ACCREDITATION

Stanford University is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; (510) 748-9001. In addition, certain programs of the University have specialized accreditation. For information, contact the Office of the University Registrar.

Stanford University is committed to complying with the following requirements enumerated by the Western Association of Schools and Colleges (WASC) in its accreditation process:

"Core Commitment to Institutional Capacity—The institution functions with clear purposes, high levels of institutional integrity, fiscal stability, and organizational structures to fulfill its purposes.

"Commitment to Educational Effectiveness—The institution evidences clear and appropriate educational objectives and design at the institutional and program level. The institution employs processes of review, including the collection and use of data, which ensure delivery of programs and learner accomplishments at a level of performance appropriate for the degree or certificate awarded."

For more information, see the University's WASC Accreditation web site.

Also, see the President Hennessy's statement (pdf) on Stanford's fulfilment of the Core Commitments to Institutional Capacity and Educational Effectiveness.

NONDISCRIMINATION POLICY

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students or applicants for admission, or employees or applicants for employment on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.

See the "Judicial Affairs and Student Conduct" section of this bulletin for further information on The Fundamental Standard and The Honor Code.

HONOR CODE

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President.

The Honor Code reads:

A. *The Honor Code is an undertaking of the students, individually and collectively:*
   1. *that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;*
   2. *that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.*

B. *The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.*

C. *While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.*

See the "Judicial Affairs and Student Conduct" section of this bulletin for further information on The Fundamental Standard and The Honor Code.

CURRENT INFORMATION AND ACCURACY STATEMENT

Every effort is made to ensure that the degree requirement and course information, applicable policies, and other materials contained in the *Stanford Bulletin* are accurate and current. The University reserves the right to make changes at any time without prior notice. The Bulletin in the form as it exists online at http://bulletin.stanford.edu and http://explorecourses.stanford.edu is therefore the governing document, and contains the then currently applicable policies and information.

Courses of Instruction are available at the *Stanford Bulletin's* ExploreCourses web site.

A non-official pdf of the Bulletin and pdfs of individual sections of the Bulletin are made available for download in September; these pdfs are produced once in September and are not updated to reflect corrections or changes made during the academic year.

REGISTRAR'S OFFICE

The *Stanford Bulletin* is an online publication of the Office of the University Registrar, Stanford University.

Address:
Office of the University Registrar
630 Serra Street
Suite 120
Stanford University
Stanford, California 94305-6032

Students with questions or issues should contact the Student Services Center or file a help ticket with Stanford's HelpSU system. Alumni, staff, or the general public may also file a help ticket to request the Registrar's Office assistance or to ask for information.

Additional information on Stanford University can be obtained through Stanford's web site at http://www.stanford.edu.

Telephone number for all University departments: Area code: (650) 723-2300

ACADEMIC CALENDAR 2010-11

This calendar is also available at the University Registrar's web site: http://registrar.stanford.edu/academic_calendar. All dates are subject to change at the discretion of the University.

AUTUMN QUARTER 2010-11

- August 1 (Sun) Axess opens for course enrollment.
- August 23 (Mon) M.D. first-year students, first day of instruction.
- August 26 (Thu) M.D. second-year students, first day of instruction.
- August 30 (Mon) Law School instruction begins for 1st-year J.D. students
- September 10 (Fri, 5:00 p.m.) Course enrollment deadline to receive stipend or refund check on first day of term.
- September 14 (Tue) New undergraduates arrive; Convocation.
- September 20 (Mon) First day of quarter; instruction begins; Law School instruction begins for 2nd/3rd-year J.D. & Adv. Degree Students
- September 20 (Mon, 5:00 p.m.) Preliminary Study List deadline. Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status. The late study list fee is $200.
- September 20 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- September 23 (Thu) Conferral of degrees, Summer Quarter 2009-10.
- October 8 (Fri, 5:00 p.m.) Final Study List deadline. Last day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
- November 8 (Mon, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- November 12 (Fri, 5:00 p.m.) Change of grading basis deadline.
- November 12 (Fri, 5:00 p.m.) Course withdrawal deadline.
- November 12 (Fri, 5:00 p.m.) Application deadline for Autumn Quarter degree conferral.
- November 22-26 (Mon-Fri) Thanksgiving Recess (no classes).
- November 29-December 5 (Mon-Sun) End-Quarter Period.
- December 3 (Fri) Last day of classes (unless class meets on Sat.)
- December 3 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
- December 3 (Fri, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
- December 3 (Fri, 5:00 p.m.) Late application deadline for Autumn Quarter degree conferral ($50 fee).
- December 6-10 (Mon-Fri) End-Quarter examinations.
- December 6-13 (Mon-Mon) Law School examinations
- December 14 (Tue, 11:59 p.m.) Grades due.
- January 6 (Thu) Conferral of degrees, Autumn Quarter.

WINTER QUARTER 2010-11

- October 24 (Sun) Axess opens for course enrollment.
- December 10 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term.
- January 3 (Mon) First day of quarter; instruction begins for all students.
- January 3 (Mon, 5:00 p.m.) Preliminary Study List deadline. Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status. The late study list fee is $200.
- January 3 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- January 17 (Mon) Martin Luther King, Jr., Day (holiday, no classes).
- January 21 (Fri, 5:00 p.m.) Final Study List deadline. Final day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
- February 16 (Wed, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- February 21 (Mon) Presidents' Day (holiday, no classes; Law and GSB do hold classes).
- February 25 (Fri, 5:00 p.m.) Change of grading basis deadline.
- February 25 (Fri, 5:00 p.m.) Course withdrawal deadline.
- February 25 (Fri, 5:00 p.m.) Application deadline for Winter Quarter degree conferral.
- March 7-13 (Mon-Sun) End-Quarter Period.
- March 11 (Fri) Last day of classes (unless class meets on Sat.)
- March 11 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
- March 11 (Fri, noon) University thesis, D.M.A. final project, Ph.D. dissertation, last day to submit.
- March 11 (Fri, 5:00 p.m.) Late application deadline for Winter Quarter degree conferral ($50 fee).
- March 11-18 (Fri-Fri) Law School examinations
- March 14-18 (Mon-Fri) End-Quarter examinations.
- March 22 (Tue, 11:59 p.m.) Grades due.
- March 31 (Thu) Conferral of degrees, Winter Quarter.

SPRING QUARTER 2010-11

- February 6 (Sun) Axess opens for course enrollment.
- March 18 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term.
- March 28 (Mon) First day of quarter; instruction begins for all students.
- March 28 (Mon, 5:00 p.m.) Preliminary Study List deadline. Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Special Registration Status. The late study list fee is $200.
- March 28 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- April 8 (Fri, 5:00 p.m.) Application deadline for Spring Quarter degree conferral.
- April 15 (Fri, 5:00 p.m.) Final Study List deadline. Last day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.
- May 10 (Tue, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- May 20 (Fri, 5:00 p.m.) Change of grading basis deadline.
- May 20 (Fri, 5:00 p.m.) Course withdrawal deadline.
- May 27-June 2 (Fri-Thu) End-Quarter Period.
- May 30 (Mon) Memorial Day (holiday, no classes).
- May 31-June 7 (Tue-Tue) Law School examinations.
- June 1 (Wed) Last day of classes.
- June 1 (Wed) Last opportunity to arrange Incomplete in a course, at last class.
- June 1 (Wed, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
- June 1 (Wed, 5:00 p.m.) Late application deadline for Spring Quarter degree conferral ($50 fee).
- June 2 (Thu) Day before finals, no classes.
- June 3-8 (Fri-Wed) End-Quarter examinations.
- June 9 (Thu, noon) Grades for graduating students due.
- June 11 (Sat) Senior Class Day.
- June 11 (Sat) Baccalaureate Saturday.
- June 12 (Sun) Commencement. Conferral of degrees, Spring Quarter.
- June 14 (Tue, 11:59 p.m.) Grades for non-graduating students due.

SUMMER QUARTER 2010-11

- April 10 (Sun) Axess opens for course enrollment.
- June 10 (Fri) Course enrollment deadline to receive stipend or refund check on first day of term.
- June 20 (Mon) First day of quarter; instruction begins.
- June 20 (Mon, 5:00 p.m.) Preliminary Study List deadline.
- June 20 (Mon) Deadline to submit Leave of Absence for full refund. See Tuition and Refund Schedule: 2010-11 for a full refund schedule.
- July 1 (Fri, 5:00 p.m.) Final Study List deadline. Final day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
- July 4 (Mon) Independence Day observed (holiday, no classes).
- July 22 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund. SeeTuition and Refund Schedule: 2010-11 for a full refund schedule.
- July 29 (Fri, 5:00 p.m.) Change of grading basis deadline.
- July 29 (Fri, 5:00 p.m.) Course withdrawal deadline.
- July 29 (Fri, 5:00 p.m.) Application deadline for Summer Quarter degree conferral.
- August 6-11 (Sat-Thu) End-Quarter Period.
- August 11 (Thu) Last day of classes.
- August 11 (Thu) Last opportunity to arrange Incomplete in a course, at last class.
- August 11 (Thu, 5:00 p.m.) Late application deadline for Summer Quarter degree conferral ($50 fee).
- August 12-13 (Fri-Sat) End-Quarter examinations.
- August 16 (Tue, 11:59 p.m.) Grades due.
- August 26 (Fri, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
- September 29 (Thu) Conferral of degrees, Summer Quarter.

ACADEMIC CALENDAR 2011-12

First day of classes and last day of finals

- Autumn 2011-12: September 26 and December 16
- Winter 2011-12: January 9 and March 23
- Spring 2011-12: April 2 and June 13 (Commencement June 17)
- Summer 2011-12: June 25 and August 18

STANFORD BULLETIN

STANFORD BULLETIN

CONTENTS

STANFORD'S MISSION

The Stanford University Founding Grant (pdf), dated November 11, 1885, outlines the founding principles of the University. The Founding Grant describes the "Nature, Object, and Purposes of the Institution" founded by Leland Stanford and Jane Lathrop Stanford in these terms:

> *Its nature, that of a university with such seminaries of learning as shall make it of the highest grade, including mechanical institutes, museums, galleries of art, laboratories, and conservatories, together with all things necessary for the study of agriculture in all its branches, and for mechanical training, and the studies and exercises directed to the cultivation and enlargement of the mind;*
>
> *Its object, to qualify its students for personal success, and direct usefulness in life;*
>
> *And its purposes, to promote the public welfare by exercising an influence in behalf of humanity and civilization, teaching the blessings of liberty regulated by law, and inculcating love and reverence for the great principles of government as derived from the inalienable rights of man to life, liberty, and the pursuit of happiness.*

Each of Stanford's seven schools has its own mission statement and those can be found by following the links below:

- School of Earth Sciences Mission Statement
- Graduate School of Business Mission Statement
- School of Humanities and Sciences Mission Statement
- School of Engineering Mission Statement
- School of Medicine Mission Statement
- School of Education Mission Statement
- Stanford Law School Mission Statement

A BRIEF HISTORY OF STANFORD

On October 1, 1891, more than 400 enthusiastic young men and women were on hand for opening day ceremonies at Leland Stanford Junior University. They came from all over: many from California, some who followed professors hired from other colleges and universities, and some simply seeking adventure in the West. They came to seize a special opportunity, to be part of the pioneer class in a brand new university. They stayed to help turn an ambitious dream into a thriving reality. As a pioneer faculty member recalled, "Hope was in every heart, and the presiding spirit of freedom prompted us to dare greatly."

For Leland and Jane Stanford on that day, the University was the realization of a dream and a fitting tribute to the memory of their only son, who died of typhoid fever weeks before his 16th birthday, at an age when many young men and women were planning their college education.

From the beginning, it was clear that Stanford would be different. It was coeducational at a time when single-sex colleges were the norm. It was non-sectarian when most private colleges were still affiliated with a church. And it offered a broad, flexible program of study while most schools insisted on a rigid curriculum of classical studies. Though there were many difficulties during the first months (housing was inadequate, microscopes and books were late in arriving from the East), the first year foretold greatness. As Jane Stanford wrote in the summer of 1892, "Even our fondest hopes have been realized."

What manner of people were this man and this woman who had the intelligence, the means, the faith, and the daring to plan a major university in Pacific soil, far from the nation's center of culture?

LELAND AND JANE STANFORD

Although he was trained as a lawyer, Leland Stanford came to California in 1852 to join his five brothers in their mercantile business in the gold fields; Jane Stanford followed in 1855. They established large-scale operations in Sacramento, where Mr. Stanford became a leading figure in California business and politics. One of the "Big Four" who built the western link of the first transcontinental railroad, he was elected Governor of California and later United States Senator. One of the founders of the Republican Party in California, he was an ardent follower of Abraham Lincoln and is credited with keeping California in the Union during the Civil War.

THE CASE FOR A LIBERAL EDUCATION

Despite the enormous success they achieved in their lives, Governor and Mrs. Stanford had come from families of modest means and rose to prominence and wealth through a life of hard work. So it was natural that their first thoughts were to establish an institution where young men and women could "grapple successfully with the practicalities of life." As their thoughts matured, however, these ideas of "practical education" enlarged to the concept of producing cultured and useful citizens who were well prepared for professional success. In a statement of the case for liberal education that was remarkable for its time, Leland Stanford wrote, "I attach great importance to general literature for the enlargement of the mind and for giving business capacity. I think I have noticed that technically educated boys do not make the most successful businessmen. The imagination needs to be cultivated and developed to assure success in life. A man will never construct anything he cannot conceive."

STANFORD LANDS AND ARCHITECTURE

The campus occupies what was once Leland Stanford's Palo Alto Stock Farm and the favorite residence of the Stanford family. The Stanfords purchased an existing estate in 1876 and later acquired much of the land in the local watershed for their stock farm, orchards, and vineyards.

The name of the farm came from the tree El Palo Alto, a coast redwood (Sequoia sempervirens), that still stands near the northwest corner of the property on the edge of San Francisquito Creek. Many years ago, one of the winter floods that periodically rushed down the arroyo tore off one of its twin trunks, but half of the venerable old tree lives on, a gaunt and time-scarred monument. Named in 1769 by Spanish explorers, El Palo Alto has been the University's symbol and the centerpiece of its official seal.

The Stanfords gave their farm to the University in the Founding Grant of 1885. They personally financed the entire cost of the construction and operation of the University until 1903, when surviving founder Jane Stanford, who performed heroically in keeping the University functioning during difficult times following Leland Senior's death in 1893, turned over control to the Board of Trustees. The founding gift has been estimated at $25 million, not including the land and buildings.

The general concept for the University grounds and buildings was conceived by Frederick Law Olmsted, the designer of Central Park in New York. A brilliant young Boston architect, Charles Allerton Coolidge, further developed the concept in the style of his late mentor, Henry Hobson Richardson. The style, called Richardsonian Romanesque, is a blend of Romanesque and Mission Revival architecture. It is characterized by rectilinear sandstone

buildings joined by covered arcades formed of successive half-circle arches, the latter supported by short columns with decorated capitals.

More than one hundred years later, the University still enjoys 8,180 acres (almost 13 square miles) of grassy fields, eucalyptus groves, and rolling hills that were the Stanfords' generous legacy, as well as the Quadrangle of "long corridors with their stately pillars" at the center of campus. It is still true, as the philosopher William James said, during his stint as a visiting professor, that the climate is "so friendly . . . that every morning wakes one fresh for new amounts of work."

CURRENT PERSPECTIVES

In other ways, the University has changed tremendously on its way to recognition as one of the world's great universities. At the hub of a vital and diverse Bay Area, Stanford is less than an hour's drive or Caltrain trip south of San Francisco and just a few miles north of the Silicon Valley, an area dotted with computer and high technology firms largely spawned by the University's faculty and graduates. On campus, students and faculty enjoy new libraries, modern laboratories, sports facilities, and comfortable residences. Contemporary sculpture, as well as pieces from the Iris and B. Gerald Cantor Center for Visual Arts at Stanford University's extensive collection of sculpture by Auguste Rodin, can be found throughout the campus, providing unexpected pleasures at many turns.

The Cantor Center opened in January 1999. The center includes the historic Leland Stanford Junior Museum building, the Rodin Sculpture Garden and a new wing with spacious galleries, auditorium, cafe, and bookshop. At the Stanford University Medical Center, world-renowned for its research, teaching, and patient care, scientists and physicians are searching for answers to fundamental questions about health and disease. Ninety miles down the coast, at Stanford's Hopkins Marine Station on the Monterey Bay, scientists are working to better understand the mechanisms of evolution and ecological systems.

The University is organized into seven schools: Earth Sciences, Education, Engineering, the Graduate School of Business, Humanities and Sciences, Law, and Medicine. In addition, there are more than 30 interdisciplinary centers, programs, and research laboratories including: the Hoover Institution on War, Revolution and Peace; the Freeman Spogli Institute for International Studies; the Woods Institute for the Environment; the SLAC National Accelerator Laboratory; and the Stanford Program for Bioengineering, Biomedicine, and Biosciences (Bio-X), where faculty from many fields bring different perspectives to bear on issues and problems. Stanford's Bing Overseas Studies Program offers undergraduates in all fields remarkable opportunities for study abroad, with campuses in Australia, Beijing, Berlin, Florence, Kyoto, Madrid, Moscow, Oxford, Paris, and Santiago.

STANFORD PEOPLE

By any measure, Stanford's faculty, which numbers approximately 1,900, is one of the most distinguished in the world. It includes 16 living Nobel laureates, 4 Pulitzer Prize winners, 19 National Medal of Science winners, 135 members of the National Academy of Sciences, 251 members of the American Academy of Arts and Sciences, 88 members of the National Academy of Engineering, and 30 members of the National Academy of Education. Yet beyond their array of honors, what truly distinguishes Stanford faculty is their commitment to sharing knowledge with their students. The great majority of professors teach undergraduates both in introductory lecture classes and in small freshman, sophomore, and advanced seminars.

Enrollment in Autumn Quarter 2009 totaled 15,319, of whom 6,878 were undergraduates and 8,441 were graduate students. Like the faculty, the Stanford student body is distinguished. Approximately 18 people apply to Stanford for every student who enters the freshman class. 89 Stanford students have been named Rhodes Scholars and 76 have been named Marshall Scholars. The six-year graduation rate for freshmen who entered Stanford University full-time in 2003 was 95 percent. Stanford awarded 4,716 degrees in 2009-10, of which 1,670 were baccalaureate and 3,046 were advanced degrees.

Stanford students also shine in an array of activities outside the classroom, from student government to music, theater, and journalism. Through the Haas Center for Public Service, students participate in dozens of community service activities, such as tutoring programs for children in nearby East Palo Alto, the Hunger Project, and the Arbor Free Clinic.

In the athletic arena, Stanford students have enjoyed tremendous success as well. Stanford fields teams in 35 Division I varsity sports. Of Stanford's 97 NCAA team titles, 80 have been captured since 1980, placing Stanford at the top among the nation's most title-winning schools during that time. In 2009-10, Stanford won national championships in men's volleyball, women's tennis, and women's lightweight rowing. In 1999-2000, Stanford became the first school in Pac-10 history to win conference championships in football, men's basketball, and baseball in the same year. Athletic success has reached beyond The Farm, as well, with 48 Stanford athletes and coaches taking part in the 2008 Olympics in Beijing. Intramural and club sports are also popular; over 1,000 students take part in the club sports program, while participation in the intramural program has reached 9,000 with many active in more than one sport.

Stanford graduates can be found in an extraordinary variety of places: in space (Sally Ride, '73, Ph.D. '78, was the first American woman in space); on the news (Ted Koppel, M.A. '62, created the successful program Nightline); Broadway (David Henry Hwang, '79, received a Tony Award for his celebrated work, *M. Butterfly*); in San Francisco live theater (Carey Perloff, '80, artistic director of the American Conservatory Theater); at the helm of major corporations (Scott McNealy, '80, founded Sun Microsystems, Sergey Brin, M.S. '95, and Larry Page, M.S. '98, founded Google, and Chih-yuan (Jerry) Yang, '94, and David Filo, '90, founded Yahoo); and on the U.S. Supreme Court (two Stanford graduates, Anthony Kennedy, '58, and Stephen Breyer, '59, currently sit on the high court; Sandra Day O'Connor, '50, J.D. '52, recently retired from the high court, and William Rehnquist, '48, J.D.'52, served until his death in 2005).

LOOKING AHEAD

In her address to the Board of Trustees in July 1904, Jane Stanford said, "Let us not be afraid to outgrow old thoughts and ways, and dare to think on new lines as to the future of the work under our care." Her thoughts echo in the words of Stanford President John Hennessy, who said in his message in the 2002 Annual Report, "Our bold entrepreneurial spirit has its roots in the founders and our location in the pioneering West. In 1904, Jane Stanford defined the challenge for the young University ... Each generation at Stanford has taken this to heart and boldly launched new efforts, from the classroom to the laboratory ... We will continue to innovate and invest in the future ... The pioneering spirit that led the founders and early leaders to ‘dare to think on new lines' continues to guide us."

UNIVERSITY GOVERNANCE AND ORGANIZATION

Web site: http://www.stanford.edu/about/administration/

Stanford University is a trust with corporate powers under the laws of the State of California. The University is a tax-exempt entity under section 501(c)3 of the Internal Revenue Code. Under the provisions of the Founding Grant, the Board of Trustees (with a maximum membership of 35) is custodian of the endowment and all the properties of Stanford University. The board administers the invested funds, sets the annual budget and determines policies for operation and control of the university. Among the powers given to the trustees by the Founding Grant is the power to appoint a president. The board delegates broad authority to the president to operate the university and to the faculty on certain academic matters. The formal legal name is "The Board of Trustees of the Leland Stanford Junior University."

ACCREDITATION

Stanford University is accredited by the Accrediting Commission of Senior Colleges and Universities of the Western Association of Schools and Colleges.

THE BOARD OF TRUSTEES

Powers and Duties—The Board of Trustees is custodian of the endowment and all properties of the University. The Board administers the invested funds, sets the annual budget, and determines policies for the operation and control of the University. The powers and duties of the Board of Trustees derive from the Founding Grant, amendments, legislation, and court decrees. In addition, the Board operates under its own bylaws and a series of resolutions on major policy.

Membership—Board membership is set at 35, including the President of the University who serves ex officio and with vote. Trustees serve a five-year term and are eligible for appointment to one additional five-year term. At the conclusion of that term, a Trustee is not eligible for reelection until after a lapse of one year. Eight of the Trustees are elected or appointed in accordance with the Rules Governing the Election or Appointment of Alumni Nominated Trustees. They serve a five-year term.

Officers of the Board—The officers of the board are a chair, one or more vice chairs, a secretary, and an associate secretary. Officers are elected to one-year terms at the annual meeting in June, with the exception of the chair, who serves a two-year term. Their terms of office begin July 1.

Committees—Standing committees of the Board are Academic Policy, Planning, and Management; Alumni and External Affairs; Audit and Compliance; Development; Finance; Land and Buildings; the Medical Center; and Trusteeship. Special committees include Athletics, Compensation, Investment Responsibility, and Litigation.

Meetings—The Board generally meets five times each year.

MEMBERS OF THE BOARD OF TRUSTEES AS OF JULY 2010

- Robert M. Bass, President, Keystone Group LP, Fort Worth, TX
- William R. Brody, President, Salk Institute for Biological Studies, La Jolla, CA
- Mariann Byerwalter, Chairman, JDN Corporate Advisory, LLC, Daly City, CA
- James E. Canales, President and CEO, The James Irvine Foundation, San Francisco, CA
- James G. Coulter, Founding Partner, TPG Capital, LP, San Francisco, CA
- Lauren B. Dachs, President, S.D. Bechtel, Jr. Foundation, San Francisco, CA
- Steven A. Denning, Chairman, General Atlantic LLC, Greenwich, CT
- Bruce W. Dunlevie, General Partner, Benchmark Capital, Menlo Park, CA

EXECUTIVE OFFICERS

STANFORD ADMINISTRATION

- John Hennessy, *President*
- John Etchemendy, *Provost*
- David Demarest, *Vice President for Public Affairs*
- Randall S. Livingston, *Vice President for Business Affairs and Chief Financial Officer*
- William J. Madia, *Vice President, SLAC National Accelerator Laboratory*
- Robert Reidy, *Vice President for Land, Buildings and Real Estate*
- Martin Shell, *Vice President for Development*

- Howard Wolf, *Vice President for Alumni Affairs and President, Stanford Alumni Association*
- Debra Zumwalt, *Vice President and General Counsel*

CABINET

- Ann Arvin, *Vice Provost and Dean of Research*
- Persis Drell, *Director, SLAC National Accelerator Laboratory*
- Patricia Gumport, *Vice Provost for Graduate Education*
- Garth Saloner, *Dean, Graduate School of Business*
- Larry Kramer, *Dean, School of Law*
- Pamela Matson, *Dean, School of Earth Sciences*
- Philip Pizzo, *Dean, School of Medicine*
- James Plummer, *Dean, School of Engineering*
- John Raisian, *Director, Hoover Institution on War, Revolution and Peace*
- Richard Saller, *Dean, School of Humanities and Sciences*
- Deborah Stipek, *Dean, School of Education*

THE PRESIDENT

The Founding Grant prescribes that the Board of Trustees shall appoint the President of the University and that the Board shall give to the President the following powers:

- To prescribe the duties of the professors and teachers.
- To prescribe and enforce the course of study and the mode and manner of teaching.
- Such other powers as will enable the President to control the educational part of the University to such an extent that the President may justly be held responsible for the course of study therein and for the good conduct and capacity of the professors and teachers.

The President is also responsible for the management of financial and business affairs of the University, including operation of the physical plant.

The President is responsible for the safety of the campus and may take reasonable steps to protect the University including, but not limited to, barring people from campus who disrupt the normal business operations of the University or who present a threat to the safety of the University community. In extraordinary circumstances, the President may permanently discontinue students who present a threat to the health and safety of the University community.

The President appoints the following, subject to confirmation by the Board: Provost, Vice President for Business Affairs and Chief Financial Officer, Chief Executive Officer of Stanford Management Company, Vice President for Alumni Affairs and President of Stanford Alumni Association, Vice President for Development, Vice President for Public Affairs, Vice President and General Counsel, Vice President for the SLAC National Accelerator Laboratory, and Vice President for Land, Buildings, and Real Estate.

For additional information, see the Office of the President web site.

COMMITTEES AND PANELS APPOINTED BY THE PRESIDENT

University Committees are appointed by and are primarily responsible to the President. Such committees deal with matters on which the responsibility for recommendation or action is clearly diffused among different constituencies of the University. In accordance with the *Report on the Committee Structure of the University*, Academic Council members are appointed to University Committees on nomination of the Senate Committee on Committees and student members on nomination of the Associated Students of Stanford University (ASSU) Committee on Nominations. The President takes the initiative in the appointment of staff members to such committees. Although immediately responsible to the President, University Committees may be called upon to report to the Senate of the Academic Council or the ASSU. Charges to such committees are set by the President on recommendation of the Committee on Committees and others. There are five University Committees, as follows:

- Advisory Panel on Investment Responsibility and Licensing (APIR-L)
- Committee on Athletics, Physical Education, and Recreation (C-APER)
- Committee on Environmental Health and Safety (C-EH&S)
- Committee on Faculty Staff Human Resources (C-FSHR)
- Panel on Outdoor Art (P-OA)

Additionally there are eleven standing administrative panels which are appointed by the Vice Provost and Dean of Research, and which report through him/her to the President:

- Administrative Panel on Biosafety
- Administrative Panel on Human Subjects in Medical Research-01
- Administrative Panel on Human Subjects in Medical Research-03
- Administrative Panel on Human Subjects in Medical Research-04
- Administrative Panel on Human Subjects in Medical Research-05
- Administrative Panel on Human Subjects in Medical Research-06
- Administrative Panel on Human Subjects in Medical Research-07
- Administrative Panel on Human Subjects in Medical Research-08
- Administrative Panel on Human Subjects in Non-Medical Research-02
- Administrative Panel on Laboratory Animal Care
- Administrative Panel on Radiological Safety

THE PROVOST

The Provost, as the chief academic and budget officer, administers the academic program (instruction and research in schools and other academic units) and University services in support of the academic program (including budgeting and planning, land and buildings, libraries and information resources, and student affairs). In the absence or inability of the President to act, the Provost becomes the Acting President of the University. The Provost shares with the President conduct of the University's relations with other educational institutions, groups, and associations.

SCHOOLS OF THE UNIVERSITY

The program of instruction in the University is organized into seven schools: Graduate School of Business, School of Earth Sciences, School of Education, School of Engineering, School of Humanities and Sciences, Stanford Law School, School of Medicine.

The deans of the schools report to the Provost.

THE ACADEMIC COUNCIL

Web Site: http://academiccouncil.stanford.edu/

According to the Articles of Organization of the Faculty, originally adopted by the Board of Trustees in 1904 and revised in

1977, the powers and authority of the faculty are vested in the Academic Council consisting of:

1. the President of the University
2. tenure-line faculty: Assistant, Associate, and Full Professor
3. nontenure-line faculty: Associate and Full Professor followed by the parenthetical notation (Teaching), (Performance), (Applied Research), or (Clinical)
4. nontenure-line research faculty: Assistant Professor (Research), Associate Professor (Research), Professor (Research)
5. Senior Fellows in specified policy centers and institutes
6. certain specified officers of academic administration.

In the Spring of 1968, the Academic Council approved the charter for a Senate to be composed of 55 representatives elected by the Hare System of Proportional Representation and, as ex officio nonvoting members, deans of the academic schools and certain major officers of academic administration.

In the allocation of representation, each school constitutes a major constituency. The Senate may create from time to time other major constituencies as conditions warrant. Approximately one-half of the representatives are allocated to constituencies on the basis of the number of students in those constituencies and the remainder on the basis of the number of members of the Academic Council from each constituency.

COMMITTEES OF THE ACADEMIC COUNCIL

Committees of the Academic Council are created by and responsible to the Senate of the Academic Council and are appointed by the Committee on Committees of the Senate. Such committees deal with academic policy matters on which the primary responsibility for action and decision lies with the Academic Council or, by delegation, the Senate. Pursuant to the Senate's acceptance on September 25, 1969 of the *Report from the Committee on Committees on the Committee Structure of the University* and subsequent Senate action, the Senate has established seven standing Committees of the Academic Council, as follows:

- Committee on Academic Computing and Information Systems (C-ACIS)
- Committee on Graduate Studies (C-GS)
- Committee on Libraries (C-Lib)
- Committee on Research (C-Res)
- Committee on Review of Undergraduate Majors (C-RUM)
- Committee on Undergraduate Admissions and Financial Aid (C-UAFA)
- Committee on Undergraduate Standards and Policy (C-USP)

The Senate has also created a Planning and Policy Board of the Senate to consider long-range strategic issues of concern to the faculty. Information regarding charges to these committees is available from the Office of the Academic Secretary to the University.

ASSOCIATED STUDENTS OF STANFORD UNIVERSITY (ASSU)

Web Site: http://assu.stanford.edu

All registered students are members of the ASSU. They are governed by the ASSU Constitution and Bylaws, which was last revised and approved by student vote in April 2007.

Executive—The President and Vice President serve as the chief executives and representatives for the Association. The Financial Manager acts as business manager of the ASSU, CEO of Stanford Student Enterprises (SSE), and controller of the Students' Organizations Fund in which ASSU and student organization funds are deposited.

Legislative—There are two legislative bodies, an Undergraduate Senate and a Graduate Student Council, that work together to determine the Association's budgetary, financial, investment, business, and operating policies. In addition, each entity provides funding for student organizations, participates in recommending student appointments to University Committees and advocates on behalf of its constituents. Each body has 15 elected representatives and an elected chair. Both meet regularly to conduct Association business and discuss and act on issues pertinent to student life at Stanford.

ADMISSION AND FINANCIAL AID

UNDERGRADUATE ADMISSION

Stanford's undergraduate community is drawn from throughout the United States and the world. It includes students whose abilities, intellectual interests, and personal qualities allow them to benefit from and contribute to the University's wide range of teaching and research programs in the humanities, natural sciences, social sciences, and engineering. The University admits students who derive pleasure from learning for its own sake; who exhibit energy, creativity, and curiosity; and who have distinguished themselves in and out of the classroom.

Stanford welcomes a diverse community that cuts across many dimensions. The University does not use quotas of any kind in its admission process: it does not favor particular schools or types of schools, nor any geographic region, nor does it have any racial, religious, ethnic, or gender-related quotas. The University believes that a student body that is both highly qualified and diverse in terms of culture, socioeconomic status, race, ethnicity, gender, work and life experiences, skills, and interests is essential to the educational process. Applications are encouraged from those who would take the initiative and responsibility for their own education and who would provide additional dimensions to the University and its programs.

In order to preserve the residential character of the University and to maintain a favorable student-faculty ratio, Stanford has a limited undergraduate enrollment. The anticipated size of the freshman class is approximately 1,600-1,700 students who are admitted for Autumn Quarter enrollment. Approximately 20-40 transfer students, entering either the sophomore or junior class, are also typically admitted for Autumn enrollment if space allows. Each year, the University receives many more applications from qualified students than there are places available.

Stanford is committed to meeting the University-computed financial need of each admitted student, and admission decisions are made without regard to the applicant's financial status, except in the case of international students who are neither U.S. citizens nor U.S. registered permanent residents.

Application procedures, requirements, and deadlines vary from year to year. See the Undergraduate Admission web site at http://admission.stanford.edu for the most recent information and to begin an application online; or call the Office of Undergraduate Admission at (650) 723-2091.

NONMATRICULATED STUDY (UNDERGRADUATE)

Permission to enroll at Stanford as a nonmatriculated student during Autumn, Winter, and Spring quarters is not routinely approved except under extenuating circumstances. Nonmatriculated students authorized to enroll at Stanford University are not admitted to any Stanford degree program and are permitted to register for a specific period, usually one, two, or three quarters. Financial assistance from Stanford University is not available. Permission to enroll as a nonmatriculated student does not imply subsequent admission as a matriculated student.

Nonmatriculated status is a privilege and not a right. The University reserves the right, at its discretion, to withhold registration from, or require withdrawal for the program by, any student or applicant. In addition, nonmatriculated status may be revoked at the University's discretion (and after consideration of such factors as the University considers relevant in the particular case) at the end of any quarter of enrollment.

Students interested in nonmatriculated status during the Autumn, Winter, and Spring quarters should contact the Office of the University Registrar, not the Office of Undergraduate Admission. Note: newly admitted Stanford students (that is, those admitted to a Stanford degree program) are not eligible to enroll for nonmatriculated study for any quarter, except with the permission of the Vice Provost for Undergraduate Education (or his or her designee) under extenuating circumstances.

High School Nonmatriculated Students—Local high school students are eligible to be considered to attend Stanford as nonmatriculated students on a limited basis when they have exhausted all of the courses in a given discipline offered by their high school. Nonmatriculated high school students are permitted to enroll in one course per quarter and are required to pay the applicable tuition. Permission from the academic department and the University Registrar is required.

Summer Session—Students wishing to enroll as nonmatriculated students during Summer Quarter should contact the Summer Session Office for more information about the Summer Visitor Program. Admission to the Summer Visitor Program does not imply regular admission to Stanford for subsequent quarters or to one of Stanford's regular degree programs.

GRADUATE ADMISSION

MATRICULATED STUDY (GRADUATE STUDENTS)

Applicants from colleges and universities of recognized standing who hold a U.S. bachelor's degree or its equivalent are eligible to be considered for admission for graduate study. Details regarding degrees offered in specific departments are given on the Graduate Admissions web site at http://gradadmissions.stanford.edu. The number of applicants who can be admitted for work in a particular field of study at any time is limited by the facilities and programs of the school or department and by the number of matriculated students who continue their work in that field.

As with its undergraduate program, Stanford believes that a graduate student body that is both highly qualified and diverse in terms of culture, socioeconomic status, race, ethnicity, gender, work and life experience, skills, and interests is essential to the graduate educational process. It particularly welcomes applications from African Americans, Latinos, and Native Americans, as well as from others whose backgrounds and experiences would add additional dimensions to the University's educational programs.

THE COTERMINAL DEGREE PROGRAM

This program permits matriculated Stanford undergraduates to study for bachelor's and master's degrees simultaneously in the same or different departments. Application policies and procedures are established by each master's department. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable Advanced Placement (AP) and transfer credit. Applicants must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. This is normally the Winter Quarter prior to Spring Quarter graduation. Students who decide to apply for admission to master's programs after these deadlines are not eligible for the coterminal program and must apply through the regular graduate admission process.

APPLICATION PROCESS

Specific information regarding test requirements, other application procedures and requirements, and closing dates for filing applications and supporting credentials for admission and financial

aid are listed on the Graduate Admissions web site at http://gradadmissions.stanford.edu.

Graduate fellowship funds and assistantships are generally committed in March for the entire period comprising Autumn, Winter, and Spring quarters of the next academic year. Awards are seldom made to students who enter the University in Winter, Spring, and Summer quarters; such applicants must meet the same financial aid application requirements as those entering in Autumn Quarter.

Applications are to be submitted electronically for graduate programs in the schools of Business, Earth Sciences, Education, Engineering, Humanities and Sciences, and the Biosciences (non-M.D. programs in Medicine). Application instructions may be found at http://gradadmissions.stanford.edu.

For admission to the following programs, apply directly via the web sites below.

Business—Admission information is available for the M.B.A., Sloan Master's Program, and Ph.D. programs at http://www.gsb.stanford.edu/admissions/. All applications must be submitted electronically.

Law—Applicants for the JD degree should see the Law School Admissions web site at http://www.law.stanford.edu/program/degrees/jd/jd_application/. Applicants for LLM, JSM, JSD, and MLS degrees will find instructions at http://www.law.stanford.edu/program/degrees/advanced/application/. These applications are submitted to the Director of Admissions, School of Law, Stanford University, Stanford, CA 94305-8610. The Law School Admissions Test is required.

M.D. Program—Applicants should see the M.D. admissions web site at http://med.stanford.edu/md/admissions or, for additional information about the M.D. program, write to Stanford University School of Medicine, Office of M.D. Admissions, 251 Campus Drive, MSOB X3C01, Stanford, CA 94305-5404. The American Medical College Application Service (AMCAS) application is available at http://aamc.org. Applications and transcripts must be received by AMCAS by October 15. The Medical College Admissions Test is required.

Coterminal Master's Program—Interested Stanford undergraduates should contact directly the department in which they wish to pursue a master's degree and must adhere to the application deadlines described above.

NONMATRICULATED STUDY (GRADUATE STUDENTS)

Eligibility for consideration for nonmatriculated enrollment is restricted to two groups of applicants:

1. Stanford alumni who wish to return to Stanford to take courses that are prerequisites for Medical School admission, such as undergraduate Biology or Chemistry courses, are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, and three letters of recommendation are required. The decision to admit or deny is made by the Director of Graduate Admissions on the basis of relevant factors, including a 3.0 GPA and positive letters of recommendation.

   Applicants who graduated from other universities are not eligible to take the prerequisites for Medical School at Stanford.
2. Individuals who hold a bachelor's degree or equivalent and wish to take courses in a specific department that allows non-degree students are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, original transcripts, and three letters of recommendation are required. The decision to admit or deny is made by the chair of the department in which they wish to take courses and conveyed in writing to the Graduate Admissions Office. Applicants are notified of the decision by Graduate Admissions in the Office of the University Registrar.

Students who are granted nonmatriculated status are charged the 8-10 unit rate for each quarter in which they are enrolled, and may enroll for a maximum of a total of one academic year. Nonmatriculated status is a privilege and not a right; the nonmatriculated status may be revoked at the University's discretion (and after consideration of such factors as the University considers relevant in the particular case) at the end of any quarter of enrollment.

Nonmatriculated students are not permitted to enroll in certain courses, such as those in the following departments or programs: film and broadcasting courses in Art; all courses in Computer Science, Economics, Electrical Engineering, International Policy Studies, and the School of Medicine. Nonmatriculated students are expected to limit their enrollment to classes in the department in which they have been admitted. Nonmatriculated students receive academic credit for courses satisfactorily completed and may obtain an official transcript. As a general proposition, they may use University facilities and services. In classes of limited enrollment, students in degree programs have priority. Nonmatriculated students may apply for housing but have a low priority for assignment and are not guaranteed housing. No fellowships, assistantships, or Stanford loans are available for nonmatriculated students. Nonmatriculated students are not eligible for a leave of absence.

Nonmatriculated students who later apply for admission to a degree program must meet the standard admission requirements and should not anticipate special priority because of work completed as a nonmatriculated student. Students who are admitted to a degree program may apply a maximum of 15 units of nonmatriculated study toward the residency requirement for a master's degree and 30 units for the Engineer or Ph.D. degree, subject to the approval of the degree granting department.

Application forms for nonmatriculated status during the regular academic year are available from Graduate Admissions, Office of the University Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032. Deadlines for applying are included with the forms and are generally required two months before the start of the quarter.

Applicants interested in nonmatriculated student status for the Summer Quarter only should contact the Summer Session Office, 482 Galvez Mall, Stanford, CA 94305-6079.

POSTDOCTORAL SCHOLARS

Postdoctoral scholars are trainees in residence at Stanford University pursuing advanced studies beyond the doctoral level in preparation for an independent career. Postdoctoral scholars are appointed for a limited period of time and may participate in Stanford research projects and/or may be supported by external awards or fellowships. In all cases, their appointment at Stanford is for the purpose of advanced studies and training under the sponsorship of a Stanford faculty member.

Postdoctoral appointments require initial full-time engagement in the designated research or study and are generally restricted to those who have earned a terminal degree such as Ph.D. or J.D. within the last three years or a medical degree such as M.D., M.B.B.S., or D.D.S. within the last six years. Requests for exceptions for individuals who are beyond these limits, or have not been actively engaged in research as their primary effort, must include a written statement from the sponsoring faculty member indicating what additional training outside the primary area of effort the individual plans to receive, and the reasons for which the exception is requested. Postdoctoral scholars are appointed at Stanford for fixed terms, typically one year but that may eventually total up to four years, and are subject to a strict five-year rule (that is, that the total postdoctoral appointment period is not to exceed a total of five years of postdoctoral research experience at all institutions combined). In cases of combined training, only the years of active research at the postdoctoral level are counted for salary and other purposes. Postdoctoral scholars who begin a second postdoctoral appointment in a new field may have training extended to a maximum total of up to six years. Postdoctoral scholars may request temporary reductions in effort and pay due to temporary family or other conditions.

All postdoctoral scholars appointed at Stanford must be supported by Stanford grants and contracts, training grants, departmental or school fellowship funds, or external fellowships, or by a combination of these sources. Scholars may not be self-supporting. In addition, all postdoctoral scholars are eligible for a benefits package including medical, dental, life, and disability insurance. Postdoctoral scholars are normally appointed for 100% time.

Postdoctoral scholars must be registered at Stanford during every academic quarter of their appointment. Registration entails payment of a quarterly postdoctoral fee by the academic department or school appointing the scholar.

Prospective postdoctoral scholars should write directly to the department in which they wish to study or check for postdoctoral openings at http://postdocs.stanford.edu/prospects/index.html. For more information, see http://postdocs.stanford.edu.

VISITING RESEARCHERS

In limited instances, it is to the benefit of Stanford faculty to permit persons who have not yet obtained a Ph.D. (or its foreign equivalent) or who are not recognized experts in their fields to engage in research on the Stanford campus using Stanford research facilities. Such instances include students at other universities who are engaged in graduate-level research in a field of interest to the faculty member, a person doing a laboratory rotation as part of a larger research study or grant, or employees of companies who are conducting research which requires specialized equipment available only at Stanford.

In these instances, they may be eligible to apply to register as nonmatriculated graduate students in the visiting researcher category for one year. Invited persons must be qualified to conduct research at a level comparable to that of other Stanford graduate students, and the research must be of benefit to Stanford as well as to the visitor. Application for Admission forms for visiting researchers are submitted to Graduate Admissions, Office of the University Registrar by the department issuing the invitation.

Visiting researchers pay the Permit for Services Only (PSO) rate and may waive the University's student medical insurance plan only if they have comparable coverage with another carrier and submit proof of the comparable coverage prior to the term start date. They are not permitted to enroll in or audit any courses, but in quarters they are registered as visiting researchers they are eligible for the usual student benefits of nonmatriculated student status. However, in a few instances, visiting researchers may be invited to apply for nonmatriculated graduate non-degree student status. Once non-degree student status is granted, they must pay the regular tuition rate and will be eligible to enroll in courses. It is important to note, however, that permission to enroll in any specific class is not guaranteed in the non-degree approval process. Information on nonmatriculated non-degree student eligibility requirements and application forms can be obtained from Graduate Admissions, Office of the University Registrar.

Visiting researchers may apply for housing, but have a low priority for assignments. No Stanford fellowships, assistantships, or Stanford loans are available for visiting researchers. Stanford cannot certify visiting researchers for deferment of U.S. educational loans. Citizens of other countries who enter the United States to be visiting researchers at Stanford must have a DS-2019 Certificate (to apply for a J-1 visa) issued by the Bechtel International Center and must register each quarter, including Summer Quarter, to maintain their visa status.

See also the Research Policy Handbook, Procedures for Registering Visiting Researchers (RPH 9.7) at http://rph.stanford.edu/9-7.html.

HONORS COOPERATIVE PROGRAM

The Honors Cooperative Program (HCP) is a part-time graduate program offered by Stanford University. It allows working professionals, who may be eligible for tuition support through their employer, an opportunity to earn a graduate degree in any of the engineering programs, applied physics, statistics, or biomedical informatics, on a part-time basis.

Prospective HCP students apply to the department in which they would like to pursue a graduate degree through the normal graduate admissions process, and compete with all other applicants for admission to the program. Once admitted, HCP students arrange their part-time status and tuition payment options through the Stanford Center for Professional Development (SCPD). Courses are delivered online and broadcast locally. HCP students are also welcome to attend classes on campus, and some on-campus attendance may be required depending on the degree track.

To participate, HCP students must have the support of their employer as a participating company of the Stanford Center for Professional Development. For more information, see http://scpd.stanford.edu, or phone (650) 725-3000.

VISAS

In order to register as students, Stanford University requires that all those who are not U.S. citizens or U.S. registered permanent residents must obtain and maintain an appropriate visa status for their stay in the United States. The types of student visas sponsored by Stanford include the following:

1. Student Visa (F-1), obtained with an I-20 Certificate of Eligibility issued by Stanford University. The graduate student on an F-1 visa must enroll in a full course of study. The accompanying spouse or child enters on an F-2 visa. F-2 visa holders may not hold employment or engage in business under any circumstances. The F-2 spouse of an F-1 student may not engage in full-time study, and the F-2 child may only engage if the study is in an elementary or secondary school (kindergarten through twelfth grade). The F-2 spouse and child may engage in study that is avocational or recreational in nature.
2. Exchange Visitor Visa (J-1), obtained with a DS-2019 Certificate of Eligibility issued by Stanford University or a sponsoring agency. This visa is required for graduate students sponsored by certain agencies, foundations, and governments. In some cases, exchange visitors must leave the United States at the conclusion of their programs, may not change to non-student visa status, and may not apply for permanent residency in the United States until they have returned to their home countries for at least two years. The accompanying spouse or child of an exchange visitor enters on a J-2 visa and may, in some cases, obtain permission to work. J-2 dependents can apply for an Employment Authorization document from U.S. Citizenship and Immigration Services in order to be employed in the U.S. There is no regulatory restriction on study for J-2 dependents.

The Certificate of Eligibility (I-20/DS-2019) is issued to an admitted student after receipt of certification of adequate financial support. An F-1 student transferring from another U.S. school must obtain a new I-20 document from Stanford and complete a transfer process at the Bechtel International Center no later than 15 days after the effective date of the transfer. A J-1 student transferring from another U.S. school must obtain a new DS-2019 document from Stanford and complete a transfer process at the Bechtel International Center no later than 30 days after the effective date of the transfer.

Information on visas is sent to admitted graduate students in the *Welcome to Stanford* guide, mailed by Graduate Admissions, Office of the University Registrar. Information on visas for postdoctoral scholars and visiting researchers is available at the Bechtel International Center web site http://stanford.edu/dept/icenter.

HOLDS AND RESCISSION

By applying for admission to Stanford University academic programs, applicants certify that the information they provide in

their applications is their own work and, to the best of their knowledge, is complete and accurate. As also noted in the application materials, Stanford reserves the right to withdraw an offer of admission under certain circumstances, including: 1) if there is a significant drop in academic performance or a failure to graduate (in the applicant's current program); 2) if there has been a misrepresentation in or a violation of any of the terms of the application process; or 3) if the University learns that an applicant has engaged in behavior prior to the first day of class that indicates a serious lack of judgment or integrity. Indeed (and for example), Stanford may rescind an applicant's admission at any time, including after attendance and after degree conferral, if it determines, for example, that an individual has been admitted to Stanford on the basis of having provided false information or has withheld requested information. The University further reserves the right to require applicants to provide additional information and/or authorization for the release of information about any such matter, and to place a hold on registration and/or the conferral of a degree during the investigation into any such matter.

Similarly, Stanford University awards degrees on the basis of successful completion of all program requirements in accordance with Stanford's Honor Code requiring academic honesty and integrity. The University reserves the right to rescind any degree or honors designation (even after conferral) if the program requirements have not been so completed, and to place a hold on issuing a degree during the investigation into any such matter.

Students with unmet financial (or other university) obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released.

UNDERGRADUATE FINANCIAL AID

The University has a comprehensive need-based financial aid program for its undergraduates who meet various conditions set by federal and state governments, the University, and other outside agencies. Students are admitted without consideration of their financial circumstances, except in the case of international students.

In awarding its own funds, the University assumes that students and their parents accept the first and primary responsibility for meeting educational costs. Stanford's policy generally is to exclude undergraduates from being considered financially independent of their parents for University-administered scholarship aid unless a student is an orphan, a ward of the court, or at least 25 years of age. Spouses of married undergraduate students share in the responsibility to meet educational costs.

Stanford expects financial aid applicants to apply for and use resources from state, federal, and private funding sources, contribute from their earnings during nonenrollment periods (for example, summer), and use earnings from part-time employment during the academic year to meet educational expenses. If Stanford determines that an applicant and his or her family cannot meet these expenses, the University may offer financial aid funds to help meet these costs.

The amount of scholarship or grant funds offered to students is determined by the difference between the comprehensive cost of attendance (including tuition, fees, room, board and allowances for books, supplies, personal expenses, and travel) and the amount the student and parents can reasonably be expected to contribute toward educational costs based on family financial circumstances. Scholarships from outside sources may change the University's financial aid award. When a student receives outside scholarships, these funds reduce or eliminate the student's responsibility to contribute from job earnings. If the total in outside scholarships exceeds the student's responsibility (approximately $4,750 in most cases), the University then reduces institutional scholarship, dollar for dollar, by any additional amount.

Students are considered for University scholarship eligibility during their first four years of undergraduate enrollment. The Financial Aid Office (FAO) considers applicants for University scholarship eligibility beyond the twelfth quarter only if enrollment is essential in order to complete the minimum requirements for the first baccalaureate degree or major. Students who enroll for a fifth year in pursuit of a coterminal program, a minor, a second major, a second degree, or the B.A.S. degree are not eligible for University scholarship consideration but may apply for student loans and federal grants. Eligibility for federal student aid is limited to the equivalent of 15 quarters of full-time undergraduate enrollment, including course work taken at other colleges and universities.

For additional detailed information, refer to the FAO web site at http://financialaid.stanford.edu.

UNDERGRADUATE FINANCIAL AID APPLICATION AND AWARD NOTIFICATION PROCESS

Prospective freshmen	Regular Decision, February 15, 2011
Prospective transfers	March 15, 2011
Returning students	April 15, 2011

APPLICANT DOCUMENTS

U.S. citizens and U.S. registered permanent residents who wish to be considered for all available funding administered by Stanford should submit the following documents:

1. Free Application for Student Aid (FAFSA): file online at http://fafsa.ed.gov. Stanford's school code is 001305. Freshman applicants who are California residents must file the FAFSA and submit a GPA Verification Form to the California Student Aid Commission (CSAC) by March 2, 2011, for Cal Grant consideration.
2. CSS PROFILE application: file online at http://profileonline.collegeboard.com. Stanford's school code is 4704.
3. Copies of parents' 2010 W-2 forms. Continuing students should submit copies directly to the FAO. New applicants should submit signed copies of their parents' 2010 federal tax returns and W-2 forms to the CSS IDOC service.

U.S. citizens and U.S. registered permanent residents who wish to apply only for federal aid consideration do not need to file the CSS PROFILE; they should file the FAFSA and submit tax documents directly to the FAO.

New International students should submit the CSS PROFILE application online at http://profileonline.collegeboard.com. The Certification of Finances form available from our web site should be submitted directly to the FAO. Canadians should also submit tax documents as listed above. Continuing international students will be asked to submit the International Student Financial Aid Application and Certification of Finances directly to the FAO.

Students whose application materials are filed after the priority filing deadlines or who have not secured all external need-based funds such as Pell and Cal Grants can expect higher amounts of student responsibility in their financial aid packages.

Applicants and their parents are required to submit accurate and complete information on all application documents. The University participates in the U.S. Department of Education's Quality Assurance Program to evaluate the accuracy of aid application data. As part of this program, the FAO may request additional documentation to verify reported data. Students who fail to submit the requested documentation will have their financial aid funds withheld or canceled and their future registration placed on hold. Financial aid awards may change as a result of the verification process.

NOTIFICATION DATES

In December, the FAO notifies Restrictive Early Action applicants who apply by the November filing date of their estimated financial aid award. The FAO notifies freshman applicants who

apply by the February 15 filing date in early April. Transfer applicants who apply by the March 15 filing date are normally notified of their financial aid award within five days of their notice of admission.

The FAO sends notification of award eligibility to continuing and returning applicants early June through August 1. Applicants who file after the priority filing date may not have a financial aid award or funds secured for disbursement by the Autumn Quarter payment due date.

Financing Options—The federal PLUS loan program is available to help parents who are U.S. citizens or U.S. registered permanent residents cover all or part of the expected family contribution through a fixed-interest, long-term loan. PLUS loans are available to all parents who meet credit requirements regardless of their computed financial need. See the Financial Aid Office web site at http://financialaid.stanford.edu for details on the PLUS program. Parents should also contact their employers for information about what may be available to them as employees' benefits to help meet college costs.

GRADUATE FINANCIAL AID

Graduate students at Stanford receive funding from a variety of sources. University fellowships, research assistantships, and teaching assistantships are offered primarily to doctoral students. In some cases, master's students also may receive fellowships and assistantships. In addition, outside agencies provide fellowships to many graduate students at Stanford. Students without fellowships or assistantships, and those whose funding does not cover all of their costs, may need to use student loans, savings, other personal assets, a spouse's earnings, or parental support to meet their educational expenses.

FELLOWSHIPS AND ASSISTANTSHIPS

Fellowships, research assistantships, and teaching assistantships are important parts of the educational program for graduate students at Stanford. Schools and/or departments determine eligibility for University fellowships and assistantships on the basis of academic merit, program, and the availability of funds. Some departments admit only those students to whom they can offer support or who have guaranteed funds from outside sources. Other departments may offer admission without being able to provide fellowship or assistantship funding.

Fellowship and assistantship funding is provided so that students may focus on their studies; concurrent employment is therefore limited. Students with full assistantships are limited to eight additional hours of employment per week. Students on full fellowships may be paid for up to eight additional hours per week, or may hold a supplemental assistantship appointment up to a maximum of 25% with no additional hourly employment. International students who have Stanford assistantships may not work more than 20 hours per week, including the time required for their assistantship appointments. In Summer Quarter, graduate students who are not required to enroll full-time may be allowed additional employment.

Application procedures and deadlines for admission and University funding are described in the Guide to Graduate Admission and at http://gradadmissions.stanford.edu. Fellowships and assistantships are normally awarded to incoming students between March 15 and April 15, in accordance with the Council of Graduate Schools resolution. Acceptance of University funding obliges the student to inform the department of any additional funds received; in such cases, Stanford funding may be adjusted (see "Outside Fellowships" below). Recipients of all graduate fellowships and assistantships must enroll in courses for each quarter of their appointment. Students may make arrangements with Student Financial Services to have their assistantship salary credited directly to the University bill through a payroll deduction plan.

OUTSIDE FELLOWSHIPS

Many graduate students hold fellowships won in national competition from outside agencies such as the National Science Foundation. Information on application procedures and terms of such fellowship programs may be obtained from the applicant's current academic institution or the national office of the agency administering the program. A student who receives support from an outside source must notify his or her Stanford academic department immediately; Stanford funding may be adjusted.

STUDENT LOANS (GRADUATE STUDENTS)

Graduate students can apply for federal and private student loans through the University's Financial Aid Office (FAO). Available programs include federal Direct loans (also known as Stafford loans), federal Perkins loans, and federal graduate/professional PLUS loans. Information on these loan programs is available at http://financialaid.stanford.edu or by calling the FAO at (650) 723-3058. Students who are not U.S. citizens or U.S. registered permanent residents are not eligible for federal student loans.

Application—Students in the Schools of Business, Law, and Medicine (M.D. program) should consult their schools for loan application instructions. The following loan application requirements apply to graduate students in the Schools of Earth Sciences, Education, Engineering, Humanities and Sciences, and Medicine (Ph.D. only):

1. Free Application for Federal Student Aid (FAFSA); file online at http://fafsa.ed.gov. Stanford's school code is 001305.
2. Stanford Graduate Student Loan and Federal Work-Study Application; file online at http://financialaid.stanford.edu.

Students should complete the application process at least two months prior to the beginning of the quarter in which they need the funds. The FAO determines eligibility for student loans based on a review of FAFSA and application data, satisfactory academic progress, level of indebtedness, credit history, and availability of funds. Student loan eligibility may be affected by fellowship, assistantship, and other funding; total funding, including student loans, may not exceed the expense budget as determined by the FAO.

Emergency funds—Students may request a cash advance from the Student Services Center. Cash advances may not be used to pay University bills.

COTERMINAL STUDENT FINANCIAL AID

Coterminal students, who are concurrently pursuing bachelor's and master's degrees, may receive University fellowships and assistantships only after completing 180 units. Most private and federal graduate fellowships are awarded only to students who have received their bachelor's degrees. Stanford undergraduate scholarships and grants are reserved for students in their first four years of undergraduate study.

VETERANS' EDUCATIONAL BENEFITS

The Office of the University Registrar serves as the liaison between the University, its students, and the various federal, state, and local agencies concerned with veterans' benefits. Stanford certifies enrollment for students in degree seeking programs. Nonmatriculated and certificate programs are not eligible. All students eligible to receive veterans' benefits while attending the University are urged to complete arrangements with the appropriate agency in advance of enrollment. Students must have their department approve their study lists as meeting graduation requirements before the Office of the University Registrar can certify the courses for Veterans Affairs.

To comply with federal regulations concerning credit for previous training (38 CFR 21.4253), Stanford University is required to evaluate all previous education and training completed elsewhere to determine what credit, if any, should be granted to students eligible to receive Veterans Affairs (VA) educational benefits. Stanford is required to complete an evaluation; credit is granted when

appropriate. Credit is evaluated toward the degree program registered with Veterans Affairs as determined by the Office of the University Registrar in conjunction with the relevant academic department(s) or program(s). All relevant policies regarding transfer credit apply. In addition, this evaluation occurs each time a student's degree program is changed.

Subject to current federal and University guidelines, students eligible for receipt of VA educational benefits have their prior education and training evaluated up to the credit limits outlined in the "Residency Policy for Graduate Students" section of this bulletin. As an exception to that policy, students in master's programs in the schools of Earth Sciences, Education, Engineering, Humanities and Sciences, Law, Medicine, and Graduate Business are allowed a maximum of 6 transfer (quarter) units.

Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student's degree program or courses beyond those required for a specific degree program are not certified.

Stanford participates in the Yellow Ribbon provision of the Post 9/11 GI Bill (Ch. 33). If a student qualifies for Chapter 33 benefits at the 100% level, the student will receive additional funding through the Yellow Ribbon Program. Under this program, Stanford provides an annual award of $3,000 to supplement the Chapter 33 base tuition benefit. The VA matches Stanford's Yellow Ribbon contribution, so the student receives a combined total of $6,000 in additional funds. The amount of the institutional contribution is higher (up to $7,500) for graduate students enrolling at Graduate School of Business.

TUITION, FEES, AND HOUSING

Regular quarterly tuition for the 2010-11 academic year, payable Autumn, Winter, and Spring quarters, is as follows:

Undergraduate	$12,900
Graduate 11-18 units	$12,900
Graduate 8-10 units	$8,390
Graduate Engineering 11-18 units	$13,740
Graduate Engineering 8-10 units	$8,930
Graduate School of Business, first year MBA	$17,706
Graduate School of Business, second year MBA	$17,107
School of Medicine (M.D. Program—FY 2011 and beyond)*	$14,732
School of Medicine (M.D. Program—FY 2010 and earlier)*	$15,531
Stanford Law School	$14,960

*Ph.D. students in the Biomedical Sciences and in Graduate Business are assessed the regular graduate tuition rate.

For complete tuition information, see the Registrar's tuition web site at http://studentaffairs.stanford.edu/registrar/students/tuition-fees_10-11.

Regular tuition fees apply to the undergraduate Overseas Studies and Stanford in Washington programs. For Summer Quarter tuition rates and policies, see http://studentaffairs.stanford.edu/registrar/students/summer-tuition_10-11.

A coterminal student is subject to graduate tuition assessment and adjustment policies once graduate standing is reached. Coterminal students should see the student policies and procedures for tuition assessment, as described under "Residency and Unit Requirements in Coterminal Programs" in the “Graduate Degrees” section of this bulletin.

Eligibility for registration at reduced tuition rates is described below. Tuition exceptions may also be made for illness, disability, pregnancy, new-parent relief, or other instances at the discretion of the University. No reduction in tuition charges is made after the first two weeks of the quarter.

All students are advised, before registering at less than the regular full-tuition rate, to consider the effects of that registration on their degree progress and on their eligibility for financial aid and awards, visas, deferment of student loans, and residency requirements.

The University reserves the right to change at any time, without prior notice, tuition, room fees, board fees, or other charges.

UNDERGRADUATE TUITION

During Autumn, Winter, and Spring quarters, undergraduates are expected to register at the regular full-tuition rate.

During Summer Quarter, Stanford undergraduates may register on a unit-basis (minimum 3 units). For Summer Quarter tuition rates and policies, see http://registrar.stanford.edu/students/finances/summer.htm.

The following reduced-tuition categories can be requested by matriculated undergraduate students in the final stages of their degree program:

1. *Permit to Attend for Services Only (PSO)*—Undergraduates completing honors theses, clearing incompletes, or requiring a registration status, and who meet the PSO conditions listed in the "Special Registration Statuses (Undergraduate)" section of this

Bulletin, may petition for PSO status one time only in their terminal quarter. The PSO rate is $3,900 per quarter in 2010-11

2. *13th Quarter*—Undergraduates who meet the 13th Quarter conditions listed in the "Special Registration Statuses (Undergraduate)" section of this Bulletin may petition one time only to register for a minimum of eight units. For per-unit tuition rates, see the Registrar's tuition web site at http://registrar.stanford.edu/students/finances.

3. Graduation Quarter—Undergraduates may petition to register for Graduation Quarter registration status in the quarter in which they are receiving a degree if they are not using any University resources (including housing), have completed all University requirements, and meet the Graduation Quarter conditions listed in the "Special Registration Statuses (Undergraduate)" section of this bulletin. The Graduation Quarter rate is $100 per quarter in 2010-11.

GRADUATE STUDENT TUITION

Matriculated graduate students are expected to enroll for at least eight units during the Autumn, Winter, and Spring quarters. Schools and departments may set a higher minimum. During the Autumn, Winter, and Spring quarters, matriculated graduate students in most departments may register at the reduced 8-, 9-, or 10-unit tuition rate if their enrollment plans are accepted by their departments. Students in the Stanford Law School, in the MBA program in the Graduate School of Business, or the M.D. program in the School of Medicine, should consult appropriate school officers about tuition reduction eligibility.

Graduate students who are enrolled in more than one graduate degree at Stanford, where each program charges a different tuition, are charged:

1. the tuition associated with a degree in the doctoral/professional category, if the other degree is in the master's category. Those degrees in the doctoral or professional category for tuition purposes are the Ph.D., D.M.A., J.S.D., M.D., and J.D. degrees. Those degrees in the master's category for tuition purposes are the Engineer, M.A., M.S., M.P.P., M.B.A., M.F.A., L.L.M., M.L.S., and J.S.M. degrees.
2. the higher tuition rate, if both degrees are in the same category.
3. a University-approved tuition rate if the student is in a special program for which specific tuition agreements have been approved by the Faculty Senate (e.g., all joint degree programs (JDPs) or the Master of Science in Medicine program).

Honors Cooperative students register at the per-unit rate.

During the Summer Quarter registration is not required by Stanford University and does not substitute for registration during the academic year. Students are required to be enrolled Summer Quarter if, during that quarter, they will meet any of the criteria listed in the "Enrollment Requirements" section of the "Graduate Degrees" section of this bulletin. Graduate students who do enroll Summer Quarter may reduce their enrollment to a minimum of one unit (charged on a per-unit basis, with a minimum tuition charge at the 1-3 unit rate) unless the terms of a fellowship or other financial support, or of their particular degree program, require a higher level of enrollment. TGR students who enroll in summer pay the TGR rate and must enroll in the required zero-unit course. Students in the schools of Law, Business, or the M.D. program should consult appropriate school officers regarding summer enrollment requirements. Students possessing an F1 or J1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

Tuition exceptions may also be available for students who are faculty spouses, regular Stanford employees, or full-time educators in the Bay Area.

Nonmatriculated graduate students pay the same tuition rates as matriculated students, but must register for at least 8 units. Visiting researchers pay the Permit for Services Only (PSO) rate; they may not enroll in or audit courses. Within certain restrictions, postdoctoral scholars may enroll in courses if the appropriate unit rate for tuition is paid.

The following reduced-tuition categories can be requested by matriculated graduate students in the final stages of their degree programs:

1. *Terminal Graduate Registration (TGR)*—Doctoral students, master's students, and students pursuing Engineer degrees who have completed all degree requirements other than the University oral exam and dissertation (doctoral students) or a required project or thesis (Engineer or master's students) and meet the conditions listed in the "TGR" section of this bulletin may request Terminal Graduate Registration tuition status.
   Each quarter, TGR students must enroll in the 801 (for master's and Engineer students) or 802 (for doctoral students) course in their department for zero units, in the appropriate section for their adviser. TGR students register at a special tuition rate: $2,517 per quarter in 2010-11. TGR students may enroll in up to 3 units of course work per quarter at this tuition rate. Within certain restrictions, TGR students may enroll in additional courses at the applicable unit rate. The additional courses cannot be applied toward degree requirements since all degree requirements must be complete in order to earn TGR status.
2. *Graduate Tuition Adjustment*—Graduate students who need fewer than 8 units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency. This status may be used only once during a degree program. For per-unit tuition rates, see the Registrar's tuition web site at http://registrar.stanford.edu/students/finances.
3. *Graduation Quarter*—Registration is required for the term in which a student submits a dissertation or has a degree conferred. Students who meet the conditions listed in the "Graduation Quarter" section of this bulletin are eligible to be assessed a special tuition rate of $100 for the quarter in which they are receiving a degree.

INTERNATIONAL STUDENTS

F-1 or J-1 visas are required by the U.S. Department of Homeland Security. International students must be registered as full-time students during the academic year. Summer Quarter registration is not required unless the I-20/DS-2019 notes the Summer Quarter as the start date. International graduate students comply with immigration regulations while enrolled for partial tuition if their Stanford fellowships or assistantships require part-time enrollment, if they are in TGR status, or if they are in the final quarter of a degree program. Nonmatriculated international students must register for at least 8 units.

APPLICATION FEE

Contact the Undergraduate Admission Office for information about the undergraduate application fee and the Graduate Admission section of the Office of the University Registrar for the current graduate application fee. Application fees for the School of Law, the School of Medicine, and the Graduate School of Business vary by program. Fees are payable at the time of application and are not refundable.

ASSU FEES

The Associated Students of Stanford University (ASSU) fees are established by student vote in Spring Quarter. Fees directly fund activities of student organizations and not operations of ASSU. The 2010-11 fees are:

- *Undergraduates*—$111 per quarter

- *Graduate Students*—$28 for each of Autumn and Winter quarters; $29 for Spring Quarter.

ASSU fees are assessed each term and can be waived. Waivers can be requested during the first three weeks of each quarter on the ASSU web site at http://assu.stanford.edu. Waivers granted will result in a credit to the student's University bill.

DOCUMENT FEE

Stanford charges a one-time Document Fee to all students admitted to new degree or non-degree programs. The fee is paid once only, regardless of the number of degrees a student may ultimately pursue. It covers the cost of a variety of University administrative services such as enrollment and degree certification, course drops and adds done in Axess before published deadlines, diplomas, official transcripts and their production, and credential files maintained by the Career Development Center.

The document fee for students admitted to new degree or non-degree programs in 2010-11 is $200.

CAMPUS HEALTH SERVICE FEE

All students enrolled on the main Stanford campus are required to pay the Campus Health Service Fee. The Campus Health Service Fee covers most of the services provided by Vaden Health Center, including primary care medical visits, psychological evaluation and short-term therapy at Counseling and Psychological Services (CAPS), and health and wellness programs. The services provided by Vaden Health Center are not covered by Cardinal Care or a student's private health insurance. More information and answers to questions about the fee can be found at http://vaden.stanford.edu/fees/index.

HEALTH INSURANCE

The University requires all registered students to carry medical insurance to provide coverage for services not provided by Vaden Health Center. Students are enrolled in and charged for the Stanford student health insurance plan, Cardinal Care, unless they have completed waiver procedures by the waiver deadline.

For complete information on health insurance, see http://vaden.stanford.edu/insurance/.

Those who carry medical insurance through an alternate carrier are generally eligible for waiver of the Stanford student health insurance plan. For information on waiver procedures, see http://vaden.stanford.edu/insurance/using_your_own.html#waive.

SPECIAL FEES

New Student Orientation Fee—A fee is charged to all entering undergraduates for the costs of orientation, including room and board, and for the cost of class dues to provide funds for later activities of the class.

School of Law Course Materials Fee—A fee is charged each quarter to School of Law students for supplementary course materials.

Graduate School of Business M.B.A. Course Reader Fee—A fee is charged each quarter to M.B.A. students in the Graduate School of Business to cover the cost of in-class handouts and licensing fees.

Late Study List Fees—Charges are imposed for late submission of study lists. The amount is $200

Laboratory Fee—Students in chemistry laboratory courses are charged a nonrefundable fee.

Music Practice; Athletics, Physical Education, Recreation; and Dance—Courses for which special fees are charged are indicated in the *Time Schedule*.

Dissertation Fee—Each Ph.D. and D.M.A. candidate has the option to either submit electronically or on paper. Electronic submission is free. Students who choose to submit on paper are charged a fee to cover the cost of microfilming and binding the dissertation and the cost of publishing the abstract.

International Scholar Service Fee—A one-time fee for visa authorization documents is charged to international postdoctoral and visiting scholars.

PAYMENTS

By accepting Stanford's offer of admission and enrolling in classes, each student accepts responsibility for paying all debts to the University, including tuition and fees, for which he or she is liable.

Charges and credits from offices within the University are aggregated in a student's individual account and presented on the University bill. Student Financial Services sends the University bill electronically to students monthly via Stanford ePay. Students may view their account online 24 hours a day, seven days a week, via Stanford ePay at http://axess.stanford.edu. Payments should be made online through Stanford ePay. If necessary, the bill and a payment stub may be printed from Stanford ePay.

Term fees, such as tuition, fees, room, board, and health insurance, are due and must be received by the 15th of the month. Online payments via Stanford ePay can be made up to midnight PST on the 15th of the month. Mailed payments must be postmarked by 5:00 p.m. on the 15th of the month.

After the start of the term, adding units may result in additional tuition charges. Other fees, such as room damage repair charges, petition fees, late fees, lab fees, library fees, DMCA file-sharing related fees and other miscellaneous fees, are due after they are billed.

An individual's registration as a Stanford student constitutes his or her agreement to make timely payment of all amounts due.

FORMS OF PAYMENT

Stanford's standard method of payment is electronic check (eCheck) using the online service, Stanford ePay. No fee is associated with eCheck. See http://fingate.stanford.edu/students/universbill/resources/stanford_epay.html for ePay payment instructions. If online payment is impossible, students may mail or deliver payment to the Student Services Center.

Stanford accepts the following forms of payment: Stanford ePay eCheck, personal check, cashier's check, money order, travelers checks in U.S. funds drawn on U.S. banks, cash, and wire transfer (recommended for foreign students, see http://fingate.stanford.edu/students/universbill/payment_methods.html#wire_transfer for wire transfer instructions). Stanford does not accept credit cards or postdated checks.

ACCOUNT FEES AND ACTIONS

Late Fees—The University must receive the full amount due on or before the due date indicated on the bill. If full payment is not received by the due date, a late fee of 1.0% of the amount past due may be assessed. Anticipated aid (aid that has been accepted but not disbursed and is shown on the student account) reduces the total amount due prior to late fees being applied.

Holds—Accounts that become past due more than 30 days are subject to financial holds. A financial hold blocks transcripts, diplomas, and enrollment eligibility.

Nonsufficient Funds—Checks or eCheck payments returned due to insufficient funds have already been submitted twice to the bank. A non-refundable $25.00 administrative fee is assessed. In addition, student accounts are subject to holds and late payment penalties may apply.

Delinquent Accounts—Delinquent accounts may be reported to one or more of the national credit reporting agencies. Severely delinquent accounts may be referred to a collection agency and/or placed in litigation in accordance with state and federal laws. Students with delinquent accounts may be held responsible for collection costs, attorney fees, and court costs.

MEAL PLANS

For latest information see http://dining.stanford.edu.

Stanford University's Residential Education program promotes the philosophy that living and learning are integrated and that formal teaching, informal learning, and personal support in residences are integral to a Stanford education. Meals play a key role in this mission of community building, leading, and learning. Therefore, residents of specially designated University residence halls (Branner, Crothers/ Crothers Memorial, Florence Moore, Lakeside, Manzanita, Murray, Ricker, Stern, Toyon, Wilbur, and Yost) are required to participate in a Stanford Dining meal plan. Stanford Dining is committed to excellence by providing meal plans that offer significant value, the highest quality, and maximum flexibility of dining across campus.

Stanford Dining serves 19 meals each week: breakfast, lunch and dinner, Monday through Friday, and brunch and dinner on the weekends. There are three meal plans to choose from: 19 meals/week, 14 meals/week plus Meal Plan Dollars, and 10 meals/week plus Meal Plan Dollars.

Up to 50 Meal Plan Dollars are carried over into the following quarter for those enrolled in a Stanford Dining Meal Plan during the following quarter. This includes Autumn to Winter, Winter to Spring, Spring to Summer, and Summer to Autumn quarters).

Meal plans are billed on a quarterly basis, and the cost is determined by the number of service days in each quarter. Meal Plan Dollars provided as part of the 14 meal/week and 10 meal/week plans also vary, depending on the number of days in each quarter.

Stanford meal plan rates are available at the Stanford Dining web site.

REFUNDS

Students who withdraw from the University before the end of a term may be eligible to receive refunds of portions of their tuition under certain limited circumstances.

ANNULLED REGISTRATION

Students who take a leave of absence or summer annulment from the University voluntarily before the first day of instruction may have their registrations annulled. Tuition is refunded in full. Such students are not included in University records as having registered for the term and new students do not secure any privileges for admission for any subsequent quarter as returning students. An annulment does not automatically cancel health coverage unless the annulment is granted before the first day of instruction. Financial aid recipients should be aware that a proportion of any refund is returned to the various sources of aid.

CANCELLATION OF REGISTRATION OR SUSPENSION FOR CAUSE

Students who have their registrations canceled or are suspended from the University for cause generally receive refunds on the same basis as those receiving leaves of absence unless otherwise specified. A student whose registration is canceled less than one week after the first day of instruction for an offense committed during a preceding quarter receives a full refund of tuition fees.

INSTITUTIONAL INTERRUPTION OF INSTRUCTION

It is the University's intention to avoid the necessity of taking the actions described in this paragraph. However, should the University determine that continuation of some or all academic and other campus activities is impracticable, or that their continuation involves a high degree of physical danger to persons or property, activities may be curtailed and students requested or required to leave the campus. In such an event, arrangements are made as soon as practical to offer students the opportunity to complete their courses, or substantially equivalent work, so that appropriate credit may be given. Alternatively, the University may determine that students receive refunds on the same basis as those receiving leaves of absence, or on some other appropriate basis.

LEAVES OF ABSENCE

A student in good standing who desires or is required to take a leave of absence from the University after the first day of instruction, but before the end of the first 60 percent of the quarter (term withdrawal deadline), may file a petition for a leave of absence and tuition refund with the Student Services Center. A leave of absence after the first 60 percent of the quarter (term withdrawal deadline) is only granted for approved health and emergency reasons. For more information on leaves of absence, undergraduates should see the "Leaves of Absence and Reinstatement (Undergraduate)" section of this bulletin, and graduate students should see the "Leaves of Absence and Reinstatement (Graduate)" section of this bulletin.

ROOM AND MEAL PLAN REFUNDS

Students assigned to a University residence are subject to the terms of the University Residence Agreement, and are required to live in University Housing for the full duration of their signed contract. The text of the University Residence Agreement is available at http://www.stanford.edu/dept/rde/shs/res_agree.htm.

Room refunds are made only when students move out of the residence system and graduate from or cease to be enrolled at the University. Eligibility for refunds is listed in the Residence Agreement and in the online termination form at http://onlinetoc.stanford.edu. Filing a termination of occupancy form and moving out of Student Housing does not necessarily entitle a student to a refund. Students in all-male fraternities or all-female sororities are billed directly by the fraternity or sorority, and refunds are arranged between the student and the fraternity or sorority.

A meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. If a student uses the meal plan after that date, an additional daily charge incurs.

Any decision to refund prepaid room and meal plan charges or to waive liability for deferred charges is made at the sole discretion of the University. Students with questions about refunds should contact Housing Assignments for room refunds or the central office of Stanford Dining for residential meal plan refunds.

TUITION REFUND SCHEDULE

Students who take an approved leave of absence or summer annulment are eligible for a tuition refund during the first 60 percent of the quarter, until the term withdrawal deadline. Refunds are calculated on a per diem basis (including weekends and University holidays) starting the first day of instruction of each quarter. Tuition is charged on a daily basis (including weekends and holidays) through the first 60 percent of the quarter (term withdrawal deadline). After the first 60 percent of the quarter (term withdrawal deadline), students are liable for the full amount of tuition that they were charged. Health insurance charges are not refundable after the first day of instruction.

PER DIEM TUITION CHARGES FOR STUDENTS WHO TAKE A LEAVE OF ABSENCE

Quarter	*Autumn*	*Winter*	*Spring*	*Summer*
Undergraduate/ Graduate Full Tuition	$157.32	$174.32	$179.17	$238.89
Graduate 8-9-10 Unit Rate	$102.32	$113.38	$116.53	$155.37
Graduate Engr. Full Tuition	$167.56	$185.68	$190.83	$254.44
Graduate Engr. 8-9-10 Unit Rate	$108.90	$120.68	$124.03	$165.37
Last Date for Tuition Refund	Nov. 8. 2010	Feb. 17, 2011	May 11, 2011	July 23, 2011

For example: an undergraduate, who was charged the tuition rate of $12,900 for Autumn Quarter, becomes ill and informs the Student Services Center on the 10th day of the quarter that he or she wants to take a leave of absence. If the petition is approved, the student is charged for 10 days of tuition (10 days x $157.32 per day) or $1,573.20.

Separate schedules exist for students paying the medical, law, graduate business, or summer session rates. These 2010-11 schedules are available at the Registrar's tuition web page at http://studentaffairs.stanford.edu/registrar/students/tuition-fees_10-11.

Tuition refunds are calculated based on the date that the student's leave of action petition is submitted.

Students may not be entitled to any financial aid credits such as federal loans or University scholarships or grants that were previously placed on their accounts. The Financial Aid Office can confirm any amounts that may have been withdrawn from a student's account as a result of not being enrolled.

The amount refundable based on the criteria outlined above, an overpayment of fees, or financial aid awards in excess of fees is presented on the University bill in Stanford ePay. Refunds are processed routinely throughout the term. Refunds may be requested via HelpSU (http://helpsu.stanford.edu, request category Student Services, request type University Bill/Student Account), or in person or by phone at the Student Services Center.

Direct deposit is Stanford University's standard method for providing student refunds. Students are advised to maintain up-to-date direct deposit details in Axess for fast, convenient receipt of funds. Students who have not established direct deposit receive a check mailed to the mailing address as recorded in Axess. Checks for those without a mailing address are sent to the permanent home address. Checks cannot be picked up on campus as they are mailed from a Wells Fargo processing center.

Tuition payments made to the University under certain specific tax benefit programs prohibit tuition refunds to the student or donor. For more information about these programs, contact the Student Services Center.

HOUSING

University housing is available to enrolled Stanford students. Student Housing, a division of Residential and Dining Enterprises, is responsible for: managing, maintaining, and cleaning the physical plant of student residences; assigning students to housing; and operating the regional housing front desks. Information on University housing assignments, options, policies, application procedures, and deadlines may be obtained from Housing Assignments online at http://studenthousing.stanford.edu, by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 725-2810, or by email at housingassignments@lists.stanford.edu. Information regarding off-campus housing may be obtained from Community Housing at http://offcampus.stanford.edu, by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 723-3906, or by email at communityhousing@lists.stanford.edu. For other housing related information, email studenthousing@lists.stanford.edu or phone the main student housing office at (650) 725-1600.

The department of Residential Education (http://www.stanford.edu/dept/resed, 650-725-2800) and the Graduate Life Office (http://www.stanford.edu/group/glo, 650-723-1171) are responsible for planning educational programs, counseling, and crisis intervention. In addition, Residential Education is responsible for the administration of local undergraduate residence offices.

HOUSING RATES

Complete information on housing is available at http://housing.stanford.edu. Campus housing rates are generally below local area market rents.

- See undergraduate housing to apply for 2010-11 housing; rates are available at http://housing.stanford.edu/ugrad/ugrad_rates_10.htm.
- See graduate housing to apply for 2010-11 housing; rates are available at http://www.stanford.edu/dept/rde/shs/pdfs/grad_rates_10.pdf.

All rates are per student and include utilities and coinless laundry. Room rates are charged quarterly on the University Bill. Information on payment options and procedures is discussed in housing assignment information from Housing Assignments and is available in complete detail from the Student Services Center, 2nd floor of Tresidder Memorial Union, 459 Lagunita Drive, Stanford University, Stanford, CA 94305-6036.

A quarterly house dues fee for students is generally determined by the local residence staff and/or residents of the house and may be included with room and board charges on their University Bill.

Students who live in housing are automatically assessed a telecommunications fee on their University Bill that covers in-room network connections and a land-line phone with basic telephone service.

UNDERGRADUATE RESIDENCES

Approximately 95 percent of undergraduates live in University housing, not counting students studying abroad during the academic year. All freshmen and transfers are required to live in University residences for educational reasons and are automatically assigned housing following admission.

Residence assignments for continuing undergraduates are made on the basis of an annual lottery, called the Draw, and quarterly waiting lists. Undergraduates are guaranteed four years of University housing (two or three years for transfer students based on their entering class standing) if:

1. they are in compliance with the University housing agreement and University polices
2. they apply by the appropriate Draw deadlines
3. *and*, they are willing to live anywhere on campus.

Undergraduate residences include traditional residence halls, language and culture residences, crosscultural theme houses, student-managed and cooperative houses, apartments, suites, fraternities, and sororities.

GRADUATE RESIDENCES

Web Site: http://www.stanford.edu/dept/rde/shs/grad/apply_10.htm

Assignment to Graduate Residences—Over 57 percent of matriculated graduate students live in Stanford student housing. Residence assignments are made on the basis of an annual lottery and quarterly waiting lists. New matriculated students are guaranteed University housing if:

1. they are in compliance with the University housing agreement and University policies;

2. they apply by the first round application deadline for the Autumn term; and
3. they are willing to live in any residence for which they are eligible.

At Stanford University, new matriculated students are students who are in a graduate program for the first time. Students starting a second graduate degree are not considered new students and therefore are not guaranteed housing.

After the first year, continuing matriculated graduate students are given priority for housing for a specified number of years based on their academic degree program. Master's students are given one additional year of limited priority for housing. Doctoral students are given five additional years of limited priority for housing. Limited priority years are not automatically cumulative, so students do not receive additional years of limited priority for subsequent degrees. If a student completes a master's program and then moves to a doctoral program, they receive four additional limited priority years, which is the difference between the allocation for a master's and a doctoral program. Students who live in residences that are open year-round and who remain in continuous occupancy in their rooms or apartments may renew their contracts annually if they meet certain eligibility requirements. Students who live in residences that are open only during the academic year, or who want to change residences, re-enter the lottery each year. Approximately 80% of continuing student applicants are assigned housing each year.

Single graduate students may request assignment to graduate apartments and residence halls, or to spaces in six undergraduate cooperative houses.

Couples without children may request assignment to either furnished or unfurnished one-bedroom apartments. Couple housing is available to students who are married and to students who have a same-sex or opposite-sex domestic partner. At Stanford University, a domestic partnership is defined as an established, long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

One-, two-, and three-bedroom apartments (furnished and unfurnished) are provided for students with children, based on the number of dependents. Housing for students with children is available to married couples, domestic partners, and single parents who have dependent children living with them. Housing is not provided for extended families, including the parents and siblings of students, or live-in day care staff.

COMMUNITY HOUSING

Community Housing maintains computerized listings of private rooms, houses, and apartments in surrounding communities that are available to students who want to live off-campus. Students must make rental arrangements directly with landlords. Information on community housing may be obtained from Community Housing at http://offcampus.stanford.edu, by mail or in person at 630 Serra Street, Suite 110, Stanford University, Stanford, CA 94305-6034, by telephone at (650) 723-3906, or by email at communityhousing@lists.stanford.edu. During early September, temporary accommodations are available in student residence halls at a modest charge for students searching for off-campus housing for Autumn Quarter. Contact Stanford Conference Services for more information at (650) 725-1429.

TRANSFER WORK

Stanford accepts a small number of undergraduate transfer students each year. Requirements for admission are described as part of the undergraduate application process and are listed on the Registrar's web site. Stanford University has a designated adviser who coordinates support for transfer students.

The Office of the University Registrar evaluates and records the amount of transfer credit and advanced placement test credit an undergraduate can apply toward graduation requirements. Stanford awards credit based on course work completed at U.S. colleges or universities accredited by a regional accrediting association; or course work completed at international colleges or universities of recognized standing. Credit may also be awarded for certain Advanced Placement programs, International Baccalaureate Program, GCE, French Baccalaureate, and the German Abitur examinations.

See the "Advanced Placement" section of this Bulletin for information concerning Stanford's policy on credit for Advanced Placement work. Details on how to request credit for advanced placement examinations are available at the Registrar's Advanced Placement site.

UNDERGRADUATE TRANSFER WORK

Academic credit for work done elsewhere may be allowed toward a Stanford bachelor's degree under the following rules and conditions:

1. Credit may be granted for work completed at institutions in the U.S. only if the institutions are accredited.
2. Study in institutions outside the U.S., when validated by examination results, tutorial reports, or other official evidence of satisfactory work, may be credited toward a Stanford bachelor's degree, subject to the approval of the credit evaluator and the appropriate departments.
3. Credit is officially allowed only after the student has been unconditionally admitted to Stanford.
4. Credit is allowed for work completed at institutions in the U.S. only on the basis of an official transcript received by the Registrar at Stanford directly from the institution where the credit was earned.
5. Credit from another institution may be transferred for courses which are substantially equivalent to those offered at Stanford University on the undergraduate level, subject to the approval of the credit evaluator. A maximum of 20 quarter units may represent courses which do not parallel specific undergraduate courses at Stanford, again, subject to the approval of the credit evaluator as to quality and suitability.
6. Course work cannot duplicate, overlap, or regress previous work.
7. Transfer course work cannot count towards secondary school diploma and/or graduation requirements.
8. To fulfill GER requirements through transfer work, the course must match a specific Stanford course that fulfills the same GER requirement, be a minimum of three quarter units, and be taken for a letter grade.
9. The credit allowed at Stanford for one quarter's work may not exceed the number of units that would have been permissible for one quarter if the work had been done at Stanford; for work done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence.
10. Credit is allowed at Stanford for work graded 'A,' 'B,' 'C,' or 'Pass' (where 'Pass' is equivalent to a letter grade of 'C' or above), but not for work graded 'D' or below.
11. No more than 45 (90 for transfer students) quarter units of credit for work done elsewhere may be counted toward a bachelor's degree at Stanford.
12. Credit earned in extension, correspondence, and online courses is transferable only if the university offering the courses allows that credit toward its own bachelor's degree. Such credit is limited to a maximum of 45 quarter units for extension courses, a maximum of 15 quarter units for correspondence and online study, and a maximum of 45 quarter units for the combination of extension, correspondence, and online courses.
13. Credit earned in military training and service is not transferable to Stanford, unless offered by an accredited college or university in the U.S. and evaluated as above by the credit evaluator.

GRADUATE RESIDENCY TRANSFER CREDIT

After at least one quarter of enrollment, students pursuing an Engineer, D.M.A., or Ph.D. may apply for transfer credit for graduate work done at another institution. Engineer candidates who also earned their master's at Stanford are not eligible for transfer residency credit, nor are any master's degree students.

Students enrolled at Stanford who are going to study elsewhere during their degree program should obtain prior approval of any transfer credit sought before their departure.

The following criteria are used by the department in determining whether, in its discretion, it awards transfer credit for graduate-level work done at another institution:

1. Courses should have comparable Stanford counterparts that are approved by the student's department. A maximum of 12 units of courses with no Stanford counterparts and/or research units may be granted transfer credit.
2. The student must have been enrolled at the other institution in a student category which yields graduate credit. The maximum amount of credit given for extension and nonmatriculated (non-degree) courses is 12 units. No transfer credit is given for online or correspondence work.
3. Courses must have been taken after the conferral of the bachelor's degree. The only exception is for work taken through programs structured like the Stanford coterminal bachelor's/master's program.
4. Courses must have been completed with a grade point average (GPA) of 3.0 (B) or better. Pass grades are accepted only for courses for which letter grades were not an option and for which the standard of passing is 'B' quality work.
5. Courses must have been taken at a regionally accredited institution in the U.S. or at an officially recognized institution in a foreign country. Courses taken at foreign universities must be at the level of study comparable to a U.S. graduate program.

The Application for Graduate Residency Credit is reviewed by the department and the Office of the University Registrar. For transfer credit done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence.One semester unit or hour usually equals 1.5 quarter units.

UNDERGRADUATE DEGREES AND PROGRAMS

DEGREE PROGRAMS

BACHELOR OF ARTS (B.A.), BACHELOR OF SCIENCE (B.S.)

Stanford University confers the degree of Bachelor of Arts (B.A.) or the degree of Bachelor of Science (B.S.) on those candidates who have been recommended by the Committee on Undergraduate Standards and Policy (C-USP), who have applied in advance for conferral of the degree, and who have fulfilled the following requirements:

1. A minimum of 180 units of allowable University work. (As described below, units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 180-unit minimum.)
2. The Writing, General Education, and Language Requirements (see below).
3. Curricular requirements of at least one major department or program and the recommendation of the department(s). (Descriptions of curricular and special degree requirements are included in each department's section of this bulletin.)
4. *Students admitted as freshmen*—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
5. *Students admitted as transfers*—A minimum of 90 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 90 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

Stanford confers the Bachelor of Science degree on candidates who fulfill these requirements in the School of Earth Sciences, in the School of Engineering, or in the departments of Applied Physics, Biology, Chemistry, Mathematics, or Physics in the School of Humanities and Sciences. The University also awards B.S. degrees to candidates in the Program in Science, Technology, and Society; in the Program in Mathematical and Computational Science; in the Program in Symbolic Systems; and, when appropriate, in the Program for Individually Designed Majors. Candidates who fulfill these requirements in other schools or departments receive the Bachelor of Arts degree.

Students who complete the requirements for two or more majors, which ordinarily would lead to the same degree (B.A. or B.S.), should review "The Major" section of this bulletin to ensure that they have an understanding of the requirements for multiple or secondary majors.

BACHELOR OF ARTS AND SCIENCE (B.A.S.)

The University confers the degree of Bachelor of Arts and Science (B.A.S.) on candidates who have completed, with no overlapping courses, the curricular requirements of two majors which ordinarily would lead to different bachelor's degrees (that is, a Bachelor of Arts degree and a Bachelor of Science). These students must have applied in advance for graduation with the B.A.S. degree instead of the B.A. or B.S. degree, been recommended by the Committee on Undergraduate Standards and Policy (C-USP), and have fulfilled requirements 1, 2, and 4/5 above in addition to the requirements for multiple majors.

Students who cannot meet the requirements for both majors without overlapping courses are not eligible for the B.A.S., but may apply to have a secondary major recorded on their transcripts. (See "The Major" in the "Undergraduate Degrees and Programs" section of this bulletin.)

DUAL BACHELOR'S DEGREES (CONCURRENT B.A. AND B.S.)

A Stanford undergraduate may work concurrently toward both a B.A. and a B.S. degree. To qualify for both degrees, a student must complete:

1. A minimum of 225 units of University work. Units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 225 minimum.
2. The requirements of each major without applying any course towards the requirements of more than one major, according to "Multiple Majors" section of this bulletin. The Major-Minor and Multiple Major Course Approval Form is required for graduation for students with dual degrees.
3. The Writing, General Education, and Language requirements.
4. The curricular requirements of two majors (one of which leads to a Bachelor of Arts degree and the other to a Bachelor of Science degree).
5. *Students admitted as freshmen*—A minimum of 180 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 180 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
6. *Students admitted as transfers*—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

A student interested in dual bachelor's degrees should declare them in Axess no later than two quarters in advance of completing the program.

Students who do not meet the higher unit and residence requirements of the dual degree option may be eligible instead for the B.A.S. degree as described above.

SECOND BACHELOR'S DEGREE

Stanford does not award a second Bachelor of Arts degree to an individual who already holds a Bachelor of Arts, nor a Bachelor of Science degree to an individual who already holds a Bachelor of Science degree. However, the holder of a Bachelor of Arts degree from Stanford may apply to the C-USP Subcommittee on Academic Standing for admission to candidacy for a Bachelor of Science degree, and the holder of a Bachelor of Science degree from Stanford may apply for candidacy for a Bachelor of Arts degree. The C-USP Subcommittee on Academic Standing determines whether the application for a second degree may be approved and/or the conditions a student must meet in order to be allowed to earn a second degree. A recommendation of the major department for the second bachelor's degree must accompany the application.

Generally, a holder of a B.A. or B.S. degree may not apply for the Bachelor of Arts and Sciences degree, although a student may submit a petition for exception. The Office of the Vice Provost for Undergraduate Education, Sweet Hall, reviews these petitions. A student approved for this program may register as an undergraduate and is subject to the current rules and regulations affecting undergraduates. Requirements for a second Stanford bachelor's degree are the same as those described above for dual bachelor's degrees.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

The coterminal degree program allows undergraduates to study for a master's degree while completing their bachelor's degree(s) in the same or a different department. Undergraduates with strong academic records may apply for admission to a coterminal master's program upon completion of 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Full-time enrollment during Summer Quarters, as well as allowable undergraduate transfer credit, are also counted towards quarters of undergraduate study. Students who wish to apply for a master's program after these deadlines must apply through the regular graduate admissions process.

To apply for admission to a coterminal master's program, students must submit to the prospective graduate department the following: coterminal application, statement of purpose, preliminary program proposal, two letters of recommendation from Stanford professors, and a current Stanford transcript. Graduate Record Examination (GRE) scores or other requirements may be specified by the prospective department.

For coterminal students, the quarter following completion of 12 full-tuition undergraduate quarters is identified as the first graduate quarter for tuition assessment. Beginning with this quarter, coterminal students are subject to graduate student policies and procedures (including those described in the "Graduate Degrees" section of this bulletin) in addition to undergraduate minimum progress standards. These policies include continuous registration or leaves of absence for quarters not enrolled and minimal progress guidelines.

In the first graduate quarter, a coterminal student is assigned an adviser in the master's department for assistance in planning a program of study to meet the requirements for the master's degree. The plan is outlined on the Program Proposal for a Master's Degree, which is approved by the master's department by the end of the first graduate quarter. Authorizations for master's programs expire three calendar years from the first graduate quarter. An extension requires review of academic performance by the department.

The specific University residency, unit requirement, and additional policies for a bachelor's/master's program are described under Coterminal Programs Residency Requirement in the "Graduate Degrees" section of this bulletin. For University application forms, see
http://studentaffairs.stanford.edu/registrar/publications#Coterm.

Conferral of each degree is applied for separately by the deadlines given in the Academic Calendar at http://studentaffairs.stanford.edu/registrar/academic-calendar. The master's degree must be conferred simultaneously with, or after, the bachelor's degree.

DEGREE REQUIREMENTS

A LIBERAL EDUCATION

As do all major universities, Stanford provides the means for its undergraduates to acquire a liberal education, an education that broadens the student's knowledge and awareness in each of the major areas of human knowledge, that significantly deepens understanding of one or two of these areas, and that prepares him or her for a lifetime of continual learning and application of knowledge to career and personal life.

The undergraduate curriculum at Stanford allows considerable flexibility. It permits each student to plan an individual program of study that takes into account personal educational goals consistent with particular interests, prior experience, and future aims. All programs of study should achieve some balance between depth of knowledge acquired in specialization and breadth of knowledge acquired through exploration. Guidance as to the limits within which that balance ought to be struck is provided by the University's General Education Requirements and by the requirements set for major fields of study.

These educational goals are achieved through study in individual courses that bring together groups of students examining a topic or subject under the supervision of scholars. Courses are assigned credit units. To earn a bachelor's degree, the student must complete at least 180 allowable units and, in so doing, also complete the Writing Requirement, the General Education Requirements, the Language Requirement, and the requirements of a major.

The purpose of the Writing Requirement is to promote effective communication by ensuring that every undergraduate can write clear and effective English prose. Words are the vehicles for thought, and clear thinking requires facility in writing and speech.

The Language Requirement ensures that every student gains a basic familiarity with a foreign language. Foreign language study extends the student's range of knowledge and expression in significant ways, providing access to materials and cultures that otherwise would be out of reach.

The General Education Requirements provide guidance toward the attainment of breadth and stipulate that a significant share of a student's work must lie outside an area of specialization. These requirements ensure that every student is exposed to different ideas and different ways of thinking. They enable the student to approach and to understand the important ways of knowing how to assess their strengths and limitations, their uniqueness, and, no less important, what they have in common with others.

Depth, the intensive study of one subject or area, is provided through specialization in a major field. The major relates more specifically to a student's personal goals and interests than do the general requirements outlined above. Stanford's curriculum provides a wide range of standard majors through its discipline-oriented departments, a number of interdisciplinary majors in addition to department offerings, and the opportunity for students to design their own major programs.

Elective courses, which are not taken to satisfy requirements, play a special role in tailoring the student's program to individual needs. For most students, such courses form a large portion of the work offered for a degree. Within the limitations of requirements, students may freely choose any course for which previous studies have prepared them.

Following are more detailed descriptions of these various requirements and the rationales upon which they are based.

GENERAL EDUCATION REQUIREMENTS

PURPOSE

The General Education Requirements are an integral part of undergraduate education at Stanford. Their purpose is: 1) to introduce students to a broad range of fields and areas of study within the humanities, social sciences, natural sciences, applied sciences, and technology; and 2) to help students prepare to become responsible members of society. Whereas the concentration of courses in the major is expected to provide depth, the General Education Requirements have the complementary purpose of providing breadth to a student's undergraduate program. The requirements are also intended to introduce students to the major social, historical, cultural, and intellectual forces that shape the contemporary world.

Fulfillment of the General Education Requirements in itself does not provide a student with an adequately broad education any more than acquiring the necessary number of units in the major qualifies the student as a specialist in the field. The major and the General Education Requirements are meant to serve as the nucleus around which the student is expected to build a coherent course of study by drawing on the options available among the required and elective courses.

Information regarding courses that have been certified to fulfill the General Education Requirements, and regarding a student's status in meeting these requirements, is available at the Student Services Center. Course planning and advising questions related to

the General Education Requirements should be directed to Undergraduate Advising and Research.

It is the responsibility of each student to ensure that he or she has fulfilled the requirements by checking in Axess. This should be done at least two quarters before graduation.

Students should be very careful to note which set of General Education Requirements apply to them. The date of matriculation at Stanford determines which requirements apply to an individual student.

During Autumn Quarter 2004-05, the Academic Senate approved modifications to undergraduate General Education Requirements that became effective Autumn Quarter 2005-06 for all matriculated undergraduates who entered Stanford in Autumn Quarter 2004-05 or later.

The purpose of these modifications was 1) to give students a fuller and more articulate understanding of the purposes of the requirements and of a liberal arts education that these requirements embody; 2) to make a place in the curriculum for ethical reasoning to help make students aware of how pervasive ethical reasoning and value judgments are throughout the curriculum, and 3) to provide some greater freedom of choice by reducing the GERs by one course.

AREA REQUIREMENTS

The following structure for General Education Requirements became effective with the 2005-06 entering freshman and transfer class:

Introduction to the Humanities—one quarter introductory courses followed by two quarter thematic sequences.

Introduction to the Humanities builds an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Courses introduce students to methods of inquiry in the humanities: interdisciplinary methods in Autumn Quarter and discipline-based methods in Winter and Spring quarters.

Disciplinary Breadth—requirement satisfied by completing five courses of which one course must be taken in each subject area.

Disciplinary Breadth gives students educational breadth by providing experience in the areas of Engineering and Applied Sciences, Humanities, Mathematics, Natural Sciences, and the Social Sciences.

Education for Citizenship—requirement satisfied by completing two courses in different subject areas; or completing two Disciplinary Breadth courses which also satisfy different Education for Citizenship subject areas.

Education for Citizenship provides students with some of the skills and knowledge that are necessary for citizenship in contemporary national cultures and participation in the global cultures of the 21st century. Education for Citizenship is divided into four subject areas: Ethical Reasoning, the Global Community, American Cultures, and Gender Studies.

Ethical Reasoning—Courses introduce students to the pervasiveness, complexity, and diversity of normative concepts and judgments in human lives, discuss skeptical concerns that arise about normative practices, review ways in which people have engaged in ethical reflection, and consider ethical problems in light of diverse ethical perspectives.

The Global Community—Courses address the problems of the emerging global situation. They may compare several societies in time and space or deal in depth with a single society, either contemporary or historical, outside the U.S. Challenges of note: economic globalization and technology transfer; migration and immigration; economic development, health; environmental exploitation and preservation; ethnic and cultural identity; and international forms of justice and mediation.

American Cultures—Courses address topics pertaining to the history, significance, and consequences of racial, ethnic, or religious diversity in the culture and society of the U.S. Challenges of note: equity in education; employment and health; parity in legal and social forms of justice; preserving identity and freedom within and across communities.

Gender Studies—Courses address gender conceptions, roles, and relations, and sexual identity in a contemporary or historical context; they critically examine interpretations of gender differences and relations between men and women. Challenge of note: changing sexual and physiological realities in contemporary and historical perspective.

Courses certified as meeting the General Education Requirements must be taken for a letter grade and a minimum of 3 units of credit. A single course may be certified as fulfilling only one subject area within the General Education Requirements; the one exception is that a course may be certified to fulfill an Education for Citizenship subject area in addition to a Disciplinary Breadth subject area.

Courses that have been certified as meeting the requirements are identified throughout this bulletin with the notational symbols listed below. A comprehensive list of certified courses also appears in the *Time Schedule of Classes* for that quarter.

Introduction to the Humanities
- IHUM-1 (formerly GER:1a): first-quarter course
- IHUM-2 (formerly GER:1b): second-quarter course
- IHUM-3 (formerly GER:1c): third-quarter course

Disciplinary Breadth
- DB-EngrAppSci (formerly GER:2b): Engineering and Applied Sciences
- DB-Hum (formerly GER:3a): Humanities
- DB-Math (formerly GER:2c): Mathematics
- DB-NatSci (formerly GER:2a): Natural Sciences
- DB-SocSci (formerly GER:3b): Social Sciences

Education for Citizenship
- EC-AmerCul (formerly GER:4b): American Cultures
- EC-GlobalCom (formerly GER:4a): Global Community
- EC-Gender (formerly GER:4c):Gender Studies
- EC-EthicReas (GER:4d): Ethical Reasoning

Students who matriculated Autumn Quarter 2004-05 or later are subject to the revised General Education Requirements effective Autumn Quarter 2005-06. Students who matriculated Autumn Quarter 2003-04 or earlier remain on the old General Education Requirements, but may elect to change to the new system. Students interested in electing the revised GER system should contact the Student Services Center. No further changes are allowed once a student has elected to move to the new system.

