral and social interventions. Focus is on small-group projects based on real-world need finding. Prerequisite: background in one of design, computing, medicine, behavioral sciences, communications, or business.

3-4 units, Win (Winograd, C; Winograd, T; Friedlander, A; Yock, P)

MED 279Z. Design Project for Agile Aging
(Same as CS 379Z.) Second of two quarter sequence; students may take 379Y without 379Z; offered by the d.school. Small teams develop projects that can have an impact in the world through products, programs, and practices that affect people's health on a broad scale. Technical interventions, social and contextual design, organizational contexts, and business and distribution issues. Limited enrollment. Prerequisites: CS379Y, and master's level skills in one of design, computing, medicine, behavioral sciences, communications, or business.

3-4 units, not given this year

MED 289. Introduction to Bioengineering Research
(Same as BIOE 390.) Preference to medical and bioengineering graduate students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Topics include: imaging; molecular, cell, and tissue engineering; biomechanics; biomedical computation; biochemical engineering; biosensors; and medical devices. Limited enrollment.

1-2 units, Aut (Taylor, C), Win (Taylor, C)

MED 298. Clinical Research in Carbohydrate and Lipid Metabolism
Open to MD, graduate and undergraduate students. Students participate in research protocols associated with disorders of carbohydrate and lipid metabolism. Prerequisite: interview with the course director.

3 units, Aut, Win, Spr , Sum (Reaven, G)

MED 299. Directed Reading in Medicine
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MED 399. Graduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MEDICINE INTERDISCIPLINARY (INDE) COURSES

See the "School of Medicine" section of this bulletin for more information.

UNDERGRADUATE COURSES IN MEDICINE INTERDISCIPLINARY

INDE 183I. Early Clinical Experience in International Family and Community Medicine
(Same as INDE 283I. Graduate students register for 283I.) For preclinical medical students; undergraduates by special arrangement. Interactive early clinical experience with physicians, community leaders, health care workers, and patients in Mexico, India, China, or Tibet. Emphasis is on community health from local and global perspectives. Social, political, historical, and economic backgrounds of the country and local region. Non-western attitudes, beliefs and practices regarding health care, including herbal and other complementary medicine; local institutions and infrastructure including schools, social services, and the public health care system; and policies that impact health and the provision of care. Prerequisites: conversational Spanish for Mexico; for medical students, completion of first year; for undergraduates, junior standing or higher. Undergraduates apply through International Alliance in Service and Education (IASE) for Mexico; Volunteers in Asia (VIA) for Asian sites. Medical students

6-12 units, Aut (LeBaron, S), Win (LeBaron, S), Spr (LeBaron, S), Sum (LeBaron, S)

INDE 199. Undergraduate Directed Reading and Research in Family and Community Medicine
Interested students should contact the Center for Education in Family and Community Medicine administration. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN MEDICINE INTERDISCIPLINARY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

INDE 207A. Medical Mandarin I: Beginning
Develops essential medical vocabularies and conversational communication skills. Teaches the pinyin pronunciation system, which provides an accessible method of learning basic phrases. The foundations of taking a comprehensive patient history in Mandarin and doing medical interviews at individual hospital divisions, including making introductions, soliciting symptoms, explaining health concepts (e.g. diseases and prescriptions). Main goals are to improve rapport with Chinese patients through Mandarin fluency in the medical setting and to promote understanding of Chinese culture in the context of health care. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in field activities as well.

1-2 units, Aut (Wang, X; So, S)

INDE 207B. Medical Mandarin II: Intermediate
For students who already have a basic command of spoken Chinese. Conversational communication skills practiced in a more advanced setting, including more sophisticated assessment of patient history and cultural components that influence diseases found in Chinese-speaking patients. Builds working vocabulary for organ system disease processes to conduct a full physical exam, and to describe treatment modalities for Chinese-speaking patients (diagnostic and therapeutic). Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in field activities as well. Prerequisite: one semester of college-level Chinese or instructor assessment of fluency.

1-2 units, Aut (Wang, X; So, S)

INDE 207C. Medical Mandarin III: Advanced
Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of Medical Mandarin II, or advanced Chinese proficiency.

1-2 units, Aut (Wang, X; So, S)

INDE 208C. Medical Mandarin III: Advanced
Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of 207C, or advanced Chinese proficiency.

1-2 units, Win (Wang, X; So, S)

INDE 209C. Medical Mandarin III: Advanced
Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. Students participating in classroom instruction only register for 1 unit. Students registering for 2 units participate in project activities as well. Prerequisite: Completion of 208C or advanced Chinese proficiency.

1-2 units, Spr (Wang, X; So, S)

INDE 212. The Human Condition: Medicine, Arts, and Humanities
The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performing arts, film, and literary genres such as poetry, fiction, and scholarly writing. Designed for medical students in the Biomedical Ethics and Medical Humanities Scholarly Concentration, but all students are welcome.

2 units, Spr (Zaroff, L; Shafer, A)

INDE 213. Medical Tai Chi
Tai chi as a recognized form of complimentary and alternative medicine. Intended to promote student health and well-being and to decrease stress, depression, and anxiety through the practice of tai chi. Weekly practices under the instruction of world-renowned 20th generation tai chi expert, Master Shu Dong Li. Analysis of the literature regarding health benefits of tai chi.

2 units, Aut (Andrews, J; LeBaron, S), Win (Andrews, J; LeBaron, S), Spr (Andrews, J; LeBaron, S)

INDE 226. History of Medicine Online
Via Internet. Topics include: ancient medicine, Egypt and Babylonia, ancient Greece and Rome, Europe in the Middle Ages and the Renaissance, 18th-century schools of thought, and technological medicine. Sources include Kleinman's core clinical functions, and text, pictures, hypertext links, and sound clips. See http://cwp.stanford.edu.

1 unit, Aut (Shafer, A), Win (Shafer, A), Spr (Shafer, A)

INDE 227. Careers in Medicine: Clinical Medicine and the Biomedical Sciences at the Cutting Edge
Open to medical students, graduate and undergraduate students. Interactive, seminar-style sessions expose students to diverse career opportunities and the challenges of developing work-life balance in medicine. Recognized experts in clinical medicine and biomedical research who have been innovators in their careers discuss their work, decision-points in their career pathways, and lifestyle aspects of their choices.

1 unit, Spr (Gesundheit, N)

INDE 238. Current Concepts and Dilemmas in Genetic Testing
(Same as GENE 238.) Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. For M.D., biomedical graduate, and genetic counseling students.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

INDE 244. Ethnicity and Medicine
Weekly lecture series introduces basic information about ethnic and cultural factors that impact patient care. Presents information about culturally sensitive health care services and addresses contemporary research issues involving minority and underserved populations. Topics include health care issues and indigenous medical practices of African Americans, Asians, Latinos, Native Americans, immigrants and refugees in both urban and rural settings. One unit for weekly lectures only; two units require additional discussions facilitated by course director; three units (non-medical graduate students and undergraduates) require weekly response papers and a research paper.

1-3 units, Spr (Garcia, R)

INDE 245. Women and Health Care
Lecture and seminar series. Topics of interest to women as health care consumers and providers. The historical role of women in health care; current and future changes.

1-2 units, Aut (Grudzen, M; LeBaron, S; Massion, C)

INDE 256. Current Controversies in Women's Health
(Same as OBGYN 256, HUMBIO 125.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Jacobson, M; Stefanick, M)

INDE 262A. Providing and Evaluating Health Education for Underserved Children
(Same as HUMBIO 121A.) A service learning experience in community health. Students participate in developing health education materials for underserved middle school students based on principles of human biology and health science ; become knowledgeable about logic modes and other evaluation tools available for evaluating health education modules and community intervnetions; develop an implementation and evaluation plan. Prequisite for undergraduates: Human Biology core or equivalent or consent of instructor.

3 units, Aut (Rodriguez, E; Morioka-Douglas, N)

INDE 262B. Providing and Evaluating Health Education for Underserved Children
(Same as HUMBIO 121B.) Students implement the health education activities/modules developed in INDE 262A/HUMBIO 121A, solicit evaluative feedback, and present the outcomes.

3 units, Win (Rodriguez, E; Morioka-Douglas, N)

INDE 283I. Early Clinical Experience in International Family and Community Medicine
(Same as INDE 183I. Graduate students register for 283I.) For preclinical medical students; undergraduates by special arrangement. Interactive early clinical experience with physicians, community leaders, health care workers, and patients in Mexico, India, China, or Tibet. Emphasis is on community health from local and global perspectives. Social, political, historical, and economic backgrounds of the country and local region. Non-western attitudes, beliefs and practices regarding health care, including herbal and other complementary medicine; local institutions and infrastructure including schools, social services, and the public health care system; and policies that impact health and the provision of care. Prerequisites: conversational Spanish for Mexico; for medical students, completion of first year; for undergraduates, junior standing or higher. Undergraduates apply through International Alliance in Service and Education (IASE) for Mexico; Volunteers in Asia (VIA) for Asian sites. Medical students

6-12 units, Aut (LeBaron, S), Win (LeBaron, S), Spr (LeBaron, S), Sum (LeBaron, S)

MEDIEVAL STUDIES (MEDVLST) COURSES

For information on undergraduate programs in Medieval Studies, see the "Medieval Studies" section of this bulletin.

UNDERGRADUATE COURSES IN MEDIEVAL STUDIES

MEDVLST 165. Crusades: Interdisciplinary Approaches
(Same as ENGLISH 103, HISTORY 215, RELIGST 140.) Causes, meanings, meaningfulness, and commemoration of the Christian expeditions against Muslims, pagans, and heretics. Primary and secondary sources. GER:DB-Hum

3-5 units, given next year

GRADUATE COURSES IN MEDIEVAL STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MEDVLST 299. Materials and Methods: Medieval and Early Modern Books and Manuscripts
Hands-on seminar dealing with bibliography, codicology, paleography, and other skills associated with advanced research in the humanities using book and manuscript sources. Topics include: paper, ink, marginalia, binding, printing, type, illustration, collation, and formatting; and English, French, German, Italian, and Latin paleography. Guest experts from faculty and library staff.

1-2 units, not given this year

MICROBIOLOGY AND IMMUNOLOGY (MI) COURSES

For information on graduate programs in Microbiology and Immunology, see the "Microbiology and Immunology" section of this bulletin.

UNDERGRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

MI 25N. Modern Plagues
Preference to freshmen. Molecular and medical aspects of new and old microorganisms that infect humans. Goal is to place modern human plagues in scientific and historical perspective. Focus is on factors that lead to emergence and control.

3 units, not given this year

MI 104. Innate Immunology
(Same as MI 204. Undergraduates register for 104.) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

3 units, Spr (Schneider, D)

MI 115B. The Vaccine Revolution
(Same as HUMBIO 155B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisites: HUMBIO 155H, MI 155V.

6 units, Aut (Siegel, R)

MI 155H. Humans and Viruses I
(Same as HUMBIO 155H.) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, not given this year

MI 155V. Humans and Viruses II
Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis on host pathogen interactions and policy issues. Topics: measles and viral epidemiology, rotavirus and world health, rabies and infections of the brain, HPV and cancer -causing viruses, herpes simplex and viral latency, CMV and viral teratogenesis, retrovirology and endogenous viral sequences, HIV and viral treatement, viral hepatitis and chronic infections, prions and diseases of life style. Prerequisite: 155H.

6 units, not given this year

MI 185. Topics in Microbiology
For advanced undergraduates. Topics include diversity, molecular regulation, growth, bioenergetics, and unique matabolic processes. Presentation of student papers on current topic selected with student input; last year's topic was cancer chemotherapy. Prerequisites: CHEM 31X, Biology core.

3 units, Win (Matin, A)

MI 198. Directed Reading in Microbiology and Immunology
Fields of study are decided in consultation with sponsoring professor. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MI 199. Undergraduate Research
Investigations sponsored by individual faculty members. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MI 204. Innate Immunology
(Same as MI 104. Undergraduates register for 104.) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

3 units, Spr (Schneider, D)

MI 209. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part I
For graduate students and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. Emphasis is on mechanisms to establish infection in the host and responses of the host to infection. Current literature. Prerequisite: background in biochemistry and molecular biology.

4 units, Win (Sarnow, P)

MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part II
For graduate and medical students, and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Current literature.

4 units, Spr (Chen, C)

MI 211. Advanced Immunology I
(Same as IMMUNOL 201.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

MI 215. Principles of Biological Technologies
(Same as IMMUNOL 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.

3 units, Spr (Kirkegaard, K)

MI 233. The Biology of Small Modulatory RNAs
(Same as GENE 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, alternate years, not given this year

MI 250. Frontiers in Microbiology and Immunology
Required of first- and second-year students in Microbiology and Immunology. How to evaluate biological research. Held in conjunction with the Microbiology and Immunology Friday noon seminar series. Before the seminar, students and faculty discuss one or more papers from the speaker's primary research literature on a related topic. After the seminar, students meet informally with the speaker to discuss their research.

1 unit, Aut (Schneider, D), Win (Schneider, D), Spr (Schneider, D)

MI 299. Directed Reading in Microbiology and Immunology
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MI 399. Graduate Research
Students who have completed the necessary foundation courses undertake investigations in general bacteriology, bacterial physiology and ecology, bacterial genetics, microbial pathogenicity, immunology, parasitology, or virology sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MODERN THOUGHT AND LITERATURE (MTL) COURSES

Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Slavic Languages and Literatures, Portuguese, and Spanish. For information on undergraduate and graduate programs in Modern Thought and Literature, see the "Modern Thought and Literature" section of this bulletin.

GRADUATE COURSES IN MODERN THOUGHT AND LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor. Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 299. Edgework: New Directions in the Study of Culture
Workshop. Required of first-year students in the doctoral program. Methodologies of different disciplines, the possibility and difficulty of interdisciplinary work within these disciplines, and their connection with the individual projects of students in Modern Thought and Literature. May be repeated for credit.
2 units, Win (Heise, U)

MTL 300. Modern Thought and Literature Colloquium
Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels. (Mudimbe-Boyi)
1-3 units, Spr (Simpson, R)

MTL 334A. The Modern Tradition I
(Same as LAW 501.) The development over the modern period of ideas about state regulatory power and legal rationality; recent critiques of those ideas. Focus is on justice, legal interpretation, individual agency and moral choice, equality, punishment, legislation, the nation state, and international society. Readings from Sophocles, Grotius, Kant, Rousseau, Hegel, Montesquieu, Wollstonecraft, Austin, Bentham, Marx, Weber, Arendt, Foucault, Said, Spivak, Butler, Habermas, MacKinnon, Rose, and Kennedy.
5 units, not given this year

MTL 334B. The Modern Traditions II: The Study of Culture in the Age of Globalization
(Same as ENGLISH 334B.) 20th-century theory with focus on the concept of culture and methods of studying it from diverse disciplines including sociology, anthrolopogy, history, literary and cultural studies. Modernization, postmodernization, and globalization in their relations to culture broadly understood, cultures in their regional, national, and diasporic manifestations, and cultures as internally differentiated such as high and low culture, subcultures, and media cultures. Readings include Gramsci, Adorno, Horkheimer, Williams, Hall, Gilroy, Hebdige, Jameson, García Canclini, Foucault, Bourdieu, Geertz, Clifford, Saïd, Appadurai, and Appiah.
5 units, Aut (Heise, U)

MTL 390. Qualifying Paper
Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar
Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the faculty to supervise it. May be repeated for
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MTL 398. Research
Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MTL 399. Reading for Orals
Reading in preparation for the University Oral Examination. May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MOLECULAR AND CELLULAR PHYSIOLOGY (MCP) COURSES

For information on graduate programs in Molecular and Cellular Physiology, see the "Molecular and Cellular Physiology" section of this bulletin. Course and laboratory instruction in the Department of Molecular and Cellular Physiology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

MCP 100Q. The Hippocampus as a Window to the Mind
Stanford Introductory Seminar. Preference to sophomores. Electrical physiology of the brain using the hippocampus as a model system. The seminar builds from basic anatomical and electrical principles of brain structure and function, through the electrical properties of individual neurons and simple neuronal circuits, to the nature of behaviors that emerge from these more basic properties. Also discusses other brain regions where the hippocampal model provides insight into specific neuronal functions. Culminates in a discussion of neuronal disorders such as epilepsy, drug addiction, and obsessive-compulsive disorder that can be better understood on a basis of knowledge of the hippocampal model.
3 units, Win (Madison, V)

MCP 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MCP 200. Cardiovascular Physiology
Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.
5 units, Spr (Kobilka, B)

MCP 202. Advanced Immunology II
(Same as IMMUNOL 202.) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201.
3 units, Spr (Garcia, K)

MCP 213. Special Topics in Molecular and Cellular Physiology
Introductory and advanced physiological topics agreed on by an instructor and students. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MCP 216. Genetic Analysis of Behavior
(Same as NBIO 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.
4 units, Spr (Goodman, M)

MCP 222. Imaging: Biological Light Microscopy
(Same as BIO 152, NBIO 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core.
3 units, alternate years, not given this year

MCP 232. Advanced Imaging Lab in Biophysics
(Same as BIO 132, BIO 232, BIOPHYS 232.) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.
4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology
Open to graduate and medical students, and advanced undergraduates. Dynamic aspects of cell behavior and function,

including cellular energetics, homeostasis, heterogeneity of membranes, structure and function of organelles, solute and water transport, signaling and motility. Emphasis is on the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Mathematical models of cell function. Student presentations.

4 units, Spr (Maduke, M; Lewis, R)

MCP 258. Information and Signaling Mechanisms in Neurons and Circuits

(Same as NBIO 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, alternate years, not given this year

MCP 299. Directed Reading in Molecular and Cellular Physiology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MCP 399. Graduate Research

Students undertake investigations sponsored by individual faculty members. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC (MUSIC) COURSES

Many Music courses have web pages linked to the Music home page. Courses with web sites at press time are noted in their entries below. For information on undergraduate and graduate programs in the Department of Music, see the "Music" section of this bulletin.

UNDERGRADUATE COURSES IN MUSIC

Students with training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 5G. Introduction to Guzheng

Introduction to Chinese music through learning how to play guzheng, a 21-stringed traditional Chinese instrument. The cultural, social, and historical significance of guzheng. 15 guzheng techniques, how to read Chinese music and guzheng notation, and two simple classic guzheng pieces. May be repeated for credit a total of 14 times. (AU)

1 unit, Aut (You, H), Win (You, H), Spr (You, H)

MUSIC 6A. Musical Treasures of Asia

Introduction to the music of Asian cultures emphasizing China, India, Indonesia, Japan, and Korea. Ethnic, social, cultural, and global perspectives. Instruments and ensembles in performance contexts such as sacred rituals and secular dance and theater. Traditional genres and their impact on contemporary composers. No musical background required. GER:DB-Hum, EC-GlobalCom

3 units, Win (Kapuscinski, J)

MUSIC 7A. World Music and Globalized Culture

The circulation of musicians, audiences, instruments and other musical technologies, songs, recordings, and musical genres. What happens when music moves from rural to urban contexts, across national boundaries, into new mediascapes and technological regimes? Emphasis is on recent developments. Topics include: Arabic, Chinese, and Hindustani classical music; hip hop's global reach; carnival in the Americas; Bollywood film; music, Islam, and the state; attempts at creating pan-Asian pop; the spread of the guitar and the brass band; ringtones and mobile music; YouTube.

3 units, Aut (Kronengold, C)

MUSIC 8A. Rock, Sex, and Rebellion

Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER:DB-Hum, EC-AmerCul

3 units, Spr (Applebaum, M), alternate years, not given next year

MUSIC 12A. Introductory Piano Class

(A=level 1; B=level 2; C=level 3)

1 unit. Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)

MUSIC 12B. Introductory Piano Class

(A=level 1; B=level 2; C=level 3)

1 unit. Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)

MUSIC 12C. Introductory Piano Class

(A=level 1; B=level 2; C=level 3.) May be repeated for credit a total of 14 times.

1 unit. Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China

Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

MUSIC 14N. Women Making Music

Stanford Introductory Seminar. Preference to freshmen. Women's musical activities across times and cultures; how ideas about gender influence the creation, performance, and perception of music. GER:DB-Hum, EC-Gender

3 units, Aut (Hadlock, H)

MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings

(Same as GERLIT 16N.) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart

Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

3 units, Win (Berger, K)

MUSIC 17Q. Perspectives in North American Taiko

Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Spr (Sano, S; Uyechi, L)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940

From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul

3 units, Win (Berry, F)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present

Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul

3 units, Spr (Berry, F)

MUSIC 19. Introduction to Music Theory
For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum
3 units, Aut (Berger, T), Spr (Berger, T)

MUSIC 20A. Jazz Theory
Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum
3 units, Aut (Nadel, J)

MUSIC 20B. Advanced Jazz Theory
Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum
3 units, Win (Nadel, J), alternate years, not given next year

MUSIC 20C. Jazz Arranging and Composition
Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.
3 units, alternate years, not given this year

MUSIC 21. Elements of Music I
Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Concurrent enrollment in MUSIC 12 (Piano) or demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required. Enrollment limited to 40. Prerequisite: pass a basic musical skills proficiency examination on first day of class; students who do not pass may take MUSIC 19. GER:DB-Hum
4 units, Aut (Aquilanti, G), Win (Berger, T)

MUSIC 22. Elements of Music II
Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: 21 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum
4 units, Win (Aquilanti, G), Spr (Berger, T)

MUSIC 23. Elements of Music III
Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course's final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: 22 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum
4 units, Aut (Berger, T), Spr (Ulman, E)

MUSIC 37N. *Ki ho'alu:* The New Renaissance of a Hawaiian Musical Tradition
Stanford Introductory Seminar. Preference to freshman. Developed in the Hawaiian Islands during the 1830s, *ki ho'alu*, or Hawaiian slack key guitar, is an art form experiencing newfound popularity coinciding with the growth of political activism in Hawaiian culture. The musical, cultural, historical, and political perspectives of Hawaiian music and *ki ho'alu*, through hands-on experience, readings, discussion, and workshops. Hawaiian music and history and relationships among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul
3 units, Aut (Sano, S)

MUSIC 38N. Singing Early Music
Stanford Introductory Seminar. Preference to freshmen. 15th- and 16th-century musical repertories and their contexts; performance practice. GER:DB-Hum
3 units, Spr (Rodin, J)

MUSIC 40. Music History to 1600
Pre- or corequisite: 23. GER:DB-Hum
4 units, Aut (Rodin, J)

MUSIC 41. Music History 1600-1830
Pre- or corequisite: 23. GER:DB-Hum
4 units, Win (Hadlock, H)

MUSIC 42. Music History Since 1830
Pre- or corequisite: 23. GER:DB-Hum
4 units, Spr (Grey, T)

MUSIC 65A. Voice Class I
Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.
1 unit, Aut (Linduska, M), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Linduska, M)

MUSIC 65B. Voice Class II
Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.
1 unit, Aut (Linduska, M), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Linduska, M)

MUSIC 72A. Intermediate Piano Class
For intermediate students. May be repeated for credit a total of 14 times. Prerequisites: 12C or equivalent, audition.
1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Zerlang, T)

MUSIC 72B. Organ Class
For beginning organ students who have keyboard skills. May be repeated for credit a total of 14 times.
1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)

MUSIC 72C. Harpsichord Class
For beginning harpsichord students who have keyboard skills. May be repeated for credit a total of 14 times.
1 unit, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)

MUSIC 72D. Jazz Piano Class
By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.
1 unit, Aut (Low, M), Win (Low, M), Spr (Low, M)

MUSIC 73. Intermediate Voice Class
For intermediate students. Admission by audition. May be repeated for credit a total of 14 times.
1 unit, Aut (Linduska, M), Win (Giovannetti, C), Spr (Giovannetti, C)

MUSIC 74C. Classical Guitar Class
May be repeated for credit a total of 14 times.
1 unit, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)

MUSIC 74D. Harp Class
May be repeated for credit a total of 14 times.
1 unit, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)

MUSIC 75B. Renaissance Wind Instruments Class
May be repeated for credit.
1 unit, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

MUSIC 76. Brass Instruments Class
May be repeated for credit a total of 14 times.
1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)

MUSIC 77. Percussion Class
May be repeated for credit a total of 14 times.
1 unit, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)

MUSIC 121. Analysis of Tonal Music
Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Ulman, E)

MUSIC 122A. Eighteenth-Century Counterpoint
Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Spr (Rodin, J)

MUSIC 122B. Harmonic Materials of 19th Century
Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Ulman, E)

MUSIC 122C. Introduction to 20th-Century Composition
Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Aut (Ulman, E)

MUSIC 123. Undergraduate Seminar in Composition
Current trends in composition. May be repeated for credit a total of 7 times. Prerequisites: Music major; 23 or consent of instructor. GER:DB-Hum
3 units, Aut (Kapuscinski, J)

MUSIC 125. Individual Undergraduate Projects in Composition
May be repeated for credit a total of 14 times. Prerequisites: music major, and one quarter of 123.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 126. Introduction to Thoroughbass
The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.
1-3 units, Win (Berger, T)

MUSIC 127. Instrumentation and Orchestration
Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum
3 units, Aut (Aquilanti, G)

MUSIC 128. Composition, Coding, and Performance with SLOrk
Classroom instantiation of the Stanford Laptop Orchestra (SLOrk) which includes public performances. An ensemble of more than 20 humans, laptops, controllers, and special speaker arrays designed to provide each computer-mediated instrument with its sonic identity and presence. Topics and activities include issues of composing for laptop orchestras, instrument design, sound synthesis, programming, and live performance. May be repeated four times for credit.
1-5 units, Spr (Wang, G)

MUSIC 128X. Composing, Coding, and Performance for Laptop Orchestra (Extended)
Composing, coding, and performing with the medium of the laptop orchestra. Prerequisite: MUSIC 128 and consent of instructor.
1 unit, Aut (Wang, G), Win (Wang, G)

MUSIC 130A. Introduction to Conducting
Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.
3 units, Aut (Morgan, R), alternate years, not given next year

MUSIC 130B. Elementary Orchestral Conducting
Prerequisites: 127 or previous orchestral performance experience, 130A.
3 units, Spr (Cai, J), alternate years, not given next year

MUSIC 130C. Elementary Choral Conducting
Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.
3 units, Win (Wait, G), alternate years, not given next year

MUSIC 140. Studies in Medieval Music
(Same as MUSIC 240.) May be repeated for credit. Pre- or corequisite: 23 GER:DB-Hum
3-4 units, alternate years, not given this year

MUSIC 141. Studies in Renaissance Music
(Same as MUSIC 241.) May be repeated for credit. Pre- or corequisite: 23. GER:DB-Hum
3-4 units, not given this year

MUSIC 142. Studies in Baroque Music
(Same as MUSIC 242.) May be repeated for credit. Pre- or corequisite: 23. GER:DB-Hum
3-4 units, not given this year

MUSIC 143. Studies in Classic Music
(Same as MUSIC 243.) May be repeated for credit. Pre- or corequisite: 23. GER:DB-Hum
3-4 units, Spr (Hadlock, H)

MUSIC 144. Studies in Romantic Music
(Same as MUSIC 244.) May be repeated for credit. Pre or corequisite: 23. GER:DB-Hum
3-4 units, not given this year

MUSIC 145. Studies in Modern Music
(Same as MUSIC 245.) May be repeated for credit. Pre- or corequisite: 23. GER:DB-Hum
3-4 units, not given this year

MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film
(Same as HUMNTIES 192G, MUSIC 248.) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet*, *Othello*, *Macbeth*, *Hamlet*, *The Tempest*, *Midsummer Night's Dream*, and *Twelfth Night*. May be repeated for credit. Pre- or corequisite: 23.
4-5 units, Win (Grey, T)

MUSIC 149. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future
(Same as MUSIC 249.) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's *After the Golden Age* and Philip's *Performing Music in the Age of Recording*. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with January 2009 symposium; see http://music.stanford.edu/Events/StanfordMusicSymposium/. May be repeated for credit. Pre- or corequisite: 23 or consent of instructor. GER:DB-Hum
3-4 units, Aut (Barth, G; Arul, K)

MUSIC 150. Musical Acoustics
The physics of vibrating systems, waves, and wave motion. Time- and frequency-domain analysis of sound. Room acoustics, reverberation, and spatialization. The acoustics of musical instruments: voice, strings, and winds. Emphasis is on the practical aspects of acoustics in making music. Hands-on and computer-based lab. See http://ccrma.stanford.edu/courses/150/. Prerequisites: music performance/composition experience, basic algebra, calculus, and physics. GER:DB-EngrAppSci
3 units, Win (Rossing, T)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians
Concepts and experiments relevant to the use of sound, especially synthesized, in music. Listening to sound examples. Emphasis is on salience and the importance of various auditory phenomena in music. See http://ccrma.stanford.edu/. Prerequisite: basic knowledge of music. GER:DB-Hum, WIM
4 units, Win (Berger, J; Menon, V)

MUSIC 152. Anthropology of Sound, Identity, and Place
(Same as ANTHRO 127A.) The ethnography of sound; challenges and opportunities in representing and interpreting the music, noise, and silence of human cultures. Readings include work that avoids, engages with, distorts, and celebrates sound. Goal is for the students to develop critical theories and techniques. Guest lecturer is MacArthur Fellow Steven Feld. Fieldwork includes making recordings; final project.
5 units, Win (Diehl, K)

MUSIC 154. Composition and Performance of Instrumental Music with Electronics
Aesthetic and analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music. May be repeated for credit once.
1-5 units, Spr (Ruviaro, B)

MUSIC 156. "sic": Improvisation Collective
Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required. May be repeated for credit for a total of 3 times.
1 unit, Aut (Applebaum, M)

MUSIC 157. Introduction to Mariachi Ensemble
The practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron). May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 158. Soundwire Ensemble
Stanford's Internet2-based Soundwire Ensemble rehearses with the East Coast Tintinnabulate Ensemble directed by Pauline Oliveros, Rensselaer Polytechnic Institute. Concerts, composition, and improvisation projects using resources available when connecting with remote musicians. State-of-the-art audio and video technology developed by ensemble participants. May be repeated for credit.
2-3 units, Win (DiPietro, R)

MUSIC 159. Early Music Singers
Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter. May be repeated for credit for a total of 14 times.
1 unit, Aut (Mahrt, W), Win (Mahrt, W), Spr (Mahrt, W)

MUSIC 160. Stanford Symphony Orchestra
70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter. May be repeated for credit a total of 14 times.
1 unit, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)

MUSIC 160A. Stanford Philharmonia Orchestra
Prerequisite: audition, one year of 160, or consent of instructor. May be repeated for credit.
1 unit, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)

MUSIC 161A. Stanford Wind Ensemble
40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter. May be repeated for credit a total of 14 times.
1 unit, Aut (Aquilanti, G), Win (Aquilanti, G), Spr (Aquilanti, G)

MUSIC 161B. Jazz Orchestra
Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter. May be repeated for credit a total of 14 times.
1 unit, Aut (Berry, F), Win (Berry, F), Spr (Berry, F)

MUSIC 161C. Red Vest Band
A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men's and women's home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit a total of 4 times.
1 unit, Win (Aquilanti, G)

MUSIC 161D. Stanford Brass Ensemble
Performance of works for full brass choir and for smaller ensembles of brass instruments. Once weekly rehearsals. May be repeated for credit. Prerequisite: audition and consent of instructor.
1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)

MUSIC 162. Symphonic Chorus
100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter. May be repeated for credit a total of 14 times.
1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)

MUSIC 163. Memorial Church Choir
Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar. May be repeated for credit a total of 14 times.
2 units, Aut (Wait, G), Win (Wait, G), Spr (Wait, G)

MUSIC 165. Chamber Chorale
Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music. May be repeated for credit a total of 14 times.
1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)

MUSIC 167. University Singers
Mixed-repertory chorus, performing choral repertoire from all periods of Western art music and other world cultures. May be repeated for credit a total of 14 times.
1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)

MUSIC 167S. Summer Chorus
80-100 voice ensemble, performing major choral masterworks.
1 unit, Sum (Hunn, A)

MUSIC 169. Stanford Taiko
Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only. May be repeated for credit a total of 14 times.
1 unit, Aut (Sano, S; Uyechi, L), Win (Sano, S; Uyechi, L), Spr (Sano, S; Uyechi, L)

MUSIC 169A. Seminar in Performance Practices
(Same as MUSIC 269A.) Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods. GER:DB-Hum
1-4 units, alternate years, not given this year

MUSIC 170. Collaborative Piano
Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.
1 unit, Aut (Dahl, L)

MUSIC 171. Chamber Music
Audition required. Weekly coachings (1 hr) from Music Dept. Faculty. Classical string quartets and piano/ string groups are supervised by the St. Lawrence String Quartet, and require attendance at a weekly Wednesday 4:15pm masterclass. May be repeated for credit.
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 172A. Piano
Private lessons and group master class weekly. May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 172B. Organ
May be repeated for credit a total of 14 times.
1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)

MUSIC 172C. Harpsichord
May be repeated for credit a total of 14 times.
1-3 units, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)

MUSIC 172D. Jazz Piano
By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.
1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)

MUSIC 172E. Fortepiano
May be repeated for credit a total of 14 times.
1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)

MUSIC 172F. Carillon
May be repeated for credit a total of 14 times.
1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)

MUSIC 173. Voice
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 174A. Violin
May be repeated for credit a total of 14 times.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 174B. Viola
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 174C. Violoncello
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 174D. Contrabass
May be repeated for credit a total of 14 times.
1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)

MUSIC 174E. Viola Da Gamba
May be repeated for credit a total of 14 times.
1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)

MUSIC 174F. Classical Guitar
May be repeated for credit a total of 14 times.
1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)

MUSIC 174G. Harp
May be repeated for credit a total of 14 times.
1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)

MUSIC 174H. Baroque Violin
May be repeated for credit a total of 14 times.
1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)

MUSIC 174I. Early Plucked Strings
(Same as MUSIC 274I.)
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 175A. Flute
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 175B. Oboe
May be repeated for credit a total of 14 times.
1-3 units, Aut (Hubbard, R), Win (Matheson, J), Spr (Matheson, J)

MUSIC 175C. Clarinet
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 175D. Bassoon
May be repeated for credit a total of 14 times.
1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)

MUSIC 175E. Recorder/Renaissance Wind Instruments
May be repeated for credit a total of 14 times.
1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

MUSIC 175F. Saxophone
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 175G. Baroque Flute
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 176A. French Horn
May be repeated for credit a total of 14 times.
1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)

MUSIC 176B. Trumpet
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 176C. Trombone
May be repeated for credit a total of 14 times.
1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)

MUSIC 176D. Tuba
May be repeated for credit a total of 14 times.
1-3 units, Aut (Clements, A), Win (Clements, A), Spr (Clements, A)

MUSIC 177. Percussion
May be repeated for credit a total of 14 times.
1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)

MUSIC 181. Advanced Voice Performance
Performance class in a workshop setting. Skills including style, diction, interpretation, and expression in art song, oratorio, and opera literature. Repertoire varies and spans more than one quarter. May be repeated for credit a total of 14 times. Prerequisite: private-lesson proficiency in voice or consent of instructor.
1 unit, Aut (Wait, G), Win (Schneider, A), Spr (Schneider, A)

MUSIC 182. Diction for Singers
The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.
1 unit, Win (Dahl, L)

MUSIC 183A. German Art Song Interpretation
Including composers from Beethoven and Schubert to Wolf and Strauss. for advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers. May be repeated for credit a total of 2 times.
1 unit, alternate years, not given this year

MUSIC 183B. French Art Song Interpretation
Composers include Fauré, Debussy, Ravel, and Poulenc. For advanced singers and pianists as partners. Performance class in a workshop setting. May be repeated for credit a total of 2 times. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
1 unit, Spr (Dahl, L), alternate years, not given next year

MUSIC 192A. Foundations of Sound-Recording Technology
For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; and principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci
3 units, Aut (Kadis, J)

MUSIC 192B. Advanced Sound Recording Technology
Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See http://ccrma.stanford.edu/courses/. Prerequisite: 192A. GER:DB-EngrAppSci, DB-Hum
3 units, Win (Kadis, J)

MUSIC 192C. Session Recording
Independent engineering of recording sessions. May be repeated for credit a total of 14 times. Prerequisites: 192A,B.
1-2 units, Aut (Kadis, J), Win (Kadis, J), Spr (Kadis, J)

MUSIC 197. Undergraduate Teaching Apprenticeship
Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor.
1-2 units, Aut (Staff), Win (Sano, S), Spr (Sano, S)

MUSIC 198. Concentrations Project
For concentration program participants only. Must be taken in senior year.
4 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 199. Independent Study
For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor. May be repeated for credit a total of 14 times.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN MUSIC

Primarily for graduate students; undergraduates may enroll with consent of instructor.

MUSIC 200. Graduate Proseminar
Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.
4 units, Aut (Berger, K; McBride, J)

MUSIC 220A. Fundamentals of Computer-Generated Sound
Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-

modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/.

2-4 units, Aut (Wang, G)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing

The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/. Prerequisite: 220A.

2-4 units, Win (Wang, G)

MUSIC 220C. Research Seminar in Computer-Generated Music

Individual projects in composition, psychoacoustics, or signal processing. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu. May be repeated for credit. Prerequisite: 220B.

2-4 units, Spr (Caceres, J)

MUSIC 220D. Research in Computer-Generated Music

Independent research projects in composition, psychoacoustics, or signal processing. See http://ccrma.stanford.edu/. May be repeated for credit. Prerequisite: 220C.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 221. Topics in the History of Theory

The intersection of music theory and compositional practice in different eras of Western music history. Primary sources in music theory and issues such as notation, rhythm, mode, dissonance treatment, counterpoint, tonality, form, rhetoric, affect and imitation, expression, linear analysis, 12-tone and set theory, in light of relevant repertoire and modern scholarship. May be repeated for credit a total of 5 times.

3-5 units, alternate years, not given this year

MUSIC 230. Advanced Orchestral Conducting

May be repeated for credit a total of 8 times. Prerequisite: 130B.

2-4 units, Aut (Cai, J), Win (Cai, J), Spr (Cai, J)

MUSIC 231. Advanced Choral Conducting

May be repeated for credit a total of 8 times. Prerequisite: 130C.

2-4 units, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)

MUSIC 240. Studies in Medieval Music

(Same as MUSIC 140.) May be repeated for credit. Pre- or corequisite: 23

3-4 units, alternate years, not given this year

MUSIC 241. Studies in Renaissance Music

(Same as MUSIC 141.) May be repeated for credit. Pre- or corequisite: 23.

3-4 units, not given this year

MUSIC 242. Studies in Baroque Music

(Same as MUSIC 142.) May be repeated for credit. Pre- or corequisite: 23.

3-4 units, not given this year

MUSIC 243. Studies in Classic Music

(Same as MUSIC 143.) May be repeated for credit. Pre- or corequisite: 23.

3-4 units, Spr (Hadlock, H)

MUSIC 244. Studies in Romantic Music

(Same as MUSIC 144.) May be repeated for credit. Pre- or corequisite: 23.

3-4 units, not given this year

MUSIC 245. Studies in Modern Music

(Same as MUSIC 145.) May be repeated for credit. Pre- or corequisite: 23.

3-4 units, not given this year

MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film

(Same as HUMNTIES 192G, MUSIC 148.) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night's Dream,* and *Twelfth Night*. May be repeated for credit. Pre- or corequisite: 23.

4-5 units, Win (Grey, T)

MUSIC 249. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future

(Same as MUSIC 149.) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's After the Golden Age and Philip's Performing Music in the Age of Recording. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with January 2009 symposium; see http://music.stanford.edu/Events/StanfordMusicSymposium/. May be repeated for credit. Pre- or corequisite: 23 or consent of instructor.

3-4 units, Aut (Barth, G; Arul, K)

MUSIC 250A. HCI Theory and Practice

HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See http://ccrma.stanford.edu/.

3-4 units, Aut (Ju, W)

MUSIC 250B. HCI Performance Systems

Continuation of 250A, concentrating on interactive computer-music performance systems. See http://ccrma.stanford.edu/courses/250b/. Prerequisite: 250A.

1-4 units, Win (Ju, W)

MUSIC 251. Music, the Brain, and Human Behavior

The perception, cognition, and neuroscience of music. Prerequisite: MUSIC 151 or consent of instructors.

1-5 units, Win (Berger, J; Menon, V)

MUSIC 253. Musical Information: An Introduction

The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.

1-4 units, Win (Selfridge-Field, E)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation

Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.

1-4 units, Spr (Selfridge-Field, E)

MUSIC 256. Music, Computing, and Design

Topics include interactive software system design for computer music, implementation strategies and best practices, software interface design and visualization, and real-time audio systems. Open-source, software re-use, and the intersection of audio and graphics. Crafting software systems for computer music and multimedia. Programming projects in C++ and the ChucK programming language. Prerequisite: a programming course in C++/Java or equivalent experience. May be repeated once for credit.

1-4 units, Aut (Wang, G)

MUSIC 269A. Seminar in Performance Practices

(Same as MUSIC 169A.) Performance techniques, theoretical principles, aesthetics, and musical resources of historical periods.

1-4 units, alternate years, not given this year

MUSIC 269B. Research in Performance Practices

May be repeated for credit a total of 5 times.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 272A. Advanced Piano

Private lessons and group masterclass weekly. May be repeated for credit a total of 14 times.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 272B. Advanced Organ
May be repeated for credit a total of 14 times.
1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)

MUSIC 272C. Advanced Harpsichord
May be repeated for credit a total of 14 times.
1-3 units, Aut, Win, Spr (Thornburgh, E)

MUSIC 272D. Advanced Jazz Piano
By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.
1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)

MUSIC 272E. Advanced Fortepiano
May be repeated for credit a total of 14 times.
1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)

MUSIC 272F. Advanced Carillon
May be repeated for credit a total of 14 times.
1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)

MUSIC 273. Advanced Voice
May be repeated for credit.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 274A. Advanced Violin
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 274B. Advanced Viola
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 274C. Advanced Violoncello
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 274D. Advanced Contrabass
May be repeated for credit a total of 14 times.
1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)

MUSIC 274E. Advanced Viola da Gamba
May be repeated for credit a total of 14 times.
1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)

MUSIC 274F. Advanced Classical Guitar
May be repeated for credit a total of 14 times.
1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)

MUSIC 274G. Advanced Harp
May be repeated for credit a total of 14 times.
1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)

MUSIC 274H. Advanced Baroque Violin
May be repeated for credit a total of 14 times.
1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)

MUSIC 274I. Early Plucked Strings
(Same as MUSIC 174I.)
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 275A. Advanced Flute
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 275B. Advanced Oboe
May be repeated for credit a total of 14 times.
1-3 units, Aut (Hubbard, R), Win (Matheson, J), Spr (Matheson, J)

MUSIC 275C. Advanced Clarinet
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 275D. Advanced Bassoon
May be repeated for credit a total of 14 times.
1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)

MUSIC 275E. Advanced Recorder/Renaissance Wind Instruments
May be repeated for credit a total of 14 times.
1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

MUSIC 275F. Advanced Saxophone
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 275G. Advanced Baroque Flute
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 276A. Advanced French Horn
May be repeated for credit a total of 14 times.
1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)

MUSIC 276B. Advanced Trumpet
May be repeated for credit a total of 14 times.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

MUSIC 276C. Advanced Trombone
May be repeated for credit a total of 14 times.
1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)

MUSIC 276D. Advanced Tuba
May be repeated for credit a total of 14 times.
1-3 units, Aut (Clements, A), Win (Clements, A), Spr (Clements, A)

MUSIC 277. Advanced Percussion
May be repeated for credit a total of 14 times.
1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)

MUSIC 280. TA Training Course
Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.
1 unit, Spr (Ruviaro, B; Heel, K)

MUSIC 300A. Medieval Notation
Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.
4 units, alternate years, not given this year

MUSIC 300B. Renaissance Notation
Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.
4 units, Aut (Mahrt, W), alternate years, not given next year

MUSIC 301A. Analysis of Music: Modal
4 units, Win (Mahrt, W)

MUSIC 301B. Analysis of Music: Tonal
4 units, Aut (Grey, T)

MUSIC 301C. Analysis of Music: Post-Tonal
Current analytical trends, issues, and methods.
4 units, Spr (Ulman, E)

MUSIC 302. Research in Musicology
May be repeated for credit a total of 7 times.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 310. Research Seminar in Musicology
For graduate students. Topics vary each quarter. May be repeated for credit a total of 8 times.
3-5 units, Aut (Kronengold, C), Win (Rodin, J), Spr (Mahrt, W)

MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche
For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.
4 units, Win (Berger, K), alternate years, not given next year

MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today
For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.
4 units, Spr (Berger, K), alternate years, not given next year

MUSIC 318. Advanced Acoustics
Current topics. May be repeated for credit.
1-5 units, Win (Rossing, T)

MUSIC 319. Research Seminar on Computational Models of Sound Perception
All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See http://ccrma.stanford.edu/courses/. May be repeated for credit a total of 14 times.
1-3 units, Aut (Slaney, M), Win (Slaney, M), Spr (Slaney, M)

MUSIC 320. Introduction to Digital Audio Signal Processing
Digital signal processing for music and audio research. Topics: complex numbers, sinusoids, spectrum representation, sampling and

aliasing, digital filters, frequency response, z transforms, transfer-function analysis, and associated Matlab software. See http://ccrma.stanford.edu/courses/320/.

3-4 units, Aut (Abel, J; Berners, D)

MUSIC 321. Readings in Music Theory
May be repeated for credit a total of 5 times.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 323. Doctoral Seminar in Composition
Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor. May be repeated for credit a total of 14 times.

4 units, Aut (Applebaum, M), Win (Berger, J), Spr (Kapuscinski, J)

MUSIC 325. Individual Graduate Projects in Composition
May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 341. Ph.D Dissertation
May be repeated for credit a total of 5 times.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 390. Practicum Internship
On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of adviser.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 399. D.M.A. Final Project
May be repeated for credit a total of 5 times.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

MUSIC 420. Signal Processing Models in Musical Acoustics
Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See http://ccrma.stanford.edu/courses/420/. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton's laws of motion; and CS 106B or equivalent programming in C and C++.

3-4 units, Win (Smith, J)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT)
Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (Smith, J)

MUSIC 422. Perceptual Audio Coding
History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such asAC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See http://ccrma.stanford.edu/.

3 units, Win (Bosi-Goldberg, M)

MUSIC 423. Signal Processing Research
Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See http://ccrma.stanford.edu/courses/423/. May be repeated for credit a total of 11 times.

1-4 units, Aut (Abel, J; Berners, D), Win (Smith, J), Spr (Smith, J)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects
Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

NATIVE AMERICAN STUDIES (NATIVEAM) COURSES

For information on undergraduate programs in Native American Studies, see the "Comparative Studies in Race and Ethnicity" section of this bulletin.

UNDERGRADUATE COURSES IN NATIVE AMERICAN STUDIES

NATIVEAM 109A. Federal Indian Law
(Same as CSRE 109A.) Cases, legislation, comparative justice models, and historical and cultural material. The interlocking relationships of tribal, federal, and state governments. Emphasis is on economic development, religious freedom, and environmental justice issues in Indian country.

5 units, Aut (Biestman, K)

NATIVEAM 109B. Indian Country Economic Development
(Same as CSRE 109B.) The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.

5 units, not given this year

NATIVEAM 117S. History of California Indians
(Same as CSRE 117S.) Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system. GER:EC-AmerCul

5 units, Win (Shively, J)

NATIVEAM 200R. Directed Research

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

NATIVEAM 200W. Directed Reading

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

NEUROBIOLOGY (NBIO) COURSES

For information on graduate programs in Neurobiology, see the "Neurobiology" section of this bulletin. Course and laboratory instruction in the Department of Neurobiology, conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html. The department offers a one quarter course (NBIO 206) on the structure and function of the nervous system, which is open to medical and graduate students and advanced undergraduates. Advanced courses are open to students who have completed this basic course.

UNDERGRADUATE COURSES IN NEUROBIOLOGY

NBIO 101. Social and Ethical Issues in the Neurosciences
(Same as NBIO 201.) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Hurlbut, W; Newsome, W)

NBIO 198. Directed Reading in Neurobiology
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NBIO 199. Undergraduate Research
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN NEUROBIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

NBIO 201. Social and Ethical Issues in the Neurosciences
(Same as NBIO 101.) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Hurlbut, W; Newsome, W)

NBIO 206. The Nervous System
Structure and function, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

7-8 units, Win (Dolmetsch, R)

NBIO 216. Genetic Analysis of Behavior
(Same as MCP 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, Spr (Goodman, M)

NBIO 218. Neural Basis of Behavior
Advanced seminar. The principles of information processing in the nervous system and the relationship of functional properties of neural systems with perception, behavior, and learning. Original papers; student presentations. Prerequisite: 206 or consent of instructor.

4 units, alternate years, not given this year

NBIO 220. Central Mechanisms in Vision-based Cognition
Contemporary visual neuroscience, emphasizing the neural mechanisms underlying primate vision and visually guided behavior. Seven foundational topics in visual neuroscience; current papers concerning each topic. Student presentations. Computer-based demonstration exercises.

2-4 units, Spr (Newsome, W; Moore, T), alternate years, not given next year

NBIO 221. Frontiers in Translational Medicine
Small group course for first year MSTP and Master's in Medicine students only. Focus is on pathways for combining science and medicine during graduate and postdoctoral training and in one's career, and practical aspects of translational medicine. Guest lecturers are physician-scientists who have advanced the frontiers of translational medicine. Previous lecturers have included Drs. Gilbert Chu, Jamie Topper, Irv Weissman, Beverly Mitchell, Geoff Duyk, William Mobley, Judy Shizuru, and David Cox. Prerequisite: consent of instructor.

1 unit, Spr (Barres, B)

NBIO 222. Imaging: Biological Light Microscopy
(Same as BIO 152, MCP 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core.

3 units, alternate years, not given this year

NBIO 227. Understanding Techniques in Neuroscience
Techniques commonly used in the field of neuroscience, including molecular/genetic, electrophysiological, and whole brain imaging. Presentations by senior graduate students and examples from the literature. Optional laboratory demonstrations.

2 units, Aut (Carter, M; Villeda, S; Clark, K)

NBIO 228. Mathematical Tools for Neuroscience
Student-instructed. For students with no math background beyond basic calculus, or as a review for more advanced students. Techniques useful for analysis of neural data including linear algebra, Fourier transforms, probability and statistics, signal detection, Bayesian inference, and information theory.

1-3 units, Spr (Corrado, G)

NBIO 254. Molecular and Cellular Neurobiology
(Same as BIO 154, BIO 254.) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biology core or equivalent, or consent of instructors.

4-5 units, Aut (Luo, L; Shen, K; Clandinin, T), alternate years, not given next year

NBIO 258. Information and Signaling Mechanisms in Neurons and Circuits
(Same as MCP 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, alternate years, not given this year

NBIO 299. Directed Reading in Neurobiology
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NBIO 300. Professional Development and Integrity in Neuroscience
Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.

1-2 units, Aut (Moore, T), Win (Moore, T), Spr (Moore, T)

NBIO 399. Graduate Research
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NEUROLOGY AND NEUROLOGICAL SCIENCES (NENS) COURSES

UNDERGRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

NENS 67N. Intracellular Trafficking and Neurodegeneration
Stanford Introductory Seminar. Preference to freshmen. Cell structures and functions, the intracellular trafficking system that maintains exchanges of materials and information inside cells, and clinical features and pathologies of neurodegenerative diseases. Techniques for examining cellular and subcellular structures, especially cytoskeletons; functional insights generated from structural explorations. Prerequisite: high school biology.
3 units, Spr (Yang, Y)

NENS 199. Undergraduate Research
Students undertake research sponsored by an individual faculty member. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

NENS 202. Longevity
(Same as PSYCH 102.) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.
3 units, Win (Rando, T; Carstensen, L)

NENS 205. Neurobiology of Disease Seminar
Case demonstrations of selected disorders, discussion of the pathophysiological basis of the disorder, presentation of the basic principles underlying modern diagnostic and therapeutic management, and a discussion of recent research advances for each disease entity. Prerequisite: Neurobiology 206 or consent of instructor.
2 units, Win (Yang, Y; Mobley, W; Reimer, R), alternate years, not given next year

NENS 206. Introduction to Neurology Seminar
Exploration of aspects of neurology, including subspecialties. Current issues, clinical cases, and opportunities in the field.
1 unit, Spr (Barreto-Chang, O; Reimer, R)

NENS 220. Computational Neuroscience
Computational approaches to neuroscience applied at levels ranging from neurons to networks. How do neurons compute? How do networks of neurons encode/decode and store information? Focus is on biophysical (Hodgkin-Huxley) models of neurons and circuits, with emphasis on application of commonly available modeling tools (NEURON, MATLAB) to issues of neuronal and network excitability. Issues relevant to neural encoding and decoding, information theory, plasticity, and learning. Final project. Prerequisite: NBIO 206; undergraduates require consent of instructor.. Recommended: facility with linear algebra and calculus recommended.
4 units, not given this year

NENS 221. Current Issues in Aging
(Same as DBIO 221, GENE 221.) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.
2 units, Spr (Kim, S; Brunet, A; Rando, T)

NENS 267. Molecular Mechanisms of Neurodegenerative Disease
(Same as BIO 267.) The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.
4 units, not given this year

NENS 299. Directed Reading in Neurology and Neurological Science
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NENS 399. Graduate Research
Students undertake research sponsored by individual faculty members. Includes laboratory work in neurophysiology and neurochemistry.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NEUROSCIENCES PROGRAM (NEPR) COURSES

For information on graduate programs in the Neurosciences Program, see the "Neurosciences" section of this bulletin. Course and laboratory instruction in the Neurosciences Program conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

GRADUATE COURSES IN NEUROSCIENCES PROGRAM

Primarily for graduate students; undergraduates may enroll with consent of instructor.

NEPR 299. Directed Reading in Neurosciences
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NEPR 399. Graduate Research
StudenInvestigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

NEUROSURGERY (NSUR) COURSES

For information on graduate programs in Neurosurgery, see the "Neurosurgery" section of this bulletin.

UNDERGRADUATE COURSES IN NEUROSURGERY

NSUR 70Q. Experimental Stroke
(F,Dial) Stanford Introductory Seminar. Preference to sophomores. How stroke is studied in the laboratory; advances in stroke research over the last two decades; and future directions. Topics include: cellular and molecular mechanisms of neuronal death and survival in the brain after stroke, including necrosis, apoptosis, inflammation, and cell signaling pathways; experimental tools for stroke treatment, such as gene therapy, cell therapy, hypothermia, preconditioning, postconditioning, and other pharmacological treatments; the gap and barrier between laboratory research and clinical translation.
2 units, Win (Zhao, H)

NSUR 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN NEUROSURGERY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

NSUR 261. Principles and Practice of Stem Cell Engineering
(Same as BIOE 261.) Quantitative models used to characterize incorporation of new cells into existing tissues emphasizing pluripotent cells such as embryonic and neural stem cells. Molecular methods to control stem cell decisions to self-renew, differentiate, die, or become quiescent. Practical, industrial, and ethical aspects of stem cell technology application. Final projects: team-reviewed grants and business proposals.
3 units, Aut (Deisseroth, K; Palmer, T)

NSUR 278A. From Science to Business: Innovation in Neurologic Disease Beyond Neurosurgery
For medical, business, and engineering students. The process of innovation and company building in the medical field, emphasizing the neurosciences. Overview of neurological diseases; business and regulatory aspects of device and biotech product development. Guest speakers on healthcare entrepreneurship. Venture capital and entrepreneurial mentors guide interdisciplinary student teams in evaluating a solution to an unmet clinical need or a project within a biotech company. May be taken for 2 units without the team project.
2-4 units, alternate years, not given this year

NSUR 278B. Independent Study on Healthcare Innovation and Entrepreneurship
Continuation of NSUR 278A for students wishing to work on actual strategy and implementation of their idea developed in 278A or, more generally, for students who wish to develop a strategic plan for a specific healthcare (drug or device) venture.
2-4 units, Aut, Win, Spr (Kallmeyer, V; Steinberg, G), Sum (Kallmeyer, V)

NSUR 279. Concepts in Drug Delivery and Drug Device Combinations
Open to all graduate students. Issues relating to drug-device combination products, including review of recently approved products such as cardiac stent), and development, regulatory, and reimbursement issues. Emphasis is on market evaluation, product development, and regulatory strategies. Lecture only for 2 units; project for 4 units.
2-4 units, Win (Kallmeyer, V), alternate years, not given next year

NSUR 299. Directed Reading in Neurosurgery
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OBSTETRICS AND GYNECOLOGY (OBGYN) COURSES

For information on graduate programs in Obstetrics and Gynecology, see the "Obstetrics and Gynecology" section of this bulletin.

UNDERGRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY

OBGYN 78Q. Darwin's Evolution and Genomic Revolution
Preference to sophomores. Topics include evolution based on fossil and genetic evidence, mechanisms of natural selection, the impact of genomic revolution on the study of gene evolution, new gene discovery, human-accelerated selection, Darwinian medicine, and the social implications of evolution.
3 units, not given this year

OBGYN 199. Undergraduate Research in Reproductive Biology
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

OBGYN 202. Assisted Reproductive Technologies
(Same as DBIO 202.) Primary and current literature in basic and clinical science aspects of assisted reproductive technologies (ART), and demonstrations of current ART techniques including in vitro fertilization and embryo culture, and micromanipulation procedures such as intracytoplasmic sperm injection and embryo biopsy and cryopreservation.Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Recommended: DBIO 201, or consent of instructors.
1-3 units, Win (Porzig, E; Behr, B)

OBGYN 256. Current Controversies in Women's Health
(Same as HUMBIO 125, INDE 256.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.
3 units, Spr (Jacobson, M; Stefanick, M)

OBGYN 399. Graduate Research - Reproductive Biology
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

ORTHOPEDIC SURGERY (ORTHO) COURSES

UNDERGRADUATE COURSES IN ORTHOPEDIC SURGERY

ORTHO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine
(S,Sem Same as HUMBIO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.
3 units, Aut (Matheson, G), Spr (Matheson, G)

ORTHO 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN ORTHOPEDIC SURGERY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

ORTHO 222. Anatomy of Movement
Perspectives include orthopedic surgery, neurology, mechanical engineering, computer science, anthropology, and art. Anatomy and pathology affecting the human locomotor system. Normal function and functional deficit from disease or injury. Engineering dilemmas that assist or emulate human movement, such as design of an artificial joint or simulation of tendon transfers for nerve palsy. The expression of human movement in art masterpieces and photography. The evolution of the hand as it became an instrument of purpose. Student team projects. Lecture only for 2 units; project for 4 units.
2-4 units, Win (Ladd, A; Rose, J)

ORTHO 260. Tissue Engineering
Biological principles underlying the use of engineering strategies and biocompatible materials for tissue repair and regeneration. Structure, physiology, and mechanics of articular cartilage, bone, and dense soft connective tissues. Current ideas, approaches, and applications being implemented as therapeutic regimens for arthritis, spinal deformities, and limb salvage. Multidisciplinary constraints on the design and creation of tissue constructs. Prerequisite: familiarity with basic cell and molecular mechanisms underlying tissue differentiation.
3 units, Win (Smith, R)

OVERSEAS STUDIES SPECIAL PROGRAMS (OSPGEN) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS SEMINARS

These three-week, faculty-led seminars are offered prior to the beginning of Autumn Quarter. Locations are announced in December and applications are taken in January for the following academic year.

OSPGEN 80. Changing Face of the World: Cultural, Scientific, Medical and Social Aspects of Craniofacial Biology
Field trips to London's Darwin Center to examine his work on the evolution of facial architecture, and Guy's Hospital and museum. Students work with Changing Faces, a charity seeking to change views of disfigurement. Field trips to Paris' cranialfacial biologist Nicole Le Douarin and her institute, and to museums to examine artists' views of the face. Facial transplants and ethical considerations.
2 units, Aut (Helms, J)

OSPGEN 81. Shakespeare and Friends: Adventures in England's Theater Scene
Immersion in England's theater scene. Students attend shows in London and Stratford. Under the guidance of Nona Shepphard of the Royal Academy of Dramatic Arts, students produce a short excerpt from a Shakespeare play for performance at the end of the seminar.
2 units, Aut (Friedlander, L)

OSPGEN 82. Education, Health Care, and Development in Emerging China
Current status of education and health care systems in China. Contrast education and health care systems prior to recent reforms with those of today. Major problems and ongoing solutions put forth by the central government. Field trips to rural and urban educational and health institutions; local guest speakers; interaction with students at Renmin University in Beijing. Students work in groups to propose reforms of China's education and health care delivery systems.
2 units, Aut (Rozelle, S; Atlas, S)

OSPGEN 83. Gandhi and His Legacy: Nonviolence in India, the U.S., and the World
Gandhi's life, thought, and legacy in settings where he lived and struggled, including the sites of his assassination and cremation, Sevagram Ashram, Gandhi's home base for twelve years, and Kolkata, site of one of his fasts. Connections between Gandhi and Martin Luther King. Guest speakers include academics and social activists, and may include his grandson, Gopalkrishna Gandhi.
2 units, Aut (Carson, C; Hess, L)

OSPGEN 84. Natural History and Behavioral and Evolutionary Ecology
Natural history, biodiversity, and ecology of a species-rich tropical dry forest in Western Mexico. Focus on plant/insect interactions, as representing the architecture of biodiversity.Questions in ecology, evolution, behavior, and conservation biology, in this ecosystem. Students work at the Chamela Tropical Research Station, a fully-equipped field research facility administered by the National University of Mexico (UNAM). Hands-on research experience and methods of scientific research.
2 units, Aut (Gordon, D; Dirzo, R)

OSPGEN 85. Project Finance, Urban Development, and Construction in the Middle East
Conditions and processes for the sustainable development of Doha and Qatar. Topics include: history and economy; existing and planned infrastructure, and its sustainable development and operation; ongoing commercial and institutional developments; 4D modeling; scoping, phasing, and analysis of development projects; regional competitiveness analysis; development risk identification and assessment; assessment of social, political, and financial sustainability. Small groups develop a proposal, plan, and presentation for the development of a large-scale project.
2 units, Aut (Fischer, M; Orr, R)

OSPGEN 86. St. Petersburg and Beyond
Unique role of St. Petersburg in Russian cultural history. History, architecture, art, city planning, literature, music, ballet, and politics. Prerequisite: ARTHIST 107A.
2 units, Aut (Kollmann, N; Kollmann, J)

OSPGEN 87. Thailand: Education, Development, and Globalization
Instructors team with the faculties of Education, Engineering, and Science at Chulalongkorn University in Bangkok. Visits to other educational institutions, offices of international organizations, and historical sites in Bangkok, and schools and rural villages outside of the capital.
2 units, Aut (Antonio, A; Wotipka, C)

OSPGEN 88. The Bloomsbury Group
The 20th-century literary and intellectual concentration of individuals in Britain. Readings include Virginia Woolf and E.M. Forster. Students select a member of the group for individual concentration. Meetings in King's College, Cambridge, where the Bloomsbury Group originated, with visits to sites associated with the group in London and Sussex.
2 units, Aut (Stansky, P)

OSPGEN 89. Tibetan Buddhism in Bhutan and Gross National Happiness
Function of Buddhism in the social, political, and economic development of the Kingdom of Bhutan; the national development theory, Gross National Happiness, and its roots in Buddhism.
2 units, Aut (Mancall, M; Watkins, G)

OVERSEAS STUDIES: AUSTRALIA (OSPAUSTL) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems
Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biology major. GER:DB-EngrAppSci
3 units, Aut (Hoegh-Guldberg, O; Ward, S; Arrigo, K)

OSPAUSTL 20. Coastal Resource Management
Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how those are defined; features of the

human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biology major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R)

OSPAUSTL 30. Coastal Forest Ecosystems

Prehistory of Australian rainforest and how rainforest structure and biodiversity change with altitude, latitude, and geology. Tropical coastal marine wetlands, mangrove forests, and the relationship between land- and sea-based biota. Biology and ecology of marine plants, mangroves, and tropical salt marsh. Introduction to specialized fields of marine plant biology and ecology including biogeography and evolution, aquatic plant ecophysiology, water quality and bioindicator techniques, pollution and eutrophication, and environmental control of marine plant distribution and productivity. Two units only counted for Biology major. GER:DB-EngrAppSci

3 units, Aut (Hall, J)

OSPAUSTL 40. Australian Studies

Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips. GER:DB-SocSci, EC-GlobalCom

3 units, Aut (Lilley, I)

OSPAUSTL 50. Targeted Research Project

Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Staff)

OVERSEAS STUDIES: BEIJING (OSPBEIJ) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN BEIJING

OSPBEIJ 3C. First-Year Modern Chinese

5 units, Spr (Staff)

OSPBEIJ 9. Chinese Language Tutorial

2 units, Aut (Staff), Spr (Staff)

OSPBEIJ 11. Chinese Society in the Post-Mao Era

The rapid changes that have transformed urban and rural China since the early 80s. Topics: agricultural reform, migration and unemployment, poverty and wealth, inequality, the new middle class and business elite, and social conflict. Research paper on one of these topics. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Walder, A)

OSPBEIJ 19. Population and Society in East Asia

Current demographic situation, and country differences. Emphasis is on China; attention to Japan and S. Korea. Relationship between social change and demographic change in the past. Factors influencing and influenced by fertility, mortality, and migration. Fertility control, the aging process, old age care, and migration. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Zhou, Y)

OSPBEIJ 21C. Second-Year Modern Chinese

5 units, Aut (Staff)

OSPBEIJ 23C. Second-Year Modern Chinese

5 units, Spr (Staff)

OSPBEIJ 24. China's Economic Development

Historical stages, economic and political rationale, and effectiveness of the economic policies and institutional changes that have shaped China's economic emergence. China as case study for understanding how institutions and institutional change affect economic and social development. Guest speakers; field study; trip to rural areas. GER:DB-SocSci

5 units, Spr (Rozelle, S)

OSPBEIJ 27. Topics in China's Development

Independent study in one of: finding balance between growth and the environment; finding balance between urban and rural; finding balance between incentives in work and social welfare; China's elections at the grassroots; China's education system; or China's health system.

2-4 units, Spr (Rozelle, S)

OSPBEIJ 41. Chinese Society and Business Culture

Key features of Chinese society and their applications to Chinese business culture from a sociological perspective. Structural differences between Chinese and U.S. societies and their social, economic, and cultural implications. Emerging patterns in areas such as retailing and consumer behaviors, work relations and management, and business negotiation and collaboration. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Li, B)

OSPBEIJ 42. Chinese Media Studies

Fundamental changes in Chinese media. Issues such as: how Chinese media emerge and evolve against the background of modern Chinese history; how they interact with government, sponsors, receivers, and other social institutions; and implications for Chinese social development. GER:DB-SocSci

4 units, Aut (Li, K)

OSPBEIJ 43. Constitutional and Legal Reforms in Contemporary China

Key issues of legal reform toward civil society and the rule of law in China. Basic framework of China's society, political structure, individual rights, and regulatory process. Case studies. Comparison to corresponding systems in U.S. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Wang, X)

OSPBEIJ 46. Introduction to Chinese Economy

Major aspects of Chinese economy and challenges it faces. Topics: historical background; transition to market economy; issues associated with the transition process. Cultural, political, and institutional environment from a historical perspective. Economic theory and empirical analysis applied to explain economic phenomena in China. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Chen, D)

OSPBEIJ 47. Institutional Change in Reform China

Process and content of institutional change and its consequences in China since 1978. Key variables that explain the course of China's reforms. Isues: key political actors; role of the central state and its agents; incentives motivating responses to reforms; winners and losers in the different reforms; new problems emerging as a consequence of piecemeal reform. Recommended: basic knowledge of government and politics of post-1949 China. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Oi, J)

OSPBEIJ 66. Essentials of China's Criminal Justice System

Criminal laws and cases. Topics include criminal legal thinking, liability, prosecution and defense in criminal litigation, death penalty debates, evidence and compulsory measures, and the Chinese prison system. Comparisons with other systems. Human rights protection. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Wang, S)

OSPBEIJ 101C. Third-Year Modern Chinese

5 units, Aut (Staff)

OSPBEIJ 103C. Third-Year Modern Chinese

5 units, Spr (Staff)

OSPBEIJ 211C. Fourth-Year Modern Chinese

5 units, Aut (Staff)

OVERSEAS STUDIES: BERLIN (OSPBER) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN BERLIN

OSPBER 1Z. Accelerated German: First and Second Quarters
A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.
8 units. Aut (Splettstoesser, J; Wohlfeil, J), Win (Splettstoesser, J; Wohlfeil, J)

OSPBER 2Z. Accelerated German, Second and Third Quarters
Qualifies students for participation in an internship following the study quarter. Emphasis is on communicative patterns in everyday life and in the German work environment, including preparation for interviews.
8 units, Spr (Wohlfeil, J)

OSPBER 12. The Politics of Memory
Politics of memorializing WW II focusing on Berlin. How the memory of WW II and its representation became constitutive to the self-consciousness of democratic culture in Germany. What constitutes the nature of collective memory; who has the authority to represent the war; the function of the memorial in public consciousness; and limits of representation of terror or genocide. Theoretical literature on politics of memory. Field trips to memorials. GER:DB-SocSci, EC-GlobalCom
3 units, Win (Fonrobert, C)

OSPBER 13. Jewish and Muslim Berlin: The City and its Religious Minorities
History of Jewish life in Berlin leading up to WW II, focusing on moments of literary and cultural creativity: the Jewish Enlightenment in Berlin; forms of protest against bourgeois German-Jewish culture; and literary, artistic, and political productivity of the interwar period. Cultural relationship between Germans and Jews. These historical dynamics as background to current discussion about the place of Islam and Muslim culture in contemporary Germany and Berlin. Site visits in Berlin. GER:DB-SocSci, EC-GlobalCom
3 units, Win (Fonrobert, C)

OSPBER 15. Shifting Alliances? The European Union and the U.S.
The development of European integration, a model for global security and peace, and a possible replacement for the U.S. position as unilateral superpower. Competing arguments about the state of transatlantic relations. GER:DB-SocSci, EC-GlobalCom
4-5 units, Win (Brueckner, U)

OSPBER 17. Split Images: A Century of Cinema
20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including *Run Lola Run* and *Goodbye Lenin*. Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image. GER:DB-Hum, EC-GlobalCom
4 units, Win (Kramer, K)

OSPBER 21B. Intermediate German
Grammar review, vocabulary building, writing, and discussion of German culture, literature, and film. Corequisite: OSPBER 100B.
5 units, Aut (Friesel, D), Win (Friesel, D), Spr (Friesel, D)

OSPBER 30. Berlin vor Ort: A Field Trip Module
The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin's cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp.
1 unit, Aut (Ebeling, K), Win (Ebeling, K), Spr (Ebeling, K)

OSPBER 38. Research Module
For continuing students. Research under the guidance of a local specialist in libraries, archives, research institutes, and/or in the field. Prerequisite: GERGEN 177A. (Kramer)
3-4 units, Win (Staff), Spr (Staff)

OSPBER 40B. Introductory Electronics
GER:DB-EngrAppSci
5 units, Aut (Howe, R), Win (Howe, R), Spr (Wong, S)

OSPBER 47. Ethics in Medicine and Everyday Life
Ethical conflicts in relation to life situations. Moral questions in the conduct of science. Collaboration of physicians and academics with Nazi medical experiments; Milgram's experiments on obedience; Stanford's prison experiments; misleading marketing strategies used by the tobacco industry; ethics of placebo controlled clinical trials; decisions related to stem cell research and reproductive technologies. GER:EC-EthicReas
4 units, Aut (Casper, R)

OSPBER 48. Topics in Medicine and Ethics
Independent study with weekly meetings. Topics: comparative analysis of legislation of human fertilization and embryology in the U.S. and UK; history and structure of the health care systems in Germany, Canada, and the U.S.; lives of admirable precepts but dubious practice such as Seneca, the Stoics, and Rousseau; promise and pitfalls of genetically modified plant and animal food. Do ethnic, national, and professional stereotypes serve a function? Primarily in English, but some topics might require German.
2-4 units, Aut (Casper, R)

OSPBER 50B. Introductory Science of Materials
GER:DB-EngrAppSci
4 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPBER 52. European Modernism in Art
French and German modernist artists such as Cezanne, Van Gogh, Kirchner, and Kandinsky in the period of early modernist art. Cubism, Dadaism, Surrealism, and the German period Neue Sachlichkeit. Why modernism took certain directions in these countries, how the social and political circumstances in these areas impacted the arts, and how artists acted and reacted in these sociopolitical environments. GER:DB-Hum
4 units, Spr (Barton, B)

OSPBER 53. The Brothers Grimm and their Fairy Tales
Cultural context for collection of these fairy tales. Questions related to sources of the tales; reception of tales in different cultures and at different times; values represented by the tales; service to interests of German states in the present and past. Theoretical perspectives such as feminist and psychoanalytic. In German. GER:DB-Hum
4 units, Spr (Robinson, O)

OSPBER 55. Filmed Experience: Berlin at Eye-Level
Screenings of films made in Berlin to develop awareness of the practical side of filmmaking: narration; camera angles; editing. Writing exercises (reviews, analysis of storyline, characters). Individual student projects: writing of film treatment or production of short video. GER:DB-Hum
5 units, Spr (Maerker, C)

OSPBER 56. A Laboratory of Modernity: Concert and Concerto in 19th-Century Germany
How the emerging institution of the concert and the musical genre of the concerto produced and mirrored identities of the rising bourgeoisie in 19th-century Germany: discourses about the value and idea of the concert; aspects of the performance; the music and its perception. The development of the genre of the concerto through live performances in Berlin concert halls. No musical reading skills required. GER:DB-Hum
4 units, Win (Bork, C)

OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin
Diversity of Berlin's architecture and urban design resulting from its historical background. Architect Ludwig Mies van der Rohe and his artistic ancestors. Role of the cultural exchange between Germany and the U.S. Changing nature of the city from the 19th century to the present. GER:DB-Hum
4-5 units, Aut (Pabsch, M)

OSPBER 62. Shades of Green: Environmental Policy in Germany and the U.S. in Historical Perspective
How political institutions, political culture, and economic structure influence domestic and foreign environmental policies across countries in areas such as climate change, urbanization, and management of finite resources. Impact on cooperative solutions between countries with focus on Germany and the U.S. GER:DB-SocSci

5 units, Spr (Tempel, S)

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture
German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of *Körperkultur, Leistung, Show, Verein,* and *Haltung*. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts.