CREDIT TRANSFER

Students may propose that work taken at another college or university be accepted in fulfillment of a General Education Requirement. In such cases, the Office of the University Registrar's Degree Progress section determines, after appropriate faculty consultation, whether the work is comparable to any of the specifically certified courses or course sequences.

LANGUAGE REQUIREMENT

To fulfill the Language Requirement, undergraduates are required to complete one year of college-level study or the equivalent in a foreign language. Students may fulfill the requirement in any one of the following ways:

1. Complete three quarters of a first-year, 4-5 units language course at Stanford or the equivalent at another recognized post-secondary institution subject to current University transfer credit policies. Language courses at Stanford may be taken with the credit/no credit grading basis to fulfill the requirement.

2. Score 4 or 5 on the Language Advanced Placement (AP) test in one of the following languages: Chinese, French, German, Japanese, Latin, or Spanish. Advanced Placement (AP) tests in foreign literature do not fulfill the requirement.

3. Achieve a satisfactory score on the SAT II Subject Tests in the following languages taken prior to college matriculation:

Chinese	630	Italian	630
French	640	Japanese	620
German	630	Korean	630
Latin	630	Hebrew	540
Spanish	630	•	

4. Take a diagnostic test in a particular language which either:
   a. Places them out of the requirement, *or*
   b. Diagnoses them as needing one, two, or three additional quarters of college-level study. In this case, the requirement can then be fulfilled either by passing the required number of quarters of college-level language study at Stanford or the equivalent elsewhere, or by retaking the diagnostic test at a later date and placing out of the requirement.

Written placements are offered online throughout the summer in Chinese, French, German, Italian, Japanese, Russian, Spanish, and Spanish for home background speakers.

For a full description of Language Center offerings, see the "Language Center" section of this bulletin under the school of Humanities and Sciences.

WRITING AND RHETORIC REQUIREMENT

All instructors at Stanford University expect students to express themselves effectively in writing and speech. The Writing and Rhetoric requirement helps students meet those high expectations.

All candidates for the bachelor's degree, regardless of the date of matriculation, must satisfy the Writing and Rhetoric requirement. Transfer students are individually reviewed at the time of matriculation by the Office of the University Registrar's Degree Progress section and, if necessary, the Program in Writing and Rhetoric (PWR) as to their status with regard to the requirement.

The current Writing and Rhetoric requirement, effective beginning 2003, includes courses at three levels. The first two levels are described in more detail below. Writing-intensive courses that fulfill the third level, the Writing in the Major (WIM) requirement, are designated under individual department listings.

All undergraduates must satisfy the first-level Writing and Rhetoric requirement (WR 1) in one of three ways:

1. PWR 1: a course emphasizing writing and research-based argument.
2. SLE: writing instruction in connection with the Structured Liberal Education program.
3. Transfer credit approved by the Office of the University Registrar's Degree Progress section for this purpose.

All undergraduates must satisfy the second-level Writing and Rhetoric Requirement (WR 2) in one of four ways:

1. PWR 2, a course emphasizing writing, research, and oral presentation of research.
2. SLE: writing and oral presentation instruction in connection with the Structured Liberal Education program.
3. A course offered through a department or program certified as meeting the WR 2 requirement by the Writing and Rhetoric Governance Board. These courses are designated as Write-2.
4. Transfer credit approved by the Office of the University Registrar for this purpose.

A complete listing of PWR 1 courses is available each quarter on the UAL web site at http://ual.stanford.edu/AP/univ_req/PWR/Courses, and at the PWR office in Sweet Hall, Third Floor. Complete listings of PWR 2 and Write-2 courses are available to students on the UAL web site the quarter before they are scheduled to complete the WR 2 requirement.

For a full description of the Program in Writing and Rhetoric (PWR), see the "Writing and Rhetoric" section of this bulletin under the Vice Provost of Undergraduate Education.

Students who matriculated prior to Autumn 2003 should consult previous issues of the *Stanford Bulletin* or the PWR office to determine what requirements apply.

CREDIT

ADVANCED PLACEMENT

Stanford University allows up to 45 units of external credit toward graduation including work completed in high school as part of the College Entrance Examination Board (CEEB) Advanced Placement curriculum. The awarding of such credit is based on CEEB Advanced Placement test scores and is subject to University and department approval.

The faculty of a given department determine whether any credit toward the 180-unit requirement can be based on achievement in the CEEB Advanced Placement Program in their discipline. Stanford departments electing to accept the Advanced Placement (AP) credit are bound by these University policies:

1. Credit is usually granted for an AP score of 4 or 5. Usually, 10 quarter units are awarded (but occasionally fewer than 10). No more than 10 quarter units may be given for performance in a single examination.
2. Whether credit is to be given for an AP score of 3 is a matter for departmental discretion; up to 10 units may be awarded.
3. No credit may be authorized for an AP score lower than 3.

Performance on an AP exam can indicate the appropriate placement for continuing course work in that subject at Stanford. If students enroll in courses at Stanford for which they received equivalent AP credit, the duplicating AP credit will be removed. The chart below shows the current AP credit and placement policies.

A maximum of 45 quarter units of Advanced Placement (AP), transfer credit, and/or other external credit (such as International Baccalaureate) may be applied toward the undergraduate degree. More than 45 units of AP, transfer, and other external credit may appear on the Stanford University transcript; however, only 45 units can be applied to the minimum units required for the undergraduate degree. Stanford University policies on AP and other external credit are subject to review and change on an annual basis. Subjects not listed on this chart are not eligible for AP credit at Stanford University.

Further information is available from the Student Services Center or at http://studentaffairs.stanford.edu/registrar/students/ap.

AP SCORES AND PLACEMENT

Test Subject	*Score*	*Placement*	*Quarter Units*
Calculus AB (or AB subscore)	5	MATH 51	10
	4	MATH 42	5
Calculus BC	4, 5	MATH 51	10
	3	MATH 42	5
Chemistry	5	CHEM 33 or above	4
Chinese (Language and Culture)[1]	5	Take placement exam if continuing in this language	10
Computer Science A	4,5	CS 106B or 106X	5
Computer Science AB	4,5	CS 106B, 106X, or 107	5
French (Language)[1]	5	Take placement exam if continuing in this language	10
German (Language)[1]	5	Take placement exam if continuing in this language	10
Japanese (Language and Culture)[1]	5	Take placement exam if continuing in this language	10
Latin (Literature or Virgil)[1]	4,5	Take placement exam if continuing in this language	10
Physics B	5	PHYSICS 25	8
	4	PHYSICS 23 and 25	4
Physics C			
Mechanics only	4,5	PHYSICS 43 and 45 *or* PHYSICS 23 and 25	4
	3	PHYSICS 41, 43, and 45 *or* PHYSICS 23 and 25	4
E&M only	4,5	PHYSICS 41 and 45 *or* PHYSICS 21 and 25	5
	3	PHYSICS 41, 43, and 45 *or* PHYSICS 21 and 25	4
Both Parts	4,5	PHYSICS 45 *or* PHYSICS 25	9
	3	PHYSICS 41, 43, and 45 *or* PHYSICS 25	8
Spanish (Language)[1]	5	Take placement exam if continuing in this language	10

1 A score of 4 or 5 on this test fulfills the Language Requirement. A score of 5 is required to receive 10 units of credit.

Stanford University awards advanced placement credit for certain International Baccalaureate and international advanced placement subject examinations. The international test subjects must match the content of the College Entrance Examination Board (CEEB) Advanced Placement test subjects that receive advanced placement credit.

ACTIVITY COURSES

For undergraduates, a maximum of 8 units of credit earned in activity courses, regardless of the offering department or if accepted as transfer units, count towards the 180 (225 if dual degrees are being pursued) units required for the bachelor's degree. All activity courses are offered on a satisfactory/no credit basis.

COURSES TAKEN ON SATISFACTORY/NO CREDIT OR CREDIT/NO CREDIT BASIS

A maximum of 36 units of credit (including activity courses) taken at Stanford or its overseas campuses for a "CR" or "S" grade may be applied towards the 180 (225 if dual degrees are being pursued) units required for the bachelor's degree. The maximum for transfer students is 27 units.

Departments may also limit the number of satisfactory or credit courses accepted towards the requirements for a major. Satisfactory/Credit courses applied towards a minor may be similarly limited. Courses not letter-graded are not accepted in fulfillment of the General Education Requirements. Writing in the Major courses are usually offered letter grade only. In those instances where the course is offered for a letter grade or CR/NC, the course must be taken for a letter grade to fulfill the Writing in the Major requirement.

INTERNSHIP GUIDELINES

Undergraduate internships should not by themselves carry any credit. However, an individual student may arrange with a faculty member for a research or other academic project to be based on the internship. Arrangements between students and faculty regarding credit are expected to be made well in advance of the internship. Credit should be arranged within departmental rules for directed reading or independent study and should meet the usual department standards. No transfer credit is awarded for internships.

UNDERGRADUATE TRANSFER WORK

Academic credit for work done elsewhere may be allowed toward a Stanford bachelor's degree under the following rules and conditions:

1. Credit may be granted for work completed at institutions in the U.S. only if the institutions are accredited.
2. Study in institutions outside the U.S., when validated by examination results, tutorial reports, or other official evidence of satisfactory work, may be credited toward a Stanford bachelor's degree, subject to the approval of the credit evaluator and the appropriate departments.
3. Credit is officially allowed only after the student has been unconditionally admitted to Stanford.
4. Credit is allowed for work completed at institutions in the U.S. only on the basis of an official transcript received by the Registrar at Stanford directly from the institution where the credit was earned.
5. Credit from another institution may be transferred for courses which are substantially equivalent to those offered at Stanford University on the undergraduate level, subject to the approval of the credit evaluator. A maximum of 20 quarter units may represent courses which do not parallel specific undergraduate courses at Stanford, again, subject to the approval of the credit evaluator as to quality and suitability.
6. Course work cannot duplicate, overlap, or regress previous work.
7. Transfer course work cannot count towards secondary school diploma and/or graduation requirements.
8. To fulfill GER requirements through transfer work, the course must match a specific Stanford course that fulfills the same GER requirement, be a minimum of three quarter units, and be taken for a letter grade.
9. The credit allowed at Stanford for one quarter's work may not exceed the number of units that would have been permissible for one quarter if the work had been done at Stanford; for work done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence.
10. Credit is allowed at Stanford for work graded 'A,' 'B,' 'C,' or 'Pass' (where 'Pass' is equivalent to a letter grade of 'C' or above), but not for work graded 'D' or below.
11. No more than 45 (90 for transfer students) quarter units of credit for work done elsewhere may be counted toward a bachelor's degree at Stanford.
12. Credit earned in extension, correspondence, and online courses is transferable only if the university offering the courses allows that credit toward its own bachelor's degree. Such credit is limited to a maximum of 45 quarter units for extension courses, a maximum of 15 quarter units for correspondence and online study, and a maximum of 45 quarter units for the combination of extension, correspondence, and online courses.
13. Credit earned in military training and service is not transferable to Stanford, unless offered by an accredited college or

university in the U.S. and evaluated as above by the credit evaluator.

LAST UNITS OUT OF RESIDENCE

Students may petition to complete their final 15 units out of residence to complete their degree requirements. The final 15 units of transfer credit must meet the criteria in the undergraduate "Transfer Work" section of this bulletin. Students must submit the Request for Last Units Out of Residence Petition to determine eligibility and to request pre-approval of the transfer work. A registration status is required to graduate. Students should select either the Graduation Quarter or the Permit for Services Only special registration status on the Last Units Out of Residence petition. Refer to the Special Registration Status section of the bulletin for a description of theses statuses. An application to graduate should be submitted through Axess.

CONCURRENT ENROLLMENT

Students may enroll concurrently at Stanford and at another college or university. The following policies apply to concurrent enrollment:

1. Students may not exceed 20 quarter units between both schools. This is the same unit maximum for undergraduates at Stanford. (One semester credit or hour generally equals 1.5 quarter units.)
2. Satisfactory academic progress is determined only by Stanford courses and units. Transfer work completed at other institutions is not considered in this calculation.
3. Students are expected to submit a Request for Transfer Credit Evaluation for pre-approval of transfer credit prior to enrolling in the transfer institution.

THE MAJOR

The primary purpose of the major is to encourage each student to explore a subject area in considerable depth. This in-depth study complements the breadth of study promoted by the General Education Requirements and, in many cases, by a student's choice of electives. Work in depth permits practice in critical analysis and the solving of problems. Because of its depth, such study also provides a sense of how knowledge grows and is shaped by time and circumstances.

The structure of a major should be a coherent reflection of the logic of the discipline it represents. Ideally, the student should be introduced to the subject area through a course providing a general overview, and upper-division courses should build upon lower-division courses. The course of study should, if feasible, give the student the opportunity and responsibility of doing original, creative work in the major subject. Benefits of the major program are greatest when it includes a culminating and synthesizing experience such as a senior seminar, an undergraduate thesis, or a senior project.

REQUIREMENTS

Undergraduates must select a major by the end of their sophomore year. All undergraduate major programs listed in this bulletin, except for certain honors degree programs that require application and admission in advance, are open to all students. Students may use Axess to declare, drop, or exchange a major at any time. In some departments or programs, though, a late change could easily result in extending the period of undergraduate study. Students who have applied to graduate, or who wish to declare an individually designed major, and coterminal students must use printed forms to select or change a major. Students requiring assistance should contact the Student Services Center. For academic advising regarding majors, students should consult the Undergraduate Academic Life Office (UAL).

Check individual department or program listings in this bulletin for the undergraduate degrees offered and for specific major requirements. If an area of study has no baccalaureate degree, that discipline is not available as a regular undergraduate major.

Faculty set the minimum requirements for the major in each department. These requirements usually allow latitude for tailoring a major program to a student's specific educational goals. The responsibility for developing a major program within department or program requirements lies ultimately with the individual student working in consultation with the major adviser.

LIMITS OF THE MAJOR

In order to achieve the values of study in depth, a well-structured major should constitute at least one-third of a student's program (55-65 units). To ensure the values of breadth, a major should comprise no more than two-thirds of a student's program (115-125 units); and, to avoid intellectual parochialism, a major program should not require a student to take more than about one-third of his or her courses from within a single department.

Major requirements in cognate subjects essential to the structure of a given major should be counted as part of the major program in applying these guidelines. Department or school requirements designed to provide extra disciplinary breadth should not be counted.

For a limited number of qualified students, many departments and programs offer special programs leading to degrees with honors. A student may apply to the major department or program for acceptance into the honors program. Demands on the student may vary, but all honors programs encourage creative, independent work at an advanced level in addition to the major requirements.

The guidelines set forth here are deliberately general; implementation must take into account the specific needs of a student's program and the nature of the discipline or disciplines involved. The exercise of responsibility in achieving the desired educational balance belongs first with the student, who, after all, has the strongest interest in the value of his or her education. It belongs secondarily to departments and major programs, which must set the requirements of competence in the many majors offered.

MULTIPLE MAJORS

Although most students declare only one major, a student may formally declare more than one major within a single bachelor's degree (B.A., B.S., or B.A.S.) program. The student may do that either at the time of initial major declaration or, as may be more advisable given the planning required to complete more than one major, by amending the original declaration. The student's major departments or programs have access routinely to all information pertinent to that student's academic record (for example, course and grade information), and each is expected to provide advising and other assistance. Students may pick up appropriate information regarding major declarations from the Student Services Center. To be awarded a bachelor's degree with multiple majors, the student must fulfill the following requirements:

1. Formally declare all majors through Axess to the Office of the University Registrar.
2. Satisfy the requirements of each major without applying any course towards the requirements of more than one major or any minor unless:
   a. overlapping courses constitute introductory skill requirements (for example, introductory math or a foreign language);
   b. overlapping courses enable the student to meet school requirements (for example, for two majors within the School of Engineering). Currently, only the School of Engineering has school requirements for its undergraduate majors.

Students pursuing multiple majors must complete a multiple major program form indicating which courses they plan to apply toward each major and any minor(s). Departments must certify that the plan of study meets all requirements for the majors and any minor(s) without unallowable overlaps in course work; the School of Engineering Dean's office certifies this information in any case involving an Engineering major or minor. To facilitate advance planning, multiple major program forms are available at any time from the Registrar's forms web site. The Major-Minor and Multiple

Major Course Approval Form is required for graduation for students with multiple majors or a minor. The form should besubmitted to the Student Services Center by the first day of the quarter of intended graduation.

If the pursuit of multiple majors unduly delays an undergraduate's progress through Stanford, the University reserves the right to limit a student to a single major.

When students cannot meet the requirements of multiple majors without overlaps, the secondary major, may be relevant.

SECONDARY MAJOR

In some cases, students may complete course requirements for more than one major, but they may not meet the requirements outlined for the multiple major option. For example, the student may develop a course plan in which courses requisite for one major overlap with requirements for another. In these cases, the student may declare a secondary major which results in the transcript bearing an annotation that the course requirements for that major have also been met. Secondary majors are not listed on the diploma.

UNDERGRADUATE MINOR

Students completing a bachelor's degree may elect to complete one or more minors in addition to the major. Minors must be officially declared by students no later than the deadline for their application(s) to graduate, according to declaration procedures developed and monitored by the Registrar. Earlier deadlines for declaration of the minor may be set by the offering school or department. Satisfactory completion of declared minors is noted on the student's transcript after degree conferral.

A minor is a coherent program of study defined by the department or degree program. It may be a limited version of a major concentration or a specialized subset of a field. A minor consists of no fewer than six courses of 3 or more units to a maximum of 36 units of letter-graded work, except where letter grades are not offered. Departments and degree programs establish the structure and requirements of each minor in accordance with the policy above and within specific guidelines developed by the deans of schools. Programs which do not offer undergraduate degrees may also make proposals to their cognizant deans to establish a minor. Requirements for each minor are described in the individual department or program listings in this bulletin.

Students may not overlap (double-count) courses for completing major and minor requirements, unless:

1. Overlapping courses constitute introductory skill requirements (for example, introductory math or a foreign language), *or*
2. Overlapping courses enable the student to meet school requirements (for example, for a major within the School of Engineering and a minor). Currently, only the School of Engineering has school requirements for its undergraduate majors.

Undergraduates use Axess to declare or drop a minor. The Major-Minor and Multiple Major Course Approval Form is required for graduation for students with a minor.

Students with questions about declaring minors or double-counting courses towards combinations of majors and/or minors should consult with the departments or programs involved or the Student Services Center. For academic advising regarding minors, students should consult the Undergraduate Advising and Research Office (UAR).

BACCALAUREATE HONORS

With Distinction—In recognition of high scholastic attainment, the University, upon recommendation of a major department or program, awards the Bachelor's Degree with Distinction. Distinction is awarded to 15% of the graduating class based on cumulative grade point averages. Distinction is calculated at the end of the Winter Quarter for each graduating class.

Students are also urged to consider the departmental honors programs that may give depth to their major study and to consider, as well, how the interdisciplinary honors programs might contribute to the quality of their undergraduate education.

Departmental Honors Programs—In recognition of successful completion of special advanced work, departments may recommend their students for honors in the major. Departmental honors programs demand independent creative work at an advanced level

in addition to major requirements. If approved for departmental honors, the student should declare the Honors degree through Axess.

Interdisciplinary Honors Programs—In recognition of successful completion of honors program requirements, the following interdisciplinary programs can recommend students majoring in any field for honors in their program:

- Democracy, Development, and the Rule of Law
- Education
- Environmental Science, Technology, and Policy
- Ethics in Society
- Feminist Studies
- International Security Studies
- Latin American Studies
- Science, Technology, and Society

The interdisciplinary honors programs are designed to complement study in a department major. The requirements for these honors programs are described in the department sections of this bulletin. If approved for interdisciplinary honors, the student should submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program form to the Student Services Center.

Foreign Language Proficiency—The notation "proficiency in (language)" appears on the official transcripts of those students whose levels of achievement are found by procedures established by the Language Center to be roughly equivalent to knowledge an excellent student can be expected to demonstrate late in the third quarter of the third year of study in that language.

SPECIAL REGISTRATION STATUSES (UNDERGRADUATE)

The following reduced-tuition categories can be requested by undergraduates in the final stages of their degree program:

Permit to Attend for Services Only (PSO)—Undergraduates in their terminal quarter who are completing honors theses, clearing incomplete grades, or have completed all requirements and are requiring a registration status to utilize university resources, may petition one time only for PSO status. PSO does not permit any course enrollment. Students should apply to graduate in their PSO quarter. The deadline for the completed PSO petition is the Preliminary Study List deadline of the applicable quarter.

13th Quarter—Undergraduates who have completed at least twelve full-time quarters may petition to register for 13th Quarter registration status at a reduced tuition rate for their final quarter, but must register for at least eight units. Undergraduate dual degree students must complete at least fifteen full-time quarters before petitioning for reduced tuition in their final quarter. Undergraduates should apply to graduate through Axess if applying for the 13th-quarter special registration status.

Graduation Quarter—Undergraduates may petition one time only for Graduation Quarter in their terminal quarter only if:

1. filing a Request for Last Units Out of Residence in order to complete up to 15 final units at another institution; or
2. returning from a discontinued status and filing a Request to Return and Register in Undergraduate Study (http://ual.stanford.edu/pdf/returning_return_register.pdf) in order to confer their degree; or
3. if all degree requirements have been completed and student requires a registration status to graduate, but will not be using University resources or housing.

Undergraduates may be eligible for Graduation Quarter status in these three situations only if the student has completed all graduation requirements and will not be utilizing University resources, including housing. The deadline for the completed Graduation Quarter petition is the Preliminary Study List deadline of the applicable quarter.

MINIMUM PROGRESS FOR UNDERGRADUATES

Undergraduates are expected to finish their degree requirements in a timely fashion. In addition to maintaining academic standing obligations, students are expected to take courses to progress towards a Bachelor of Arts or a Bachelor of Science. If after 12 quarters, an undergraduate is not on track to complete degree requirements and graduate within the next two quarters, the University may impose requirements with deadlines on a student's course of study. Further, if a student fails to meet those imposed requirements and/or has not after 18 quarters completed all degree requirements, the University may discontinue the student for failure to progress.

CONFERRAL OF DEGREES

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Undergraduate Standards and Policy, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer quarters. All diplomas, however, are prepared and distributed after degree conferral in accordance to the distribution dates listed on the Registrar's Office web site at http://studentaffairs.stanford.edu/registrar/students/diplomas.

Students must apply for conferral of an undergraduate or graduate degree by filing an Application to Graduate by the deadline for each term. The deadlines are published in the Academic Calendar. A separate application must be filed for each degree program and for each conferral term. Applications are filed through Axess, the online service which allows students to update their administrative/academic records.

Requests for conferral are reviewed by the Office of the University Registrar and the student's department, to verify completion of degree requirements. Registration is required in the conferral term. Students with unmet financial or other University obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released. An academic record where no other degree objective is being pursued is permanently frozen after the final degree conferral, and all subsequent grade change requests will be denied.

Students are typically expected to apply to graduate during the term in which they expect to be awarded a degree. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University's usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to the Application to Graduate should notify the Student Services Center in writing through the Withdrawal of Application to Graduate Form or other appropriate form. Students who withdraw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

GRADUATE DEGREES

GENERAL REQUIREMENTS

For each Stanford advanced degree, there is an approved course of study which meets University and department requirements. The University's general requirements, applicable to all graduate degrees at Stanford, are described below. University requirements pertaining to only a subset of advanced degrees are described in the "Degree-Specific Requirements" section.

See the "Graduate Programs" section of each department's listing for specific department degree requirements. Additional information on professional school programs is available in the bulletins of the Graduate School of Business, the School of Law, and the School of Medicine.

ENROLLMENT REQUIREMENTS

Graduate students must enroll in courses for all terms of each academic year (Autumn, Winter, and Spring quarters) from the admission term until conferral of the degree. The only exception to this requirement occurs when the student is granted an official leave of absence. Failure to enroll in courses for a term during the academic year without taking a leave of absence results in denial of further enrollment privileges unless and until reinstatement to the degree program is granted and the reinstatement fee paid. Registration in Summer Quarter is not required and does not substitute for registration during the academic year. Students possessing an F-1 or J-1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

In addition to the above requirement for continuous registration during the academic year, graduate students are required by the University to be registered:

1. In each term during which any official department or University requirement is fulfilled, including qualifying exams or the University oral exam. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term.
2. In any term in which a University dissertation/thesis is submitted or at the end of which a graduate degree is conferred.
3. Normally, in any term in which the student receives financial support from the University.
4. In any term for which the student needs to use University facilities.
5. For international students, in any term of the academic year (summer may be excluded) for which they have nonimmigrant status (i.e., a J-1 or F-1 visa).

Individual students may also find themselves subject to the registration requirements of other agencies (for example, external funding sources such as federal financial aid). Course work and research are expected to be done on campus unless the department gives prior approval for study in absentia.

LEAVES OF ABSENCE AND REINSTATEMENT (GRADUATE)

Graduate students who do not meet the requirement for continuous registration during the academic year must obtain an approved leave of absence, in advance, for the term(s) they will not be registered. The leave of absence must be reviewed for approval by the chair or director of graduate studies of the student's major department and, if the student is in the United States on a foreign student visa, by the Bechtel International Center. The granting of a leave of absence is at the discretion of the department and subject to review by the Office of the University Registrar. The University may condition its approval of a petition for leave of absence on the student's meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return such as, in the case of a leave for medical reasons, proof of treatment or an interview with a provider at Vaden Health Center or Counseling and Psychological Services).

New graduate students and approved coterminal students may not take a leave of absence during their first quarter. Coterminal students are required to register their first graduate quarter. However, new Stanford students may request a deferment from the department.

Leaves of absence are granted for a maximum of one calendar year, or four quarters. Leaves requested for a longer period are approved only in exceptional circumstances (for example, mandatory military service). An extension of leave, for a maximum of one year or four quarters, is approved only in unusual circumstances. Extension requests must be made before the expiration of the original leave of absence. Leaves of absence for graduate students may not exceed a cumulative total of two years (eight quarters including summer quarters).

An involuntary leave of absence can be imposed in circumstances in which a student:

- presents a substantial risk of harm to self or others or is failing to carry out substantial self-care obligations; or
- significantly disrupts the educational or other activities of the University community; or
- is unable to participate meaningfully in educational activities; or
- requires a level of care from the University community that exceeds the resources and staffing that the University can reasonably be expected to provide for the student's well-being.

Students whose circumstances warrant a review under the Involuntary Leave of Absence Policy, will be apprised, in writing, of University concerns and will be provided an opportunity to respond to concerns in writing or in person or via telephone before a review committee convened by the Dean of Student Life. Students placed on involuntary leave of absence can appeal an unfavorable decision to the Vice Provost for Student Affairs. The University can condition a student's return to registered student status on such requirements as the University deems appropriate in the individual case (such as, in the case of a leave for medical reasons, proof of treatment of an interview with a provider at Vaden or CAPS or its designee). The Involuntary Leave of Absence Policy is available on the Dean of Student Life's web site.

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period.

Students on leave may complete course work for which an 'Incomplete' grade was awarded in a prior term and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes.

When a student is granted (or placed on) a leave of absence after the beginning of the term, courses in which the student was enrolled after the drop deadline appear on the student's transcript and show the symbol 'W' (Withdraw).

Students who fail to be either enrolled by the final study list deadline or approved for a leave of absence by the start of a term are required to apply for reinstatement through the Graduate Admissions office before they can return to the same degree program. The decision to approve or deny reinstatement is made by the student's department or program. Departments are not obliged to approve reinstatements of students. Reinstatement decisions are made at the discretion of the department or the program and may be based on the applicant's academic status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, and the ability of the department to support the student both academically and financially, as well as any other factors or considerations regarded as relevant by the department or program.

Reinstatement information is available from the Graduate Admissions office. A fee is required. Reinstatement applications must

be submitted prior to the first day of the term for which re-enrollment is requested if the student is registering for courses.

CHILDBIRTH ACCOMMODATION POLICY

Women graduate students, including students in professional schools, anticipating or experiencing a birth are eligible for an academic accommodation period of up to two consecutive academic quarters (in total) before and after the birth, during which the student may postpone course assignments, examinations, and other academic requirements. During this period, they are eligible for full-time enrollment and retain access to Stanford facilities, Cardinal Care, and Stanford housing. Such students are granted an automatic one quarter extension of University and departmental requirements and academic milestones, with the possibility of up to three quarters by petition under unusual circumstances. Women graduate students supported by fellowships, teaching assistantships, and/or research assistantships are excused from regular TA or RA duties for a period of six weeks during which they continue to receive support. Students do not receive a stipend or salary if none was received previously, but are eligible for the academic accommodation period and the one quarter extension of academic milestones. For more information and a complete statement of the policy, see http://stanford.edu/group/gap/5-9.

RESIDENCY POLICY FOR GRADUATE STUDENTS

Each type of graduate degree offered at Stanford (for example, Master of Science, Doctor of Philosophy) has a residency requirement based on the number of academic units required for the degree. These residency requirements and the maximum allowable transfer units for each degree type are listed below.

The unit requirements for degrees can represent solely course work required for the degree or a combination of course work, research, and a thesis or dissertation. Academic departments and schools offering degrees may establish unit requirements that are higher than the minimum University residency requirement, but they may not have a residency requirement that is lower than the University standard. In addition to the University's residency requirement based on a minimum number of units for each degree, the School of Medicine and the Graduate School of Business may establish residency requirements based on the number of quarters of full-time registration in which students are enrolled to earn a degree. However, in no case may a student earn fewer units than the University minimum for each degree. All residency requirements are published in the *Stanford Bulletin.* Students should consult the *Stanford Bulletin* or their academic department to determine if their degree program has residency requirements that exceed the minimum.

Students eligible for Veterans Affairs educational benefits should refer to "Veterans' Educational Benefits" in the "Admissions and Financial Aid" section of this bulletin.

It is Stanford University's general policy that units are applicable toward only one degree. Units may not normally be duplicated or double-counted toward the residency requirement for more than one degree. Exceptions to this general policy for specified combinations of degree types, known as Joint Degree Programs, may be approved by agreement of the Faculty Senate and the deans of the schools affected, with review by the Committee on Graduate Studies. See the "Joint Degree Programs" section of this bulletin for additional information.

Only completed course units are counted toward the residency requirement. Courses with missing, incomplete, in progress, or failing grades do not count toward the residency requirement. Courses from which a student has formally withdrawn do not count toward the residency requirement.

Terminal Graduate Registration (TGR) is available to graduate students who have met all of the conditions listed in the "TGR" section of this bulletin.

This policy is effective for students who enter graduate programs beginning in the Autumn Quarter of the 2001-02 academic year. For information about the residency policy in effect for students who entered prior to Autumn Quarter 2001, see the *Stanford Bulletin* 2000-01.

UNIVERSITY MINIMUM RESIDENCY REQUIREMENTS FOR GRADUATE DEGREES

Degree Type[1]	*Minimum # of Units*	*Maximum Allowable External Transfer Units*
M.A., M.S., M.F.A., M.L.A.	45	0[4]
Engineer[2]	90	45
M.B.A., M.P.P.[3]	90	0[4]
Ph.D., D.M.A.[5]	135	45
M.D.	235	90
J.D.[6,7]	109	45
M.L.S., L.L.M., J.S.M.[7]	35	0[4]
J.S.D.[7]	44	0[4]

1. The University has authorized the granting of the M.A.T., Ed.S. and Ed.D degrees, but they are not being offered.
2. Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit in an Engineering discipline may be used toward the 90 unit residency requirement for the Engineer degree. At least 45 units of work at Stanford are necessary to complete the 90 residency units for the Engineer degree.
3. Enrollment in the M.P.P. program is limited to candidates who have earlier been accepted to another Stanford graduate degree program.
4. Students eligible for Veterans Affairs educational benefits should refer to the Veterans Benefits section of "Admissions and Financial Aid" in this bulletin.
5. Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit may be used toward the 135 unit residency requirement for the Ph.D. or D.M.A. degree. At least 90 units of work at Stanford are necessary to complete the 135 residency units for the Ph.D. or D.M.A. degree.
6. The Academic Senate approved these residency requirements on February 4, 2010, effective for the 2009-10 academic year.
7. J.D. students entering prior to the Autumn Quarter 2009-10 must take the equivalent of 86 semester units.

COTERMINAL PROGRAMS RESIDENCY REQUIREMENT

The University minimum requirements for the coterminal bachelor's/master's program are 180 units for the bachelor's degree plus 45 (or higher departmental requirement, as determined by each graduate department) unduplicated units for the master's degree. The requirements for the coterminal program with dual undergraduate degrees are 225 units for the two bachelor's degrees, and 45 units for the master's degree. For the 45-unit University minimum for the master's degree, all courses must be at or above the 100 level and 50 percent must be courses designated primarily for graduate students (typically at least at the 200 level). Department requirements may be higher. Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

Tuition Rate for Graduate Engineering—The tuition rate for graduate Engineering is higher than for undergraduate programs. Students enrolled in a coterminal program in the School of Engineering begin to pay the higher graduate Engineering tuition rate after 12 full-tuition undergraduate quarters.

Coterminal students in the School of Engineering, with two undergraduate degrees, are assessed the graduate Engineering tuition rate in the quarter after they have been enrolled for 15 full-tuition quarters.

Engineering coterminal students would also start paying the graduate Engineering tuition rate if any undergraduate degree is conferred or if they are granted any graduate aid. Once charged under the graduate Engineering tuition schedule, the tuition will not revert thereafter to the undergraduate rate.

For additional information on the coterminal bachelor's/master's program, see Coterminal Bachelor's and Master's Degrees in the "Undergraduate Degrees and Programs" section of this bulletin.

GRADUATE RESIDENCY TRANSFER CREDIT

After at least one quarter of enrollment, students pursuing an Engineer, D.M.A., or Ph.D. may apply for transfer credit for graduate work done at another institution. Engineer candidates who also earned their master's at Stanford are not eligible for transfer residency credit, nor are any master's degree students.

Students enrolled at Stanford who are going to study elsewhere during their degree program should obtain prior approval of any transfer credit sought before their departure.

The following criteria are used by the department in determining whether, in its discretion, it awards transfer credit for graduate-level work done at another institution:

1. Courses should have comparable Stanford counterparts that are approved by the student's department. A maximum of 12 units of courses with no Stanford counterparts and/or research units may be granted transfer credit.
2. The student must have been enrolled at the other institution in a student category which yields graduate credit. The maximum amount of credit given for extension and nonmatriculated (non-degree) courses is 12 units. No transfer credit is given for online or correspondence work.
3. Courses must have been taken after the conferral of the bachelor's degree. The only exception is for work taken through programs structured like the Stanford coterminal bachelor's/master's program.
4. Courses must have been completed with a grade point average (GPA) of 3.0 (B) or better. Pass grades are accepted only for courses for which letter grades were not an option and for which the standard of passing is 'B' quality work.
5. Courses must have been taken at a regionally accredited institution in the U.S. or at an officially recognized institution in a foreign country. Courses taken at foreign universities must be at the level of study comparable to a U.S. graduate program.

The Application for Graduate Residency Credit is reviewed by the department and the Office of the University Registrar. For transfer credit done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence.One semester unit or hour usually equals 1.5 quarter units.

JOINT DEGREE PROGRAMS

A Joint Degree Program (JDP) is a specified combination of degree programs or degree types in which a student is enrolled in two graduate degree programs concurrently. JDPs are developed and proposed by the relevant academic units with agreement of the deans of the schools affected.

An approved JDP includes a set of agreements between the participating programs and schools about matters such as admissions, advising, curricula, and tuition. In a JDP, a specified number of units may be double-counted toward the minimum University residency requirements for both degrees, reducing the total number of residency units required to complete both degrees. Application deadlines for each program or degree apply. Students must be admitted to the JDP no later than the study list deadline of the term prior to the term of expected degree conferral. In a JDP, both degrees are conferred concurrently since the units required for each degree are linked to the completion of both degrees. The sole exception is the J.D. degree which may be awarded prior to the second degree.

The following Joint Degree Programs, permitting students to complete requirements for two degrees with a reduced number of total residency units, are offered:

- *Juris Doctor with a Master of Arts* in Economics, Education, History, Public Policy, or the Division of International Comparative and Area Studies: African Studies, East Asian Studies, International Policy Studies, Latin American Studies, and Russian, East European and Eurasian Studies (J.D./M.A.)
- *Juris Doctor with a Master of Science* in Bioengineering, Electrical Engineering, Computer Science, Health Research and Policy, Interdisciplinary Program in Environment & Resources, or Management Science and Engineering (J.D./M.S.)
- *Juris Doctor with a Master in Public Policy* (J.D./M.P.P)
- *Juris Doctor with a Doctor of Philosophy* in Bioengineering, Economics, History, Interdisciplinary Program in Environment and Resources, Management Science and Engineering, Philosophy, Political Science, Psychology, or Sociology (J.D./Ph.D.)
- *Juris Doctor with a Master of Business Administration* (J.D./M.B.A.)
- *Master of Business Administration with a Master of Arts* in Education (M.B.A./M.A.)
- *Master of Business Administration with a Master of Science* in Interdisciplinary Program in Environment and Resources (M.B.A./M.S.)
- *Master of Business Administration with a Master of Public Policy* (M.B.A./M.P.P.)
- *Master of Arts in International Policy Studies with a Master in Public Policy* (M.A./M.P.P.)
- *Master of Science* in *Management Science and Engineering with a Master in Public Policy* (M.S../M.P.P.)
- *Doctor of Philosophy* in Economics, Education, Psychology, or Sociology *with a Master in Public Policy* (Ph.D./M.P.P.)

Specific requirements for the joint degree programs are available from the participating departments and schools and at http://registrar.stanford.edu/students/academics/jdp.htm.

Creation of additional Joint Degree Programs that are combinations of J.D./M.A., J.D./M.S., and Ph.D./M.P.P. degrees have been authorized by the Faculty Senate. New JDPs from among these combinations may double-count up to 45 units towards residency requirements. JDPs from these combinations are proposed by the coordinating programs and schools. Once approvals from the chairs of the programs and deans of the relevant schools are obtained, approval on behalf of the Committee on Graduate Studies is granted by the Office of the Vice Provost for Graduate Education, and final approval is granted by the Office of the University Registrar. JDPs combining other degree types or programs may be proposed, but require review by the Faculty Senate Committee on Graduate Studies and must be approved by the Faculty Senate.

GRADUATE UNITS REQUIREMENTS

The University's expectation is that the units counted towards all graduate degrees are primarily in graduate courses. All units must be in courses at or above the 100 level and at least 50 percent of those must be courses designated primarily for graduate students (typically at least the 200 level). Units earned in courses below the 100 level may not be counted towards the minimum unit requirement for the master's degree. Department specifications for the level of course work accepted for a particular master's degree program may be higher than the University's specifications.

MINIMUM PROGRESS REQUIREMENTS FOR GRADUATE STUDENTS

The academic requirements for graduate students include completion of University, department, and program requirements, such as admission to candidacy, successful completion of qualifying exams, and so on in a timely and satisfactory manner. Graduate students must also meet the following standards of minimum progress as indicated by units and grades. (These standards apply to all advanced degree programs except the School of Business Ph.D., and the M.B.A., J.D., L.L.M., J.S.M., J.S.D., M.D., and M.L.A., which follow guidelines issued by the respective schools and are described in their respective school bulletins.)

Graduate students enrolled for 11 or more units must pass at least 8 units per term by the end of each term. Those registered for fewer than 11 units must pass at least 6 units per term by the end of each term, unless other requirements are specified in a particular case or for a particular program.

In addition, graduate students must maintain a 3.0 (B) grade point average overall in courses applicable to the degree.

Department requirements for minimum progress that set a higher standard for units to be completed, or a higher or lower standard for grade point average to be maintained, take precedence over the University policy; any such different standards must be published in the *Stanford Bulletin*.

Students identified as not meeting the requirements for minimum progress and timely and satisfactory completion of requirements are reviewed by their departments to determine whether the problem lies with administrative matters such as reporting of grades or with academic performance. Students have the opportunity to explain any special circumstances. Approval for continuation in the degree program is contingent on agreement by the student and department to a suitable plan to maintain appropriate progress in subsequent quarters. Dismissal of graduate students is addressed in separate guidelines.

Graduate students who have been granted Terminal Graduate Registration (TGR) status must enroll each term in the TGR course (801 for master's and Engineer programs or 802 for doctoral programs) in their department in the section appropriate for the adviser. An 'N' grade signifying satisfactory progress must be received each quarter to maintain registration privileges. An 'N-' grade indicates unsatisfactory progress. The first 'N-' grade constitutes a warning. A second consecutive 'N-' grade normally causes the department to deny the student further registration until a written plan for completion of degree requirements has been approved by the department. Subsequent 'N-' grades are grounds for dismissal from the program.

GUIDELINES FOR DISMISSAL OF GRADUATE STUDENTS FOR ACADEMIC REASONS

Admission to graduate programs at Stanford is highly selective. It is anticipated that every admitted student will be able to fulfill the requirements for the advanced degree. This document provides guidelines to be used in the unusual circumstance that a department must consider dismissal of a graduate student for academic reasons. These guidelines apply to all advanced degree programs except those in the schools of Law and Business, the STEP program in the School of Education, and the M.D. program in the School of Medicine, which follow guidelines issued by the respective schools.

The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. The guidelines that follow specify procedures for dismissal of graduate students who are not meeting these conditions. In such cases, a departmental committee (hereafter "the committee"), whether the department's committee of the faculty or other committee authorized to act on the department's behalf such as the departmental graduate studies committee, will:

1. Where possible and as early as possible, warn the student, in writing, of the situation and deficiency. A detailed explanation of the reason for the warning should be provided.
2. Consider extenuating circumstances communicated by the student.
3. Decide the question of dismissal by majority vote of the committee (with at least three faculty members participating in the committee's deliberation), and communicate the decision to the student in writing.
4. Place a summary of department discussions, votes, and decisions in the student's file.
5. Provide students the opportunity to examine their department files, if requested.
6. Provide students with information on their rights to appeal under the Student Academic Grievance Procedure. See the "Student Academic Grievance Procedure" section of this bulletin.

Careful records of department decisions safeguard the rights of both students and faculty.

ADDITIONAL SPECIFICS FOR DEGREES WITH CANDIDACY

Before Candidacy—The committee may vote to dismiss a student who is not making minimum progress or completing requirements in a timely and satisfactory way before review for admission to candidacy. Before considering dismissal, the committee should communicate with the student (which may include a meeting with the student) concerning his or her academic performance and how to correct deficiencies, where such deficiencies are deemed correctable.

At the Review for Candidacy—In a review for admission to candidacy, if the committee votes not to recommend the student for admission to candidacy, the vote results in the dismissal of the student from the program. The department chair, or Director of Graduate Studies, or the student's adviser shall communicate the department's decision to the student in writing and orally. The student may submit a written request for reconsideration. The committee shall respond in writing to the request for reconsideration; it may decline to reconsider its decision.

During Candidacy—When a student admitted to candidacy is not making minimum progress or not completing University, department, or program requirements in a timely and satisfactory manner, the student's adviser, the Director of Graduate Studies, or department chair, and other relevant faculty should meet with the student. A written summary of these discussions shall be sent to the student and the adviser and added to the student's department file. The summary should specify the student's academic deficiencies, the steps necessary to correct them (if deemed correctable), and the period of time that is allowed for their correction (normally one academic quarter). At the end of the warning period, the committee should review the student's progress and notify the student of its proposed actions. If the student has corrected the deficiencies, he or she should be notified in writing that the warning has been lifted.

If the deficiencies are not deemed correctable by the committee (for example, the failure of a required course or examination, or a pattern of unsatisfactory performance) or if, at the end of the warning period, the student has not in the view of the committee corrected the deficiencies, the committee may initiate proceedings for dismissal. The student shall be notified, in writing, that the case of dismissal will be considered at an impending committee meeting. The student has the right to be invited to attend a portion of the scheduled meeting to present his or her own case; a student may also make this case to the committee in writing.

After full discussion at the committee meeting, the committee, without the student present, shall review the case and vote on the issue of dismissal. The student shall be sent a written summary of

the discussion, including the committee's decision and the reasons for it. The student may submit a written request for reconsideration. The committee's response to the request for reconsideration shall be made in writing; it may decline to reconsider its decision.

TERMINAL GRADUATE REGISTRATION (TGR)

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the University oral exam and dissertation, completed 135 units or 10.5 quarters of residency (if under the old residency policy), and submitted a Doctoral Dissertation Reading Committee form, may request Terminal Graduate Registration status to complete their dissertations. Students pursuing Engineer degrees may apply for TGR status after admission to candidacy, completion of all required courses, and completion of 90 units or six quarters of residency (if under the old residency policy). Students enrolled in master's programs with a required project or thesis may apply for TGR status upon completion of all required courses and completion of 45 units. Students with more than one active graduate degree program must be TGR-eligible in all programs in order to apply for TGR status.

The TGR Final Registration status may also be granted for one quarter only to a graduate student who is returning after reinstatement, working on incompletes in his or her final quarter, or registering for one final term after all requirements are completed when Graduation Quarter is not applicable. TGR requirements above apply. Doctoral students under the term-based residency policy need nine quarters of residency to qualify for TGR Final Registration Status.

Each quarter, TGR students must enroll in the 801 (for master's and Engineer students) or 802 (for doctoral students) course in their department for zero units, in the appropriate section for their adviser. TGR students register at a special tuition rate: $2,517 per quarter in 2010-11. TGR students may enroll in up to 3 units of course work per quarter at this tuition rate. Within certain restrictions, TGR students may enroll in additional courses at the applicable unit rate. The additional courses cannot be applied toward degree requirements since all degree requirements must be complete in order to earn TGR status. See the "Minimum Progress Requirements for Graduate Students" of this bulletin for information about satisfactory progress requirements for TGR students.

GRADUATE TUITION ADJUSTMENT

Graduate students who need only 3 to 7 remaining units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency. This status may be used only once during a degree program.

GRADUATION QUARTER

Registration is required for the term in which a student submits a dissertation or has a degree conferred. Students who meet all the following conditions are eligible to be assessed a special tuition rate for the quarter in which they are receiving a degree:

1. All course work, degree requirements, oral exams, and residency requirements for all graduate degree programs, including joint degree programs, have been completed prior to the start of the requested Graduation Quarter. .
2. A graduate or professional student must have been enrolled or have been on an approved leave of absence in the term immediately preceding the term chosen as the graduation quarter. Summer term enrollment is optional for students on graduation quarter in the Autumn term provided that they have been enrolled the prior Spring term.
3. The student has formally applied to graduate in Axess.
4. The student has only to submit the dissertation, project, or master's thesis by the deadline for submission in the term designated as the graduation quarter.
5. The student has filed all necessary forms regarding graduation quarter before the first day of the term chosen as graduation quarter.

Students on graduation quarter are registered at Stanford and, therefore, have the rights and privileges of registered students. Graduation Quarter status may be used only once during a degree program. There is a tuition rate of $100 for the graduation quarter.

CONFERRAL OF DEGREES

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Graduate Studies, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer terms. All diplomas, however, are prepared and distributed after degree conferral in accordance to the distribution dates listed on the Registrar's Office web site at http://registrar.stanford.edu/students/records/diplomas.htm.

Students must apply for conferral of a graduate degree by filing an Application to Graduate in Axess by the deadline for each term. The deadlines are available in the Academic Calendar. A separate application must be filed for each degree program and for each conferral term.

Requests for conferral are reviewed by the Office of the University Registrar and the student's department to verify completion of degree requirements. Students must be registered in the term of degree conferral. Students with unmet financial obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released by the Office of Student Financial Services. An academic record where no other degree objective is being pursued is permanently frozen after the final degree conferral, and all subsequent grade change requests will be denied.

Students are typically expected to apply to graduate during the term in which they expect to be awarded a degree. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University's usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to the Application to Graduate should submit the Withdrawal of Application to Graduate form to the Student Services Center. Students who withdraw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

CHANGES OF DEGREE PROGRAMS

Graduate students are admitted to Stanford for a specific degree program. Students who have attended Stanford for at least one term and who are currently enrolled may submit a Graduate Program Authorization Petition to make one of the following changes: (1) change to a new degree program in the same department; (2) change to a new degree program in a different department; (3) add a new degree program in the same or a different department to be pursued with the existing program. Coterminal students must have the bachelor's degree conferred before adding a second advanced degree program. Summer term enrollment is optional for students beginning a new degree program in the Autumn term provided that they have been enrolled the prior Spring term.

It is important that the attempt to add or change degree programs be made while enrolled. Otherwise, a new Application for Graduate Admission must be submitted and an application fee paid. The Graduate Program Authorization Petition is submitted electronically through Axess to the department in which admission is requested. If applying for a higher degree program, students may also be required to submit other application materials such as GRE Subject Test scores, a statement of purpose, or new letters of recommendation. Decisions on the petitions are made by the pro-

grams or departments to which they are directed, and are at the discretion of those programs or departments.

International students changing departments or degree programs must also obtain the approval of the Foreign Student Adviser at the Bechtel International Center. If the requested change lengthens their stay, they also are required to submit verification of sufficient funding to complete the new degree program.

Students who wish to terminate study in a graduate program should submit a properly endorsed Request to Permanently Withdraw from Degree Program form to the Student Services Center. To return to graduate study thereafter, the student is required to apply for reinstatement (if returning to the same degree program) or admission (if applying to a different program). Both applications require payment of a fee.

DEGREE-SPECIFIC REQUIREMENTS

MASTER OF ARTS AND MASTER OF SCIENCE

In addition to completing the general requirements for advanced degrees and the specified program requirements, candidates for the degree of Master of Arts (M.A.) or Master of Science (M.S.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

MASTER'S PROGRAM PROPOSAL

Students pursuing an M.A., M.F.A., M.S., or M.P.P. degree are required to submit an acceptable program proposal to their department during the first quarter of enrollment. Coterminal students must submit the proposal during the first quarter after admission to the coterminal program. The program proposal establishes a student's individual program of study to meet University and department degree requirements. Students must amend the proposal formally if their plans for meeting degree requirements change.

In reviewing the program proposal or any subsequent amendment to it, the department confirms that the course of study proposed by the student fulfills all department course requirements (for example, requirements specifying total number of units, course levels, particular courses, sequences, or substitutes). The department confirms that all other department requirements (for example, required projects, foreign language proficiency, or qualifying exams) are listed on the form and that all general University requirements (minimum units, residency, and so on) for the master's degree will be met through the proposed program of study. Students who fail to submit an acceptable proposal may be dismissed.

TIME LIMIT FOR COMPLETION OF THE MASTER'S DEGREE

All requirements for a master's degree must be completed within three years after the student's first term of enrollment in the master's program (five years for Honors Cooperative students). Students pursuing a coterminal master's degree must complete their requirements within three years of their first quarter of graduate standing.

The time limit is not automatically extended by a student's leave of absence. All requests for extension, whether prompted by a leave or some other circumstance, must be filed by the student before the conclusion of the program's time limit. Departments are not obliged to grant an extension. The maximum extension is one additional year. Extensions require review of academic progress and any other factors regarded as relevant by the department, and approval by the department; such approval is at the department's discretion.

MASTER IN PUBLIC POLICY

The degree of Master in Public Policy (M.P.P.) is a two-year program leading to a professional degree. Enrollment in the M.P.P. program is limited to candidates who have earlier been accepted to another Stanford graduate degree program. In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Public Policy" section of this bulletin, candidates for the degree of Master of Public Policy (M.P.P.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

MASTER OF BUSINESS ADMINISTRATION

The degree of Master of Business Administration (M.B.A.) is conferred on candidates who have satisfied the requirements established by the faculty of the Graduate School of Business and the general requirements for advanced degrees. Full particulars concerning the school requirements are found on the M.B.A. program web site of the Graduate School of Business. The M.B.A. must be completed within the time limit for completion of the master's degree.

MASTER OF FINE ARTS

In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Art and Art History" section of this bulletin, candidates for the degree of Master of Fine Arts (M.F.A.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

MASTER OF LIBERAL ARTS

The Master of Liberal Arts (M.L.A.) program is a part-time interdisciplinary master's program in the liberal arts for returning adult students. In addition to completing the general requirements for advanced degrees, candidates for the degree of Master of Liberal Arts (M.L.A.) must complete their degrees within five years, an exception to the rule specified above.

ENGINEER

In addition to completing the general requirements for advanced degrees and the requirements specified by their department, candidates for the degree of Engineer must be admitted to candidacy and must complete a thesis per the specifications below.

CANDIDACY

The Application for Candidacy for Degree of Engineer is an agreement between the student and the department on a specific program of study to fulfill degree requirements. Students must apply for candidacy by the end of the second quarter of the program. Honors Cooperative students must apply by the end of the fourth quarter of the program. Candidacy is valid for five calendar years.

THESIS

A University thesis is required for the Engineer degree. Students have the option of submitting the thesis electronically or via the paper process. Standards for professional presentation of the thesis have been established by the Committee on Graduate Studies. Directions for preparation of the thesis for electronic or paper submission are available at the Office of the University Registrar dissertation/thesis web site at http://studentaffairs.stanford.edu/registrar/students/dissertation-thesis.

The deadline for submission of theses for degree conferral in each term is specified by the University academic calendar. if submitting via the paper process, three copies of the thesis, bearing the approval of the adviser under whose supervision it was pre-

pared, must be submitted to the Office of the University Registrar before the quarterly deadline listed on the University academic calendar. A fee is charged for binding copies of the paper thesis. If submitting via the electronic process the signed thesis signature page and title page must be submitted to the Student Services Center and one final copy of the thesis must be uploaded, and approved by the Final Reader, on or before the quarterly deadline indicated in the University's academic calendar. There is no fee charged for the electronic submission process.

Students must be registered or on graduation quarter in the term in which they submit the thesis; see "Graduation Quarter" section of this bulletin for additional information. At the time the thesis is submitted, an Application to Graduate must be on file, all department requirements must be complete, and candidacy must be valid through the term of degree conferral.

MASTER OF LEGAL STUDIES

Admission to study for the Master of Legal Studies degree (M.L.S.), a nonprofessional degree, is granted to students who hold the Doctor of Philosophy (Ph.D.) or other nonlaw doctoral degree, or who have been admitted to a nonlaw doctoral program and have completed a program of study amounting to 45 quarter units toward the doctorate, and who meet an admission standard equivalent to that required of candidates for the Doctor of Jurisprudence degree.

The M.L.S. degree is conferred upon candidates who, in not fewer than two academic terms in residence and in not more than two consecutive academic years, successfully complete at least three first-year courses in the first Autumn term plus an additional 24 units of Law School work, including at least one course or seminar requiring a research paper. All work shall conform to the rules and regulations of the University and the Stanford Law School.

MASTER OF LAWS

The degree of Master of Laws (L.L.M.) is conferred upon candidates who have completed one academic year (35 quarter units) in residence in accordance with the rules of the University and the Stanford Law School. The degree is designed for foreign graduate students trained in law and is available only to students with a primary law degree earned outside the United States. The L.L.M. program offers students a choice of two areas of specialization: Corporate Governance and Practice, or Law, Science, and Technology.

MASTER OF THE SCIENCE OF LAW

The degree of Master of the Science of Law (J.S.M.) is conferred upon candidates who have completed one academic year (35 quarter units) with distinction in accordance with the rules of the University and the Stanford Law School

The degree is primarily designed for those qualified students who hold a J.D. or its equivalent and who are at the Stanford Law School for independent reasons (for example, as teaching fellows) and who wish to combine work toward the degree with their primary academic activities. Specially qualified lawyers, public officials, academics, and other professionals who have worked outside the United States may apply for the degree through the Stanford Program in International Legal Studies (SPILS). Additional information concerning requirements may be found at http://www.law.stanford.edu/program/degrees/advanced.

DOCTOR OF JURISPRUDENCE

The degree of Doctor of Jurisprudence (J.D.) is conferred on candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the Stanford Law School over not less than three academic years and who otherwise have satisfied the requirements of the University and the Stanford Law School.

DOCTOR OF THE SCIENCE OF LAW

The degree of the Doctor of the Science of Law (J.S.D.) is conferred upon candidates who hold a J.D. or its equivalent, who complete one academic year in residence, and who, as a result of independent legal research, present a dissertation that is, in the opinion of the faculty of the Stanford Law School a contribution to knowledge. Such work and dissertation must conform to the rules of the Stanford Law School and the University for the dissertation and the University Oral Examination, as described in the "Doctor of Philosophy" section of this bulletin.

Candidacy is limited to students of exceptional distinction and promise. Full particulars concerning requirements may be found at http://www.law.stanford.edu/program/degrees/advanced.

DOCTOR OF MUSICAL ARTS

The degree of Doctor of Musical Arts (D.M.A.) is conferred on candidates who have satisfied the general requirements for advanced degrees, the program requirements specified in the “Music” section of this bulletin, and the candidacy requirement as described in the “Doctor of Philosophy” section.

DOCTOR OF MEDICINE

Candidates for the degree of Doctor of Medicine (M.D.) must satisfactorily complete the required curriculum in medicine. The requirements for the M.D. degree are detailed online at http://med.stanford.edu/md.

DOCTOR OF PHILOSOPHY

The degree of Doctor of Philosophy (Ph.D.) is conferred on candidates who have demonstrated to the satisfaction of their department or school substantial scholarship, high attainment in a particular field of knowledge, and the ability to do independent investigation and present the results of such research. They must satisfy the general requirements for advanced degrees, the program requirements specified by their departments, and the doctoral requirements described below. The option for a Ph.D. minor is also described below, though it is not a Ph.D. requirement.

CANDIDACY

Admission to a doctoral degree program is preliminary to, and distinct from, admission to candidacy. Admission to candidacy for the doctoral degree is a judgment by the faculty of the student’s potential to successfully complete the requirements of the degree program. Students are expected to complete department qualifying procedures and apply for candidacy by the end of their second year in the Ph.D. program. Honors Cooperative students must apply by the end of their fourth year.

The Application for Candidacy specifies a departmentally approved program of study to fulfill degree requirements, including required course work, language requirements, teaching requirements, dissertation (final project and public lecture-demonstration for D.M.A.), and University oral examination (for Ph.D.). At least 3 units of work must be taken with each of four Stanford faculty members. To reiterate, however, a student will only advance to candidacy if, in addition to the student's fulfilling departmental prerequisites, the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program.

If the Ph.D. student is pursuing a minor, approval by the department awarding the minor is also required on the Application for Candidacy.

TIME LIMIT FOR COMPLETION OF A DEGREE WITH CANDIDACY

All requirements for the degree must be completed before candidacy expires. Candidacy is valid for five years unless terminated by the department (for example, for unsatisfactory progress). The time limit is not automatically extended by a student’s leave of absence. All requests for extension, whether prompted by a leave

or some other circumstance, must be filed by the student before the conclusion of the program's time limit. Departments are not obligated to grant an extension. Students may receive a maximum of one additional year of candidacy per extension. Extensions require review by the department of a dissertation progress report, a timetable for completion of the dissertation, any other factors regarded as relevant by the department, and approval by the department; such approval is at the department's discretion.

TEACHING AND RESEARCH REQUIREMENTS

A number of departments require their students to teach (serving as a teaching assistant) or assist a faculty member in research (serving as a research assistant) for one or more quarters as part of their doctoral programs. Detailed information is included in the department sections of this bulletin.

FOREIGN LANGUAGE REQUIREMENT

Some departments require a reading knowledge of one or more foreign languages as indicated in department sections of this bulletin. Fulfillment of language requirements must be endorsed by the chair of the major department.

UNIVERSITY ORAL EXAMINATION

Passing a University oral examination is a requirement of the Ph.D. and J.S.D. degrees. The purpose of the examination is to test the candidate's command of the field of study and to confirm fitness for scholarly pursuits. Departments determine when, after admission to candidacy, the oral examination is taken and whether the exam will be a test of knowledge of the field, a review of a dissertation proposal, or a defense of the dissertation. The chairperson of a Stanford oral examination is appointed for this examination only, to represent the interests of the University for a fair and rigorous process.

Students must be registered in the term in which the University oral examination is taken. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term. Candidacy must also be valid.

The University Oral Examination Committee consists of at least five Stanford faculty members: four examiners and the committee chair from another department. All members are normally on the Stanford Academic Council, and the chair must be a member. Emeritus faculty are also eligible to serve as examiners or chair of the committee. (A petition for appointment of an examining committee member who is not on the Academic Council may be approved by the chair of the department if that person contributes an area of expertise that is not readily available from the faculty.) The chair of the examining committee may not have a full or joint appointment in the adviser's or student's department, but may have a courtesy appointment in the department. The chair can be from the same department as any other member(s) of the examination committee and can be from the student's minor department provided that the student's adviser does not have a full or joint appointment in the minor department.

For Interdisciplinary Degree Programs (IDPs), the chair of the examining committee may not have a full or joint appointment in the primary adviser's major department and must have independence from the student and adviser.

The University Oral Examination form must be submitted to the department graduate studies administrator at least two weeks prior to the proposed examination date. The examination is conducted according to the major department's adopted practice, but it should not exceed three hours in length, and it must include a period of private questioning by the examining committee.

Responsibility for monitoring appointment of the oral examination chair rests with the candidate's major department. Although the department cannot require the candidate to approach faculty members to serve as chair, many departments invite students and their advisers to participate in the process of selecting and contacting potential chairs.

The candidate passes the examination if the examining committee casts four favorable votes out of five or six, five favorable votes out of seven, or six favorable votes out of eight. Five members present and voting constitute a quorum. If the committee votes to fail a student, the committee chair sends within five days a written evaluation of the candidate's performance to the major department and the student. Within 30 days and after review of the examining committee's evaluation and recommendation, the chair of the student's major department must send the student a written statement indicating the final action of the department.

DISSERTATION

An approved doctoral dissertation is required for the Ph.D. and J.S.D. degrees. The doctoral dissertation must be an original contribution to scholarship or scientific knowledge and must exemplify the highest standards of the discipline. If it is judged to meet this standard, the dissertation is approved for the school or department by the doctoral dissertation reading committee. Each member of the reading committee signs the signature page of the dissertation to certify that the work is of acceptable scope and quality. One reading committee member reads the dissertation in its final form and certifies on the Certificate of Final Reading that department and University specifications have been met.

Dissertations must be in English. Approval for writing the dissertation in another language is normally granted only in cases where the other language or literature in that language is also the subject of the discipline. Such approval is routinely granted for dissertations in the Division of Literatures, Cultures, and Languages, in accordance with the policy of the individual department. Dissertations written in another language must include an extended summary in English.

Students have the option of submitting the dissertation electronically or via the paper process. Directions for preparation of the dissertation for electronic or paper submission are available at the Office of the University Registrar dissertation web site at http://studentaffairs.stanford.edu/registrar/students/dissertation-thesis. If submitting via the paper process, the signed dissertation copies and accompanying documents must be submitted to the Office of the University Registrar on or before the quarterly deadline indicated in the University's academic calendar. A fee is charged for the microfilming and binding of the paper dissertation copies. If submitting via the electronic process the signed dissertation signature page and title page must be submitted to the Student Services Center and one final copy of the dissertation must be uploaded, and approved by the Final Reader, on or before the quarterly deadline indicated in the University's academic calendar. There is no fee charged for the electronic submission process.

Students must either be registered or on graduation quarter in the term they submit the dissertation; see "Graduation Quarter" in the "Graduate Degrees" section of this Bulletin for additional information. At the time the dissertation is submitted, an Application to Graduate must be on file, all department requirements must be complete, and candidacy must be valid through the term of degree conferral.

DOCTORAL DISSERTATION READING COMMITTEE

The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student's major department. Normally, all members are on the Stanford Academic Council. The student's department chair may, in some cases, approve the appointment of a reader who is not on the Academic Council, if that person is particularly well qualified to consult on the dissertation topic and holds a Ph.D. or equivalent foreign degree. Former Stanford Academic Council members, emeritus professors, and non-Academic Council members may thus on occasion serve on a reading committee. If they are to serve as the principal dissertation adviser, however, the appointment of a co-adviser who is currently on the Academic Council is required. A non-Academic Council member (including emeritus professors and former Academic Council

members) may replace only one of three required members of dissertation reading committees.

The reading committee, as proposed by the student and agreed to by the prospective members, is endorsed by the chair of the major department on the Doctoral Dissertation Reading Committee form. This form must be submitted before approval of Terminal Graduate Registration (TGR) status or before scheduling a University oral examination that is a defense of the dissertation. The reading committee may be appointed earlier, according to the department timetable for doctoral programs. All subsequent changes to the reading committee must be approved by the chair of the major department. The reading committee must conform to University regulations at the time of degree conferral. Exceptions allowing two non-Academic Council members on the dissertation reading committee when a member of the committee becomes emeritus may be granted by the department chair through the Petition for Doctoral Committee Members.

PH.D. MINOR

Students pursuing a Ph.D. may pursue a minor in another department or program to complement their Ph.D. program. This option is not available to students pursuing other graduate degrees. Ph.D. candidates cannot pursue a minor in their own major department or program. In rare cases, a Ph.D. student may complete the requirements for more than one minor. In that case, 20 unduplicated units must be completed for each minor.

Only departments that offer a Ph.D. may offer a minor, and those departments are not required to do so. The minor should represent a program of graduate quality and depth, including core requirements and electives or examinations. The department offering the minor establishes the core and examination requirements. Elective courses are planned by the students in conjunction with their minor and Ph.D. departments.

The minimum University requirement for a Ph.D. minor is 20 units of course work at the graduate level (courses numbered 200 and above). If a minor department chooses to require those pursuing the minor to pass the Ph.D. qualifying or field examinations, the 20-unit minimum can be reduced. All of the course work for a minor must be done at Stanford.

Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units of graduate course work done at Stanford. Courses used for a minor may not be used also to meet the requirements for a master's degree.

A Ph.D. minor form outlining a program of study must be approved by the major and minor departments. This form is submitted at the time of admission to candidacy and specifies whether representation from the minor department on the University oral examination committee is required.

ADVISING AND CREDENTIALS

ADVISING

By the start of their first term, students should be paired by the department with faculty advisers who assist them in planning a program of study to meet degree requirements. The department should also ensure that doctoral students are informed in a timely fashion about procedures for selecting a dissertation adviser, reading committee members, and orals committee members. Departments should make every effort to assist doctoral students who are not admitted to candidacy in finding an appropriate adviser.

Students are obliged to follow department procedures for identifying advisers and committee members for their dissertation reading and orals examinations.

Occasionally, a student's research may diverge from the area of competence of the adviser, or irreconcilable differences may occur between the student and the faculty adviser. In such cases, the student or the faculty adviser may request a change in assignment. If the department decides to grant the request, every reasonable effort must be made to pair the student with another suitable adviser. This may entail some modification of the student's research project.

In the rare case where a student's dissertation research on an approved project is in an advanced stage and the dissertation adviser is no longer available, every reasonable effort must be made to appoint a new adviser, usually from the student's reading committee. This may also require that a new member be added to the reading committee before the draft dissertation is evaluated, to keep the reconstituted committee in compliance with the University requirements for its composition.

TEACHING CREDENTIALS

Stanford University is accredited by the California Commission on Teacher Credentialing and the National Council for Accreditation of Teacher Education and is authorized to recommend candidates for credentials. The University offers a complete training program for both Single (Secondary) and Multiple Subject (Elementary) teaching credentials. Upon completion of a Stanford approved program, the credentials allow teachers to serve in California public schools.

Current Stanford undergraduates wishing to complete the requirements for a teaching credential should apply to the coterminal program at the School of Education. All other applicants should apply directly to the Stanford Teacher Education Program (STEP) at the School of Education.

ACADEMIC POLICIES AND STATEMENTS

COMPLIANCE WITH UNIVERSITY POLICIES/REGISTRATION HOLDS

Registration as a student constitutes a commitment by the student to abide by University policies, rules, requirements, and regulations, including (but not limited to) those concerning registration, academic performance, student conduct, health and safety, housing, use of the libraries and computing resources, operation of vehicles on campus, University facilities, and the payment of fees and assessments. Some of these are set forth in this bulletin while others are available in relevant University offices.

Students should take responsibility for informing themselves of applicable University policies, rules, requirements, and regulations. A collection is available on the Stanford University policy web site at http://www.stanford.edu/about/administration/policy. Many are also set forth in the *Research Policy Handbook* and the *Graduate Academic Policies and Procedures Handbook (the GAP handbook).*

The University reserves the right to withhold registration privileges or to cancel the registration of any student: who is not in compliance with its policies, rules, requirements, or regulations; or for reasons pertaining to academic performance, health and wellness, qualification to be a student, behavioral conduct, or the safety of the University community.

NOTIFICATION/OBLIGATION TO READ EMAIL

For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Emails and forms delivered through a SUNet account by a student to the University may likewise constitute a formal communication, with the use of this password-protected account constituting the student's electronic signature.

REGISTRATION AND STUDY LISTS

The preliminary study list deadline is the first day of classes of each quarter during the academic year. As early as possible, but no later than this deadline, students (including those with TGR status) must submit to the Office of the University Registrar via Axess, a study list to enroll officially in classes for the quarter. Students are expected to be enrolled "at status" by the preliminary study list deadline; meaning that students must be enrolled in sufficient units to meet requirements for their status, whether full-time, or on approved special registration status. Students who enroll in more units than their anticipated tuition charge covers will be charged the additional tuition. They may not enroll in courses for zero units unless those courses, like TGR, are defined as zero-unit courses. Undergraduates are subject to academic load limits described in the "Amount of Work" section of this bulletin. Students will be charged a $200 late study list fee for submitting their study lists after the quarterly deadline.

The University reserves the right to withhold registration from, and to cancel the advance registration or registration of, any student having unmet obligations to the University.

STUDY LIST CHANGES

Students may add courses or units to their study lists through the end of the third week of classes. (Individual faculty may choose to close their classes to new enrollments at an earlier date.) Courses or units may be added only if the revised program remains within the normal load limits.

Courses or units may be dropped by students through the end of the third week of classes, without any record of the course remaining on the student's transcript. No drops are permitted after this point.

A student may withdraw from a course after the final study list deadline through the end of the eighth week of each quarter. In this case, a grade notation of 'W' (withdraw) is automatically recorded on the student's transcript for that course. Students who do not officially withdraw from a class by the end of the eighth week are assigned the appropriate grade or notation by the instructor to reflect the work completed.

Through the end of the eighth week of classes, students may choose the grading option of their choice in courses where an option is offered.

If the instructor allows a student to take an 'I' (incomplete) in the course, the student must make the appropriate arrangements for that with the instructor by the last day of classes.

The deadlines described above follow the same pattern each quarter but, due to the varying lengths of Stanford's quarters, they may not always fall in exactly the week specified. Students should consult the University's academic calendar for the deadline dates each term. Other deadlines may apply in Law, Graduate School of Business, Medicine, and Summer Session.

REPEATED COURSES

Students may not enroll in courses for credit for which they received either Advanced Placement or transfer credit.

Some Stanford courses may be repeated for credit; they are specially noted in this bulletin. Most courses may not be repeated for credit. Under the general University grading system, when a course which may not be repeated for credit is retaken by a student, the following special rules apply:

1. A student may retake any course on his or her transcript, regardless of grade earned, and have the original grade, for completed courses only, replaced by the notation 'RP' (repeated course). When retaking a course, the student must enroll in it for the same number of units originally taken. When the grade for the second enrollment in the course has been reported, the units and grade points for the second course count in the cumulative grade point average in place of the grade and units for the first enrollment in the course. Because the notation 'RP' can only replace grades for completed courses, the notation 'W' cannot be replaced by the notation 'RP' in any case.
2. A student may not retake the same course for a third time unless he or she received a 'NC' (no credit) or 'NP' (not passed) when it was taken and completed the second time. A student must file a petition for approval to take the course for a third time with the Office of the Vice Provost for Undergraduate Education. When a student completes a course for the third time, grades and units for both the second and third completions count in the cumulative grade point average. The notation 'W' is not counted toward the three-retake maximum.

AMOUNT OF WORK

The usual amount of work for undergraduate students is 15 units per quarter; 180 units (225 for dual degree students) are required for graduation. Registration for fewer than 12 units is rarely permitted and may cause the undergraduate to be ineligible for certification as a full-time student. The maximum is 20 units (21 if the program includes a 1-unit activity course). Requests for exception to the maximum may be considered for compelling reasons, the approval of which may include conditions or restrictions. A past superior academic performance is not considered to be sufficient justification for exceeding the maximum. Petitions for pro-

grams of fewer than 12 or more than 20 units must be submitted to the Office of the Vice Provost for Undergraduate Education, Sweet Hall, first floor. For additional information regarding satisfactory academic progress, refer to the "Academic Standing" section of this bulletin.

Matriculated graduate students are expected to enroll for at least eight units during the academic year; schools and departments may set a higher minimum. Petitions for programs of fewer than 8 must be signed by the student's department and submitted for consideration to the Office of the University Registrar. Graduate students are normally expected to enroll in no more than 24 units; registration for more than 24 units must be approved by the department. Under certain circumstances, graduate students may register on a part-time basis. See the "Tuition, Fees, and Housing" section of this bulletin.

UNIT OF CREDIT

Every unit for which credit is given is understood to represent approximately three hours of actual work per week for the average student. Thus, in lecture or discussion work, for 1 unit of credit, one hour per week may be allotted to the lecture or discussion and two hours for preparation or subsequent reading and study. Where the time is wholly occupied with studio, field, or laboratory work, or in the classroom work of conversation classes, three full hours per week through one quarter are expected of the student for each unit of credit; but, where such work is supplemented by systematic outside reading or experiment under the direction of the instructor, a reduction may be made in the actual studio, field, laboratory, or classroom time as seems just to the department.

AUDITING

No person shall attend any class unless he or she is a fully registered student enrolled in the course or meets the criteria for auditors. Auditors are not permitted in courses that involve direct participation such as language or laboratory science courses, field work, art courses with studio work, or other types of individualized instruction. Auditors are expected to be observers rather than active participants in the courses they attend, unless the instructors request attendance on a different basis. Stanford does not confer credit for auditing, nor is a permanent record kept of courses audited. Students who have been suspended are not permitted to audit.

Auditors may not join classes for the first time after the University's final study list deadline. Auditors are not eligible for other University services or privileges including housing, health insurance (Cardinal Care), Vaden clinical services, and the University health plan. The University Registrar reviews for approval any other services or privileges that may be sought.

In all cases of auditing, the instructor's prior consent and the Office of the University Registrar's prior approval are required. Further information is available from the Office of the University Registrar.

RELIGIOUS HOLIDAYS

Students planning not to attend class or take an exam because of a religious observance are expected to convey this information to instructors in advance. The Office for Religious Life makes available to faculty, staff, and students a list of significant religious observances at the beginning of each academic year. For further information, contact the Deans for Religious Life at (650) 723-1762 or see http://religiouslife.stanford.edu.

LEAVES OF ABSENCE AND REINSTATEMENT (UNDERGRADUATE)

Undergraduates are admitted to Stanford University with the expectation that they will complete their degree programs in a reasonable amount of time, usually within four years. Students have the option of taking a leave of absence for up to one year upon filing a petition to do so with the Office of the University Registrar and receiving approval. The leave may be extended for up to one additional year provided the student files (before the end of the initial one-year leave) a petition for the leave extension with the Office of the University Registrar and receives approval. The University may condition its approval of a petition for leave of absence on the student's meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return (such as, in the case of a leave for medical reasons, proof of treatment or an interview with a provider at Vaden or CAPS). Leaves of absence for undergraduates may not exceed a cumulative total of two years (eight quarters including Summer Quarters). Undergraduates who take an approved leave of absence while in good standing may enroll in the University for the subsequent quarter with the privileges of a returning student.

Students who wish to withdraw from the current quarter, or from a quarter for which they have registered in advance and do not wish to attend, must file a leave of absence petition with the Office of the University Registrar. Information on tuition refunds is available in the "Refunds" section of this bulletin.

An involuntary leave of absence can be imposed in circumstances in which a student:

- presents a substantial risk of harm to self or others or is failing to carry out substantial self-care obligations; or
- significantly disrupts the educational or other activities of the University community; or
- is unable to participate meaningfully in educational activities; or
- requires a level of care from the University community that exceeds the resources and staffing that the University can reasonably be expected to provide for the student's well-being.

Students whose circumstances warrant a review under the Involuntary Leave of Absence Policy, will be apprised, in writing, of University concerns and will be provided an opportunity to respond to concerns in writing or in person or via telephone before a review committee convened by the Dean of Student Life. Students placed on involuntary leave of absence can appeal an unfavorable decision to the Vice Provost for Student Affairs. The University can condition a student's return to registered student status on such requirements as the University deems appropriate in the individual case (such as, in the case of a leave for medical reasons, proof of treatment of an interview with a provider at Vaden or CAPS or its designee). The Involuntary Leave of Absence Policy is available on the Dean of Student Life's web site.

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period.

When a student is granted or placed on a leave of absence after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Standing" section of this bulletin.

Students who have exceeded their eight quarters of approved leave, or who fail to submit a Leave of Absence petition by the published deadline and otherwise do not submit a study list, must apply for reinstatement. The University is not obliged to approve reinstatements of students. Applications for reinstatement are reviewed by the Vice Provost for Undergraduate Education and are subject to the approval of the Faculty Senate Committee on Undergraduate Standards and Policy or its designees. The Committee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions may be based on the applicant's status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education or the Committee.

Applications for reinstatement must be submitted to the Office of the Vice Provost for Undergraduate Education six to eight weeks prior to the start of the term in which the student seeks to enroll in classes. Petition information and instructions may be obtained by contacting the Office of the Vice Provost for Undergraduate Education, Sweet Hall, first floor.

Leaves of absence for and reinstatements of graduate students are addressed in the "Graduate Degrees" section of this bulletin.

RECORDS

TRANSCRIPTS

Transcripts of Stanford records are issued by the Office of the University Registrar upon the student's request when submitted in writing or via the online Axess system. There is no charge for official transcripts. The courses taken in one quarter do not appear on any student's transcript until after the final study list deadline. The University reserves the right to withhold transcripts or records of students with unmet obligations to the University.

CERTIFICATION OF ENROLLMENT OR DEGREES

The Office of the University Registrar can provide oral or written confirmation of registration, enrollment, or degree status. The printed certification can be used whenever enrollment or degree verification is required for car insurance, loan deferments, medical coverage, scholarship purposes, and so on. Using Axess, students are able to print an official certification at no charge. Certification of full- or part-time enrollment cannot be provided until after the study list is filed.

Degrees are conferred quarterly, but diplomas are issued in accordance to the distribution dates listed on the Registrar's Office web site at http://studentaffairs.stanford.edu/registrar/students/obtain-diploma. After conferral, the degree awarded to a student can be verified by contacting the Office of the University Registrar for an official transcript, a certification form, or the National Student Clearinghouse. Requests for transcripts must be made by the student in writing or through Axess.

Full-time enrollment for undergraduates is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Work necessary to complete units from previous quarters does not count toward the 12 units necessary for full-time status in the current quarter. Enrollment in 8 to 11 units is considered half-time enrollment. Enrollment in 1 to 7 units is considered less-than-half-time, or part-time enrollment. During Summer Quarter, all graduate students who hold appointments as research or teaching assistants are considered to be enrolled on at least a half-time basis.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification.

Stanford uses the following definitions (in units) to certify the enrollment status of graduate and professional students each quarter:

	Graduate	*Business (M.B.A., Sloan)*	*Law*	*Medicine (M.D.)*
Full time:	8 or more	11 or more	9 or more	9 or more
Half time:	6 or 7	6-10	6-8	6-8
Part time:	5 or fewer	5 or fewer	5 or fewer	5 or fewer

TGR students enrolled in a course numbered 801 or 802 are certified as full time.

As a general proposition, only information classified by the University as directory information (see the "Directory Information" section of this bulletin) can be confirmed to inquirers other than the student.

PRIVACY OF STUDENTS RECORDS

NOTIFICATION OF RIGHTS UNDER FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student's education records within 45 days of the date the University receives a request for access.
   The student should submit to the Registrar, Dean, chair of the department, or other appropriate University official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.
   A student may ask the University to amend the record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record (with a copy to the University Registrar), clearly identify the part of the records he or she wants changed, and specify why it should be changed.
   If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment.
   Additional information regarding the hearing procedures is provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.
   FERPA contains various exceptions to the general rule that the University should not disclose education records without seeking the prior written consent of the student. The following circumstances are representative of those in which education records (and information drawn from education records) may be disclosed without the student's prior written consent:
   a. Upon request, the University may release Directory Information (see the "Directory Information" section of this bulletin).
   b. School officials who have a legitimate educational interest in a student's education record may be permitted to review it. A school official is: a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student or volunteer serving on an official committee (or representing a recognized student group), such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her responsibility to Stanford or to the student.
   c. The University discloses education records without consent to officials of another school, in which a student seeks or intends to enroll, upon request of officials at that other school.
   d. The University may choose to disclose education records (and information drawn from education records) to either

supporting parent(s) or guardian(s) where the student is claimed as a dependent under the Internal Revenue Code.

e. The University may inform persons including either parent(s) or guardian(s) when disclosure of the information is necessary to protect the health or safety of the student or other persons.

f. For students under the age of 21, the University may notify either parent(s) or guardian(s) of a violation of any law or policy relating to the use of alcohol or controlled substances.

g. The University must provide records in response to lawfully issued subpoenas, or as otherwise compelled by legal process.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-4605.

SHARING INFORMATION WITH PARENTS

Students are encouraged to maintain an ongoing, open dialogue with parents throughout their careers at Stanford about academic progress and personal development. Most student difficulties are resolved at Stanford without involving parents. The University does recognize, however, that there are some exceptional situations where parental involvement may be appropriate to assist a student through a difficult circumstance. Under those circumstances, Stanford may (but is not required to) choose to disclose information to parents if permitted by law.

Under the Family Educational Rights and Privacy Act (FERPA), Stanford is permitted to disclose information drawn from education records to parents if one or more parent claims the student as a dependent for federal tax purposes. Some laws, especially those relating to medical and mental health care, prohibit the disclosure of information without the student's consent, even where the student is a tax dependent.

DIRECTORY INFORMATION

The University regards the following items of information as "directory information," that is, information that the University may make available to any person upon specific request (and without student consent):

- Name*
- Date of birth
- Place of birth
- Directory addresses and telephone numbers
- Email addresses
- SUNet ID (as opposed to Stanford Student ID Number)*
- Mailing addresses
- Campus office address (for graduate students)
- Secondary or permanent mailing addresses
- Residence assignment and room or apartment number
- Specific quarters or semesters of registration at Stanford
- Stanford degree(s) awarded and date(s)
- Major(s), minor(s), and field(s)
- University degree honors
- Student theses and dissertations*
- Participation in officially recognized sports or activities*
- Weight and height of members of athletic teams*
- Institution attended immediately prior to Stanford
- ID card photographs

For more information, see Stanford's FERPA web page at http://studentaffairs.stanford.edu/registrar/students/ferpa.

Students may prohibit the release of any of the items listed above (except those with an '*') by designating which items should not be released on the Privacy function of Axess. Students may prohibit the release of all directory information listed above after an appointment with the Office of the University Registrar to discuss the ramifications of this action. Student theses and dissertations can be restricted through the publishing options and embargo settings students select during submission.

Students, faculty, and others with questions regarding student records should contact the Office of the University Registrar.

CONSENT TO USE OF PHOTOGRAPHIC IMAGES

Registration as a student and attendance at or participation in classes and other campus and University activities constitutes an agreement by the student to the University's use and distribution (both now and in the future) of the student's image or voice in photographs, video or audio capture, or electronic reproductions of such classes and other campus and University activities.

If any student in a class where such photographing or recording is to take place does not wish to have his or her image or voice so used, the student should raise the matter in advance with the instructor.

STANFORD UNIVERSITY ID NUMBER

The Stanford University ID Number is assigned to each student's academic record for unique identification. It is printed on the Stanford University ID card and on documents distributed by the Office of the University Registrar and other administrative offices. It is a violation of University policy to use another's Stanford University ID Number to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

SUNET ID

The SUNet ID provides access to the Stanford University Network (SUNet) and its services, and identifies authorized users of these services. Each member of the Stanford electronic community creates a unique SUNet ID and SUNet ID password for him/herself. SUNet IDs provide:

- Axess services
- Email service
- Storage space within Stanford's distributed file system
- Usenet newsgroups
- World wide web services, including serving of personal web pages on the Leland system and access to Stanford Web Resources

The SUNet ID together with SUNet ID password may serve in place of a signature on electronic forms. The SUNet ID password must remain confidential. It is a violation of University policy to use another's SUNet ID or SUNet ID password to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

IDENTIFICATION CARDS

The ID card serves as an identification card, an electronic key, and a debit card, allowing cardholders to use services for which they have privileges, to enter certain facilities, and to make purchases.

ID cards are available to registered students, faculty, academic staff, and regular staff. Students obtain their ID cards at the Student Services Center, Tresidder Union, 459 Lagunita Drive, 2nd Floor (650) 498-CARD). Faculty and staff obtain ID cards at George Forsythe Hall, 275 Panama Street, Room 190 (650-498-CARD).

Courtesy ID cards are available for spouses and domestic partners of the Stanford professoriate, academic staff, regular staff, and students. These cards may be obtained from the Stanford Card ID Office at Forsythe Hall. The spouse/partner courtesy ID card enables use of some campus services during terms for which the student is registered.

Visiting Scholars who are on campus for a minimum of one quarter and contribute to Stanford's mission by teaching or col-

laborating on Stanford research also receive ID cards and campus privileges during their stay on campus. These cards may be obtained from the Stanford Card ID Office at Forsythe Hall.

Library access and borrowing privileges are reserved for the Stanford professoriate, academic staff, regular staff, students, and others closely associated with the University with a need for such access.

ID cards bear a photograph of the cardholder. This photograph is maintained in an online database and, as stated in the "Directory Information" section of this bulletin, is available for classroom, student residence, and other use upon specific request and without student consent unless the student has designated that the photograph not be released. Photographs can be designated as private using the Privacy function of Axess.

For more information, see http://campuscard.stanford.edu. For the complete policy on Stanford Identification Cards, see the Administrative Guide, 28-4 (pdf).

EXAMINATIONS

MIDTERMS

Classes that give midterm examinations outside of regular class hours must:

1. announce the date and time during the first week of the academic quarter, and
2. provide reasonable alternative times to those students for whom these announced times are not convenient.

According to Honor Code interpretations and applications, different examinations may be given at these alternative times.

END-QUARTER POLICY STATEMENT

The End-Quarter Period is a time of reduced social and extracurricular activity preceding final examinations. Its purpose is to permit students to concentrate on academic work and to prepare for final examinations.

In Autumn, Winter, and Spring quarters, End-Quarter starts seven full days (to begin at 12:01 a.m.) prior to the first day of final exams. In Spring Quarter, final examinations begin on Friday; no classes are held on Thursday, the day before. In Summer Quarter, this consists of the weekend and the four class days preceding the final examinations, which take place on Friday and Saturday of the eighth week. (See the *Time Schedule* for dates.)

During the End-Quarter Period, classes are regularly scheduled and assignments made; this regular class time is used by instructors in whatever way seems best suited to the completion and summation of course material. Instructors should neither make extraordinary assignments nor announce additional course meetings in order to "catch up" in course presentations that have fallen behind. They are free, however, and even encouraged to conduct optional review sessions and to suggest other activities that might seem appropriate for students preparing for final examinations.

No graded homework assignments, mandatory quizzes, or examinations should be given during the End-Quarter Period except:

1. In classes where graded homework assignments or quizzes are routine parts of the instruction process.
2. In classes with laboratories where the final examination will not test the laboratory component. In such a case, the laboratory session(s) during the End-Quarter Period may be used to examine students on that aspect of the course.

Major papers or projects about which the student has had reasonable notice may be called due in the End-Quarter Period.

Take-home final examinations, given in place of the officially scheduled in-class examination, may be distributed in the End-Quarter Period. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course. Such a policy respects the principle that students' final examinations are to be scheduled over a period of several days.

End-quarter examinations may not be held during this period. This policy preserves the instruction time for courses and protects the students' opportunities for extensive review and synthesis of their courses.

During the End-Quarter Period, no musical, dramatic, or athletic events involving compulsory student participation may be scheduled, unless approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP), nor may routine committee meetings be scheduled (such as those of the ASSU, the Senate of the Academic Council, or the committees of the President of the University) when such meetings normally would involve student participation.

Note—Students who believe that there are faculty who are violating End-Quarter policy should contact the Office of the University Registrar.

END-QUARTER EXAMINATIONS

Examinations are part of the process of education at the same time that they are a means to measure the student's performance in course work. Their structure, content, frequency, and length are to be determined in accordance with the nature of the course and the material presented in it, subject only to the limitations contained herein.

Great flexibility is available regarding the types of examinations that an instructor may choose to employ. Examinations, including final examinations, may be, for example, in-class essay examinations, take-home essay examinations, objective examinations, oral examinations, or appropriate substitutes such as papers or projects. Instructors may use any type of examination, paper, or project, or any combination thereof, guided only by the appropriateness of the types of examinations, papers, or projects for the material upon which the student is being examined.

When the final examination is an in-class examination, the following regulations apply:

1. A three-hour period is reserved during examination week for the final examination in each course of more than 2 units. This examination period must be available for students, but not necessarily in its entirety, if an in-class examination is given. In courses with extraordinary meeting times, such that ambiguity might exist as regards the period reserved for the final examination, the schedule should be clarified and students informed no later than the end of the second week of the quarter.
2. Examinations in 1- or 2-unit courses must be completed by the end of the last class meeting before the End-Quarter Period, except in Summer Quarter when examinations must be completed during the last regularly scheduled class session.

When the final examination or its appropriate substitute is not an in-class examination (for example, when an instructor chooses to employ a take-home examination, paper, or project in lieu of an in-class examination), the following regulations apply:

1. The schedule and format of the final examination or its appropriate substitute are made known not later than the end of the second week of the quarter and, if changed subsequently, may be only an option of the plan originally announced by the instructor.
2. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course.

In submitting official Study Lists, students commit to all course requirements, including the examination procedures chosen and announced by the course instructor. In choosing courses, students should take cognizance of the official schedule of final examinations announced on the Registrar's web site at http://studentaffairs.stanford.edu/registrar/final-exams. Students anticipating conflicts in final examination schedules should seek to resolve these with the instructors involved before the Preliminary Study List deadline at the beginning of the quarter. If accommodation cannot be made at that time, the student should revise his or her Study List before the Final Study List deadline at the end of the

third week of the quarter in order to be able to meet the required final examination.

If unforeseen circumstances prevent the student from sitting for the regularly scheduled examination, instructors should make alternative arrangements on an individual basis. Such unforeseen circumstances include illness, personal emergency, or the student's required participation in special events (for example, athletic championships) approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP). Inquiries regarding these circumstances may be directed to the Office of the Vice Provost for Undergraduate Education, Sweet Hall.

STATEMENT CONCERNING EARLY EXAMINATIONS

Students are reminded that taking final examinations earlier than the scheduled time is a privilege, not a right. They should request this privilege only in the event of extraordinary circumstances.

Since the final examination schedule for each quarter is published annually on the Registrar's web site at the time of course selection and enrollment, students are expected to make their academic plans in light of known personal circumstances that may make certain examination times difficult for them.

In general, faculty members are discouraged from giving final examinations earlier than the published and announced times. If faculty nevertheless decide to administer early examinations, either the questions should be completely different from those on the regularly scheduled examination or the early examination should be administered in a highly controlled setting. An example of such a setting would be a campus seminar room where the examination questions would be collected along with students' work and students would be reminded of their Honor Code obligations not to share information about the examination contents. Giving students easy opportunities to abuse the integrity of an examination is unfair to honest students and inconsistent with the spirit of the Honor Code.

Academic fields differ in the degree to which early examination requests present dilemmas for faculty. If, for example, an examination format consists of a small number of essay questions, where students would be greatly advantaged by knowing the question topics, faculty should be especially reluctant to allow early examinations unless they are willing to offer totally different examinations or a different kind of academic task, for example, a final paper in lieu of an examination.

GRADING SYSTEMS

GENERAL UNIVERSITY GRADING SYSTEMS

The general University grading system is applicable to all of Stanford University except the Graduate School of Business, the School of Law, and M.D. students in the School of Medicine. Note that the GPA (grade point average) and rank in class are not computed under the general University grading system. Stanford does use an internal-only GPA which is based on units completed up to the time of conferral of the first bachelor's degree. This information is used for internal purposes only (including academic standing) and is not displayed on the official transcript which is sent outside the University. Most courses are graded according to the general University grading system. However, courses offered through Law, Business, and Medicine are graded according to those schools' grading systems, even in cases where students in other programs are enrolled in their classes. Note also that, as to graduate students, there may be departmental requirements as to grades that must be maintained for purposes of minimum academic progress.

DEFINITION AND EXPLANATION OF GRADING SYSTEMS

All grades/notations for courses taken in 1995-96 or later are to be visible on student transcripts. Effective Summer Quarter 2008-09, the notation * was changed to GNR (Grade Not Reported).

A (+,-)	Excellent
B (+,-)	Good
C (+,-)	Satisfactory
D (+,-)	Minimal pass
	Plus (+) and minus (-) may be used as modifiers with the above letter grades
NP	Not Passed
NC	No Credit (unsatisfactory performance, 'D+' or below equivalent, in a class taken on a satisfactory/no credit basis)
CR	Credit (student-elected satisfactory; A, B, or C equivalent)
S	No-option Satisfactory; A, B, or C equivalent
L	Pass, letter grade to be reported
W	Withdraw
N	Continuing course
I	Incomplete
RP	Repeated Course
*	No grade reported (effective through Spring 2008-09).
GNR	Grade not reported (effective beginning Autumn Quarter 2009-10).

EXPLANATION

NC	The notation 'NC' represents unsatisfactory performance in courses taken on a satisfactory/no credit basis. Performance is equivalent to letter grade 'D+' or below.
NP	The notation 'NP' is used by instructors in courses taken for a letter grade that are not passed.
CR	In a course for which some students receive letter grades, the 'CR' represents performance that is satisfactory or better when the student has elected the 'CR' grading option.
S	For an activity course or a course in which the instructor elects to grade students only on a satisfactory/no credit basis, the 'S' represents performance that is satisfactory or better. For such a course, no letter grades may be assigned for satisfactorily completed work. It should be noted that the Registrar is unable to record course grades submitted when the instructor has not observed the required distinction between 'S' and 'CR.' The 'satisfactory' options are intended to relieve the pressure on students for achievement in grades. The 'satisfactory' options in no way imply fewer or different course work requirements than those required of students who elect evaluation with a letter grade. A department may limit the number of 'satisfactory' courses to count for a major program. No more than 36 units of Stanford course work (including activity courses) in which a 'CR' or 'S' was awarded can be applied toward the 180 (225 if dual degrees are being pursued) units required for a bachelor's degree. Transfer students are limited to 27 'CR' or 'S' units applied to the 180/225 minimum.
L	The 'L' is a temporary notation that represents creditable completion of a course for which the student will receive a permanent letter grade before the start of the next quarter. The 'L' is given when the instructor needs additional time to determine the specific grade to be recorded, but it is not appropriate if additional work is expected to be submitted by the student. A student receives unit credit for work graded 'L.'
N	The 'N' indicates satisfactory progress in a course that has not yet reached completion. Continuation courses need not continue at the same number of units, but the grade for all quarters of such a course must be the same.

N- The 'N-' grade indicates unsatisfactory progress in a continuing course. The first 'N-' grade constitutes a warning. The adviser, department chair, and student should discuss the deficiencies and agree on the steps necessary to correct them. A second consecutive 'N-' will normally cause the department to deny the student further registration until a written plan for the completion of the degree requirements has been submitted by the student and accepted by the department. Subsequent 'N-' grades are grounds for dismissal from the program.

I The 'I' is restricted to cases in which the student has satisfactorily completed a substantial part of the course work. No credit will be given until the course is completed and a passing grade received. When a final grade is received, all reference to the initial 'I' is removed.

'I' grades must be changed to a permanent notation or grade within a maximum of one year. If an incomplete grade is not cleared at the end of one year, it is changed automatically by the Office of the University Registrar to an 'NP' (not passed) or 'NC' (no credit) as appropriate for the grading method of the course. Students must request an incomplete grade by the last class meeting. Faculty may determine whether to grant the request or not. Faculty are free to determine the conditions under which the incomplete is made up, including setting a deadline of less than one year.

RP The notation 'RP' (meaning Repeated Course) replaces the original grade recorded for a course when a student retakes a course. (See the "Repeated Courses" section of this bulletin.)

W The notation 'W' (meaning Withdraw) is recorded when a student withdraws from a course.

* The '*' symbol appears when no grade has been reported to the Registrar for courses taken prior to 2001-02. The '*' symbol remains on the transcript until a grade has been reported (effective through Spring 2008-09).

GNR The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported. (Effective beginning Autumn Quarter 2009-10.)

REPORTING OF GRADES

All grades should be reported within 96 hours after the time and day reserved for the final examination, and in no case later than noon of the fourth day (including weekends) after the last day of the final examination period.

In the case of degree candidates in Spring Quarter, final grades should be reported by noon of the day following the end of the final examination period.

REVISION OF END-QUARTER GRADES

When duly filed with the Office of the University Registrar, end-quarter grades are final and not subject to change by reason of a revision of judgment on the instructor's part; nor are grades to be revised on the basis of a second trial (for example, a new examination or additional work undertaken or completed after the end of the quarter). Changes may be made at any time to correct an actual error in computation or transcription, or where some part of the student's work has been unintentionally overlooked; that is, if the new grade is the one that would have been entered on the original report had there been no mistake in computing and had all the pertinent data been before the instructor, the change is a proper one.

If a student questions an end-quarter grade based on the grading of part of a specific piece of work (for example, part of a test) on the basis of one of the allowable factors mentioned in the preceding paragraph (for example, an error in computation or transcription, or work unintentionally overlooked, but not matters of judgment as mentioned below), the instructor may review the entire piece of work in question (for example, the entire test) for the purpose of determining whether the end-quarter grade was a proper one. In general, changing an end-quarter grade is permitted on the basis of the allowable factors already mentioned whether an error is discovered by the student or the instructor; however, changing a grade is not permitted by reason of revision of judgment on the part of the instructor.

In the event that a student disputes an end-quarter grade, the established grievance procedure should be followed (see the "Student Academic Grievance Procedure" section of this bulletin).

GRADUATE SCHOOL OF BUSINESS GRADES

All courses offered by the Graduate School of Business are graded according to the following five-level scheme:

H Honors. Work that is of truly superior quality.

HP High Pass. A passing performance, and one that falls approximately in the upper quarter of passing grades.

P Pass. A passing performance that falls in the center of the distribution of all passing grades.

LP Low Pass. A passing performance that falls approximately in the lower quarter of passing grades.

U Unsatisfactory. A failing performance. Work that does not satisfy the basic requirements of the course and is deficient in significant ways.

GNR The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported (effective Autumn Quarter 2009-10).

GSB courses may receive grades of "+" (Pass) for courses taken on a Pass-Fail basis, with "U" denoting a failing grade, "I" for Incomplete, and "N" for a continuing grade. The grade of N is recorded in a course that spans more than a single quarter, where the grade in an earlier quarter will be determined only later, after the entire course sequence is complete..

Prior to 2009-10, an asterisk (*) notation was placed when no grade was reported.

STANFORD LAW SCHOOL GRADES

Effective Autumn Quarter 2009-10, units earned in the Stanford Law School are quarter units. Units earned in the Stanford Law School prior to 2009-10 were semester units. The following grading system became effective in Autumn Semester 2008-09. J.D. students who graduated in 2009 remained on the prior grading system but all other students shifted to the new grading system. For more information, see http://law.stanford.edu/experience/studentlife/SLS_Student_Handbook.pdf.

H Honors (exceptional work, significantly superior to the average performance at the school)

P Pass (representing successful mastery of the course material)

R Restricted credit (representing work that is unsatisfactory)

F Fail (representing work that does not show minimally adequate mastery of the material)

MP Mandatory pass (representing P or better work)

N Continuing course

I Incomplete

* No grade reported

GNR Grade not reported (effective Autumn Quarter 2009-10).

The grading systems employed at the Stanford Law School September 2001 through Spring 2009 were as follows. Under the numerical system (with letter equivalents), the range of satisfactory grades ran from 4.3 to 2.5 as outlined in the following distribution. Below the grade of 2.5 was one level of restricted credit (2.2) and one level of failure (2.1). The number grades with letter equivalents were as follows:

4.3–4.2	A+	3.4–3.2	B+	2.2	Restricted Credit
4.1–3.9	A	3.1–2.9	B	2.1	Failure
3.8–3.5	A-	2.8–2.5	B-		

On this old system, students could elect to take a limited number of courses on a credit/restricted credit/no credit system (K/RK/NK). 'K' was awarded for work that was comparable to numerical grades 4.3 to 2.5, 'RK' for Restricted Credit-level work (2.2), and 'NK' for Failure-level work (2.1). A limited number of courses were offered on a mandatory credit (KM)/no credit (NK) basis.

'N' is a temporary notation used in a continuing course; it is replaced with a final grade upon completion of the course series.

SCHOOL OF MEDICINE GRADES

In general, the following grades are used in reporting on the performance of students in the M.D. program:

Pass (+)	Indicates that the student has demonstrated to the satisfaction of the department or teaching group responsible for the course that the student has mastered the material taught in the course.
Fail (-)	Indicates that the student has not demonstrated to the satisfaction of the department or teaching group responsible for the course that the student has mastered the material taught in the course.
Incomplete (I)	Indicates that extenuating medical or personal circumstances have prevented the student from completing the course requirements. This grade is given when requested by the student with the prior approval of an Advising Dean in the School of Medicine.
Continuing (N)	Indicates that the course has not concluded and the student is continuing the course.
Exempt (Ex)	Indicates a course that is exempted by examination. No units are awarded.
GNR	The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported (effective Autumn Quarter 2009-10).

In general, a 'Fail' grade can be cleared by repeating and passing the particular course or by other arrangement prescribed by the department or teaching group. An 'Incomplete' grade can be made up in a manner specified by the department or teaching group within a reasonable time; if the deficiency is not made up within the specified time, the 'Incomplete' grade becomes a 'Fail' grade. The opportunity to clear a 'Fail' grade or an 'Incomplete' grade cannot be extended to individuals who are not registered or eligible to register as students in the M.D. program. For more specific information, see http://med.stanford.edu/md/curriculum/assessment-grading.html.

ACADEMIC STANDING

Undergraduates matriculating in or after Autumn 1999 are required to adhere to the following academic standards.

Undergraduates must maintain a minimum 2.0 cumulative GPA and a quantitative unit requirement for good academic standing. In addition, a minimum 2.0 cumulative GPA is required for conferral of a baccalaureate degree.

Undergraduates normally are expected to plan their academic programs so that they can complete 180 units in four years (twelve quarters), including the requirements for a major and the General Education, Writing and Rhetoric, and Language Requirements. Satisfactory academic progress is, on average, 45 units per academic year for four years leading to at least 180 units, a cumulative grade point average of at least 2.0, and a baccalaureate degree.

While undergraduates are expected to register for a minimum of 12 units, they are required to complete at least 9 units each quarter (by the end of the final exam period) and at least 36 units in their most recent three quarters of Stanford enrollment (by the end of the third final exam period). In addition, students are expected to maintain a cumulative grade point average of at least 2.0. Transfer work completed at other institutions is not considered in this calculation.

A student earning fewer than 9 units per quarter or fewer than 36 units in three quarters, or earning less than a 2.0 cumulative grade point average, is placed on probation. Additionally, a student may be placed directly on provisional registration or suspended without first being placed on probation if the student has had a prior probation status. Students on probation or provisional registration status are required to complete a minimum of 12 units of new course work per quarter (by the end of the final quarter examination period for each quarter) for each quarter for three consecutive quarters, and achieve and maintain a cumulative grade point average of at least 2.0 to attain good academic standing. (A Stanford Summer Session quarter counts toward the three consecutive quarter requirement if 11 or more units are completed). The C-USP Subcommittee on Academic Standing may stipulate otherwise by acting upon a petition for fewer units.

Full-time enrollment is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Under extenuating circumstances, students may petition to the C-USP Subcommittee on Academic Standing to take fewer units. Work necessary to complete units from previous quarters does not count toward the 12 units necessary for full-time enrollment in the current quarter. All students registering for fewer than 12 units should consider the effects of that registration on their degree progress, visas, deferment of student loans, residency requirements, and their eligibility for financial aid and awards.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification and athletic participation.

Units are granted for courses completed with grades 'A,' 'B,' 'C,' 'D,' 'Satisfactory' ('CR' or 'S'), and 'L.' Courses graded 'N' are counted provisionally as units completed, provided the student enrolls in the continuing segment of that course the following quarter. When the course is completed, the student receives the units for which he or she enrolled. No units are granted for a course in which the student receives an 'I' or an '*' ('GNR' replaces the '*' effective Autumn Quarter 2009-10) until the course is completed satisfactorily and the final grade reported. No units are granted for a course in which the student receives a 'W'. (See the "Grading Systems" section of this bulletin).

Students who receive all 'W's as the result of a Leave of Absence are subject to Academic Standing policies.

The C-USP Subcommittee on Academic Standing in its discretion is empowered to place conditions on students on probation or provisional registration in regard to enrollment and participation in programs and activities. In addition, students on probation or provisional registration require approval in advance from Undergraduate Advising and Research, Residential Education, and the Overseas Studies Program office or Stanford in Washington Program office in order to participate in Stanford's Overseas Studies Program or Stanford in Washington.

Academic performance of a student participating in a coterminal program, and whose undergraduate degree or degrees have not yet been conferred, is reviewed on a case-by-case basis in conjunction with the graduate department or program in which the student is enrolled.

UNDERGRADUATES MATRICULATING PRIOR TO AUTUMN 1999

Note: Undergraduates matriculating prior to Autumn 1999 are required to adhere to the academic standards described above but are exempt from the minimum 2.0 cumulative GPA requirement for academic standing purposes. However, departments can elect to require a minimum GPA for course work applicable to the major and the minor. Refer to departmental literature for specific requirements.

PROBATION

A student who fails to complete at least 36 units of work in his or her most recent three quarters of enrollment at the University (by the end of the third final exam period), or who fails to complete by the end of the final examination period at least 9 quarter units of work in his or her most recent quarter of enrollment at the University, or who has a cumulative grade point average of less than 2.0, shall be placed on probation (warning status).

A student shall be removed from probation after three consecutive subsequent quarters of enrollment at the University if, in each quarter, he or she completes a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from probation at the discretion of the C-USP Subcommittee on Academic Standing or its designees as a result of a review of individual records.

PROVISIONAL REGISTRATION

A student who, while on probation, fails in any quarter of registration to complete a minimum of 12 units of new course work by the end of the final examination period or fails to achieve and maintain a cumulative grade point average of at least 2.0, shall be placed on provisional registration status. In addition, and on occasion, a student may also be placed directly on provisional registration without first being placed on probation if the student has had a prior probation status.

A student shall be removed from provisional registration after three consecutive subsequent quarters of enrollment at the University if, in each quarter, he or she completes a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from provisional registration at the discretion of the C-USP Subcommittee on Academic Standing or its designees as a result of a review of individual records.

SUSPENSION

A student who, while on provisional registration, fails to complete a minimum of 12 units of new course work by the end of the final examination period, or who fails to achieve and maintain a cumulative grade point average of at least 2.0, shall be suspended. In addition, and on occasion, a student may also be suspended directly from probation; or may be suspended without first being placed on probation or provisional registration if the student has had a prior probation status.

While students suspended for the first time are suspended for one year, students suspended a subsequent time may be suspended for up to three years.

Students suspended for one year are not eligible to enroll for four quarters (including Summer Quarter) following the quarter in which the suspension was issued. Students suspended for up to three years are not eligible to enroll for up to twelve quarters (including Summer Quarter) following the quarter in which the suspension was issued.

Appeal of Suspension—Students who have been suspended, and who believe they have a compelling reason to appeal their suspension, without a break in enrollment, are required to submit a Petition to Appeal Academic Suspension. Otherwise, students are expected to complete their academic suspension in full.

RETURNING FROM SUSPENSION

Students are required to submit a properly endorsed application for reinstatement to request reenrollment after the suspension period has been completed. Instructions including deadlines for requesting provisional registration should be obtained from the Office of the Vice Provost for Undergraduate Education, Sweet Hall. The C-USP Subcommittee on Academic Standing, or those designated by the subcommittee, acts upon all requests concerning academic standing, including requests for reinstatement after academic suspension. The subcommittee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions may be based on activities while away from campus, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education or the subcommittee or its designees.

Questions concerning academic standing or the petitioning process should be directed to the Office of the Vice Provost for Undergraduate Education, Sweet Hall.

Students returning from suspension should also contact appropriate campus offices, such as Housing and Financial Aid, regarding their deadlines and procedures.

NOTIFICATION (ACADEMIC STANDING)

Written notification that a student is on probation, provisional registration, or suspension is sent to the student and to the student's academic adviser as soon as possible after the close of the quarter. Students also receive written notification of the outcome of their application for reinstatement. Current student status, such as whether a student is enrolled or not, is considered Directory Information for FERPA purposes at Stanford, and Stanford may provide either parent(s) or guardian(s) written notification of a change in student status. Provided that a student consents, or the student is a dependent for income tax purposes, Stanford may also provide either parent(s) or guardian(s) written notification that the student is on probation, provisional registration, suspension, leave of absence, or voluntary withdrawal.

STUDENT ACADEMIC GRIEVANCE PROCEDURE

The following policy is subject to periodic review and modificatoin.

1. Coverage
   a. Any Stanford undergraduate or graduate student who believes that he or she has been subjected to an improper decision on an academic matter is entitled to file a grievance to obtain an independent review of the allegedly improper decision, followed by corrective action if appropriate. A grievance is a complaint in writing made to an administrative officer of the University concerning an academic decision, made by a person or group of persons acting in an official University capacity, that directly and adversely affects the student as an individual in his or her academic capacity.
   b. This grievance procedure applies only in those cases involving a perceived academic impropriety arising from a decision taken by: (1) an individual instructor or researcher; (2) a school, department, or program; (3) a committee charged to administer academic policies of a particular school, department, or program; or (4) the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or a Senate committee or subcommittee charged to administer academic policies of the Senate of the Academic Council. This procedure does not apply to: (1) complaints expressing dissatisfaction with a University policy of general application challenged on the grounds that the policy is unfair or inadvisable; (2) individual school, department, or program academic policies, as long as those policies are not inconsistent with general University policy; (3) matters proceeding through the Office of Judicial Affairs; or (4) involuntary leave decisions.
   c. Individuals should be aware that the University Ombuds Office is available to all Stanford students, faculty, and staff to discuss and advise on any matter of University concern and frequently helps expedite resolution of such

matters. Although it has no decision-making authority, the University Ombuds Office has wide powers of inquiry, including into student complaints against instructors.

2. Grievance and Appeal Procedures
   a. *Informal Attempts at Resolution:* the student first should discuss the matter, orally or in writing, with the individual(s) most directly responsible. If no resolution results, the student should then consult with the individual at the next administrative level, for example, the chair or director of the relevant department or program, or, for those cases in which there is none, with the school dean. At this stage, the department chair or program director, if any, may inform the dean that the consultation is taking place and may solicit his or her advice on how to ensure that adequate steps are taken to achieve a fair result. Efforts should be made to resolve the issues at an informal level without the complaint escalating to the status of a formal grievance.
   b. *The Filing of the Grievance:*
      1. If informal means of resolution prove unsatisfactory, the student should set forth in writing a statement of the decision that constitutes the subject matter of the dispute, the grounds on which it is being challenged, and the reasons why the grievant believes that the decision was improperly taken. The statement should also include a description of the remedy sought and the informal efforts taken to date to resolve the matter. It is at this point that the complaint becomes a formal grievance. The written grievance should specifically address the matters set forth in the Standards for Review, as stated in Section 4 below. The grievance should include an allegation of any adverse effects on the grievant, known to the grievant at the time of filing.
      2. The grievance document should be submitted to the dean of the school in which the grievance arose; for a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate committee or subcommittee, the procedures set forth herein for grievances and appeals shall be modified as stated in Section 3 below. A grievance must be filed in a timely fashion, that is, normally within 30 days of the end of the academic quarter in which the adverse decision occurred or should reasonably have been discovered. Except in extraordinary circumstances, delay in filing a grievance may will constitute grounds for rejection of the grievance.
   c. *The Response to the Grievance:*
      1. The relevant dean willconsider the grievance. The dean may attempt to resolve the matter informally or make whatever disposition of the grievance that he or she deems appropriate. The dean may, in appropriate cases, remand the grievance to a lower administrative level (including to the level at which the grievance arose) for further consideration.
      2. The dean may also refer the grievance, or any issue therein, to any person (the "grievance officer") who will consider the matter and report to the dean as the latter directs. The dean will inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and will specify the matters referred, the directions to the person or persons to whom the referral is made (including the time frame within which the person is to report back to the dean), and the name of that person.
      3. In undertaking the review, the dean or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information considered relevant, including faculty, staff, and students.
      4. Should attempts to resolve the matter informally not be successful, the dean will decide the grievance, and will notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the grievance.
      5. Normally, no more than 60 days should elapse between the filing of a grievance and the disposition by the dean. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the dean decides that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of that in writing, giving the grounds therefore and an estimate of when a disposition can be expected. During summers and the winter closure, this time frame will nearly always be extended.
   d. *The Filing of an Appeal:*
      1. If the grievant is dissatisfied with the disposition of the grievance at the decanal level, either on substantive or on procedural grounds, he or she may appeal in writing to the Provost.
      2. The appeal must specify the particular substantive or procedural bases of the appeal (that is, the appeal must be made on grounds other than general dissatisfaction with the disposition) and must be directed only to issues raised in the grievance as filed or to procedural errors in the grievance process itself, and not to new issues. The appeal must contain the following:
   a. A copy of the original grievance and any other documents submitted by the grievant in connection therewith.
   b. A copy of the determination made by the dean on that grievance.
   c. A statement of why the reasons for the determination of the dean are not satisfactory to the grievant. This statement should specifically address the matters set forth in the *Standards for Review* in Section 4 below.
      3. The grievant will file his or her appeal at the earliest practicable date after the grievant's receipt of the determination by the dean. Normally, no more than 30 days should elapse between the transmittal of the dean's decision on the grievance and the filing of the appeal. Except in extraordinary circumstances, delay in filing an appeal will constitute grounds for rejection of the appeal.
   e. *The Response to the Appeal:*
      1. The Provost may attempt to resolve the matter informally, or refer the appeal, or any issue thereof, to any person (the "grievance appeal officer") who shall consider the matter and report to the Provost as the latter directs. The Provost may also, in appropriate cases, remand the matter to a lower administrative level (including to the level at which the grievance arose) for further consideration.
      2. The Provost will inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and will specify the matters referred, the directions to the person to whom the referral is made (including the time frame within which the person is to report back to the Provost), and the name of that person.
      3. Should attempts be made to resolve the matter informally not be successful, the Provost will decide the appeal, and will notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the appeal. The decision of the Provost shall be final, unless the grievant requests a further appeal to the President pursuant to

subsection 2f below, and the President agrees to entertain this further appeal.

4. Normally no more than 45 days should elapse between the filing of the appeal and the disposition by the Provost. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the Provost judges that disposition on that schedule is not possible, he or she will inform the grievant (and the party against whose decision the grievance has been filed) of the fact in writing, giving the grounds therefore and an estimate of when a disposition can be expected. During summers and the winter closure, this time frame will nearly always be extended.

f. *The Request to the President:* if the student is dissatisfied with the disposition of the appeal by the Provost, he or she may write to the President of the University giving reasons why he or she believes the grievance result to be wrong (following the general format set forth in subsection 2d.2 above). No more than 30 days should elapse between the transmittal of the Provost's disposition and the written statement to the President urging further appeal. In any case, the President may agree or decline to entertain this further appeal. If the President declines to entertain the further appeal, the decision of the Provost is final. If the President decides to entertain the further appeal, he or she will follow the general procedures set forth in Section 2e above, and the decision of the President will be final.

3. Grievances Concerning Decisions of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate Committee or Subcommittee
   a. For a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Standing, or of a Senate committee or subcommittee, the grievant will file his or her grievance with the Provost, rather than with the dean, and the Provost will handle that grievance in accordance with the procedures set forth in Section 2c above.
   b. There is no appeal of the Provost's disposition of that grievance, except as may be available under Section 2f above.
4. Standards for Review and Procedural Matters
   a. The review of grievances or appeals will usually be limited to the following considerations:
      1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
      2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
      3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?
   b. The time frames set forth herein are guidelines. They may be extended by the relevant administrative officer in his or her discretion for good cause.
   c. Questions concerning the filing and appeal of grievances should be directed to the Office of the Provost.

UNDERGRADUATE EDUCATION

Vice Provost for Undergraduate Education: Harry J. Elam, Jr.
Senior Associate Vice Provost for Undergraduate Education: TBA
Web Site: http://ual.stanford.edu

The Vice Provost for Undergraduate Education (VPUE) is responsible for building partnerships with faculty, departments, programs, and schools to promote and sustain excellence in undergraduate education at Stanford. It has a special focus on the academic programs in the first and second year that engage students in critical thinking and scholarly inquiry and that lay the foundations for their subsequent fields of concentration and future achievements. Other VPUE programs support upper class students in research, the arts, overseas study, and writing. VPUE works to ensure equity and accessibility for all students and to promote the core values of a liberal arts education. It seeks to help students create individually meaningful and coherent educational programs by guiding them in their choice of courses, programs of study, and extracurricular academic opportunities. VPUE fosters productive interactions between faculty and students and excellence in teaching through the provision of resources to departments and faculty for research with undergraduates, curriculum and pedagogical development, opportunities for mentoring, and small group seminars.

VPUE programs for first- and second-year students include New Student Orientation/Approaching Stanford, Introduction to the Humanities, Program in Writing and Rhetoric, Introductory Seminars, and Sophomore College. Programs for more advanced students include the Bing Overseas Study Program, Writing in the Major, Arts Intensive Program, and Bing Honors College. Undergraduate Advising and Research, the Center for Teaching and Learning, Diversity Outreach, and the Hume Writing Center serve undergraduates throughout their time at Stanford. The Office of the VPUE works closely with the Office of the Vice Provost for Student Affairs and the Admissions Office. The Vice Provost for Undergraduate Education reports to the Provost.

Policies governing undergraduate education are formulated by Faculty Senate committees and voted into legislation by the Faculty Senate. The Committee on Undergraduate Standards and Policies (C-USP) addresses such topics as general education requirements, grading, awards, advising, and teaching evaluation. The Committee to Review Undergraduate Majors (C-RUM) oversees the initiation and review of undergraduate degree programs. Committee members include the Vice Provost for Undergraduate Education or his delegated staff (ex-officio) and representatives from the faculty at large, administration (such as the Office of the University Registrar), and students. The Associated Students of Stanford University (ASSU) nominations committee selects student members. The VPUE also maintains, by rule of the Faculty Senate, the Introduction to the Humanities Governance Board and the Writing and Rhetoric Governance Board to oversee these University degree requirements. Finally, the Undergraduate Advisory Council (UGAC) was established by the Provost in 1996 to serve as the main faculty advisory body for the Vice Provost for Undergraduate Education.

STANFORD INTRODUCTORY STUDIES

Program Directors: Marvin Diogenes, Ellen Woods
Offices: Sweet Hall
Phone: (650) 723-2631
Email: stanfordintrostudies@stanford.edu
Web Site: http://sis.stanford.edu

Stanford Introductory Studies offers courses taught by faculty from across the seven Schools of the University. Some of these courses satisfy University Requirements (IHUM, GER, and the Writing and Rhetoric Requirement) while others provide seminar opportunities for first- and second-year students. Special residential programs such as Structured Liberal Education and September Studies (Sophomore College, Arts Intensive, and Bing Honors College) expand SIS curricular opportunities for students. The Hume Writing Center, which manages writing services such as tutorials and workshops for all students, is also part of SIS.

INTRODUCTION TO THE HUMANITIES PROGRAM

Director: Russell A. Berman
Associate Director: Ellen Woods
Affiliated Faculty: Lanier Anderson (Philosophy), Chris Bobonich (Philosophy), Eavan Boland (English), Scott Bukatman (Art and Art History), Steven Carter (Asian Languages), David Como (History), Adrian Daub (German Studies), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Zephyr Frank (History), Paul Harrison (Religious Studies), Robert Harrison (French and Italian), Ursula Heise (English), Ian Hodder (Archaeology and Anthropology), Christian Kaesser (Classics), Joshua Landy (French and Italian), Henry Lowood (University Libraries, Science and Technology), Marsh H. McCall, Jr. (Classics), Ian Morris (Classics), Alice Rayner (Drama), Eric Roberts (Computer Science), Orrin Robinson (German Studies), Janice Ross (Drama), Gabriella Safran (Slavic Languages), Nariman Skakov (Slavic Languages), Jennifer Summit (English), Kenneth Taylor (Philosophy), Blakey Vermeule (English), Barbara Voss (Archaeology and Anthropology), Steven Weitzman (Religious Studies), Laura Wittman (French and Italian), Tobias Wolff (English), Allen Wood (Philosophy), Lee Yearley (Religious Studies), Mark Zoback (Geophysics)
Lecturers: Sarah Allison, Lalaie Ameeriar, Nicholas Bauch, Kristin Boyce, Renu Cappelli, Bill Carter, Dan Contreras, John Corbally, Zenon Culverhouse, Jon Daehnke, Matthew Daube, William Elison, Jackie Feke, Catherine Flynn, Corinne Gartner, James Genone, William Goldman, Abby Heald, Andrew Hui, Michael Hunter, Ruth Kaplan, Kimberly Lewis, Tomas Matza, Liz Mullane, Christy Pichichero, Anne Pollok, Toma Roberts, Kathryn Lafrenz Samuels, Matthew Sayre, Jeffrey Schwegman, Janna Segal, Patricia Slatin, Melissa Stevenson, Anise Strong, Natalya Sukhonos, Bulbul Tiwari, Candace West, Gabriel Wolfenstein, Joshua Wright, Zhaohua Yang, Kari Zimmerman
Offices: Sweet Hall, Second Floor
Mail code: 3068
Phone: (650) 723-0944
Email: ihumprogram@stanford.edu
Web Site: http://ual.stanford.edu/ihum

Courses offered by the Introduction to the Humanities Program have the subject code IHUM and are listed in the "Introduction to the Humanities Courses" section of this bulletin.

Introduction to the Humanities offers courses that satisfy a three-quarter General Education Requirement (GER) for first-year students. The purpose of the Introduction to the Humanities (IHUM) requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture.

Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas.

The IHUM requirement may be satisfied in two ways:

1. *Introduction to the Humanities courses*—a one quarter, interdisciplinary course followed by a two quarter course sequence.
2. *The Program in Structured Liberal Education*—a three quarter, residence-based learning experience, which satisfies the IHUM requirement, both of the University Writing and Rhetoric requirements, and the General Education Requirement in Disciplinary Breadth: Humanities. For information on the program, see the "Structured Liberal Education" section of this bulletin.

PROGRAM IN WRITING AND RHETORIC

Faculty Director: Nicholas Jenkins
Associate Director: Jonathan Hunt
Lecturers: Christine Alfano, Paul Bator, Katherine Baxter, Julia Bleakney, Shaleen Brawn, Subho Chakravarty, Kevin DiPirro, Mark Feldman, Marjorie Ford, Wendy Goldberg, Patti Hanlon-Baker, Arturo Heredia, Donna Hunter, Lee Konstantinou, John Lee, Sohui Lee, Sangeeta Mediratta, Kimberly Moekle, Gabrielle Moyer, Kelly Myers, Alyssa O'Brien, John Peterson, Michael Reid, Carolyn Ross, Helle Rytkonen, Kim Savelson, Susan Schuyler, Rod Taylor, Davy Walter, Ann Watters, Susan Wyle
Teaching Affiliates: Steffi Dippold (Autumn), Ingrid Fernandez (Autumn), Hanna Janiszewska (Autumn), Mark Vega (Autumn, Winter, Spring), Jessica Weare (Winter, Spring)
Offices: Sweet Hall, Third Floor
Mail Code: 3069
Phone: (650) 723-2631
Email: pwrcourses@stanford.edu
Web Site: http://ual.stanford.edu/AP/univ_req/PWR/Req

Courses offered by the Program in Writing and Rhetoric are listed under the subject code PWR on the *Stanford Bulletin's* ExploreCourses web site.

The Program in Writing and Rhetoric (PWR) designs and teaches courses that meet the Writing and Rhetoric requirement for undergraduates at Stanford as well as intermediate and advanced writing and rhetoric classes. For more information on the requirement, see the "Writing and Rhetoric Requirement" section of this bulletin.

PWR courses engage students in rhetorical and contextual analysis of texts and substantive research-based argument. Students in PWR courses learn and practice time-tested rhetorical principles to gain increasing control over the intellectual and stylistic elements of their writing; they learn to analyze the ideas and persuasive strategies of others and to apply those insights to their own writing.

Toward these ends, PWR 1 focuses on elements of academic argument: understanding a writer's stance; developing a supportable argumentative thesis; discovering, developing, and deploying cogent proofs; making appropriate organizational and stylistic choices; and understanding the expectations of audiences. The course emphasizes research-based writing, including the effective use of print and non-print sources, primary and secondary sources, and data based on fieldwork. Students enrolled in PWR 1 carry out significant research and use it as the basis for a polished and persuasive research-based argument.

PWR 2 further develops students' skills in writing and oral presentation, emphasizing the ongoing development of content, organization, and style. The course addresses the dynamic interdependence of writing and speaking, as well as the importance of visual and multimedia elements in the effective presentation of research. Students enrolled in PWR 2 have opportunities to draft and revise written assignments and oral presentations as well as opportunities to present the results of scholarly inquiry, with an emphasis on how to work purposefully and well with a variety of presentation media.

As a general rule, students complete a minimum of three major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentations may involve collaborative work as well as multimedia elements. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of academic and research-based arguments. In-class work focuses on how to read with an increasingly critical eye and how to identify, evaluate, integrate, and cite sources effectively.

Writing and Rhetoric classes enroll no more than 15 students, and all classes are conducted as seminars in which participation is crucial. In-class activities include close reading of and responding to the writing of peers; these workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

COURSES

The Writing and Rhetoric requirement includes courses at three levels.

1. The first-level course, taken in the first year, can be satisfied by courses in PWR or Structured Liberal Education; the curriculum emphasizes analysis and research-based argument.
2. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/multimedia presentation course taught by the Program in Writing and Rhetoric and by other programs and departments; completion of Structured Liberal Education also satisfies the second-level requirement.
3. The third-level course is a Writing in the Major (WIM) course taught in each major, providing students with systematic opportunities to develop skills for writing in their chosen fields. A list of certified WIM courses may be found in the table of "Undergraduate Major Unit Requirements" in the "Undergraduate Degrees and Programs" section of this bulletin. WIM course descriptions may be found under individual department and program sections.

The sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters during their undergraduate years. At each level, students develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the web site at http://ual.stanford.edu/AP/univ_req/PWR/Courses. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

WRITING AND RHETORIC 2 REQUIREMENT

The Writing and Rhetoric 2 requirement may be satisfied through completion of courses offered through PWR or by other programs and departments. Before the quarter in which students are assigned to enroll in the second-level course, they will be able to review all available courses that meet the requirement on the web site at http://ual.stanford.edu/AP/univ_req/PWR/Courses. In addition to PWR 2, Introductory Seminars certified by the Writing and Rhetoric Governance Board satisfy the second-level Writing and Rhetoric requirement (Write-2). Courses offered as Introductory Seminars require an additional application form; see http://ual.stanford.edu/OO/intro_seminars/IntroSemsCurrent for more information.

HUME WRITING CENTER

The Hume Writing Center, located in Room 20 of Margaret Jacks Hall (Building 460), supports student writing in the full range of academic and extracurricular contexts. The Center emphasizes support for students' writing for PWR, Introduction to the Humanities, and Stanford Introductory Seminars, while also serving all Stanford undergraduates through one-to-one and group

tutorials, workshops, and seminars. Other events sponsored or hosted by the Center include readings for Parents Weekend and Admit Weekend. For further details on the Center, see http://ual.stanford.edu/ARS/help_writing/WritingProject.

PWR PEDAGOGY PROGRAM

PWR offers ENGLISH 397A, a pedagogy seminar for all graduate students (TAs) from English, Modern Thought and Literature, and Comparative Literature who teach PWR courses as part of their graduate studies. Taught in the Autumn Quarter, the pedagogy seminar focuses on syllabus design, developing writing assignments, and responding to student writing. The history of rhetoric and writing supplies a theoretical foundation as well as practical lessons for how to teach writing and research most effectively. In the Winter and Spring, graduate students continue their pedagogical development through a series of workshops and seminars focused on specific issues in the teaching of writing. Elements of the pedagogy program include class visits; group evaluation of writing assignments; workshops and lectures; a handbook on teaching; a library of teaching materials; a program web site with links to other writing program sites; and individual work with mentors and peers.

PEER WRITING CONSULTANTS

The Program in Writing and Rhetoric offers PWR 195, a course on the tutoring of writing for undergraduates chosen to serve as peer writing consultants in the Hume Writing Center and across the campus.

COMMUNITY WRITING PROJECT (CWP)

Students may elect to enroll in a section of PWR 1 or 2 designated as "CWP" on the PWR web site. Students in CWP sections complete at least one project during the term (a grant proposal, pamphlet, news article, profile, or web site) for a local community service agency. The program provides an orientation for each CWP section, including a description of participating agencies. Community Writing Project assignments are then made in consultation with the instructor, the agencies, and the program.

STRUCTURED LIBERAL EDUCATION

Director: Carolyn Lougee Chappell (History)
Assistant Director: Greg Watkins
Lecturers: Yoon Sook Cha, Nicole Lopez, Jacob Mackey, Jeremy Sabol, Greg Watkins
Offices: Sweet Hall, Second Floor, and Florence Moore Hall
Mail Code: 94305-8581
Phone: (650) 725-0102
Email: sle-program@stanford.edu
Web Site: http://sle.stanford.edu

The Program in Structured Liberal Education (SLE) is a yearlong residence-based great works course that satisfies several requirements at once: IHUM, Writing and Rhetoric (both PWR1 and PWR2), and the Disciplinary Breadth GER in Humanities. The curriculum includes works of philosophy, literature, art, and music from the ancient world to the present. The program is interdisciplinary in approach; it emphasizes intellectual rigor and individualized contact between faculty and students.

SLE has two fundamental purposes: to develop a student's ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in critical reading, expository writing, logical reasoning, and group discussion. SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-made answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

The residence hall is the setting for lectures and small group discussions. SLE enhances the classroom experience with other educational activities, including a weekly film series, writing tutorials, occasional special events and field trips, and a student-produced play each quarter.

Freshmen interested in enrolling in SLE should indicate this preference for their IHUM assignment. SLE is designed as a three-quarter sequence, and students are expected to make a commitment for the entire year (9 units autumn and winter, 10 units spring).

INTRODUCTORY SEMINARS

Participating Faculty: Over 200 faculty from more than 60 departments teach an SIS Introductory Seminar. See faculty listings in each department's section of this bulletin for pertinent information.
Offices: Sweet Hall, Third Floor
Mail Code: 3069
Phone: (650) 724-2405
Email: introsems@stanford.edu
Web Site: http://introsems.stanford.edu

Introductory Seminars provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. Over 200 faculty from more than 60 departments take part in the program. The courses provide department credit and most count towards an eventual major as well as fulfill General Education Requirements (GERs).

Some faculty who have taught Freshman Seminars volunteer to continue working with their students through a formal advising relationship during the students' sophomore year.

Freshman Seminars and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are typically given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

For a list of introductory seminars offered in 2010-11, as well as information for applying, see the Introductory Seminars online catalog.

All seminars require a brief application. See Explore Courses, the *Stanford Introductory Seminars Course Catalogue* published each August, or the course webpage http://vcais.stanford.edu. Due dates for 2010-11 applications for both freshman and sophomore preference courses are at 5pm on the following dates: Autumn Quarter - September 6, 2010; Winter Quarter - November 29, 2010; Spring Quarter - February 28, 2011.

SEPTEMBER STUDIES

Director: Marvin Diogenes

Courses in September Studies at Stanford are characterized by intense engagement. These residential programs allow students to return to campus three weeks prior to the beginning of Autumn Quarter to work with faculty on a focused area of study or artistic practice. The programs are designed to facilitate mentoring relationships between faculty and students. Sophomore College participants have completed their first year and are rising sophomores; Arts Intensive participants are sophomores, juniors and seniors; and Bing Honors College participants are seniors.

SOPHOMORE COLLEGE

Offices: Sweet Hall, Second Floor
Mail code: 3068

Phone: (650) 723-4338
Email: sophcollege@stanford.edu
Web Site: http://soco.stanford.edu

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. Students immerse themselves in a subject and collaborate with peers, upper-class course assistants, and faculty in constructing a community of scholars. They are also encouraged to explore the full range of Stanford's academic resources both in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls twelve to fourteen students, who live together in a Stanford residence and receive two units of academic credit. Courses are announced in March, and applications are due in April. For more information or to apply, see http://soco.stanford.edu.

ARTS INTENSIVE

Offices: Sweet Hall, Second Floor
Phone: (650) 721-6253
Email: artsintensive@stanford.edu

The Arts Intensive (AI) Program enrolls small groups of Stanford students in arts courses that encourage a dynamic immersion into the process of making art. The program aims to engage students, regardless of the level of expertise, in the practice of a particular artistic discipline. In 2010, courses were offered in acting, filmmaking, ballet, graphic design, sound design, improvisation, and product design. Courses are taught by Stanford arts faculty and a visiting artist; students live together in a Stanford residence during the program and receive two units of academic credit. Enrollment is by application and takes place in Spring for the upcoming September program. For more information or to apply see the Arts Intensive web site at http://artsintensive.stanford.edu.

BING HONORS COLLEGE

Bing Honors College brings students who are writing honors theses to campus in September before the start of the regular school year for a program of intensive scholarship and writing guided by faculty from participating departments and programs. By concentrating solely on the thesis for nearly three weeks, the college participants begin the senior year with a commitment to independent scholarship in an atmosphere of shared intellectual purpose. The college sponsors cross-disciplinary forums, such as writing workshops and methodology panels, as well as residential activities, and a celebratory concluding event to which students invite their research advisers. Students participating in the college receive room and board, and access to computers.

If you are a prospective honors student and interested in joining Bing Honors College, please contact your department to find out whether it is participating.

FRESHMAN-SOPHOMORE COLLEGE

Location: 236 Santa Teresa, Stanford, CA 94305
Web Site: http://frosoco.stanford.edu

The Freshman-Sophomore College (FroSoCo) at Sterling Quad is a residence for approximately 180 freshmen and sophomores interested in broad intellectual exploration of the liberal arts and sciences. The college integrates intellectual, academic, and social activities with residential life. Entering freshmen have the option of living for two years in FroSoCo.

BING OVERSEAS STUDIES PROGRAM

Program Director: Robert Sinclair

Stanford Program in Australia
Director: Peter Mumby, School of Biological Sciences, University of Queensland
Faculty-in-Residence: Kevin Arrigo
Program Faculty: Claire Baker, Bill Casey, Norm Duke, Simon Dunn, Ron Johnstone, Ian Lilly, Selina Ward

Stanford Program in Beijing
Director: Xiaohong Shen
Faculty-in-Residence: Thomas Fingar, Scott Rozelle
Program Faculty: Dong Chen, Li Chen, Bobai Li, Kun Li, Shizhou Wang, Suolao Wang, Yan Wang, Pei Zhang, Yun Zhou, Xiaoya Zhu

Stanford Program in Berlin
Director: Karen Kramer
Faculty-in-Residence: Philippe Buc, David Holloway, Barbara Pitkin, Brent Sockness
Program Faculty: Maria Biege, Camilla Bork, Ulrich Brückner, Knut Ebeling, Martin Jander, Wolf-D. Junghanns, Ingo Klein, Sylvia Kloetzer, Matthias Pabsch, Kathryn Strachota, Sylke Tempel, Ufuk Topkara, Jochen Wohlfeil

Stanford Program in Cape Town
Director: Timothy Stanton
Faculty-in-Residence: James P. Daughton, Raymond Levitt
Program Faculty: Mohamed Adhikari, Azeem Badroodien, Diane Cooper, Aslam Fataar, Stephan Klingebiel, Janice McMillan, Xolani Ngazimbi, Sophie Oldfield, John Parkington, Jeremy Seekings, Mary Simons, Nolubabalo Tyam

Stanford Program in Florence
Director: Ermelinda Campani
Faculty-in-Residence: Eric Bettinger, Reviel Netz, Leonard Ortolano
Program Faculty: Khaled Fouad Allam, Pompeo Della Posta, Paolo Galluzzi, Giuseppe Mammarella, Leonardo Morlino, Fiorenza Quercioli, Filippo Rossi, Timothy Verdon

Stanford Center for Technology and Innovation (SCTI)—Kyoto
Director: Andrew Horvat
Faculty-in-Residence: James Reichert
Program Faculty: Naoko Asami, Peter Duus, Toshiko Fujiwara, Toshihiko Hayashi, Yuko Kawahara, Catherine Ludvik, Kiyoko Tanaka, Hiroko Tayama, Haruka Ueda

Stanford Program in Madrid
Director: Santiago Tejerina-Canal
Faculty-in-Residence: Laurence Baker, Jorge Ruffinelli, Thomas Sheehan
Program Faculty: Francisco Javier Bobillo de la Peña, Miguel Buñuel, María Teresa Camblor Portilla, Julia Doménech, Sylvia Hilton, Sheila Klaiber, Miguel Larrañaga Zulueta, Pablo de Lora del Toro, Antonio Muñoz, Laura Murcia, Alicia Pérez Blanco, Oscar Sánchez Fuster

Stanford Program in Moscow
Director: Alexander Abashkin
Faculty-in-Residence: Jack Kollmann, Nancy Kollmann
Program Faculty: Tatyana Boldyreva, Maxim Bratersky, Galina Filatova, Edward Ivanian, Sergey Kortunov, Lisa Kurganova, Vladimir Mau, Sergei Medvedev, Vadim Novikov, Tatyana Ryndak

Stanford Program in Oxford
Director: Geoffrey Tyack
Faculty-in-Residence: Mark Applebaum, Judith Goldstein, Robert Sinclair
Program Faculty: Giovanni Capoccia, James Forder, Rosemary Hill, Helen Kidd, Robert McMahon, Amanda Palmer, Emma Plaskitt, Richard Rowley

Stanford Program in Paris

Director: Estelle Halevi
Faculty-in-Residence: Jean-Marie Apostolides, Jill Helms, Caroline Winterer
Program Faculty: Laurie Boussaguet, Patrick Chamorel, Colette Deremble, Jean Paul Deremble, Jean-Marie Fessler, Brigitte Gallini, Sonia Gourevitch, Patrick Guedon, Choukri Hmed, Tiphanie Karsenti, Eloi Laurent, Jacques Le Cacheux, Benoit Leguet, Florence Mercier, Marie-Madeleine Mervant-Roux, Elizabeth Molkou, Christian de Perthuis, Pauline Reychman, Marie-Christine Ricci, Sylvie Strudel, Fabrice Virgili

Stanford Program in Santiago
Director: Iván Jaksic
Faculty-in-Residence: Héctor Hoyos, Shripad Tuljapurkar
Program Faculty: Mabel Abad, Marcela Bustamante, Cristóbal Aninat, César Albornoz, Andrés Bobbert, Marcela Bustamante, Germán Correa, Claudio Fuentes, Sergio Micco, Sergio Missana, Alvaro Palma, Hernan Pons, Emilio Rivano, Bernardo Subercaseaux, Gloria Toledo

Program Offices: Sweet Hall, Ground Floor, 590 Escondido Mall
Mail Code: 94305-3089
Phone: (650) 723-3558
Email: bospstudy@lists.stanford.edu
Web Site: http://bosp.stanford.edu

Courses offered by the Overseas Studies Program are listed on the *Stanford Bulletin's* ExploreCourses web site under subject codes beginning with OSP:

- Australia [OSPAUSTL
- Barcelona (Consortium for Advanced Studies) [OSPBARCL]
- Beijing [OSPBEIJ]
- Berlin [OSPBER]
- Cape Town [OSPCPTWN]
- Florence [OSPFLOR]
- Kyoto [OSPKYOTO]
- Kyoto Consortium for Japanese Studies [OSPKYOCT]
- Madrid [OSPMADRD]
- Moscow [OSPMOSC]
- Oxford [OSPOXFRD]
- Paris [OSPPARIS]
- Santiago [OSPSANTG].

The Bing Overseas Studies Program (BOSP) provides opportunities for Stanford students to broaden their undergraduate education through study in another country and immersion in its culture. Regular programs in Australia, Beijing, Berlin, Cape Town, Florence, Kyoto, Madrid, Moscow, Oxford, Paris, and Santiago offer courses in social and natural sciences, humanities, and engineering with full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Students may enroll for one or more quarters at most locations. Academic or paid internships are available at the Beijing, Berlin, Florence, Kyoto-SCTI, Madrid, Moscow, Paris, and Santiago programs. Research opportunities are available in various formats at different centers. Service-learning and community-based research opportunities are available in Cape Town. Minimum academic and language prerequisites are specific to each program. See http://bosp.stanford.edu for information on these requirements.

While studying overseas through BOSP, students remain registered at Stanford and pay regular tuition, along with the overseas fee, which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

In addition to regular programs offered for enrolled Stanford students, the University is a member of two consortia: the Consortium for Advanced Studies in Barcelona and the Kyoto Consortium for Japanese Studies. Overseas Studies occasionally offers a limited number of special programs.

Overseas Studies, located on the ground floor of Sweet Hall, has full-time staff members and student advisers to assist in planning for overseas study. Course information, while accurate at the time of publication, is subject to change. See http://bosp.stanford.edu for updated information.

UNDERGRADUATE ADVISING AND RESEARCH

Dean: Julie Lythcott-Haims
Program Office: Sweet Hall, first floor
Phone: (650) 723-2426
Fax: (650) 725-1436
Web Site: http://ual.stanford.edu
Email: vpue-advising@stanford.edu, vpue-research@stanford.edu
Appointments: (650) 723-2426

Undergraduate Advising and Research introduces students to the full intellectual richness of undergraduate study at Stanford, supports students in their academic and intellectual pursuits, and seeks to instill within them a deep sense of identity within and belonging to our community of scholars at Stanford. This means different things for different students at different times, leading to anemphasis on extended one-on-one interactions between students and advisers. The substance of these interactions flows from the scholarship and teaching of the broad intellectual community at Stanford.

The UAR staff includes professional advisors in Sweet Hall, the Athletics Academic Resource Center, and in the undergraduate residences. Freshmen are assigned to academic advisers (faculty and academic staff) according to their preliminary academic interest and residence. The professional advisers in Sweet Hall, the Athletics Academic Resource Center, and the undergraduate residences complement the role of the assigned advisers with a comprehensive understanding of the curriculum; they advise students broadly on their courses of study and long-term goals. Some freshmen receive enhanced academic support through participation in Expanded Advising Programs (EAP).

UAR functions include:

- overseeing the transition of freshmen/transfers into the university
- assistance with curriculum planning
- consultation on choosing a major
- advice on integrating research into an undergraduate program of study
- support for students considering and applying for merit-based scholarships and national fellowships
- practical advice on how to prepare for and apply to graduate and professional schools
- academic and personal advising related to academic performance
- guidance on policies and procedures concerning academic standing
- assistance with interpretation and application of academic rules and regulations
- referrals to campus tutoring resources and counseling offices

SCHOLARSHIPS AND FELLOWSHIPS, AND POST-BACCALAUREATE STUDIES

Together with advisers at the Overseas Resource Center (http://stanford.edu/dept/icenter/orc) and the Haas Center for Public Service (http://studentaffairs.stanford.edu/haas), UAR advisers help students to compete for merit scholarships and post-baccalaureate fellowships. UAR also administers campus nomination competitions for the Beinecke, Carnegie, Center for the Study of the Presidency, Goldwater, Liebmann, Merage, Mellon Mays, Truman, and Udall scholarships. Binders containing applications of previous winners of these scholarships are available for review on the first floor of Sweet Hall and in the offices of Academic Directors.

UAR offers workshops and individual consultations on planning for graduate or professional studies, such as in law or medicine, and on how to write personal statements, how to solicit letters of recommendation, and how to prepare for interviews.

UNDERGRADUATE RESEARCH

UAR sponsors and supports programs that encourage undergraduates to work individually with faculty on research, advanced scholarship, and creative projects. Programs are designed to serve students new to research and those with considerable research experience who are able to take on advanced, independent projects. See http://undergradresearch.stanford.edu http://undergradresearch.stanford.edu for more information.

STUDENT GRANT PROGRAMS

UAR offers research grants to registered Stanford undergraduates. Grants support faculty-mentored research projects, and are typically used to pay for research/creative supplies, travel, and room and board/ Major Grant and Chappell Lougee Scholarship recipients may include a stipend within their budget if they are working full-time on their project over the Summer Quarter.

For the 2010-11 academic year, students have access to the following grant programs:

- Small Grants provide for student projects that explore a topic of interest or contribute to the development of future intellectual pursuits. They are often used for smaller projects, preliminary research, and follow-up expenses associated with larger projects.
- Major Grants support larger projects that normally span several quarters. Funded projects typically culminate in an honors thesis or some other substantial capstone product that demonstrates a focused and intellectually rigorous perspective on the topic of interest. Major grant proposals are subject to a review process that includes input from faculty in the relevant departments.
- The Chappell Lougee Scholarship supports sophomores who wish to undertake research in the humanities, creative arts, and qualitative social sciences. Students receive a grant for full-time research under the supervision of a faculty mentor. In addition, UAR provides guidance for students to transform their research into a creative performance, a capstone or honors project, or post-baccalaureate study.
- Angel Grants assist students in producing a finished public creative work such as an art exhibit, film, stage production, or concert.
- Conference Travel Grants support students who have been invited to present their research at a professional or scholarly conference. The grants fund travel expenses to and from the conference, and normal conference registration. Students demonstrating financial need may also include conference-associated food and lodging in their budget. Normally, Conference Travel Grants are intended to match funds made available by the faculty mentor or some other source.

For current deadlines and program details, see http://studentgrants.stanford.edu.

The application for any student grant consists of:

1. a student-authored project proposal, including a line-item budget
2. a letter of support written by a qualified member of the Stanford faculty

UAR may also consult student transcripts as well as outside faculty reviewers. Proposals are judged on intellectual significance, rigor and feasibility of project design, and evidence of student preparedness. The program is competitive, and not all good proposals can be funded.

UAR provides advising support for students considering a research grant, including proposal writing and project design consultation and advice on administrative policies. Students can view sample proposals at the UAR office. For more information, see http://studentgrants.stanford.edu.

DEPARTMENTAL AND FACULTY SPONSORED RESEARCH OPPORTUNITIES

Departments, interdisciplinary programs, and Stanford research centers use VPUE Departmental Grants for Undergraduate Research to support programs that provide undergraduates with mentorship and training in scholarship and research. Typically, departments pair students with a faculty member or faculty-led research group according to their mutual scholarly interests. Students conduct substantive, directed research on a particular aspect of the faculty member's research project, and they meet frequently with their faculty mentors to discuss progress and future directions for the project. For more information and the Request for Proposals, see http://vpuedepartmentalgrants.stanford.edu. Students should consult directly with the departments and programs of interest to learn about these opportunities.

Similarly, individual faculty members may use VPUE Faculty Grants for Undergraduate Research. Faculty grants provide funding for undergraduates to work closely with faculty on a directed research project. Students gain valuable experience with the methods of inquiry and analysis in their chosen discipline, and are able to subsequently leverage this experience in pursuit of more independent projects or theses. For more information and the Request for Proposals, see http://vpuefacultygrants.stanford.edu.

CENTER FOR TEACHING AND LEARNING

Associate Vice Provost for Undergraduate Education and Director: Michele Marincovich
Senior Associate Director (Science and Engineering): Robyn Wright Dunbar
Associate Director (Humanities): Mariatte Denman
Associate Director (Social Sciences and Technology): Marcelo Clerici-Arias
Associate Director for Academic Support: Adina Glickman
Tutoring and Academic Skills Specialist: Amy Chambers
Oral Communication Program Director and Senior Lecturer: Doree Allen
Oral Communication Specialist and Tutor Manager: Lindsey Paul
Lecturers: Thomas Freeland, Marianne Neuwirth, James Wagstaffe

Department Offices: Sweet Hall, 4th floor
Speaking Center: Meyer Library 123
Mail Code: 94305-3087
Center Phone: (650) 723-1326
Email: TeachingCenter@stanford.edu
Web Site: http://ctl.stanford.edu

The Center for Teaching and Learning is a University-wide resource on effective teaching and public speaking for faculty, lecturers, and teaching assistants and on effective learning and public speaking for undergraduates and graduate students. All courses listed with CTL promote acquisition of public speaking skills, enhanced learning skills, and/or teaching excellence. Courses offered by the Center for Teaching and Learning are listed under the subject code CTL on the *Stanford Bulletin's* ExploreCourses web site.

CTL SERVICES TO UNDERGRADUATES AND GRADUATE STUDENTS

CTL provides resources for students who want to enhance their study approaches and clarify their learning strategies. Through courses, individual counseling, and workshops, CTL helps students

build skills that are the foundation for continuous improvement and lifelong learning. Students benefit from developing and applying individually crafted strategies that build on their existing strengths. Time management, test preparation, note taking, reading comprehension and retention, and procrastination are common topics for discussion.

Free tutoring is available to undergraduates in many subjects; see http://tutoring.stanford.edu for details on where and when tutors can be found. Students with strong academic records, especially in the subject areas that they would like to tutor, may apply and, if accepted, are expected to take CTL's course on tutoring; the application process takes place each February.

CTL SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Our goals are: to identify and involve successful faculty, lecturers, and TAs who are willing to share their talents with others; to provide those who are seeking to improve their teaching with the means to do so; to acquaint the Stanford community with important innovations and new technologies for teaching; to prepare new faculty and TAs for their responsibilities; to contribute to the professional development of teaching assistants; to expand awareness of the role of teaching at research universities; and to increase the rewards for superior teaching. CTL is also available to help departments/programs in the design of effective TA training programs.

Resources available to faculty, lecturers, and TAs include: videotaping, microteaching (simulated practice teaching), and consultation; small group and other forms of mid-quarter evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; and work with individuals, groups, and departments on their specific needs. For further details, see CTL's teaching handbook or the CTL brochure, both available by calling (650) 723-1326, or see http://ctl.stanford.edu.

For questions or requests, email TeachingCenter@stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students' general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings. Those interested in individualized instruction or independent study are invited to make an appointment to use the program's Speaking Center in Meyer Library, room 123, where trained student tutors, multimedia, and instructional resource materials are available on an ongoing basis. Students with a passion for public speaking are encouraged to apply to become Oral Communication Tutors; the application process takes place each January. To schedule appointments, see http://speakinghelp.stanford.edu. For further details, call (650) 725-4149 or 723-1326 or email speakinghelp@stanford.edu.

GRADUATE EDUCATION

Vice Provost for Graduate Education: Patricia J. Gumport
Associate Vice Provosts for Graduate Education: John Boothroyd, Chris M. Golde, Sheri D. Sheppard
Assistant Dean for Research and Graduate Policy: Ann George
Director of Fellowships and Programs: Pat Cook
Associate Director, Programs and Administration: Rebecca Jantzen
Web site: http://vpge.stanford.edu
Office: Building 310
Mail code: 94305-2102
Phone: (650) 736-0775

The Vice Provost for Graduate Education (VPGE) plays a leadership role in initiating and managing policies and programs that enhance the quality of graduate education for master's, doctoral, and professional students across Stanford's seven schools. VPGE fosters academic innovation and supports the schools and programs that have primary responsibility for organizing and delivering graduate education. In addition to providing University-wide graduate policy direction, the VPGE office has three primary areas of program activity: administering University-wide graduate fellowship programs; advancing graduate student diversity; and promoting cross-school educational opportunities (interdisciplinary learning, leadership and professional development). The Vice Provost for Graduate Education reports to the Provost.

GRADUATE POLICY

The Faculty Senate Committee on Graduate Studies (C-GS) formulates policy concerning the substance and process of graduate education as well as the evaluation and recording of graduate achievement, and reviews the implementation of such policy. The committee also monitors the academic quality and effectiveness of the University's graduate interdisciplinary and joint degree granting programs. Committee members include the Vice Provost for Graduate Education or her delegated staff (ex officio) and representatives from the faculty at large, administration such as the Office of the University Registrar, and students. The Graduate Student Council and the Nominations Committee of the Associated Students of Stanford University (ASSU) choose student members.

VPGE recommends, promulgates, and interprets University policies related to graduate education. VPGE oversees administrative and financial systems related to graduate student support, including policies related to requirements for research and teaching assistantships, and minimum compensation levels for those positions. For other policies related to graduate admissions and degree requirements, see relevant sections of this bulletin.

RESEARCH POLICIES FOR GRADUATE STUDENTS

Graduate education and research are interrelated enterprises. Many Stanford graduate students are conducting research under the guidance and sponsorship of Stanford faculty members. The Dean of Research has primary responsibility for oversight of the research enterprise. Several policies in that arena are particularly relevant to graduate students. These include:

Academic Authorship—Guidelines related to academic authorship, such as the allocation of responsibility and credit for scholarly publications. For complete text of the guidelines, see Research Policy Handbook memo 2.8, On Academic Authorship, at http://rph.stanford.edu//2-8.

Intellectual Property—Policies on copyrights and patents resulting from University work. Graduate students and postdoctoral fellows, as well as all faculty, staff, and visitors engaged in research, must sign the Stanford University Patent and Copyright Agreement. For complete text of the currently applicable versions of these policies, see Research Policy Handbook chapter 5, Intellectual Property, at http://rph.stanford.edu/Chpt5.

Openness in Research—Policy on openness in research, such as the principle of freedom of access by all interested persons to the underlying data, processes, and final results of research. Stanford University does not accept funding for research projects that require secrecy. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 2.6, Openness in Research, at http://rph.stanford.edu/2-6.

Relationships between Students and Outside Organizations—Summary of policies on the establishment of relationships between students and outside entities, such as private companies or nonprofit organizations, as part of or outside the student's academic program at Stanford. This covers open versus proprietary nature of the work, ownership of intellectual property, and possible conflicts of commitment and interest. For complete text of the currently applicable versions of these policies, see Research Policy Handbook memo 2.11, Relationships Between Students (Including Postdoctoral Scholars) and Outside Entities, at http://rph.stanford.edu/2-11.

Research Compliance—Seven administrative panels review and approve research projects to safeguard the rights and welfare of all human research subjects, ensure the humane care and use of laboratory animals, and protect the safety of personnel and the general public in the areas of biosafety and radiological safety. For more information, contact the Research Compliance Office, http://researchcompliance.stanford.edu.

Research Misconduct—Policy on allegations, investigations, and reporting of research misconduct. Each member of the University community has a responsibility to foster an environment which promotes intellectual honesty and integrity, and which does not tolerate misconduct in any aspect of research or scholarly endeavor. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 2.5, Research Misconduct: Policy on Allegations, Investigations and Reporting, at http://rph.stanford.edu/2-5.

COMPETITIVE GRADUATE FELLOWSHIP PROGRAMS

Several University-wide graduate fellowship programs are administered by the VPGE, including the Stanford Graduate Fellowships Program in Science and Engineering (SGF) and the Stanford Interdisciplinary Graduate Fellowship (SIGF) program. VPGE also administers several smaller University-wide fellowships programs to new and continuing doctoral students that require nomination by faculty or deans.

STANFORD GRADUATE FELLOWSHIPS PROGRAM IN SCIENCE AND ENGINEERING (SGF)

Web site: http://sgf.stanford.edu

SGF competitively awards approximately 100 two- and three-year fellowships providing tuition support and stipend to outstanding students pursuing a doctoral degree in the sciences and engineering. SGF fellows can explore labs in a variety of fields. Nominations for SGF fellowships are submitted by science and engineering departments and programs.

STANFORD INTERDISCIPLINARY GRADUATE FELLOWSHIPS (SIGF)

Web Site: http://sigf.stanford.edu

Beginning in 2008-09, the new SIGF program awards fellowships on a competitive basis to doctoral students engaged in interdisciplinary research. The fellowships enable Stanford doctoral students to pursue questions that cross traditional disciplinary boundaries. Nominations for SIGF fellowships are submitted by faculty.

GRADUATE STUDENT DIVERSITY

VPGE works to diversify the graduate student population by supporting recruitment and retention programs in collaboration with faculty and staff in each of the schools. VPGE funds recruiting activities to expand the pool of qualified applicants, such as visits to campus and travel grants. VPGE offers resources to groups within and across schools for activities that enhance the quality of students' educational experiences and improve retention. VPGE also works collaboratively to develop programs that cultivate interest in academic careers and diversify the pipeline for future faculty. The DARE Doctoral Fellowship Program, administered by VPGE, awards two-year fellowships on a competitive basis to Stanford doctoral students in their final two years who want to investigate and prepare for academic careers and whose participation can help to diversify the professoriate.

CROSS-SCHOOL LEARNING OPPORTUNITIES

VPGE provides seed funding to initiatives that foster cross-school interactions for graduate students. The Stanford Graduate Summer Institute (SGSI) offers noncredit interdisciplinary short courses exclusively for Stanford graduate students and postdoctoral scholars. VPGE also seeks to facilitate enrollment in courses outside of students' home departments and schools.

Leadership, pedagogy, communication, and entrepreneurship are topics of interest to graduate students across the University. VPGE collaborates with other departments, such as the Center for Teaching and Learning, the Graduate Life Office, and the Writing Center to raise the visibility and expand the breadth of these offerings.

STANFORD GRADUATE SUMMER INSTITUTE (SGSI)

Web site: http://sgsi.stanford.edu

SGSI courses introduce graduate students to multidisciplinary and interdisciplinary thinking. Students from across the University have the opportunity to meet others outside their fields, create networks, and foster crossdisciplinary collaborations. Most SGSI courses are small and taught in an intensive workshop format at the end of Summer Quarter. Courses are non-credit bearing and free of tuition or fees.

GRADUATE SCHOOL OF BUSINESS

Emeriti: (Professors) David P. Baron, William H. Beaver, Charles P. Bonini, Alain C. Enthoven,* Robert J. Flanagan,* Charles A. Holloway,* Charles T. Horngren, James E. Howell, Robert K. Jaedicke, Robert L. Joss,* James G. March, Joanne Martin, Gerald M. Meier, Arjay Miller, James R. Miller III, William F. Miller, David B. Montgomery, George G. C. Parker,* Jerry I. Porras, Evan L. Porteus,* Michael L. Ray, Henry S. Rowen, Myron S. Scholes, William F. Sharpe, George P. Shultz, A. Michael Spence, Venkataraman Srinivasan, James C. Van Horne, Robert B. Wilson*; *(Associate Professor)* Andrea Shepard; *(Senior Lecturers)* David L. Bradford,* Steven Brandt, Kirk O. Hanson; *(Lecturer)* Robert Augsburger

Dean: Garth Saloner

Senior Associate Deans: Glenn R. Carroll, Peter M. DeMarzo, Madhav Rajan, Daniel N. Rudolph

Associate Deans: Gale H. Bitter, Sharon J. Hoffman, Sharon A. Marine, Claudia J. Morgan, Karen A. Wilson

Assistant Deans: Derrick Bolton, Pulin Sanghvi. Priya Singh, Robert Urstein

Professors: Jennifer L. Aaker, Anat R. Admati, William P. Barnett, Mary E. Barth, Jonathan Bendor, Jonathan B. Berk, David W. Brady, Jeremy I. Bulow, Robert A. Burgelman, Glenn R. Carroll, Peter M. DeMarzo, J. Darrell Duffie, Yossi Feinberg, George Foster, Steven R. Grenadier, Deborah H. Gruenfeld, Michael T. Hannan, J. Michael Harrison, Chip Heath, Charles I. Jones, Daniel P. Kessler, Roderick M. Kramer, Keith Krehbiel, Ilan Kremer, David M. Kreps, Sunil Kumar, David F. Larcker, James M. Lattin, Edward P. Lazear, Charles M.C. Lee, Hau L. Lee, John G. McDonald, Maureen F. McNichols, Haim Mendelson, Dale T. Miller, Margaret A. Neale, Charles A. O'Reilly III, Paul Oyer, James M. Patell, Jeffrey Pfeffer, Paul C. Pfleiderer, Erica L. Plambeck, Madhav Rajan, Hayagreeva Rao, Stefan J. Reichelstein, Peter C. Reiss, Condoleezza Rice, D. John Roberts, Garth Saloner, Kathryn L. Shaw, Baba Shiv, Kenneth W. Shotts, Itamar Simonson, Kenneth J. Singleton, Andrzej Skrzypacz, Jesper Sørensen, Sarah A. Soule, Larissa Z. Tiedens, Lawrence W. Wein, Seungjin Whang, Stefanos Zenios, Jeffrey H. Zwiebel

Associate Professors: Anne Beyer, Steven Callander, Michaela M. Draganska, Francis J. Flynn, Wesley Hartmann, Ron Kasznik, Phillip Leslie, Brian S. Lowery, Benoit Monin, Elizabeth Mullen, Stefan Nagel, Harikesh S. Nair, Sridhar Narayanan, Michael Ostrovsky, Joseph D. Piotroski, Alan T. Sorensen, Ilya A. Strebulaev, Zakary L. Tormala, Tunay I. Tunca, S. Christian Wheeler

Assistant Professors: John L. Beshears, Konstantinos Bimpikis, Jules H. van Binsbergen, T. Renee Bowen, John-Paul Ferguson, Ilan Guttman, Sharique Hasan, John W. Hatfield, Dan A. Iancu, Joy Ishii, Dirk Jenter, Saumitra Jha, Uzma Khan, Arthur G. Korteweg, Nicholas S. Lambert, Claire S.H. Lim, Ian Martin, Maria Ogneva, Francisco Pérez-González, Monic J. Sun, Robert P. Swinney, Ali Yurukoglu

Professor (Teaching): James A. Phills, Jr.

Acting Assistant Professor: Nir Halevy

Courtesy Professors: Eric P. Bettinger, Nicholas Bloom, Timothy F. Bresnahan, M. Kate Bundorf, Geoffrey L. Cohen, Robert M. Daines, Alan M. Garber, Warren H. Hausman, Ronald A. Howard, Mark G. Kelman, Larry Kramer, Jonathan D. Levin, Daniel A. McFarland, Debra E. Meyerson, Paul R. Milgrom, Walter W. Powell, Ilya Segal, Robert I. Sutton, Paul Yock

Lecturers: Douglas Abbey, Dick Allen, Laura K. Arrillaga-Andreessen, Rick Aubry, Kirk D. Bowman, Scott Bristol, Anne Casscells, Safra A. Catz, Patricia Chang, Robert B. Chess, Stephen J. Ciesinski, David M. Dodson, R. James Ellis, Christopher M. Flink, Richard P. Francisco, Andrew S. Grove, William Guttentag, Keith Hennessey, Mary Ann Huckabay, John Hurley, Franklin P. Johnson, Jr., Peter B. Kelly, Dan Klein, Kay Kostopoulos, Mark Leslie, Geoffrey L. Lieberthal, Leo E. Linbeck III, David Lockwood, Michael E. Marks, R. Bruce McKern, William L. McLennan, William F. Meehan III, John P. Morgridge, Jill G. Parker, Robert Pearl, Joel C. Peterson, Andrew Rachleff, Carole Robin, Dennis M. Rohan, JD Schramm, Russell Siegelman, F. Victor Stanton, Mark A. Stevens, Myra H. Strober, Kevin Taweel, John G.Watson, Jane Wei-Skillern, Peter C. Wendell, Evelyn Willliams

Consulting Professors: Anthony S. Bryk, H. Irving Grousbeck, Mark A. Wolfson

Acting Instructors: Leslie Chin, Richard Kass

Visiting Professor: John Van Reenen

Visiting Associate Professor: Andrea Larson

Visiting Assistant Professor: Parag A. Pathak

* Recalled to active duty.

The mission of the Graduate School of Business is to create ideas that deepen and advance the understanding of management and, with these ideas, develop innovative, principled, and insightful leaders.

The two-year Master of Business Administration (M.B.A.) degree program is for students who aspire to contribute to society through leadership in business, government, and the nonprofit sector. The general management curriculum rests on a foundation of social science principles and management functions layered with interdisciplinary themes of leadership, entrepreneurship, global management, and social responsibility. The M.B.A. curriculum stresses breadth rather than depth, but includes options for certificates in Global Management and Public Management. A number of joint degree programs allow the M.B.A. to be combined with degrees in the Schools of Education, Law, and Medicine, as well as interdisciplinary degrees in Public Policy and Environmental Studies. The primary criteria for admission are demonstrated leadership potential, intellectual vitality, and diversity among students. No specific undergraduate major or courses are required for admission, but experience with analytic and quantitative concepts is important. Some students enter directly following undergraduate study, but most obtain one or more years of work experience.

The Stanford Sloan Program is an intensive, one-year course of study for middle management executives leading to the degree of Master of Science in Management. Participants must have demonstrated superior achievement and are normally sponsored by their company.

Those interested in college teaching and research are served by the Doctor of Philosophy program.

For detailed information on programs, curricula, and faculty, see the School's web site at http://gsb.stanford.edu.

SCHOOL OF EARTH SCIENCES

Dean: Pamela A. Matson
Associate Dean for Academic Affairs and Diversity Programs: Stephan A. Graham
Assistant Dean for Academic Affairs and Diversity Programs: Roni Holeton

Courses offered by the School of Earth Sciences are listed under the subject code EARTHSCI on the *Stanford Bulletin's* ExploreCourses web site. Courses offered by departments and programs of the school are linked on their separate sections, and are available at the ExploreCourses web site.

The School of Earth Sciences includes the departments of Geological and Environmental Sciences, Geophysics, Energy Resources Engineering (formerly Petroleum Engineering), and Environmental Earth System Science; and three interdisciplinary programs: the Earth Systems undergraduate program, the Emmett Interdisciplinary Graduate Program in Environment and Resources (E-IPER), and the graduate-level Earth, Energy, and Environmental Sciences Graduate Program (EEES). The Earth Systems Program and E-IPER offer study of biophysical and social dimensions of environment and resources, while EEES is intended for students working across departments and disciplines within the School of Earth Sciences.

The aims of the school are:

1. to prepare students for careers in the fields of biogeochemistry, climate science, energy resource engineering, environmental science, geology, geochemistry, geomechanics, geophysics, geostatistics, hydrogeology, land science, oceanography, petroleum engineering, and petroleum geology
2. to conduct research in the Earth sciences
3. to provide opportunities for Stanford undergraduates to learn about the planet's history, to understand the energy and resource base that supports humanity, to appreciate the geological and geophysical hazards that affect human societies, and to understand the challenges and solutions related to the environment and sustainability.

To accomplish these objectives, the school offers a variety of programs adaptable to the needs of the individual student

- four-year undergraduate programs leading to the degree of Bachelor of Science (B.S.)
- five-year programs leading to the coterminal Bachelor of Science and Master of Science (M.S.
- graduate programs offering the degrees of Master of Science, Engineer, and Doctor of Philosophy.\

Details of individual degree programs are found in the section for each department or program.

UNDERGRADUATE PROGRAMS IN EARTH SCIENCES

Any undergraduate admitted to the University may declare a major in one of the Earth Science departments or programs by contacting the appropriate department or program office.

Requirements for the B.S. degree are listed in each department or program section. Departmental academic advisers work with students to define a career or academic goal and assure that the student's curricular choices are appropriate to the pursuit of that goal. Advisers can help devise a sensible and enjoyable course of study that meets degree requirements and provides the student with opportunities to experience advanced courses, seminars, and research projects. To maximize such opportunities, students are encouraged to complete basic science and mathematics courses in high school or during their freshman year.

Each department offers an honors program involving research during the senior year. Each department also offers an academic minor for those undergraduates majoring in compatible fields. The Earth Systems Program also offers an honors program in Environmental Science, Technology, and Policy through the Woods Institute for the Environment.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN EARTH SCIENCES

The Stanford coterminal degree plan enables an undergraduate to embark on an integrated program of study leading to the master's degree before requirements for the bachelor's degree have been completed. This may result in more expeditious progress towards the advanced degree than would otherwise be possible, making the program especially important to Earth scientists because the master's degree provides an excellent basis for entry into the profession. The coterminal plan permits students to apply for admission to a master's program after earning 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree.

Under the plan, the student may meet the degree requirements in the more advantageous of the following two ways: by first completing the 180 units required for the B.S. degree and then completing the three quarters required for the M.S. degree; or by completing a total of 15 quarters during which the requirements for the two degrees are completed concurrently. In either case, the student has the option of receiving the B.S. degree upon meeting all the B.S. requirements or of receiving both degrees at the end of the coterminal program. Students earn degrees in the same department or program, in two different departments, or even in different schools; for example, a B.S. in Physics and an M.S. in Geological and Environmental Sciences. Students are encouraged to discuss the coterminal program with their advisers during their junior year. Additional information is available in the individual department offices.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

GRADUATE PROGRAMS IN EARTH SCIENCES

Admission to the Graduate Program—A student who wishes to enroll for graduate work in the school must be qualified for graduate standing in the University and also must be accepted by one of the school's four departments or one of the two interdisciplinary Ph.D. programs. One requirement for admission is submission of scores on the verbal and quantitative sections of the Graduate Record Exam. Admission to one department of the school does not guarantee admission to other departments.

Faculty Adviser—Upon entering a graduate program, the student should report to the head of the department or program who arranges with a member of the faculty to act as the student's adviser. Alternatively, in several of the departments, advisers are established through student-faculty discussions prior to admission. The student, in consultation with the adviser(s), then arranges a course of study for the first quarter and ultimately develops a complete plan of study for the degree sought.

Financial Aid—Detailed information on scholarships, fellowships, and research grants is available from the school's individual departments and programs. Applications should be filed by the various dates listed in the application packet for awards that become effective in Autumn Quarter of the following academic

year.Earth, Energy, and Environmental Sciences Graduate Program (EEES)

Director: Kevin R. Arrigo

Academic Oversight Committee: Kevin Arrigo (Environmental Earth System Science), Biondo Biondi (Geophysics), Jef Caers (Energy Resources Engineering), Louis Durlofsky (Energy Resources Engineering), Scott Fendorf (Environmental Earth System Science)

Program Offices: Yang and Yamazaki Environment and Energy Building, Room 140

Mail Code: 94305-4216

Web Site: http://pangea.stanford.edu/EEES

Courses offered by the Earth, Energy, and Environmental Sciences Program are listed under the subject code EEES on the *Stanford Bulletin's* ExploreCourses web site.

The Earth, Energy, and Environmental Sciences Graduate Program (EEES) is not accepting new students. The program continues to provide courses and advising for students already enrolled.

The goal of Earth, Energy, and Environmental Sciences (EEES) is to complement the disciplinary Earth Science and Engineering programs offered within the departments of the School of Earth Sciences and to train graduate students to integrate knowledge from these disciplines through tools and methods needed to evaluate the linkages among physical, chemical, and biological systems of the Earth, and understand the dynamics or evolution of these integrated systems and the resources they provide.

Students in EEES must make significant headway in, and combine insights from, more than one scientific discipline. For example, a student whose goal is to understand the structure of the Earth's interior using computational methods might design a study plan that includes high-level mathematics, numerical modeling, and geophysical imaging techniques. A student interested in water management might integrate water flow analysis and modeling, geophysical imaging, geostatistics, and satellite remote sensing of changes in agricultural intensity and land use. A student interested in marine carbon cycling might use knowledge and tools from numerical modeling, marine biogeochemistry and geochemistry, oceanography, and satellite imaging. The key to the program is its academic flexibility and ability to exploit an increasingly interdisciplinary faculty, particularly in the School of Earth Sciences, but also in the greater Stanford community.

GRADUATE PROGRAMS IN EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE IN EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES

The objective of the M.S. degree in Earth, Energy, and Environmental Sciences is to prepare the student either for a professional career or for doctoral studies.

Students in the M.S. degree program must fulfill the following requirements:

1. Complete EARTHSCI 300, Earth Sciences Seminar, during their first quarter of enrollment.
2. Complete a 45-unit program of study, of which a minimum of 30 units must be course work, with the remainder consisting of no more than 15 research units.
3. Course work units must be divided among two or more scientific and/or engineering disciplines and can include the three core courses required for the Ph.D. degree.
4. The program of study must be approved by the research adviser and the academic oversight committee.
5. Each candidate must either present and defend the results of his or her research at a public oral presentation attended by the candidate's advisor at least two faculty members, or submit a thesis/report to the candidate's adviser and at least two faculty members.

DOCTOR OF PHILOSOPHY IN EARTH, ENERGY, AND ENVIRONMENTAL SCIENCES

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The Interdepartmental Program in Earth, Energy, and Environmental Sciences has the following requirements:

1. Ph.D. students must complete EARTHSCI 300, Earth Sciences Seminar, during their first quarter of enrollment.
2. Students must complete a minimum of 13 courses, including the three core courses and five courses from each of the two areas of specialization. At least half of the ten non-core classes must be at a 200 level or higher, and all must be taken for a letter grade. Students obtaining their M.S. from within the program can apply all master's units toward Ph.D. requirements. Students with an M.S. degree or other specialized training from outside EEES may be able to waive some of the non-core course requirements, depending on the nature of the prior courses or training. The number and distribution of courses to be taken by these students is determined with input from the research advisers and academic oversight committee.
3. Prior to the formation of a thesis committee, the student works with research advisers and the academic oversight committee to design a course of study with depth in at least two areas of specialization and preparation in analytical methods and skills. Students can select other courses from departments of the School of Earth Sciences and other University departments as appropriate. All courses must be approved by the student's thesis committee or by the academic oversight committee.The research advisers and academic oversight committee have primary responsibility for the adequacy of the course of study.
4. During Spring Quarter of each year, students must undergo an annual review by their thesis committee to allow the committee to monitor the progress of the student and make recommendations, where necessary.
5. Prior to taking the oral qualifying examination at or before the end of the sixth academic quarter, the student must have completed 24 units of letter-graded course work, developed a written crossdisciplinary dissertation proposal suitable for submission to a funding organization, and selected a thesis committee.
6. To be admitted to candidacy for the Ph.D. degree, the student must pass an oral qualifying examination. At least two of the minimum four-member examining committee must be faculty within the School of Earth Sciences. During the exam, students present and defend their proposed thesis research work; the exam generally takes the form of a 20-30 minute presentation by the student, followed by 1-2 hours of questioning.
7. The research advisers and two other faculty members comprise the dissertation reading committee. Upon completion of the thesis, the student must pass a University Oral Examination in defense of the dissertation.

Additional information may be found in the *Graduate Academic Policies and Procedures* handbook at http://gap.stanford.edu/.

EARTH SYSTEMS

Director: Robert B. Dunbar
Associate Director, Academics: Julie Kennedy, Senior Lecturer
Associate Director, Administration: Deana Fabbro-Johnston
Committee of the Whole: Nicole Ardoin (School of Education), Kevin Arrigo (Environmental Earth System Science; Earth, Energy and Environmental Sciences), Gregory Asner (Department of Global Ecology, Carnegie Institution), Barbara Block (Biology, Hopkins Marine Station), Carol Boggs (Biology), Alexandre Boucher (Environmental Earth System Science), Margaret Caldwell (Law), Page Chamberlain (Environmental Earth System Science), Gretchen Daily (Biology), Jenna Davis (Civil and Environmental Engineering), Mark Denny (Biology, Hopkins Marine Station), Noah Diffenbaugh (Environmental Earth System Science), Rodolfo Dirzo (Biology), Robert B. Dunbar (Earth Systems, Environmental Earth System Science), William Durham (Anthropology), Anne Egger (School of Earth Sciences), Gary Ernst (Geological and Environmental Sciences, emeritus), Walter Falcon (Freeman Spogli Institute for International Studies), Scott Fendorf (Environmental Earth System Science), Christopher Field (Department of Global Ecology, Carnegie Institution), Christopher Francis (Environmental Earth System Science), Zephyr Frank (History), David Freyberg (Civil and Environmental Engineering), Margot Gerritsen (Energy Resources Engineering), Deborah Gordon (Biology), Steven Gorelick (Environmental Earth System Science), Elizabeth Hadly (Biology), George Hilley (Geological and Environmental Sciences), David Kennedy (History), Donald Kennedy (Biology, Freeman Spogli Institute for International Studies, emeritus), Julie Kennedy (Earth Systems, Environmental Earth System Science), Rosemary Knight (Geophysics), Jeffrey Koseff (Civil and Environmental Engineering), Anthony Kovscek (Energy Resources Engineering), Eric Lambin (Environmental Earth System Science), David Lobell (Environmental Earth System Science), Gilbert Masters (Civil and Environmental Engineering), Pamela Matson (Dean, School of Earth Sciences; Freeman Spogli Institute for International Studies), Stephen Monismith (Civil and Environmental Engineering), Harold Mooney (Biology), Rosamond Naylor (Environmental Earth System Science, Freeman Spogli Institute for International Studies), Stephen Palumbi (Biology, Hopkins Marine Station), Jonathan Payne (Geological and Environmental Sciences), Gary Schoolnik (Medicine), George Somero (Biology, Hopkins Marine Station), James Sweeney (Management Science and Engineering), Paul Switzer (Environmental Earth System Science, Statistics), Leif Thomas (Environmental Earth System Science), Barton Thompson (Law), Peter Vitousek (Biology; Interdisciplinary Program in Environment and Resources), Virginia Walbot (Biology), Mark Zoback (Geophysics)
Program Office: Yang and Yamazaki Environment and Energy (Y2E2) Building, Room 131
Mail Code: 94305-4215
Phone: (650) 725-7427
Email: deana@stanford.edu or emburns@stanford.edu
Web Site: http://pangea.stanford.edu/ESYS

Courses offered by the Earth Systems Program are listed under the subject code EARTHSYS on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE UNDERGRADUATE PROGRAM IN EARTH SYSTEMS

The Earth Systems Program is an interdisciplinary environmental science major. Students learn about and independently investigate complex environmental problems caused by human activities in interaction with natural changes in the Earth system. Earth Systems majors become skilled in those areas of science, economics, and policy needed to tackle the globe's most pressing environmental problems, becoming part of a generation of scientists, professionals, and citizens who approach and solve problems in a new way: a systematic, interdisciplinary way.

For students to be effective contributors to solutions for such problems, their training and understanding must be both broad and deep. To this end, Earth Systems students take courses in the fundamentals of biology, calculus, chemistry, geology, and physics, as well as economics, policy, and statistics. After completing breadth training, they concentrate on advanced work in one of five focus areas: biology, energy, environmental economics and policy, land management, or oceanography. Tracks are designed to support focus and rigor but include flexibility for specialization. Examples of specialized focus have included but are not limited to environment and human health, sustainable agriculture, energy economics, sustainable development, business and the environment, and marine policy. Along with formal course requirements, Earth Systems students complete a 9-unit (270-hour) internship. The internship provides a hands-on academic experience working on a supervised field, laboratory, government, or private sector project.

The following is an outline of the sequential topics covered and skills developed in this major.

1. *Fundamentals:* The Earth Systems Program includes courses that describe the natural workings of the physical and biological components of the Earth as well as courses that describe the human activities that lead to change in the Earth system. Training in fundamentals includes introductory course work in geology, biology, chemistry, physics, and economics. Depending on the Earth Systems track chosen, training may also include introduction to the study of energy systems, microbiology, oceans, or soils.
2. *System Interactions:* Focus in these courses is on the fundamental interactions among the physical, biological, and human components of the Earth system. The dynamics of the interplay between natural variation and human-imposed influences must be understood to achieve effective solutions to environmental problems. Earth Systems courses that introduce students to the dynamic and multiple interactions that characterize global change problems include EARTHSYS 10, Introduction to Earth Systems, EARTHSYS 111, Biology and Global Change, and EARTHSYS 112, Human Society and Environmental Change. Competence in understanding system-level interactions is critical to development as an Earth Systems thinker, so additional classes that meet this objective are excellent choices as electives.
3. *Skills Development:* Students take skills courses that help them to recognize, quantify, describe, and help solve complex problems that face society.

Field and laboratory methods can help students to recognize the scope and nature of environmental change. For example, training in satellite remote sensing and geographic information systems allows students to monitor and analyze large-scale spatial patterns of change. This training is either required or recommended for all tracks. EARTHSYS 189, Field Studies in Earth Systems, is also recommended.

Quantification of environmental problems requires training in single and multivariable calculus, linear algebra, and statistics. Training in statistics is specific to the area of focus: geostatistics, biostatistics, econometrics.

Success in building workable solutions to environmental problems is linked to the ability to effectively communicate ideas, data, and results. Writing intensive courses (WIM) help students to communicate complex concepts to expert and non-expert audiences. All Stanford students must complete one WIM course in their major. The Earth Systems WIM course is EARTHSYS 260. Other Earth Systems courses also focus on effective written and oral communication and are recommended.

Effective solutions to environmental problems take into consideration natural processes as well as human needs. Earth Systems emphasizes the importance of interdisciplinary analysis and implementation of workable solutions through the required 9-unit

internship, EARTHSYS 260, and knowledge synthesis in EARTHSYS 210, Senior Seminar.

A comprehensive list of environmental courses, as well as advice on those that focus on problem solving, is available in the program office.

The Earth Systems Program provides an advising network that includes faculty, staff, and student peer advisers.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. demonstrate knowledge of foundational skills and concepts relevant to interdisciplinary study of the environment.
2. analyze environmental problems at the interface of natural and human systems in an interdisciplinary fashion.
3. demonstrate the ability to communicate complex concepts and data to expert and non-expert audiences.
4. independently and as part of a team apply relevant science, economics, engineering, and policy to problem analysis and proposed solutions.

BACHELOR OF SCIENCE IN EARTH SYSTEMS

The B.S. in Earth Systems (EARTHSYS) requires the completion of at least 94 units that can be divided into three levels of courses. The student must complete a series of courses comprising a broad base of specialized study which includes the Earth Systems core, as well as track-specific requirements and electives. Finally, the student must carry out a senior-level research or internship project and participate in the senior seminar, as well as the writing in the major requirement.

REQUIRED CORE

Subject and Catalog Number	*Units*
EARTHSYS 10. Introduction to Earth Systems	4
EARTHSYS 111. Biogeosphere	4
EARTHSYS 112. Human Society and Environmental Change	4
EARTHSYS 210. Senior Seminar	3
EARTHSYS 260. Internship	9

REQUIRED FOUNDATION AND BREADTH COURSES

Biology (any one course below):

BIO 41. Genetics, Biochemistry, and Molecular Biology	5
or BIO 43. Plant Biology, Evolution, and Ecology	5
or BIO 101. Ecology	3
or HUMBIO 2A,B. Genetics, Evolution and Ecology; Culture Evolution, and Society	10

Chemistry:

CHEM 31A. Chemical Principles I	4
CHEM 31B. Chemical Principles II	4
or CHEM 31X. Chemical Principles	4

Economics:

ECON 1A. Elementary Microeconomics	5

Geological and Environmental Sciences:

GES 1A, B, or C. Fundamentals of Geology	4-5
or EESS 2. Earth System History	3

Mathematics:

MATH 19. Calculus	3
MATH 20. Calculus	3
MATH 21. Calculus	4
or MATH 41. Calculus	5
MATH 42. Calculus	5
MATH 51. Linear Equations and Differential Calculus of Several Variables	5

Probability and Statistics (any one course below):

BIOHOPK 174H. Experimental Design and Probability	3
BIO 141. Biostatistics (Same as STATS 141)	4
ECON 102A. Introduction to Statistical Methods for Social Scientists	5
EESS 160. Statistical Methods for Earth and Environmental Sciences	4
EESS 161. Geostatistics	4
STATS 60. Introduction to Statistical Methods	5
STATS 110. Statistical Methods in Engineering and Physical Sciences	4
STATS 116. Theory of Probability	3-5

Physics:

PHYSICS 41. Mechanics	4

More extensive work in mathematics and physics may be expected for those planning graduate study. Graduate study in ecology and evolutionary biology and in economics requires familiarity with differential equations, linear algebra, and stochastic processes. Graduate study in geology, oceanography, and geophysics may require more physics and chemistry. Students should consult their adviser for recommendations beyond the requirements specified above.

TRACKS

ANTHROSPHERE

Additional foundation and breadth courses:

ECON 50. Economic Analysis	5
ECON 155. Environmental Economics and Policy	5

Choose one course in each of the three following subcategories, total six required. At least one of the six must be a skills class marked with and asterisk (*).

Economics and Environmental Policy:

ECON 51. Economic Analysis II	5
ECON 102B. Introduction to Econometrics*	5
ECON 150. Economic Policy Analysis	5
ECON 154. Economics of Legal Rules and Institutions	5
EARTHSYS 147. Controlling Climate Change in the 21st Century	3
EARTHSYS 175. The California Coast: Science, Policy, and Law	3-4
MSE 197. Ethics and Public Policy	5
MSE 243. Energy and Environmental Policy Analysis	3
MSE 248. Economics of Natural Resources	3-4
MSE 294. Climate Policy Analysis	3

Social Entrepreneurship and the Environment:

MSE 245G. Finance 1 for Non-MBAs	3-5
MSE 280. Organizational Behavior: Evidence in Action	3-4
MSE 285. Negotiation	3
MSE 288. Creating Infectious Action	3-4
URBANST 132. Concepts and Analytical Skills for the Social Sector*	4
URBANST 133. Social Entrepreneurship Collaboratory	4

Sustainable Development:

ANTHRO 115A. Environmental Crises and State Collapse	3
ANTHRO 162. Indigenous Peoples and Environmental Problems	3-5
ANTHRO 343. Culture as Commodity	5
ANTHRO 349. Anthropology of Capitalism	5
ANTHRO 161. Human Behavioral Ecology	3-5
BIO 102. Demography: Health, Development, Environment	3
CEE 124. Sustainable Development Studio (must be taken for at least 3 units)	1-5
CEE 142A. Sustainable Development	3
EARTHSYS 180. Fundamentals of Sustainable Agriculture	3
ECON 52. Economic Analysis III*	5
ECON 106. World Food Economy*	5
ECON 118. The Economics of Development	5
HUMBIO 118. Theory of Environmental and Ecological Anthropology	5
MSE 264. Sustainable Product Development and Manufacturing	3
POLISCI 140. Political Economy of Development	5
POLISCI 143. Nongovernmental Organizations and Development in Poor Countries	5
URBANST 163. Land Use Control	4

BIOSPHERE

Additional foundation and breadth courses:
BIO 41. Genetics, Biochemistry, and Molecular Biology 5
BIO 43. Plant Biology, Evolution, and Ecology 5
CHEM 33. Structure and Reactivity 4

Biogeochemistry (choose one):
BIO 216. Terrestrial Biogeochemistry 3
EARTHSYS 189. Field Studies in Earth Systems 5
EESS 143. Marine Biogeochemistry 3-4
EESS 155. Science of Soils 4

Conservation Biology (choose one):
HUMBIO 112. Conservation Biology 4
BIOHOPK 173H. Marine Conservation Biology 3

Ecology (choose two):
BIO 101. Ecology 3
BIO 125. Ecosystems of California 3
BIO 136. Evolutionary Paleobiology 4
BIO 145. Behavioral Ecology 4
GES 123. Invertebrate Paleobiology 4

Ecosystems and Society (choose one):
ANTHRO 115A. Environmental Crises and State Collapse: Lessons from the Past 3
ANTHRO 162. Indigenous Peoples and Environmental Problems 3-5
ANTHRO 165. Parks and Peoples: The Benefits and Costs of Protected Area Conservation 5
ANTHRO 166. Political Ecology of Tropical Land Use 3-5
EARTHSYS 165. Promoting Behavior Change 4
EARTHSYS 180. Fundamentals of Sustainable Agriculture 3
HUMBIO 114. Environmental Change and Emerging Infectious Diseases 3-5
HUMBIO 118. Theory of Ecological and Environmental Anthropology 5

ENERGY SCIENCE AND TECHNOLOGY

ADDITIONAL FOUNDATION AND BREADTH COURSES:
PHYSICS 43. Electricity and Magnetism 4
PHYSICS 45. Light and Heat 4

Energy Resources and Technology:
CEE 176A. Energy Efficient Buildings 3-4
CEE 176B. Electric Power: Renewables and Efficiency 3-4
EARTHSYS 101. Energy and the Environment 3
Choose one of the following:
EARTHSYS 102. Renewable Energy Sources and Greener Energy Processes 3
or EARTHSYS 103. Energy Resources 4-5

Energy Fundamentals:
ENGR 30. Engineering Thermodynamics 3

Energy Policy (Choose one):
EARTHSYS 147. Controlling Climate Change in the 21st Century 3
MSE 243. Energy and Environmental Policy Analysis 3
MSE 294. Climate Policy Analysis 3
MSE 295. Energy Policy Analysis 3

LAND SYSTEMS

ADDITIONAL FOUNDATION AND BREADTH COURSES:
EARTHSYS 144. Fundamentals of GIS 4
PHYSICS 45. Light and Heat 4

Choose six courses, with at least one from each grouping:

Land:
BIO 125. Ecosystems of California 3
BIO 144. Conservation Biology 3-4
EARTHSYS 180. Fundamentals of Sustainable Agriculture 3
EARTHSYS 189. Field Studies in Earth Systems 5
ECON 106. World Food Economy 5
EESS 155. Science of Soils 4
HISTORY 254. Popular Culture and American Nature 5

Water:
CEE 101B. Mechanics of Fluids 4
CEE 166A. Watersheds and Wetlands 3
CEE 166B. Floods and Droughts, Dams and Aqueducts 3
CEE 171. Environmental Planning Methods 3
CEE 265D. Water and Sanitation in Developing Countries 3
EARTHSYS 104. The Water Course 3
GES 130. Soil Physics and Hydrology 3

Urban:
CEE 115. Goals and Methods of Sustainable Building Projects 3
CEE 124. Sustainable Development Studio 3-5
CEE 176A. Energy Efficient Buildings 3-4
URBANST 110. Introduction to Urban Studies 4
URBANST 113. Introduction to Urban Design 5
URBANST 163. Land Use Control 4
URBANST 165. Sustainable Urban and Regional Transportation Planning 4-5

OCEANS

ADDITIONAL FOUNDATION AND BREADTH COURSES:
GES 8. The Oceans: An Introduction to the Marine Environment 3
PHYSICS 45. Light and Heat 4

Physics of the Sea:
CEE 164. Introduction to Physical Oceanography 4

Biological Oceanography (choose one):
BIOHOPK 163H. Oceanic Biology 4
EESS 143. Marine Biogeochemistry 3-4

Remote Sensing of the Ocean (choose one):
EESS 141. Remote Sensing of the Ocean 4
EARTHSYS 144. Fundamentals of Geographic Information Science (GIS) 4

Additional Requirement (choose one):
- One quarter Stanford@SEA (EARTHSYS 323)
- One quarter abroad at the Stanford in Australia Program
- One quarter at the Hopkins Marine Station

EARTH SYSTEM SCIENCE TRACK

Tailored interdisciplinary course of study constructed under the guidance of program directors and the faculty adviser. See Associate Director of Academics for additional information.

UPPER-DIVISION ELECTIVES

Two to three additional courses at the 100-level or above are required. Electives allow students to personalize their curriculum by pursuing higher-level courses offered in their focus area, or by incorporating new academic perspectives. Each must be a minimum of three units and approved by an adviser. The following courses are suggested but not required; this is not an exhaustive list.

ANTHROSPHERE TRACK

CEE 171. Environmental Planning Methods 4
CEE 266A. Watersheds and Wetlands 3
CEE 266B. Floods and Droughts, Dams and Aqueducts 3
CEE 266C. Water Resources and Water Hazards Field Trips 2
ECON 158. Antitrust and Regulation 5
ECON 165. International Economics 5
MS&E 241. Economic Analysis 3-4
PUBLPOL 103B. Ethics and Public Policy 5
GSBGEN 339. Environmental Entrepreneurship 4

BIOSPHERE TRACK

BIO 139. Biology of Birds 3
BIO 175. Tropical Ecology and Conservation 5
BIO 215. Biochemical Evolution 3
BIO 216. Terrestrial Biogeochemistry 3
BIOHOPK 161H. Invertebrate Zoology 5
BIOHOPK 163H. Oceanic Biology 4
BIOHOPK 164H. Marine Botany 4
CEE 274E. Pathogens in the Environment 3
EARTHSYS 147. Controlling Climate Change in the 21st Century 3

ENERGY SCIENCE AND TECHNOLOGY TRACK

CEE 156. Building Systems	4
ECON 158. Antitrust and Regulation	5
EE 293A. Fundamentals of Energy Processes	3
EE 293B. Fundamentals of Energy Processes	3
ENERGY120. Fundamentals of Petroleum Engineering	3
ENERGY269. Geothermal Reservoir Engineering	3
GES 115. Engineering Geology Practice	3
ME 131A. Heat Transfer	3
MSE 248. Economics of Natural Resources	3-4

LAND SYSTEMS TRACK

CEE 173A. Energy Resources	4-5
CEE 175A. California Coast: Science, Policy, and Law	3-4
GES 112. Mapping the Geological Environment	3
GES 115. Engineering Geology Practice	3
GES 131. Environmental Earth Sciences II: Fluvial Systems and Landscape Evolution	3
URBANST 132. Concepts and Analytic Skills for the Social Sector	4

OCEANS TRACK

BIOHOPK 161H. Invertebrate Zoology	5
BIOHOPK 164H. Marine Botany	4
EARTHSYS 175. The California Coast: Science, Policy, and Law	3-4

SUMMARY OF COURSE REQUIREMENTS AND UNITS

Earth Systems Introduction and Core	12
Required allied courses	41-62
TRACKS	
Anthrosphere	19-30
Biosphere	15-22
Energy Science and Technology	18-22
Land Systems	18-29
Oceans	10-12
Upper-division electives	6-15
Senior research or internship	9
Senior seminar	3
Total units (depending on track, electives)	94-126

HONORS PROGRAM

The honors program in Earth Systems provides students with an opportunity to pursue individual research within a specific area or between areas of Earth Systems, through a year-long mentored research project with an Earth Systems-affiliated faculty member that culminates in a written thesis.

To be admitted to the honors program, applicants must maintain a minimum GPA of 3.4 in Earth Systems course work. Potential honors students should complete the EARTHSYS 111 and EARTHSYS 112 sequence by the end of the junior year. Qualified students apply in Spring Quarter of the junior year, or the fourth quarter before graduation, by submitting a detailed research proposal and a brief statement of support from a faculty research adviser. Students who elect to do an honors thesis should begin planning no later than Winter Quarter of the junior year.

A maximum of 9 units is awarded for thesis research through EARTHSYS 199. Those 9 units may not substitute for any other required parts of the Earth Systems curriculum. All theses are evaluated for acceptance by the thesis faculty adviser and one additional member of the Earth Systems Committee of the Whole.

Honors students are encouraged to present their research through the School of Earth Sciences Annual Research Review, which highlights undergraduate and graduate research in the school during the annual visit of the School of Earth Sciences external Advisory Board. Faculty advisers are encouraged to sponsor presentation of student research results at professional society meetings.

Students interested in a group-oriented, interdisciplinary honors experience should investigate the Goldman Interschool Honors Program in Environmental Science, Technology, and Policy, a program of the School of Earth Sciences. More information on Goldman may be obtained by phoning (650) 725-2745.

COTERMINAL B.S. AND M.S. DEGREES IN EARTH SYSTEMS

The Stanford coterminal degree enables an undergraduate to embark on an integrated program of study leading to the master's degree before requirements for the bachelor's degree have been completed. Undergraduates with a minimum 3.4 Stanford GPA may apply to work simultaneously toward B.S. and M.S. degrees. The M.S. degree in Earth Systems provides the student with enhanced tools to evaluate the primary literature of the discipline most closely associated with the student's track and allows an increased specialization through additional course work that may include 9 units of thesis research. Integration of earth systems concepts is furthered by participation in EARTHSYS 290, the Master's Seminar.

To apply, complete and return to the Earth Systems office an application that includes:

- a statement of purpose
- a resume
- a Stanford transcript
- two letters of recommendation, one of which must be from the master's adviser
- a list of courses that fulfill degree requirements signed by the Associate Director, Academics, and the master's adviser.

Applications must be submitted by the quarter preceding the anticipated quarter of graduation. An application fee is assessed by the Registrar's Office for coterminal applications.

Students may either:

1. complete 180 units required for the B.S. degree and then complete the three quarters required for the M.S. degree
2. *or,* complete a total of 15 quarters during which the requirements of the degrees are fulfilled concurrently.

The student has the option of receiving the B.S. degree after completing that degree's requirements or receiving two degrees concurrently at the end of the master's program.

These requirements must be fulfilled to receive an M.S. degree:

1. All requirements for the B.S. degree.
2. Further course work (and/or thesis research), all of which should be at the 100-level or above, including 22 units at the 200-level or above, leading to further focus within the student's track.
3. Participation in the Master's Seminar (EARTHSYS 290).

The program consists of a minimum of 45 units of course work and/or thesis research, at least 22 of which must be at the 200-level or above.

The student must devise a program of study that shows a level of specialization appropriate to the master's level, as determined in consultation with the adviser. The program should demonstrate further specialization and focus within the student's undergraduate track. Students applying from an undergraduate major other than Earth Systems or students applying for a coterminal M.S. in Environmental Earth System Science should meet with Julie Kennedy or Deana Fabbro-Johnston for clarification.

With the adviser's approval, 9 units may be in the form of research. This may culminate in the preparation of a master's thesis; however, a thesis is not required for the degree. Master's students must take part in the Spring Quarter Master's Seminar, EARTHSYS 290, and have additional responsibilities appropriate to the master's level (thesis presentation, modeling problems, and so on).

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

OVERSEAS STUDIES COURSES IN EARTH SYSTEMS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site

(http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

- OSPAUSTL 10. Coral Reef Ecosystems. 3 units, Kevin Arrigo, Simon Dunn, Selina Ward, GER:DB:EngrAppSci
- OSPAUSTL 20. Coastal Resource Management. 3 units, Ron Johnstone, GER:DB:EngrAppSci
- OSPAUSTL 30. Coastal Forest Ecosystems. 3 units, Claire Baker, Norman Duke, GER:DB:EngrAppSci

FLORENCE

- OSPFLOR 38. Water Resources Engineering in Italy: An Historical Perspective. 4-5 units, Leonard Ortolano, GER:DB:EngrAppSci

SANTIAGO

- OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, Marcela A. Bustamante, GER:DB:EngrAppSci

WINTER QUARTER

BERLIN

- OSPBER 62. Shades of Green: Environmental Policy in Germany and the U.S. in Historical Perspective. 5 units, Sylke Tempel, GER:DB:SocSci

SANTIAGO

- OSPSANTG 27. Humans and the Environment: The Great Transitions. 3-5 units, Shripad Tuljapurkar
- OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, GER:DB:EngrAppSci

SPRING QUARTER

PARIS

- OSPPARIS 33. The Economics of Climate Change: Policies in Theory and in Practice in the EU and the US. 5 units, Christian de Perthuis, Benoit Leguet, GER:DB:SocSci, EC:GlobalCom

SANTIAGO

- OSPSANTG 85. Marine Ecology of Chile and the South Pacific. 5 units, Alvaro Palma, GER:DB:NatSci

EMMETT INTERDISCIPLINARY PROGRAM IN ENVIRONMENT AND RESOURCES (E-IPER)

Director: Peter Vitousek (Biology)
Associate Director: Helen J. Doyle
Faculty: Nicole Ardoin (Education, Woods Institute for the Environment), Kevin Arrigo (Environmental Earth System Science), Kenneth J. Arrow (Economics, emeritus), Gregory Asner (Global Ecology, Carnegie Institution), Shilajeet Banerjee (Mechanical Engineering), William Barnett (Business), Michele Barry (Medicine), Sally M. Benson (Energy Resources Engineering, Global Climate and Energy Program), Sarah L. Billington (Civil and Environmental Engineering), Douglas W. Bird (Anthropology), Rebecca Bleige Bird (Anthropology), Barbara Block (Biology), Alexandria Boehm (Civil and Environmental Engineering), Carol Boggs (Biology), Jef Caers (Energy Resources Engineering), Ken Caldeira (Global Ecology, Carnegie Institution), Margaret Caldwell (Law), Page Chamberlain (Environmental Earth System Science), Joshua Cohen (Political Science), Craig S. Criddle (Civil and Environmental Engineering), Lisa Curran (Anthropology, Woods Institute for the Environment), Gretchen C. Daily (Biology), Jennifer Davis (Civil and Environmental Engineering, Woods Institute for the Environment), Noah Diffenbaugh (Environmental Earth System Science, Woods Institute for the Environment), Rodolfo Dirzo (Biology), Robert B. Dunbar (Environmental Earth System Science), William H. Durham (Anthropology), Anne Ehrlich (Biology), Paul Ehrlich (Biology), Gary Ernst (Geological and Environmental Sciences, emeritus), Walter Falcon (Freeman Spogli Institute for International Studies, emeritus), Scott Fendorf (Environmental Earth System Science), James Ferguson (Anthropology), Christopher B. Field (Biology, Environmental Earth System Science, Carnegie Institution), Martin Fischer (Civil and Environmental Engineering), Zephyr Frank (History), David Freyberg (Civil and Environmental Engineering), Oliver Fringer (Civil and Environmental Engineering), Tadashi Fukami (Biology), Margot Gerritsen (Energy Resources Engineering), Steven Gorelick (Environmental Earth System Science), Lawrence Goulder (Economics), Mark Granovetter (Sociology), Elizabeth Hadly (Biology), Ursula Heise (English), Thomas Heller (Law), Henning Hillmann (Sociology), Dominique Irvine (Anthropology), Mark Jacobson (Civil and Environmental Engineering), James Holland Jones (Anthropology, Woods Institute for the Environment), Terry Karl (Political Science), David Kennedy (History), Donald Kennedy (Biology, emeritus), Herve Kieffel (Management Science and Engineering), Jeffrey Koseff (Civil and Environmental Engineering, Woods Institute for the Environment), Anthony Kovscek (Energy Resources Engineering), Eric Lambin (Environmental Earth System Science, Woods Institute for the Environment), Raymond Levitt (Civil and Environmental Engineering), David Lobell (Environmental Earth System Science), Richard Luthy (Civil and Environmental Engineering), Janet Martinez (Law), Gilbert M. Masters (Civil and Environmental Engineering, emeritus), Michael D. Mastrandrea (Woods Institute for the Environment), Pamela Matson (Dean, School of Earth Sciences), Douglas McAdam (Sociology), Monica McDermott (Sociology), Michael D. McGehee (Materials Science and Engineering), Lynn Meskell (Anthropology), Fiorenza Micheli (Biology), Grant Miller (Medicine), Stephen Monismith (Civil and Environmental Engineering), Harold Mooney (Biology), Rosamond Naylor (Environmental Earth System Science), Leonard Ortolano (Civil and Environmental Engineering), Stephen Palumbi (Biology), Erica Plambeck (Business), Walter W. Powell (Education), Dariush Rafinejad (Management Science and Engineering), Stefan J. Reichelstein (Business), Thomas N. Robinson (Medicine),

Terry L. Root (Woods Institute for the Environment), Robert Sapolsky (Biology), Debra Satz (Philosophy), Lee Schipper (Precourt Energy Efficiency Center), Gary Schoolnik (Medicine), Richard Scott (Sociology), Sarah A. Soule (Business), James Sweeney (Management Science and Engineering, Precourt Energy Efficiency Center), Barton Thompson (Law, Woods Institute for the Environment), Shripad Tuljapurkar (Biology), Peter Vitousek (Biology), Michael Wara (Law), Jeremy Weinstein (Political Science), John Weyant (Management Science and Engineering, Precourt Energy Efficiency Center), Richard White (History), Jennifer Wilcox (Energy Resources Engineering), Mark Zoback (Geophysics)

Senior Lecturer: Julie Kennedy

Lecturers: Jon Christensen, Stan Christensen, Thomas Hayden, Kathleen A. Phillips

Program Offices: Yang and Yamazaki (Y2E2) Building, Suite 226
Mail Code: 4210
Phone: (650) 723-6117
Email: nelsondn@stanford.edu
Web Site: http://e-iper.stanford.edu

Courses offered by the Emmett Interdisciplinary Program in Environment and Resources are listed under the subject code ENVRES on the *Stanford Bulletin's* ExploreCourses web site.

The Emmett Interdisciplinary Program in Environment and Resources (E-IPER) is designed to create interdisciplinary scholars and leaders to address the world's most challenging environmental and sustainability issues. E-IPER students combine academic disciplines, including natural and earth sciences, engineering, economics, humanities, social sciences, law, health, policy, and business, to yield new insights and novel solutions to urgent global problems, such as energy use, climate change, food security, freshwater availability, depletion of ocean resources, land degradation, and biodiversity loss.

E-IPER offers a Ph.D. in Environment and Resources and, for students currently enrolled in Stanford's Graduate School of Business, Stanford Law School, and School of Medicine, a joint degree consisting of an M.S. in Environment and Resources in combination with their professional degree. Both E-IPER's Ph.D. and M.S. degrees are interdisciplinary, giving students exposure to environmental and sustainability issues and insight into new knowledge, technologies, and policies to help solve these problems. Within the guidelines of their respective degrees, E-IPER students are advised by faculty from and take classes offered in all seven schools of the University.

Through their original research and their work in policy and industry, E-IPER students address issues such as the science and policy of global climate change, regional food security, the mapping and valuation of ecosystem services, the development of new energy technologies, the effects of agricultural intensification and other land use changes, and conservation finance. For additional information about E-IPER students, see http://e-iper.stanford.edu/people.students.php.

E-IPER's affiliated faculty members come from all seven Stanford schools. Collectively, they represent an extraordinary diversity of environment and sustainability interests and breadth of research and policy approaches. More information about individual faculty can be found at http://e-iper.stanford.edu/people.faculty.php. More details about Stanford's interdisciplinary environmental research and policy work generally can be found on the Woods Institute for the Environment's web site, http://woods.stanford.edu.

GRADUATE PROGRAMS IN ENVIRONMENT AND RESOURCES

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin. The E-IPER Ph.D. and M.S. degrees are guided by comprehensive requirements created with faculty and student input and approved by E-IPER's executive committee. To access the current Ph.D. and M.S. degree requirement documents, see http://e-iper.stanford.edu/resources.academic.php.

MASTER OF SCIENCE IN ENVIRONMENT AND RESOURCES

Students may not apply directly for the M.S. in Environment and Resources degree. The M.S. is an option exclusively for students currently enrolled in the joint degree programs with the M.B.A. in the Graduate School of Business or the J.D. with the Stanford Law School; concurrently pursuing the M.D. in the School of Medicine; or for E-IPER Ph.D. students who do not continue in the Ph.D. degree program.

JOINT MASTER'S DEGREE

Students enrolled in a professional degree program in Stanford's Graduate School of Business or the Stanford Law School are eligible to apply for admission to the joint M.S. in Environment and Resources degree program (JDP). Enrollment in the JDP allows students to pursue an M.S. degree concurrently with their professional degree and to count a defined number of units toward both degrees, resulting in the award of joint M.B.A. and M.S. in Environment and Resources degrees or joint J.D. and M.S. in Environment and Resources degrees.

The joint M.B.A./M.S. degree program requires a total of 129 quarter units to be completed over approximately eight academic quarters (compared to 105 units for the M.B.A. and 45 units for the M.S. if pursued as separate degrees).

The joint J.D./M.S. degree program requires a minimum of 111 quarter units, although it is possible that students may need to take additional units to satisfy the degree requirements for both the J.D. and M.S. The joint J.D/M.S. may be completed in three years.

The student's program of study is subject to the approval of the student's faculty adviser and E-IPER staff. The joint degrees are conferred when the requirements for both the E-IPER M.S. and the professional degree programs have been met. For application information, see http://e-iper.stanford.edu/admissions.php. For additional information, see http://e-iper.stanford.edu/academic.requirements.php.

In addition to requirements for the professional degree, requirements for the JDP include:

1. Completion of a required introductory core course:
   - For joint M.B.A/M.S. students: ENVRES 338, Environmental Science for Managers and Policy Makers (same as OIT 338). If offered, ENVRES 339/OIT 339 also fulfills this requirement.
   - For all other JDP students: ENVRES 310, Environmental Forum Seminar.
2. Attendance at two mandatory workshops to be held in Autumn Quarter 2010 to introduce new E-IPER joint M.S. students to the E-IPER community and program requirements.
3. Completion and presentation of a capstone project that integrates the student's professional and M.S. degrees, as part of the required course ENVRES 290, Capstone Project Seminar in Environment and Resources.
4. Completion of a minimum of four letter-graded courses, while maintaining a 'B' average, from one joint M.S. course track:
   - Energy
   - Climate and Atmosphere
   - Cleantech
   - Land Use and Agriculture
   - Oceans and Estuaries
   - Freshwater
   - Global, Community, and Environmental Health
   - Sustainable Built Environment.

   Approved courses in each track are below. See also http://e-iper.stanford.edu/academic.jointms.curriculum.php.
5. Completion of at least four additional graded elective courses at the 100-level or higher, which may be taken from one or more course tracks or elsewhere in the University, while maintaining a 'B' average.