3 units, Win (Junghanns, W)

OSPBER 70. The Long Way to the West: German History from the 18th Century to the Present
Battles still current within Germany's collective memory. Sources include the narrative resources of museums, and experts on the German history in Berlin and Potsdam. Field trips. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Jander, M)

OSPBER 100B. Aktives Deutsch
Required for students enrolled in GERLANG 3B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.

2 units, Aut (Friesel, D), Win (Friesel, D), Spr (Strube, F)

OSPBER 101A. Contemporary Theater
Texts of plays supplemented by theoretical texts or reviews. Weekly theater visits, a tour of backstage facilities, and discussions with actors, directors, or other theater professionals. In German. GER:DB-Hum

5 units, Spr (Kramer, K)

OSPBER 101B. Advanced German
For intermediate and advanced students. Focus is on Berlin through film, literature, music, live performance, news media, and field trips. Essay writing, vocabulary building, and in-class presentations. Reading literature and news stories, essay writing, vocabulary building, and in-class presentations.

5 units, Aut (Biege, M), Win (Biege, M), Spr (Biege, M)

OSPBER 115X. The German Economy: Past and Present
The history of the German economy in the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and current challenges faced by united Germany. GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (Klein, I)

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU
The institutional architecture of the EU and its current agenda. Weaknesses, strengths, and relations with partners and neighbors. Discussions with European students. Field trips; guest speakers. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Brueckner, U)

OSPBER 161X. The German Economy in the Age of Globalization
Germany's role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of German economic and environmental policies. The globalization of the world's economy and Germany's competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Klein, I)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective
Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender

5 units, Spr (Junghanns, W)

OSPBER 177A. Culture and Politics in Modern Germany
Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:DB-SocSci, EC-Gender

4-5 units, Aut (Kramer, K)

OVERSEAS STUDIES: FLORENCE (OSPFLOR) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN FLORENCE

OSPFLOR 18. Centro Linguistico
Opportunities to improve Italian language skills through activities at the Centro Linguistico including workshops, guided discussions, and meetings with Italian students. May be repeated for credit. (AU)

1 unit, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

OSPFLOR 21F. Second-Year Italian, First Quarter
Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.

4 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

OSPFLOR 22F. Second-Year Italian, Second Quarter
Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.

4 units, Win (Quercioli, F)

OSPFLOR 31F. Advanced Italian Conversation
Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor.

4 units, Aut (Quercioli, F), Spr (Quercioli, F)

OSPFLOR 32. Service Learning in Italian
Oral and linguistic skills and increased cultural awareness through service to a local social work organization. Issues of contemporary Italian social change. Organizations include Caritas diocesana, Communita de S. Egidio, and Progetto Arcobaleno.

4 units, Win (Quercioli, F)

OSPFLOR 33. The Americanization of Italy
How cultural and social patterns from the U.S. shape everyday life in contemporary Italy. Popular culture and consumer culture as vehicles of penetration; role of supermarkets, malls, and new patterns of consumption. Are American models accepted or changed according to Italian culture? How global and local interact in this cultural encounter. GER:DB-SocSci

4 units, Spr (Scarpellini, E)

OSPFLOR 34. The Woman in Florentine Art
Influence and position of women in the history of Florence as revealed in its art. Sculptural, pictorial, and architectural sources from a social, historical, and art historical point of view. Themes: the virgin mother (middle ages); the goddess of beauty (Botticelli to mannerism); the grand duchess (late Renaissance, Baroque); the lady, the woman (19th-20th centuries). GER:DB-Hum, EC-Gender
4 units, Aut (Verdon, T)

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice
The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. Limited enrollment.
3-5 units, Aut (Rossi, F)

OSPFLOR 42. Academic Internship
Mentored internships in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. May be repeated for credit.
1-5 units, Win (Campani, E), Spr (Campani, E)

OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought
Galileo's life and scientific progress starting from his student years at the University of Pisa. Departure from traditional natural philosophy leading to radical reformation of cosmology and physics, emphasizing the science of motion. His innovative use of observation and measurement instruments, emphasizing the telescope. Cultural and social context. GER:DB-Hum
5 units, Win (Galluzzi, P)

OSPFLOR 46. International Monetary Economics
Balance of payments and exchange rates from theoretical and institutional point of views; relationships that operate in international exchange rate and financial markets, including interaction in standard models linking exchange rates with fundamental macroeconomic variables; and consequences of capital liberalization process of last twenty years, including institutional innovations such as the EMU and the Euro and empirical challenges of recent financial upheavals in Asia and Latin America. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Cifarelli, G)

OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition
The city's art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum
4 units, Win (Rossi, F; Verdon, T)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum
5 units, Win (Campani, E)

OSPFLOR 50F. Introductory Science of Materials
GER:DB-EngrAppSci
4 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPFLOR 54. High Renaissance and Maniera
The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra' Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early maniera: Pontormo and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum
5 units, Spr (Verdon, T)

OSPFLOR 55. Academy of Fine Arts: Studio Art
Courses through the Academia delle Belle Arti. Details upon arrival. Minimum Autumn and Winter Quarter enrollment required; 1-3 units in Autumn. May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPFLOR 56. University of Florence Courses
1-5 units, Aut (Campani, E), Win (Campani, E), Spr (Campani, E)

OSPFLOR 58. Space as History: Urban Change and Social Vision in Florence 1059-2008
A thousand years of intentional change in Florence. Phases include programmatic enlargement of ecclesiastical structures begun in the 11th century; aggressive expansion of religious and civic space in the 13th and 14th centuries; aggrandizement of private and public buildings in the 15th century; transformation of Florence into a princely capital from the 16th through the 18th centuries; traumatic remaking of the city's historic core in the 19th century; and development of new residential areas on the outskirts and in neighboring towns in the 20th and 21st centuries. GER:DB-Hum
4 units, Spr (Rossi, F; Verdon, T)

OSPFLOR 60. North/South in Contemporary Italy
Italian unification between north and south: economic, social, cultural, and linguistic. History of conflict between north and south from the Risorgimento to the present, with a focus on prose fiction and film. GER:DB-Hum
4 units, Win (Springer, C)

OSPFLOR 61. Europe and U.S. Foreign Policy
Relationship between Europe and U.S. foreign policy, with an emphasis on developments since 1990. Sources of conflict and cooperation in this relationship. Topics include: U.S.-European defense cooperation; role of Europe in American decisions to use force; European responses to U.S. power, especially since 9/11 and the Iraq war; sources and consequences of anti-Americanism in European publics; and the effects of U.S. foreign policy on European integration. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Schultz, K)

OSPFLOR 62. Resistance: 1943-45
Texts from the immediate postwar period to the present day documenting or re-imagining the partisan resistance. Novels, poems, songs, letters, diaries, and films. Visit to village of Sant' Anna di Stazzema GER:DB-Hum
4 units, Win (Springer, C)

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image
Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender
4 units, Spr (Campani, E)

OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future
Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. Limited enrollment.
3-5 units, Spr (Rossi, F)

OSPFLOR 73. On the Way to Fascism
Intellectual construction of Fascism through some focal novels, political essays and films. Novels by Gabrielle D'Annunzio, F.T. Marinetti, Curzio Malaparte, Emilio Lussu; Mussolini's political speeches; and Ezra Pound's notorious radio broadcasts. Giovanne Pastrone's 1914 film Cabiria and Bernardo Bertolucci's 1976 film Novecento. GER:DB-Hum
4 units, Spr (Resina, J)

OSPFLOR 74. Italy in the Foreign Imaginary
How Italy became in the 18th and 19th centuries the symbol of a decadent world where the vestiges of ancient civilization offered

insight into Western identity and a counterpoint to modernity. Addison's Remarks on Several Parts of Italy, Goethe's Italian Travels, Stendhal's Rome, Naples, and Florence, Washington Irving's Tales of a Traveler, Henry James' The Aspern Papers, Thomas Mann's Death in Venice, and texts by Freud, Benjamin, and Pound. Theories of tourism and the anthropology of travel. GER:DB-Hum

4 units, Spr (Resina, J)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union

Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Morlino, L)

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon

Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Allam, K)

OSPFLOR 94. Photography in Florence

Introduction to the functioning of the camera, exposure, and b/w film processing and printing. Emphasis is on perceptive imagery and the development of technical proficiency. 35mm camera required. Limited enrollment.

4 units, Win (Loverme, C)

OSPFLOR 97. Human Rights, Justice and Terrorism: Is the World Community Prepared to Prevent a Catastrophe?

Roosevelt's four freedoms, problematic notions of human rights, concept of fair trial, the U.S. Supreme Court decision on Guantanamo detainees, current international protection against torture and rape. Is current international protection satisfactory? Did victors' justice at Nuremberg serve any purpose? Is a jury necessary to establish guilt or innocence? What is genocide? How should post-conflict situations be handled? Why is the U.S. opposing the International Criminal Court? GER:DB-SocSci, EC-EthicReas

4 units, Spr (Vierucci, L)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society

Italian history from the Risorgimento to the present. Society, crises, evolution, values, and the relation to the political institution in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy's predominant subcultures: Catholic and Socialist. In Italian. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Mammarella, G)

OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence

Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum

4 units, Win (Verdon, T)

OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization

The history, history of art, and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Common meaning and ideological differences between the religious and civic symbols of Florence's history from the time of Giotto and the first Guelf republic to Bronzino and Giovanni da Bologna and the Grand Duchy. GER:DB-Hum

4 units, Aut (Verdon, T)

OSPFLOR 134F. Modernist Italian Cinema

As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema's archaeology in futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Marinetti, Pirandello, D'Annuzio). GER:DB-Hum

5 units, Aut (Campani, E)

OVERSEAS STUDIES: KYOTO—SCTI (OSPKYOTO) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN KYOTO—SCTI

OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B

5 units, Spr (Staff)

OSPKYOTO 17K. Second-Year Japanese Language, Culture, and Communication B

5 units, Spr (Staff)

OSPKYOTO 17R. Religion and Japanese Culture

Major religious traditions of Japan. Topics include: relation between religion and culture; ancient Japanese religion and Shinto; Buddhist schools of Heian Japan; Zen Buddhism as it flourished in the Kamakura period; Confucianism, as originally conceived in ancient China and as transmitted to Japan in the Edo period in its neo-Confucian form; characteristic modern practices. Field trips to religious centers to observe current religious practices. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Ludvik, C)

OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B

5 units, Spr (Staff)

OSPKYOTO 21. Research Project

Independent research projects on aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.

2-3 units, Spr (Staff)

OSPKYOTO 24. Japan in Contemporary International Affairs

Japanese foreign affairs since the end of the cold war. Evolution of the U.S.-Japan alliance, the rise of China, transformation of the security environment, and historical, strategic, geopolitical, economic, and cultural factors in Japan's new assertiveness in foreign relations. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Horvat, A)

OSPKYOTO 33. Digital Systems II

The design of processor-based digital systems. Instruction sets, addressing modes, data types. Assembly language programming, low-level data structures, introduction to operating systems and compilers. Processor microarchitecture, microprogramming, pipelining. Memory systems and caches. Input/output, interrupts, buses and DMA. System design implementation alternatives, software/hardware tradeoffs. Labs involve the design of processor subsystems and processor-based embedded systems. Prerequisite: 108A, CS 106B.

3-4 units, Spr (Kozyrakis, C)

OSPKYOTO 40K. Introductory Electronics

GER:DB-EngrAppSci

5 units, Spr (Wong, S)

OSPKYOTO 55. Urban Dreams and Nightmares
International fiction from the 20s to the 90s with focus on the metropolis and urban life. Modern cities, urban crowds, and the innovative modes of cognition, perception, and behavior they trigger as literary theme. New techniques to describe the multiplicity of big cities and the transformation of self and community they required. Multicultural patchwork and global connectedness of large cities. Authors include Woolf, Dos Passos, Doblin, Kawabata, Robbe-Grillet, Lispector, Yamashita, Haruki Murakami, and Ryu Murakam. GER:DB-Hum
5 units, Spr (Heise, U)

OSPKYOTO 56. Technology, Ecology, and the Imagination of the future
Scientific and literary visions of the future from the 60s to the present. How visions of the future shape present-day attitudes and policies, and where scientific extrapolations and literary story lines converge or collide. Techniques from literary and cultural analysis to study stories and images about technology and the environment, emphasizing narrative theory, theories of metaphor, and risk theory. Media include Rachel Carson's *Silent Spring,* Al Gore's *An Inconvenient Truth,* and the computer game SimCity. GER:DB-SocSci
5 units, Spr (Heise, U)

OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B
5 units, Spr (Staff)

OSPKYOTO 211K. Upper Advanced Japanese
5 units, Spr (Staff)

OSPKYOTO 215X. The Political Economy of Japan
Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan's postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci
4-5 units, Spr (Hayashi, T)

OVERSEAS STUDIES: MADRID (OSPMADRD) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

UNDERGRADUATE STUDIES IN MADRID

OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia
Russian economic history in the 20th century. Reasons and logic for economic transformation, major components of postcommunist economic transformation doctrine, and results of practical implementation. Mechanisms of economic policy decision making in modern Russia, and patterns of and alternatives in economic development. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Mau, V)

OSPMOSC 72. Space, Politics, and Modernity in Russia
The idea of space as a key to understanding Russian politics and governance, economy, society, and culture. Phenomenology of Russian space: structure, topology, and features, including notions of enormity. Space in its relation to state power; how geography shaped Russian history and politics. Reification of space-state relationship

on levels such as economy, politics and administration, security and social mobility, nationalism and imperialism, culture and language, and habits and ways. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Medvedev, S)

OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration
Analysis of the opportunities and challenges for political, economic, and military cooperation within the Shanghai Cooperation Organization (SCO). Likelihood of SCO's aspirations being realized and the potential of its becoming a political and military counterbalance to the West. Issues related to national security and security perceptions of post-Soviet states and China, their economic and energy ambitions and needs, and the role of external players in the region. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Bratersky, M; Kortunov, S)

OSPMOSC 75. Soviet and Post-Soviet Leaders
The role of the leader in the Soviet and post-Soviet systems, the role of personality and career trajectories in the making of leaders; the impact and legacies of Lenin, Stalin, Khrushchev, Brezhnev, Gorbachev, Yeltsin and Putin in Soviet and post-Soviet political culture. Core readings are biographies of these men. GER:DB-SocSci
5 units, Aut (Weiner, A)

OSPMOSC 76. Soviet History in Present-Day Russian Media
Presentations in the present-day Russian print and broadcast media of key events, such as the 1917 Revolution, the Great Terror, the Second World War, the Thaw, the so-called years of stagnation, and the collapse of the Soviet Union.
3 units, Aut (Weiner, A)

OSPMOSC 77. Russian Cinema: Peaks and Failures
Soviet and post-Soviet film, from art house to blockbuster, and from Oscar and Cannes winners *Burnt by the Sun* and *Russian Arc* to lesser known local productions such as *Bimmer* and *Brother-2*. Overview of contemporary Russian film directors.
5 units, Aut (Staff)

OSPMOSC 111M. Third-Year Russian
5 units, Aut (Filatova, G)

OSPMOSC 177M. Fourth-Year Russian
5 units, Aut (Staff)

OVERSEAS STUDIES: OXFORD (OSPOXFRD) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN OXFORD

OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850
The influence of classicism and the Renaissance. Insights into European art and architecture and the history of Britain from the Tudor era to the Industrial Revolution. Field trips; joint study trips to London and Florence. GER:DB-Hum
4-5 units, Aut (Tyack, G)

OSPOXFRD 17. Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction
Literary and moral value of transgressive sub-genres of the novel; what they reveal about Victorian society's anxiety over prohibited elements in the domestic and public spheres. Sources include gothic and detective novels. GER:DB-Hum
5 units, Spr (Plaskitt, E)

OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
UK and U.S. What should society look like? How should incomes be distributed? How should it be taxed? How much inequality is acceptable? The overlap of economics with practical politics through political philosophy behind the government decisions; how public policy ought to be formulated. Issues include poverty, environmental policy, trade and globalization, and transport. GER:DB-SocSci
4-5 units, Win (McMahon, R)

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective
Introduction to the study of constitutions and constitutional systems of government. The workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the U.S. such as how suspected terrorists should be treated in a time of war. How to think about fundamental constitutional questions. GER:DB-SocSci
4-5 units, Spr (McMahon, R)

OSPOXFRD 35. Modern UK and European Government and Politics
Background of main political systems in Europe and recent developments in European politics. Topics: Blair's constitutional reforms; the consequences of the German reunification; Berlusconi's rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci
4-5 units, Aut (Cappocia, G)

OSPOXFRD 62. Heretics to Headscarves
Issues of religious toleration, diversity, and freedom of conscience, from their modern origins in the wake of the 16th-century Reformation to the current debate over the place of Islam in a highly secularized but historically Christian Britain and Europe. How persecutions and martyrdoms of the 16th and 17th centuries yielded to the tolerationist ethos of the 18th-century Enlightenment. Contemporary European debate over the public display of religious symbols. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Rakove, J)

OSPOXFRD 63. Locke and his Legacy
Locke's life and leading works, emphasizing his political writings as they relate to ideas of resistance, religious toleration, property, and related topics. Focus is not only on what he wrote, but also how and why he wrote it, in an effort to explain the sources of his creativity. How to account biographically for the development of Locke's leading ideas. GER:DB-SocSci
5 units, Win (Rakove, J)

OSPOXFRD 66. Oxford: The Culture of the City
History and culture of cities in Britain from Roman times to the present, with Oxford as a case study. Impact of social and economic change on Oxford's planning and architecture in relation to British urban history. Visits to central and suburban locations to examine physical and social structures of the city and to Roman and Georgian Bath to provide contrast to Oxford. GER:DB-Hum
3 units, Aut (Chance, H), Win (Chance, H)

OSPOXFRD 67. Art in Oxford
Paintings and drawings in the collections of the University and colleges of Oxford and how they relate to key themes and critical approaches in the history of art. Themes include collecting and patronage, the impact of art historical scholarship on collections, drawing and its purposes, changing approaches to Renaissance art, symbolism and realism in 19th-century painting, and romantic and modern landscapes.
3 units, Spr (Chance, H)

OSPOXFRD 70. The History of London
London's physical growth, emphasizing characteristics which set it apart from other capitals, and its economic, social and political development, including the problems of poverty and the inner city, the provision of public services, and the growth of suburbs and public transport. Challenges facing London in modern times. Walking tours, especially less frequented areas. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Tyack, G)

OSPOXFRD 86. Smallpox: Past, Present, and Future
England's role in the history of smallpox: from the introduction of the practice of variolation by Mary Wortley Montagu to Jenner's discovery of the world's first vaccine. Broad view of the virus, focusing on the history, biology, and policy issues. The nature and use of vaccination, smallpox as a model for disease eradication, international health, and the threat of smallpox as a biological

weapon. Visit to Edward Jenner's home in Berkeley and his statue in Hyde Park, London. GER:DB-NatSci, EC-GlobalCom
3 units, Spr (Siegel, R)

OSPOXFRD 88. Evolution of Darwin
Darwin as a lens through which to view society, history, science, and intellectual thought. Facets of Darwin's life and intellectual development, and the subsequent evolution of evolutionary thought to the present. Visits to the Darwin archive in Cambridge, Kew Gardens, the British Museum, Darwin's tomb, and Down House at the time of the 200th anniversary of Darwin's birth and the 150th anniversary of the publication of The Origin of the Species.
3 units, Spr (Siegel, R)

OSPOXFRD 98. Creative Writing Workshop
Selection and combination; poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Limited enrollment based on writing sample.
3 units, Aut (Kidd, H), Win (Kidd, H), Spr (Kidd, H)

OSPOXFRD 116Z. Close Readings in English Literature, 1642-1740
From the Civil War to the middle of the 18th century. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts, and key texts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine's undergraduates. GER:DB-Hum
5 units, Win (Bullard, P)

OSPOXFRD 154Z. Close Readings in English Literature, 1740-1832
Close Readings in English Literature, 1740-1832'Restricted to students majoring in English and related subjects. Taught jointly for Stanford and second-year St. Catherine's undergraduates. Texts beginning with William Collins and Thomas Gray and concluding with John Keats. GER:DB-Hum
5 units, Spr (Crawford, J)

OSPOXFRD 163X. Shakespeare: Critical Commentary
For English majors or minors only. Topics include the use of soliloquy, epilogues, alternation of prose and verse, rhetoric, meta-theatricality. Close reading technique. Taught jointly with students from St. Catherine's College. GER:DB-Hum
5 units, Aut (Rowley, R)

OSPOXFRD 194. Second Oxford Tutorial
For students who want to take a second tutorial during a quarter in the Oxford program. Topics limited to economics, history, literature, philosophy, politics and international relations, and sociology. May be repeated for credit.
5 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPOXFRD 221Y. Art and Society in Britain
Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design. Comparisons between the British experience and that of continental Europe and the U.S. Readings address questions related to the role of art in modern society. GER:DB-Hum
4-5 units, Win (Tyack, G)

OVERSEAS STUDIES: PARIS (OSPPARIS) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN PARIS

OSPPARIS 17. The Paris Art Practicum
Laboratory format to create works of art inspired by the local urban environment. Projects include: sonic scavenger hunts to record Paris' sound ecology as basis for electronic music works; solo and group performance art, and public poetry readings related to and staged throughout the city at idiosyncratic locations; temporary public visual art such as chalk art; bricolage art projects that result in sculpture and two-dimensional visual art constituted by found objects salvaged from the Parisian cityscape. No experience required.
3-4 units, Win (Applebaum, M)

OSPPARIS 18. French in the Working Environment
Preparation for internships in Paris. Understanding cultural differences between the U.S.and France in the business world: formailty/familiarity; written/spoken language; sense of time and space. Vocabulary and jargon specific to French busines world. Resumé writing and interview preparation in French. Official letter writing in French.
1 unit, Aut (Habert, L), Win (Habert, L)

OSPPARIS 21. Contemporary Art in Paris: A Trans-Idiomatic Survey
Current state of the arts in Paris through an examination of its cultural offerings. Visits to concerts, museums, research facilities, and events throughout the city serve as catalysts for critical discussions, an understanding of the manner in which artistic media operate, and a comparison of the expressive parameters in each medium. Current trends in architecture, opera, experimental music, jazz, popular music, painting, sculpture, installation art, photography, film, dance, and cuisine.
3 units, Win (Applebaum, M)

OSPPARIS 22P. Intermediate French I
4 units, Aut (Reychman, P), Win (Mercier, F), Spr (Reychman, P)

OSPPARIS 23P. Intermediate French II
4 units, Aut (Mercier, F), Win (Gourevitch, S), Spr (Habert, L)

OSPPARIS 24. Introduction to French Society
Required of Paris program participants. Engagement with French society through language immersion, volunteer work, projects with French students, encounters with prominent figures, and visits to French political and cultural institutions.
1 unit, Aut (Halevi, E; Molkou, E), Win (Halevi, E; Molkou, E), Spr (Halevi, E; Molkou, E)

OSPPARIS 25. Literature and the City
Subtle and hidden aspects of Paris through the eyes of France's greatest writers, poets, and philosophers including Balzac, Baudelaire, Zola, and Aragon. Essays, poems, and novels that portray the historical, social, and political realty of the city better than textbooks or guides. GER:DB-Hum
4 units, Aut (Guyot, S)

OSPPARIS 28. Performing in French
Students participate in every aspect of theater presentation, including study of texts, scene work, stage management, and acting. Possible-end-of quarter performance in a Parisian theater house. Objectives: explore French theater and texts through dramatic processes; improve French language skills and pronunciation; immersion in a collaborative and bicultural project with French students from other institutions in Paris. No experience required. In French.
3 units, Spr (Poirson, M)

OSPPARIS 33. The Economics of Climate Change: Policies in Theory and Practice in the EU and the U.S.
Economic tools for tackling climate change. Analytical bases of existing cap-and-trade schemes. The European greenhouse gas Emission Trading Scheme within the frame of the Kyoto Protocol, and emerging regulatory or voluntary markets in the U.S. Carbon-pricing mechanisms with focus on power and gas markets. Possibilities of linking carbon pricing mechanisms on both sides of the Atlantic and conditions for integrating these markets into an international post-Kyoto agreement. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (de Perthuis, C; Keppler, J; Leguet, B)

OSPPARIS 40P. Introductory Electronics
GER:DB-EngrAppSci
5 units, Aut (Howe, R), Spr (Wong, S)

OSPPARIS 41. EAP: Perspective, Interior Decorating, Volume, and Design
May be repeated for credit.
2 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPPARIS 42. EAP: Drawing with Live Models
May be repeated for credit.
2 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPPARIS 43. EAP: Painting and Use of Color
May be repeated for credit.
2 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPPARIS 44. EAP: Graphic Art
May be repeated for credit.
2 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPPARIS 50P. Introductory Science of Materials
GER:DB-EngrAppSci
4 units, Aut (Staff), Win (Staff), Spr (Staff)

OSPPARIS 57. Human Rights in Comparative Perspective
Human rights arose from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER:DB-SocSci, EC-GlobalCom
4-5 units, Spr (Boussaguet, L)

OSPPARIS 66. Classical Paris
How modern Paris has been shaped by the classical past. The cultures of Athens and Rome as models for architecture, urban design, literature, art, sport, and the everyday culture of university, cafe, and boulevard. Site visits demonstrate the web of French cultural connections that keep the ancient past alive and include: the Louvre, the Roman baths at Cluny; and the Hippodrome. GER:DB-Hum
3-5 units, Aut (Martin, R)

OSPPARIS 67. Representation of the Domestic in the Louvre
Conceptions and visual representation of the domestic in Greek, Dutch, and French art displayed at the Louvre. Social, cultural, and artistic contexts in which the representation of the domestic was established in 17th-century Holland and its relationship to contemporary French thought. Domestic scenes of Jean-Baptiste-Simeon Chardin as framework for analysis of French culture and civilization of the 18th century. GER:DB-Hum, EC-Gender
3-5 units, Aut (Peponi, A)

OSPPARIS 81. France During the Second World War: Between History and Memory
French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER:DB-SocSci
5 units, Win (Virgili, F)

OSPPARIS 84. Foundations of French Political Culture: the French Revolution
Salient features of French political culture, as they appeared in the efforts of the French Revolution to destroy the absolute monarchy that preceded it. Cultural foundations of the old regime and relationship between claims of absolute monarchy and assumptions of a corporate social order. Evolution of the revolutionary dynamic and the appearance of the Terror. How the experience and memory of the French Revolution have shaped French notions of citizenship, education, national identity and other aspects of contemporary French life.
5 units, Spr (Baker, K)

OSPPARIS 91. Globalization and Its Effect on France and the European Union
Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Le Cacheux, J; Laurent, E)

OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design
The development of Parisian building and architecture from the 17th century to the present. Interaction of tradition and innovation in its transformation and its historical, political, and cultural underpinnings. Visits and case studies throughout Paris illustrate the formation of the city landscape and its culture. GER:DB-Hum
4 units, Spr (Halevi, E)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France
The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l'Ile-de-France was its birthplace. GER:DB-Hum
4 units, Aut (Deremble, C; Deremble, J)

OSPPARIS 120X. French Painting in the 19th Century: Between Tradition and Revolution
Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. GER:DB-Hum
4 units, Win (Halevi, E)

OSPPARIS 122X. Challenges of Integration in the European Union
European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:DB-SocSci
4-5 units, Spr (Strudel, S)

OSPPARIS 124P. Advanced French I
4 units, Aut (Guedon, P)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead
Issues and challenges of European economic construction. The European Economic Union at the end of the 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, its relations with industrial and developing countries, and its challenges in confronting global economic crises. GER:DB-SocSci
5 units, Aut (Le Cacheux, J; Laurent, E)

OSPPARIS 125P. Advanced French II
4 units, Win (Molkou, E), Spr (Molkou, E)

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
Should health systems be organized or left to the free market? What is the role of the state in the delivery of health care? The evolution of the health profession, health policy, and reform in France and the U.S.; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention. Is the solution to the increase of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER:DB-SocSci, EC-GlobalCom
4-5 units, Win (Fessler, J)

OSPPARIS 186F. Contemporary African Literature in French
Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER:DB-Hum, EC-GlobalCom
4 units, Win (Guyot, S)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France
The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such demonstrations and protests. Attitudes and values are linked to voting choice. GER:DB-SocSci, EC-GlobalCom
4-5 units, Aut (Muxel, A; Strudel, S)

OVERSEAS STUDIES: SANTIAGO (OSPSANTG) COURSES

For information on the Bing Overseas Studies Program, see the "Overseas Studies Program" section of this bulletin.

OVERSEAS STUDIES IN SANTIAGO

OSPSANTG 10. Borges and Argentina
His work and readings of other key figures of Argentine literature during the period. Close reading technique. Readings in the context of the main developments in Argentine history, and in relationship to the major literary and philosophical trends of the 20th century. Topics include Borges' rejection of the novel, storytelling as a reaction against romanticism, philosophical concerns, paradoxical plot devices, humor, and influence in Latin America. Readings include short stories such as The Library of Babel and The Aleph, poems and essays, and texts by key Argentine writers of the period including Arlt, Bioy Casares, Silvina Ocampo, and Cortázar. GER:DB-Hum

4-5 units, Win (Missana, S)

OSPSANTG 12S. Accelerated Second-Year Spanish, Part I: Chilean Emphasis
Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago.

5 units, Aut (Abad, M), Win (Abad, M), Spr (Abad, M)

OSPSANTG 13S. Accelerated Second-Year Spanish, Part II: Chilean Emphasis
Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.

5 units, Aut (Abad, M), Win (Abad, M), Spr (Abad, M)

OSPSANTG 14. Women Writers of Latin America in the 20th Century
Key figures in poetry, narrative fiction, theater, and testimonio, such as Mistral, Garro, Lispector, Poniatowska, Valenzuela, Eltit and Menchú. Close reading technique. Issues raised in literary texts that reflect the evolution of the condition of women in Latin America during the period. Topics include gender differences and relationships, tradition versus transgression, relationship between changes in the status of women and other egalitarian transformations, and women writers and the configuration of literary canons. GER:DB-Hum, EC-Gender

4-5 units, Aut (Missana, S)

OSPSANTG 17. Chilean Fiction of the 20th Century
Novels and short stories. Chilean and Latin American political and economic history contexts. GER:DB-Hum

4-5 units, Spr (Missana, S)

OSPSANTG 33. Spanish Language Tutorial
Prerequisite: two years of college Spanish or equivalent placement.

2 units, Aut (Abad, M; Pons, H), Win (Abad, M; Pons, H), Spr (Abad, M; Pons, H)

OSPSANTG 43. Topics in Human Genetics
Independent projects in the following areas: genetic testing leading to identification of children of missing persons (Argentina); screening for inherited diseases; fragile X syndrome; ancestry determination; direct-to-consumer genetic testing.

3 units, Win (Francke, U)

OSPSANTG 44. Human Genetic Diversity in Individuals and Populations
Issues of human genetics and society from a global perspective, with examples specific to Latin America. Topics include: types of genetic variation leading to individual and ancestry identification; heritable and de novo disorders of development; adult-onset disease predisposition; differential susceptibility to infections and environmental agents; and different responses to drugs. Principles and types of genetic testing; access and utilization of genetic information; methods, results, and outcome interpretation of genomic analyses and implications for public policy.

4-5 units, Win (Francke, U)

OSPSANTG 45. The Cinema of the Chilean Transition (1990-2007)
Nature of the dialogue filmmakers sought to establish with the audience during time of democratic peace. Themes include: delinquency (Lubbert's *Taxi para tres*); presence or absence of indigenous people (Alicia Scherson's *Play*); family dynamics (Sebastián Lelio's *La sagrada familia*); social protagonism of women (Quercia's *Geografía del deseo*); relationship between art and commerce (Caiozzi's *Cachimba*); use of the thriller and noir genres (Hidalgo's *El huesped*; Olguin's *Sangre eterna*). GER:DB-Hum

3-5 units, Aut (Ruffinelli, J)

OSPSANTG 46. Topics in Chilean Cultural Expressions
Independent study in one of the following topics: 20th-century Chilean poetry such as Neruda and Nicanor Parra; Chilean novelists such as Donoso, Skarmeta, and Allende; trends in Chilean culture including theater, music, peñas, sports, and arts; cultural journalism or how daily newspapers reflect on Chilean popular interests.

3-5 units, Aut (Ruffinelli, J)

OSPSANTG 58. Living Chile: A Land of Extremes
Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops. GER:DB-EngrAppSci

5 units, Aut (Reid, S), Win (Reid, S)

OSPSANTG 62. Topics in Chilean History
Main themes of Chilean history: Spanish colonial background; independence in comparative perspective; construction of the republic in the 19th century; actors in the political process; the clash between authoritarian and democratic traditions in the 20th century. How Chileans have viewed their own history through conventional historical accounts, novels, and memoirs. GER:DB-Hum

4-5 units, Win (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America
Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order. GER:DB-SocSci

4-5 units, Aut (Jaksic, I), Spr (Jaksic, I)

OSPSANTG 85. Marine Ecology of Chile and the South Pacific
Relationships among physical processes in the ocean, biological productivity, and the exploitation of resources by high-thropic-level predators including human beings. Characterization of ecological patterns; identification of processes operating on marine systems. Open ocean ecosystems, intertidal and benthic regions of the world's oceans, and ecological research developed along coastal regions, focusing on Chile's 4,000 km coastline. GER:DB-NatSci

5 units, Spr (Palma, A)

OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago
Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent.

3-5 units, Aut (Bobbert, A), Win (Staff), Spr (Staff)

OSPSANTG 104X. Modernization and Culture in Latin America
Intellectual and cultural expressions of Latin America against the background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, Cultura y modernización en

América Latina and Sarlo, Una modernidad periférica. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Subercaseaux, B)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
Chile's strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women's groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:DB-SocSci
5 units, Spr (Correa, G)

OSPSANTG 118X. Artistic Expression in Latin America
Elite, mass-media, and popular cultural changes in Chile under conditions of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Albornoz, C)

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci
5 units, Spr (Munoz, O)

OSPSANTG 129X. Latin America in the International System
Latin America's role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America's evolving relationship in the international system. GER:DB-SocSci
4-5 units, Win (Fuentes, C)

OSPSANTG 130X. Latin American Economies in Transition
Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci
5 units, Aut (Briones, I)

OSPSANTG 141X. Politics and Culture in Chile
The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:DB-Hum, EC-GlobalCom
5 units, Spr (Subercaseaux, B)

OSPSANTG 160X. Latin America in the International Economy
The external economic relations of Latin American countries. Similarities and differences among countries, focusing on the last 15 years. Analytical and empirical elements for interpretation of policies, and the outcome. Trade, external debt, capital flows, and the inter-relationships between domestic economy and overall growth. Recommended: ECON 1, 51, and 52. GER:DB-SocSci
5 units, Win (Staff)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
The dynamics of the Chilean transition. Topics: challenges faced by democratic governments in the 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci
5 units, Aut (Micco, S)

PATHOLOGY (PATH) COURSES

For information on graduate programs in Pathology, see the "Pathology" section of this bulletin. Course and laboratory instruction in the Department of Pathology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN PATHOLOGY

PATH 101. Cancer Biology
(Same as CBIO 101.) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisite: Biology or Human Biology core or equivalent, or consent of instructor.
4 units, Spr (Lipsick, J)

PATH 103Q. Lymphocyte Migration
Stanford Introductory Seminar. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Known as lymphocyte migration, this process involves a complex series of adhesion, activation and diapedesis events. The cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The roles of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.
1 unit, Win (Michie, S)

PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry
Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.
3 units, Spr (Regula, D)

PATH 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN PATHOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PATH 206. Epigenetics
(Same as GENE 206.) For graduate students; undergraduates by consent of instructor. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in Drosophila in the 20s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: background in genetics and molecular biology.
2 units, alternate years, not given this year

PATH 210. Stem Cells in Development and Disease

Molecular and cellular mechanisms underlying the basic self-renewal and differentiation properties of stem cells in multiple tissues and organisms. How abnormal stem cell behavior may contribute to diseases such as cancer. How to manipulate stem cell behavior in vitro or in vivo for therapeutic purposes. Classical papers and recent literatures in the field of stem cell biology. Open to graduate, medical, and advanced undergraduate students. Prerequisite: consent of instructor.

1-2 units, Aut (Lu, B)

PATH 218. Computational Analysis of Biological Images
Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.

2 units, alternate years, not given this year

PATH 233. The Biology of Small Modulatory RNAs
(Same as GENE 233, MI 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, alternate years, not given this year

PATH 296. Stem Cell Biology and Regenerative Medicine
(Same as DBIO 296.) For graduate and medical students. Embryonic and adult stem cells, including origin, regulation, self-renewal, differentiation, fate, and relationship to cancer; biological mechanisms and methods to translate findings to therapeutic applications. Medical students must enroll for 5 units; graduate students may choose to take only the basic science part for 3 units. Prerequisites: DBIO 201 and 210, or consent of instructor.

3-5 units, Win (Weissman, I; Nusse, R; Fuller, M)

PATH 299. Directed Reading in Pathology
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PATH 399. Graduate Research
Students undertake investigations sponsored by individual faculty members. Opportunities at the molecular, cellular, and clinicopathologic levels. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PEDIATRICS (PEDS) COURSES

Only Stanford Introductory Seminars open to undergraduates are listed. See http://medcatalog.stanford.edu/ for additional offerings.

UNDERGRADUATE COURSES IN PEDIATRICS

PEDS 111Q. Issues of Race and Ethnicity in the Health of Children
Stanford Introductory Seminar. Preference to sophomores. Medicine and pediatrics from a public-health, evidence-based perspective. How research methods unmask health issues for at-risk racial and ethnic groups of children. Determinants of health with regard to race and ethnicity and ideas for changes in public policy. Students identify an area of interest and proposed intervention.

3-4 units, Aut (Burgos, A)

PHILOSOPHY (PHIL) COURSES

For information on undergraduate and graduate programs in the Department of Philosophy, see the "Philosophy" section of this bulletin.

UNDERGRADUATE COURSES IN PHILOSOPHY

PHIL 100-103 are surveys of important figures and movements in Western philosophy. Other courses in the 100+ range cover particular periods, movements, and figures in the history of philosophy. Prospective Philosophy majors should take as many as possible during the sophomore year.

PHIL 10. God, Self, and World: An Introduction to Philosophy
Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER:DB-Hum

5 units, Aut (Duarte, S)

PHIL 11N. Skepticism
Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum

3 units, Win (De Pierris, G)

PHIL 13N. Freedom of the Will and Moral Responsibility
Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary views on this central philosophical problem: in order to be morally responsible, do people have to have free will? If so, then would the premise that all events are causally determined make such freedom impossible?

3 units, Spr (Schapiro, T)

PHIL 14N. Belief
Stanford Introductory Seminar. Preference to freshmen. Is there anything wrong with believing something without evidence? Is it possible? The nature and ethics of belief, and belief's relation to evidence and truth. How much control do believers have over their belief? GER:DB-Hum

3 units, Win (Lawlor, K)

PHIL 15N. Freedom, Community, and Morality
Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER:DB-Hum, EC-EthicReas

3 units, Aut (Friedman, M)

PHIL 19N. Practical Reasoning
Stanford Introductory Seminar. Preference to freshmen. Practical reasoning aims. Structure of practical reasoning. Practical reasoning as means to ends that are taken as given. Practical reasoning about ends. Practical reasoning concerned with some sort of maximization of some value. Relation between practical reasoning and desire. Relation between practical reasoning and planning. Relation between different views about practical reasoning and different views about morality. Structure of practical reasoning affected by perceptions of subtle features of different situations.

3 units, Win (Bratman, M)

PHIL 20. Introduction to Moral Philosophy
(Same as ETHICSOC 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas

5 units, Win (Schapiro, T)

PHIL 20S. Introduction to Moral Philosophy
What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors.
3 units, Sum (McElroy, P)

PHIL 30. Introduction to Political Philosophy
(Same as ETHICSOC 30, POLISCI 3, PUBLPOL 103A.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas
5 units, Spr (Hussain, N)

PHIL 41Q. Truth
Stanford Introductory Seminar. Preference to sophomores. Central issues animating current work in the philosophy of truth. What is truth? What is it about a statement or judgment that makes it true rather than false? Are there any propositions that are neither true nor false? Could truth be relative to individuals or communities? Do people have different notions of truth for different enterprises such as mathematics and ethics? Might truth be a matter of degree? Sources include the instructor's book manuscript and other contemporary writers.
3 units, Aut (Burgess, A)

PHIL 42. Philosophy through Theater: Choice and Chance
Dramatic literature as a window into philosophical work on freedom of the will and indeterminism. Students participate in the production of original one-act plays.
4 units, Win (Burgess, A)

PHIL 43S. Happiness: Positive Psychology and Philosophy
The connection between research in positive psychology to determine what happiness is and the conditions under which human beings are happy with issues in moral philosophy regarding whether we should aim at happiness or think of it as a good. The assumptions about happiness made by positive psychologists. The philosophical insight into the question of how people should live that is gained by looking at the empirical results provide by psychologists.
3 units, Sum (Papadopol, A)

PHIL 50. Introductory Logic
Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER:DB-Math
4 units, Win (Paul, S), Spr (Duarte, S)

PHIL 50S. Introductory Logic
Propositional and predicate logic. Themes include: translations of English sentences into logical symbols; semantics of and proof rules for propositional and predicate logic. Emphasis is on evaluating arguments with the syntax and semantics of contemporary logic.
4 units, Sum (Angelides, A)

PHIL 60. Introduction to Philosophy of Science
(Same as HPS 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerbend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
5 units, Aut (Ryckman, T)

PHIL 61. Science, Religion, and the Birth of Modern Philosophy
(Same as HPS 61.) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
5 units, not given this year

PHIL 71H. Philosophy and the Real World
Introduction to the humanities as an applied discipline; how literary and philosophical ideas illuminate and change how people live their lives as individuals and members of society. Focus is on short texts that illustrate how literary and philosophical ideas arise from social problems and attempt to confront those problems. Methods and approaches: how to read such texts; how to make arguments about them; how such texts shed light on contemporary situations.
2 units, Sum (Staff)

PHIL 77. Methodology in Ethics: Translating Theory into Practice
(Same as ETHICSOC 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
4 units, not given this year

PHIL 78. Medical Ethics
(Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, DB-Hum, EC-EthicReas
4 units, not given this year

PHIL 80. Mind, Matter, and Meaning
Central topics in philosophy emphasizing development of analytical writing skills. What are human beings? Are human beings free? How do human minds and bodies interact? What does it all mean? Prerequisite: introductory philosophy course. GER:DB-Hum, WIM
5 units, Aut (Crimmins, M), Spr (Burgess, A)

PHIL 81. Philosophy and Literature
Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Win (Anderson, L; Vermeule, B)

PHIL 100. Greek Philosophy
Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. (Bobonich) GER:DB-Hum
4 units, Aut (Duarte, S)

PHIL 101. Medieval Religious Philosophy
(Same as RELIGST 167.) Focus is on God, world, and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and *The Book of the World* as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham. GER:DB-Hum
4 units, not given this year

PHIL 102. Modern Philosophy, Descartes to Kant
Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum
4 units, Win (Duarte, S)

PHIL 103. 19th-Century Philosophy
Focus is on ethics and the philosophy of history. Works include Mill's *Utilitarianism*, Hegel's *The Philosophy of World History*, Marx's *Economic and Philosophic Manuscripts*, Kierkegaard's *The Sickness Unto Death*, and Nietzsche's *On the Genealogy of Morals*. GER:DB-Hum
4 units, not given this year

PHIL 107. Plato and Heraclitus
(Same as PHIL 207.) Similarities and differences.
3 units, not given this year

PHIL 110. Plato
(Same as PHIL 210.) Plato's *Republic*. GER:DB-Hum
4 units, Aut (Bobonich, C)

PHIL 111. Aristotle
(Same as PHIL 211.) Aristotle's epistemology; related issues in his psychology and philosophy of science. GER:DB-Hum
4 units, Win (Bobonich, C)

PHIL 113. Hellenistic Philosophy
(Same as PHIL 213.) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology. GER:DB-Hum
4 units, not given this year

PHIL 115. Problems in Medieval Philosophy
(Same as PHIL 215.) Is a science of metaphysics possible? What is a Aristotelian science? How does science get started? How are the most basic principles of scientific thinking known? If the special sciences cover every particular subject, as chemistry deals with substantial change and meteorology with accidental change, then what is the subject of the general science of metaphysics? Can it be unified? Answers by Aristotle, Aquinas, Duns, Scotus, and Ockham. GER:DB-Hum
3-5 units, not given this year

PHIL 117. Descartes
(Same as PHIL 217. Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum
4 units, Win (De Pierris, G)

PHIL 118. British Empiricism, 1660s-1730s
(Same as PHIL 218.) GER:DB-Hum
4 units, not given this year

PHIL 119. Rationalists
(Same as PHIL 219. Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphazing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum
4 units, not given this year

PHIL 122. Hume
(Same as PHIL 222. Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum
4 units, not given this year

PHIL 125. Kant's First Critique
(Same as PHIL 225. Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum
4 units, Spr (De Pierris, G)

PHIL 126B. Kant's Ethical Theory
(Same as PHIL 226B. Graduate students register for 226B.) Kant's moral philosophy based primarily on the *Groundwork of Metaphysics of Morals, Critique of Practical Reason,* and *The Metaphysics of Morals*. GER:DB-Hum
4 units, not given this year

PHIL 127A. Kant's Value Theory
(Same as PHIL 227A. Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity). GER:DB-Hum
4 units, Win (Hills, D)

PHIL 127B. Kant's Anthropology and Philosophy of History
(Same as PHIL 227B.) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include Idea for a Universal History, Conjectural Beginning of Human History, and Anthropology from a Pragmatic Point of View. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race.
4 units, not given this year

PHIL 128. Fichte's Ethics
(Same as PHIL 228. Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.
4 units, not given this year

PHIL 130. Hegel's Elements of Philosophy of Right
(Same as PHIL 230. Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum
4 units, not given this year

PHIL 134. Phenomenology and Intersubjectivity
(Same as PHIL 234. Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum
4 units, not given this year

PHIL 135. Existentialism
(Same as PHIL 235. Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum
4 units, not given this year

PHIL 136. History of Analytic Philosophy
(Same as PHIL 236. Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum
4 units, not given this year

PHIL 137. Wittgenstein
(Same as PHIL 237. Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:DB-Hum
4 units, Spr (Hills, D)

PHIL 143. Quine
(Same as PHIL 243. Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum
4 units, Aut (Follesdal, D)

PHIL 150. Basic Concepts in Mathematical Logic
(Same as PHIL 250. Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math
4 units, Aut (Barker-Plummer, D)

PHIL 150X. Basic Concepts in Mathematical Logic
Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.
2 units, Aut (Barker-Plummer, D)

PHIL 151. First-Order Logic
(Same as PHIL 251. Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math
4 units, Win (Pacuit, E)

PHIL 152. Computability and Logic
(Same as PHIL 252.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math
4 units, Spr (Pacuit, E)

PHIL 153. Feminist Theories and Methods Across the Disciplines
(Same as FEMST 103, FEMST 203.) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism for scholarship and research. GER:EC-Gender
4-5 units, Aut (Longino, H)

PHIL 154. Modal Logic
(Same as PHIL 254. Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151. GER:DB-Math
4 units, Spr (vanBenthem, J)

PHIL 155. General Interest Topics in Mathematical Logic
Propositional calculus, Sudoku puzzles, problem P=NP. Possible worlds, modal logic. Incompleteness, provability logic. Logic of knowledge and belief. May be repeated for credit.
4 units, Win (Mints, G)

PHIL 157. Topics in Philosophy of Logic
(Same as PHIL 257. Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, Spr (Pacuit, E)

PHIL 160A. Newtonian Revolution
(Same as PHIL 260A. Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's Principia. GER:DB-Hum
4 units, Win (Smith, G)

PHIL 160B. Newtonian Revolution
(Same as PHIL 260B. Graduate students register for 260B.) Newton's Principia in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science. GER:DB-Hum
4 units, Spr (Smith, G)

PHIL 162. Philosophy of Mathematics
(Same as MATH 162, PHIL 262. Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor.
4 units, not given this year

PHIL 163. Significant Figures in Philosophy of Science
(Same as PHIL 263. Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard. GER:DB-Hum
4 units, not given this year

PHIL 164. Central Topics in the Philosophy of Science: Theory and Evidence
(Same as PHIL 264. Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum
4 units, Win (Smith, G)

PHIL 165. Philosophy of Physics
(Same as PHIL 265. Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum
4 units, Aut (Ryckman, T)

PHIL 166. Probability: Ten Great Ideas About Chance
(Same as PHIL 266.) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.
4 units, Spr (Skyrms, B)

PHIL 167B. Philosophy, Biology, and Behavior
(Same as PHIL 267B. Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIO course or Human Biology core; or equivalent with consent of instructor.
4 units, not given this year

PHIL 168. Theories of Truth
(Same as PHIL 268. Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.
4 units, not given this year

PHIL 170. Ethical Theory
(Same as ETHICSOC 170, PHIL 270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas
4 units, Aut (Schapiro, T)

PHIL 171. Justice
(Same as ETHICSOC 171, IPS 208, PHIL 271, POLISCI 136S, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
4-5 units, Aut (Cohen, J)

PHIL 172. History of Modern Ethics
(Same as PHIL 272.) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price.
4 units, not given this year

PHIL 173A. Aesthetics: Metaphor across the Arts
What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary

accounts of metaphor as a verbal device. Arguments for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER:DB-Hum

4 units, Aut (Hills, D)

PHIL 173B. Metaethics

(Same as PHIL 273B. Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course. GER:DB-Hum

4 units, Win (Hussain, N)

PHIL 174. Freedom and the Practical Standpoint

(Same as PHIL 274. Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum

4 units, not given this year

PHIL 174A. Moral Limits of the Market

(Same as ETHICSOC 174A, PHIL 274A.) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases. GER:DB-Hum

4 units, Win (Satz, D)

PHIL 175. Philosophy of Law

Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: PHIL 80 and one additional PHIL course. GER:DB-Hum

4 units, Spr (Bratman, M)

PHIL 175M. Two Ethical Theories and Being a Person

(Same as PHIL 275M.) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents. GER:DB-Hum

4 units, not given this year

PHIL 176. Political Philosophy: The Social Contract Tradition

(Same as PHIL 276. Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum

4 units, not given this year

PHIL 176B. The Economic Individual in the Behavioral Sciences

(Same as PHIL 276B. Graduate students register for 276B.)

4 units, not given this year

PHIL 177. Philosophical Issues Concerning Race and Racism

(Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul

4 units, not given this year

PHIL 178. Ethics in Society Honors Seminar

(Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

3 units, Win (Reich, R)

PHIL 179. Semantics: Theories of Meaning

(Same as PHIL 279.) What makes ambiguity, polysemy, and context sensitivity needed in natural languages; why this is not the case with formal languages. How to develop semantics for context-sensitive structures. GER:DB-Hum

4 units, not given this year

PHIL 179S. Moral Psychology, Reasons for Action, and Moral Theory

(Same as PHIL 279S.) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

4 units, not given this year

PHIL 180. Metaphysics

(Same as PHIL 280.) Traditional philosophical riddles involving the notion of existence including: the ontological argument for the existence of God; the problem of intuitively true, negative existential statements; the sorites paradox; and the question of why there is anything at all. Conceptual tools philosophers use to address these questions, from nonexistent objects to possible worlds. Meta-metaphysics. GER:DB-Hum

4 units, not given this year

PHIL 181. Philosophy of Language

(Same as PHIL 281.) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.

4 units, Spr (Crimmins, M)

PHIL 182. Truth

Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor.

4 units, not given this year

PHIL 184. Theory of Knowledge

(Same as PHIL 284.) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum

4 units, Win (Lawlor, K)

PHIL 184B. Philosophy of the Body

How essential is the body to people's conception of themselves as individuals and as human beings? What role does embodiment play in shaping cognitive capacities? How much or what kind of somatic awareness is required for agency? Embodiment theories of cognition. Readings from Plato, Descartes, Nietzsche, Merleau-Ponty, Parfit, novelist Michel Houellebecq, and contemporary philosophy of mind and cognitive science.

4 units, Spr (Maguire, L)

PHIL 184F. Feminist Theories of Knowledge

(Same as FEMST 166, PHIL 284F.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER:DB-Hum, EC-Gender

4 units, not given this year

PHIL 185. Memory
Structure, content, functional role, and epistemic authority of human memories. Sources include philosophical and psychological literature from different schools and historical periods.
4 units, not given this year

PHIL 186. Philosophy of Mind
(Same as PHIL 286. Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.
4 units, Spr (Paul, S)

PHIL 187. Philosophy of Action
(Same as PHIL 287. Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum
4 units, Win (Bratman, M)

PHIL 190. Introduction to Cognitive and Information Sciences
(Same as LINGUIST 144, PSYCH 132, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Wasow, T; Roberts, E)

PHIL 193H. The Art of the Movies: Story, Drama, and Image
(Same as HUMNTIES 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock.
4 units, Aut (Hills, D)

PHIL 193W. Nietzsche, Doestoevsky, and Sartre
(Same as HUMNTIES 193W.) Literary works in which philosophical ideas and issues are put forward, such as prose poems, novels, and plays. Ideas and issues and the dramatic or narrative structures through which they are presented. Texts include: Nietzsche, *Thus Spoke Zarathustra;* Dostoevsky, *The Brothers Karamazov;* and Sartre, *Nausea* and *No Exit*. GER:DB-Hum
4 units, not given this year

PHIL 194A. Empiricism and the Philosophy of Mind
Priority to majors. 20th-century analytic and early modern philosophy of mind and epistemology. Main text is Wilfrid Sellars's Empiricism and the Philosophy of Mind; source materials and commentary. Enrollment limited to 12.
4 units, not given this year

PHIL 194B. The Ethics of Belief
Priority to majors. Are beliefs subject to moral evaluation? Can it be right or wrong to believe or disbelieve something? Are people morally required to believe only that for which there is sufficient evidence; or can the good consequences of believing something justify the belief, irrespective of the evidence? Contemporary and historical sources. Enrollment limited to 12.
4 units, not given this year

PHIL 194E. Undergraduate Seminar: Ethical Antitheory
May be repeated for credit.
4 units, not given this year

PHIL 194L. W.E.B. DuBois as Writer and Philosopher
(Same as AFRICAAM 152, ENGLISH 152D.) Capstone seminar for Philosophy and Literature programs. Preference to majors in English, Philosophy, African and African American Studies, or the Philosophy and Literature programs. Life, career, thought, and writings of DuBois. Focus on the first half of his career, interactions among his early philosophical perfectionism, his work in social theory/social science, and his literary ambitions as an essayist and novelist. Sources include *Souls of Black Folk*, as well as his books on history and sociology, scholarly essays, and novels. GER:DB-Hum
5 units, Spr (Elam, M; Anderson, L)

PHIL 194P. Naming and Necessity
Saul Kripke's lectures on reference, modal metaphysics, and the mind/body problem.
4 units, Win (Burgess, A)

PHIL 194R. Epistemic Paradoxes
Paradoxes that arise from concepts of knowledge and rational belief, such as the skeptical paradox, the preface paradox, and Moore's paradox. Can one lose knowledge without forgetting anything? Can one change one's mind in a reasonable way without gaining new evidence? GER:DB-Hum
4 units, Aut (Lawlor, K)

PHIL 195A. Unity of Science
Primarily for seniors.
4-5 units, not given this year

PHIL 195B. Donor Seminar: Practical Reasoning
Primarily for seniors. Relationships among action, deliberation, reasons, and rationality. On what basis do people decide what to do? What norms or rules structure reasoning? What constitutes rationality?
4 units, not given this year

PHIL 196. Tutorial, Senior Year
5 units, Aut (Burgess, A), Win (Staff), Spr (Staff), Sum (Staff)

PHIL 197. Individual Work, Undergraduate
May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHIL 198. The Dualist
Weekly meeting of the editorial board of *The Dualist*, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)
1 unit, Aut (Staff), Win (Staff), Spr (Staff)

PHIL 199. Seminar for Prospective Honors Students
Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project. May be repeated for credit.
2 units, Spr (Staff)

PHIL 249. Evidence and Evolution
(Same as PHIL 349.) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.
3-5 units, Spr (Staff)

GRADUATE COURSES IN PHILOSOPHY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PHIL 207. Plato and Heraclitus
(Same as PHIL 107.) Similarities and differences.
3 units, not given this year

PHIL 210. Plato
(Same as PHIL 110.) Plato's Republic.
4 units, Aut (Bobonich, C)

PHIL 211. Aristotle
(Same as PHIL 111.) Aristotle's epistemology; related issues in his psychology and philosophy of science.
4 units, Win (Bobonich, C)

PHIL 213. Hellenistic Philosophy
(Same as PHIL 113.) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology.
4 units, not given this year

PHIL 215. Problems in Medieval Philosophy
(Same as PHIL 115.) Is a science of metaphysics possible? What is a Aristotelian science? How does science get started? How are the most basic principles of scientific thinking known? If the special sciences cover every particular subject, as chemistry deals with substantial change and meteorology with accidental change, then what is the subject of the general science of metaphysics? Can it be unified? Answers by Aristotle, Aquinas, Duns, Scotus, and Ockham.
3-5 units, not given this year

PHIL 217. Descartes
(Same as PHIL 117. Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world.

4 units, Win (De Pierris, G)

PHIL 218. British Empiricism, 1660s-1730s
(Same as PHIL 118.)

4 units, not given this year

PHIL 219. Rationalists
(Same as PHIL 119. Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphazing their own doctrines and their criticism of their predecessors. Prerequisite: 102.

4 units, not given this year

PHIL 222. Hume
(Same as PHIL 122. Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.

4 units, not given this year

PHIL 224. Kant's Philosophy of Physical Science
Kant's *Metaphysical Foundations of Natural Science* (1786), published between the first (1781) and second (1787) editions of the *Critique of Pure Reason*, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant's thought. Prerequisite: acquaintance with either Kant's theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.

4 units, not given this year

PHIL 225. Kant's First Critique
(Same as PHIL 125. Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy.

4 units, Spr (De Pierris, G)

PHIL 226B. Kant's Ethical Theory
(Same as PHIL 126B. Graduate students register for 226B.) Kant's moral philosophy based primarily on the *Groundwork of Metaphysics of Morals, Critique of Practical Reason,* and *The Metaphysics of Morals*.

4 units, not given this year

PHIL 227A. Kant's Value Theory
(Same as PHIL 127A. Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity).

4 units, Win (Hills, D)

PHIL 227B. Kant's Anthropology and Philosophy of History
(Same as PHIL 127B.) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include *Idea for a Universal History, Conjectural Beginning of Human History,* and *Anthropology from a Pragmatic Point of View*. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; Kant's theory of race.

4 units, not given this year

PHIL 228. Fichte's Ethics
(Same as PHIL 128..) The founder of the German Idealist movement who revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.

4 units, not given this year

PHIL 230. Hegel's Elements of Philosophy of Right
(Same as PHIL 130. Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy.

4 units, not given this year

PHIL 233. Husserl
Husserl's phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.

4 units, not given this year

PHIL 234. Phenomenology and Intersubjectivity
(Same as PHIL 134. Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other.

4 units, not given this year

PHIL 235. Existentialism
(Same as PHIL 135. Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism.

4 units, not given this year

PHIL 236. History of Analytic Philosophy
(Same as PHIL 136. Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90.

4 units, not given this year

PHIL 237. Wittgenstein
(Same as PHIL 137. Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning.

4 units, Spr (Hills, D)

PHIL 239. Teaching Methods in Philosophy
For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.

1-4 units, Aut (Staff)

PHIL 240. Individual Work for Graduate Students
May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHIL 241. Dissertation Development Seminar
Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.

2-3 units, Sum (Bobonich, C)

PHIL 242. The Philosophical and Educational Thought of John Dewey
(Same as EDUC 304.) Dewey's pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including *Democracy and Education;* and his call for a revolution in philosophy in *Reconstruction in Philosophy*. (SSPEP)

4 units, not given this year

PHIL 243. Quine
(Same as PHIL 143. Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental.

4 units, Aut (Follesdal, D)

PHIL 248. Medieval Latin Paleography
The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle's Ethics preserved in a Florentine manuscript.
3-5 units, not given this year

PHIL 250. Basic Concepts in Mathematical Logic
(Same as PHIL 150. Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability.
4 units, Aut (Barker-Plummer, D)

PHIL 251. First-Order Logic
(Same as PHIL 151. Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor.
4 units, Win (Pacuit, E)

PHIL 252. Computability and Logic
(Same as PHIL 152.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151.
4 units, Spr (Pacuit, E)

PHIL 254. Modal Logic
(Same as PHIL 154. Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151.
4 units, Spr (vanBenthem, J)

PHIL 257. Topics in Philosophy of Logic
(Same as PHIL 157. Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, Spr (Pacuit, E)

PHIL 258. Minds and Machines
Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel's incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389. (Feferman)
4 units, not given this year

PHIL 260A. Newtonian Revolution
(Same as PHIL 160A. Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's Principia.
4 units, Win (Smith, G)

PHIL 260B. Newtonian Revolution
(Same as PHIL 160B. Graduate students register for 260B.) Newton's Principia in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science.
4 units, Spr (Smith, G)

PHIL 262. Philosophy of Mathematics
(Same as MATH 162, PHIL 162. Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor.
4 units, not given this year

PHIL 263. Significant Figures in Philosophy of Science
(Same as PHIL 163. Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard.
4 units, not given this year

PHIL 264. Central Topics in the Philosophy of Science: Theory and Evidence
(Same as PHIL 164. Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories.
4 units, Win (Smith, G)

PHIL 265. Philosophy of Physics
(Same as PHIL 165. Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different.
4 units, Aut (Ryckman, T)

PHIL 266. Probability: Ten Great Ideas About Chance
(Same as PHIL 166.) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.
4 units, Spr (Skyrms, B)

PHIL 267B. Philosophy, Biology, and Behavior
(Same as PHIL 167B. Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIO course or Human Biology core; or equivalent with consent of instructor.
4 units, not given this year

PHIL 268. Theories of Truth
(Same as PHIL 168. Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.
4 units, not given this year

PHIL 270. Ethical Theory
(Same as ETHICSOC 170, PHIL 170.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors.
4 units, Aut (Schapiro, T)

PHIL 271. Justice
(Same as ETHICSOC 171, IPS 208, PHIL 171, POLISCI 136S, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.
4-5 units, Aut (Cohen, J)

PHIL 272. History of Modern Ethics
(Same as PHIL 172.) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price.
4 units, not given this year

PHIL 273B. Metaethics
(Same as PHIL 173B. Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course.
4 units, Win (Hussain, N)

PHIL 274. Freedom and the Practical Standpoint
(Same as PHIL 174. Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view.
4 units, not given this year

PHIL 274A. Moral Limits of the Market
(Same as ETHICSOC 174A, PHIL 174A.) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases.
4 units, Win (Satz, D)

PHIL 275M. Two Ethical Theories and Being a Person
(Same as PHIL 175M.) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents.
4 units, not given this year

PHIL 276. Political Philosophy: The Social Contract Tradition
(Same as PHIL 176. Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant.
4 units, not given this year

PHIL 276B. The Economic Individual in the Behavioral Sciences
(Same as PHIL 176B. Graduate students register for 276B.)
4 units, not given this year

PHIL 279. Semantics: Theories of Meaning
(Same as PHIL 179.) What makes ambiguity, polysemy, and context sensitivity needed in natural languages; why this is not the case with formal languages. How to develop semantics for context-sensitive structures.
4 units, not given this year

PHIL 279S. Moral Psychology, Reasons for Action, and Moral Theory
(Same as PHIL 179S.) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.
4 units, not given this year

PHIL 280. Metaphysics
(Same as PHIL 180.) Traditional philosophical riddles involving the notion of existence including: the ontological argument for the existence of God; the problem of intuitively true, negative existential statements; the sorites paradox; and the question of why there is anything at all. Conceptual tools philosophers use to address these questions, from nonexistent objects to possible worlds. Meta-metaphysics.
4 units, not given this year

PHIL 281. Philosophy of Language
(Same as PHIL 181.) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.
4 units, Spr (Crimmins, M)

PHIL 284. Theory of Knowledge
(Same as PHIL 184.) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor.
4 units, Win (Lawlor, K)

PHIL 284F. Feminist Theories of Knowledge
(Same as FEMST 166, PHIL 184F.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power.
4 units, not given this year

PHIL 286. Philosophy of Mind
(Same as PHIL 186. Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.
4 units, Spr (Paul, S)

PHIL 287. Philosophy of Action
(Same as PHIL 187. Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80.
4 units, Win (Bratman, M)

PHIL 312. Aristotle's Psychology
De Anima and parts of *Parva Naturalia*.
4 units, not given this year

PHIL 318. Aristotle's Ethics
Topics in Aristotle's ethical theory and related parts of his psychology.
4 units, not given this year

PHIL 319. Aristotle's Metaphysics
Aristotle's views about substance and the nature and possibility of metaphysics. Focus is on *Categories* and *Metaphysics Book Zeta*.
3 units, Win (Bobonich, C)

PHIL 322. Hume
Hume's theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.
4 units, Spr (De Pierris, G)

PHIL 323. Kant's Criticism of Metaphysics
Motivations and strategies of Kant's criticisms of traditional metaphysics in the *Critique of Pure Reason*. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant's analytic/synthetic distinction, focusing on its place in the rejection of metaphysics and in arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first Critique, or consent of instructor.
4 units, Aut (Anderson, L)

PHIL 325. Modern Seminar
(Same as HUMNTIES 325.) Modern anxieties about the place of human concerns within a disenchanted natural world, focusing on texts of philosophy, social theory, and imaginative literature. Cultural and psychological consequences of perceived decline in and

threats to religious faith. Authors may include Schiller, Schopenhauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, Weber, Eliot, Woolf, Sartre, and Camus.

3-5 units, Spr (Anderson, L)

PHIL 332. Nietzsche

Preference to doctoral students. Nietzsche's later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The shape of Nietzsche's philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.

4 units, not given this year

PHIL 334. Habermas

Does Habermas have a distinctive account of normativity and normative judgements?

3-5 units, Spr (Hussain, N)

PHIL 335. Topics in Aesthetics

May be repeated for credit.

4 units, not given this year

PHIL 336. Marx and Weber

(Same as POLISCI 336M.) How Marx and Weber each developed theories to account for the political problems of unfreedom, inequality, oppression, and bureaucratization; investigated the extent to which such problems could be mitigated or resolved; and believed that social science could contribute to understanding the modern world and efforts to change it. Their works with reference to politics, human agency, social change, and the role of knowledge.

4 units, Spr (Satz, D)

PHIL 338. Hobbes and Rousseau

(Same as POLISCI 338J.) On human nature, freedom, equality, and political authority in Hobbes's *Leviathan* and Rousseau's *Discourse on Inequality* and *Social Contract*.

3 units, Aut (Cohen, J)

PHIL 340. Time and Free Will

Free will and the consequence argument of Peter van Inwagen and others. Focus is on the principle that one cannot change the past and the problem of backtracking conditionals, and less on the problem raised by determinismon. Hypotheses less drastic than determinism support backtrackers; given the backtracker, would someone's not having done something require that he change the past? Issues related to time, change, the phenomenology of agency, and McTaggart's argument about the reality of time.

3-5 units, Aut (Perry, J)

PHIL 349. Evidence and Evolution

(Same as PHIL 249.) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.

3-5 units, Spr (Staff)

PHIL 350A. Model Theory

Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150,151, or equivalent.

3 units, Aut (Pacuit, E)

PHIL 350B. Finite Model Theory

(Same as MATH 290B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.

3 units, not given this year

PHIL 351A. Recursion Theory

Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel's incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.

3 units, Aut (Mints, G)

PHIL 351B. Constructive Mathematics

Effective and non-effective proofs. Background from constructive logic and computability. Elementary constructive analysis, recursive analysis. Constructive models. Foundational issues. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a calculus class.

3 units, not given this year

PHIL 352A. Set Theory

(Same as MATH 292A.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.

3 units, not given this year

PHIL 352B. Set Theory

(Same as MATH 292B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.

3 units, not given this year

PHIL 353A. Proof Theory

(Same as MATH 293A.) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.

3 units, not given this year

PHIL 353B. Higher-Order Logic

Second-order and general higher-order logic. Expressive power and failure of classical theorems such as axiomatizability, compactness, and Loewenheim-Skolem. Different systems of higher-order logic, including type theory. Proof theory and completeness over general models. History of type theory as an alternative foundation of mathematics. Applications in computer science and linguistics. Prerequisite: 151. Recommended: 152.

3 units, not given this year

PHIL 354. Topics in Logic

Readings on uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs, uniformity results. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a 100-level MATH course.

3 units, Win (Mints, G)

PHIL 355. Logic and Social Choice

Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference versus judgment aggregation, role of language in social choice, and metatheory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.

4 units, not given this year

PHIL 356. Applications of Modal Logic

Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.

3 units, not given this year

PHIL 358. Rational Agency and Intelligent Interaction

(Same as CS 222.) For advanced undergraduates, and M.S. and beginning Ph.D. students. Logic-based methods for knowledge representation, information change, and games in artificial

intelligence and philosophy. Topics: knowledge, certainty, and belief; time and action; belief dynamics; preference and social choice; games; and desire and intention. Prerequisite: propositional and first-order logic. Recommended: modal logic; game theory.

3 units, Spr (Shoham, Y)

PHIL 359. Advanced Modal Logic
Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.

4 units, not given this year

PHIL 360. Core Seminar in Philosophy of Science
Limited to first- and second-year Philosophy Ph.D. students.

4 units, Win (Friedman, M; Longino, H)

PHIL 365. Seminar in Philosophy of Science: Time

4 units, Win (Ryckman, T)

PHIL 366. Evolution and Communication
Topics include information bottlenecks, signaling networks, information processing, invention of new signals, teamwork, evolution of complex signals, teamwork. Sources include signaling games invented by David Lewis and generalizations thereof, using evolutionary and learning dynamics.

4 units, Spr (Skyrms, B)

PHIL 370. Core Seminar in Ethics
Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, not given this year

PHIL 372. Problems in Kantian Ethics
May be repeated for credit.

4 units, not given this year

PHIL 372D. Graduate Seminar: John Rawls's Political Philosophy
(Same as POLISCI 332.) Leading ideas in *A Theory of Justice, Political Liberalism*, and *The Law of Peoples*.

5 units, not given this year

PHIL 372E. Graduate Seminar on Moral Psychology
Recent philosophical works on desire, intention, the motivation of action, valuing, and reasons for action. Readings: Williams, Korsgaard, Smith, Blackburn, Velleman, Stampe, Frankfurt.

3-5 units, Aut (Staff)

PHIL 373. Moral Psychology: The Concept of Inclination
The weight placed by Kantian and rationalist moral theories on the distinction between inclination and reason. The concept of inclination as that which inclines but does not determine how people act. How are inclinations related to the people who hold them? Are they expressions of values, or more like internal weather? What is their nature? What does it mean to act from inclination? Are actions on inclination unchosen or just badly chosen? Historical and contemporary sources.

4 units, not given this year

PHIL 374. Caring and Practical Reasoning
What is it to care about something; how is caring related to desiring, emotions, and having policies; what is the relationship between caring and the will; why do people care about things; can attention to caring help explain the phenomenon of silencing reasons? Readings from contemporary literature, including Frankfurt, Watson, Bratman, Scanlon, Williams, Helm, and Kolodny. May be repeated for credit.

4 units, not given this year

PHIL 374D. Religion and the Constitution
(Same as POLISCI 336T. Same as LAW 569.) Issues of religious toleration in political theory and in American constitutional law. Topics include: whether religion merits special the special constitutional solicitude provided by the First Amendment's religion clauses; religion as distinct from culture, morality, and philosophy as understood for constitutional purposes; the tensions between ensuring free exercise and avoiding religious establishment; cases for and against free exercise exemptions; and whether the religion clauses can be understood as serving a single fundamental value such as liberty,equality, or neutrality. Readings from political and constitutional theory including Bodin, Locke, Madison, Jefferson, Rawls, Nussbaum, McConnell, Okin, Choper, Hamburger, and constitutional cases.

3-5 units, Win (Cohen, J; Sullivan, K)

PHIL 376. Agency and Personal Identity
How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.

4 units, not given this year

PHIL 378. Problems in Medical Ethics
Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer's patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.

4 units, not given this year

PHIL 379. Graduate Seminar in Metaethics
Theories about the meaning of ethical terms and the content of ethical judgements. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.

4 units, not given this year

PHIL 380. Core Seminar in Metaphysics and Epistemology
Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, not given this year

PHIL 381. Core Seminar in Philosophy of Language
Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, Aut (Perry, J)

PHIL 382. Seminar on Reference
Philosophical issues concerning the relationship between linguistic expressions and the objects to which they refer. Is it possible to get one unified theory of reference for different kinds of referring expressions such as proper names, pronouns, demonstratives, and other kinds of indexicals? Unsolved problems and desiderata for a theory of reference?

4 units, not given this year

PHIL 383. Philosophy of Mind Seminar
May be repeated for credit.

4 units, not given this year

PHIL 384. Seminar in Metaphysics and Epistemology
May be repeated for credit.

4 units, Spr (Burgess, A)

PHIL 385. Philosophy of Language Seminar: Foundations of Non-Factualism
How could a meaningful, declarative sentence fail to say anything true or false? Focus is on Huw Price's Facts and the Function of Truth.

4 units, not given this year

PHIL 385B. Topics in Metaphysics and Epistemology: Vaguenes
Contemporary proposals for how and whether to explain and accommodate vagueness in reality and in representation.Theories of mental and linguistic representation that struggle to explain imprecise representation, and metaphysical theories of the ultimate structure of reality that are threatened with incoherence if worldly boundaries are vague. May be repeated for credit.

4 units, not given this year

PHIL 386B. Husserl and Adam Smith
Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.

4 units, Aut (Follesdal, D)

PHIL 386C. Subjectivity
Continuation of 386B.

4 units, not given this year

PHIL 387. Practical Rationality
Contemporary research on practical reason, practical rationality and reasons for action. May be repeated for credit

4 units, Aut (Bratman, M)

PHIL 387S. Practical Reasons and Practical Reasoning
Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.
4 units, not given this year

PHIL 388. Normativity
May be repeated for credit.
4 units, not given this year

PHIL 389. Advanced Topics in Epistemology
Skepticism and contextualism, epistemic closure, and problems generated by closure.
4 units, Aut (Lawlor, K)

PHIL 391. Research Seminar in Logic and the Foundations of Mathematics
(Same as MATH 391.) Contemporary work. May be repeated a total of three times for credit.
1-3 units, Spr (Mints, G; Feferman, S)

PHIL 450. Thesis
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHIL 470. Proseminar in Moral Psychology
Restricted to Philosophy doctoral students. May be repeated for credit.
4 units, not given this year

PHIL 500. Advanced Ph.D. Proseminar
Presentation of dissertation work in progress by seminar participants. May be repeated for credit.
1 unit, Aut (Staff), Win (Crimmins, M), Spr (Crimmins, M)

PHYSICS (PHYSICS) COURSES

For information on undergraduate and graduate programs in the Department of Physics, see the "Physics" section of this bulletin.

PHYSICS COURSE CATALOG NUMBERING SYSTEM

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

100	undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

00	laboratory
10,20,30	general courses
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

UNDERGRADUATE COURSES IN PHYSICS

There are four series of beginning courses. One course from the teen series (15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46) is for students of engineering, chemistry, earth sciences, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series. The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

PHYSICS 11N. The Basic Rules of Nature
Stanford Introductory Seminar. Preference to freshmen. The development by physicists of descriptions of the behavior of matter on microscopic scales and scales characteristic of the Universe as a whole, including quantum mechanics, particle physics, and general relativity. Promising approaches that physicists are using to shed light on remaining mysteries, including string theory and M theory. Discussions are semiquantitative. Prerequisite: high school physics or equivalent. GER:DB-NatSci
3 units, Win (Susskind, L)

PHYSICS 15. The Nature of the Universe
The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of the Milky Way galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER:DB-NatSci
3 units, Aut (Romani, R), Sum (Staff)

PHYSICS 16. Cosmic Horizons
The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology, and the fate of the cosmos. GER:DB-NatSci
3 units, Win (Linde, A)

PHYSICS 17. Black Holes
Newton's and Einstein's theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER:DB-NatSci
3 units, Spr (Abel, T)

PHYSICS 18. Revolution in Concepts of the Cosmos
The evolution of concepts of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. Enrollment limited to 20.
1 unit, not given this year

PHYSICS 18N. Revolutions in Concepts of the Cosmos
Stanford Introductory Seminar. Preference to freshmen. The evolution of the concept of the cosmos and its origin from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. Enrollment limited to 20 in one section. GER:DB-NatSci
3 units, Win (Roodman, A)

PHYSICS 19. How Things Work: An Introduction to Physics
The principles of physics through familiar objects and phenomena, including airplanes, engines, refrigerators, lightning, radio, TV, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER:DB-NatSci
3 units, Aut (Manoharan, H)

PHYSICS 21. Mechanics and Heat
For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Prerequisite: high school algebra and trigonometry; calculus not required. GER:DB-NatSci
3 units, Aut (Linde, A)

PHYSICS 21S. Mechanics and Heat w/ laboratory
Equivalent to 21 and 22. GER:DB-NatSci
4 units, Sum (Fisher, G)

PHYSICS 22. Mechanics and Heat Laboratory
Pre- or corequisite: 21.
1 unit, Aut (Linde, A)

PHYSICS 23. Electricity and Optics
Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER:DB-NatSci
3 units, Win (Wojcicki, S)

PHYSICS 24. Electricity and Optics Laboratory
Focus is on electrodynamics circuits. Pre- or corequisite: 23.
1 unit, Win (Wojcicki, S)

PHYSICS 25. Modern Physics
Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER:DB-NatSci
3 units, Spr (Burchat, P)

PHYSICS 25S. Modern Physics with Laboratory
Equivalent to 25 and 26. GER:DB-NatSci
4 units, Sum (Fisher, G)

PHYSICS 26. Modern Physics Laboratory
Pre- or corequisite: 25.
1 unit, Spr (Burchat, P)

PHYSICS 28. Mechanics, Heat, and Electricity
For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: high school algebra and trigonometry. GER:DB-NatSci
6 units, Sum (Fisher, G)

PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics
Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER:DB-NatSci
6 units, Sum (Fisher, G)

PHYSICS 41. Mechanics
Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER:DB-NatSci
4 units, Win (Church, S)

PHYSICS 41N. Mechanics: Insights, Applications, and Advances
Stanford Introductory Seminar. Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41.
1 unit, Win (Abel, T)

PHYSICS 43. Electricity and Magnetism
Electrostatics, Coulomb's law, electric fields and fluxes, electric potential, properties of conductors, Gauss's law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday's law, Ampere's law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell's equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 or equivialent, and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER:DB-NatSci
4 units, Spr (Fisher, I)

PHYSICS 43N. Understanding Electromagnetic Phenomena
Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.
1 unit, Spr (Laughlin, R)

PHYSICS 44. Electricity and Magnetism Lab
(Formerly 56.) Pre- or corequisite: 43.
1 unit, Spr (Fisher, I)

PHYSICS 45. Light and Heat
Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: 41 or equivalent, and MATH 19 or 41, or consent of instructor. GER:DB-NatSci
4 units, Aut (Gratta, G), Sum (Staff)

PHYSICS 45N. Advanced Topics in Light and Heat
Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or consent of instructor.
1 unit, Aut (Susskind, L)

PHYSICS 46. Light and Heat Laboratory
Pre- or corequisite: 45.
1 unit, Aut (Gratta, G), Sum (Staff)

PHYSICS 50. Astronomy Laboratory and Observational Astronomy
Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER:DB-NatSci, DB-NatSci
3 units, Aut (Funk, S), Sum (Staff)

PHYSICS 59. Current Research Topics
Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.
1 unit, Aut (Michelson, P)

PHYSICS 61. Mechanics and Special Relativity
For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schodinger equation. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting to decide if course is appropriate; some students may benefit more from the 40 series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequisite MATH 42. GER:DB-NatSci
4 units, Aut (Blandford, R)

PHYSICS 63. Electricity, Magnetism, and Waves
Recommended for prospective Physics majors or those interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, Lagrangian mechanics, special relativity, and electricity and magnetism. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting of 61 to help students decide if course is appropriate; some students may benefit more from the 40 series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequsite: MATH 42. GER:DB-NatSci
4 units, Win (Allen, S)

PHYSICS 64. Advanced Electromagnetism Laboratory
Experimental work in mechanics, electricity and magnetism. Corequisite 63.
1 unit, Win (Allen, S)

PHYSICS 65. Thermodynamics and Foundations of Modern Physics
Recommended for students contemplating a major in Physics or interested in a more rigorous treatment of physics. The structure of classical physics including Newtonian mechanics, Lagrangian mechanics, special relativity, and electricity and magnetism; topics in heat and light and an introduction to modern physics. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting of 61 to help students decide if course is appropriate; some students may benefit more from the 40 series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequsite: MATH 42. GER:DB-NatSci
4 units, Spr (Fetter, A)

PHYSICS 67. Introduction to Laboratory Physics
Methods of experimental design, data collection and analysis, statistics, and curve fitting in a laboratory setting. Experiments drawn from electronics, optics, heat, and particle physics. Intended as preparation for PHYSICS 105, 107, 108. Lecture plus laboratory format. Required for 60 series Physics majors; recommended for 40 series students who intend to major in Physics. Corequisite: 65 or 43. (Fisher)

2 units, Spr (Pam, R)

PHYSICS 70. Foundations of Modern Physics
Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER:DB-NatSci

4 units, Aut (Kasevich, M)

PHYSICS 80N. The Technical Aspects of Photography
Stanford Introductory Seminar. Preference to freshmen and sophomores with some background in photography. How cameras record photographic images on film and electronically. Technical photographic processes to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students take photographs around campus. Prerequisite: high school physics.

3 units, Spr (Osheroff, D)

PHYSICS 84Q. The Rise of the Machines
Stanford Introductory Seminar. Preference to sophomores. Key experiments in the history of particle physics and astrophysics. Evolution and innovation in detector and accelerator technologies that enabled these experiments. The fundamental structure and interactions of matter. Recommended: some high school or introductory college physics.

3 units, Spr (Schindler, R)

PHYSICS 87N. The Physics of One: Nanoscale Science and Technology
Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high school physics. GER:DB-NatSci

3 units, Win (Manoharan, H)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy
For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of college physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER:DB-NatSci

4 units, Spr (Church, S)

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics
Analog electronics including Ohm's law, passive circuits and transistor and op amp circuits, emphasizing practical circuit design skills to prepare undergraduates for laboratory research. Short design project. Minimal use of math and physics, no electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 or 63.

3 units, Aut (Pam, R)

PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis
Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 or 60 series, and 70 and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM

4 units, Win (Kasevich, M)

PHYSICS 108. Intermediate Physics Laboratory III: Project
Small student groups plan, design, build, and carry out a single experimental project in low-temperature physics. Prerequisites 105, 107.

3 units, Win (Kapitulnik, A), Spr (Goldhaber-Gordon, D)

PHYSICS 110. Intermediate Mechanics
Lagrangian and Hamiltonian mechanics. Principle of least action, Galilean relativity, Lagrangian mechanical systems, Euler-Lagrange equations. Central potential, Kepler's problem, planetary motion. Scattering problems, disintegration, Rutherford scattering cross section. Harmonic motion in the presence of rapidly oscillating field. Poisson's brackets, canonical transformations, Liouville's theorem, Hamilton-Jacoby equation. Prerequisites: 41 or 61, and MATH 53

4 units, Spr (Kuo, C)

PHYSICS 112. Mathematical Methods of Physics
Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green's functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series. MATH 131.

4 units, Win (Kachru, S)

PHYSICS 113. Computational Physics
Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace's equation and Poisson's equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in 110, 121. Previous programming experience not required.

4 units, Spr (Cabrera, B)

PHYSICS 120. Intermediate Electricity and Magnetism
Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell's equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 43 or 63; concurrent or prior registration in MATH 52 and 53. Recommended: concurrent or prior registration in 112.

4 units, Win (Cabrera, B)

PHYSICS 121. Intermediate Electricity and Magnetism
Vector analysis, electrostatic fields, including multipole expansion. Dielectrics, static magnetic fields, magnetic materials. Maxwell's equation. Electromagnetic radiation. Special relativity and transformation between electric and magnetic fields. Plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation and their frequency and angular distributions. Scattering synchrotron and bremsstrahlung processes. Energy loss in water. Wave guides and cavities. Prerequisites: 120; concurrent or prior registration in MATH 131. Recommended: 112.

4 units, Spr (Petrosian, V)

PHYSICS 130. Quantum Mechanics
The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.

4 units, Aut (Kivelson, S)

PHYSICS 131. Quantum Mechanics
The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-

independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.

4 units, Win (Wacker, J)

PHYSICS 134. Advanced Topics in Quantum Mechanics
Variational principle, time-dependent perturbation theory, WKB approximation. Scattering theory: partial wave expansion, Born approximation. Nature of quantum measurement: EPR paradox, Bell's inequality, and Schrödinger's cat paradox. Additional topics may include relativistic quantum mechanics or quantum information science. Prerequisites: 130, 131.

4 units, Spr (Moler, K)

PHYSICS 152A. Introduction to Particle Physics I
(Same as PHYSICS 252A.) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter, particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.

4 units, Win (Dixon, L)

PHYSICS 152B. Introduction to Particle Physics II
(Same as PHYSICS 252B.) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.

3 units, Spr (Dixon, L)

PHYSICS 153B. Introduction to String Theory II: Open Strings and D-branes
Emergence of gauge theory and connections to particle physics. String thermodynamics and black holes. T-duality, string compactification, and stringy modifications of geometry. Prerequisites: 130, 131, and 153A.

4 units, given once only

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
Observed characteristics of stars and the Milky Way galaxy. Physical processes in stars and matter under extreme conditions. Structure and evolution of stars from birth to death. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure, interstellar medium, molecular clouds, HI and HII regions, star formation, and element abundances. Prerequisites: 40 or 60 series, and 70.

3 units, Win (Petrosian, V)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology
Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 or 60 series, and 70.

3 units, Spr (Wechsler, R)

PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem
Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.

1-9 units, Aut (Staff)

PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project
Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Win (Staff)

PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project
Completion of research and writing of a paper presenting methods used and results.

1-9 units, Spr (Staff)

PHYSICS 170. Thermodynamics, Kinetic Theory, and Statistical Mechanics
The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, and internal energy; entropy; reversibility; applications to various properties of matter; and absolute zero and low-temperature phenomena. Corequisite: 130.

4 units, Aut (Goldhaber-Gordon, D)

PHYSICS 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics
The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy; entropy; reversibility; applications to various properties of matter; absolute zero and low-temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Corequisite: 131.

4 units, Win (Zhang, S)

PHYSICS 172. Solid State Physics
Crystal structures and bonding in solids. X-ray diffraction. Lattice dynamics and thermal properties. Electronic structure of solids; transport properties of metals; quantum oscillations; charge density waves. Properties and applications of semiconductors. Phenomenology and microscopic theory of superconductivity. Prerequisites: 170, 171.

3 units, Spr (Manoharan, H)

PHYSICS 173B. Concepts in Condensed Matter Physics
Focus is on simple, archetypical examples. Topics include interaction and correlation, emergent order and symmetry breaking, new states of matter, pattern formation, and nonlinear dynamics in material systems. Prerequisite: introductory solid state or condensed matter physics.

1 unit, not given this year

PHYSICS 190. Independent Study
Preference to sophomores. Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN PHYSICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PHYSICS 204A. Seminar in Theoretical Physics
Topics of recent interest may include cosmology, black hole physics, and strong-weak coupling duality transformations.

3 units, Aut (Laughlin, R)

PHYSICS 204B. Seminar in Theoretical Physics
Topics including quantum computing, Berry phase, and quantum Hall effect.

3 units, Win (Doniach, S)

PHYSICS 205. Undergraduate Honors Research
Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHYSICS 210. Advanced Particle Mechanics
The Lagrangian and Hamiltonian dynamics of particles. Beyond small oscillations. Phase portraits, Hamilton-Jacoby theory, action-angle variables, adiabatic invariance. Nonlinear dynamical systems, continuous and discrete. Behavior near the fixed points, stability of solutions, attractors, chaotic motion. Transition to continuum mechanics. Prerequisite: 110 or equivalent.

3 units, Aut (Kahn, S)

PHYSICS 211. Continuum Mechanics
Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.
3 units, Win (Peskin, M)

PHYSICS 212. Statistical Mechanics
Principles, ensembles, statistical equilibrium. Thermodynamic functions, ideal and near-ideal gases. Fluctuations. Mean-field description of phase-transitions and associated critical exponents. One-dimensional Ising model and other exact solutions. Renormalization and scaling relations. Prerequisites: 130, 131, 171, or equivalents.
3 units, Spr (Susskind, L)

PHYSICS 216. Back of the Envelope Physics
Techniques such as scaling and dimensional analysis, useful to make order-of-magnitude estimates of physical effects in different settings. Goals is to promote a synthesis of physics through solving problems, some not included in a standard curriculum. Applications include properties of materials, fluid mechanics, geophysics, astrophysics, and cosmology. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.
3 units, Aut (Madejski, G)

PHYSICS 220. Classical Electrodynamics
Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121, 210, or equivalents; MATH 106 and 132.
3 units, Win (Tantawi, S)

PHYSICS 221. Classical Electrodynamics
Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121 or equivalent; MATH 106 and 132, or PHYSICS 210 .
3 units, Spr (Tantawi, S)

PHYSICS 230. Quantum Mechanics
Fundamental concepts. Introduction to Hilbert spaces and Dirac's notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The path integral formulation of quantum statistical mechanics. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems. Prerequisite: 131 or equivalent.
3 units, Aut (Shenker, S)

PHYSICS 231. Quantum Mechanics
Basis for higher level courses on atomic solid state and particle physics. Wigner-Eckart theorem and addition of angular momenta. Approximation methods for time-independent and time-dependent perturbations. Semiclassical and quantum theory of radiation, second quantization of radiation and matter fields. Systems of identical particles and many electron atoms and molecules. Prerequisite: 230.
3 units, Win (Shenker, S)

PHYSICS 232. Quantum Mechanics
Special topics. Elementary excitations in solids (the free electron gas, electronic band structure, phonons). Elementary scattering theory (Born approximation, partial wave analyses, resonance scattering). Relativistic single-particle equations. Dirac equation applied to central potentials, relativistic corrections, and nonrelativistic limits.
3 units, Spr (Dimopoulos, S)

PHYSICS 252A. Introduction to Particle Physics I
(Same as PHYSICS 152A.) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter, particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.
4 units, Win (Dixon, L)

PHYSICS 252B. Introduction to Particle Physics II
(Same as PHYSICS 152B.) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.
3 units, Spr (Dixon, L)

PHYSICS 260. Introduction to Astrophysics and Cosmology
The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: 110, 121, and 171, or equivalents.
3 units, Aut (Petrosian, V)

PHYSICS 262. Introduction to Gravitation
Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Weak field limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisite: 121 or equivalent including special relativity.
3 units, Spr (Michelson, P)

PHYSICS 275. Electrons in Nanostructures
The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, graphen, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.
3 units, alternate years, not given this year

PHYSICS 290. Research Activities at Stanford
Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.
1-3 units, Aut (Michelson, P)

PHYSICS 291. Practical Training
Opportunity for practical training in industrial labs. Arranged by student with the research adviser's approval. A brief summary of activities is required, approved by the research adviser.
3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHYSICS 293. Literature of Physics
Study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PHYSICS 294. Teaching of Physics Seminar
Required of teaching assistants in Physics in the year in which they first teach. Techniques of teaching physics by means of weekly

seminars, simulated teaching situations, observation of other teachers, and evaluation of in-class teaching performance.

1 unit, Aut (Pam, R)

PHYSICS 301. Astrophysics Laboratory
Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, Spr (Church, S)

PHYSICS 312. Basic Plasma Physics
For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.

3 units, Win (Kosovichev, A)

PHYSICS 321. Laser Spectroscopy
Theoretical concepts and experimental techniques. Absorption, dispersion, Kramers-Kronig relations, line-shapes. Classical and laser linear spectroscopy. Semiclassical theory of laser atom interaction: time-dependent perturbation theory, density matrix, optical Bloch equations, coherent pulse propagation, multiphoton transitions. High-resolution nonlinear laser spectroscopy: saturation spectroscopy, polarization spectroscopy, two-photon and multiphoton spectroscopy, optical Ramsey spectroscopy. Phase conjugation. Four-wave mixing, harmonic generation. Coherent Raman spectroscopy, quantum beats, ultra-sensitive detection. Prerequisite: 230. Recommended: 231.

3 units, Spr (Kasevich, M)

PHYSICS 323. Laser Cooling and Trapping
Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, not given this year

PHYSICS 330. Quantum Field Theory
Quantization of scalar and Dirac fields. Introduction to supersymmetry. Feynman diagrams. Quantum electrodynamics. Elementary electrodynamic processes: Compton scattering; e+e- annihilation. Loop diagrams and electron (g-2). Prerequisites: 130, 131, or equivalents.

3 units, Aut (Kallosh, R)

PHYSICS 331. Quantum Field Theory
Functional integral methods. Local gauge invariance and Yang-Mills fields. Asymptotic freedom. Spontaneous symmetry breaking and the Higgs mechanism. Unified models of weak and electromagnetic interactions. Prerequisite: 330.

3 units, Win (Kallosh, R)

PHYSICS 332. Quantum Field Theory
Theory of renormalization. The renormalization group and applications to the theory of phase transitions. Renormalization of Yang-Mills theories. Applications of the renormalization group of quantum chromodynamics. Perturbation theory anomalies. Applications to particle phenomenology.

3 units, Spr (Wacker, J)

PHYSICS 351. Standard Model of Particle Physics and Beyond
Group theory, symmetries, the standard model of particle physics, gauge hierarchy and the cosmological constant problem as motivations for beyond the standard model, introduction to supersymmetry, technicolor, extra dimension, split SUSY. Corequisite: 230.

3 units, Aut (Dimopoulos, S)

PHYSICS 352. Neutrino Physics
Neutrino masses and mixing. Kinematics tests for neutrino masses. Neutrino interactions, the number of light neutrino species. Solar and atmospheric neutrino anomalies. Artificial neutrino sources: reactors and particle accelerators. Majorana and Dirac neutrinos. Double-beta decay. Neutrinos in supernovae. Relic neutrinos. Neutrino telescopes. (Vogel)

3 units, not given this year

PHYSICS 360. Physics of Astrophysics
Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Win (Romani, R)

PHYSICS 361. Stellar and Galactic Astrophysics
Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean's mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Supernovae and compact sources. Structure of the Milky Way: disk and spiral arms; dark matter and the halo mass; central bulge or bar; and black hole. Prerequisite: 221 or equivalent. Recommended: 260, 360.

3 units, Spr (Romani, R)

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360.

3 units, not given this year

PHYSICS 363. Solar and Solar-Terrestrial Physics
Structure, mechanisms, and properties of the Sun's interior and atmosphere. Tools for solar observations; magnetic fields and polarimetry. Solar oscillations and helioseismology. Differential rotation and turbulent convection. Solar MHD, Alfven and magneto-acoustic waves. Solar cycle and dynamo. Magnetic energy release, reconnection, particle acceleration. Solar activity, sunspots, flares, coronal mass ejections; UV, X-ray, and high-energy particle emissions. The interaction of the solar wind with Earth's magnetosphere and its terrestrial effects; space weather. Prerequisite: 221 or equivalent.

3 units, not given this year

PHYSICS 364. Advanced Gravitation
Early universe cosmology. Topics at the interface between cosmology and gravity, particle theory, and speculative theories of physics at the Planck scale such as string theory. Inflationary cosmology and generation of density pertubations, models of baryogenesis, big bang nucleosynthesis, and speculations about the Universe at the Planck scale. Experiments in the near future that may extend or revise current notions.

3 units, Win (Silverstein, E)

PHYSICS 370. Theory of Many-Particle Systems
Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green's functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Prerequisite: 232.

3 units, Aut (Zhang, S)

PHYSICS 372. Condensed Matter Theory I
Fermi liquid theory, many-body perturbation theory, response function, functional integrals, interaction of electrons with impurities. Prerequisite: APPPHYS 273.

3 units, alternate years, not given this year

PHYSICS 373. Condensed Matter Theory II
Superfluidity and superconductivity. Quantum magnetism. Prerequisite: 372.
3 units, not given this year

PHYSICS 376. Superfluidity and Superconductivity
Introduction to superfluid He: two-fluid model, phonons, and rotons, Feynman description, vortices, Bogoliubov theory. Phenomenology of superconductors: London description, Ginzburg-Landau model, type-I vs. type-II materials, Josephson effects, thin films, Kosterlitz-Thouless behavior, electron-phonon coupling. BCS theory: bulk systems, tunneling, strong-coupling materials, dirty and gapless superconductivity, fluctuation effects, Ginzburg criterion. Recommended: APPPHYS 272, 273, or equivalents. (Kivelson)
3 units, Win (Laughlin, R)

PHYSICS 450. PARTICLE PHYSICS
General properties of proton-proton collisions at 14 TeV. Capabilities of the LHC experiments. QCD predictions for hard-scattering reactions: parton distributions, radiative corrections, jets, parton shower. Methods for computing multijet cross sections. Properties of W, Z, top quarks, and Higgs bosons at the LHC. Methods for discovering new heavy particles. May be repeated for credit. Prerequisites: 262, 330, 331, and 332.
3 units, Aut (Peskin, M)

PHYSICS 451. Physics Beyond the Standard Model
Naturalness and the hierarchy problem. Technicolor and extended technicolor. The supersymmetric standard model, supersymmetric unification, and dark matter candidates. Large extra dimensions and TeV scale gravity. The cosmological constant problem, Weinberg's solution, and the landscape. Split supersymetry. May be repeated for credit. Prerequisite: 330.
3 units, Win (Dimopoulos, S)

PHYSICS 452. Supersymmetry, Supergravity, and Cosmology
Issues in supersymmetry and supergravity related to cosmology. The current status of dark energy in supersymmetric theories. Available cosmological data on the early universe and possible supergravity or string theory models explaining the data. A tension between the light gravitino and known mechanisms of moduli stabilization in string cosmology. Future data in cosmology and from the LHC as tests of fundamental physics. May be repeated for credit. Prerequisites: 262, 330, 331, and 332.
3 units, Spr (Kallosh, R)

PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology
Content varies depending on participant interest. This year, topics include: large-scale structure formation, the formation and structure of dark matter halos, and N-body simulations; alternative dark matter models; galaxy clustering, the halo model, and halo occupation statistics; galaxy formation models and galaxy evolution; and constraints on cosmological parameters and galaxy formation from large surveys.
3 units, alternate years, not given this year

PHYSICS 475. Advanced Topics in Condensed Matter Physics
Current literature and advanced topics. Journal club format. Content varies depending on interests of participants. May be repeated for credit. Recommended: APPPHYS 272, 273, or equivalents.
1-3 units, not given this year

PHYSICS 490. Research
Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLITICAL SCIENCE (POLISCI) COURSES

For information on undergraduate and graduate programs in the Department of Political Science, see the "Political Science" section of this bulletin.

UNDERGRADUATE COURSES IN POLITICAL SCIENCE

Courses numbered below 100 are introductory. Courses numbered from 100-199 are intermediate undergraduate lecture courses. Courses numbered 200-299 are advanced undergrduate seminar courses.

POLISCI 1. Introduction to International Relations
Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER:DB-SocSci
5 units, Aut (Tomz, M), Spr (Krasner, S)

POLISCI 2. Introduction to American National Government and Politics
The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci
5 units, Win (Fiorina, M; Frisby, T)

POLISCI 3. Introduction to Political Philosophy
(Same as ETHICSOC 30, PHIL 30, PUBLPOL 103A.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas
5 units, Spr (Hussain, N)

POLISCI 4. Introduction to Comparing Political Systems
Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Diaz-Cayeros, A)

POLISCI 12N. Democracy and Inequality in Latin America
Stanford Introductory Seminar. Preference to freshmen. The relationship between inequality, attributable to factors such as education, assets, land tenure and family structure, and the spread of democracy. The role of colonial institutions founded on the extraction of mineral resources and plantation labor relations; the deficit in political institutions that often led to the exclusion of the poor; the lack of rule of law and enforcement of property rights; the slow expansion of educational systems; the links between enfranchisement and literacy requirements; and the role of military coups and the frequent interruption of democratic politics.
5 units, Spr (Diaz-Cayeros, A)

POLISCI 13N. 2008 Presidential Election
Stanford Introductory Seminar. Preference to freshmen. Analytical framework for understanding the U.S. presidential election campaign. Focus is on historical election results, survey data, and experimental data. Concepts from political science, such as party identification and the spatial voting model, and statistics, such as sampling error and survey bias. GER:DB-SocSci
5 units, Aut (Jackman, S)

POLISCI 16N. Politics of Economic Development
Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:DB-SocSci
5 units, Win (Tomz, M)

POLISCI 41Q. Building Democracy after Conflict: Iraq in Comparative Perspective
Stanford Introductory Seminar. Preference to sophomores. Problems of post-conflict situations, the conditions for building democracy and how they relate to post-conflict situations, and historical experiences such as Germany and Japan. Iraq as a principal case study.
5 units, Win (Diamond, L)

POLISCI 43N. Oil, Regime Change, and Conflict
Stanford Introductory Seminar. Preference to sophomores. Relationships among dependence on oil export, democratization and authoritarian rule, and rising conflict. Case studies including Venezuela, Nigeria, Iran, Iraq, Chad, and Indonesia. The resource curse: the impact of oil on a country's political economy. The relationship between such economic dependence and regime type. Why oil exporting countries are more prone to conflict and civil war than other countries. Research paper.
5 units, Aut (Karl, T)

POLISCI 110A. Theory and Practice in International Relations
Major approaches to understanding international politics including realism, liberalism, and constructivism, and their utility in explaining events and issues over the last century including the WWI and WWII, the Cold War, trade and globalization, and transnational terrorism. GER:DB-SocSci
5 units, not given this year

POLISCI 110B. Strategy, War, and Politics
Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:DB-SocSci
5 units, not given this year

POLISCI 110C. America and the World Economy
(Same as POLISCI 110X. Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM
5 units, Win (Goldstein, J)

POLISCI 110D. War and Peace in American Foreign Policy
(Same as POLISCI 110Y. Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, WIM
5 units, Spr (Schultz, K)

POLISCI 110X. America and the World Economy
(Same as POLISCI 110C. Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci
5 units, Win (Goldstein, J)

POLISCI 110Y. War and Peace in American Foreign Policy
(Same as POLISCI 110D. Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci
5 units, Spr (Schultz, K)

POLISCI 111. Peace Studies
(Same as PSYCH 165.) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci
5 units, not given this year

POLISCI 111D. British Politics
The impact on the world's oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Dorfman, G)

POLISCI 112K. Korea and East Asian International Relations
Analytical perspectives on the sources of stability and conflict in East Asia, and empirical evidence gathered between the 19th-century clash of civilizations up to the present. Topics include U.S. strategy in East Asia, the impact of the rise of China on regional security, nuclear proliferation, territorial disputes, nationalism, economic interdependence and regionalism, and the broader global security environment.
5 units, Win (Park, S)

POLISCI 113F. The United Nations and Global Governance
The role of international institutions and organizations in the areas of health, environment, security, trade, development, and human rights. Evaluation, accountability, participation, legitimacy, and autonomy. GER:DB-SocSci
5 units, not given this year

POLISCI 114D. Democracy, Development, and the Rule of Law
(Same as IPS 230, INTNLREL 114D, POLISCI 314D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. GER:DB-SocSci
5 units, Aut (Stoner-Weiss, K; McFaul, M)

POLISCI 114S. International Security in a Changing World
(Same as IPS 241.) The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci
5 units, Win (Blacker, C; Crenshaw, M)

POLISCI 116. History of Nuclear Weapons
(Same as HISTORY 103E.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci
5 units, Spr (Holloway, D)

POLISCI 117. Political Economy of East Asia
(Formerly 211.) Comparative and international political economy of E.and S.E. Asia. Industrial development and the Asian miracle, economic integration, regional cooperation, the Asian financial crisis, and contemporary challenges.
5 units, Spr (Lipscy, P)

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe
First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one, two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Recommended: 2. GER:DB-SocSci
5 units, not given this year

POLISCI 120B. Parties, Voting, the Media, and Elections
The electoral process in the U.S. and patterns of voting behavior. Topics include the causes and structure of partisan identity, public opinion, the decision over whether to vote, and candidate preference among the electorate. Materials on campaigns, candidates, and research on determinants of outcome. The function of the electoral system as a whole and proposals for reform. GER:DB-SocSci
5 units, Aut (Segura, G)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts
How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. WIM GER:DB-SocSci, WIM
5 units, Spr (Rutten, A)

POLISCI 121. Urban Politics
(Same as SOC 149X, SOC 249X, URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci
5 units, not given this year

POLISCI 122. Introduction to American Law
(Same as AMSTUD 179, LAWGEN 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci
3-5 units, Aut (Friedman, L)

POLISCI 123. Politics and Public Policy
(Same as PUBLPOL 101.) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:DB-SocSci
5 units, Spr (Frisby, T)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System
The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. WIM GER:DB-SocSci, WIM
5 units, Aut (Rutten, A)

POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties
The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci
5 units, Win (Rutten, A)

POLISCI 125V. Minority Representation and the Voting Rights Act
Focus is on whether and how racial and ethnic minorities including African Americans, Asian Americans, and Latinos are able to organize and press their demands on the political system. Topics include the political behavior of minority citizens, the strength and effect of these groups at the polls, the theory and practice of group formation among minorities, the responsiveness of elected officials, and the constitutional obstacles and issues that shape these phenomena.
5 units, Win (Segura, G)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700
(Same as POLISCI 330B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:DB-Hum
5 units, not given this year

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power
(Same as POLISCI 330C.) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey. GER:DB-Hum
5 units, Spr (Stone, P)

POLISCI 133. Ethics and Politics of Public Service
(Same as ETHICSOC 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci
5 units, given next year

POLISCI 134. Democracy and the Communication of Consent
(Same as COMM 136, COMM 236.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci
4-5 units, not given this year

POLISCI 136. Philosophical Issues Concerning Race and Racism
(Same as PHIL 177.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul
4 units, not given this year

POLISCI 136R. Introduction to Global Justice
(Same as ETHICSOC 136R, INTNLREL 136R, POLISCI 336.) Recent work in political theory on the ethics of international relations. Topics include human rights, global economic justice, and the problem of global poverty.
5 units, Spr (Staff)

POLISCI 136S. Justice
(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
4-5 units, Aut (Cohen, J)

POLISCI 137R. Justice at Home and Abroad: Civil Rights in the 21st Century
(Same as EDUC 261X, ETHICSOC 137R, POLISCI 337R.) Focus is on theories of justice. How the core ideals of freedom, equality, and security animate theories which John Rawls considers the first virtue of social institutions. Topics include the U.S. Constitution as a legal framework for the operation of these ideals, civil rights legislation and litigation as the arena of tensions between those ideals, and how ideas of justice function both at home and abroad to impact civil liberties in today's war on terror.
5 units, Aut (Reich, R; Steyer, J)

POLISCI 140. Political Economy of Development
Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Diaz-Cayeros, A)

POLISCI 140C. The Comparative Political Economy of Post-Communist Transitions
Dominant theoretical perspectives of comparative democratization and marketization; focus is on the political economy of transition in Eastern Europe and Eurasia while comparing similar processes in Latin America and Asia. Topics include: meanings of democracy, synergy between democracies and markets, causes of the collapse of communism, paths to political liberalization and democracy, civil society, constitutions, parliaments, presidents, the rule of law, electoral systems, market requirements, strategies of reform, the Russian experience of market building, exporting democracy and the market, and foreign aid and assistance.

5 units, Win (Stoner-Weiss, K)

POLISCI 140L. China in World Politics
The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Miller, L)

POLISCI 141. The Global Politics of Human Rights
The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike, and the rights of women in S. Africa. GER:DB-SocSci

5 units, Win (Karl, T)

POLISCI 142. Politics of Western Europe
Major challenges to European states since WWII. Topics include: the ramification of the differences in Western European political systems; the explanations and consequences of the emergence of the EU; and how European states have reacted to immigration. Theories in comparative politics and political experiences in UK, France, Germany, and Italy. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Kuo, A)

POLISCI 144T. Democracies and Dictatorships
Social scientific findings and debates; cross-sectional approach. What accounts for the emergence of democracy; under what conditions are democracies stable; why are so many developing countries ruled by dictators; why do rulers who destroy their own societies survive for so long; and what accounts for the breakdown of autocratic regimes?

5 units, Spr (Magaloni, B)

POLISCI 147. Comparative Democratic Development
Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. (Diamond) GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 149S. Islam and the West
Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Milani, A)

POLISCI 150A. Political Methodology I
(Same as POLISCI 350A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math

5 units, Aut (Wand, J)

POLISCI 150B. Political Methodology II
(Same as POLISCI 350B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math

5 units, Win (Rivers, D)

POLISCI 150C. Political Methodology III
(Same as POLISCI 350C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Jackman, S)

POLISCI 151B. Data Analysis for Political Science
Operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER:DB-Math

5 units, Spr (Jackman, S)

POLISCI 152. Introduction to Game Theoretic Methods in Political Science
(Same as POLISCI 352.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

POLISCI 157. Sampling and Surveys
(Same as POLISCI 357.) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.

5 units, Spr (Rivers, D)

POLISCI 210R. International Conflict: Management and Resolution
(Same as IPS 250, POLISCI 310R. Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

5 units, Win (Weiner, A; Holloway, D)

POLISCI 214. The Politics of Nuclear Proliferation
(Same as POLISCI 314. Graduate students register for 314.) The origins and effects of the spread of nuclear weapons at international and domestic levels. The role of faulty intelligence, clandestine proliferation networks, and nuclear assistance from third parties on proliferators' programs. Case studies of relevant programs, including Iran and North Korea.

5 units, Win (Montgomery, A)

POLISCI 215. Explaining Ethnic Violence
What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER:DB-SocSci

5 units, Aut (Fearon, J)

POLISCI 216E. International History and International Relations Theory
(Same as HISTORY 202, HISTORY 306E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Aut (Holloway, D)

POLISCI 217. International Organizations
(Same as POLISCI 317. Graduate students register for 317.) The role of international organizations in interstate cooperation. Theoretical approaches and applications. The UN, International Monetary Fund,

World Bank, World Trade Organization, and regional and supranational organizations.

5 units, Spr (Lipscy, P)

POLISCI 218. U.S. Relations in Iran
The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci

5 units, Aut (Milani, A)

POLISCI 219. Directed Reading and Research in International Relations
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 221. Tolerance and Democracy
The value of tolerance and its implications for the principles and practices of democracy. Tolerance as understood by political philosophers and citizens. Readings include: John Stuart Mill's On Liberty, Isaiah Berlin's Two Concepts of Liberty, and modern studies of public opinion. Topics include: ideas and liberty; value pluralism; the interplay of authority and obedience; the role of political elites and mass publics in democratic societies; multiculturalism. Principal forms of value conflict in contemporary liberal democracies. GER:DB-Hum

5 units, Win (Sniderman, P)

POLISCI 221F. Race and American Politics
How the issue of race has helped define the modern era of American politics. Major theories of political cleavage over public policies dealing with race.

5 units, not given this year

POLISCI 222R. Tolerance and Prejudice
Focus is on the contemporary strain in U.S. and W. European liberal democratic politics over accommodation of racial, ethnic, and religious diversity and the major threads of current political discourse including pluralism, diversity, prejudice, multiculturalism, and tolerance. GER:DB-SocSci

5 units, not given this year

POLISCI 222S. Topics in Constitutional History
(Same as HISTORY 251G.) Ideas of rights in American history emphasizing the problem of defining constitutional rights, the free exercise of religion, freedom of expression, and the contemporary debate over rights talk and the idiom of human rights. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rakove, J)

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World
How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America's proper role in the world? Prerequisite: senior standing. GER:DB-SocSci

5 units, Aut (Joffe, J)

POLISCI 227R. Polarized Politics and Special Interest Groups
The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci

5 units, Spr (Wand, J)

POLISCI 229. Directed Reading and Research in American Politics
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 230A. Classical Seminar: Origins of Political Thought
(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, POLISCI 330A.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

5 units, Win (Ober, J)

POLISCI 231S. Contemporary Theories of Justice
Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. WIM GER:DB-Hum, DB-SocSci, EC-EthicReas

5 units, not given this year

POLISCI 235. Politics and Religion
Theories about the proper relationship between church and state. Court cases and policy debates.

5 units, Win (Stone, P)

POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
The historical development and modern structure of civil society emphasizing philanthropy and the nonprofit sector. What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? How do nongovernmental organizations operate domestically and globally? Readings in political philosophy, political sociology, and public policy.

5 units, not given this year

POLISCI 237. Models of Democracy
(Same as CLASSHIS 137, CLASSHIS 237, COMM 212, COMM 312, POLISCI 337.) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, Spr (Fishkin, J; Ober, J; Luskin, R)

POLISCI 239. Directed Reading and Research in Political Theory
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 240T. American Efforts at Promoting Democracy Abroad: Theory and Reality
Theoretical and intellectual debates about democracy promotion with focus on realism versus liberalism. The evolution of these debates with attention to the Cold War, the 90s, and American foreign policy after 9/11. Tools for and bureaucratic struggles over how to promote democracy. Contemporary case studies.

5 units, Spr (McFaul, M)

POLISCI 242. Political Economy of Oil and Other Resources
Political and economic determinants of oil and resource policies in developing countries, and their impact on world markets. Interaction between states and extractive industries, challenges of resource wealth management, and causal links between resource dependency and institutions. Is there a resource curse? Do mineral rents hinder democracy and development? Why is resource nationalism on the rise again? Why are there such high rents in oil extraction? Limited enrollment. Prerequisite: senior standing.

5 units, Spr (Monaldi Marturet, F)

POLISCI 243R. Research Seminar in Democratization and Human Rights
Goal is to produce a minimum 30-page paper based on field research abroad. Students prepare research problem statement, meet individually with the professor, and circulate drafts for class comment. Graduate students should register for directed reading under the professor's name. GER:DB-SocSci

5 units, Aut (Karl, T)

POLISCI 245R. Politics in Modern Iran
Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Milani, A)

POLISCI 247R. Politics and Economics in Democracies
Comparative political economy. Why do some countries have larger welfare states than others? Why do some countries provide collective goods more effectively than others? Prerequisite: senior standing. WIM

5 units, Spr (Staff)

POLISCI 247V. Elections and Redistribution

5 units, Spr (Magaloni, B)

POLISCI 248. Mexican Politics
Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime's incentives to redress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypothesis testing with empirical data. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Diaz-Cayeros, A)

POLISCI 248S. Latin American Politics
Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic polices. The nature of this dual transformation. GER:DB-SocSci

5 units, Win (Magaloni, B)

POLISCI 249. Directed Reading and Research in Comparative Politics
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 299A. Senior Project
Students conduct independent research work towards a senior honors thesis. See "Honors Program" above.

1-5 units, Aut (Staff)

POLISCI 299B. Senior Project
Students conduct independent research work towards a senior honors thesis. See "Honors Program" above.

1-5 units, Win (Staff)

POLISCI 299C. Senior Project
Students conduct independent research work towards a senior honors thesis. See "Honors Program" above.

1-5 units, Spr (Staff)

POLISCI 299Q. Junior Research Seminar
Required of students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.

2 units, Aut (Rutten, A), Win (Rutten, A), Spr (Rutten, A)

POLISCI 299R. Senior Research Seminar
Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design. WIM WIM

3 units, Aut (Rutten, A)

POLISCI 299S. Senior Honors Tutorial
Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.

2 units, Win (Rutten, A)

GRADUATE COURSES IN POLITICAL SCIENCE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

POLISCI 310A. International Relations Theory, Part I
First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.

5 units, Win (Schultz, K)

POLISCI 310B. International Relations Theory, Part II
Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.

5 units, Aut (Tomz, M)

POLISCI 310C. Research in International Relations
Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.

5 units, Spr (Goldstein, J)

POLISCI 310R. International Conflict: Management and Resolution
(Same as IPS 250, POLISCI 210R. Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

5 units, Win (Weiner, A; Holloway, D)

POLISCI 311A. Workshop in International Relations
For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, Aut (Goldstein, J; Tomz, M)

POLISCI 311B. Workshop in International Relations
For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, Win (Schultz, K; Sagan, S)

POLISCI 311C. Workshop in International Relations
Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, not given this year

POLISCI 312S. Managing Global Complexity
(Same as IPS 201.) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.

3 units, Spr (Krasner, S; Stedman, S)

POLISCI 314. The Politics of Nuclear Proliferation
(Same as POLISCI 214. Graduate students register for 314.) The origins and effects of the spread of nuclear weapons at international and domestic levels. The role of faulty intelligence, clandestine proliferation networks, and nuclear assistance from third parties on proliferators' programs. Case studies of relevant programs, including Iran and North Korea.

5 units, Win (Montgomery, A)

POLISCI 314D. Democracy, Development, and the Rule of Law
(Same as IPS 230, INTNLREL 114D, POLISCI 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Stoner-Weiss, K; McFaul, M)

POLISCI 314S. Decision Making in U.S. Foreign Policy
(Same as IPS 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

POLISCI 316. International History and International Relations Theory
(Same as HISTORY 202, HISTORY 306E, POLISCI 216E.) The

relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.

5 units, Aut (Holloway, D)

POLISCI 317. International Organizations
(Same as POLISCI 217. Graduate students register for 317.) The role of international organizations in interstate cooperation. Theoretical approaches and applications. The UN, International Monetary Fund, World Bank, World Trade Organization, and regional and supranational organizations.

5 units, Spr (Lipscy, P)

POLISCI 319. Directed Reading in International Relations
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 323R. The Press and the Political Process
(Same as COMM 160, COMM 260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, Win (Iyengar, S)

POLISCI 323S. Analysis of Political Campaigns
(Same as COMM 162, COMM 262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged?

4-5 units, Aut (Iyengar, S)

POLISCI 324. Graduate Seminar in Political Psychology
(Same as COMM 308.) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.

1-3 units, Aut (Krosnick, J), Win (Krosnick, J), Spr (Krosnick, J)

POLISCI 325. Seminar in Law and Politics
Normative and positive literature concerning the relation of law and politics. Literature in political science and political aspects of judicial decision making. Topics include classic questions regarding judicial review of legislation and its ramifying jurisprudential issues.

3-5 units, Win (Ferejohn, J)

POLISCI 326. Race and Racism in American Politics
Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.

5 units, Aut (Segura, G)

POLISCI 327. Minority Behavior and Representation
Politics of minorities in the U.S. Topics include: historic and contemporary struggles of Latinos, African Americans, and gays and lesbians for political power and social acceptance; group-level public opinion and electoral behavior; scholarship on group influence in the policy making process and policy issues of importance; and the jurisprudence shaping minority political access and civil rights.

5 units, Win (Segura, G)

POLISCI 329. Directed Reading and Research in American Politics
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 330A. Classical Seminar: Origins of Political Thought
(Same as CLASSHIS 133, CLASSHIS 333, HUMNTIES 321, POLISCI 230A.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

5 units, Win (Ober, J)

POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700
(Same as POLISCI 130B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science.

5 units, not given this year

POLISCI 330C. History of Political Thought III: Freedom, Reason, and Power
(Same as POLISCI 130C.) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey.

5 units, Spr (Stone, P)

POLISCI 331. High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests
(Same as CLASSHIS 332.) Normative political theory combined with positive political theory to better explain how major texts may have responded to and influenced changes in formal and informal institutions. Emphasis is on historical periods in which catastrophic institutional failure was a recent memory or a realistic possibility. Case studies include Greek city-states in the classical periodand the northern Atlantic community of the 17th and 18th centuries including upheavals in England and the American Revolutionary era.

4-5 units, Win (Ober, J; Weingast, B)

POLISCI 331S. Politics and Collective Action
(Same as IPS 206A, PUBLPOL 204A.) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applicable to collective action problems in any realm, but focus is on practical examples from environmental management.

4 units, Spr (Oleson, K)

POLISCI 332. Graduate Seminar: John Rawls's Political Philosophy
(Same as PHIL 372D.) Leading ideas in *A Theory of Justice*, *Political Liberalism*, and *The Law of Peoples*.

5 units, not given this year

POLISCI 334. Research Workshop: Philanthropy and Civil Society
(Same as EDUC 374, SOC 374.) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

1-3 units, Aut (Reich, R; Meverson, D), Win (Reich, R; Meyerson, D), Spr (Reich, R; Meyerson, D)

POLISCI 336. Introduction to Global Justice
(Same as ETHICSOC 136R, INTNLREL 136R, POLISCI 136R.) Recent work in political theory on the ethics of international relations. Topics include human rights, global economic justice, and the problem of global poverty.

5 units, Spr (Staff)

POLISCI 336M. Marx and Weber
(Same as PHIL 336.) How Marx and Weber each developed theories to account for the political problems of unfreedom, inequality, oppression, and bureaucratization; investigated the extent to which such problems could be mitigated or resolved; and believed that social science could contribute to understanding the modern world and efforts to change it. Their works with reference to politics, human agency, social change, and the role of knowledge.

4 units, Spr (Satz, D)

POLISCI 336T. Religion and the Constitution
(Same as PHIL 374D. Same as LAW 569.) Issues of religious toleration in political theory and in American constitutional law. Topics include: whether religion merits special the special

constitutional solicitude provided by the First Amendment's religion clauses; religion as distinct from culture, morality, and philosophy as understood for constitutional purposes; the tensions between ensuring free exercise and avoiding religious establishment; cases for and against free exercise exemptions; and whether the religion clauses can be understood as serving a single fundamental value such as liberty,equality, or neutrality. Readings from political and constitutional theory including Bodin, Locke, Madison, Jefferson, Rawls, Nussbaum, McConnell, Okin, Choper, Hamburger, and constitutional cases.

3-5 units, Win (Cohen, J; Sullivan, K)

POLISCI 337. Models of Democracy
(Same as CLASSHIS 137, CLASSHIS 237, COMM 212, COMM 312, POLISCI 237.) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, Spr (Fishkin, J; Ober, J; Luskin, R)

POLISCI 337R. Justice at Home and Abroad: Civil Rights in the 21st Century
(Same as EDUC 261X, ETHICSOC 137R, POLISCI 137R.) Focus is on theories of justice. How the core ideals of freedom, equality, and security animate theories which John Rawls considers the first virtue of social institutions. Topics include the U.S. Constitution as a legal framework for the operation of these ideals, civil rights legislation and litigation as the arena of tensions between those ideals, and how ideas of justice function both at home and abroad to impact civil liberties in today's war on terror.

5 units, Aut (Reich, R; Steyer, J)

POLISCI 338E. The Problem of Evil in Literature, Film, and Philosophy
(Same as FRENGEN 265.) Conceptions of evil and its nature and source, distinctions between natural and moral evil, and what belongs to God versus to the human race have undergone transformations reflected in literature and film. Sources include Rousseau's response to the 1755 Lisbon earthquake; Hannah Arendt's interpretation of Auschwitz; Günther Anders' reading of Hiroshima; and current reflections on looming climatic and nuclear disasters. Readings from Rousseau, Kant, Dostoevsky, Arendt, Anders, Jonas, Camus, Ricoeur, Houellebeck, Girard. Films by Lang, Bergman, Losey, Hitchcock.

3-5 units, Spr (Dupuy, J)

POLISCI 338J. Hobbes and Rousseau
(Same as PHIL 338.) On human nature, freedom, equality, and political authority in Hobbes's *Leviathan* and Rousseau's *Discourse on Inequality* and *Social Contract*.

3 units, Aut (Cohen, J)

POLISCI 339. Directed Reading and Research in Political Theory
May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern
(Same as HISTORY 378A.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, not given this year

POLISCI 348R. Workshop: China Social Science
(Same as SOC 368W.) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut (Walder, A; Zhou, X; Oi, J), Win (Walder, A; Zhou, X; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)

POLISCI 349. Directed Reading and Research in Comparative Politics
May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 350A. Political Methodology I
(Same as POLISCI 150A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.

5 units, Aut (Wand, J)

POLISCI 350B. Political Methodology II
(Same as POLISCI 150B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses.

5 units, Win (Rivers, D)

POLISCI 350C. Political Methodology III
(Same as POLISCI 150C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Jackman, S)

POLISCI 351A. Foundations of Political Economy
(Same as POLECON 680.) Introduction to political economy with an emphasis on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.

4 units, Aut (Hatfield, J)

POLISCI 351B. Economic Analysis of Political Institutions
(Same as POLECON 681.) Applying techniques such as information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations of microeconomic analysis and game theory to political behavior and institutions. Applicatoins include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

4 units, Spr (Shotts, K)

POLISCI 351C. Testing Models of Governmental Decision Making
(Same as POLECON 682.) Applications of formal models to several stages of decision making in the U.S. national government, with an emphasis on the legislative branch. Topics include strategies of committees, roll call voting, the budget process, policy formation, effects of special rules, congressional-presidential relations, and congressional-agency relations. Prerequisites: POLECON 680/POLISCI 351A and POLECON 681/POLISCI 351B.

4 units, not given this year

POLISCI 352. Introduction to Game Theoretic Methods in Political Science
(Same as POLISCI 152.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

POLISCI 353A. Workshop in Statistical Modeling
Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.

1-5 units, Aut (Wand, J)

POLISCI 353B. Workshop in Statistical Modeling
Continuation of 353A. Prerequisite: 353A.

1-5 units, Win (Wand, J)

POLISCI 353C. Workshop in Statistical Modeling
Continuation of 353A. May be repeated for credit. Prerequisite: 353A.

1-5 units, Spr (Wand, J)

POLISCI 357. Sampling and Surveys
(Same as POLISCI 157.) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.
5 units, Spr (Rivers, D)

POLISCI 362. New Economics of Organization
Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.
5 units, Spr (Weingast, B)

POLISCI 364. Theories of Political Institutions
(Same as POLECON 664.) Organized activity as it reflects the organization of political life. Eclectic and interdisciplinary. Emphasis is on political institutions and formal organizations, and the norms, expectation, and routines characteristic of informal political structure.
4 units, Win (Moe, T)

POLISCI 365. Organizational Decision Making
Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts: public agencies and firms.
5 units, not given this year

POLISCI 369. Directed Reading and Research in Political Organizations
Advanced individual study in public administration.
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 400. Dissertation
1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop
(Same as COMM 310.) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See http://mapss.stanford.edu. May be repeated for credit.
1 unit, Aut (Jackman, S), Win (Jackman, S), Spr (Jackman, S)

POLISCI 403. International Conflict Resolution Colloquium
(Same as PSYCH 283. Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.
1 unit, Win (Weiner, A; Holloway, D; Ross, L)

POLISCI 404. Dispute Resolution in International Economic Law
(Same as LAW 356.) Topics include: theoretical work on international trade and investment disputes; empirical work on WTO dispute resolution and the efficacy of developing country participation; and legal analysis of current, prominent disputes in the WTO and under international investment treaties. Substantial paper required. May be repeated for credit.
1 unit, Aut (Goldstein, J; Sykes, A), Win (Goldstein, J; Sykes, A)

POLISCI 420A. Approaches to the Study of American Politics
Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.
5 units, Aut (Wand, J)

POLISCI 420B. Topics in American Political Behavior
For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.
5 units, Win (Sniderman, P)

POLISCI 420C. American Political Institutions
Field seminar. Major theoretical perspectives, controversies, and literature on the substance of American politics, including Congress, the Presidency, federalism, bureaucracy, and the courts. Preparation for performing publishable research. Prerequisites: 420A,B.
5 units, Spr (Moe, T)

POLISCI 422. Campaigns, Elections, and Public Opinion
Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.
2-5 units, Aut (Fiorina, M; Sniderman, P), Win (Sniderman, P; Fiorina, M), Spr (Sniderman, P; Fiorina, M)

POLISCI 436. Rational Choice
The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality.
5 units, Spr (Stone, P)

POLISCI 440A. Theories in Comparative Politics
Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.
5 units, Aut (Magaloni, B)

POLISCI 440B. Political Economy of Development
(Same as HISTORY 378E.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.
5 units, Win (Haber, S)

POLISCI 440C. Methods in Comparative Politics
Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.
5 units, Spr (Jusko, K)

POLISCI 440D. Workshop in Comparative Politics
Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.
1-5 units, Aut (Rodden, J; Jusko, K), Win (Rodden, J; Jusko, K), Spr (Rodden, J; Jusko, K)

POLISCI 443T. Approaches to Chinese Politics
Major secondary literature on Chinese politics, involving the evolution of theoretical concepts and social scientific approaches characterizing the field. Subjects include changes made to defining fundamental issues of Chinese political theory, and the implications of shifts in research methods and analytical tools. Prerequisite: basic knowledge of politics of post-1949 China.
5 units, Spr (Oi, J)

POLISCI 444. Comparative Political Economy: Advanced Industrial Societies
Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.
3-5 units, given next year

OVERSEAS STUDIES COURSES IN POLITICAL SCIENCE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BEIJING POLITICAL SCIENCE COURSES

OSPBEIJ 47. Institutional Change in Reform China
5 units, Aut (Oi, J)

OSPBEIJ 66. Essentials of China's Criminal Justice System
5 units, Aut (Wang, S)

BERLIN POLITICAL SCIENCE COURSES

OSPBER 15. Shifting Alliances? The European Union and the U.S.
4-5 units, Win (Brueckner, U)

OSPBER 115X. The German Economy: Past and Present
4-5 units, Aut (Klein, I)

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU
4-5 units, Aut (Brueckner, U)

FLORENCE POLITICAL SCIENCE COURSES

OSPFLOR 61. Europe and U.S. Foreign Policy
5 units, Aut (Schultz, K)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union
5 units, Aut (Morlino, L)

OSPFLOR 97. Human Rights, Justice and Terrorism: Is the World Community Prepared to Prevent a Catastrophe?
4 units, Spr (Vierucci, L)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society
4 units, Aut (Mammarella, G)

KYOTO POLITICAL SCIENCE COURSES

OSPKYOTO 24. Japan in Contemporary International Affairs
5 units, Spr (Horvat, A)

OSPKYOTO 215X. The Political Economy of Japan
4-5 units, Spr (Hayashi, T)

MOSCOW POLITICAL SCIENCE COURSES

OSPMOSC 72. Space, Politics, and Modernity in Russia
5 units, Aut (Medvedev, S)

OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration
5 units, Aut (Bratersky, M; Kortunov, S)

OXFORD POLITICAL SCIENCE COURSES

OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
4-5 units, Win (McMahon, R)

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective
4-5 units, Spr (McMahon, R)

OSPOXFRD 35. Modern UK and European Government and Politics
4-5 units, Aut (Cappocia, G)

OSPOXFRD 62. Heretics to Headscarves
5 units, Win (Rakove, J)

OSPOXFRD 63. Locke and his Legacy
5 units, Win (Rakove, J)

PARIS POLITICAL SCIENCE COURSES

OSPPARIS 57. Human Rights in Comparative Perspective
4-5 units, Spr (Boussaguet, L)

OSPPARIS 122X. Challenges of Integration in the European Union
4-5 units, Spr (Strudel, S)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France
4-5 units, Aut (Muxel, A; Strudel, S)

SANTIAGO POLITICAL SCIENCE COURSES

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
5 units, Spr (Correa, G)

OSPSANTG 129X. Latin America in the International System
4-5 units, Win (Fuentes, C)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
5 units, Aut (Micco, S)

PORTUGUESE LANGUAGE (PORTLANG) COURSES

Because the Portuguese Language Program is in the process of instituting a formal placement test, students registering for the first time in a first- or second-year course must see the coordinator for proper placement if they have had any prior training in Portuguese. Certain Portuguese classes count towards a major in Spanish, and all count for a minor in Portuguese. Consult the Department of Spanish and Portuguese or http://span-port.stanford.edu for further information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN PORTUGUESE LANGUAGE

PORTLANG 1. First-Year Portuguese, First Quarter
Emphasis is on oral comprehension and proficiency in speaking. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 3 fulfills the University Foreign Language Requirement.
5 units, Aut (Wiedemann, L)

PORTLANG 1A. Accelerated First-Year Portuguese, Part 1
For students with two years of college level study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab.
3-5 units, Aut (Staff), Win (Wiedemann, L), Spr (Staff)

PORTLANG 2. First-Year Portuguese, 2nd Quarter
Continuation of 1. Speaking and oral comprehension and reading and writing skills. Lab. Prerequisite: 1.
5 units, Win (Staff)

PORTLANG 2A. Accelerated First-Year Portuguese, Part 2
For students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement.
3-5 units, Aut (Wiedemann, L), Win (Staff), Spr (Wiedemann, L)

PORTLANG 3. First-Year Portuguese
Emphasizes speaking and oral comprehension proficiency and the development of reading and writing skills. Literary and journalistic readings, studying of Brazilian popular music, and viewing short documentaries are the basis for discussions on Brazilian culture and current events. Lab. Completion of 3 fulfills the University Foreign Language Requirement. Prerequisite: 2 or equivalent.
5 units, Spr (Staff)

PORTLANG 11A. Accelerated Second-Year Portuguese, Part 1
Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions Prerequisite: first-year sequence, equivalent, or consent of instructor.
3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTLANG 12A. Accelerated Second-Year Portuguese, Part 2
Continuation of 11A. Prerequisite: 11A, equivalent, or consent of instructor.
3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTLANG 50. Reading in Portuguese
Introductory class for students with superior reading proficiency in Spanish or another Romance language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees.
3-4 units, Spr (Wiedemann, L)

PORTLANG 99. Language Specials
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTLANG 101. Reading Brazil
For intermediate or advanced students. Short expository readings, guest lectures, discussions, compositions on Brazilian issues. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions. Prerequisite: 12A or equivalent, or consent of instructor.
3-4 units, Aut (Wiedemann, L)

PORTLANG 103. Advanced Conversation: Brazil Today
For intermediate and advanced students. Reading and discussions on issues from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary building with emphasis on formal expository writing. Writing practice if desired. Students prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.
3 units, Spr (Wiedemann, L)

PORTLANG 193Q. Spaces and Voices of Brazil through Film
Stanford Introductory Seminar. Preference to sophomores. Introduction to the history, culture, politics, society, and literature of Brazil through films and readings. How the Brazilian film industry reflects its ethnically mixed culture. Forces that have shaped the multicultural reality of modern Brazil and the images projected by the country. In English.
3-4 units, Aut (Wiedemann, L)

GRADUATE COURSES IN PORTUGUESE LANGUAGE

For graduate students only.

PORTLANG 1G. Accelerated First-Year Portuguese, Part 1
For GSB students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, establishing relationships, providing and obtaining information, and expressing feelings, emotions, and opinions. Written and spoken language; social and cultural influences; and how to present information, concepts, and ideas on academic topics. Limited enrollment.
4 units, Win (Wiedemann, L)

PORTLANG 2G. Accelerated First-Year Portuguese, Part 2
Continuation of 1G. GSB students only. Limited enrollment.
4 units, Spr (Wiedemann, L)

PORTLANG 297. Directed Reading
Prerequisite: consent of instructor.
1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation
Prerequisite: consent of instructor.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

PORTUGUESE LITERATURE (PORTLIT) COURSES

These courses typically require knowledge of Portuguese. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on the undergraduate minor in Portuguese, see the "Spanish and Portuguese" section of this bulletin. For courses in Portuguese language instruction, see "Portuguese Language" courses section of this bulletin.

UNDERGRADUATE COURSES IN PORTUGUESE LITERATURE

PORTLIT 157. Introduction to Medieval and Early Modern Iberian Literatures
(Same as SPANLIT 157.) Topics may include: lyric and epic poetry; Jewish and Muslim literatures; the development of Castilian, Catalan, and Portuguese prose; the Valencian golden age; texts of the Renaissance and Baroque; the literature of imperial expansion into Africa, Asia, and the Americas. GER:DB-Hum
3-5 units, Aut (Barletta, V)

GRADUATE COURSES IN PORTUGUESE LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PORTLIT 299. Individual Work
Open to department undergraduates or graduate students by consent of professor. May be repeated for credit.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PORTLIT 399. Individual Work
For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCHIATRY (PSYC) COURSES

The following courses are available to undergraduates. For graduate and Medical School offerings, see http://medcatalog.stanford.edu.

UNDERGRADUATE COURSES IN PSYCHIATRY

PSYC 76Q. Temperament and Creativity in Mood Disorders
Stanford Introductory Seminar. Preference to sophomores. Western cultural notions of mad geniuses and artistic temperaments. How many individuals who suffer from depression, bipolar disorder, and related problems are nonetheless productively creative. Current psychological and neurobiological research, and assessment of mood, temperament, and creativity. Emphasis is on written and oral communications and multimedia presentations. Write 2. Prerequisite: PWR 1.
4 units, Win (Ketter, T)

PSYC 78Q. Mental Health in Collegiate Athletes
Stanford Introductory Seminar. Developmental, social, and performance issues in collegiate sports. Topics include transition to Stanford, time management, coping with injuries.
3 units, Win (Steiner, H; McCurdy, M)

PSYC 81Q. Fate of Orphans and Vulnerable Children in Sub Saharan Africa: The HIV/AIDS Pandemic
Stanford Introductory Seminar. The complicated forces,shaped by geopolitcal history and current events, that frame all social programs, the care of orphans in the context of the AIDS pandemic in particular; history of the care of orphans; developmental effects of deprivation of care and nurturing. Guest speakers.
3 units, Win (Solvason, H; Reicherter, D)

PSYC 111Q. Madness and the Womb: Medical and Artistic Approaches to Mental Illness in Women Through the Ages
Stanford Introductory Seminar. Historical and current concepts of mental illness in women. Premenstrual dysphoric disorder (PMS), postpartum depression, menopausal mood disorders, and eating disorders. Historical biopsychosocial approach. Readings include women's diaries and advice books, physicians' casebooks, and 19th- and 20th-century medical texts. Guest speakers from art and literature departments. Literary and artistic images, and the social and cultural contexts of these disorders during the last 300 years.
3 units, Aut (Williams, K)

PSYC 135. Sleep and Dreams
(Same as PSYC 235.) Current research on how sleep affects our daily lives. Physiology of non-REM and REM sleep, dreams and dreaming, content, psychophysiological cause, lucid dreaming, sleep need, sleep debt, daytime alertness, and performance; biological clock and circadian rhythms; sleep disorders, insomnia, narcolepsy, sleep apnea, sleepwalking, jet lag, sleeping pills, sleep and mental illness, sleep and memory, and the impact of sleep deprivation and sleep disorders on academic and social life. Multimedia presentations, guest lectures, and projects. GER:DB-NatSci
3 units, Win (Dement, W; Van Rheenen, J)

PSYC 136A. Valuescience: Shedding Illusion to Live Better
(Same as PSYC 236A.) Applying scientific methods and principles to discern and realize value. Readings in history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to scientific and cultural revolutions attending the emergence of valuescience as foundation for an increasing range of human action. Perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; personal and social benefits of doing so.
3 units, Aut (Dement, W)

PSYC 136B. Valuescience: Shedding Illusion to Live Better
(Same as PSYC 236B.) Continuation of 136A/236A. Applying scientific methods and principles to discern and realize value. Readings in history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to scientific and cultural revolutions attending the emergence of valuescience as foundation for an increasing range of human action. Perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; personal and social benefits of doing so.
3 units, Spr (Dement, W)

PSYC 139. Clinical Introduction to Couples and Family Therapy (VAPAHCS)
(Same as PSYC 239.) Introduces family-systems theory as a foundation for the practice of couples and family therapy in psychiatric and medical settings. Students observe couples and families in treatment "live" from behind a one-way mirror or on videotape and participate in post-session discussions. In these discussions with Family Therapy Program staff, students learn basic family interviewing, assessment, and intervention skills. Selected readings provide both a theoretical and practical introduction to couples and family therapy.
1 unit, Spr (Rait, D)

PSYC 195. Special Laboratory Projects
Assist Behavioral Neuroendocrinology Program with data entry, library organization, and study-related projects.
1-3 units, Aut (Rasgon, N), Win (Rasgon, N), Spr (Rasgon, N), Sum (Rasgon, N)

PSYC 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCHOLOGY (PSYCH) COURSES

For information on undergraduate and graduate programs in the Department of Psychology, see the "Psychology" section of this bulletin.

UNDERGRADUATE COURSES IN PSYCHOLOGY

PSYCH 1. Introduction to Psychology
Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci
5 units, Aut (Gross, J), Win (Knutson, B), Spr (Monin, B)

PSYCH 7Q. Language Acquisition
Stanford Introductory Seminar. Preference to sophomores. How do infants learn language so effortlessly? Why is it more difficult to learn a language as an adult? Theories of first and second language development and experimental techniques for reading children's minds.
3 units, Aut (Fernald, A)

PSYCH 8N. Life Span Development
Stanford Introductory Seminar. Preference to freshmen. People continue to change in systematic ways throughout life, but developmental psychology has focused mostly on childhood. Focus is on conceptual models that direct developmental research on adulthood and old age, and the empirical literature concerning developmental changes in cognition, motivation, and emotion. GER:DB-SocSci
3 units, Spr (Carstensen, L)

PSYCH 10. Introduction to Statistical Methods: Precalculus
(Same as STATS 60, STATS 160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math
5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

PSYCH 12N. Self Theories
Stanford Introductory Seminar. Preference to freshmen. The impact of people's belief in a growing versus fixed self on their motivation and performance in school, business, sports, and relationships. How such theories develop and can be changed. GER:DB-SocSci
3 units, Aut (Dweck, C)

PSYCH 16N. Amines and Affect
Stanford Introductory Seminar. Preference to freshmen. How serotonin, dopamine, and norepinephrine influence people's emotional lives. GER:DB-SocSci
3 units, Spr (Knutson, B)

PSYCH 18N. Early Social Cognitive Development
Preference to freshmen. Focus is on the development of attachment and its impact on psychological functioning. GER:DB-SocSci
3 units, not given this year

PSYCH 23N. Aping: Imitation, Control, and the Development of the Human Mind
Stanford Introductory Seminar. Preference to freshmen. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.
3 units, Spr (Ramscar, M)

PSYCH 25N. Psychology, Inequality, and the American Dream
Stanford Introductory Seminar. Preference to freshmen. What role do psychological factors play in perpetrating inequality despite legal prohibitions? How can psychologically wise reforms promote equal

opportunity? Topics include school achievement, prejudice and discrimination, social class, and race/ethnicity.