6. Among the courses fulfilling requirements 4 and 5 above, completion of at least four courses at the 200-level or above, excluding individual study courses. Individual study courses, directed reading. and independent research units may count for a maximum of 4 units for joint M.S. students (such as ENVRES 398 or ENVRES 399).

Restrictions on course work that may fulfill the Joint M.S. degree include:

1. A maximum of 5 units from courses that are identified as primarily consisting of guest lectures, such as the Energy Seminar or the Environmental Law Workshop, may be counted toward the joint M.S. degree. Additional courses in this category are listed at http://e-iper.stanford.edu/academic.jointms.curriculum.php.
2. A maximum of 12 units from approved courses related to the environmental and resource fields from the student's professional school may be applied toward the M.S. A list of approved courses from the GSB, School of Law, and School of Medicine can be found at http://e-iper.stanford.edu/academic.jointms.curriculum.php.

DUAL MASTER'S DEGREE

Only students in the School of Medicine may apply to pursue the M.S. in Environment and Resources degree. For the dual degree, students must meet the University's minimum requirements for the M.D. and complete an additional 45 units for the M.S. in Environment and Resources. Completion of the M.S. is anticipated to require at least three quarters in addition to the quarters required for the M.D. For additional information, see http://e-iper.stanford.edu/academic.requirements.php.

The student's program of study is subject to the approval of the student's faculty adviser and E-IPER staff. The two degrees are conferred when the requirements for both the E-IPER M.S. and the professional degree programs have been met. For application information, see http://e-iper.stanford.edu/admissions.php.

In addition to requirements for the M.D., requirements for the dual M.S. include:

1. Completion of a required introductory core course: ENVRES 310, Environmental Forum Seminar.
2. Attendance at two mandatory workshops to be held in Autumn Quarter 2010 to introduce all new E-IPER joint M.S. students to the E-IPER community and program requirements.
3. Completion and presentation of a capstone project that integrates the student's professional and M.S. degrees, as part of the required course ENVRES 290, Capstone Project Seminar in Environment and Resources.
4. Completion of a minimum of four graded courses, while maintaining a 'B' average, from one Joint M.S. Course Track:
   - Energy
   - Climate and Atmosphere
   - Cleantech
   - Land Use and Agriculture
   - Oceans and Estuaries
   - Freshwater
   - Global, Community, and Environmental Health
   - Sustainable Built Environment.

   Approved courses in each track are below. See also http://e-iper.stanford.edu/academic.jointms.curriculum.php.
5. Completion of at least four additional letter-graded elective courses at the 100-level or higher, which may be taken from one or more course tracks or elsewhere in the University, while maintaining a 'B' average.
6. Among the courses fulfilling requirements 4 and 5 above, completion of at least four courses at the 200-level or above, excluding individual study courses. Individual study courses, directed reading, and independent research units may count for a maximum of 4 units for dual M.S. students (such as ENVRES 398 or ENVRES 399).

Restrictions on course work that may fulfill the Dual M.S. degree include:

1. A maximum of 5 units from courses that are identified as primarily consisting of guest lectures, such as the Energy Seminar or the Environmental Law Workshop may be counted toward the Joint M.S. degree. Additional courses in this category are listed at http://e-iper.stanford.edu/academic.jointms.curriculum.php.
2. A maximum of 12 units from courses related to the environmental and resource fields from the student's professional school may be applied toward the M.S. A list of approved courses from the GSB, School of Law, and School of Medicine can be found at http://e-iper.stanford.edu/academic.jointms.curriculum.php.

JOINT M.S. AND DUAL M.S. COURSE TRACKS

Students should consult *Stanford Bulletin's* Explore Courses web site to determine course description, class schedule, location, eligibility, and prerequisites. Course tracks and other recommended courses are also available at http://e-iper.stanford.edu/academic.jointms.curriculum.php.

MASTER OF SCIENCE

In exceptional circumstances, E-IPER offers a Master of Science degree for students in E-IPER's Ph.D. program who opt to complete their training with a M.S. degree or who do not advance to candidacy for the Ph.D. degree. Admission directly to the M.S. program is not allowed.

Requirements for the M.S. include:

1. Completion of a minimum of 45 units at or above the 100-level, of which the majority of units should be at or above the 200-level.
2. Completion of the E-IPER Ph.D. core curriculum, each with a letter grade of 'B' or higher, comprising:
   - ENVRES 310. Environmental Forum Seminar
   - ENVRES 315. Environmental Research Design Seminar
   - ENVRES 320. Designing Environmental Research
   - ENVRES 330. Research Approaches to Environmental Problem Solving, taken concurrently with ENVRES 398. Directed Individual Study in Environment and Resources
3. Additional courses may be chosen from approved course lists in E-IPER's four focal areas (culture and institutions; economics and policy analysis; engineering and technology; or natural sciences) or from other courses approved by the student's lead advisers.
4. Students may take no more than 6 of the required 45 units credit/no credit and must maintain at least a 'B' average in all courses taken for the M.S. degree.
5. Directed research and independent study may count for a maximum of 8 units of the 45 unit M.S.

The M.S. degree does not have an M.S. with thesis option. Students may write a M.S. thesis, but it is not formally recognized by the University.

DOCTOR OF PHILOSOPHY IN ENVIRONMENT AND RESOURCES

E-IPER's Ph.D. requirements, updated annually at http://e-iper.stanford.edu/resources.academic.php, lay out a scaffold of advising meetings, core courses, program activities, and milestones to guide students' progress. Each student works with a faculty advising team, comprising at least two faculty from different disciplines, to design a course of study that allows the student to develop and exhibit: a) familiarity with analytical tools and research approaches for interdisciplinary problem solving, and a mastery of those tools and approaches central to the student's thesis work; b) interdisciplinary breadth in each of four focal areas: culture and institutions; economics and policy analysis; engineering and technology; and natural sciences; and c) depth in at least two distinct fields of inquiry.

Program specific Ph.D. requirements are outlined in detail in the current year requirements and are summarized below:

1. Completion of the Ph.D. core course sequence: ENVRES 310, Environmental Forum Seminar; ENVRES 315, Environmental Research Design Seminar; ENVRES 320, Designing Environmental Research; and ENVRES 330, Research Approaches for Environmental Problem Solving, taken concurrently with ENVRES 398. Directed Individual Study in Environment and Resources, each with a letter grade of 'B' or higher. E-IPER Ph.D. students are also required to take EARTHSCI 300, Earth Sciences Seminar, which is required of all incoming School of Earth Sciences graduate students.
2. Completion of the breadth requirement in all four focal areas (culture and institutions; economics and policy analysis; engineering and technology; and natural sciences) through a sequence of courses, independent study, and/or demonstration of proficiency through prior course work or experience. Specific requirements and approved courses that satisfy breadth in each of the four focal areas as of July 2010 are listed below and in the current Ph.D. requirements document. Updated course lists are available at http://e-iper.stanford.edu/academic.phd.curriculum.php. Fulfillment of the breadth requirement must be certified by the student's two lead faculty advisers and the E-IPER faculty director.
3. Fulfillment of depth in the student's chosen fields of inquiry through additional courses, research, and/or independent studies. The student's two lead faculty advisers must certify that a) the two fields of inquiry are sufficiently distinct such that work integrating the two is interdisciplinary; and b) the student's course work and independent study has provided the substantial depth of understanding normally expected at the Ph.D. level.
4. Completion of quarterly meetings with advisers during the first year, culminating in the Spring Quarter first-year big picture advising meeting; and at minimum, annual meetings thereafter, including the Spring Quarter Second Year Meeting of the Minds, prior to which students must formally identify their two lead advisers and two distinct fields of inquiry.
5. Submission of a candidacy plan by end of Spring Quarter of the second year, for review at the Second Year Meeting of the Minds and subject to the approval of E-IPER's faculty director. The candidacy plan should document how the student has fulfilled the program requirements to date and include a summary of research ideas and a list of faculty who might serve as qualifying exam committee members.
6. Completion of the oral qualifying exam and completion of the requirements for candidacy, including at least 25 graded graduate course units (200 level and above) with at least a 'B' average, by the end of Winter Quarter of the third year. The oral qualifying exam committee should include the student's two lead advisers and 2-3 other faculty with expertise in the student's research area. The majority of the oral qualifying exam committee should be members of the Academic Council; the chair of the committee must be an Academic Council member and may not be one of the student's two lead advisers. In exceptional cases, the committee may include a member-at-large who is not a Stanford faculty member as a fourth or fifth member.
7. Completion of a written dissertation, approved by the student's dissertation reading committee consisting of the student's lead advisers and at least one other member, and passage of the University oral examination in defense of the dissertation following the guidelines outlined in the "Graduate Degrees" sec-

tion of this bulletin. The University oral examination committee comprises the student's two lead advisers, at least two additional members, and a chair who is outside of the departments of the lead advisers, all of whom are normally Academic Council members. Appointment of a non-Academic Council member must be justified and approved by the faculty director.

In addition to the requirements listed above, all Ph.D. students must:

1. Serve as a teaching assistant for at least one quarter in a course with a discussion section or with an opportunity to lecture in at least two class sessions, in any department or program, including ENVRES 320 or ENVRES 330. Seminars, including Introductory Seminars, may not be used to fulfill this requirement. Students should fulfill the teaching requirement by the end of the third year unless they obtain a firm commitment from a faculty member to TA a future course.
2. On an ongoing basis, submit grant proposals for external funding, defined as fellowship and/or research funds provided by a government agency, a private foundation, or a University entity other than E-IPER or the School of Earth Sciences.
3. Participate each year in a Spring Quarter annual review in which the student and lead advisers submit progress reports to the E-IPER executive committee.

The following courses may be taken to satisfy the breadth requirement in E-IPER's four focal areas. Updated lists are available at http://e-iper.stanford.edu/academic.phd.curriculum.php. Students should consult the *Stanford Bulletin's* Explore Courses web site to determine the course schedule, location, eligibility, and prerequisites.

CULTURE AND INSTITUTIONS BREADTH COURSES

At least two courses are required. Students may choose a course not listed below provided it meets the criteria for this focal area's subject knowledge. Students are advised to seek approval from their lead advisers in advance and are required to obtain their advisers' signatures on the breadth certification form as verification that they have met this requirement.

ANTHRO 247. Nature, Culture, Heritage
ANTHRO 262. Indigenous Peoples and Environmental Problems

SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit

ECONOMICS AND POLICY ANALYSIS BREADTH COURSES

One of the course sequences listed below, culminating in ENVRES 243 (same as MS&E 243), satisfies the minimum breadth requirement. Students are advised to seek approval from their lead advisers in advance and are required to obtain their advisers' signatures on the breadth certification form as verification that they have met this requirement.

ECON 50 and 51. Economic Analysis I and II; and MS&E/ENVRES 243
ECON 50. Economic Analysis I and ECON 155. Environmental Economics and Policy; and MS&E/ENVRES 243
ECON 202 *or* ECON 202N and ECON 203 *or* ECON 203N. Core Economics; and MS&E/ENVRES 243
ECON 106. World Food Economy; and MS&E/ENVRES 243
MS&E 241. Economic Analysis; and MS&E/ENVRES 243
MS&E 248. Economics of Natural Resources; and MS&E/ENVRES 243
PUBLPOL 301A. Microeconomics; and MS&E/ENVRES 243

Possible substitutes for ENVRES 243:

ECON 250. Environmental Economics
ECON 251. Natural Resources and Energy
PUBLPOL 301B. Cost-Benefit Analysis and Evaluation

The same prerequisites listed above apply to PUBLPOL 301B, ECON 250, and ECON 251. PUBLPOL 301B focuses less on environmental issues than ENVRES 243. Ph.D. students choosing economics and policy analysis as one of their fields of inquiry are encouraged to take ECON 202 or ECON 202N and ECON 203 or ECON 203N, in addition to ENVRES 243, ECON 250, and/or ECON 251.

ENGINEERING AND TECHNOLOGY BREADTH COURSES

At least one course is required; this list represents examples of appropriate courses only. Students may choose a course not listed below provided it meets the criteria for this focal area's subject knowledge. Students are advised to seek approval from their lead advisers in advance and are required to obtain their advisers' signatures on the breadth certification form as verification that they have met this requirement.

CEE 101B. Mechanics of Fluids
CEE 161A. Rivers, Streams, and Canals
CEE 172. Air Quality Management
CEE 176A. Energy Efficient Buildings
CEE 176B. Electric Power: Renewables and Efficiency
CEE 177. Aquatic Chemistry and Biology
CEE 201D. Computations in Civil and Environmental Engineering
CEE 207A. Energy Resources
CEE 215. Goals and Methods of Sustainable Building Projects
CEE 260A. Physical Hydrogeology
CEE 262B. Transport and Mixing in Surface Water Flows
CEE 263A. Air Pollution Modeling
CEE 264A. Rivers, Streams, and Canals

CEE 265A. Sustainable Water Resources Development
CEE 266B. Floods and Droughts, Dams and Aqueducts
CEE 270. Movement and Fate of Organic Contaminants in Surface Waters and Groundwater
CEE 275A. Law and Science of California Coastal Policy
EE 293A. Fundamentals of Energy Processes
EE 293B. Fundamentals of Energy Processes
MS&E 250A. Engineering Risk Analysis

NATURAL SCIENCES BREADTH COURSES

At least two courses are required. Students may choose a course not listed below provided it meets the criteria for this focal area's subject knowledge. Students are advised to seek approval from their lead advisers in advanced and are required to obtain their advisers' signatures on the breadth certification form as verification that they have met this requirement.

Web Site: http://pangea.stanford.edu/ERE

Courses offered by the Department of Energy Resources Engineering are listed under the subject code ENERGY on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Energy Resources Engineering (ERE) awards the following degrees: the Bachelor of Science, Master of Science, Engineer, and Doctor of Philosophy in Energy Resources Engineering. The department also awards the Master of Science, Engineer, and Doctor of Philosophy in Petroleum Engineering. Consult the ERE student services office to determine the relevant program.

Energy resources engineers are concerned with the design of processes for energy recovery. Included in the design process are characterizing the spatial distribution of hydrocarbon and geothermal reservoir properties, drilling wells, designing and operating production facilities, selecting and implementing methods for enhancing fluid recovery, examining the environmental aspects of petroleum and geothermal exploration and production, monitoring reservoirs, and predicting recovery process performance. The program also has a strong interest in related energy topics such as renewable energy, global climate change, and CO_2 sequestration. The Energy Resources Engineering curriculum provides a sound background in basic sciences and their application to practical problems to address the complex and changing nature of the field. Course work includes the fundamentals of chemistry, computer science, engineering, geology, geophysics, mathematics, and physics. Applied courses cover most aspects of energy resources engineering and some related fields like geothermal engineering and geostatistics. The curriculum emphasizes the fundamental aspects of fluid flow in the subsurface. These principles apply equally well to optimizing oil recovery from petroleum reservoirs, geothermal energy production and remediating contaminated groundwater systems.

Faculty and graduate students conduct research in areas including: enhanced oil recovery by thermal means, gas injection, and the use of chemicals; flow of fluids in pipes; geostatistical reservoir characterization and mathematical modeling; geothermal engineering; natural gas engineering; carbon sequestration optimization; properties of petroleum fluids; reservoir simulation using computer models; and well test analysis. Undergraduates are encouraged to participate in research projects.

M.S., Engineer, and Ph.D. degrees may be awarded with field designations for students who follow programs of study in the fields of geostatistics, geothermal, crustal fluids, or environmental specialties.

The department is housed in the Green Earth Sciences Building. It operates laboratories for research in enhanced oil recovery processes, geological carbon storage operations, clean energy conversions, and geothermal engineering. Students have access to a variety of computers for research and course work. Computers available for instruction and research include ten multiprocessor Windows 2008 servers within the department, as well as campus-wide computer clusters. Graduate students performing research are provided with one 3 GHz dual-4CPU computer.

MISSION OF THE UNDERGRADUATE PROGRAM IN ENERGY RESOURCES ENGINEERING

The mission of the Energy Resources Engineering major is to provide students with the engineering skills and foundational knowledge needed to flourish as technical leaders within the energy industry. Such skills and knowledge include resource assessment, choices among energy alternatives, and carbon management, as well as the basic scientific background and technical skills common to engineers. The curriculum is designed to prepare students for immediate participation in many aspects of the energy industry and graduate school.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. apply skills developed in fundamental courses to engineering problems.
2. research, analyze, and synthesize solutions to an original and contemporary energy problem.
3. work independently and as part of a team to develop and improve engineering solutions.
4. apply written, visual, and oral presentation skills to communicate scientific knowledge.

BACHELOR OF SCIENCE IN ENERGY RESOURCES ENGINEERING

The four-year program leading to the B.S. degree provides a foundation for careers in many facets of the energy industry. The curriculum includes basic science and engineering courses that provide sufficient depth for a wide spectrum of careers in the energy and environmental fields.

One of the goals of the program is to provide experience integrating the skills developed in individual courses to address a significant design problem. In ENERGY 199, taken in the senior year, student teams identify and propose technical solutions for an energy-resource related problem of current interest.

PROGRAM

The requirements for the B.S. degree in Energy Resources Engineering are similar, but not identical, to those described in the "School of Engineering" section of this bulletin. Students must satisfy the University general education, writing, and language requirements. The normal Energy Resources Engineering undergraduate program automatically satisfies the University General Education Requirements (GERs) in the Disciplinary Breadth areas of Natural Sciences, Engineering and Applied Sciences, and Mathematics.

Engineering fundamentals courses and Energy Resources Engineering depth and elective courses must be taken for a letter grade.

The Energy Resources Engineering undergraduate curriculum is designed to prepare students for participation in the energy industry or for graduate studies, while providing requisite skills to evolve as the energy landscape shifts over the next half century. The program provides a background in mathematics, basic sciences, and engineering fundamentals such as multiphase fluid flow in the subsurface. In addition, the curriculum is structured with flexibility that allows students to explore energy topics of particular individual interest and to study abroad.

In brief, the unit and subject requirements are:

Subject	*Minimum Units*
Energy Resources Core	16
Energy Resources Depth	18
Mathematics	25
Engineering Fundamentals and Depth	24
Science	30
Technology in Society	3-5
University Requirements: IHUM, GERs, Writing, Language	60-67
Total	176-185

The following courses constitute the normal program leading to a B.S. in Energy Resources Engineering. The program may be modified to meet a particular student's needs and interests with the adviser's prior approval.

REQUIRED CORE IN ENERGY RESOURCES ENGINEERING

The following courses constitute the core program in Energy Resources Engineering:

ENERGY 101. Energy Resources and the Environment	3
ENERGY 104. Technology in the Greenhouse: Options for Reducing Greenhouse Gas Emissions	3
ENERGY 120. Fundamentals of Petroleum Engineering	3
ENERGY 160. Modeling Uncertainty in the Earth Sciences	3
ENERGY 199. Senior Project and Seminar in Energy Resources (WIM)	4
Total	16

MATHEMATICS:

- MATH 41. Single Variable Calculus
  - *and* MATH 42. Single Variable Calculus
- *or* MATH 19. Calculus
  - *and* MATH 20. Calculus
  - *and* MATH 21. Calculus
- MATH 51. Linear Algebra and Differential Calculus of Several Variables
  - *or* CME 100. Vector Calculus for Engineers
- MATH 52. Integral Calculus of Several Variables
  - *or* CME104. Linear Algebra and Partial Differential Equations for Engineers
- MATH 53. Ordinary Differential Equations with Linear Algebra
  - *or* CME 102. Ordinary Differential Equations for Engineers

SCIENCE:

- CHEM 31A. Chemical Principles
- CHEM 31B. Chemical Principles II
  - *or* CHEM 31X may be substituted for CHEM 31A,B
- CHEM 33. Structure and Reactivity
- GES 1. Fundamentals of Geology
- PHYSICS 41. Mechanics
- PHYSICS 43. Electricity and Magnetism
- PHYSICS 45. Light and Heat
- PHYSICS 46. Light and Heat Laboratory

ENGINEERING FUNDAMENTALS:

- CS 106A. Programming Methodology
- CS 106B. Programming Abstractions
  - *or* CS 106X may be substituted for CS 106A,B
- ENGR 14. Applied Mechanics: Statics
- ENGR 30. Engineering Thermodynamics
- ENGR 60. Engineering Economy
- ME 70. Introductory Fluids Engineering
  - *or* CHEMENG 120A
- Technology in Society, 1 course

EARTH AND ENERGY DEPTH CONCENTRATION

Choose courses from the list below for a total of at least 18 units. At least one course must be completed in each category. Courses must be planned in consultation with the student's academic adviser. Appropriate substitutions are allowed with the consent of the adviser.

FLUID FLOW AND THE SUBSURFACE

ENERGY 121. Fundamentals of Multiphase Flow	3
ENERGY 130. Well Log Analysis	3
ENERGY 160. Groundwater Pollution and Oil Spills	3
ENERGY 175. Well Test Analysis	3
ENERGY 180. Production Engineering	3
ENGR 62. Introduction to Optimization	4

3D MODELING OF SUBSURFACE STRUCTURES

ENERGY 141. Practice of 3D Subsurface Modeling	3
ENERGY 146. Reservoir Characterization	3
GEOPHYS 112. Exploring the Geosciences with Matlab	3
GEOPHYS 222. Reflection Seismology	3
GES 151. Sedimentary Geology	3

EARTH AND ENERGY SYSTEMS

ENERGY 102. Renewable Energy Resources	3
ENERGY 153. Carbon Capture and Sequestration	3
ENERGY 169. Geothermal Reservoir Engineering	3
ENERGY 191. Optimization of Energy Systems	3
ENERGY 301. The Energy Seminar	1
CEE 64. Air Pollution	3
CEE 70. Environmental Science and Technology	3
CEE 173B. The Coming Energy Revolution	3
CEE 176B. Electric Power	3-4
GEOPHYS 104. The Water Course	3
GEOPHYS 150. General Geophysics and Physics of the Earth	3

HONORS PROGRAM

The program in Energy Resources Engineering leading to the Bachelor of Science with Honors provides an opportunity for independent study and research on a topic of special interest and culminates in a written report and oral presentation.

The Honors Program is open to students with a grade point average (GPA) of at least 3.5 in all courses required for the ERE major and minimum of 3.0 in all University course work. Qualified students intending to pursue honors must submit an Honors Program Application to the Undergraduate Program Director no later than the eighth week of their ninth quarter, but students are encouraged to apply to the program during Winter Quarter of their junior year. The application includes a short form, an unofficial transcript, and a 2-3 page research proposal prepared by the student and endorsed by a faculty member who will serve as the research advisor.

Upon approval, students enroll in the Honors Program via Axess. Students must enroll in a total of 9 units of ENERGY 193; these units may be spread out over the course of the senior year, and may include previous enrollment units for the same research project. Research undertaken for the Honors Program cannot be used as a substitute for regularly required courses. A formal written report must be submitted to the student's research advisor no later than the fourth week of the student's final quarter, and the report must be read, approved, and signed by the student's faculty advisor and a second member of the faculty. Each honors candidate must make an oral presentation of his or her research results.

MINOR IN ENERGY RESOURCES ENGINEERING

The minor in Energy Resources Engineering requires the following three courses plus three additional electives. Courses must be planned in consultation with an ERE adviser. Appropriate substitutions are allowed with the consent of the adviser.

Required courses—

ENERGY 101. Energy Resources and the Environment	3
ENERGY 120. Fundamentals of Petroleum Engineering	3
ENERGY 160. Modeling Uncertainty in the Earth Sciences	3

Elective courses (at least 3 courses from the list below)—

- ENERGY 102. Renewable Energy Resources
- ENERGY 104. Technology in the Greenhouse
- ENERGY 121. Fundamentals of Multiphase Flow
- ENERGY 125. Modeling and Simulation
- ENERGY 130. Well Log Analysis
- ENERGY 141. Practice of Geostatistics and Seismic Data Integration
- ENERGY 146. Reservoir Characterization
- ENERGY 153. Carbon Capture and Sequestration
- ENERGY 169. Geothermal Reservoir Engineering
- ENERGY 175. Well Test Analysis

COTERMINAL B.S. AND M.S. PROGRAM IN ENERGY RESOURCES ENGINEERING

The coterminal B.S./M.S. program offers an opportunity for Stanford University students to pursue a graduate experience while completing the B.S. degree in any relevant major. Energy Resources Engineering graduate students generally come from backgrounds such as chemical, civil, or mechanical engineering; geology or other earth sciences; or physics or chemistry. Students should have a background at least through MATH 53 and CS 106 before beginning graduate work in this program.

The two types of M.S. degrees, the course work only degree and the research degree, as well as the courses required to meet degree requirements, are described below in the M.S. section. Both degrees require 45 units and may take from one to two years to complete depending on circumstances unique to each student.

Requirements to enter the program are: two letters of recommendation from faculty members or job supervisors, a statement of purpose, scores from the GRE general test, and a copy of Stanford University transcripts. While the department does not require any specific GPA or GRE score, potential applicants are expected to compete favorably with graduate student applicants.

A Petroleum Engineering or Energy Resources Engineering master’s degree can be used as a terminal degree for obtaining a professional job in the petroleum or energy industries, or in any related industry where analyzing flow in porous media or computer simulation skills are required. It can also be a stepping stone to a Ph.D. degree, which usually leads to a professional research job or an academic position.

Students should apply to the program any time after they have completed 105 undergraduate units, and in time to take ENERGY 120, the basic introductory course in Autumn Quarter of the year they wish to begin the program. Contact the Department of Energy Resources Engineering to obtain additional information.

The University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, also see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

GRADUATE PROGRAMS IN ENERGY RESOURCES ENGINEERING

The Energy Resources Engineering department offers two distinct degree programs at both the M.S and Ph.D. levels. One program leads to the degrees of M.S. or Ph.D. in Petroleum Engineering, and the other leads to the degrees of M.S. or Ph.D. in Energy Resources Engineering. The Engineer degree, which is offered in either Petroleum Engineering or Energy Resources Engineering, is an extended form of the M.S. degree with additional course work and research.

The University's basic requirements for M.S., Engineer, and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

The following are minimum requirements for a student in the Department of Energy Resources Engineering to remain in good academic standing regarding course work:

1. no more than one incomplete grade at any time
2. a cumulative grade point average (GPA) of 3.0
3. a grade point average (GPA) of 2.7 each quarter
4. a minimum of 15 units completed within each two quarter period (excluding Summer Quarter).

Unless otherwise stated by the instructor, incomplete grades in courses within the department are changed to 'NP' (not passed) at the end of the quarter after the one in which the course was given. This one quarter limit is a different constraint from the maximum one-year limit allowed by the University.

Academic performance is reviewed each quarter by a faculty committee. At the beginning of the next quarter, any student not in good academic standing receives a letter from the committee or department chair stating criteria that must be met for the student to return to good academic standing. If the situation is not corrected by the end of the quarter, possible consequences include termination of financial support, termination of departmental privileges, and termination from the University.

Students funded by research grants or fellowships from the department are expected to spend at least half of their time (a minimum of 20 hours per week) on research. Continued funding is contingent upon satisfactory research effort and progress as determined by the student's adviser. After Autumn Quarter of the first year, students receive a letter from the department chair concerning their research performance. If problems are identified and they persist through the second quarter, a warning letter is sent. Problems persisting into a third quarter may lead to loss of departmental support including tuition and stipend. Similar procedures are applied in subsequent years.

A balanced master's degree program including engineering course work and research requires a minimum of one maximum-tuition academic year beyond the baccalaureate to meet the University residence requirements. Most full-time students spend at least one additional summer to complete the research requirement. An alternative master's degree program based only on course work is available, also requiring at least one full tuition academic year to meet University residence requirements.

M.S. students who anticipate continuing in the Ph.D. program should follow the research option. M.S. students receiving financial aid normally require two academic years to complete the degree. Such students must take the research option.

The degree of Engineer requires a comprehensive maximum-tuition, two-year program of graduate study. This degree permits more extensive course work than the master's degree, with an emphasis on professional practice. All Engineer degree students receiving financial aid are limited to a 10-unit course load per quarter and need at least ten quarters of work to complete the degree.

The Ph.D. degree is awarded primarily on the basis of completion of significant, original research. Extensive course work and a minimum of 90 units of graduate work beyond the master's degree are required. Doctoral candidates planning theoretical work are encouraged to gain experimental research experience in the M.S. program. Ph.D. students receiving financial assistance are limited to 10 units per quarter and often require more than three years to complete the Ph.D.

In special cases, the M.S., Engineer, and Ph.D. degrees may be awarded with field designations for students who follow programs of study in the particular fields of (1) geostatistics, (2) geothermal, or (3) environment. For example, students may be awarded the degree Master of Science in Energy Resources Engineering (Geothermal).

MASTER OF SCIENCE IN PETROLEUM ENGINEERING

The objective is to prepare the student for professional work in the energy industry through completion of fundamental courses in the major field and in related sciences as well as independent research.

Students entering the graduate program are expected to have an undergraduate-level engineering or physical science background. Competence in computer programming in a high-level language (CS 106X or the equivalent) and knowledge of engineering and geological fundamentals (ENERGY 120, 130, and GES 151) are prerequisites for taking most graduate courses.

The candidate must fulfill the following requirements:

1. Register as a graduate student for at least 45 units.
2. Submit a program proposal for the Master's degree approved by the adviser during the first quarter of enrollment.
3. Complete 45 units with a grade point average (GPA) of at least 3.0. This requirement is satisfied by taking the core sequence, selecting one of the seven elective sequences, an appropriate number of additional courses from the list of technical electives, and completing 6 units of master's level research. Students electing the course work only M.S. degree are strongly encouraged to select an additional elective sequence in place of the research requirement. Students interested in continuing for a Ph.D. are expected to choose the research option and enroll in 6 units of ENERGY 361. All courses must be taken for a letter grade.
4. Students entering without an undergraduate degree in Petroleum Engineering must make up deficiencies in previous training. Not more than 10 units of such work may be counted as part of the minimum total of 45 units toward the M.S. degree.

Research subjects include certain groundwater hydrology and environmental problems, energy industry management, flow of non-Newtonian fluids, geothermal energy, natural gas engineering, oil and gas recovery, pipeline transportation, production optimization, reservoir characterization and modeling, carbon sequestration, reservoir engineering, reservoir simulation, and transient well test analysis.

RECOMMENDED COURSES AND SEQUENCES

The following list is recommended for most students. With the prior special consent of the student's adviser, courses listed under technical electives may be substituted based on interest or background.

CORE SEQUENCE

Subject and Catalog Number	*Units*
ENERGY 175. Well Test Analysis	3
or ENERGY 130. Well Log Analysis	3
ENERGY 221. Fundamentals of Multiphase Flow	3
ENERGY 222. Reservoir Engineering*	3
ENERGY 246. Reservoir Characterization and Flow Modeling with Outcrop Data	3
ENERGY 251. Thermodynamics of Equilibria†	3
CME 200. Linear Algebra with Application to Engineering Computations	3
CME 204. Partial Differential Equations in Engineering	3
Total	21

* Students taking the Environmental sequence may substitute ENERGY 227.

† Optional for students taking the Geostatistics and Reservoir Modeling sequence.

ELECTIVE SEQUENCE

Choose one of the following:

CRUSTAL FLUIDS:

GES 230. Physical Hydrogeology	4
GES 231. Contaminant Hydrogeology	4
GEOPHYS 200. Fluids and Tectonics	3
Total	11

ENVIRONMENTAL:

ENERGY 227. Enhanced Oil Recovery	3
GES 231. Contaminant Hydrogeology	4

Plus two out of the following courses:

ENERGY 240. Geostatistics	3-4
ENERGY 260. Environmental Problems in Petroleum Engineering	3
CEE 270. Movement, Fate, and Effect of Contaminants in Surface Water and Groundwater	3
CEE 273. Aquatic Chemistry	3
CEE 274A. Environmental Microbiology	3
GES 230. Physical Hydrogeology	4
Total	13-14

ENHANCED RECOVERY:

ENERGY 225. Theory of Gas Injection Processes	3
ENERGY 226. Thermal Recovery Methods	3
ENERGY 227. Enhanced Oil Recovery	3
Total	9

GEOSTATISTICS AND RESERVOIR MODELING:

ENERGY 240. Geostatistics for Spatial Phenomena	3-4
ENERGY 241. Practice of Geostatistics	3-4
GEOPHYS 182. Reflection Seismology	3
or GEOPHYS 262. Rock Physics	3
Total	9-11

GEOTHERMAL:

ENERGY 269. Geothermal Reservoir Engineering	3
or ENERGY 102. Renewable Energy Sources	3
CHEMENG 120B. Energy and Mass Transport	4
ME 131A. Heat Transfer	3
Total	10

RESERVOIR PERFORMANCE:

ENERGY 223. Reservoir Simulation	3-4
ENERGY 280. Oil and Gas Production Engineering	3
GEOPHYS 202. Reservoir Geomechanics	3
Total	9-11

SIMULATION AND OPTIMIZATION:

ENERGY 223. Reservoir Simulation	3-4
ENERGY 224. Advanced Reservoir Simulation	3
ENERGY 284. Optimization	3
Total	9-10

RENEWABLE ENERGY:

ENERGY 102. Renewable Energy Sources	3
ENERGY 293A. Fundamentals of Energy Processes	3-4
ENERGY 293B. Fundamentals of Energy Processes	3-4
Total	9-11

RESEARCH SEQUENCE

ENERGY 361. Master's Degree Research in Petroleum Engineering*	6
Total units required for M.S. degree	45

* Students choosing the company sponsored course-work-only for the M.S. degree may substitute an additional elective sequence in place of the research.

TECHNICAL ELECTIVES

Technical electives from the following list of advanced-level courses usually complete the M.S. program. In unique cases, when justified and approved by the adviser prior to taking the course, courses listed here may be substituted for courses listed above in the elective sequences.

ENERGY 130. Well Log Analysis	3
ENERGY 224. Advanced Reservoir Simulation	3
ENERGY 230. Advanced Topics in Well Logging	3
ENERGY 260. Environmental Aspects of Petroleum Engineering	3
ENERGY 267. Engineering Valuation and Appraisal of Oil and Gas Wells, Facilities and Properties	3
ENERGY 269. Geothermal Reservoir Engineering	3
ENERGY 273. Special Production Engineering Topics in Petroleum Engineering	1-3
ENERGY 280. Oil and Gas Production	3
ENERGY 281. Applied Mathematics in Reservoir Engineering	3
ENERGY 284. Optimization	3
ENERGY 301. The Energy Seminar	1
CME 204. Partial Differential Equations to Engineering	3
ENERGY 293A. Fundamentals of Energy Processes	3-4
ENERGY 293B. Fundamentals of Energy Processes	3-4
GEOPHYS 182. Reflection Seismology	3
GEOPHYS 190. Near Surface Geophysics	3
GEOPHYS 202. Reservoir Geomechanics	3

MASTER OF SCIENCE IN ENERGY RESOURCES ENGINEERING

The objective of the M.S. degree in Energy Resources Engineering is to prepare the student either for a professional career or for doctoral studies.

Students in the M.S. degree program must fulfill the following:

1. Complete a 45-unit program of study. The degree has two options:
   a. a course work degree, requiring 45 units of course work
   b. a research degree, of which a minimum of 39 units must be course work, with the remainder consisting of no more than 6 research units.
2. Course work units must be divided among two or more scientific and/or engineering disciplines and can include the core courses required for the Ph.D. degree.
3. All courses must be taken for a letter grade.
4. The program of study must be approved by the academic adviser and the department graduate program committee.
5. Students taking the research-option degree are required to complete an M.S. thesis, approved by the student's thesis committee.

RECOMMENDED COURSES AND SEQUENCES

The following list is recommended for most students. With the prior consent of the student's adviser, courses listed under technical electives may be substituted based on interest or background.

CORE SEQUENCE

ENGINEER IN PETROLEUM ENGINEERING OR ENERGY RESOURCES ENGINEERING

The objective of the Engineer degree program is to broaden training through additional work in engineering and the related sciences and by additional specialization.

Basic requirements include completion of 90 units of course work including 15 units of research (ENERGY 362), and including all course requirements of the department's master's degree (39 units, excluding research). If the candidate has received credit for research in the M.S. degree, this credit ordinarily would be transferable to the Engineer degree, in which case a total of 9 additional research units would be required. No more than 10 of the 90 required units can be applied to overcoming deficiencies in undergraduate training.

At least 30 units in Engineering and closely allied fields must be taken in advanced work, that is, work beyond the master's degree requirements and in addition to research (ENERGY 362). These may include courses from the Ph.D. degree list below or advanced-level courses from other departments with prior consent of the adviser. All courses must be taken for a letter grade. The student must have a grade point average (GPA) of at least 3.0 in courses taken for the degree of Engineer. A thesis based on 15 units of research must be submitted and approved by the adviser and one other faculty member.

DOCTOR OF PHILOSOPHY IN PETROLEUM ENGINEERING OR ENERGY RESOURCES ENGINEERING

The Ph.D. degree is conferred upon demonstration of high achievement in independent research and by presentation of the research results in a written dissertation and oral defense.

In addition to University and the Department of Energy Resources Engineering basic requirements for the doctorate, the Petroleum Engineering Ph.D. and Energy Resources Engineering Ph.D. degrees have the following requirements:

1. Students must complete a minimum of 36 course units and 54 research units (a total of 90 units) beyond the M.S. degree. At least half of the classes must be at a 200 level or higher and all must be taken for a letter grade. Students with an M.S. degree or other specialized training from outside ERE are generally expected to include ENERGY 221, 223, and 240, or their equivalents. The number and distribution of courses to be taken is determined with input from the research advisers and department graduate program committee.
2. To achieve candidacy (usually during or at the end of the first year of enrollment), the student must complete 24 units of letter-graded course work, develop a written Ph.D. research proposal, and choose a idissertation committee.
3. The research adviser(s) and two other faculty members comprise the dissertation reading committee. Upon completion of the dissertation, the student must pass a University oral examination in defense of the dissertation.
4. Complete 135 units of graduate work.
5. Act as a teaching assistant at least once, and enroll in ENERGY 359.

36 units of course work is a minimum; in some cases the research adviser may specify additional requirements to strengthen the student's expertise in particular areas. The 36 units of course work does not include required teaching experience (ENERGY 359) nor required research seminars. Courses must be taken for a letter grade, and a grade point average (GPA) of at least 3.25 must be maintained.

The dissertation must be submitted in its final form within five calendar years from the date of admission to candidacy. Candidates who fail to meet this deadline must submit an Application for Extension of Candidacy for approval by the department chair if they wish to continue in the program.

Ph.D. students entering the department are required to hold an M.S. degree in a relevant science or engineering discipline. Students wishing to follow the Ph.D. program in Petroleum Engineering must hold an M.S. degree (or equivalent) in Petroleum Engineering. Students following the Ph.D. program in Energy Resources Engineering must hold an M.S. degree (or equivalent), although it need not be in Energy Resources Engineering.

PH.D. DEGREE QUALIFICATION

The procedure for the Ph.D. qualification differs depending upon whether the student entered the department as an M.S. or Ph.D. student. In either case, previous written and oral exams have been replaced by a written Ph.D. proposal followed by a proposal defense.

For students who complete an M.S. in the Energy Resources Engineering Department at Stanford—In the second year of the M.S. degree program, the student formally applies to the Ph.D. program. The student is considered for admission to the Ph.D. program along with external applicants. The admission decision is based upon course work and research progress. During or before the third quarter as a Ph.D. student, generally corresponding to Spring Quarter in the third year at Stanford, the student must pass a

QUALIFYING EXAM by presenting a Ph.D. proposal to a committee of three faculty members. This entails a written document, including material such as a literature review or proposed work, and an oral presentation. Following the presentation, the student is questioned on the research topic and general field of study. The student can pass, pass with qualifications requiring more classes or teaching assistancies, or fail. A student who substantially changes topics between the M.S. and Ph.D. may ask their advisor to petition for an extra quarter before presenting the Ph.D proposal.

For students who enter directly into the Ph.D. program after receiving an M.S. from another university—After the second quarter at Stanford, a faculty committee evaluates the student's progress. If a student is found to be deficient in course work and/or research, a written warning is issued. After the third quarter, the faculty committee decides whether or not funding should be continued for the student. Students denied funding after the third quarter are advised against proceeding with the Ph.D. proposal, though the student may choose to proceed under personal funding. Before the end of their fourth quarter at Stanford (not counting Summer Quarter), continuing Ph.D. students must present a Ph.D. proposal as described above.

COURSE WORK

The 36 units of course work may include graduate courses in Energy Resources Engineering (numbered 200 and above) and courses chosen from the following list. Other courses may be substituted with prior approval of the adviser. In general, non-technical courses are not approved.

Students who enter directly into the Ph.D. program after receiving an M.S. degree from another university are expected to show expertise in the core courses required for Stanford's M.S. degree in Energy Resources Engineering, either by including those courses in their Ph.D. degree or by showing that they have taken equivalent courses during their M.S. degree.

For a Ph.D. in Energy Resources Engineering, 12 of the 36 required course units must be completed from the following list of courses. If the student has not taken ENERGY 293A,B or their equivalent during the M.S., then these courses must be taken during the Ph.D. (they will satisfy 6 of the required 12 units).

- ENERGY 104. Technology in the Greenhouse
- ENERGY 252. Chemical Kinetics Modeling
- ENERGY 253. Carbon Capture and Sequestration
- ENERGY 260. Modeling Uncertainty in the Earth Sciences
- ENERGY 269. Geothermal Reservoir Engineering
- ENERGY 291. Optimization of Energy Systems
- ENERGY 293A. Fundamentals of Energy Processes
- ENERGY 239B. Fundamentals of Energy Processes
- ENERGY 301. The Energy Seminar (may be repeated for credit no more than 3 times)

PH.D. MINOR IN PETROLEUM ENGINEERING OR ENERGY RESOURCES ENGINEERING

To be recommended for a Ph.D. degree with Petroleum Engineering or Energy Resources Engineering as a minor subject, a student must take 20 units of graduate-level lecture courses in the department. These courses must include ENERGY 221 and 222. The remaining courses should be selected from ENERGY 175, 223, 224, 225, 227, 240, 241, 251, 280, 281, and 284.

ENVIRONMENTAL EARTH SYSTEM SCIENCE

Chair: Scott Fendorf
Associate Chair: Kevin Arrigo
Professors: Kevin Arrigo, C. Page Chamberlain, Robert Dunbar, Scott Fendorf, Christopher Field,* Steven Gorelick, Eric Lambin,** Pamela Matson,** Rosamond Naylor **†
Assistant Professors: Karen Casciotti (effective Winter Quarter), Noah Diffenbaugh,** Christopher Francis, David Lobell,**† Leif Thomas
Courtesy Professors: Gregory Asner, Ken Caldeira, Peter Vitousek
Visiting Professors: Shemin Ge, Sally MacIntyre, John Melack, Alicia Wilson

* Joint appointment with Biology

** Joint appointment with Woods Institute for the Environment

† Joint appointment with the Freeman Spogli Institute for International Studies

Department Offices: Yang and Yamazaki Environment and Energy Building, Room 140
Phone: 650-721-5723
Mail Code: 94305-4216
Web Site: http://pangea.stanford.edu/eess

Courses offered by the Department of Environmental Earth System Science are listed under the subject code EESS on the *Stanford Bulletin's* ExploreCourses web site.

Environmental Earth System Science studies the planet's oceans, lands, and atmosphere as an integrated system, with an emphasis on changes occurring during the current period of overwhelming human influence, the Anthropocene. Faculty and students within the department use the principles of biology, chemistry, and physics to study problems involving processes occurring at the Earth's surface, such as climate change and global nutrient cycles, providing a foundation for problem solving related to environmental sustainability and global environmental change.

GRADUATE PROGRAMS IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The purpose of the master's program is to continue a student's training in one of the earth science disciplines and to prepare students for a professional career or doctoral studies.

The department's graduate coordinator, in coordination with the departmental faculty, appoints an academic adviser during registration with appropriate consideration of the student's background, interests, and professional goals. In consultation with the adviser, the student plans a program of course work for the first year. The student should select a thesis adviser within the first year of residence and submit to the thesis adviser a proposal for thesis research as soon as possible. The academic adviser supervises completion of the department requirements for the M.S. program as outlined below until the research proposal has been accepted; responsibility then passes to the thesis adviser. The student may change either thesis or academic advisers by mutual agreement and after approval of the graduate coordinator.

The University's requirements for M.S. degrees are outlined in the "Graduate Degrees" section of this bulletin. Additional departmental requirements include the following:

1. Completion of core course work: EESS 211. Fundamentals of Modeling; EESS 213. Spatial Statistics and Analysis for Environmental Data; EESS 215. Earth System Dynamics; EARTHSCI 300. Earth Sciences Seminar.
2. Enrollment in EESS 301. Topics in Environmental Earth System Science, each quarter during the academic year.
3. A minimum of 45 units of course work at the 100 level or above.
4. Half of the courses used to satisfy the 45-unit requirement must be intended primarily for graduate students, usually at the 200 level or above.
5. No more than 15 units of thesis research may be used to satisfy the 45-unit requirement.
6. Some students may be required to make up background deficiencies in addition to these basic requirements.
7. By the end of Winter Quarter of the first year in residence, a student must complete at least three courses taught by a minimum of two different department faculty members.
8. Serve as a teaching assistant in at least two quarters during their graduate career.

Each student must have a research adviser who is a faculty member in the department and is within the student's thesis topic area or specialized area of study. The faculty adviser is charged with designing the curriculum in consultation with the student specific to the research topic. Each student must complete a thesis describing his or her research. Thesis research should begin during the first year of study at Stanford and should be completed before the end of the second year of residence. Early during the thesis research period, and after consultation with the student, the thesis adviser appoints a second reader for the thesis who must be approved by the graduate coordinator; the thesis adviser is the first reader. The two readers jointly determine whether the thesis is acceptable for the M.S. degree in the department.

DOCTOR OF PHILOSOPHY IN ENVIRONMENTAL EARTH SYSTEM SCIENCE

The objectives of the doctoral program are to enable students to develop the skills needed to conduct original investigations in environmental and earth system sciences, to interpret the results, and to present the data and conclusions in a publishable manner. Graduates should develop strong communication skills and leadership skills with the ability to teach and communicate effectively with the public.

The University's requirements for the Ph.D. degree are outlined in the "Graduate Degrees" section of this bulletin. A summary of additional department requirements follows:

1. Completion of core course work: EESS 211. Fundamentals of Modeling; EESS 213. Spatial Statistics and Analysis for Environmental Data; EESS 215. Earth System Dynamics; EARTHSCI 300. Earth Sciences Seminar.
2. Enrollment in EESS 301. Topics in Environmental Earth System Science, each quarter during the academic year.
3. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different departmental faculty members.
4. Completion of required courses in their individual program or in their specialized area of study with a grade point average (GPA) of 3.0 (B) or higher, or demonstrate that they have completed the equivalents elsewhere.
5. Completion of a minimum of four letter grade courses of at least 3 units each from four different faculty members on the Academic Council in the University.
6. Serve as a teaching assistant in at least four quarters during their graduate career.
7. During Spring Quarter of each year, students must undergo an annual review by their thesis committee to allow the committee to monitor the progress of the student and make recommendations, where necessary.
8. Qualify for candidacy for the Ph.D. by the end of the sixth quarter in residence, excluding summers. Department procedures require selection of a faculty thesis adviser, preparation

of a written research proposal, approval of this proposal by the thesis adviser, selection of a committee for the Ph.D. qualifying examination, and approval of the membership by the graduate coordinator and chair of the department. The research examination consists of three parts: oral presentation of a research proposal; examination on the research proposal; and examination on subject matter relevant to the proposed research. The exam should take place prior to May 1 so that its outcome is known at the time of the annual spring evaluation of graduate students.

Upon qualifying for Ph.D. candidacy, the student and thesis adviser, who must be a department faculty member, choose a research committee that includes a minimum of two faculty members in the University in addition to the adviser. Annually, in the month of March or April, the candidate must organize a meeting of the full research committee to present a progress report covering the past year and provide expected goals for the coming year.

Under the supervision of the research advisory committee, the candidate must prepare a doctoral dissertation that is a contribution to knowledge and is the result of independent research; curriculum must also be developed with the supervision of the committee, which should be designed to provide a rigorous foundation for the research area. The format of the dissertation must meet University guidelines. The student is urged to prepare dissertation chapters that, in scientific content and format, are readily publishable.

The doctoral dissertation is defended in the University oral examination. The department appoints the research adviser and two other members of the research committee to be readers of the draft dissertation. The readers are charged to read the draft and to certify in writing to the department that it is adequate to serve as a basis for the University oral examination. Upon obtaining this written certification, the student is permitted to schedule the University oral examination.

GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Emeriti: (Professors) Robert Coleman, Robert R. Compton, Marco T. Einaudi, W. Gary Ernst,* John W. Harbaugh, James C. Ingle, Jr.,* Juhn G. Liou,* Ronald J. P. Lyon, Michael McWilliams, J. Michael Moldowan,* George A. Parks, Irwin Remson, Tjeerd H. Van Andel

Chair: Jonathan F. Stebbins

Associate Chair: Donald R. Lowe

Professors: Dennis K. Bird, Gordon E. Brown, Jr., Stephan A. Graham, Andre G. Journel,** Keith Loague, Donald R. Lowe, Gail A. Mahood, Elizabeth L. Miller, David D. Pollard, Jonathan F. Stebbins

Assistant Professors: George Hilley, Katherine Maher, Wendy Mao, Jonathan Payne, Jessica Warren

Professors (Research): Atilla Aydin, Martin J. Grove

Courtesy Professors: Page Chamberlain, Elizabeth Hadly, Simon L. Klemperer, Anders R. Nilsson, Alfred M. Spormann

Lecturers: Anne E. Egger, Bob Jones

Consulting Professors: Thomas L. Holzer, Jack J. Lissauer, Leslie B. Magoon, Mark S. Marley, Timothy R. McHargue, Kristian E. Meisling, Kenneth Peters

Consulting Associate Professor: Jorge A. Vazquez

Visiting Professors: Craig M. Bethke, Moonsup Cho, Knut Bertil Per Persson

* Recalled to active duty

** Joint appointment with Energy Resources Engineering

Department Offices: Braun Hall, Building 320

Mail Code: 94305-2115

Phone: (650) 723-0848

Web Site: http://ges.stanford.edu/

Courses offered by the Department of Geological and Environmental Sciences are listed under the subject code GES on the *Stanford Bulletin's* ExploreCourses web site.

The geological and environmental sciences are naturally interdisciplinary, and include: the study of earth materials, earth processes, and how they have changed over Earth's 4.56 billion year history. More specifically, courses and research within the department address: the chemical and physical makeup and properties of minerals, rocks, soils, sediments, and water; the formation and evolution of Earth and other planets; the processes that deform Earth's crust and shape Earth's surface; the stratigraphic, paleobiological, and geochemical records of Earth history including changes in climate, oceans, and atmosphere; present-day, historical, and long-term feedbacks between the geosphere and biosphere, and the origin and occurrence of our natural resources.

The department's research is critical to the study of natural hazards (earthquakes, volcanic eruptions, landslides, and floods), environmental and geological engineering, surface and groundwater management, the assessment, exploration, and extraction of energy, mineral and water resources, ecology and conservation biology, remediation of contaminated water and soil, geological mapping and land use planning, and human health and the environment.

A broad range of instrumentation for elemental and radiogenic/stable isotope analysis is available, including ion microprobe, electron microprobe, thermal and gas source mass spectrometry, inductively coupled plasma mass spectrometry and nuclear magnetic resonance. The Center for Materials Research and facilities at the SLAC National Accelerator Laboratory, Stanford Synchrotron Radiation Laboratory (SSRL), and the U.S. Geological Survey in nearby Menlo Park are also available for the department's research. Branner Library, devoted exclusively to the Earth Sciences, represents one of the department's most important resources. The department also maintains rock preparation (crushing, cutting, polishing), mineral separation, and microscopy facilities.

MISSION OF THE UNDERGRADUATE PROGRAM IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The purpose of the undergraduate program in Geological and Environmental Sciences is to provide students with a broad background in the fundamentals of the Earth sciences and the quantitative, analytical, and communications skills necessary to conduct research and think critically about questions involving the Earth. The major provides excellent preparation for graduate school and careers in geological and environmental consulting, land use planning, law, teaching, and other professions in which an understanding of the Earth and a background in science are important.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to develop and demonstrate:

1. an understanding of fundamental concepts in Earth science.
2. the ability to collect, analyze, and interpret geological and environmental data using a variety of techniques to test hypotheses.
3. the ability to address real geological and/or environmental problems in the field.
4. the ability to communicate scientific knowledge orally, visually, and in writing.

BACHELOR OF SCIENCE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The major consists of five interrelated components:

1. *Earth Sciences Fundamentals*—Students must complete a set of core courses that introduce the properties of Earth materials, the processes that change the Earth, and the timescales over which those processes act. These courses provide a broad

foundational knowledge that can lead to specialization in many different disciplines of the geological and environmental sciences.

2. *Quantitative and Analytical Skills*—Students must complete adequate course work in mathematics, chemistry, and physics or biology. In addition, they learn analytical techniques specific to the Earth sciences through the laboratory component of courses.
3. *Advanced Course Work and Research*—Students gain breadth and depth in upper-level electives and are encouraged to apply these skills and knowledge to problems in the Earth sciences through directed research.
4. *Field Research Skills*—Most GES courses include field trips and/or field-based projects. In addition, students must complete at least six weeks of field research through departmental offerings or through a faculty-directed field research project that involves learning and application of field techniques, field mapping, and the preparation of a written report.
5. *Communication Skills*—To fulfill the Writing in the Major requirement, students take a writing-intensive senior seminar (GES 150), in which they give both oral and written presentations that address current research in the earth sciences.

The major requires at least 77 units; letter grades are required in all courses if available. Students interested in the GES major should consult with the undergraduate program coordinator for information about options within the curriculum.

COURSE SEQUENCE (77-101 UNITS TOTAL)

CORE REQUIREMENT

Students are required to take all of the following (28-30 units):

Subject and Catalog Number	*Units*
GES 1A, 1B,or 1C.. Introduction to Geology	4-5
GES 4. Evolution and Extinction: Introduction to Historical Geology	4
GES 90. Introduction to Geochemistry	3-4
GES 102. Earth Materials: Introduction to Mineralogy	3
GES 102L. Introductory Mineralogy Laboratory	1
GES 103. Earth Materials: Rocks in Thin Section	3
GES 104. Earth Materials: Introduction to Petrology	3
GES 104L. Introductory Petrology Laboratory	1
GES 105. Introduction to Field Methods	3
GES 150. Senior Seminar: Issues in the Earth Sciences (WIM)	3
GES 190, other field course, or field research (see below for more information)	6

BREADTH IN THE DISCIPLINE REQUIREMENT

To gain understanding of the breadth of subject areas within the geological and environmental sciences, students are required to take one course from each of the following six groups (19-25 units).

Courses marked with an asterisk (*) are offered in alternate years.

ENVIRONMENTAL GEOLOGY AND SURFACE PROCESSES

The chemical and physical properties of the solid, aqueous, and gaseous phases comprising Earth's surface environment, their natural compositional variations and biogeochemical interactions, and the processes that affect their distribution and stability.

EESS 155. Science of Soils	4
GES 130. Soil Physics and Hydrology	3
GES 131. Hydrologically-Driven Landscape Evolution	3
GES 170. Environmental Geochemistry	4

STRUCTURAL GEOLOGY AND TECTONICS

The nature, description, and modeling of deformation of earth materials in response to tectonic forces. Processes of plate tectonics, mountain building, and sedimentary basin formation. The origin and evolution of geologic structures including folds, faults, fabrics, and fractures.

GES 110. Structural Geology and Tectonics	5
GES 111A. Fundamentals of Structural Geology	3

EARTH MATERIALS AND GEOCHEMISTRY

The materials that comprise the Earth and how they can be used to deduce geological processes over time. The fundamental chemical and geologic processes responsible for the abundance and distribution of elements and their isotopes.

GES 163. Introduction to Isotope Geochemistry	3
*GES 180. Igneous Processes	4
*GES 185. Volcanology	3-4
GES 107. Journey to the Center of the Earth	3

SEDIMENTARY SYSTEMS

The processes of weathering, erosion, transportation, and deposition, interpretation of depositional environments, the formation and evolution of sediments and sedimentary basins, and the evolution of sedimentary systems over geologic time.

GES 151.Sedimentary Geology and Petrology	4

BIOGEOSCIENCES

The origin and evolution of life on Earth, the influence of biological processes on Earth's surface environments, and the role of geological processes in shaping large-scale evolutionary patterns.

*GES 123. Paleobiology	3

GEOSPATIAL STATISTICS AND COMPUTER SCIENCE

Statistical techniques specific to the geosciences that facilitate analysis of three- and four-dimensional data; computer programming and modeling.

CS 106A. Programming Methodology	3-5
EESS 160. Statistical Methods for Earth and Environmental Sciences: General Introduction	3
EESS 161. Statistical Methods for Earth and Environmental Sciences: Geostatistics	3-4
EESS 164. Fundamentals of Geographic Information Science (GIS)	4
ENERGY 125. Modeling and Simulation for Geoscientists and Engineers	3
ENERGY 211. Computer Programming in C++ for Earth Scientists and Engineers	4
GEOPHYS 112. Exploring Geosciences with MATLAB	3
*GEOPHYS 140. Introduction to Remote Sensing	3

DEPTH IN THE DISCIPLINE REQUIREMENT (10 UNITS)

To allow students to go into greater depth in the major, students must complete at least 10 units of electives drawn primarily from the list above and other upper-level courses in GES (including graduate-level courses). Additional courses in Geophysics, EESS, and ERE may be counted towards the elective units if they allow a student to pursue a topic in depth; these options should be discussed with an adviser. A maximum of 3 elective units may be fulfilled by GES 192, 197, 198, or advanced seminars. Honors research (GES 199) may fulfill up to 4 elective units.

REQUIRED SUPPORTING MATHEMATICS (5-15 UNITS)

This requirement may also be fulfilled by Advanced Placement credit. Choose one of the following equivalent series:

MATH 19. Calculus	3
MATH 20. Calculus	3
MATH 21. Calculus	4
or	
MATH 41. Calculus	5
MATH 42. Calculus	5

Choose at least one of the following (the entire series is recommended for students who plan to pursue graduate studies in the sciences or engineering):

MATH 51. Multivariate Mathematics	5
MATH 52. Multivariate Mathematics	5
MATH 53. Multivariate Mathematics	5

REQUIRED SUPPORTING COGNATE SCIENCES (15-21 UNITS)

Advanced placement credit may be accepted for these courses as determined by the relevant departments.

CHEMISTRY

CHEM 31A,B. Chemical Principles I/II	8
or CHEM 31X. Chemical Principles	4
CHEM 135. Physical Chemical Principles	3
or CHEM 171. Physical Chemistry	3
or GES 171. Geochemical Thermodynamics	3

In addition to chemistry, students may choose between introductory sequences in biology and physics. This choice should be made after discussion with an adviser and based on a student's interests.

PHYSICS

Choose one of the following series:

PHYSICS 21. Mechanics and Heat	3
PHYSICS 22. Mechanics and Heat Lab	1
PHYSICS 23. Electricity and Optics	3
PHYSICS 24. Electricity and Optics Lab	1
or	
PHYSICS 41 (formerly 53). Mechanics	4
PHYSICS 45 (formerly 51). Light and Heat	4
PHYSICS 46 (formerly 52). Light and Heat Lab	1
or	
PHYSICS 41 (formerly 53). Mechanics	4
PHYSICS 43 (formerly 55). Electricity and Magnetism	3
PHYSICS 44 (formerly 56). Electricity and Magnetism Lab	1

BIOLOGY

BIO 41. Genetics, Biochemistry, and Molecular Biology	5
BIO 42. Cell Biology and Animal Physiology	5
or BIO 43. Plant Biology, Evolution, and Ecology	5
or BIO 101. Ecology	3

FIELD RESEARCH

Field research skills are a critical component of the undergraduate curriculum in GES. The conventional and most straightforward way for undergraduates to meet the field requirement is to take the two GES courses (GES 105 and GES 190) that are offered every year:

- GES 105, Introduction to Field Mapping, is a two-week introduction to field techniques and geologic mapping that is taught every year in the White Mountains of eastern California prior to the start of Autumn Quarter in September. This course gives students the tools to undertake geologic research in the field. GES 105 is required of all GES majors and is the framework upon which all subsequent undergraduate field-related instruction is based.
- GES 190, Research in the Field, gives GES undergraduates additional training in field research. This course provides undergraduates with a team-based experience of collecting data to answer research questions and is directed by faculty and graduate students. Offered in June and/or September.

By taking GES 105 and two iterations of GES 190, GES undergraduates develop the broad experience and confidence necessary to go out and evaluate a geological or environmental geology question by collecting field-based data. The main goal is that, upon graduation, GES undergraduates will be able to plan and execute independent field research.

It is also possible to customize GES 190 or substitute non-Stanford courses to allow flexibility in fulfilling the field requirement. One or two GES 190 requirements can be satisfied through customized courses with two possible approaches:

1. The first approach involves working on a project during the summer with a graduate student or professor. This may fulfill one GES 190 requirement. To receive credit for GES 190, a proposal must be filed at the end of Winter Quarter with the field program committee which evaluates it for suitability.
2. A second approach is to take a modified version of an existing field-based course such as Stanford at Sea/Australia/Hawaii. This may also fulfill one GES 190 requirement.

In both cases, to receive credit for GES 190, a proposal must be filed at the end of Winter Quarter with the field program committee which evaluates it for suitability. Students subsequently enroll in GES 190 with a specific instructor or their faculty mentor who evaluates the final report from the fieldwork.

GES 190 can also be satisfied by enrolling in a single four-to-six week geology field camp offered by another institution. This externally administered experience can substitute for two GES 190 courses, subject to approval by the Undergraduate Curriculum Committee.

COGNATE COURSES

Many courses offered within the School of Earth Sciences, as well as courses in other schools with a significant Earth sciences component, may be used in satisfaction of optional requirements for the Geological and Environmental Sciences degree. Undergraduates should discuss the options available to them with the undergraduate program coordinator; graduate students should discuss options with their advisers.

The following courses outside the School of Earth Sciences are particularly applicable:

- BIO 121. Biogeography
- BIO 136. Evolutionary Paleobiology
- BIOHOPK 182H. Stanford at Sea
- CEE 63. Weather and Storms
- CEE 64. Air Pollution: From Urban Smog to Global Change
- CEE 101A. Mechanics of Materials
- CEE 101B. Mechanics of Fluids
- CEE 101C. Geotechnical Engineering
- CEE 161A. Rivers, Streams, and Canals
- CEE 164. Introduction to Physical Oceanography
- CEE 166A. Watersheds and Wetlands
- CEE 173A. Energy Resources

HONORS PROGRAM

The honors program provides an opportunity for year-long independent study and research on a topic of special interest, culminating in a written thesis. Students select research topics in consultation with the faculty adviser of their choosing. Research undertaken for the honors program may be of a theoretical, field, or experimental nature, or a combination of these approaches. The honors program is open to students with a GPA of at least 3.5 in GES courses and 3.0 in all University course work. Modest financial support is available from several sources to help defray laboratory and field expenses incurred in conjunction with honors research. Interested students must submit an application, including a research proposal, to the department by the end of their junior year.

Upon approval of the research proposal and entrance to the program, course credit for the honors research project and thesis preparation is assigned by the student's faculty adviser within the framework of GES 199; the student must complete a total of 9 units over the course of the senior year. Up to 4 units of GES 199 may be counted towards the elective requirement, but cannot be used as a substitute for regularly required courses.

Both a written and oral presentation of research results are required. The thesis must be read, approved, and signed by the student's faculty adviser and a second member of the faculty. In addition, honors students must participate in the GES Honors Symposium in which they present their research to the broader community. Honors students in GES are also eligible for the Firestone medal, awarded by Undergraduate Advising and Research for exceptional theses.

ENGINEERING GEOLOGY AND HYDROGEOLOGY UNDERGRADUATE SPECIALIZED CURRICULUM

The Engineering Geology and Hydrogeology curriculum is intended for undergraduates interested in the application of geological and engineering data and principles to the study of rock, soil, and water to recognize and interpret geological and environmental factors affecting engineering structures and groundwater resources. Students learn to characterize and assess the risks associated with natural geological hazards, such as landslides and earthquakes, and with groundwater flow and contamination. The curriculum prepares students for graduate programs and professional careers in engineering, environmental geology, geology, geotechnical engineering, and hydrogeology. Students interested in this curriculum should contact a faculty adviser: Professor Loague, Pollard, or Hilley.

GES majors who elect the Engineering Geology and Hydrogeology curriculum are expected to complete a core course sequence and a set of courses in supporting sciences and mathematics. The core courses come from Earth Sciences and Engineering. Any substitutions for core courses must be approved by the faculty adviser and through a formal petition to the undergraduate program director. In addition, four elective courses, consistent with the core curriculum and required of all majors, are to be chosen with the advice and consent of the adviser. Typically, electives are chosen from the list below. Letter grades are required if available.

COURSE SEQUENCE (90-101 UNITS TOTAL)

REQUIRED GEOLOGICAL AND ENVIRONMENTAL SCIENCES (36-38 UNITS)

Subject and Catalog Number	*Units*
GES 1A,B,C. Introduction to Geology	4-5
GES 102. Earth Materials	5
GES 111A. Fundamentals of Structural Geology	3
GES 115. Engineering Geology Practice	3
EESS 164. Fundamentals of GIS	4
GES 150. Senior Seminar: Issues in the Earth Sciences (WIM)	3
EESS 160. Statistical Methods for Earth and Environmental Sciences: General Introduction	4
or EESS 161. Statistical Methods for the Earth and Environmental Sciences: Geostatistics	3-4
EESS 220. Physical Hydrogeology	4
GEOPHYS 190. Applied Geophysical Methods	3

REQUIRED ENGINEERING (20 UNITS)

CEE 101A. Mechanics of Materials	4
CEE 101B. Mechanics of Fluids	4
CEE 101C. Geotechnical Engineering	4
CS 106A. Programming Methodology	5
ENGR 14. Applied Mechanics: Statics	3

REQUIRED SUPPORTING SCIENCES AND MATHEMATICS (23-27 UNITS)

CHEM 31A,B. Chemical Principles I/II	8
or CHEM 31X. Chemical Principles	4
MATH 51. Multivariate Mathematics	5
MATH 52. Multivariate Mathematics	5
MATH 53. Multivariate Mathematics	5
PHYSICS 41. Mechanics	4

SUGGESTED ELECTIVES (11-16 UNITS)

Choose four courses from the following list or, with faculty approval, four related courses:

CEE 101D. Computations in Civil and Environmental Engineering	3
CEE 180. Structural Analysis	4
CEE 270. Movement, Fate, and Effects of Contaminants in Surface Waters and Groundwater	3
CEE 293. Foundation Engineering	3
CEE 296. Experimental Soil Mechanics	2
EESS 221. Contaminant Hydrogeology	4
ENGR 30. Engineering Thermodynamics	3
ENGR 50. Introductory Science of Materials	4
GEOPHYS 112. Exploring Geosciences with MATLAB	1-3
GES 111B. Fundamentals of Structural Geology	3
GES 130. Soil Physics and Hydrology	3
GES 131. Hydrologically-Driven Landscape Evolution	3
GES 217. Characterization and Hydraulics of Rock Fracture	3
GES 237. Surface and Near-Surface Hydrologic Response	3
MATH 103. Matrix Theory and its Applications	3
MATHSCI 151. Microstructure and Mechanical Properties	3-4
ME 80. Strength of Materials	3

MINOR IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The minor in GES consists of a small set of required courses plus 12 elective units. A wide variety of courses may be used to satisfy these elective requirements.

REQUIRED COURSES

GES 1A, 1B, or 1C. Introduction to Geology	4-5
GES 4. Evolution and Extinction: Introduction to Historical Geology	4
GES 102. Earth Materials: Introduction to Mineralogy	3
GES 104. Earth Materials: Introduction to Petrology	3

ELECTIVES (12 UNITS)

Students must take a minimum of 12 additional units drawn primarily from the Breadth in the Discipline list in the GES major; a majority of units must be from classes within the GES department. Up to 3 units of Stanford Introductory Seminars in GES may be counted.

Students pursuing a minor in GES are encouraged to participate in the senior seminar (GES 150) and in field research (GES 105).

COTERMINAL B.S. AND M.S. DEGREES IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The coterminal B.S./M.S. program offers students the opportunity to pursue graduate research and an M.S. degree concurrently with or subsequent to their B.S. studies. The M.S. degree can serve as an entrance to a professional degree in subdisciplines within the Earth sciences such as engineering geology and environmental geology, or to graduate course work and research as an intermediate step in pursuit of the Ph.D. Regardless of professional goals, coterminal B.S./M.S. students are treated as members of the graduate community and are expected to meet all of the standards set for regular M.S. students. Applicants must have earned no fewer than 120 units toward graduation, and must submit their application no later than the quarter prior to the expected completion of their undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. The application includes a statement of purpose, a current Stanford transcript, official Graduate Record Examination (GRE) scores, letters of recommendation from two members of the Stanford faculty (at least one of whom must be in the GES department), and a list of courses in which they intend to enroll to fulfill the M.S. degree requirements. Specific research interests should be noted in the statement of purpose and discussed with a member of the GES faculty prior to submission of the application. Coterminal students must complete a thesis describing research results.

The University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, also see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

Students must meet all requirements for both the B.S. and M.S. degrees. Students may either:

1. complete 180 units required for the B.S. degree and then complete three full-time quarters (45 units at the 100-level or above) for the M.S. degree
2. *or*. complete a total of fifteen quarters during which the requirements of the two degrees are fulfilled concurrently.

At least half of the courses used to satisfy the 45-unit requirement must be designated as being primarily for graduate students, normally at the 200-level or above. No more than 15 units of thesis research may be used to satisfy the 45-unit requirement. Further information about this program may be obtained from the GES office.

GRADUATE PROGRAMS IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Graduate Studies in the Department of Geological and Environmental Sciences (GES) involve academic course work and independent research. Students are prepared for careers as professional scientists in research, education, or the application of the earth sciences to mineral, energy, and water resources. Programs lead to the M.S., Engineer, and Ph.D. degrees. Course programs in the areas of faculty interest are tailored to the student's needs and interests with the aid of his or her research adviser. Students are encouraged to include in their program courses offered in other departments in the School of Earth Sciences as well as in other departments in the University. Diplomas designate degrees in Geological and Environmental Sciences and may also indicate the following specialized fields of study: Geostatistics and Hydrogeology.

Admission—For admission to graduate work in the department, the applicant must have taken the Aptitude Test (verbal, quantitative, and analytical writing assessment) of the Graduate Record Examination. In keeping with University policy, applicants whose first language is not English must submit TOEFL (Test of English as a Foreign Language) scores from a test taken within the last 18 months. Individuals who have completed a B.S. or two-year M.S. program in the U.S. or other English-speaking country are not required to submit TOEFL scores. Previously admitted students who wish to change their degree objective from M.S. to Ph.D. must petition the GES Admissions Committee.

MASTER OF SCIENCE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Objectives—The purpose of the master's program in Geological and Environmental Sciences is to continue a student's training in one of a broad range of earth science disciplines and to prepare students for either a professional career or doctoral studies.

Procedures—The graduate coordinator of the department appoints an academic adviser during registration with appropriate consideration of the student's background, interests, and professional goals. In consultation with the adviser, the student plans a program of course work for the first year. The student should select a thesis adviser within the first year of residence and submit to the thesis adviser a proposal for thesis research as soon as possible. The academic adviser supervises completion of the department requirements for the M.S. program (as outlined below) until the research proposal has been accepted; responsibility then passes to the thesis adviser. The student may change either thesis or academic advisers by mutual agreement and after approval of the graduate coordinator.

Requirements—The University's requirements for M.S. degrees are outlined in the "Graduate Degrees" section of this bulletin. Practical training (GES 385) may be required by some programs, with adviser approval, depending on the background of the student. Additional department requirements include the following:

1. A minimum of 45 units of course work at the 100 level or above.
   a. Half of the courses used to satisfy the 45-unit requirement must be intended as being primarily for graduate students, usually at the 200 level or above.
   b. No more than 15 units of thesis research may be used to satisfy the 45-unit requirement.
   c. Some students may be required to make up background deficiencies in addition to these basic requirements.
2. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different GES faculty members.
3. Each student must have a research adviser who is a faculty member in the department and is within the student's thesis topic area or specialized area of study.
4. Each student must complete a thesis describing his or her research. Thesis research should begin during the first year of study at Stanford and should be completed before the end of the second year of residence.
5. Early during the thesis research period, and after consultation with the student, the thesis adviser appoints a second reader for the thesis, who must be approved by the graduate coordinator; the thesis adviser is the first reader. The two readers jointly determine whether the thesis is acceptable for the M.S. degree in the department.

ENGINEER DEGREE IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

The Engineer degree is offered as an option for students in applied disciplines who wish to obtain a graduate education extending beyond that of an M.S., yet do not have the desire to conduct the research needed to obtain a Ph.D. A minimum of two years (six quarters) of graduate study is required. The candidate must complete 90 units of course work, no more than 10 of which may be applied to overcoming deficiencies in undergraduate training. The student must prepare a substantial thesis that meets the approval of the thesis adviser and the graduate coordinator.

DOCTOR OF PHILOSOPHY IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Objectives—The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship, high attainment in a particular field of knowledge, and the ability to conduct independent research. To this end, the objectives of the doctoral program are to enable students to develop the skills needed to conduct original investigations in a particular discipline or set of disciplines in the earth sciences, to interpret the results, and to present the data and conclusions in a publishable manner.

Requirements—The University's requirements for the Ph.D. degree are outlined in the "Graduate Degrees" section of this bulletin. Practical training (GES 385) may be required by some programs, with adviser approval, depending on the background of the student. A summary of additional department requirements is presented below:

1. Ph.D. students must complete the required courses in their individual program or in their specialized area of study with a grade point average (GPA) of 3.0 (B) or higher, or demonstrate that they have completed the equivalents elsewhere. Ph.D. students must complete a minimum of four letter-grade courses of at least 3 units each from four different faculty members on the Academic Council in the University. By the end of Winter Quarter of their first year in residence, students must complete at least three courses taught by a minimum of two different GES faculty members.
2. Each student must qualify for candidacy for the Ph.D. by the end of the sixth quarter in residence, excluding summers. Department procedures require selection of a faculty thesis adviser, preparation of a written research proposal, approval of this proposal by the thesis adviser, selection of a committee for the Ph.D. qualifying examination, and approval of the mem-

bership by the graduate coordinator and chair of the department. The research examination consists of three parts: oral presentation of a research proposal, examination on the research proposal, and examination on subject matter relevant to the proposed research. The exam should be scheduled prior to May 1, so that the outcome of the exam is known at the time of the annual spring evaluation of graduate students.

3. Upon qualifying for Ph.D. candidacy, the student and thesis adviser, who must be a department faculty member, choose a research committee that includes a minimum of two faculty members in the University in addition to the adviser. Annually, in the month of March or April, the candidate must organize a meeting of the research committee to present a brief progress report covering the past year.
4. Under the supervision of the research advisory committee, the candidate must prepare a doctoral dissertation that is a contribution to knowledge and is the result of independent research. The format of the dissertation must meet University guidelines. The student is strongly urged to prepare dissertation chapters that, in scientific content and format, are readily publishable.
5. The doctoral dissertation is defended in the University oral examination. The research adviser and two other members of the research committee are determined to be readers of the draft dissertation. The readers are charged to read the draft and to certify in writing to the department that it is adequate to serve as a basis for the University oral examination. Upon obtaining this written certification, the student is permitted to schedule the University oral examination.

PH.D. MINOR IN GEOLOGICAL AND ENVIRONMENTAL SCIENCES

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in Geological and Environmental Sciences must complete, with a GPA of 3.0 (B) or better, 20 units in the geosciences in lecture courses intended for graduate students. The selection of courses must be approved by the student's GES adviser and the department chair.

GEOPHYSICS

Emeriti: Jon Claerbout, Antony Fraser-Smith,* Robert Kovach, Amos Nur, George A. Thompson
Chair: Greg Beroza
Associate Chair: Biondo Biondi
Professors: Greg Beroza, Biondo Biondi, Jerry M. Harris, Simon Klemperer, Rosemary J. Knight, Joan Roughgarden,** Paul Segall, Norman H. Sleep, Howard Zebker,* Mark D. Zoback
Assistant Professors: Eric Dunham, Jesse Lawrence
Professor (Research): Gerald M. Mavko
Courtesy Professors: Stephan A. Graham, Wendy Mao, David D. Pollard
Consulting Professors: James Berryman, Dimitri Bevc, Jonathan Glen, Antoine Guitton, Peter Hennings, Shuki Ronen
Consulting Associate Professor: Stewart Levin
Cox Visiting Professor: Lee Slater
Visiting Assistant Professor: Adam Pidlisecky
Senior Research Scientists: Robert Clapp, Jack Dvorkin, Tiziana Vanorio
Research Associate: Youli Quan

* Joint appointment with Electrical Engineering
** Joint appointment with Biological Sciences

Department Offices: Mitchell Building, Third Floor
Mail Code: 94305-2215
Phone: (650) 724-3293
Email: tilich@stanford.edu
Web Site: http://pangea.stanford.edu/GP

Courses offered by the Department of Geophysics are listed under the subject code GEOPHYS on the *Stanford Bulletin's* ExploreCourses web site.

Geophysics is the branch of Earth science concerned with exploring and analyzing active processes of the Earth through physical measurement. The undergraduate and graduate programs are designed to provide a background of fundamentals in science, and courses to coordinate these fundamentals with the principles of geophysics. The program leading to the Bachelor of Science (B.S.) in Geophysics permits many electives and a high degree of flexibility for each student. Graduate programs provide specialized training for professional work in resource exploration, research, and education, and lead to the degrees of Master of Science and Doctor of Philosophy.

The Department of Geophysics is housed in the Ruth Wattis Mitchell Earth Sciences Building. It has numerous research facilities, among which are a state-of-the-art broadband seismic recording station, high pressure and temperature rock properties and rock deformation laboratories, various instruments for field measurements including seismic recorders, nine dual frequency GPS receivers, and field equipment for measuring in-situ stress at great depth. Current research activities include crustal deformation; earthquake seismology and earthquake mechanics; reflection, refraction, and tomographic seismology; rock mechanics, rock physics; seismic studies of the continental lithosphere; remote sensing; environmental geophysics; and synthetic aperture radar studies.

MISSION OF THE UNDERGRADUATE PROGRAM IN GEOPHYSICS

The mission of the undergraduate program in Geophysics is to expose students to a broad spectrum of geophysics, including resource exploration, environmental geophysics, seismology, and tectonics. Students in the major obtain a solid foundation in the essentials of mathematics, physics, and geology, and build upon that foundation with advanced course work in Geophysics to develop the in-depth knowledge they need to pursue advanced graduate study and professional careers in government or the private sector.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. understand the physics and geology that form the basis for geophysical observation and measurement.
2. understand Earth structure and evolution.
3. identify the physical processes governing the behavior of common geophysical systems.
4. be able to explain the principles of applying geophysical methods to societally relevant problems, including natural hazards, resource exploration and management, and environmental issues.
5. be able to quantitatively describe the behavior of natural systems and the principles of geophysical measurement with physics-based mathematical models.
6. investigate these models by solving the governing equations with a combination of analytical and computational methods.
7. make their own observations with a variety of geophysical instruments, and reduce, model, and interpret their data and uncertainties
8. effectively communicate their scientific knowledge through written and oral presentations
9. be able to interpret and evaluate the published literature and oral and poster presentations at national meetings.

GRADUATE PROGRAMS IN GEOPHYSICS

University requirements for the M.S. and Ph.D. are described in the "Graduate Degrees" section of this bulletin. Lecture course units applied to graduate degree program requirements must be taken for a letter grade if the course is offered for a letter grade.

Transfer Credit—An incoming student with a relevant Master of Science degree may apply for a departmental waiver of up to 12

units of the 30 lecture units required for the Ph.D. degree (see the "Doctor of Philosophy in Geophysics" section of this Bulletin), for certain courses as approved by the Departmental Graduate Faculty Adviser. Credit for courses generally requires that students identify an equivalent Stanford course and obtain the signature of the Stanford faculty responsible for that course, stating its equivalence.

BACHELOR OF SCIENCE IN GEOPHYSICS

The following courses are required for the B.S. degree in Geophysics. A written report on original research or an honors thesis is also required through participation in two or three quarters of GEOPHYS 185, Research Seminar Series, typically during the senior year. The departmental program proposal form can be downloaded at http://geo.stanford.edu/GP/undergraduate/major.html. Seniors in Geophysics who expect to do graduate work should take the Graduate Record Examination (GRE) early in their final undergraduate year.

CURRICULUM

GEOPHYSICS CORE COURSES (24-26 UNITS)

Students must take all of the following:

- GEOPHYS 110. Earth in the Balance: Introduction to Geophysics, 3 units
- GEOPHYS 120. Ice, Water, Fire, 3 units
- GEOPHYS 130. Introductory Seismology, 3 units
- GEOPHYS 150. Geodynamics: Our Dynamic Earth , 3 units
- GEOPHYS 160. Introduction to SES Computing, 2 units
  or equivalent knowledge
- GEOPHYS 190. Geophysical Field Methods, 3 units
- GEOPHYS 199. Senior Seminar (WIM), 3 units
- GEOPHYS 200. Undergraduate Research, 5 units
- GEOPHYS 201. Frontiers of Geophysical Research, 1 unit

GEOPHYSICS BREADTH COURSES (12-14 UNITS)

Choose four upper-level courses, one from each of the following four areas:

1. Resources, hazards, and the environment
   - GEOPHYS 182. Reflection Seismology, 3 units
   - GEOPHYS 183. Reflection Seismology Interpretation, 3 units
   - GEOPHYS 185. Rock Physics, 3 units
   - ENERGY 120. Fundamentals of Petroleum Engineering, 3 units
   - GES 131. Hydrologically-Driven Landscape Evolution, 3 units
2. Whole-earth Geophysics
   - GEOPHYS 184. Journey to the Center of the Earth, 3 units
   - GEOPHYS 140. Introduction to Remote Sensing , 3 units
   - GEOPHYS 170. Global Tectonics, 3 units
   - GEOPHYS 186. Tectonophysics, 3 units
3. Numerical and computational methods
   - GEOPHYS 180. Geophysical Inverse Problems, 3 units
   - GEOPHYS 187. Environmental Soundings Image Estimation, 3 units
   - CME 200. Linear Algebra with Applications to Engineering Computations, 3 units
   - CME 204. Partial Differential Equations in Engineering, 3 units
   - CME 206. Introduction to Numerical Methods for Engineering, 3 units
   - CME 211. Computer Programming in C++ for Earth Scientists and Engineers, 3 units
   - EE 102A. Signal Processing and Linear Systems I, 4 units
   - ENERGY 160. Modeling Uncertainty, 3 units
4. Geophysical fluid dynamics
   - GEOPHYS 181. Fluids and Flow, 3 units
   - CEE 164. Introduction to Physical Oceanography, 4 units
   - EESS 146A. Atmosphere, Ocean, and Climate Dynamics: Atmospheric Circulation, 3 units
   - EESS 220. Physical Hydrogeology, 4 units
   - ENERGY 121. Fundamentals of Multiphase Flow, 3 units
   - GES 130. Soil Physics and Hydrogeology, 3 units

SUPPORTING MATHEMATICS COURSES

Students must take all of the following (15-20 units):

- CME 100. Vector Calculus for Engineers, 5 units
- CME 102. Ordinary Differential Equations for Engineers, 5 units
- CME 104. Linear Algebra and Partial Differential Equations for Engineers, 5 units
- (MATH 51 (recommended: 51M), 52, and 53 plus one of CME 104, CME 108, or GEOPHYS 112 may substitute for the CME series)

SUPPORTING SCIENCE COURSES

Students must take all of the following (16-25 units):

- GES 1A, B, or C Introduction to Geology, 4-5units
- CHEM 31A,B Chemical Principles I & II 8
  or CHEM 31X Chemical Principles, 4 units
  or a score of 4-5 on the Chemistry AP exam
- PHYSICS 41. Mechanics, 4 units
- PHYSICS 43. Electricity and Magnetism, 4 units
- PHYSICS 45. Light and Heat, 4 units
- plus one additional PHYSICS class (4 units)
- PHYSICS 110. Intermediate Mechanics, 4 units
  or PHYSICS 120. Intermediate Electricity & Magnetism , 4 units
  or CEE 101A. Mechanics of Materials, 4 units
  or EE 141. Engineering Electromagnetics, 4 units
  or ME 80. Mechanics of Deformable Bodies, 4 units
- plus one additional approved geology class (4 units) typically chosen from among:
  - GES 102. Earth Materials: Mineralogy, 3 units
  - GES 110. Structural Geology and Tectonics, 5 units
  - GES 111A. Structural Geology and Rock Mechanics, 3 units
  - GES 151. Sedimentary Geology, 4 units

HONORS PROGRAM

The department offers a program leading to the B.S. degree in Geophysics with honors. The guidelines are:

1. Select a research project, either theoretical, field, or experimental, that has the approval of an adviser.
2. Submit a proposal to the department, which decides on its suitability as an honors project. Necessary forms are in the department office.
3. Course credit for the project is assigned by the adviser within the framework of GEOPHYS 205.
4. The decision whether a given independent study project does or does not merit an award of honors is made jointly by the department and the student's adviser. This decision is based on the quality of both the honors work and the student's other work in Earth sciences.
5. The work done on the honors program cannot be used as a substitute for regularly required courses.

MINOR IN GEOPHYSICS

The Geophysics minor provides students with a general knowledge of Geophysics in addition to a background in the related fields of physics, mathematics, and geology. The minor consists of one required class (8 units), two electives (6 units), and prerequisites in mathematics and physics. Minors require no fewer than 20 units and no more than 36 units. The departmental program proposal form can be downloaded from http://geo.stanford.edu/GP/undergraduate/major.html.

CURRICULUM

1. GEOPHYS 110

2. Three additional approved upper-level (100 or higher) Geophysics lecture courses, typically chosen from GEOPHYS 120, 130, 140, 150, 170, 184, 190
3. Supporting science:
   a. PHYSICS 20 series (21,22,23,24), *or* 41 and either 43 or 45
   b. GES 1A or 1B or 1C
   c. CME 100 or MATH 51

COTERMINAL B.S./M.S. PROGRAM IN GEOPHYSICS

The Department offers a coterminal M.S. degree for students wishing to obtain more specialized training in Geophysics than is normally possible during study for the B.S. degree alone. An M.S.degree should be considered as the professional degree in Geophysics, and is aimed at students wishing to work in a related industry, or students desiring more focused academic study in the field than the B.S. program allows.

The coterminal M.S. degree in Geophysics is offered in conjunction with any relevant undergraduate program at Stanford. Geophysics students often enter the department with degrees in Earth sciences, mathematics, physics, chemistry, or other natural science or engineering fields. Any of these are suitable for the coterminal Geophysics program, and interested students are encouraged to discuss their own background with a Geophysics faculty member.

The requirements for entry into the coterminal M.S. program are submission of a transcript, a statement of purpose, and at least one letter of recommendation. Applications with a letter of recommendation from a Geophysics faculty are generally considered the strongest. Additional letters from other academic or work-related persons also strengthen the application. There are no specific GPA requirements for entry, but the Department looks for proven performance in a rigorous undergraduate curriculum as a prerequisite for admission.

Undergraduates with at least junior-level standing may apply, and applications should be submitted by the Autumn Quarter of the senior year. The graduation requirements to obtain the degree are identical to those for the regular Geophysics master's degree. Contact the Department of Geophysics student services officer for additional information.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF SCIENCE IN GEOPHYSICS

Objectives—To enhance the student's training for professional work in geophysics through the completion of fundamental courses, both in the major fields and in related sciences, and to begin independent work and specialization.

Requirements for the Degree—The candidate must complete 45 units from the following groups of courses:

1. Complete 15 units of Geophysics lecture courses with at least 9 units numbered 200 or higher.
2. Complete six units numbered 100 or higher and three units of 200-level, non-Geophysics lecture courses in earth sciences.
3. Complete one to four electives selected from courses numbered 100 or higher from mathematics, chemistry, engineering, physics, relevant biology, computer science, ecology, hydrology, or earth science. At least one course must be numbered 200 or higher.
4. At least 9, but not more than 18, of the 45 units must be independent work on a research problem resulting in a written report accepted and archived by the candidate's faculty adviser. Normally, this research is undertaken as part of the candidate's participation in multiple quarters of research seminar (GEOPHYS 385 series). A summer internship is encouraged as a venue for research, but no academic credit is given.
5. Submit a program proposal for approval by a faculty adviser in the first quarter of enrollment.
6. Each candidate must present and defend the results of his or her research at a public oral presentation attended by at least two faculty members; and turn in a thesis/report to adviser.
7. Students are required to attend department seminars.

DOCTOR OF PHILOSOPHY IN GEOPHYSICS

Objectives—The Ph.D. degree is conferred upon evidence of high attainment in Geophysics and ability to conduct an independent investigation and present the results of such research.

Requirements for the Degree—A minimum of 135 units of graduate study at Stanford must be satisfactorily completed. Required courses must be taken for a letter grade, if offered. Students are required to attend the department seminars, and to complete sufficient units of independent work on a research problem to meet the 135-unit University requirement. 12 units must be met by participation in the GEOPHYS 385 series, or equivalent series in other departments with approval of the adviser and graduate coordinator. Students are encouraged to participate in the GEOPHYS 385 series from more than one faculty member or group and relevant equivalent series in other departments. Students with a Master's degree may waive up to 12 units for approved courses.

ENGR 102W/202W, Technical Writing, is recommended but not required.

The student's record must indicate outstanding scholarship, and deficiencies in previous training must be removed. Experience as a teaching assistant (quarter-time for at least two academic quarters) is required for the Ph.D. degree. For more information, see the *Geophysics Administrative Guide*, section 1.4.1.

The student must pass the departmental oral examination by the end of the sixth academic quarter (third academic quarter for students with an M.S. degree); prepare under faculty supervision a dissertation that is a contribution to knowledge and the result of independent work expressed in satisfactory form; and pass the University oral examination.

The Ph.D. dissertation must be submitted in its final form within five calendar years from the date of admission to candidacy. Upon formal acceptance into a research group, the student and faculty adviser form a supervising committee consisting of at least three members who are responsible for overseeing satisfactory progress toward the Ph.D. degree. At least two committee members must be Geophysics faculty members. The committee conducts the department oral examination, and meets thereafter annually with the student to review degree progress. The Geophysics faculty monitors progress of all students who have not yet passed their department oral examination by carrying out an annual performance appraisal at a closed faculty meeting.

Course requirements—

1. *Geophysics**—12 units, lecture courses numbered 200 and above, from 4 different Geophysics faculty with different research specializations
2. *Additional Geophysics*—3 units, lecture courses numbered 150 and above
3. *School of Earth Sciences (non-Geophysics)*—3 units, lecture courses numbered 100 or above
4. *Mathematics (numbered 100 or above), Science, and Engineering (non-School of Earth Sciences)*—6 units, lecture courses numbered 200 or above
5. *Any of the above categories*—6 units, lecture courses numbered 200 or above
6. *Total:* 30 units

* These units marked cannot be waived.

Ph.D. Department Examination Requirement—

1. One research proposal (10-20 pages) with a completed component that outlines a plan of research for 2 -3 years

2. Second scientific proposal or paper (4-10 pages) with a professor in another area
3. An oral presentation with the student's advising committee on both the research proposal (~30-40 min) and the second proposal/paper (~10 min), with questions by the committee constituting the qualifying exam

The purpose of the second research project is to add breadth to Ph.D. study, and give the student the ability and confidence to teach or advise work in multiple areas. Both research projects must be in Geophysics or related disciplines. The two projects should be clearly distinct: neither the same methodology applied to two different datasets, nor two distinct methodologies applied to the same fundamental problem. The second project should clearly stand alone as a separate piece of work. The two projects must be supervised by different faculty in separate research groups, except in rare cases, as approved by the departmental graduate faculty adviser. The quality of each research project should be consistent with publication of a short journal article (typically achieved by additional work beyond the qualifying exam); although occasionally an extensive term paper deserving of presentation to the second project research group may be approved. The expected level of work on the second project should be about one academic quarter of full time effort.

SCHOOL OF EDUCATION

Emeriti: (Professors) J. Myron Atkin, John Baugh, Edwin M. Bridges, Robert C. Calfee, Larry Cuban, Elliot W. Eisner, James Greeno, Michael W. Kirst, Henry M. Levin, Richard Lyman (President emeritus), James G. March, William F. Massy, Milbrey McLaughlin, Nel Noddings, Ingram Olkin, Denis C. Phillips, Thomas Rohlen, Richard J. Shavelson, Lee S. Shulman, George D. Spindler, Myra H. Strober, Carl E. Thoresen, David B. Tyack, Decker F. Walker, Hans Weiler
Dean: Deborah J. Stipek
Associate Dean for Faculty Affairs: Edward Haertel (on leave)
Interim Associate Dean for Faculty Affairs, 2010-11: Francisco O. Ramirez
Associate Dean for Student Affairs: Eamonn Callan
Senior Associate Dean for Administration: Stephen Olson
Associate Dean for External Relations: Rebecca T. Smith
Assistant Dean for Academic Services: Priscilla Fiden
Assistant Dean for Information Technology and CTO: Paul Kim
Professors: Arnetha Ball, Joanna Boaler, Hilda Borko, Eamonn Callan, Martin Carnoy, Geoffrey Cohen, William Damon, Linda Darling-Hammond, Claude Goldenberg, Pamela Grossman, Patricia J. Gumport, Edward Haertel, Kenji Hakuta, Connie Juel, John D. Krumboltz, David F. Labaree, Susanna Loeb, Teresa D. LaFromboise, Raymond P. McDermott, Jonathan Osborne, Amado M. Padilla, Roy Pea, Walter Powell, Francisco O. Ramirez, Daniel Schwartz, Deborah J. Stipek, Guadalupe Valdés, John Willinsky, Sam Wineburg
Associate Professors: H. Samy Alim, Anthony L. Antonio, Brigid J. Barron, Eric Bettinger, Prudence Carter, Daniel McFarland, Debra Meyerson, Sean Reardon, David Rogosa, Mitchell Stevens
Assistant Professors: Jennifer Adams, Nicole M. Ardoin, Maren Songmy Aukerman, Paulo Blikstein, Bryan Brown, Leah Gordon, Aki Murata, Jelena Obradović
Professors (Teaching): Shelley Goldman, Rachel Lotan
Associate Professors (Teaching): Ira Lit, Susan O'Hara, Christine Min Wotipka
Professor (Research): David Plank
Courtesy Professors: Stephen Barley, Albert Camarillo, Carol Dweck, Paula England, Eric Hanushek, William Koski, Clifford Nass, Brad Osgood, John Rickford, Cecilia Ridgeway, Caroline Winterer
Courtesy Associate Professors: Stephen Cooper, Robert Reich
Courtesy Assistant Professor: Shashank Joshi
Consulting Professor: Michael Kamil
Consulting Associate Professors: Suki Hoagland, Thomas Keating
Acting Assistant Professor: Michelle Reininger
Senior Lecturers: Denise Pope, Ann Porteus
School Offices: School of Education, Room 101
Mail Code: 94305-3096
Phone: (650) 723-2109
Email: info@suse.stanford.edu
Web Site: http://ed.stanford.edu

Courses offered by the School of Education are listed under the subject code EDUC on the *Stanford Bulletin's* ExploreCourses web site.

Aiming towards the ideal of enabling all people to achieve maximum benefit from their educational experiences, the School of Education seeks to continue as a world leader in groundbreaking, cross-disciplinary inquiries that shape educational practices, their conceptual underpinnings, and the professions that serve the enterprise. The School of Education prepares scholars, teachers, teacher educators, policy analysts, evaluators, research-

ers, administrators, and other educational specialists. Two graduate degrees with specialization in education are granted by the University: Master of Arts and Doctor of Philosophy. While no undergraduate majors are offered, the school offers a number of courses for undergraduates, an undergraduate minor and undergraduate honors program, and a variety of tutoring programs.

The School of Education is organized into three program area committees: Curriculum Studies and Teacher Education (CTE); Developmental and Psychological Sciences (DAPS); and Social Sciences, Policy, and Educational Practice (SSPEP).

In addition, several cross-area programs are sponsored by faculty from more than one area. These programs include the doctoral Learning Sciences and Technology Design Program (LSTD); two master's level programs: the Stanford Teacher Education Program (STEP) and the Learning, Design, and Technology Program (LDT); and the undergraduate honors and minor programs.

These program area committees function as administrative units that act on admissions, plan course offerings, assign advisers, and determine program requirements. Various concentrations exist within most of these areas. Faculty members are affiliated primarily with one area but may participate in several programs. While there is a great deal of overlap and interdisciplinary emphasis across areas and programs, students are affiliated with one area committee or program and must meet its degree requirements.

Detailed information about admission and degree requirements, faculty members, and specializations related to these area committees and programs can be found in the publication *School of Education Guide to Graduate Studies* and at http://ed.stanford.edu.

The School of Education offers an eight-week summer session for admitted students only. The school offers no correspondence or extension courses, and in accordance with University policy, no part-time enrollment is allowed. Work in an approved internship or as a research assistant is accommodated within the full-time program of study.

UNDERGRADUATE PROGRAMS IN EDUCATION

The School of Education offers a minor and an honors program at the undergraduate level. Further information about these programs can be found at http://ed.stanford.edu/suse/.

Regardless of whether they are enrolled in one of these undergraduate programs, undergraduates are also welcome in many graduate-level courses.

GRADUATE PROGRAMS IN EDUCATION

The School of Education offers Master of Arts and Doctor of Philosophy degrees in several programs described below. University and School of Education requirements must be met for each degree. The University requirements are detailed in the "Graduate Degrees" section of this bulletin. Students are urged to read this section carefully, noting residency, tuition, and registration requirements. A student who wishes to enroll for graduate work in the School of Education must be admitted to graduate standing by one of the school's area committees and with the approval of the Associate Dean of Student Affairs.

Complete information about admissions procedures and requirements is available at http://gradadmissions.stanford.edu, or at http://ed.stanford.edu/. All applicants, except coterminal applicants, must submit scores from the Graduate Record Examination General Test (verbal, quantitative, and analytical or analytical writing areas); TOEFL scores are also required from those whose first language is not English. Applicants to the Stanford Teacher Education Program are also required to submit specific test scores or acceptable equivalents as required by the California Commission on Teacher Credentialing; see the section on STEP below. Test information is available at http://ed.stanford.edu/ in the admissions section.

HONORS PROGRAM IN EDUCATION (UNDERGRADUATE)

An honors program is available to undergraduates to supplement their regular majors outside the school. This program permits interested undergraduates at Stanford to build on the training received in their major field of study by pursuing additional courses and a research thesis in a related area of education.

Students apply for entry during the junior year. Applications are available at http://ed.stanford.edu/suse/programs-degrees/cross-area-undergrad-honors.html. The current director of the program is Mitchell Stevens, Associate Professor of Education.

At least one course must be taken from each of the following areas:

1. *Educational policy and history in the U.S.*—
   - EDUC 165. History of Higher Education in the U.S.
   - EDUC 201. History of Education in the United States
   - EDUC 202. Introduction to the Study of International Comparative Education
2. *Contemporary problem areas*—courses include:
   - EDUC 149. Theory and Issues in the Study of Bilingualism
   - EDUC 179. Urban Youth and their Institutions: Research and Practice
   - EDUC 197. Education, Gender, and Development
3. *Foundational disciplines*—courses include:
   - EDUC 110. Sociology of Education: Social Organizations of Schools
   - EDUC 204. Introduction to Philosophy of Education

A directed reading course and directed research courses with a faculty member in Education are also required. Students in the program should enroll in EDUC 199A,B,C, Undergraduate Honors Seminar, during their senior year.

Near the end of Spring Quarter, successful candidates for honors orally present brief reports of their work and findings at a mini-conference. All honors students in Education are expected to attend this conference.

MINOR IN EDUCATION (UNDERGRADUATE)

The Stanford University School of Education awards an undergraduate minor in the field of Education. The minor is structured to provide a substantial introduction to education through a broad-based and focused study of educational research, theory and practice. The goals of the minor are to allow undergraduates to develop an understanding of the core issues facing educators and policymakers, to make connections to their major programs of study, and to provide rigorous preparation for graduate studies in education.

Students interested in pursuing an undergraduate minor in Education begin by contacting the minor director (Jennifer Lynn Wolf, jlwolf@stanford.edu), who is responsible for advising all candidates and approving each student's minor plan of study. Applications for the minor are due no later than the second quarter of the junior year.

The Education Minor requires three core courses to ensure coverage of the disciplines of the field, while allowing flexibility for students wanting to pursue specific interests within Education. In order to graduate with a minor in Education, students must complete the minor program of study as described here, for a total of not less than 20 units and not more than 30 units, with a minimum of six courses.

COURSE REQUIREMENTS AND DISTRIBUTION

1. All minor students are required to take the minor core course:

- EDUC 101. Introduction to Teaching and Learning, addressing foundational issues in teaching, learning, and education.

2. All students are also required to take two foundational courses, such as the following:
   - EDUC 103B. Sociocultural Theory and Practices
   - EDUC 110. Sociology of Education
   - EDUC 201. History of Education in the United States
   - EDUC 203. The Anthropology of Education
   - EDUC 204. Introduction to Philosophy of Education
3. Each student identifies a subfield of study in which to take at least three elective courses. Established subfields of study within the School of Education include: Teaching and Learning; Education Research and Policy; and Educational Technology. Suitable elective courses include:
   1. *Subfield 1: Teaching and Learning—*
      - EDUC 103A . Tutoring: Seeing a Child through Literacy
      - EDUC 111. The Young Adult Novel: A Literature for and About Adolescents
      - EDUC 116X. Service Learning as an Approach to Teaching
      - EDUC 149. Theory and Issues in the Study of Bilingualism
      - EDUC 165. History of Higher Education in the U.S.
      - EDUC 171. Early Childhood Education Practicum
      - EDUC 208. Curriculum Construction
      - EDUC 218. Topics in Learning and Cognition
      - EDUC 223. Good Districts and Good Schools: Research, Policy and Practice
      - EDUC 256. Psychological and Educational Resilience Among Children and Youth
      - EDUC 283. Child Development in and Beyond Schools
   2. *Subfield 2: Education Research and Policy—*
      - EDUC 104X. The Conduct of Research with and in Communities
      - EDUC 119X. Writing about Education
      - EDUC 122X. Collaborations for International Environmental Education
      - EDUC 123X. Contexts that Promote Youth Development
      - EDUC 113X. Gender and Sexuality in the Schools
      - EDUC 177. Education of Immigrant Students: Psychological Perspectives
      - EDUC 197. Education, Gender and Development
      - EDUC 223. Good Districts and Good Schools: Research, Policy & Practice
   3. *Subfield 3: Educational Technology—*
      - EDUC 106. Interactive Media and Education
      - EDUC 124. Collaborative Design and Research of Technology: Integrated Curriculum
      - EDUC 208. Curriculum Construction
      - EDUC 218. Topics in Learning and Cognition
      - EDUC 283. Child Development in and Beyond Schools
      - EDUC 303X. Designing Learning Spaces
      - EDUC 333A. Understanding Learning Environments
      - EDUC 333B. Imagining the Future of Learning
      - EDUC 342. Child Development and New Technologies
4. Course work completed for the Education Minor must meet the following criteria:
   - All courses must be taken for a letter grade.
   - All courses must be completed with a minimum GPA of 3.0.
   - Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (major or minor).
   - All courses must be taken at Stanford University.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN EDUCATION

The School of Education admits a small number of students from undergraduate departments within the University into a coterminal bachelor's and master's program. For information about the coterminal option through the Stanford Teacher Education Program (STEP), see the details under STEP below. Students in this program receive the bachelor's degree in their undergraduate major and the master's degree in Education. Approval of the student's undergraduate department and admission to the School of Education M.A. program are required. Undergraduates may apply when they have completed at least 120 units, and must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. The number of units required for the M.A. degree depends on the program requirements within the School of Education; the minimum is 45 units.

Applicants may obtain coterminal degree application materials from the School of Education's Admissions Office in Cubberley, Room 140.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF ARTS IN EDUCATION

The M.A. degree is conferred by the University upon recommendation of the faculty of the School of Education. The minimum unit requirement is 45 quarter units earned at Stanford as a graduate student. Students must maintain a grade point average (GPA) of 3.0 or better in courses applicable to the degree, and a minimum of 27 units must be taken in the School of Education. Students typically enroll in 15 to 18 units per quarter. They must enroll in at least 11 units of work each quarter unless their program makes special provision for a lower quarterly minimum. Master's students should obtain detailed program requirements from the master's program officer, located in the office of academic services in the School of Education. Most programs require a final project, scholarly paper, or monograph. Additional detailed information regarding program content, entrance, and degree requirements is available at http://ed.stanford.edu. Upon admission, each student is assigned a faculty adviser from the appropriate area committee to begin early planning of a coherent program.