3 units, Aut (Walton, G)

PSYCH 30. Introduction to Perception

Behavioral and neural aspects of perception focusing on visual and auditory perception. Topics include: scientific methods for studying perception, anatomy and physiology of the visual and auditiory systems, color vision, depth perception, motion perception, stereopsis, visual recognition, pitch and loudness perception, speech perception, and reorganization of the visual system in the blind. GER:DB-NatSci

3 units, Aut (Grill-Spector, K)

PSYCH 45. Introduction to Learning and Memory

The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.

3 units, Spr (Wagner, A)

PSYCH 50. Introduction to Cognitive Neuroscience

(Same as SYMBSYS 50.) Topics in human neuropsychology. The functional organization of the human nervous system and of brain imaging techniques (MRI, PET). Hemispheric specialization and the brain basis of perception, memory, language, emotion, spatial cognition, and problem solving. Neuropsychological deficits in neurological disorders and their implications in understanding normal function. Recommended: 1 GER:DB-NatSci

4 units, Win (McClure, S)

PSYCH 60. Introduction to Developmental Psychology

Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci

3 units, Aut (Johnson, S)

PSYCH 60A. Introduction to Developmental Psychology Section

Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.

2 units, Aut (Lomangino, A)

PSYCH 70. Introduction to Social Psychology

Topics related to the influence of other people on individuals' thoughts, emotions, and behaviors. Factors that affect the way that we perceive ourselves and others; how people influence others; how persuasion happens; what causes us to like, love, help, or hurt others; and how social psychology helps to understand quesions about law, business, and health. GER:DB-SocSci

4 units, Spr (Tormala, T)

PSYCH 75. Introduction to Cultural Psychology

The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. WIM GER:DB-SocSci, EC-GlobalCom

5 units, alternate years, not given this year

PSYCH 80. Introduction to Personality Psychology

Current empirical and theoretical approaches to personality. How and why do people differ? Does personality change over time? Can people change their personalities?mWhat makes people happy? What are the physical, mental, and social consequences of personalities? Prerequisite: 1. GER:DB-SocSci

3 units, Spr (Tsai, J)

PSYCH 90. Introduction to Clinical Psychology

History of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci

3 units, Aut (Haas, A)

PSYCH 95. Introduction to Abnormal Psychology

Theories of and approaches to understanding the phenomenology, etiology, and treatment of psychological disorders among adults and children. Research findings and diagnostic issues. Recommended: PSYCH 1. GER:DB-SocSci, DB-SocSci

3 units, not given this year

PSYCH 101. Community Health Psychology

(Same as HUMBIO 128.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

PSYCH 102. Longevity

(Same as NENS 202.) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. GER:DB-SocSci

3 units, Win (Rando, T; Carstensen, L)

PSYCH 104. Uniquely Human

Are humans the only species that displays altruism, experiences uncertainty, and is capable of language and deception? Sources include empirical and theoretical papers in comparative psychology. Prerequisite: 1.

3 units, Win (Hard, B)

PSYCH 110. Research Methods and Experimental Design

Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. GER:DB-SocSci

5 units, not given this year

PSYCH 119. Psychology and Public Policy

(Same as PUBLPOL 172.) Applications of psychology to public and social policy. Topics include the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. How psychological theory can be used to shape policies and policy making in areas such as environment, education, criminal justice, and health.

5 units, Win (Tormala, T)

PSYCH 119S. The Psychology of Stigma

What obese people, African Americans, people with physical disabilities, lesbians, and Muslims have in common: social stigma. The social and psychological experiences of individuals living with social stigmas. Classic and current theory and research. Topics include: function, nature, and types of stigma; how stigmatized individuals view their identities and cope; mental and cognitive consequences; and interactions between stigmatized and non-stigmatized. Literature employing research methods including neuroimaging and social interaction studies.

3 units, Sum (Jones, V)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior

(Same as BIO 153.) Neural interactions underlying behavior. Prerequisites: PSYCH 1 or basic biology. GER:DB-NatSci

4 units, not given this year

PSYCH 120S. Temptations and Self Control

(Same as PSYCH 220S.) Why do people do things they come to regret, such as lack of exercise, angry words, overeating, unsafe sex, or dangerous driving? How can they minimize such behaviors? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Emphasis is on real-world applications.

3 units, not given this year

PSYCH 121. Ion Transport and Intracellular Messengers

(Same as PSYCH 228. Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

PSYCH 122S. Introduction to Cognitive and Comparative Neuroscience

Evolutionary and ethological perspective on cognitive neuroscience and the neural systems underlying human thought. Classic research in cognitive neuroscience. How to analyze cutting-edge science. Sources include primary research articles. Topics include: basic neuroanatomy and neuroscientific techniques; perception, memory,

and attention; language, social learning and communication; priniciples of evolution; learning and decision making. Final project. Prerequisites: high school biology or consent of instructor.

3 units, Sum (Yoon, J; Chen, J; Hutchinson, J)

PSYCH 124S. Applying Psychology to Modern Life

A scientific examination of everyday modern life. Topics include: how research on attention and memory can be applied to improve study strategies; how advertisers persuade and how their techniques can be resisted; how interpersonal conflicts can be avoided through knowledge of common errors in judging other people; and how studies on attraction and love can improve close relationships.

3 units, Sum (Jordan, A; Chen, F)

PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community

(Same as CTL 130.) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

3 units, Win (Glickman, A)

PSYCH 131. Language and Thought

(Same as PSYCH 262.) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci

4 units, Aut (Clark, H)

PSYCH 132. Introduction to Cognitive and Information Sciences

(Same as LINGUIST 144, PHIL 190, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Wasow, T; Roberts, E)

PSYCH 133. Human Cognitive Abilities

(Same as EDUC 369.) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci, DB-SocSci

3 units, Win (Shavelson, R)

PSYCH 134. Seminar on Language and Deception

Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci

3 units, Win (Clark, H)

PSYCH 137. Birds to Words: Cognition, Communication, and Language

(Same as HUMBIO 145, PSYCH 239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

4 units, Aut (Fernald, A; Ramscar, M)

PSYCH 138. Wise Interventions

(Same as PSYCH 238.) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

4 units, Spr (Walton, G)

PSYCH 141. Cognitive Development

How children's thinking and mental abilities change from infancy on. The major theories and explanations of intellectual growth. Sources include classic findings and state-of-the-art research on cognitive development. Prerequisite: 1. GER:DB-SocSci

3 units, Aut (Markman, E)

PSYCH 143. Developmental Anomalies

For advanced students. Developmental disorders and impairments. What the sparing of mental abilities in otherwise devastating disorders (or vice versa) tells about the mind and its development in the normal case. Examples of disorders and impairments: autism, congenital blindness, deafness, mental retardation, attachment disorder, and Williams syndrome. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, Spr (Johnson, S)

PSYCH 145. Seminar on Infant Development

For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data.

1-2 units, Spr (Fernald, A)

PSYCH 146. Observation of Children

Learning about children through guided observations at Bing Nursery School, Psychology's lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER:DB-SocSci

3-5 units, Win (Lomangino, A), Spr (Lomangino, A)

PSYCH 147. Development in Early Childhood

Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching/learning environment. Recommended: 60 or 146, or consent of instructor.

3-5 units, Aut (Winters, J; Chandra, P), Win (Winters, J; Chandra, P), Spr (Winters, J; Chandra, P)

PSYCH 149. The Infant Mind: Cognitive Development over the First Year

How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:DB-SocSci

3 units, Spr (Hard, B)

PSYCH 152. Mexdiation for Dispute Resolution

(Same as EDUC 131.) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.

3 units, Aut (Massey, T)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity

(Same as CSRE 196C, ENGLISH 172D, HISTORY 65, SOC 146.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, given next year

PSYCH 158. Emotions: History, Theories, and Research

(Same as PSYCH 259.) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

1-3 units, Win (Zajonc, R)

PSYCH 161. Emotion

(Same as PSYCH 261. Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Win (Gross, J)

PSYCH 163. Interpersonal Basis of Abnormal Behavior
The role of interpersonal problems and processes in producing forms of psychopathology including mild and severe disorders. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: PSYCH 1. GER:DB-SocSci

3 units, Win (Horowitz, L)

PSYCH 165. Peace Studies
(Same as POLISCI 111.) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci

5 units, not given this year

PSYCH 166. Seminar on Personal and Social Change
Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.

3 units, not given this year

PSYCH 167. Seminar on Aggression
The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.

3 units, Win (Bandura, A)

PSYCH 168. Emotion Regulation
(Same as PSYCH 268. Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Spr (Gross, J)

PSYCH 171. Research Seminar on Aging
Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.

4 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L)

PSYCH 179. The Psychology of Everyday Morality
(Same as PSYCH 270. Graduate students register for 270.) For graduate students, coterms, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units, not given this year

PSYCH 180. Social Psychological Perspectives on Stereotyping and Prejudice
(Same as PSYCH 245.) Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment. GER:DB-SocSci

3 units, Spr (Eberhardt, J)

PSYCH 180C. Asian American Sexualities
(Same as ASNAMST 180C, CSRE 180C.) Seminar. Mutual constitution of culture and sexuality among Asian Americans; attitudes, behaviors, taboos, and identity. How masculinity and femininity are portrayed in the media; cultural attitudes toward homosexuality; and sexual politics. Social, political, and psychological implications.

5 units, not given this year

PSYCH 183. Mind, Culture, and Society Labwork
Required of and limited to research assistants in the mind, culture, and society lab. The development of analytical thinking with reference to how social identities such as race, class, gender, and culture affect psychological experiences across domains including education, law, business, and health.

2-3 units, Aut (Eberhardt, J), Win (Eberhardt, J), Spr (Eberhardt, J)

PSYCH 186. The Psychology of Everyday Morality
(Same as PSYCH 286.) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).

3 units, Win (Monin, B)

PSYCH 189. Stanford Center on Longevity Practicum
Student involvement in an interdisciplinary center aimed at changing the culture of human aging using science and technology.

3 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L), Sum (Carstensen, L)

PSYCH 193. Special Laboratory Research
May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 194. Reading and Special Work
Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 195. Special Laboratory Projects
Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications
Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department's areas: social, personality, developmental, neuroscience, and cognitive psychology. Faculty present current research. Discussions led by advanced graduate students in the field represented by that week's guest. Students write research proposals. Small grants available to students to conduct a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, Aut (Clark, H)

PSYCH 197. Advanced Research
Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Eberhardt, J)

PSYCH 198. Senior Honors Research
Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.

1-4 units, Win (Eberhardt, J), Spr (Eberhardt, J)

PSYCH 199. Temptations and Self Control
(Same as PSYCH 299. Graduate students register for 299.) Why do people do things that that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

2 units, not given this year

GRADUATE COURSES IN PSYCHOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PSYCH 192. Career and Personal Counseling
(Same as EDUC 134, EDUC 234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments. Case studies of bicultural role conflict. Informal experience in counseling. (PSE)
3 units, not given this year

PSYCH 201. Social Psychology Lecture Series
Required of social psychology graduate students. Guest lecturers from Stanford and other institutions. May be repeated for credit.
3 units, not given this year

PSYCH 202. Cognitive Neuroscience
Graduate core course. The anatomy and physiology of the brain. Methods: electrical stimulation of the brain, neuroimaging, neuropsychology, psychophysics, single-cell neurophysiology, theory and computation. Neuronal pathways and mechanisms of attention, consciousness, emotion, language, memory, motor control, and vision. Prerequisite: 207 or consent of instructor.
3 units, Spr (McClure, S)

PSYCH 204A. Computational Neuroimaging
Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). The physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.
1-3 units, Spr (Wandell, B)

PSYCH 204B. Computational Neuroimaging: Analysis Methods
Neuroimaging methods with focus on data analysis techniques. Basic MR physics and BOLD signals. Methods for neuroimaging data using real and simulated data sets. Topics include: linearity of the fmri signal; time versus space resolution tradeoffs; noise in neuroimaging; correlation analysis; visualization methods; cortical reconstruction, inflation, and flattening; reverse engineering; can cognitive states be predicted from brain activation? Prerequisite: consent of instructor.
1-3 units, alternate years, not given this year

PSYCH 205. Foundations of Cognition
Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.
1-3 units, Win (Ramscar, M)

PSYCH 206. Cortical Plasticity: Perception and Memory
Seminar. Topics related to cortical plasticity in perceptual and memory systems including neural bases of implicit memory, recognition memory, visual priming, and perceptual learning. Emphasis is on recent research with an interdisciplinary scope, including theory, behavioral findings, neural mechanisms, and computational models. May be repeated for credit. Recommended: 30, 45.
1-3 units, Win (Grill-Spector, K; Wagner, A)

PSYCH 207. Professional Seminar for First-Year Ph.D. Graduate Students
Required of and limited to first-year Ph.D. students in Psychology. Major issues in contemporary psychology with historical backgrounds.
2-3 units, Aut (Wandell, B)

PSYCH 208. Advanced Topics in Self-Defense
Seminar. Threat to the self and how people deal with them. Readings from social psychological areas including social comparison, self-affirmation, self-completion, self-discrepancy, shame and guilt, terror management, dimensions of self-worth, self-regulation, self-presentation, psychophysiology, and moral identity. Enrollment limited to 15.
1-3 units, not given this year

PSYCH 209. The Neural Basis of Cognition: A Parallel Distributed Processing Approach
The neural basis of perception and attention; memory, learning, and semantic knowledge; language and reading; and action selection, planning, and problem solving. Findings from human behavioral experiments, neurophysiology, functional brain imaging, and the effects of brain disorders on performance; computational models that address these findings from the parallel distributed processing point of view which holds that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning occurs primarily through the adjustment of the strengths of the connections between the neurons. Corequisite: 209B.
3 units, not given this year

PSYCH 209A. The Neural Basis of Cognition: A Parallel Distributed Processing Approach
Models and data to support the notion that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning and development occur primarily through the adjustment of the strengths of the connections between the neurons. How models may be used to explain aspects of human cognition, development, and effects of brain damage on cognition. Prerequisites: linear algebra, differential equations, a programming course, and two courses in psychology or neuroscience.
1-4 units, Win (McClelland, J)

PSYCH 209B. Applications of Parallel Distributed Processing Models to Cognition and Cognitive Neuroscience
Research seminar. Builds on project proposal developed in 209A. Hands-on use of computational models to address phenomena in cognitive psychology and cognitive neuroscience. Classic and modern papers, and student presentations of their own projects. Final paper in the form of a journal article submission. Prerequisite: 209A.
4 units, Spr (McClelland, J)

PSYCH 210. Foundations of Memory
Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural architectures of working, declarative, and nondeclarative memory. Recommended: 45.
3 units, alternate years, not given this year

PSYCH 211. Developmental Psychology
Prerequisite: 207 or consent of instructor.
1-3 units, Win (Markman, E; Dweck, C)

PSYCH 212. Social Psychology
Classic studies in experimental social psychology. Group and group dynamics; compliance and social pressure; conformity, cooperation, conflict, and social dilemmas; attraction and preference; attitudes and attitude change; social comparison, emotion, and affiliation; dissonance, consistency, and self-justification; attribution and self-perception; judgment and decision making, motivation, automaticity, and culture. Prerequisite: 207 or consent of instructor.
1-3 units, Win (Lepper, M)

PSYCH 213. Personality and Psychopathology
Historical trends, theoretical issues, and empirical approaches to the study of individual differences in personality and psychopathology. Topics include: trait approach for describing individual differences; its role in exploring such topics as the importance of the person by situation interaction; and psychometric themes and issues. Individual differences in motivation manifested in attachment styles in childhood and adulthood; stress, coping, health; self and self-regulation; and severe forms of psychopathology. Prerequisite: 207 or consent of instructor.
1-3 units, Spr (Horowitz, L)

PSYCH 215. Mind, Culture, and Society
Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and polity.

Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.

3 units, not given this year

PSYCH 216. Public Policy and Social Psychology: Implications and Applications

(Same as IPS 207B, PUBLPOL 205B.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.

4 units, Spr (Ross, L)

PSYCH 217. Topics and Methods Related to Culture and Emotion

Preference to graduate students. How cultural factors shape emotion and other feeling states. Empirical and ethnographic literature, theories, and research on culture and emotion. Applications to clinical, educational, and occupational settings. Research in psychology, anthropology, and sociology. May be repeated for credit.

1-3 units, Win (Tsai, J)

PSYCH 218. Early Social Cognitive Development

Current literature on social and cognitive development in infancy emphasizing the interface between the two domains. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Spr (Johnson, S)

PSYCH 220. Topics in Cognitive Development

Topics change each year. May be repeated for credit. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, Spr (Markman, E)

PSYCH 220S. Temptations and Self Control

(Same as PSYCH 120S.) Why do people do things they come to regret, such as lack of exercise, angry words, overeating, unsafe sex, or dangerous driving? How can they minimize such behaviors? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Emphasis is on real-world applications.

3 units, not given this year

PSYCH 221. Applied Vision and Image Systems

The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.

1-3 units, Win (Wandell, B)

PSYCH 223. Social Norms

(Same as OB 630.) Research and theory on the origins and function of social norms. Topics include the estimation of public opinion, the function of norms as ideals and standards of judgment, and the impact of norms on collective and individual behavior. How to identify and formulate tractable research questions.

4 units, Spr (Staff)

PSYCH 226. Models and Mechanisms of Memory

Current topics in memory as explored through computational models addressing experimental findings and physiological and behavioral investigations. Topics include: explicit and inplict learning; role of MTL structures in learning and memory; and single versus dual processes approaches to recognition. May be repeated for credit.

1-3 units, Aut (McClelland, J; Wagner, A)

PSYCH 227. Seminar in Psycholinguistics

(Same as LINGUIST 247.) May be repeated for credit.

2-4 units, not given this year

PSYCH 228. Ion Transport and Intracellular Messengers

(Same as PSYCH 121. Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

PSYCH 232. Brain and Decision Making

Neuroeconomics combines experimental techniques from neuroscience, psychology, and experimental economics, such as electrophysiology, fMRI, eye tracking, and behavioral studies, and models from computational neuroscience and economics. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Spr (Knutson, B)

PSYCH 233. MATLAB and Psychtoolbox for the Behavioral Sciences

Topics such as experiment design, stimulus presentation, counterbalancing, response collection, data analysis, and plotting. Programming experiments. Final project programming a complete behavioral experiment relevant to student's research. Prerequisite: introductory programming such as CS 105 or 106, or consent of instructor.

1-3 units, not given this year

PSYCH 234. Topics in Affective Disorders

Current research topics including epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, given next year

PSYCH 236. The Social Self

The psychological bases of complex social organization such as work teams and national and cultural identities. Topics include: the effect of social influence on perception, beliefs, attitudes, emotions, and behaviors; shared intentionality; and the relational bases of learning, motivation, and performance. Works of classic scholars (Asch, Lewin) and contemporary researchers in social, developmental, and comparative psychology. Prerequisite: graduate standing or consent of instructor.

3 units, Win (Walton, G)

PSYCH 238. Wise Interventions

(Same as PSYCH 138.) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

4 units, Spr (Walton, G)

PSYCH 239A. Birds to Words: Cognition, Communication, and Language

(Same as HUMBIO 145, PSYCH 137.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults.

4 units, Aut (Fernald, A; Ramscar, M)

PSYCH 243. General Development Seminar

May be repeated for credit. Prerequisite: consent of instructors.

1-2 units, Win (Markman, E; Fernald, A; Johnson, S)

PSYCH 244. Psychology of Aging

Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, not given this year

PSYCH 245. Social Psychological Perspectives on Stereotyping and Prejudice
(Same as PSYCH 180.) Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment.
3 units, Spr (Eberhardt, J)

PSYCH 246. Cognitive and Neuroscience Friday Seminar
Participant presentations. May be repeated for credit. Prerequisite: graduate standing in psychology or neuroscience program.
1 unit, Aut (Boroditsky, L; Wagner, A), Win (Boroditsky, L; Wagner, A), Spr (Boroditsky, L; Wagner, A)

PSYCH 249. Human Motivation
Current research and theory including questions concerning the nature of human motives, intrinsic motivation, self-regulation, the roles of affect and cognition, and lifespan and cultural influences on motivation. Prerequisite: 207 or consent of instructors.
1-3 units, Spr (Dweck, C; Lepper, M)

PSYCH 250. High-level Vision
Interdisciplinary focus on topics of high level vision from research in psychology, neuroscience and computer science. Theories, ongoing debates in the field, and recent empirical findings. Theories and models of object and face recognition. How is invariant object recognition accomplished? What are the neural mechanisms of object and face recognition? Are faces special? What is the role of experience in shaping object and face representations? Recommended: 30
1-3 units, Spr (Grill-Spector, K)

PSYCH 251. Affective Neuroscience
Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.
3 units, not given this year

PSYCH 252. Statistical Methods for Behavioral and Social Sciences
For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent.
1-6 units, Aut (Thomas, E; Monin, B)

PSYCH 253. Statistical Theory, Models, and Methodology
Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.
3 units, Spr (Thomas, E)

PSYCH 257. Individually Supervised Practicum
Satisfies INS requirements for curricular practical training. Relevant experience for graduate students as part of their program of study. May be repeated for credit. Prerequisites: graduate standing in Psychology, consent of adviser.
3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 258. Graduate Seminar in Social Psychology Research
For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict. (Zajonc)
1-3 units, Aut (Zajonc, R), Win (Zajonc, R), Spr (Zajonc, R)

PSYCH 259. Emotions: History, Theories, and Research
(Same as PSYCH 158.) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.
1-3 units, Win (Zajonc, R)

PSYCH 260. Reinforcement Learning in the Brain
Recent advances in neural and behavioral models of reinforcement learning. Reinforcement learning models. Key findings in applying models to brain activity and behavior.
2-3 units, Spr (Staff)

PSYCH 261. Emotion
(Same as PSYCH 161. Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas.
3 units, Win (Gross, J)

PSYCH 261A. Learning and Cognition in Activity
(Same as EDUC 295.) Methods and results of research on learning, understanding, reasoning, problem solving, and remembering, as aspects of participation in social organized activity. Principles of coordination that support cognitive achievements and learning in activity settings in work and school environments.
3 units, not given this year

PSYCH 262. Language and Thought
(Same as PSYCH 131.) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1.
4 units, Aut (Clark, H)

PSYCH 266. Current Debates in Learning and Memory
Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP). Recommended: 45
1-3 units, not given this year

PSYCH 267. Human Memory: Facts, Fallacies, and Fragile Powers
Seminar. Applications of memory concepts in everyday life and in social and clinical settings. Topics include personal identity, childhood amnesia, autobiographic memory, emotions and memory, memory distortions, illusions, self-serving biases, recovery of repressed memories, false memories, implicit memories, and unconscious influences on social behavior, with applications to psychopathology.
1-3 units, not given this year

PSYCH 268. Emotion Regulation
(Same as PSYCH 168. Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas.
3 units, Spr (Gross, J)

PSYCH 269. Graduate Seminar in Personality Research
May be repeated for credit. Prerequisite: graduate standing in Psychology. (Gotlib)
1 unit, Aut (Gotlib, I), Win (Gotlib, I), Spr (Gotlib, I)

PSYCH 270. The Psychology of Everyday Morality
(Same as PSYCH 179. Graduate students register for 270.) For graduate students, coterms, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.
4 units, not given this year

PSYCH 272. Special Topics in Psycholinguistics
May be repeated for credit. Prerequisite: consent of instructor.
1-3 units, Spr (Clark, H)

PSYCH 273. Graduate Seminar on Language, Cognition, and Perception
Current topics and debates. Readings from psychology, linguistics, neuroscience, ethology, anthropology, and philosophy. May be repeated for credit.
3 units, not given this year

PSYCH 275. Graduate Research
Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 279. Topics in Cognitive Control
The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence. Recommended: 45.
1-3 units, not given this year

PSYCH 281. Practicum in Teaching
Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

PSYCH 282. Practicum in Teaching PSYCH 1
Logistical TA training including: preparing for sections; creating, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.
1-2 units, Aut (Gross, J), Win (Monin, B), Spr (Knutson, B)

PSYCH 283. International Conflict Resolution Colloquium
(Same as POLISCI 403. Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.
1 unit, Win (Weiner, A; Holloway, D; Ross, L)

PSYCH 286. The Psychology of Everyday Morality
(Same as PSYCH 186.) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).
3 units, Win (Monin, B)

PSYCH 290. Graduate Research Methods
Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.
2 units, not given this year

PSYCH 291. Psychology Teaching Methods
Open to graduate students and advanced undergraduates. Principles of good teaching. Students practice teaching skills.
1-2 units, not given this year

PSYCH 297. Seminar for Coterminal Master of Arts
Contemporary issues and student research. Student and faculty presentations.
1-2 units, Aut (Clark, H), Win (Clark, H), Spr (Clark, H)

PSYCH 299. Temptations and Self Control
(Same as PSYCH 199. Graduate students register for 299.) Why do people do things that that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.
2 units, not given this year

PSYCH 459. Frontiers in Interdisciplinary Biosciences
(Same as BIO 459, BIOC 459, BIOE 459, CHEMENG 459, CHEM 459.) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://biox.stanford.edu/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.
1 unit, Aut, Win, Spr (Robertson, C)

PUBLIC POLICY (PUBLPOL) COURSES

For information on undergraduate and graduate programs in Public Policy, see the "Public Policy" section of this bulletin.

UNDERGRADUATE COURSES IN PUBLIC POLICY

PUBLPOL 101. Politics and Public Policy
(Same as POLISCI 123.) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:DB-SocSci
5 units, Spr (Frisby, T)

PUBLPOL 102. Organizations and Public Policy
Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A. GER:DB-SocSci
5 units, Win (Bendor, J)

PUBLPOL 103A. Introduction to Political Philosophy
(Same as ETHICSOC 30, PHIL 30, POLISCI 3.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, DB-Hum, EC-EthicReas
5 units, Spr (Hussain, N)

PUBLPOL 103B. Ethics and Public Policy
(Same as MS&E 197, STS 110.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas
5 units, Win (McGinn, R)

PUBLPOL 104. Economic Policy Analysis
(Same as ECON 150.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisite: ECON 50.
5 units, Spr (Staff)

PUBLPOL 104W. Economic Policy Analysis
(Same as ECON 150W, SIW 123.) Taught in Washington, DC; offered via distance learning to Stanford students on campus. Economics of evaluating and implementing public policies. Focus is

on cost-benefit analysis, regulation, efficiency and equity, externalities, subsidies, public good provision, opportunity costs, the role of economic analysis in policy making, and how political institutions affect policy outcomes. Topics: climate change, telecommunications, defense and homeland security, controversial aspects of cost-benefit-analysis.

5 units, Aut (Wallsten, S)

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy

Reviews material covered in prerequisites with applications of qualitative independent variable techniques to labor market data. Maximum likelihood estimation and qualitative dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: ECON 102A,B. GER:DB-SocSci

5 units, Spr (Rothwell, G)

PUBLPOL 106. Economics of Legal Rules and Institutions

(Same as ECON 154.) Design and consequences of laws, given alternative policy objectives. Welfarist approach to legal policy; deontological perspectives including Kant, Locke, Mill, and Rawls. Economic efficiency and agent rationality, law as mitigation of market and cognitive failures, effects of law on expectations and incentives, balancing costs of type I and type II legal errors. Empirical studies of law's effects. Applications: property, tort, contract, antitrust, discrimination, crime, legal procedure. Examples chiefly from U.S. law, but analytical tools of general applicability. Prerequisite: ECON 50. WIM

5 units, Aut (Owen, B)

PUBLPOL 117. Econometrics for Public Policy Majors

Descriptive statistics, regression analysis, analysis of variance, heteroskedasticity, serial correlation, errors in variables, and simultaneous equations. Prerequisites: Public Policy major; ECON 50 and 102A.

5 units, not given this year

PUBLPOL 121. Policy and Climate Change

Science and economics, including recent findings. History and evolution of local, state, regional, national, and international policy. California's recent landmark climate change bill. Future policy prospects, emphasizing national and international levels.

5 units, Aut (Nation, J)

PUBLPOL 125. Law and Public Policy

How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, stem cell research, government surveillance, and digital copyright. Prerequisites: POLISCI 2. GER:DB-SocSci

5 units, Spr (Greenberg, J)

PUBLPOL 126. Networking with Government to Achieve Social Change

(Same as GSBGEN 593.) The role of government in the change process, the values and mindsets of government leaders, assets and resources that public agencies bring to the change initiative, limits of government action, and leadership strategies for promoting collaboration between sectors. Guest speakers, case studies, team projects, including a business plans for a social innovation project.

2 units, not given this year

PUBLPOL 130. Path Dependence in Private Action and Public Policy: Decision Making in the Shadow of History

(Same as ECON 151.) The historically contingent development of economic, social, and political behaviors at micro and macro levels. History's role in individual and organizational decision making. When can extraneous events have persisting effects upon public institutions, private organizations, and government agencies? Science and technology policy making; precedent-based judicial and administrative proceedings; and institutional reforms and regulatory initiatives illustrate positive feedback dynamics; self-organization and emergent properties in complex systems; conditions of lock-in to and escapes from sub-optimal equilibria in economic and social arrangements. Recommended: ECON 51.

3-5 units, Win (David, P)

PUBLPOL 154. Politics and Policy in California

State politics and policy making, including the role of the legislature, legislative leadership, the governor, special interests, campaign finance, the public, ballot initiatives, the state constitution, the media, and the role of research organizations. Case studies may include pension reform, health care, term limits and other political reform measures, open primaries, infrastructure improvements, and the budget. Changes in constitutional and in state statutes that can improve policy making in California.

5 units, Win (Nation, J)

PUBLPOL 156. Health Care Policy and Reform

Competing health care reform proposals at the state and local levels. Focus is on California including proposals for expanding coverage for children, a single payer system, employer and individual mandates. Recent proposals in other states including Massachusetts, Maine, and Vermont; their relation to national efforts. Attention to local reform efforts, including in San Francisco. Prospects for future policy.

5 units, Spr (Nation, J)

PUBLPOL 164. Comparative Public Policy

Problems, answers, underlying political philosophies, and impacts of public policy choices in areas such as aging populations, health care costs, illegal immigration, terrorism, pollution, and competition from low-cost countries. Focus is on N. America and Europe. (Crombez) GER:DB-SocSci

3 units, not given this year

PUBLPOL 168. Global Organizations: Managing Diversity

Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci

5 units, Win (Meyersson Milgrom, E)

PUBLPOL 172. Psychology and Public Policy

(Same as PSYCH 119.) Applications of psychology to public and social policy. Topics include the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. How psychological theory can be used to shape policies and policy making in areas such as environment, education, criminal justice, and health.

5 units, Win (Tormala, T)

PUBLPOL 176. Urban Economics

(Same as URBANST 173.) Application of the principles of economic analysis to urban issues and policy, including urban land use, housing, transportation, economic development, and the financing of public services. Fundamentals of microeconomic theory.

4-5 units, Aut (Reilly, M)

PUBLPOL 180. Social Innovation

The mechanisms and features of social innovation defined as the process of inventing, securing support for, and implementing novel solutions to social needs and problems. Focus is on the social, economic, technical, and organizational mechanisms underlying innovations. Sources include social science theory and research, and insights from the practical world. GER:DB-SocSci

4 units, not given this year

PUBLPOL 183. Philanthropy and Social Innovation

Philanthropy's role in modern society and the translation of its vision and capital into social action. Topics: individual giving; philanthropic history and industry; foundation models and infrastructure; philanthropic strategy and grantmaking; accountability and board governance; global and corporate philanthropy; and public policy engagement. Readings: business school cases and industry articles. Guest speakers include individual donors and foundation presidents. Final project: students evaluate grant proposals and make funding recommendations. Enrollment limited to 15. GER:DB-Hum

2 units, Spr (Arrillaga, L)

PUBLPOL 184. Poverty and Policies in Developing Economies
Economic models of growth and poverty, differences in growth rates among countries, and the persistence of poverty. Models of physical and human capital accumulation, and recent theories of the importance of institutions, social capital, and political factors. The effectiveness of social policies in developing countries, emphasizing India, in the light of theories of growth and poverty, and in terms of immediate goals and long-term consequences. Policies include schooling and health, anti-poverty, banking, and political decentralization. Prerequisites: ECON 1A,B. GER:DB-SocSci

5 units, Win (Kochar, A)

PUBLPOL 187. The Unintended Consequences of Technology
How human inventions impact other inventions, society, the individual, and history. Unintended social consequences of technologies such as railroads, telegraphs, telephones, automobiles, and jet travel. Group projects focus on the design of a national survey to gauge the social effects of Internet technology (IT) on how people spend their time, including the impact of Internet use on non-work activities such as sleep and time spent with friends and family. Practical and innovative techniques in statistical analysis. GER:DB-SocSci

3-4 units, not given this year

PUBLPOL 194. Technology Policy
How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, stem-cell research, government surveillance, and digital copyright. Recommended: POLISCI 2.

5 units, Win (Windham, P)

PUBLPOL 197. Junior Honors Seminar
(Same as ECON 198.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Enrollment limited to 25.

5 units, Win (Rothwell, G), Spr (Rothwell, G)

PUBLPOL 198. Directed Readings in Public Policy

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

PUBLPOL 199. Senior Research
May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

PUBLPOL 199B. Senior Honors Seminar
Research, statistical, and writing support for Public Policy honors students.

1 unit, not given this year

PUBLPOL 200A. Senior Seminar
Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.

3 units, Aut (Lovenheim, M)

PUBLPOL 200B. Senior Seminar: Conducting Policy Analysis for Local Agencies
Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor. GER:DB-SocSci

5 units, Win (Durbin, B)

PUBLPOL 200C. Senior Seminar
Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.

3 units, Spr (Durbin, B)

GRADUATE COURSES IN PUBLIC POLICY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

PUBLPOL 201A. Microeconomics
(Same as IPS 204A.) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.

4 units, Aut (Bulow, J)

PUBLPOL 201B. Cost-Benefit Analysis and Evaluation
(Same as IPS 204B.) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Behavioral economics: psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.

4 units, Spr (Kessler, D)

PUBLPOL 202A. Introduction to Law
Differences between common and civil law systems; judge-made law and judicial process; courts and litigation; legislation and its interpretation; administrative law and regulation. Separation of powers and federalism; constitutional law and civil liberties; criminal justice; empirical studies of the legal profession and legal behavior; social change and its impact on the legal order; law and economic development.

2 units, Aut (Friedman, L)

PUBLPOL 202B. Economic Analysis of Law
(Same as LAW 277.) How legal rules and institutions can correct market failures.The economic function of contrasts; role of legal remedies to resolve disputes when contracts fail. The choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors such as regulatory authorities. Economics of litigation; how private incentives to bring lawsuits differ from the social value of litigation. Economic motives to commit crimes; optimal governmental response to crime. Prerequisites: intermediate-level microeconomics; some calculus.

4 units, Win (Polinsky, M)

PUBLPOL 203A. Principles of Research Design and Analysis: Methods
(Same as IPS 205A.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis using popular statistical packages. Goal is to analyze empirical studies, conduct empirical research, and to crossexamine or work with statistical experts.

2 units, Aut (Hensler, D)

PUBLPOL 203B. Principles of Research Design and Analysis: Tools
(Same as IPS 205B, LAW 366.) Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. The construction and use of models for analyzing economic and social phenomena. Bayesian analysis. Univariate and bivariate analysis. Simple regression model. Multiple regression model. Inference and heteroskedasticity. Linear probability model. Instrumental variables. Maximum likelihood methods. Measurement of social and political attitudes and ideologies. Statistical analysis of large data sets.

4 units, Win (Strnad, J)

PUBLPOL 203C. Foundations of Statistical Inference
(Same as IPS 205C, LAW 362.) Statistical background and introduction to regression. Topics include hypothesis testing, linear regression, nearest-neighbors regression, and other statistical concepts. Hands-on empirical analysis via computer exercises using statistical packages; how to analyze empirical studies, conduct empirical research, and cross-examine or work with statistical experts.

2 units, Aut (Strnad, J)

PUBLPOL 204A. Politics and Collective Action
(Same as IPS 206A, POLISCI 331S.) Classic theories for why collective action problems occur and how they can be solved. Politics of aggregating individual decisions into collective action, including voting, social protest, and competing goals and tactics of officials, bureaucrats, interest groups, and other stakeholders. Economic, distributive, and moral frameworks for evaluating collective action processes and outcomes. Applicable to collective action problems in any realm, but focus is on practical examples from environmental management.
4 units, Spr (Oleson, K)

PUBLPOL 204B. Organizations
(Same as IPS 206B.) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.
4 units, Spr (Stedman, S; Eden, L)

PUBLPOL 205A. Judgment and Decision Making
(Same as IPS 207A. Same as LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.
4 units, Win (Brest, P)

PUBLPOL 205B. Public Policy and Social Psychology: Implications and Applications
(Same as IPS 207B, PSYCH 216.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.
4 units, Spr (Ross, L)

PUBLPOL 206. Writing and Rhetoric for Policy Audiences
Techniques of effective writing and argument for addressing decision makers, interest groups, and the public. The importance of apparent simplicity; uses and misuses of history and historical analogies; and incentives, cognitive limits, and biases of audiences. Why some arguments become traditional. Sources include historical briefing papers and oral arguments. Students write briefing papers and make oral arguments, individually and in teams. Enrollment limited. Prerequisite: consent of instructor.
4 units, Win (Owen, B; Rosston, G)

PUBLPOL 207. Justice
(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 136S.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.
4-5 units, Aut (Cohen, J)

PUBLPOL 209. Practicum
(Same as IPS 209.) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.
5 units, Aut, Win (Sprague, M; Oleson, K)

PUBLPOL 231. Political Economy of Health Care in the United States
(Same as MGTECON 331, HRP 391.) The economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients' bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries' health care systems evolved, and what the U.S. can learn from their experiences.
4 units, Spr (Kessler, D; Bundorf, M)

PUBLPOL 299. Master of Arts Thesis
Restricted to students writing a master's thesis in Public Policy. May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN PUBLIC POLICY

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BEIJING PUBLIC POLICY COURSES

OSPBEIJ 24. China's Economic Development
5 units, Spr (Rozelle, S)

OSPBEIJ 47. Institutional Change in Reform China
5 units, Aut (Oi, J)

FLORENCE PUBLIC POLICY COURSES

OSPFLOR 46. International Monetary Economics
5 units, Spr (Cifarelli, G)

OSPFLOR 61. Europe and U.S. Foreign Policy
5 units, Aut (Schultz, K)

OSPFLOR 61. Europe and U.S. Foreign Policy
5 units, Aut (Schultz, K)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union
5 units, Aut (Morlino, L)

OXFORD PUBLIC POLICY COURSES

OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
4-5 units, Win (McMahon, R)

PARIS PUBLIC POLICY COURSES

OSPPARIS 33. The Economics of Climate Change: Policies in Theory and Practice in the EU and the U.S.
5 units, Spr (de Perthuis, C; Keppler, J; Leguet, B)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead
5 units, Aut (Le Cacheux, J; Laurent, E)

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
4-5 units, Win (Fessler, J)

SANTIAGO PUBLIC POLICY COURSES

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
5 units, Spr (Munoz, O)

OSPSANTG 160X. Latin America in the International Economy
5 units, Win (Staff)

RADIATION ONCOLOGY (RADO) COURSES

For information on graduate programs in Radiation Oncology, see the "Radiation Oncology" section of this bulletin. Course and laboratory instruction in the Department of Radiation Oncology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN RADIATION ONCOLOGY

RADO 101. Readings in Radiation Biology
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RADO 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN RADIATION ONCOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

RADO 299. Directed Reading in Radiation Oncology
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RADO 399. Graduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RADIOLOGY (RAD) COURSES

For information on graduate programs in Radiology, see the "Radiology" section of this bulletin.

UNDERGRADUATE COURSES IN RADIOLOGY

RAD 101. Readings in Radiology Research
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RAD 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN RADIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

RAD 208. Experimental Nuclear Medicine
Computer applications in medicine, particularly in the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus.
2 units, Win (Goris, M)

RAD 220. Imaging Anatomy
(Same as BIOE 220.) The physics of medical imaging and human anatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and the relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Prerequisites: basic biology, physics.
3 units, Win (Gold, G; Pauly, K)

RAD 222A. Multimodality Molecular Imaging in Living Subjects I
(Same as BIOE 222A.) Instruments for imaging molecular and cellular events in animals and human beings using novel assays. Instrumentation physics, chemistry of molecular imaging probes, and applications to preclinical models and clinical disease management.
4 units, Aut (Gambhir, S; Rao, J)

RAD 222B. Multimodality Molecular Imaging in Living Subjects II
(Same as BIOE 222B.) In vivo imaging techniques and applications to preclinical models and clinical disease management. Focus on cancer research, neurobiology, cardiovascular and musculoskeletal diseases.
2 units, Win (Gambhir, S; Rao, J)

RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging
Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.
3 units, Win (Spielman, D)

RAD 227. Functional MRI Methods
(Same as BIOPHYS 227.) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics. Recommended: neuroscience.
3 units, not given this year

RAD 228. Magnetic Resonance Imaging Programming Topics
Primarily for students working on research projects involving MRI pulse sequence programming. Introductory and student-initiated topics in seminars and hands-on labs. Image contrast mechanisms achieved by pulse sequences that control radiofrequency and gradient magnetic fields in real time, while acquiring data in an organized manner for image reconstruction. Prerequisites: EE 369B and consent of instructor.
3 units, Sum (Hargreaves, B)

RAD 299. Directed Reading in Radiology
Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RAD 399. Graduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RELIGIOUS STUDIES (RELIGST) COURSES

For information on undergraduate and graduate programs in the Department of Religious Studies, see the "Religious Studies" section of this bulletin.

UNDERGRADUATE COURSES IN RELIGIOUS STUDIES

RELIGST 2N. Theories of Ethics in Classical Islamic Thought
Stanford Introductory Seminar. Preference to freshmen. Premodern Islamic theories of ethics. Homegrown ethical theories and adaptations of Greek thought. How various groups molded their ethical theories to fit their respective theological outlooks, including dialectic theologians, the Greek-inspired philosophers, and the mystics.
4 units, Spr (Sadeghi, B)

RELIGST 3N. Jesus the Jew and the Origins of Christianity
Stanford Introductory Seminar. Preference to freshmen. Contemporary historical-critical methods in investigating how one might study Jewish and Christian texts of the 1st century CE. Social

contexts including economic realities and elite ideological views. What can be known historically about 1st-century Judaism and Jesus' part it in it. How Jewish apocalyptic messianism shaped the birth of Christianity and its trajectory through the 1st century.

4 units, Aut (Sheehan, T)

RELIGST 7N. The Divine Good: Secular Ethics and Its Discontents

Stanford Introductory Seminar. Preference to freshmen. What is the good and how does it orient human choice and activity? Is it natural to human beings, or in some way transcendent? How do people come to know it? Why do people often fail to do the good they know? What human capacities and dispositions enable its enactment or attainment? What resources does religion offer for its reparation? Classical and modern readings in moral theory emphasizing the difference that religious aspiration makes for moral reflection. GER:DB-Hum, EC-EthicReas

4 units, Win (Sockness, B)

RELIGST 9N. Transgression and Transcendence: Exploring Tantric Buddhism

Stanford Introductory Seminar. Preference to freshmen. Vajrayana or Tantric Buddhism, its historical development and primary doctrines, ritual practices, and iconography. Focus is on their transgressive aspects, broader Indian background, and contemporary representations.

4 units, Aut (Harrison, P)

RELIGST 11. Religious Classics of Asia: India's Ramayana Epic

The Ramayana as one of the most important religious and cultural texts of India. Its heroes, Rama and Sita, as incarnations of the supreme God and Goddess and models for ideal manhood and womanhood. Textual and performative versions including Valmiki's 2,000-year-old Sanskrit poem, medieval vernacular versions, rural women's folk songs, and the TV serial of 1988-89. Ramayana traditions through the lenses of religion, literature, performance, popular culture, gender, and politics. GER:DB-Hum, EC-GlobalCom

3 units, not given this year

RELIGST 12. Introduction to Hinduism

Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 14. Introduction to Buddhism

From its beginnings to the 21st century. Principal teachings and practices, institutional and social forms, and artistic and iconographical expressions. GER:DB-Hum, EC-GlobalCom

4 units, Win (Harrison, P)

RELIGST 18. Introduction to Zen Buddhism

Classical Zen thought in China, and its background, origins, and development. GER:DB-Hum, EC-GlobalCom

4 units, Aut (Bielefeldt, C)

RELIGST 20. Introduction to the Zoroastrian Religion

The origins of Zoroastrianism, its role in the Iranian empires, and its relation to Judaism, Christianity, Manichaeism, and Islam, and its later forms and function in Iran, India, and its diaspora. The impact of the religion on European literati such as Voltaire, Mozart, the romantic poets, and Nietzsche. GER:DB-Hum

3 units, Win (Rose, J)

RELIGST 23. Introduction to Judaism

The historical development of Jewish religious thought and practice, from the biblical period to the present. Scriptural, liturgical, midrashic, legal, historical, and philosophical texts reflecting that development. The Sabbath, and annual festivals and sacred days. GER:DB-Hum

4 units, Spr (Radwin, A)

RELIGST 24. Introduction to Christianity

The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity's major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum

4 units, not given this year

RELIGST 27. Introduction to Islam

Ideas, foundation texts, competing interpretive hegemonies, and historical compromises and syntheses that shaped and inform Islam. Readings from the Qur'ân, hadîth, and seminal theological texts in translation. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 35. Introduction to Chinese Religions

(Formerly 55.) Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 37. Introduction to Japanese Religions

Major themes in Japanese religious culture, including gods, religious sites, and specialist and popular practices. Films and readings from literary, ethnographic, and historical sources in translation.

4 units, Spr (Blair, H)

RELIGST 46. Introduction to Daoism

(Formerly 56.) Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture. GER:DB-Hum

4 units, not given this year

RELIGST 52. The Problem of God

(Formerly 32.) Monotheism is a belief for which people continue to live and die. Philosophical inquiry into the concept of God through its classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:DB-Hum

4 units, not given this year

RELIGST 54. The Roots of Right and Wrong in Christianity, Judaism, and Islam

What Christian, Jewish, and premodern Muslim thinkers have to say about these questions: what makes an act right or wrong; can a basis for right and wrong be identified independently of revealed religion; is observing commands and prohibitions sufficient to lead a life of virtue and refinement? Readings in primary texts. GER:DB-Hum

4 units, not given this year

RELIGST 57. Millennium, Messiahs, and Mayhem

How the apocalypse has captured the imaginations and influenced the behaviors of many Jews and Christians who predict the end of the world during their lifetimes, whether facilitated by the arrival of a human or divine emissary, preceded by a cataclysm, or announced by a renunciation of normative morals. Examples include the Book of Revelations, the Dead Sea Scrolls, the Brotherhood of the Free Spirit, Shabtai Tzvi, Jacob Frank, the Mormons, and Chabad Chasidism.

4 units, not given this year

RELIGST 62. Philosophy of Religion

Classic and modern questions in the philosophy of religion traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and mystical experience. Readings from traditional and modern texts. GER:DB-Hum

4 units, Aut (Gelber, H)

RELIGST 82. Approaches to the Study of Religion: Christianity

Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:DB-Hum

4 units, not given this year

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity

The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum

4 units, Win (Pitkin, B)

RELIGST 101. Classical Islamic Theology

How did attitudes towards God's nature define and distinguish different theological movements in premodern Islam? Were theological differences due to different methods of interpreting the Qur'ân? God's power, free will versus predestination, the age of the

Universe. Political and social contexts. Readings mostly in primary sources. GER:DB-Hum

3 units, Spr (Sadeghi, B)

RELIGST 104. Views of the Human Body in Daoism
The human body as seen in Daoist traditions and related areas, particularly cosmol- ogy and medicine. Major sources including images and charts, and the views of the human being that they reflect. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 107. Hindus and Muslims in South Asia
The history of Hindus and Muslims living together in S. Asia for over 1,000 years. Peace and conflict, composite cultures, and interdependent social worlds. Partition in 1947 and the creation of separate nations. Religion, arts, society, and politics. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 108. The Mahabharata
How the Sanskrit epic and its versions in other languages are interwoven with the history of Hinduism and S. Asian arts, philosophy, and social and political thought. How the text is interpreted through performance, including village ritual dramas, classical dance, and mass market television.

4 units, Win (Hess, L)

RELIGST 111. Religions of Mexico
Key issues in the study of religion and religions of Mexico. Sacred cities of the Aztec and Maya, the encounter between Christianity and indigenous religions and contemporary religious performances in Mexico and among Mexican Americans. Theoretical frames of Mircea Eliade, Emile Durkheim, and Victor Turner. Emphasis is on the recently recovered indigenous codex known as the Mapa de Cuauhtinchan #2. GER:DB-Hum

4 units, Win (Carrasco, D)

RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions
Miraculous births, wandering in the wilderness, encounters with angels: stories of Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender

4 units, not given this year

RELIGST 113A. Sacred Space and the Supernatural in Japanese Religion
Ties to place in Japanese religious history, legends, and religious practices. The role of Japan's mountains in the religious imagination.

4 units, not given this year

RELIGST 114A. Sacred Journeys in Chinese Religion
Journey themes in Shamanic, Buddhist, Daoist, and popular Chinese religion from ancient to early modern period. Genres and traditions such as ancient shamanesses and their ecstatic trysts with nature deities, Daoist poets and their literary flights, and monks and their legendary westward journeys in search of Buddhist scripture.

4 units, not given this year

RELIGST 115. Hope and Prophetic Politics: Abraham Joshua Heschel and Martin Luther King, Jr.
The biblically informed prophetic tradition that has long shaped the history of American religious and political thought and that has often clashed with an impulse towards empire and the desire to accumulate power. Focus is on Abraham Joshua Heschel and Martin Luther King, Jr., 20th-century religious intellectuals whose lives and works draw on this tradition to raise and address questions basic to the role of religion in public life. GER:DB-Hum

4 units, Spr (Lerner, A; Gonnerman, M)

RELIGST 116. Daoist Thought, Daoist Religion
Main traditions and lineages of Daoism over its two and a half millennia of history. Sources include translated primary sources and secondary studies.

4 units, not given this year

RELIGST 118. Gandhi, King, and Nonviolence
(Same as HISTORY 105.) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today. GER:DB-Hum

4 units, not given this year

RELIGST 124. Sufi Islam
The complex of Islamic intellectual and social perspectives subsumed under the term Sufism. Sufi mystical philosophies and historical and social evolution. Major examples include: Qushayrî, Râbi'a, Junayd, Hallâj, Sulamî, Ibn al-'Arabî, Rûmî, Nizâm al-Dîn Awliyâ'. Social and political roles of Sufi saints and communities. Readings include original prose and poetry in translation, secondary discussions, and ethnography. GER:DB-Hum

4 units, Aut (Bashir, S)

RELIGST 126. Protestant Reformation
16th-century evangelical reformers (Luther, Calvin, Zwingli) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum

4 units, Aut (Pitkin, B)

RELIGST 127A. Kabbalah: The Mystical Teachings of Judaism
Jewish mystical literature, especially the Zohar. Mystical concepts of the divine: masculine and feminine aspects of the Godhead, divine sonship; eroticism and sexuality; cosmogony and apocalypse; mystical secrecy and popularization, including the contemporary Kabbalah movement in the U.S. and figures such as Madonna and Roseanne. Guest lectures by scholars of Kabbalah including Moshe Idel from Jerusalem and Daniel Matt, the American translator of the Zohar.

2 units, Aut (Fonrobert, C; Radwin, A)

RELIGST 129. Modern Jewish Thought
From the early Enlightenment to the present. Universalism, subjectivity, and redemption within Judaism's encounter with modernity as reflected on by Jewish intellectuals within the Western philosophical tradition; how modern Jewish intellectuals have shaped and been shaped by current debates. Challenges to religious identity by secularism, capitalism, and the nation state. Messianism, mysticism, reactionary romanticism, critical theory, post-Holocaust philosophy, spirituality, and feminism. Thinkers include Spinoza, Marx, Freud, Buber, Strauss, the Frankfurt school, Benjamin, Arendt, and Levinas.

4 units, not given this year

RELIGST 132. Jesus the Christ
How did Jesus of Nazareth, who never claimed to be Christ or divine, become the son of God after his death? Sources include the history of first-century Judaism and Christianity.

4 units, not given this year

RELIGST 133. Inventing Christianity in Late Antiquity
The transformation of an apocalyptic sect into an imperial religion from 200 to 600 C.E. Shifts in structures of authority, worship, and belief mapped against shifts in politics, economics and religion in the larger Roman empire. Cultural visions of this history including Edward Gibbon's Decline and Fall of the Roman Empire, Dan Brown's conspiracy theory in The Da Vinci Code, and Elaine Pagels' The Secret Gospel of Thomas. GER:DB-Hum

4 units, Spr (Lyman, R)

RELIGST 135. Daoist Ideals of Sainthood
Differing representations of the ideal of sainthood in Daoist texts from different backgrounds. Views of the Dao and application to self-cultivation, ethics, and government.

4 units, not given this year

RELIGST 136. Buddhist Yoga
Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER:DB-Hum, EC-GlobalCom

4 units, Win (Bielefeldt, C)

RELIGST 144. John Calvin and Christian Faith
Close reading and analysis of Calvin's Institutes of the Christian Religion as a classic expression of Christian belief. GER:DB-Hum

4 units, not given this year

RELIGST 148. From Jesus to Paul
Jesus considered himself God's definitive prophet, but he did not think he was God, and had no intention of founding a new religion. How did this Jewish prophet become the gentile God and the founder of Christianity? The role of Paul. GER:DB-Hum

4 units, not given this year

RELIGST 150. The Lotus Sutra: History of a Buddhist Book
The Lotus school of Mahayana, and its Indian sources, Chinese formulation, and Japanese developments. GER:DB-Hum, DB-Hum, EC-GlobalCom

4 units, Aut (Staff)

RELIGST 154. Buddhism Today: Responses to New Global Challenges
How do the traditions of Buddhism cope with new social, ethical, and global challenges? Case studies from Sri Lanka, Japan, and the West. The historical position of Buddhist social thought. Buddhism's ascetic and meditative legacy: friend or foe of social engagement? GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 156. Goddesses and Gender in Hinduism
India's tradition of worshiping female forms of the divine, including Kali, Durga, Lakshmi, Saraswati, Radha, Sita, and local deities. The stories, histories, iconographies, theologies, arts, and practices associated with these goddesses. How the worship of goddesses impacts the lives of women. Readings include Is the Goddess a Feminist? GER:DB-Hum, EC-Gender

4 units, not given this year

RELIGST 159. Music and Religion in South Asia
Music and religion have been closely related for millennia in the India subcontinent. Topics include theories of sound, mantra, music as yoga, guru-disciple relationship, devotional singing, gods and their relation to music, aesthetic theory, classical and folk forms, and Hindu and Muslim traditions. Practical instruction in music. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

RELIGST 159A. Religion and Performance in South Asia
(Same as RELIGST 359A.) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions. GER:DB-Hum

4 units, Spr (Hess, L)

RELIGST 167. Medieval Religious Philosophy
(Same as PHIL 101.) Focus is on God, world, and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and *The Book of the World* as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Readings from Augustine, Anselm, Aquinas, Scotus, Ockham. GER:DB-Hum

4 units, not given this year

RELIGST 170C. Reading in Biblical Hebrew
Third of a three quarter sequence. Readings and translation of biblical narratives emphasizing grammar and literary techniques. Prerequisite: AMELANG 170B.

4 units, not given this year

RELIGST 172. Sex, Body, and Gender in Medieval Religion
Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:DB-Hum, EC-Gender

4 units, Spr (Gelber, H)

RELIGST 174. Martyrdom in the Ancient World
(Same as CLASSGEN 174.) Jewish, Christian, and pagan narratives of persecution and resistance. Emphasis is on ancient documents in translation. Competing agendas of parties involved, group dynamics, individual motivation, symbolic violence, and the body as a locus of power and control. GER:DB-Hum

4 units, Aut (Gleason, M)

RELIGST 176. Religious Diversity: Theoretical and Practical Issues
What does it mean for a religion to be true? If one religion is true, what about the truth of other religious possibilities? How, and why, should religious traditions be compared? Readings address tolerance and pluralism, relativism, comparative theory, and new religious virtues. GER:DB-Hum

4 units, Win (Rapp, J)

RELIGST 183. The Death of God: Between Hegel and Marx
The radical transformations in Western notions of God between the death of Hegel and the birth of historical materialism, arguing that questions about theism and atheism, humanism, and history formulated in the period 1831-50 are still pertinent today. Texts from Hegel, the young Hegelians, Feuerbach, and Marx on issues of God, history, and the social dimensions of human nature. GER:DB-Hum

4 units, Win (Sheehan, T)

RELIGST 185. Prophetic Voices of Social Critique
Judges, Samuel, Amos, and Isaiah depict and question power, strong leaders who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal arrangements through attention to narrative artistry and poetic force, and condemnation of injustice. Includes service-learning component in conjunction with the Haas Center. GER:DB-Hum

4 units, not given this year

RELIGST 199. Individual Work
Prerequisite: consent of instructor and department. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RELIGST 201. Classical Islamic Law
(Same as RELIGST 301.) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts.

3-5 units, Win (Sadeghi, B)

RELIGST 203. Myth, Place, and Ritual in the Study of Religion
(Same as RELIGST 303.) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's Say the Name: A Survivor's Tale in Prose and Poetry, Jackson's At Home in the World, Marie Cardinal's The Words to Say It, and John Phillip Santos' Places Left Unfinished at the Time of Creation.

3-5 units, Spr (Carrasco, D)

RELIGST 210. Translating the Daode Jing
One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum

4 units, not given this year

RELIGST 212. Chuang Tzu
The Chuang Tzu (Zhuangzi) in its original setting and as understood by its spiritual progeny. Limited enrollment. GER:DB-Hum

5 units, not given this year

RELIGST 216. Japanese Buddhism
Recent scholarship. GER:DB-Hum

4 units, not given this year

RELIGST 217. Japanese Studies of Religion in China
(Same as RELIGST 317. Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

3 units, not given this year

RELIGST 219. Buddhism and Death
The role of pre and post mortem practices in ancient and modern Buddhist traditions; examples from India, China, and Japan. How the clergy and laity conceived of the process of dying, and how those beliefs were transformed into rituals.

4 units, Spr (Brose, B)

RELIGST 220. Modern Muslim Thought: Philosophy, Politics, Society
Focus is on major challenges of the modern period. Historicity and plurality. Questions concerning governance, law, development, and political and social order in majority and minority Muslim contexts. Readings include original works in English and in translation. GER:DB-Hum
5 units, Spr (Staff)

RELIGST 221. The Talmud
(Same as RELIGST 321.) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew. GER:DB-Hum
4 units, not given this year

RELIGST 222. Literature and Society in Medieval Islam
The development of literary traditions, 600-1500. Major poetic and prose topoi through examples from Arabic, Persian, and Turkish literature in translation. Literature's place in Islamic societies and biographies of significant authors. The religious value of literary forms. Literary canons as unifying agents in different parts of the medieval Muslim world. Comparison between high and folk literatures. The role of aesthetic paradigms in the formation of Islamic religious and cultural identities. GER:DB-Hum
4 units, not given this year

RELIGST 223. Studying Islam: History, Methods, Debates
Islam as a subject of academic inquiry since the 19th century. Origins and critiques of major methodological perspectives in Islamic studies such as philology, religious studies, history, art history, and anthropology. Landmarks in the development of the field and the work of major scholars. Academic debates regarding unity versus diversity, orientalism, fundamentalism and Islamism, Sufism, and gender. Current trends in scholarship on medieval and modern Muslim societies. Prerequisite: course work in Islamic studies or methodology in religious studies. GER:DB-Hum
4 units, not given this year

RELIGST 224. Classical Islamic Texts
(Same as RELIGST 324.) Premodern Islamic scholarship. Genre-specific historical research methods. The hadith literature, tafsir, biographical dictionaries, fiqh, tarikh, and geographical works. Prerequisite: reading knowledge of Arabic.
3-5 units, Spr (Sadeghi, B)

RELIGST 226. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period
(Same as RELIGST 326.) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.
5 units, not given this year

RELIGST 227. The Qur'ân
(Same as RELIGST 327.) Early history, themes, structure, chronology, and premodern interpretation.relative chronology of passages.
5 units, not given this year

RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries
To what extent are Judaism and Christianity products of the Roman Empire, and shaped by its politics? Literature concerning Jewish and Christian perceptions of power, and archaeological and artistic traces of both religions in the imperial city of Rome. What roles did strategies of resistance and accommodation play in the formation of these religious communities' emerging identities? Possible optional field trip to Rome over Spring break. GER:DB-Hum
5 units, not given this year

RELIGST 238. Christian Neo-Platonism, East and West
(Same as RELIGST 338.) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine.
3-5 units, Win (Staff)

RELIGST 239. Luther and the Reform of Western Christianity
(Same as RELIGST 339.) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world. GER:DB-Hum
3-5 units, Spr (Pitkin, B)

RELIGST 240. Contemporary Religious Reflection
(Same as HUMNTIES 196S, RELIGST 340.) Focus is on normative and prescriptive proposals by recent and contemporary philosophers and theologians, as opposed to the domination of Religious Studies by textual, historical, cultural, and other largely descriptive and interpretive approaches. Do such normative and prescriptive proposals belong in the academy? Has Religious Studies exorcised its theological nimbus only to find contemporary religious reflection reappearing elsewhere in the university?
3-5 units, Aut (Sockness, B)

RELIGST 247. Chinese Buddhist Texts
(Same as RELIGST 347.) From the first millennium C.E., including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese. GER:DB-Hum
3-5 units, Aut (Staff)

RELIGST 248. Chinese Buddhism in World Historical Perspective
(Same as RELIGST 348.) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.
3-5 units, Spr (McRae, J)

RELIGST 250. Classics of Indian Buddhism
Texts in English translation includING discourses (sutras), philosophical treatises, commentaries, didactic epistles, hymns, biographies, and narratives. GER:DB-Hum
4 units, not given this year

RELIGST 251. Readings in Indian Buddhist Texts
(Same as RELIGST 351. Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit. GER:DB-Hum
3-5 units, Win (Harrison, P)

RELIGST 253. Mountains, Buddhist Practice, and Religious Studies
(Same as RELIGST 353.) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources.
3-5 units, Aut (Blair, H)

RELIGST 254. Recent Contributions to Buddhist Studies
May be repeated for credit.
4 units, not given this year

RELIGST 257. Readings in Daoist Texts
(Same as RELIGST 357.) Readings from primary sources. Prerequisite: classical Chinese.
4 units, not given this year

RELIGST 258. Japanese Buddhist Texts
(Same as RELIGST 358.) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese.
3-5 units, Spr (Bielefeldt, C)

RELIGST 260. Martin Buber: Philosopher, Theologian, Revolutionary
How Buber's philosophy of dialogue influenced fields including sociology, education, Bible scholarship, psychology, political philosophy, and Jewish and Christian theology. Focus is on I and Thou, his retellings of Hasidic stories, Bible commentaries, and controversial approach to Zionism. His definition of what it means to be human and to live as part of a human community.
4 units, not given this year

RELIGST 263. Judaism and the Body
Representations and discourses of the body in Jewish culture; theories of body and ritual. Case studies of circumcision, menstrual impurity, and intersexuality. Readings include classical texts in Jewish tradition and current discussions of these textual traditions. GER:DB-Hum, EC-Gender
4 units, not given this year

RELIGST 271A. Dante's Spiritual Vision
Mysticism, poetry, ethics, and theology in Dante's Divine Comedy. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:DB-Hum

4-5 units, not given this year

RELIGST 271B. Dante's Spiritual Vision
Mysticism, poetry, ethics and theology in Dante's Divine Comedy. Brief, supplementary readings from both classical authors, like St. Augustine and St. Thomas, and modern writers. Prerequisite: 271A.

4-5 units, not given this year

RELIGST 273. Historicism and Its Problems
(Same as RELIGST 373.) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology. GER:DB-Hum

3-5 units, Spr (Sockness, B)

RELIGST 274. From Kant to Kierkegaard
(Same as RELIGST 374. Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum

3-5 units, not given this year

RELIGST 275. Kierkegaard and Religious Existentialism
(Same as RELIGST 375. Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, Concluding Unscientific Postscript to Philosophical Fragments, in its early 19th-century context. GER:DB-Hum

3-5 units, not given this year

RELIGST 278. Heidegger: Hermeneutics of the Self
(Same as RELIGST 378.) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and opuscula up to 1933, the *Letter on Humanism*, and *Contributions of Philosophy*. GER:DB-Hum

3-5 units, Aut (Sheehan, T)

RELIGST 279. Heidegger and the Holy
(Same as RELIGST 379.) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of Being and Time as an introduction to the question of the holy.

4 units, not given this year

RELIGST 280. Schleiermacher
(Same as RELIGST 380.) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context. GER:DB-Hum

3-5 units, not given this year

RELIGST 290. Majors Seminar
Theories of religion versus religions themselves: attempts to define the phenomenon of religion in anthropology, psychology, sociology, and cultural studies, such as ny Sigmund Freud, Karl Marx, Emile Durkheim, Mircea Eliade, Max Weber, and Clifford Geertz; critical perspectives on the study of religion, such as gender and postcolonialism. WIM

5 units, Win (Gelber, H)

RELIGST 297. Senior Essay/Honors Essay Research
Guided by faculty adviser. May be repeated for credit. Prerequisite: consent of instructor and department.

3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

RELIGST 298. Senior Colloquium
For Religious Studies majors writing the senior essay or honors thesis. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities.

5 units, Spr (Pitkin, B)

GRADUATE COURSES IN RELIGIOUS STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

RELIGST 301. Classical Islamic Law
(Same as RELIGST 201.) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts.

3-5 units, Win (Sadeghi, B)

RELIGST 303. Myth, Place, and Ritual in the Study of Religion
(Same as RELIGST 203.) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's Say the Name: A Survivor's Tale in Prose and Poetry, Jackson's At Home in the World, Marie Cardinal's The Words to Say It, and John Phillip Santos' Places Left Unfinished at the Time of Creation.

3-5 units, Spr (Carrasco, D)

RELIGST 304A. Theories and Methods
Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, alternate years, not given this year

RELIGST 304B. Theories and Methods
Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, Aut (Bashir, S)

RELIGST 308. Medieval Japanese Buddhism
Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film.

3-5 units, not given this year

RELIGST 312. Buddhist Studies Proseminar
Research methods and materials for the study of Buddhism. May be repeated for credit. Prerequisite: reading knowledge of Chinese or Japanese.

1-5 units, not given this year

RELIGST 317. Japanese Studies of Religion in China
(Same as RELIGST 217. Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

3 units, not given this year

RELIGST 321. The Talmud
(Same as RELIGST 221.) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew.

(Same as RELIGST 227.) Early history, themes, structure, chronology, and premodern interpretation.relative chronology of passages.

5 units, not given this year

RELIGST 338. Christian Neo-Platonism, East and West
(Same as RELIGST 238.) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine.

3-5 units, Win (Staff)

RELIGST 339. Luther and the Reform of Western Christianity
(Same as RELIGST 239.) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world.
3-5 units, Spr (Pitkin, B)

RELIGST 340. Contemporary Religious Reflection
(Same as HUMNTIES 196S, RELIGST 240.) Focus is on normative and prescriptive proposals by recent and contemporary philosophers and theologians, as opposed to the domination of Religious Studies by textual, historical, cultural, and other largely descriptive and interpretive approaches. Do such normative and prescriptive proposals belong in the academy? Has Religious Studies exorcised its theological nimbus only to find contemporary religious reflection reappearing elsewhere in the university?
3-5 units, Aut (Sockness, B)

RELIGST 347. Chinese Buddhist Texts
(Same as RELIGST 247.) From the first millennium C.E., including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese.
3-5 units, Aut (Staff)

RELIGST 348. Chinese Buddhism in World Historical Perspective
(Same as RELIGST 248.) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.
3-5 units, Spr (McRae, J)

RELIGST 349. Meditation and Mythology in Chinese Buddhism
Readings in Chinese texts and English scholarly literature on issues such as specific techniques and hagiographical imagery in Chinese Buddhist traditions of self-cultivation. Prerequisite: background in Chinese or Japanese.
3-5 units, Win (McRae, J)

RELIGST 350. Modern Western Religious Thought Proseminar
Research methods and materials. May be repeated for credit.
1-5 units, not given this year

RELIGST 351. Readings in Indian Buddhist Texts
(Same as RELIGST 251. Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit.
3-5 units, Win (Harrison, P)

RELIGST 353. Mountains, Buddhist Practice, and Religious Studies
(Same as RELIGST 253.) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources.
3-5 units, Aut (Blair, H)

RELIGST 357. Readings in Daoist Texts
(Same as RELIGST 257.) Readings from primary sources. Prerequisite: classical Chinese.
4 units, not given this year

RELIGST 358. Japanese Buddhist Texts
(Same as RELIGST 258.) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese.
3-5 units, Spr (Bielefeldt, C)

RELIGST 359A. Religion and Performance in South Asia
(Same as RELIGST 159A.) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions.
4 units, Spr (Hess, L)

RELIGST 370. Comparative Religious Ethics
The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor.
4 units, not given this year

RELIGST 373. Historicism and Its Problems
(Same as RELIGST 273.) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology.
3-5 units, Spr (Sockness, B)

RELIGST 374. From Kant to Kierkegaard
(Same as RELIGST 274. Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard.
3-5 units, not given this year

RELIGST 375. Kierkegaard and Religious Existentialism
(Same as RELIGST 275. Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, Concluding Unscientific Postscript to Philosophical Fragments, in its early 19th-century context.
3-5 units, not given this year

RELIGST 378. Heidegger: Hermeneutics of the Self
(Same as RELIGST 278.) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and opuscula up to 1933, the *Letter on Humanism,* and *Contributions of Philosophy*.
3-5 units, Aut (Sheehan, T)

RELIGST 379. Heidegger and the Holy
(Same as RELIGST 279.) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of *Being and Time* as an introduction to the question of the holy.
4 units, not given this year

RELIGST 380. Schleiermacher
(Same as RELIGST 280.) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context.
3-5 units, not given this year

RELIGST 389. Individual Work for Graduate Students
May be repeated for credit. Prerequisite: consent of instructor.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

RELIGST 390. Teaching in Religious Studies
Required supervised internship for PhDs.
3-5 units, Aut (Staff), Win (Staff), Spr (Staff)

RELIGST 391. Pedagogy
Required of Ph.D. students. May be repeated for credit.
1 unit, Aut (Rosenberg, J)

RELIGST 392. Candidacy Essay
Prerequisite: consent of graduate director. May be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

RELIGST 395. Master of Arts Thesis
2-9 units, Aut (Staff), Win (Staff), Spr (Staff)

RELIGST 399. Recent Works in Religious Studies
Readings in secondary literature for Religious Studies doctoral students. May be repeated for credit.
1-2 units, not given this year

RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES) COURSES

For information on undergraduate and graduate programs in the Center for Russian, East European, and Eurasian Studies, see the "Russian, East European, and Eurasian Studies" section of this bulletin.

UNDERGRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

REES 35. Self-Determination in Central Asian Cinema of the 1960s and 1990s
Films with English subtitles from Tajikistan, Uzbekistan, Kazakhstan, Kyrgyzstan, and Turkmenistan. May be repeated once for credit. (AU)
1-2 units, Win (Staff), Spr (Staff)

REES 105. Central and East European Politics
(Same as REES 205.) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe. GER:DB-SocSci
5 units, Aut (Staff), given once only

REES 130. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries
(Same as REES 330.) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.
4-5 units, Aut (Kollmann, J)

GRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

REES 200. Current Issues in Russian, East European, and Eurasian Studies
Enrollment limited to REEES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.
1 unit, Aut (Kollmann, J), Win (Kollmann, J), Spr (Kollmann, J)

REES 205. Central and East European Politics
(Same as REES 105.) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe.
5 units, Aut (Staff), given once only

REES 299. Directed Reading
1-12 units, Aut (Staff), Win (Staff), Spr (Staff)

REES 320. State and Nation Building in Central Asia
Issues of identity, development, and security following the dissolution of the Soviet Union and the emergence of independent states in Central Asia and the Southern Caucasus. Topics include the impact of 9/11, the spread of radical Islamist movements in the region, its growing role as a transit route for drugs, weapons, and possibly nuclear materials, the impact of the Soviet legacy, the nature of political and economic transformations, relations with neighboring countries, security challenges, and options facing U.S. policy makers.
5 units, Win (Lapidus, G)

REES 330. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries
(Same as REES 130.) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.
4-5 units, Aut (Kollmann, J)

SCIENCE, TECHNOLOGY, AND SOCIETY (STS) COURSES

For information on undergraduate programs in Science, Technology, and Society, including cognate course lists applicable to degree requirements, see the "Science, Technology, and Society" section of this bulletin. See http://sts.stanford.edu for updated course scheduling information, course syllabi, faculty and staff information, and information about how to declare a major or a minor in STS.

UNDERGRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

STS 101. Science, Technology, and Contemporary Society
(Same as ENGR 130, STS 201.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci
4-5 units, Aut (McGinn, R)

STS 101Q. Technology in Contemporary Society
Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci
4 units, Aut (McGinn, R)

STS 110. Ethics and Public Policy
(Same as MS&E 197, PUBLPOL 103B.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM
5 units, Win (McGinn, R)

STS 112. Ten Things: Science, Technology, and Design
(Same as CLASSART 113, CLASSART 213.) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci
4-5 units, Win (Shanks, M)

STS 115. Ethical Issues in Engineering
(Same as ENGR 131.) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum
4 units, Spr (McGinn, R), alternate years, not given next year

STS 134. History of the Senses
(Same as HISTORY 241G, HISTORY 341G, STS 234.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci
4-5 units, not given this year

STS 144. Game Studies: Issues in Design, Technology, and Player Creativity
What can be learned about innovation from digital games? Digital game technologies, communities, and cultures. Topics include game design, open source ideas and modding, technology studies, player/consumer-driven innovation, fan culture, transgressive play, and collaborative co-creation drawn from virtual worlds and online games.
4 units, Spr (Lowood, H)

STS 153. Living With Social Technologies
How can technologies facilitate and engage human capacities and needs for social interaction? Do social technologies pose special challenges for policy making and research and how can we respond? Topics include: the emergence of social technologies in cyberspace; gaming, social networking, virtual agents, and social robotics; comparison of communities online and off; technological innovation and new modes of communicating, learning, playing, and working; the social impacts of shifting boundaries between animacy/inanimacy, human/machine, real/virtual.
4 units, Win (Sabanovic, S)

STS 155. Society in the Age of Robots
Predictions, discourse, and applications of robotics and its impacts on individual lives, cultural practices, and social institutions. Are robots the next step in human evolution? How will robotic technologies affect society in their new roles as caretakers, companions, entertainers, teachers, and guides? Can robotics contribute to solving contemporary social issues such as an aging society? Attention to materials from robotics, the social sciences and humanities, and film and fiction; comparison between the U.S. and Japan.
4 units, Spr (Sabanovic, S)

STS 160. Controversy and Closure: The Politics of Technical Expertise
What are the causes and consequences of global warming? Do birth control pills increase the risk of cancer? Was there prewar evidence of WMD in Iraq? How political institutions, culture, and technology shape techno-political advice and common assumptions about who counts as an expert.
4 units, not given this year

STS 165. Science and Engineering in the Security State
How defense research changes how scientists and engineers work. How the research projects of the Cold War shaped practices in disciplines including computing, physics, biology, medicine, environmental sciences, and social sciences. Challenges faced by scientists and engineers in the context of heavy defense spending.
4 units, not given this year

STS 170. Technology in Modern Security Discourse
Technology's central role in discussions of international security issues including nuclear proliferation or containment, ballistic missiles or anti-missiles, biological weapons or vaccines, and data mining or computer security. What uses can and should technology serve in diplomacy? Why are some weapons stigmatized while others are deemed acceptable? How does discourse itself become a weapon? The history of technologies and discourses about them.
4 units, not given this year

STS 176. Technology and Politics
The impact of politics, scientific advice, and government actors on new technologies; their effects on political life. How politics have shaped the development, use, and regulation of information, bio-, nano-, space-based weapons, nuclear power, and greenhouse gas technologies. How technologies such as television, the Internet, and large computer databases have affected democratic politics, freedom, privacy, equality, civil society, and political participation. Focus is on U.S. politics; attention to developments elsewhere.
5 units, offered occasionally

STS 180. Imagining the Computer, Wiring the World
(Same as STS 280.) The theme of revolution in th epopular imagination about computing. How people imagine themselves as members of a global network society, navigating cyberspace and pioneering a bold, new information age. But where did modern information technology come from? Has it brought about revolution, and if so for whom? The cultural and political visions that shaped modern computing, and how the resulting technology has shaped a globalizing sociopolitical order.
4 units, Spr (Slayton, R)

STS 190. Junior Honors Seminar
For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.
3-4 units, Win (Slayton, R)

STS 195A. Honors Research
For students in STS honors program. Goal is submission of proposal.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

STS 195B. Honors Research
For students in STS honors program. Continued study and writing.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

STS 195C. Honors Research
For students in STS honors program. Final work on project.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

STS 199. Individual Work
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

STS 200. Senior Colloquium
Analytical and theoretical texts treating the natures and interplay of science, technology, and society. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
4 units, Win (Heise, U), Spr (Dupuy, J)

STS 210. Ethics, Science, and Technology
Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum
4 units, Spr (McGinn, R), alternate years, not given this year

STS 221. The Politics and Ethics of Modern Science and Technology
(Same as HISTORY 257, HISTORY 347.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
4-5 units, not given this year

STS 290A. Senior Honors Seminar
For seniors pursuing STS honors. Goal is to write a literature review with adviser consultation.
1-5 units, Aut (Slayton, R; Sabanovic, S)

STS 290B. Senior Honors Seminar
For seniors pursuing STS honors. Goal is to analyze data and write up results.
1-5 units, Win (Sabanovic, S)

STS 290C. Senior Honors Seminar
For seniors pursuing STS honors. Goal is to complete the final thesis.
1-5 units, Spr (Slayton, R)

GRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

STS 201. Science, Technology, and Contemporary Society
(Same as ENGR 130, STS 101.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology.
4-5 units, Aut (McGinn, R)

STS 234. History of the Senses
(Same as HISTORY 241G, HISTORY 341G, STS 134.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation.
4-5 units, not given this year

STS 280. Imagining the Computer, Wiring the World
(Same as STS 180.) The theme of revolution in th epopular imagination about computing. How people imagine themselves as members of a global network society, navigating cyberspace and pioneering a bold, new information age. But where did modern information technology come from? Has it brought about revolution, and if so for whom? The cultural and political visions that shaped modern computing, and how the resulting technology has shaped a globalizing sociopolitical order.
4 units, Spr (Slayton, R)

STS 299. Advanced Individual Work
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

FLORENCE SCIENCE, TECHNOLOGY, AND SOCIETY COURSES

OSPFLOR 134F. Modernist Italian Cinema
5 units, Aut (Campani, E)

SLAVIC GENERAL (SLAVGEN) COURSES

These courses are open to all undergraduates and graduate students, are taught in English, and do not require a knowledge of a Slavic language. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in Slavic languages and literatures, see the "Slavic Languages and Literatures" section of this bulletin. For courses in Slavic language instruction, see "Slavic Languages" courses section of this bulletin.

UNDERGRADUATE COURSES IN SLAVIC GENERAL

SLAVGEN 13N. Russia and the Russian Experience
Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol
Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukranian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum
3-4 units, Aut (Fleishman, L)

SLAVGEN 110. The Gogol Bordello: Ukraine as a Meeting House of Cultures
(Same as SLAVGEN 210.) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by Polish, Jewish, German, and Russian cohabitants. Possible authors include: Andrukhovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko. GER:DB-Hum
3-5 units, not given this year

SLAVGEN 122. Yiddish Story
(Same as SLAVGEN 222.) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshtevn. In English. GER:DB-Hum, EC-GlobalCom
5 units, not given this year

SLAVGEN 123. The Yiddish Novel
(Same as SLAVGEN 223.) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish. GER:DB-Hum
3-4 units, not given this year

SLAVGEN 133. Poles and Others: Literature and History in Modern Poland
(Same as SLAVGEN 233.) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusans, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum
3-4 units, not given this year

SLAVGEN 141. Staging the Revolution: Russian Theater and Society, 1917-1937
(Same as SLAVGEN 241.) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English. GER:DB-Hum
4 units, not given this year

SLAVGEN 145. Age of Experiment: From Pushkin to Gogol
(Same as SLAVGEN 245.) The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin's *Eugene Onegin,*

The Belkin Tales, and *The Captain's Daughter*; Lermontov's *Hero of Our Time*; and Gogol's *Petersburg Tales* and *Dead Souls*. GER:DB-Hum, EC-GlobalCom

3-4 units, Aut (Fleishman, L)

SLAVGEN 146. History and Other Theories of Time and Action in the Great Russian Novel
(Same as SLAVGEN 246.) Connections of philosophy to literary form in Turgenev's *Fathers and Sons*, Tolstoy's *War and Peace*, Dostoevsky's *The Brothers Karamazov*, and Chekov's *The Cherry Orchard*, and other stories. GER:DB-Hum, EC-GlobalCom

3-4 units, Win (Greenleaf, M)

SLAVGEN 147. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s
(Same as SLAVGEN 247.) First of two-part sequence. Russian modernism and the avant garde.The Russian Revolution, the era of the NEP, Soviet civilization, and the literature of opposition following Stalin's death. Texts in English translation. GER:DB-Hum, EC-GlobalCom

3-4 units, Spr (Fleishman, L)

SLAVGEN 148. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present
(Same as SLAVGEN 248.) From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for 399. GER:DB-Hum, EC-GlobalCom

3-4 units, not given this year

SLAVGEN 150. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry
(Same as SLAVGEN 250.) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian. GER:DB-Hum

3-4 units, not given this year

SLAVGEN 151. Dostoevsky and His Times
(Same as COMPLIT 119, COMPLIT 219, SLAVGEN 251.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum

4 units, Win (Frank, J)

SLAVGEN 153. Russian Jewish LIterature
(Same as SLAVGEN 253.) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the t21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsypkin, Ludmila Ulitskaia, Gary Shteyngardt.

3-4 units, Win (Safran, G)

SLAVGEN 155. Anton Chekhov and the Turn of the Century
(Same as SLAVGEN 255.) Chekhov's art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov's letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:DB-Hum

4 units, Spr (Safran, G)

SLAVGEN 156. Nabokov in the Transnational Context
(Same as COMPLIT 115, COMPLIT 215, SLAVGEN 256.) Nabakov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift, Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English.GER:DB-Hum

3-4 units, Spr (Greenleaf, M)

SLAVGEN 162. Gender Images in Film
(Same as SLAVGEN 262.) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:EC-Gender

3 units, not given this year

SLAVGEN 163. Gender in Postwar Russian Culture
(Same as SLAVGEN 263.) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies. GER:EC-Gender

3-4 units, not given this year

SLAVGEN 165. Poetry, Painting, and Music of the Russian Avant Garde
(Same as SLAVGEN 265.) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, not given this year

SLAVGEN 169. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory
(Same as SLAVGEN 269.) Russian culture through its oral folklore and music. Theory, current data and its interpretation, how scholars collect and understand traditional oral poetry, and the lessons of folklore. GER:DB-Hum

3-5 units, not given this year

SLAVGEN 181. Philosophy and Literature
Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Vermeule, B)

SLAVGEN 190. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought
(Same as HUMNTIES 197F, SLAVGEN 290.) Themes: institutions of the family and gender; debate about the female body, church, and religion; the decline of privilege and the rise of capital and industry; the meaning of art and the artist; conflicts of law and custom, country and city, andnationalism and cosmopolitanism; and the ascetic rejection of the world. Authors include Marx, Mill, Nietzsche, Dostoevsky, Weber, and Freud. GER:DB-Hum, DB-Hum, EC-EthicReas

3-4 units, Spr (Freidin, G)

SLAVGEN 195. RUSSIAN THEATER
(Same as SLAVGEN 295.) Reading plays in juxtaposition with clips from performances and famous directors' writings (Stanislavsky, Meyerhold, and beyond). Evolution of Russian theatrical theory and practice, with particular attention to the present. Some knowledge of Russian desirable. GER:DB-Hum

3-4 units, Aut (Greenleaf, M)

GRADUATE COURSES IN SLAVIC GENERAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SLAVGEN 210. The Gogol Bordello: Ukraine as a Meeting House of Cultures
(Same as SLAVGEN 110.) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, German, and Russian cohabitants. Possible authors include : Andrukhovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko.

3-5 units, not given this year

SLAVGEN 222. Yiddish Story
(Same as SLAVGEN 122.) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshtevn. In English.

5 units, not given this year

SLAVGEN 223. The Yiddish Novel
(Same as SLAVGEN 123.) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish.

3-4 units, not given this year

SLAVGEN 233. Poles and Others: Literature and History in Modern Poland
(Same as SLAVGEN 133.) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusans, Ukrainians, and others from the state and participation in a partially shared culture.

3-4 units, not given this year

SLAVGEN 241. Staging the Revolution: Russian Theater and Society, 1917-1937
(Same as SLAVGEN 141.) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English.

4 units, not given this year

SLAVGEN 245. Age of Experiment: From Pushkin to Gogol
(Same as SLAVGEN 145.) The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin's *Eugene Onegin, The Belkin Tales,* and *The Captain's Daughter*; Lermontov's *Hero of Our Time*; and Gogol's *Petersburg Tales* and *Dead Souls*.

3-4 units, Aut (Fleishman, L)

SLAVGEN 246. History and Other Theories of Time and Action in the Great Russian Novel
(Same as SLAVGEN 146.) Connections of philosophy to literary form in Turgenev's *Fathers and Sons*, Tolstoy's *War and Peace*, Dostoevsky's *The Brothers Karamazov*, and Chekov's *The Cherry Orchard*, and other stories.

3-4 units, Win (Greenleaf, M)

SLAVGEN 247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s
(Same as SLAVGEN 147.) First of two-part sequence. Russian modernism and the avant garde.The Russian Revolution, the era of the NEP, Soviet civilization, and the literature of opposition following Stalin's death. Texts in English translation.

3-4 units, Spr (Fleishman, L)

SLAVGEN 248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present
(Same as SLAVGEN 148.) From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for 399.

3-4 units, not given this year

SLAVGEN 250. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry
(Same as SLAVGEN 150.) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian.

3-4 units, not given this year

SLAVGEN 251. Dostoevsky and His Times
(Same as COMPLIT 119, COMPLIT 219, SLAVGEN 151.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history.

4 units, Win (Frank, J)

SLAVGEN 253. Russian Jewish LIterature
(Same as SLAVGEN 153.) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the t21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsypkin, Ludmila Ulitskaia, Gary Shteyngardt.

3-4 units, Win (Safran, G)

SLAVGEN 255. Anton Chekhov and the Turn of the Century
(Same as SLAVGEN 155.) Chekhov's art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov's letters and works by his friends and contemporaries, such as Leskov, Tolstov, Korolenko, and Gorky.

4 units, Spr (Safran, G)

SLAVGEN 256. Nabokov in the Transnational Context
(Same as COMPLIT 115, COMPLIT 215, SLAVGEN 156.) Nabakov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift, Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English.

3-4 units, Spr (Greenleaf, M)

SLAVGEN 262. Gender Images in Film
(Same as SLAVGEN 162.) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory.

3 units, not given this year

SLAVGEN 263. Gender in Postwar Russian Culture
(Same as SLAVGEN 163.) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies.

3-4 units, not given this year

SLAVGEN 265. Poetry, Painting, and Music of the Russian Avant Garde
(Same as SLAVGEN 165.) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, not given this year

SLAVGEN 269. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory
(Same as SLAVGEN 169.) Russian culture through its oral folklore and music. Theory, current data and its interpretation, how scholars collect and understand traditional oral poetry, and the lessons of folklore.

3-5 units, not given this year

SLAVGEN 290. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought
(Same as HUMNTIES 197F, SLAVGEN 190.) Themes: institutions of the family and gender; debate about the female body, church, and religion; the decline of privilege and the rise of capital and industry; the meaning of art and the artist; conflicts of law and custom, country and city, andnationalism and cosmopolitanism; and the ascetic rejection of the world. Authors include Marx, Mill, Nietzsche, Dostoevsky, Weber, and Freud.
3-4 units, Spr (Freidin, G)

SLAVGEN 295. RUSSIAN THEATER
(Same as SLAVGEN 195.) Reading plays in juxtaposition with clips from performances and famous directors' writings (Stanislavsky, Meyerhold, and beyond). Evolution of Russian theatrical theory and practice, with particular attention to the present. Some knowledge of Russian desirable.
3-4 units, Aut (Greenleaf, M)

SLAVGEN 313. Visuality and Literacy Workshop
Visual arts, theater, and literature in the culture of modernity.
1-2 units, not given this year

SLAVIC LANGUAGE (SLAVLANG) COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 17, 2008. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN SLAVIC LANGUAGE

SLAVLANG 1. First-Year Russian, First Quarter
Functionally-based communicative approach, including essential Russian grammar. Russian culture and the Russian view of reality.
5 units, Aut (Marcos, M)

SLAVLANG 2. First-Year Russian, Second Quarter
Functionally-based communicative approach, including essential Russian grammar. Russian culture and the Russian view of reality.
5 units, Win (Marcos, M; Leidy, W)

SLAVLANG 3. First-Year Russian, Third Quarter
Functionally-based communicative approach, including essential Russian grammar. Russian culture and the Russian view of reality.
5 units, Spr (Marcos, M; Leidy, W)

SLAVLANG 5. Russian for Native Speakers, First Quarter
Self-paced.Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.
2 units, Aut (Khassina, E)

SLAVLANG 6. Russian for Native Speakers, Second Quarter
Self-paced.Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.
2 units, Win (Neklyudova, E)

SLAVLANG 7. Russian for Native Speakers, Third Quarter
Self-paced.Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.
2 units, Spr (Marcos, M)

SLAVLANG 42. Russian for Returnees
For students returning from the Stanford Program in Moscow; others welcome. Goal is to prepare students who took first-year Russian abroad for SLAVLANG 53.
2 units, Win (Schupbach, R)

SLAVLANG 51. Second-Year Russian, First Quarter
More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. 51: Aut, 52: Win, 53: Spr
5 units, Aut (Khassina, E)

SLAVLANG 52. Second-Year Russian, Second Quarter
More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. 51: Aut, 52: Win, 53: Spr
5 units, Win (Khassina, E)

SLAVLANG 53. Second-Year Russian, Third Quarter
More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. 51: Aut, 52: Win, 53: Spr
5 units, Spr (Khassina, E)

SLAVLANG 55. Intermediate Russian Conversation
May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.
2 units, not given this year

SLAVLANG 60A. Beginning Russian Conversation
(AU)
1 unit, Aut (Schupbach, R)

SLAVLANG 60B. Intermediate Russian Conversation
(AU)
1 unit, Win (Schupbach, R)

SLAVLANG 60C. Advanced Russian Conversation
(AU)
1 unit, Spr (Schupbach, R)

SLAVLANG 60D. East European Breweries and Brewing
(AU)
1 unit, Win (Schupbach, R), Spr (Schupbach, R)

SLAVLANG 60F. Slavic Films Series
AU
1 unit, Win (Schupbach, R)

SLAVLANG 60P. Slav Dom Theme Projects
(AU)
1 unit, Aut (Schupbach, R), Win (Schupbach, R), Spr (Schupbach, R)

SLAVLANG 60T. Teaching Slavic Conversation
(AU)
1 unit, Aut (Schupbach, R), Win (Schupbach, R), Spr (Schupbach, R)

SLAVLANG 99. Language Specials
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

SLAVLANG 111. Third-Year Russian, First Quarter
A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. 111: Aut, 112: Win, 113: Spr
4 units, Aut (Marcos, M)

SLAVLANG 112. Third-Year Russian, Second Quarter
A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. 111: Aut, 112: Win, 113: Spr (Greenhill)
4 units, Win (Erman, I)

SLAVLANG 113. Third-Year Russian, Third Quarter
A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. 111: Aut, 112: Win, 113: Spr
4 units, Spr (Erman, I)

SLAVLANG 177. Fourth-Year Russian
Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.
3 units, Aut (Greenhill, R)

SLAVLANG 178. Fourth-Year Russian
Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.
3 units, Win (Marcos, M)

SLAVLANG 179. Fourth-Year Russian
Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.
3 units, Spr (Marcos, M)

SLAVLANG 181. Fifth-Year Russian, First Quarter
Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.
3 units, Aut (Khassina, E)

SLAVLANG 182. Fifth-Year Russian, Second Quarter
Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.
3 units, Win (Khassina, E)

SLAVLANG 183. Fifth-Year Russian, Third Quarter
Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.
3 units, Spr (Khassina, E)

SLAVLANG 184A. Russian Advanced Conversation and Composition
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.
2-3 units, Aut (Greenhill, R)

SLAVLANG 184B. Russian Advanced Conversation and Composition
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.
2-3 units, Win (Staff)

SLAVLANG 184C. Russian Advanced Conversation and Composition
Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.
2-3 units, Spr (Staff)

SLAVLANG 199. Individual Work
Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN SLAVIC LANGUAGE

For graduate students only.

SLAVLANG 299. Independent Study
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN SLAVIC LANGUAGE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

MOSCOW SLAVIC LANGUAGE COURSES

OSPMOSC 10M. Intensive First-Year Russian
9 units, Aut (Kurganova, L)

OSPMOSC 51M. Second-Year Russian
5 units, Aut (Boldyreva, T)

OSPMOSC 111M. Third-Year Russian
5 units, Aut (Filatova, G)

OSPMOSC 177M. Fourth-Year Russian
5 units, Aut (Staff)

SLAVIC LITERATURE (SLAVLIT) COURSES

These courses typically require knowledge of a Slavic language. Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in Slavic languages and literatures, see the "Slavic Languages and Literatures" section of this bulletin. For courses in Slavic language instruction, see "Slavic Languages" courses section of this bulletin.

UNDERGRADUATE COURSES IN SLAVIC LITERATURE

SLAVLIT 129. Poetry as System: Introduction to Theory and Practice of Russian Verse
(Same as SLAVLIT 229.) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian. GER:DB-Hum
4 units, not given this year

SLAVLIT 179. Literature from Old Rus' and Medieval Russia
(Same as SLAVLIT 279.) From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.
4 units, not given this year

SLAVLIT 182. Pushkin's Eugene Onegin
Russian literature's central masterpiece. In Russian. (Fleishman)
4 units, not given this year

SLAVLIT 183. Readings in the Russian Press
(Same as SLAVLIT 283.) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.
4 units, not given this year

SLAVLIT 187. Russian Poetry of the 18th and 19th Centuries
(Same as SLAVLIT 287.) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.
3-4 units, Spr (Fleishman, L)

SLAVLIT 189A. Honors Research
Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

SLAVLIT 189B. Honors Research
Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Aut (Staff)

SLAVLIT 199. Individual Work for Undergraduates
Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN SLAVIC LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SLAVLIT 200A. Introduction to Russian Literary Scholarship
Required of first-year Slavic graduate students and honors students. Elements of literary work and principles of literary history. 20th-

century Russian literary scholarship emphasizing Russian formalism and structuralism. The relationship of literary studies with the other areas of humanistic research such as linguistics, history, art criticism, semiotics, and cultural studies. Bibliographic and archival research.

3-4 units, Aut (Fleishman, L)

SLAVLIT 200B. Proseminar in Russian Literary Theory
Corequisite: 305.

1 unit, not given this year

SLAVLIT 203. Academic Russian
How to read and analyze secondary sources, formulate arguments, and present intellectual work in Russian. In Russian. Prerequisite: four years of Russian or equivalent.

3 units, not given this year

SLAVLIT 211. Introduction to Old Church Slavic
The first written language of the Slavic people. Grammar. Primarily a skills course, with attention to the historical context of Old Church Slavic.

4 units, Win (Timberlake, A)

SLAVLIT 212. Old Russian and Old Church Slavic
Continuation of 211. Readings in additional canonical Old Church Slavic texts, following the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the Primary Chronicle, Boris and Gleb, The Life of Theodosius. The general issues of writing and the reception of Byzantine culture in early Rus.

3 units, not given this year

SLAVLIT 215. Russian Poetry after Brodsky
The Bronze Age of Russian poetry in the 70s-80s as a time of enthusiasm for poetic diction and achievement, attempts to reclaim connections with Russian and European traditions, and avant garde experimentation. The new metaphysics, the problem of the poet's self, new forms, and the limitations of the poetic domain. Poets include Leonid Aronzon, Victor Krivulin, Elena Shvartz, Ivan Zhdanov, Petr Cheigin, Gennadii Aigui, and Leonid Gubanov. Readings in Russian. Undergraduates require consent of instructor.

3-4 units, not given this year

SLAVLIT 225. Readings in Russian Realism
Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.

4 units, not given this year

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde
The works of Pasternak and his contemporaries Vladimir Mayakovsky and Marina Tsvetaeva; cultural context and the features of Russian avant garde poetics. Readings in Russian.

3-4 units, Win (Fleishman, L)

SLAVLIT 229. Poetry as System: Introduction to Theory and Practice of Russian Verse
(Same as SLAVLIT 129.) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian.

4 units, not given this year

SLAVLIT 269. Pushkin: Tying and Untying the Threads of the Golden Age
Graduate seminar. The formation of a simultaneously imperial and Enlightenment culture under Catherine the Great, and how Pushkin and his contemporaries realized its potentials and contradictions. Literary texts in light of other verbal discourses and artistic media; the field of 18th-century and imperial studies in Russia. Undergraduates require consent of instructor.

3 units, not given this year

SLAVLIT 270. Pushkin
Major poems and prose with detailed examination of his cultural milieu. Emphasis is on changes in the understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, romanticism).

2-3 units, not given this year

SLAVLIT 272. Osip Mandelstam and the Modernist Paradigm
His poetry, prose, cultural criticism as an expression of Russian modernism in contexts including: symbolism, acmeism, and the avant garde; NEP culture; and Stalinism. Mandelstam's legacy in art and Russian postmodernism. Myth of the poet. The cultural paradigm of Soviet civilization. Knowledge of Russian desirable but not necessary. See http://www.stanford.edu/class/slavic272.

2-4 units, not given this year

SLAVLIT 279. Literature from Old Rus' and Medieval Russia
(Same as SLAVLIT 179.) From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.

4 units, not given this year

SLAVLIT 283. Readings in the Russian Press
(Same as SLAVLIT 183.) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.

4 units, not given this year

SLAVLIT 287. Russian Poetry of the 18th and 19th Centuries
(Same as SLAVLIT 187.) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.

3-4 units, Spr (Fleishman, L)

SLAVLIT 289B. The Literature and Culture of Kievan Rus and Muscovy
Major works in all genres from Kievan Rus and Muscovy (11th through 17th centuries) in their original language. Literature, history, and culture of the period; seminar discussions of the texts. Prerequisite: SLAVLIT 211.

4 units, Spr (Staff)

SLAVLIT 299. Individual Work for Graduate Students
For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, Win (Staff), Spr (Staff), Sum (Staff)

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film
Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias's civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdidge). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskaia; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.

2-4 units, not given this year

SLAVLIT 399. Advanced Research Seminar in Russian Literature
Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOCIOLOGY (SOC) COURSES

Courses are open to all students without prerequisites, unless indicated. For information on undergraduate and graduate programs in the Department of Sociology, see the "Sociology" section of this bulletin.

UNDERGRADUATE COURSES IN SOCIOLOGY

Courses numbered below 100 are introductory courses intended for undergraduates. Courses numbered 100 - 202 are undergraduate-level courses.

SOC 1. Introduction to Sociology
Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci
5 units, Aut (Sandefur, R)

SOC 15N. The Transformation of Socialist Societies
Stanford Introductory Seminar. Preference to freshmen. The impact of societal organization on the lives of ordinary people in socialist societies and in the new societies arising through the processes of political, economic, and social transformation. Do the concepts of democratization and marketization suffice to characterize ongoing changes? Enrollment limited to 16. GER:EC-GlobalCom
3 units, Win (Tuma, N)

SOC 32N. Law in Society
Stanford Introductory Seminar. Preference to freshmen. Law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work. Enrollment limited to 16. GER:DB-SocSci, EC-AmerCul
3 units, Aut (Sandefur, R)

SOC 45Q. Understanding Race and Ethnicity in American Society
Stanford Introductory Seminar. Preference to sophomores. A brief historical overview of race in America, race and violence, race and socioeconomic wellbeing, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci
5 units, Aut (Snipp, C)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities
Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci
3 units, Win (Rosenfeld, M)

SOC 103A. Tutoring: Seeing a Child through Literacy
(Same as EDUC 103A, EDUC 203A, SOC 203A.) Experience tutoring grade school readers in a low income community near Stanford under supervision. Training in tutoring; the role of instruction in developing literacy; challenges facing low income students and those whose first language is not English. How to see school and print through the eyes of a child. Ravenswood Reads tutors encouraged to enroll. GER:DB-SocSci
4 units, Aut (Juel, C; England, P)

SOC 104. Sociology of Work
Classical and contemporary issues and debates. The effects of a changing workplace on individual workers in the U.S. Topics include: classical issues such as bureaucracy, alienation, and life in the industrial corporation; and contemporary issues such as managerial and professional work, the increase in service work and contracting, globalization, gender and race in the workplace, and maintaining a work/life balance.
5 units, Aut (Parker, A)

SOC 105D. Sociology of Criminal Procedure: Cops and Robbers, Lawyers and Juries
(Same as SOC 205D.) Preference to undergraduates and master's students. Interdisciplinary: law and the social sciences. Major areas in American criminal procedure, including juries, search and seizure, Miranda rights, racial profiling, and the right to counsel. The changing state of the law. Sources include major cases and the work of legal scholars. Social sciences perspectives on how the law works: how reliable are suspects' confessions; do juries listen to expert witnesses; do race and class affect how the police treat people; should social science have a role in deciding what the law should be? Limited enrollment.
5 units, Sum (TafollaYoung, K), given once only

SOC 106. Political Sociology
(Same as SOC 206.) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests. GER:DB-SocSci
5 units, Win (Parigi, P)

SOC 106D. Race in Contemporary America: Salad Bowl, Melting Pot, Land of Caublinasians?
(Same as SOC 206D.) The debate on the meaning of race in the U.S. by examining past and present race relations, trends within the emerging multiracial population, and the implications that this new population has on the significance of race in contemporary society. The growing visibility of multiraciality is seen as a sign that race does not matter as much as it did in the past versus evidence that race continues to affect people's lives including those with mixed race backgrounds. Sources include academia and popular media.
5 units, Sum (Ku, M), given once only

SOC 107. China After Mao
(Same as SOC 207.) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes. GER:DB-SocSci
5 units, Spr (Walder, A)

SOC 108. Historical Sociology
(Same as SOC 208.) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company. GER:DB-SocSci
5 units, Aut (Parigi, P)

SOC 110. Politics and Society
(Same as SOC 210. Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world. GER:DB-SocSci
5 units, not given this year

SOC 114. Economic Sociology
(Same as SOC 214. Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:DB-SocSci
5 units, Aut (Granovetter, M)

SOC 115. Topics in Economic Sociology
(Same as SOC 315. Graduate students register for 315.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:DB-SocSci
5 units, Win (Granovetter, M)

SOC 117A. China Under Mao
(Same as SOC 217A. Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

SOC 118. Social Movements and Collective Action
(Same as SOC 218.) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war. GER:DB-SocSci
5 units, Win (McAdam, D)

SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960s
(Same as SOC 219.) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S. GER:DB-SocSci
5 units, Aut (McAdam, D)

SOC 120. Interpersonal Relations
(Same as SOC 220. Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci
5 units, Aut (Ridgeway, C)

SOC 121. The Individual in Social Structure: Foundations in Sociological Social Psychology
Dynamics of the relationship between the individual and social structure, the relationship between the individual and immediate social context, and relationships between individuals. Focus is on the dominant theoretical perspectives in sociological social psychology: social structure and personality, structural social psychology, and symbolic interactionism.
5 units, Win (Chin, L)

SOC 123. Sex and Love in Modern Society
(Same as SOC 223.) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:DB-SocSci, EC-Gender
5 units, Aut (England, P)

SOC 125A. Understanding Religion in a Global Context
(Same as SOC 225A.) American and western scholarly thought about religion from social and sociological perspectives. Challenges to assumptions in the 21st century. A framework for understanding issues such as global religious movements, religious nationalism, secular nationalism, and violence as a means to religious ends. Topics include American religious history, contemporary American religions, legal and social interpretations of freedom of religion, definitions of religious rights across the global culture, and strategic responses by policymakers. GER:DB-SocSci
5 units, Spr (Chang, P)

SOC 126. Introduction to Social Networks
(Same as SOC 226. Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations. GER:DB-SocSci
5 units, not given this year

SOC 127. Bargaining, Power, and Influence in Social Interaction
(Same as SOC 227. Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci
5 units, not given this year

SOC 130. Education and Society
(Same as EDUC 220C, SOC 230.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci
4-5 units, not given this year

SOC 132. Sociology of Education: The Social Organization of Schools
(Same as EDUC 110, EDUC 310, SOC 332.) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy. GER:DB-SocSci
4 units, Win (Carter, P)

SOC 133. Law and Wikinomics: The Economic and Social Organization of the Legal Profession
(Same as SOC 333. Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Win (Dauber, M)

SOC 134. Education, Gender, and Development
(Same as EDUC 197.) Theories and perspectives from the social sciences relevant to the role of education in changing, modifying, or reproducing structures of gender differentiation and hierarchy. Cross-national research on the status of girls and women and the role of development organizations and processes. (SSPEP) GER:EC-Gender
4-5 units, Aut (Wotipka, C)

SOC 135. Poverty, Inequality, and Social Policy in the United States
(Same as SOC 235.) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies. GER:DB-SocSci
5 units, Win (Wimer, C)

SOC 136. Sociology of Law
(Same as SOC 236. Graduate students register for 236; same as LAW 538.) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books;

organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci

5 units, alternate years, not given this year

SOC 138. American Indians in Comparative Historical Perspective

(Same as SOC 238. Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:DB-SocSci, EC-AmerCul

5 units, Win (Snipp, C)

SOC 139. American Indians in Contemporary Society

(Same as SOC 239. Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Snipp, C)

SOC 140. Introduction to Social Stratification

(Same as SOC 240. Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:DB-SocSci

5 units, Spr (Sandefur, R)

SOC 141. Controversies about Inequality

(Same as SOC 241. Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality. GER:DB-SocSci

5 units, Spr (Grusky, D)

SOC 141A. Social Class, Race, Ethnicity, Health

(Same as HUMBIO 122S.) Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:DB-SocSci, EC-AmerCul

5 units, Win (Barr, D)

SOC 142. Sociology of Gender

(Same as SOC 242. Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender

5 units, Win (Correll, S)

SOC 143. Poverty in Brazil: From Empirical Evidence to Anti-poverty Policies

(Same as SOC 243.) The evolution of poverty in Brazil. Poverty indexes, profiles, indicators; income approach, establishment, and use of poverty lines. The working poor, informality, and education. Social security and targeted transfers. The design of anti-poverty policies.

5 units, Spr (Rocha, S)

SOC 145. Race and Ethnic Relations

(Same as SOC 245. Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

SOC 146. Introduction to Comparative Studies in Race and Ethnicity

(Same as CSRE 196C, ENGLISH 172D, HISTORY 65, PSYCH 155.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, given next year

SOC 147A. Comparative Ethnic Conflict

(Same as SOC 247A.) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

SOC 148. Racial Identity

(Same as SOC 248.) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:DB-SocSci, EC-AmerCul

5 units, Win (McDermott, M)

SOC 149. The Urban Underclass

(Same as SOC 249, URBANST 112. Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rosenfeld, M)

SOC 149X. Urban Politics

(Same as POLISCI 121, SOC 249X, URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

5 units, not given this year

SOC 155. The Changing American Family

(Same as SOC 255.) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change. GER:DB-SocSci

5 units, Spr (Rosenfeld, M)

SOC 160. Formal Organizations

(Same as SOC 260. Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies. GER:DB-SocSci

5 units, not given this year

SOC 161. The Social Science of Entrepreneurship

(Same as SOC 261. Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field

projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:DB-SocSci

5 units, Spr (Thornton, P)

SOC 164. Immigration and the Changing United States
(Same as SOC 264.) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration. GER:DB-SocSci

5 units, Spr (Jimenez, T)

SOC 165. Power, Gender, and the Professions
(Same as SOC 265.) Alternative views of professions and professionals, combining theories of professions and gender. The institutionalization of professional power and professional structure in the 20th century. Changing professional roles in the face of increasing bureaucratization of professional work. The role of gender in professional work, and alternative explanations for gender-based differences. How these forces operate, particularly in the professions of medicine, law, and academics. GER:DB-SocSci

5 units, Spr (Barr, D)

SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society
(Same as SOC 266.) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation. GER:DB-SocSci

5 units, Win (Jimenez, T)

SOC 170. Classics of Modern Social Theory
(Same as SOC 270. Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment. GER:DB-SocSci

5 units, Aut (McDermott, M)

SOC 180A. Foundations of Social Research
(Same as SOC 280A.) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms. GER:DB-SocSci

5 units, Aut (Sorensen, A), Spr (Sorensen, A)

SOC 180B. Evaluation of Evidence
(Same as SOC 280B.) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors. GER:DB-SocSci

5 units, Win (Rosenfeld, M)

SOC 181B. Sociological Methods: Statistics
(Same as SOC 281B. Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

5 units, Aut (Johnson, J)

SOC 186. Advanced Social Network Analysis
Practical experience and an interdisciplinary perspective on the collection, management, exploration, and analysis of social network data. Emphasis is on developing technical skills for studying large-scale social networks. Topics include theories of social order, small worlds, scientific computing, network sampling, and network dynamics.

5 units, Win (Haynes, J)

SOC 190. Undergraduate Individual Study

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 191. Undergraduate Directed Research
Work on a project of student's choice under supervision of a faculty member. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 192. Undergraduate Research Apprenticeship
Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 193. Undergraduate Teaching Apprenticeship
Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 196. Senior Thesis
Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 200. Junior/Senior Seminar for Majors
For Sociology majors. Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. Independent research. How to formulate a research question; how to integrate theory and methods. Prerequisites: SOC 170, 180B.

5 units, Aut (McDermott, M), Spr (Beck, C)

SOC 201. Preparation for Senior Project
(Same as URBANST 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A.

5 units, Win (Kahan, M)

SOC 202. Preparation for Honors Thesis
(Same as URBANST 202.) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. WIM

5 units, Win (McAdam, D)

GRADUATE COURSES IN SOCIOLOGY

Courses numbered 203-299 are open to advanced undergraduates and graduate students. Courses numbered 300 and above are normally offered to matriculated doctoral students only.

SOC 203A. Tutoring: Seeing a Child through Literacy
(Same as EDUC 103A, EDUC 203A, SOC 103A.) Experience tutoring grade school readers in a low income community near Stanford under supervision. Training in tutoring; the role of instruction in developing literacy; challenges facing low income students and those whose first language is not English. How to see school and print through the eyes of a child. Ravenswood Reads tutors encouraged to enroll.

4 units, Aut (Juel, C; England, P)

SOC 205D. Sociology of Criminal Procedure: Cops and Robbers, Lawyers and Juries
(Same as SOC 105D.) Preference to undergraduates and master's students. Interdisciplinary: law and the social sciences. Major areas in American criminal procedure, including juries, search and seizure, Miranda rights, racial profiling, and the right to counsel. The changing state of the law. Sources include major cases and the work of legal scholars. Social sciences perspectives on how the law works: how reliable are suspects' confessions; do juries listen to expert witnesses; do race and class affect how the police treat people; should social science have a role in deciding what the law should be? Limited enrollment.

5 units, Sum (TafollaYoung, K), given once only

SOC 206. Political Sociology
(Same as SOC 106.) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests.

5 units, Win (Parigi, P)

SOC 206D. Race in Contemporary America: Salad Bowl, Melting Pot, Land of Caublinasians?
(Same as SOC 106D.) The debate on the meaning of race in the U.S. by examining past and present race relations, trends within the emerging multiracial population, and the implications that this new population has on the significance of race in contemporary society. The growing visibility of multiraciality is seen as a sign that race does not matter as much as it did in the past versus evidence that race continues to affect people's lives including those with mixed race backgrounds. Sources include academia and popular media.

5 units, Sum (Ku, M), given once only

SOC 207. China After Mao
(Same as SOC 107.) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes.

5 units, Spr (Walder, A)

SOC 208. Historical Sociology
(Same as SOC 108.) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company.

5 units, Aut (Parigi, P)

SOC 210. Politics and Society
(Same as SOC 110. Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world.

5 units, not given this year

SOC 214. Economic Sociology
(Same as SOC 114. Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China.

5 units, Aut (Granovetter, M)

SOC 217A. China Under Mao
(Same as SOC 117A. Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath.

5 units, not given this year

SOC 218. Social Movements and Collective Action
(Same as SOC 118.) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war.

5 units, Win (McAdam, D)

SOC 219. Understanding Large-Scale Societal Change: The Case of the 1960s
(Same as SOC 119.) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S.

5 units, Aut (McAdam, D)

SOC 220. Interpersonal Relations
(Same as SOC 120. Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups.

5 units, Aut (Ridgeway, C)

SOC 223. Sex and Love in Modern Society
(Same as SOC 123.) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love.

5 units, Aut (England, P)

SOC 225A. Understanding Religion in a Global Context
(Same as SOC 125A.) American and western scholarly thought about religion from social and sociological perspectives. Challenges to assumptions in the 21st century. A framework for understanding issues such as global religious movements, religious nationalism, secular nationalism, and violence as a means to religious ends. Topics include American religious history, contemporary American religions, legal and social interpretations of freedom of religion, definitions of religious rights across the global culture, and strategic responses by policymakers.

5 units, Spr (Chang, P)

SOC 226. Introduction to Social Networks
(Same as SOC 126. Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations.

5 units, not given this year

SOC 227. Bargaining, Power, and Influence in Social Interaction
(Same as SOC 127. Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40.

5 units, not given this year

SOC 230. Education and Society
(Same as EDUC 220C, SOC 130.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling.

4-5 units, not given this year

SOC 231. World, Societal, and Educational Change: Comparative Perspectives
(Same as EDUC 136, EDUC 306D.) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture.

4-5 units, Win (Ramirez, F)

SOC 235. Poverty, Inequality, and Social Policy in the United States
(Same as SOC 135.) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor

market policies, education, and community-based antipoverty strategies.

5 units, Win (Wimer, C)

SOC 236. Sociology of Law

(Same as SOC 136. Graduate students register for 236; same as LAW 538.) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.

5 units, alternate years, not given this year

SOC 238. American Indians in Comparative Historical Perspective

(Same as SOC 138. Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty.

5 units, Win (Snipp, C)

SOC 239. American Indians in Contemporary Society

(Same as SOC 139. Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history.

5 units, Spr (Snipp, C)

SOC 240. Introduction to Social Stratification

(Same as SOC 140. Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S.

5 units, Spr (Sandefur, R)

SOC 241. Controversies about Inequality

(Same as SOC 141. Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality.

5 units, Spr (Grusky, D)

SOC 242. Sociology of Gender

(Same as SOC 142. Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations.

5 units, Win (Correll, S)

SOC 243. Poverty in Brazil: From Empirical Evidence to Anti-poverty Policies

(Same as SOC 143.) The evolution of poverty in Brazil. Poverty indexes, profiles, indicators; income approach, establishment, and use of poverty lines. The working poor, informality, and education. Social security and targeted transfers. The design of anti-poverty policies.

5 units, Spr (Rocha, S)

SOC 245. Race and Ethnic Relations

(Same as SOC 145. Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements.

5 units, not given this year

SOC 247A. Comparative Ethnic Conflict

(Same as SOC 147A.) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world.

5 units, not given this year

SOC 248. Racial Identity

(Same as SOC 148.) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America.

5 units, Win (McDermott, M)

SOC 249. The Urban Underclass

(Same as SOC 149, URBANST 112. Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor.

5 units, Spr (Rosenfeld, M)

SOC 249X. Urban Politics

(Same as POLISCI 121, SOC 149X, URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor.

5 units, not given this year

SOC 255. The Changing American Family

(Same as SOC 155.) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.

5 units, Spr (Rosenfeld, M)

SOC 257. Causal Inference in Quantitative Educational and Social Science Research

(Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

3-5 units, Spr (Reardon, S)

SOC 260. Formal Organizations

(Same as SOC 160. Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies.

5 units, not given this year

SOC 261. The Social Science of Entrepreneurship

(Same as SOC 161. Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology

licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups.

5 units, Spr (Thornton, P)

SOC 264. Immigration and the Changing United States
(Same as SOC 164.) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration.

5 units, Spr (Jimenez, T)

SOC 265. Power, Gender, and the Professions
(Same as SOC 165.) Alternative views of professions and professionals, combining theories of professions and gender. The institutionalization of professional power and professional structure in the 20th century. Changing professional roles in the face of increasing bureaucratization of professional work. The role of gender in professional work, and alternative explanations for gender-based differences. How these forces operate, particularly in the professions of medicine, law, and academics.

5 units, Spr (Barr, D)

SOC 266. Mexicans, Mexican Americans, and Chicanos in American Society
(Same as SOC 166.) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation.

5 units, Win (Jimenez, T)

SOC 270. Classics of Modern Social Theory
(Same as SOC 170. Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment.

5 units, Aut (McDermott, M)

SOC 273. Gender and Higher Education: National and International Perspectives
(Same as EDUC 273.) The effects of interactions between gender and the structures of higher education; policies seeking changes in those structures. Topics: undergraduate and graduate education, faculty field of specialization, rewards and career patterns, sexual harassment, and the development of feminist scholarship and pedagogy.

4 units, Spr (Wotipka, C)

SOC 280A. Foundations of Social Research
(Same as SOC 180A.) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.

5 units, Aut (Sorensen, A), Spr (Sorensen, A)

SOC 280B. Evaluation of Evidence
(Same as SOC 180B.) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors.

5 units, Win (Rosenfeld, M)

SOC 281B. Sociological Methods: Statistics
(Same as SOC 181B. Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

5 units, Aut (Johnson, J)

SOC 300. Workshop: Teaching Development
For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.

2 units, Spr (Simmons, A)

SOC 305. Graduate Proseminar
For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.

1 unit, Aut (Grusky, D)

SOC 310. Political Sociology
Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.

4-5 units, Spr (Walder, A)

SOC 311A. Workshop: Comparative Studies of Educational and Political Systems
(Same as EDUC 387A.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, Aut (Ramirez, F)

SOC 311B. Workshop: Comparative Systems of Educational and Political Systems
(Same as EDUC 387B.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, Win (Ramirez, F)

SOC 311C. Workshop: Comparative Studies of Educational and Political Systems
(Same as EDUC 387C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. Prerequisite: consent of instructor. May be repeated for credit. (SSPEP/ICE)

1-5 units, Spr (Ramirez, F)

SOC 312W. Workshop: Political Sociology, Social Movements, and Collective Action
Faculty and student presentations of ongoing research on topics including: social movement and organizations, and the relationship between them; democracy movements; legislative and policy outcomes; and collective action tactics, strategies, and trajectories. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-5 units, Aut (Olzak, S; McAdam, D), Win (McAdam, D), Spr (Walder, A; McAdam, D)

SOC 314. Economic Sociology
Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student status or consent of instructor.

3-5 units, Aut (Granovetter, M)

SOC 315. Topics in Economic Sociology
(Same as SOC 115. Graduate students register for 315.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314.

5 units, Win (Granovetter, M)

SOC 315W. Workshop: Economic Sociology and Organizations
Theory, methods, and research in the sociology of the economy. Possible activities: participation in ongoing research projects; instruction in new methods; and presentation of ongoing research by students, faculty, or visiting speakers. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-5 units, Aut (Granovetter, M; Zhou, X), Win (Granovetter, M; Zhou, X), Spr (Granovetter, M; Zhou, X)

SOC 316. Historical and Comparative Sociology
Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.

3-5 units, not given this year

SOC 318. Social Movements and Collective Action
Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.

3-5 units, alternate years, not given this year

SOC 320. Foundations of Social Psychology
Major theoretical perspectives, and their assumptions and problems, in interpersonal processes and social psychology. Techniques of investigation and methodological issues. Perspectives: symbolic interaction, social structure and personality, and cognitive and group processes.

3-5 units, Win (Ridgeway, C)

SOC 321W. Workshop: Social Psychology and Social Structure
Current theories and research agendas, recent publications, and presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Cook, K; Ridgeway, C), Win (Cook, K; Ridgeway, C), Spr (Cook, K; Ridgeway, C)

SOC 322. Social Interaction, Social Structure, and Social Exchange
Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.

3-5 units, Aut (Cook, K)

SOC 323. Sociology of the Family
Sociological research on changing family forms. Topics include courtship, marriage, fertility, divorce, conflict, relationship skills and satisfaction, gender patterns, power relations within the family, and class and race differences in patterns.

3-5 units, Spr (Rosenfeld, M)

SOC 324. Social Networks
How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.

3-5 units, not given this year

SOC 327. Frontiers of Social Psychology
Advanced topics, current developments, theory, and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.

1-5 units, Aut (Ridgeway, C)

SOC 332. Sociology of Education: The Social Organization of Schools
(Same as EDUC 110, EDUC 310, SOC 132.) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy.

4 units, Win (Carter, P)

SOC 333. Law and Wikinomics: The Economic and Social Organization of the Legal Profession
(Same as SOC 133. Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Win (Dauber, M)

SOC 338W. Workshop: Sociology of Law
(Same as LAW 581.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. Topics such as the relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

1-5 units, Win (Dauber, M; Sandefur, R)

SOC 339. Gender Meanings and Processes
Current theories and research on the social processes, such as socialization, status processes, stereotyping, and cognition, that produce gender difference and inequality. Intersections of gender with race, class, and bodies. Applications to workplaces, schools, families, and intimate relationships. Prerequisite: Sociology doctoral student or consent of instructor

1-5 units, Spr (Correll, S)

SOC 340. Social Stratification
Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.

3-5 units, Spr (Sandefur, R)

SOC 341W. Workshop: Inequality
Causes, consequences, and structure of inequality; how inequality results from and shapes social classes, occupations, professions, and other aspects of the economy. Research presentations by students, faculty, and guest speakers. Discussion of controversies, theories, and recent writings. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-5 units, Aut (Grusky, D; Correll, S), Win (Grusky, D; Correll, S; Tuma, N), Spr (Grusky, D; Correll, S)

SOC 342B. Gender and Social Structure
The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.

3-5 units, not given this year

SOC 345. Seminar in Comparative Race and Ethnic Relations
Restricted to doctoral students. Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.

3-5 units, not given this year

SOC 347. Race and Ethnicity in Society and Institutions
(Same as EDUC 315X.) Primarily for doctoral students. Major theories and empirical research. Emphasis is on schooling and race, racial identity, urban issues, and the impact of immigration on race relations.

1-5 units, Win (McDermott, M; Carter, P)

SOC 358. Sociology of Immigration
Topics include: the process of migration; historical perspectives; immigrant integration; transnationalism; immigration policy; labor; nations and nationalism.

1-5 units, Spr (Jimenez, T)

SOC 359. Organizations and Uncertainty
Organizations and environments characterized by institutional uncertainty. Beliefs at the roots of shared routines and institutional myths are absent. Institutionalists and neo-institutionalists, organizations facing uncertain institutional environments.

3-5 units, Win (Parigi, P)

SOC 361. Social Psychology of Organizations
(Same as OB 671.) Seminar. Social psychological theories and research relevant to organizational behavior. Current research topics; theories in micro-organizational behavior. Topics include models of attribution, choice and decision making, intergroup behavior, stereotyping, and social influence. Prerequisites: Ph.D student; graduate-level social psychology course.

4 units, Win (Lowery, B)

SOC 361W. Workshop: Networks and Organizations
(Same as EDUC 361.) For students doing advanced research. Group comments and criticism on dissertation projects at any phase of completion, including data problems, empirical and theoretical challenges, presentation refinement, and job market presentations. Collaboration, debate, and shaping research ideas. Prerequisite: courses in organizational theory or social network analysis.

1-5 units, Aut (McFarland, D), Win (McFarland, D), Spr (McFarland, D)

SOC 362. Organization and Environment
(Same as OB 672.) Leading sociological approaches to analyzing relations of organizations and environments emphasizing dynamics. Theoretical formulations, research designs, and results of empirical studies.

4 units, Aut (Carroll, G)

SOC 363. Social and Political Process in Organizations
(Same as OB 676.) Cognition, attitudes, and behavior in organizations. Social psychological and sociological research at the meso, or intermediate between micro and macro, level of analysis. Topics vary from year to year, but may include: organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; and cultural perspectives on organizations. Prerequisite: Ph.D student.

4 units, Spr (Staff)

SOC 363A. Seminar on Organizational Theory
(Same as EDUC 375A.) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.

5 units, not given this year

SOC 363B. Seminar on Organizations: Institutional Analysis
(Same as EDUC 375B.) Seminar. Key lines of inquiry on organizational change, emphasizing network, institutional, and evolutionary arguments.

3-5 units, not given this year

SOC 364. Perspectives on the Social Psychology of Organizations
(Same as OB 673.) Topics relevant to organizational behavior, drawing on social psychological and sociological research. How theories and methods change as levels of analysis change, focusing on the organizational meso (intermediate between micro and macro) level. Topics vary annually, but may include: organizational learning or routines; power; emotions in organizations; diversity and demography; organizational identity and legitimacy; culture; contagion and diffusion. Focus is on theory development processes, and writing journal articles. Prerequisite: enrollment in a Ph.D. program.

4 units, Win (Staff)

SOC 366. Organization Studies: Theories and Analyses
(Same as EDUC 288.) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.

4 units, Aut (Drori, G)

SOC 366A. Organizational Ecology
(Same as OB 601.) This seminar examines theoretical and methodological issues in the study of the ecology of organizations. Particular attention is given to the dynamics that characterize the interface between organizational populations and their audiences.

4 units

SOC 367. Institutional Analysis of Organizations
Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.

3-5 units, Win (Scott, W)

SOC 368W. Workshop: China Social Science
(Same as POLISCI 348R.) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut (Walder, A; Zhou, X; Oi, J), Win (Walder, A; Zhou, X; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)

SOC 369. Social Network Analysis
(Same as EDUC 316.) The educational applications of social network analysis. Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Students apply these techniques to data on schools and classrooms. (SSPEP)

4-5 units, Aut (McFarland, D)

SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict
Restricted to doctoral students.The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.

3-5 units, Aut (Olzak, S)

SOC 370B. Social Interaction and Group Process
Theoretical strategies for the study of interaction, group, and network processes, including rational choice and exchange theory, the theory of action, symbolic interactionism, formal sociology, and social phenomenology. Antecedent ideas in foundational works and contemporary programs of theoretical research.

3-5 units, alternate years, not given this year

SOC 372. Theoretical Analysis and Design
Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.

3-5 units, Aut (Zelditch, M)

SOC 374. Research Workshop: Philanthropy and Civil Society
(Same as EDUC 374, POLISCI 334.) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

1-3 units, Aut (Reich, R; Meyerson, D), Win (Reich, R; Meyerson, D), Spr (Reich, R; Meyerson, D)

SOC 376. Perspectives on Organization and Environment
(Same as OB 674.) Sociologists and organizational scholars have increasingly come to recognize that networks are not simply relevant as conduits for the flow of information and resources, but are critical

determinants of identity, shaping preferences and influencing perceptions of the qualities that inhere in actors. Research that informs the link between networks and identity based on intellectual traditions such as social exchange theory, role theory, and economic and historical sociology.

4 units, Win (Barnett, W)

SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit

(Same as EDUC 377, GSBGEN 346.) Seminar. For students interested in the nonprofit sector, and those in the joint Business and Education program. The missions, functions, and capabilities of nonprofit, public, and private organizations. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials. Advanced undergraduates require consent of instructor.

4 units

SOC 378. Seminar on Institutional Theory and World Society

Sociological analyses of the rise and impact of the expanded modern world order, with its internationalized organizations and globalized discourse. Consequences for national and local society: education, political organization, economic structure, the environment, and science. The centrality of the individual and the rationalized organization as legitimated actors.

1-5 units, Win (Staff)

SOC 380. Qualitative Methods

Priority to Sociology doctoral students. Emphasis is on observational and interview-based research. Limited enrollment.

3-5 units, not given this year

SOC 381. Sociological Methodology I: Introduction

Enrollment limited to first-year Sociology doctoral students. Basic math and statistics. Types of variables, how to recode and transform variables, and how to manage different types of data sets. Introduction to statistical packages and programming.

2-3 units, Aut (Levanon, A; Ku, M)

SOC 382. Sociological Methodology II: The General Linear Model

Preference to Sociology doctoral students. The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Enrollment limited to 15. Prerequisites: 281A,B or equivalents.

3-6 units, Win (Tuma, N)

SOC 383. Sociological Methodology III: Advanced Models for Discrete Outcomes

Required for Ph.D. in Sociology; enrollment limited to first-year Sociology doctoral students. The rationale for and interpretation of static and dynamic models for the analysis of discrete variables. Prerequisites: 281A,B and 382, or equivalents.

4-5 units, Spr (Zhou, X)

SOC 384. New Models and Methods in the Social Sciences

Two-week intensive introduction to new statistical approaches. Emphasis is on applications. Topics may include network models, multilevel models, latent class models, mixed methods, new qualitative methods, growth models, geostatistical tools, survey-based experiments, new methods for estimating causal effects, web-based surveys, advanced discrete choice models, and diffusion models.

2-5 units, Sum (Grusky, D)

SOC 385A. Research Practicum 1

Workshop on research methods. Ongoing student research, methodological problems, and possible solutions.

1-2 units, Aut (Staff)

SOC 385B. Research Practicum II

Continuation of 385A.

1-2 units, Win (England, P)

SOC 388. Log-Linear Models

Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.

3-5 units, not given this year

SOC 389. Mixed Method Research Design and Analysis

Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.

3-5 units, not given this year

SOC 390. Graduate Individual Study

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 391. Graduate Directed Research

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 392. Research Apprenticeship

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SOC 393. Teaching Apprenticeship

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

OVERSEAS STUDIES COURSES IN SOCIOLOGY

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

BEIJING SOCIOLOGY COURSES

OSPBEIJ 11. Chinese Society in the Post-Mao Era

5 units, Aut (Walder, A)

BERLIN SOCIOLOGY COURSES

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture

3 units, Win (Junghanns, W)

FLORENCE SOCIOLOGY COURSES

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon

5 units, Win (Allam, K)

SOPHOMORE COLLEGE COURSES

For more information on Sophomore College, see the "Undergraduate Education" section of this bulletin.

ANTHROPOLOGY

ANTHRO 10SC. Darwin, Evolution, and Galápagos

(Same as HUMBIO 17SC.) Lessons from the study of flora and fauna in Galápagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapágos Islands pose for conservation.

2 units, Aut (Durham, W)

BIOLOGY

BIO 10SC. Natural History, Marine Biology, and Research

The biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.

2 units, Aut (Thompson, S)

CHEMICAL ENGINEERING

CHEMENG 11SC. Energy Technologies for a Sustainable Future

(Same as MATSCI 11SC.) The scope of the energy problem and global energy issues; options for sustainable energy. Focus is on the scientific basis of sustainable, cutting-edge technologies, including

solar cells, fuel cells, and biofuels emphasizing the fundamental science behind the technologies. Readings include technical information on the science and engineering of sustainable energy technologies. Field trips; laboratory experiments.

2 units, Aut (Bent, S; Clemens, B)

COMPARATIVE LITERATURE

COMPLIT 12SC. Ghost Stories: Why the Dead Return and What They Want From Us

Anxiety about mortality and wisdom about the cultural place of the past in the enduring genre of the ghost story from classical literature to popular film. Memory and regret, mourning and forgetting. Classic authors such as Hoffmann, Poe, James, Joyce, and Ibsen, and more recent authors such Paul Auster, Marie Darrieussecq, Catherine Lim, and Toni Morrison.

2 units, Aut (Berman, R)

COMPUTER SCIENCE

CS 10SC. The Intellectual Excitement of Computer Science

Intellectual tradition of computer science. Topics include analysis of algorithms, computability, cryptography, hardware design, and artificial intelligence.

2 units, Aut (Staff)

DRAMA

DRAMA 11SC. Learning Theater: From Audience to Critic at the Oregon Shakespeare Festival

Ten days and six plays at the Oregon Shakespeare Festival in Ashland. The details of the plays, their interpretation, production, and acting, and their value as entertainment and challenge.

2 units, Aut (Rayner, A)

DRAMA 12SC. Playwriting Lab: The Art of Dramatic Writing

Workshop. Each student develops an original script which is presented in theater by the other students. How to develop, expand, and condition the creative mind. Toipcs including dramatic action, text and subtext, characterization, language, and style. Students function as a theatrical collective where each has the opportunity to participate in reading and serving the vision of each student-author.

2 units, Aut (Freed, A)

ECONOMICS

ECON 13SC. Economic Policies of the Presidential Candidates

Modern finance theory. Financial instruments including stocks, bonds, options, mutual funds, and exchange-traded funds. Historical returns on asset classes. Equity analysis. Capital pricing model. Efficient market hypotheses. Index funds. Meetings with financial managers and venture capitalists.

2 units, Aut (Shoven, J)

ECON 19SC. Land and Water Policies in the West

(Same as HISTORY 19SC, POLISCI 21SC.) Historical development and current status, with a focus on California. Topics include: the political origins and economic implications of federal laws and programs that define and allocate rights to land and water; competition for resources between cities and agriculture; the history of federal involvement with the West; contemporary policies and controversies regarding resource management, agriculture, water, energy, and environmental quality. Field trip to California's Central Valley and Owens Valley.

2 units, Aut (Frisby, T; Kennedy, D; Brady, D)

ELECTRICAL ENGINEERING

EE 10SC. Mathematics of the Information Age

How mathematics is used to shape and direct modern life and work. The mathematics of the information age including CD players, cellular phones, imaging, and the Internet.

2 units, Aut (Osgood, B)

ENVIRONMENTAL EARTH SYSTEM SCIENCE

EESS 12SC. Environmental and Geological Field Studies in the Rocky Mountains

Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.

2 units, Aut (Chamberlain, P)

ETHICS IN SOCIETY

ETHICSOC 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature

Short novels and plays as the basis for reflection on ethical values and the purpose of life. Why are people here? How do they find meaningful work? What can death teach about life? What is the meaning of success? What is the nature of true love? How can one find balance between work and personal life? How free are people to seek their own destinies? What obligations does one have to others?

2 units, Aut (McLennan, W)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES

GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains

Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.

2 units, Aut (Chamberlain, P)

HISTORY

HISTORY 11SC. How Is a Buddhist

Buddhism as a system of thought, a culture, a way of life, a definition of reality, a method for investigating it, and a mental, physical, and social practice. Buddhism as a total phenomenon. Readings, films, music, and art. How Buddhist practices constitue the world of the Buddhist.

2 units, Aut (Mancall, M)

HISTORY 19SC. Land and Water Policies in the West

(Same as ECON 19SC, POLISCI 21SC.) Historical development and current status, with a focus on California. Topics include: the political origins and economic implications of federal laws and programs that define and allocate rights to land and water; competition for resources between cities and agriculture; the history of federal involvement with the West; contemporary policies and controversies regarding resource management, agriculture, water, energy, and environmental quality. Field trip to California's Central Valley and Owens Valley.

2 units, Aut (Frisby, T; Kennedy, D; Brady, D)

HISTORY 20SC. America in Vietnam

(Same as POLISCI 20SC.) The American intervention in Vietnam, focusing o:n political motives and moral justifications for intervention; the military and political strategies of counterinsurgency and nation building; the political uses of terror and the mobilization strategies of the Viet Cong and N. Vietnam; and consequences of the war at home, including the draft and the efforts of Congress to devise a constitutional remedy to the problem of unilateral, presidential war making. Readings include Michael Herr and Norman Mailer.

2 units, Aut (Goldstein, J; Rakove, J)

HUMAN BIOLOGY

HUMBIO 16SC. Stanford Safari: Field Observations in Our Own Backyard

Interdisciplinary approach to analyzing complex institutions using Stanford as focus; field observation skills including photography. Disciplines include anthropology, sociology, structural and landscape architectures, art, photography, tourism, educational theory, history, climatology, ecology, natural history.

2 units, Aut (Siegel, R)

HUMBIO 17SC. Darwin, Evolution, and Galápagos

(Same as ANTHRO 10SC.) Lessons from the study of flora and fauna in Galápagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapágos Islands pose for conservation.

2 units, Aut (Durham, W)

MATERIALS SCIENCE AND ENGINEERING

MATSCI 10SC. Diamonds from Peanut Butter: Material Technologies and Human History
Technological importance of materials in history is captured in names: the Stone Age, Bronze Age, Iron Age, and now the Information Age or the Silicon Age. How materials have played, and continue to play, pivotal roles in the development of new technologies.

2 units, Aut (Bravman, J)

MATSCI 11SC. Energy Technologies for a Sustainable Future
(Same as CHEMENG 11SC.) The scope of the energy problem and global energy issues; options for sustainable energy. Focus is on the scientific basis of sustainable, cutting-edge technologies, including solar cells, fuel cells, and biofuels emphasizing the fundamental science behind the technologies. Readings include technical information on the science and engineering of sustainable energy technologies. Field trips; laboratory experiments.

2 units, Aut (Bent, S; Clemens, B)

MECHANICAL ENGINEERING

ME 12SC. Hands-on Jet Engines
How jet engines transformed the world through intercontinental travel causing internationalization in daily life. Competition driving improvements in fuel economy, engine lifetime, noise, and emissions.

2 units, Aut (Eaton, J)

MUSIC

MUSIC 12SC. Musical Collisions and Radical Creativity
The margins of musical culture; nonconformist, maverick, and eccentric creative impulses that expand the definition of art. Laboratory atmosphere and daily rehearsals in which students create collaborative works with a final public concert involving collaborations with local musicians and presentations of student-composed works created during the course.

2 units, Aut (Applebaum, M)

POLITICAL SCIENCE

POLISCI 10SC. American Foreign Policy in the 21st Century
The substance of U.S. foreign policy, and the political considerations that influence the making and conduct of American diplomacy. Topics include the prospects for conflict and cooperation among the great powers, regional security, peacekeeping and peacemaking, international terrorism, the proliferation of weapons of mass destruction, the global economy, and the domestic politics of U.S. foreign policy.

2 units, Aut (Blacker, C)

POLISCI 19SC. Food and Politics
Politics of food production and distribution; organic and sustainable farming; federal farm and free trade policies; genetically modified food; animal ethics; and the political context of famine and obesity.

2 units, Aut (Reich, R)

POLISCI 20SC. America in Vietnam
(Same as HISTORY 20SC.) Focus is on political motives and moral justifications for intervention; the military and political strategies of counterinsurgency and nation building; political uses of terror and mobilization strategies of the Viet Cong and N. Vietnam; consequences of the war at home, including the draft and efforts of Congress to devise a constitutional remedy to the problem of unilateral, presidential war making. Readings include Michael Herr and Norman Mailer.

2 units, Aut (Goldstein, J; Rakove, J)

POLISCI 21SC. Land and Water Policies in the West
(Same as ECON 19SC, HISTORY 19SC.) Historical development and current status, with a focus on California. Topics include: the political origins and economic implications of federal laws and programs that define and allocate rights to land and water; competition for resources between cities and agriculture; the history of federal involvement with the West; contemporary policies and controversies regarding resource management, agriculture, water, energy, and environmental quality. Field trip to California's Central Valley and Owens Valley.

2 units, Aut (Frisby, T; Kennedy, D; Brady, D)

SPANISH LANGUAGE (SPANLANG) COURSES

Students who have never studied Spanish before should enroll in SPANLANG 1. Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Spanish Language Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer at http://language.stanford.edu/SPANISH, followed by Part II (oral), to be administered on campus September 17, 2008. Students who have passed the language AP exam with a 4 or 5 or the SAT II with a 630 or above are exempted from the written test, but must take the oral on September 17, 2008 in order to determine their correct placement. Students who have taken the Spanish Language Advanced Placement (AP) and received a score of 5 are eligible for 10 units of credit in Spanish. Consult the Language Center or http://language.stanford.edu/ for further information. Completion of SPANLANG 2A, 3, or 41C fulfills the University language requirement. Students who grew up in homes where Spanish is spoken should take the placement assessment for the special series of courses (21B,22B,23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speak-ers should complete the questionnaire found at http://language.stanford.edu/HOMEBACKGROUND, and attend the assessment for potential home-background speakers administered on September 17, 2008. A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence. Second-year students may alternate between the cultural emphasis (11C,12C,13C) and international relations (11R,12R,13R) series if done so in sequence (11,12,13); however, a student may only take one of each level in these series.

UNDERGRADUATE COURSES IN SPANISH LANGUAGE

SPANLANG 1. First-Year Spanish, First Quarter
Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut (Ashby, Z), Win (Barletta, L), Spr (Del Carpio, C)

SPANLANG 1A. Accelerated First-Year Spanish
Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

5 units, Aut (Del Carpio, C), Win (Del Carpio, C)

SPANLANG 2. First-Year Spanish, Second Quarter
Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut (Sanchez, K), Win (Ashby, Z), Spr (Barletta, L)

SPANLANG 2A. Accelerated First-Year Spanish
Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

5 units, Win (Brates, V), Spr (Brates, V)

SPANLANG 3. First-Year Spanish, Third Quarter
Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut (Urruela, M), Win (Urruela, M), Spr (Ashby, Z)

SPANLANG 5A. Intensive First-Year Spanish, Part A
Goal is to engage in interactions with Spanish speakers in socially

and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 205A,B,C.

5 units, Sum (Staff)

SPANLANG 5B. Intensive First-Year Spanish, Part B
Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Sum (Staff)

SPANLANG 5C. Intensive First-Year Spanish, Part C
Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Sum (Staff)

SPANLANG 10. Beginning Oral Communication
Additional pronunciation, vocabulary, and speaking skills. May be repeated once for credit. Prerequisite: one quarter of Spanish, demonstrated oral proficiency above the novice level; may be taken concurrently with 2, 2A, or 3.

2 units, Aut (Ortiz Cuevas, C), Win (Barletta, L), Spr (Corso, I)

SPANLANG 11C. Second-Year Spanish: Cultural Emphasis, First Quarter
Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut (Gonzalez Flores, F), Win (Renfro, C), Spr (Del Carpio, C)

SPANLANG 11R. Second-Year Spanish: Emphasis on International Relations, First Quarter
Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent. 11R: Aut, 12R: Win, 13R: Spr

4-5 units, Aut (Brates, V)

SPANLANG 12C. Second-Year Spanish: Cultural Emphasis, Second Quarter
Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut (Urruela, M), Win (Ortiz Cuevas, C), Spr (Catoira, L)

SPANLANG 12R. Second-Year Spanish: Emphasis on International Relations, Second Quarter
Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent placement. 11R: Aut, 12R: Win, 13R: Spr

4-5 units, Win (Brates, V)

SPANLANG 13C. Second-Year Spanish: Cultural Emphasis, Third Quarter
Sequence integrating culture and language. Oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic and professional contexts. Prerequisite: one year of college Spanish or equivalent placement.

4-5 units, Aut (Won, H), Win (Perales, O), Spr (Ortiz Cuevas, C)

SPANLANG 13R. Second-Year Spanish: Emphasis on International Relations, Third Quarter
Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent placement. 11R: Aut, 12R: Win, 13R: Spr

4-5 units, Spr (Brates, V)

SPANLANG 15. Intermediate Oral Communication
Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit. Prerequisite: first-year Spanish and demonstrated oral proficiency above the low intermediate level.

3 units, Aut (Barletta, L), Win (Barletta, L), Spr (Urruela, M), Sum (Staff)

SPANLANG 21B. Second-Year Spanish for Heritage Language Students, First Quarter
Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings. 21B: Aut, 22B: Win, 23B: Spr

3-5 units, Aut (Junguito Camacho, M)

SPANLANG 22B. Second-Year Spanish for Heritage Language Students, Second Quarter
Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, both print and non-print such as movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings. 11B: Aut, 12B: Win, 13B: Spr

3-5 units, Win (Junguito Camacho, M)

SPANLANG 23B. Second-Year Spanish for Heritage Language Students, Third Quarter
Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, both print and non-print such as movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings. 11B: Aut, 12B: Win, 13B: Spr

3-5 units, Spr (Staff)

SPANLANG 25A. Intensive Second-Year Spanish, Part A
Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4 units, Sum (Staff)

SPANLANG 25B. Intensive Second-Year Spanish, Part B
Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4 units, Sum (Staff)

SPANLANG 25C. Intensive Second-Year Spanish, Part C
Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4 units, Sum (Staff)

SPANLANG 60A. Beginning Spanish Conversation (AU)
1 unit, Aut (Urruela, M)

SPANLANG 60B. Intermediate Spanish Conversation (AU)
1 unit, Win (Urruela, M), Spr (Urruela, M)

SPANLANG 60C. Advanced Spanish Conversation (AU)
1 unit, not given this year

SPANLANG 60K. Cooking Class (AU)
1 unit, Win (Urruela, M)

SPANLANG 60M. Movie Series (AU)
1 unit, Win (Urruela, M)

SPANLANG 60P. Yost Lecture Series (AU)
1 unit, Aut (Urruela, M), Win (Urruela, M), Spr (Urruela, M)

SPANLANG 60T. Teaching Spanish Conversation (AU)
1 unit, Aut (Urruela, M), Win (Urruela, M), Spr (Urruela, M)

SPANLANG 99. Language Specials
May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SPANLANG 100. Advanced Oral Communication
For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.
3 units, Aut (Perales, O), Win (Perales, O), Spr (Perales, O)

SPANLANG 101. The Structure of Spanish
Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent. (Sierra)
3-5 units, Win (Miano, A)

SPANLANG 102. Composition and Writing Workshop
Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM
3-5 units, Aut (Barletta, L), Spr (Kenna, C)

SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students
For students with a good understanding of written accents, spelling, and syntax. Focus is on the craft of writing with emphasis on brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Writing essays on literary topics. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: 21B, 22B, and 23B or equivalent.
3-5 units, Win (Barletta, L)

SPANLANG 121M. Spanish for Medical Students
(Same as HRP 280.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.
3 units, Aut (Staff)

SPANLANG 122M. Spanish for Medical Students
(Same as HRP 281.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.
3 units, Win (Corso, I)

SPANLANG 123M. Spanish for Medical Students
(Same as HRP 282.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.
3 units, Spr (Corso, I)

SPANLANG 131M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students
For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.
3-4 units, Aut (Staff), Spr (Sierra, A)

SPANLANG 199. Individual Reading
May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN SPANISH LANGUAGE

For graduate students only.

SPANLANG 50. Reading Spanish
For students who have already taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'
3 units, Win (Sierra, A)

SPANLANG 205A. Intensive First-Year Spanish, Part A
Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take all three courses for a total of 9 units, or two of the courses for a total of 9 units.
3-5 units, Sum (Staff)

SPANLANG 205B. Intensive First-Year Spanish, Part B
Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take all three courses for a total of 9 units, or two of the courses for a total of 9 units.
3-5 units, Sum (Staff)

SPANLANG 205C. Intensive First-Year Spanish
Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take all three courses for a total of 9 units, or two of the courses for a total of 9 units.
3-5 units, Sum (Staff)

SPANLANG 394. Graduate Studies in Spanish Conversation
Prerequisite: consent of instructor.
1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

SPANLANG 395. Graduate Studies in Spanish
Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

OVERSEAS STUDIES COURSES IN SPANISH LANGUAGE

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

MADRID SPANISH LANGUAGE COURSES

OSPMADRD 12M. Accelerated Second-Year Spanish I
5 units, Aut (Camblor Portilla, M), Win (Camblor Portilla, M), Spr (Camblor Portilla, M)

OSPMADRD 13M. Accelerated Second-Year Spanish II
5 units, Aut (Camblor Portilla, M), Win (Camblor Portilla, M), Spr (Camblor Portilla, M)

OSPMADRD 102M. Composition and Writing Workshop for Student in Madrid
3-5 units, Aut (Camblor Portilla, M), Win (Camblor Portilla, M), Spr (Camblor Portilla, M)

SANTIAGO SPANISH LANGUAGE COURSES

OSPSANTG 12S. Accelerated Second-Year Spanish, Part I: Chilean Emphasis
5 units, Aut (Abad, M), Win (Abad, M), Spr (Abad, M)

OSPSANTG 13S. Accelerated Second-Year Spanish, Part II: Chilean Emphasis
5 units, Aut (Abad, M), Win (Abad, M), Spr (Abad, M)

OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago
3-5 units, Aut (Bobbert, A), Win (Staff), Spr (Staff)

SPANISH LITERATURE (SPANLIT) COURSES

Students interested in literature and literary studies should also consult course listings in Chinese, Classics, Comparative Literature, English, French, German, Italian, Japanese, Portuguese, Slavic Languages and Literatures, Spanish, and Modern Thought and Literature. Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages. For information on undergraduate and graduate programs in Spanish, see the "Spanish and Portuguese" section of this bulletin. For courses in Spanish language instruction, see "Spanish Language" courses section of this bulletin.

SPANISH COURSE CATALOG NUMBERING

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

1. Courses in Literature and Culture (100-399)
   a. Undergraduate Courses (100-199)
   b. Courses for Advanced Undergraduates and Graduates (200-299)
      Iberian Literature (200-239)
      Latin American Literature, including Brazil (240-279)
      Latino/Chicano Literature (280-298)
      Individual Work (299)
2. Graduate Seminars (300-399)
      Iberian Literature (300-339)
      Latin American and Brazilian Literature (340-379)
      Chicano Literature (380-398)
      Individual Work (399)
      Dissertation Research (802)

Courses bearing the suffix 'E' are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages or bilingually.

UNDERGRADUATE COURSES IN SPANISH LITERATURE

SPANLIT 102N. Contemporary Latin American Theater
Stanford Introductory Seminar. Representative playwrights and theater troupes of Spanish speaking Latin America and the Caribbean, emphasizing the 60s and 70s. Topics: representation and politics; theatrical language and poetics; avant gardes and performance; teatro comprometido; psychodrama; influence of Brecht, Artaud, and the Theater of the Absurd. Plays by Emilio Carballido, Sabina Berman, Virgilio Piñera, Jose Triana, René Marqués, Luis Rafael Sánchez, La Candelaria, Yuyachkani, Osvaldo Dragún, Griselda Gambaro, Eduardo Pavlovsky, Egon Wolff. GER:DB-Hum

3-4 units, Aut (Briceno, X)

SPANLIT 105N. Don Quixote
Stanford Introductory Seminar. Preference to freshmen. Topics include: theories of language and the novel; history of early modern Iberia; Muslims in Europe. Close reading technique. Sources include filmed version. GER:DB-Hum

3-4 units, Aut (Barletta, V)

SPANLIT 106N. Contemporary Latin American Novel in Translation
Stanford Introductory Seminar. Preference to freshmen. Representative Latin American novelists who attained international readership after the literary boom. Critical readings and theoretical debates. Topics include: latinoamericanidad, reactions to magical realism, crime and the city, politics of translation, economies of prestige, revisions of dictatorship, relations with contemporary art, representations of class and gender, globalization. Films which deal the role of women in society (*Retrato de Teresa*), migration (*Memorias del subdesarrollo, Lejanía*), history (*La última cena, Lucia*), youth (*Personal Belongings, El telón de azúcar*), including films made by Cubans in the U.S. (El super).
3-5 units, Win (Ruffinelli, J)

SPANLIT 278. Senior Seminar: The Novelas ejemplares by Miguel de Cervantes and the Culture of the Baroque
Cervantes' representation of a new world characterized by geographical, social and cultural plurality. Topics include: the Baroque space (Deleuze); the fascination of alterity; the imperative of honor and the hermeneutic of defaud and disappointment; the theatralization of the environment and the new rhetoric; the language of the body and women as protagonist; neoplatonism; a new conciousness of authorship. Texts by Cervantes, Mraraval, and Villari. GER:DB-Hum
3-5 units, Spr (Sanchez, J)

SPANLIT 278A. Senior Seminar: Love and Politics in Latin America from Romanticism to Postmodernism
Tthe relationship between love and power through representative literary texts from the 19th and 20th centuries. Topics: romanticism and the nation; modernism and postmodernism; affinities and kinship; love and desire; and gender, sexualities, and revolution. Authors: Isaacs, Bombal, Girondo, Vallejo, Neruda, García Marquéz, Córtazar, Valenzuela, Lispector. Film adaptations: *El beso de la mujer araña, La virgen de los sicarios, Dona Flor e Seus dois maridos*. May be repeated for credit.
3-5 units, Win (Briceno, X)

SPANLIT 293E. Baroque and Neobaroque
(Same as COMPLIT 233, ENGLISH 233.) The literary, cultural, and political implications of the 17th-century phenomenon formed in response to the conditions of the 16th century including humanism, absolutism, and early capitalism, and dispersed through Europe, the Americas, and Asia. If the Baroque is a universal code of this period, how do its vehicles, such as tragic drama, Ciceronian prose, and metaphysical poetry, converse with one another? The neobaroque as a complex reaction to the remains of the baroque in Latin American cultures, with attention to the mode in recent Brazilian literary theory and Mexican poetry.
5 units, Win (Greene, R)

GRADUATE COURSES IN SPANISH LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SPANLIT 206. Language Use in the Chicano Community
(Same as EDUC 242.) The significance and consequences of language diversity in the culture and society of the U.S. Experiences of non-English background individuals through focus on Spanish-English bilingual communities.
3-5 units, not given this year

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.
3 units, Aut (Jarboe, L)

SPECLANG 129B. Beginning Ukrainian, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.
3 units, Win (Jarboe, L)

SPECLANG 129C. Beginning Ukrainian, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.
3 units, Spr (Jarboe, L)

SPECLANG 130A. Intermediate Ukrainian, First Quarter
3 units, Aut (Jarboe, L)

SPECLANG 130B. Intermediate Ukrainian, Second Quarter
3 units, Win (Jarboe, L)

SPECLANG 130C. Intermediate Ukrainian, Third Quarter
3 units, Spr (Jarboe, L)

SPECLANG 134A. Beginning Haitian Creole
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Haitian culture.
3 units, not given this year

SPECLANG 144A. Beginning Tagalog, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Tagalog culture.
3 units, Aut (Staff)

SPECLANG 144B. Beginning Tagalog, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Tagalog culture.
3 units, Win (Staff)

SPECLANG 145A. Intermediate Tagalog, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Aut (Staff)

SPECLANG 145B. Intermediate Tagalog, Second Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Win (Staff)

SPECLANG 145C. Intermediate Tagalog, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Spr (Staff)

SPECLANG 150A. Beginning Vietnamese, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.
3 units, Aut (Staff)

SPECLANG 150B. Beginning Vietnamese, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.
3 units, Win (Staff)

SPECLANG 150C. Beginning Vietnamese, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.
3 units, Spr (Staff)

SPECLANG 151A. Intermediate Vietnamese, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Aut (Staff)

SPECLANG 151B. Intermediate Vietnamese, Second quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Win (Staff)

SPECLANG 151C. Intermediate Vietnamese, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Spr (Staff)

SPECLANG 152A. Beginning Hindi, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture.
3 units, Aut (Staff)

SPECLANG 152B. Beginning Hindi, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture
4 units, Win (Malhotra, P)

SPECLANG 152C. Beginning Hindi, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture.
4 units, Spr (Malhotra, P)

SPECLANG 153A. Intermediate Hindi, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
4 units, Aut (Staff)

SPECLANG 153B. Intermediate Hindi, Second Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
4 units, Win (Staff)

SPECLANG 153C. Intermediate Hindi, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
4 units, Spr (Staff)

SPECLANG 154A. Advanced Hindi, First Quarter
4 units, Aut (Staff)

SPECLANG 154B. Advanced Hindi, Second Quarter
4 units, Win (Staff)

SPECLANG 154C. Advanced Hindi, Third Quarter
4 units, Spr (Staff)

SPECLANG 156A. Beginning Indonesian, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Indonesian culture.
3 units, Aut (Staff)

SPECLANG 156B. Beginning Indonesian, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Indonesian culture.
3 units, Win (Staff)

SPECLANG 156C. Beginning Indonesian, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Indonesian culture.
3 units, Spr (Staff)

SPECLANG 157A. Intermediate Indonesian, First Quarter
3 units, Aut (Staff)

SPECLANG 157B. Intermediate Indonesian, Second Quarter
3 units, Win (Staff)

SPECLANG 157C. Intermediate Indonesian, Third Quarter
3 units, Spr (Staff)

SPECLANG 158A. Advanced Indonesian, First Quarter
3 units, Aut (Staff)

SPECLANG 158B. Advanced Indonesian, Second Quarter
3 units, Win (Staff)

SPECLANG 158C. Advanced Indonesian, Third Quarter
3 units, Spr (Staff)

SPECLANG 159A. Beginning Punjabi, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Punjabi culture.
3 units, Aut (Dhillon, R)

SPECLANG 159B. Beginning Punjabi, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Punjabi culture.
3 units, Win (Dhillon, R)

SPECLANG 159C. Beginning Punjabi, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Punjabi culture.
3 units, Spr (Dhillon, R)

SPECLANG 164A. Beginning Czech, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Czech culture.
3 units, Aut (Dusatko, J)

SPECLANG 164B. Beginning Czech, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Czech culture.
3 units, Win (Dusatko, J)

SPECLANG 164C. Beginning Czech, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Czech culture.
3 units, Spr (Staff)

SPECLANG 165A. Intermediate Czech, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Aut (Dusatko, J)

SPECLANG 165B. Intermediate Czech, Second Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Win (Dusatko, J)

SPECLANG 165C. Intermediate Czech, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Spr (Dusatko, J)

SPECLANG 167A. Beginning Polish, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Polish culture.
3 units, Aut (Bartoszewski, L)

SPECLANG 167B. Beginning Polish, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Polish culture.
3 units, Win (Bartoszewski, L)

SPECLANG 167C. Beginning Polish, Third Quarter
First year sequence enables students to express themselves in spoken and written Polish while mastering basic vocabulary and grammar structures. Introduction to the culture.
3 units, Spr (Bartoszewski, L)

SPECLANG 168A. Intermediate Polish, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Aut (Bartoszewski, L)

SPECLANG 168B. Intermediate Polish, Second Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Win (Bartoszewski, L)

SPECLANG 168C. Intermediate Polish, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Spr (Bartoszewski, L)

SPECLANG 170A. Beginning Modern Greek, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Greek culture.
4 units, Aut (Staff)

SPECLANG 170B. Beginning Modern Greek, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Greek culture.
4 units, Win (Staff)

SPECLANG 170C. Beginning Modern Greek, Third Quarter
Emphasis on speaking, reading, writing and listening. Student-centered, interactive approach focuses on mastering the basic grammar structures and basic vocabulary through a multimodal approach. Introduction to the Greek culture.
4 units, Spr (Staff)

SPECLANG 172A. Modern Greek Language and Culture through Literature and Film, First Quarter
Accelerated. Vocabulary enrichment through multimedia, online materials.
4 units, Aut (Prionas, E)

SPECLANG 172B. Modern Greek Language and Culture through Literature and Film, Second Quarter
Accelerated. Vocabulary enrichment through multimedia, online materials.
4 units, Win (Prionas, E)

SPECLANG 172C. Modern Greek Language and Culture through Literature and Film, Third Quarter
Accelerated. Vocabulary enrichment through multimedia, online materials.
4 units, Spr (Prionas, E)

SPECLANG 173A. Beginning Hungarian, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.
3 units, Aut (Szoke, E)

SPECLANG 173B. Beginning Hungarian, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.
3 units, Win (Szoke, E)

SPECLANG 173C. Beginning Hungarian, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.
3 units, Spr (Szoke, E)

SPECLANG 174A. Beginning Quechua, First Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Quechua culture.
3 units, Aut (Fajardo, J)

SPECLANG 174B. Beginning Quechua, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Quechua culture.
3 units, Win (Fajardo, J)

SPECLANG 174C. Beginning Quechua, Third Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Quechua culture.
3 units, Spr (Fajardo, J)

SPECLANG 176B. Beginning Thai, Second Quarter
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Thai culture.
3 units, Win (Moore, R)

SPECLANG 177A. Intermediate Thai, First Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Aut (Moore, R)

SPECLANG 177B. Intermediate Thai, Second Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, not given this year

SPECLANG 177C. Intermediate Thai, Third Quarter
Grammar structures and vocabulary through authentic materials. Cultural proficiency.
3 units, Spr (Moore, R)

SPECLANG 178A. Beginning Sign Language, First Quarter
Comprehension and production skills; cultural awareness necessary for communication. Limited enrollment.
4 units, Aut (Haas, C)

SPECLANG 178B. Beginning Sign Language, Second Quarter
Comprehension and production skills; cultural awareness necessary for communication. Limited enrollment.
4 units, Win (Haas, C)

SPECLANG 178C. Beginning Sign Language, Third Quarter
Comprehension and production skills; cultural awareness necessary for communication. Limited enrollment.
4 units, Spr (Haas, C)

SPECLANG 179A. Intermediate Sign Language, First Quarter
Additional functional structures, lexical items, and history. Limited enrollment.
4 units, Aut (Haas, C)

SPECLANG 179B. Intermediate Sign Language, Second Quarter
Additional functional structures, lexical items, and history. Limited enrollment.
4 units, Win (Haas, C)

SPECLANG 179C. Intermediate Sign Language, Third Quarter
Additional functional structures, lexical items, and history. Limited enrollment.

Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, DB-Hum, EC-GlobalCom
3-5 units, Aut (Prionas, E)

SPECLANG 215A. Modern Greek for Heritage Language Learners, First Quarter
For students of Greek background. Sources include authentic texts, multimedia materials, and Greek media.
2-4 units, alternate years, not given this year

SPECLANG 215B. Modern Greek for Heritage Language Learners, Second Quarter
For students of Greek background. Sources include authentic texts, multimedia materials, and Greek media.
2-4 units, alternate years, not given this year

SPECLANG 215C. Modern Greek for Heritage Language Learners, Third Quarter
For students of Greek background. Sources include authentic texts, multimedia materials, and Greek media.
2-4 units, alternate years, not given this year

SPECLANG 238A. Beginning Uzbek, First Quarter
3 units, Aut (Kunanbaeva, A)

SPECLANG 238B. Beginning Uzbek, Second Quarter
3 units, Win (Staff)

SPECLANG 238C. Beginning Uzbek, Third Quarter
3 units, Spr (Staff)

SPECLANG 241A. Ukrainian for Speakers of a Slavic Language, First Quarter
3 units, Aut (Fleishman, E)

SPECLANG 241B. Ukrainian for Speakers of a Slavic Language, Second Quarter
3 units, Win (Staff)

SPECLANG 241C. Ukrainian for Speakers of a Slavic Language, Third Quarter
3 units, Spr (Staff)

GRADUATE COURSES IN SPECIAL LANGUAGE PROGRAM

For graduate students only.

SPECLANG 297. Directed Reading
Prerequisite: consent of instructor.
1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff), by arrangement

SPECLANG 395. Graduate Studies in Special Language
Prerequisite: consent of instructor.
1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

STANFORD INTRODUCTORY SEMINARS

All seminars require a brief application. See the *Stanford Introductory Seminars Course Catalogue* published each September, or http://introsems.stanford.edu. Due dates for 2008-09 applications for both freshman and sophomore preference courses are: Autumn Quarter, 5 p.m., September 19; Winter Quarter, noon, December 5; Spring Quarter, noon, March 13. Key: F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

AERONAUTICS AND ASTRONAUTICS STANFORD INTRODUCTORY SEMINARS

AA 113N. Structures: Why Things Don't (and Sometimes Do) Fall Down
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How structures created by nature or built by human beings keep things up and keep things in. Topics: nature's structures from microorganisms to large vertebrae; buildings from ancient dwellings to modern skyscrapers; spacecraft and airplanes; boats from ancient times to America's Cup sailboats, and how they win or break; sports equipment from Odysseus's bow to modern skis; and biomedical devices including bone replacements and cardiovascular stents. How composite materials are used to make a structure light and strong. GER:DB-EngrAppSci
3 units, Win (Springer, G)

AMERICAN STUDIES STANFORD INTRODUCTORY SEMINARS

AMSTUD 114N. Visions of the 1960s
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the ideas, sensibility, and, to a lesser degree, the politics of the American 60s. Topics: the early 60s vision of a beloved community; varieties of racial, generational, and feminist dissent; the meaning of the counterculture; and current interpretive perspectives on the 60s. Film, music, and articles and books. GER:DB-Hum, EC-AmerCul
5 units, Aut (Gillam, R)

ANESTHESIA STANFORD INTRODUCTORY SEMINARS

ANES 70Q. The Psychosocial and Economic Ramifications of Critical Illness
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The impact of critical illness on a patient and family members; difficulties involved in the decision making process for the patient, family, and healthcare professionals. Topics include: conventional views of death and dying, epidemiology of critical illness, grief, coping skills, cultural variations, euthanasia and withdrawal of care, palliative care and hospice, advanced directive and legal aspects of medical catastrophe, psychosocial dynamics of family meetings, and emotional ramifications of medical decisions.
3 units, Spr (Lin, L)

ANTHROPOLOGY STANFORD INTRODUCTORY SEMINARS

ANTHRO 8N. The Anthropology of Globalization
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. GER:DB-SocSci
3-4 units, Aut (Ebron, P)

ANTHRO 16N. Ethnographies of North America: An Introduction to Cultural and Social Anthropology
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Ethnographic look at human behavior, including cultural transmission, social organization, sex and gender, culture change, and related topics in N. America. Films. GER:DB-SocSci
3-4 units, Win (Wilcox, M)

ANTHRO 18N. Glimpses of Divinity
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How human beings search for and identify the presence of the divine in everyday human life.Sources include spiritual classics in the Christian, Jewish and Hindu traditions including works by Augustine, Teresa of Avila, Jonathan Edwards, the Bhagvad Gita, the Zohar, and some ethnographies of non-literate traditions.
3 units, Win (Luhrmann, T)

ANTHRO 22N. Maya Hieroglyphic Writing
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Decipherment of classic Maya writing. Principles of archaeological decipherment. Maya calendrical, astronomical, historical, mythological, and political texts on stone, wood, bone, shell, murals, ceramics, and books (screenfold codices). Archaeology and ethnohistory of Maya scribal practice and literacy. Related Mesoamerican writing systems. The evolution of writing and the relevance of writing to theories of culture and civilization. GER:DB-SocSci, EC-GlobalCom
4 units, Spr (Fox, J)

APPLIED PHYSICS STANFORD INTRODUCTORY SEMINARS

APPPHYS 68N. Lasers and Photons
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The physics of lasers and their light. Computer applets and hands-on investigations. Historical development of ideas about light: electromagnetic waves; particles; special relativity; quantum theory; and the laser. Properties of laser light: wavelength and frequency; coherence; polarization; interference; diffraction; and linear and nonlinear optics. Lasers and applications from Schawlow and Townes to Linac Coherent Light Source. Prerequisites: high school physics and calculus. GER:DB-EngrAppSci
3 units, Aut (Bucksbaum, P)

APPPHYS 79N. Energy Choices for the 21st Century
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Choices for meeting the future energy needs of the U.S. and the world. Basic physics of energy sources, technologies that might be employed, and related public policy issues. Trade-offs and societal impacts of different energy sources. Policy options for making rational choices for a sustainable world energy economy. GER:DB-EngrAppSci
3 units, Aut (Fox, J; Geballe, T)

BIOCHEMISTRY STANFORD INTRODUCTORY SEMINARS

BIOC 118Q. Genomics and Medicine
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Knowledge gained from sequencing human, bacterial, and viral genomes and implications for medicine and biomedical research. Novel diagnoses (chips, SNPs and gene expression) and treatment of diseases including gene therapy, stem cell therapy, and rational drug design. Ethical implications of stem cell therapy and uses of genetic information. Use of genome and disease databases to determine gene function in disease, diagnosis, and potential treatments. See http://biochem118.stanford.edu/. GER:DB-EngrAppSci
3 units, Aut (Brutlag, D)

BIOENGINEERING STANFORD INTRODUCTORY SEMINARS

BIOE 70Q. Medical Device Innovation
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Commonly used medical devices in different medical specialties. Guest lecturers include Stanford Medical School physicians, entrepreneurs, and venture capitalists. How to identify clinical needs and design device solutions to address these needs. Fundamentals of starting a company. Field trips to local medical device companies; workshops. No previous engineering training required.
3 units, Spr (Mandato, J; Milroy, J; Doshi, R)

BIOLOGY STANFORD INTRODUCTORY SEMINARS

BIO 13N. Environmental Problems and Solutions
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Students do independent investigations of current environmental problems, analyzing differing views of them and discussing possible solutions. Each student gives two seminar presentations and leads two seminar discussions. Short, documented position papers are written for policy makers. GER:DB-NatSci
3 units, Spr (Ehrlich, P)

BIO 14N. Plants and Civilization
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The role of plants in the development of civilization. Topics: the use of forests, woodlands, and grazing lands; centers of origins and spread of crops; viticulture, and wine and beer making; the spice route and the age of exploration; the use of plants as medicine; the global spread of weeds; engineering plants for the future; the importance of tea, coffee, chocolate, sugar, potatoes, natural dyes, and rubber in societal affairs and change. GER:DB-NatSci
3 units, Win (Mooney, H)

BIO 15N. Environmental Literacy
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Lack of public understanding of the details of most environmental problems is cited as a cause of environmental deterioration. Good citizenship requires literacy about the elements of the scientific and decision making processes that accompany most environmental issues: what can happen, what are the odds, how can the credibility of sources of expertise be assessed, which components of environmental debates deal with factual and theoretical issues, and which are political value judgments? GER:DB-NatSci
3 units, Win (Schneider, S)

BIO 25N. Biogeography of Disease
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Geographic distribution of disease. Biotic interactions among vectors, hosts, and environment. Influence of climatic and environmental change on spread and virulence of disease. Human and animal diseases. Primary literature. GER:DB-NatSci
3 units, Aut (Hadly, E)

BIO 25Q. The Molecular Basis of Genetic Disease
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on two genetic diseases resulting from the production of protein molecules that are unable to fold into their native conformations, called conformational diseases: cystic fibrosis and amyotrophic lateral sclerosis or Lou Gehrig's disease. Hypotheses and controversies surrounding the molecular basis of these disorders, and implications for novel therapeutics. Readings from research literature. GER:DB-NatSci
3 units, Spr (Kopito, R)

BIO 26N. Maintenance of the Genome
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Focus is on DNA repair systems which scan the genome to ensure genomic stability in the face of natural endogenous threats to DNA and those due to radiation and chemicals in the external environment. Redundancy of the genetic message ensured by complementary DNA strands facilitates recovery of information when one of the strands is altered. Predisposition to cancer often implicates a defective DNA repair gene. Relevance for oncology, aging, developmental biology, environmental health, and neurobiology. GER:DB-NatSci
3 units, Spr (Hanawalt, P)

BIO 31Q. Ants: Behavior, Ecology, and Evolution
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Behavior: the organization of colonies, how they operate without central control, how they resemble other complex systems like brains. Ecology: how populations of colonies change, comparing the ecology of a species in SW American desert and invasive Argentine ants. Evolution: why are there so many species of ants; how are they alike, how do they differ, and why? Ants as the theme for exploring how to do research in animal behavior, ecology, and evolution. Research project on the invasive Argentine ant: its distribution on campus, foraging trails, and nest structure.
3 units, Spr (Gordon, D)

BIO 33N. Conservation Science and Practice
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Interdisciplinary. The science and art of conservation today. The forces that are driving change in Earth's atmosphere, lands, waters, and variety of life forms. Which broad dimensions of the biosphere, and which elements of ecosystems, most merit protection? The

prospects for, and challenges in, making conservation economically attractive and commonplace. Field trip; project. GER:DB-NatSci

3 units, Spr (Daily, G)

BIOMEDICAL INFORMATICS STANFORD INTRODUCTORY SEMINARS

BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution

(S,Sem Same as GENE 109Q.) Stanford Introductory Seminar. Preference to sophomores. For non-science majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

CHEMICAL ENGINEERING STANFORD INTRODUCTORY SEMINARS

CHEMENG 35N. Renewable Energy for a Sustainable World

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. An overall world energy assessment, projections, and technologies. How to assess good and bad potential impacts of leading renewable energy candidates: benefit versus impact ratio using quantitative cradle-to-grave approach. Technologies suitable for near-term application in developing economic systems. Governmental policies, governmental versus private sector investments, raw materials supply issues, and impact of cultural influences on technology choices and speed of implementation.

3 units, Aut (Swartz, J)

CHEMENG 60Q. Environmental Regulation and Policy

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How environmental policy is formulated in the U.S. How and what type of scientific research is incorporated into decisions. How to determine acceptable risk, the public's right to know of chemical hazards, waste disposal and clean manufacturing, brownfield redevelopment, and new source review regulations. The proper use of science and engineering including media presentation and misrepresentation, public scientific and technical literacy, and emotional reactions. Alternative models to formulation of environmental policy. Political and economic forces, and stakeholder discussions. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Libicki, S)

CHEMENG 70Q. Masters of Disaster

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students interested in science, engineering, politics, and the law. Learn from past disasters to avoid future ones. How disasters can be tracked to failures in the design process. The roles of engineers, artisans, politicians, lawyers, and scientists in the design of products. Failure as rooted in oversight in adhering to the design process. Student teams analyze real disasters and design new products presumably free from the potential for disastrous outcomes. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Moalli, J)

CHEMENG 80Q. Art, Chemistry, and Madness: The Science of Art Materials

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Chemistry of natural and synthetic pigments in five historical palettes: earth (paleolithic), classical (Egyptian, Greco-Roman), medieval European (Middle Ages), Renaissance (old masters), and synthetic (contemporary). Composite nature of paints using scanning electron microscopy images; analytical techniques used in art conservation, restoration, and determination of provenance; and inherent health hazards. Paintings as mechanical structures. Hands-on laboratory includes stretching canvas, applying gesso grounds, grinding pigments, preparing egg tempera paint, bamboo and quill pens, gilding and illumination, and papermaking. GER:DB-EngrAppSci

3 units, Spr (Frank, C; Loesch-Frank, S)

CHEMISTRY STANFORD INTRODUCTORY SEMINARS

CHEM 24N. Nutrition and History

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Intended to broaden the introductory chemistry experience. The biochemical basis of historically important nutritional deficiencies (vitamins, minerals, starvation, metabolic variants that predispose to disease) and environmental toxins is related to physiological action and the sociological, political, and economic consequences of its effect on human populations. Prerequisite: high school chemistry. Recommended: 31A,B, or 31X, or 33.

2 units, Spr (Huestis, W)

CHEM 25N. Science in the News

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Possible topics include: diseases such as avian flu, HIV, and malaria; environmental issues such as climate change, atmospheric pollution, and human population; energy sources in the future; evolution; stem cell research; nanotechnology; and drug development. Focus is on the scientific basis for these topics as a basis for intelligent discussion of societal and political implications. Sources include the popular media and scientific media for the nonspecialist, especially those available on the web.

3 units, Aut (Andersen, H)

CHEM 25Q. Science-in-Theatre: A New Genre?

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How scientists acquire their rules, mores, and idiosyncrasies through a form of intellectual osmosis in a mentor-disciple relationship. Scientists represented as Frankensteins or nerds, rather than normal. Why more intellectually challenging plays have appeared on the Anglo-American theatre scene where scientific behavior and even science are presented accurately. Students engage in a playwriting experiment.

2 units, Win (Djerassi, C)

CIVIL AND ENVIRONMENTAL ENGINEERING STANFORD INTRODUCTORY SEMINARS

CEE 31Q. Accessing Architecture Through Drawing

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Drawing architecture provides a deeper understanding of the intricacies and subtleties that characterize contemporary buildings. How to dissect buildings and appreciate the formal elements of a building, including scale, shape, proportion, colors and materials, and the problem solving reflected in the design. Students construct conventional architectural drawings, such as plans, elevations, and perspectives. Limited enrollment. GER:DB-EngrAppSci

4 units, Aut (Barton, J), Spr (Barton, J)

CEE 46Q. Fail Your Way to Success

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How to turn failures into successes; cases include minor personal failures and devastating engineering disasters. How personalities and willingness to take risks influence the way students approach problems. Field trips, case studies, and guest speakers applied to students day-to-day interactions and future careers. Goal is to redefine what it means to fail. GER:DB-EngrAppSci

3 units, Spr (Clough, R)

CEE 48N. Organizing Global Projects

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Challenges associated with planning and managing both commercial and governmental/non-profit global projects; theory, methods, and tools to enhance global project outcomes. Students teams model and simulate crosscultural teams engaged in global projects. Opportunities to participate in research in the Collaboratory for Research on Global Projects involving faculty from Stanford departments and schools; see http://crgp.stanford.edu.

4 units, Aut (Levitt, R)

CLASSICS ART/ARCHAEOLOGY STANFORD INTRODUCTORY SEMINARS

CLASSART 21Q. Eight Great Archaeological Sites in Europe

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on excavation, features and finds, arguments over interpretation, and the place of each site in understanding the archaeological history of Europe. Goal is to introduce the latest archaeological and anthropological thought, and raise key questions about ancient society. The archaeological perspective foregrounds interdisciplinary study: geophysics articulated with art history, source criticism with analytic modeling, statistics interpretation. A web site with resources about each site, including plans,

photographs, video, and publications, is the basis for exploring. GER:DB-Hum

3-5 units, Win (Shanks, M)

CLASSICS GENERAL STANFORD INTRODUCTORY SEMINARS

CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent

(F,Sem Same as DRAMA 12N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

4 units, Win (Rehm, R)

CLASSGEN 45N. Conversations: Catullus, Virgil, and their Influence on the Prose and Poetry of Robert Frost

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Poems by Catullus and Virgil (in Latin or in translation) and by Robert Frost. Why Frost kept the poetry of Catullus close at hand throughout his life; the relationship between a writer's reading and writing; and how emotional experience can be transmuted into verbal at. Sound, rhythm, meter, the order of words, artful construction of short poems, and the dramatic function of conversation. Poetry recitation and creative writing.

3-5 units, Spr (Lain, N)

CLASSGEN 48N. Ethical Wisdom in Greek Tragedy and Philosophy

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What sorts of ethical values are found in Greek tragedies? Modes of ethical wisdom promoted and enacted in Greek tragedy and philosophy in the classical period emphasizing modes of wisdom that reflected traditional Greek religion and traditional social and political values in democratic Athens. GER:DB-Hum

3-5 units, Spr (Nightingale, A)

CLASSICS HISTORY STANFORD INTRODUCTORY SEMINARS

CLASSHIS 37N. The Early Roman Emperors: HIstory, Biography, and Fiction

(F,Sem. Same as HISTORY 12N.) Stanford Introductory Seminar. Preference to freshmen. The politics, drama, and characters of the period after the fall of the Roman Republic in 49 B.C.E. Issues of liberty and autocracy explored by Roman writers through history and biography. The nature of history writing, how expectations about literary genres shape the materials, the line between biography and fiction,and senatorial ideology of liberty. Readings include: Tacitus' Annals, Suetonius' Lives of the Caesers, and Robert Graves' I Claudius and episodes from the BBC series of the same title. GER:DB-Hum

3 units, Aut (Saller, R)

COMMUNICATION STANFORD INTRODUCTORY SEMINARS

COMM 118Q. Theories of Film Practice

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How theory connects with practice in the production of film and television. Film and television from the perspectives of practitioners who have theorized about their work in directing, editing, screenwriting, cinematography, and sound, and social scientists whose research has explored similar issues empirically.

4 units, Win (Breitrose, H)

COMPARATIVE LITERATURE STANFORD INTRODUCTORY SEMINARS

COMPLIT 10N. Shakespeare and Performance in a Global Context

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The problem of performance including the performance of gender through the plays of Shakespeare. In-class performances by students of scenes from plays. The history of theatrical performance. Sources include filmed versions of plays, and readings on the history of gender, gender performance, and transvestite theater. GER:DB-Hum, EC-Gender

3 units, Spr (Parker, P)

COMPLIT 11Q. Shakespeare, Playing, Gender

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER:DB-Hum, EC-Gender

3 units, Win (Parker, P)

COMPLIT 21N. First Person Singular

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How first person narrative has been used across Western literature from antiquity to the present, in works including nonfictional autobiography, records of travel and testimonial, novels, and lyric poetry. Nonfictional readings may include Augustine, Rousseau, Cook, Equiano, and Freud; novels by Montesquieu, Mary Shelley, Conrad, and Levi; and poems by Rimbaud and Rilke. The use of the first-person in online media. GER:DB-Hum

5 units, Spr (Cohen, M)

COMPLIT 41Q. Ethnicity and Literature

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. What is meant by ethnic literature? How is ethnic writing different from non-ethnic writing, or is there such a thing as either? How does ethnicity as an analytic perspective affect the way literature is read by ethnic peoples? Articles and works of fiction; films on ethnic literature and cultural politics. How ethnic literature represents the nexus of social, historical, political, and personal issues. GER:DB-Hum, EC-AmerCul

3-5 units, Aut (Palumbo-Liu, D)

COMPLIT 54N. Reading in Common

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The personal and social functions of literary narrative. How do works of literature serve as ways for people to communicate with each other? Are fiction readers part of a broad, transhistorical community of readers? How does that membership shape the way authors write their own life stories? Writers include: Ruth Ozeki, Ondaatje, Calvino, and Gordimer.

5 units, Spr (Palumbo-Liu, D)

COMPLIT 61Q. Culture and Conflict in Contemporary Europe

(S,Sem Same as GERGEN 61Q.) Stanford Introductory Seminar. Preference to sophomores. Transformation of European culture and identity in the wake of the Cold War, European unification, and the post 9/11 environment. Pressures on transatlantic relationships; anti-Americanism; tensions around national cultural identity due to regional integration and globalization; immigration and the European experience of multiculturalism; and flashpoints of conflict concerning religion, secularization, and antisemitism.

3-5 units, Spr (Berman, R)

COMPARATIVE MEDICINE STANFORD INTRODUCTORY SEMINARS

COMPMED 81N. Comparative Anatomy and Physiology of Mammals

(F,Sem) Stanford Introductory Seminar. Preference to sophomores. Comparative approach to common mammals, laboratory, and domestic species. The unique adaptations of each species in terms of its morphological, anatomical, and behavioral characteristics. How these species interact with human beings and other animals. GER:DB-NatSci

3 units, Win (Bouley, D)

COMPMED 84Q. Globally Emerging Zoonotic Diseases

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Infectious diseases impacting veterinary and human health around the world today. Mechanisms of disease, epidemiology, and underlying diagnostic, treatment and control principles associated with these pathogens.

3 units, Spr (Felt, S)

COMPUTER SCIENCE STANFORD INTRODUCTORY SEMINARS

CS 21N. Can Machines Know? Can Machines Feel?
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Can mental attitudes attributed to people and sometimes to animals, including knowledge, belief, desire, and intention, also be ascribed to machines? Can light sensors have a belief? Can a pool cleaning robot or tax-preparation software have an intention? If not, why not? If yes, what are the rules of such ascription, and do they vary between human beings and machines? Sources include philosophy, neuroscience, computer science, and artificial intelligence. Topics: logic, probability theory, and elements of computation. Students present a paper. GER:DB-EngrAppSci
3 units, Aut (Shoham, Y)

CS 45N. Computers and Photography: From Capture to Sharing
(F,Sem) Stanford Introductory Seminar. Preference to freshmen with exerience in photography and use of computers. How a photographer creates photos, makes them available for computer viewing, reliably stores them, organizes them, tags them, searches them, and distributes them online. Access to a digital SLR camera and to PhotoShop Elements or equivalent software is required; no programming experience required.
3 units, Aut (Garcia-Molina, H)

CS 48N. The Science of Art
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The interwoven histories of science and Western art from the Renaissance to the 19th century. Emphasis is on the revolutions in science and mathematics that inspired parallel revolutions in the visual arts such as Brunelleschi's invention of linear perspective, Newton's discoveries in geometric optics, and the theories of color vision proposed by Goethe, Young, and Helmholtz. The scientific principles behind image making including digital image synthesis and computer graphics. No programming experience required. GER:DB-EngrAppSci
3 units, Win (Levoy, M)

CS 51N. Visionaries in Computer Science
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How visionaries anticipated the future; how could they see what their contemporaries did not? How can others strive for comparable achievements? The insights of Alan Turing, Vannevar Bush, Richard Licklider, Ted Nelson, Morton Heilig, Ivan Sutherland, Douglas Engelbart, Alan Kay, Frederick Brooks, and others.
3 units, Spr (Koltun, V)

CS 73N. Business on the Information Highways
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The capabilities of the Internet and its services. Writing for the web. The effect on commerce, education, government, and health care. Technical and business alternatives. Who is hurt and who benefits from the changes? Participants develop web publications.
3 units, Spr (Wiederhold, G; Barr, A; Tessler, S)

CS 74N. Digital Dilemmas
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Issues where policy decision making requires understanding computer and communications technology. Technology basics taught in non-technology terms. Topics include consumer privacy, government surveillance, file sharing and intellectual property. Focus is on technology in elections including topics such as voter registration databases, and electronic and Internet voting. GER:DB-EngrAppSci
3 units, Aut (Dill, D)

DRAMA STANFORD INTRODUCTORY SEMINARS

DRAMA 11N. Dramatic Tensions: Theater and the Marketplace
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Tension between artistic and commercial forces in modern theater; the conflicted state of the art form. Sources include major and emerging contemporary figures in commercial, fringe, and nonprofit theater in the U.S. and UK. Visits with writers, directors, and dramaturges. GER:DB-Hum
4 units, Aut (Freed, A)

DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent
(F,Sem Same as CLASSGEN 6N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender
4 units, Win (Rehm, R)

DRAMA 14N. Shakespeare from Stage to Screen
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The texts, stage practices, and filmic transformations for Shakespearean plays, including Henry V, Hamlet, Midsummer Night's Dream, and Macbeth. Close readings of texts and films; the relationship of film technologies to the texts in the production of political and social space; and the cultural assumptions carried by images and characters. GER:DB-Hum
4 units, Win (Rayner, A)

DRAMA 16N. Beauty or the Beast? Kitsch and Contemporary Culture
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What kind of esthetic experience does kitsch describe? Is it a matter of taste? Kitsch through disciplines such as visual arts, theater, literature, music, advertising, fashion, celebrity culture, and food. GER:DB-Hum
4 units, Spr (Jakovljevic, B)

DRAMA 17N. Salt of the Earth: The Docudrama in América
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Docudrama as a form of dramatic writing which provides a social critique of current or historical events through creative documentation and dramatization. Sources include Chicana/o and Latina/o texts, Brecht, Teatro Campesino, and Culture Clash. Students produce a short docudrama. GER:DB-Hum, EC-AmerCul
3 units, Win (Moraga, C)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Chomsky's ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum
3 units, Win (Rehm, R)

DRAMA 184Q. Devised Theater Project
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Students create material through writing and performance exercises. Research; storyline and dramatic structure; preparation of the performance space, props, and costume pieces; and rehearse and performance. Guest professionals.
3 units, Win (Weber, C)

DRAMA 187Q. The Stage in Dialogue with History
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The practice and ideological positions of European and American theater from the end of WW II to the implosion of the Soviet empire as seen in major playwrights and practitioners who shaped the European theater. Focus is on how plays and their staging responded to and tried to influence history. GER:DB-Hum
3 units, Aut (Weber, C)

DRAMA 189Q. Mapping and Wrapping the Body
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The concepts behind gender boundaries and clothing systems. GER:DB-Hum
3 units, Aut (Eddelman, W)

EARTH SYSTEMS STANFORD INTRODUCTORY SEMINARS

EARTHSYS 45N. Energy Issues Confronting the World
(F,Sem) Stanford Introductory Seminar. Preference to freshman. Geologic, economic, and policy issues shaping energy use and contrasting human perceptions of energy security. Topics include

discourse of resources, history and future of fossil fuels, curse of oil, global climate change, adaptation versus mitigation, relationship between wealth and energy, demand and strategies for efficiency and conservation, alternative energy prospects, geopolitics of energy trading, and energy flow among countries of the world. Game simulation, outside readings, class brainstorming, and student oral presentations on country energy profiles. GER:DB-NatSci

3 units, Win (Howell, D)

ECONOMICS STANFORD INTRODUCTORY SEMINARS

ECON 11N. Understanding the Welfare System

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and overtime rules. Economic principles to understand the effectiveness of these programs and their consequences on the behavior of families. Pre- or corequisite: ECON 1. Recommended: basic understanding of labor markets, taxes, and transfers.

2 units, Aut (MaCurdy, T)

ECON 17N. Energy, the Environment, and the Economy

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The relationship between environmental quality and production and consumption of energy. Can environmentally-friendly energy production and consumption compete with conventional sources? How to estimate and compare environmental impact costs of nonrenewable sources such as fossil fuels and nuclear power versus renewable sources such as solar and wind power. Implicit subsidies in conventional energy sources and the environmental costs of these subsidies. Regulatory and legal barriers to more environmentally friendly energy sources.

2 units, Spr (Wolak, F)

ELECTRICAL ENGINEERING STANFORD INTRODUCTORY SEMINARS

EE 10N. How Musical Instruments Work

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Musical instruments as examples of science, engineering, and the interplay between the two. The principles of operation of wind, string, and percussion instruments. Concepts include waves, resonators, sound spectra and the harmonic structure of instruments, engineering design, and the historical co-development of instruments and the science and engineering that makes them possible. Prerequisites: high school math and physics. Recommended: some experience playing a musical instrument. GER:DB-EngrAppSci

3 units, Spr (Miller, D)

EE 14N. Things about Stuff

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Most engineering curricula present truncated, linear histories of technology, but the stories behind disruptive inventions such as the telegraph, telephone, wireless, television, transistor, and chip are as important as the inventions themselves. How these stories elucidate broadly applicable scientific principles. Focus is on studying consumer devices; optional projects to build devices including semiconductors made from pocket change. Students may propose topics of interest to them. GER:DB-EngrAppSci

3 units, Aut (Lee, T)

EE 17N. Engineering the Micro and Nano Worlds: From Chips to Genes

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Hands-on operation of microscopes and micro-fabrication tools in the Stanford Nanofabrication Facility, field trips to local companies engaged in the applications of micro/nanotechnologies, and guest speakers in microelectronics, MEMS, and bio- and nanotechnology. Prerequisites: high-school physics. GER:DB-EngrAppSci

3 units, Spr (Pease, R; Maluf, N)

EE 21N. What is Nanotechnology?

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Possibilities and impossibilities of nanotechnology. Sources include Feynman's There's Plenty of Room at the Bottom, Drexler's Engines of Creation: The Coming Era of Nanotechnology, and Crichton's Prey. Assumptions and predictions of these classic works; what nano machinery may do; scenarios of a technology that may go astray. Prerequisites: high school math, physics and chemistry. GER:DB-EngrAppSci

3 units, Aut (Wong, P)

EE 23N. Imaging: From the Atom to the Universe

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Forms of imaging including human and animal vision systems, atomic force microscope, microscope, digital camera, holography and three-dimensional imaging, telescope, synthetic aperture radar imaging, nuclear magnetic imaging, sonar and gravitational wave imaging, and the Hubble Space telescope. Physical principles and exposure to real imaging devices and systems. GER:DB-EngrAppSci

3 units, Spr (Hesselink, L)

EE 60N. Man versus Nature: Coping with Disasters Using Space Technology

(F,Sem Same as GEOPHYS 60N.) Stanford Introductory Seminar. Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data manipulation and analysis. GER:DB-EngrAppSci

4 units, Aut (Zebker, H)

ENGINEERING STANFORD INTRODUCTORY SEMINARS

ENGR 159Q. Japanese Companies and Japanese Society

(S,Sem Same as MATSCI 159Q.) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci

3 units, Spr (Sinclair, R)

ENGLISH STANFORD INTRODUCTORY SEMINARS

ENGLISH 14Q. Tis All in Pieces: John Donne and the Early Modern World

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Situating Donne's work within his historical and cultural milieu; how his writing reflects changes on the threshold of the modern era. The historical, scientific, and cultural milieu of the early modern world. Related developments in mathematical perspective and early modern art. The influence of his dramatic realism on modern poets such as Browning, Eliot, and Rich, and composers such as Benjamin Britten and Bob Dylan. GER:DB-Hum

4-5 units, Win (Brooks, H)

ENGLISH 51N. Drama Queens: Powerful Women on Stage

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Eight strong women at the center of works of Greek, Shakespearean, and modern theater in the context of social misogyny. How they enact the social and spiritual visions of their creators. Sources include film performances. Students perform simple scene work. No acting experience required. GER:DB-Hum

3 units, Aut (Friedlander, L)

ENGLISH 52N. Ten Top Books

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The books most frequently taught in U.S. English departments including classics by Nathaniel Hawthorne and F. Scott Fitzgerald and recent works by minority writers such as Toni Morrison and Maxine Hong Kingston. Cultural and historical contexts, and the aesthetic and social factors that canonize these literary supertexts. GER:DB-Hum

3 units, Win (Jones, G)

ENGLISH 53N. Aesthetic Taste and Gastronomy

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. A sampling of aesthetics and gastronomy as defined by 18th-century

British essayists and their heirs from England and France. Focus is on the development of middle class taste, figurative as well as food-oriented, and manners, snobbery, and sensibility. GER:DB-Hum

3 units, Win (Gigante, D)

ENGLISH 65N. Contemporary Women Fiction Writers
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Novels and story collections by women writers whose work explores: domestic and global politics; love, sexuality, and orientation; and spirituality and its meanings. Readings includes Dandicant, Eisenberg, Munro, Morrison, O'Brien, and Erdrich. GER:DB-Hum

3 units, Aut (Tallent, E)

ENGLISH 69Q. Sources of Global Challenges Today, Possibilities for Global Solutions: A Literary Exploration
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Concerns central to literary study, comparative study in race and ethnicity, and African and African American Studies as expressed in fiction from Africa, the Caribbean, the U.S., and Hawai'i. Issues include: relations between the West and the Muslim world; class and race in the U.S.; the shift of world populations from rural society to the metropolis; international immigration and refugee situations; and how women's lives are impacted by society, and how they shape and change it. Opportunities for dialogue with members of local ethnic and religious communities. GER:DB-Hum

3-5 units, Spr (Drake, S)

ENGLISH 70N. Shakespeare on Film
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Premises of film criticism. Films include *A Midsummer Night's Dream* directed by Max Reinhardt and Peter Hall; *Romeo and Juliet* by Franco Zefirelli and Baz Luhrman; *Henry V* by Laurence Olivier and Kenneth Branagh; and *Hamlet* by Sven Gade, Olivier, Grigori Kozintsev, Zefirelli, Branagh, and Michael Almereyda. GER:DB-Hum

3 units, Aut (Riggs, D)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Italy as metaphor, in depictions by British and American writers from Shakespeare and Byron to D.H.Lawrence and Robert Hellenga. GER:DB-Hum

3 units, Aut (Evans, M)

ENGLISH 82Q. Shakespeare's Plays
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:DB-Hum

5 units, Spr (Rebholz, R)

ENGLISH 85Q. The Brontës: A Victorian Family
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The Brontë children's stories of personal power and political intrigue, based on the the news of the period. Readings include Charlotte Brontë's *Jane Eyre*, Emily Brontë's *Wuthering Heights*, and Anne Brontë's *Agnes Grey* focusing on the tedium, aspirations, and frustrations of these gifted women. Historical, cultural, and autobiographical questions in these novels, the juvenilia, and a representative later work. Prerequisite: PWR 1. GER:DB-Hum

3-4 units, Win (Paulson, L)

ENGLISH 87N. The Graphic Novel: Word, Image, Sound, Silence
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The evolution of funnies to comics and graphic novels. How definitions and representations of this genre have changed over the last century. The controversy over the status of the graphic novel. GER:DB-Hum

5 units, Win (Lunsford, A)

ENVIRONMENTAL EARTH SYSTEM SCIENCE STANFORD INTRODUCTORY SEMINARS

EESS 39N. The Carbon Cycle: Reducing Your Impact
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Changes in the long- and short-term carbon cycle and global climate through the burning of fossil fuels since the Industrial Revolution. How people can shrink their carbon footprints. Long-term sources and sinks of carbon and how they are controlled by tectonics and short-term sources and sinks and the interaction between the biosphere and ocean. How people can shrink their carbon footprints. Held at the Stanford Community Farm. GER:DB-NatSci

3 units, Spr (Chamberlain, P)

EESS 46N. Exploring the Critical Interface between the Land and Monterey Bay: Elkhorn Slough
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Field trips to sites in the Elkhorn Slough, a small agriculturally impacted estuary that opens into Monterey Bay, a model ecosystem for understanding the complexity of estuaries, and one of California's last remaining coastal wetlands. Readings include Jane Caffrey's Changes in a California Estuary: A Profile of Elkhorn Slough. Basics of biogeochemistry, microbiology, oceanography, ecology, pollution, and environmental management.

3 units, Spr (Francis, C)

FEMINIST STUDIES STANFORD INTRODUCTORY SEMINARS

FEMST 188N. Imagining Women: Writers in Print and in Person
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Contemporary literature through recent texts and conversations with the authors including Stanford faculty and visiting writers. Analytical and creative writing. Writing experience not necessary.Preference to sophomores. Contemporary literature through recent texts and conversations with the authors including Stanford faculty and visiting writers. Analytical and creative writing. Prerequisite: PWR 1. GER:DB-Hum

4-5 units, Win (Miner, V)

FEMST 191Q. Writing Women's Lives
(F,Dial) Stanford Introductory Seminar. Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.

2 units, Aut (Miner, V)

FRENCH GENERAL STANFORD INTRODUCTORY SEMINARS

FRENGEN 45N. American Writers in 20th-Century Paris
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. A crosscultural inquiry into Paris as a part of American culture, a myth, a longing, and source of inspiration. Role of artistic movements (Cubism, Surrealism, Existentialism) and cultural institutions such as the cafés, libraries, and salons in the life and creativity of the expatriate. Birth of their writing selves and existential questioning around issues of national and individual identities. Readings: Gertrude Stein, Hemingway, Fitzgerald, Anaïs Nin, and Baldwin. In English. GER:DB-Hum

3-4 units, Win (Alduy, C)

FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. GER:DB-Hum

4 units, Spr (Bertrand, M)

GENETICS STANFORD INTRODUCTORY SEMINARS

GENE 109Q. Genomics: A Technical and Cultural Revolution
(S,Sem Same as BIOMEDIN 109Q.) Stanford Introductory Seminar. Preference to sophomores. For non-science majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES STANFORD INTRODUCTORY SEMINARS

GES 39N. Forensic Geoscience: Stanford CSI
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Geological principles, materials, and techniques indispensable to modern criminal investigations. Basic earth materials, their origin and variability, and how they can be used as evidence in criminal cases and investigations such as artifact provenance and environmental pollution. Sources include case-based, simulated forensic exercises and the local environments of the Stanford campus and greater Bay Area. Local field trips; research presentation and paper. GER:DB-NatSci
3 units, Spr (Maher, K)

GES 40N. Diamonds
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Topics include the historyof diamonds as gemstones, prospecting and mining, and their often tragic politics. How diamond samples provide clues for geologists to understand the Earth's deep interior and the origins of the solar system. Diamond's unique materials properties and efforts in synthesizing diamonds. GER:DB-NatSci
3 units, Spr (Mao, W)

GES 43Q. Environmental Problems
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Components of multidisciplinary environmental problems and ethical questions associated with decision making in the regulatory arena. Students lead discussions on environmental issues such as groundwater contamination from point and nonpoint sources, cumulative watershed effects related to timber and mining practices, acid rain, and subsurface disposal of nuclear waste. GER:DB-NatSci
3 units, Win (Loague, K)

GES 55Q. The California Gold Rush: Geologic Background and Environmental Impact
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Topics include: geologic processes that led to the concentration of gold in the river gravels and rocks of the Mother Lode region of California; and environmental impact of the Gold Rush due to population increase, mining operations, and high concentrations of arsenic and mercury in sediments from hard rock mining and milling operations. Recommended: introductory geology. GER:DB-NatSci
3 units, Win (Bird, D)

GEOPHYSICS STANFORD INTRODUCTORY SEMINARS

GEOPHYS 20Q. Predicting Volcanic Eruptions
(F,Dial) Stanford Introductory Seminar. Preference to sophomores. The physics and chemistry of volcanic processes and modern methods of volcano monitoring. Volcanoes as manifestations of the Earth's internal energy and hazards to society. How earth scientists better forecast eruptive activity by monitoring seismic activity, bulging of the ground surface, and the discharge of volcanic gases, and by studying deposits from past eruptions. Focus is on the interface between scientists and policy makers and the challenges of decision making with incomplete information. Field trip to Mt. St. Helens, site of the 1980 eruption.
3 units, Spr (Segall, P), alternate years, not given next year

GEOPHYS 60N. Man versus Nature: Coping with Disasters Using Space Technology
(F,Sem Same as EE 60N.) Stanford Introductory Seminar. Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data manipulation and analysis. GER:DB-EngrAppSci
4 units, Aut (Zebker, H)

GERMAN GENERAL STANFORD INTRODUCTORY SEMINARS

GERGEN 61Q. Culture and Conflict in Contemporary Europe
(S,Sem Same as COMPLIT 61Q.) Stanford Introductory Seminar. Preference to sophomores. Transformation of European culture and identity in the wake of the Cold War, European unification, and the post 9/11 environment. Pressures on transatlantic relationships; anti-Americanism; tensions around national cultural identity due to regional integration and globalization; immigration and the European experience of multiculturalism; and flashpoints of conflict concerning religion, secularization, and antisemitism.
3-5 units, Spr (Berman, R)

GERMAN LITERATURE STANFORD INTRODUCTORY SEMINARS

GERLIT 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings
(F,Sem Same as MUSIC 16N.) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom
3 units, Spr (Grey, T)

GRADUATE SCHOOL OF BUSINESS STANFORD INTRODUCTORY SEMINARS

GSBGEN 111Q. Seminar in Entrepreneurial Communication
(S,Sem) Stanford Introductory Seminar. College campuses have been the incubators for thousands of new business ventures. What makes the difference between a successful entrepreneur and an initial failure: often not the quality of the idea, but rather the ability of the entrepreneurs to successfully communicate their vision to potential investors, employees, and customers. Successful and failed entrepreneurial communication. Basics of persuasive oral and written communication.
3 units, Spr (Schramm, J)

HEALTH RESEARCH AND POLICY STANFORD INTRODUCTORY SEMINARS

HRP 89Q. Introduction to Crosscultural Issues in Medicine
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Focus is on culturally unique and non-English speaking populations and developing interpersonal and communication skills with diverse ethnic groups. GER:EC-AmerCul
3 units, Win (Corso, I)

HISTORY STANFORD INTRODUCTORY SEMINARS

HISTORY 12N. The Early Roman Emperors: HIstory, Biography, and Fiction
(F,Sem Same as CLASSHIS 37N.) Stanford Introductory Seminar. Preference to freshmen. The politics, drama, and characters of the period after the fall of the Roman Republic in 49 B.C.E. Issues of liberty and autocracy explored by Roman writers through history and biography. The nature of history writing, how expectations about literary genres shape the materials, the line between biography and fiction,and senatorial ideology of liberty. Readings include: Tacitus' Annals, Suetonius' Lives of the Caesers, and Robert Graves' I Claudius and episodes from the BBC series of the same title. GER:DB-Hum
3 units, Aut (Saller, R)

HISTORY 20Q. Russia in the Early Modern European Imagination
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult,

contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. Prerequisite: PWR 1. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Kollmann, N)

HISTORY 22N. Images and Practices of Violence in Early Modern Russian Art and Law

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Myths and realities about violence in 15th-17th century Russia. While Muscovy is often considered a brutal and violent state, political ideology stressed piety, judicial practice routinely mitigated sentences, and artistic imagery never depicted graphic violence. Theories of iconography, ritual, and imagery and their reception by beholders; judicial and political practice; political ideology; social behavior; and comparisons to early modern Europe in art, violence, and the law. GER:DB-Hum

5 units, Spr (Kollmann, N)

HISTORY 34N. The European Witch Hunts

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Witch trials, early modern demonology, and historians' interpretations. What was it about early modernity that fueled witch hunting? Forms of the supernatural in history, whether from the ordered world of organized religion, or frightening, uncontrolled, and dangerous. The idea of witchcraft; the fear that some people harm others supernaturally. Reformation era witch hunts conducted in a period of state building and scientific discovery and in violation of extant laws and procedures. GER:DB-Hum

4 units, Win (Stokes, L)

HISTORY 36N. Gay Autobiography

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender

4 units, Spr (Robinson, P)

HISTORY 38N. The Body

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cultural and social meanings of the body. How medicine, media, law, and culture construct changing ideals of the body. How to apply historical and feminist analyses to understand change and the difference that gender makes in the social and cultural construction of the body. Emphasis is on shifting historical ideals for female and male bodies, and the changing importance of body image in popular culture. Readings include girls' diaries, women's sports, masculinity in the media, sexual violence, and performing the body. GER:DB-Hum, EC-Gender

5 units, Spr (Freedman, E)

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Women's participation in science; women as objects of scientific research; gender in the culture of the sciences; and how gender analysis has changed science theory and practice. GER:DB-Hum, EC-Gender

4 units, Win (Schiebinger, L)

HISTORY 46N. Science and Magic

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Key episodes in the intertwined histories of natural science and magic from the early modern period, and questions these episodes raise regarding the nature of scientific knowledge, its public image, and the modern role of magic in society. GER:DB-Hum

5 units, Win (Riskin, J)

HISTORY 48Q. South Africa: Contested Transitions

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum

3 units, Win (Samoff, J)

HISTORY 52N. The Harlem Renaissance

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The literary and artistic movement of the Harlem Renaissance in the context of broader transformations in American and African American culture in the 20s. Novels, poetry, plays, and critical essays by writers such as Langston Hughes, Zora Neale Hurston, Nella Larsen, Claude McKay, Wallace Thurman, and Alain Locke. The work of contemporary musicians, dancers, and visual artists. GER:DB-Hum

5 units, Win (Campbell, J)

HISTORY 54N. African American Women's Lives

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum

4-5 units, Aut (Hobbs, A)

HISTORY 90Q. Buddhist Political and Social Theory

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Historical and textual roots, emphasizing Tibetan, Bhutanese, and Thai Buddhism. Society and polity in Buddhist thought, Buddhist spiritual, social, and political practice. The state, sovereignty, and the individual and society. Law. Buddhist economic theory, Gross National Happiness, and sustainable economy. The Buddhist critique of neoliberalism. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Mancall, M)

HISTORY 95N. Mapping the World: Cartography and the Modern Imagination

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Focus is on cutting-edge research. Topics: the challenge of grasping the globe as a whole; geography's roots in empire; maps as propaganda and as commodities; the cultural production of scale; and the cartography of imaginery worlds.Sources include resources in the Green Library Special Collections and in the Stanford Spatial History Lab. GER:DB-SocSci

5 units, Aut (Wigen, K)

HUMAN BIOLOGY STANFORD INTRODUCTORY SEMINARS

HUMBIO 84Q. Social Justice, Responsibility, Health

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

HUMBIO 86Q. Love as a Force for Social Change

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Win (Murray, A)

HUMBIO 87Q. Women and Aging

(S,Sem Same as MED 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER:DB-NatSci
3 units, Aut (Fernald, R)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine
(S,Sem Same as ORTHO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.
3 units, Aut (Matheson, G), Spr (Matheson, G)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.
3 units, Aut (Zaroff, L)

INTRODUCTION TO THE HUMANITIES STANFORD INTRODUCTORY SEMINARS

IHUM 58Q. Technology and Utopia: Refining the Vision
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Students read utopian literature more broadly than in IHUM 58 including texts such as Edward Bellamy's Looking Backward and texts that offer greater diversity of vision. The nature of utopia. Students develop their own imaginative visions of the ideal society. Prerequisite: IHUM 58.
3 units, Aut (Robinson, O; Roberts, E)

ITALIAN GENERAL STANFORD INTRODUCTORY SEMINARS

ITALGEN 41N. Imagining Italy
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Literary responses to Italy by writers in English during the past hundred years and how they continue to constuct myths of Italy. How these myths have been transformed into commodities in consumer culture, making Italy a profitable fiction. Authors include Hawthorne, Howells, James, Wharton, Forster, Unsworth, Hellenga, and Maves. GER:DB-Hum
3-4 units, Spr (Springer, C)

JAPANESE GENERAL STANFORD INTRODUCTORY SEMINARS

JAPANGEN 71N. Language and Gender in Japan: Myths and Reality
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Ideology and practice of gender in the Japanese society as reflected in and created by stylistic choices in the Japanese language. Past and present speech styles of women and men, speech situations, age, class, identities of the individual speakers and their relationships with others. How belief and reality are refracted through mass media and fictional representations. Comparisons with similar phenomena in other cultures. GER:DB-SocSci, EC-Gender
4 units, Spr (Matsumoto, Y)

LAW NONPROFRSSIONAL STANFORD INTRODUCTORY SEMINARS

LAWGEN 110Q. Criminal Justice and the Criminal Courts
(S,Sem) Stanford Introductory Seminar. Focus is on the structures and theories at play in the criminal court system, emphasizing court procedures, structures, constitutional guarantees, and the trial process. The roles of individual agents, including the police, prosecutors, defense attorneys, judges, probation officers, and corrections officials.
3 units, Spr (Dansky, K)

LINGUISTICS STANFORD INTRODUCTORY SEMINARS

LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat. GER:DB-SocSci
3 units, Aut (Sumner, M)

LINGUIST 62N. The Language of Food
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The relationship between food and language around the globe. The vocabulary of food and prepared dishes, and crosslinguistic similarities and differences, historical origins, forms and meanings, and relationship to cultural and social variables. The structure of cuisines viewed as meta-languages with their own vocabularies and grammatical structure. The language of menus; their historical development and crosslinguistic differences.
3 units, Aut (Jurafsky, D)

LINGUIST 63N. Translation
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages? GER:DB-SocSci
3 units, Aut (Kay, M)

MANAGEMENT SCIENCE AND ENGINEERING STANFORD INTRODUCTORY SEMINARS

MS&E 92Q. International Environmental Policy
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.
4 units, Win (Weyant, J)

MS&E 93Q. Nuclear Weapons, Terrorism, and Energy
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. What are nuclear weapons and what do they do? Why do some nations want them? What are the risks of nuclear terrorism? What is radioactivity? What role does nuclear power play? Can it help with global warming? Emphasis is on policy options in the light of changes in the world. Recommended: a course in international relations, engineering, or physical science. GER:DB-EngrAppSci, DB-EngrAppSci
3 units, Spr (Hecker, S)

MATERIALS SCIENCE AND ENGINEERING STANFORD INTRODUCTORY SEMINARS

MATSCI 70N. Building the Future: Invention and Innovation with Engineering Materials
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The technological importance of materials in human civilization is captured in historical names such as the Stone, Bronze, and Iron Ages. The present Information Age could rightly be called the

Silicon Age. The pivotal roles of materials in the development of new technologies. Quantitative problem sets, field trips, and formal presentations of small-group projects. GER:DB-EngrAppSci

5 units, Spr (Bravman, J)

MATSCI 81N. Bioengineering Materials to Heal the Body
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How scientists and engineers are designing new materials for surgeon to use in replacing body parts such as heart tissue or the spinal cord. How cells, in the body and transplanted stem cells, communicate with implanted materials. Real-world examples of materials developed for tissue engineering and regenerative medicine therapies. Students identify a clinically important disease or injury that requires a better material, research approaches to the problem, and debate possible engineering solutions. GER:DB-EngrAppSci

3 units, Win (Heilshorn, S)

MATSCI 159Q. Japanese Companies and Japanese Society
(S,Sem Same as ENGR 159Q.) Stanford Introductory Seminar. Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. GER:DB-SocSci

3 units, Spr (Sinclair, R)

MATHEMATICS STANFORD INTRODUCTORY SEMINARS

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

3 units, Win (Finn, R)

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

3 units, Spr (Wieczorek, W)

MATH 88Q. The Mathematics of the Rubik's Cube
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.

3 units, Win (Bump, D)

MECHANICAL ENGINEERING STANFORD INTRODUCTORY SEMINARS

ME 10N. Form and Function of Animal Skeletons
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology. Field trips to labs. GER:DB-EngrAppSci

3 units, Win (Carter, D)

ME 17N. Robotics Imitating Nature
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The dream of constructing robots that duplicate the functional abilities of humans and/or other animals has been promulgated primarily by science fiction writers. But biological systems provide models for the designers of robots. Building electromechanical devices that perform locomotory and sensing functions similar to those of an animal as a way of learning about how biological systems function. Walking and running machines, and the problem of giving a robot the capability to respond to its environment. GER:DB-EngrAppSci

3 units, Spr (Waldron, K)

ME 18Q. Teamology: Creative Teams and Individual Development
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

3 units, Aut (Wilde, D)

ME 21N. Renaissance Machine Design
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Technological innovations of the 1400s that accompanied the proliferation of monumental art and architecture by Brunelleschi, da Vinci, and others who designed machines and invented novel construction, fresco, and bronze-casting techniques. The social and political climate, from the perspective of a machine designer, that made possible and demanded engineering expertise from prominent artists. Hands-on projectsto provide a physical understanding of Renaissance-era engineering challenges and introduce the pleasure of creative engineering design. Technical background not required. GER:DB-EngrAppSci

3 units, Spr (Cutkosky, M)

ME 25N. Global Warming and Climate Change: Fact or Fiction
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Scientific arguments concerning debates between the view that anthropogenic activities are not causing global warming versus the view that these activities are responsible for a global warming that results in significant climate change. Consequences of increased demand for energy. Prerequisites: high school physics, chemistry, and biology.

3 units, Win (Bowman, C)

ME 26N. Think Like a Designer
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Techniques designers use to create innovative solutions across domains. Project-based. Emphasis is on approaches to problem identification and problem solving. Topics include need finding, structured brainstorming, synthesis, rapid prototyping, and visual communication. Field trips to a local design firm, a robotics lab, and a machining lab. The pleasures of creative design and hands-on development of tangible solutions.

3 units, Aut (Banerjee, S)

MEDICINE STANFORD INTRODUCTORY SEMINARS

MED 70Q. Cancer and the Immune System
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

3 units, Spr (Negrin, R)

MED 83Q. Ethical, Legal, and Social Dimensions of Stem Cell Research
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Ethical, legal, social, and economic dimensions of stem cell research such as the discovery of human embryonic stem cells and the international landscape of public policy. How stem cells work, their role in the upkeep of the human body, and current and future uses in medicine. Issues at the intersection of science and society such as human-animal hybrids, notions of justice in intellectual property law, distribution of health care, and the major ethical frameworks defining the debate.

3 units, Spr (Scott, C)

MED 86Q. Seeing the Heart
(F,Dial) Stanford Introductory Seminar. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a cost-effective

public screening program. Field trips to Stanford Medical Center imaging centers.