Master of Arts degrees are offered for the following specializations:

- Curriculum and Teacher Education. Students may specialize in English, literacy, mathematics, science, or history. (The program in CTE is not a credentialing program; see STEP below.)
- International Comparative Education
- International Educational Administration and Policy Analysis
- Joint Degree Program with Graduate School of Business (M.B.A./M.A.)
- Joint Degree Program with Law School (J.D./M.A.)
- Learning, Design, and Technology
- Policy, Organization, and Leadership Studies

In addition, an M.A. degree with a teaching credential is offered in the Stanford Teacher Education Program.

STANFORD TEACHER EDUCATION PROGRAM (STEP)

STEP is a twelve-month, full-time program leading to a Master of Arts and a preliminary California teaching credential. STEP offers two Master of Arts programs to prepare college graduates for careers as teachers in single- or multiple-subject classrooms. STEP-Secondary prepares humanities and sciences students to become teachers of English, languages (French, German, Japanese, Mandarin, Spanish), mathematics, science (biology, chemistry, earth science, physics), and history/social science. STEP-Elementary prepares students to be teachers in California multiple-subject classrooms. STEP seeks to prepare and support teachers to work with diverse learners to achieve high intellectual, academic, and social standards by creating equitable and successful schools and classrooms.

The 12-month STEP year begins in June with a Summer Quarter of intensive academic preparation and placement in a local summer school. During the academic year, students continue their course work and begin a year-long field placement under the guidance of expert teachers in local schools. The master's degree and teaching credential require a minimum of 45 quarter units, taken during four quarters of continuous residency.

Stanford undergraduates who enroll in STEP through the co-terminal program must have their B.A. conferred prior to commencing the four quarters of the STEP program. Students complete their undergraduate degree prior to beginning in the STEP year, which concludes in a master's degree and a recommendation for a California teaching credential.

Applicants to the secondary program are required to pass the California Basic Educational Skills Test (CBEST) and must demonstrate subject matter competence in one of two ways: (1) by passing the California Subject Examination for Teachers (CSET) in their content area; or (2) by completing a California state-approved subject matter preparation program. Applicants to the elementary program are required to pass the California Basic Educational Skills Test (CBEST), the California Multiple Subject Examination for Teachers (CSET), and the Reading Instruction Competence Assessment Test (RICA) after admission to the program.

Further information regarding admission requirements, course work, and credential requirements is available at http://ed.stanford.edu and in the *School of Education Guide to Graduate Studies.*

DOCTORAL DEGREES IN EDUCATION

The School of Education offers the Doctor of Philosophy (Ph.D.) degree in all program area committees. The degree is conferred by the University upon recommendation by the faculty of the School of Education and the University Committee on Graduate Studies. The Ph.D. requires a minimum of 135 units of course work and research completed at Stanford beyond the baccalaureate degree. Students may transfer up to 45 units of graduate course work. Students must consult with the doctoral programs officer if they intend to transfer prior course work. Students must maintain a grade point average (GPA) of 3.0 (B) or better in courses applicable to the degree.

Students should note that admission to the doctoral program does not constitute admission to candidacy for the degree. Students must qualify and apply for candidacy by the end of their second year of study and should obtain information about procedures and requirements during their first year from the doctoral programs officer in Cubberley 135.

The Ph.D. degree is designed for students who are preparing for research work in public school systems, branches of government, or specialized institutions; teaching roles in education in colleges or universities, and research connected with such teaching; or other careers in educational scholarship and research.

Ph.D. students must complete a minor in another discipline taught outside the school, or hold an acceptable master's degree outside the field of education, or complete an approved individually designed distributed minor that combines relevant advanced work taken in several disciplines outside the school.

Upon admission, the admitting area committee assigns an initial adviser from its faculty who works with the student to establish an appropriate and individualized course of study, a relevant minor, and project research plans. Other faculty members may also be consulted in this process. Details about administrative and academic requirements for each area committee and the School of Education, along with the expected time frame to complete program milestones, are given in the publication *School of Education Doctoral Degree Handbook*, available for download at http://ed.stanford.edu/suse/programs-degrees/publications.html.

The following doctoral specializations, with their sponsoring area and concentration, are offered:

- Administration and Policy Analysis (SSPEP)
- Anthropology of Education (SSPEP)
- Child and Adolescent Development (DAPS)
- Developmental and Psychological Sciences (DAPS)
- Economics of Education (SSPEP)
- Educational Linguistics (SSPEP)
- Educational Psychology (DAPS)
- English Education/Literacy Studies (CTE)
- General Curriculum Studies (CTE)
- Higher Education (SSPEP)
- History/Social Science Education (CTE)
- History of Education (SSPEP)
- Interdisciplinary Studies (SSPEP)
- International Comparative Education (SSPEP)
- Learning Sciences and Technology Design (CTE, DAPS, SSPEP)
- Mathematics Education (CTE)
- Organization Studies (SSPEP)
- Philosophy of Education (SSPEP)
- Science Education (CTE)
- Sociology of Education (SSPEP)
- Teacher Education (CTE)

PH.D. MINOR IN EDUCATION

Candidates for the Ph.D. degree in other departments or schools of the University may elect to minor in Education. Requirements include a minimum of 20 quarter units of graduate course work in Education and a field of concentration. Students choosing to minor in Education should meet with the Associate Dean for Student Affairs to determine a suitable course of study early in their program.

SCHOOL OF ENGINEERING

Dean: James D. Plummer
Senior Associate Deans: Laura L. Breyfogle (External Relations), Anthony J. DiPaolo (Stanford Center for Professional Development), Curtis W. Frank (Faculty and Academic Affairs), Clare Hansen-Shinnerl (Administration), Brad Osgood (Student Affairs)
Associate Dean: Noé P. Lozano (Diversity Programs)
Assistant Dean: Sally Gressens (Graduate Student Affairs)
Faculty Teaching General Engineering Courses
Professors: Stacey F. Bent, Mark Cappelli, Roger Howe, Chaitan Khosla, Thomas Lee, Reginald Mitchell, Parviz Moin, Drew Nelson, Brad Osgood, Channing R. Robertson, Stephen M. Rock, Eric Shaqfeh, Sheri Sheppard, Robert Sinclair, Stuart Thompson
Associate Professors: Samuel S. Chiu, Eric Darve, Ashish Goel, Ellen Kuhl, Sanjay Lall, Paul McIntyre, Beth Pruitt, Benjamin Van Roy
Assistant Professors: Charles E. Eesley, Oliver Fringer, Sarah Heilshorn, Nicolas A. Melosh, Christina Smolke, Clifford L. Wang, Thomas A. Weber, Xiaolin Zheng
Professors (Teaching): Thomas H. Byers, Robert E. McGinn, Eric Roberts
Associate Professor (Teaching): Mehran Sahami
Senior Lecturer: Vadim Khayms, Claude Reichard
Lecturers: Jerry Cain, David Evans, Midge Eisele, Lisa Y. Hwang, David Jaffe, Mary McDevitt, Lauren Rusk, Evelin Sullivan
Consulting Professors: Paul Mitiguy
Consulting Associate Professors: David Baggeroer, William Behrman, Brendan Boyle, Robyn Wright Dunbar
Consulting Assistant Professors: Scott Doorley
Mail Code: 94305-4027
Phone: (650) 723-5984
Web Site: http://soe.stanford.edu

Courses offered by the School of Engineering are listed under the subject code ENGR on the *Stanford Bulletin's* ExploreCourses web site.

The School of Engineering offers undergraduate programs leading to the degree of Bachelor of Science (B.S.), programs leading to both B.S. and Master of Science (M.S.) degrees, other programs leading to a B.S. with a Bachelor of Arts (B.A.) in a field of the humanities or social sciences, dual-degree programs with certain other colleges, and graduate curricula leading to the degrees of M.S., Engineer, and Ph.D.

The school has nine academic departments: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering. These departments and one interdisciplinary program, the Institute for Computational and Mathematical Engineering, are responsible for graduate curricula, research activities, and the departmental components of the undergraduate curricula. In research where faculty interest and competence embrace both engineering and the supporting sciences, there are numerous programs within the school as well as several interschool activities, including the Alliance for Innovative Manufacturing at Stanford, Center for Integrated Systems, Center on Polymer Interfaces and Macromolecular Assemblies, Collaboratory for Research on Global Projects, Center for Position, Navigation, and Time, and the NIH Biotechnology Graduate Training Grant in Chemical Engineering. Energy Resources Engineering (formerly Petroleum Engineering) is offered through the School of Earth Sciences.

The School of Engineering's Institute of Design (http://dschool.stanford.edu) brings together students and faculty in engineering, business, education, medicine, and the humanities to learn design thinking and work together to solve big problems in a human-centered way.

The Woods Institute for the Environment (http://environment.stanford.edu) brings together faculty, staff, and students from the schools, institutes and centers at Stanford to conduct interdisciplinary research, education, and outreach to promote an environmentally sound and sustainable world.

The School of Engineering has a summer internship program in China for undergraduate and graduate students. For more information, see http://soe.stanford.edu/chinaintern. The department also hasan exchange program available to graduate students whose research would benefit from collaboration with Chinese academic institutions.

Instruction in Engineering is offered primarily during Autumn, Winter, and Spring quarters of the regular academic year. During the Summer Quarter, a small number of undergraduate and graduate courses are offered.

UNDERGRADUATE PROGRAMS IN THE SCHOOL OF ENGINEERING

The principal goals of the undergraduate engineering curriculum are to provide opportunities for intellectual growth in the context of an engineering discipline, for the attainment of professional competence, and for the development of a sense of the social context of technology. The curriculum is flexible, with many decisions on individual courses left to the student and the adviser. For a student with well-defined educational goals, there is often a great deal of latitude.

In addition to the special requirements for engineering majors described below, all undergraduate engineering students are subject to the University general education, writing, and foreign language requirements outlined in the first pages of this bulletin. Depending on the program chosen, students have the equivalent of from one to three quarters of free electives to bring the total number of units to 180.

The School of Engineering's *Handbook for Undergraduate Engineering Programs* is the definitive reference for all undergraduate engineering programs. It is available online at http://ughb.stanford.edu and provides detailed descriptions of all undergraduate programs in the school, as well as additional information about extracurricular programs and services. Because it is revised in the summer, and updates are made to the web site on a continuing basis, the handbook reflects the most up-to-date information on School of Engineering programs for the academic year.

Accreditation—The Accreditation Board for Engineering and Technology (ABET) accredits college engineering programs nationwide using criteria and standards developed and accepted by U.S. engineering communities. At Stanford, the following undergraduate programs are accredited: Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, and Mechanical Engineering. In ABET-accredited programs, students must meet specific requirements for engineering science, engineering design, mathematics, and science course work. Students are urged to consult the School of Engineering *Handbook for Undergraduate Engineering Programs* and their adviser.

Accreditation is important in certain areas of the engineering profession; students wishing more information about accreditation should consult their department office or the office of the Senior Associate Dean for Student Affairs in 135 Huang Engineering Center.

Policy on Satisfactory/No Credit Grading and Minimum Grade Point Average—All courses taken to satisfy major requirements (including the requirements for mathematics, science, engineering fundamentals, Technology in Society, and engineering depth) for

all engineering students (including both department and School of Engineering majors) must be taken for a letter grade if the instructor offers that option.

For departmental majors, the minimum combined GPA (grade point average) for all courses taken in fulfillment of the Engineering Fundamentals requirement and the Engineering Depth requirement is 2.0. For School of Engineering majors, the minimum GPA on all engineering courses taken in fulfillment of the major requirements is 2.0.

ADMISSION

Any students admitted to the University may declare an engineering major if they elect to do so; no additional courses or examinations are required for admission to the School of Engineering.

RECOMMENDED PREPARATION

FRESHMEN

Students who plan to enter Stanford as freshmen and intend to major in engineering should take the highest level of mathematics offered in high school. (See the "Mathematics" section of this bulletin for information on advanced placement in mathematics.) High school courses in physics and chemistry are strongly recommended, but not required. Additional elective course work in the humanities and social sciences is also recommended.

TRANSFER STUDENTS

Students who do the early part of their college work elsewhere and then transfer to Stanford to complete their engineering programs should follow an engineering or pre-engineering program at the first school, selecting insofar as possible courses applicable to the requirements of the School of Engineering, that is, courses comparable to those described under "Undergraduate Programs." In addition, students should work toward completing the equivalent of Stanford's foreign language requirement and as many of the University's General Education Requirements (GERs) as possible before transferring. Some transfer students may require more than four years (in total) to obtain the B.S. degree. However, Stanford affords great flexibility in planning and scheduling individual programs, which makes it possible for transfer students, who have wide variations in preparation, to plan full programs for each quarter and to progress toward graduation without undue delay.

Transfer credit is given for courses taken elsewhere whenever the courses are equivalent or substantially similar to Stanford courses in scope and rigor. The policy of the School of Engineering is to study each transfer student's preparation and make a reasonable evaluation of the courses taken prior to transfer by means of a petition process. Inquiries may be addressed to the Office of Student Affairs in 135 Huang Engineering Center. For more information, see the transfer credit section of the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu.

DEGREE PROGRAM OPTIONS

The School of Engineering offers two types of B.S. degrees: Bachelor of Science in Engineering and Bachelor of Science for Individually Designed Majors in Engineering (IDMENs). There are nine Engineering B.S. subplans that have been proposed by cognizant faculty groups and pre-approved by the Undergraduate Council: Aeronautics and Astronautics; Architectural Design; Atmosphere/Energy; Bioengineering; Biomechanical Engineering; Biomedical Computation; Computer Systems Engineering; Engineering Physics; and Product Design. The B.S. for an Individually Designed Major in Engineering has also been approved by the council.

Curricula for majors offered by the departments of Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering have the following components: 36-45 units of mathematics and science (see Basic Requirements 1 and 2 at the end of this section); engineering fundamentals (three course minimum, at least one of which must be unspecified by the department, see Basic Requirement 3); Technology in Society (TIS) (one course minimum, see Basic Requirement 4); engineering depth (courses such that the total number of units for Engineering Fundamentals and Engineering Depth is between 60 and 72). ABET accredited majors must meet a minimum number of Engineering Science and Engineering Design units; (see Basic Requirement 5). Curricular requirements for departmental majors are being revised at the time of publication. Consult the 2010-11 *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu for the most up-to-date listing of curricular requirements.

DUAL AND COTERMINAL PROGRAMS

A Stanford undergraduate may work simultaneously toward two bachelor's degrees or toward a bachelor's and a master's degree, that is, B.A. and M.S., B.A. and M.A., B.S. and M.S., or B.S. and M.A. The degrees may be granted simultaneously or at the conclusion of different quarters. Five years are usually required for a dual or coterminal program or for a combination of these two multiple degree programs. For further information, inquire with the School of Engineering's student affairs office, 135 Huang Engineering Center, or with department contacts listed in the *Handbook for Undergraduate Engineering Programs*, available at http://ughb.stanford.edu.

Dual B.A. and B.S. Degree Program—To qualify for both degrees, a student must:

1. complete the stated University and department requirements for each degree
2. complete 15 full-time quarters, or 3 full-time quarters after completing 180 units
3. complete a total of 225 units (180 units for the first bachelor's degree plus 45 units for the second bachelor's degree)

Coterminal Bachelor's and Master's Degree Program—A Stanford undergraduate may be admitted to graduate study for the purpose of working simultaneously toward a bachelor's degree and a master's degree, in the same or different disciplines. To qualify for both degrees, a student must:

1. complete, in addition to the 180 units required for the bachelor's degree, the number of units required by the graduate department for the master's degree which in no event is fewer than the University minimum of 45 units
2. complete the requirements for the bachelor's degree (department, school, and University) and apply for conferral of the degree at the appropriate time
3. complete the department and University requirements for the master's degree and apply for conferral of the degree at the appropriate time

A student may complete the bachelor's degree before completing the master's degree, or both degrees may be completed in the same quarter.

Admission to the coterminal program requires admission to graduate status by the pertinent department. Admission criteria vary from department to department.

Procedure for Applying for Admission to Coterminal Degree Programs—A Stanford undergraduate may apply to the pertinent graduate department using the University coterminal application form after completing 120 bachelor's degree units. Application deadlines vary by department, but in all cases the student must apply early enough to allow a departmental decision at least one quarter in advance of the anticipated date of conferral of the bachelor's degree.

Students should refer to the University Registrar's Office or its web site for details about when courses begin to count toward the master's degree requirements and when graduate tuition is assessed; this may affect the decision about when to apply for admission to graduate status.

The University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program

rules and University application forms, also see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

BACHELOR OF SCIENCE IN THE SCHOOL OF ENGINEERING

Departments within the School of Engineering offer programs leading to the B.S. degree in the following fields: Chemical Engineering, Civil Engineering, Computer Science, Electrical Engineering, Environmental Engineering, Management Science and Engineering, Materials Science and Engineering, and Mechanical Engineering. The School of Engineering itself offers interdisciplinary programs leading to the B.S. degree in Engineering with specializations in Aeronautics and Astronautics, Architectural Design, Atmosphere/Energy, Bioengineering, Biomechanical Engineering, Biomedical Computation, Computer Systems Engineering, Engineering Physics, and Product Design. In addition, students may elect a B.S. in an Individually Designed Major in Engineering.

The departments of Chemical Engineering, Civil and Environmental Engineering, Computer Science, Electrical Engineering, and Mechanical Engineering, as well as the faculty overseeing the Architectural Design, Biomechanical Engineering, Biomedical Computing, Computer Systems Engineering, and Engineering Physics majors, offer qualified students opportunities to do independent study and research at an advanced level with a faculty mentor in order to receive a Bachelor of Science with honors. An honors option is also available to students pursuing an independently designed major, with the guidance and approval of their adviser.

Petroleum Engineering—Petroleum Engineering is offered by the Department of Energy Resource Engineering in the School of Earth Sciences. Consult the "Energy Resources Engineering" section of this bulletin for requirements. School of Engineering majors who anticipate summer jobs or career positions associated with the oil industry should consider enrolling in ENGR 120, Fundamentals of Petroleum Engineering.

Programs in Manufacturing—Programs in manufacturing are available at the undergraduate, master's, and doctorate levels. The undergraduate programs of the departments of Civil and Environmental Engineering, Management Science and Engineering, and Mechanical Engineering provide general preparation for any student interested in manufacturing. More specific interests can be accommodated through Individually Designed Majors in Engineering (IDMENs).

BASIC REQUIREMENTS

Basic Requirement 1 (Mathematics)—Engineering students need a solid foundation in the calculus of continuous functions, linear algebra, an introduction to discrete mathematics, and an understanding of statistics and probability theory. Students are encouraged to select courses on these topics. To meet ABET accreditation criteria, a student's program must include the study of differential equations. Courses that satisfy the math requirement are listed at http://ughb.stanford.edu in the *Handbook for Undergraduate Engineering Programs*.

Basic Requirement 2 (Science)—A strong background in the basic concepts and principles of natural science in such fields as biology, chemistry, geology, and physics is essential for engineering. Most students include the study of physics and chemistry in their programs. Courses that satisfy the science requirement are listed at http://ughb.stanford.edu in the *Handbook for Undergraduate Engineering Programs.*

Basic Requirement 3 (Engineering Fundamentals)—The Engineering Fundamentals requirement is satisfied by a nucleus of technically rigorous introductory courses chosen from the various engineering disciplines. It is intended to serve several purposes. First, it provides students with a breadth of knowledge concerning the major fields of endeavor within engineering. Second, it allows the incoming engineering student an opportunity to explore a number of courses before embarking on a specific academic major. Third, the individual classes each offer a reasonably deep insight into a contemporary technological subject for the interested non-engineer.

The requirement is met by taking three courses from the following list, at least one of which must be chosen by the student rather than by the department:

ENGR 10. Introduction to Engineering Analysis
ENGR 14. Applied Mechanics: Statics
ENGR 15. Dynamics
ENGR 20. Introduction to Chemical Engineering (Same as CHEMENG 20)
ENGR 25. Biotechnology (Same as CHEMENG 25)
ENGR 25E. Energy: Chemical Transformations for Production, Storage, and Use (Same as CHEMENG 25E)
ENGR 30. Engineering Thermodynamics
ENGR 40. Introductory Electronics[1]
ENGR 50/50E/50M. Introduction to Materials Science, Nanotechology/Energy/or Biomaterials Emphasis
ENGR 60. Engineering Economics
ENGR 62. Introduction to Optimization (Same as MS&E 111)
ENGR 70A/CS 106A. Programming Methodology
ENGR 70B *or* X/CS 106B or X. Programming Abstractions (or Accelerated)
ENGR 80. Introduction to Bioengineering (Same as BIOE 80)

1 ENGR 40 and 50 may be taken on video at some of Stanford's Overseas Centers.

Basic Requirement 4 (Technology in Society)—It is important for the student to obtain a broad understanding of engineering as a social activity. To foster this aspect of intellectual and professional development, all engineering majors must take one course devoted to exploring issues arising from the interplay of engineering, technology, and society. Courses that fulfill this requirement are listed online at http://ughb.stanford.edu in the *Handbook for Undergraduate Engineering Programs*.

Basic Requirement 5 (Science and Design)—In order to satisfy ABET (Accreditation Board for Engineering and Technology) requirements, a student majoring in Chemical, Civil, Electrical, Environmental, or Mechanical Engineering must complete one and a half years of engineering topics, consisting of a minimum of 68 units of Engineering Science and Engineering Design appropriate to the student's field of study. In most cases, students meet this requirement by completing the major program core and elective requirements in Fundamentals and Depth. For example, ENGR 40 is a 5-unit course; 3 of these 5 units are assigned to Engineering Science and the remaining 2 units are assigned to Engineering Design. A student may need to take additional courses in Depth in order to fulfill the minimum requirement. The science and design units assigned to each major's depth courses are listed online at http://ughb.stanford.edu in the *Handbook for Undergraduate Engineering Programs.*

Experimentation—Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Materials Science and Engineering, and Mechanical Engineering must include 8 units of experimentation. Lab courses taken in the sciences, as well as experimental work taken in courses within the School of Engineering, can be used in fulfillment of this requirement. By careful planning, the experimentation requirement should not necessitate additional course work beyond that required to meet the other components of an engineering major. A list of courses and their experimentation content (in units) can be found online at http://ughb.stanford.edu in the *Handbook for Undergraduate Engineering Programs*.

BACHELOR OF ARTS AND SCIENCE (B.A.S.) IN THE SCHOOL OF ENGINEERING

This degree is available to students who complete both the requirements for a B.S. degree in engineering and the requirements for a major or program ordinarily leading to the B.A. degree. For more information, see the "Undergraduate Degrees" section of this bulletin.

MINOR IN THE SCHOOL OF ENGINEERING

An undergraduate minor in some Engineering programs may be pursued by interested students; see the *Handbook for Undergraduate Engineering Programs*, or consult with a department's undergraduate program representative or the Office of Student Affairs, Huang Engineering Center, Suite 135.

General requirements and policies for a minor in the School of Engineering are:

1. A set of courses totaling not less than 20 and not more than 36 units, with a minimum of six courses of at least 3 units each.
2. The set of courses should be sufficiently coherent as to present a body of knowledge within a discipline or subdiscipline.
3. Prerequisite mathematics, statistics, or science courses, such as those normally used to satisfy the school's requirements for a department major, may not be used to satisfy the requirements of the minor; conversely, engineering courses that serve as prerequisites for subsequent courses must be included in the unit total of the minor program.

Departmentally based minor programs are structured at the discretion of the sponsoring department, subject only to requirements 1, 2, and 3 above. Interdisciplinary minor programs may be submitted to the Undergraduate Council for approval and sponsorship. A general Engineering minor is not offered.

AERONAUTICS AND ASTRONAUTICS (AA) MINOR

The Aero/Astro minor introduces undergraduates to the key elements of modern aerospace systems. Within the minor, students may focus on aircraft, spacecraft, or disciplines relevant to both. The course requirements for the minor are described in detail below. Courses cannot be double-counted within a major and a minor, or within multiple minors; if necessary, the Aero/Astro adviser can help select substitute courses to fulfill the AA minor core.

The following core courses fulfill the minor requirements:

AA 100. Introduction to Aeronautics and Astronautics	3
ENGR 14. Statics[1]	3
ENGR 15. Dynamics[1]	3
ENGR 30. Thermodynamics[1]	3
ME 70. Introductory Fluids	4
ME 131A. Heat Transfer	4
Two courses from one of the upper-division elective areas below (min. 6 units)	
plus one course from a second area below (min. 3 units):	9-11
Aerospace Systems Synthesis/Design:	
AA 236A,B. Spacecraft Design	8
AA 241A,B. Aircraft Design	6
Dynamics and Controls:	
AA 242A. Classical Dynamics	3
AA 271A. Dynamics and Control of Spacecraft/Aircraft	3
AA 279. Space Mechanics	3
ENGR 105. Feedback Control Design	3
ENGR 205. Introduction to Control Design Techniques	3
Fluids:	
AA 200. Applied Aerodynamics	3
AA 210A. Fundamentals of Compressible Flow	3
AA 214A. Numerical Methods in Fluid Mechanics	3
or AA 283. Aircraft Propulsion	3
Structures:	
AA 240A. Analysis of Structures	3
AA 240B. Analysis of Structure II	3
AA 256. Mechanics of Composites	3

1 ENGR 14, 15, or 30 are waived as minor requirements if already taken as part of the major.

CHEMICAL ENGINEERING (CHE) MINOR

The following core courses fulfill the minor requirements:

ENGR 20/CHEMENG 20. Introduction to Chemical Engineering	3
CHEMENG 100. Chemical Process Modeling, Dynamics, and Control	3
CHEMENG 110. Equilibrium Thermodynamics	3
CHEMENG 120A. Fluid Mechanics	4
CHEMENG 120B. Energy and Mass Transport	4
CHEMENG 140. Micro and Nanoscale Fabrication	3
or CHEMENG 160. Polymer Science and Engineering	3
or CHEMENG 181. Biochemistry I	3
CHEMENG 170. Kinetics and Reactor Design	3
CHEMENG 180. Chemical Engineering Plant Design	3
CHEMENG 185A. Chemical Engineering Lab A	4
CHEM 171. Physical Chemistry	3

CIVIL ENGINEERING (CE) MINOR

The Civil Engineering minor is intended to give students an in-depth introduction to one or more areas of civil engineering. Departmental expertise and undergraduate course offerings are available in the areas of Construction Engineering and Management, Structural Engineering, and Architectural Design. Students interested in an environmental or energy focus should see the Environmental Engineering minor.

The minimum prerequisite for a Civil Engineering minor focusing on construction engineering and management or structural engineering is MATH 42 (or 21); however, many courses of interest require PHYSICS 41 and/or MATH 51 as prerequisites.

The minimum prerequisite for a Civil Engineering minor focusing on architectural design is MATH 41 (or 19) and a course in Statistics.

A minor in Civil Engineering is not an ABET-accredited degree program.

Since civil engineering is a broad field and undergraduates with varying backgrounds may be interested in obtaining a civil engineering minor, no single set of course requirements is appropriate for all students. Instead, interested students are encouraged to propose their own set of courses within the guidelines listed below; this list must be officially approved by the Civil Engineering (CE) undergraduate minor adviser.

Additional information on preparing a minor program is available in Chapter 6 of the *Handbook for Undergraduate Engineering Programs*.

General guidelines are—

1. A Civil Engineering minor must contain at least 24 units of course work not taken for the major, and must consist of at least six classes of at least 3 units each.
2. The list of courses must represent a coherent body of knowledge in a focused area, and should include classes that build upon one another.

Professor Anne Kiremidjian (kiremidjian@stanford.edu) is the CE undergraduate minor adviser in Structural Engineering and Construction Engineering and Management. John Barton (jhbarton@stanford.edu), Program Director for Architectural Design, is the undergraduate minor adviser in Architectural Design. Students must consult one of these advisers in developing their minor program, and obtain approval of the finalized study list from them.

COMPUTER SCIENCE (CS) MINOR

The following core courses fulfill the minor requirements. Prerequisites include the standard mathematics sequence through MATH 51.

Introductory Programming (AP Credit may be used to fulfill this requirement):	5
CS 106B. Programming Abstractions	
or CS 106 X. Programming Abstractions (Accelerated)	5
Core:	
CS 103. Mathematical Foundations of Computing[1]	5
CS 107. Computer Organization and Systems[2]	5
CS 109. Introduction to Probability for Computer Scientists[3]	5
Electives (choose two courses from different areas):	
Artificial Intelligence—	
CS 121. Introduction to Artificial Intelligence	3
CS 221. AI: Principles and Techniques	4
Human-Computer Interaction—	
CS 147. Introduction to Human-Computer Interaction Design	4

Software—

CS 108. Object-Oriented Systems Design	4
CS 110. Principles of Computer Systems	5

Systems—

CS 140. Operating Systems	4
CS 143. Compilers	4
CS 144. Networking	4
CS 145. Databases	4
CS 148. Graphics	4

Theory—

CS 154. Automata and Complexity Theory	4
CS 157. Logic and Automated Reasoning	3
CS 161. Design and Analysis of Algorithms	5

Note: for students with no programming background and who begin with CS 106A, the minor consists of seven or eight courses.

1 Students who have taken either CS 103X or CS 103A/B are considered to have satisfied the CS 103 requirement.

2 The name of CS 107 has changed. The previous CS 107 course entitled Programming Paradigms also fulfills this requirement.

3 Students who completed STATS 116, MS&E 120, or CME 106 in Winter 2008-09 or earlier may count that course as satisfying the CS 109 requirement. These same courses taken in Spring 2008-09 or later cannot be used to satisfy the CS 109 requirement.

ELECTRICAL ENGINEERING (EE) MINOR

Courses from any of the following three options, along with four graded EE courses of level 100 or higher (13-21 units), fulfill the minor requirements:

Option I:

ENGR 40. Introductory Electronics	5
EE 101A. Circuits I	4
EE 101B. Circuits II	4
Four graded EE courses numbered 100 or higher	

Option II:

ENGR 40. Introductory Electronics	5
EE 102A. Signal Processing and Linear Systems I	4
EE 102B. Signal Processing and Linear Systems II	4
Four graded EE courses numbered 100 or higher	

Option III:

ENGR 40. Introductory Electronics	5
EE 108A. Digital Systems I	4
EE 108B. Digital Systems II	4
Four graded EE courses numbered 100 or higher	

ENVIRONMENTAL ENGINEERING (ENV) MINOR

The Environmental Engineering minor is intended to give students a broad introduction to one or more areas of Environmental Engineering. Departmental expertise and undergraduate course offerings are available in the areas of environmental engineering and science, environmental fluid mechanics and hydrology, and atmosphere/energy. The minimum prerequisite for an Environmental Engineering minor is MATH 42 (or 21); however, many courses of interest require PHYSICS 41 and/or MATH 51 as prerequisites. Students should recognize that a minor in Environmental Engineering is not an ABET-accredited degree program.

Since undergraduates having widely varying backgrounds may be interested in obtaining an environmental engineering minor, no single set of course requirements is appropriate for all students. Instead, interested students are encouraged to propose their own set of courses within the guidelines listed below; this list must be officially approved by the Civil and Environmental Engineering (CEE) undergraduate minor adviser. Additional information on preparing a minor program is available in Chapter 6 of the *Handbook for Undergraduate Engineering Programs*.

General guidelines are—

- An Environmental Engineering minor must contain at least 24 units of course work not taken for the major, and must consist of at least six classes of at least 3 units each.
- The list of courses must represent a coherent body of knowledge in a focused area, and should include classes that build upon one another.

Professor Lynn Hildemann (hildemann@stanford.edu) is the CEE undergraduate minor adviser in Environmental Engineering. Students must consult with Professor Hildemann in developing their minor program, and obtain approval of the finalized study list from her.

MANAGEMENT SCIENCE AND ENGINEERING (MS&E) MINOR

The following courses fulfill the minor requirements:

Background requirement:

MATH 51. Calculus	5

Minor requirements:

ENGR 60. Engineering Economy (prerequisite: MATH 41)	3
MS&E 111. Introduction to Optimization	4
MS&E 120. Probabilistic Analysis (prerequisite: MATH 51)	5
MS&E 121. Introduction to Stochastic Modeling	4
MS&E 130 or 134. Information Networks/Systems	3-4
MS&E 142 or 260. Investment Science or Production	3-4
MS&E 180. Organizations: Theory and Management	4
Elective (any 100- or 200-level MS&E course)	3-4

MATERIALS SCIENCE AND ENGINEERING (MATSCI) MINOR

A minor in Materials Science and Engineering allows interested students to explore the role of materials in modern technology and to gain an understanding of the fundamental processes that govern materials behavior.

The following courses fulfill the minor requirements:

Engineering Fundamentals (choose one of the following)—

ENGR 50. Introduction to Materials Science, Nanotechnology Emphasis	4
ENGR 50E. Introduction to Materials Science, Energy Emphasis	4
ENGR 50M. Introduction to Materials Science, Biomaterials Emphasis	4
Materials Science Fundamentals and Engineering Depth (choose 6 of the following):	24
MATSCI 151. Microstructure and Mechanical Properties	4
MATSCI 152. Electronic Materials Engineering	4
MATSCI 153. Nanostructure and Characterization	4
MATSCI 154. Solid State Thermodynamics	4
MATSCI 155. Nanomaterials Synthesis	4
MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution	4
MATSCI 157. Quantum Mechanics of Nanoscale Materials	4
MATSCI 160. Nanomaterials Laboratory	4
MATSCI 161. Nanocharacterization Laboratory	4
MATSCI 162. X-Ray Diffraction Laboratory	4
MATSCI 163. Mechanical Behavior Laboratory	4
MATSCI 164. Electronic and Photonic Materials and Devices Laboratory	4
MATSCI 190. Organic and Biological Materials	4
MATSCI 192. Materials Chemistry	4
MATSCI 193. Atomic Arrangements in Solids	4
MATSCI 194. Thermodynamics and Phase Equilibria	4
MATSCI 195. Waves and Diffraction in Solids	4
MATSCI 196. Imperfections in Crystalline Solids	4
MATSCI 197. Rate Processes in Materials	4
MATSCI 198. Mechanical Properties of Materials	4
MATSCI 199. Electronic and Optical Properties of Solids	4

MECHANICAL ENGINEERING (ME) MINOR

The following courses fulfill the minor requirements:

General Minor—This minor aims to expose students to the breadth of ME in terms of topics and analytic and design activities. Prerequisites: MATH 41, 42, and PHYSICS 41.

ENGR 14. Applied Mechanics: Statics	3
ENGR 15. Dynamics	3
ENGR 30. Thermodynamics	3
ME 70. Introductory Fluids Engineering	4
ME 101. Visual Thinking	3

Plus two of the following:

ME 80. Mechanics of Materials	4
ME 131A. Heat Transfer	4
ME 161. Dynamic Systems	4
ME 203. Manufacturing and Design	4

Thermosciences Minor -- Prerequisites: MATH 41, 42, 51 (or CME 100) and PHYSICS 41.

ENGR 14. Applied Mechanics: Statics	3
ENGR 30. Thermodynamics	3
ME 70. Introductory Fluids Engineering	4
ME 131A. Heat Transfer	4
ME 131B. Fluid Mechanics	4
ME 140. Advanced Thermal Systems	5

Mechanical Design—This minor aims to expose students to design activities supported by analysis. Prerequisites: MATH 41, 42, and PHYSICS 41.

ENGR 14. Applied Mechanics: Statics	3
ENGR 15. Dynamics	3
ME 80. Mechanics of Materials	4
ME 101. Visual Thinking	3
ME 112. Mechanical Engineering Design	4
ME 203. Manufacturing and Design	4

Plus one of the following:

ME 113. Engineering Design	4
ME 210. Introduction to Mechatronics	4
ME 220. Introduction to Sensors	4

AERONAUTICS AND ASTRONAUTICS (AA)

Completion of the undergraduate program in Aeronautics and Astronautics leads to the conferral of the Bachelor of Science in Engineering. The subplan "Aeronautics and Astronautics" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN AERONAUTICS AND ASTRONAUTICS

The mission of the undergraduate program in Aeronautics and Astronautics Engineering is to provide students with the fundamental principles and techniques necessary for success and leadership in the conception, design, implementation, and operation of aerospace and related engineering systems. Courses in the major introduce students to engineering principles. Students learn to apply this fundamental knowledge to conduct laboratory experiments and aerospace system design problems. Courses in the major include engineering fundamentals, mathematics, and the sciences, as well as in-depth courses in aeronautics and astronautics, dynamics, mechanics of materials, fluids engineering, and heat transfer. The major prepares students for careers in aircraft and spacecraft engineering, space exploration, air and space-based telecommunication industries, teaching, research, military service, and many related technology-intensive fields.

REQUIREMENTS

Mathematics (24 units):	
MATH 53 *or* CME 102/ENGR 155A	5
MATH electives[1]	
Science (18 units):	
PHYSICS 41. Mechanics	4
PHYSICS 43. Electricity and Magnetism	4
One additional Physics course	3
Science electives[1]	9
Technology in Society[1] (one course required)	3-5
Engineering Fundamentals[1;] three courses minimum, including:	
ENGR 30. Engineering Thermodynamics	3
ENGR 70A. Programming Methodology	3-5
Engineering Depth (39 units):	
AA 100. Introduction to Aeronautics and Astronautics	3
AA 190. Directed Research in Aeronautics and Astronautics (WIM)	3
ENGR 15. Dynamics	3
CEE 101A. Mechanics of Materials *or* ME 80. Strength of Materials	4
ME 161. Dynamic Systems *or* PHYSICS 110. Intermediate Mechanics	4
ME 70. Introductory Fluids Engineering	4
ME 131A. Heat Transfer	4
Depth Area I[2]	6
Depth Area II[2]	6
Engineering Elective(s)[3]	3

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 Courses that satisfy the Math electives, Science electives, the Technology in Society requirement, and the Engineering Fundamentals requirement are listed in Figures 3-1, 3-2, 3-3, and 3-4 in the *Handbook for Undergraduate Engineering Programs at http://ughb.stanford.edu*,

2 Two of the following areas:
Fluids (AA 200, 210A, 214A, 283; ME 131B)
Structures (AA 240A, 240B, 256)
Dynamics and Controls (AA 242A, 271A, 279; ENGR 105, 205)
Systems Design (AA 241A, 241B, 236A, 236B)

3 Electives are to be approved by the adviser, and might be from the depth area lists or other upper-division Engineering courses.

ARCHITECTURAL DESIGN (AD)

Completion of the undergraduate program in Architectural Design leads to the conferral of the Bachelor of Science in Engineering. The subplan "Architectural Design" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN ARCHITECTURAL DESIGN

The mission of the undergraduate program in Architectural Design is to develop students' ability to integrate engineering and architecture in ways that blend innovative architectural design with cutting-edge engineering technologies. Courses in the program combine hands-on architectural design studios with a wide variety of other courses. Students can choose from a broad mix of elective courses concerning energy conservation, sustainability, building systems, and structures, as well as design foundation and fine arts courses. In addition to preparing students for advanced studies in architecture and construction management, the program's math and science requirements prepare students well for graduate work in other fields such as civil and environmental engineering, law, and business.

REQUIREMENTS

Mathematics and Science (36 units minimum):	
MATH 19, 20, and 21, or 41 and 42 (required)	10
One course in Statistics (required)	3-5
PHYSICS 21 or 41. Mechanics (required)	3-4
Recommended: EARTHSYS 101, 102; GES 1; CEE 64, 70, 101D; CME 100; PHYSICS 23 or 43; or from School of Engineering approved list[1]	
Technology in Society (one course required; see Basic Requirement 4)	3-5
Engineering Fundamentals (three courses minimum; see Basic Requirement 3):	
ENGR 14. Applied Mechanics: Statics	3
ENGR 60. Engineering Economy	3
Fundamentals Elective	3-5
Engineering Depth:	
CEE 31 or 31Q. Accessing Architecture Through Drawing	4
CEE 100. Managing Sustainable Building Projects (WIM)	4
CEE 101A. Mechanics of Materials	4

CEE 110. Building Information Modeling 4
CEE 130. Architectural Design: 3D Modeling, Methodology, and Process 4
CEE 136. Green Architecture 4
CEE 137B. Intermediate Architecture Studio (or one of the 137 series) 5
CEE 156. Building Systems 4
ARTHIST 3. Introduction to the History of Architecture 5
Engineering Depth Electives (with at least 3 units from SoE courses): the number of units of Depth Electives must be such that courses in Engineering Fundamentals and Engineering Depth total at least 60 units.[2]

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 School of Engineering approved list of math and science courses available in the *Handbook for Undergraduate Engineering Programs at* http://ughb.stanford.edu

2 Engineering depth electives: At least one of the following courses: CEE 111, 115, 124, 131, 131A, 132 or 138A; and others from CEE 80N, 101B, 101C, 122A,B, 134B, 135A, 139, 154, 172A, 176A, 180, 181, 182, 183; ENGR 50, 103, 131; ME 101, 110A, 115, 120, 222; ARTSTUDIO 60, 70, 140, 145, 148, 151, 271; ARTHIST 141, 142, 143A, 188A; FILMPROD 114; DRAMA 137; URBANST 110, 113, 163, 171.

ATMOSPHERE/ENERGY (A/E)

Completion of the undergraduate program in Atmosphere/Energy leads to the conferral of the Bachelor of Science in Engineering. The subplan "Atmosphere/Energy" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN ATMOSPHERE/ENERGY

Atmosphere and energy are strongly linked: fossil-fuel energy use contributes to air pollution, climate change, and weather modification; and changes in the atmosphere feed back to renewable energy, including wind, solar, hydroelectric, and wave energy. The mission of the undergraduate program in Atmosphere/Energy (A&E) is to provide students with the fundamental background necessary to solve large- and local-scale climate, air pollution, and energy problems through renewable and efficient energy systems. To accomplish this goal, students learn in detail the causes and proposed solutions to the problems, and learn to evaluate whether the proposed solutions are truly beneficial. A/E students take courses in renewable energy resources, indoor and outdoor air pollution, energy efficient buildings, climate change, renewable energy and clean-vehicle technologies, weather and storm systems, energy technologies in developing countries, electric grids, and air quality management. The curriculum is flexible: depending upon their area of interest, students may take in-depth courses in energy or atmosphere and focus either on science, technology, or policy. The major is designed to provide students with excellent preparation for careers in industry, government, and research, as well as study in graduate school.

REQUIREMENTS

Mathematics (23 units minimum, including at least one course from each group):
Group A:
MATH 53. Ordinary Differential Equations with Linear Algebra 5
CME 102. Ordinary Differential Equations for Engineers 5
Group B:
CME 106. Introduction to Probability and Statistics for Engineers 4
STATS 60. Introduction to Statistical Methods: Pre-Calculus 5
STATS 110. Statistical Methods in Engineering and the Physical Sciences 4-5
GES 160. Statistical Methods for Earth and Environmental Sciences 3-4
Science (22 units minimum, including all of the following):
PHYSICS 41. Mechanics 4
PHYSICS 43. Electricity and Magnetism 4
or 45. Light and Heat
CHEM 31B. Chemical Principles II 4
or CHEM 31X. Chemical Principles *or* ENGR 31
CEE 70. Environmental Science and Technology 3
Technology in Society:
STS 110. Ethics and Public Policy (WIM) 3-5
Engineering Fundamentals (three courses minimum, including the following):
ENGR 25E. Energy: Chemical Transformations for Production, Storage, and Use 3
Plus one of the following courses plus one elective (see Basic Requirement 3):
ENGR 30. Engineering Thermodynamics 3
ENGR 60. Engineering Economy 3
ENGR 70A. Programming Methodology 3-5
Engineering Depth (42 units minimum):
Required:
CEE 64. Air Pollution: From Urban Smog to Global Change 3
CEE 173A. Energy Resources 4-5
At least 34 units from the following with at least four courses from each group:
Group A: Atmosphere
AA 100. Introduction to Aeronautics and Astronautics 3
CEE 63. Weather and Storms 3
CEE 101B. Mechanics of Fluids *or* 4
ME 70. Introductory Fluids Engineering
CEE 164. Introduction to Physical Oceanography *or* EESS 4
146B. Atmosphere, Ocean, Climate Dynamics 3
CEE 172. Air Quality Management 3
CEE 172A. Indoor Air Quality (given alternate years) 2-3
CEE 172S. Greenhouse Gas Mitigation 3-4
CEE 178. Introduction to Human Exposure Analysis 3
EARTHSYS 111. Biology and Global Change 3
EARTHSYS 133. California Climate Change Law and Policy 3
EARTHSYS 144. Fundamentals of GIS 4
or GEOPHYS 140. Introduction to Remote Sensing 3
EARTHSYS 147. Control Climate Change/21st Century (alt years) 3
3
EARTHSYS 148. Cooperage Climate Protocol 3
or EESS 57Q. Climate Change from Past to the Future 2
EESS 146A Atm., Ocean, Clim. Dynamics: Atm. Circ. (alt years) 3
ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery 4
Group B: Energy
CEE 109. Creating a Green Student Workforce 2
or EARTHSYS 45N. Environmental Issues Confronting the World (alternate years) 3
CEE 115. Goals & Methods for the Sustainable Design of Buildings 3-4
or CEE 177S. Design for a Sustainable World 1-5
CEE 142A. Negotiating Sustainable Development 3
or CEE 156. Building Systems 4
CEE 172P. Distributed Generation and Grid Integration Renewables 3-4
CEE 176A. Energy Efficient Buildings 3-4
CEE 176B. Electric Power: Renewables and Efficiency 3-4
CEE 176F. Energy Systems Field Trips (alternate years) 4
CEE 177S. Design for a Sustainable World 1-5
CHEMENG 35N. Renewable Energy for a Sustainable World 3
EARTHSYS 101. Energy and the Environment 3
EARTHSYS 102. Renewable Energy Sources and Greener Energy Processes 3
EARTHSYS 132. Energy and Climate Cooperation in the Western Hemisphere 4
EE 25Q. Electric Automobiles and Aircraft 3
EESS 37N. Energy and Environment on the Back of an Envelope 3
ENERGY 104. Technology in the Greenhouse *or* MATSCI 11SC. Energy Technologies for a Sustainable Future 3
2
MATSCI 156. Solar Cells, Fuel Cells, and Batteries 4

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

BIOENGINEERING (BIOE)

Completion of the undergraduate program in Bioengineering leads to the conferral of the Bachelor of Science in Engineering.

The subplan "Bioengineering" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN BIOENGINEERING

The mission of the Department of Bioengineering is to create a fusion of engineering and the life sciences that promotes scientific discovery and the development of new biomedical technologies and therapies through research and education. The Bioengineering (BIOE) major enables students to embrace biology as a new engineering paradigm and apply engineering principles to medical problems and biological systems. Students who major in BIOE obtain a solid background in the basic sciences (chemistry, physics, and biology) and mathematics. They take three engineering fundamentals courses including an introductory bioengineering course and computer programming. Starting in the sophomore year, BIOE students take six core classes to gain essential knowledge to pursue a career in bioengineering and then have the opportunity to pursue elective courses suited to their own interests. The major prepares students to continue on to graduate or medical school; work in the biotechnology, medical device, medical imaging, or other medical and non-medical industries; or pursue advanced degrees in business or law.

REQUIREMENTS

Mathematics (21 units minimum; see Basic Requirement 1)[1]	
Science (30 units minimum)[2]	
CHEM 31X *or* A,B. General Chemistry	4-8
CHEM 33. Structure and Reactivity	4
BIO 41,42. Biology Core	10
PHYSICS 41. Mechanics	4
PHYSICS 43. Electricity and Magnetism	4
BIO 44X. Core Experimental Laboratory (WIM)	4
Additional units from School of Engineering approved list	
Technology in Society (one course required; see Basic Requirement 4)	
BIOE 131. Ethics[3]	3
Engineering Topics (Engineering Science and Design):	
Engineering Fundamentals (3 courses required; see Basic Requirement 3):	
ENGR 70A (same as CS 106A). Programming Methodology	5
ENGR 80. Introduction to Bioengineering	3
Fundamentals Elective	3-5
Bioengineering Core (25 units):	
BIOE 41. Physical Biology of Macromolecules	4
BIOE 42. Physical Biology of Cells	4
BIOE 101. Systems Biology	4
BIOE 102. Systems Physiology & Design I	4
BIOE 103. Systems Physiology & Design II	4
BIOE 141. Biodesign Project I	4
BIOE 393. Bioengineering Departmental Research Colloquium	1
Options to complete the BIOE depth (4 courses, minimum 12 units[4]):	
BIOE 44. Synthetic Biology Lab	4
BIOE 121. Tissue Engineering Lab	4
BIOE 122. Optics Lab	4
BIOE 123. Bioinstrumentation and Imaging Lab	4
BIOE 141. Biodesign Project II	4
BIOE 212. Introduction to Biomedical Informatics Research Methodology	3
BIOE 214. Representations and Algorithms for Computational Molecular Biology	3
BIOE 220. Imaging Anatomy	3
BIOE 222A. Multimodality Molecular Imaging in Living Subjects I	4
BIOE 222B. Multimodality Molecular Imaging in Living Subjects II	4
BIOE 222C. Multimodality Molecular Imaging in Living Subjects III	4
BIOE 261. Principles and Practice of Stem Cell Engineering	3
BIOE 281. Biomechanics of Movement	3
BIOE 284A. Cardiovascular Bioengineering	3
BIOE 284B. Cardiovascular Bioengineering	3

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs* (UGHB).

1 Mathematics courses must include MATH 53 or CME 102, and STAT 110 or 141 or CME 106; in addition, CME 104 is recommended.

2 Science must include both Chemistry and Physics with two quarters of course work in each, two courses of BIO core, and CHEM 31A and B or X, *or* ENGR 31. CHEM 31A and B are considered one course even though given over two quarters.

3 The first offering of BIOE 131 is planned for 2011-12; see UGHB, Chapter 3, Figure 3-3 for a list of other approved options.

4 Students pursuing a pre-med program will need to take additional courses; see UGHB, Chapter 5, BIOE 4-Year Plan #3.

BIOMECHANICAL ENGINEERING (BME)

Completion of the undergraduate program in Biomechanical Engineering leads to the conferral of the Bachelor of Science in Engineering. The subplan "Biomechanical Engineering" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN BIOMECHANICAL ENGINEERING

The mission of the undergraduate program in Biomechanical Engineering is to help students address health science challenges by applying engineering mechanics and design to the fields of biology and medicine. The program is interdisciplinary in nature, integrating engineering course work with biology and clinical medicine. Research and teaching in this discipline focus primarily on neuromuscular, musculoskeletal, cardiovascular, and cell and tissue biomechanics. This major prepares students for graduate studies in bioengineering, medicine or related areas.

REQUIREMENTS

Mathematics (21 units minimum; see Basic Requirement 1)	
Science (22 units minimum)[1]	
CHEM 31X *or* A,B. (required)	4-8
BIO 44X. Biology Labs (WIM)	4
Biology or Human Biology A/B core courses	10
Additional units from School of Engineering approved list	
Technology in Society (one course required; see Basic Requirement 4)	3-5
Engineering Topics (Engineering Science and Design):	
Engineering Fundamentals (minimum three courses; see Basic Requirement 3):	
ENGR 14. Applied Mechanics: Statics	3
ENGR 25. Biotechnology	3
Fundamentals Elective	3-5
Engineering Depth:	
ENGR 15. Dynamics	3
ENGR 30. Engineering Thermodynamics	3
ME 70. Introductory Fluids Engineering	4
ME 80. Mechanics of Materials	4
ME 389 or BIOE 393. Seminar	1
Options to complete the ME depth sequence (3 courses, minimum 9 units):	
ENGR 105. Feedback Control Design	3
ME 101. Visual Thinking	3
ME 103D. Engineering Drawing and Design	1
ME 112. Mechanical Engineering Design	4
ME 113. Mechanical Engineering Design	4
ME 131A. Heat Transfer	3-4
ME 131B. Fluid Mechanics	4
ME 140. Advanced Thermal Systems	5
ME 161. Dynamic Systems	4
ME 203. Manufacturing and Design	3-4
ME 210. Introduction to Mechatronics	4
ME 220. Introduction to Sensors	3-4
Options to complete the BME depth sequence (3 courses, minimum 9 units):	
BIOE 282. Performance, Development, and Adaptation of Skeletal Muscle	3
ME 280. Skeleton Development and Evolution	3
ME 281. Biomechanics of Movement	3
ME 284A. Cardiovascular Bioengineering	3
ME 284B. Cardiovascular Bioengineering	3
ME 294. Medical Device Design	3
ME 239. Mechanics of the Cell	3

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 Science must include both Chemistry and Physics with one year of course work (3 courses) in at least one, two courses of HUMBIO core or BIO core, and CHEM 31A and B or X, *or* ENGR 31. CHEM 31A and B are considered one course even though given over two quarters.

BIOMEDICAL COMPUTATION (BMC)

Completion of the undergraduate program in Biomedical Computation leads to the conferral of the Bachelor of Science in Engineering. The subplan "Biomedical Computation" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN BIOMEDICAL COMPUTATION

The mission of the undergraduate program in Biomedical Computation is to prepare students to work at the cutting edge of the interface between computer science, biology, and medicine. Students in the major gain a foundation in the biological and computational disciplines. They learn techniques of informatics and simulation and their countless applications in understanding and analyzing biology at all levels, from individual molecules in cells to entire organisms and populations. Students in the program select an in-depth focus area, and participate in a substantial research project with a faculty member. The Biomedical Computation major prepares students to enter a wide range of cutting-edge fields in academia and industry.

REQUIREMENTS

Mathematics (21 unit minimum; see Basic Requirement 1)
- MATH 41. Calculus 5
- MATH 42. Calculus 5
- STATS 116. Theory of Probability[1] 5
- CS 103. Mathematical Foundations of Computing 5

Science (17 units minimum; see Basic Requirement 2)
- PHYSICS 41. Mechanics 4
- CHEM 31X *or* A/B. Chemical Principles 4
- CHEM 33. Structure and Reactivity 4
- BIO 41. Evolution, Genetics, Biochemistry *or* HUMBIO 2A. Genetics, Evolution, and Ecology 5
- BIO 42. Cell Biology, Dev. Biology, and Neurobiology *or* HUMBIO 3A. Cell and Developmental Biology 5
- BIO 43. Plant Biology, Evolution, and Ecology *or* HUMBIO 4A. The Human Organism 5

Engineering Fundamentals (two different courses required):
- CS 106B (*or* CS 106X). Programming Abstractions (*or* Accelerated) 5

For the second required course, see concentrations

Technology in Society (one course required; see Basic Requirement 4) 3-5

Engineering
- CS 107. Computer Organization and Systems 5
- CS 161. Data Structures and Algorithms 4
- One of CS 270, 273A, 274, 275, 278, 279 3
- Research: 6 units of biomedical computation research in any department[2,3] 6

Engineering Depth Concentration (choose one of the following concentrations):[7]

Cellular/Molecular Concentration (10 courses):
- Mathematics: one of the following courses: 5
  - CME 100. Vector Calculus for Engineers
  - STATS 141. Biostatistics
  - MATH 51. Advanced Calculus
  - One additional Engineering Fundamental[4] 3-5
- Biology (four courses):
  - BIO 129A. Cell Dynamics I 4
  - BIO 129B. Cell Dynamics II 4
  - BIO 188. Biochemistry *or* CHEM 135. Physical Chemistry *or* CHEM 171. Physical Chemistry 3
  - BIO 203. Advanced Genetics *or* BIO 118. Genetic Analysis of Biological Processes 4
- Informatics Electives (two courses)[5,6] 6-10
- Simulation Electives (two courses)[5,6] 6-10
- Simulation, Informatics, or Cell/Mol Elective (one course)[5,6] 3-5

Informatics Concentration:
- Mathematics: One of the following courses:
  - STATS 141. Biostatistics 4
  - STATS 203. Intro to Regression Models and ANOVA 3
  - STATS 205. Intro to Nonparametric Statistic 3
  - STATS 215. Statistical Models in Biology 3
  - STATS 225. Bayesian Analysis 3
  - One additional Engineering Fundamental[4] 3-5
- Informatics Core (three courses)
  - Choose one: CS 145. Databases *or* CS 147. HCI 4
  - Choose one: CS 121/122, CS 228, CS 229 *or* CS 223B 3-4
  - One additional course from the previous two lines 3-4
- Informatics Electives (three courses)[5,6] 9-15
- Cellular Electives (two courses)[5,6] 6-10
- Organs Electives (two courses)[5,6] 6-10

Organs/Organisms Concentration:
- Mathematics (one of the following courses):
  - CME 100. Vector Calculus for Engineers 5
  - STATS 141. Biostatistics 5
  - MATH 51. Advanced Calculus 5
  - One additional Engineering Fundamental[4] 3
- Biology (two courses)
  - BIO 112. Human Physiology 4
  - BIO 188. Biochemistry I *or* BIOE/RAD 220. Introduction to Imaging 3
  - Two additional Organs Electives[5,6] 6-10
- Simulation Electives (two courses)[5,6] 6-10
- Informatics Electives (two courses)[5,6] 6-10
- Simulation, Informatics, or Organs Elective (one course)[5,6] 3-5

Simulation Concentration:
- Mathematics:
  - CME 100 *or* MATH 51. Advanced Calculus I 5
- Engineering Fundamentals:
  - ENGR 30. Engineering Thermodynamics 3
- Simulation Core:
  - CME 102 or MATH 53. Advanced Calculus II 5
  - ENGR 80. Introduction to Biotechnology 3
  - BIOE 101. Systems Biology 4
  - BIOE 102. Systems Physiology & Design I 4
  - BIOE 102. Systems Physiology & Design II 4
- Simulation Electives (two courses)[5,6] 6-10
- Cellular Elective (one course)[5,6] 3
- Organs Elective (one course)[5,6] 3
- Simulation, Cellular, or Organs Elective one course)[5,6] 3-5

These requirements are subject to change; see http://bmc.stanford.edu for the most up-to date program description. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs.*

1 CS 109, MS&E 120, MS&E 220, EE 178, and CME 106 are acceptable substitutes for STATS 116.

2 Research projects require pre-approval of BMC Coordinators.

3 Research units taken as CS 191W or in conjunction with ENGR199W fulfill the Writing in the Major (WIM) requirement. CS 272, which does not have to be taken in conjunction with research, also fulfills the WIM requirement.

4 One 3-5 unit course required; CS 106A may not be used. See Fundamentals list in *Handbook for Undergraduate Engineering Programs*.

5 The list of electives is continually updated to include all applicable courses. For the current list of electives, see http://bmc.stanford.edu.

6 A course may only be counted towards one elective or core requirement; it may not be double-counted.

7 A total of 40 Engineering units must be taken. The core classes only provide 27 Engineering units, so the remaining units must be taken from within the electives.

CHEMICAL ENGINEERING (CHE)

Completion of the undergraduate program in Chemical Engineering leads to the conferral of the Bachelor of Science in Chemical Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN CHEMICAL ENGINEERING

Chemical engineers are responsible for the conception and design of processes for the purpose of production, transformation, and transportation of materials. This activity begins with experimentation in the laboratory and is followed by implementation of

the technology in full-scale production. The mission of the undergraduate program in Chemical Engineering is to develop students' understanding of the core scientific, mathematical, and engineering principles that serve as the foundation underlying these technological processes. The program's core mission is reflected in its curriculum which is built on a foundation in the sciences of chemistry, physics, and biology. Course work includes the study of applied mathematics, material and energy balances, thermodynamics, fluid mechanics, energy and mass transfer, separations technologies, chemical reaction kinetics and reactor design, and process design. The program provides students with excellent preparation for careers in the corporate sector and government, or for graduate study.

REQUIREMENTS

Mathematics:
- MATH 41, 42. 10
- CME 100. Vector Calculus for Engineers 5
  - *or* MATH 51 and 52. Calculus 10
- CME 102. Ordinary Differential Equations for Engineers
  - *or* MATH 53. Ordinary Differential Equations 5
- CME 104. Linear Algebra and Partial Differential Equations for Engineers 5
  - *or* CME 106. Intro to Probability and Statistics for Engineers 4

Science:
- CHEM 31X. Chemical Principles 4
  - *or* CHEM 31A,B. Chemical Principles I,II 8
- CHEM 33. Structure and Reactivity 4
- CHEM 35. Organic Monofunctional Compounds 4
- CHEM 36. Chemical Separations 3
- PHYSICS 41. Mechanics 4
- PHYSICS 43. Electricity and Magnetism 4

Technology in Society (one course required; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):
- ENGR 20/CHEMENG 20. Introduction to Chemical Engineering 3
- ENGR 25B/CHEMENG 25B. Biotechnology 3
- or ENGR 25E/CHEMENG 25E. Energy:Chemical Transformations for Production, Storage, and Use 3
- Fundamentals Elective 3-5

Chemical Engineering Depth (minimum 68 Engineering Science and Design units; see Basic Requirement 5):
- CHEMENG 10. The Chemical Engineering Profession 1
- CHEMENG 100. Chemical Process Modeling, Dynamics, and Control 3
- CHEMENG 110. Equilibrium Thermodynamics 3
- CHEMENG 120A. Fluid Mechanics 4
- CHEMENG 120B. Energy and Mass Transport 4
- CHEMENG 130. Separation Process 3
- CHEMENG 150. Biochemical Engineering 3
- CHEMENG 170. Kinetics and Reactor Design 3
- CHEMENG 180. Chemical Engineering Plant Design 3
- CHEMENG 185A. Chemical Engineering Laboratory A (WIM) 4
- CHEMENG 185B. Chemical Engineering Laboratory B 4
- CHEMENG 181. Biochemistry I 3
- CHEM 130. Qualitative Organic Analysis 4
- CHEM 131. Organic Polyfunctional Compounds 3
- CHEM 171. Physical Chemistry: Chemical Thermodynamics 3
- CHEM 173. Physical Chemistry: Quantum Chemistry 3
- CHEM 175. Physical Chemistry 3
- Two courses required*:
  - CHEMENG 140. Micro and Nanoscale Fabrication 3
  - CHEMENG 160. Polymer Science and Engineering 3
  - CHEMENG 174. Environmental Microbiology I 3
  - CHEMENG 183. Biochemistry II 3
  - *Any two acceptable except combining 174 and 183

Unit count is higher if program includes one or more of the following: MATH 20 series, MATH 50 series (in lieu of the CME math courses), or CHEM 31A,B (in lieu of CHEM 31X). The above requirements are subject to change. The final requirements are published with representative sequences of courses in the *Handbook for Undergraduate Engineering Programs*. Handbooks are available at http://ughb.stanford.edu or from the department or school.

CIVIL ENGINEERING (CE)

Completion of the undergraduate program in Civil Engineering leads to the conferral of the Bachelor of Science in Civil Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN CIVIL ENGINEERING

The mission of the undergraduate program in Civil Engineering is to provide students with the principles of engineering and the methodology needed for civil engineering practice. This preprofessional program balances the fundamentals common to many specialties in civil engineering and allows for concentration in structures and construction or environmental and water studies. Students in the major learn to apply knowledge of mathematics, science, and civil engineering to conduct experiments, design structures and systems to creatively solve engineering problems, and communicate their ideas effectively. The curriculum includes course work in structural, construction, and environmental engineering. The major prepares students for careers in government and industry, and further graduate study.

REQUIREMENTS

Mathematics and Science (45 units minimum[1]; see Basic Requirements 1 and 2):

Technology in Society (one course; see Basic Requirement 4) 3-5

Engineering Fundamentals (three courses minimum; see Basic Requirement 3)
- ENGR 14. Applied Mechanics: Statics 3
- ENGR 60. Engineering Economy 3
- Fundamentals Elective 3-5

Engineering Depth (minimum of 68 Engineering Science and Design units; see Basic Requirement 5):
- CEE 70. Environmental Science and Technology 3
- CEE 100. Managing Sustainable Building Projects (WIM) 4
- CEE 101A. Mechanics of Materials 4
- CEE 101B. Mechanics of Fluids 4
- CEE 101C. Geotechnical Engineering 4
- Specialty courses in either Environmental and Water Studies[2]
  - *or* Structures and Construction[3] 39-40
- Other School of Engineering Electives 0-4

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 Mathematics must include CME 100/102 (or Math 51/53) and a Statistics class. Science must include PHYSICS 41, either CHEM 31A, CHEM 31X or ENGR 31; two additional quarters in either chemistry or physics, and GES 1. For students in the Environmental and Water Studies track, the additional chemistry or physics must include CHEM 33; for students in the Structures and Construction track, it must include PHYSICS 43 or 45.

2 Environmental and Water Studies: ENGR 30; CEE 101D, 160, 161A, 166A, 166B, 171, 172, 177, 179A; and either CEE 169 or 179C. Remaining specialty units from: CEE 63, 64, 109, 129, 164, 166D, 172A, 173A, 176A, 176B, 178, 199.

3 Structures and Construction: ENGR 50 or 50M; CEE 102, 156, 180, 181, 182, 183. Remaining specialty units from: ENGR 15, CME 104; CEE 101D, 111, 115, 122A,B, 129, 141A/B, 142A, 147, 151, 154, 159C, 160, 161A, 171, 176A, 176B, 195A/B, 196, 199, 203, and one of 110, 130, 131A, 134B, or 135A.

COMPUTER SCIENCE (CS)

Completion of the undergraduate program in Computer Science leads to the conferral of the Bachelor of Science in Computer Science.

MISSION OF THE UNDERGRADUATE PROGRAM IN COMPUTER SCIENCE

The mission of the undergraduate program in Computer Science is to develop students' breadth of knowledge across the sub-

ject areas of computer sciences, including their ability to apply the defining processes of computer science theory, abstraction, design, and implementation to solve problems in the discipline. Students take a set of core courses. After learning the essential programming techniques and the mathematical foundations of computer science, students take courses in areas such as programming techniques, automata and complexity theory, systems programming, computer architecture, analysis of algorithms, artificial intelligence, and applications. The program prepares students for careers in government, law, and the corporate sector, and for graduate study.

REQUIREMENTS

Mathematics (26 units minimum):
- CS 103. Mathematical Foundations of Computing[1] — 5
- CS 109. Introduction to Probability for Computer Scientists[2] — 5
- MATH 41, 42. Calculus[3] — 10
- Plus two electives[4]

Science (11 unit minimum):
- PHYSICS 41. Mechanics — 4
- PHYSICS 43. Electricity and Magnetism — 4
- Science Elective[5] — 3

Technology in Society (one course; see Basic Requirement 4) — 3-5

Engineering Fundamentals (13 units; see Basic Requirement 3)
- CS 106B *or* X. Programming Abstractions (or Accelerated) — 5
- ENGR 40. Electronics — 5
- Fundamentals Elective (may not be 70A, B, or X) — 3-5

Writing in the Major (one course):
- CS 181W, 191W, 194W, 210B, 294W

Computer Science Core (15 units):
- CS 107. Computer Organization and Systems[6] — 5
- CS 110. Principles of Computer Systems[7] — 5
- CS 161. Data Structures and Algorithms[8] — 5

Computer Science Depth[9] (choose one of the following tracks; 25 units minimum):

Artificial Intelligence Track—
- CS 221. Artificial Intelligence: Principles and Techniques — 4
- Choose two of: CS 223A, 223B, 224M, 224N, 226, 227, 228, 229 — 6-8
- One additional course from the list above or the following: CS 124, 205A, 222, 224S, 224U, 224W, 225A 225B, 227B, 262, 276, 277, 279, 321, 323, 326A, 327A, 329 (with adviser consent), 374, 379 (with adviser consent); EE 263, 376A; ENGR 205, 209A; MS&E 251, 339, 351; STATS 315A, 315B — 3-4
- Track Electives: at least three additional courses from the lists above, the general CS electives list[10], or the following: CS 275, 278; EE 364A, 364B; ECON 286; MS&E 252, 352, 355; PHIL 152; PSYCH 202, 204A, 204B; STATS 200, 202, 205 — 9-13

Biocomputation Track—the Mathematics, Science, and Engineering Fundamentals requirements are non-standard for this track. See *Handbook for Undergraduate Engineering Programs* for details.)
- One of: CS 121, 221, 223B, 228, 229 — 3-4
- One of: CS 262, 270, 273A, 274, 275, 278, 279 — 3-4
- One additional course from the lists above or the following: CS 124, 145, 147, 148, 248 — 3-4
- One course from either the general CS electives list[10] or the list of Biomedical Computation (BMC) Informatics electives (see http://bmc.stanford.edu and select Informatics from the elective options) — 3-4
- One course from the BMC Informatics elective list — 3-4
- One course from either the BMC Informatics, Cellular/Molecular, or Organs/Organisms electives lists — 3-5
- One course from either the BMC Cellular/Molecular or Organs/Organisms electives lists — 3-5

Graphics Track—
- CS 148, 248 — 8
- One of[11]: CS 205A; CME 104, 108; MATH 52, 113 — 3-5
- Two of: CS 164, 178, 205B, 223B, 268, 348A, 348B, 448 — 6-8
- Track Electives: at least two additional courses from the lists above, the general CS electives list[10], or the following: ARTSTUDI 60, 70, 179; CS 48N, 326A; CME 302, 306, 324; EE 262, 264, 278, 368; ME 101; PSYCH 30, 221; STS 144 — 6-8

Human-Computer Interaction Track—
- CS 147, 247 — 8
- One of: CS 148, 376, 377, 378 — 3-4
- One of: CS 108, 124, 140, 142, 221, 229, 249A — 3-4
- One of: PSYCH 55, 252; MS&E 184; ME 101 — 3-6
- Track Electives: at least two additional courses from the lists above, the general CS electives list[10], or the following: ARTSTUDI 60; COMM 169; CME 340; CS 447 (with consent of undergraduate adviser), 448B (with adviser consent); ME 216A; PSYCH 205, 221 — 6-9

Information Track—
- CS 124, 145 — 8
- Two courses, from different areas: — 6-9
  - *Information-based AI applications*: CS 224N, 224S, 229
  - *Database and Information Systems:* CS 140, 142, 245, 246, 341, 345, 346, 347
  - *Information Systems in Biology:* CS 262, 270, 274
  - *Information Systems on the Web:* CS 224W, 276, 364B
- At least three additional courses from the above areas or the general CS electives list[10] — 9-14

Systems Track—
- CS 140 — 4
- One of: CS 143 or EE 108B — 3-4
- Two additional courses from the list above or the following: CS 144, 145, 149, 155, 240, 242, 243, 244, 245; EE 271, 282 — 6-8
- Track Electives: at least three additional courses selected from the list above, the general CS electives list[10], or the following: CS 240E, 244C, 244E, 315A, 315B, 341, 343, 344, 344E, 345, 346, 347, 349 (with adviser consent), 448; EE 382A, 382C, 384A, 384B, 384C, 384S, 384X, 384Y — 9-12

Theory Track—
- CS 154 — 4
- One of: CS 164, 255, 258, 261, 268, 361A, 361B, 365 — 3
- Two additional courses from the list above or the following: CS 143, 155, 157 or PHIL 151, 205A, 228, 242, 254, 259, 262, 354, 355, 357, 358, 359 (with consent of undergraduate adviser), 364A, 364B, 369 (with advisor consent), 374; MS&E 310 — 6-8
- Track Electives: at least three additional courses from the list above, the general CS electives list[10], or the following: CME 302, 305; PHIL 152 — 9-12

Unspecialized Track—
- CS 154 — 4
- One of: CS 140, 143 — 4
- One additional course from the list above or the following: CS 144, 155, 242, 244; EE 108B — 3-4
- One of: CS 121 or 221, 223A, 223B, 228, 229 — 3-4
- One of: CS 145, 147, 148, 248, 262 — 3-4
- At least two courses from the general CS electives list[10] — 6-8

Individually Designed Track—
- Students may propose an individually designed track. Proposals should include a minimum of seven courses, at least four of which must be CS courses numbered 100 or above. See *Handbook for Undergraduate Engineering Programs* for further information.

Capstone Project (3 units minimum)
- CS 191, 191W, 194, 194W, 210B, 294, 294W[12] — 3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Students who have taken either CS 103X or CS 103A,B are considered to have satisfied the CS103 requirement. Students who took CS103X are required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).

2 Students who completed STATS 116, MS&E 120, or CME 106 in Winter Quarter 2008-09 or earlier may count that course as satisfying the CS 109 requirement. These same courses taken in Spring Quarter 2008-09 or later cannot be used to satisfy the CS 109 requirement.

3 MATH 19, 20, and 21 may be taken instead of MATH 41 and 42 as long as at least 26 MATH units are taken.

4 The math electives list consists of: MATH 51, 103, 104, 108, 109, 110, 113; CS 157, 205A; PHIL 151; CME 100, 102, 104. Completion of MATH 52 and 53 counts as one math elective. Restrictions: MATH 51 and 103, or MATH 103 and 113, or CS 157 and PHIL 151, may not be used in combination to satisfy the math electives requirement. Students who have taken both MATH 51 and 52 may not count CME 100 as an elective. Courses counted as math electives cannot also count as CS electives, and vice versa.

5 The science elective may be any course of 3 or more units from the School of Engineering lists plus PSYCH 30 or 55; AP Chemistry and Physics also may be used to meet this requirement. Either of the PHYSICS sequences 61/63 or 21/23 may be substituted for 41/43 as long as at least 11 science units are taken.

6 The name of CS 107 has changed. The previous CS 107 course entitled Programming Paradigms also fulfills this requirement.

7 Students who completed CS 108 and either CS 140 or CS 143 by Winter Quarter 2008-09 or earlier, may choose to count CS 108 as satisfying the CS 110 requirement. In such a case, CS 108 may not also be counted as an elective and the student is required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).

8 Students who took CS 161 for 4 units are required to complete one additional unit in their track or elective courses (i.e., 26 total units for track and elective courses).

9 Students must satisfy the requirements for any one track. Track requirements plus electives should include a minimum of seven courses and total at least 25 units.

10 General CS Electives: CS 108, 121 or 221, 124, 140, 142, 143, 144, 145, 147, 148, 149, 154, 155, 156, 157 or PHIL 151, 164, 205A, 205B, 210A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 225A, 225B, 226, 227, 228, 228T, 229, 240, 241, 242, 243, 244, 244B, 245, 246, 247, 248, 249A, 249B, 254, 255, 256, 257, 258, 261, 262, 270, 271, 272, 273A, 274, 276, 277, 295; CME 108; EE 108B, 282.

11 CS 205A is recommended in this list for the Graphics track. Students taking CME 104 are also required to take its prerequisite, CME 102.

12 Independent study projects (CS 191 or 191W) require faculty sponsorship and must be approved by the adviser, faculty sponsor, and the CS senior project adviser (R. Plummer or P. Young). A signed approval form, along with a brief description of the proposed project, should be filed the quarter before work on the project is begun. Further details can be found in the *Handbook for Undergraduate Engineering Programs*.

COMPUTER SYSTEMS ENGINEERING (CSE)

Completion of the undergraduate program in Computer Systems Engineering leads to the conferral of the Bachelor of Science in Engineering. The subplan "Computer Systems Engineering" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN COMPUTER SYSTEMS ENGINEERING

The mission of the undergraduate program in Computer Systems Engineering is to introduce students to the design, analysis, and application of computers and computer-based systems. Through course and laboratory experiences, students learn the principles essential to defining, designing, and building both general purpose and application-specific computer systems. Course work emphasizes fundamental elements of electrical engineering and computer science as well as underlying circuit and logic technologies. The senior project provides a unique hands-on experience. The program prepares students for careers in industry or for graduate study.

REQUIREMENTS

Mathematics (25 units minimum):
- MATH 41, 42, 51. Calculus — 15
- MATH 52 *or* 53. Multivariable Math — 5
- CS 109. Introduction to Probability for Computer Scientists[1] — 5

Science (12 units):
- PHYSICS 41. Mechanics — 4
- PHYSICS 43. Electricity and Magnetism — 4
- PHYSICS 45. Light and Heat — 4

Technology in Society (one course required; see Basic Requirement 4) — 3-5

Engineering Fundamentals (13 units minimum; see Basic Requirement 3):
- ENGR 40. Introductory Electronics — 5
- ENGR 70B *or* 70X. Programming Abstractions *or* Accelerated (same as CS 106 B *or* X) — 5
- Fundamentals Elective (may not be ENGR 70A, B, *or* X) — 3-5

Writing in the Major (one course):
- CS 181W, 191W, 194W, 210B, 294W — 3-4

Computer Systems Engineering Core (32 units minimum):
- CS 103. Mathematical Foundations of Computing[2] — 5
- CS 107. Computer Organization and Systems[3] — 5
- CS 108. Object-Oriented Systems Design — 4
  - *or* CS 110. Principles of Computer Systems — 5
- EE 108A. Digital Systems I — 3 or 4
- EE 108B. Digital Systems II — 3 or 4
- Senior Project (CS 191, 191W, 194, 194W, 210B, 294, or 294W)[4] — 3

Plus two of the following:[5]
- EE 101A. Circuits I — 4
- EE 101B. Circuits II — 4
- EE 102A. Signals and Systems I — 4
- EE 102B. Signals and Systems II — 4

Computer Systems Engineering Depth:
(19-27 units; choose one of the following specializations):

Digital Systems Specialization:
- CS 140. Operating Systems — 4
  - or CS 143. Compilers
- EE 109. Digital Systems Design Lab — 4
- EE 271. VLSI Systems — 3

Plus three to four of the following:[6]
- CS 140 or 143 (if not counted above) — 4
- CS 144. Introduction to Computer Networking — 4
- CS 149. Parallel Programming — 4
- CS 240E. Embedded Wireless Systems — 3
- CS 244. Advanced Topics in Networking — 4
- CS 244E. Wireless Networking — 3
- EE 273. Digital Systems Engineering — 3
- EE 282. Computer Systems Architecture — 3

Robotics and Mechatronics Specialization
- CS 205A. Math for Robotics, Vision, Graphics — 3
- CS 223A. Introduction to Robotics — 3
- ME 210. Introduction to Mechatronics — 4
- ENGR 105. Feedback Control Design — 3

Plus two to three of the following:[6]
- AA 278. Optimal Control and Hybrid Systems — 3
- CS 223B. Introduction to Computer Vision — 3
- CS 225A. Experimental Robotics — 3
- CS 225B. Robot Programming Lab — 4
- CS 277. Experimental Haptics — 3
- ENGR 205. Introduction to Control Design — 3
- ENGR 206. Control System Design — 3-4
- ENGR 207A. Linear Control Systems I — 3
- ENGR 207B. Linear Control Systems II — 3

Networking Specialization:
- CS 140. Operating Systems — 4
- CS 144. Introduction to Computer Networking — 4

Plus four to five of the following:[6]
- CS 240. Advanced Topics in Operating Systems — 3
- CS 240E. Embedded Wireless Systems — 3
- CS 244. Advanced Topics in Networking — 4
- CS 244B. Distributed Systems — 3
- CS 244E. Wireless Networking — 3
- CS 249A. Object-Oriented Programming — 3
- CS 249B. Advanced Object-Oriented Programming — 3
- EE 179. Introduction to Communications — 3
- EE 276. Introduction to Wireless Personal Communications — 3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Students who complete STATS 116, MS&E 120, or CME 106 in Winter 2008-09 or earlier may count that course as satisfying the CS109 requirement. These same courses taken in Spring 2008-09 or later cannot be used to satisfy the CS 109 requirement.

2 Students who have taken either CS 103X or CS 103A, B are considered to have satisfied the CS 103 requirement. Students taking CS 103A,B may complete the lower number of elective courses in a given specialization (see footnote 6).

3 The name of CS 107 has changed. The previous CS 107 course entitled Programming Paradigms also fulfills this requirement.

4 Independent study projects (CS 191 or 191W) require faculty sponsorship and must be approved in advance by the adviser, faculty sponsor, and the CSE senior project adviser (R. Plummer or P. Young). A signed approval form and brief description of the proposed project should be filed the quarter before work on the project is begun. Further details can be found in the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu.

5 Students pursuing the Robotics and Mechatronics or Networking specializations must take EE 102A and B.

6 Students who take CS 103A,B may complete the lower number of elective courses in a given specialization (i.e., one less elective than students taking CS 103X or CS 103).

ELECTRICAL ENGINEERING (EE)

Completion of the undergraduate program in Electrical Engineering leads to the conferral of the Bachelor of Science in Electrical Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN ELECTRICAL ENGINEERING

The mission of the undergraduate program of the Department of Electrical Engineering is to augment the liberal education expected of all Stanford undergraduates, to impart a basic understanding of electrical engineering built on a foundation of physical science, mathematics, computing, and technology, and to provide majors in the department with knowledge of electrical engineering principles along with the required supporting knowledge of mathematics, science, computing, and engineering fundamentals. The program develops students' skills in performing and designing experimental projects and communicating their findings to the scientific community effectively. Students in the major are required to select one subdiscipline for specialization. Choices include computer hardware, computer software, controls, electronics, fields and waves, communication and signal processing, or solid state and photonic devices. The program prepares students for careers in government agencies, the corporate sector, or for future study in graduate or professional schools.

REQUIREMENTS

Mathematics:
- MATH 41, 42 — 10
- MATH 51 and 52, *or* CME 100/ ENGR 154 and CME 104/ENGR 155B — 10
- MATH 53 *or* CME 102/ENGR 155A — 5
- EE 178, STATS 116, MATH 151, *or* CME 106/ENGR 155C — 3-5

Science:
- PHYSICS (41, 43) *or* (61, 63) — 8
- Math or Science electives[1]: — 7-9

Technology in Society (one course; see Basic Requirement 4) — 3-5

Technical Writing: ENGR 102E (WIM corequisite for EE 108A) — 1

EE 100. The Electrical Engineering Profession — 1

Engineering Fundamentals (three courses minimum; see Basic Requirement 3):
- CS 106B *or* CS 106X — 5
- At least two additional courses, at least one of which is not in EE or CS — 6-10

Engineering Depth (minimum 68 Engineering Science and Design units; see Basic Requirement 5):
- Circuits: EE 101A,B — 8
- Signals Processing and Linear Systems: EE 102A,B — 8
- Digital Systems: EE 108A (Laboratory, WIM), 108B — 8
- Physics in Electrical Engineering: EE 41 or EE 141 — 3-5
- Specialty courses[2] — 9-12
- One course in Design[3]
- Electrical Engineering electives[4] — 9-20

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 A minimum of 12 science units must be taken. A minimum of 45 math and science units combined must be taken.

2 Three courses from one of the specialty areas shown below (consultation with an adviser in the selection of these courses is especially important):

Computer Hardware: EE 109, 271, 273, 282; CS 107

Computer Software: CS 107, 108, 140, 143, 145, 148, 194 (CS 144 *or* EE 284)

Controls: ENGR 105, 205, 206, 207A, 207B, 209A, 209B; EE 263

Circuits and Devices: EE 114, 116, 122, 133, 212, 214, 216, 271

Fields and Waves: EE 134, 141, 242, 246, 247, 252, 256

Communications and Signal Processing: EE 124, 133, 168, 179, 261, 263 (264 *or* 265), 276, 278, 279

Solid State and Photonic Devices: EE 116, 134, 136, 141, 216, 222, 223, 228, 235, 268

3 The design course may be part of the specialty sequence. The following courses satisfy this requirement: EE 109, 133, 134, 168, 256, 262, 265; CS 194, ENGR 206.

4 May include up to two additional Engineering Fundamentals. May include up to 10 units of EE 191. May include any CS 193 course.

ENGINEERING PHYSICS (EPHYS)

Completion of the undergraduate program in Engineering Physics leads to the conferral of the Bachelor of Science in Engineering. The subplan "Engineering Physics" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN ENGINEERING PHYSICS

The mission of the undergraduate program in Engineering Physics is to provide students with a strong foundation in physics and mathematics, together with engineering design and problem solving skills. All majors take high-level math and physics courses as well as engineering courses. This background prepares them to tackle complex problems in multidisciplinary areas that are at the forefront of 21st-century technology such as solid state devices, quantum optics and photonics, materials science, nanotechnology, electromechanical systems, energy systems, and any other engineering field that requires a solid background in physics. Because the program emphasizes science, mathematics, and engineering, students are well prepared to pursue graduate work in engineering, physics, or applied physics.

REQUIREMENTS

Mathematics (18 units):
- MATH 51 and 52. Multivariable Calculus *or* CME 100 and 104. Vector Calculus, Linear Algebra, PDE — 10
- MATH 53 or CME 102. Ordinary Differential Equations — 5
- MATH 131P. Partial Differential Equations I — 3

Science (15 units minimum):
- PHYSICS 41and 42. Mechanics and Lab[1] — 5
- PHYSICS 43 and 67[2]. Electricity and Magnetism and Lab — 5
- PHYSICS 45 and 46. Light and Heat and Lab — 5
- PHYSICS 70. Foundations of Modern Physics — 4

  or
- PHYSICS 61 and 62. Mechanics and Special Relativity and Lab[3] — 5
- PHYSICS 63 and 64. Electricity, Magnetism, and Waves and Lab — 5
- PHYSICS 65 and 67. Thermodynamics and Modern Physics and Lab — 6

Technology in Society (one course required; see Basic Requirement 4) — 3-5

Engineering Fundamentals (three courses minimum; CS 106A or X recommended) — 9-14

Engineering Physics Depth (core):
- Advanced Mathematics
- One advanced math elective such as EE 261, PHYSICS 112, CS 109, or CME 106. Also qualified are EE 263, any Math or Statistics course numbered 100 or above, and any CME course numbered 200 or above, except CME 206. — 3-4
- Intermediate Mechanics:
- ENGR 15. Dynamics — 3
  - *or* PHYSICS 110. Intermediate Mechanics — 4
- Intermediate Electricity and Magnetism:
- EE 141 and 242. Engineering Electromagnetics and Electromagnetic Waves — 7
  - *or* PHYSICS 120 and 121. Intermediate Electricity and Magnetism — 8
- Numerical Methods:
- APPPHYS 215. Numerical Methods for Physicists and Engineers — 3
  - *or* CME 108. Introduction to Scientific Computing — 3-4
  - *or* CME 206/ME 300C. Intro to Numerical Methods for Engineering — 3
  - *or* PHYSICS 113. Computational Physics — 4

Electronics Lab:
- ENGR 40. Introductory Electronics — 5
  - *or* EE 101B. Circuits II — 3
  - *or* EE 122A. Analog Circuits Laboratory — 3
  - *or* PHYSICS 105. Analog Electronics — *3*
  - *or* APPPHYS 207. Laboratory Electronics — 3

Writing Lab (WIM):
- EE 108A and ENGR 102E. Digital Systems I — 4-5
  - *or* ME 203 and ENGR 102M. Manufacturing and Design — 5
  - *or* MATSCI 161. Nanocharacterization Laboratory — 4

or MATSCI 164. Electronic and Photonic Materials and Devices Laboratory	4
or PHYSICS 107. Experimental Techniques and Data Analysis	4
Quantum Mechanics:	
EE 222 and 223. Applied Quantum Mechanics I and II	6
or PHYSICS 130 and 131. Quantum Mechanics	8
Thermodynamics and Statistical Mechanics:	
PHYSICS 170 and 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics	8
or ME 346A. Introduction to Statistical Mechanics	3
Design Course (choose one of the following):	
CS 108. Object-Oriented Systems Design	3-4
EE 133. Analog Communications Design Laboratory	3-4
ME 203. Design and Manufacturing	4
ME 210 *or* EE 118. Introduction to Mechatronics	4
PHYSICS 108. Project Laboratory	3
Three courses from one specialty area:	9-12
Solid State Physics:	
APPPHYS 272. Solid State Physics I	3
APPPHYS 273. Solid State Physics II	3
EE 116. Semiconductor Device Physics	3
EE 216. Principles and Models of Semiconductor Devices	3
MATSCI 199. Electronic and Optical Properties of Solids	4
PHYSICS 172. Solid State Physics	3
Photonics:	
EE 216. Principles and Models of Semiconductor Devices	3
EE 231. Introduction to Lasers	3
EE 232. Laser Dynamics	3
EE 234. Photonics Laboratory	3
EE 243. Semiconductor Optoelectronic Devices	3
EE 268. Introduction to Modern Optics	3
MATSCI 199. Electronic and Optical Properties of Solids	4
Materials Science: Any MATSCI courses numbered 151 to 199 (except 159Q) or PHYSICS 172	
Electromechanical System Design:	
ME 80. Mechanics of Deformable Bodies	4
ME 112. Mechanical Systems Design	4
ME 210 or EE 118. Introduction to Mechatronics	4
Energy Systems:	
ME 131A. Heat Transfer	3-4
ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery	4
ME 140. Advanced Thermal Systems	5
Renewable Energy:	
EE 293A. Fundamentals of Energy Processes	3-4
EE 293B. Fundamentals of Energy Processes	3
MATSCI 156. Solar Cells, Fuel Cells and Batteries	4
MATSCI 302. Solar Cells	3
MATSCI 316. Nanoscale Science, Engineering, and Technology	3
ME 260. Fuel Cell Science Technology	3

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 PHYSICS 42, Mechanics Lab (1 unit), recommended in 2010-11; required in 2011-12

2 PHYSICS 67, Electricity and Magnetism Lab (1 unit), recommended in place of PHYSICS 44

3 PHYSICS 62, Mechanics Lab (1 unit), recommended in 2010-11; required in 2011-12

ENVIRONMENTAL ENGINEERING (ENV)

Completion of the undergraduate program in Environmental Engineering leads to the conferral of the Bachelor of Science in Environmental Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN ENVIRONMENTAL ENGINEERING

The mission of the undergraduate program in Environmental Engineering is to equip students with the problem solving skills and knowledge necessary to assess and develop solutions to environmental problems impacting the biosphere, land, water, and air quality. Courses in the program are multidisciplinary in nature, combining fundamental principles drawn from physics, chemistry, geology, engineering, and biology. Students learn about the analytical methods necessary to evaluate environmental changes and to design strategies to prevent or remediate problems that inevitably result from human activities. The program prepares students for careers in consulting, industry, and government, and for graduate school in engineering.

REQUIREMENTS

Mathematics and Science (see Basic Requirement 1 and 2)	45 units[1]
Technology in Society[2] (one course; see Basic Requirement 4)	3-5
Engineering Fundamentals (three courses minimum; see Basic Requirement 3):	
ENGR 30. Engineering Thermodynamics	3
ENGR 60. Engineering Economy	3
Fundamentals Elective	3-5
Engineering Depth (minimum of 68 Engineering Science and Design units; see Basic Requirement 5):	
CEE 64. Air Pollution: From Urban Smog to Global Change	3
CEE 70. Environmental Science and Technology	3
CEE 100. Managing Sustainable Building Projects (WIM)	4
CEE 101B. Mechanics of Fluids	4
CEE 101D. Computations in CEE	3
CEE 160. Mechanics of Fluids Laboratory	2
CEE 161A. Rivers, Streams, and Canals	3
CEE 166A. Watersheds and Wetlands	3
CEE 166B. Floods and Droughts, Dams, and Aqueducts	3
CEE 171. Environmental Planning Methods	3
CEE 172. Air Quality Management	3
CEE 177. Aquatic Chemistry and Biology	4
CEE 179A. Water Chemistry Laboratory	2
Capstone design experience: CEE 169 or 179C	5
CEE Breadth Electives[3]	10
Other School of Engineering Electives	0-4

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 Math must include CME 100/102 (or Math 51/53) and a Statistics course. Science must include PHYSICS 41; one of ENGR 31, CHEM 31A *or* CHEM 31X; CHEM 33; GES 1; and one other physics or chemistry class for at least 3 units.

2 Should choose a class that specifically includes an ethics component, such as STS 101, 110 or 115; COMM 169; CS 181; or MS&E 181.

3 Breadth electives currently include CEE 63, 101C, 109, 129, 164, 166D, 169, 172A, 173A, 176A, 176B, 178, and 199.

INDIVIDUALLY DESIGNED MAJORS IN ENGINEERING (IDMENS)

Completion of the undergraduate program in Individually Designed Majors in Engineering (IDMEN) leads to the conferral of the Bachelor of Science in an Individually Designed Major: (approved title). The approved title of the IDMEN also appears on the transcript.

MISSION OF THE UNDERGRADUATE PROGRAM IN INDIVIDUALLY DESIGNED MAJORS IN ENGINEERING

The mission of the undergraduate program in Individually Designed Majors in Engineering (IDMEN) is to provide students with an understanding of engineering principles and the analytical and problem solving, design, and communication skills necessary to be successful in the field. The B.S. for IDMENs is intended for undergraduates interested in pursuing engineering programs that, by virtue of their focus and intellectual content, cannot be accommodated by existing departmental majors or the pre-approved School of Engineering majors. Core courses in the curriculum include engineering fundamentals, mathematics, technology in society, and the sciences. Students then take additional courses pertinent to their IDMEN major. The program prepares students for careers in government and the corporate sector, and for graduate study.

B.S. IN INDIVIDUALLY DESIGNED MAJORS IN ENGINEERING

The B.S. degree for IDMENs is intended for undergraduates interested in pursuing engineering programs that, by virtue of their focus and intellectual content, cannot be accommodated by existing departmental majors or the pre-approved School of Engineering majors. IDMEN curricula are designed by students with the assistance of two faculty advisers of their choice and are submitted to the Undergraduate Council's Subcommittee on Individually Designed Majors. The degree conferred is "Bachelor of Science in Individually Designed Major in Engineering: (approved title)."

Students must submit written proposals to the IDMEN subcommittee detailing their course of study. Programs must meet the following requirements: mathematics (21 unit minimum, see Basic Requirement 1 below), science (17 units minimum, see Basic Requirement 2 below), Technology in Society (one approved course, see Basic Requirement 4 below), engineering (40 units minimum), and sufficient relevant additional course work to bring the total number of units to at least 90 and at most 107. Students may take additional courses pertinent to their IDMEN major, but the IDMEN proposal itself may not exceed 107 units. The student's curriculum must include at least three Engineering Fundamentals courses (choosing from ENGR 10, 14, 15, 20, 25, 30, 40, 50/50E/50M, 60, 62, 70A, 70B, 70X, 80). Students are responsible for completing the prerequisites for all courses included in their majors.

Each proposal should begin with a statement describing the proposed major. In the statement, the student should make clear the motivation for and goal of the major, and indicate how it relates to her or his projected career plans. The statement should specify how the courses to be taken relate to and move the student toward realizing the major's goal. A proposed title for the major should be included. The title approved by the IDMEN Subcommittee is listed on the student's official University transcript and on the diploma in this form: "Individually Designed Major in Subplan", where "Subplan" is the title approved by the IDMEN Subcommittee.

The proposal statement should be followed by a completed Program Sheet listing all the courses comprising the student's IDMEN curriculum, organized by the five categories printed on the sheet (mathematics, science, technology in society, additional courses, and engineering depth). Normally, the courses selected should comprise a well-coordinated sequence or sequences that provide mastery of important principles and techniques in a well-defined field. In some circumstances, especially if the proposal indicates that the goal of the major is to prepare the student for graduate work outside of engineering, a more general engineering program may be appropriate. A four-year study plan, showing courses to be taken each quarter, should also be included in the student's IDMEN proposal.

The proposal must be signed by two faculty members who certify that they endorse the major as described in the proposal and that they agree to serve as the student's permanent advisers. One of the faculty members, who must be from the School of Engineering, acts as the student's primary adviser. The proposal must be accompanied by a statement from that person giving an appraisal of the academic value and viability of the proposed major.

Students proposing IDMENs must have at least four quarters of undergraduate work remaining at Stanford after the quarter in which their proposals are first submitted. Any changes in a previously approved major must be endorsed by the advisers and reapproved by the IDMEN subcommittee. A request by a student to make changes in her or his approved curriculum must be made sufficiently far in advance so that, should the request be denied, adequate time remains to complete the original, approved curriculum. Proposals are reviewed and acted upon once a quarter. Forms may be obtained from the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu. Completed proposals should be submitted to Darlene Lazar in the Office of Student Affairs, Huang Engineering Center, Suite 135. An IDMEN cannot be a student's secondary major.

MANAGEMENT SCIENCE AND ENGINEERING (MS&E)

Completion of the undergraduate program in Management Science and Engineering leads to the conferral of the Bachelor of Science in Management Science and Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN MANAGEMENT SCIENCE AND ENGINEERING

The mission of the undergraduate program in Management Science and Engineering is to provide students with the fundamentals of engineering systems analysis so that they are able to plan, design, and implement complex economic and technical management systems. The program builds on the foundational courses for engineering including calculus, engineering fundamentals, and physics or chemistry as well as management science. Students may select courses in computer science, information, organizational theory, mathematical modeling, optimization, probability, statistics and finance or production. To allow for greater in-depth exploration in a particular area, students then choose a concentration area. The major prepares students for a variety of career paths, including facilities and process management, investment banking, management consulting or for graduate school in industrial engineering, operations research, economics, public policy, medicine, law, or business.

REQUIREMENTS

Mathematics (7 courses and 32 units minimum[1]; see Basic Requirement 1):	
MATH 41. Calculus	5
MATH 42. Calculus	5
MATH 51. Linear Algebra and Differential Calculus of Several Variables	5
MATH 53. Ordinary Differential Equations with Linear Algebra	5
MS&E 120. Probabilistic Analysis	5
MS&E 121. Introduction to Stochastic Modeling	4
STATS 110 *or* 200. Statistical Methods/Inference	3-5
Science (3 courses and 11 units minimum[1]; see Basic Requirement 2):	
One of the following three sequences:	
CHEM 31B *or* X, and 33	8
PHYSICS 21, 22, 23, and 24	8
PHYSICS 41 and 43	8
Science Elective	3
Technology in Society (one course[2]; see Basic Requirement 4)	3-5
Engineering Fundamentals (three courses minimum; see Basic Requirement 3):	
CS 106A. Programming Methodology[3]	5
ENGR 25. Biotechnology *or* ENGR 40. Introduction to Electronics *or* ENGR 80. Introduction to Bioengineering	3-5
Fundamentals Elective[4]	3-5
Engineering Depth (core; all required):	26-29
CS 106B *or* CS 106X. Programming Abstractions	5
or CS 103. Math Foundations of Computing	5
or CME 108. Intro to Scientific Computing	4
ENGR 60. Engineering Economy[4]	3
MS&E 108. Senior Project	5
MS&E 111. Introduction to Optimization[4]	4
MS&E 130 *or* 134. Information[5]	3-4
MS&E 142 *or* 260. Investment Science or Production[6]	3-4
MS&E 180. Organizations: Theory and Management	4
Engineering Depth (concentration: choose one of the following 5 concentrations; 7 courses minimum):[7]	24-30
Financial and Decision Engineering Concentration:	27-30
ECON 50. Economic Analysis I	5
ECON 51. Economic Analysis II	5
MS&E 140. Industrial Accounting	4
MS&E 152. Introduction to Decision Analysis (WIM)	4
MS&E 245G *or* 247S. Finance	3-4

Two of the following courses:	
ENGR 145. Technology Entrepreneurship[8]	4
FINANCE 323. International Financial Management	4
MS&E 107. Interactive Management Science	3
MS&E 223. Simulation	3
MS&E 250A. Engineering Risk Analysis	3
MS&E 260. Production/Operating Systems[6]	4
Operations Research Concentration:	24-27
MATH 113. Linear Algebra and Matrix Theory[8]	3
MATH 115. Functions of a Real Variable[8]	3
MS&E 112. Network and Integer Optimization	3
MS&E 142 *or* 260. Investment Science or Production[6]	3-4
MS&E 152. Introduction to Decision Analysis (WIM)	3-4
MS&E 241. Economic Analysis	3-4
MS&E 251. Stochastic Decision Models	3
STATS 202. Data Analysis[8]	3
Organization, Technology, and Entrepreneurship Concentration	24-29
At least one of the following courses:	
ECON 50. Economic Analysis I	5
PSYCH 70. Introduction to Social Psychology	4
SOC 114. Economic Sociology	5
At least two of the following courses:	
ENGR 145. Technology Entrepreneurship[8]	4
MS&E 175. Innovation, Creativity, and Change	4
MS&E 181. Issues in Technology and Work[8]	4
At least four of the following courses (may also include omitted courses from above: ENGR 145, MS&E 175, or MS&E 181):	
Organizations and Technology:	
CS 147. Intro Human Computer Interaction	4
ENGR 130. Science, Technology, and Contemporary Society[8]	4-5
MS&E 134. Organizations and Info Systems[5]	3-4
MS&E 185. Global Work	4
MS&E 189. Social Networks	3-4
Entrepreneurship and Innovation:	
MS&E 140. Industrial Accounting	3-4
MS&E 178. The Spirit of Entrepreneurship	3
MS&E 266. Management of New Product Development	4
Policy and Strategy Concentration:	25-30
ECON 50. Economic Analysis I	5
ECON 51. Economic Analysis II	5
MS&E 190. Policy and Strategy Analysis	3
At least four of the following courses, including at least one course in policy and at least one course in strategy:	
Policy:	
MS&E 193. Technology and National Security[8]	3
MS&E 197. Ethics and Public Policy (WIM)[8]	5
MS&E 243. Energy and Environmental Policy Analysis	3
MS&E 248. Economics of Natural Resources	3-4
MS&E 292. Health Policy Modeling	3
Strategy:	
ENGR 145. Technology Entrepreneurship[8]	4
MS&E 175. Innovation, Creativity, and Change	3-4
MS&E 266. Mgmt. of New Product Development	3-4
Production and Operations Management Concentration:	26-30
ECON 50. Economic Analysis I	5
ECON 51. Economic Analysis II	5
MS&E 140. Industrial Accounting	3-4
MS&E 152. Introduction to Decision Analysis (WIM)	4
and three of the following courses:	
MS&E 142 *or* 245G. Investment Science/Finance	3-4
MS&E 262. Supply Chain Management	3
MS&E 263. Internet-Enabled Supply Chains	3
MS&E 264. Sustainable Product Development and Manufacturing	3
MS&E 265. Supply Chain Logistics	4
MS&E 266. Management of New Product Development	3-4
MS&E 268. Operations Strategy	3

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 Math and Science must total a minimum of 45 units. Electives must come from the School of Engineering approved list, or PHYSICS 21, 22, 23, 24, 25, 26; PSYCH 55, 70. AP credit for Chemistry, Mathematics, and Physics may be used.

2 Technology in Society course must be one of the following MS&E approved courses: COMM 120, 169, CS 201, MS&E 181, 193 (WIM), STS 101/ENGR 130, STS 110/MS&E 197 (WIM), STS 115/ENGR 131, STS 160, 163, 170, 279.

3 Students may petition to place out of CS 106A.

4 Students may not count ENGR 60 or 62 for engineering fundamentals as those courses count toward engineering depth (core) and cannot be double counted.

5 Students may not count 134 for both core and the Organization, Technology, and Entrepreneurship concentration.

6 Students may not count 142 or 260 for both core and concentration. Students doing the Financial and Decision Engineering concentration must take 142, students doing the Operations Research concentration must take both 142 and 260, and students doing the Production and Operations Management concentration must take 260.

7 Engineering fundamentals, engineering depth (core), and engineering depth (concentration) must total a minimum of 60 units.

8 Courses used to satisfy the Math, Science, Technology in Society, or Engineering Fundamental requirement may not also be used to satisfy an engineering depth requirement.

MATERIALS SCIENCE AND ENGINEERING (MATSCI)

Completion of the undergraduate program in Materials Science and Engineering leads to the conferral of the Bachelor of Science in Materials Science and Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN MATERIALS SCIENCE AND ENGINEERING

The mission of the undergraduate program in Materials Science and Engineering is to provide students with a strong foundation in materials science and engineering with emphasis on the fundamental scientific and engineering principles which underlie the knowledge and implementation of material structure, processing, properties, and performance of all classes of materials used in engineering systems. Courses in the program develop students' knowledge of modern materials science and engineering, teach them to apply this knowledge analytically to create effective and novel solutions to practical problems, and develop their communication skills and ability to work collaboratively. The program prepares students for careers in industry and for further study in graduate school.

REQUIREMENTS

Mathematics (20 units minimum; see Basic Requirement 1):	
MATH 51 and 52, *or* CME 100/ENGR 154 and CME 104/ENGR 155B	10
MATH 53 *or* CME 102/ENGR 155A	5
Science (20 units minimum; see Basic Requirement 2):	
Must include a full year of physics or chemistry, with one quarter of study in the other subject.	
Technology in Society (one course; see Basic Requirement 4)	3-5
Engineering Fundamentals (three courses minimum; see Basic Requirement 3)	
ENGR 50. Intro to Materials Science, Nanotechnology[1]	4
or ENGR 50E. Intro to Materials Science, Energy[1]	4
or ENGR 50M. Intro to Materials Science, Biomaterials[1]	4
At least two additional courses	6-9
Materials Science and Engineering Depth:	
Materials Science Fundamentals[2]	24
MATSCI 153. Nanostructure and Characterization	4
MATSCI 154. Solid State Thermodynamics	4
MATSCI 155. Nanomaterials Synthesis	4
MATSCI 157. Quantum Mechanics of Nanoscale Materials	4
And two additional courses	8
Engineering Depth: Choose four of the following lab courses:	16
MATSCI 160. Nanomaterials Laboratory	4
MATSCI 161. Nanocharacterization Laboratory (WIM)	4
MATSCI 162. X-Ray Diffraction Laboratory	4
MATSCI 163. Mechanical Behavior Laboratory	4
MATSCI 164. Electronic & Photonic Materials & De-	4

vices Lab (WIM)
Focus Area Options[3] 10

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 If both ENGR 50, 50E, and/or ENGR 50M are taken, one may be used for the Materials Science Fundamentals requirement.