2 units, Win (McConnell, M)

MED 87Q. Women and Aging
(S,Sem Same as HUMBIO 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

MED 88Q. Dilemmas in Current Medical Practice
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Optional observation of instructors in their medical practices.

3 units, Aut (Croke, J; Jones, H)

MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.

3 units, Aut (Katzenstein, D)

MED 108Q. Human Rights and Health
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. Topics such as: the health status of refugees and internally displaced persons; child labor; trafficking in women and children; torture; poverty, the environment, and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. International conventions on human rights as background for social and political changes that could improve the health of groups and individuals. Optional opportunities to observe at sites where human rights and health are issues.

3 units, Win (Laws, A)

MOLECULAR AND CELLULAR PHYSIOLOGY STANFORD INTRODUCTORY SEMINARS

MCP 100Q. The Hippocampus as a Window to the Mind
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Electrical physiology of the brain using the hippocampus as a model system. The seminar builds from basic anatomical and electrical principles of brain structure and function, through the electrical properties of individual neurons and simple neuronal circuits, to the nature of behaviors that emerge from these more basic properties. Also discusses other brain regions where the hippocampal model provides insight into specific neuronal functions. Culminates in a discussion of neuronal disorders such as epilepsy, drug addiction, and obsessive-compulsive disorder that can be better understood on a basis of knowledge of the hippocampal model.

3 units, Win (Madison, V)

MUSIC STANFORD INTRODUCTORY SEMINARS

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

MUSIC 14N. Women Making Music
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Women's musical activities across times and cultures; how ideas about gender influence the creation, performance, and perception of music. GER:DB-Hum, EC-Gender

3 units, Aut (Hadlock, H)

MUSIC 16N. Music, Myth, and Modernity: Wagner's *Ring* Cycle and Tolkien's *Lord of the Rings*
(F,Sem Same as GERLIT 16N.) Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

3 units, Win (Berger, K)

MUSIC 17Q. Perspectives in North American Taiko
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Spr (Sano, S; Uyechi, L)

MUSIC 37N. Ki ho'alu: The New Renaissance of a Hawaiian Musical Tradition
(F,Sem) Stanford Introductory Seminar. Preference to freshman. Developed in the Hawaiian Islands during the 1830s, ki ho'alu, or Hawaiian slack key guitar, is an art form experiencing newfound popularity coinciding with the growth of political activism in Hawaiian culture. The musical, cultural, historical, and political perspectives of Hawaiian music and ki ho'alu, through hands-on experience, readings, discussion, and workshops. Hawaiian music and history and relationships among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

3 units, Aut (Sano, S)

MUSIC 38N. Singing Early Music
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. 15th- and 16th-century musical repertories and their contexts; performance practice. GER:DB-Hum

3 units, Spr (Rodin, J)

NEUROLOGY AND NEUROLOGICAL SCIENCES STANFORD INTRODUCTORY SEMINARS

NENS 67N. Intracellular Trafficking and Neurodegeneration
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cell structures and functions, the intracellular trafficking system that maintains exchanges of materials and information inside cells, and clinical features and pathologies of neurodegenerative diseases. Techniques for examining cellular and subcellular structures, especially cytoskeletons; functional insights generated from structural explorations. Prerequisite: high school biology.

3 units, Spr (Yang, Y)

NEUROSURGERY STANFORD INTRODUCTORY SEMINARS

NSUR 70Q. Experimental Stroke
(F,Dial) Stanford Introductory Seminar. Preference to sophomores. How stroke is studied in the laboratory; advances in stroke research

over the last two decades; and future directions. Topics include: cellular and molecular mechanisms of neuronal death and survival in the brain after stroke, including necrosis, apoptosis, inflammation, and cell signaling pathways; experimental tools for stroke treatment, such as gene therapy, cell therapy, hypothermia, preconditioning, postconditioning, and other pharmacological treatments; the gap and barrier between laboratory research and clinical translation.

2 units, Win (Zhao, H)

ORTHOPEDIC SURGERY STANFORD INTRODUCTORY SEMINARS

ORTHO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine

(S,Sem Same as HUMBIO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Aut (Matheson, G), Spr (Matheson, G)

PATHOLOGY STANFORD INTRODUCTORY SEMINARS

PATH 103Q. Lymphocyte Migration

(F,Dial) Stanford Introductory Seminar. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Known as lymphocyte migration, this process involves a complex series of adhesion, activation and diapedesis events. The cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The roles of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.

1 unit, Win (Michie, S)

PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.

3 units, Spr (Regula, D)

PEDIATRICS STANFORD INTRODUCTORY SEMINARS

PEDS 111Q. Issues of Race and Ethnicity in the Health of Children

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Medicine and pediatrics from a public-health, evidence-based perspective. How research methods unmask health issues for at-risk racial and ethnic groups of children. Determinants of health with regard to race and ethnicity and ideas for changes in public policy. Students identify an area of interest and proposed intervention.

3-4 units, Aut (Burgos, A)

PHILOSOPHY STANFORD INTRODUCTORY SEMINARS

PHIL 11N. Skepticism

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum

3 units, Win (De Pierris, G)

PHIL 13N. Freedom of the Will and Moral Responsibility

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary views on this central philosophical problem: in order to be morally responsible, do people have to have free will? If so, then would the premise that all events are causally determined make such freedom impossible?

3 units, Spr (Schapiro, T)

PHIL 14N. Belief

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Is there anything wrong with believing something without evidence? Is it possible? The nature and ethics of belief, and belief's relation to evidence and truth. How much control do believers have over their belief? GER:DB-Hum

3 units, Win (Lawlor, K)

PHIL 15N. Freedom, Community, and Morality

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER:DB-Hum, EC-EthicReas

3 units, Aut (Friedman, M)

PHIL 19N. Practical Reasoning

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Practical reasoning aims. Structure of practical reasoning. Practical reasoning as means to ends that are taken as given. Practical reasoning about ends. Practical reasoning concerned with some sort of maximization of some value. Relation between practical reasoning and desire. Relation between practical reasoning and planning. Relation between different views about practical reasoning and different views about morality. Structure of practical reasoning affected by perceptions of subtle features of different situations.

3 units, Win (Bratman, M)

PHIL 41Q. Truth

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Central issues animating current work in the philosophy of truth. What is truth? What is it about a statement or judgment that makes it true rather than false? Are there any propositions that are neither true nor false? Could truth be relative to individuals or communities? Do people have different notions of truth for different enterprises such as mathematics and ethics? Might truth be a matter of degree? Sources include the instructor's book manuscript and other contemporary writers.

3 units, Aut (Burgess, A)

PHYSICS STANFORD INTRODUCTORY SEMINARS

PHYSICS 11N. The Basic Rules of Nature

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The development by physicists of descriptions of the behavior of matter on microscopic scales and scales characteristic of the Universe as a whole, including quantum mechanics, particle physics, and general relativity. Promising approaches that physicists are using to shed light on remaining mysteries, including string theory and M theory. Discussions are semiquantitative. Prerequisite: high school physics or equivalent. GER:DB-NatSci

3 units, Win (Susskind, L)

PHYSICS 18N. Revolutions in Concepts of the Cosmos

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The evolution of the concept of the cosmos and its origin from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. Enrollment limited to 20 in one section. GER:DB-NatSci

3 units, Win (Roodman, A)

PHYSICS 41N. Mechanics: Insights, Applications, and Advances

(F,Sem) Stanford Introductory Seminar. Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41.

1 unit, Win (Abel, T)

PHYSICS 43N. Understanding Electromagnetic Phenomena
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.
1 unit, Spr (Laughlin, R)

PHYSICS 45N. Advanced Topics in Light and Heat
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or consent of instructor.
1 unit, Aut (Susskind, L)

PHYSICS 80N. The Technical Aspects of Photography
(F,Sem) Stanford Introductory Seminar. Preference to freshmen and sophomores with some background in photography. How cameras record photographic images on film and electronically. Technical photographic processes to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students take photographs around campus. Prerequisite: high school physics.
3 units, Spr (Osheroff, D)

PHYSICS 84Q. The Rise of the Machines
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Key experiments in the history of particle physics and astrophysics. Evolution and innovation in detector and accelerator technologies that enabled these experiments. The fundamental structure and interactions of matter. Recommended: some high school or introductory college physics.
3 units, Spr (Schindler, R)

PHYSICS 87N. The Physics of One: Nanoscale Science and Technology
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high school physics. GER:DB-NatSci
3 units, Win (Manoharan, H)

POLITICAL SCIENCE STANFORD INTRODUCTORY SEMINARS

POLISCI 12N. Democracy and Inequality in Latin America
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The relationship between inequality, attributable to factors such as education, assets, land tenure and family structure, and the spread of democracy. The role of colonial institutions founded on the extraction of mineral resources and plantation labor relations; the deficit in political institutions that often led to the exclusion of the poor; the lack of rule of law and enforcement of property rights; the slow expansion of educational systems; the links between enfranchisement and literacy requirements; and the role of military coups and the frequent interruption of democratic politics.
5 units, Spr (Diaz-Cayeros, A)

POLISCI 13N. 2008 Presidential Election
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Analytical framework for understanding the U.S. presidential election campaign. Focus is on historical election results, survey data, and experimental data. Concepts from political science, such as party identification and the spatial voting model, and statistics, such as sampling error and survey bias. GER:DB-SocSci
5 units, Aut (Jackman, S)

POLISCI 16N. Politics of Economic Development
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:DB-SocSci
5 units, Win (Tomz, M)

POLISCI 41Q. Building Democracy after Conflict: Iraq in Comparative Perspective
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Problems of post-conflict situations, the conditions for building democracy and how they relate to post-conflict situations, and historical experiences such as Germany and Japan. Iraq as a principal case study.
5 units, Win (Diamond, L)

POLISCI 43N. Oil, Regime Change, and Conflict
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Relationships among dependence on oil export, democratization and authoritarian rule, and rising conflict. Case studies including Venezuela, Nigeria, Iran, Iraq, Chad, and Indonesia. The resource curse: the impact of oil on a country's political economy. The relationship between such economic dependence and regime type. Why oil exporting countries are more prone to conflict and civil war than other countries. Research paper.
5 units, Aut (Karl, T)

PORTUGUESE LANGUAGE STANFORD INTRODUCTORY SEMINARS

PORTLANG 193Q. Spaces and Voices of Brazil through Film
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the history, culture, politics, society, and literature of Brazil through films and readings. How the Brazilian film industry reflects its ethnically mixed culture. Forces that have shaped the multicultural reality of modern Brazil and the images projected by the country. In English.
3-4 units, Aut (Wiedemann, L)

PSYCHIATRY STANFORD INTRODUCTORY SEMINARS

PSYC 76Q. Temperament and Creativity in Mood Disorders
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Western cultural notions of mad geniuses and artistic temperaments. How many individuals who suffer from depression, bipolar disorder, and related problems are nonetheless productively creative. Current psychological and neurobiological research, and assessment of mood, temperament, and creativity. Emphasis is on written and oral communications and multimedia presentations. Write 2. Prerequisite: PWR 1.
4 units, Win (Ketter, T)

PSYC 78Q. Mental Health in Collegiate Athletes
(S,Sem) Stanford Introductory Seminar. Developmental, social, and performance issues in collegiate sports. Topics include transition to Stanford, time management, coping with injuries.
3 units, Win (Steiner, H; McCurdy, M)

PSYC 81Q. Fate of Orphans and Vulnerable Children in Sub Saharan Africa: The HIV/AIDS Pandemic
(S,Sem) Stanford Introductory Seminar. The complicated forces,shaped by geopolitcal history and current events, that frame all social programs, the care of orphans in the context of the AIDS pandemic in particular; history of the care of orphans; developmental effects of deprivation of care and nurturing. Guest speakers.
3 units, Win (Solvason, H; Reicherter, D)

PSYC 111Q. Madness and the Womb: Medical and Artistic Approaches to Mental Illness in Women Through the Ages
(S,Sem) Stanford Introductory Seminar. Historical and current concepts of mental illness in women. Premenstrual dysphoric disorder (PMS), postpartum depression, menopausal mood disorders, and eating disorders. Historical biopsychosocial approach. Readings include women's diaries and advice books, physicians' casebooks, and 19th- and 20th-century medical texts. Guest speakers from art and literature departments. Literary and artistic images, and the social and cultural contexts of these disorders during the last 300 years.
3 units, Aut (Williams, K)

PSYCHOLOGY STANFORD INTRODUCTORY SEMINARS

PSYCH 7Q. Language Acquisition
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How do infants learn language so effortlessly? Why is it more difficult to learn a language as an adult? Theories of first and second language development and experimental techniques for reading children's minds.
3 units, Aut (Fernald, A)

PSYCH 8N. Life Span Development
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. People continue to change in systematic ways throughout life, but developmental psychology has focused mostly on childhood. Focus is on conceptual models that direct developmental research on adulthood and old age, and the empirical literature concerning developmental changes in cognition, motivation, and emotion. GER:DB-SocSci
3 units, Spr (Carstensen, L)

PSYCH 12N. Self Theories
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of people's belief in a growing versus fixed self on their motivation and performance in school, business, sports, and relationships. How such theories develop and can be changed. GER:DB-SocSci
3 units, Aut (Dweck, C)

PSYCH 16N. Amines and Affect
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How serotonin, dopamine, and norepinephrine influence people's emotional lives. GER:DB-SocSci
3 units, Spr (Knutson, B)

PSYCH 23N. Aping: Imitation, Control, and the Development of the Human Mind
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.
3 units, Spr (Ramscar, M)

PSYCH 25N. Psychology, Inequality, and the American Dream
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What role do psychological factors play in perpetrating inequality despite legal prohibitions? How can psychologically wise reforms promote equal opportunity? Topics include school achievement, prejudice and discrimination, social class, and race/ethnicity.
3 units, Aut (Walton, G)

RELIGIOUS STUDIES STANFORD INTRODUCTORY SEMINARS

RELIGST 2N. Theories of Ethics in Classical Islamic Thought
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Premodern Islamic theories of ethics. Homegrown ethical theories and adaptations of Greek thought. How various groups molded their ethical theories to fit their respective theological outlooks, including dialectic theologians, the Greek-inspired philosophers, and the mystics.
4 units, Spr (Sadeghi, B)

RELIGST 3N. Jesus the Jew and the Origins of Christianity
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Contemporary historical-critical methods in investigating how one might study Jewish and Christian texts of the 1st century CE. Social contexts including economic realities and elite ideological views. What can be known historically about 1st-century Judaism and Jesus' part it in it. How Jewish apocalyptic messianism shaped the birth of Christianity and its trajectory through the 1st century.
4 units, Aut (Sheehan, T)

RELIGST 7N. The Divine Good: Secular Ethics and Its Discontents
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. What is the good and how does it orient human choice and activity? Is it natural to human beings, or in some way transcendent? How do people come to know it? Why do people often fail to do the good they know? What human capacities and dispositions enable its enactment or attainment? What resources does religion offer for its reparation? Classical and modern readings in moral theory emphasizing the difference that religious aspiration makes for moral reflection. GER:DB-Hum, DB-Hum, EC-EthicReas
4 units, Win (Sockness, B)

RELIGST 9N. Transgression and Transcendence: Exploring Tantric Buddhism
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Vajrayana or Tantric Buddhism, its historical development and primary doctrines, ritual practices, and iconography. Focus is on their transgressive aspects, broader Indian background, and contemporary representations.
4 units, Aut (Harrison, P)

SCIENCE, TECHNOLOGY, AND SOCIETY STANFORD INTRODUCTORY SEMINARS

STS 101Q. Technology in Contemporary Society
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci
4 units, Aut (McGinn, R)

SLAVIC GENERAL STANFORD INTRODUCTORY SEMINARS

SLAVGEN 13N. Russia and the Russian Experience
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukranian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum
3-4 units, Aut (Fleishman, L)

SOCIOLOGY STANFORD INTRODUCTORY SEMINARS

SOC 15N. The Transformation of Socialist Societies
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of societal organization on the lives of ordinary people in socialist societies and in the new societies arising through the processes of political, economic, and social transformation. Do the concepts of democratization and marketization suffice to characterize ongoing changes? Enrollment limited to 16. GER:EC-GlobalCom
3 units, Win (Tuma, N)

SOC 32N. Law in Society
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work. Enrollment limited to 16. GER:DB-SocSci, EC-AmerCul
3 units, Aut (Sandefur, R)

SOC 45Q. Understanding Race and Ethnicity in American Society
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. A brief historical overview of race in America, race and violence, race and socioeconomic wellbeing, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci

3 units, Win (Rosenfeld, M)

SPANISH LITERATURE STANFORD INTRODUCTORY SEMINARS

SPANLIT 102N. Contemporary Latin American Theater
(F,Sem) Stanford Introductory Seminar. Representative playwrights and theater troupes of Spanish speaking Latin America and the Caribbean, emphasizing the 60s and 70s. Topics: representation and politics; theatrical language and poetics; avant gardes and performance; teatro comprometido; psychodrama; influence of Brecht, Artaud, and the Theater of the Absurd. Plays by Emilio Carballido, Sabina Berman, Virgilio Piñera, Jose Triana, René Marqués, Luis Rafael Sánchez, La Candelaria, Yuyachkani, Osvaldo Dragún, Griselda Gambaro, Eduardo Pavlovsky, Egon Wolff. GER:DB-Hum

3-4 units, Aut (Briceno, X)

SPANLIT 105N. Don Quixote
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Topics include: theories of language and the novel; history of early modern Iberia; Muslims in Europe. Close reading technique. Sources include filmed version. GER:DB-Hum

3-4 units, Aut (Barletta, V)

SPANLIT 106N. Contemporary Latin American Novel in Translation
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Representative Latin American novelists who attained international readership after the literary boom. Critical readings and theoretical debates. Topics include: latinoamericanidad, reactions to magical realism, crime and the city, politics of translation, economies of prestige, revisions of dictatorship, relations with contemporary art, representations of class and gender, globalization. Works by Piglia, Vallejo, Aira, Bellatin, Melo, and Bolaño. Film adaptations by Piñevro and Schroeder. GER:DB-Hum

3-4 units, Spr (Hoyos, H)

SPANLIT 109Q. Ten Latin American Protagonists who Changed the World
(S,Sem) Stanford Introductory Seminar. Preference to sohomores. Life stories and portraits of Eva Peron, Frida Kalho, Che Guevara, Michelle Bachelet, sub-comandante Marcos, Lula , Evo Morales, Hugo Chavez, Pele, and Victor Jara. The dynamics of Latin American culture. Sources include documentaries, film, video, news, readings, and archives. GER:DB-Hum

3-4 units, Win (Ruffinelli, J)

SPECIAL LANGUAGE PROGRAM STANFORD INTRODUCTORY SEMINARS

SPECLANG 198Q. Modern Greece in Film and Literature
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, DB-Hum, EC-GlobalCom

3-5 units, Aut (Prionas, E)

STATISTICS STANFORD INTRODUCTORY SEMINARS

STATS 46N. Experiments in Extrasensory Perception: A Critical Analysis
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Old and new reports of ESP experiments at Stanford and elsewhere. Principles of experimental design, randomization, experimental control and confounding, response modeling, and probabilistic calculation. Design and execution of student ESP experiments, literature reviews, probability calculations, critiques, and oral and written presentations.

3 units, Aut (Switzer, P)

STATS 47N. Breaking the Code?
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math

3 units, Aut (Holmes, S)

SURGERY STANFORD INTRODUCTORY SEMINARS

SURG 67Q. Health and Medicine in an International World
(S,Sem) Stanford Introductory Seminar. Preference to sophomores.Topics may include the history and international development of Interplast, a nonprofit organization providing free reconstructive surgery for needy children and adults in developing nations; health care at King Faisal Hospital, Saudi Arabia; medical conditions in S. India; eye care in Africa; medical teaching experiences in Dar es Salaam and Haiti; and rural health care in Latin America. The role such activities play in U.S. international relationships.

3 units, Win (Wang, N)

SURG 68Q. Current Concepts in Transplantation
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific literature, and research and present topics in contemporary transplantation.

3 units, Spr (Martinez, O; Krams, S)

SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society.

3-4 units, Win (Helms, J; Brugmann, S)

STATISTICS (STATS) COURSES

For information on undergraduate and graduate programs in the Department of Statistics, see the "Statistics" section of this bulletin.

UNDERGRADUATE COURSES IN STATISTICS

STATS 46N. Experiments in Extrasensory Perception: A Critical Analysis
Stanford Introductory Seminar. Preference to freshmen. Old and new reports of ESP experiments at Stanford and elsewhere. Principles of experimental design, randomization, experimental control and confounding, response modeling, and probabilistic calculation. Design and execution of student ESP experiments, literature reviews, probability calculations, critiques, and oral and written presentations.
3 units, Aut (Switzer, P)

STATS 47N. Breaking the Code?
Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math
3 units, Aut (Holmes, S)

STATS 50. Mathematics of Sports
(Same as MCS 100.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math
3 units, not given this year

STATS 60. Introduction to Statistical Methods: Precalculus
(Same as PSYCH 10, STATS 160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math
5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

STATS 110. Statistical Methods in Engineering and the Physical Sciences
Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math
4-5 units, Aut (Staff), Sum (Staff)

STATS 116. Theory of Probability
Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the laws of large numbers and central limit theorem. Prerequisites: MATH 52 and familiarity with infinite series, or equivalent. GER:DB-Math
3-5 units, Aut (Ross, K), Spr (Staff), Sum (Staff)

STATS 141. Biostatistics
(Same as BIO 141.) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. See http://www-stat.stanford.edu/~rag/stat141/. GER:DB-Math
4-5 units, Aut (Boik, J; Rogosa, D)

STATS 166. Computational Biology
(Same as BIOMEDIN 366, STATS 366.) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.
2-3 units, Spr (Wong, W)

STATS 191. Introduction to Applied Statistics
Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math
3-4 units, Win (Taylor, J)

STATS 199. Independent Study
For undergraduates.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN STATISTICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

STATS 160. Introduction to Statistical Methods: Precalculus
(Same as PSYCH 10, STATS 60.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages.
5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

STATS 200. Introduction to Statistical Inference
Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.
3 units, Win (Romano, J), Sum (Staff)

STATS 202. Data Mining and Analysis
Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.
3 units, Aut (Walther, G)

STATS 203. Introduction to Regression Models and Analysis of Variance
Modeling and interpretation of observational and experimental data using linear and nonlinear regression methods. Model building and selection methods. Multivariable analysis. Fixed and random effects models. Experimental design. Pre- or corequisite: 200.
3 units, Win (Zhang, N)

STATS 206. Applied Multivariate Analysis
Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.
3 units, Aut (Khalessi, S), Sum (Staff)

STATS 208. Introduction to the Bootstrap
The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling

methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.

3 units, Spr (Holmes, S)

STATS 209. Understanding Statistical Models and their Social Science Applications

(Same as EDUC 260X, HRP 239.) Statistical modeling in experimental and non-experimental settings, including misconceptions in social science applications such as causal models. Text is Statistical Models: Theory and Practice, by David Freedman. See http://www-stat.stanford.edu/~rag/stat209. Prerequisite: intermediate-level statistical methods including multiple regression, logistic regression, and log-linear models.

3 units, Win (Rogosa, D)

STATS 211. Topics in Quantitative Methods: Meta-Analysis

Meta-analysis as a quantitative method for combining the results of independent studies enabling researchers to evaluate available evidence. Examples of meta-analysis in medicine, education, and social and behavioral sciences. Statistical methods include nonparametric methods, contingency tables, regression and analysis of variance, and Bayesian methods. Project involving an existing published meta-analysis. Prerequisite: basic sequence in statistics.

1-3 units, Win (Olkin, I)

STATS 212. Applied Statistics with SAS

Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.

3 units, Sum (Staff)

STATS 214. Randomness in the Physical World

(Same as APPPHYS 214.) Topics include: random numbers, and their generation and application; disordered systems, quenching, and annealing; percolation and fractal structures; universality, the renormalization group, and limit theorems; path integrals, partition functions, and Wiener measure; random matrices; and optical estimation. Prerequisite: introductory course in statistical mechanics or analysis.

3 units, Spr (Diaconis, P; Fisher, D; Holmes, S), alternate years, not given next year

STATS 215. Statistical Models in Biology

Poisson and renewal processes, Markov chains in discrete and continuous time, branching processes, diffusion. Applications to models of nucleotide evolution, recombination, the Wright-Fisher process, coalescence, genetic mapping, sequence analysis. Theoretical material approximately the same as in STATS 217, but emphasis is on examples drawn from applications in biology, especially genetics. Prerequisite: 116 or equivalent.

3 units, Win (Zhang, N)

STATS 217. Introduction to Stochastic Processes

Discrete and continuous time Markov chains, point processes, random walks, branching processes, first passage times, recurrence and transience, stationary distributions. Prerequisite: STATS 116 or consent of instructor.

3 units, Win (Rajaratnam, B), Sum (Staff)

STATS 218. Introduction to Stochastic Processes

Renewal theory, Brownian motion, Gaussian processes, second order processes, martingales.

3 units, Spr (Staff), Sum (Staff)

STATS 219. Stochastic Processes

(Same as MATH 136.) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent.

3 units, Aut (Ross, K)

STATS 237. Time Series Modeling and Forecasting

Box-Jenkins and Bayesian approaches. State-space and change-point models. Application to revenue prediction, forecasting product demand, and other real world problems. Development and assessment of models and forecasts in practical applications. Hands-on experience with real data.

3 units, Sum (Staff)

STATS 239A. Workshop in Quantitative Finance

Topics of current interest.

1 unit, Aut (Lai, T)

STATS 239B. Workshop in Quantitative Finance

Topics of current interest. May be repeated for credit.

1 unit, Spr (Lai, T)

STATS 240. Statistical Methods in Finance

(SCPD students register for 240P.) Regression analysis and applications to pricing and investment models. Principal components and multivariate analysis. Parametric influence. Financial time series. Estimation and modeling of volatilities. Statistical methods for portfolio management. Hands-on experience with financial data.

3-4 units, Aut (Lai, T)

STATS 240P. Statistical Methods in Finance

For SCPD students; see 240.

3 units, Aut (Lai, T)

STATS 241. Statistical Modeling in Financial Markets

(SCPD students register for 241P.) Nonparametric regression and yield curve smoothing. Advanced time series modeling and forecasting. Market risk measures. Substantive and empirical modeling approaches in financial markets. Statistical trading strategies. Prerequisite: 240 or equivalent.

3-4 units, Spr (Lai, T)

STATS 241P. Statistical Modeling in Financial Markets

For SCPD students; see 241.

3 units, Spr (Lai, T)

STATS 243. Introduction to Mathematical Finance

Interest rate and discounted value. Financial derivatives, hedging, and risk management. Stochastic models of financial markets, introduction to Ito calculus and stochastic differential equations. Black-Scholes pricing of European options. Optimal stopping and American options. Prerequisites: MATH 53, STATS 116, or equivalents.

3-4 units, Sum (Staff)

STATS 250. Mathematical Finance

(Same as MATH 238.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

STATS 252. Data Mining and Electronic Business

The Internet and related technologies have caused the cost of communication and transactions to plummet, and consequently the amount of potentially relevant data to explode. The underlying principles, statistical issues, and algorithmic approaches to data mining and e-business, with real world examples.

3 units, Spr (Weigend, A)

STATS 253. Spatial Statistics

(Same as STATS 352.) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials. GER:DB-Math

3 units, Spr (Taylor, J)

STATS 254. Correspondence Analysis and Related Methods

Use of correspondence analysis (CA) method for dimension-reduction based on the singular-value decomposition, aimed at frequency data or raw multivariate categorical observations.

Comprehensive treatment of simple and multiple CA and related methods, using R packages and including 2- and 3-dimensional graphics.

3 units, Aut (Staff)

STATS 260A. Workshop in Biostatistics
(Same as HRP 260A.) Applications of statistical techniques to current problems in medical science.

1-2 units, Aut (Olshen, R)

STATS 260B. Workshop in Biostatistics
(Same as HRP 260B.) Applications of statistical techniques to current problems in medical science.

1-2 units, Win (Olshen, R)

STATS 260C. Workshop in Biostatistics
(Same as HRP 260C.) Applications of statistical techniques to current problems in medical science.

1-2 units, Spr (Olshen, R)

STATS 261. Intermediate Biostatistics: Analysis of Discrete Data
(Same as BIOMEDIN 233, HRP 261.) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis
(Same as HRP 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Sainani, K)

STATS 270. A Course in Bayesian Statistics
(Same as STATS 370.) Bayesian statistics including theory, applications, and computational tools. Topics: history of Bayesian methods, foundational problems (what is probability), subjective probability and coherence, exchangeability and deFinetti's theorem. Conjugate priors, Laplace approximations, Gibbs sampling, hierarchical and empirical Bayes, nonparametric methods, Dirichlet and Polya tree priors. Bayes robustness, asymptotic properties of Bayes procedures.

3 units, Win (Wong, W)

STATS 290. Paradigms for Computing with Data
For Statistics graduate students and others whose research involves data analysis and development of associated computational software. Programming and computing techniques to support projects in data analysis and related research. Prerequisites: CS 106, and STATS 110 or 141, or equivalent background.

3 units, Win (Narasimhan, B; Chambers, J)

STATS 297. Practical Training
For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit once. Prerequisite: consent of adviser.

1-3 units, Aut (Lai, T), Win (Lai, T), Spr (Lai, T), Sum (Lai, T)

STATS 298. Industrial Research for Statisticians
Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program, prior to candidacy.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

STATS 299. Independent Study
For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

STATS 300. Advanced Topics in Statistics
May be repeated for credit.

3 units, Sum (Staff)

STATS 300A. Theory of Statistics
Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Aut (Walther, G)

STATS 300B. Theory of Statistics
Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Win (Siegmund, D)

STATS 300C. Theory of Statistics
Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Spr (Siegmund, D)

STATS 305. Introduction to Statistical Modeling
The linear model: simple linear regression, polynomial regression, multiple regression, anova models; and with some extensions, orthogonal series regression, wavelets, radial basis functions, and MARS. Topics: normal theory inference (tests, confidence intervals, power), related distributions (t, chi-square, F), numerical methods (QR, SVD), model selection/regularization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies including bootstrap inference, and cross-validation. Emphasis is on problem sets involving substantial computations with data sets, including developing extensions of existing methods. Prerequisites: consent of instructor, 116, 200, applied statistics course, CS 106A, MATH 114.

2-4 units, Aut (Owen, A)

STATS 306A. Methods for Applied Statistics
Extension of modeling techniques of 305: binary and discrete response data and nonlinear least squares. Topics include regression, Poisson loglinear models, classification methods, clustering. May be repeated for credit. Prerequisite: 305 or equivalent.

2-4 units, Win (Efron, B)

STATS 306B. Methods for Applied Statistics
Unsupervised learning techniques in statistics, machine learning, and data mining.

2-4 units, Spr (Hastie, T)

STATS 310A. Theory of Probability
(Same as MATH 230A.) Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers.

Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.

2-4 units, Aut (Diaconis, P)

STATS 310B. Theory of Probability
(Same as MATH 230B.) Stopping times, 0-1 laws, Kolmogorov consistency theorem. Uniform integrability. Radon-Nikodym theorem, branching processes, conditional expectation, discrete time martingales. Exchangeability. Large deviations. Laws of the iterated logarithm. Birkhoff's and Kingman's ergodic theorems. Recurrence, entropy. Prerequisite: 310A or MATH 230A.

2-4 units, Win (Dembo, A)

STATS 310C. Theory of Probability
(Same as MATH 230C.) Infinitely divisible laws. Continuous time martingales, random walks and Brownian motion. Invariance principle. Markov and strong Markov property. Processes with stationary independent increments. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

STATS 314. Advanced Statistical Methods
Topic this year is multiple hypothesis testing. The demand for new methodology for the simultaneous testing of many hypotheses as driven by modern applications in genomics, imaging, astronomy, and finance. High dimensionality: how tests of many hypotheses may be considered simultaneously. Classical techniques, and recent developments. Stepwise methods, generalized error rates such as the false discovery rate, and the role of resampling. May be repeated for credit.

2-3 units, not given this year

STATS 315A. Modern Applied Statistics: Learning
Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisite: 315A,B, 305, 306A,B, or consent of instructor.

2-3 units, Aut (Tibshirani, R)

STATS 315B. Modern Applied Statistics: Data Mining
Three-part sequence. New techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a predictive goal, viewed from a statistical perspective as computer automated exploratory analysis of large complex data sets.

2-3 units, Win (Friedman, J)

STATS 315C. Modern Applied Statistics: Transposable data
Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisite: 315A,B, 305/306A,B, or consent of instructor.

2-3 units, Spr (Owen, A)

STATS 316. Stochastic Processes on Graphs
Local weak convergence, Gibbs measures on trees, cavity method, and replica symmetry breaking. Examples include random k-satisfiability, the assignment problem, spin glasses, and neural networks. Prerequisite: 310A or equivalent.

1-3 units, not given this year

STATS 317. Stochastic Processes
Semimartingales, stochastic integration, Ito's formula, Girsanov's theorem. Gaussian and related processes. Stationary/isotropic processes. Integral geometry and geometric probability. Maxima of random fields and applications to spatial statistics and imaging.

2-3 units, Spr (Siegmund, D)

STATS 318. Modern Markov Chains
Tools for understanding Markov chains as they arise in applications. Random walk on graphs, reversible Markov chains, Metropolis algorithm, Gibbs sampler, hybrid Monte Carlo, auxiliary variables, hit and run, Swedson-Wong algorithms, geometric theory, Poincare-Nash-Cheger-Log-Sobolov inequalities. Comparison techniques, coupling, stationary times, Harris recurrence, central limit theorems, and large deviations.

2-3 units, not given this year

STATS 319. Literature of Statistics
Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.

1-3 units, Aut (Taylor, J), Win (Montanari, A)

STATS 322. Function Estimation in White Noise
Gaussian white noise model sequence space form. Hyperrectangles, quadratic convexity, and Pinsker's theorem. Minimax estimation on Lp balls and Besov spaces. Role of wavelets and unconditional bases. Linear and threshold estimators. Oracle inequalities. Optimal recovery and universal thresholding. Stein's unbiased risk estimator and threshold choice. Complexity penalized model selection. Connecting fast wavelet algorithms and theory. Beyond orthogonal bases.

2-3 units, Spr (Johnstone, I)

STATS 324. Multivariate Analysis
Classic multivariate statistics: properties of the multivariate normal distribution, determinants, volumes, projections, matrix square roots, the singular value decomposition; Wishart distributions, Hotelling's T-square; principal components, canonical correlations, Fisher's discriminant, the Cauchy projection formula.

2-3 units, not given this year

STATS 345. Computational Algorithms for Statistical Genetics
(Same as GENE 245.) Computational algorithms for human genetics research. Topics include: permutation, bootstrap, expectation maximization, hidden Markov model, and Markov chain Monte Carlo. Rationales and techniques illustrated with existing implementations commonly used in population genetics research, disease association studies, and genomics analysis. Prerequisite: GENE 244 or consent of instructor.

2-3 units, Spr (Tang, H; Zhang, N)

STATS 351A. An Introduction to Random Matrix Theory
(Same as MATH 231A.) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinental point processes.

3 units, Aut (Diaconis, P)

STATS 352. Spatial Statistics
(Same as STATS 253.) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials.

3 units, Spr (Taylor, J)

STATS 362. Monte Carlo Sampling
Fundamentals of Monte Carlo methods. Generating uniform and nonuniform variables, random vectors and processes. Monte Carlo integration and variance reduction. Quasi-Monte Carlo sampling. Markov chain Monte Carlo, including Gibbs sampling and Metropolis-Hastings. Examples, problems and motivations from Bayesian statistics, computational finance, computer graphics, physics.

2-3 units, Aut (Owen, A)

STATS 366. Computational Biology
(Same as BIOMEDIN 366, STATS 166.) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as

combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.

2-3 units, Spr (Wong, W)

STATS 370. A Course in Bayesian Statistics
(Same as STATS 270.) Bayesian statistics including theory, applications, and computational tools. Topics: history of Bayesian methods, foundational problems (what is probability), subjective probability and coherence, exchangeability and deFinetti's theorem. Conjugate priors, Laplace approximations, Gibbs sampling, hierarchical and empirical Bayes, nonparametric methods, Dirichlet and Polya tree priors. Bayes robustness, asymptotic properties of Bayes procedures.

3 units, Win (Wong, W)

STATS 375. Inference in Graphical Models
Graphical models as a unifying framework for describing the statistical relationships between large sets of variables; computing the marginal distribution of one or a few such variables. Focus is on sparse graphical structures, low-complexity algorithms, and their analysis. Topics include: variational inference; message passing algorithms; belief propagation; generalized belief propagation; survey propagation. Analysis techniques: correlation decay; distributional recursions. Applications from engineering, computer science, and statistics. Prerequisite: EE 278, STATS 116, or CS 228. Recommended: EE 376A or STATS 217.

3 units, Win (Montanari, A)

STATS 390. Consulting Workshop
Skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department's drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.

1-3 units, Aut (Olshen, R), Win (Tibshirani, R), Spr (Owen, A), Sum (Staff)

STATS 398. Industrial Research for Statisticians
Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. May be repeated for credit. Prerequisite: Statistics Ph.D. candidate.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

STATS 399. Research
Research work as distinguished from independent study of nonresearch character listed in 199. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

STRUCTURAL BIOLOGY (SBIO) COURSES

For information on graduate programs in Structural Biology, see the "Structural Biology" section of this bulletin. Course and laboratory instruction in the Department of Structural Biology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

UNDERGRADUATE COURSES IN STRUCTURAL BIOLOGY

SBIO 199. Undergraduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN STRUCTURAL BIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SBIO 228. Computational Structural Biology
(Same as BIOPHYS 228.) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.

3 units, Aut (Levitt, M), Spr (Levitt, M)

SBIO 229. The Eukaryote Chromosome
The principles of chromosome structure and function including the structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and basis of chromosome maintenance and sorting in mitosis; mechanism of gene activation with particular regard to enhancer, promoter, and terminator sequences; basis of sequence-specific protein-DNA interaction; and organization and assembly of the cell nucleus. Prerequisite: knowledge of basic biochemistry and cell biology.

3 units, not given this year

SBIO 241. Biological Macromolecules
(Same as BIOC 241, BIOPHYS 241.) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.

3-5 units, Aut (Herschlag, D; Puglisi, J; Garcia, K; Ferrell, J; Block, S; Weis, W)

SBIO 242. Methods in Molecular Biophysics
(Same as BIOPHYS 242.) Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction, nuclear magnetic resonance, and fluorescence spectcroscopy. Prerequisite: physical chemistry or consent of instructor.

3 units, Win (Weis, W; Puglisi, J), alternate years, not given next year

SBIO 274. Topics in Nucleic Acid Structure and Function
Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.

2 units, not given this year

SBIO 299. Directed Reading in Structural Biology
Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SBIO 399. Graduate Research
Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

STRUCTURED LIBERAL EDUCATION (SLE) COURSES

For information on undergraduate and graduate programs in Structured Liberal Education, see the "Structured Liberal Education" section of this bulletin.

UNDERGRADUATE COURSES IN STRUCTURED LIBERAL EDUCATION

SLE 91. Structured Liberal Education
Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The cultural foundations of western civilization in ancient Greece, Rome, and the Middle East, with attention to Buddhist and Hindu counterparts and the questions these traditions address in common. Texts and authors include Homer, Plato, Aristotle, Greek tragedy, Sappho, the Hebrew Bible, the New Testament, Saint Augustine, and texts from Hindu and Buddhist traditions. GER:DB-Hum, IHUM-1
9 units, Aut (Mancall, M; Greene, R)

SLE 92. Structured Liberal Education
Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The foundations of the modern world, from late antiquity through the Middle Ages, the Renaissance, the Enlightenment, and the Scientific Revolution. Authors include Dante, Descartes, Shakespeare, and texts from Chinese and Islamic traditions. GER:DB-Hum, IHUM-2
9 units, Win (Greene, R; Greenberg, S)

SLE 93. Structured Liberal Education
Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. Modernity as a period in intellectual history and a problem in the human sciences. Authors include Marx, Nietzsche, Freud, Kafka, Woolf, Eliot, and Sartre. GER:DB-Hum, IHUM-3
10 units, Spr (Greene, R)

SLE 199. Teaching SLE
1-3 units, Aut (Mancall, M; Greenberg, S), Win (Mancall, M; Greenberg, S), Spr (Greenberg, S; Greene, R)

SURGERY (SURG) COURSES

The following courses are available to undergraduates or graduate students. For additional graduate and Medical School offerings, see http://medcatalog.stanford.edu.

UNDERGRADUATE COURSES IN SURGERY

SURG 67Q. Health and Medicine in an International World
Stanford Introductory Seminar. Preference to sophomores.Topics may include the history and international development of Interplast, a nonprofit organization providing free reconstructive surgery for needy children and adults in developing nations; health care at King Faisal Hospital, Saudi Arabia; medical conditions in S. India; eye care in Africa; medical teaching experiences in Dar es Salaam and Haiti; and rural health care in Latin America. The role such activities play in U.S. international relationships.
3 units, Win (Wang, N)

SURG 68Q. Current Concepts in Transplantation
Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific literature, and research and present topics in contemporary transplantation.
3 units, Spr (Martinez, O; Krams, S)

SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face
Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society.
3-4 units, Win (Helms, J; Brugmann, S)

SURG 101. Regional Study of Human Structure
Preference to seniors. Lectures in regional anatomy and dissection of the human cadaver; the anatomy of the trunk and limbs through the dissection process, excluding the head and neck.
5 units, Win (Gosling, J; Whitmore, I)

SURG 102. International Health Opportunities
(Same as SURG 202.) The value of international medical humanitarianism. Topics include: rehabilitation efforts of leprosy cases in South India, orthopedic work in Afghanistan, charity initiatives in Vietnam, mobile surgical missions in Ecuador, construction of specialized hospitals in Nepal and Nigeria, history and development of humanitarian foundations such as Interplast, and service-based community projects in Mexico.
3-4 units, Aut (Laub, D; Dunlap, J; Chase, R)

SURG 111A. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 211A. Graduate students register for 211A.) Basics of life support outside the hospital setting; readiness training for emergencies on- or off-campus. Topics include emergency patient assessments, and cardiac, respiratory, and neurological emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR certification; application (see http://surg211.stanford.edu), and consent of instructor.
3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 111B. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 211B. Graduate students register for 211B.) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111A/211A and consent of instructor.
3 units, Win (Gilbert, G; Espinoza, N; D'Souza, P)

SURG 111C. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 211C. Graduate students register for 211C.) Continuation of 111B/211B. Special topics in EMS; topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisite: 111B/211B, CPR-PR certification, and consent of instructor.
3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 112A. Advanced Reading and Teaching for the EMT-1
(Same as SURG 212A.) Advanced Topics in EMS and training in teaching BLS skills (Graduate students register for 212A.) Topics include advanced airway and stroke management, abdominal emergencies, and prehospital pharmacology. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor.
2-3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 112B. Advanced Reading and Teaching for the EMT-1
(Same as SURG 212B. Graduate students register for 212B.) Topics include advanced assessment and treatment of the undifferentiated trauma patient (including advanced airway management, monitoring,

and evaluation) and prehospital care in nontraditional locations. Prerequisites: SURG 111/211A-C or equivalent EMT-Basic certification, CPR for the Professional Rescuer certification, and consent of instructor.

2-3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 112C. Advanced Reading and Teaching for the EMT-1
(Same as SURG 212C. Graduate students register for 212C.) Topics include advanced assessment and treatment of patients in difficult and advanced situations: mass casualty incidents, assaults, pediatrics; and advanced emergency skills, ultrasound, suturing. Prerequisites: SURG 111/211A-C or equivalent EMT-Basic certification, CPR for the Professional Rescuer certification, and consent of instructor.

2-3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 199. Undergraduate Research
Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN SURGERY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SURG 202. International Health Opportunities
(Same as SURG 102.) The value of international medical humanitarianism. Topics include: rehabilitation efforts of leprosy cases in South India, orthopedic work in Afghanistan, charity initiatives in Vietnam, mobile surgical missions in Ecuador, construction of specialized hospitals in Nepal and Nigeria, history and development of humanitarian foundations such as Interplast, and service-based community projects in Mexico.

3-4 units, Aut (Laub, D; Dunlap, J; Chase, R)

SURG 211A. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 111A. Graduate students register for 211A.) Basics of life support outside the hospital setting; readiness training for emergencies on- or off-campus. Topics include emergency patient assessments, and cardiac, respiratory, and neurological emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR certification; application (see http://surg211.stanford.edu), and consent of instructor.

3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 211B. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 111B. Graduate students register for 211B.) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111A/211A and consent of instructor.

3 units, Win (Gilbert, G; Espinoza, N; D'Souza, P)

SURG 211C. Emergency Medical Technician (EMT-1): Training and Application
(Same as SURG 111C. Graduate students register for 211C.) Continuation of 111B/211B. Special topics in EMS; topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisite: 111B/211B, CPR-PR certification, and consent of instructor.

3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 212A. Advanced Reading and Teaching for the EMT-1
(Same as SURG 112A.) Advanced Topics in EMS and training in teaching BLS skills (Graduate students register for 212A.) Topics include advanced airway and stroke management, abdominal emergencies, and prehospital pharmacology. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor.

2-3 units, Aut (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 212B. Advanced Reading and Teaching for the EMT-1
(Same as SURG 112B.) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212B.) Topics include advanced assessment and treatment of the undifferentiated trauma patient (including advanced airway management, monitoring, and evaluation) and prehospital care in nontraditional locations. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor.

2-3 units, Win (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 212C. Advanced Reading and Teaching for the EMT-1
(Same as SURG 112C.) Advanced Topics in EMS and training in teaching BLS skills. (Graduate students register for 212C.) Topics include advanced assessment and treatment of patients in difficult and advanced situations - mass casualty incidents, assaults, pediatrics; and advanced emergency skills - ultrasound, suturing. Prerequisites: SURG 111/211 A-C (or equivalent EMT-Basic certification), CPR for the Professional Rescuer certification, and consent of instructor.

2-3 units, Spr (Gilbert, G; D'Souza, P; Espinoza, N)

SURG 223. Wilderness Medicine
Wilderness-related illnesses and injuries; framework for dealing with emergencies in the backcountry. Hands-on workshops. Topics include high altitude medicine, diving medicine, hypothermia, snake and spider envenomations, search and rescue, and travel medicine. Open to all students.

2 units, Spr (Weiss, E)

SURG 230. Obesity in America
Prevalence and effects of the obesity epidemic in America and the growing prevalence of associated comorbidities such as diabetes, hypertension, hyperlipidemia, sleep apnea, and joint problems. Risk factors, multi-disciplinary treatment options, the role of food in society, patients' perspectives, and current research in the field. Includes fieldtrips to grocery stores and restaurants.

1 unit, Win (Morton, J; Woodard, G)

SURG 267. International Health
Topics include: colonialism and development, reproductive health, women's health issues, environmental health, maternal child health, primary health care and its evolution, health policy, infectious disease, human rights and social justice. Guest speakers from UCSF and Berkeley School of Public Health.

1 unit, not given this year

SYMBOLIC SYSTEMS (SYMBSYS) COURSES

For information on undergraduate and graduate programs in Symbolic Systems, see the " Symbolic Systems" section of this bulletin.

UNDERGRADUATE COURSES IN SYMBOLIC SYSTEMS

SYMBSYS 10. Symbolic Systems Forum
A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.

1 unit, Aut (Davies, T), Win (Davies, T), Spr (Davies, T)

SYMBSYS 50. Introduction to Cognitive Neuroscience
(Same as PSYCH 50.) Topics in human neuropsychology. The functional organization of the human nervous system and of brain imaging techniques (MRI, PET). Hemispheric specialization and the brain basis of perception, memory, language, emotion, spatial cognition, and problem solving. Neuropsychological deficits in neurological disorders and their implications in understanding normal function. Recommended: 1 GER:DB-NatSci

4 units, Win (McClure, S)

SYMBSYS 91. Junior Honors Seminar
Recommended for juniors doing an honors project during the following year. Defining a topic, choosing an adviser, considering overall goals. Resources at Stanford and some experiences of seniors discussed with guest speakers.

2 units, Win (Davies, T)

SYMBSYS 100. Introduction to Cognitive and Information Sciences
(Same as LINGUIST 144, PHIL 190, PSYCH 132.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Wasow, T; Roberts, E)

SYMBSYS 145. Cognition in Interaction Design
Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system. GER:DB-SocSci
3 units, Win (Shrager, J)

SYMBSYS 170. Decision Behavior: Theory and Evidence
(Same as SYMBSYS 270.) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.
3-4 units, not given this year

SYMBSYS 190. Senior Honors Tutorial
Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SYMBSYS 191. Senior Honors Seminar
Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students discuss, and present their honors project.
2 units, Aut (Davies, T)

SYMBSYS 196. Independent Study
Independent work under the supervision of a faculty member. Can be repeated for credit.
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

GRADUATE COURSES IN SYMBOLIC SYSTEMS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

SYMBSYS 201. ICT, Society, and Democracy
The impact of information and communication technologies on social and political life. Interdisciplinary. Classic and contemporary readings focusing on topics such as social networks, virtual versus face-to-face communication, the public sphere, voting technology, and collaborative production.
3 units, Spr (Davies, T)

SYMBSYS 206. Topics in the Philosophy of Neuroscience
Does understanding the brain or computational models of the brain allow understanding of the mind? Recent literature on neurophilosophical and neuroskeptical approaches to the mind including perception, neurophenomenology, sensorimotor accounts, computational models, and eliminativism. Prerequisites: PHIL 80, and familiarity with philosophy or neuroscience, or consent of instructor. May be repeated for credit.
3 units, Aut (Skokowski, P)

SYMBSYS 209. Battles Over Bits
The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks, contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMBSYS 202.
3 units, not given this year

SYMBSYS 270. Decision Behavior: Theory and Evidence
(Same as SYMBSYS 170.) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.
3-4 units, not given this year

SYMBSYS 290. Master's Degree Project
1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

SYMBSYS 291. Master's Program Seminar
Enrollment limited to students in the Symbolic Systems M.S. degree program. May be repeated for credit.
1 unit, Aut (Davies, T), Win (Davies, T), Spr (Davies, T)

TIBETAN LANGUAGE (TIBETLNG) COURSES

Because the Tibetan Language Program does not have a formal placement test, students registering for the first time must see the coordinator for proper placement if they have had any prior training in Tibetan. Completion of TIBETLNG 3 fulfills the University Foreign Language Requirement. Consult the Language Center or http://language.stanford.edu/ for information. Language courses may not be repeated for credit and must be taken in sequence.

UNDERGRADUATE COURSES IN TIBETAN LANGUAGE

TIBETLNG 1. First-Year Tibetan, First Quarter
Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.
5 units, Aut (Clark, R)

TIBETLNG 2. First Year Tibetan, Second Quarter
Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.
5 units, Win (Clark, R)

TIBETLNG 3. First Year Tibetan, Third Quarter
Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.
5 units, Spr (Clark, R)

TIBETLNG 199. Individual Work
May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

GRADUATE COURSES IN TIBETAN LANGUAGE

For graduate students only.

TIBETLNG 395. Graduate Studies in Tibetan
May be repeated for credit. Prerequisite: consent of instructor.
2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

URBAN STUDIES (URBANST) COURSES

For information on undergraduate programs in Urban Studies, see the "Urban Studies" section of this bulletin.

UNDERGRADUATE COURSES IN URBAN STUDIES

URBANST 110. Introduction to Urban Studies
The study of cities and urban civilization. History of urbanization and current issues such as suburbanization, racial discrimination, globalization, terrorism, and the environment. Public policies designed to address these issues. GER:DB-SocSci, EC-AmerCul
4 units, Aut (Stout, F), Win (Stout, F)

URBANST 111. Urban Politics
(Same as POLISCI 121, SOC 149X, SOC 249X.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

5 units, not given this year

URBANST 112. The Urban Underclass
(Same as SOC 149, SOC 249. Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rosenfeld, M)

URBANST 113. Introduction to Urban Design: Contemporary Urban Design in Theory and Practice
Comparative studies in N. America and abroad of neighborhood conservation, central city regeneration, and growth policies for metropolitan regions. Case studies, team projects, and class workshops in San Francisco. GER:DB-SocSci

5 units, Win (Gast, G)

URBANST 114. Cities in Comparative Perspective
(Same as ANTHRO 126.) Core course for Urban Studies majors. The city as interdisciplinary object. Discourses about cities such as the projects, practices, plans, representations, and sensibilities that combine to create what people know about urban spaces. Local, national, and transnational spatial scales. Conversations across regional boundaries; geographies of difference. Case studies. GER:DB-SocSci

5 units, Aut (Inoue, M)

URBANST 115. Urban Sustainabilty: Long-Term Archaeological Perspectives
(Same as CLASSGEN 123, CLASSGEN 223.) Comparative and archaeological view of urban design and sustainability. How fast changing cities challenge human relationships with nature. Innovation and change, growth, industrial development, the consumption of goods and materials. Five millennia of city life including Near Eastern city states, Graeco-Roman antiquity, the Indus Valley, and the Americas.

3-5 units, Spr (Shanks, M)

URBANST 123. Approaching Research and the Community
How experience with community organizations provides a starting point for developing community-based senior theses or independent research projects. Principles and practice of doing community-based research as a collaborative enterprise between academic researchers and community members; how academic scholarship can be made useful to community organizations. Guest speakers from community organizations, faculty, and alumni of the Public Service Scholars Program.

2 units, Aut (Cotterman, K)

URBANST 126. Spirituality and Nonviolent Urban and Social Transformation
A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and WIlliam Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. GER:DB-Hum

5 units, not given this year

URBANST 131. Social Innovation and the Social Entrepreneur
Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.

1 unit, Aut (Edwards, M)

URBANST 132. Concepts and Analytic Skills for the Social Sector
Analytical methods, marketing, language, organizational mission, strategy, and finance in the for-profit and nonprofit social sectors. Focus is on the integration of theory and application. Opportunities and limits of methods from the profit sector to meet social goals. Enrollment limited to 20. GER:DB-SocSci

4 units, Win (Kieschnick, M)

URBANST 133. Social Entrepreneurship Collaboratory
Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team's research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisites: 131 and 132, or consent of instructor.

4 units, Aut (Edwards, M), Spr (Scher, L)

URBANST 161. U.S. Urban History since 1920
The end of European immigration and its impact on cities; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. Final project is history of a San Francisco neighborhood, based on primary sources and site visit. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

URBANST 162. Managing Local Governments
In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci

3-4 units, Win (Boesch, D)

URBANST 163. Land Use Control
Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci

4 units, Spr (Hall, R)

URBANST 164. Utopia and Reality in Modern Urban Planning
(Same as ARTHIST 254.) Primarily for Urban Studies and Art majors. Utopian urbanist thinkers such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:DB-Hum

5 units, not given this year

URBANST 165. Sustainable Urban and Regional Transportation Planning
Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER:DB-SocSci

4-5 units, not given this year

URBANST 171. Urban Design Studio
The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.
5 units, not given this year

URBANST 173. Urban Economics
(Same as PUBLPOL 176.) Application of the principles of economic analysis to urban issues and policy, including urban land use, housing, transportation, economic development, and the financing of public services. Fundamentals of microeconomic theory.
4-5 units, Aut (Reilly, M)

URBANST 190. Urban Professions Seminar
Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work.
1 unit, Spr (Kahan, M)

URBANST 194. Internship in Urban Studies
For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and readings.
2-4 units, Aut (Staff), Win (Staff), Spr (Staff)

URBANST 195. Special Projects in Urban Studies
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

URBANST 197. Directed Reading
1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

URBANST 198. Senior Research in Public Service
Limited to seniors approved by their departments for honors thesis, and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public and community service? How can communities benefit from research? Theory and practice of research as a form of public service. Readings in research theory and methods of participatory action research; presentations on research as service; workshops on each participant's thesis work-in-progress; public presentation of completed research; thesis evaluation by a community-based reader. May be repeated for credit. Corequisite: 199.
1-3 units, Aut (Schmidt-Posner, J), Win (Schmidt-Posner, J), Spr (Schmidt-Posner, J)

URBANST 199. Senior Honors Thesis
1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

URBANST 201. Preparation for Senior Project
(Same as SOC 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A.
5 units, Win (Kahan, M)

URBANST 201A. Capstone Internship in Urban Studies
Restricted to Urban Studies majors. Students work at least 80 hours with a supervisor, establish learning goals, and create products demonstrating progress. Reflection on service and integration of internship with senior research plans. Must be completed by start of Winter Quarter senior year. May continue for additional quarter as 194. Corequisite: 201 or consent of instructor.
3 units, Aut (Staff), Spr (Staff)

URBANST 202. Preparation for Honors Thesis
(Same as SOC 202.) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research.
5 units, Win (McAdam, D)

URBANST 203. Senior Seminar
Conclusion of capstone sequence. Students write a substantial paper based on the research project developed in 201 or 202. Students in the honors program may incorporate paper into their thesis. Guest scholar chosen by students. WIM
5 units, Aut (Beck, C)

OVERSEAS STUDIES COURSES IN URBAN STUDIES

For course descriptions and additional offerings, see the respective "Overseas Studies" courses section of this bulletin or http://bosp.stanford.edu. Students should consult their program's student services office for applicability of Overseas Studies courses to a major or minor program.

FLORENCE URBAN STUDIES COURSES

OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization
4 units, Aut (Verdon, T)

WRITING AND RHETORIC, PROGRAM IN (PWR) COURSES

For information on the Program in Writing and Rhetoric, see the "Program in Writing and Rhetoric" and the "Writing Requirement" sections of this bulletin.

UNDERGRADUATE COURSES IN WRITING AND RHETORIC, PROGRAM IN

PWR 1. Writing and Rhetoric 1
Fulfills first level of the writing requirement. Rhetorical and contextual analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor.
4 units, Aut (Staff), Win (Staff), Spr (Staff)

PWR 2. Writing and Rhetoric 2
Further work in developing skills in argument and research-based writing, with emphasis on oral presentations of research-based arguments. Individual conferences with instructor. Prerequisite: PWR 1.
4 units, Aut (Staff), Win (Staff), Spr (Staff)

PWR 4. Directed Writing
Further work on developing writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
3-4 units, Aut (Staff), Win (Staff)

PWR 5. Independent Writing
Individual writing project under the guidance of a PWR instructor. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
1-5 units, Aut (Diogenes, M), Win (Diogenes, M), Spr (Diogenes, M), Sum (Staff)

PWR 6. Writing Workshop
1-2 units, Aut (Staff), Win (Staff), Spr (Staff)

PWR 91. Intermediate Writing
For students who have completed the first two levels of the writing requirement and want further work in developing skills in argument and research-based writing, emphasizing discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
3 units, Spr (Staff)

PWR 191. Advanced Writing
Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Focus is on the relationship of genre and form; attention to developing stylistic versatility. Individual conferences with instructor. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
3 units, Spr (Staff)

PWR 192. Projects in Research, Writing, and Rhetoric
Advanced work on research projects, early drafts of theses, expository excursions, manifestos, scripts, first-hand accounts, investigative reports, proposals, comic disputations, and other textual, rhetorical and imaginative explorations. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
1-5 units, Aut (Obenzinger, H)

PWR 193. Writing the Honors Thesis
For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
1-5 units, Win (Obenzinger, H), Spr (Obenzinger, H)

PWR 194. Topics in Writing and Rhetoric: Law and the Rhetorical Tradition
(Same as LAW 304.) Interdisciplinary seminar. The rhetorical underpinnings of legal argument. Goal is understanding rhetoric as readers and interpreters of legal texts and to develop skills as writers and speakers. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.
4 units, Win (Sassoubre, T)

PWR 195. Peer Writing Tutor Training Course
For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.
3 units, Spr (Moneyhun, C)

PWR 198X. Tutoring with Adolescents: Ravenswood Writes
(Same as EDUC 198X.) Strategies and approaches for teaching writing to students from diverse backgrounds and languages, and cultural and learning styles. Course prepares students to become tutors for Ravenswood Writes. Prerequisites: application and committee approval.
3 units, not given this year

CENTERS, LABORATORIES, AND INSTITUTES

Independent research laboratories, centers, and institutes perform multidisciplinary research that extends beyond the scope of any one of the University's organized schools. Organizations in this section are listed alphabetically by their formal name.

OFFICE OF VICE PROVOST AND DEAN OF RESEARCH

Vice Provost and Dean of Research and Dean of the Independent Laboratories, Centers, and Institutes: Ann M. Arvin
Offices: 450 Serra Mall, Main Quadrangle, Building 60
Mail Code: 94305-2064
Office Phone: 650-723-8789
Office Fax: 650-723-0662
Web Site: http://www.stanford.edu/dept/DoR

The following independent Laboratories, Centers, and Institutes report to the Vice Provost and Dean of Research:

BIOLOGICAL AND LIFE SCIENCES

Bio-X, the interdisciplinary program related to bioengineering, biomedicine, and biosciences

ENVIRONMENTAL SCIENCES

Global Climate and Energy Program (G-CEP)
Precourt Institute for Energy Efficiency
Woods Institute for the Environment

HUMANITIES AND SOCIAL SCIENCES

Center for Advanced Study in the Behavioral Sciences (CASBS)
Freeman Spogli Institute for International Studies (FSI)
Human-Sciences and Technologies Advance Research Institute (H-STAR), including SCIL, Media-X, and Center for the Study of Language And Information (CSLI)
Stanford Center on Longevity (SCL)
Stanford Humanities Center
Stanford Institute for Economic Policy Research (SIEPR)

PHYSICAL SCIENCES

Edward L. Ginzton Laboratory
Geballe Laboratory for Advanced Materials (GLAM)
Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), operated jointly with SLAC
Photon Ultrafast Laser Science and Engineering (PULSE), operated jointly with SLAC
Stanford Institute for Materials and Energy Sciences (SIMES), operated jointly with SLAC
W. W. Hansen Experimental Physics Laboratory (HEPL)

OTHER ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

The Center for Space Science and Astrophysics, the Institute for Research in the Social Sciences (IRiSS), and the Morrison Institute for Population and Resource Studies report to the School of Humanities and Sciences.

The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost.

SLAC is independently operated under a contract with the Department of Energy. KIPAC, PULSE, and SIMES are operated jointly with SLAC and the Office of Vice Provost and Dean of Research.

CENTER FOR ADVANCED STUDY IN THE BEHAVIORAL SCIENCES (CASBS)

Director: Claude Steele
Deputy Director: Ann C. Petersen
Center Offices: 75 Alta Road, Stanford, CA 94305
Mail Code: 94305-2130
Web Site: http://www.casbs.org

The Center for Advanced Study in the Behavioral Sciences at Stanford (CASBS) is dedicated to advancing knowledge about human behavior and fostering contributions to society. CASBS does this through several programs, and primarily residential fellowships. Other programs are special projects within the residential year, extended seminars involving groups of scholars who meet at the Center over two to three years, and summer institutes. For all these programs, CASBS identifies the most accomplished and promising scholars in the fields represented by the Center.

CASBS programs seek to advance knowledge, advance fields of humanities and the social and behavioral sciences, and contribute to society. Groups of scholars gathered together at the Center stimulate each other to broaden and deepen their thinking. The specific methods of CASBS are the social interactive process of interdisciplinary stimulation, intellectual freedom and time, and staff support. These social structures in the microenvironment permit fellows to engage new and challenging ideas, to think clearly and analytically, and to write more profoundly and prolifically than at any other time in their careers. Young scholars especially benefit from this environment and build their fields in a way influenced by their experience at the Center.

CENTER FOR HISTORY AND PHILOSOPHY OF SCIENCE

Executive Director: Michael Friedman
HST Director: Jessica Riskin
LMPS Director: Michael Friedman

The Center for History and Philosophy of Science (CHPS) brings together faculty and research initiatives concerned with understanding science, technology and medicine from historical, philosophical, logical, methodological, and cultural points of view. CHPS comprises two divisions: the Division of History of Science and Technology (HST) and the Division of Logic, Methodology, and Philosophy of Science (LMPS). HST and LMPS, both separately and in cooperation, sponsor visiting scholars, postdoctoral researchers, workshops, and speakers, providing a bridge between the humanities and sciences.

HST involves primarily historians of science, technology, and medicine, and cooperates with other units concerned with the social and cultural context of these disciplines. LMPS involves primarily philosophers of science and logicians, and cooperates with other units concerned with logic and methodology. CHPS as a whole pursues the history and philosophy of all of these areas, and is connected in this way with the Program in History and Philosophy of Science and Technology (HPST). HPST is an interdisciplinary graduate program jointly administered by the History and Philosophy departments. Prospective students interested in applying to the graduate program should consult the "History and Philosophy of Science and Technology" section of this bulletin, and the admissions requirements of the department in which they wish to apply for an M.A. or Ph.D.

CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Emeriti: (Professors) Robert Cannon, I-Dee Chang, Daniel B. DeBra, W.Gary Ernst, Von R. Eshleman, Robert A. Helliwell, Bruce B. Lusignan, Ronald J. P. Lyon, Laurence A. Manning, Bradford W. Parkinson, J. David Powell, Peter A. Sturrock, G. Leonard Tyler (Electrical Engineering), Robert V. Wagoner, Alan T. Waterman; *(Associate Professor)* Bruce B. Lusignan (Electrical Engineering); *(Professors, Research)* Donald L. Carpenter, Aldo V. daRosa, Antony Fraser-Smith
Director: Robert V. Wagoner
Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer
Professors: Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Tune Kame (SLAC), Peter F. Michelson (Physics), Vahé Petrosian (Physics), Roger W. Romani (Physics), Norman H. Sleep (Geophysics)
Associate Professors: Tom Abel (Physics, SLAC), Steve Allen (Physics, SLAC), Sarah Church (Physics), Guenther Walther (Statistics), Howard Zebker (Electrical Engineering, Geophysics)
Assistant Professors: Stefan Funk (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Risa Wechler (Physics, SLAC)
Professors (Research): C-W. Francis Everitt (HEPL), Philip H. Scherrer (Physics)
Consulting Professor: Martin Walt (Electrical Engineering)
SLAC Staff Physicist: Grzegorz Madejski

Center Offices: Varian, Room 316
Mail Code: 94305-4060
Phone: (650) 723-1439
Email: danav@stanford.edu
Web Site: http://www.stanford.edu/group/CSSA

The Center for Space Science and Astrophysics is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the Stanford Linear Accelerator Center. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, including gravitational waves (LIGO, LISA), guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, theoretical astrophysics, x-ray astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research the NASA/Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in Houston, Texas; the University Corporation for Atmospheric Research in Boulder, Colorado; and the San Diego Supercomputing Consortium.

Stanford is the lead institution for the GLAST gamma-ray observatory, Gravity Probe B, and the Solar Oscillations Investigation on the Solar and Heliospheric Observatory spacecraft (SOHO). Stanford is also a member of the Hobby-Eberly Telescope Consortium which operates a 10-meter telescope at the McDonald Observatory of the University of Texas. Members are also involved in the design of the Large Synoptic Survey Telescope (LSST).

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

Further information is available from the director.

EDWARD L. GINZTON LABORATORY

Director: Robert L. Byer
Deputy Director: Olav Solgaard
Office: 450 Via Palou
Mail Code: 94305-4088
Phone: 650-723-0107
Fax: 650-725-7509
Web Site: http://www.stanford.edu/group/ginzton

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, and Mechanical Engineering. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for scientific research in the fields of photonic science and engineering, quantum science and engineering, and nanoscience and engineering, including fiber optics, laser physics and applications, mesoscopic devices, microelectromechanical and microacoustic devices and systems, optoelectronic devices and systems, photonics, nanophotonics and photonic crystals, scanning optical microscopy, quantum cryptography and computing, tunneling and force microscopy, and ultrafast and nonlinear optics.

FREEMAN SPOGLI INSTITUTE FOR INTERNATIONAL STUDIES (FSI)

Director: Coit D. Blacker
Deputy Director: Michael A. McFaul
Institute Office: Encina Hall, 616 Serra Street
Phone: (650) 723-4581
Web Site: http://fsi.stanford.edu

The Freeman Spogli Institute for International Studies (FSI) is Stanford University's primary forum for interdisciplinary research on contemporary international issues and challenges. Working in partnership with the seven schools at Stanford and the Hoover Institution, FSI undertakes collaborative research and teaching which transcend disciplinary, school, and national boundaries. Priority areas of research include: efforts to prevent nuclear proliferation and ensure effective responses to acts of biological, chemical, or nuclear terrorism; linkages among democracy, development, and the rule of law; global healthcare delivery and outcomes; political, economic, and social change in the Asia-Pacific region; national, regional, and multilateral security concerns in the region; European integration;

trade-offs among energy, food security, and environmental degradation; global justice and human rights; overcoming barriers to conflict resolution; and the political, legal, and economic factors affecting the operation of modern energy markets.

Opportunities for undergraduate research include the CISAC Interschool Honors Program in International Security Studies and the CDDRL Undergraduate Honors Program. The institute manages five student fellowship programs and three faculty grant programs.

Constituent centers within FSI include: the Center on Democracy, Development, and the Rule of Law; the Center for Health Policy/Center for Primary Care and Outcomes Research; the Center for International Security and Cooperation; and the Walter H. Shorenstein Asia-Pacific Research Center.

FSI administers the following programs: the Forum on Contemporary Europe; the Program on Food Security and the Environment; the Inter-University Center for Japanese Language Studies; the Program on Energy and Sustainable Development; the Program on Global Justice; the Stanford Center on International Conflict and Negotiation; and the Stanford Program on International and Cross-Cultural Education.

For more information about particular FSI centers and programs, contact the center or program directly (area code 650):

INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY STUDIES

Co-Directors: Michael M. May, Paul Stockton

The Center for International Security and Cooperation (CISAC) coordinates a University-wide interschool honors program in international security studies. Students chosen for the honors program intern with a security-related organization, attend the program's honors college in Washington, D.C. in September, attend a year-long core seminar on international security research, and produce an honors thesis with policy implications. Upon fulfilling individual department course requirements and completing the honors program, students graduate in their major with a certificate in Honors in International Security Studies. To be considered for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken: POLISCI 114S, International Security in a Changing World; MS&E 193, Technology and National Security; and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis; STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy; SOC 160, Formal Organizations; PUBLPOL 102/SOC 166, Organizations and Public Policy; POLISCI 110B, Strategy, War, and Politics; and POLISCI 114T, Major Issues in International Conflict Management.

Students in the program enroll in IIS 199, Interschool Honors Program in International Security Studies, in Autumn, Winter, and Spring quarters.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, C223 Encina Hall Central, telephone (650) 723-9626, or http://cisac.stanford.edu.

CDDRL UNDERGRADUATE HONORS PROGRAM

The Center on Democracy, Development, and the Rule of Law (CDDRL) Honors Program provides students majoring in International Relations the opportunity to conduct an independent research project focused on issues of democracy, development, and the rule of law under CDDRL faculty guidance. Students interested in the program consult with their prospective honors advisers in their junior year and must submit their honors thesis proposal in the Spring Quarter of that year. Honors students present a formal defense of their theses in mid-May of the senior year. Prerequisites for the program are a 3.5 grade-point average, a strong overall academic record, and demonstrated skills in writing and conducting independent research.

Required course work includes INTNLREL 199, an honors research seminar that focuses on democracy, development, and the rule of law in developing countries as well as INTNLREL/POLISCI 114D, CDDRL's flagship undergraduate lecture course taught every Autumn Quarter. Honors students meet bi-weekly with faculty and their peers to present project theses and receive feedback. Students must attend honors college in September before Autumn Quarter classes begin and the weekly CDDRL seminar.

For more information, contact the Center on Democracy, Development, and the Rule of Law, Encina Hall C100, phone (650) 724-7197; or see http://cddrl.stanford.edu.

GEBALLE LABORATORY FOR ADVANCED MATERIALS (GLAM)

Director: Paul McIntyre
Associate Director: Droni Chiu
Offices: McCullough Building, 476 Lomita Mall
Mail Code: 94305-4045
Fax: 650-723-3044
Web Site: http://www-glam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of more than 20 faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also has a newly remodeled Stanford Nanocharacterization Laboratory which provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. The instruments include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis (XRD), x-ray photoelectron spectroscopy (XPS), and high resolution Auger electron spectroscopy (AES) for characterization and thin film

deposition capabilities for synthesis of materials. These facilities are managed by professional staff who also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization. GLAM is also home to the Center for Probing the Nanoscale, a nanoscale science and engineering center sponsored by the National Science Foundation, the Stanford Center for Magnetic Nanotechnology, and the Center for Advanced Molecular Photovoltaics, funded by the King Abdullah University for Science and Technology (KAUST). GLAM also maintains a strong link to the Stanford Insititute for Materials Energy Science (SIMES) on campus and at SLAC.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center devoted to the advanced study of politics, economics, and political economy, both domestic and foreign, as well as international affairs. Hoover fellows are the foundation of the research program. This varied and distinguished community of scholars strives to conceive and disseminate ideas defining a free society within the framework of three programs:

American Institutions and Economic Performance—Focus is on interrelationships of U.S. political and legal institutions and economic activity, often referred to as political economy.

Democracy and Free Markets—Focus is on political economy in countries around the world.

International Rivalries and Global Cooperation—Focus is on interrelationships among countries, by examining issues of foreign policy, security, and trade.

By collecting knowledge, generating ideas, and disseminating both, the Institution seeks to secure and safeguard peace, improve the human condition, and limit government intrusion into the lives of individuals, all of which are consistent with three prominent values: peace, personal freedom, and the safeguards of the American system.

HUMAN SCIENCES AND TECHNOLOGIES ADVANCED RESEARCH INSTITUTE (H-STAR)

Executive Committee: Keith Devlin, Valerie Halperin, Roy Pea, Byron Reeves
Web Site: http://hstar.stanford.edu

H-STAR (Human Sciences and Technologies Advanced Research) is an interdisciplinary research institute focusing on how people use technology, how to better design technology to make it more usable and more competitive in the marketplace, how technology affects people's lives, and the innovative use of technologies in research, education, art, business, commerce, entertainment, communication, national security, and other walks of life. Among the problems at the heart of the H-STAR research agendas are:

- Reducing complexity of technology to enable its universal uses for work, learning and other vital sectors of life
- Closing digital divides across class, race, gender, age, and nations, so that access to and fluencies in technologies provide equal opportunities to learn and work productively
- Accelerating innovation in the creation and diffusion of products and services that better meet human needs
- Solving security and trust problems of computing, communications, and information systems at home and work and in governmental affairs
- Ensuring safety and health with human-centered technology innovations

Within H-STAR are two interdisciplinary centers, CSLI (the Center for the Study of Language and Information) and SCIL (the Stanford Center for Innovations in Learning), and an industry partners program, Media X.

CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION (CSLI)

Director: Stanley Peters
Center Offices: Cordura Hall
Mail Code: 94305-4115
Web Site: http://www-csli.stanford.edu

CSLI supports research at the intersection of the social and computing sciences. It is an interdisciplinary endeavor, bringing researchers together from academe and industry in the fields of artificial intelligence, computer science, engineering, linguistics, logic, education, philosophy, and psychology. CSLI's researchers are united by a common interest in communication and information processing that ties together people and interactive technology.

The technologies of interest at CSLI, at the cutting edge of the information revolution, include natural language processing, voice/user interfaces, ubiquitous computing, collaborative work environments, handheld devices, information appliances, automatic language translation, conversational interfaces, machine learning, intelligent agents, electronic customer relationship management, and distance learning applications.

A primary goal of CSLI is to have a substantial and long-term intellectual impact on the academic and business communities involved with interactive technology. The center's industry research partners and sponsors have access to ideas, faculty, students, and laboratories. Partners can share in the intellectual property of CSLI, and in the governance committees of the center that establish research directions and funding priorities. CSLI accelerates knowledge transfer to products and services by involving executives and researchers in Stanford classrooms. CSLI partners can meet Stanford students studying in over 20 degree programs.

Course work related to the research at CSLI can be found in the "Program in Symbolic Systems" section of this bulletin.

STANFORD CENTER FOR INNOVATIONS IN LEARNING (SCIL)

Director: Roy Pea
Center Offices: Wallenberg Hall (Building 160)
Web Site: http://scil.stanford.edu

The Stanford Center for Innovations in Learning (SCIL) conducts scholarly research to advance the science, technology, and practice of learning and teaching from early childhood through postsecondary education. The center brings together teachers, scholars, and students from around the world to study how to improve formal and informal learning across cultural boundaries.

SCIL is housed in Wallenberg Hall, a state-of-the-art testing ground for technology applications in the classroom. With the support of SCIL technical and advisory staff, more than 70 professors and instructors have taught courses in Wallenberg Hall.

SCIL programs are multidisciplinary and collaborative in nature and include the LIFE Center (Learning in Informal and Formal Environments), a research endeavor funded by the National Science Foundation whose researchers are working toward the development of an integrated multidisciplinary science of learning. Engaging more than 40 faculty members and researchers from the learning sciences, psychology, education, communications, computer science, and developmental, cognitive, and social neuroscience, LIFE is a collaboration with the University of Washington and SRI International.

In addition to its research work, SCIL provides year-round technical and advisory support to University instructors.

MEDIA X

Web Site: http://mediax.stanford.edu

Media X builds bridges between faculty and student scholars at Stanford and thought leaders from influential companies to address questions of importance within academia and industry. Activities are driven by the inspiration that emerge at the intersections of industry need and academic research, of various disciplines addressing the same question, and of people and technology.

INSTITUTE FOR RESEARCH IN THE SOCIAL SCIENCES (IRiSS)

Director: Karen Cook
Executive Director: Chris Thomsen
Office: 450 Serra Mall, Building 370
Mail Code: 94305-2077
Phone: (650) 724-5221
Email: IRiSS-info@stanford.edu
Web site: http://iriss.stanford.edu

The Institute for Research in the Social Sciences (IRiSS) supports the research of Stanford faculty, graduate students. and undergraduate across the social sciences. IRiSS has a two-fold mandate: to advance discovery research in areas involving a mix of questions of anthropology, communication, economics, political science, psychology, and sociology, often addressing major societal challenges; and to build core research infrastructure that strengthens scientific inquiry.

IRiSS hosts the Stanford Center for the Study of Poverty and Inequality, the Stanford Center on Philanthropy and Civil Society, the Social Science History Program, and the Stanford Institute for the Quantitative Study of Society. Research projects consist of: the American National Election Studies (ANES), a collaboration with the University of Michigan's Institute for Social Research; Educational Diversity in Graduate Education in the Social, Behavioral and Economic Sciences (EDGE-SBE), a multi-university collaboration sponsored by the National Science Foundation aimed at increasing the number of under-represented minorities in the social, behavioral, and economic sciences who enter and complete Ph.D. programs; and the Minerva Project, a longitudinal study examining how scientific ideas, scholarly networks, and their institutional contexts influence each other.

In addition, the institute provides programs, funding opportunities, and technology initiatives to enhance research for faculty and graduate students. These include: annual awards made through a peer-reviewed proposal process for seed grants and faculty fellow appointments; an early career faculty program; an experimental research program for nonmedical subjects; and research methods training with a certification option for Ph.D. students. IRiSS also offers conferences and workshops to explore new collaborative research topics.

IRiSS participates in a collaborative program with the Stanford Libraries in providing access to Academic Technology Specialists (ATS) for the social sciences. The technology resources they support include: the Secure Data Center, including the Stanford Branch of the Northern California Census Research Data Center; the development of geographic information systems (GIS); online survey design and implementation; and the creation of high performance computing grids and data visualization systems (for the manipulation of data sets).

SOCIAL SCIENCE HISTORY INSTITUTE

Directors: Stephen Haber
Office: 450 Serra Mall, Building 370
Mail Code: 94305-2077
Phone: (650) 723-1466
Email: toney@stanford.edu
Web Site: http://sshi.stanford.edu

The goal of the Social Science History Program is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests, such as the development of economies, political systems, and social structures, but they approach them with different and complementary methods and bodies of evidence. There is a great deal of potential for historians and social scientists to draw from the strengths of each other's methods to improve their own work and to foster increased interaction among the disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Program seeks to realize this potential by transplanting state-of-the-art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline. Toward this end, SSHP offers conferences and research support for faculty and graduate students. The program is an affiliate of the Institute for Research in the Social Sciences.

STANFORD CENTER ON PHILANTHROPY AND CIVIL SOCIETY

Faculty Directors: Debra Meyerson, Rob Reich, Walter Powell
Managing Director: Malka Kopell
Office: 562 Salvatierra Walk
Mail Code: 94305-8620
Phone: (650) 723-72599
Email: malkak@stanford.edu
Web site: http://haas.stanford.edu/index.php/item/1684

The Stanford Center on Philanthropy and Civil Society was established in September 2006 as a program of the Institute for Research in the Social Sciences, a unit of the School of Humanities and Sciences. The center's goal is not to build a separate field of study, but to draw on current research by Stanford faculty, Ph.D. students, and advanced undergraduates on civil society and the public sphere and to infuse these topics into the core disciplines of the humanities and social sciences, while building on expertise located in the professional schools. The center's mission, therefore, is to engage students, faculty, and practitioners in examining ways in which philanthropic institutions, nonprofit organizations, and other key elements of civil society work to define and address public interests in the United States and abroad.

To pursue these goals, the Center offers Ph.D. fellowships, support for undergraduates writing honor's theses, seminar series and dialogues, undergraduate classes, and a Ph.D. workshop. Additionally, the center links theory and practice by engaging practitioners in the philanthropic and civil sector. By connecting students and faculty with practitioners through workshops, presentations, and structured conversations, the center is building a community of scholars and practitioners working to effect social change.

STANFORD CENTER FOR THE STUDY OF POVERTY AND INEQUALITY

Director: David B. Grusky
Office: 450 Serra Mall, Building 80
Mail Code: 94305-2029
Phone: (650) 724-6913
Email: inequality@stanford.edu
Web site: http://www.inequality.com

The Center for the Study of Poverty and Inequality supports research, training, and dissemination on issues of social, economic, and political inequality. A unit of the Institute for Research in the Social Sciences, the center has over 125 Stanford faculty affiliates, over 400 national and international fellows, and a program of visiting scholars.

The center supports a graduate training program in poverty and inequality in collaboration with the Public Policy Program. With funding from the Elfenworks Foundation, the center brings scholars of poverty and inequality to Stanford University to teach innovative classes, deliver public lectures, and develop new policy. The center sponsors the Berkeley-Stanford inequality workshop as well as a program of public lectures and seminars on poverty and inequality topics, including the Controversies in Inequality series.

Center faculty affiliates carry out research on a poverty and inequality topics, including causes and consequences, measuring techniques, and effects of interventions to reduce poverty and inequality.

In collaboration with Stanford University Press, the center sponsors the Controversies in Inequality series that addresses policy decisions about poverty and inequality and develops approaches to address them. In 2008, the center launched a web and hard copy magazine, *Pathways*. The center's web site serves as a clearinghouse for research, videos, podcasts, and trend data on poverty and inequality.

KAVLI INSTITUTE FOR PARTICLE ASTROPHYSICS AND COSMOLOGY (KIPAC)

Director: Roger Blandford
Deputy Director: Sarah Church
Campus Mailing Address: Physics Astrophysics Building, 452 Lomita Mall
Campus Mail Code: 94305-4085
SLAC Mailing Address: SLAC 2575 Sand Hill Road, M/S 29, Menlo Park, CA 94025
Web Site: http://www-group.slac.stanford.edu/kipac

KIPAC is an independent laboratory funded in part by Stanford University and the Department of Energy. KIPAC was founded to explore new fronts and challenges in particle astrophysics and cosmology, including the study of the very large and the study of the very small as a source of fundamental questions.

MICHELLE R. CLAYMAN INSTITUTE FOR GENDER RESEARCH

Director: Londa Schiebinger
Associate Director: Michelle Cale
Program Manager: Jane Gruba-Chevalier
Accounting Associate: Eric Scarry
Artist in Residence: Valerie Miner
Art Curator: Heather Green
Residential Research Fellows: Deborah Kolb, Fredi Kronenberg, Deboleena Roy, Nhung Tran
Institute Office: Serra House, 589 Capistrano Way
Mail Code: 94305-8640
Phone: (650) 723-1994
Web Site: http://gender.stanford.edu

Founded in 1974, the Clayman Institute contributes to the development of greater gender equity in society through the creation of innovative research studies and the dissemination of key findings to decision makers in universities, business, communities, and government.

The institute focuses primarily on gender issues in science, technology, engineering, and mathematics. It brings together faculty and students in interdisciplinary seminars, and organizes guest lectures and conferences open to the general public. It recently published a volume entitled *Gendered Innovations in Science and Engineering,* edited by Londa Schiebinger, and a report entitled *Dual Career Academic Couples: What Universities Need to Know* which is available for download from the institute's web site. In-house research projects include: why mid-level women leave technology jobs in Silicon Valley; and women in entrepreneurship and venture capital. The institute also offers prizes and awards to graduate students and faculty, including seven graduate dissertation fellowships, and hosts up to seven residential research fellows who contribute to the institute's research studies and broader research agenda. Each quarter, the institute hosts a new exhibition of gender-related art work, artists' salons and receptions, and meetings of its Professional Women Artists' Group.

MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus Feldman (Biology), William H. Durham (Anthropology), Paul R. Ehrlich (Biology), Lawrence H. Goulder (Economics and Freeman Spogli Institute for International Studies), Li Shuzhuo (Xi'an Jiaotong University, China), Shripad Tuljapurkar (Biology)

Institute Office: 371 Serra Mall (Gilbert 116)
Mail Code: 94305-5020
Phone: (650) 723-7518
Email: morrisoninstitute@stanford.edu
Web Site: http://www.stanford.edu/group/morrinst

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

PHOTON ULTRAFAST LASER SCIENCE AND ENGINEERING (PULSE)

Director: Phil Bucksbaum
SLAC Address: 2575 Sand Hill Road, Menlo Park, CA 94025
Web Site: http://photonscience.slac.stanford.edu/pulse/index.php

PULSE (Photon Ultrafast Laser Science and Engineering) is based on the construction of the world's first x-ray free electron laser. The construction of this new x-ray source, called the Linac Coherent Light Source (LCLS), is funded by the Department of Energy, and its operation is planned to begin toward the end of calendar 2008. LCLS will provide x-ray beams of unprecedented brightness, delivered in femtosecond pulses with full transverse coherence.

PULSE builds on, and leverages existing strengths in, atomic physics, chemistry, biology, and condensed matter physics. The center plans to focus on ultrafast structural and electronic dynamics in materials science, the generation of attosecond laser pulses, single molecule imaging, and the origin of efficient light harvesting and solar energy conversion in molecular systems during the first three years of operation.

PRECOURT INSTITUTE FOR ENERGY EFFICIENCY (PIEE)

Director: James L. Sweeney
Deputy Director: John Weyant
Institute Address: Yang and Yamazaki (Y2E2), Room 175, 473 Via Ortega
Mail Code: 94305-4205
Web Site: http://piee.stanford.edu

The Precourt Institute for Energy Efficiency (PIEE), founded in October 2006, conducts research and analysis through interdisciplinary teams of faculty, postdoctoral fellows, graduate students, and undergraduates students. The institute's mission is to improve opportunities for and implementation of energy efficient technologies, systems, and practices, with an emphasis on economically attractive deployment. Research includes technology development, economic analysis, policy analysis, and behavioral research.

PIEE adopts a broad systems approach, examining links among technology, policy, and market diffusion in areas such as: energy-efficiency problems in economic sectors such as buildings, transportation, and electric power; supply- and demand-side barriers and solutions to energy-efficiency challenges; combining engineering, economic, and political expertise in devising solutions to energy-efficiency challenges; and the decision making environment in corporations, public organizations, and households.

STANFORD CENTER ON LONGEVITY (SCL)

Director: Laura L. Carstensen, Ph.D.
Deputy Director: Thomas Rando, M.D., Ph.D.
Center Office: Encina Hall, East Wing, Fifth Floor, 616 Serra Street
Mail Code: 94305-6053
Web Site: http://longevity2.stanford.edu

The aim of the Center is to use increased life expectancy to bring about profound advances in the quality of life from early childhood to old age.

The center sponsors an interdisciplinary mobility project to integrate new technologies and to institute streamlined methods of assisting Stanford faculty with the development of innovative ideas. Major disciplines represented in this project are biology, medicine, engineering, psychology, economics, urban planning, and the d.school.

STANFORD HUMANITIES CENTER

Director: Aron Rodrigue
Associate Director: Matthew Tiews
Web Site: http://shc.stanford.edu

The Stanford Humanities Center promotes research and education in the humanities at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for Stanford faculty, faculty members from other institutions, and Stanford graduate and undergraduate students; public presentations such as lectures, conferences, and publications; and a research workshop program that brings faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences.

STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH (SIEPR)

Director: John B. Shoven
Deputy Director: Gregory Rosston
Institute Office: 579 Serra Mall
Phone: (650) 725-1874
Web Site: http://siepr.stanford.edu

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) facilitating graduate student and faculty research on economic policy issues; (2) building a community of scholars conducting policy research; (3) disseminating research findings broadly; and (4) linking academics at Stanford with decision makers in business and government.

SIEPR is a University-wide research institute, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in its three research centers and six programs. The Stanford Center for International Development (SCID; Roger G. Noll, Director) fosters research on the economic problems of developing economies and economies in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this center call (650) 725-8730. The Center on Employment and Economic Growth (CEEG; Tim Bresnahan, Director) is focusing on the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force. The program on regulation is part of this center. The Center for Public and Private Finance (CPPF; John B. Shoven and Michael J. Boskin, co-Directors) encompasses work on macroeconomics and monetary policy, tax and budget policy, and finance.

Separate research programs within SIEPR and their directors are the California Policy Program (Thomas MaCurdy); the Energy, Natural Resources, and the Environment Program (James L. Sweeney); the Knowledge Networks and Institutions for Innovation Program (Paul A. David); the Program on the Japanese Economy (Masahiko Aoki); and the Program on Market Design (Susan Athey and Paul Milgrom).

STANFORD INSTITUTE FOR MATERIALS AND ENERGY SCIENCES (SIMES)

Director: Z-X Shen
Campus Office: 476 Lomita, McCullough Bldg., Room 136
Campus Mail Code: 94305-4045
Campus Phone: 650-723-3458
SLAC Office: Building 137, Room 306, Stanford Linear Accelerator Center, 2575 Sand Hill Road, MS 69, Menlo Park, CA 94025
SLAC Phone: 650-926-5913
Web Site: http://photonscience.slac.stanford.edu/xlam/index.php

SIMES, a research unit within the Photon Science Directorate at SLAC, addresses key challenges associated with the Department of Energy's mission in the areas of condensed matter physics and materials science, providing scientific leadership in using and developing photon science devices and detectors and other SLAC facilities. SIMES also provides theoretical leadership and support for photon/materials-based experiments at SLAC. The emphasis of this core group is in scattering, spectroscopy, and imaging using the Stanford Synchrotron Radiation Laboratory (SSRL) and the Linac Coherent Light Source (LCLS).

The SLAC-based core capabilities include x-ray scattering, x-ray absorption and emission spectroscopy, angle-resolved photoemission, time-resolved scattering and spectroscopy, and spectro-microscopy. The emphasis has been the unique photon source at SLAC and its related spectroscopy and scattering expertise; there are plans for a strong computational component of this core to support the interpretation of experimental data. The SLAC photon based experimental techniques have been applied to strongly correlated materials, magnetic materials, low-dimensional materials, molecular solids, materials made of nano-clusters, surfaces and interfaces, and catalysis. XLAM programs plan to extend this effort to include matters under extreme conditions, such as high magnetic field and high pressure.

SIMES serves as a link between SLAC and the intellectual resources in other Stanford schools such as the Geballe Laboratory for Advanced Materials (GLAM). XLAM serves to couple SLAC and the Stanford campus by engaging the larger Stanford community to participate in DOE's basic energy science research enterprise. SIMES programs co-located with GLAM in the McCullough Building include materials synthesis, local probe microscopy, condensed matter theory, and organic/inorganic interfaces.

STANFORD INSTITUTE FOR THE QUANTITATIVE STUDY OF SOCIETY

Director: Norman H. Nie
Center Offices: 417 Galvez Mall, Encina Hall West, first floor
Mail Code: 94305-6048
Phone: (650) 723-7242
Web Site: http://www.stanford.edu/group/siqss

Founded in 1998, the Stanford Institute for the Quantitative Study of Society (SIQSS) is a multidisciplinary research institute affiliated with Stanford University's Office of Research and Graduate Policy. The Institute is devoted to producing and sponsoring high-quality empirical social science research about the nature of society and social change.

The central mission of SIQSS is to provide social knowledge for the larger society and to develop the empirical social sciences as a primary tool for understanding social reality. SIQSS seeks to fulfill this mission by undertaking large-scale, socially relevant, theoretically important, and methodologically sound social research. Examples of projects under way include unintended consequences of information and technology in society; education and its social outcomes; conducting the 2000 census under adversity; and an online scholarly journal, IT & Society at http://www.stanford.edu/group/siqss/itandsociety/.

Scholars participating in SIQSS research programs and activities are drawn from diverse disciplines throughout Stanford University and from other academic institutions. SIQSS currently supports quantitative research through the following: long-term institute-initiated research programs, Stanford faculty research grants and student research assistantships, Stanford faculty fellows, interdisciplinary seminars, and the American Empirical Series.

STANFORD LINEAR ACCELERATOR CENTER

Director: Persis Drell
Web Site: http://www.slac.stanford.edu/

The Stanford Linear Accelerator Center (SLAC) has two academic departments. The Particle and Particle Astrophysics Department includes several areas of research: theoretical and experimental elementary particle physics, particle astrophysics, cosmology, accelerator and beam physics, and detector instrumentation. The Photon Science Department includes all areas of science done at the Stanford Synchrotron Radiation Laboratory (SSRL), the Photon Ultrafast Laser Science and Engineering Center (PULSE), and Linac Coherent Light Source, currently under construction to become a state-of-the-art X-ray laser research facility.

SLAC is located on 425 acres of Stanford property west of the main campus and is operated under a contract with the United States Department of Energy. SLAC is operated by Stanford as a national facility allowing qualified scientists from Stanford and other universities and research centers worldwide to participate in the research programs. Graduate students at Stanford may carry out Ph.D. research with members of the SLAC faculty; graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified Stanford students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Students interested in research in the areas of high energy physics, particle astrophysics, and accelerator physics should first contact Professor Rafe H. Schindler at the SLAC Graduate Studies Office. Students interested in research opportunities in photon science and SPEAR 3 should contact a member of the SSRL faculty, or other members of the Stanford faculty who use SSRL in their research programs; see http://www.ssrl.slac.stanford.edu/faculty/.

STANFORD SYNCHROTRON RADIATION LABORATORY (SSRL)

Director: Joachim Stöhr
Web Site: http://www-ssrl.slac.stanford.edu

SSRL, a division of the Stanford Linear Accelerator Center, is a National User Facility which provides synchrotron radiation, a name given to x-rays or light produced by electrons circulating in a storage ring at nearly the speed of light. These extremely bright x-rays can be used to investigate forms of matter ranging from objects of atomic and molecular size to man-made materials with unusual properties. The obtained information and knowledge is of great value to society, with impact in areas such as the environment, future technologies, health, and national security. Many of SSRL's 22 faculty hold joint appointments with campus departments.

SSRL has research programs in materials science, chemistry, structural biology, and ultrafast science, as well as accelerator physics and development of advanced sources of synchrotron radiation, especially ultra short pulse, x-ray free electron lasers. The lab is interdisciplinary with graduate students pursuing degrees from Stanford campus departments that include Applied Physics, Chemical Engineering, Chemistry, Earth Sciences, Electrical

Engineering, Materials Science and Engineering, Physics, and Structural Biology.

Students interested in working at the facility should contact a member of the SSRL faculty, one of the assistant directors, or other members of the Stanford faculty who use SSRL in their research programs; see http://www-ssrl.slac.stanford.edu/faculty/.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Blas Cabrera
Deputy Director: Mark Kasevich
Office: Via Palou at Via Pueblo
Mail Code: 94305-4085
Phone: 650-723-0100
Fax: 650-725-8311
Web Site: http://hepl.stanford.edu

HEPL is an independent laboratory celebrating over 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

WOODS INSTITUTE FOR THE ENVIRONMENT

Directors: Jeffrey R. Koseff, Barton H. Thompson, Jr.
Institute Office: Yang and Yamazaki (Y2E2), 473 Via Ortega
Mail Code: 94305-4205
Phone: (650) 736-8668
Web Site: http://woods.stanford.edu

The Woods Institute for the Environment harnesses the expertise of academics and decision makers to create practical solutions for people and the planet by sponsoring research that leads to solutions to global environmental sustainability issues; infusing science into policies and practices of the business, government, and NGO communities; developing environmental leaders for today and the future; and serving as catalyst and hub for the University's interdisciplinary work in environmental research, education, and action.

The Woods Institute focuses on thesecore areas: fresh water; climate and energy; land use and conservation; oceans and estuaries; and the sustainable built environment.

The Woods Environmental Venture Projects (EVP) program provides seed funding to interdisciplinary teams of Stanford faculty for innovative work in the core research areas. The institute also offers training in leadership and communications skills through the Leopold Leadership Program and other faculty training efforts.

Through its Strategic Collaborations and Uncommon Dialogues, the institute brings together faculty with leaders from the private and public sectors to develop pragmatic solutions to major environmental challenges. Three strategic collaborations have been established in partnership with other organizations: the Natural Capital Project (partners: The Nature Conservancy and World Wildlife Fund); the Center for Ocean Solutions (partners: Monterey Bay Aquarium and MBARI); and the Program on Food Security and the Environment (partner: Freeman Spogli Institute for International Studies). Special workshops are held regularly on key environmental issues such as biofuels, climate change policy, the U.S. Farm Bill, Pacific salmon, and carbon offsets. During the academic year, the Woods Institute also sponsors public events, including the Energy Seminar and the Environmental Forum, which are open to the Stanford community.

Through this and other work, the Woods Institute is helping to ensure that we can meet the needs of not only the current generation but of generations to come.

Undergraduate Programs—The Woods Institute provides support for student group projects focusing on the environment and sustainability. For details, see http://woods.stanford.edu/students/projects.html.

The institute sponsors the University-wide Goldman Interschool Honors Program in Environmental Science, Technology, and Policy.

The Woods Institute also sponsors a weekly series of talks on a broad range of energy topics under the rubric of CEE/ENERGY 301, Energy Seminar. For more information, see http://woods.stanford.edu/cgi-bin/energyseminar.php.

GOLDMAN INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Woods Institute for the Environment coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with faculty members in the environmental field on an honors thesis that incorporates both scientific principles and policy aspects of environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained by phoning (650) 723-5697 and at http://woods.stanford.edu/education/goldman.html.

LIBRARIES AND COMPUTING RESOURCES

STANFORD UNIVERSITY LIBRARIES AND ACADEMIC INFORMATION RESOURCES

University Librarian and Director of Academic Information Resources: Michael A. Keller
Web Site: http://library.stanford.edu

Stanford University Libraries and Academic Information Resources (SULAIR) includes more than 30 libraries and programs supporting research, teaching, and learning at Stanford University. SULAIR acquires and delivers library collections in all formats, establishes policies and standards to guide the use of academic information resources, develops training and support programs for academic uses of computers, and maintains a broad array of electronic information resources, including the online library catalog and several hundred article and indexing databases and electronic journal subscriptions.

In each library unit, knowledgeable professional staff provide assistance in locating and using print and online information resources. Subject specialists and reference librarians are available for individual consultation, group classes, demonstrations, and special workshops by request.

Libraries throughout campus provide group and individual study spaces, public computers, personal laptop connections, photocopy machines, and digital scanners for use by Stanford faculty, staff, and students.

For information about library hours, see http://libraryhours.stanford.edu/hours.

In support of the University's academic mission, Academic Computing provides technology expertise, resources and services to students and faculty. Academic Computing provides information on the use of technology in teaching and learning environments; operates and manages classrooms and public and multimedia computer clusters in Meyer Library and a computer cluster in Tresidder; provides faculty-specific computing resources through the Academic Technology Specialist program and Academic Technology Lab; provides technology support to Stanford University Libraries' services; operates and manages residential computing clusters and services; and supports CourseWork, Stanford's course management system.

Information about the library collections, facilities, services, and policies is available at http://library.stanford.edu.

Further information about library services and resources is available from the Information Center staff in Cecil H. Green Library at http://infocenter.stanford.edu, and from reference staff in all University libraries.

CENTRAL CAMPUS LIBRARIES

The Cecil H. Green Library (East and Bing Wings) maintains research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number approximately 2.8 million volumes. Major services in Green Library include: the Information Center, the Media Microtext Center, the Jonsson Reading Room, the Lane Reading Room, the Bender Room, Loan Desk and Privileges, Interlibrary Services, course reserves, the Department of Special Collections, and the University Archives.

The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing group of SULAIR and provides study, multimedia, consulting, and instructional support services. In addition, Meyer Library houses the University's Digital Language Lab, computer clusters, technology enhanced classrooms, the Academic Technology Lab, and the central offices of Student Computing and Academic Computing.

BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

Science Branch Libraries include the Branner Earth Sciences Library, Engineering Library, Falconer Biology Library, Mathematical and Computer Sciences Library, Harold A. Miller Library at the Hopkins Marine Station, Physics Library, and Swain Library of Chemistry and Chemical Engineering.

COORDINATE LIBRARIES

J. Hugh Jackson Library, Graduate School of Business
Director: Kathy Long
Lane Medical Library
Director: Debra Ketchell
Crown Law Library
Director: Paul Lomio
Stanford Linear Accelerator Center Library
Director of Technical Information Services: Patricia Kreitz

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www.hoover.org

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, the publications and records of national and international bodies, both official and unofficial, and books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

INFORMATION TECHNOLOGY SERVICES (IT SERVICES)

Web Site: http://it-services.stanford.edu

IT Services manages the University's central information technology infrastructure and provides hundreds of services and applications for use in academic and business activities. Support is provided in four layers:

- Participation and client-focused leadership in institutional IT planning, including strategies for data center expansion,

centrally managed storage and backup, and business continuity and disaster recovery.
- Applications and services for departments and end-users including email, calendaring, wireless connectivity, web authentication, and Windows and Linux server hosting. These services are supported by a help desk, contract-support consultants, online self-help, and training.
- Applications and services that support other campus service providers, including the help desk, change management, and network registration systems.
- A communications and collaboration infrastructure robust enough to support advanced network, voice, and web-based services.

To learn about the variety of information technology resources available at Stanford, see http://computing.stanford.edu. For assistance with technology services at Stanford, contact the Stanford IT Help Desk at (650) 725-HELP (5-4357) or submit a request through http://helpsu.stanford.edu.

THE CONTINUING STUDIES PROGRAM

Dean and Associate Provost: Charles Junkerman
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-2650; Fax: (650) 725-4248
Email: continuingstudies@stanford.edu
Web Site: http://continuingstudies.stanford.edu

The Continuing Studies Program provides adults from Stanford and surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned for the 2008-09 academic year.

The faculty are primarily drawn from the ranks of the University's professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

MASTER OF LIBERAL ARTS PROGRAM

Associate Dean and Director: Linda Paulson
Participating Faculty: Russell Berman (Comparative Literature and German), Jay Bhattacharya (Medicine), Eamonn Callan (Education), Gerry Dorfman (Hoover Institute and Political Science), Arnold Eisen (Religious Studies), Michele Elam (English), Martin Evans (English), Paula Findlen (History), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English), Barbara Gelpi (English), Monika Greenleaf (Slavic Languages), Robert Gregg (Religious Studies), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics), Mark Mancall (History), Joseph Manning (Classics), Diane Middlebrook (English, emeritus), Thomas Moser (English), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, and, by courtesy, Philosophy), Jack Rakove (History), Ronald Rebholz (English), Rush Rehm (Drama), John Rick (Anthropological Sciences), John Rickford (Linguistics), Paul Robinson (History), Ramón Saldívar (English), Paul Seaver (History), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Peter Stansky (History), Stephen Stedman (Freeman Spogli Institute for International Studies, and, by courtesy, Political Science), Thomas Wasow (Linguistics), Ernlé Young (Center for Biomedical Ethics), Steven Zipperstein (History)
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-0061
Email: mlaprogram@stanford.edu
Web Site: http://mla.stanford.edu

Program Description—The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to

intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Degree Requirements—Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course—During the Autumn, Winter, and Spring following admission to the program, there is a three quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar—During the first quarter of the second year, new students take the core introductory seminar, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars—Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master's Thesis—The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

Enrollment Requirements—MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or (b) be actively working on their theses and regularly attend a minimum of three-quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

Timeline for completion—All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

Registration—Master of Liberal Arts students enroll in courses through Stanford's Axess system.

SUMMER SESSION

Associate Dean: Patricia Brandt
Director of Admission and Student Services: Teresa Nishikawa
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 723-3109; Fax: (650) 725-6080
Email: summersession@stanford.edu
Web Site: http://summer.stanford.edu

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or the Summer College program for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may apply to the Summer College program.

Students in Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at http://summer.stanford.edu.

STUDENT AFFAIRS

Vice Provost for Student Affairs: Greg Boardman
Web Site: http://www.stanford.edu/dept/vpsa/

Student Affairs supports the academic mission of the University by fostering a climate conducive to living and learning in a diverse community. The division encompasses programs and services for undergraduates and graduate students which include the Office of Residential Education, the University Registrar, the Vaden Health Center, the Career Development Center, the Office of Accessible Education, the Graduate Life Office, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, and the Office of Student Activities. The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division's units. The Vice Provost interacts with the President, the Provost, the University Cabinet, faculty, schools, department representatives, students, and parents. The Vice Provost also serves as an ex officio member of the Senate of the Academic Council.

DEAN OF STUDENT LIFE

Dean of Student Life: Chris Griffith
Office: Tresidder Memorial Union
Phone: (650) 723-2733
Web Site: http://www.stanford.edu/dept/vpsa/

The Dean of Student Life has responsibility for overseeing the development, implementation, and monitoring of comprehensive student life programs. The unit consists of the Graduate Life Office, the Office of Student Activities, Student Unions, Judicial Affairs, and ASSU administrative staff. The Dean reports to the Vice Provost for Student Affairs and is a member of his executive group.

DEAN OF EDUCATIONAL RESOURCES

Dean of Educational Resources: Sally Dickson
Office: Tresidder Memorial Union
Phone: (650) 725-1808
Web Site: http://www.stanford.edu/dept/vpsa/

The Dean of Educational Resources is responsible for overseeing the development, implementation, and monitoring of comprehensive programs relating to ethnic, gender, career, and learning needs and interests of student groups. The unit is comprised of the Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, the Women's Center, Bechtel International Center, Career Development Center, and the Office of Accessible Education. The Dean also has oversight responsibility for the Haas Center for Public Service. The Dean reports to the Vice Provost for Student Affairs and serves as a member of his executive group.

OFFICE OF ACCESSIBLE EDUCATION (OAE)

Offices: 563 Salvatierra Walk
Phone: (650) 723-1066; TDD (650) 723-1067
Web Site: http://www.stanford.edu/group/OAE/

The Office of Accessible Education provides services and resources to students with disabilities through its four primary centers.

STUDENT DISABILITY RESOURCE CENTER (SDRC)

The SDRC coordinates academic and other accommodations for undergraduates and graduate students who have disabilities including mobility impairments, chronic illness, sensory disabilities, learning disabilities, and psychological disabilities. The center's goal is to enable students with disabilities to participate fully in the educational experience at Stanford while meeting the academic standards maintained by the university.

In accordance with the provisions of the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, the SDRC offers an array of accommodations and auxiliary aids and services to students with documented disabilities. Direct support services include, but are not limited to, notetaking, Brailling, oral or sign language interpretation, stenocaptioning, books on tape or electronic text, examination accommodations, and special housing arrangements. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who have temporary and permanent mobility impairments or who use a wheelchair. To arrange for an on-campus ride call 725-2484 (5-CHUG).

ASSISTIVE LEARNING TECHNOLOGY CENTER (ALTEC)

ALTeC is the technology arm of the Office of Accessible Education providing resources to make information technology and education more accessible for those with disabilities. Students can access assistive technology software such as screen magnification, speech recognition, text-to-speech screen readers, and graphic outliners from any of the computing clusters in Meyer, Tresidder, and the residences, as well as the Lane and SSRC Reading Rooms in Green Library.

ALTeC's Alternative Format Production Facility (AFPF) converts printed text to computer files (e-text), large print, or Braille using high-speed scanners and Braille embossers. The Equipment and Software Loan Library (EaSLL) allows students to borrow certain assistive technology for evaluation purposes.

ALTeC's services are available to eligible students, faculty, and staff who need assistance due to a disability. Students should contact the SDRC at (650) 723-1066 for more information. Faculty and staff should contact Stanford's ADA/504 Compliance Officer at (650) 723-0755 for a referral.

SCHWAB LEARNING CENTER

The Schwab Learning Center offers enhanced services for students with learning differences (LD) and attention deficit hyperactivity disorder (ADHD) including screening assessments for learning differences, individual learning strategy sessions, and tutoring in academic disciplines.

CENTER FOR UNIVERSAL DESIGN IN EDUCATION

Application of the principles of universal design for instruction (UDI) represents a new approach to teaching that promotes proactive design and use of inclusive instructional practices that benefit all students. The center seeks to advance the development of instructional methods, tools, and strategies that are flexible, customizable, and accessible to students from different backgrounds, learning styles, abilities, and disabilities in a variety of learning contexts.

CAREER DEVELOPMENT CENTER

Center Office: 563 Salvatierra Walk
Web Site: http://cardinalcareers.stanford.edu

Counseling Services—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m.; (650) 725-1789.

Employment Services—Monday through Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

Reference File Services—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 3 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers services such as counseling, workshops, presentations, on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are available to undergraduate and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses/domestic partners.

The following suggestions may assist students in getting the most out of the CDC:

- Visit early in a Stanford career.
- Register with the CDC's Cardinal Career online system to access internships, part-time and full-time;
- Gather general career information through the career resource library, jobs and internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.
- Use the Reference File Service to ease the management of applications for graduate school or employment.

COMMUNITY CENTERS

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center: http://www.stanford.edu/group/a3c/
- Black Community Services Center: http://www.stanford.edu/dept/BCSC/
- El Centro Chicano: http://www.stanford.edu/dept/elcentro/
- LGBT Community Resources Center: http://lgbt.stanford.edu/
- Native American Cultural Center: http://www.stanford.edu/dept/nacc/
- Women's Community Center: http://womenscntr.stanford.edu/

GRADUATE LIFE OFFICE

Graduate Life Office, Escondido Village Office, 859 Comstock Circle
Graduate Life Office, Graduate Community Center: 750 Escondido
Phone: (650) 736-7078
Email: graduatelife@stanford.edu
Web Site: http://glo.stanford.edu

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The Graduate Community Center (GCC) serves as a focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University. Staff work closely with student services administrators in academic departments to provide consultation and services to students in need.

GRADUATE STUDENT RESIDENCE PROGRAM

The University's philosophy of graduate student housing is based on the premise that supporting high quality graduate scholarship and research is central to the mission of the University. By providing affordable housing in proximity to academic resources, the University creates an environment conducive to research and intellectual dialogue among students, their peers, and faculty members. The Community Associate program in the residences serves to connect student neighbors through social events and activities to build a sense of community in the residences.

HAAS CENTER FOR PUBLIC SERVICE

Center Offices: 562 Salvatierra Walk
Mail Code: 94305-8620
Phone: (650) 723-0992
Web Site: http://haas.stanford.edu

The Haas Center for Public Service connects academic study with community and public service to strengthen communities and develop effective public leaders. The Center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in the following areas of work.

- Through the center's fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations, and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year.
- The Public Service Leadership Fellows Program provides an opportunity for students who want to be intentional about their leadership development. Center staff also provides leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.
- With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center's Public Service Scholars Program supports seniors writing honors theses that combine academic research with service to communities.
- Faculty from Stanford's School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools. Another program trains Stanford students to bring results of scientific research to neighborhood programs. The federally supported Community Service Work-Study program, administered in conjunction with the University's Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies.
- The postgraduate and alumni programs help students, particularly graduating seniors, identify opportunities to assist in launching their public service careers in nonprofit and government agencies, and in the private sector in service-related positions. The Haas Center houses one associated program, the Center on Philanthropy and Civil Society, a program of the Institute for Research in the Social Sciences (IRiSS).

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should contact the center.

BECHTEL INTERNATIONAL CENTER

Web Site: http://www.stanford.edu/dept/icenter/

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through social, cultural, and educational programs, I-Center facilities are used to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The Center believes that international educational exchange nurtures a lifelong global perspective, and plays a key role in supporting Stanford's standing as a truly international university in the following ways:

- Provides information about and assistance with obtaining and maintaining legal status in the U.S. to foreign students, scholars, and Stanford departments.
- Advises U.S. students who are pursuing scholarships for study and research abroad.
- Enables foreign students, scholars, and their family members at Stanford to receive maximum academic, cultural, and personal benefit from their stays in the U.S.
- Contributes to international activities at Stanford by helping to create a welcoming and supportive environment that is responsive to the needs of the international community.
- Facilitates professional meetings between visiting international delegations and their Stanford counterparts.
- Provides opportunities for Stanford students, faculty, staff, and members of the local community to broaden their horizons by interacting with people from different cultures through programs to increase international awareness and understanding.

JUDICIAL AFFAIRS AND STUDENT CONDUCT

Office: Tresidder Memorial Union, 2nd floor
Mailing Address: 459 Lagunita Drive, Suite 9
Mail Code: 94305-3010
Phone: (650) 725-2485
Fax: (650) 736-0247
Web Site: http://judicialaffairs.stanford.edu
Email: judicial.affairs@stanford.edu

In March 1996, President Gerhard Casper convened the Committee of 15 and requested a review of the student judicial system at the University under the then-existing Legislative and Judicial Charter of 1968. During the following year, the Committee of 15 conducted an extensive review of the existing charter and process and drafted a new charter to take its place. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University's Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University's Office of Judicial Affairs web site at . The web site also contains the policies, rules, and interpretations, as well as the University's Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs.

The primary codes of conduct for students are the Fundamental Standard and Honor Code.

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

"Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University."

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical assault
- Property damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

THE HONOR CODE

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

A. The Honor Code is an undertaking of the students, individually and collectively:
   1. that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
   2. that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.

Examples of conduct that has been found to be in violation of the Honor Code include:

- Copying from another's examination paper or allowing another to copy from one's own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor's knowledge and consent
- Representing as one's own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at http://www.stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode.int.htm. The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a 'No Pass' for the course in which the violation occurred.

OLD UNION

Stanford's student union, known as the Old Union, serves as a hub for student activities on campus. The central structure in a three-building complex, the Old Union has administrative offices for ASSU, Office of Student Activities (OSA), Tresidder Meeting Services, and the Office for Religious Life. It also houses a multifaith center known as CIRCLE (Center for Inter-Religious Community, Learning, and Experiences), meeting rooms for student use, and the Axe and Palm which offers casual dining. Adjoining the Old Union, the Nitery houses a black-box theater and El Centro Chicano, and the Clubhouse is home to the Asian American Activities Center and the Native American Cultural Program.

OFFICE OF RESIDENTIAL EDUCATION

Web Site: http://www.stanford.edu/dept/resed/

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The conviction behind the Stanford residence program is that formal teaching, informal learning, and personal support in residences play an important role in a Stanford education.

RESIDENTIAL EDUCATION PROGRAM

The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Residential Education programs extend the classroom into the residences and complement the academic curriculum with activities and experiences that contribute to students' preparation for a life of leadership, intellectual engagement, citizenship, and service. An extensive network of staff, including many that live in the residence halls, supports students during their undergraduate careers.

RESIDENCE DEANS

Residence Deans provide assistance to on- and off-campus undergraduate students. They can advise students about personal matters, occasionally intervene directly in behavioral problems or mental health concerns, and assist with personal emergencies. Advice is also available on issues of academic probation or suspension, leaves of absence, special concerns of students, and administrative matters. Residence Deans work closely with the Dean of Student Life and other University offices. They are assigned to specific residences and to off-campus students. For further information, undergraduates should call Residential Education at (650) 725-2800. For assistance, graduate students can consult Assistant Deans in the Graduate Life Office at (650) 723-1171.

OFFICE OF STUDENT ACTIVITIES

Web Site: http://www.stanford.edu/dept/OSA

The Office of Student Activities, located in Old Union, supports student activities, over 600 student organizations, the ASSU, and sororities and fraternities through publications, workshops, one-on-one consultation, and major event planning support. The OSA also provides fundraising expertise for student groups and leadership opportunities for students.

VOLUNTARY STUDENT ORGANIZATIONS

At its March 1963 meeting, the Board of Trustees adopted the following policy:

"Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford.

"All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters.

"Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students.

"Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University."

Voluntary student organizations are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities, Old Union, room 206.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representatives of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean for Religious Life.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms; a ticket office; a campus information center; a convenience store; banking and credit union offices with ATMs; a fitness center; and a hair styling shop.

TMU is also the home of several administrative offices: Judicial Affairs, Dean of Student Life, Residential Education, the Student Services Center, and the office of the Vice Provost for Student Affairs.

VADEN HEALTH CENTER

Center Office: 866 Campus Drive
Web Site: http://vaden.stanford.edu

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

MEDICAL SERVICES

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services (without charge) include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from the on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.
- Additional services (fees may apply): allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, pediatric immunizations (academic year only), drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services (without charge) include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students' social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

YWCA SEXUAL ASSAULT CENTER AT STANFORD

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday through Thursday, 2:00-4:00 PM. The center also can be reached at its 24-hour campus telephone line (650) 725-9955.

HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.
- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HIV*PACT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, the University-sponsored plan for students, fulfills this requirement. Insured by The Chickering Group, an Aetna Company (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see http://vaden.stanford.edu/insurance/dependent.html. Options for voluntary dental insurance are also offered.

OTHER SERVICES AND PROGRAMS

BOOKSTORE

Web Site: http://www.stanfordbookstore.com

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall (White Plaza), provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of medical books and books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries medical instruments, Stanford logo apparel, gifts and souvenirs, periodicals, and features a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline. There are four branches in addition to the Stanford Bookstore that also serve the community: the Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store, (650) 723-9224 in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

DIVERSITY AND ACCESS OFFICE

Office: Mariposa House, 585 Capistrano Way
Mail Code: 94305-8230
Phone: (650) 723-0755; TTY: (650) 723-1216
Email: equal.opportunity@stanford.edu, disability.access@stanford.edu
Web Site: http://www.stanford.edu/dept/diversityaccess

The Diversity and Access Office has two primary missions:

1. To oversee University compliance with nondiscrimination and equal opportunity laws as well as the regulations relating to affirmative action. This includes collecting, monitoring, reporting, and analyzing major personnel data regarding the hiring, promotion, and retention of women and minorities.
2. To oversee University compliance with federal and state disability-related laws, including (but not limited to) the Americans with Disabilities Act, and Sections 503 and 504 of the Rehabilitation Act. This includes providing assistance and information to staff and faculty with disabilities needing workplace accommodations. The office also provides auxiliary aids and services to the public visiting Stanford and attending public events. In addition, the office monitors disability access on campus and provides information regarding web accessibility.

STANFORD CONFERENCE SERVICES

Phone: (650) 723-3126
Email: conferenceinquiries@stanford.edu
Web Site: http://conference.stanford.edu

A conference is defined as any student, youth, or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for hosting a new, academically sponsored residential summer conference during the mid-June through late-August time frame, contact Stanford Conference Services by phone or email as listed above. Stanford Conference Services also offers meeting planning services on a year-round basis for academically sponsored conference groups seeking assistance with planning and managing residential and non-residential conferences. In addition, conference organizers seeking to conduct conferences outside of the late August to early June time frame can also contact the non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755 or reg-events@stanford.edu, or contact Stanford Events, (650) 723-2551 or stanfordevents@stanford.edu.

Academic sponsorship by a Stanford dean or department head is required for first time conferences hosted by University departments or by conferences hosted by external organizations interested in meeting at Stanford. Conferences initiated by University departments or external organizations must demonstrate consistency with the University's academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President's Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford's campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through late August.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audio-visual aids, signage, janitorial services, trash pick-up and removal, sprinkler shutoffs, and other conference-related products/services. During the academic year, housing arrangements for University-sponsored visitors can be made through the Stanford Guest House, (650) 926-2800, or at http://guesthouse.stanford.edu.

OMBUDS

Stanford University Ombuds: David Rasch
Ombuds Office: Mariposa House, 585 Capistrano Way, Room 210
Phone: (650) 723-3682
Mail Code: 94305-8200
Email: rasch@stanford.edu
Web Site: http://www.stanford.edu/dept/ombuds
School of Medicine Ombuds: Keith Smith
Email: keith.smith@stanford.edu

The charge to the Ombuds office at Stanford is: "The Ombudsperson's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombudsperson's office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty. Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the "Non-Academic Regulations" section of this bulletin.

POLICE SERVICES

Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: http://police.stanford.edu

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff's Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the *Stanford Safety and Security Almanac*, available free from Public Safety, or see http://police.stanford.edu.

OFFICE FOR RELIGIOUS LIFE

Office: Memorial Church
Phone: (650) 723-1762
Web Site: http://religiouslife.stanford.edu

The mission of the Office for Religious Life (ORL) is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford's history from its founding, is a vital part of both its ethos and education.

The ORL is committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds, striving to ensure that students, faculty, and staff have access to supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

The ORL oversees and provides support for Stanford Associated Religions (SAR), more than thirty religious organizations that offer their spiritual services to the campus, as well as the Center for Inter-Religious Community, Learning, and Experiences (the CIRCLE). Located on the third floor of the remodeled Old Union, the CIRCLE offers an interfaith sanctuary, a seminar room, a common room, a student lounge, a non-lending library, and offices housing many SAR member groups.

STANFORD ALUMNI ASSOCIATION

Web Site: http://www.stanfordalumni.org
Phone: (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association (SAA) seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, Stanford magazine, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association's alumni and student class outreach department (ASCO) provides undergraduates and graduate students with networking opportunities, celebratory and social events, and programs that enhance their Stanford experience and help connect them to the 200,000 alumni worldwide who make up the Stanford alumni community. ASCO programs bring students and alumni together through Reunion Homecoming Weekend each autumn and Commencement weekend in the spring, along with alumni networking events throughout the year.

For students, SAA sponsors events such as student tailgates, alumni panels, Senior Send-off, Senior Dinner on the Quad, and Class Day. The Alumni Association gives out the J.E. Wallace Sterling award and the Stanford Award of Excellence annually to honor graduating seniors for exemplary service to the University. For more information on students programs at the Stanford Alumni Association, see http://www.stanfordalumni.org/students/home.html.

STANFORD EVENTS

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President's office such as: Commencement, Baccalaureate, the University President's inaugurations, New Student Orientation Convocation, Community Day/Founders' Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. For information about University event planning, policies, procedures, and University facilities,see http://stanfordevents.stanford.edu, or call (650) 723-2551.

Stanford Lively Arts, the University's presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see http://livelyarts.stanford.edu, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see http://tickets.stanford.edu, or call (650) 725-ARTS (2787).

AWARDS AND HONORS

FACULTY AND STAFF AWARDS

KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 to recognize of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford's long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement.

LLOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement.

WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan's belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President's example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

STUDENT AWARDS

BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT'S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President's Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

DEANS' AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

HOEFER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

FREDERICK EMMONS TERMAN ENGINEERING SCHOLASTIC AWARD

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

PHI BETA KAPPA

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter's election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of 'B-' or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GER) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement

they may satisfy. IHUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of '+' or 'CR' is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students' names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.

EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

EXCHANGE PROGRAMS

UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, NH, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford, and Stanford students may apply to one of these other institutions, for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean's office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers' Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford's transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures.

Students who complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-4034; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-7602.

AIR FORCE ROTC

The following are offered by San Jose State University. See also http://info.sjsu.edu/web-dbgen/catalog/departments/AS.html.

AS 001A,B. The Foundation of the United States Air Force
Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

AS 002A,B. The Evolution of the United States Air And Space Power
Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

AS 131A,B. Air Force Leadership Studies
Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

AS 141A. National Security Affairs
Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

AS 141B. Preparation for Active Duty
Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

Leadership Laboratory (LLAB)
Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and followership skills. Guest speakers.

ARMY ROTC

See also http://www.scu.edu/rotc.

FRESHMAN YEAR

MILS 11. Leadership and Personal Development
Taught on Stanford campus. Personal challenges and competencies for effective leadership. How life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Development of a personal fitness program under the guidance of an Army master fitness trainer. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field exercise away from the University.

MILS 12. Foundations in Leadership I
Taught on Stanford Campus. Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills. Leadership dimensions and values. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One evening military formal dinner.

MILS 13. Foundations in Leadership II
Taught on Stanford campus. Leadership framework; practical applications in fundamentals such as problem solving, listening, presenting briefs, and effective writing skills. Values, attributes, skills, and actions in the context of practical and interactive exercises. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field training exercise away from the University.

SOPHOMORE YEAR

MILS 21. Innovative Leadership
Taught on Stanford campus. Creative and innovative leadership strategies and styles through historical cases and interactive exercises. Personal motivation and team building through team exercises. Focus is on leadership values and attributes through organizational customs and courtesies. Leadership case studies; individual creeds and organizational ethos. Two 60-minute classes per week. Weekly 3-hour labs required. One four-day weekend field training exercise away from the University.

MILS 22. Leadership in Changing Environments
Taught on Stanford campus. The challenges of leading in contemporary operational environments. Crosscultural challenges and applications to leadership tasks and situations. Case studies. Two 60-minute classes per week. Weekly 3-hour labs required. One evening military formal dinner.

MILS 23. Team Leading Procedures
Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks and the decision making process. Planning techniques to develop orders, briefing plans, and decisions. Two 60-minute classes per week. Five 3-hour labs per quarter. One four-day weekend field training exercise away from the University.

JUNIOR YEAR

MILS 131. Adaptive Team Leadership
Taught at Santa Clara University. Adaptive leadership skills and the demands of the ROTC Leader Development Assessment Course (LDAC). Scenarios related to small-unit tactical operations to develop self awareness and thinking skills. Feedback on student leadership abilities. Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

MILS 132.Situational Leadership I
Taught at Santa Clara University. Skills in leading small units, including decision making, persuading, and motivating team members when under fire. Two 90 minute classes per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.

MILS 133. Situational Leadership II
Taught at Santa Clara University. Applications of situational leadership challenges in decision making, persuading, and motivating team members when under fire. Preparation for ROTC Leader Development Assessment Course (LDAC). Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

SENIOR YEAR

MILS 141. Developing Adaptive Leaders
Taught at Santa Clara University. Planning, executing, and assessing complex operations, functioning as a member of staff , and providing leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Responsibilities of key staff. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

MILS 142. Leadership in a Complex World I
Taught at Santa Clara University. Differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interacting with nongovernmental organizations, civilians on the battlefield, and host nation support. Two 90-minute seminars per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 141.

MILS 143. Leadership in a Complex World II
Taught at Santa Clara University. Preparation for first unit of assignment and transition to Lieutenant. Case studies, scenarios, and exercises to prepare for complex ethical and practical demands as commissioned officers in the U.S. Army. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 142.

MILITARY HISTORY

MILS 199. Dynamics of Leadership in Military History
Taught at Santa Clara University. Dynamics that drive decisions made by history's military leaders and followers. Wars and battles from 1861 to present. Techniques and innovations in military training, weapon systems, political timing, and their effect they have on strategies. Combined arms experiences.

NAVAL ROTC

The Department of Naval Science at UC Berkeley offers programs of instruction leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years. Students should consult http://navsci.berkeley.edu.

FRESHMAN YEAR

NS 1. Introduction to Naval Science
NS 2. Sea Power

SOPHOMORE YEAR

NS 3. Leadership and Management
NS 10. Naval Ship Systems I: Engineering
Navy option students in the four- or two-year program normally complete the following courses during their junior and senior years.

JUNIOR YEAR

NS 12A. Navigation and Naval Operations I
NS 12B. Navigation and Naval Operations II

SENIOR YEAR

NS 401. Naval Ship Systems
NS 412. Leadership and Ethics

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.

NONACADEMIC REGULATIONS

UNIVERSITY POLICIES

NONDISCRIMINATION POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

ADA (AMERICANS WITH DISABILITIES ACT)/SECTION 504 GRIEVANCE PROCEDURE (STUDENT)

For information concerning policies and procedures for students with disabilities, see http://www.stanford.edu/dept/ocr/access/student.html, or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email); see also the Student Disability Resource Center at http://www.stanford.edu/group/DRC/.

POLICY

The following is quoted from the policy:

I. *Policy*

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. *Applicability*

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

A. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
B. Inaccessibility of a program or activity;
C. Harassment or discrimination on the basis of disability;
D. Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the *Stanford Bulletin*) for disability-related grievances.

III. *Compliance Officers*

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA/Section 504 Compliance Officer. The office is located in Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. *Informal Resolution*

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution.

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

V. *Formal Complaint*

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

A. *When to File Complaint:* Complaints shall be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
B. *What to File*: a complaint must be in writing and include the following:
   1. The grievant's name, address, email address, and phone number
   2. A full description of the problem
   3. A description of what efforts have been made to resolve the issue informally
   4. A statement of the remedy requested
C. *Where to File Complaint:* the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).
D. *Notice of Receipt*: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
E. *Investigation*: the Compliance Officer or his or her designee (hereafter collectively referred to as the "grievance officer") shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
F. *Representation*: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
G. *Findings and Notification:* upon completion of the investigation, the Compliance Officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance

Office for good cause (including for reasons relating to breaks in the academic calendar). The final report shall also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.

H. *Final Disposition:* the disposition proposed by the Compliance Officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the Compliance Officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. *Urgent Matters*

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. *Remedies*

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the Compliance Officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. *Appeal*

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the Compliance Officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar). The decision of the Provost on the appeal is final.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit discrimination on the basis of sex. The Title IX Compliance Officer is the Special Counselor to the President for Campus Relations and has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title IX and its regulations should contact the Title IX Compliance Officer, the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax). Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the "Student Non-Academic Grievance Procedure". See also Administrative Guide Memo 23 at http://adminguide.stanford.edu/23.pdf.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

It is the policy of Stanford University to comply with Title VI of the Civil Rights Act of 1964 and its regulations, which prohibit discrimination on the basis of race, color, and national origin. The Title VI Compliance Officer is the Director of the Diversity and Access Office and has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title VI and its regulations should contact the Title VI Compliance Officer, Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Grievance procedures to address complaints of discrimination on the basis of race, color, and national origin are set forth in the "Student Non-Academic Grievance Procedure". See also Administrative Guide Memo 23 at http://adminguide.stanford.edu/23.pdf.

GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Statement on Academic Grievance Procedures (see the "Academic Policies and Statements" section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable procedures with the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

POLICY

The following is the policy:

1. *Applicability*
   a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

      In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Nondiscrimination Policy provides in part: "Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs."

   b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:
      1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
      1. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.

2. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student's capacity as a student-employee.

d. This procedure is available to undergraduate and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter "the Director") may, in his or her discretion, entertain such a grievance in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law. In the same way, the Director may entertain a grievance under this procedure brought by a non-student, in an appropriate case.

e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

1. The Director may be contacted at: Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email), http://www.stanford.edu/dept/ocr.

2. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University's Department of Human Resources.

2. *Informal Resolution*

a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.

b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. *Formal Grievance*

a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.

c. The Director shall promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

e. The Director (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline shall be brought to the attention of the appropriate disciplinary process.

4. *Appeal*

a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

5. *General Provisions*

a. *Time Guidelines*—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar).

b. *Advisers*—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.

c. *Ombuds*—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds) and the School of Medicine's Ombuds (http://www.med.stanford.edu/ombuds) are available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although they have no decision making authority, the Ombuds' Offices have wide powers of inquiry.

d. *Sexual Harassment*—For further information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu.

e. *No retaliation*—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

f. *Standards for Review*—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?

2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?

3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at http://adminguide.stanford.edu/15_5.pdf.

COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the Provost's Copyright Reminder, http://www.stanford.edu/dept/ucomm/provost/copyright_reminder.html. It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly, and Stanford will charge reconnection fees starting at $100 and going up as high as $1,000 for successive DMCA complaints. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law at http://rescomp.stanford.edu/info/dmca.

DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University's nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 23.2, Sexual Harassment, http://adminguide.stanford.edu/23_2.pdf. It is also available from the Sexual Harassment Policy Office homepage, http://harass.stanford.edu.

SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

POLICY

The following is quoted from the policy:

1. *In General*
   a. *Applicability and Sanctions for Policy Violations*—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
   b. *Respect for Each Other*—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
   c. *Prompt Attention*—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
   d. *Confidentiality*—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.
   e. *Protection Against Retaliation*—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may

violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.

f. *Relationship to Freedom of Expression*—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

2. *What Is Sexual Harassment?*

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; *or*

b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, (http://adminguide.stanford.edu/23_3.pdf) may also apply when sexual harassment involves physical contact.

3. *What To Do About Sexual Harassment*

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- The Sexual Harassment Policy Office web page at http://harass.stanford.edu.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. *Consultation*—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHadvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or "off the record." This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu
- Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter
- Chaplains at Memorial Church
- The University Ombudsperson, http://www.stanford.edu/dept/ombuds
- The Medical Center Ombudsperson, http://www.med.stanford.edu/ombuds

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/confidential.html.

For further information on confidentiality, see Section 1(d) above.

b. *Direct Communication*—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. *Third Party Intervention*—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. *Formal Grievance, Appeal, and Disciplinary Processes*—Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. *Grievances and Appeals*—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual's submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:

- "Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy" (also at http://hrweb.stanford. edu/forms/staffresolution.pdf.)
- "Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates"
- "The Dispute Resolution Process (A User's Guide)"

1. *Disciplinary Procedures*—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline and students to the Fundamental Standard. For additional information related to student judicial affairs, see http://www.stanford.edu/dept/vpsa/judicialaffairs.

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. *Procedural Matters*
   a. *Investigations*—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.
   b. *Recordkeeping*—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

      The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.
   c. *Indemnification and Costs*—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, "An employer shall indemnify (its) employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his (or her) duties as such … ." The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee's duties. In general, see Administrative Guide Memo 15.7 (http://adminguide.stanford. edu/15_7.pdf).
5. *Resources for Dealing with Sexual Harassment*
   a. *Advice*—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/SHadvisers.html or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

      Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

      There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

      - *Sexual Harassment Advisers* (http://harass.stanford.edu/SHadvisers.html) serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.
      - *The Director of the Sexual Harassment Policy Office* is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu).
      - As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons. For more information, see http://harass.stanford.edu/resources.html.

   b. *External Reporting*—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.
6. *Consensual Sexual or Romantic Relationships*
   a. *In General*—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

      Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not

remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

b. *With Students*—At a university, the role of the teacher is multi-faceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. *Policy Review and Evaluation*—This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

RESOURCES

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at http://harass.stanford.edu, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: harass@stanford.edu.

Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

Assistant Director: Nanette Andrews

SEXUAL ASSAULT

The University's Policy on Sexual Assault is published in complete form in the Administrative Guide Memo 23.3, available at http://adminguide.stanford.edu/23_3.pdf, and on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

SUMMARY

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Background—This policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Policy—Sexual assault is unacceptable and will not be tolerated at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University's off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault. A comprehensive website containing a list of resources can be found at http://www.stanford.edu/group/svab/.

Definition—For purposes of this policy, sexual assault is defined as the commission of an unwanted sexual act, occurring without consent of both individuals, or occuring under threat or coercion. It can occur either forcibly and/or against a person's will, or when a person is incapable of giving consent (if under 18 years of age; if intoxicated by drugs or alcohol; if developmentally disabled; if temporarily or permanently mentally or physically unable to do so). Sexual assault includes but is not limited to rape, forcible sodomy, forcible oral copulation, rape with an object, sexual battery, forcible fondling, and threat of sexual assault.

Notification—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

Legal Reporting Requirements—Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

"911" Emergency Network: dial 9-911 from University phones or 911 from outside phones

Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000

YWCA Sexual Assault Center at Stanford, for students, at the Vaden Health Service, telephone (650) 725-9955

Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

Non-Emergency Resources—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy.

Ongoing Case Management Procedures—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University's policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the Stanford Bulletin. Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary

action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confidential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

Information Requests and Confidentiality—The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

Information about Options—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, the availability of mediation, alternative housing assignments, and academic assistance alternatives.

POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at http://adminguide.stanford.edu/15_1.pdf.

SUMMARY

The following summarizes the policy on Political Actvities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

POLICY

The following is quoted from the policy:

1. *Summary of Legal Requirements and Restrictions*
   a. *Campaign Activities:* contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.
   b. *Lobbying:* lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

      Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee—other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:
      - President
      - Provost
      - Deans of the Seven Schools
      - Vice Provost and Dean of Research
      - Vice President for Business Affairs and Chief Financial Officer
      - Executive Director of Human Resources
      - Director of the Stanford Linear Accelerator Center
      - Director of the Hoover Institution
      - General Counsel
      - Vice President for Public Affairs

      The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.
   c. *Giving of Gifts to Public Officials and Staff:* almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

      As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.
   d. *Reporting of Political Activities:* the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.
2. *Prohibited and Restricted Political Activities*
   a. *In General:*
   b. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.
   c. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.
   d. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.
   e. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.
   f. No person may use for lobbying activities federally-funded contract or grant money received by the University.

      Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or

contemplating doing so, should consult with the Director of Government and Community Relations.

g. *Guidelines for Avoiding Prohibited Partisan Political Activities:* the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3.b., below:
   1. *Use of Name and Seal:* neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.
   2. *Use of Address and Telephones:* no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)
   3. *Use of Title:* the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.
   4. *Use of Services and Equipment:* University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.
   5. *Use of Personnel:* no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

3. *Permissible Activities*

a. *In General:* as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

   Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:
   1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.
   2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

   To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b. *Limited University Political Activities:* limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.

4. *Responsibility for Interpretation:* the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

CAMPUS DISRUPTIONS

The University's policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.
2. obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

APPLICATION

The following are examples to illustrate the policy:

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.

USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

POLICY

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

To schedule an event, approval must be obtained in advance from the Office of Stanford Events (see below). Unscheduled events, protests, or activities are prohibited.

Requests for waivers to this policy must be submitted in advance and in writing to the Office of Stanford Events. Exceptions may be granted only in extraordinary cases.

RESOURCES

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Office of Stanford Events at (650) 723-2551, http://stanfordevents.stanford.edu. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, http://www.stanford.edu/dept/OSA.

NOISE AND AMPLIFIED SOUND

POLICY

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

RESOURCES

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

a. The Office of Student Activities: phone: 723-2733, or see http://osa.stanford.edu/publications/soh/2002-2003/
b. Registrar's Scheduling Office: phone (650) 723-6755, or see http://registrar.stanford.edu/event/.
c. The Office of Stanford Events: phone (650) 723-2551, or see http://stanfordevents.stanford.edu.

PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University's policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa.judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

1. The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.
2. The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term "Stanford campus" shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

CONTROLLED SUBSTANCES AND ALCOHOL

STUDENT CONDUCT

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs ("controlled substances")* and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, even death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University's policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

POLICY

The University's policy on controlled substances and alcohol is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.6, available at http://adminguide.stanford.edu/23_6.pdf, and on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa/judicialaffairs.

The following is quoted from the policy:

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the workplace, or as part of any of the University's activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution.

This policy will be reviewed at least biennially.

APPLICATIONS

The following are examples to illustrate the policy:

No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences, house funds (funds collected by the University Bursar or other

University offices) may not by used to buy alcohol because the majority of undergraduates are under the legal drinking age of 21. The decision to use student-collected funds to buy alcohol should be made lawfully, thoughtfully, fairly, and in a way that respects the views of all students. Students must not be required to contribute to a student-collected fund for the purposes of purchasing alcohol. No alcoholic beverages may be served at all-freshman house events in common area spaces (e.g., lounges, hallways, patios/outdoor areas).

Party planners are responsible for planning and carrying out events in compliance with this policy. At least one house or organization officer must assume responsibility for an event's compliance with the policy, and their names must be made available to Stanford's Department of Public Safety and the University upon request.

CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

Individuals who violate the University Residence Agreement may lose their University student housing privileges and/or be reported to the Judicial Affairs Office.

Individuals who violate the University's terms and conditions for student organization recognition as defined in the *Student Organization Handbook* may be subject to expulsion from the student organization.

Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.

Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot not be specifically measured in terms of dollar amount. For example, pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one's own safety or that of others.
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one's possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

WHERE TO GET HELP

In the event of a life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

*Campus Resources—(*Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Vaden Health Service's Medical Advice Line, 24 hours (723-4841); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Vaden Health Service: provides information and referral, educational trainings and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: http://www-leland.stanford.edu/dept/OSA/party/ (723-2733).

*Community Resources—*Alcoholics Anonymous (650) 592-2364, Alanon (650) 873-2356 or (408) 379-1051.

HAZING POLICY

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

DEFINITION OF HAZING AT STANFORD UNIVERSITY

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Judicial Affairs; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

APPLICATIONS

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Some examples of hazing activities or events may be found at http://osa.stanford.edu/publications/soh/critical_policies--hazing.shtml. Questions should be directed to the Office of Student Activities, (650) 723-2733.

SMOKE-FREE ENVIRONMENT

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.4, available at http://adminguide.stanford.edu/23_4.pdf, and Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/.

Applicability—This policy applies to all academic and administrative units of Stanford University, including SLAC, and all campus student housing. This policy does not supercede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

Note also that the School of Medicine has adopted a more restrictive policy; see http://med.stanford.edu/tobaccofree.

POLICY

The following is quoted from the policy:

1. *Policy*
   It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.
2. *Guidelines*
   a. *Smoking-Prohibited Areas*—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.
      - Ashtrays will not be provided in any enclosed University building or facility.
      - "Smoking Prohibited" signs will be posted.

   b. *Outdoor Smoking Areas*—Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).
3. *Enforcement*—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.
   a. *Smoking Cessation Information*—Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.
   b. *Repeated Violations*—Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.
4. *Implementation and Distribution*—Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violaters of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

COMPUTER AND NETWORK USAGE

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 62, Computer and Network Usage Policy, available at http://adminguide.stanford.edu/62.pdf.

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and

local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

CHAT ROOMS, BLOGS, AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at http://adminguide.stanford.edu/66.pdf.

POLICY

The following is quoted from the policy:

1. *Definition*
   From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, blogs, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.
2. *Establishment of Forums*
   a. *Connection with University Activities*—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.
   b. *University Role*—Unless specifically sponsored by an academic administrative unit of the University, the University's role in connection with these forums will be solely as a passive Internet service provider.
   c. *Terms of Use*—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled "Terms of Use." The URL is http://www.stanford.edu/home/atoz/terms.html.
3. *Operation of Forums*

All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University's various policies regarding computer facilities and services.

PROTECTION OF CONFIDENTIAL DATA

Stanford University maintains confidential data including Social Security numbers, financial information, health information, and student records. It is incumbent on every member of the Stanford community with lawful access to confidential data to protect it. Confidential data in electronic form should be encrypted and should not be stored locally on desktop machines or laptops. Members of the Stanford community should familiarize themselves with applicable laws and University policies on privacy as provided by the University, including Administrative Guide Memo 63, Information Security, http://adminguide. stanford.edu/63.pdf, Administrative Guide Memo 64, Identification and Authentication of Systems, http://adminguide.stanford.edu/64.pdf, Administrative Guide Memo 65, Electronic Commerce, http://adminguide.stanford.edu/65.pdf, and Administrative Guide Memo 67, Information Security Incident Response, http://adminguide.stanford. edu/67.pdf. For information on best practices for securing mobile computing devices, see http://www.stanford.edu/group/security/securecomputing/mobile_devices.html.

CAMPUS SAFETY AND CRIMINAL STATISTICS

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the Department of Public Safety web site at http://police.stanford.edu/index2.html.