2 Materials Science Fundamentals; 24 units (6 courses): MATSCI 153, 154, 155 and 157 are required, and choose 2 courses from ENGR 50, 50E, or 50M MATSCI 151,152, 156, 190, 192, 193, 194, 195, 196, 197, 198, 199. The MATSCI 150 series is designed specifically for undergraduates, while the 190 series represents more advanced courses.

3 Focus Area Options; 10 units from one of the following areas:

Bioengineering: BIOE 220, 281, 284A, 284B, 333, 381; MATSCI 190, 380, 381, 382

Chemical Engineering: CHEM 171; CHEMENG 130, 140, 150, 160

Chemistry: CHEM 151, 153, 171, 173, 175, 181, 183, 185

Electronics and Photonics: EE 101A, 101B, 102A, 102B, 116, 134, 136, 141

Energy Technology: EE 293A, 293B; MATSCI 302, 303; ME 260

Materials Characterization Techniques: MATSCI 320, 321, 323, 325, 326.

Mechanical Behavior and Design: AA 240A, 240B, 256; MATSCI 198, 358; ME 80 or CEE 101A, ME 203, 294

Nanoscience: BIOE 333, EE 136, ENGR 240, MATSCI 316, 320, 346, 347, 380

Physics: PHYSICS 70, 110, 120, 121,130, 131, 134 170, 171, 172.

Self-Defined Option: petition for a self-defined cohesive program, minimum of 10 units.

MECHANICAL ENGINEERING (ME)

Completion of the undergraduate program in Mechanical Engineering leads to the conferral of the Bachelor of Science in Mechanical Engineering

MISSION OF THE UNDERGRADUATE PROGRAM IN MECHANICAL ENGINEERING

The mission of the undergraduate program in Mechanical Engineering is to provide students with a balance of intellectual and practical experiences that enable them to address a variety of societal needs. The curriculum encompasses elements from a wide array of disciplines built around the themes of biomedicine, computational engineering, design, energy, and multiscale engineering. Course work may include mechatronics, computational simulation, solid and fluid dynamics, microelectromechanical systems, biomechanical engineering, energy science and technology, propulsion, sensing and control, and nano- and micro- mechanics, and design. The program prepares students for entry-level work as mechanical engineers and for graduate studies in either an engineering discipline or another field where a broad engineering background is useful.

REQUIREMENTS

Mathematics (24 units minimum[1]; see Basic Requirement 1) must include:
CME 102/ENGR 155A. Ordinary Differential Equations for Engineers
or MATH 53. Ordinary Differential Equations with Linear Algebra 5
and
CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers
or STATS 110. Statistical Methods in Engineering
or STATS 116. Theory of Probability 3-5
Science (21 units minimum[1]; see Basic Requirement 2):
CHEM 31X *or* ENGR 31 (recommended)
Technology in Society (one course from approved ME list;[2] see Basic Requirement 4) 3-5
Engineering Fundamentals: (three courses minimum; see Basic Requirement 3)
ENGR 40. Introductory Electronics (required) 5
ENGR 70A (same as CS 106A). Programming Methodology (required) 3-5
Fundamentals Elective[3] 3-5
Engineering Depth (minimum of 68 Engineering Science and Design ABET units; see Basic Requirement 5):
ENGR 14. Applied Mechanics: Statics 3
ENGR 15. Dynamics 3
ENGR 30. Engineering Thermodynamics 3
ENGR 102M. Technical Writing* 1
ME 70. Introductory Fluids Engineering 4
ME 80. Mechanics of Materials 4
ME 101. Visual Thinking 3
ME 103D. Engineering Drawing* 1
ME 112. Mechanical Engineering Design 4
ME 113. Mechanical Engineering Design 4
ME 131A. Heat Transfer 4
ME 131B. Fluid Mechanics 4
ME 140. Advanced Thermal Systems 5
ME 161. Dynamic Systems 4
ME 203. Manufacturing and Design* 4

*All three courses (ENGR 102M, ME 103D, ME 203) must be taken concurrently in order to fulfill the Writing in the Major (WIM) requirement.

Options to complete the ME depth sequence: see the list of options in the ME major section of the *Handbook for Undergraduate Engineering Programs*.

These requirements are subject to change. The final requirements are published with sample programs in the *Handbook for Undergraduate Engineering Programs*.

1 Math and science must total 45 units. Math: 24 units required and must include a course in differential equations (CME 102/ENGR 155A or MATH 53; one of these required) and Statistics (CME 106/ENGR 155C or STATS 110 or 116 is required—STATS 60/160 do not fulfill statistics requirement). Science: 21 units minimum and requires courses in Physics and Chemistry, with at least a full year (3 courses) in one or the other. CHEM 31A/B are considered one course because they cover the same material as CHEM 31X but at a slower pace. CHEM 31X or ENGR 31 are recommended.

2 ME majors must choose their TIS course from the following list: ME 190 (recommended; offered every other year), STS 101, 110, or 115; POLISCI 114S, or CS 281.

3 ME Fundamental elective may not be a course counted for other requirements. Students may opt to use ENGR 14, 15, or 30 from the required depth courses as the third fundamental class. However, total units for Engineering Topics (Fundamentals + Depth) must be a minimum of 68 units; additional options courses may be required to meet unit requirements.

PRODUCT DESIGN (PD)

Completion of the undergraduate program in Product Design leads to the conferral of the Bachelor of Science in Engineering. The subplan "Product Design" appears on the transcript and on the diploma.

MISSION OF THE UNDERGRADUATE PROGRAM IN PRODUCT DESIGN

The mission of the undergraduate program in Product Design is to graduate designers who can synthesize technology and aesthetics in the service of human need. The program teaches a design process that encourages creativity, craftsmanship, and personal expression, and emphasizes brainstorming and need finding. Students studying product design follow the basic mechanical engineering curriculum and are expected to meet the University requirements for a Bachelor of Science degree. The program emphasis is placed on conceptual thinking, creativity, risk taking, and aesthetics. Students are taught to use design processes to resolve constraints arising from technical, human, aesthetic, and business concerns. The course work provides students with the skills necessary to carry projects from initial concept to completion of working prototypes. The program prepares students for careers in industry and for graduate study.

REQUIREMENTS

Mathematics (20 units minimum)
Recommended: one course in Statistics
Science (22 units minimum):15 units must be from School of Engineering approved list[1]
One year of PHYSICS 40 series (required)
Behavioral Science[1] (8 units minimum):
PSYCH 1. Introduction to Psychology (required) 5
PSYCH elective from courses numbered 20-952 3-5
Mathematics and Science (maximum combined total of 45 units)
Technology in Society (one course):
ME 120. History of Philosophy of Design (required) 3-4
Engineering Fundamentals (three courses minimum): 13-15
ENGR 40 (required), 70A (required), plus one course from ENGR 10, 15, 20, 25, 30, 50, 50M, 60, 62
Product Design Engineering Depth (48 units minimum):
ARTSTUDI 60. Design I: Fundamental Visual Language 3

ARTSTUDI 160. Design II: The Bridge	3
One additional Art Studio course (ARTSTUDI 70 recommended)	3
ENGR 14. Applied Mechanics	3
ENGR 102M*. Technical/Professional Writing for ME Majors[3]	1
ME 80. Mechanics of Materials	4
ME 101. Visual Thinking	3
ME 103D*. Engineering Drawing	1
ME 110A. Design Sketching	1
ME 112. Mechanical Systems	4
ME 115A. Human Values in Design[2]	3
ME 115B. Introduction to Design Methods[2]	3
ME 115C. Design and Business Factors[2]	3
ME 116. Advanced Product Design: Formgiving	4
ME 203*. Manufacturing and Design[3]	4
ME 216A. Advanced Product Design: Needfinding	4
ME 216B. Advanced Product Design: Implementation	4

*These three courses (ENGR 102M, ME 103D, ME 203) must be taken concurrently in order to fulfill the Writing in the Major (WIM) requirement.

These requirements are subject to change. The final requirements are published with sample programs in the Handbook for Undergraduate Engineering Programs.

1 School of Engineering approved science list available at http://ughb.stanford.edu.

2 One quarter abroad may substitute for one of the ME 115-series classes.

3 Must be taken concurrently to fulfill the Writing in the Major requirement.

GRADUATE PROGRAMS IN THE SCHOOL OF ENGINEERING

ADMISSION

Application for admission with graduate standing in the school should be made to the graduate admissions committee in the appropriate department or program. While most graduate students have undergraduate preparation in an engineering curriculum, it is feasible to enter from other programs, including chemistry, geology, mathematics, or physics.

For further information and application instructions, see the department sections in this bulletin or http://gradadmissions.stanford.edu. Stanford undergraduates may also apply as coterminal students; details can be found under “Degree Program Options” in the "Undergraduate Programs in the School of Engineering" section of this bulletin.

FELLOWSHIPS AND ASSISTANTSHIPS

Departments and divisions of the School of Engineering award graduate fellowships, research assistantships, and teaching assistantships each year.

CURRICULA IN THE SCHOOL OF ENGINEERING

For further details about the following programs, see the department sections in this bulletin.

Related aspects of particular areas of graduate study are commonly covered in the offerings of several departments and divisions. Graduate students are encouraged, with the approval of their department advisers, to choose courses in departments other than their own to achieve a broader appreciation of their field of study. For example, most departments in the school offer courses concerned with nanoscience, and a student interested in an aspect of nanotechnology can often gain appreciable benefit from the related courses given by departments other than her or his own.

Departments and programs of the school offer graduate curricula as follows:

AERONAUTICS AND ASTRONAUTICS

- Aeroelasticity
- Aircraft Design, Performance, and Control
- Applied Aerodynamics
- Computational Aero-Acoustics
- Computational Fluid Dynamics
- Control of Robots, including Space and Deep-Underwater Robots
- Conventional and Composite Structures/Materials
- Direct and Large Eddy Simulation of Turbulence
- High-Lift Aerodynamics
- Hybrid Propulsion
- Hypersonic and Supersonic Flow
- Multidisciplinary Design Optimization
- Navigation Systems (especially GPNetworked and Hybrid Control
- Optimal Control, Estimation, System Identification
- Spacecraft Design and Satellite Engineering
- Turbulent Flow and Combustion

BIOENGINEERING

- Biomedical Computation
- Biomedical Devices
- Biomedical Imaging
- Cell and Molecular Engineering
- Regenerative Medicine

CHEMICAL ENGINEERING

- Applied Statistical Mechanics
- Biocatalysis
- Biochemical Engineering
- Bioengineering
- Biophysics
- Computational Materials Science
- Colloid Science
- Dynamics of Complex Fluids
- Energy Conversion
- Functional Genomics
- Hydrodynamic Stability
- Kinetics and Catalysis
- Microrheology
- Molecular Assemblies
- Nanoscience and Technology
- Newtonian and Non-Newtonian Fluid Mechanics
- Polymer Physics
- Protein Biotechnology
- Renewable Fuels
- Semiconductor Processing
- Soft Materials Science
- Solar Utilization
- Surface and Interface Science
- Transport Mechanics

CIVIL AND ENVIRONMENTAL ENGINEERING

- Atmosphere/Energy
- Construction Engineering and Management
- Design/Construction Integration
- Environmental Engineering and Science
- Environmental Fluid Mechanics and Hydrology
- Environmental and Water Studies
- Geomechanics
- Structural Engineering
- Sustainable Design and Construction

COMPUTATIONAL AND MATHEMATICAL ENGINEERING

- Applied and Computational Mathematics
- Computational Fluid Dynamics
- Computational Geometry and Topology

- Discrete Mathematics and Algorithms
- Numerical Analysis
- Optimization
- Partial Differential Equations
- Stochastic Processes

COMPUTER SCIENCE

See http://forum.stanford.edu/research/areas.php for a comprehensive list.

- Algorithmic Game Theory
- Analysis of Algorithms
- Artificial Intelligence
- Autonomous Agents
- Biomedical Computation
- Compilers
- Complexity Theory
- Computational Biology
- Computational Geometry
- Computational Logic
- Computational Photography
- Computational Physics
- Computer Architecture
- Computer Graphics
- Computer Security
- Computer Science Education
- Computer Vision
- Cryptography
- Database Systems
- Data Mining
- Digital Libraries
- Distributed and Parallel Computation
- Electronic Commerce
- Formal Verification
- Haptic Display of Virtual Environments
- Human-Computer Interaction
- Image Processing
- Information Management and Mining
- Machine Learning
- Mathematical Theory of Computation
- Mobile Computing
- Multi-Agent Systems
- Natural Language and Speech Processing
- Networks, Internet Infrastructure, and Distributed Systems
- Operating Systems
- Parallel Computing
- Probabilistic Models and Methods
- Programming Systems/Languages
- Robotics
- Robust System Design
- Scientific Computing and Numerical Analysis
- Sensor Networks
- Social Computing
- Social Networking
- Ubiquitous and Pervasive Computing
- Web Application Infrastructure

ELECTRICAL ENGINEERING

- Computer Hardware
- Computer Software Systems
- Control and Systems Engineering
- Communication Systems
- Dynamic Systems and Optimization
- Electronic Circuits
- Electronic Devices, Sensors, and Technology
- Fields, Waves, and Radioscience
- Image Systems
- Lasers, Optoelectronics, and Quantum Electronics
- Network Systems
- Signal Processing
- Solid State Materials and Devices
- VLSI Design

ENGINEERING

- Interdepartmental Programs
- Interdisciplinary Programs

MANAGEMENT SCIENCE AND ENGINEERING

- Decision and Risk Analysis
- Dynamic Systems
- Economics
- Entrepreneurship
- Finance
- Information
- Marketing
- Optimization
- Organization Behavior
- Organizational Science
- Policy
- Production
- Stochastic Systems
- Strategy

MATERIALS SCIENCE AND ENGINEERING

- Biomaterials
- Ceramics and Composites
- Computational Materials Science
- Electrical and Optical Behavior of Solids
- Electron Microscopy
- Fracture and Fatigue
- Imperfections in Crystals
- Kinetics
- Magnetic Behavior of Solids
- Magnetic Storage Materials
- Nanomaterials
- Photovoltaics
- Organic Materials
- Phase Transformations
- Physical Metallurgy
- Solid State Chemistry
- Structural Analysis
- Thermodynamics
- Thin Films
- X-Ray Diffraction

MECHANICAL ENGINEERING

- Biomechanics
- Combustion Science
- Computational Mechanics
- Controls
- Design of Mechanical Systems
- Dynamics
- Environmental Science
- Experimental Stress and Analysis
- Fatigue and Fracture Mechanics
- Finite Element Analysis
- Fluid Mechanics
- Heat Transfer
- High Temperature Gas Dynamics
- Kinematics
- Manufacturing
- Mechatronics

- Product Design
- Robotics
- Sensors
- Solids
- Thermodynamics
- Turbulence

MASTER OF SCIENCE IN THE SCHOOL OF ENGINEERING

The M.S. degree is conferred on graduate students in engineering according to the University regulations stated in the "Graduate Degrees" section of this bulletin, and is described in the various department listings. A minimum of 45 units is usually required in M.S. programs in the School of Engineering. The presentation of a thesis is not a school requirement. Further information is found in departmental listings.

MASTER OF SCIENCE IN ENGINEERING

The M.S. in Engineering is available to students who wish to follow an interdisciplinary program of study that does not conform to a normal graduate program in a department. There are three school requirements for the M.S. degree in Engineering:

1. The student's program must be a coherent one with a well-defined objective and must be approved by a department within the school.
2. The student's program must include at least 21 units of courses within the School of Engineering with catalog numbers of 200 or above in which the student receives letter grades.
3. The program must include a total of at least 45 units.

Each student's program is administered by the particular department in which it is lodged and must meet the standard of quality of that department. Transfer into this program is possible from any graduate program within the school by application through the appropriate department; the department will then recommend approval to the Office of Student Affairs in the School of Engineering.

ENGINEER IN THE SCHOOL OF ENGINEERING

The degree of Engineer is intended for students who want additional graduate training beyond that offered in an M.S. program. The program of study must satisfy the student's department and must include at least 90 units beyond the B.S. degree. The presentation of a thesis is required. The University regulations for the Engineer degree are stated in the "Graduate Degrees" section of this bulletin, and further information is available in the individual departmental sections of this bulletin.

DOCTOR OF PHILOSOPHY IN THE SCHOOL OF ENGINEERING

Programs leading to the Ph.D. degree are offered in each of the departments of the school. University regulations for the Ph.D. are given in the "Graduate Degrees" section of this bulletin. Further information is found in departmental listings.

HONORS COOPERATIVE PROGRAM

Industrial firms, government laboratories, and other organizations may participate in the Honors Cooperative Program (HCP), a program that permits qualified engineers, scientists, and technology professionals admitted to Stanford graduate degree programs to register for Stanford courses and obtain the degree on a part-time basis. In many areas of concentration, the master's degree can be obtained entirely online.

Through this program, many graduate courses offered by the School of Engineering on campus are made available through the Stanford Center for Professional Development (SCPD). SCPD delivers more than 250 courses a year on television and online. For HCP employees who are not part of a graduate degree program at Stanford, courses and certificates are also available through a non-degree option (NDO) and a non-credit professional education program. Non-credit short courses may be customized to meet a company's needs. For a full description of educational services provided by SCPD, see http://scpd.stanford.edu; call (650) 725-3000; fax (650) 725-2868; or email scpd-registration@stanford.edu.

OVERSEAS STUDIES COURSES IN ENGINEERING

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AERONAUTICS AND ASTRONAUTICS

Emeriti: (Professors) Peter Bradshaw, Arthur E. Bryson, Robert H. Cannon, Richard Christensen,* Daniel B. DeBra,* Bradford W. Parkinson,* J. David Powell,* Charles R. Steele, Stephen W. Tsai,* Walter G. Vincenti

Chair: Charbel Farhat

Professors: Brian J. Cantwell, Fu-Kuo Chang, Per Enge, Charbel Farhat, Antony Jameson, Ilan Kroo, Sanjiva Lele, Robert W. MacCormack, Stephen Rock, George S. Springer, Claire Tomlin

Associate Professors: Juan Alonso, Sanjay Lall

Assistant Professor: Sigrid Close

Courtesy Professors: C. W. Francis Everitt, J. Christian Gerdes, Ronald K. Hanson, Lambertus Hesselink

Consulting Professors: G. Scott Hubbard, Arif Karabeyoglu, Stanley Weiss, Gregory Zilliac

Consulting Assistant Professor: Steven Murray

* Recalled to active duty.

Phone: (650) 723-3317

Web Site: http://aa.stanford.edu

Courses offered by the Department of Aeronautics and Astronautics are listed under the subject code AA on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Aeronautics and Astronautics prepares students for professional positions in industry, government, and academia by offering a comprehensive program of graduate teaching and research. In this broad program, students have the opportunity to learn and integrate multiple engineering disciplines. The program emphasizes structural, aerodynamic, guidance and control, and propulsion problems of aircraft and spacecraft. Courses in the teaching program lead to the degrees of Master of Science, Engineer, and Doctor of Philosophy. Undergraduates and doctoral students in other departments may also elect a minor in Aeronautics and Astronautics.

Requirements for all degrees include courses on basic topics in Aeronautics and Astronautics, as well as in mathematics, and related fields in engineering and the sciences.

The current research and teaching activities cover a number of advanced fields, with emphasis on:

- Aeroelasticity and Flow Simulation
- Aircraft Design, Performance, and Control
- Applied Aerodynamics
- Computational Aero-Acoustics
- Computational Fluid Dynamics
- Computational Mechanics and Dynamical Systems
- Control of Robots, including Space and Deep-Underwater Robots
- Conventional and Composite Materials and Structures
- Direct and Large-Eddy Simulation of Turbulence
- High-Lift Aerodynamics
- Hybrid Propulsion
- Hypersonic and Supersonic Flow
- Multidisciplinary Design Optimization
- Navigation Systems (especially GPS)
- Optimal Control, Estimation, System Identification
- Spacecraft Design and Satellite Engineering
- Turbulent Flow and Combustion

MISSION OF THE UNDERGRADUATE PROGRAM IN AERONAUTICS AND ASTRONAUTICS

The mission of the undergraduate program in Aeronautics and Astronautics Engineering is to provide students with the fundamental principles and techniques necessary for success and leadership in the conception, design, implementation, and operation of aerospace and related engineering systems. Courses in the major introduce students to engineering principles. Students learn to apply this fundamental knowledge to conduct laboratory experiments and aerospace system design problems. Courses in the major include engineering fundamentals, mathematics, and the sciences, as well as in-depth courses in aeronautics and astronautics, dynamics, mechanics of materials, fluids engineering, and heat transfer. The major prepares students for careers in aircraft and spacecraft engineering, space exploration, air and space-based telecommunication industries, teaching, research, military service, and many related technology-intensive fields.

GRADUATE PROGRAMS IN AERONAUTICS AND ASTRONAUTICS

Admission—To be eligible to apply for admission to the department, a student must have a bachelor's degree in engineering, physical science, mathematics, or an acceptable equivalent. Students who have not yet received a master's degree in a closely allied discipline will be admitted to the master's program; eligibility for the Ph.D. program is considered after the master's year (see "Doctor of Philosophy" below). Applications for admission with financial aid (fellowships or assistantships) or without financial aid must be received and completed by December 7 for the next Autumn Quarter.

Information about admission to the Honors Cooperative Program is included in the "School of Engineering" section of this bulletin. The department may consider HCP applications for Winter or Spring quarters as well as for Autumn Quarter; prospective applicants should contact the department's student services office.

Further information and application forms for all graduate degree programs may be obtained from Graduate Admissions, the Registrar's Office, http://gradadmissions.stanford.edu.

Waivers and Transfer Credits—Students may receive departmental waivers of required courses for the M.S. degree in Aeronautics and Astronautics by virtue of substantially equivalent and satisfactorily performed course work at other institutions. A waiver petition (signed by the course instructor and adviser) should be submitted to the student services office indicating (1) the Stanford University course number and title, and (2) the institution, number(s), and title(s) of the course(s) wherein substantially equivalent material was treated. If a waiver is granted, the student must take an additional technical elective, chosen in consultation with their adviser, from graduate courses in Aeronautics and Astronautics. The total 45-unit requirement for the master's degree is not reduced by course waivers.

A similar procedure should be followed for transfer credits. The number of transfer credits allowed for each degree (Engineer and Ph.D.) is delineated in the "Graduate Degrees" section of this bulletin; transfer credit is not accepted for the M.S. degree. Transfer credit is allowed only for courses taken as a graduate student, after receiving a bachelor's degree, in which equivalence to Stanford courses is established and for which a grade of 'B' or better has been awarded. Transfer credits, if approved, reduce the total number of Stanford units required for a degree.

Fellowships and Assistantships—Fellowships and course or research assistantships are available to qualified graduate students. Fellowships sponsored by Gift Funds, Stanford University, and Industrial Affiliates of Stanford University in Aeronautics and Astronautics provide grants to several first-year students for the nine-month academic year to cover tuition and living expenses. Stanford Graduate Fellowships, sponsored by the University, provide grants for three full years of study and research; each year, the department is invited to nominate several outstanding doctoral or predoctoral students for these prestigious awards. Students who have excelled in their master's-level course work at Stanford are eligible for course assistantships in the department; those who have demonstrated research capability are eligible for research assistantships from individual faculty members. Students may also hold assistantships in other departments if the work is related to their

academic progress; the criteria for selecting course or research assistants are determined by each hiring department. A standard, 20 hours/week course or research assistantship provides a semi-monthly salary and an 8-10 unit tuition grant per quarter. Research assistants may be given the opportunity of additional summer employment. They may use their work as the basis for a dissertation or Engineer's thesis.

AERONAUTICS AND ASTRONAUTICS FACILITIES

The work of the department is centered in the William F. Durand Building for Space Engineering and Science. This 120,000 square foot building houses advanced research and teaching facilities and concentrates in one complex the Department of Aeronautics and Astronautics as well as some of the activities of the Mechanical Engineering Department.

The Durand Building also houses faculty and staff offices and several conference rooms. Attached to the building is a modern classroom building equipped for televising lectures; it contains a lecture auditorium.

Through the department's close relations with nearby NASA-Ames Research Center, students and faculty have access to one of the best and most extensive collections of experimental aeronautical research facilities in the world, as well as the latest generation of supercomputers.

GENERAL INFORMATION

Further information about the facilities and programs of the department is available at http://aa.stanford.edu, or from the department's student services office.

The department has a student branch of the American Institute of Aeronautics and Astronautics, which sponsors programs and speakers covering aerospace topics and social events. It also conducts visits to nearby research, government, and industrial facilities, and sponsors a Young Astronauts Program in the local schools.

BACHELOR OF SCIENCE IN ENGINEERING (AERONAUTICS AND ASTRONAUTICS)

Although primarily a graduate-level department, the program offers an undergraduate major in Aeronautics and Astronautics (AA) leading to the B.S. degree in Engineering and an undergraduate minor in Aeronautics and Astronautics. For further information, see the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu.

Undergraduates interested in aerospace are encouraged to combine either a minor or a coterminal M.S. in Aeronautics and Astronautics with a major in a related discipline (such as Mechanical or Electrical Engineering). Students considering these options are encouraged to contact the department's student services office.

COTERMINAL DEGREES PROGRAM IN AERONAUTICS AND ASTRONAUTICS

This special program allows Stanford undergraduates an opportunity to work simultaneously toward a B.S. in another field and an M.S. in Aeronautics and Astronautics. General requirements for this program and admissions procedures are described in the "School of Engineering" section of this bulletin. Admission is granted or denied through the departmental faculty Admissions and Awards Committee. A coterminal student must meet the course and scholarship requirements detailed for the M.S. below.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF SCIENCE IN AERONAUTICS AND ASTRONAUTICS

The University's basic requirements for the master's degree are outlined in the "Graduate Degrees" section of this bulletin. Students with an aeronautical engineering background should be able to qualify for the master's degree in three quarters of work at Stanford. Students with a bachelor's degree in Physical Science, Mathematics, or other areas of Engineering may find it necessary to take certain prerequisite courses, which would lengthen the time required to obtain the master's degree. The following are departmental requirements.

Grade Point Averages—A minimum grade point average (GPA) of 2.75 is required to fulfill the department's M.S. degree requirements; a minimum GPA of 3.4 is required for eligibility to attempt the Ph.D. qualifying examination. It is incumbent upon both M.S. and potential Ph.D. candidates to request letter grades in all courses except those that do not offer a letter grade option and those that fall into the categories of colloquia and seminars (for example, AA 297 and ENGR 298). Insufficient grade points on which to base the GPA may delay expected degree conferral or result in refusal of permission to take the qualifying examinations. Candidates with GPAs of 3.0 through 3.4 may request the permission of the candidacy committee to attempt the qualifying examinations.

The master's program (45 units) in Aeronautics and Astronautics (AA) is designed to provide a solid grounding in the basic disciplines. All candidates for this degree are expected to meet the basic course requirements in experimentation in aeronautics and astronautics, fluid mechanics, guidance and control, propulsion, and structural mechanics (category A below), in addition to work in applied mathematics (category B) and technical electives (category C).

A. *Basic Courses*—Candidates choose eight courses as follows:

1. One course in each basic area of Aeronautics and Astronautics:
   a. Experimentation: 241X, 236A, 257, 284B, or 290; or ENGR 205, 206, or 207A
   b. Fluids: one of 200 or 210A
   c. Guidance and Control: ENGR 105
   d. Propulsion: 283
   e. Structures: 240A
2. Three courses, one each from three of the areas below:
   a. Fluids: 200 (if 210A was taken or waived in item 1); or 210A (if 200 was taken or waived in item 1)
   b. Structures: 240B or 256
   c. Guidance and Control: 242A, 271A, or 279
   d. Aero/Astro elective: AA course numbered 200 and above, excluding seminars and independent research.

Candidates who believe they have satisfied a basic course requirement in previous study may request a waiver of one or more courses (see "Waivers and Transfer Credits" in the "Graduate Programs in Aeronautics and Astronautics" section of this bulletin).

B. *Mathematics Courses*—During graduate study, each candidate is expected to develop a competence in the applied mathematics pertinent to his or her major field. This requirement can be met by matriculating in a minimum of 6 units in either (1) applied mathematics (for example, complex variables, linear algebra, partial differential equations, probability), or (2) technical electives that strongly emphasize applied mathematics. A list of courses approved for the mathematics requirement is available in the departmental student services office. (Calculus, ordinary differential equations, and vector analysis are fundamental mathematics prerequisites, and do not satisfy the master's mathematics requirement.) Students planning to continue to the Ph.D. should note that 25 percent of the major-field Ph.D. qualifying examination is devoted to pertinent mathematics.

C. *Technical Electives*—Candidates, in consultation with their advisers, select at least four courses (totaling at least 12 units) in their major field from among the graduate-level courses offered by the departments of the School of Engineering and related science departments. This requirement increases by one course, taken in

either the major or peripheral fields, for each basic course that is waived. Normally, one course (3 units) in this category may be directed research. Courses taken in satisfaction of the other master's requirements (categories A, B, and D) may not also be counted as technical electives.

D. *Other Electives*—It is recommended that all candidates enroll in at least one humanities or social science course. Language classes qualify in this category, but practicing courses in, for example, art, music, and physical education do not qualify.

When planning their programs, candidates should check course descriptions carefully to ensure that all prerequisites have been satisfied. A course that is taken to satisfy a prerequisite for courses in category A (basic courses) or B (mathematics) cannot be counted as a technical elective, but can count toward the M.S. degree in category D (other electives).

MASTER OF SCIENCE IN ENGINEERING (AA)

Students whose career objectives require a more interdepartmental or narrowly focused program than is possible in the M.S. program in Aeronautics and Astronautics (AA) may pursue a program for an M.S. degree in Engineering (45 units). This program is described in the "Graduate Programs in the School of Engineering" section of this bulletin.

Sponsorship by the Department of Aeronautics and Astronautics in this more general program requires that the student file a proposal before completing 18 units of the proposed graduate program. The proposal must be accompanied by a statement explaining the objectives of the program and how the program is coherent, contains depth, and fulfills a well-defined career objective. The proposed program must include at least 12 units of graduate-level work in the department and meet rigorous standards of technical breadth and depth comparable to the regular AA Master of Science program. The grade and unit requirements are the same as for the M.S. degree in Aeronautics and Astronautics.

ENGINEER IN AERONAUTICS AND ASTRONAUTICS

The degree of Engineer represents an additional year (or more) of study beyond the M.S. degree and includes a research thesis. The program is designed for students who wish to do professional engineering work upon graduation and who want to engage in more specialized study than is afforded by the master's degree alone. It is expected that fulltime students will be able to complete the degree within two years of study after the master's degree.

The University's basic requirements for the degree of Engineer are outlined in the "Graduate Degrees" section of this bulletin. The following are department requirements.

The candidate's prior study program should have fulfilled the department's requirements for the master's degree or a substantial equivalent. Beyond the master's degree, a total of 45 units of work is required, including a thesis and a minimum of 30 units of courses chosen as follows:

1. 24 units of approved technical electives, of which 9 are in mathematics or applied mathematics. (A list of courses approved for the mathematics requirement is available in the departmental student services office.) The remaining 15 units are chosen in consultation with the adviser, and represent a coherent field of study related to the thesis topic. Suggested fields include: (a) acoustics, (b) aerospace structures, (c) aerospace systems synthesis and design, (d) analytical and experimental methods in solid and fluid mechanics, (e) computational fluid dynamics, and (f) guidance and control.
2. 6 units of free electives.
3. The remaining 15 units may be thesis, research, technical courses, or free electives.

Candidates for the degree of Engineer are expected to have a minimum grade point average (GPA) of 3.0 for work in courses beyond those required for the master's degree. All courses except seminars and directed research should be taken for a letter grade.

DOCTOR OF PHILOSOPHY IN AERONAUTICS AND ASTRONAUTICS

The University's basic requirements for the Ph.D. degree are outlined in the "Graduate Degrees" section of this bulletin. Department requirements are stated below.

Qualifications for candidacy for the doctoral degree are contingent on:

1. Having fulfilled department requirements for the master's degree or its substantial equivalent.
2. Maintaining a high scholastic record for graduate course work.
3. Completing 3 units of a directed research problem (AA 290 or an approved alternative).
4. In the first year of doctoral study, passing an oral Ph.D. qualifying examination given by the department during Autumn and Spring quarters.

Detailed information about the deadlines, nature, and scope of the Ph.D. qualifying examination can be obtained from the department. Research on the doctoral dissertation may not be formally started before passing this examination.

Beyond the master's degree, a total of 90 additional units of work is required, including a minimum of 36 units of approved formal course work (excluding research, directed study, and seminars). The courses should consist primarily of graduate courses in engineering and related sciences, and should form a strong and coherent doctoral program. At least 12 units must be from graduate-level courses in mathematics or applied mathematics (a list of approved courses is available from the department student services office). University requirements for continuous registration apply to doctoral students for the duration of the degree.

Dissertation Reading Committee—Each Ph.D. candidate is required to establish a reading committee for the doctoral dissertation within six months after passing the department's Ph.D. Qualifying exams. Thereafter, the student should consult frequently with all members of the committee about the direction and progress of the dissertation research.

A dissertation reading committee consists of the principal dissertation adviser and at least two other readers. Reading committees in Aeronautics and Astronautics often include faculty from another department. It is expected that at least two members of the AA faculty be on each reading committee. If the principal research adviser is not within the AA department, then the student's AA academic adviser should be one of those members. The initial committee, and any subsequent changes, must be officially approved by the department Chair.

University Oral and Dissertation—The Ph.D. candidate is required to take the University oral examination after the dissertation is substantially completed (with the dissertation draft in writing), but before final approval. The examination consists of a public presentation of dissertation research, followed by substantive private questioning on the dissertation and related fields by the University oral committee (four selected faculty members, plus a chair from another department). Once the oral has been passed, the student finalizes the dissertation for reading committee review and final approval. Forms for the University oral scheduling and a one-page dissertation abstract should be submitted to the department student services office at least three weeks prior to the date of the oral for departmental review and approval.

PH.D. MINOR IN AERONAUTICS AND ASTRONAUTICS

A student who wishes to obtain a Ph.D. minor in Aeronautics and Astronautics should consult the department office for designation of a minor adviser. A minor in Aeronautics and Astronautics may be obtained by completing 20 units of graduate-level courses in the Department of Aeronautics and Astronautics, following a program (and performance) approved by the department's candidacy chair.

The student's Ph.D. reading committee and University oral committee must each include at least one faculty member from Aeronautics and Astronautics.

BIOENGINEERING

Chair: Russ B. Altman
Co-Chair: Stephen R. Quake
Professors: Russ B. Altman, Annelise E. Barron, Dennis R. Carter, Scott L. Delp, Norbert J. Pelc, Stephen R. Quake, Matthew Scott, James R. Swartz, Paul Yock
Associate Professors: Kwabena Boahen, Karl Deisseroth, Charles Taylor
Assistant Professors: Zev David Bryant, Jennifer R. Cochran, Markus Willard Covert, Andrew Endy, Kerwyn C. Huang, Michael Lin, Manu Prakash, Ingmar Riedel-Kruse, Christina D. Smolke, Fan Yang

Courtesy Associate Professors: Jeffrey A. Feinstein, Garry E. Gold, Kim Butts Pauly
Affiliated Faculty: Serafim Batzoglou, Atul J. Butte, Rebecca Fahrig, Stuart B. Goodman, Sarah Heilshorn, Ellen Kuhl, Marc E. Levenston, Craig Levin, Sylvia K. Plevritis, Mark J. Schnitzer, Krishna V. Shenoy, Daniel Mark Spielman
Student Services: Clark Center, Room S-166
Mail Code: 94305-5444
Student Services Phone: (650) 736-2254
Web Site: http://bioengineering.stanford.edu

Courses offered by the Department of Bioengineering are listed under the subject code BIOE on the *Stanford Bulletin's* ExploreCourses web site.

Bioengineering is jointly supported by the School of Engineering and the School of Medicine. The facilities and personnel of the Department of Bioengineering are housed in the James H. Clark Center, the William F. Durand Building for Space Engineering and Science, the William M. Keck Science Building, the Jerry Yang and Akiko Yamazaki Environment and Energy Building, and the Richard M. Lucas Center for Magnetic Resonance Spectroscopy and Imaging.

The departmental headquarters is in the James H. Clark Center for Biomedical Engineering and Sciences, along with approximately 600 faculty, staff, and students from more than 40 University departments. The Clark Center is also home to Stanford's Bio-X program, a collaboration of the Schools of Engineering, Medicine, Humanities and Sciences, and Earth Sciences.

Courses in the teaching program lead to the degrees of Master of Science and Doctor of Philosophy. The department collaborates in research and teaching programs with faculty members in Chemical Engineering, Mechanical Engineering, Electrical Engineering, and departments in the School of Medicine. Quantitative biology is the core science base of the department. The research and educational thrusts are in biomedical computation, biomedical imaging, biomedical devices, regenerative medicine, and cell/molecular engineering. The clinical dimension of the department includes cardiovascular medicine, neuroscience, orthopedics, cancer care, neurology, and environment.

MISSION OF THE UNDERGRADUATE PROGRAM IN BIOENGINEERING

The mission of the Department of Bioengineering is to create a fusion of engineering and the life sciences that promotes scientific discovery and the development of new biomedical technologies and therapies through research and education. The Bioengineering (BIOE) major enables students to embrace biology as a new engineering paradigm and apply engineering principles to medical problems and biological systems. Students who major in BIOE obtain a solid background in the basic sciences (chemistry, physics, and biology) and mathematics. They take three engineering fundamentals courses including an introductory bioengineering course and computer programming. Starting in the sophomore year, BIOE students take six core classes to gain essential knowledge to pursue a career in bioengineering and then have the opportunity to pursue elective courses suited to their own interests. The major prepares students to continue on to graduate or medical school; work in the biotechnology, medical device, medical imaging, or other medical and non-medical industries; or pursue advanced degrees in business or law.

The department offers an undergraduate major in Bioengineering (BIOE) leading to the B.S. degree in Engineering. An undergraduate major in Biomechanical Engineering and an undergraduate major in Biomedical Computation, both of which lead to the B.S. degree in Engineering, are available through the School of Engineering. For further information, see the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu.

GRADUATE PROGRAMS IN BIOENGINEERING

The University's requirements for the M.S. and Ph.D. degrees are outlined in the "Graduate Degrees" section of this bulletin.

Admission—Students are expected to enter with a series of core competencies in mathematics, biology, chemistry, physics, computing, and engineering. Students entering the program are assessed by the examination of their undergraduate transcripts and research experiences. Specifically, the department requires that students have completed mathematics through multivariable calculus and differential equations, completed a series of undergraduate biology courses (equivalent to the BIO 41,42,43 series) and completed physics, chemistry, and computer sciences courses required of all undergraduate majors in engineering.

Qualified applicants are encouraged to apply for predoctoral national competitive fellowships, especially those from the National Science Foundation. Applicants to the Ph.D. program should consult with their financial aid officers for information and applications.

The deadline for receiving applications is December 7, 2010.

Further information and application forms for all graduate degree programs may be obtained from Graduate Admissions, the Registrar's Office, http://gradadmissions.stanford.edu.

BACHELOR OF SCIENCE IN ENGINEERING (BIOENGINEERING)

The department offers an undergraduate major in Bioengineering (BIOE) leading to the B.S. degree in Engineering. For additional information, see the *Handbook for Undergraduate Engineering Programs* at http://ughb.stanford.edu.

COTERMINAL B.S./M.S. PROGRAM IN BIOENGINEERING

This option is available to outstanding Stanford undergraduates who wish to work simultaneously toward a B.S. in another field and an M.S. in Bioengineering. The degrees may be granted simultaneously or at the conclusion of different quarters, though the bachelor's degree cannot be awarded after the master's degree has been granted. The University minimum requirements for the coterminal bachelor's/master's program are 180 units for the bachelor's degree plus 45 unduplicated units for the master's degree. Students may apply for the coterminal B.S. and M.S. program after 120 undergraduate units have been completed, and they must be accepted into our program one quarter before receiving the B.S. degree. Students should apply directly to the Bioengineering Student Service Office by December 7, 2010. Students interested in the coterminal degree must take the Graduate Record Examination (GRE); applications may be obtained at http://www.gre.org. Prospective applicants should see the application form, instructions, and supporting documents at http://bioengineering.stanford.edu/education/coterminal.html. University regulations and forms concerning coterminal degree programs are available at http://registrar.stanford.edu/shared/ publications.htm#Coterm.

The application must provide evidence of potential for strong academic performance as a graduate student. The application is evaluated and acted upon by the graduate admissions committee of

the department. Students are expected to enter with a series of core competencies in mathematics, biology, chemistry, physics, computing, and engineering. Typically, a GPA of at least 3.5 in engineering, science, and math is expected.

MASTER OF SCIENCE IN BIOENGINEERING

The Master of Science in Bioengineering requires 45 units of course work. The curriculum consists of core bioengineering courses, technical electives, seminars and unrestricted electives. Core courses focus on quantitative biology and biological systems analysis. Approved technical electives are chosen by the student in consultation with his/her graduate adviser, and can be selected from graduate course offerings in mathematics, statistics, engineering, physical sciences, life sciences, and medicine. Seminars highlight emerging research in bioengineering and provide training in research ethics. Unrestricted electives can be freely chosen by the student in association with his/her adviser.

The department's requirements for the M.S. in Bioengineering are:

1. *Core Bioengineering courses* (9 units)—the following courses are required:
   BIOE 300A. Molecular and Cellular Bioengineering
   BIOE 300B. Physiology and Tissue Engineering
   BIOE 301A. Molecular and Cellular Bioengineering Lab
   BIOE 301B. Clinical Needs and Technology
   These courses, together with the approved technical electives, should form a cohesive course of study that provides depth and breadth.
2. *Approved Technical Electives* (27 units)—these units must be selected from graduate courses in mathematics, statistics, engineering, physical science, life science, and medicine. They should be chosen in concert with the bioengineering courses to provide a cohesive degree program in a bioengineering focus area. Students are required to take at least one course in some area of device or instrumentation. Up to 9 units of directed study and research may be used as approved electives.
3. *Seminars* (3 units)—the seminar units should be fulfilled through BIOE 390, Introduction to Bioengineering Research, BIOE 393, Bioengineering Departmental Research Colloquium, or BIOE 459, Frontiers in Interdisciplinary Biosciences. Other relevant seminar units may also be used with the approval of the faculty adviser. One of the seminar units must be MED 255, The Responsible Conduct of Research.
4. *Unrestricted Electives* (6 units).

Students are assigned an initial faculty adviser to assist them in designing a plan of study that creates a cohesive degree program with a concentration in a particular bioengineering focus area. These focus areas include, but are not limited to: Biomedical Computation, Regenerative Medicine/Tissue Engineering, Molecular and Cell Bioengineering, Biomedical Imaging, and Biomedical Devices.

To ensure that an appropriate program is pursued by all M.S. candidates, students who first matriculate at Stanford at the graduate level must:

1. submit an adviser-approved Program Proposal for a Master's Degree form to the student services office during the first month of the first quarter of enrollment
2. obtain approval from the M.S. adviser and the Chair of Graduate Studies for any subsequent program change or changes.

It is expected that the requirements for the M.S. in Bioengineering can be completed within approximately one year. There is no thesis requirement for the M.S.

Due to the interdisciplinary nature of Bioengineering; a number of courses are offered directly through the Bioengineering Department, but many are available through other departments. See respective ExploreCourses for course descriptions.

COGNATE COURSES

BIOC 218. Computational Molecular Biology (same as BIOMEDIN 231)
BIOMEDIN 210. Modeling Biomedical Systems: Ontology, Terminology, Problem Solving (same as CS 270)
BIOMEDIN 217. Translational Bioinformatics (same as CS 275)
CHEMENG 450. Advances in Biotechnology
EE 369A,B. Medical Imaging Systems I,II
EE 369C. Medical Image Reconstruction
ME 280. Skeletal Development and Evolution
ME 287. Soft Tissue Mechanics
ME 381. Orthopaedic Bioengineering
ME 382A,B. Medical Device Design
RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging

DOCTOR OF PHILOSOPHY IN BIOENGINEERING

A student studying for the Ph.D. degree must complete a master's degree (45 units) comparable to that of the Stanford M.S. degree in Bioengineering. Up to 45 units of master's degree residency units may be counted towards the degree. The Ph.D. degree is awarded after the completion of a minimum of 135 units of graduate work as well as satisfactory completion of any additional University requirements. Students admitted to the Ph.D. program with an M.S. degree must complete at least 90 units of work at Stanford. The maximum number of transfer units is 45.

On the basis of the research interests expressed in their application, students are assigned an initial faculty adviser who assists them in choosing courses and identifying research opportunities. The department does not require formal lab rotations, but students are encouraged to explore research activities in two or three labs during their first academic year.

Prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of bioengineering fundamentals and a potential for research by passing a qualifying oral examination.

Typically, the exam is taken shortly after the student earns a master's degree. The student is expected to have a nominal graduate Stanford GPA of 3.25 to be eligible for the exam. Once the student's faculty sponsor has agreed that the exam is to take place, the student must submit an application folder containing items including a curriculum vitae, research project abstract, and preliminary dissertation proposal to the student services office. Information about the exam may be obtained from the student services office.

In addition to the course requirements of the M.S. degree, doctoral candidates must complete a minimum of 15 additional units of approved formal course work (excluding research, directed study, and seminars).

Dissertation Reading Committee—Each Ph.D. candidate is required to establish a reading committee for the doctoral dissertation within six months after passing the department's Ph.D. qualifying exams. Thereafter, the student should consult frequently with all members of the committee about the direction and progress of the dissertation research.

A dissertation reading committee consists of the principal dissertation adviser and at least two other readers. Reading committees in Bioengineering may include faculty from another department. It is expected that at least one member of the Bioengineering faculty be on each reading committee. The initial committee, and any subsequent changes, must be officially approved by the department Chair.

University Oral and Dissertation—The Ph.D. candidate is required to take the University oral examination after the dissertation is substantially completed (with the dissertation draft in writing), but before final approval. The examination consists of a public presentation of dissertation research, followed by substantive private questioning on the dissertation and related fields by the University oral committee (four selected faculty members, plus a chair from another department). Once the oral has been passed, the stu-

dent finalizes the dissertation for reading committee review and final approval. Forms for the University oral scheduling and a one-page dissertation abstract should be submitted to the department student services office at least three weeks prior to the date of the oral for departmental review and approval.

PH.D. MINOR IN BIOENGINEERING

Doctoral students pursuing a Ph.D. degree in a major other than Bioengineering may apply for the Ph.D. minor in Bioengineering. A minor is a not a requirement for any degree, but is available when agreed upon by the student and the major and minor department.

Application forms, including the University's general requirements, can be found at http://registrar.stanford.edu/shared/forms.htm.

A student desiring a Ph.D. minor in Bioengineering must have a minor program advisor who is a regular Bioengineering faculty member. This advisor must be a member of the student's reading committee for the doctoral dissertation, and the entire reading committee must meet at least one year prior to the date of the student's dissertation defense.

The Ph.D. minor program must include at least 20 units of course work in Stanford Bioengineering or Bioengineering cognate courses at or above the 200 level. Of these 20 units, no more than 10 can be in cognate courses. All courses listed to fulfill the 20-unit requirement must be taken for a letter grade and the GPA must be at least 3.25. Courses used for a minor may not be used to also meet the requirements for a master's degree.

M.D./PH.D. DUAL DEGREE PROGRAM

Students interested in a career oriented towards bioengineering and medicine can pursue the combined M.D./Ph.D. degree program. Stanford has two ways to do an M.D./Ph.D. U.S. citizens and permanent residents can apply to the Medical Scientist Training Program and can be accepted with funding from both M.D. and Ph.D. programs for stipend and tuition. They can then select a bioengineering laboratory for their Ph.D. Students not admitted to the Medical Scientist Training Program must apply to be admitted separately to the M.D. program and the Ph.D. program of their choice.

The Ph.D. is administered by the Department of Bioengineering. To be formally admitted as a Ph.D. degree candidate in this combined degree program, the student must apply through normal departmental channels and must have earned or have plans to earn an M.S. in bioengineering or other engineering discipline at Stanford or another university. The M.S. requires 45 units of course work which consists of core bioengineering courses, technical electives, seminars, and 6 unrestricted units. Students must also pass the Department of Bioengineering Ph.D. qualifying examination.

For students fulfilling the full M.D. requirements who earned their master’s level engineering degree at Stanford, the Department of Bioengineering waives the normal departmental requirement of 15 units applied towards the Ph.D. degree beyond the master’s degree level through formal course work. Consistent with the University Ph.D. requirements, the department accepts 15 units comprised of courses, research, or seminars approved by the student’s academic adviser and the department chair. Students not completing their M.S. engineering degree at Stanford are required to take 15 units of formal course work in engineering-related areas as determined by their academic adviser.

JOINT DEGREE PROGRAMS IN BIOENGINEERING AND THE SCHOOL OF LAW

The School of Law and the Department of Bioengineering offer joint programs leading to either a J.D. degree combined with an M.S. degree in Bioengineering or to a J.D. degree combined with a Ph.D. in Bioengineering.

The J.D./M.S. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves intensively for careers in areas relating to both law and bioengineering. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Bioengineering and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Bioengineering Department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Bioengineering. Faculty advisers from each academic unit will participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Bioengineering program regardless of whether enrollment at that time is in the Law School or in the Department of Bioengineering. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.S. or Ph.D. degrees as specified in the *Stanford Bulletin* or elsewhere.

The Law School shall approve courses from the Bioengineering Department that may count toward the J.D. degree, and the Bioengineering Department shall approve courses from the Law School that may count toward the M.S. or Ph.D. degree in Bioengineering. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The lists may differ depending on whether the student is pursuing an M.S. or a Ph.D. in Bioengineering.

In the case of a J.D./M.S. program, no more than 45 units of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 units of approved courses may be counted toward both degrees. In either case, no more than 36 units of courses that originate outside the Law School may count toward the law degree. To the extent that courses under this joint degree program originate outside of the Law School but count toward the law degree, the law school credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of law school credits that may be counted toward the M.S. or Ph.D. in Bioengineering is the greater of: (i) 15 units; or (ii) the maximum number of units from courses outside of the department that M.S. or Ph.D. candidates in Bioengineering are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program. Tuition and financial aid arrangements will normally be through the school in which the student is then enrolled.

CHEMICAL ENGINEERING

Emeriti: (Professors) Andreas Acrivos, Michel Boudart, George M. Homsy, Robert J. Madix
Chair: Chaitan Khosla
Professors: Stacey F. Bent, Curtis W. Frank, Gerald G. Fuller, Chaitan Khosla, Jens K. Nørskov, Channing R. Robertson, Eric S. G. Shaqfeh, Alfred M. Spormann, James R. Swartz

Visiting Professors: Sung-Hyeon Baeck, Dong-Myung Kim
Administrative Office: Stauffer III, Room 113
Student Services Office: Keck Science Building, Room 189
Mail Code: 94305-5025
S*tudent Services Phone:* (650) 723-1302
Web Site: http://cheme.stanford.edu

Courses offered by the Department of Chemical Engineering are listed under the subject code CHEMENG on the *Stanford Bulletin's* ExploreCourses web site.

Research investigations are currently being carried out in the following fields: applied statistical mechanics, biocatalysis, bioengineering, biophysics, colloid science, computational materials science, electronic materials, hydrodynamic stability, kinetics and catalysis, Newtonian and non-Newtonian fluid mechanics, polymer science, renewable energy, rheo-optics of polymeric systems, and surface and interface science. Additional information may be found at http://cheme.stanford.edu.

The Department of Chemical Engineering offers opportunities for both undergraduates and graduate students to pursue course work in interdisciplinary biosciences, which include the chemical, biological, physical, mathematical, and engineering sciences. Courses include CHEMENG 25B, 150, 181/281, 183/283, 185B, 355, 450, 454, 456, and 457. In addition, students seeking a broad introduction to current topics in the interdisciplinary biosciences and engineering should consider CHEMENG 459, Frontiers in Interdisciplinary Biosciences, which covers emerging technologies and other subject matter at the intersection of engineering and biology, ranging from molecular to complex systems; see http://biox.stanford.edu. Students are encouraged to review course offerings in all departments of the School of Engineering.

Further information about the department may be found at http://cheme.stanford.edu. Undergraduates considering majoring in Chemical Engineering are encouraged to talk with faculty and meet with staff in the departmental student services office. Students interested in pursuing advanced work in chemical engineering, including coterminal degrees, should contact the department as well. Admission to the Master of Science program for an active undergraduate Stanford student is by approval of an Application for Admission to Coterminal Master's Program. Admission to an advanced degree program for an active Stanford graduate student by approval of the Graduate Authorization Petition. All other students should go to http://studentaffairs.stanford.edu/gradadmissions for general and departmental information about the requirements and processes for applying for admission to a graduate degree program.

MISSION OF THE UNDERGRADUATE PROGRAM IN CHEMICAL ENGINEERING

Chemical engineers are responsible for the conception and design of processes for the purpose of production, transformation, and transportation of materials. This activity begins with experimentation in the laboratory and is followed by implementation of the technology in full-scale production. The mission of the undergraduate program in Chemical Engineering is to develop students' understanding of the core scientific, mathematical, and engineering principles that serve as the foundation underlying these technological processes. The program's core mission is reflected in its curriculum which is built on a foundation in the sciences of chemistry, physics, and biology. Course work includes the study of applied mathematics, material and energy balances, thermodynamics, fluid mechanics, energy and mass transfer, separations technologies, chemical reaction kinetics and reactor design, and process design. The program provides students with excellent preparation for careers in the corporate sector and government, or for graduate study.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able to demonstrate:

1. proficiency in and ability to apply knowledge of engineering and mathematics through differential equations, probability and statistics, and science including physics, chemistry, and biology.
2. ability to design and to conduct experiments, as well as to analyze and to interpret data.
3. ability to design a system, component, or process to meet desired needs.
4. ability to function on multidisciplinary teams.
5. ability to identify, formulate, and solve engineering problems.
6. professional and ethical responsibility.
7. ability to communicate effectively.
8. the broad education necessary to understand the impact of engineering solutions in a global and societal context.
9. recognition of the need for and an ability to engage in life-long learning.
10. knowledge of contemporary issues.
11. ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
12. the background for admission to engineering or other professional graduate programs.

GRADUATE PROGRAMS IN CHEMICAL ENGINEERING

The University's requirements, including residency requirements, for the M.S., Engineer, and Ph.D. degrees are summarized in the "Graduate Degrees" section of this bulletin.

Current research and teaching activities cover a number of advanced topics in chemical engineering, including applied statistical mechanics, biocatalysis, biochemical engineering, bioengineering, biophysics, computational materials science, colloid science, dynamics of complex fluids, energy conversion, functional genomics, hydrodynamic stability, kinetics and catalysis, microrheology, molecular assemblies, nanoscience and technology, Newtonian and non-Newtonian fluid mechanics, polymer physics, protein biotechnology, renewable fuels, semiconductor processing, soft materials science, solar utilization, surface and interface science, and transport mechanics.

Fellowships and Assistantships—Qualified predoctoral applicants are encouraged to apply for nationally competitive fellowships, for example, those from the National Science Foundation. Applicants to the Ph.D. program should consult with their financial aid officers for application information and advice. In the absence of other awards, incoming Ph.D. students normally are awarded departmental fellowships. Matriculated Ph.D. students are primarily supported by fellowship awards and assistantship appointments. All students are encouraged to apply for external, competitive fellowships and may obtain information about various awarding

agencies from faculty advisers and student services. Assistantships are paid positions for graduate students that, in addition to a salary, provide the benefit of a tuition allocation. Individual faculty members appoint students to research assistantships; the department chair appoints doctoral students to teaching assistantships. Contact departmental student services for additional information.

COGNATE COURSES FOR ADVANCED DEGREES IN CHEMICAL ENGINEERING

In addition to core CHEMENG graduate courses in the 300 series and elective CHEMENG graduate courses in the 200 and 400 series, students pursuing advanced degrees in chemical engineering include elective courses offered by other departments. The following list is a partial list of the more frequently chosen courses and is subdivided into five focus areas.

Broadly Applicable—
APPPHYS 207. Laboratory Electronics (3 units)
CHEM 221. Advanced Organic Chemistry (3 units)
CHEM 271. Advanced Physical Chemistry (Quantum Mechanics) (3 units)
CHEM 273. Advanced Physical Chemistry (Angular Momentum, etc.) (3 units)
EE 261. The Fourier Transform and its Applications (3 units)
EE 268. Introduction to Modern Optics (3 units)
MS&E 234. Organizations and Information Systems (4 units)
STATS 200. Statistical Inference (3 units)

Biochemistry and Bioengineering focus, e.g., with CHEMENG 281, 283, 454, 456—
BIO 203. Advanced Genetics (human)
BIO 217. Neuronal Biophysics (4 units)
BIOC 133. Genetics of Prokaryotes (3 units; needs approval of chair)
BIOE 331. Protein Engineering (3 units)
BIOPHYS/SBIO 228. Computational Structural Biology (3 units)
BIOPHYS/SBIO 241. Biologic Macromolecules (3-5 units)
CBIO 241. Molecular, Cellular, and Genetics Basis of Cancer (3 units)
CEE 274. Environmental Microbiology I & II (3 units each)
MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology (4 units)
MPHA 210. Signal Transduction Pathways and Networks (4 units)
MPHA 240. Drug Discovery (4 units)
MPHA 260. Quantitative Chemical Biology (4 units)
SBIO 228. Computational Structural Biology (3 units)
SBIO 241. Biological Macromolecules (3-5 units)

Fluid Mechanics, Applied Mathematics, and Numerical Analysis focus, e.g., with CHEMENG 462—
AA 218. Introduction to Symmetry Analysis (3 units)
CME 200. Linear Algebra with Application to Engineering Computations (3 units)
CME 204. Partial Differential Equations in Engineering (3 units)
CME 206. Introduction to Numerical Methods for Engineering (3 units)
CME 212. Introduction to Large-Scale Computing in Engineering (3 units)
CME 332. Computational Methods for Scientific Reasoning and Discovery (3 units)
CME 340. Computational Methods in Data Mining (3 units)
ME 338A. Continuum Mechanics (3 units)
ME 351A. Fluid Mechanics (3 units)
ME 457. Fluid Flow in Microdevices (3 units)
ME 469A. Computational Methods in Fluid Mechanics (3 units)

Materials Science focus, e.g., with CHEMENG 260, 442, 460, 461, 464, 466—
MATSCI 210. Organic and Biological Materials (3 units)
MATSCI 251. Microstructure and Mechanical Properties (3 units)
MATSCI 316. Nanoscale Science, Engineering, and Technology (3 units)
MATSCI 343. Organic Semiconductors for Electronics and Photonics (3 units)
MATSCI 380. Molecular Biomaterials (3 units)

Microelectronics focus, e.g., with CHEMENG 240—
AA 218. Introduction to Symmetry Analysis (3 units)
CME 200. Linear Algebra with Application to Engineering Computation (3 units)
CME 204. Partial Differential Equations in Engineering (3 units)
CME 206. Introduction to Numerical Methods for Engineering (3 units)
CME 212. Introduction to Large-Scale Computing in Engineering (3 units)
CME 332. Computational Methods for Scientific Reasoning and Discovery (3 units)
CME 340. Computational Methods in Data Mining
ME 338A. Continuum Mechanics (3 units)
ME 351. Fluid Mechanics (3 units)
ME 457. Fluid Flow in Microdevices (3 units)
ME 469A. Computational Methods in Fluid Mechanics (3 units)

BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING

The University's basic requirements for the bachelor's degree and coterminal bachelor's and master's degrees are discussed in the "Undergraduate Degrees" section of this bulletin.

The Chemical Engineering B.S. program requires basic courses in biology, chemistry, engineering, mathematics, and physics. The depth sequence of courses required for the major in chemical engineering provides training in applied chemical kinetics, biochemical engineering, electronic materials, engineering thermodynamics, plant design, polymers, process analysis and control, separation processes, and transport phenomena. Undergraduates who wish to major in the department should consult the curriculum outlined in the "Undergraduate Program in Chemical Engineering" section of this bulletin. Courses taken to fulfill the requirements for the major (courses in mathematics; science; technology and society; engineering fundamentals; and engineering depth) must be taken for a letter grade if this option is offered.

Representative sequences of courses leading to a B.S. in Chemical Engineering, in both flow chart and 4-year, quarter-by-quarter formats, can be found in the *Handbook for Undergraduate Engineering Programs*, available at http://ughb.stanford.edu. These are explanatory examples, with each sequence starting at a different level and demonstrating how a student, based on his or her precollege preparation, can complete the major in four years. These typical course schedules are available from departmental student services and faculty advisers for undergraduates, as well as the Office of Student Affairs in the School of Engineering. It is recommended that students discuss their prospective programs with Chemical Engineering faculty advisers, especially if transferring from another major such as Biology, Chemistry, Physics, or another Engineering major. With advance planning, students can usually arrange to attend one of the overseas campuses.

Students interested in a minor in Chemical Engineering should consult the requirements for a "Minor in Chemical Engineering" section of this bulletin.

HONORS PROGRAM

The Department of Chemical Engineering offers a program leading to the degree of Bachelor of Science in Chemical Engineering with Honors. Qualified undergraduate majors conduct independent study and research at an advanced level with faculty mentors, graduate students, and fellow undergraduates. This three quarter sequential program requires concurrent participation each quarter in the CHEMENG 191H seminar; completion of a faculty-approved thesis; and participation in the Chemical Engineering Honors Poster Session held annually during the Mason Lecture Series Spring Quarter. The last requirement may also be fulfilled through an alternative, public, oral presentation with the approval

of the department chair. Work should begin at least four quarters prior to graduation.

Admission to the honors program is by application and submission of a research proposal and is subject to approvals by faculty advisers, sponsors, and the chair of the department. Declared Chemical Engineering majors with a cumulative grade point average (GPA) of 3.5 or higher are encouraged to apply. Students should submit their applications by Winter Quarter of their junior year; applications must be submitted no later than the end of the first week of Autumn Quarter of the senior year. An application includes a research proposal, approved by both the student's research thesis adviser and a faculty reader. The faculty adviser or, alternatively, a faculty sponsor, must be a faculty member in the Department of Chemical Engineering. Students should start their research no later than Spring Quarter their junior year and are encouraged to consider incorporating research opportunities such as those sponsored by Undergraduate Academic Life into their honors research proposal; see http://ual.stanford.edu/OO/research_opps/Grants http://ual.stanford.edu/OO/research_opps/Grants). See departmental student services staff in Keck 189 for more information about the application process, a proposal template, and other assistance.

In order to receive departmental honors, students admitted to the honors program must:

1. Maintain an overall grade point average (GPA) of at least 3.5 as calculated on the unofficial transcript.
2. Complete at least three quarters of research with a minimum of 9 units of CHEMENG 190H for a letter grade. All quarters must focus on the same topic. The same faculty adviser and faculty reader should be maintained throughout if feasible.
3. Enroll in CHEMENG 191H, Undergraduate Honors Seminar, concurrently with each quarter of CHEMENG 190H.
4. Participate with a poster and oral presentation of thesis work at the Chemical Engineering Honors Poster Session held during Spring Quarter or, at the Undergraduate Program Committee's discretion, at a comparable public event.
5. Submit final drafts of a thesis simultaneously to the adviser and the reader and, if appropriate, to the Chemical Engineering faculty sponsor, no later than April 11th, or the first school day of the third week of the quarter in which the degree is to be conferred.
6. Complete all work and thesis revisions and obtain indicated faculty approvals on the Certificate of Final Reading of Thesis forms by the end of the first week of May, or the second month of the graduation quarter.
7. Submit to departmental student services five (5) final copies of the honors thesis, as approved by the appropriate faculty. Include in each thesis an original, completed, faculty signature sheet immediately following the title page. The 2010-11 deadline is May 10, 2011, or the Tuesday at the beginning of the second week of the second month of the graduation quarter.
8. Submit to student services one copy of the honors thesis in electronic format at the same time as the final copies of the thesis or no later than May 10, 2011.
9. Submit one copy of the thesis, upon departmental approval, to the School of Engineering.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN CHEMICAL ENGINEERING

Undergraduates with strong academic records may apply to study for a master's degree while at the same time completing their bachelor's degree(s). Interested students should discuss their educational goals with their faculty advisers before applying and should talk with departmental student services about the departmental requirements and deadlines for applications.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF SCIENCE IN CHEMICAL ENGINEERING

A range of M.S. programs comprising appropriate course work is available to accommodate students wishing to obtain further academic preparation before pursuing a professional chemical engineering career. This degree is lecture course based; there are no research or thesis requirements. It is a terminal M.S. degree. It is not a prerequisite for nor does it lead into the department's Ph.D. program. For conferral of an M.S. degree in chemical engineering the following departmental requirements must be met.

Unit and Course Requirements—Students terminating their graduate work with the M.S. degree in Chemical Engineering must develop a graduate-level, thematic M.S. program consisting of a minimum of 45 completed units of academic work that includes (1) four Chemical Engineering lecture courses selected from the 300 series; (2) 3 units of 699 Colloquia; (3) an additional 30 units, selected from graduate-level science or engineering lecture courses in any department and, by petition to the Chair of the Department of Chemical Engineering, from upper-division undergraduate lecture courses in science and engineering. Alternatively, up to 6 units of research may be used in lieu of up to 6 units of the additional 30 lecture units to partially satisfy the 45 unit minimum requirement. Another option is an up-to-six-unit combination of research units and 1, 2, or 3 units of 459 or other similar 1- or 2-unit graduate seminar courses, with faculty developed curricula, used in lieu of up to 6 units of the required additional 30 lecture units. Credit toward the M.S. degree is not given for Chemical Engineering special topics courses numbered in the 500 series nor for similar courses in other departments.

To ensure that an appropriate Chemical Engineering graduate program is pursued by each M.S. candidate, students who first matriculate at Stanford at the graduate level must, during the first quarter, no later than the eighth week, (a) complete a Program Proposal for a Master's Degree form, that is approved by the M.S. adviser; (b) submit this petition to departmental student services, for review by the department chair; and (c) obtain approval for any subsequent program change or changes from the M.S. adviser and the department chair. Stanford undergraduates admitted to the coterminal master's program must (a) submit an adviser-approved Program Proposal for a Master's Degree (a graduate degree progress form) either during their first quarter of graduate standing or upon the completion of 9 units of graduate work (whichever occurs first), and (b) document with student services their M.S. adviser's review and approval of their graduate program when they have accrued 30 units toward the M.S. degree in Chemical Engineering. Each M.S. candidate must obtain approvals for the final M.S. program no later than the eighth week of the quarter preceding the quarter of degree conferral, in order to permit amendment of the final quarter's study list if the faculty deem this necessary. Students with questions should contact departmental student services.

Minimum Grade Requirement—Any course used to satisfy the 45-unit minimum for the M.S. degree must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Research Experience—Students in the M.S. program wishing to obtain research experience should work with the M.S. faculty adviser on the choice of research adviser as early as feasible and in advance of the anticipated quarter(s) of research. Once arrangements are mutually agreed upon, including the number of units, students enroll in the appropriate section of CHEMENG 600. A written report describing the results of the research under taken must be submitted to and approved by the research adviser. CHEMENG 600 may not be taken in lieu of any of the required four 300-level lecture courses.

ENGINEER IN CHEMICAL ENGINEERING

The degree of Engineer is awarded after completion of a minimum of 90 units of graduate work beyond the B.S. degree and satisfactory completion of all University requirements plus the following departmental requirements. This degree is not a prerequisite for the Ph.D. program.

Unit and Course Requirements—A minimum of 90 total units (including research) within which 45 units of lecture course work are required for the Engineer degree, including (1) CHEMENG 310, 320, 340, 345, 355 and (2) 3 units of CHEMENG 699. The remaining lecture courses, to total at least 45 completed units, may be chosen from the basic sciences and engineering according to the guidelines given in the Master of Science section and with the consent of the graduate curriculum committee chair and the department chair. In fulfilling the required 45-unit requirement for lecture course units, an aggregate of 6 units maximum of the required 45-unit minimum of course work may include such courses as CHEMENG 459 and 699, but not 500 level seminar courses or research units. Students seeking the Engineer degree may petition to add a M.S. program and apply for the M.S. degree once the requirements for that degree have been fulfilled (see General Requirements in the "Graduate Degrees" section of this bulletin and Chemical Engineering's "Master of Science" section).

Minimum Grade Requirement—Any course intended to satisfy the degree requirements must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Reading Committee Requirement—All candidates are required to have an initial meeting with their reading committees, consisting of two members of the Chemical Engineering faculty, by the end of their seventh quarter. Following this initial meeting, additional committee meetings must occur no less than once a year until all the requirements for the degree are satisfied. Students are encouraged to hold meetings on a more frequent basis to help focus and guide the thesis project. It is each student's responsibility to schedule meetings and to assist in the keeping of accurate degree progress records by informing student services when meetings have occurred.

Thesis Requirement—The thesis must represent a substantial piece of research equivalent to nine months of full-time effort and must be approved by the student's reading committee.

Qualification for the Ph.D. Program by Students Ready to Receive the Degree of Engineer—After completing the requirements for the Engineer degree, a student may request to be examined on the research work completed for that degree, for the purpose of qualifying for the Ph.D. degree. If the request is granted, the student's thesis must be approved by the reading committee and available in its final form for inspection by the entire faculty at least two weeks prior to the scheduled date of said examination.

DOCTOR OF PHILOSOPHY IN CHEMICAL ENGINEERING

The Ph.D. degree is awarded after the completion of a minimum of 135 units of graduate work as well as satisfactory completion of any additional University requirements and the following departmental requirements. Completion of a M.S. degree is not a prerequisite for beginning, pursuing, or completing doctoral work.

Unit and Course Requirements—A minimum of 135 completed units, including a minimum of 45 units of lecture course work, is required for the Ph.D. degree. The following courses are required: CHEMENG 310, 320, 340, 345, and 355, plus two courses in the CHEMENG 440, 450, or 460 series. These are to be taken at Stanford, and any petition to substitute another graduate-level course for any of these core courses must be approved by the department chair. The remaining lecture courses may be chosen from graduate-level science and engineering lecture courses in any department and, by petition to the department chair, from upper-division undergraduate lecture courses in the sciences and engineering. 3 units of CHEMENG 699 must be completed and may be included in the required 45 units of lecture courses. Additionally, 1, 2, or 3 units of seminar courses with faculty developed curricula, such as CHEMENG 459, may be substituted for up to 3 units of the unspecified lecture courses, but not for any of the specified CHEMENG courses above. All proposals for Ph.D. course work must be approved by the student's adviser and the department chair or his designee. Students admitted to Ph.D. candidacy should enroll each quarter in the 500 series, 600, and 699 as appropriate and as study list unit limits permit. Predoctoral students may petition for a M.S. degree program to be added to their university record. When the petition is approved, students may apply in Axess for M.S. degree conferral once the requirements for that degree have been fulfilled (see the "Master of Science in Chemical Engineering" section in this bulletin). The M.S. degree must be awarded within the University's candidacy period for completion of a master's degree.

Minimum Grade Requirement—Any course intended to satisfy the Ph.D. degree requirements must be taken for a letter grade, if offered. An overall grade point average (GPA) of 3.0 must be maintained for these courses.

Qualifying Examination—To be advanced to candidacy for the Ph.D. degree, the student must pass both parts of the qualifying examination. The first part is held at the beginning of Spring Quarter, or the third quarter of study, and the first-year student is asked to make an oral presentation to the faculty of a critical review of a published paper. This preliminary examination, in addition to performance in courses and during research rotations, is the basis for determining whether or not a first-year student is to be allowed by faculty to choose a research adviser and to begin doctoral research work immediately. Failure in this first part of the qualifying examination normally leads to termination of a student's study towards the Ph.D. degree; however, the student may continue to work toward an M.S. degree (see the "Master of Science in Chemical Engineering" section of this bulletin). It also precludes any financial aid beyond that already awarded. Students who pass the preliminary examination take the second part of the qualifying examination at the beginning of their second year, or the fifth quarter. This second examination before the faculty is an oral presentation and defense of their current research work. Students who pass both parts of the qualifying examination must promptly submit to students services an Application for Candidacy for Doctoral Degree form that has been approved by their research adviser(s), and at the same time establish their doctoral dissertation reading committees.

Reading Committee Requirement—All Ph.D. candidates are required to assemble reading committees and to have an initial meeting with the full committee by the end of their seventh quarter. Reading committee meetings are not examinations; they are intended to be discussion sessions to help focus and guide the dissertation project. Following the initial committee meeting, additional meetings must take place no less than once per year until all the requirements for the Ph.D. degree are satisfied. The department encourages students to take advantage of the benefits of more frequent meetings with their full reading committee. It is the student's responsibility to schedule committee meetings and to assist in the maintenance of degree progress records by reporting the meeting dates to the student services manager.

Teaching Requirement—Teaching experience is considered an essential component of doctoral training because it assists in the further development and refinement of candidates' skills in conveying what they know, think, and conclude, based on articulated assumptions and knowledge. All Ph.D. candidates, regardless of the source of their financial support, are required to assist in the teaching of a minimum of two chemical engineering courses.

Dissertation and Oral Defense Requirements—A dissertation based on a successful investigation of a fundamental problem in chemical engineering is required. Within approximately five calendar years after enrolling in the Ph.D. program, a student is expected to have fulfilled all the requirements for this degree, including the completion of a dissertation approved by his or her research

adviser(s). Upon adviser approval, copies of the final draft of a dissertation must be distributed to each reading committee member. No sooner than three weeks after this distribution, a student may schedule an oral examination. This examination is a dissertation defense, based on the candidate's dissertation research, and is in the form of a public seminar followed by a private examination by the faculty members on the student's oral examination committee. Satisfactory performance in the oral examination and acceptance of an approved dissertation by Graduate Degree Progress, Office of the University Registrar, leads to Ph.D. degree conferral.

PH.D. MINOR IN CHEMICAL ENGINEERING

The University's general requirements for the Ph.D. minor are specified in the "Graduate Degrees" section of this bulletin. An application for a Ph.D. minor must be approved by both the major and minor departments.

A student desiring a Ph.D. minor in Chemical Engineering must have a minor program adviser who is a regular Chemical Engineering faculty member. At a minimum, this adviser must be a member of the student's reading committee for the doctoral dissertation, and the entire reading committee must meet at least once and at least one year prior to the scheduling of the student's oral examination. The department strongly prefers that regular meetings of the full reading committee start in the second year of graduate study or when the student is admitted to Ph.D. candidacy. In addition, the Chemical Engineering faculty member who is the minor adviser must be a member of the student's University oral examination committee.

The Ph.D. minor program must include at least 20 units of graduate-level lecture courses (numbered at the 200 level or above), but may not include any 1-2 unit lecture courses in the 20-unit minimum. The list of courses must form a coherent program and must be approved by the minor program adviser and the chair of this department. All courses for the minor must be taken for a letter grade, and a GPA of at least 3.0 must be earned for these courses.

CIVIL AND ENVIRONMENTAL ENGINEERING

Emeriti: (Professors) James Douglas, Joseph B. Franzini, En Y. Hsu, Helmut Krawinkler*, Paul Kruger, Gilbert M. Masters*, Perry L. McCarty*, Henry W. Parker, George A. Parks, Haresh C. Shah, Robert L. Street*, Clyde B. Tatum* (on leave Winter), Paul M. Teicholz

Chair: Stephen G. Monismith

Associate Chair: Sarah Billington

Professors: Ronaldo I. Borja, Craig S. Criddle, Gregory G. Deierlein, Martin A. Fischer, Mark Z. Jacobson, Anne S. Kiremidjian, Peter K. Kitanidis (on leave Winter, Spring), Jeffrey R. Koseff, Kincho H. Law, James O. Leckie (on leave Winter, Spring), Raymond E. Levitt (on leave Winter), Richard G. Luthy, Stephen G. Monismith, Leonard Ortolano, Alfred M. Spormann

Associate Professors: Alexandria B. Boehm (on leave Winter), Sarah L. Billington, David L. Freyberg, Lynn M. Hildemann, Eduardo Miranda

Assistant Professors: Jack W. Baker, Jennifer Davis, Oliver B. Fringer, Michael D. Lepech

Professor (Research): Martin Reinhard

Courtesy Professors: Peter M. Pinsky, David D. Pollard

Courtesy Associate Professor: Margot G. Gerritsen

Lecturers: John H. Barton II, Cathrine D. Blake, Stan Christensen, Derek Fong, Renate Fruchter, Robert R. Groves, Eric Haesloop, Stefan Hastrup, Andrew G. Hudacek, Glenn Katz, Karl Knapp, Nelson A. Koen Cohen, Eric Kolderup, Royal J. Kopperud, John C. Kunz, Amy Larimer, Ryan J. Orr, Alexander P. Robertson, Peter Rumsey, Raphael Sperry, Patti J. Walters

Consulting Professors: Vladimir Bazjanac, James E. Cloern, Angelos N. Findikakis, Gary Griggs, Robert F. Hickey, Michael C. Kavanaugh, Mark R. Kroll, Michael E. London, Francis L. Ludwig, Douglas M. MacKay, Martin W. McCann, Jr., Paul K. Meyer, Piotr D. Moncarz, Wayne R. Ott, Ingo Pinnau, Harry E. Ridgway, Benedict R. Schwegler, Jr, Avram S. Tucker, Antonio L. Vives, Michael W. Walton

Consulting Associate Professors: William J. Behrman, Curtis R. Cook, Edward S. Gross, Charles S. Han, Thomas L. Holzer, Jonathan G. Koomey, Lisa V. Lucas, Colin Ong, Azadeh Tabazadeh, Joel N. Swisher, Jie Wang, Jane Woodward

Consulting Assistant Professors: Cristina L. Archer, Murray D. Einarson, Calvin K. Kam, Neil E. Klepeis, Gloria T. Lau, Michael L. MacWilliams, Pooya Sarabandi

Shimizu Visiting Professors: Nicholas Jenkins, Ning Lu, George W. Scherer

Shimizu Visiting Associate Professor: S. Ping Ho

UPS Visiting Associate Professor: Riyad Manasrah

* Recalled to active duty.

Zip-Mail Code: 94305-4020

Phone: (650) 723-3074; Fax: (650) 725-8662

Web Site: http://cee.stanford.edu

Courses offered by the Department of Civil and Environmental Engineering are listed under the subject code CEE on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Civil and Environmental Engineering (CEE) at Stanford conducts basic and applied research that advances the civil and environmental engineering professions, educates future academic and industry leaders, and prepares students for careers in professional practice. Civil and environmental engineers work to sustain the natural environment while creating and maintaining the built environment. Civil and environmental engineers are essential to providing the necessities of human life, including water, air, shelter, the infrastructure, energy, and food in increasingly more efficient and renewable ways.

The department focus is on the theme of engineering for sustainability, including three core areas: the Built environment, Environmental and Water studies, and Atmosphere and Energy. The built environment includes creating processes, techniques, materials, and monitoring technologies for planning, design, construction and operation of environmentally sensitive, economically efficient, performance-based built systems, and managing associated risks from natural and man-made hazards. The water environment includes creating plans, policies, science-based assessment models and engineered systems to manage water in ways that protect human health, promote human welfare, and provide freshwater and coastal ecosystem services. Atmosphere and Energy includes studying fundamental energy and atmospheric engineering and science, assessing energy-use effects on atmospheric processes and air quality, and analyzing and designing energy-efficient generation and use systems with minimal environmental impact.

The department also hosts the School of Engineering undergraduate major in Architectural Design and the undergraduate major in Atmosphere/Energy; both of these programs lead to a B.S. in Engineering.

MISSION OF THE UNDERGRADUATE PROGRAM IN CIVIL ENGINEERING

The mission of the undergraduate program in Civil Engineering is to provide students with the principles of engineering and the methodology needed for civil engineering practice. This preprofessional program balances the fundamentals common to many specialties in civil engineering and allows for concentration in structures and construction or environmental and water studies. Students in the major learn to apply knowledge of mathematics, science, and civil engineering to conduct experiments, design structures and systems to creatively solve engineering problems,

and communicate their ideas effectively. The curriculum includes course work in structural, construction, and environmental engineering. The major prepares students for careers in government and industry, and further graduate study.

MISSION OF THE UNDERGRADUATE PROGRAM IN ENVIRONMENTAL ENGINEERING

The mission of the undergraduate program in Environmental Engineering is to equip students with the problem solving skills and knowledge necessary to assess and develop solutions to environmental problems impacting the biosphere, land, water, and air quality. The Environmental Engineering major offers a more focused program in Environmental and Water Studies than the Environmental and Water Studies concentration in the Civil Engineering degree program. Courses in the program are multidisciplinary in nature, combining fundamental principles drawn from physics, chemistry, geology, engineering, and biology. Students learn about the analytical methods necessary to evaluate environmental changes and to design strategies to remediate problems that inevitably may have resulted from human activities. The program prepares students for careers in consulting, industry, and government, and for graduate school in engineering.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of engineering principles as well as the analytical, problem solving, design, and communication skills necessary to succeed and continue learning in diverse careers.
2. preparation for successful engineering practice with a longer term perspective that takes into account new tools such as advanced information technology and biotechnology, and increasingly complex professional and societal expectations.
3. sufficient breadth and depth for graduate study in engineering or other professional fields.
4. the awareness, background, and skills necessary to become responsible citizens and leaders in service to society.

GRADUATE PROGRAMS IN CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering (CEE), in collaboration with other departments, offers graduate degrees structured in three degree programs.

- The Atmosphere and Energy Program offers degrees with the designation of Atmosphere/Energy.
- The Built Environment Program offers degrees with five designations:
  - Construction Engineering and Management
  - Design/Construction Integration
  - Structural Engineering
  - Geomechanics
  - Sustainable Design Construction.
- The Environmental and Water Studies Program offers degrees with two designations:
  - Environmental Engineering and Science
  - Environmental Fluid Mechanics and Hydrology

For detailed information on these programs and degree designations, see the "Programs of Graduate Study in Civil and Environmental Engineering" section of this bulletin.

ADMISSIONS AND FINANCIAL AID

Applications require online submission of the application form and statement of purpose, followed by three letters of recommendation, results of the General Section of the Graduate Record Examination, and transcripts of courses taken at colleges and universities. See http://gradadmissions.stanford.edu. Policies for each of the department's programs are available by referring to http://cee.stanford.edu. Successful applicants are advised as to the degree and program for which they are admitted. If students wish to shift from one CEE program to another after being accepted, an application for the intradepartmental change must be filed within the department; they will then be advised whether the change is possible. If, after enrollment at Stanford, students wish to continue toward a degree beyond the one for which they were originally admitted, a written application must be made to the Department of Civil and Environmental Engineering.

The department maintains a continuing program of financial aid for graduate students. Applications for financial aid and assistantships should be filed by December 7, 2010; it is important that Graduate Record Examination scores be available at that time. Applicants not requesting financial assistance have until February 1, 2011 for the online submission. Teaching assistantships carry a salary for as much as half- time work to assist with course offerings during the academic year. Up to half-time research assistantships also are available. Engineer and Ph.D. candidates may be able to use research results as a basis for the thesis or dissertation. Fellowship and scholarship awards or loans may supplement assistantships and other basic support. Continued support is generally provided for further study toward the Engineer or Ph.D. degree based on the student's performance, the availability of research funds, and requisite staffing of current research projects.

FACILITIES

Research work and instruction under the three programs are carried out in these facilities: Building Energy Laboratory; Environmental Engineering and Science Laboratory; Environmental Fluid Mechanics Laboratory (EFML); Geotechnical Engineering Laboratory; Structural Engineering Laboratory; and water quality control research and teaching laboratories. The John A. Blume Earthquake Engineering Center conducts research on earthquake engineering including advanced sensing and control, innovative materials, and risk hazard assessment. Research and advanced global teamwork education is conducted in the Project Based Learning (PBL) Laboratory. In collaboration with the Department of Computer Science, the Center for Integrated Facility Engineering (CIFE) employs advanced CAD, artificial intelligence, communications concepts, and information management to integrate participants in the facility development process and to support design and construction automation. The Collaboratory for Research on Global Projects (CRGP) is a multi-school, multi-university research program aimed at improving the performance of global engineering and construction projects, with a special focus on sustainable infrastructure in developing countries.

BACHELOR OF SCIENCE IN CIVIL AND ENVIRONMENTAL ENGINEERING

The B.S. in Civil Engineering and the B.S. in Environmental Engineering are ABET accredited programs, which place high priority on integrating research with engineering education. Four major objectives structure both degree programs:

1. To provide an understanding of engineering principles and the analytical, problem solving, design, and communication skills to continue succeeding and learning in diverse careers.
2. To prepare for successful engineering practice with a longer term perspective that takes into account new tools such as advanced information technology and biotechnology, and increasingly complex professional and societal expectations.
3. To prepare for possible graduate study in engineering or other professional fields.
4. To develop the awareness, background, and skills necessary to become responsible citizens and leaders in service to society.

Students who major in Civil Engineering or in Environmental Engineering must complete the appropriate requirements for the B.S. degree listed. Each student has elective units, which may be used in any way the student desires, including additional studies in

Civil and Environmental Engineering or any other school or department in the University. Because the undergraduate engineering curriculum provides breadth of study, students who intend to enter professional practice in civil or environmental engineering should plan to obtain their professional education at the graduate level.

A number of undergraduate programs at Stanford may be of interest to students seeking to specialize in environmental studies. In addition to the two majors offered in the department, students should examine related programs such as Earth Systems, Geological and Environmental Sciences, Urban Studies, and Human Biology.

HONORS PROGRAM

This program leads to a B.S. with honors for undergraduates majoring in Civil Engineering or in Environmental Engineering. It is designed to encourage qualified students to undertake a more intensive study of civil and environmental engineering than is required for the normal majors through a substantial, independent research project.

The program involves an in-depth research study in an area proposed to and agreed to by a Department of Civil and Environmental Engineering faculty adviser and completion of a thesis of high quality. A written proposal for the research to be undertaken must be submitted and approved by the faculty advisor in the fourth quarter prior to graduation. At the time of application, the student must have an overall grade point average (GPA) of at least 3.3 for course work at Stanford; this GPA must be maintained to graduation. The thesis is supervised by a CEE faculty adviser and must involve input from the School of Engineering writing program by means of ENGR 202S or its equivalent. The written thesis must be approved by the thesis adviser. Students are encouraged to present their results in a seminar for faculty and students. Up to 10 units of CEE 199H, Undergraduate Honors Research in Civil and Environmental Engineering, may be taken to support the research and writing (not to duplicate ENGR 202S). These units are beyond the normal Civil Engineering or Environmental Engineering major program requirements.

MINOR IN CIVIL ENGINEERING OR ENVIRONMENTAL ENGINEERING

The department offers a minor in Civil Engineering and a minor in Environmental Engineering. Departmental expertise and undergraduate course offerings are available in the areas of architectural design, construction engineering, construction management, structural/geotechnical engineering, environmental engineering and science, environmental fluid mechanics and hydrology, and atmosphere/energy. The courses required for the minors typically have prerequisites. Minors are not ABET-accredited programs.

PROGRAMS OF GRADUATE STUDY IN CIVIL AND ENVIRONMENTAL ENGINEERING

ATMOSPHERE AND ENERGY PROGRAM

The Atmosphere and Energy program in Civil and Environmental Engineering combines atmospheric science with energy science and engineering. The main goals of the program are to educate students and the public, through courses, research, and public outreach, about the causes of climate, air pollution, and weather problems and methods of addressing these problems through renewable and efficient energy systems. In addition, students learn about feedbacks between the atmosphere and renewable energy systems and the effects of the current energy infrastructure on the atmosphere.

Major focus areas of energy research include examining the resource availability of renewable energies, such as wind, solar, and wave, and studying optimal methods of combining renewable energies together to match energy supply with instantaneous demand. This type of work is generally done through a combination of data analysis, three-dimensional atmospheric computer modeling of wind, solar, wave, and hydroelectric power resources, and transmission load flow computer modeling. Other energy research, performed through three-dimensional computer modeling, focuses on the effects, for example, of hydrogen fuel cell vehicles on air pollution and the ozone layer and the effects of ethanol and diesel vehicles on air quality and climate. Studies also examine the feedback of wind turbines to the atmosphere and the effects of climate change on wind and solar energy resources.

Atmospheric research in the program generally involves laboratory work, field measurements, or three-dimensional computer modeling of the combined atmosphere, ocean, and land surface. An example of laboratory work includes measuring the properties of organic particulate matter that forms in the atmosphere. Examples of fieldwork include measuring exposures to secondhand smoke, allergens, and emissions from building materials.

Computer modeling is performed at a variety of spatial scales, from the globe down to the size of a building or smaller. Some examples of modeling studies include examining the effects of air pollution particles on clouds, rainfall, water supply, ultraviolet radiation, the stratospheric ozone layer, and climate, simulating the dispersion of toxic contaminants in an urban street canyon, studying the effects of aircraft exhaust and biomass burning on climate, studying the effects of carbon dioxide domes over cities on air pollution mortality, and studying the leading causes of global warming and their impacts.

ENVIRONMENTAL AND WATER STUDIES PROGRAMS

Environmental and water studies include subprograms in environmental engineering and science and environmental fluid mechanics and hydrology, which includes environmental planning. Course offerings permit study in a single area or interrelated study between areas. Programs are flexible to foster interaction among students and encourage the development of individual programs. The Stanford laboratories for water quality control and environmental fluid mechanics are well equipped for advanced research and instruction.

Courses from other programs and departments complement our programs' course offerings. Examples include Computer Science (numerical methods), Geological and Environmental Sciences (geostatistics, hydrogeology), Mechanical Engineering (applied math, experimental methods, fluid mechanics, heat transfer), Energy Resources Engineering (reservoir engineering, well-test analysis), and Statistics (probability and statistics).

The major areas of specialization in the two subprograms, environmental engineering and science, and environmental fluid mechanics and hydrology, are described following. Admission to these subprograms are handled separately; prospective students should indicate their preference on their application.

ENVIRONMENTAL ENGINEERING AND SCIENCE

The Environmental Engineering and Science (EES) subprogram emphasizes the chemical and biological processes involved in water quality engineering, pollution treatment, remediation, and environmental protection.

Course offerings include: the biological, chemical, and engineering aspects of water supply; the movement and fate of pollutants in surface and ground waters, soil, and the atmosphere; hazardous substance control; molecular environmental biotechnology; and water and air pollution. Companion courses in the Environmental Fluid Mechanics and Hydrology Program (EFMH) include environmental planning and impact assessment, and environmental fluid mechanics, hydrology, and transport modeling.

ENVIRONMENTAL FLUID MECHANICS AND HYDROLOGY

The Environmental Fluid Mechanics and Hydrology (EFMH) subprogram focuses on understanding the physical processes controlling the movement of mass, energy, and momentum in the water environment and the atmosphere. The subprogram also consid-

ers environmental and institutional issues involved in planning water resources development projects.

Environmental fluid mechanics courses address: experimental methods; fluid transport and mixing processes; the fluid mechanics of stratified flows; natural flows in coastal waters, estuaries, lakes, and open channels; and turbulence and its modeling. Hydrology courses consider flow and transport in porous media, stochastic methods in both surface and subsurface hydrology, and watershed hydrology and modeling. Atmosphere courses deal with climate, weather, storms and air pollution and their modeling. Planning courses emphasize environmental policy implementation and sustainable water resources development.

The research of this group is focused in the Environmental Fluid Mechanics Laboratory, which includes the P. A. McCuen Environmental Computer Center.

SUSTAINABLE BUILT ENVIRONMENT PROGRAMS

The Sustainable Built Environment programs include subprograms in construction engineering and management, design-construction integration, structural engineering and geomechanics, and sustainable design and construction. These programs focus on educating practitioners and researchers to plan, design, build, and operate more sustainable buildings and infrastructure.

The Construction Engineering and Management (CEM) subprogram prepares students for careers with progressive construction firms worldwide, interested in building more sustainable buildings and infrastructure using advanced modeling and visualization methods and tools known as virtual design and construction.

The Structural Engineering and Geomechanics (SEG) subprogram educates designers and researchers who want to progress beyond traditional life safety code-based design, to develop and disseminate performance-based structural and geotechnical engineering methods and tools that maximize the lifecycle economic value of facilities.

The Design-Construction Integration (DCI) subprogram combines courses from CEM and SEG to educate and prepare students for design construction firms that provide integrated design-build project delivery, construction management, and pre-construction services.

The Sustainable Design and Construction (SDC) subprogram provides courses in sustainable, multi-stakeholder design methods and tools that incorporate lifecycle cost analysis, green architectural design, lighting, and energy analysis, to educate students interested in promoting more sustainable development of buildings and infrastructure.

Admission to these programs are handled separately; prospective students should indicate their preference on their application.

CONSTRUCTION ENGINEERING AND MANAGEMENT

The Construction Engineering and Management (CEM) subprogram prepares technically qualified students for responsible engineering and management roles in all phases of the development of major constructed facilities. It emphasizes management techniques useful in organizing, planning, and controlling the activities of diverse specialists working within the unique project environment of the construction industry, and it covers construction engineering aspects of heavy, industrial and building construction.

The CEM subprogram offers courses in: building systems, construction administration, construction law, project finance, accounting, real estate development, structural design, HVAC design and construction, equipment and methods, estimating, international construction, labor relations, managing human resources, planning and control techniques, productivity improvement, and project and company organizations. Additional related course work is available from other programs within the department, from other engineering departments, and from other schools in the University such as Earth Sciences and the Graduate School of Business.

The CEM program allows students substantial flexibility to tailor their program of study for careers with general contractors, specialty contractors, real estate, or infrastructure developers or facility owners and operators.

DESIGN-CONSTRUCTION INTERGRATION

The Design-Construction Integration (DCI) subprogram prepares students for multidisciplinary collaborative teamwork in an integrated design and construction process. The subprogram extends a student's design or construction background with core courses in each of these areas and develops the background needed to understand the concerns and expertise of the many project stakeholders. It includes a comprehensive project-based learning experience.

The subprogram in Design-Construction Integration is open to applicants with backgrounds in engineering and science. Applicants should also have a background in the planning, design, or construction of facilities by virtue of work experience and/or their undergraduate education. Knowledge in subjects from the traditional areas of civil engineering is necessary for students to receive the degree and to satisfy prerequisite requirements for some of the required graduate courses.

Students with an undergraduate degree in Civil Engineering, and who expect to pursue careers with design or construction firms that emphasize design-build, EPC, or turnkey projects should consider DCI.

STRUCTURAL ENGINEERING AND GEOMECHANICS

The Structural Engineering and Geomechanics (SEG) subprogram encompasses teaching and research in structural design and analysis, structural materials, earthquake engineering and structural dynamics, advanced sensing and structural health monitoring, risk and reliability analysis, computational science and engineering, and geotechnical engineering including geomechanics. The SEG subprogram prepares students for industrial or academic careers.

Students can balance engineering fundamentals with modern computational and experimental methods to customize programs to launch careers as consultants on large and small projects, designers, and engineering analysts.

Structural design and analysis focuses on the conceptual design of structural systems and on computational methods for predicting the static and dynamic, linear and nonlinear responses of structures.

Structural materials research and teaching focuses on the design and analysis of high-performance as well as low-environmental impact materials.

Earthquake engineering and structural dynamics addresses earthquake phenomena, ground shaking, and the behavior, analysis, and design of structures under seismic and other dynamic forces.

Reliability and risk analysis focuses on advanced methods for structural safety evaluation and design, including methods for loss estimation from damage and failures of structures and lifeline systems.

Computational science and engineering emphasizes the application of modern computing methods to structural engineering and geomechanics and encompasses numerical, structural, and geotechnical analysis, including finite element analysis and boundary element methods.

In the area of geomechanics, students focus on the application of the principles of applied mechanics to problems involving geologic materials including theoretical soil and rock mechanics, computational methods, and analysis and design of foundations and earth structures.

SUSTAINABLE DESIGN CONSTRUCTION

The Sustainable Design and Construction (SDC) subprogram prepares students for careers in planning, designing, building, and operating sustainable buildings and infrastructure to maximize their lifecycle economic value, their net contribution to environmental functions and services, and their social equity.

The subprogram offers courses in: project finance; sustainable multidisciplinary, multi-stakeholder planning and design proc-

esses; green architecture; performance-based structural design; building energy systems; and sustainable construction processes and materials. Classes on strategy, economics and organization design for new businesses, and corporate or governmental initiatives focusing on enhancing the sustainability of buildings and infrastructure round out the subprogram.

This subprogram is intended for students with undergraduate degrees in architecture, engineering, science, construction management, economics or business who wish to pursue careers that enhance the sustainability of the built environment.

Potential employers include architectural or engineering design firms, sustainability consultants, construction firms focusing on green buildings, green-tech start-ups, and green-tech venture funds.

COTERMINAL B.S./M.S. PROGRAM IN CIVIL AND ENVIRONMENTAL ENGINEERING

Stanford undergraduates who wish to continue their studies for the Master of Science degree in the coterminal program at Stanford must have earned a minimum of 120 units towards graduation. This includes allowable Advanced Placement (AP) and transfer credit. Applicants must submit their application no later than the quarter prior to the expected completion of their undergraduate degree and and are expected to meet the Department of Civil and Environmental Engineering application deadlines for all applicants for graduate study (December 7, 2010 to be considered for financial aid, or February 1, 2011 if no financial aid is requested). Applications are considered once a year near the beginning of Winter Quarter. An application must display evidence of potential for strong academic performance as a graduate student.

It is recommended that students who contemplate advanced study at Stanford discuss their plans with their advisers in the junior year.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF SCIENCE IN CIVIL AND ENVIRONMENTAL ENGINEERING

The following programs are available leading to the M.S. degree in Civil and Environmental Engineering:

- Atmosphere/Energy
- Construction Engineering and Management
- Design/Construction Integration
- Environmental Engineering and Science
- Environmental Fluid Mechanics and Hydrology
- Geomechanics
- Structural Engineering and Sustainable Design Construction

Students admitted to graduate study with a B.S. in Civil Engineering, or equivalent, from an accredited curriculum can satisfy the requirements for the M.S. degree in Civil and Environmental Engineering by completing a minimum of 45 units beyond the B.S. All 45 units must be taken at Stanford. A minimum 2.75 grade point average (GPA) is required for candidates to be recommended for the M.S. degree. No thesis is required.

The program of study must be approved by the faculty of the department and should include at least 45 units of courses in engineering, mathematics, science, and related fields unless it can be shown that other work is pertinent to the student's objectives. Additional program area requirements are available from the department's student services office (Y2E2 room 316).

Candidates for the M.S. in Civil and Environmental Engineering who do not have a B.S. in Civil Engineering may, in addition to the above, be required to complete those undergraduate courses deemed important to their graduate programs. In such cases, more than three quarters is often required to obtain the degree.

ENGINEER IN CIVIL AND ENVIRONMENTAL ENGINEERING

A student with an M.S. in Civil Engineering may satisfy the requirements of the degree of Engineer in Civil and Environmental Engineering by completing 45 unduplicated course work and research units for a total of 90 units. Engineer candidates must submit an acceptable thesis (12 to 15 units) and maintain a minimum GPA of 3.0. The program of study must be approved by a faculty member in the department.

This degree is recommended for those desiring additional graduate education, especially those planning a career in professional practice. The thesis normally should be started in the first quarter of graduate study after the M.S. degree. Programs are offered in the fields of specialization mentioned for the M.S. degree. The Engineer thesis topic, for students who will continue study toward a CEE Ph.D., must be significantly different from their doctoral research.

DOCTOR OF PHILOSOPHY IN CIVIL AND ENVIRONMENTAL ENGINEERING

The Ph.D. is offered under the general regulations of the University as set forth in the "Graduate Degrees" section of this bulletin. This degree is recommended for those who expect to engage in a professional career in research, teaching, or technical work of an advanced nature. The Ph.D. program requires a total of 135 units of graduate study, at least 90 units of which must be at Stanford. Up to 45 units of graduate study can be represented by the M.S. program described above. Students must maintain a minimum GPA of 3.0 in post-M.S. course work. All candidates for the Ph.D. degree are required to complete CEE 200 in conjunction with a one-quarter teaching assistantship/course assistantship to gain training and instructional experience. Further information on Ph.D. requirements and regulations is found in the department handbook.

The program of study is arranged by the prospective candidate at the beginning of the second year with the advice of a faculty committee whose members are nearest in the field of interest to that of the student. The chair of the committee serves as the student's interim adviser until such time as a member of the faculty has agreed to direct the dissertation research. Insofar as possible, the program of study is adapted to the interests and needs of the student within the framework of the requirements of the department and the University.

By the end of the second year of graduate study (or by the end of the first year for students who enroll at Stanford with an M.S.), the student is expected to pass the department's General Qualifying Examination (GQE) to be admitted to candidacy for the doctoral degree. The purpose of the GQE is to ensure that the student is adequately prepared to undertake doctoral research and has a well planned research topic. The exam may take the form of (1) a written and/or oral general examination of the candidate's major field, (2) a presentation and defense of the candidate's doctoral research dissertation proposal, or (3) a combination research proposal and general examination. The GQE is administered by an advisory committee consisting of at least three Stanford faculty members, including a chair who is a faculty member in Civil and Environmental Engineering. All members are normally on the Stanford Academic Council. A petition for appointment of one advisory committee member who is not on the Academic Council may be made if the proposed person contributes an area of expertise that is not readily available from the faculty. Such petitions are subject to approval by the department chair. When the primary research adviser is not a member of the CEE Academic Council faculty, the committee must consist of four examiners, with two members from the CEE department.

PH.D. MINOR IN CIVIL AND ENVIRONMENTAL ENGINEERING

A Ph.D. minor is a program outside a major department. Requirements for a minor are established by the minor department.

Acceptance of the minor as part of the total Ph.D. program is determined by the major department. Application for the Ph.D. minor must be approved by both the major and the minor department, and the minor department must be represented at the University oral examination.

A student desiring a Ph.D. minor in Civil and Environmental Engineering (CEE) must have a minor program adviser who is a regular CEE faculty member in the program of the designated subfield. This adviser must be a member of the student's University oral examination committee and the reading committee for the doctoral dissertation.

The program must include at least 20 units of graduate-level course work (courses numbered 200 or above, excluding special studies and thesis) in CEE completed at Stanford University. The list of courses must form a coherent program and must be approved by the minor program adviser and the CEE chair. A minimum GPA of 3.0 must be achieved in these courses.

OVERSEAS STUDIES COURSES IN CIVIL AND ENVIRONMENTAL ENGINEERING

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

- OSPAUSTL 10. Coral Reef Ecosystems. 3 units, Kevin Arrigo, Sophie Dove, Selina Ward, GER:DB:EngrAppSci
- OSPAUSTL 20. Coastal Resource Management. 3 units, Ron Johnstone, GER:DB:EngrAppSci
- OSPAUSTL 30. Coastal Forest Ecosystems. 3 units, Norman Duke, John Hall, GER:DB:EngrAppSci

FLORENCE

- OSPFLOR 38. Water Resources Engineering in Italy: An Historical Perspective. 4-5 units, Leonard Ortolano, GER:DB:EngrAppSci

WINTER QUARTER

CAPETOWN

- OSPCPTWN 26. Managing Global Projects. 3-4 units, Raymond Levitt

INSTITUTE FOR COMPUTATIONAL AND MATHEMATICAL ENGINEERING

Emeritus: (Professor) Joe Keller (Mathematics, Mechanical Engineering)
Director: Peter Glynn (Management Science and Engineering)
Director of Student Affairs: Walter Murray (Management Science and Engineering)
Professors: Stephen Boyd (Electrical Engineering), Emanuel Candes (Mathematics, Statistics), Gunnar Carlsson (Mathematics), Persi Diaconis (Mathematics, Statistics), David Donoho (Statistics), Charbel Farhat (Aeronautics and Astronautics, Mechanical Engineering), Peter Glynn (Management Science and Engineering), Leonidas Guibas (Computer Science), Pat Hanrahan (Computer Science, Electrical Engineering), Jerry Harris (Geophysics), Peter Kitanidis (Civil and Environmental Engineering), Tze Leung Lai (Statistics), Sanjiva Lele (Mechanical Engineering, Aeronautics and Astronautics), Parviz Moin (Mechanical Engineering), Brad Osgood (Electrical Engineering), George Papanicolaou (Mathematics), Peter Pinsky (Mechanical Engineering), Leonid Ryzhik (Mathematics), Eric Shaqfeh (Chemical Engineering, Mechanical Engineering), Andras Vasy (Mathematics), Lawrence Wein (Graduate School of Business), Wing Wong (Statistics), Yinyu Ye (Management Science and Engineering)
Associate Professors: Juan Alonso (Aeronautics and Astronautics), Ronald Fedkiw (Computer Science), Margot Gerritsen (Energy Resources Engineering), Ashish Goel (Management Science and Engineering), Heinz Pitsch (Mechanical Engineering), Charles Taylor (Bioengineering, Surgery), Benjamin Van Roy (Management Science and Engineering, Electrical Engineering)
Assistant Professors: Eric Darve (Mechanical Engineering), Oliver Fringer (Civil and Environmental Engineering), Gianluca Iaccarino (Mechanical Engineering), Ramesh Johari (Management Science and Engineering), Adrian Lew (Mechanical Engineering), Amin Saberi (Management Science and Engineering), Andrew Spakowitz (Chemical Engineering)
Professors (Research): Antony Jameson (Aeronautics and Astronautics), Walter Murray (Management Science and Engineering), Arogyaswami Paulraj (Electrical Engineering), Michael A. Saunders (Management Science and Engineering)
Senior Lecturer: Vadim Khayms
Consulting Assistant Professor: Sepandar Kamvar
Web Site: http://icme.stanford.edu
Mail Code: 94305-4042
Phone: (650) 736-9038

Courses offered by the Institute for Computational and Mathematical Engineering are listed under the subject code CME on the *Stanford Bulletin's* ExploreCourses web site.

The central research mission of the Institute for Computational and Mathematical Engineering (iCME) is to develop sophisticated algorithmic and mathematical tools that impact many applied disciplines. iCME leverages Stanford's strengths in engineering applications and the physical, biological, and information sciences to guide the development of modern methods for research and education in computational mathematics.

iCME's teaching mission is to provide courses for graduate students and undergraduates from all departments in the mathematical sciences focusing on theoretical work and its role in the solution of real problems, integrating numerical computation to facilitate application of mathematical techniques and theories. The institute identifies research areas that benefit from a multidisciplinary approach in which computational mathematics plays a key role such as discrete mathematics, including computational probability and combinatorial optimization, optimization, stochastics, and numerical solution of partial differential equations. Research applications include the physical sciences, business, medicine, and information science.

A strength of iCME is its multidisciplinary intellectual environment, with interaction among students and faculty with diverse backgrounds and expertise. iCME offers service courses for undergraduates and graduate students to fulfill departmental requirements, core courses for M.S. and Ph.D. students in Scientific Computing and Computational Mathematics, and specialized electives in various application areas.

GRADUATE PROGRAMS IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

University regulations governing the M.S. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

The M.S. degree in Computational and Mathematical Engineering is intended as a terminal professional degree and does not lead

to the Ph.D. program. Students interested in the doctoral program should apply directly to the Ph.D. program. Master's students who have maintained a minimum grade point average (GPA) of 3.5 are eligible to take the Ph.D. qualifying exam; those who pass this examination and secure a research adviser may continue into the Ph.D. program upon acceptance by the institute.

The master's program consists of 45 units of course work taken at Stanford. No thesis is required; however, students may become involved in research projects during the master's program, particularly to explore an interest in continuing to the doctoral program. Although there is no specific background requirement, significant exposure to mathematics and engineering course work is necessary for successful completion of the program.

Applications to the M.S. program and all required supporting documents must be received by January 11, 2011. See http://icme.stanford.edu/admissions for up-to-date information including departmental deadlines. See http://gradadmissions.stanford.edu for information and application materials.

The University requirements for the coterminal M.S. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, also see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

REQUIREMENTS

A candidate is required to complete a program of 45 units of courses numbered 200 or above. Courses below 200 level will require special approval from the program office. At least 36 of these must be graded units, passed with a grade point average (GPA) of 3.0 (B) or better. Master's students interested in continuing to the doctoral program must maintain a 3.5 or better grade point average in the program.

Requirement 1—The following courses may be needed as prerequisites for other courses in the program: MATH 41, 42, 51, 52, 53, 103, 113; CME 100, 102, 104, 108, 200, 204, 302; CS 106A, 106X, 108, 205, 229; ENGR 62; STATS 116 or 202.

Requirement 2—Students must demonstrate foundational knowledge in the field by completing the following core courses:

- CME 302. Numerical Linear Algebra
- CME 303. Partial Differential Equations of Applied Mathematics
- CME 304. Numerical Optimization
- CME 305. Discrete Mathematics and Algorithms
- CME 306. Numerical Solution of Partial Differential Equations
- CME 308. Stochastic Methods in Engineering

Courses in this area must be taken for letter grades. Deviations from the core curriculum must be justified in writing and approved by the student's iCME adviser and the chair of the iCME curriculum committee. Courses that are waived may not be counted towards the master's degree.

Requirement 3—12 units of general electives to demonstrate breadth of knowledge in technical area. The elective course list represents automatically accepted electives within the program. However, electives are not limited to the list below, and the list is expanded on a continuing basis. The elective part of the iCME program is meant to be broad and inclusive of relevant courses of comparable rigor to iCME courses. Courses outside this list can be accepted as electives subject to approval by the student's iCME adviser.

1. *Aeronautics and Astronautics:*
   - AA 214B. Numerical Computation of Compressible Flow
   - AA 214C. Numerical Computation of Viscous Flow
   - AA 218. Introduction to Symmetry Analysis
2. *Computational and Mathematical Engineering:*
   - CME 208. Mathematical Programming and Combinatorial Optimization
   - CME 212. Introduction to Large Scale Computing in Engineering
   - CME 215 A,B. Advanced Computational Fluid Dynamics
   - CME263. Introduction to Linear Dynamical Systems
   - CME 324. Advanced Methods in Matrix Computation
   - CME 340. Large-Scale Data Mining
   - CME 342. Parallel Methods in Numerical Analysis
   - CME 364A. Convex Optimization 1
3. *Computer Science:*
   - CS 164. Computing with Physical Objects: Algorithms for Shape and Motion
   - CS 205. Mathematical Methods for Robotics, Vision, and Graphics
   - CS 221. Artificial Intelligence: Principles and Techniques
   - CS 228. Probabilistic Models in Artificial Intelligence
   - CS 229. Machine Learning
   - CS 255. Introduction to Cryptography
   - CS 261. Optimization and Algorithmic Paradigms
   - CS 268. Geometric Algorithms
   - CS 315A. Parallel Computer Architecture and Programming
   - CS 340. Level Set Methods
   - CS 348A. Computer Graphics: Geometric Modeling
   - CS 364A. Algorithmic Game Theory
4. *Electrical Engineering:*
   - EE 222. Applied Quantum Mechanics I
   - EE 223. Applied Quantum Mechanics II
   - EE 256. Numerical Electromagnetics
   - EE 262. Two-Dimensional Imaging
   - EE 278. Introduction to Statistical Signal Processing
   - EE 292E. Analysis and Control of Markov Chains
   - EE 363. Linear Dynamic Systems
   - EE 376A. Information Theory
5. *Management Science and Engineering:*
   - MS&E 220. Probabilistic Analysis
   - MS&E 221. Stochastic Modeling
   - MS&E 223. Simulation
   - MS&E 238. Network Structures and Analysis
   - MS&E 251. Stochastic Decision Models
   - MS&E 310. Linear Programming
   - MS&E 313. Vector Space Optimization
   - MS&E 316. Pricing Algorithms and the Internet
   - MS&E 321. Stochastic Systems
   - MS&E 322. Stochastic Calculus and Control
   - MS&E 323. Stochastic Simulation
6. *Mathematics:*
   - MATH 136. Stochastic Processes
   - MATH 171. Fundamental Concepts of Real Analysis
   - MATH 221. Mathematical Methods of Imaging
   - MATH 227. Partial Differential Equations and Diffusion Processes
   - MATH 236. Introduction to Stochastic Differential Equations
   - MATH 237. Stochastic Equations and Random Media
   - MATH 238. Mathematical Finance
7. *Mechanical Engineering:*
   - ME 335A,B,C. Finite Element Analysis
   - ME 346B. Introduction to Molecular Simulations
   - ME 408. Spectral Methods in Computational Physics
   - ME 412. Engineering Functional Analysis and Finite Elements
   - ME 469A,B. Computational Methods in Fluid Mechanics
   - ME 484. Computational Methods in Cardiovascular Bioengineering
8. *Statistics:*
   - STATS 208. Introduction to the Bootstrap
   - STATS 217. Introduction to Stochastic Processes
   - STATS 219. Stochastic Processes
   - STATS 227. Statistical Computing
   - STATS 237. Time Series Modeling and Forecasting
   - STATS 250. Mathematical Finance

- STATS 305. Introduction to Statistical Modeling
- STATS 310A,B,C. Theory of Probability
- STATS 324. Classical Multivariate and Random Matrix Theory
- STATS 345. Computational Molecular Biology
- STATS 362. Monte Carlo Sampling
- STATS 366. Computational Biology

9. *Other:*
   - CEE 281. Finite Element Structural Analysis
   - CEE 362G. Stochastic Inverse Modeling and Data Assimilation Methods
   - ENGR 209A. Analysis and Control of Nonlinear Systems

Requirement 4—9 units of focused graduate application electives, approved by the iCME graduate adviser, in the areas of engineering, mathematics, physical, biological, information, and other quantitative sciences. These courses should be foundational depth courses relevant to the student's professional development and research interests.

Requirement 5—3 units of an iCME graduate seminar or other approved seminar. Additional seminar units may not be counted towards the 45-unit requirement.

DOCTOR OF PHILOSOPHY IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

The deadline for applications to the Ph.D. program is December 7, 2010; all required supporting documents must be received by January 4, 2011. See http://icme.stanford.edu /admissions for full information. Prospective graduate students should see http://gradadmissions.stanford.edu for information and application materials. Applicants should take the Graduate Record Examination by October of the academic year in which the application is submitted.

Admission to the Ph.D. program does not imply that the student is a candidate for the Ph.D. degree. Advancement to candidacy requires superior academic achievement and passing the qualifying examination.

Requirements—

1. Complete a minimum of 135 units of residency at Stanford, including:
   a. 45 units from the master's program
   b. 27 units of focused electives in an area planned with the student's Ph.D. adviser; 12 of these units should come from iCME specialized electives with significant computational content such as the CME 320-380 series. The focused and specialized elective component of the iCME program is meant to be broad and inclusive of relevant courses of comparable rigor to iCME courses. The elective course list following represents automatically accepted electives within the program. However, electives are not limited to the list below, and the list is expanded on a continuing basis; courses outside the list can be accepted as electives subject to approval by the student's iCME adviser.
   c. 60 units of thesis research
   d. 3 units of free electives
2. Maintain a grade point average (GPA) of 3.5.
3. Pass the qualifying examination administered by iCME.
4. Complete an approved program of original research.
5. Complete a written dissertation based on research.
6. Pass the oral examination that is a defense of the dissertation research.

Specialized Elective List—See requirement 1b above.

CEE 362G. Stochastic Inverse Modeling and Data Assimilation Methods
CME 364A,B. Convex Optimization I,II
CS 348A. Computer Graphics: Geometric Modeling
EE 363. Linear Dynamical Systems
EE 368. Digital Image Processing
MATH 205A. Real Analysis
MATH 215A. Complex Analysis, Geometry and Topology
MATH 217A. Differential Geometry
MATH 221. Mathematical Methods of Imaging
MATH 227. Partial Differential Equations and Diffusion Processes
MATH 236. Introduction to Stochastic Differential Equations
MATH 237. Stochastic Equations and Random Media
MATH 238. Mathematical Finance
ME 335A,B,C. Finite Element Analysis
ME 346B. Introduction to Molecular Simulations
ME 351A,B. Fluid Mechanics
ME 361. Turbulence
ME 408. Spectral Methods in Computational Physics
ME 412. Engineering Functional Analysis and Finite Elements
ME 469A,B. Computational Methods in Fluid Mechanics
MS&E 319. Approximation Algorithms
MS&E 336. Topics in Game Theory with Engineering Applications
STATS 305. Introduction to Statistical Modeling
STATS 306A,B. Methods for Applied Statistics
STATS 318. Modern Markov Chains
STATS 366. Computational Biology

Note: All courses listed under "Requirement 3" under the "Master of Science in Computational and Mathematical Engineering" section can be used for fulfilling the general elective requirement.

FINANCIAL ASSISTANCE

The department awards a limited number of fellowships, course assistantships, and research assistantships to incoming graduate students. Applying for such assistance is part of submitting the application for admission to the program. Students are appointed for half-time assistantships which provide a tuition scholarship at the 8, 9, 10 unit rate during the academic year and a monthly stipend. Half-time appointments generally require 20 hours of work per week. Most course assistantships and research assistantships are awarded to students in the doctoral program in iCME. If the number of Ph.D. students is not sufficient to staff all course and research assistantship positions available, these positions may be open to master's students. However, master's students are not guaranteed financial assistance.

PH.D. MINOR IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

For a minor in Computational and Mathematical Engineering (CME), a doctoral candidate must complete 20 units of approved graduate level courses. These should include three iCME core courses and three iCME graduate electives at the 300 level or above. A maximum of two units can be taken as iCME seminar units. All courses, except the seminar courses, must be taken for a letter grade and passed with a grade of 'B' or better. Minor programs must receive approval from the iCME curriculum chair prior to completing any of the iCME graduate electives. Minor programs should be developed in close discussion between the student and the student's primary Ph.D. adviser. Courses taken in fulfillment of the minor cannot be used for the student's Ph.D. degree.

COMPUTER SCIENCE

Emeriti: (Professors) Tom Binford, Edward Feigenbaum, Richard Fikes, Donald E. Knuth,* John McCarthy, Edward J. McCluskey, Zohar Manna, William F. Miller, Nils J. Nilsson, Vaughan Pratt,* Jeffrey D. Ullman, Gio Wiederhold*

Chair: Jennifer Widom

Associate Chair for Education: Mehran Sahami

Professors: Alex Aiken, Dan Boneh, David Cheriton, William J. Dally, David Dill, Hector Garcia-Molina, Leonidas J. Guibas, Patrick Hanrahan, John Hennessy, Mark A. Horowitz, Oussama Khatib, Daphne Koller, Monica Lam, Jean-Claude Latombe, Marc Levoy, Teresa Meng, Nick McKeown, John Mitchell, Kunle Olukotun, Yoav Shoham, Sebastian Thrun, Luca Trevisan, Jennifer Widom, Terry Winograd

Associate Professors: Serafim Batzoglou, Dawson Engler, Ronald P. Fedkiw, Michael Genesereth, Christoforos Kozyrakis, Christopher Manning, David Mazieres, Nick McKeown, Andrew Ng, Serge A. Plotkin, Balaji Prabhakar, Mendel Rosenblum

Assistant Professors: Gill Bejerano, Jeffrey Heer, Sachin Katti, Scott Klemmer, Vladlen Koltun, Jure Leskovec, Philip Levis, Fei-Fei Li, Subhasish Mitra, Tim Roughgarden

Professors (Research): John Ousterhout, John K. Salisbury

Professor (Teaching): Eric S. Roberts

Associate Professor (Teaching): Stephen Cooper, Mehran Sahami

Courtesy Professors: Russ Altman, Martin Fischer, Bernd Girod, Michael Levitt, Mark Musen, Clifford J. Nass, Roy Pea, Fouad A. Tobagi

Courtesy Associate Professors: Ashish Goel, Dan Jurafsky, Vijay Pande, Benjamin Van Roy

Courtesy Assistant Professors: Paulo Blikstein, Atul Butte, Noah Goodman, Ramesh Johari, Ge Wang

Lecturers: Gerald Cain, Nicholas J. Parlante, Robert Plummer, Patrick Young, Julie Zelenski

Consulting Professors: Gary Bradski, Stuart Card, Tom Dean, Kathleen Fisher, Prabhakar Raghavan

Consulting Associate Professor: Federico Barbagli, Pei Cao

Consulting Assistant Professors: Kurt Akeley, Martin Casado

Visiting Professor: Martin Abadi

* Recalled to active duty.

Mail Code: 94305-9025

Phone: (650) 723-2273

Web Site: http:// www.cs.stanford.edu

Courses offered by the Department of Computer Science are listed under the subject code CS on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Computer Science (CS) operates and supports computing facilities for departmental education, research, and administration needs. All CS students have access to the departmental student machine for general use (mail, news, etc.), as well as computer labs with public workstations located in the Gates Building. In addition, most students have access to systems located in their research areas.

Each research group in Computer Science has systems specific to its research needs. These systems include workstations (PCs, Macs), multi-CPU computer clusters, and local mail and file servers. Servers and workstations running Linux or various versions of Windows are commonplace. Support for course work and instruction is provided on systems available through Information Technology Services (ITS) and the School of Engineering (SoE).

MISSION OF THE UNDERGRADUATE PROGRAM IN COMPUTER SCIENCE

The mission of the undergraduate program in Computer Science is to develop students' breadth of knowledge across the subject areas of computer sciences, including their ability to apply the defining processes of computer science theory, abstraction, design, and implementation to solve problems in the discipline. Students take a set of core courses. After learning the essential programming techniques and the mathematical foundations of computer science, students take courses in areas such as programming techniques, automata and complexity theory, systems programming, computer architecture, analysis of algorithms, artificial intelligence, and applications. The program prepares students for careers in government, law, and the corporate sector, and for graduate study.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able:

1. to apply the knowledge of mathematics, science, and engineering.
2. to design and conduct experiments, as well to analyze and interpret data.
3. to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. to function on multidisciplinary teams.
5. to identify, formulate, and solve engineering problems.
6. to understand professional and ethical responsibility.
7. to communicate effectively.
8. to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. to demonstrate a working knowledge of contemporary issues.
10. to apply the techniques, skills, and modern engineering tools necessary for engineering practice.
11. to transition from engineering concepts and theory to real engineering application.

GRADUATE PROGRAMS IN COMPUTER SCIENCE

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

COMPUTER SCIENCE COURSE CATALOG NUMBERING SYSTEM

The first digit of a CS course number indicates its general level of sophistication:

001-099	Service courses for nontechnical majors
100-199	Other service courses, basic undergraduate
200-299	Advanced undergraduate/beginning graduate
300-399	Advanced graduate
400-499	Experimental
500-599	Graduate seminars

The tens digit indicates the area of Computer Science it addresses:

00-09	Introductory, miscellaneous
10-19	Hardware Systems
20-29	Artificial Intelligence
30-39	Numerical Analysis
40-49	Software Systems
50-59	Mathematical Foundations of Computing
60-69	Analysis of Algorithms
70-79	Computational Biology and Interdisciplinary Topics
90-99	Independent Study and Practicum

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

The department offers both a major in Computer Science and a minor in Computer Science. Further information is available in the *Handbook for Undergraduate Engineering Programs* published by the School of Engineering. The Computer Science major offers a number of tracks (programs of study) from which students can choose, allowing them to focus their program on the areas of most interest. These tracks also reflect the broad diversity of areas in

computing disciplines. The department has an honors program, which is described in the following section.

In addition to Computer Science itself, Stanford offers several interdisciplinary degrees with a substantial computer science component. The Computer Systems Engineering major (which leads to a B.S. in Engineering) allows the study of areas requiring a knowledge of both computer hardware and software, bridging the gap between traditional CS and Electrical Engineering majors. The Symbolic Systems major (in the School of Humanities and Sciences) offers an opportunity to explore computer science and its relation to linguistics, philosophy, and psychology. Finally, the Mathematical and Computational Sciences major (also Humanities and Sciences) allows students to explore computer science along with more mathematics, statistics, and operations research.

HONORS PROGRAM

The Department of Computer Science (CS) and the School of Engineering degree program in Computer Systems Engineering (CSE) offer an honors program for undergraduates whose academic records and personal initiative indicate that they have the necessary skills to undertake high-quality research in computer science. Admission to the program is by application only. To apply for the honors program, students must be majoring in Computer Science or Computer Systems Engineering, have a grade point average (GPA) of at least 3.6 in courses that count toward the major, and achieve senior standing (135 or more units) by the end of the academic year in which they apply. Coterminal master's students are eligible to apply as long as they have not already received their undergraduate degree. Beyond these requirements, students who apply for the honors program must find a Computer Science faculty member who agrees to serve as the thesis adviser for the project. Thesis advisers must be members of Stanford's Academic Council.

Students who meet the eligibility requirements and wish to be considered for the honors program must submit a written application to the CS undergraduate program office by May 1 of the year preceding the honors work. The application must include a letter describing the research project, a letter of endorsement from the faculty sponsor, and a transcript of courses taken at Stanford. Each year, a faculty review committee selects the successful candidates for honors from the pool of qualified applicants.

In order to receive departmental honors, students admitted to the honors program must, in addition to satisfying the standard requirements for the undergraduate degree, do the following:

1. Complete at least 9 units of CS 191 or 191W under the direction of their project sponsor.
2. Attend a weekly honors seminar Winter and Spring quarters.
3. Complete an honors thesis deemed acceptable by the thesis adviser and at least one additional faculty member.
4. Present the thesis at a public colloquium sponsored by the department.
5. Maintain the 3.6 GPA required for admission to the honors program.

GUIDE TO CHOOSING INTRODUCTORY COURSES

Students arriving at Stanford have widely differing backgrounds and goals, but most find that the ability to use computers effectively is beneficial to their education. The department offers many introductory courses to meet the needs of these students.

For students whose principal interest is an exposure to the fundamental ideas behind computer science and programming, CS 105 is the most appropriate course. It is intended for students in nontechnical disciplines who expect to make some use of computers, but who do not expect to go on to more advanced courses. CS 105 meets the General Education Disciplinary Breadth Requirement in Engineering and Applied Sciences and includes an introduction to programming and the use of modern Internet-based technologies. Students interested in learning to use the computer should consider CS 1C, Introduction to Computing at Stanford.

Students who intend to pursue a serious course of study in computer science may enter the program at a variety of levels, depending on their background. Students with little prior experience or those who wish to take more time to study the fundamentals of programming should take CS 106A followed by CS 106B. Students in CS 106A need not have prior programming experience. Students with significant prior exposure to programming or those who want an intensive introduction to the field should take CS 106X or may start directly in CS 106B. CS 106A uses Java as its programming language; CS 106B and X use C++. No prior knowledge of these languages is assumed, and the prior programming experience required for CS 106B or X may be in any language. In all cases, students are encouraged to discuss their background with the instructors responsible for these courses.

After the introductory sequence, Computer Science majors and those who need a significant background in computer science for related majors in engineering should take CS 103, 107 and 110. CS 103 offers an introduction to the mathematical and theoretical foundations of computer science. CS 107 exposes students to a variety of programming concepts that illustrate critical strategies used in systems development; CS 110 builds on this material, focusing on the development of larger-scale software making use of systems and networking abstractions.

In summary:
For exposure: CS 1C
For nontechnical use: CS 105
For scientific use: CS 106A
For a technical introduction: CS 106A
For significant use: CS 106A,B or 106X, along with 103, 107, and 110

MASTER OF SCIENCE IN COMPUTER SCIENCE

In general, the M.S. degree in Computer Science is intended as a terminal professional degree and does not lead to the Ph.D. degree. Most students planning to obtain the Ph.D. degree should apply directly for admission to the Ph.D. program. Some students, however, may wish to complete the master's program before deciding whether to pursue the Ph.D. To give such students a greater opportunity to become familiar with research, the department has instituted a program leading to a master's degree with distinction in research. This program is described in more detail below.

Admission—Applications for admission to the M.S. program, and all of the required supporting documents, must be received by December 7, 2010. Exceptions are made for applicants who are already students at Stanford and are applying to the coterminal program. Information on these deadlines is available at http://cs.stanford.edu/wiki/admissions/Applying/Deadlines.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

REQUIREMENTS

A candidate is required to complete a program of 45 units. At least 36 of these must be graded units, passed with a grade point average (GPA) of 3.0 (B) or better. The 45 units may include no more than 10 units of courses from those listed below in Requirement 1. Thus, students needing to take more than two of the courses listed in Requirement 1 actually complete more than 45 units of course work in the program. Only well-prepared students may expect to finish the program in one year; most students complete the program in six quarters. Students hoping to complete the program with 45 units should already have a substantial background in computer science, including course work or experience equivalent to all of Requirement 1 and some prior course work related to their specialization area.

Requirement 1: Foundations—

Students must complete the following courses, or waive out of them by providing evidence to their advisers that similar or more advanced courses have been taken, either at Stanford or another institution:

1. Logic, Automata, and Computability: CS 103
2. Probability: CS 109 *or* STATS 116 *or* MS&E 220 *or* CME 106
3. Algorithms: CS 161
4. Computer Organization and Systems: CS 107
5. Principles of Computer Systems: CS 110

Requirement 2: Significant Software Implementation—

Students must complete at least one course designated as having a significant software implementation component. The list of such courses includes: CS 140, 143, 144, 145, 148, 210B, 221, 243, 248, 346.

Requirement 3: Specialization—

Students may choose to satisfy this requirement through one of two options, Single Depth or Dual Depth, outlined following. All courses taken for this requirement must be taken for letter grades.

- *Option 1—Single Depth*
  - A program of 27 units in a single area of specialization must be completed.
  - Additionally, students must complete three breadth courses from the list of approved breadth courses associated with their chosen specialization. Individual specializations explicitly have different breadth requirements; see the individual specialization sheets at http://cs.stanford.edu/degrees/mscs/programsheets for details.
  - Breadth courses may not be waived and must be completed for a letter grade.
- *Option 2—Dual Depth*
  - Students select distinct primary and secondary areas.
  - A program of 21 units in the primary area of specialization must be completed.
  - Students must also complete a program of five courses satisfying the requirements for their secondary area of specialization.
  - Breadth courses are not required.

Specialization Areas—

Nine approved specialization areas which may be used to satisfy Requirement 3 are listed following. Students may propose to the M.S. program committee other coherent programs that meet their goals and satisfy the basic requirements.

Courses marked with an asterisk (*) require consent of the the faculty adviser. Courses marked with a double asterisk (**) may be waived by students with equivalent course work and with the approval of their adviser.

1. *Artificial Intelligence—*
   a. CS 221**
   b. At least four of: CS 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 228, 229
   c. Sufficient depth units from category (b) and the following: CS 124, 205A, 222, 225A, 225B, 227B, 228T, 246, 262, 270, 273A, 274, 275, 276, 277, 278, 279, 294A*, 321, 322, 323, 326A, 327A, 328, 329, 341, 345, 364A, 364B, 374, 377,* 379*; 393*, 395*, 399*; EE 263, 363, 364A, 364B, 376A; ENGR 205, 209A; MS&E 251, 252, 339, 351, 352, 353; PSYCH 202, 205; STATS 202, 315A, 315B
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a), (b), and (c) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Artificial Intelligence must take five total courses satisfying the area (a) and (b) requirements above.
      - Those students who have waived out of CS 221 may take an additional course in either area (b) or (c).

   Artificial Intelligence Breadth Courses—CS 140, 143, 144, 145, 147, 148, 149, 154, 155, 157, 164, 240, 240E, 242, 243, 244, 244E, 249A, 255, 258, 259, 261, 268; CME 108, 302; EE 108B, 282, 284
2. *Biocomputation—*
   a. at least four of: CS 262, 270, 272, 273A, 274, 278, 279
   b. Sufficient depth units from category (a) and the following: CS 228, 229, 245, 246, 261, 268, 275, 277, 341, 345, 346, 365, 374, 393**, 395**, 399**; BIOC 218; GENE 203, 211; SBIO 228
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a) and (b) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Biocomputation must take five total courses, three courses of which must come from area (a) and the remaining two courses may come from either area (a) or (b).

   Biocomputation Breadth Courses—CS 121 or 221, 124, 140, 143, 144, 145, 147, 148, 149, 154, 155, 157, 164, 205A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 240, 240E, 242, 243, 244, 244E, 249A, 255, 258, 259, 276, 279; CME 108, 302; EE 108B, 282, 284.
3. *Computer and Network Security—*
   a. CS 140**, 144**, 155, 244, 255
   b. At least three of: CS 142, 240, 241, 244B, 244C, 259, 261, 340, 344, 355, 365
   c. Sufficient depth units from category (b) and the following: CS 240E, 244E, 245, 294S*, 295, 341, 344B, 345, 347, 361A, 393*, 395*, 399*; EE 384A, 384B, 384C, 384M, 384S, 384X, 384Y
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a), (b), and (c) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Computer and Network Security must take five courses; those five courses must satisfy the area (a) requirement and additional courses from area (b) should be taken if any area (a) requirements are waived.

   Computer and Network Security Breadth Courses—CS 121 or 221, 124, 143, 147, 148, 149, 154, 157, 164, 205A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 228, 229, 242, 243, 249A, 258, 262, 268, 270, 273A, 274, 276, 279; CME 108, 302; EE 108B, 282.
4. *Database Systems—*
   a. CS 145**, 245
   b. At least two of: CS 341, 345, 346, 347
   c. Sufficient depth units from category (b) and the following: CS 240, 242, 243, 244, 244B, 244C, 246, 249A, 249B, 255, 262, 270, 271, 272, 275, 276, 315A, 321, 344, 364B, 374, 393*, 395*, 399*
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a), (b), and (c) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Database Systems must take five courses satisfying the area (a), (b), and (c) requirements above.

   Database Systems Breadth Courses—S121 or 221, 124, 140, 147, 148, 149, 154, 155, 157, 164, 205A, 222,223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 228, 229, 240E, 244E, 258, 259, 261, 268, 273A, 274, 279; CME 108, 302; EE 108B, 282.
5. *Human-Computer Interaction—*
   a. CS 147**
   b. One of: CS 247, 294H
   c. One of: CS 376, 378, 448B

d. One of: CS 124, 142, 148
e. One of: CS 303; COMM 206, 268; PSYCH 110, 252
f. One of: ARTSTUDI 160; ME 203, 216A, 313, 377
g. One or more courses from areas (b) through (f), or the following: CS140, 210A, 210B, 223A, 223B, 224N, 224S, 224U, 224W, 226, 228, 229, 242, 246, 248, 295, 341, 345, 393*, 395*, 399* or any d.school class listed at http://www.stanford.edu/group/dschool/participate/classes.php or any HCI class listed at http://hci.stanford.edu/courses noted as counting towards the CS M.S. degree. Such courses must be numbered 100 or above and be taken for at least 3 units to count for this requirement.
   - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a) through (g) requirements above.
   - Students with a secondary area of specialization (per Option 2 above) in Human-Computer Interaction must take five courses as follows:
     1. one course each from areas (a), (d), (e), and (f)
     2. then one course from either area (b) or (c)
   - Students waiving out of the area (a) requirement should take one additional course from areas (b) through (g).

Human-Computer Interaction Breadth Courses—CS 121 or 221, 143, 144, 145, 149, 154, 155, 157, 164, 205A, 222, 224M, 227, 227B, 240,240E, 243, 244, 244E, 249A, 255, 258, 259, 261, 262, 268, 270, 273A, 274, 276, 279; CME 108, 302; EE 108B, 282, 284.

6. *Real-World Computing—*
   a. At least three of: CS 148, 223A, 223B, 248
   b. At least three of: CS 205A, 205B, 226, 249A, 249B, 262, 268, 277, 348A, 348B, 374; CME 302, 306, 326
   c. Sufficient additional units chosen from the above and from the following: CS 225A, 225B, 228, 229, 247, 270, 271, 272, 273A, 274, 294A*, 323, 327A, 328, 448, 393*, 395*, 399*
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a), (b), and (c) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Real-World Computing must take five total courses satisfying area (a) and two of the three courses in the area (b) requirements above (i.e., three courses in area (a) and two courses in area (b).

   Real-World Computing Breadth Courses—CS 121, or 221, 124, 140, 143, 144, 145, 147, 149, 154, 155, 157, 164, 222, 224M, 224N, 224S, 224U, 224W, 227, 227B, 240, 240E, 242, 243, 244, 244E, 246, 255, 258, 259, 261, 276, 279; CME 108, 302; EE 108B, 282, 284.
7. *Software Theory—*
   a. CS 242, 243
   b. At least one of: CS 241, 258, 259
   c. At least one of: CS 244, 245, 295, 341, 343, 345
   d. At least one course from the following: CS 255, 261, 268, 355, 361A, 361B, 365
   e. At least two additional courses chosen from (b), (c), (d), or the following: CS 294S*, 346, 393*, 395*, 399*
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a)-(e) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Software Theory need to take 5 total courses satisfying the area (a) through (d) requirements above:
        1. two courses in area (a)
        2. one course each in areas (b) through (d).

   Software Theory Breadth Courses—CS 121 or 221, 124, 140, 147, 148, 149, 154, 155, 157, 164, 205A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 228, 229, 240, 240E, 244E, 249A, 262, 270, 273A, 274, 276, 279; CME 108, 302; EE 108B, 282.
8. *Systems—*
   a. CS 140**, 144**, 240, 242
   b. At least three of: CS 243, 244, 245, 248, 348B; EE 271, 282
   c. At least two additional courses chosen from category (b) and the following: CS 240E, 244B, 244C, 244E, 246, 249A, 249B, 255, 259, 262, 270, 271, 272, 276, 294S*, 295, 315A, 315B, 340, 341, 343, 344, 344B, 345, 346, 347, 348A, 349, 374, 448, 393*, 395*, 399*; EE 273, 382A, 382C, 384A, 384B, 384C, 384M, 384S, 384X, 384Y
      - Students with a 27-unit depth option (Option 1 above) must take 27 units subject to satisfying the area (a), (b), and (c) requirements above.
      - Students with a 21-unit depth option (Option 2 above) must take that many units subject to satisfying the area (a) and (b) requirements above, and additional courses may be taken from area (c) if any courses in the area (a) requirement are waived.
      - Students with a secondary area of specialization (per Option 2 above) in Systems need to take five courses; those courses must satisfy the area (a) requirement and additional courses may be taken from area (b).

   *Systems Breadth Courses—C*S 121 or 221, 124, 147, 154, 155, 157, 164, 205A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 228, 229, 255, 258, 261, 268, 273A, 274, 279; CME 108, 302
9. *Theoretical Computer Science—*
   a. CS 241 or 258 or 259, 261 (361A or 361B may be used as substitutes for 261)
   b. Sufficient additional units chosen from: CS 228, 241, 246, 254, 255, 258, 259, 262, 268, 341, 345, 355, 356, 357, 358, 359,* 361A, 361B, 364A, 364B, 365, 369,* 374, 393*, 395*, 399*, 468*; MS&E 310
      - Multiple CS 359, CS 369, and/or CS 468 courses may be taken as long as they are each on different topics, denoted by different letter suffixes for the courses.
      - Students with a 27- or 21-unit depth option (Option 1 or 2 above) must take 27 or 21 units respectively subject to satisfying the area (a) and (b) requirements above.
      - Students with a secondary area of specialization (per Option 2 above) in Theoretical Computer Science need to take 5 total courses satisfying the area (a) and (b) requirements above:
        1. two courses in area (a)
        2. three courses in area (b).

   Theoretical Computer Science Breadth Courses—CS 121 or 221, 124, 140, 143, 144, 145, 147, 148, 149, 154, 155, 157, 164, 205A, 222, 223A, 223B, 224M, 224N, 224S, 224U, 224W, 226, 227, 227B, 229, 240,240E, 242, 243, 244, 244E, 249A, 270, 273A, 274, 276, 279; CME 108, 302; EE 108B, 282, 284.

* With consent of faculty adviser.

** Students with equivalent course work may waive with the approval of their adviser.

Requirement 4—

Additional elective units must be technical courses (numbered 100 or above) related to the degree program and approved by the adviser. All CS courses numbered above 110 (with the exception of CS 196 and 198) taken for 3 or more units are pre-approved as elective courses. Additionally, up to a maximum of 3 units of 500-level CS seminars, CS 300, EE 380, EE 385A, or other 1-2 unit seminars offered in the School of Engineering may be counted as electives. Elective courses may be taken on a satisfactory/no credit

basis provided that a minimum of 36 graded units is presented within the 45-unit program.

MASTER OF SCIENCE WITH DISTINCTION IN RESEARCH

A student who wishes to pursue the M.S. in CS with distinction in research must first identify a faculty adviser who agrees to supervise and support the research work. The research adviser must be a member of the Academic Council and must hold an appointment in Computer Science. The student and principal adviser must also identify another faculty member, who need not be in the Department of Computer Science, to serve as a secondary adviser and reader for the research report. In addition, the student must complete the following requirements beyond those for the regular M.S. in CS degree:

1. *Research Experience*—The program must include significant research experience at the level of a half-time commitment over the course of three academic quarters. In any given quarter, the half-time research commitment may be satisfied by a 50 percent appointment to a departmentally supported research assistantship, 6 units of independent study (CS 393, 395, or 399), or a prorated combination of the two (such as a 25 percent research assistantship supplemented by 3 units of independent study). This research must be carried out under the direction of the primary or secondary adviser.
2. *Supervised Writing and Research*—In addition to the research experience outlined in the previous requirement, students must enroll in at least 3 units of independent research (CS 393, 395, or 399) under the direction of their primary or secondary adviser. These units should be closely related to the research described in the first requirement, but focused more directly on the preparation of the research report described in the next section. The writing and research units described in parts (1) and (2) may be counted toward the 45 units required for the degree.
3. All independent study units (CS 393, 395, 399) must be taken for letter grades and a GPA of 3.0 (B) or better must be maintained.
4. *Research Report*—Students must complete a significant report describing their research and its conclusions. The research report represents work that is publishable in a journal or at a high-quality conference, although it is presumably longer and more expansive in scope than a typical conference paper. A copy of the research report must be submitted to the student services office in the department three weeks before the beginning of the examination period in the student's final quarter. Both the primary and secondary adviser must approve the research report before the distinction-in-research designation can be conferred.

JOINT M.S. AND LAW DEGREE

Law students interested in pursuing an M.S. in Computer Science must apply for admission to the Computer Science Department either (i) concurrently with applying to the Law School; or (ii) after being admitted to the Law School, but no later than the earlier of: (a) the end of the second year of law school; or (b) the Computer Science Department's admission deadline for the year following that second year of law school.

In addition to being admitted separately to the Law School and the Computer Science Department, students must secure permission from both academic units to pursue degrees in those units as part of a joint degree program.

J.D./M.S. students may elect to begin their course of study in either the Law School or the Computer Science Department. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full-time in the Law School for the first year of law studies. Otherwise, enrollment may be in the graduate school or the Law School and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. degree as specified by the Law School and the M.S. degree as specified in this Bulletin.

The Law School approves courses from the Department of Computer Science that may count toward the J.D. degree, and the Computer Science Department approves courses from the Law School that may count toward the M.S. degree in Computer Science. In either case, approval may consist of a list applicable to all join degree students or may be tailored to each individual student program. No more than 45 units of approved courses may be counted toward both degrees. No more than 36 units of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.S. in Computer Science is the greater of: (i) 12 units; or (ii) the maximum number of units from courses outside of the department that M.S. candidates in Computer Science are permitted to count toward the M.S. in the case of a particular student's individual program. Tuition and financial aid arrangements are normally through the school in which the student is then enrolled.

DOCTOR OF PHILOSOPHY IN COMPUTER SCIENCE

Applications to the Ph.D. program and all supporting documents must be submitted and received online by December 7, 2010. See http://cs.stanford.edu/wiki/admissions for complete information. Changes or updates to the admission process are posted in September.

The following are general department requirements. Contact the Computer Science Ph.D. administrator for details.

1. A student should plan and complete a coherent program of study covering the basic areas of computer science and related disciplines. The student's adviser has primary responsibility for the adequacy of the program, which is subject to review by the Ph.D. program committee.
2. The first year of the Ph.D. program is spent working with 1-3 different professors on a rotating basis. The intent is to allow the first-year Ph.D. student to work with a variety of professors before aligning with a permanent program adviser. Students who don't need the full year to find a professor to align with have the option of aligning within the first or second quarter.
3. Each student, to remain in the Ph.D. program, must satisfy the breadth requirement covering introductory-level graduate material in major areas of computer science. A student must fulfill two breadth area requirements in each of three general areas by the end of the second year in the program. Fulfillment of the six breadth-area requirements means eligibility to apply for candidacy prior to the second year in the program. An up-to-date list of courses that satisfy the breadth requirements can be found at the http://cs.stanford.edu/degrees/phd/Main/. The student must completely satisfy the breadth requirement by the end of the second year in the program and must pass a qualifying exam in the general area of the expected dissertation by the end of the third year in the program.
4. As part of the training for the Ph.D., the student is also required to complete at least 4 units (a unit is 10 hours per week for one quarter) as a course assistant or instructor for courses in Computer Science numbered 100 or above.
5. The Reading Committee form and Oral Thesis Proposal must be submitted within one year of passing the qualifying exam.
6. The most important requirement is the dissertation. After passing the required qualifying examination, each student must secure the agreement of a member of the department faculty to act as the dissertation adviser. The dissertation adviser is often the student's program adviser.
7. The student must pass a University oral examination in the form of a defense of the dissertation. This is typically held af-

ter all or a substantial portion of the dissertation research has been completed.
8. The student is expected to demonstrate the ability to present scholarly material orally in the dissertation defense.
9. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a second member from within the department, and a third member chosen from within or outside of the University. The principal adviser and at least one of the other committee members must be Academic Council members.

PH.D. MINOR IN COMPUTER SCIENCE

For a minor in Computer Science, a candidate must complete 20 unduplicated units of Computer Science course work numbered 200 or above. At least three of the courses must be master's core courses to provide breadth and one course numbered 300 or above to provide depth. One of the courses taken must include a significant programming project to demonstrate programming efficiency. Courses must be taken for a letter grade and passed with a grade of 'B' or better. Applications for a minor in Computer Science are submitted at the same time as admission to candidacy.

TEACHING AND RESEARCH ASSISTANTSHIPS IN COMPUTER SCIENCE

Graduate student assistantships are available. Half-time assistants receive a tuition scholarship for 8, 9, or 10 units per quarter during the academic year, and in addition receive a monthly stipend.

Duties for half-time assistants during the academic year involve approximately 20 hours of work per week. Course assistants (CAs) help an instructor teach a course by conducting discussion sections, consulting with students, and grading examinations. Research assistants (RAs) help faculty and senior staff members with research in computer science. Most course and research assistantships are held by Ph.D. students. If there is an insufficient number of Ph.D. students to staff teaching and research assistantships, then these positions are open to master's students. However, master's students should not plan on being appointed to an assistantship.

Students with fellowships may have the opportunity to supplement their stipends by serving as graduate student assistants.

OVERSEAS STUDIES COURSES IN COMPUTER SCIENCE

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

ELECTRICAL ENGINEERING

Emeriti: (Professors) Clayton W. Bates, Richard Bube, John Cioffi *, Von R. Eshleman, Michael J. Flynn *, Gene F. Franklin *, Joseph W. Goodman, Stephen E. Harris *, Martin E. Hellman, Thomas Kailath *, Gordon S. Kino *, John G. Linvill, Albert Macovski *, Laurence A. Manning, Edward J. McCluskey *, Malcolm M. McWhorter, James D. Meindl, Richard H. Pantell *, R. Fabian W. Pease *, Anthony E. Siegman, Leonard Tyler *, Robert L. White, Bernard Widrow *; (*Associate Professor*) Bruce B. Lusignan; *(Professors, Research)* Donald L. Carpenter *, Aldo da Rosa *, Antony Fraser-Smith *, C. Robert Helms, Ingolf Lindau *, David Luckham, Arogyaswami J. Paulraj *, Calvin F. Quate

Chair: Mark Horowitz

Vice Chairs: Robert W. Dutton, Dwight G. Nishimura

Associate Chair (Admissions): Howard Zebker

Chair (Academic Affairs Committee): Dwight G. Nishimura

Professors: Nicholas Bambos, Stephen P. Boyd, Thomas M. Cover, Donald C. Cox, William J. Dally, Robert W. Dutton, Abbas El Gamal, Hector Garcia-Molina, Bernd Girod, Andrea G. Goldsmith, Robert M. Gray, Patrick Hanrahan, James S. Harris, John L. Hennessy, Lambertus Hesselink, Mark A. Horowitz, Roger T. Howe, Umran S. Inan, Joseph M. Kahn, Gregory T. A. Kovacs, Thomas H. Lee, Marc Levoy, Nick McKeown, Teresa H. Y. Meng, David A. B. Miller, Dwight G. Nishimura, Oyekunle Olukotun, Brad G. Osgood, John Pauly, James D. Plummer, Krishna Saraswat, Fouad A. Tobagi, Shan X. Wang, Jennifer Widom, H. S. Philip Wong, S. Simon Wong, Bruce A. Wooley, Yoshihisa Yamamoto, Howard Zebker

Associate Professors: Dan Boneh, Dawson Engler, Shanhui Fan, John T. Gill III, Christoforos E. Kozyrakis, Sanjay Lall, Andrea Montanari, Boris Murmann, Balaji Prabhakar, Mendel Rosenblum, Krishna V. Shenoy, Olav Solgaard, Sebastian Thrun, Benjamin Van Roy, Jelena Vuckovic, Tsacy Weissman

Assistant Professors: Audrey Ellerbee, Sachin Katti, Philip Levis, Subhasish Mitra, Ada Poon, Peter Peumans

Professors (Research): James F. Gibbons, Leonid Kazovsky, Butrus Khuri-Yakub, Yoshio Nishi, Piero Pianetta

Acting Assistant Professor: Laurent Giovangrandi

Courtesy Professors: Stacey Bent, John Bravman, Emmanuel Candes, David Cheriton, Amir Dembo, David L. Dill, Per Enge, Gary Glover, Peter Glynn, Leonidas Guibas, Monica S. Lam, David G. Luenberger, John C. Mitchell, Sandy Napel, Richard Olshen, Norbert Pelc, Zhi-Xun Shen, Julius Smith, Claire Tomlin, Brian Wandell, Yinyu Ye, Shoucheng Zhang

Courtesy Associate Professors: Kwabena Boahen, Hari Manoharan, David Mazieres, Michael McConnell, Andrew Ng, Daniel Spielman, Barbara van Schewick

Courtesy Assistant Professors: Sigrid Close, Kerwyn C. Huang, Ramesh Johari, Gunter Niemeyer, Amin Saberi

Lecturers: Dennis Allison, Michel Digonnet, Andrew Freeman, Maria del Mar Hershenson, Brooks Leman, Roger Melen, Dieter Scherer, Jason Stinson, Howard Swain, James Weaver

Consulting Professors: Hamid Aghajan, Ahmad Bahai, Richard Dasher, John Doolittle, Leslie Field, Fred M. Gibbons, Dimitry Gorinevsky, Bertrand Hochwald, Bob S. Hu, Theodore Kamins, David Leeson, Madihally Narasimha, Gurudatta Parulkar, Ronald Schafer, David Su, Simon Sze, Martin Walt, John Wenstrand

Consulting Associate Professors: Edward Chan, Micah Siegel, Katelin Vleugels, Jun Ye

Consulting Assistant Professors: Kamesh Medapalli, Daniel O'Neill, Juan Santos, Jatinder Singh

Visiting Professors: Shigeru Nishiyama, Xiaofeng Tao, Zhiping Yu

Visiting Associate Professors: Kyesan Lee, Hyukjun Oh

Visiting Assistant Professors: Seung Hoon Hwang, Ofer Levi

* recalled to active duty

Courses offered by the Department of Electrical Engineering are listed under the subject code EE on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE UNDERGRADUATE PROGRAM IN ELECTRICAL ENGINEERING

The mission of the undergraduate program of the Department of Electrical Engineering is to augment the liberal education expected of all Stanford undergraduates, to impart a basic understanding of electrical engineering built on a foundation of physical science, mathematics, computing, and technology, and to provide majors in the department with knowledge of electrical engineering principles along with the required supporting knowledge of mathematics, science, computing, and engineering fundamentals. The program develops students' skills in performing and designing

experimental projects and communicating their findings to the scientific community effectively. Students in the major are required to select one sub-discipline for specialization. Choices include hardware, computer software, controls, electronics, fields and waves, or communication and signal processing. The program prepares students for careers in government agencies, the corporate sector, or for future study in graduate or professional schools.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. The educational objectives of the program are:

1. *Technical knowledge*—provide a knowledge of electrical engineering principles along with the required supporting knowledge of computing, engineering fundamentals, mathematics, and science. The program must include depth in at least one specialty area, currently including computer hardware, computer software, controls, circuits, fields and waves, communication and signal processing, and semiconductor and photonic devices.
2. *Laboratory and design skills*—develop the basic skills needed to perform and design experimental projects. Develop the ability to formulate problems and projects and to plan a process for solution, taking advantage of diverse technical knowledge and skills.
3. *Communications skills*—develop the ability to organize and present information and to write and speak effective English.
4. *Preparation for further study*—provide sufficient breadth and depth for successful subsequent graduate study, postgraduate study, or lifelong learning programs.
5. *Preparation for the profession*—provide an appreciation for the broad spectrum of issues arising in professional practice, including economics, ethics, leadership, professional organizations, safety, service, and teamwork.

UNDERGRADUATE PROGRAMS IN ELECTRICAL ENGINEERING

To major in Electrical Engineering (EE), undergraduates should follow the depth sequence in the "Undergraduate Degree in Electrical Engineering" section of this bulletin. Students are required to have a program planning sheet approved by their adviser and the department prior to the end of the quarter following the quarter in which they declare their major and at least one year prior to graduation. Program sheets for the general EE requirements and for each of the EE specialty sequences may be found at http://ughb.stanford.edu. Majors must receive at least a 2.0 grade point average (GPA) in courses taken for the EE depth requirement; all classes must be taken for a letter grade.

Students interested in a minor should consult the "Minor in Electrical Engineering" section of this bulletin.

A Stanford undergraduate may work simultaneously toward the B.S. and M.S. degrees. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

HONORS PROGRAM

The Department of Electrical Engineering offers a program leading to a Bachelor of Science in Electrical Engineering with honors. This program offers a unique opportunity for qualified undergraduate majors to conduct independent study and research at an advanced level with a faculty mentor, graduate students, and fellow undergraduates.

Admission to the honors program is by application. Declared EE majors with a grade point average (GPA) of at least 3.5 in Electrical Engineering are eligible to submit an application. Applications must be submitted by Autumn quarter of the senior year, be signed by the thesis adviser and second reader (one must be a member of the EE Faculty), and include an honors proposal. Students need to declare honors on Axess.

In order to receive departmental honors, students admitted to the honors program must:

1. maintain a grade point average (GPA) of at least 3.5 in EE courses.
2. complete at least 10 units of EE 191 for a letter grade with their project adviser.
3. submit two final copies of the honors thesis approved by the adviser and second reader.
4. attend poster and oral presentation in the Electrical Engineering Honors Symposium held at the end of Spring Quarter or present in another suitable forum approved by the faculty adviser.

GRADUATE PROGRAMS IN ELECTRICAL ENGINEERING

University regulations governing the M.S., Engineer, and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

The profession of electrical engineering demands a strong foundation in physical science and mathematics, a broad knowledge of engineering techniques, and an understanding of the relationship between technology and man. Curricula at Stanford are planned to offer the breadth of education and depth of training necessary for leadership in the profession. To engage in this profession with competence, four years of undergraduate study and at least one year of postgraduate study are recommended. For those who plan to work in highly technical development or fundamental research, additional graduate study is desirable.

A one- to two-year program of graduate study in Electrical Engineering may lead to the degree of Master of Science. The program is typically completed in five academic quarters. A two- to three-year program, offering a wider selection of engineering course work, more opportunity for study in the related fields of engineering, mathematics, and physics, and in particular, more independent work and individual guidance, may lead to the degree of Engineer.

The degree of Doctor of Philosophy is offered under the general regulations of the University. The doctoral program, requiring a minimum of 135 units of graduate study, should be considered by those with the ability and desire to make a life work of research or teaching.

Application for Admission—Applications for admission graduate in Electrical Engineering (EE) should be completed electronically at http://gradadmissions.stanford.edu. For information concerning Electrical Engineering graduate admissions, see http://ee-admissions.stanford.edu. The application deadline for admission for Autumn Quarter 2011-12 is December 14, 2010.

ELECTRICAL ENGINEERING COURSE CATALOG NUMBERING SYSTEM

Electrical Engineering courses are typically numbered according to the year in which the courses are normally taken.

010-099	first or second year
100-199	second through fourth year
200-299	mezzanine courses for advanced undergraduates or graduate students
300-399	first graduate year
400-499	second or third graduate year
600-799	special summer courses

The Department of Electrical Engineering (EE) offers courses in the following areas:

- Communication Systems
- Computer Hardware
- Computer Software Systems
- Control and System Engineering
- Dynamic Systems and Optimization
- Electronic Circuits

- Electronic Devices, Sensors, and Technology
- Fields, Waves, and Radioscience
- Image Systems
- Lasers, Optoelectronics, and Quantum Electronics
- Network Systems
- Signal Processing
- Solid State Materials and Devices

MASTER OF SCIENCE IN ELECTRICAL ENGINEERING

Students with undergraduate degrees in physics, mathematics, or related sciences, as well as in various branches of engineering, are invited to apply for admission. They should typically be able to complete the master's degree in five academic quarters; note that many courses are not taught during the summer. Students with undergraduate degrees in other fields may also be admitted for graduate study; see below.

The master's degree program may provide advanced preparation for professional practice or for teaching at the junior college level, or it may serve as the first step in graduate work leading to the degree of Engineer or Ph.D. The faculty does not prescribe specific courses to be taken. Each student, with the help of a program adviser, prepares an individual program and submits it to the faculty for approval. The master's program proposal must be submitted to the department office during the first quarter of graduate study; modifications may be made until one quarter prior to degree conferral. Detailed requirements and instructions are in the *Handbook for Graduate Students in Electrical Engineering at Stanford University* (http://ee.stanford.edu/gradhandbook). Programs of at least 45 units that meet the following guidelines are normally approved. Cognate (extradepartmental) courses of the appropriate level are considered as Electrical Engineering courses.

1. A sequence of three or more letter-graded electrical engineering courses numbered above 200, to provide depth in one area. The student must maintain an average 3.0 grade point average (GPA) or better in both the depth area and overall courses taken.
2. At least one letter-graded EE course numbered above 200 in each of three distinct course areas outside of the area selected under item 1 to provide breadth. Two courses are not considered to be in distinct areas if they can be found under a common depth area.
3. Enough additional units of EE courses so that items 1 through 3 total at least 21 units of letter-graded EE courses numbered above 200, including at least 9 units of such courses numbered in the 300s or 400s. Some 600- or 700-level summer courses may also be considered for inclusion in the M.S. program. Special studies units may not be used.
4. Additional course work to bring the total to 45 or more quarter units
   a. of which at least 36 must be letter-graded units
   b. of which 36 units must be at or above the 100 level
   c. of which 30 units must be in technical areas such as engineering, mathematics, and science
   d. thesis and special studies units cannot be included.
5. Either (a) one formal EE seminar course for credit, or (b) attend a minimum of eight informal or formal EE research seminars, and submit with the final M.S. program a list of the seminars with a paragraph describing the content and the signature of the M.S. adviser. This requirement is to ensure that students sample the many available research seminars.

Capable students without formal undergraduate preparation in electrical engineering may also be admitted for graduate study. Such students may have graduated in any field and may hold either the B.S. or B.A. degree. Each student, with the help of an adviser, prepares a program of study to meet particular needs and submits it to the faculty for approval. A student with adequate preparation in mathematics through calculus and college physics including electricity can usually complete the M.S. degree requirements within two academic years. A student with some additional preparation in electrical engineering may be able to complete the M.S. requirements in only one academic year.

Graduate study in EE demands that students be adequately prepared in circuits, digital systems, fields, lab work, mathematics, and physics. Skill in using modern computing facilities is essential for electrical engineers, and an increasing number of courses routinely require it. This skill should be acquired early in the program, either by taking one of the regular computer science courses or one of the special short courses given by the Computation Center, or by self-study.

It is the student's responsibility, in consultation with an adviser, to determine whether the prerequisites for advanced courses have been met. Prerequisite courses ordinarily taken by undergraduates may be included as part of the graduate program of study. However, if the number of these is large, the proposed program may contain more than the typical 45 units, and the time required to meet the degree requirements may be increased.

Students working toward the Master of Science degree in Electrical Engineering who are considering a Ph.D. or Engineer degree program in Electrical Engineering at Stanford must request the addition of a new degree program by submitting a Graduate Program Authorization Petition for approval by the department. The petition must be submitted and approved at least one quarter prior to M.S. degree completion. Once the M.S. degree in EE has been conferred, a student may not register for additional course work without this approval. Permission to study beyond the M.S. degree is normally granted to students who were originally admitted to the Ph.D. program if the student:

1. has passed the Ph.D. qualifying examination within the past year, or
2. has a written commitment from a regular member of the EE faculty to serve as an Engineer or Ph.D. dissertation adviser, and has a satisfactory academic record to date.

Students originally admitted only for the M.S. degree and not to the Ph.D. program may petition the EE graduate admissions committee during Autumn Quarter of their second year at Stanford for a change of status to the Ph.D. program with permission to take the Ph.D. qualifying exam in January. Requirements for the petition include a grade point average of 3.5 on Stanford courses and a written statement of support from an EE faculty member with whom the student has conducted preliminary research through directed reading (EE 390 or 391) or as part of a 300-level project course. Decisions are based on performance and the strength of the support letter. If admitted to the Ph.D. program, permission to study beyond the M.S. degree is normally granted under the same conditions as those described above for students originally admitted to the Ph.D. program. Students not admitted to the Ph.D. program are normally granted permission to continue past the M.S. degree only if there is a written commitment from a regular member of the EE faculty to serve as an Engineer dissertation supervisor. The student should file for candidacy for the Engineer degree within one quarter of receiving the M.S.

JOINT ELECTRICAL ENGINEERING AND LAW DEGREE (J.D./M.S.)

The Department of Electrical Engineering and the School of Law offer a joint degree program leading to an M.S. degree in EE combined with a J.D. degree. The J.D./M.S. program is designed for students who wish to prepare themselves for careers that involve both Law and Electrical Engineering.

Students interested in this joint degree program must apply to and gain admission separately from the Department of Electrical Engineering and the School of Law, and as an additional step, secure consent from both academic units to pursue both degrees simultaneously. Interest in the program should be noted on a student's application to each academic unit. A student currently enrolled in either the Department of Electrical Engineering or the School of Law may apply for admission to the other academic unit and for joint degree status after commencing study in that unit.

Joint degree students may elect to begin their study in either the Department of Electrical Engineering or the School of Law. Fac-

ulty advisers from each academic unit participate in the planning and supervising of the student's joint program. In the first year of the joint degree program, students must be enrolled full-time in the School of Law. Students must satisfy the requirements for both the J.D. and the M.S. degrees as specified in the *Stanford Bulletin*.

The Electrical Engineering Department approves courses from the Law School that may count toward the M.S. degree in Electrical Engineering, and the Law School approves courses from the Department of Electrical Engineering that may count toward the J.D. degree. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program.

No more than 45 quarter hours of approved courses may be counted toward both degrees. No more than 36 quarter hours of courses that originate outside the School of Law may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the School of Law but count toward the Law degree, the School of Law credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis but not below zero.

The maximum number of School of Law units that may be counted toward the M.S. degree in Electrical Engineering is the greater of:

1. 12 quarter (8 semester) units
   or
2. the maximum number of units from courses outside of the department that M.S. candidates in Electrical Engineering are permitted to count toward the M.S. degree under general departmental guidelines, or as set forth in the case of a particular student's individual program.

Tuition and financial aid arrangements are typically administered through the school in which the student is enrolled.

THE HONORS COOPERATIVE PROGRAM

Many of the department's graduate students are supported by the Honors Cooperative Program (HCP), which makes it possible for academically qualified engineers and scientists in nearby companies to be part-time graduate students in Electrical Engineering while continuing nearly full-time professional employment. Prospective HCP students follow the same admission process and must meet the same admission requirements as full-time graduate students. For more information regarding the Honors Cooperative Program, see the "School of Engineering" section of this bulletin.

ENGINEER DEGREE IN ELECTRICAL ENGINEERING

The degree of Engineer requires a minimum of 90 units of residency. Units completed at Stanford towards a master's degree in an Engineering discipline may be used towards the 90-unit residency requirement for the Engineer degree. A student who received an M.S. degree elsewhere can transfer in 45 units towards the 90-unit requirement for an Engineer's degree. This requires the student to fill out the Application for Graduate Residency Credit form to be filed with the Degree Progress Office in the Registrar's Office.

Work toward the degree of Engineer in Electrical Engineering normally includes the requirements for work toward the master's degree in Electrical Engineering, including qualifications for admission.

An additional year allows time for a broader program, or a more concentrated program, or whatever arrangement may seem suitable to the candidate, the adviser, and the department. Advanced study at other universities, or in other departments at Stanford, may be allowed within the foregoing consideration. The equivalent of approximately one quarter is devoted to independent study and thesis work with faculty guidance. The thesis is often of the nature of a professional report on the solution of a design problem. The degree of Engineer differs from the Ph.D. in that it prepares for professional engineering work rather than theoretical research. The candidate may select courses that are suitable for either the degree of Engineer or the Ph.D. degree and decide later which program to pursue.

Applicants currently working toward the Stanford M.S. degree in Electrical Engineering should request permission to continue graduate studies beyond the master's degree, using the Graduate Program Authorization Petition form obtained from the Department of Electrical Engineering office. Applicants not planning to receive the Stanford M.S. degree in Electrical Engineering should apply for admission to the Department of Electrical Engineering as a candidate for the degree of Engineer.

During the first quarter of work beyond the M.S. degree, formal application for admission to candidacy for the degree of Engineer is made on a form that can be obtained from the department office. The student prepares his or her academic study plan with the help of the thesis adviser and submits it to the academic associate for approval. The form should contain a list of all graduate courses completed at Stanford and elsewhere and all courses yet to be completed. For the most recent information, see http://ee.stanford.edu/gradhandbook.

DOCTOR OF PHILOSOPHY IN ELECTRICAL ENGINEERING

The University requirements for the Ph.D. degree are described in the "Graduate Degrees" section of this bulletin.

Admission to a graduate program does not imply that the student is a candidate for the Ph.D. degree. Advancement to candidacy requires superior academic achievement, satisfactory performance on a qualifying examination, and sponsorship by two faculty members. Enrollment in EE 391, Special Studies, is recommended as a means for getting acquainted with a faculty member who might be willing to serve as a supervisor.

Students admitted to the Ph.D. program should submit an application to take the department qualifying examination (given each Winter Quarter). Upon completion of the qualifying examination and after securing agreement by two faculty members to serve as dissertation advisers, the student should file an Application for Doctoral Candidacy. Students are expected to apply for candidacy prior to the end of their second year in the graduate program. The Ph.D. in Electrical Engineering is a specialized degree, and is built on a broad base of physics, mathematics, and engineering skills. The course program is expected to reflect competency in Electrical Engineering and specialized study in other areas relevant to the student's research focus. Normally the majority of units are drawn from EE department or cognate courses, with typically 9 units from related advanced physics, mathematics, engineering, or computer science courses, depending on the area of research. Only after receiving department approval of the Application for Candidacy, does the student become a candidate for the Ph.D. degree.

Requirements may be summarized as follows. The student must complete:

1. a minimum of 135 units of residence with graduate standing at Stanford
2. one or more qualifying examinations given by the faculty of the Department of Electrical Engineering
3. an approved course of study in Electrical Engineering
4. an approved program of research and a written dissertation, based on research, which must be a contribution to knowledge
5. an oral examination that is a defense of dissertation research and is taken near the completion of the doctoral program.

For the most recent information, see http://ee.stanford.edu/gradhandbook.

FINANCIAL ASSISTANCE

The department awards a limited number of fellowships, teaching and course assistantships, and research assistantships to incoming graduate students. Applying for financial assistance is part of the admission application.

PH.D. MINOR IN ELECTRICAL ENGINEERING

For a minor in Electrical Engineering (EE), the student must fulfill the M.S. depth requirement, complete a total of at least 20 units of course work at the 200-plus level in Electrical Engineering (of which 15 units must be letter-graded), and be approved by the department's Ph.D. Degree Committee. A grade point average (GPA) of at least 3.35 on these courses is required.

AREAS OF RESEARCH IN ELECTRICAL ENGINEERING

Candidates for advanced degrees participate in the research activities of the department as paid research assistants or as students of individual faculty members. At any one time, certain areas of research have more openings than others. A new applicant should express a second choice of research interest in the event that there are no vacancies in the primary area of interest. At present, faculty members and students are actively engaged in research in the following areas:

- Biomedical Devices and Bioimaging
- Energy: solar cells, smart grid, load control
- Environmental and Remote Sensing: sensor nets, radar systems, space
- Graphics, HCI, Computer Vision, Photography
- Web Applications, Data Management, Security/Privacy
- Systems Software: OS, compilers, languages
- Systems Hardware: architecture, VLSI, embedded systems
- Network Systems and Science: next generation Internet, wireless networks
- Communication Systems: wireless, optical, wireline
- Information Theory and Coding: image and data compression, denoising
- Control, Learning, and Optimization
- Integrated Circuit Design: MEMs, sensors, analog, RF
- Nano, Quantum Science, and Engineering
- Electronic, Photonic, and Magnetic Devices
- Nanofabrication Science and Technology
- Fields and Waves

For additional information, see the Department of Electrical Engineering's Research page at http://ee.stanford.edu/research.php.

OVERSEAS STUDIES COURSES IN ELECTRICAL ENGINEERING

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

MANAGEMENT SCIENCE AND ENGINEERING

Emeriti: (Professors) James L. Adams, Kenneth J. Arrow, Richard W. Cottle, Donald A. Dunn, B. Curtis Eaves, Frederick S. Hillier, Donald L. Iglehart, James V. Jucker, Michael M. May, William J. Perry, Henry E. Riggs, David A. Thompson, Arthur F. Veinott, Jr.

Chair: M. Elisabeth Paté-Cornell

Professors: Nicholas Bambos, Stephen R. Barley, Margaret L. Brandeau, Robert C. Carlson, Kathleen M. Eisenhardt, Peter W. Glynn, Warren H. Hausman, Ronald A. Howard, David G. Luenberger, M. Elisabeth Paté-Cornell, Robert I. Sutton, James L. Sweeney, Yinyu Ye

Associate Professors: Samuel S. Chiu, Ashish Goel, Pamela J. Hinds, Riitta Katila, Ross D. Shachter, Edison T. S. Tse, Benjamin Van Roy

Assistant Professors: Charles E. Eesley, Feryal Erhun, Kay Giesecke, Ramesh Johari, James A. Primbs, Amin Saberi, Thomas A. Weber

Professors (Research): Siegfried S. Hecker, Walter Murray, Michael A. Saunders, John P. Weyant

Professors (Teaching): Thomas H. Byers, Robert E. McGinn

Courtesy Professors: Anat Admati, Stephen P. Boyd, Walter Powell, Tim Roughgarden

Affiliated Faculty: Seenu Srinivasan

Lecturers: Steve Blank, Andrei Z. Broder, Gregory Hamm, Hill Huntington, Vanja Josifovski, Phil Lin, Ann Miura-Ko, Mary Morrison, Donna Novitsky, Lena Ramfelt, Tina Seelig, Rosanne Siino, Lynda Kate Smith, Andreas Weigend

Consulting Professors: Gerd Infanger, Thomas Kosnik, James E. Matheson, D. Warner North, Burke Robinson, Sam L. Savage, Behnam Tabrizi

Consulting Associate Professors: Adam B. Borison, Peter Haas, Gregory L. Hamm, Samuel Holtzman, Hervé Kieffel, Michael Lyons, Audrey MacLean, Dariush Rafinejad, Adam Seiver, F. Victor Stanton

Consulting Assistant Professors: Blake E. Johnson, Jan Pietzsch

Visiting Professor: Olivier de La Grandville

Visiting Associate Professors: Charles Feinstein, Yee-Tien Fu

Visiting Assistant Professors: Arik Lifschitz, Peter Woehrmann

Director of the Industrial Affiliates Program: Yinyu Ye

Department Offices: Huang Engineering Center, 475 Via Ortega, 94305-4121

Mail Code: 4026

Web Site: http://stanford.edu/dept/MSandE

Courses offered by the Department of Management Science and Engineering are listed under the subject code MS&E on the *Stanford Bulletin's* ExploreCourses web site.

In December 1999, the Board of Trustees authorized the creation of the Department of Management Science and Engineering from the Department of Industrial Engineering and Engineering Management and the Department of Engineering-Economic Systems and Operations Research. Its main objective is to be the leader at the interface of engineering, business, and public policy. The department's mission is, through education and research, to advance the design, management, operation, and interaction of technological, economic, and social systems. The department's engineering research strength is integrated with its educational program at the undergraduate, master's, and doctoral levels: graduates of the program are trained as engineers and future leaders in technology, policy, and industry. Research and teaching activities are complemented by an outreach program that encourages the transfer of ideas to the environment of Silicon Valley and beyond.

Management Science and Engineering (MS&E) provides programs of education and research by integrating three basic strengths:

1. depth in conceptual and analytical foundations
2. comprehensive coverage of functional areas of application
3. interaction with other Stanford departments, Silicon Valley industry, and organizations throughout the world.

The analytical and conceptual foundations include decision and risk analysis, dynamic systems, economics, optimization, organizational science, and stochastic systems. The functional areas of application include entrepreneurship, finance, information, marketing, organizational behavior, policy, production, and strategy. Close associations with other engineering departments and with industry enrich the programs by providing opportunities to apply

MS&E methods to important problems and by motivating new theoretical developments from practical experience. MS&E's programs also provide a basis for contributing to other areas such as biotechnology, defense policy, environmental policy, information systems, and telecommunications.

MISSION OF THE UNDERGRADUATE PROGRAM IN MANAGEMENT SCIENCE AND ENGINEERING

The mission of the undergraduate program in Management Science and Engineering is to provide students with the fundamentals of engineering systems analysis so that they are able to plan, design, and implement complex economic and technical management systems. The program builds on the foundational courses for engineering including calculus, engineering fundamentals, and physics or chemistry as well as management science. Students may select courses in computer science, information, organizational theory, mathematical modeling, optimization, probability, statistics and finance or production. To allow for greater in-depth exploration in a particular area, students then choose a concentration area. The major prepares students for a variety of career paths, including facilities and process management, investment banking, management consulting or for graduate school in industrial engineering, operations research, economics, public policy, medicine, law, or business.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able:

1. to apply the knowledge of mathematics, science, and engineering;
2. to design and conduct experiments;
3. to design a system or components to meet desired needs;
4. to identify, formulate, and solve engineering problems;
5. to use techniques, skills, and modern engineering tools necessary for engineering practice;
6. to function on multidisciplinary teams;
7. to communicate effectively;
8. to recognize the need for and demonstrate an ability to engage in life-long learning;
9. to obtain the background necessary for admission to top professional graduate engineering or business programs;
10. to understand professional and ethical responsibility;
11. to obtain the broad education necessary to understand the impact of engineering solutions in a global and societal context; and
12. to obtain a knowledge of contemporary issues pertinent to the field of management science and engineering.

GRADUATE PROGRAMS IN MANAGEMENT SCIENCE AND ENGINEERING

MS&E, in collaboration with other departments of the University, offers programs leading to the degrees of Master of Science and Doctor of Philosophy. The department also offers a coterminal B.S./M.S. degree, and a dual master's degree in cooperation with each of the other departments in the School of Engineering.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

Applicants for admission as graduate students in MS&E must submit the results of the verbal, quantitative, and analytical parts of the Graduate Record Examination. The deadline for application to the doctoral program is December 7, 2010, and the deadline for application to the master's program is January 11, 2011.

Except in unusual circumstances, admission is limited to the Autumn Quarter because courses are arranged sequentially with basic courses and prerequisites offered early in the academic year.

Assistantships and Fellowships—A limited number of fellowships and assistantships are awarded each year. Applicants admitted to the doctoral program, who have indicated on their application that they would like to be considered for financial aid, are automatically considered for these assistantships and fellowships.

Information about loan programs and need-based aid for U.S. citizens and permanent residents can be obtained from the Financial Aid Office.

CAREERS IN MS&E

MS&E helps students prepare for professional careers in business, government, industry, non-profit institutions, and universities. Graduates have pursued careers in consulting, enterprise management, financial analysis, government policy analysis, industrial research, line management, product development, project management, strategic planning, and university teaching and research. Some have founded companies specializing in financial services, high technology products, management and systems consulting, or software. Other graduates have helped establish new analytical capabilities in existing firms or government agencies.

Many graduates have become leaders in technology-based businesses, which have an increasing need for well-educated, analytically oriented people who understand both business and technology. The Department of MS&E is attractive to people with engineering, mathematical science, and physical science backgrounds as it complements their technical abilities with the conceptual frameworks needed to analyze problems of investment, management, marketing, operations, production, and strategic planning in a technical environment.

PROFESSIONAL EDUCATION

The Stanford Center for Professional Development (SCPD) provides opportunities for employees of some local and remote companies to take courses at Stanford.

The Honors Cooperative Program (HCP) provides opportunities for employees of SCPD Member companies to earn an M.S. degree, over a longer period, by taking one or two courses per academic quarter. Some courses are only offered on campus; HCP students may attend those courses at Stanford to meet the degree requirements. It is possible to complete this program as a remote HCP student although the remote offerings are limited. Students must apply for a degree program through the standard application process, and must meet the standard application deadlines.

The non-degree option (NDO) allows employees of some local companies to take courses for credit from their company sites before being admitted to a degree program. Students apply to take NDO courses each quarter through the Stanford Center for Professional Development. Up to 18 units taken as an NDO student may be applied toward a degree program. For additional information about the NDO application process and deadlines, see http://scpd.stanford.edu, or contact SCPD at (650) 725-3000.

The department offers a certificate program within the framework of the NDO program. A certificate can be obtained by completing three MS&E core courses, plus one MS&E elective course for a total of four courses. For further information, see http://scpd.stanford.edu/scpd/programs/certs/managementSci.htm.

BACHELOR OF SCIENCE IN MANAGEMENT SCIENCE AND ENGINEERING

The program leading to the B.S. degree in Management Science and Engineering (MS&E) is outlined in the School of Engineering section of this bulletin; more information is contained in the School of Engineering's *Handbook for Undergraduate Engineering Programs*. Students are encouraged to plan their academic programs as early as possible, ideally in the freshman or sopho-

more year. Students should not wait until they are declaring a major to consult with the department's student services staff. This is particularly important for students who would like to study overseas or pursue another major or minor.

The undergraduate curriculum in Management Science and Engineering provides students training in the fundamentals of engineering systems analysis to prepare them to plan, design, and implement complex economic and technological management systems where a scientific or engineering background is necessary or desirable. Graduates are prepared for work in a variety of career paths, including facilities and process management, investment banking, management consulting, or graduate study in industrial engineering, operations research, economics, public policy, medicine, law, or business.

The educational objectives of the undergraduate degree program are:

- *Principles and Skills*—provide students with a basic understanding of management science and engineering principles, including analytical problem solving and communications skills.
- *Preparation for Practice*—prepare students for practice in a field that sees rapid changes in tools, problems, and opportunities.
- *Preparation for Continued Growth*—prepare students for graduate study and self development over an entire career.
- *Preparation for Service*—develop in students the awareness, background, and skills necessary to become responsible citizens, employees, and leaders.

In particular, the department wants to help students develop:

- an ability to apply knowledge of math, science, and engineering
- an ability to design and conduct experiments
- an ability to design a system or components to meet desired needs
- an ability to identify, formulate, and solve engineering problems
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
- an ability to function on multidisciplinary teams
- an ability to communicate effectively
- a recognition of the need for and an ability to engage in lifelong learning
- background necessary for admission to top professional graduate engineering or business programs
- an understanding of professional and ethical responsibility
- the broad education necessary to understand the impact of engineering solutions in a global and societal context
- a knowledge of contemporary issues pertinent to the field of management science and engineering.

The program builds on the foundational courses for engineering, including calculus, engineering fundamentals, and physics or chemistry.

The department core, taken for all concentrations, includes courses in computer science, deterministic optimization, information, organization theory, a senior project, and finance or production. Through the core, students in the program are exposed to the breadth of faculty interests, and are in a good position to choose a concentration during the junior year.

The five concentrations are designed to allow a student to explore one area of the department in greater depth.

1. *Financial and Decision Engineering:* focuses on the design and analysis of financial and strategic plans. It features accounting, decision analysis, economics, finance, investment science, and stochastic models.
2. *Operations Research:* provides a more mathematical program, based on algorithms, theory, and applications in economics and operations.
3. *Organization, Technology, and Entrepreneurship:* focuses on understanding and design of organizations, particularly technology-based issues. It features courses on innovation, product development, entrepreneurship, work and manufacturing systems, information systems, and human-computer interaction.
4. *Production and Operations Management:* focuses on the design and analysis of manufacturing, production, and service systems.
5. *Policy and Strategy*: focuses on the design and analysis of public policies and corporate strategies, especially those with technology-based issues. It features a core in microeconomics and modeling approaches, and policy-focused courses in topics such as national security, energy and environment, and health care, and strategy-focused courses in topics such as entrepreneurship, innovation, and product development.

Students interested in a minor should see the "Minor in MS&E" section of this bulletin.

MS&E also participates with the departments of Computer Science, Mathematics, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science" section of this bulletin.

MASTER OF SCIENCE IN MANAGEMENT SCIENCE AND ENGINEERING

The M.S. degree programs require a minimum of 45 units beyond the equivalent of a B.S. degree at Stanford. All programs represent substantial progress in the major field beyond the bachelor's degree.

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The M.S. program in Management Science and Engineering (MS&E) prepares individuals for a lifelong career addressing critical technical and managerial needs in private and public decision making. Department requirements for the M.S. degree provide breadth across some of the areas of the department, and flexibility for meeting individual objectives of depth in a particular area of concentration. The master's degree may be a terminal degree program with a professional focus, or a preparation for a more advanced graduate program. The M.S. degree can normally be earned in one academic year (three academic quarters) of full-time work, although students may choose to continue their education by taking additional MS&E courses beyond that year. Background requirements, taken in addition to degree requirements, must be met by students who have had insufficient course work in mathematical sciences, computer science, engineering and/or natural sciences.

Students must take a minimum of 45 course units as follows:

1. At least five core courses
2. At least three other courses in an area of concentration of their choice
3. A course in probability, unless a college-level course in probability has already been passed
4. A project course requirement
5. The remaining units in elective courses.

Background Requirements—Students must have had or must take the following (or equivalent) courses before the M.S. degree is conferred: MATH 41, 42, 51, Calculus, 15 units; CS 106A, Programming Methodology, 5 units, and an additional 15 units of engineering, mathematical sciences, or natural sciences. These courses do not count toward the 45 units of the M.S. degree. Courses taken to meet MS&E background requirements may be at either the undergraduate or graduate level, and may be taken as credit/no credit. These additional background requirements would typically be met by students who have a bachelor's degree in engineering, or mathematical or natural sciences.

Core (Depth) Courses—M.S. students must take at least five courses out of the following eleven options:

- MS&E 201. Dynamic Systems *or* MS&E 251. Stochastic Decision Models
- MS&E 211. Linear and Nonlinear Optimization

- MS&E 220. Probabilistic Analysis
- MS&E 221. Stochastic Modeling *or* MS&E 223. Simulation
- MS&E 240. Accounting *or* MS&E 242. Investment Science
- MS&E 241. Economic Analysis
- MS&E 252. Decision Analysis *or* MS&E 250A. Risk Analysis
- MS&E 261. Production Systems
- MS&E 270. Strategy in Technology-Based Companies
- MS&E 271. Global Entrepreneurial Marketing
- MS&E 280. Organizational Behavior

Students may not waive core courses. They may, however, petition to substitute an approved, more advanced MS&E course in the same area. Courses used to satisfy the core requirement must be taken for a letter grade, must be taken for a minimum of three units each, and may not also be used to satisfy the concentration requirement.

Courses in an Area of Concentration (Breadth)—Students must complete a departmentally approved set of three or more letter-graded courses taken for a minimum of three units each, in an area of concentration of one of the following types:

1. An area of concentration in the MS&E department
2. An area of concentration in one of the seven other departments of the School of Engineering
3. In exceptional cases, a coherent area of concentration designed by the student. Petitions for student-designed concentrations must list the three proposed courses (taken for three units or more and at the 200-level or above) and include a brief justification. The petition must be submitted to student services no later than the fifth week of the quarter prior to graduation.

Project Course Requirement—Students must take either a designated project course or two designated integrated project courses. The project course(s) must be taken for a letter grade, must be taken for a minimum of three units, and may also be used to satisfy the core or concentration requirement.

Additional requirements are:

1. At least 45 units must be in courses numbered 100 and above.
2. At least 27 units must be in courses numbered 200 and above in MS&E, taken for a letter grade and a minimum of two units each, and at least 36 letter-graded units must be in MS&E or closely related fields. Closely related fields include any department in the School of Engineering, mathematics, statistics, economics, sociology, psychology, or business.
3. The degree program must be completed with a grade point average (GPA) of 3.0 or higher.
4. A maximum of three units of language courses (numbered 100 and above).
5. A maximum of three units of 1-unit courses such as seminars, colloquia, workshops, in any department, and a maximum of one unit of MS&E 208A, B, or C, Curricular Practical Training.
6. A maximum of 18 non-degree option (NDO) units through the Stanford Center for Professional Development (SCPD).
7. Courses in athletics may not be applied toward the degree.

See the student services office or department web site for complete listing of project, integrated project, and approved concentrations.

ENERGY AND ENVIRONMENT TRACK

The Energy and Environment M.S. track is designed for students interested in energy and environmental issues from the perspectives of public policy, nongovernmental organizations, or corporations. This track includes: core courses that provide the conceptual background in economics, decisions, strategy, investment, and organizational behavior; courses in energy resources, natural resource economics, and energy/environmental policy analysis; and an individually designed concentration emphasizing policy, strategy, and/or technology. Seminars provide insights into current corporate strategy, public policy, and research community developments. Energy/environmental project courses give practice in applying methodologies and concepts. Students can complete the program in one year or may extend the program up to two years, taking additional courses for greater depth and breadth. For additional information, see http://www.stanford.edu/dept/MSandE/academics/energyenvironment.html.

DUAL MASTER'S DEGREE PROGRAM

The dual degree program enables a small group of graduate students to obtain two master's degrees simultaneously. Students complete the course requirements for each department. A total of 90 units is required to complete the dual master's degree.

Admission—For the dual degree, admission to two departments is required, but is coordinated by designated members of both admissions committees who make recommendations to the committees of their respective departments. Students may apply to only one department initially. After the first quarter at Stanford, students may apply to be admitted to the second department.

Advising—Every student in the dual degree program has one adviser in each department.

JOINT MS&E AND LAW DEGREES

The School of Law and the Department of Management Science and Engineering offer joint degree programs leading to a J.D. degree and an M.S. degree in MS&E, or to a J.D. and Ph.D. in MS&E. These programs are designed for students who wish to prepare themselves for careers in areas relating to both law and to the decision making, policy making, and problem solving knowledge and skills developed in the MS&E program. Students interested in either joint degree program must apply and gain admission separately to the School of Law and the Department of Management Science and Engineering and, as an additional step, must secure consent from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or MS&E may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or MS&E. Students are assigned to a joint program committee composed of at least one faculty member from Law and one from MS&E. This committee plans the student's program jointly with the student. Students must be enrolled full time in the Law School for the first year of law studies, and it is recommended that students devote exclusively one Autumn Quarter to the MS&E M.S. program to initiate their MS&E work. After that time, enrollment may be in MS&E or Law, and students may choose courses from either program regardless of where enrolled. A candidate in the joint J.D./Ph.D. program should spend a substantial amount of full time residency in MS&E. Students must satisfy the requirements for both the J.D. and the M.S. or Ph.D. degrees as specified in this bulletin or by the School of Law. The Law School may approve courses from MS&E or courses in the student's MS&E program from outside of the Department of Management Science and Engineering that may count toward the J.D. degree, and MS&E may approve courses from the Law School that may count toward the M.S. or Ph.D. degree in MS&E. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The lists may differ depending on whether the student is pursuing an M.S. or a Ph.D. in MS&E.

In the case of a J.D./M.S. program, no more than 45 units of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 units of approved courses may be counted toward both degrees. In either case, no more than 36 units of courses that originate outside the Law School may count toward the law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the law degree, the law credits permitted under Section 17(1) of the Law School Regulations are reduced on

a unit-per-unit basis, but not below zero. The maximum number of law school credits that may be counted toward the M.S. in MS&E is the greater of: (a) 18 units in the case of the M.S., or (b) the maximum number of hours from courses outside the department that an M.S. candidate in MS&E is permitted to count toward the applicable degree under general departmental guidelines or under departmental rules that apply in the case of a particular student.

Tuition and financial aid arrangements are normally through the school in which the student is then enrolled.

DOCTOR OF PHILOSOPHY IN MANAGEMENT SCIENCE AND ENGINEERING

University requirements for the Ph.D. degree are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. degree in MS&E is intended for students primarily interested in a career of research and teaching, or high-level technical work in universities, industry, or government. The program requires three years of full-time graduate study, at least two years of which must be at Stanford. Typically, however, students take about four to five years after entering the program to complete all Ph.D. requirements. The Ph.D. is generally organized around the requirement that the students acquire a breadth across some of the eight areas of the department, and depth in one of them. These fields of study are:

- Decision analysis and risk analysis
- Economics and finance
- Information science and technology
- Organization, technology, and entrepreneurship
- Policy and strategy
- Probability and stochastic systems
- Production and operations management
- Systems modeling and optimization

Each student admitted to the Ph.D. program must satisfy a breadth requirement and pass a qualification procedure. The purpose of the qualification procedure is to assess the student's command of the field and to evaluate his or her potential to complete a high-quality dissertation in a timely manner. The student must complete specified course work in one of the eight areas of the department, or the Systems Program which is a combination of several areas. The qualification decision is based on the student's grade point average (GPA), on the one or two preliminary papers prepared by the student, and on the student's performance in an area examination. Considering this evidence, the department faculty votes on advancing the student to candidacy in the department at large. The Ph.D. requires a minimum of 135 units, at least 54 of which must be in courses of 3 units or more. At least 48 course units in courses of 3 units or more must be taken for a letter grade. Finally, the student must pass a University oral examination and complete a Ph.D. dissertation. During the course of the Ph.D. program, students who do not have a master's degree are strongly encouraged to complete one, either in MS&E or in another Stanford department.

Breadth Requirement—

1. The breadth requirement is to be satisfied by a choice of four courses spanning four out of the above mentioned eight areas of the department. The list of courses satisfying the breadth requirement is available from the MS&E student services office.
2. The Ph.D. candidacy form must contain four courses that satisfy the breadth requirement.
3. Courses chosen to satisfy the breadth requirement must be taken for letter grades.
4. At least one of the four courses chosen to satisfy the breadth requirement must be at the 300 level.

Qualification Procedure Requirements—The qualification procedure is based both on breadth across the department's disciplines and depth in an area of the student's choice. The qualification process must be completed by the end of the month of May of the student's second year of graduate study in the department. The performance of all doctoral students is reviewed every year at a department faculty meeting at the end of May or beginning of June. Ph.D. qualification decisions are made at that time and individual feedback is provided.

The Ph.D. qualification requirements comprise these elements:

1. *Grade Point Average:* A student must maintain a GPA of at least 3.4 in the four courses chosen to satisfy the breadth requirements, and a GPA of at least 3.4 in the set of all courses taken by the student within the department. In both cases, the GPA is computed on the basis of the nominal number of units for which each course is offered.
2. *Paper(s):* A student may choose between two options, either of which is to be completed before the Spring Quarter of the student's second year. The first option involves one paper supervised by a primary faculty adviser and a faculty consultant. This paper should be written in two quarters.
   The second option involves two shorter sequential tutorials, with two different faculty advisers. Each tutorial should be completed in one quarter. In both options, the student chooses the faculty adviser(s)/consultant with the faculty members' consent.
   A student may register for up to 3 units per tutorial and up to 6 units for a paper. These paper or tutorial units do not count towards the 54 course units required for the Ph.D., and letter grades are not given.
3. *Area Qualification:* In addition, during the second year, a student must pass an examination in one of the eight areas of the MS&E department or the Systems Program, a combination of several areas, which is of the student's choice. This area examination is written, oral, or both, at the discretion of the area faculty administering the exam.
4. *Area Course Requirement:* Students must complete the depth requirements of one of the eight fields of study of the MS&E department or the Systems Program which is a combination of several areas. Courses used to satisfy depth requirements must be taken for a letter grade. The Ph.D. requirements for the eight areas of the MS&E department are available from the MS&E student services office.

PH.D. MINOR IN MANAGEMENT SCIENCE AND ENGINEERING

Students pursuing a Ph.D. in another department who wish to receive a Ph.D. minor in Management Science and Engineering should consult the MS&E student services office. A minor in MS&E may be obtained by completing 20 units of approved graduate-level MS&E courses, of which at least 6 units must be at the 300-level. Courses approved for the minor must form a coherent program, and must include one course from at least three of the eleven MS&E Master of Science core options. The program must include a minimum of 16 letter-graded units, and a minimum grade point average of 3.3 must be achieved in these courses.

MATERIALS SCIENCE AND ENGINEERING

Emeriti: (Professors) Clayton W. Bates, John C. Bravman, Richard H. Bube, Theodore H. Geballe,* Stig B. Hagstrom,* Robert A. Huggins,* William D. Nix,* Oleg D. Sherby, John C. Shyne, William A. Tiller, Robert L. White*; *(Professor, Research)* Robert S. Feigelson*

Lecturers: Eric Guyer, Brad James, Ann Marshall, Arturas Vailionis

Acting Assistant Professor: Christopher M. Earhart

Consulting Professors: Charles A. Evans, Robert Fontana, Turgut Gur, Michael A. Kelly, Rommel Noufi, Baylor Triplett, Robert M. White

Consulting Associate Professors: Geraud Dubois, Alan Sellinger

Consulting Assistant Professors: Rene Meyer, Wendelin Wright

* Recalled to active duty.

Department Offices: 496 Lomita Mall, Durand Building
Mail Code: 94305-4034
Phone: (650) 723-2534
Email: matsciengr@stanford.edu
Web Site: http://mse.stanford.edu

Courses offered by the Department of Materials Science and Engineering are listed under the subject code MATSCI on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Materials Science and Engineering is concerned with the relation between the structure and properties of materials, factors that control the internal structure of solids, and processes for altering their structure and properties, particularly at the nanoscale.

MISSION OF THE UNDERGRADUATE PROGRAM IN MATERIALS SCIENCE AND ENGINEERING

The mission of the undergraduate program in Materials Science and Engineering is to provide students with a strong foundation in materials science and engineering with emphasis on the fundamental scientific and engineering principles which underlie the knowledge and implementation of material structure, processing, properties, and performance of all classes of materials used in engineering systems. Courses in the program develop students' knowledge of modern materials science and engineering, teach them to apply this knowledge analytically to create effective and novel solutions to practical problems, and develop their communication skills and ability to work collaboratively. The program prepares students for careers in industry and for further study in graduate school.

The B.S. in Materials Science and Engineering provides training for the materials engineer and also preparatory training for graduate work in materials science. Capable undergraduates are encouraged to take at least one year of graduate study to extend their course work through the coterminal degree program which leads to an M.S. in Materials Science and Engineering. Coterminal degree programs are encouraged both for undergraduate majors in Materials Science and Engineering and for undergraduate majors in related disciplines.

The department also hosts the School of Engineering undergraduate major in Engineering Physics leading to a B.S. in Engineering.

GRADUATE PROGRAMS IN MATERIALS SCIENCE ENGINEERING

Graduate programs lead to the degrees of Master of Science, Engineer, and Doctor of Philosophy. Graduate students can specialize in any of the areas of materials science and engineering.

FACILITIES

The department is based in the William F. Durand Building, with extensive facilities in the Jack A. McCullough building and the Gordon and Betty Moore Materials Research Building. These buildings house offices for the chair and most of the faculty, for the administrative and technical staff, and for most graduate students, along with lecture and seminar rooms. Facilities for teaching and research are also available, including equipment for electrical measurements; mechanical testing of bulk and thin film materials; fracture and fatigue of advanced materials; metallography; optical, scanning, transmission electron microscopy, and atomic force microscopy; UHV sputter deposition; vacuum annealing treatments; wet chemistry; and x-ray diffraction. The McCullough/Moore Complex is also the home for the Center for Magnetic Nanotechnology, with corresponding facilities for magnetic measurements, and to the Stanford Nanocharacterization Laboratory (SNL). The Rapid Prototyping Laboratory (RPL), housing material deposition and removal stations, is a joint facility with Mechanical Engineering, and is housed in Building 530. The department maintains a microcomputer cluster for its students, which is linked to the internet.

Depending on the needs of their programs, students and faculty also conduct research in a number of other departments and independent laboratories. Chief among these are the Stanford Nanofabrication Facility (SNF), the Geballe Laboratory for Advanced Materials (GLAM) (http://stanford.edu/group/glam), and the Stanford Synchrotron Radiation Laboratory.

The Stanford Nanofabrication Facility (SNF) is a laboratory joining government and industrially funded research on microelectronic materials, devices, and systems. It houses a 10,000 square foot, class 100 clean room for Si and GaAs integrated circuit fabrication; a large number of electronic test, materials analysis, and computer facilities; and office space for faculty, staff, and students. In addition, the Center for Integrated Systems (CIS) provides startup research funds and maintains a fellow-mentor program with industry.

BACHELOR OF SCIENCE IN MATERIALS SCIENCE AND ENGINEERING

MISSION STATEMENT

The mission of the Materials Science and Engineering Program is to provide students with a strong foundation in materials science and engineering. The program's curriculum places special emphasis on the fundamental scientific and engineering principles which underlie the knowledge and implementation of materials structure, processing, properties, and performance of all classes of materials used in engineering systems. Courses in the program develop students' knowledge of modern materials science and engineering and teach them to apply this knowledge analytically to create effective and novel solutions to practical problems. The program prepares students for careers in industry or for further study in graduate school.

The undergraduate program provides training in solid state fundamentals and materials engineering. Students desiring to specialize in this field during their undergraduate period may do so by following the curriculum outlined in the "Undergraduate Degree in Materials Science and Engineering" section of this bulletin as well as the *School of Engineering Undergraduate Handbook*. The University's basic requirements for the bachelor's degree are discussed in the "Undergraduate Degrees and Programs""section of this bulletin. Electives are available so that students with broad interests can combine materials science and engineering with work in another science or engineering department.

Students interested in the minor should see the "Minor in Materials Science and Engineering" section of this bulletin.

COTERMINAL B.S./M.S. PROGRAM IN MATERIALS SCIENCE AND ENGINEERING

Stanford undergraduates who wish to continue their studies for the Master of Science degree in Materials Science and Engineering through the coterminal program may apply for admission after they have earned 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. Applicants must submit their application no later than eight weeks before the start of the proposed admit quarter. The application must give evidence that the student possesses the potential for strong academic performance at the graduate level. Scores from the Graduate Record Exam (GRE) General Test must be reported before action can be taken on an application.

Materials science is a highly integrated and interdisciplinary subject, and so applications from students of any engineering or science undergraduate major are encouraged.

Information and other requirements pertaining to the coterminal program may be obtained from the department's student services office in Durand 115.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, also see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF SCIENCE IN MATERIALS SCIENCE ENGINEERING

The University's basic requirements for the M.S. degree are discussed in the "Graduate Degrees" section of this bulletin. The following are specific departmental requirements.

The Department of Materials Science and Engineering requires a minimum of 45 units for a master's degree to be taken in residence at Stanford. Master's Program Proposal forms should be filled out, signed by the student's academic adviser, and submitted to the department's student services manager by the end of the student's first quarter of study. Final changes to the master's program must be submitted no later than one academic quarter prior to the quarter of expected degree conferral. Stanford Materials Science undergraduates who are pursuing or who plan to pursue a coterminal M.S. degree may have more flexibility in their programs and should consult with their academic advisers regarding appropriate core course and elective choices.

Degree requirements are as follows:

1. A minimum of 30 units of Materials Science and Engineering (MATSCI) course work, including core and lab courses specified below, taken for a letter grade. Research units, one-unit seminars, and courses in other departments (i.e., where students cannot enroll in a class with a MATSCI subject code) cannot be counted for this requirement.
2. Of these 30 units Materials Science requirements, students must include a or b.
   a. three classes from MATSCI 201-210 core courses and any three MATSCI laboratory courses.
   b. four classes from MATSCI 201-210 core courses and any two MATSCI laboratory courses.
3. 15 units of approved course electives that result in a technically coherent program. Of the 15 units of elective courses:
   a. 12 of the 15 units must be taken for a letter grade (except for those submitting an M.S. report).
   b. a maximum of three units may be seminars.
   c. if writing a master's research report, a minimum of 6 and a maximum of 15 units of Materials Science research units (MATSCI 200) may be counted. M.S. research units may only be counted if writing an M.S. research report. See student services manager for approval.
   d. a maximum of three units may be undergraduate units, but not courses below the 100 level (offered at Stanford University).
   e. a maximum of five units may be used for a foreign language course (not including any remedial English courses or courses in the student's native language if other than English).
   f. the combination of seminar, undergraduate, and language units may not exceed six units total.
   g. the combination of research, seminar, undergraduate, and language units may not exceed 15 units total.
   h. activity units may not be counted toward a graduate degree.
4. A minimum grade point average (GPA) of 2.75 for degree course work taken at Stanford.

All proposed degree programs are subject to approval by the department's student services manager and the Academic Degree Committee, which has responsibility for assuring that each proposal is a technically coherent program.

MASTER'S RESEARCH REPORT

Students wishing to take this option must include 6-15 Materials Science research units on their program proposal and the name of the faculty member supervising the research. Students using 15 units of research toward the degree must participate in a more complex and demanding research project than those using fewer units.

The report must be approved by two faculty members of which one must be a faculty member from the department. One faculty member is the student's research adviser. The other faculty member must be approved by the department's student services manager. Three copies of the report (one copy for each approving faculty member and one for the department file), in final form and signed by the two faculty members must be submitted. The report is not an official University thesis but is intended to demonstrate to department faculty an ability to conduct and report directed research. Refer to the *Materials Science and Engineering Student Handbook* for further clarification concerning this report.

As a general guide line, a 6-9 units of master's research is a normal load for most students. The report should reflect the number of units taken. For instance, 3-4 laboratory reports are required for a 3-unit laboratory course. Accordingly, the level expected for 9 units of research would be at least equivalent to three such courses.

Students are advised to submit their thesis draft to the readers by the end of fifth week of the quarter in which the units are to be assigned to allow time form comments and revisions. A copy of final draft should be submitted to faculty and student services manager by last day of classes. The appropriate grade for satisfactory progress in the research project prior to submission of the report is 'N' (continuing); the 'S' grade is given only when the report is fully approved by both faculty members.

In cases where students decide to pursue research after the initial program submission deadline, they should submit a revised M.S. Program Proposal at least two quarters before the degree is granted. The total combined units of Materials Science research units, seminars, language courses, and undergraduate courses cannot exceed 15. If a master's research report is not to be submitted, units of MATSCI 200 cannot be applied to the department's requirement of 45 units for the master's degree.

HONORS COOPERATIVE PROGRAM

Some of the department's graduate students participate in the Honors Cooperative Program (HCP), which makes it possible for academically qualified engineers and scientists in industry to be part-time graduate students in Materials Science while continuing professional employment. Prospective HCP students follow the same admissions process and must meet the same admissions requirements as full-time graduate students. For information regarding the Honors Cooperative Program, see Graduate Programs in the "School of Engineering" section of this bulletin.

PETITION PROCESS FOR TRANSFER FROM M.S. TO PH.D. DEGREE PROGRAM

Students admitted to the graduate program are admitted specifically into either the M.S. or the Ph.D. program. A student admitted to the M.S. program should not assume admission to the Ph.D. program. Admission to the Ph.D. program is required for the student to be eligible to work towards the Ph.D. degree.

A student in the M.S. program may petition to be admitted to the Ph.D. program by filing an M.S. to Ph.D. Transfer Petition. This petition must be accompanied by a one-page statement of purpose stating the reasons why the student wishes to transfer to the Ph.D. program, an updated transcript, and two letters of recommendation from members of the Stanford faculty, including one from the student's prospective adviser and at least one from a Materials Science faculty member belonging to the Academic Council. The M.S. to Ph.D. Transfer Petition is due to the student services manager by the end of the second week of Spring Quarter during the student's first year in the M.S. program. Only students enrolled in the 200 series core course sequence are eligible to petition, and a grade point average (GPA) of 3.5 or better in the core courses is required.

Transferring to the Ph.D. program is a competitive process and only highly qualified M.S. students may be admitted. Faculty consider the student's original application to the graduate program as well as the material provided with the transfer petition.

ENGINEER IN MATERIALS SCIENCE ENGINEERING

The University's basic requirements for the degree of Engineer are outlined in the "Graduate Degrees" section of this bulletin.

A student wishing to enter the Engineer program must have completed the requirements of the M.S. in Materials Science and Engineering, and must file a petition requesting admission to the program, stating the type of research to be done and the proposed supervising professor. Once approved, the Application for Candidacy must be submitted to the department's student services manager by the end of the second quarter in the Engineer program. Final changes in the Application for Candidacy form must be submitted no later than one academic quarter prior to degree conferral.

The 90-unit program must include 9 units of graduate courses in Materials Science with a MATSCI subject code (exclusive of research units, seminars, colloquia, and MATSCI 400, Participation in Teaching) beyond the requirements for the M.S. degree, and additional research or other units to meet the 90-unit University minimum requirement. A grade point average (GPA) of 3.0 must be maintained for all degree course work taken at Stanford.

Completion of an acceptable thesis is required. The Engineer thesis must be approved by two Academic Council faculty members, one of whom must be a member of the department, and submitted in triplicate.

DOCTOR OF PHILOSOPHY IN MATERIALS SCIENCE ENGINEERING

The University's basic requirements for the Ph.D. degree are outlined in the "Graduate Degrees"section of this bulletin.

Degree requirements for the department are as follows:

1. Students must submit a Ph.D. program plan consisting of at least 135 units,* which contains a minimum of 48 core, approved technical and seminar units.† For these 48 units:
   a. 30 units Materials Science and Engineering required core courses (MATSCI 201**, 202, 203, 204, 205, 206, 207, 208, 209, 210) must be taken, with at least six core courses (including MATSCI 203, 204, 207) during the first year
   b. 15 elective graduate technical units directly relevant to Materials Science and Engineering must be taken (units not to include MATSCI 300, Ph.D Research, MATSCI 400, Participation in Materials Science Teaching, or MATSCI 299, Practical Training)
   c. all core and technical classes must be for a letter grade
   d. first-year Ph.D. students are required to take the Materials Science Colloquium, MATSCI 230 (1 unit), each quarter of their first year (not counted as technical course units). Please note that attendance is required, roll is taken, and that more than two absences results in an automatic 'NP' grade.
2. The remaining 87 units are to be at least 75 units of MATSCI 300, Ph.D. research, and up to 12 units of other courses (may include MATSCI 400, Participation in Materials Science Teaching, and a maximum 3 units of MATSCI 299, Practical Training).
3. Students must consult with their Academic Adviser on program planning. The program planning sheet must be submitted with the approval of the student's Dissertation Adviser on joining that research group, and no later than the end of spring quarter of the the first year. For students with a non-MATSCI Dissertation Adviser, the MATSCI Academic Adviser must also approve the list of proposed courses. Any proposed deviations from the requirements can only be considered by petition.
4. Ph.D. students are required to obtain an M.S. degree in Materials Science normally by the end of their third year. A Graduate Program Authorization Petition and a M.S. Program Proposal must be submitted prior to taking the qualifying examination. Courses taken for the 48 core and technical units of Ph.D. work may count towards the M.S. degree requirements.
5. A departmental oral qualifying examination must be passed by the end of January of the second year. A grade point average (GPA) of 3.5 from the six core classes taken is required for admission to the Ph.D. qualifying exam. Students who have passed the Ph.D. Qualifying exam are required to complete the Application for Candidacy for the Ph.D. degree by the end of the quarter in which they pass the exam. Final changes in the Application for Candidacy form must be submitted no later than one academic quarter prior to degree conferral.
6. Maintain a GPA of 3.0 in all degree courses taken at Stanford.
7. Students must present the results of the dissertation at the University Ph.D. oral examination.
8. Current students subject to either this set of requirements or a prior set must obtain the approval of their adviser before filing a revised program sheet, and should as far as possible adhere to the intent of the new requirements.
9. Students may reference the list of Advanced Speciality Courses and Cognate Courses provided below as guidance for their selection of technical units. As noted above, Academic Adviser approval is required.

* At least 90 units must be taken in residence at Stanford. Students entering with an M.S. degree in Materials Science from another university may request to transfer up to 45 units of equivalent work toward the total of 135 required units.

† Students may, if they have sufficient background, petition out of some of the required core courses. To petition, students must have prior consent from their academic adviser, and consent from the instructor of the core course. That instructor provides an oral or written examination that the petitioning student must pass.

** EE 222/223 is accepted in place of this requirement.

ADVANCED SPECIALTY COURSES

Biomaterials—APPPHYS 292; BIOPHYS 228; CHEMENG 260, 310, 355; ME 284A,B, 381, 385, 457; MATSCI 380, 381, 382

PH.D. MINOR IN MATERIALS SCIENCE AND ENGINEERING

The University's basic requirements for the Ph.D. minor are outlined in the "Graduate Degrees" section of this bulletin. A minor requires 20 units of graduate work of quality and depth to be approved by the advanced degree committee of the department. Individual programs must be submitted to the student services manager at least one quarter prior to degree conferral and approved as are other academic plans.

MECHANICAL ENGINEERING

Emeriti: (Professors) James L. Adams, Peter Bradshaw*, Daniel B. DeBra, Robert H. Eustis, Thomas J. R. Hughes, James P. Johnston, Thomas R. Kane, William M. Kays, Joseph B. Keller, Charles H. Kruger, Robert H. McKim, Robert J. Moffat,* M. Godfrey Mungal*, J. David Powell, Rudolph Sher, Charles R. Steele,* Douglass J. Wilde;* *(Professors, Research)* Richard M. Christensen, Elliot Levinthal, Sidney A. Self, Felix E. Zajac

Chair: Friedrich B. Prinz

Vice Chair: Kenneth E. Goodson

Group Chairs: Mark R. Cutkosky (Design), Scott L. Delp (Biomechanical Engineering), Parviz Moin (Flow Physics and Computational Engineering), Peter M. Pinsky (Mechanics and Computation), Juan G. Santiago (Thermosciences)

Professors: Thomas P. Andriacchi, David M. Barnett, Craig T. Bowman, Brian J. Cantwell, Mark A. Cappelli, Dennis R. Carter, Mark R. Cutkosky, Scott L. Delp, John K. Eaton, Charbel Farhat, Kenneth E. Goodson, Ronald K. Hanson, David M. Kelley, Thomas W. Kenny, Larry J. Leifer, Sanjiva K. Lele, Reginald E. Mitchell, Parviz Moin, Drew V. Nelson, Peter M. Pinsky, Friedrich B. Prinz, Bernard Roth, Juan G. Santiago, Eric S. G. Shaqfeh, Sheri D. Sheppard

Associate Professors: Eric F. Darve, Christopher F. Edwards, J. Christian Gerdes, Ellen Kuhl, Marc E. Levenston, Beth L. Pruitt

Assistant Professors: Wei Cai, Gianluca Iaccarino, Adrian J. Lew, Xiaolin Zheng

Professor (Research): Kenneth J. Waldron

Professor (Teaching): David W. Beach

Associate Professor (Research): Heinz G. Pitsch

Associate Professor (Teaching): Shilajeet S. Banerjee

Courtesy Professors: Fu-Kuo Chang, Reinhold Dauskardt, Ralph S. Greco, Oussama Khatib, Paul Yock

Courtesy Associate Professor: Margot G. Gerritsen, Nicholas Giori, Charles A. Taylor

Courtesy Professors (Research): J. Kenneth Salisbury, R. Lane Smith

Courtesy Professor (Teaching): Shelley V. Goldman

Senior Lecturers: Vadim Khayms, J. Craig Milroy

Acting Associate Professor: Kurt A. Beiter

Consulting Professors: Gary S. Beaupre, J. Edward Carryer, Shuichi Fukuda, David M. Golden, Barry M. Katz, Paul Mitiguy, Johannes Schoonman, George Toye, Stephen P. Walch, Edith Wilson, Albert Yu

Consulting Associate Professors: Mehdi Asheghi, Gary D. Lichtenstein, William Moggridge, R. Matthew Ohline, Sunil Puria, Paul Saffo, Marc F. Theeuwes

Consulting Assistant Professors: Michael Barry, Brendan J. Boyle, William R. Burnett, Dev Patnaik

* Recalled to active duty.

Student Services: Building 530, Room 125

Mail Code: 94305-3030

Student Services Phone: (650) 725-7695

Web Site: http://me.stanford.edu

Courses offered by the Department of Mechanical Engineering are listed under the subject code ME on the *Stanford Bulletin's* ExploreCourses web site.

The programs in the Department of Mechanical Engineering (ME) emphasize a mix of applied mechanics, biomechanical engineering, computer simulations, design, and energy science and technology. Since mechanical engineering is a broad discipline, the undergraduate program can be a springboard for graduate study in business, law, medicine, political science, and other professions where understanding technology is important. Both undergraduate and graduate programs provide technical background for work in biomechanical engineering, environmental pollution control, ocean engineering, transportation, and other multidisciplinary problems that concern society. In all programs, emphasis is placed on developing systematic procedures for analysis, communication of work and ideas, practical and aesthetic aspects in design, and responsible use of technology.

MISSION OF THE UNDERGRADUATE PROGRAM IN MECHANICAL ENGINEERING

The mission of the undergraduate program in Mechanical Engineering is to provide students with a balance of intellectual and practical experiences that enable them to address a variety of societal needs. The curriculum encompasses elements from a wide array of disciplines built around the themes of biomedicine, com-

putational engineering, design, energy, and multiscale engineering. Course work may include mechatronics, computational simulation, solid and fluid dynamics, microelectromechanical systems, biomechanical engineering, energy science and technology, propulsion, sensing and control, nano- and micro-mechanics, and design. The program prepares students for entry-level work as mechanical engineers and for graduate studies in either an engineering discipline or another field where a broad engineering background is useful.

GRADUATE PROGRAMS IN MECHANICAL ENGINEERING

ADMISSION AND FINANCIAL ASSISTANCE

To be eligible for admission to the department, a student must have a B.S. degree in engineering, physics, or a comparable science program. To apply for the Ph.D. degree, applicants must have already completed an M.S. degree. Applications for Ph.D. and HCP (Honors Co-op) programs are accepted throughout the year. M.S. applications for fellowship aid must be received by the first Tuesday in December. The department annually awards, on a competitive basis, a limited number of fellowships, teaching assistantships, and research assistantships to incoming graduate students. Research assistantships are used primarily for post-master's degree students and are awarded by individual faculty research supervisors, not by the department.

Mechanical engineering is a varied profession, ranging from primarily aesthetic aspects of design to highly technical scientific research. Disciplinary areas of interest to mechanical engineers include biomechanics, energy conversion, fluid mechanics, materials, nuclear reactor engineering, propulsion, rigid and elastic body mechanics, systems engineering, scientific computing, and thermodynamics, to name a few. No mechanical engineer is expected to have a mastery of the entire spectrum.

A master's degree program leading to the M.S. is offered in Mechanical Engineering, and a master's degree program leading to the M.S. is offered in Engineering with a choice of the following fields of study: Biomechanical Engineering, Product Design, and an individually designed major. Fields of study are declared on Axess.

POST-MASTER'S DEGREE PROGRAMS

The department offers two post-master's degrees: Engineer and Doctor of Philosophy. Post-master's research generally requires some evidence that a student has research potential before a faculty member agrees to supervision and a research assistantship appointment. It is most efficient to carry out preliminary research during the M.S. degree program, if interested in a post-master's degree.

DEPARTMENTAL GROUPS

The department has five groups: Biomechanical Engineering; Design; Flow Physics and Computation; Mechanics and Computation; and Thermosciences. Each maintains its own labs, shops, and offices.

The Biomechanical Engineering (BME) Group has teaching and research activities which focus primarily on musculoskeletal biomechanics, neuromuscular biomechanics, cardiovascular biomechanics, and rehabilitation engineering. Research in other areas including hearing, ocean, plant, and vision biomechanics exists in collaboration with associated faculty in biology, engineering, and medicine. The group has strong research interactions with the Mechanics and Computation and the Design groups, and the departments of Neurology, Radiology, and Surgery in the School of Medicine.

The Design Group emphasizes cognitive skill development for creative design. It is concerned with automatic control, computer-aided design, creativity, design aesthetics, design for manufacturability, design research, experimental stress analysis, fatigue and fracture mechanics, finite element analysis, human factors, kinematics, manufacturing systems, microcomputers in design, microelectromechanics systems (MEMS), robotics, and vehicle dynamics. The group offers undergraduate and graduate programs in Product Design (jointly with the Department of Art and Art History) and is centrally involved in the Institute of Design; for further information, see http://dschool.stanford.edu.

The Flow Physics and Computation Group (FPC) is developing new theories, models, and computational tools for accurate engineering design analysis and control of complex flows (including acoustics, chemical reactions, interactions with electromagnetic waves, plasmas, and other phenomena) of interest in aerodynamics, electronics cooling, environmental engineering, materials processing, planetary entry, propulsion and power systems, and other areas. FPC research emphasizes modeling and analysis of physical phenomena in engineering systems. Students and research staff are developing new methods and tools for generation, access, display, interpretation and post-processing of large databases resulting from numerical simulations of physical systems. Research in FPC ranges from advanced simulation of complex turbulent flows to active flow control. Faculty teach graduate and undergraduate courses in acoustics, aerodynamics, computational fluid mechanics, computational mathematics, fluid mechanics, combustion, and thermodynamics and propulsion.

The Mechanics and Computational Group covers biomechanics, continuum mechanics, dynamics, experimental and computational mechanics, finite element analysis, fluid dynamics, fracture mechanics, micromechanics, nanotechnology, and simulation based design. Qualified students can work as research project assistants, engaging in thesis research in association with the faculty director and fellow students. Projects include analysis, synthesis, and control of systems; biomechanics; flow dynamics of liquids and gases; fracture and micro-mechanics, vibrations, and nonlinear dynamics; and original theoretical, computational, and experimental investigations in the strength and deformability of elastic and inelastic elements of machines and structures.

The Thermosciences Group conducts experimental and analytical research on both fundamental and applied topics in the general area of thermal and fluid systems. Research strengths include high Reynolds number flows, microfluidics, combustion and reacting flows, multiphase flow and combustion, plasma sciences, gas physics and chemistry, laser diagnostics, microscale heat transfer, convective heat transfer, and energy systems. Research motivation comes from applications including air-breathing and space propulsion, bioanalytical systems, pollution control, electronics fabrication and cooling, stationary and mobile energy systems, biomedical systems, and materials processing. Emphasis is on fundamental experiments leading towards advances in modeling, optimization, and control of complex systems.

FACILITIES

The department groups maintain modern laboratories that support undergraduate and graduate instruction and graduate research work.

The Structures and Composites Laboratory, a joint activity with the Department of Aeronautics and Astronautics, studies structures made of fiber-reinforced composite materials. Equipment for fabricating structural elements includes autoclave, filament winder, and presses. X-ray, ultrasound, and an electron microscope are available for nondestructive testing. The lab also has environmental chambers, a high speed impactor, and mechanical testers. Lab projects include designing composite structures, developing novel manufacturing processes, and evaluating environmental effects on composites.

Experimental facilities are available through the interdepartmental Structures and Solid Mechanics Research Laboratory, which includes an electrohydraulic materials testing system, a vehicle crash simulator, and a shake table for earthquake engineering and related studies, together with highly sophisticated auxiliary instrumentation. Facilities to study the micromechanics of fracture areas are available in the Micromechanics/Fracture Laboratory, and include a computer-controlled materials testing system, a long

distance microscope, an atomic force microscope, and other instrumentation. Additional facilities for evaluation of materials are available through the Center for Materials Research, Center for Integrated Circuits, and the Ginzton Laboratory. Laboratories for biological experimentation are accessible through the School of Medicine. Individual accommodation is available for the work of each research student.

Major experimental and computational laboratories engaged in bioengineering work are located in the Biomechanical Engineering Group. Other Biomechanical Engineering Group activities and resources are associated with the Rehabilitation Research and Development Center of the Veterans Administration Palo Alto Health Care System. This major national research center has computational and prototyping facilities. In addition, the Rehabilitation Research and Development Center houses the Electrophysiology Laboratory, Experimental Mechanics Laboratory, Human Motor Control Laboratory, Rehabilitation Device Design Laboratory, and Skeletal Biomechanics Laboratory. These facilities support graduate course work as well as Ph.D. student research activities.

Computational and experimental work is also conducted in various facilities throughout the School of Engineering and the School of Medicine, particularly the Advanced Biomaterials Testing Laboratory of the Department of Materials Science and Engineering, the Orthopaedic Research Laboratory in the Department of Functional Restoration, and the Vascular Research Laboratory in the Department of Surgery. In collaboration with the School of Medicine, facilities throughout the Stanford Medical Center and the Veterans Administration Palo Alto Health Care System conduct biological and clinical work.

The Design Group has facilities for lab work in experimental mechanics and experimental stress analysis. Additional facilities, including MTS electrohydraulic materials test systems, are available in the Solid Mechanics Research Laboratory. Design Group students also have access to Center for Integrated Systems (CIS) and Ginzton Lab microfabrication facilities.

The group also maintains the Product Realization Laboratory (PRL), a teaching facility offering students integrated experiences in market definition, product design, and prototype manufacturing. The PRL provides coaching, design manufacturing tools, and networking opportunities to students interested in product development. The ME 310 Design Project Laboratory has facilities for CAD, assembly, and testing of original designs by master's students in the engineering design program. A Smart Product Design Laboratory supports microprocessor application projects. The Center for Design Research (CDR) has an excellent facility for concurrent engineering research, development, and engineering curriculum creation and assessment. Resources include a network of high-performance workstations. For worldwide web mediated concurrent engineering by virtual, non-collocated, design development teams, see the CDR web site at http://cdr.stanford.edu. In addition, CDR has several industrial robots for student projects and research. These and several NC machines are part of the CDR Manufacturing Sciences Lab. The Manufacturing Modeling Laboratory (MML) addresses various models and methods that lead to competitive manufacturing. MML links design for manufacturing (dfM) research at the Department of Mechanical Engineering with supply chain management activities at the Department of Management Science and Engineering. The Rapid Prototyping Laboratory consists of seven processing stations including cleaning, CNC milling, grit blasting, laser deposition, low temperature deposition, plasma deposition, and shot peening. Students gain experience by using ACIS and Pro Engineer on Hewlett Packard workstations for process software development. The Design Group also has a Product Design Loft in which students in the Joint Program in Design develop graduate thesis projects.

The Flow Physics and Computation Group has a 32 processor Origin 2000, 48-node and 85-node Linux cluster with high performance interconnection and an array of powerful workstations for graphics and data analysis. Several software packages are available, including all the major commercial CFD codes. FPC is strongly allied with the Center for Turbulence Research (CTR), a research consortium between Stanford and NASA, and the Center for Integrated Turbulence Simulations (CITS), which is supported by the Department of Energy (DOE) under its Accelerated Strategic Computing Initiative (ASCI). The Center for Turbulence Research has direct access to major national computing facilities located at the nearby NASA-Ames Research Center, including massively parallel super computers. The Center for Integrated Turbulence Simulations has access to DOE's vast supercomputer resources. The intellectual atmosphere of the Flow Physics and Computation Group is greatly enhanced by the interactions among CTR's and CITS's postdoctoral researchers and distinguished visiting scientists.

The Mechanics and Computation Group has a Computational Mechanics Laboratory that provides an integrated computational environment for research and research-related education in computational mechanics and scientific computing. The laboratory houses Silicon Graphics, Sun, and HP workstations and servers, including an 8-processor SGI Origin2000 and a 16-processor networked cluster of Intel-architecture workstations for parallel and distributed computing solutions of computationally intensive problems. Software is available on the laboratory machines, including commercial packages for engineering analysis, parametric geometry and meshing, and computational mathematics. The laboratory supports basic research in computational mechanics as well as the development of related applications such as simulation-based design technology.

The Thermosciences Group has four major laboratory facilities. The Heat Transfer and Turbulence Mechanics Laboratory concentrates on fundamental research aimed at understanding and improved prediction of turbulent flows and high performance energy conversion systems. The laboratory includes two general-purpose wind tunnels, a pressurized high Reynolds number tunnel, two supersonic cascade flow facilities, three specialized boundary layer wind tunnels, and several other flow facilities. Extensive diagnostic equipment is available, including multiple particle-image velocimetry and laser-Doppler anemometry systems.

The High Temperature Gas Dynamics Laboratory includes research on sensors, plasma sciences, cool and biomass combustion and gas pollutant formation, and reactive and non-reactive gas dynamics. Research facilities include diagnostic devices for combustion gases, a spray combustion facility, laboratory combustors including a coal combustion facility and supersonic combustion facilities, several advanced laser systems, a variety of plasma facilities, a pulsed detonation facility, and four shock tubes and tunnels. The Thermosciences Group and the Design Group share the Microscale Thermal and Mechanical Characterization laboratory (MTMC). MTMC is dedicated to the measurement of thermal and mechanical properties in thin-film systems, including microfabricated sensors and actuators and integrated circuits, and features a nanosecond scanning laser thermometry facility, a laser interferometer, a near-field optical microscope, and an atomic force microscope. The activities at MTMC are closely linked to those at the Heat Transfer Teaching Laboratory (HTTL), where undergraduate and master's students use high-resolution probe stations to study thermal phenomena in integrated circuits and thermally-actuated microvalves. HTTL also provides macroscopic experiments in convection and radiative exchange.

The Energy Systems Laboratory is a teaching and research facility dedicated to the study of energy conversion systems. The lab includes three dynamometers for engine testing, a computer-controlled variable engine valve controller, a fuel-cell experimental station, a small rocket testing facility, and a small jet engine thrust stand.

The Guidance and Control Laboratory, a joint activity of the Department of Aeronautics and Astronautics and the Department of Mechanical Engineering, specializes in construction of electromechanical systems and instrumentation, particularly where high precision is a factor. Work ranges from robotics for manufacturing to feedback control of fuel injection systems for automotive emission control. The faculty and staff work in close cooperation with

both the Design and Thermosciences Groups on device development projects of mutual interest.

Many computation facilities are available to department students. Three of the department's labs are equipped with superminicomputers. Numerous smaller minicomputers and microcomputers are used in the research and teaching laboratories.

Library facilities at Stanford beyond the general library include Engineering, Mathematics, and Physics department libraries.

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

Undergraduates seeking to major in Mechanical Engineering should see the curriculum outlined in the "Undergraduate Degree in Mechanical Engineering" section of this bulletin. The University's basic requirements for the bachelor's degree are discussed in the "Undergraduate Degrees" section of this bulletin. Courses taken for the departmental major (mathematics; science; science, technology, and society; engineering fundamentals; and engineering depth) must be taken for a letter grade if the instructor offers the option.

A Product Design program offered by the Design Group leads to the B.S. in Engineering (Product Design). A major in Biomechanical Engineering offered by the Biomechanical Engineering Group leads to the B.S. in Engineering (Biomechanical Engineering); this may be appropriate for students preparing for medical school or graduate bioengineering studies.

Grade Requirements—To be recommended by the department for a B.S. in Mechanical Engineering, a student must achieve the minimum grade point average (GPA) set by the School of Engineering (2.0 in engineering fundamentals and mechanical engineering depth).

Students interested in the minor should see the "Minor in Mechanical Engineering" section of this bulletin.

HONORS PROGRAM

The Department of Mechanical Engineering offers a program leading to a B.S. in Mechanical Engineering with honors. This program offers a unique opportunity for qualified undergraduate engineering majors to conduct independent study and research at an advanced level with a faculty mentor.

Mechanical Engineering majors who have a grade point average (GPA) of 3.5 or higher in the major may apply for the honors program. Students who meet the eligibility requirement and wish to be considered for the honors program must submit a written application to the Mechanical Engineering student services office no later than the second week of Autumn Quarter in the senior year. The application to enter the program can be obtained from the ME student services office, and must contain a one-page statement describing the research topic and include an unofficial Stanford transcript. In addition, the application must be approved by a Mechanical Engineering faculty member who agrees to serve as the thesis adviser for the project. Thesis advisers must be members of Stanford's Academic Council.

In order to receive departmental honors, students admitted to the program must:

1. maintain the 3.5 GPA required for admission to the honors program.
2. submit a completed thesis draft to the adviser by April 25. Further revisions and final endorsement by the adviser are to be finished by May 15, when two bound copies are to be submitted to the Mechanical Engineering student services office.
3. present the thesis at the Mechanical Engineering Poster Session held in mid-April.

COTERMINAL B.S./M.S. PROGRAM IN MECHANICAL ENGINEERING

Stanford undergraduates who wish to continue their studies for the Master of Science degree in the coterminal program must have earned a minimum of 120 units towards graduation. This includes allowable Advanced Placement (AP) and transfer credit. Applicants must submit their application no later than the quarter prior to the expected completion of their undergraduate degree. This is normally Winter Quarter (the deadline is January 25th) prior to Spring Quarter graduation. The application must provide evidence of potential for strong academic performance as a graduate student. The Mechanical Engineering department graduate admissions committee makes decisions on each application. Typically, a GPA of at least 3.5 in engineering, science, and math is expected. Applicants must have completed two of ME 80, 112, 131A, and 131B, and must take the Graduate Record Examination (GRE) before action is taken on the application. Coterminal information, applications deadlines, and forms can be obtained from the ME Student Services Office.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

MASTER OF SCIENCE IN MECHANICAL ENGINEERING

The basic University requirements for the M.S. degree are discussed in the "Graduate Degrees" section of this bulletin.

The master's program consists of 45 units of course work taken at Stanford. No thesis is required, although many students become involved in research projects during the master's program, particularly to explore their interests in working towards a Ph.D. degree. Students whose undergraduate backgrounds are entirely devoid of some of the major subject disciplines of engineering (for example, applied mechanics, applied thermodynamics, fluid mechanics, ordinary differential equations) may need to take some undergraduate courses to fill obvious gaps and prepare themselves to take graduate courses in these areas. Such students may require more than three quarters to fulfill the master's degree requirements, as the makeup courses may only be used as unrestricted electives (see item 4 below) in the M.S. degree program. However, it is not the policy to require fulfillment of mechanical engineering B.S. degree requirements to obtain an M.S. degree.

MECHANICAL ENGINEERING

The master's degree program requires 45 units of course work taken as a graduate student at Stanford. No thesis is required. However, students who want some research experience during the master's program may participate in research through ME 391 and 392.

Students are encouraged to refer to the most recent *Mechanical Engineering Graduate Student Handbook* provided by the student services office. The department's requirements for the M.S. in Mechanical Engineering are as follows:

1. *Mathematical Fundamentals:* two mathematics courses for a total of at least 6 units from the following list are required: ME 300A, 300B, 300C; CME 302; MATH 106, 109; CS 205A or B; EE 261, 263; STATS 110, 141; ENGR 155C. Other MATH

and CME courses with catalog numbers of 200 and above also fulfill the mathematics requirement. Mathematics courses must be taken for a letter grade.

2. *Depth in Mechanical Engineering:* a set of graduate-level courses in Mechanical Engineering to provide depth in one area. The faculty have approved these sets as providing depth in specific areas as well as a significant component of applications of the material in the context of engineering synthesis. These sets are outlined in the *Mechanical Engineering Graduate Student Handbook*. Depth courses must be taken for a letter grade.
3. *Breadth in Mechanical Engineering:* two additional graduate level courses (outside the depth) from the depth/breadth charts listed in the *Mechanical Engineering Graduate Handbook.* Breadth courses must be taken for a letter grade.
4. *Sufficient Mechanical Engineering Course Work:* students must take a minimum of 24 units of course work in mechanical engineering topics. For the purposes of determining mechanical engineering topics, any course on approved lists for the mathematics, depth, and breadth requirements counts towards these units. In addition, any graduate-level course with an ME course number is considered a mechanical engineering topic.
5. *Approved Electives* (to bring the total number of units to at least 39): electives must be approved by an adviser. Graduate engineering, mathematics, and science courses are normally approved. Approved electives must be taken for a letter grade. No more than 6 of the 39 units may come from ME 391/392 (or other independent study/research courses), and no more than 3 may come from seminars. Students planning a Ph.D. should discuss with their advisers the option of taking 391 or 392 during the master's program. ME 391/392 (and other independent study courses) may only be taken on a credit/no credit basis.
6. *Unrestricted electives* (to bring the total number of units submitted for the M.S. degree to 45): students are encouraged to take these units outside engineering, mathematics, or the sciences. Students should consult their advisers on course loads and on ways to use the unrestricted electives to make a manageable program. Unrestricted electives may be taken CR/NC.
7. Within the courses satisfying the requirements above, there must be at least one graduate-level course with a laboratory component. Courses which satisfy this requirement are: ENGR 206, 341; ME203, 210, 220, 218A,B,C,D, 310A,B,C, 317A,B, 318, 323, 324, 348, 354, 367, 382A,B, 385. ME 391/392 (or other independent study courses) may satisfy this requirement if 3 units are taken for work involving laboratory experiments.

Candidates for the M.S. in Mechanical Engineering are expected to have the approval of the faculty; they must maintain a minimum grade point average (GPA) of 2.75 in the 45 units presented for fulfillment of degree requirements (exclusive of independent study courses). All courses used to fulfill mathematics, depth, breadth, approved electives, and lab studies must be taken for a letter grade (excluding seminars, independent study, and courses for which a letter grade is not an option for any student).

Students falling below a GPA of 2.5 at the end of 20 units may be disqualified from further registration. Students failing to meet the complete degree requirements at the end of 60 units of graduate registration are disqualified from further registration. Courses used to fulfill deficiencies arising from inadequate undergraduate preparation for mechanical engineering graduate work may not be applied to the 45 units required for completion of the MS degree.

ENGINEERING

As described in the "School of Engineering" section of this bulletin, each department in the school may sponsor students in a more general degree, the M.S. in Engineering. Sponsorship by the Department of Mechanical Engineering (ME) requires (1) filing a petition for admission to the program by no later than the day before instruction begins, and (2) that the center of gravity of the proposed program lies in ME. No more than 18 units used for the proposed program may have been previously completed. The program must include at least 9 units of graduate-level work in the department other than ME 300A,B,C, seminars, and independent study. The petition must be accompanied by a statement explaining the program objectives and how it is coherent, contains depth, and fulfills a well-defined career objective. The grade requirements are the same as for the M.S. in Mechanical Engineering.

MS&E 289. Clicks and Bricks: Creating Customer Experiences

MASTER OF SCIENCE IN ENGINEERING, BIOMECHANICAL ENGINEERING

The Master of Science in Engineering: Biomechanical Engineering (MSE:BME) promotes the integration of engineering mechanics and design with the life sciences. Applicants are expected to have an additional exposure to biology and/or bioengineering in their undergraduate studies. Students planning for subsequent medical school studies are advised to contact Stanford's Premedical Advising Office in Sweet Hall.

Students wishing to pursue this program must complete the Graduate Program Authorization form and get approval from the Student Services Office. This form serves to officially add the field to the student's record. This form must be filled out electronically on Axess.

Degree Requirements—

1. Mathematical competence (minimum 6 units) in two of the following areas: partial differential equations, linear algebra, complex variables, or numerical analysis, as demonstrated by completion of two appropriate courses from the following list: ME300A,B,C; MATH106, 109, 113, 131M/P, 132; STATS110, or ENGR155C; CME108, 302. Students who have completed comparable graduate-level courses as an undergraduate, and who can demonstrate their competence to the satisfaction of the instructors of the Stanford courses, may be waived via petition from this requirement by their adviser and the Student Services Office. The approved equivalent courses should be placed in the approved electives category of the program proposal.
2. Graduate Level Engineering Courses (minimum 21 units), consisting of:
   a. Biomechanical engineering restricted electives (9 units) to be chosen from: ME 280, 281, 284A, 337, 339, 381, 382A,B, 385, or 387.
   b. Specialty in engineering (9-12 units): A set of three or four graduate level courses in engineering mechanics, materials, controls, or design (excluding bioengineering courses) selected to provide depth in one area. Such sets are approved by the Mechanical Engineering Faculty. Comparable specialty sets composed of graduate engineering courses outside the Mechanical Engineering Department can be used with the approval of the student's adviser. Examples can be obtained from the Biomechanical Engineering Group Office (Durand 223).
   c. Graduate engineering electives (to bring the total number of graduate level engineering units to at least 21). These electives must contribute to a cohesive degree program, and be approved by the student's adviser. No units may

come from bioengineering courses, mathematics courses, or seminars.

3. Life science approved electives (minimum 6 units): Undergraduate or graduate biological/medical science/chemistry courses which contribute to a cohesive program.
4. Biomechanical engineering seminar ME 389.
5. General approved electives (to bring the total number of units to 39): These courses must be approved by the student's adviser. Graduate level engineering, math, and physical science courses and upper division undergraduate or graduate life science courses are normally approved.
6. Unrestricted electives (to bring the total number of units to 45): Students without undergraduate biology are encouraged to use some of these unrestricted units to strengthen their biology background. Students should consult their adviser for recommendations on course loads and on ways to use the unrestricted electives to create a manageable program.

All courses except unrestricted electives must be taken for a letter grade unless letter grades are not an option.

MASTER OF SCIENCE IN ENGINEERING, PRODUCT DESIGN

The Joint Program in Design focuses on the synthesis of technology with human needs and values to create innovative products, services, and experience designs. This program is offered jointly by the departments of Mechanical Engineering and Art and Art History. It provides a design education that integrates technical, human, aesthetic, and business concerns. Students entering the program from the engineering side earn a Master of Science in Engineering degree with a concentration in Product Design, and those from the art side a Master of Fine Arts. Students complete the core product design courses in their first year of graduate study at Stanford before undertaking the master's project in their second year.

DEGREE REQUIREMENTS

Students must complete the following courses. Students making unsatisfactory degree progress by the end of the first year may not advance to the thesis year per the faculty's discretion. A minimum cumulative GPA of 2.75 is required for degree conferral.

Subject and Catalog Number	*Units*
ME 203. Manufacturing and Design	4
ME 216A. Advanced Product Design: Needfinding	4
ME 311. Design Strategy and Leadership	3
ME 312. Advanced Product Design: Formgiving	3
ME 313. Human Value and Innovation in Design	3
ME 316A,B,C. Product Design Master's Project*	9
ME 365. Structure of Design Research	1-3
ARTSTUDI 60. Design I: Fundamental Visual Language	3
ARTSTUDI 160. Design II: The Bridge	3
ARTSTUDI 360A,B,C. Master's Project*	9
Approved Electives**	18
Total Units	60-62

Note: All required and approved electives must be taken for a letter grade unless prior approval is granted to take a class CR/NC.

* ME 316A,B,C and ARTSTUDI 360A,B,C are taken concurrently for three quarters during the second year.

** Students may choose classes (at the 200 level or higher) from any of the schools at the University to fulfill their elective requirement. However, electives that are not already pre-approved must be approved by the student's adviser via petition prior to enrollment. Electives should be chosen to fulfill career objectives; students may focus their energy in engineering, entrepreneurship and business, psychology, or other areas relevant to design. Taking a coherent sequence of electives focused on a subject area is recommended. For example, the patent, negotiation, and licensing classes (ME 207, 208, 265) constitute a sequence most relevant to potential inventors. The classes in the Graduate School of Business (STRAMGT S353, 356/366) and MS&E 273 constitute a coherent sequence in entrepreneurship and new venture formation. Students interested in social entrepreneurship should apply to the d.school course ME 206A,B, Extreme Affordability.

Pre-approved electives list: The following courses are pre-approved for fulfilling the 18-unit elective requirement for the master's degree in Engineering/Product Design. Electives taken that are not on this list must be approved via petition prior to enrollment. These must be taken for a letter grade unless prior approval is obtained.

ME 204.	The Designer's Voice
ME 207.	Negotiation

ENGR 281.	Design and Media

ENGINEER IN MECHANICAL ENGINEERING

The basic University requirements for the degree of Engineer are discussed in the "Graduate Degrees" section of this bulletin.

This degree requires an additional year of study beyond the M.S. degree and includes a research thesis. The program is designed for students who wish to do professional engineering work upon graduation and who want to engage in more specialized study than is afforded by the master's degree alone.

Admission standards are substantially the same as indicated under the master's degree. However, since thesis supervision is required and the availability of thesis supervisors is limited, admission is not granted until the student has personally engaged a faculty member to supervise a research project. This most often involves a paid research assistantship awarded by individual faculty members (usually from the funds of sponsored research projects under their direction). Thus, individual arrangement between student and faculty is necessary. Students studying for the M.S. degree at Stanford who wish to continue to the Engineer degree ordinarily make such arrangements during the M.S. degree program. Students holding master's degrees from other universities are invited to apply and may be admitted providing they are sufficiently well qualified and have made thesis supervision and financial aid arrangements.

Department requirements for the degree include a thesis; up to 18 units of credit are allowed for thesis work (ME 400). In addition to the thesis, 27 units of approved advanced course work in mathematics, science, and engineering are expected beyond the requirements for the M.S. degree; the choice of courses is subject to approval of the adviser. Students who have not fulfilled the Stanford M.S. degree requirements are required to do so, with allowance for approximate equivalence of courses taken elsewhere; up to 45 units may be transferable. A total of 90 units is required for degree conferral.

Candidates for the degree must have faculty approval and have a minimum grade point average (GPA) of 3.0 for all courses (exclusive of thesis credit and other independent study courses) taken beyond those required for the master's degree.

DOCTOR OF PHILOSOPHY IN MECHANICAL ENGINEERING

The basic University requirements for the Ph.D. degree are discussed in the "Graduate Degree" section of this bulletin. The Ph.D. degree is intended primarily for students who desire a career in research, advanced development, or teaching; for this type of work, a broad background in mathematics and the engineering sciences, together with intensive study and research experience in a specialized area, are the necessary requisites.

Ph.D. students must have a master's degree from another institution, or must fulfill the requirements for the Stanford M.S. degree in Mechanical Engineering or another discipline.

In special situations dictated by compelling academic reasons, Academic Council members who are not members of the department's faculty may serve as the principal dissertation adviser when approved by the department. In such cases, a member of the department faculty must serve as program adviser and as a member of the reading committee, and agree to accept responsibility that department procedures are followed and standards maintained.

Admission involves much the same consideration described under the Engineer degree. Since thesis supervision is required, admission is not granted until the student has personally engaged a member of the faculty to supervise a research project. Once a student has obtained a research supervisor, this supervisor becomes thereafter the student's academic adviser. Research supervisors may require that the student pass the departmental qualifying examination before starting research and before receiving a paid research assistantship. Note that research assistantships are awarded by faculty research supervisors and not by the department.

Prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of engineering fundamentals by passing a qualifying examination. The academic level and subject matter of the examination correspond approximately to the M.S. program described above. Typically, the exam is taken shortly after the student completes the M.S. degree requirements. The student is required to have a minimum graduate Stanford GPA of 3.5 to be eligible for the exam (grades from independent study courses are not included in the GPA calculation). Once the student's faculty sponsor has agreed that the exam should be scheduled, the student must submit an application folder containing several items including a curriculum vitae, research project abstract, and preliminary dissertation proposal. Information, examination dates, and deadlines may be obtained from the department's student services office.

Ph.D. candidates must complete a minimum of 27 units (taken for a letter grade) of approved formal course work (excluding research, directed study, and seminars) in advanced study beyond the M.S. degree. The courses should consist primarily of graduate courses in engineering and sciences, although the candidate's adviser may approve a limited number of upper-level undergraduate courses and courses outside of engineering and sciences, as long as such courses contribute to a strong and coherent program. In addition to this 27-unit requirement, all Ph.D. candidates must participate each quarter in one of the following (or equivalent) seminars: ME 389, 390, 393, 394, 395, 396 397; AA 297; ENGR 298, 311A/B. The department has a breadth requirement for the Ph.D. degree. This may be satisfied either by a formal minor in another department (generally 20 units) or by at least 9 units of course work (outside of the primary research topic) which are approved by the principal dissertation adviser. If a minor is taken, 9 units from the minor requirements can be counted towards the depth requirement.

The Ph.D. thesis normally represents at least one full year of research work and must be a substantial contribution to the field. Students may register for course credit for thesis work (ME 500) to help fulfill University academic unit requirements, but there is no minimum limit on registered dissertation units, as long as students are registered in at least 8 units per quarter prior to TGR. Candidates should note that only completed course units are counted toward the requirement, so ungraded courses or courses with an "N" grade must be cleared before going TGR. Questions should be directed to the department student services office.

The final University oral examination (dissertation defense) is conducted by a committee consisting of a chair from another department and four faculty members of the department or departments with related interests. Usually, the committee includes the candidate's adviser, reading committee members, plus two more faculty. The examination consists of two parts. The first is open to the public and is scheduled as a seminar talk, usually for one of the regular meetings of a seminar series. The second is conducted in private and covers subjects closely related to the dissertation topic.

PH.D. MINOR IN MECHANICAL ENGINEERING

Students who wish a Ph.D. minor in ME should consult with the ME student services office. A minor in ME may be obtained by completing 20 units of approved graduate-level ME courses. Courses approved for the minor must form a coherent program and must be chosen from those satisfying requirement 2 for the M.S. in Mechanical Engineering.

See the *Mechanical Engineering Graduate Student Handbook* produced by the Mechanical Engineering student services office for more information.

MECHANICAL ENGINEERING COURSE CATALOG NUMBERING SYSTEM

The department uses the following course numbering system:

010-099	Freshman and Sophomore
100-199	Junior and Senior
200-299	Advanced Undergraduate and Beginning Graduate
300-399	Graduate
400-499	Advanced Graduate
500	Ph.D. Thesis

SCHOOL OF HUMANITIES AND SCIENCES

Dean: Richard P. Saller
Senior Associate Deans: Ralph L. Cohen, Stephen D. Krasner, Debra M. Satz
Senior Associate Dean for Finance and Administration: Adam R. Daniel
Associate Dean for Faculty Affairs: Tina Kass
Associate Dean for Graduate and Undergraduate Studies: Susan J. Weersing
Assistant Dean and Data and Technology Manager for Graduate and Undergraduate Studies and Diversity Programs: Ayodele Thomas
Graduate Diversity Recruitment Specialist: Joseph L. Brown
Department Chairs: Paula Findlen (History), James Fishkin (Communication), Hester Gelber (Religious Studies), Lawrence Goulder (Economics), Steven Kahn (Physics), Steven Kerckhoff (Mathematics), Beth Levin (Linguistics), Helen Longino (Philosophy), Hideo Mabuchi (Applied Physics), Richard Martin (Classics), James McClelland (Psychology), Josiah Ober (Political Science), Stephen Palumbi (Hopkins Marine Station), Peggy Phelan (Drama), Gabriella Safran (Division of Literature, Cultures, and Languages), Stephen Sano (Music), Robert Simoni (Biology), Jennifer Summit (English), Chaofen Sun (East Asian Languages and Cultures), Nancy Troy (Art and Art History), Andrew Walder (Sociology), Wing Wong (Statistics), Sylvia Yanagisako (Anthropology), Richard Zare (Chemistry)
Lecturer: Ayodele Thomas

The School of Humanities and Sciences, with over 40 departments and interdepartmental degree programs, is the primary locus for the liberal arts education offered by Stanford University. Through exposure to the humanities and arts, undergraduates study the ethical, aesthetic, and intellectual dimensions of the human experience, past and present, and are thereby prepared to make thoughtful and imaginative contributions to the culture of the future. Through the study of social, political, and economic events, they acquire theories and techniques for the analysis of specific societal issues, as well as general cross-cultural perspectives on the human condition. And through exposure to the methods and discoveries of mathematics and the sciences, they become well-informed participants and leaders in today's increasingly technological societies.

The research environment within the school offers both undergraduate and graduate students the intellectual adventure of working on their own research projects side by side with the school's distinguished faculty. While a few of the school's graduate programs offer professional degrees such as the Master of Fine Arts, most are academic and research programs leading to the Ph.D. Doctoral programs emphasize original scholarly work by the graduate students, often at the frontiers of knowledge, and normally require the students to participate in the supervised teaching of undergraduates. Indeed, in the school, as in the University more broadly, graduate students are of central importance in developing a community of scholars.

The fact that so many different disciplines lie within the same organization is one reason why the school has had great success in promoting interdisciplinary teaching and research programs. Whether engaged in studies as wide ranging as ethics, policy, and technological issues, or by applying contemporary social and philosophical theories to classical literature, the school's undergraduates, graduate students, and faculty are challenging the barriers among scholarly disciplines. The school continues to strive for a balance between teaching and research, the academy and society.

ORGANIZATION

The School of Humanities and Sciences includes the departments of Anthropology, Applied Physics, Art and Art History, Biology (and the Hopkins Marine Station), Chemistry, Classics, Communication, Division of Literatures, Cultures, and Languages, Drama, East Asian Languages and Cultures, Economics, English, History, Linguistics, Mathematics, Music, Philosophy, Physics, Political Science, Psychology, Religious Studies, Sociology, and Statistics.

The school also includes 21 interdepartmental degree programs: African and African American Studies; African Studies; American Studies; Archaeology; Biophysics; Comparative Studies in Race and Ethnicity; East Asian Studies; Feminist Studies; Financial Mathematics; Human Biology; Interdisciplinary Studies in Humanities; International Policy Studies; International Relations; Latin American Studies; Mathematical and Computational Science; Modern Thought and Literature; Public Policy; Russian, East European and Eurasian Studies; Science, Technology, and Society; Symbolic Systems; and Urban Studies.

In addition, the school sponsors programs that do not currently grant degrees: Astronomy; Black Performing Arts; Buddhist Studies; Creative Writing; Ethics in Society; History and Philosophy of Science; the Institute for Gender Research; the Institute for Social Science Research; Islamic Studies; Jewish Studies; Medieval Studies; and the Social Science History Institute.

Faculty and academic staff of the School of Humanities are listed under their respective departments or programs.

DEGREES OFFERED

Candidates for the degree of Bachelor of Arts, Bachelor of Science, Bachelor of Arts and Sciences, Master of Arts, Master of Fine Arts, Master of Science, Doctor of Musical Arts, or Doctor of Philosophy should consult the department or program in which they intend to specialize.

AFRICAN AND AFRICAN AMERICAN STUDIES

Acting Director: Arnetha Ball
Associate Director: Cheryl Brown
Advisory Committee: James Campbell (History), Clayborne Carson (History), Linda Darling-Hammond (Education), Harry Elam (Drama), Michele Elam (English), Shelley Fisher Fishkin (English), Allyson Hobbs (History), Morris Graves (Associate Dean of Students), Arnold Rampersad (English), Elaine C. Ray (Director, Stanford University News Service), John R. Rickford (Linguistics), Joel Samoff (African Studies)
Affiliated Faculty: David Abernethy (Political Science, emeritus), Samy Alim (Education), R. Lanier Anderson (Philosophy), Anthony Antonio (Education), Richard Banks (Law), Lucius Barker (Political Science, emeritus), Don Barr (Sociology), Shasad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), Rashida Braggs (IHUM), Bryan Brown (Education), Albert Camarillo (History), James Campbell (History), Clayborne Carson (History), Prudence Carter (Education), Wanda Corn (Art and Art History, emerita), Linda Darling-Hammond (Education), David Degusta (Anthropology), Sally Dickson (Law), Sandra Drake (English, emerita), Jennifer Eberhardt (Psychology), Paulla Ebron (Anthropology), Harry Elam (Drama), Michele Elam (English), James Ferguson (Anthropology), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), George Fredrickson (History, emeritus), James Gibbs Jr. (Political Science, emeritus), William B. Gould (Law, emeritus), Sean Hanretta (History), Aleta Hayes (Drama), Allyson Hobbs (History), Terry Karl (Political Science), Anthony Kramer (Drama), Teresa LaFromboise (Education), Brian Lowery (Graduate School of Business), Lisa Malkki (Anthropology), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Monica McDermott (Sociology), Robert Moses (Drama), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Comparative Literature), Susan Olzak (Sociology), David Palumbo-Liu (Comparative Literature), Patricia Powell (African and African American Studies), Jack Rakove (History), Arnold Rampersad (English), Vaughn Rasberry (English), John R. Rickford (Linguistics), Richard Roberts (History), Sonia Rocha (Sociology), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (African Studies), Paul Sniderman (Political Science), Ewart Thomas (Psychology), Jeremy Weinstein (Political Science)
Program Offices: 450 Serra Mall, Building 360, Suite 362
Mail Code: 94305-2084
Phone: (650) 723-3782
Email: aaas@stanford.edu
Web Site: http://aaas.stanford.edu

Courses offered by the Program in African and African American Studies are listed under the subject code AFRICAAM on the *Stanford Bulletin's* ExploreCourses web site.

UNDERGRADUATE PROGRAM IN AFRICAN AND AFRICAN AMERICAN STUDIES

The Program in African and African American Studies (AAAS), established in 1968, was the first ethnic studies program developed at Stanford University and the first African and African American Studies program at a private institution in the U.S. The AAAS program provides an interdisciplinary introduction to the study of peoples of African descent as a central component of American culture, offering a course of study that promotes research across disciplinary and departmental boundaries as well as providing research training and community service learning opportunities for undergraduates. It has developed an extensive network of Stanford scholars who work in race studies specific to AAAS and in concert with the Center for Comparative Studies in Race and Ethnicity.

AAAS encourages an interdisciplinary program of study drawn from fields including anthropology, art, art history, economics, languages, linguistics, literature, music, philosophy, political science, psychology, religion, and sociology. The program emphasizes rigorous and creative scholarship and research, and fosters close academic advising with a faculty adviser, the AAAS Associate Director, and the Director.

AAAS is an interdisciplinary program (IDP) affiliated with the Center for Comparative Studies in Race and Ethnicity (CCSRE) and offers a major independent of it. CCSRE offers additional majors in Asian American Studies, Chicana/o Studies, Comparative Studies in Race and Ethnicity, and Native American Studies.

MISSION STATEMENT FOR THE UNDERGRADUATE PROGRAM IN AFRICAN AND AFRICAN AMERICAN STUDIES

The mission of the undergraduate programs in African and African American Studies is to provide students with an interdisciplinary introduction to the study of the peoples of African descent as a central component of American culture. Courses in the major promote research across disciplinary and departmental boundaries as well as provide students with research training and community service learning opportunities. Courses of study are drawn from anthropology, art, art history, economics, languages, linguistics, literature, music, philosophy, political science, psychology, religion, and sociology among others. The program provides an intellectual background for students considering graduate school or professional careers.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. interdisciplinary understanding of scholarship related to the African diaspora and Africa, drawing on interdisciplinary course work and each student's individualized concentration.
2. ability to identify and critically assess different disciplinary, methodological, and interpretive approaches to the study of the African Americans, Africans, and/or people of the African diaspora.
3. understanding of comparative approaches to race
4. skills in disciplinary methods necessary for their study.
5. ability to express their interpretive and analytical arguments in clear, effective prose.

BACHELOR OF ARTS IN AFRICAN AND AFRICAN AMERICAN STUDIES

MAJOR

Majors must complete a total of 60 units, which include the following:

1. 1. AFRICAAM 105. Introduction to African and African American Studies,
   or ENGLISH 143. Introduction to African American Literature
   and
   ENGLISH 152D. W. E. B. Du Bois as Writer and Philosopher
   or ENGLISH 172G. Great Works of the African American Literary Tradition
2. One 5 unit course on Africa, approved by the AAAS Director and Associate Director
3. AFRICAAM 200X. Honors Thesis and Senior Thesis Seminar
4. 40 units from other AAAS core and cognate courses.

At least 10 of these units must be core courses, which are defined as courses that are primarily focused on Africa, African American Studies, the Caribbean, or the African Diaspora.

Students also work closely with a faculty adviser, the AAAS associate director, and the AAAS director in developing a coherent thematic emphasis within their major that reflects their scholarly interests in the field.

THEMATIC EMPHASIS

AAAS majors select a thematic emphasis, devoting at least 25 units in their major program of study towards the emphasis. Selecting an emphasis allows students to customize their curriculum and to synthesize course work taken across various departments and programs into a coherent focus. Emphases offered include:

Africa; African America; Diaspora; Identities, Diversity, and Aesthetics (IDA); Gender; Class; Theory; Historical Period.

All emphases (those listed as well as proposed alternatives) must be approved by the director and a course plan developed and approved by the director, associate director, and faculty adviser within the first year of declaring the major.

HONORS PROGRAM

AAAS offers a special program leading to Honors in African and African American Studies. Students accepted to this program will complete an honors thesis on an approved topic, on which work will normally begin in the junior year and be completed by mid-May of the senior year. The honors thesis is intended to enable students to synthesize skills to produce a document or project demonstrating a measure of competence in their specialty.

The Honors program begins with extensive advising from the faculty adviser and a petition for Honors, approved no later than the Spring Quarter of the junior year. Students must enroll in AFRICAAM 200X, Honors Thesis and Senior Thesis Seminar, during Autumn of the senior year and may take up to an additional 10 units of honors work to be distributed as best fits the student's program. Senior Research units are taken in addition to the required courses for the major. In May of the senior year, Honors students share their research findings in a public presentation to which faculty and students are invited.

Majors who have maintained a grade point average (GPA) of at least 3.5 in the major may apply for the honors program. Forms are available in the AAAS office.

CORE COURSES

Subject and Catalog Number	*Units*
AFRICAAM 101. African and African American Lecture Series	1-3
AFRICAAM 105. Intro to African and African American Studies (required)	5
AFRICAAM 123/ENGLISH 172G. Great Works of the African American Tradition	5
AFRICAAM 200X. Honors Thesis and Senior Thesis Seminar	5
ENGLISH 143. Introduction to African and African American Literature	5
ENGLISH 152D. W. E. B. Du Bois and American Culture (required)	5
or ENGLISH 172G. Great Works of the African American Tradition	5
FRENLIT 133. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean	4
HISTORY 145B. Africa in the 20th Century	5
HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle	4-5
LINGUIST 65. African American Vernacular English	3-5
POLISCI 225R. Black Politics in the Post-Civil Rights Era (not given this year)	5
SOC 144. Race and Crime in America	5

AAAS COURSES

AFRICAAM 12. Presidential Politics: Race, Class, Faith and Gender in the 2008 Election
AFRICAAM 40. The Muse, Musings, and Music
AFRICAAM 54/HISTORY 54N. African American Women's Lives
AFRICAAM 60/RELIGST 60. Nation, Diaspora, and the Gods of African America
AFRICAAM 64/HISTORY 64C/164C. From Freedom to Freedom Now: African American History 1865-1965
AFRICAAM 75. Black Cinema
AFRICAAM 75B. Black Sitcoms
AFRICAAM 101. African and African American Lecture Series: Race and Faith
AFRICAAM 105. Introduction to African and African American Studies
AFRICAAM 105R/RELIGST 105. Race, Faith, and Migration
AFRICAAM 123/ENGLISH 172G. Great Works of the African American Tradition
AFRICAAM 145. Writing Race, Writing Faith: An Exploration of the Poetics and Politics of Spirituality in Black Literature
AFRICAAM 200Y. Thesis Research
AFRICAAM 200Z. Thesis Research
AFRICAAM 255/HISTORY 255D/355D. Racial Identity in the American Imagination

MINOR IN AFRICAN AND AFRICAN AMERICAN STUDIES

Students who minor in AAAS complete a minimum of 30 units from the list of AAAS courses. These courses must include:

1. AFRICAAM 105. Introduction to African and African American Studies
2. one course from the social sciences list
3. one course from the humanities list

See the "Bachelor of Arts in African and African American Studies" section of this bulletin to view the humanities and social sciences lists.

Students should seek to develop a coherent theme in their course selections in consultation with the program director or associate director. An appointment should be made to discuss the rationale for the Minor theme preceding submission of the declaration forms.

OVERSEAS STUDIES COURSES IN AFRICAN AND AFRICAN AMERICAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

WINTER QUARTER

CAPETOWN

- OSPCPTWN 18. Xhosa Language and Culture. 2 units, Nolubabalo Tyam
- OSPCPTWN 24A. Targeted Research Project in Community Health and Development. 3 units, Timothy Stanton
- OSPCPTWN 32. Adult Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 4-5 units, Janice McMillan

- OSPCPTWN 33. From Apartheid to Democracy: Namibia and South Africa. 4 units, Chris Saunders
- OSPCPTWN 38. Genocide: The African Experience. 3 units, Mohamed Adhikari, GER:DB:SocSci, EC:GlobalCom
- OSPCPTWN 41. Race and the Division of Labor in South Africa: a Historical Perspective. 4 units, Xolani Ngazimbi

PARIS

- OSPPARIS 186F. Contemporary African Literature in French. 4 units, Françoise Rullier, GER:DB:Hum, EC:GlobalCom

SPRING QUARTER

CAPETOWN

- OSPCPTWN 18. Xhosa Language and Culture. 2 units, Nolubabalo Tyam
- OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development. 3 units, Timothy Stanton
- OSPCPTWN 24B. Targeted Research Project in Community Health and Development. 5 units, Timothy Stanton
- OSPCPTWN 32. Adult Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 4-5 units, Janice McMillan
- OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington
- OSPCPTWN 40. Education in the Post-Apartheid City. 4 units, Aslam Fataar
- OSPCPTWN 44. Negotiating Home, Citizenship and the South African City. 4 units, Sophie Oldfield, GER:DB:SocSci, EC:GlobalCom
- OSPCPTWN 52. The Ethics of Imperialism. 5 units, James Daughton, GER:DB:Hum
- OSPCPTWN 53. The South African Environment in Historical Context. 5 units, James Daughton

AFRICAN STUDIES

Emeriti: David B. Abernethy, John Baugh, Joan Bresnan, Susan Cashion, Sandra E. Drake, Peter Egbert, James. L. Gibbs, Jr., William B. Gould, Bruce F. Johnston, William R. Leben, Bruce Lusignan, Hans N. Weiler, Sylvia Wynter

Chair: Richard Roberts

Professors: Jean-Marie Apostolidès (French, Drama), Ellen Jo Baron (Pathology), Michele Barry (Medicine), Joel Beinin (History), John Boothroyd (Microbiology and Immunology), Elisabeth Mudimbe-Boyi (French and Italian, Comparative Literature), James T. Campbell (History), Martin Carnoy (Education), Harry Elam (Drama), James Fearon (Political Science), James Ferguson (Anthropology), Terry Lynn Karl (Political Science), Richard Klein (Anthropology), David Laitin (Political Science), Michael McFaul (Political Science), Yvonne Maldonado (Pediatrics, Infectious Diseases), Lynn Meskell (Anthropology), Julie Parsonnet (Infectious Diseases), Mary L. Polan (Obstetrics and Gynecology), John Rickford (Linguistics), Richard Roberts (History)

Associate Professors: Prudence L. Carter (Education), Paulla A. Ebron (Anthropology), Liisa Malkki (Anthropology), Hugh Brent Solvason (Psychiatry and Behavioral Sciences)

Assistant Professors: Jenna Davis (Civil and Environmental Engineering), David DeGusta (Anthropology), Oliver Fringer (Civil and Environmental Engineering), Sean A. Hanretta (History), Barbaro Martinez-Ruiz (Art History), Kathryn Miller (History), Grant Parker (Classics), Jeremy Weinstein (Political Science)

Professor (Research): David Katzenstein (School of Medicine)

Associate Professor (Teaching): Robert Siegel (Microbiology and Immunology)

Assistant Professor (Clinical): Brian Blackburn (Infectious Diseases)

Senior Lecturers: Khalil Barhoum (African and Middle Eastern Languages), Helen Stacy (Law)

Lecturers: Byron Bland (Stanford Center on Conflict and Negotiation), Jonathan Greenberg (Law), Ramzi Salti (African and Middle Eastern Languages), Galen Sibanda (African and Middle Eastern Languages), Timothy Stanton (Bing Overseas Studies)

Consulting Professors: Anne Firth-Murray (Human Biology), Joel Samoff (Center for African Studies)

Curators: Karen Fung (African Collection Curator, Green Library), Thomas Seligman (Director, Cantor Arts Center, and Lecturer, Art and Art History), Barbara Thompson (Phyllis Wattis Curator of the Arts of Africa and the Americas, Cantor Arts Center)

Senior Research Fellows: Coit Blacker (Freeman Spogli Institute), Larry Diamond (Hoover Institution), Stephen Stedman (Freeman Spogli Institute, Center for International Security and Cooperation)

Center Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 723-0295
Email: africanstudies@stanford.edu
Web Site: http://africanstudies.stanford.edu

Courses offered by the Center for African Studies are listed under the subject code AFRICAST on the *Stanford Bulletin's* ExploreCourses web site.

The Center for African Studies coordinates an interdisciplinary program in African Studies for undergraduates and graduate students. The program seeks to enrich understanding of the interactions among the social, economic, cultural, historical, linguistic, genetic, geopolitical, ecological, and biomedical factors that shape and have shaped African societies. By arrangement with the Stanford/Berkeley Joint Center for African Studies, graduate students may incorporate courses from both institutions into their programs. Contact the center for information regarding courses offered at the University of California, Berkeley.

Courses in African Studies are offered by departments and programs throughout the University. Each year the center sponsors a seminar to demonstrate to advanced undergraduates and graduate students how topics of current interest in African Studies are approached from different disciplinary perspectives.

Course offerings in African languages are also coordinated by the Center for African Studies. Along with regular courses in several levels of Arabic, Swahili, Xhosa, and Zulu, the center arranges with the African and Middle Eastern Languages and Literatures Program in the Stanford Language Center to offer instruction in other African languages; in recent years, it has offered courses in Amharic, Bambara, Chichewa, Ewe, Fulani, Hausa, Igbo, Shona, Twi, Wolof, and Yoruba.

The Center for African Studies offers a master of arts degree for graduate students. Undergraduates and graduate students not pursuing the master's degree can specialize in African Studies under the arrangements listed below.

UNDERGRADUATE PROGRAMS IN AFRICAN STUDIES

Undergraduates may choose an African Studies focus from:

1. A major in a traditionally defined academic department such as Anthropology, History, or Political Science. These departments afford ample opportunity to enroll in courses outside the major, leaving the student free to pursue the interdisciplinary study of Africa.
2. Interdepartmental majors, such as African and African American Studies or International Relations, which offer coordinated and comprehensive interdisciplinary course sequences, permitting a concentration in African Studies.
3. An individually designed major. Under the supervision of a faculty adviser and two other faculty members, the student can

plan a program of study focused on Africa that draws courses from any department or school in the University. If approved by the dean's advisory committee on individually designed majors, the program becomes the curriculum for the B.A. degree.

CERTIFICATE IN AFRICAN STUDIES

Students may apply for a certificate in African Studies. Requirements for the certificate are the same as for the minor; however, students may double-count courses applied toward their major or graduate studies. The principal difference between the minor and the certificate is that the certificate does not appear on the transcript. For more information and an application, contact the center.

GRADUATE STUDY IN AFRICAN STUDIES

For those who wish to specialize in Africa at the graduate level, African Studies can be designated a field of concentration within the master's and doctoral programs of some academic departments. Students in such departments as Anthropology, History, Political Science, and Sociology, and in the School of Education, may declare African Studies as the area of specialization for their master's and Ph.D. thesis work. Some other departments, programs, and institutes such as the International Comparative Education Program also permit students to specialize in African Studies. Stanford graduate students who are U.S. citizens or permanent residents may request an academic year application for a Foreign Language and Area Studies (FLAS) Fellowship. Students need not be enrolled at Stanford to apply for the summer fellowship. The deadline for both is January 8. For more information or an application, contact the Center.

FINANCIAL AID

The Center for African Studies offers a limited number of Foreign Language and Area Studies (FLAS) fellowships to U.S. citizens and permanent residents who undertake full-time study of an African language as part of their graduate training.

MINOR IN AFRICAN STUDIES

The Center for African Studies awards a minor in African Studies. Students majoring in any field qualify for this minor by meeting the following requirements:

1. A minimum of 25 units of Africa-related courses. Students may not double-count courses for completing major and minor requirements.
2. At least one quarter's exposure to a sub-Saharan African language. The Center for African Studies and the Special Languages Program may arrange instruction in any of several languages spoken in West, East, Central, and Southern Africa.
3. One introductory course that deals with more than one region of Africa.
4. A minimum 25-page research paper, with a focus on Africa. This paper may be an extension of a previous paper written for an African Studies course.
5. A designated focus of study, either disciplinary or regional, through a three-course concentration.

Upon completion of requirements, final certification of the minor is made by the Center for African Studies and appears on the student's transcript.

COTERMINAL BACHELOR'S AND MASTER OF ARTS IN AFRICAN STUDIES

The one-year master's program in African Studies is designed for students who have experience working, living, or studying in Africa, and little prior course work on the region.

Undergraduates at Stanford may apply for admission to the coterminal master's program in African Studies. Coterminal degree applications will only be accepted from students in their fourth year, meaning that the program must be completed in the fifth year. An exception can only be made for students who completed an honors thesis in their third year. For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm. Requirements for the master's degree are summarized below.

The annual deadline for all applications, including coterminal and master's, is January 8. All applicants must submit an online application, including a 500-word statement of purpose, resume, 15-20 page double-spaced academic writing sample, three letters of recommendation, official transcripts, and Graduate Record Examination scores. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply online and for information on graduate admissions, see http://gradadmissions.stanford.edu.

DEGREE REQUIREMENTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin. A description of the M.A. program is also available from the Center or at http://ica.stanford.edu/afr/ma.

The program requires completion of a minimum of 45 graduate units. Upon entering, each student is assigned a faculty adviser who works with the student to develop a customized program of study.

To receive the M.A. degree in African Studies, students must complete:

1. *Core Courses* (15 units): students must complete the core African Studies M.A. course, AFRICAST 301, Dynamics of Change in Africa, in Autumn Quarter. Students elect two additional graduate courses taught by African Studies academic council members and drawn from a list of approved courses. Students must also complete AFRICAST 302, Research Workshop, in Spring Quarter, in which they present and discuss their research and research interests.
2. *Cognate Courses* (10 units): a minimum of 10 units of graduate-level credit in two cognate courses from the following thematic clusters not chosen as the student's concentration field: culture and society; health, well-being, and the environment; and political economy and security.
3. *Concentration Field* (12-15 units): students choose one area of specialization (culture and society; health, well-being, and the environment; or political economy and security), and a group of three related elective courses for graduate credit from the cognate course listings or elsewhere in the Stanford curriculum in consultation with the student's adviser and with the approval of the CAS director. With approval, introductory courses may be substituted in fields such as advanced undergraduate biology for those interested in epidemic diseases or public health. The academic adviser, in agreement with faculty in the chosen field, guarantees that each set of courses forms part of a coherent program.
4. *Language Requirement:* students take one year of training in an African language, usually at least 3 units per quarter, resulting in intermediate-level proficiency as measured by the American Council on the Teaching of Foreign Languages (ACTFL) or comparable language acquisition standards. Students who have advanced proficiency in an African language must fulfill this requirement by taking another European language spoken in Africa, such as French or Portuguese, by taking another African language to the intermediate-level, or by taking a year-long sequence in Arabic. Students with competency in one or more African languages and one or more other languages widely spoken in Africa, may substitute a program of methodological training including, for example, a sequence of courses in statistics or GIS survey techniques.
5. *Seminar Requirement:* students enroll each quarter in AFRICAST 300, Contemporary Issues in African Studies, 1 unit, in which guest scholars present lectures on African themes and topics.
6. *Thesis Option:* students may elect to write a master's thesis; they may register for up to 10 units of thesis research under the

guidance of an Academic Council member. Thesis units may be counted toward the electives within the concentration field unit requirements.

7. *Grade Requirements:* courses to be counted toward the degree, except for AFRICAST 300, must be taken for a letter grade and receive a grade of 'B' or higher.

In addition to AFRICAST courses, the following courses offered in other departments may be used to fulfill optional requirements. To meet requirements for the master's degree, students must take courses at the graduate level which are typically at least at the 200 level.

AFRICAAM 101. African American Lecture Series: Race and Faith
AFRICAAM 105. Introduction to African and African American Studies
AFRICAAM 144. African Women Writers
ANTHRO 139. Ethnography of Africa

OVERSEAS STUDIES COURSES IN AFRICAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

WINTER QUARTER

CAPETOWN

- OSPCPTWN 18. Xhosa Language and Culture. 2 units, Nolubabalo Tyam
- OSPCPTWN 24A. Targeted Research Project in Community Health and Development. 3 units, Timothy Stanton
- OSPCPTWN 32. Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 3-5 units. Janice McMillan, GER:DB:SocSci, EC:GlobalCom
- OSPCPTWN 33. From Apartheid to Democracy: Namibia and South Africa. 4 units, Chris Saunders

SPRING QUARTER

CAPETOWN

- OSPCPTWN 18. Xhosa Language and Culture. 2 units, Nolubabalo Tyam
- OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development. 3 units, Timothy Stanton
- OSPCPTWN 24B. Targeted Research Project in Community Health and Development. 5 units, Timothy Stanton
- OSPCPTWN 32. Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 3-5 units. Janice McMillan, GER:DB:SocSci, EC:GlobalCom
- OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington
- OSPCPTWN 40. Education in the Post-Apartheid City. 4 units, Azeem Badroodien, Aslam Fataar
- OSPCPTWN 44. Negotiating Home, Citizenship and the South African City. 4 units, Sophie Oldfield
- OSPCPTWN 52. The Ethics of Imperialism. 5 units, James Daughton, GER:DB:Hum

Courses offered by American Studies Program are listed under the subject code AMSTUD on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE UNDERGRADUATE PROGRAM IN AMERICAN STUDIES

The mission of the undergraduate program in American Studies is to provide students with a broad understanding of American culture and society. Building on a foundation of courses in history and institutions, literature and the arts, and race and ethnicity, students learn to analyze and interpret America's past and present, forging fresh and creative syntheses along the way. The program is an interdisciplinary major and, beyond the core requirements of the major, students may define and pursue their own interests from fields such as history, literature, art, communication, theatre, African American studies, feminist studies, economics, anthropology, religious studies, Chicana/o studies, law, sociology, education, Native American studies, music, and film. The program is designed to provide students majoring in American Studies with excellent preparation for further study in graduate or professional schools as well as careers in government, business, or other specialized fields.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. higher order, interdisciplinary, historically informed understanding of how to think about American culture and society, drawing on course work in: history and institutions; literature, art, and culture; comparative race and ethnicity; and each student's individualized thematic focus.
2. ability to identify and critically to assess different disciplinary, methodological, and interpretive approaches to the study of Americans and their past.
3. ability to produce their own persuasive, nuanced, fact-based interpretations reflecting a close critical reading and analysis of relevant primary or secondary sources.
4. ability to express their interpretive and analytical arguments in clear, effective prose.
5. ability to listen actively and to contribute to productive intellectual discussion in class.

BACHELOR OF ARTS IN AMERICAN STUDIES

The core requirements illustrate how different disciplines approach the study and interpretation of American life and include three courses in each of two main areas: history and institutions; and literature, culture, and the arts; and one course in comparative race and ethnicity. The required gateway seminar, AMSTUD 160, Perspectives on American Identity, explores the tensions between commonality and difference from a variety of disciplinary perspectives.

Beyond the core requirements of the major, American Studies expects students to define and pursue their own interests in interpreting important dimensions of American life. Accordingly, each student designs a thematic concentration of at least five courses drawn from fields such as history, literature, art, communication, theater, political science, African American studies, feminist studies, economics, anthropology, religious studies, Chicana/o studies, law, sociology, education, Native American studies, music, and film. At least one of the five courses in a student's thematic concentration should be a small group seminar or a colloquium. With program approval, students may conclude the major with a capstone honors research project during their senior year.

Whether defined broadly or narrowly, the thematic focus or concentration should examine its subject from the vantage of multiple disciplines. Examples of concentrations include: race and the law in America; gender in American culture and society; technology in American life and thought; health policy in America; art and culture in 19th-century America; education in America; nature and the environment in American culture; politics and the media; religion in American life; borders and boundaries in American culture; the artist in American society; and civil rights in America.

Completion of the major thus normally requires 13 courses (totaling at least 60 units), all of which must be taken for a letter grade. Not all courses are offered each year; students should consult ExploreCourses for scheduling information for the current academic year.

The course requirements for the American Studies major are:

1. *Gateway Seminar*—American Studies majors are required to take AMSTUD 160, Perspectives on American Identity (5 units), which is the Writing in the Major (WIM) course for American Studies.
2. *History and Institutions*—Majors are required to complete three courses in American History and Institutions. Specific requirements are:
   - AMSTUD 150A. (same as HISTORY 150A) Colonial and Revolutionary America
   - AMSTUD 150B. (same as HISTORY 150B) 19th Century America
   - The third course may be chosen from one of the following
   - AMSTUD 1B. (same as COMM 1B) Media, Culture, and Society
   - AMSTUD 2. (same as POLISCI 2) American National Government and Politics
   - AMSTUD 137. (same as COMM 137) When the People Speak: Deliberative Democracy and Public Consultation
   - AMSTUD 139. (same as SOC 139) American Indians in Contemporary Society
   - AMSTUD 150C. (same as HISTORY 150C) The United States in the 20th Century
   - AMSTUD 156H. Women and Medicine in US History: Women as Patients, Healers and Doctors
   - AMSTUD 161. (same as HISTORY 161) Women in 20th Century America
   - AMSTUD 164C. (same as HISTORY 164C) From Freedom to Freedom Now: African-American History, 1865-1965
   - AMSTUD 165. (same as EDUC 165) History of Higher Education in the U.S.
   - AMSTUD 166. (same as HISTORY 166) Introduction to African-American History
   - AMSTUD 179. (same as POLISCI 122) Introduction to American Law
   - AMSTUD 201. (same as EDUC 201) History of Education in the U.S.
   - AMSTUD 216X. (same as EDUC 216X) Education, Race, and Inequality in African American History, 1880-1990
   - AMSTUD 251. (same as HISTORY 251) Topics in Constitutional History
   - AMSTUD 251C. (same as HISTORY 251C) The American Enlightenment
   - AMSTUD 258. (same as HISTORY 258) Topics in the History of Sexuality: Sexual Violence in America
   - ECON 116. American Economic History (not given 2010-11)
   - HISTORY 154. 19th Century U.S. Cultural and Intellectual History, 1790-1860 (not given 2010-11)
   - SOC 155. The Changing American Family
3. *Literature, Culture, and the Arts*—Majors are required to take three courses in American literature, culture, and the arts. Specific requirements are: at least one course focusing on the period before the Civil War, normally AMSTUD 150, (same as ENGLISH 123) American Literature and Culture to 1855, and two additional courses, including at least one from Art, Film Studies, Music, or Drama. Choices include but are not limited to:
   - AMSTUD 35N. (same as MUSIC 35N) A Union of Diversities: Charles Ives and American Musical Tradition
   - AMSTUD 120. (same as COMM 120) Digital Media in Society
   - AMSTUD 121. (same as ENGLISH 121) Masterpieces of American Literature
   - AMSTUD 121X. (same as EDUC 121X) Hip Hop, Youth Identities, and the Politics of Language
   - AMSTUD 123D. (same as ENGLISH 123D) American Literature, 1855 to WWII
   - AMSTUD 123G. (same as ENGLISH 123G) Mark Twain: A Fresh Look at an Icon and Iconoclast (not given 2010-11)
   - AMSTUD 138C. (same as ENGLISH 138C) *Huckleberry Finn* and American Culture (not given 2010-11)
   - AMSTUD 140. Stand Up Comedy and the "Great American Joke" since 1945
   - AMSTUD 142. (same as COMPLIT 142) Literature of the Americas
   - AMSTUD 143. (same as ENGLISH 143) Introduction to African-American Literature
   - AMSTUD 146. (same as COMPLIT 146) Asian American Culture and Community

- AMSTUD 152A. (same as ENGLISH 152A) American Culture and the Cold War
- AMSTUD 152G. (same as ENGLISH 152G) Global Harlem Renaissance
- AMSTUD 167. (same as FILMST 167) Hollywood Musicals
- AMSTUD 183C. (same as ENGLISH 183C) Feminism and American Literature
- AMSTUD 186. (same as ENGLISH 186) Tales of Three Cities: New York, Chicago, Los Angeles
- AMSTUD 240. (same as ARTHIST 240) Sister Arts: Image and Text in America
- AMSTUD 257. (same as ENGLISH 257) Journalism and Imaginative Writing in America
- AMSTUD 260G. (same as ENGLISH 260G) Century's End: Race, Gender and Ethnicity at the Turn of the Century
- AMSTUD 261A. (same as ENGLISH 261A) Geography, Time, and Trauma in Asian American Literature
- AMSTUD 261F. (same as ENGLISH 261F) Gender and Sexuality in Asian American Literature
- AMSTUD 262C. (same as ENGLISH 262C) African American Literature and the Retreat of Jim Crow
- AMSTUD 262D. (same as ENGLISH 262D) African American Poetics
- ARTHIST 132. American Art and Culture, 1528-1860 (not given 2010-11)
- ARTHIST 176. Feminism and Contemporary Art (not given 2010-11)
- ARTHIST 178. Ethnicity and Dissent in United States Art and Literature (not given 2010-11)
- ARTHIST 259. The Fifties: Abstract Expressionism to Beat Culture (not given 2010-11)
- CSRE 179. Asian American Experiences and Documentary Practice
- DRAMA 163. Performance and America (not given 2010-11)
- DRAMA 165M. Musical Theater (not given 2010-11)
- ENGLISH 152D. Du Bois and American Culture (not given 2010-11)

4. *Comparative Race and Ethnicity*—Majors are required to take one course that focuses on the comparative study of race and ethnicity rather than a single racial or ethnic group, generally from the offerings listed by Comparative Studies in Race and Ethnicity (CSRE). Courses that satisfy this requirement include:
   - AMSTUD 114N. Visions of the 1960s
   - AMSTUD 121X. (same as EDUC 121X) Hip Hop, Youth Identities, and the Politics of Language
   - AMSTUD 161E. (same as ENGLISH 261E) Mixed Race Literature in the U.S. and South Africa
   - AMSTUD 169. (same as DRAMA 169A) Cultural Traffic: Race, Performance and Globalization
   - AMSTUD 183. Border Crossings and American Identities
   - AMSTUD 214. The American 1960s: Thought, Protest and Culture
   - CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity
   - CSRE 199A. Race/Sex/Gender in Cultural Representations
   - CSRE 226. Race and Racism in American Politics
   - SOC 149. The Urban Underclass
5. *Concentration and Capstone Seminar*—Students must design a thematic concentration of at least 5 courses, with the help of faculty advisers. The courses, taken together, must give the student in-depth knowledge and understanding of a coherent topic in American cultures, history, and institutions. Thematic concentrations should be approved by the end of the registration period of the Autumn Quarter of the junior year, if at all possible. Sample thematic concentrations and courses that allow a student to explore them are available in the American Studies Office in Building 460.

At least one of the courses in the concentration must be designated as the capstone seminar and must require a substantial research paper on a topic related to the thematic concentration. This paper must be filed in the program office prior to degree conferral. The program office has a list of courses that satisfy the capstone requirement, but students are encouraged to propose others that may fit better with their concentrations. An honors project, or an independent study course with a faculty member culminating in a research paper, may also fulfill this requirement with the Director's approval.

Students may choose courses for their thematic concentrations from the following list:

- AMSTUD 101. American Fiction into Film: How Hollywood Scripts and Projects Black and White Relations Over the Decades
- COMM 1A. Media Technologies, People, and Society
- COMM 125. Perspectives on American Journalism
- COMM 131. Media Ethics and Responsibility
- COMM 162. Analysis of Presidential Campaigns
- COMPLIT 41Q. Ethnicity and Literature
- COMPLIT 134. The Poetry of History in the Americas
- COMPLIT 149. The Laboring of Diaspora and Border Literary Cultures
- COMPLIT 242. The Global South -- Faulkner, Garcia Marquez, Morrison, and Cisneros
- CSRE 116. Language, Culture, and Education in Native North America
- CSRE 132. Friends, Enemies, and Lovers: Interracial Encounters in American Culture
- CSRE 133. Women and Race in the American West, 1849-1950
- CSRE 161. Asian American Immigration and Health
- CSRE 166. New Citizenship: Grassroots Movements for Social Justice in the U.S.
- CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity
- CSRE 200. Latina/o Literature
- CSRE 201. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era
- CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century
- DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts
- DRAMA 180Q. Noam Chomsky: The Drama of Resistance
- EDUC 112X. Urban Education
- EDUC 177. Education of Immigrant Students: Psychological Perspectives
- EDUC 220B. Introduction to the Politics of Education
- EDUC 220C. Education and Society
- ENGLISH 143A. American Indian Mythology, Legend and Lore
- ENGLISH 187J. Lady Sings the Blues: Blues, Literature, and Black Feminism
- HISTORY 130A. The Rise of Scientific Medicine
- HISTORY 166B. Immigration in 20th-Century America: Ethnicity, Race, Nation
- HISTORY 250A. History of California Indians
- HISTORY 255B. Introduction to African and African American Studies
- HPS 158. The Social History of Mental Illness
- HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape our Health Care System
- HUMBIO 122S. Social Class, Race, Ethnicity, Health
- HUMBIO 170. Justice, Policy and Science
- LINGUIST 65. African American Vernacular English
- LINGUIST 150. Language in Society
- LINGUIST 156. Language and Gender
- MUSIC 8A. Rock, Sex and Rebellion

- MUSIC 18A. Jazz History I: Ragtime to Bebop, 1900-1945
- MUSIC 18B. Jazz History II: Bebop to the Present, 1945-
- MUSIC 146. Music and Urban Film
- MUSIC 147. The Soul Tradition in African American Music
- NATIVEAM 120. Native American Writers, 1880-1920

HONORS PROGRAM

To graduate with honors, American Studies majors must complete a senior thesis and have an overall grade point average of 3.5 in the major, or demonstrated academic competence. Students must apply to enter the honors program no later than the end of registration period in Autumn Quarter of their senior year, and must enroll in 10-15 units of AMSTUD 250, Senior Research, during the senior year. These units are in addition to the units required for the major. The application to enter the program must contain a one-page statement of the topic of the senior thesis, and must be signed by at least one faculty member who agrees to be the student's honors adviser. (Students may have two honors advisers.) The thesis must be submitted for evaluation and possible revision to the adviser no later than four weeks before graduation.

Students are encouraged to choose an honors topic and adviser during the junior year. To assist students in this task, American Studies offers a pre-honors seminar (AMSTUD 240A) in which students learn research skills, develop honors topics, and complete honors proposals. Students also may enroll in the American Studies Honors College during September before the senior year. American Studies also provides students the opportunity to work as paid research assistants for faculty members during the summer between their junior and senior year, which includes participation in a research seminar. More information about American Studies honors is available from the program office.

MINOR IN AMERICAN STUDIES

To earn a minor in American Studies, students must complete at least 28 units of course work in the program. Because students may not count courses for both a major and a minor, the specific courses that are used for an American Studies minor depend on the courses that are used to satisfy the major requirement.

A student must take the following:

1. The gateway seminar, AMSTUD 160. Perspectives on American Identity
2. at least 2 courses from category 2 (History and Institutions)
3. at least 2 courses from category 3 (Literature, Culture and the Arts)
4. at least 1 course from category 4 (Comparative Race and Ethnicity)

Courses used to satisfy these requirements must be taken for a letter grade.

ANTHROPOLOGY

Emeriti: (Professors) Clifford R. Barnett, Harumi Befu, George A. Collier, Jane F. Collier, Carol Delaney, Charles O. Frake, James L. Gibbs, Jr., Renato I. Rosaldo, George D. Spindler, Robert B. Textor

Chair: Sylvia Yanagisako

Professors: Lisa Curran, William H. Durham, James Ferguson (on leave), Thomas Blom Hansen, Ian Hodder, Richard G. Klein, Tanya Luhrmann, Lynn Meskell, Sylvia J. Yanagisako

Associate Professors: Rebecca Bliege Bird, Paulla Ebron, James A. Fox, Miyako Inoue, Sarah Lochlann Jain, James Holland Jones, Matthew Kohrman, Liisa Malkki, John W. Rick, Barbara Voss

Assistant Professors: Melissa J. Brown, Ian G. Robertson, Michael V. Wilcox

Assistant Professor (Research): Douglas W. Bird

Courtesy Professors: Penelope Eckert, Raymond McDermott

Visiting Associate Professors: Ewa Domanska, Jean-Jacques Hublin, Mark Maguire

Lecturers: Kathleen Coll, Claudia Engel, Karen Holmberg, Patrick Hunt, Matthew Jobin, Alma Kunanbaeva, Sandra Lee, Merritt Ruhlen, Dan Salkeld, James Truncer

Consulting Associate Professor: Dominique Irvine

Affiliated Faculty: Carol Boggs, J. Gordon Brotherston, Susan Cashion, Jean-Pierre Dupuy, Marcus W. Feldman, John A. Gosling, Robert Sapolsky, Jeffrey T. Schnapp, Bernardo Subercaseaux

Post Doctoral Fellows: Ayca Alemdaroglu, Carter Hunt

Teaching Affiliates: Elif Babul, Serena Love, Erin Pettigrew, Angel Roque, Robert Samet, Joshua Samuels, Bryn Williams, Austin Zeiderman

Department Offices: Building 50, Main Quadrangle, 450 Serra Mall

Mail Code: 94305-2034

Phone: (650) 723-3421

Email: anthropology@stanford.edu

Web Site: http://anthropology.stanford.edu

Courses offered by the Department of Anthropology are listed under the subject code ANTHRO on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE DEPARTMENT OF ANTHROPOLOGY

The courses offered by the Department of Anthropology are designed to: provide undergraduates with instruction in anthropology; provide undergraduate majors in Anthropology with a program of work leading to the bachelor's degree; and prepare graduate candidates for advanced degrees in Anthropology. Anthropology is devoted to the study of human beings and human societies as they exist across time and space. It is distinct from other social sciences in that it gives central attention to the full time span of human history, and to the full range of human societies and cultures, including those located in historically marginalized parts of the world. It is therefore especially attuned to questions of social, cultural, and biological diversity, to issues of power, identity, and

inequality, and to understanding the dynamic processes of social, historical, ecological, and biological change over time. Education in Anthropology provides excellent preparation for living in a multicultural and globally-interconnected world, and helps to equip students for careers in fields including law, medicine, business, public service, research, ecological sustainability, and resource management. Students may pursue degrees in Anthropology at the bachelor's, master's, and doctoral levels.

The Department of Anthropology offers a wide range of approaches to the topics and area studies within the field, including archaeology, ecology, environmental anthropology, evolution, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through the use of qualitative and quantitative approaches. The department provides students with excellent training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of Anthropology.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the Anthropology discipline.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the Anthropology discipline.

UNDERGRADUATE PROGRAMS IN ANTHROPOLOGY

In addition to gaining an excellent foundation for graduate research and study, students majoring in Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, nonprofit organizations, and public policy.

GRADUATE PROGRAMS IN ANTHROPOLOGY

Graduate training in Anthropology at Stanford is designed for students who seek the Doctoral (Ph.D.) degree, and for students who seek the Masters of Arts (M.A.) degree only. Entering graduate students need not have majored in Anthropology as undergraduates, although most have backgrounds in behavioral, biological, social, or physical sciences.

BACHELOR OF ARTS IN ANTHROPOLOGY

Undergraduate training in the department of Anthropology is designed for students who seek the bachelor of arts (B.A.) degree only. Students may declare a major in Anthropology and earn the B.A. degree by following the requirements below. The department also offers a minor in Anthropology. The B.A. degree program usually requires at least five quarters of enrollment. Students interested in majoring in Anthropology are encouraged to declare by the beginning of their junior year and to work closely with an adviser to develop a coherent program of study. For more complete information about the major see the department web site at http://anthropology.stanford.edu.

To declare a major in Anthropology, contact the department's student peer adviser(s) or the undergraduate student services specialist to prepare the checklist for the major and the major planning form. These forms are available at http://www.stanford.edu/dept/anthropology/cgi-bin/web/?q=node/19. Apply in Axess for the B.A. in Anthropology, submit the required forms to the undergraduate student services specialist requesting a faculty adviser assignment, and meet with the assigned faculty adviser to receive approval of the checklist and major planning form. Students must apply in Axess for the B.A. Major in Anthropology by the time junior status is achieved (85 units).

DEGREE REQUIREMENTS

The B.A. degree in Anthropology may be earned by fulfilling the following requirements:

1. A faculty adviser appointed in the department of Anthropology. Undergraduate Anthropology majors should plan to meet with their faculty adviser at least once each quarter.
2. A program of 65 units, passed with an overall minimum grade of 'C' or higher:
   a. of the 65 units, 15 units may be approved from related areas of study, overseas studies, and/or transfer units.
   b. of the 65 units, at least 15 units must be in courses with the ANTHRO subject code numbered 100 or above.
   c. no more than 10 units of directed reading-style course work may be counted towards the major. These units may only be included among the 15 related units permitted for the major.
   d. no more than 10 units may be taken for a satisfactory/no credit grade: 5 units in ANTHRO courses, and 5 in related or transfer units.
3. A grade of 'B-' or higher in an ANTHRO Writing in the Major (WIM) course. This should be taken within a year of declaring the major or before the end of the junior year.
4. A grade of 'B-' or higher in an ANTHRO theory course. This should be taken within a year of declaring the major or before the end of the junior year.
5. A grade of 'B-' or higher in an ANTHRO methods course. This should be taken within a year of declaring the major or before the end of the junior year.
6. A self-designed course of study, approved by the faculty adviser, chosen from an Anthropology emphasis listed below:
   a. Archaeology and Heritage
   b. Culture and Society
   c. Ecology, Environment, and Evolution
   d. Medical Anthropology
7. A grade of 'C' or higher in a minimum of four ANTHRO essential courses listed at the 100 level or higher and taught by Anthropology faculty. (Courses should be related to the student's self-designed course study and emphasis.)
8. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of 'B-' or better. The requirement may be met by special examination administered through the Language Center, or demonstration of superior placement scores.
   Note: Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language.
9. At least five quarters of enrollment in the major. Each candidate for the B.A. in Anthropology should declare a major by the first quarter of the third year of study.

Advising is an important component of the Anthropology major. Students are encouraged to work closely with their major adviser throughout their pursuit of the degree. Advising milestones for the major include the following:

1. In the quarter in which the major is declared, students meet with their assigned faculty adviser, create a rigorous course of study based on topical breadth, and obtain adviser approval of an Anthropology emphasis as a course of study by obtaining the major adviser's signature on the Major Checklist.

2. Undergraduate Anthropology majors should plan to meet with their major faculty adviser at least once each quarter before the Final Study List deadline. Any revisions to the initial checklist must be approved by the faculty adviser.
3. Undergraduate Anthropology majors must submit an updated major checklist and planning form to the undergraduate student services specialist in the quarter before graduating.

REQUIRED COURSES—

1. *Writing in the Major courses—*
   a. Undergraduate majors can fulfill the Writing in the Major course requirement for the B.A. in Anthropology by taking the ANTHRO Theory course corresponding to their chosen emphasis.
2. *Theory courses—*
   Enroll in one of the following according to the student's chosen emphasis:
   a. Archaeology and Heritage: ANTHRO 90A. History of Archaeological Thought
   b. Culture and Society/Medical Anthropology: ANTHRO 90B. Theory in Cultural and Social Anthropology
   c. Ecology, Environment, and Evolution: ANTHRO 90C. Theory of Ecological and Environmental Anthropology
3. *Methods courses—*
   The following course fulfills the methods course requirement. Students choosing the Archaeology and Heritage emphasis may substitute ANTHRO 91A. Archaeological Methods.
   ANTHRO 91. Evidence and Methods in Anthropology
4. *Essential courses—*
   Choose from the following according to the student's chosen emphasis. These courses may fulfill the essential course requirements for more than one emphasis; see the undergraduate student services specialist for details.
   a. For the Archaeology and Heritage emphasis, most essential courses are numbered ANTHRO 100 through ANTHRO 113.
   b. For the Culture and Society emphasis, most essential courses are numbered ANTHRO 120 through ANTHRO 150.
   c. For the Ecology, Environment, and Evolution emphasis, most essential courses are numbered ANTHRO 160 through ANTHRO 178.
   d. For the Medical Anthropology emphasis, most essential courses are numbered ANTHRO 179 through ANTHRO 185.
5. *Research courses—*
   Courses listed are recommended for students writing a research paper in the major:
   - ANTHRO 92. Undergraduate Research Proposal Writing Workshop
   - ANTHRO 93. Prefield Research Seminar
   - ANTHRO 94. Postfield Research Seminar
   - ANTHRO 95A. Research in Anthropology
6. *Senior courses*—ANTHRO 95B. Senior Paper

SENIOR PAPER

The senior paper program in Anthropology provides majors the opportunity to conduct original research under the guidance of an Anthropology faculty member. All Anthropology majors are encouraged to write a senior paper. Interested Anthropology majors of junior standing may apply to the senior paper program by submitting a senior paper application form, including a research topic/title of the proposed senior paper project, a two page abstract/proposal, and a letter of reference from their faculty adviser to the undergraduate student service specialist on or by the second Monday of February in the junior year. Enrollment in ANTHRO 95A, Research in Anthropology, is recommended during Autumn and Winter quarters of the senior year. Students must enroll in ANTHRO 95B, Senior Paper, in the final quarter of the undergraduate degree program before graduating. The senior paper is submitted in the final quarter before graduation. For more information, see the undergraduate student services specialist.

HONORS PROGRAM

The honors program in Anthropology provides eligible Anthropology majors with an opportunity to conduct original ethnographic, field, laboratory, or library-based research under the guidance of an Anthropology faculty member. All Anthropology majors are urged to consider applying to the departmental honors program in Anthropology. Interested Anthropology majors of junior standing may apply for admission to the honors program by submitting an honors application form, including a research topic/title of the proposed honors project, a two page abstract/proposal, a transcript, and a letter of reference from their faculty or honors adviser to the undergraduate student services specialist on or by the second Monday of February in the junior year. Department majors are eligible to apply for honors candidacy with a 3.4 GPA in the department major, a 3.0 GPA in overall course work, and with no more than one incomplete listed on the transcript at the time of application. Students interested in the honors program are encouraged to apply for summer research funding through the Department of Anthropology, Undergraduate Advising and Research, and area studies centers. This process requires planning as the Spring Quarter research deadline falls before the honors application due date. In most case, honors students apply for such funding early in the junior year.

1. *Required Courses—*
   a. The theory and methods course appropriate to the student's chosen emphasis of study.
   b. ANTHRO 95B. Senior Paper, is required in the final quarter of the student's B.A. degree program. Senior papers with a letter grade of 'A-' or higher may be awarded departmental honors. Honors students may enroll for a minimum of 5 units and up to a maximum of 10 units.
2. *Optional Courses—*
   a. ANTHRO 92. Undergraduate Research Proposal Writing Workshop, is recommended during Autumn and Winter quarters of the junior year.
   b. ANTHRO 93. Prefield Research Seminar
   c. ANTHRO 94. Postfield Seminar, is given in Autumn Quarter only. Student researchers may choose to enroll in ANTHRO 94 or to attend Summer Honors College in the summer following their junior year.
   d. ANTHRO 95A. Research in Anthropology, is recommended during Autumn and Winter quarters of the senior year.

FIELD SCHOOL AND RESEARCH OPPORTUNITIES IN ANTHROPOLOGY

Students majoring in Anthropology are encouraged to develop field research projects under the supervision of a department faculty member. The department offers research grants to support individually-designed and other summer field research in Anthropology. The department research grants may be used to support field research as a supplement to other field research grants such as the UAR research grants. The department also offers opportunities to participate in faculty-led research projects.

See http://anthropology.stanford.edu for information about the department's summer research opportunities, including the following: Beagle II Award, Tambopata, Franz Boas and Pritzker summer scholars programs, the Georgia Sea Islands Cultural Heritage Preservation Project, and Michelle Z. Rosaldo Summer Field Research Grant program. The VPUE-funded departmental grants program supports students' participation in faculty-led research projects such as the Georgia Sea Islands Cultural Preservation Project. Other field school opportunities include the following: Catalhoyuk, El Presidio de San Francisco, Pueblo of Abo, and South Africa Heritage.

Note: Required courses for the Franz Boas and Pritzker summer scholars programs and the Michelle Z. Rosaldo grant program

include ANTHRO 93, Prefield Research Seminar, or ANTHRO 93B, Prefield Research Seminar for Non-majors, and ANTHRO 94, Postfield Research Seminar.

For more information about research opportunities and deadlines, please see http://anthropology.stanford.edu.

MINOR IN ANTHROPOLOGY

To declare a minor in Anthropology, contact the department's student peer adviser(s) or the undergraduate student services specialist to prepare the minor checklist and the minor planning form. These forms are available at http://anthropology.stanford.edu. Apply in Axess for the B.A. Minor in Anthropology; submit the required forms to the undergraduate student services specialist; request a faculty adviser assignment; and meet with the assigned faculty adviser for approval of the checklist and minor planning form. Students must apply in Axess for the B.A. Minor in Anthropology by the last day of the quarter at least two quarters before degree conferral.

Requirements for the minor in Anthropology include the following:

1. A faculty adviser appointed in the Department of Anthropology.
2. A program of 30 units, with a minimum grade of 'C' or higher:
   a. Of the 30 units, 10 units may be approved from related areas of study, overseas studies, and transfer units.
   b. Of the 30 units, a minimum of 15 units must be ANTHRO courses numbered 100 or above.
   c. No more than 5 units of directed reading-style course work may be counted towards the minor and may only be included among the 10 related units permitted for the minor.
   d. No more than 5 units may be taken for a satisfactory/no credit grade.
3. A self-designed course of study chosen from an Anthropology emphasis listed below and approved by the faculty adviser:
   a. Archaeology and Heritage
   b. Culture and Society
   c. Ecology, Environment and Evolution
   d. Medical Anthropology
4. A grade of 'C' or higher in two ANTHRO essential courses listed at the 100 level or higher and taught by Anthropology faculty.
5. At least two quarters of enrollment in the minor. Each candidate for the B.A. Minor in Anthropology should declare by the last day of the quarter at least two quarters before the quarter of degree conferral.

Advising milestones for the minor include the following:

1. In the quarter in which the minor is declared, the student must meet with his or her assigned adviser, create a rigorous course of study based on topical breadth, and obtain adviser approval for the checklist.
2. Any revisions to the initial checklist must be approved by the faculty adviser.
3. An updated minor checklist and planning form must be submitted to the undergraduate student services specialist before the student graduates.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN ANTHROPOLOGY

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

The University minimum requirements for the coterminal bachelor's/master's program are 180 units for the bachelor's degree plus 45 (or higher departmental requirement, as determined by each graduate department) unduplicated units for the master's degree. The requirements for the coterminal program with dual undergraduate degrees are 225 units for the two bachelor's degrees, and 45 units for the master's degree. For the 45-unit University minimum for the master's degree, all courses must be at or above the 100 level and 50 percent must be courses designated primarily for graduate students (typically at least at the 200 level). Department requirements may be higher. Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

Graduate enrollment at Stanford University for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the coterminal master's degree. M.A. students in Anthropology must take a minimum of 45 units of Anthropology course work beyond the undergraduate degree with an overall grade point average of 3.0 or higher. 45 units constitute the University minimum for the M.A. degree, and courses must be at or above the 100 level.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. degree program within three consecutive calendar quarters after the student's first quarter of master's-level enrollment. The University allows no transfer units into the master's program. To provide a meaningful master's program within one year, advance planning of course work with an adviser is required. Requirements for the coterminal master's program must be completed within three years.

For further information about the department's coterminal master's degree program requirements, see http://anthropology.stanford.edu.

ADMISSION TO THE COTERMINAL MASTER'S DEGREE PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program in Anthropology is December 14, 2010. Stanford University undergraduate majors are eligible to apply for the coterminal masters degree program if they have a 3.5 GPA in their department major, a 3.0 GPA in overall course work, and have no more than one incomplete listed on the transcript at the time of application. Successful applicants to the M.A. program may enter only in the following Autumn Quarter. Coterminal master's degree applicants are not required to submit their Graduate Record Examination scores. Prospective applicants should see http://anthropology.stanford.edu for further information about the application process and the department's requirements for the coterminal master's program.

For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

Degree Options—Students may pursue one of three possible department tracks in the Anthropology M.A. degree program. The tracks are 1) Archaeology, 2) Culture and Society, or 3) Ecology and Environment. The tracks are not declarable in Axess.

MASTER OF ARTS IN ANTHROPOLOGY

University requirements for the terminal M.A. are described in the "Graduate Degrees" section of this bulletin.

The Department of Anthropology offers the terminal master's degree to the following:

1. Stanford graduate students, taking advanced degrees in other departments or schools at Stanford, who are admitted to the terminal M.A. program in Anthropology.
2. Anthropology Ph.D. students at Stanford University who fulfill the terminal M.A. requirements on the way to the Ph.D. degree.
3. Graduate applicants who apply from outside the University for admission to the terminal M.A. program in Anthropology.

Applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and

in competition with the Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department's handbook for the Ph.D. Program.

Graduate enrollment at Stanford University for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the terminal master's degree. M.A. students in Anthropology must take a minimum of 45 units of Anthropology course work beyond the undergraduate degree with an overall grade point average of 3.0 or higher. 45 units constitute the University minimum for the M.A. degree, and courses must be at or above the 100 level.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. degree program within three consecutive calendar quarters after the student's first quarter of master's-level enrollment. The University allows no transfer units into the master's program. To provide a meaningful master's program within one year, advance planning of course work with an adviser is required. Requirements for the terminal master's program must be completed within three years.

For further information about the department's master's degree program requirements, see http://anthropology.stanford.edu.

ADMISSION TO THE MASTER'S DEGREE PROGRAM

The deadline for graduate applications to the M.A. degree program in Anthropology is December 14, 2010. Successful applicants to the M.A. program may enter only in the following Autumn Quarter. Master's degree applicants must file a report of their Graduate Record Examination score electronically. Prospective applicants should see http://anthropology.stanford.edu for further information about the application process and the department's requirements to the terminal master's program.

No financial support is available to students enrolled for the M.A. degree.

Degree Options—Students may pursue one of three possible department tracks in the Anthropology M.A. degree program. The tracks are 1) Archaeology, 2) Culture and Society, or 3) Ecology and Environment. The tracks are not declarable in Axess.

DEGREE REQUIREMENTS

Requirements for the coterminal and terminal master's degree program include the following:

1. A faculty adviser appointed in the Department of Anthropology.
2. A program of 45 units, taken at the 100 level or higher with a minimum grade of 'B' or higher:
   a. of the 45 units, no more than 15 units may be approved from related areas of study or overseas studies.
   b. of the 45 units, no more than 10 units of directed reading-style course work may be counted towards the degree.
   c. of the 45 units, no more than 5 units may be taken for a satisfactory/no credit grade.
3. A grade of 'B' or higher in an ANTHRO theory course from the chosen track.
4. A grade of 'B' or higher in an ANTHRO methods course from the chosen track.
5. A grade of 'B' or higher in four ANTHRO review courses from the chosen track that are listed at the 200 level or higher and taught by Anthropology faculty.
6. A self-designed course of study chosen from the Anthropology tracks listed below:
   a. Archaeology
   b. Culture and Society
   c. Ecology and Environment
7. Submission of a Graduate Research Paper Proposal approved by the faculty adviser by the end of the first quarter of the master's degree program.
8. Submission of a Master's Degree Program Proposal form approved by the faculty adviser by the end of the first quarter of the master's degree program.
9. Presentation of the master's research project at the department's master's (honors) presentation event in Spring Quarter.
10. Submission of the master's paper reviewed by two faculty members. For the Culture and Society track the thesis can be a field research or library research paper. For the Archaeology and the Ecology and Environment tracks, the thesis can also be a laboratory research paper.

Required Courses—

1. *Archaeology Track*—Four departmental review courses which must include ANTHRO 303, Introduction to Archaeology Theory, and one additional theory course. Students must also take ANTHRO 307, Archaeology Methods and Research Design.
2. *Culture and Society Track*—Four departmental review courses which must include ANTHRO 301, History of Anthropological Theory, and ANTHRO 300, Reading Theory through Ethnography. Students must also take ANTHRO 306, Anthropological Research Methods.
3. *Ecology and Environment Track*—Four departmental review courses which must include ANTHRO 302, History and Theory in Evolution and Ecology (or comparable, approved 200 level course), plus ANTHRO 305, Research Methods in Ecological Anthropology (or comparable, approved 200 level course).

Recommended Courses—For all tracks, attendance at the departmental colloquium each quarter is recommended for all master's students. Students can enroll in ANTHRO 444, Anthropology Colloquium. For the Ecology and Environment track, students may also take ANTHRO 312G, Problems in Ecology, Evolution and Environment, for one quarter, in place of attendance at one quarter of the departmental colloquium.

DOCTOR OF PHILOSOPHY IN ANTHROPOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

The deadline for graduate application to the Ph.D. degree program is December 14, 2010. Prospective applicants should see http://anthropology.stanford.edu for information about application for graduate admission. Successful applicants for the Ph.D. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically, submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level, and provide a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for applicants to provide a detailed description of the area of specialization as well as the topical interests for dissertation research. Applicants should also submit three letters of reference and recent, original transcripts.

FINANCIAL SUPPORT

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid http://www.stanford.edu/dept/finaid/grad/apply/grad_loans/form.html if they wish to be considered for funding support.

First-year students who have not obtained a higher degree previous to entering the Ph.D. degree program and who have not obtained extramural funding previous to entering the Ph.D. degree program are required to submit one extramural funding application by the first day of finals week in the Autumn Quarter of the first year.

Second-year students are required to perform one teaching assistantship quarter. Second-year students who have not secured funding for the second year summer for pre-dissertation field research are advised to make at least two pre-dissertation field research or area/language studies funding applications for summer funding support in the second year.

In order to be eligible for department funding for summer field research (usually taken in either the first year and again in the third year of the Ph.D. degree program), first-year students must submit the department's Graduate Research Proposal application establishing eligibility for summer funding.

Third-year students who have not secured fourth-year field research funding are required to make at least three extramural funding applications to support dissertation research by the end of Autumn Quarter of the third year. If receiving department funding, fourth-year students must submit a department application for funding as a predoctoral research affiliate before leaving for field work and must make quarterly reports on their degree progress to their dissertation reading committee as well as a fourth-year doctoral program report of degree progress to maintain their eligibility to receive funds.

Fifth-year students are required to perform at least one quarter of teaching assistantship. Depending upon department need, fifth-year students may be asked to serve a second quarter of teaching assistantship. Fifth-year students who have not secured extramural funding for the sixth year are required to make at least two dissertation write-up funding applications to secure extramural or intramural funding for dissertation write-up in order to be eligible for consideration of a department teaching affiliateship in the sixth year.

PROGRAM

The Ph.D. program allows the student to develop a flexible program reflecting special research interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years.

Ph.D. students in Anthropology must complete a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.

Degree Options—Students may pursue three different tracks in the Anthropology Ph.D. degree program. The tracks are not declarable in Axess; they do not appear on the transcript or the diploma. The three tracks are:

- Archaeology
- Culture and Society
- Ecology and Environment.

DEGREE REQUIREMENTS

For students who matriculate beginning 2010-11, the requirements for the doctoral degree program include the following:

1. For the first year in the degree program, students must submit a plan of study detailing the autumn quarter courses, signed by their faculty adviser, prior to the Autumn Quarter course enrollment deadline. At this time students confirm their chosen track from Archaeology, Culture and Society, or Ecology and Environment.
2. Within the first two years, pass with a grade of 'B+' or higher six graduate level ANTHRO subject code review courses appropriate to the student's chosen track.
3. In the first year of the program:
   a. pass with a grade of 'B+' or higher the theory course(s) appropriate for the chosen track:
      1. *Archaeology track*—ANTHRO 303, Introduction to Archaeological Theory
      2. *Culture and Society track*—ANTHRO 300, Reading Theory Through Ethnography, and ANTHRO 301, History of Anthropological Theory
      3. *Ecology and Environment track*—ANTHRO 302, History and Theory in Evolution and Ecology, or comparable, approved course at the ANTHRO 200 level.
   b. pass with a grade of 'B+' or higher at least one track-designated methods course:
      1. *Archaeology track*—ANTHRO 307, Archaeological Methods and Research Design
      2. *Culture and Society track*—ANTHRO 306, Anthropological Research Methods
      3. *Ecology and Environment track*—within the first year, pass at least one of two required methods courses:
   a. ANTHRO 304, Data Analysis for Quantitative Research
   b. ANTHRO 305, Research Methods in Ecological Anthropology
   c. *or* comparable, approved courses at the ANTHRO 200 level.
   c. complete at least 55 units overall (including 45 units of course work) by the end of Summer Quarter in the first year.
   d. satisfy the department ethics requirement for review of ethics in Anthropology by enrolling in a research methods course or by attending a specific meeting for the purpose of ethics review.
   e. enroll in ANTHRO 310G, Introduction to Graduate Studies in Anthropology, during Autumn Quarter.
   f. *Culture and Society track students only* enroll in ANTHRO 311G, Introduction to Culture and Society Graduate Studies in Anthropology, during Winter and Spring quarters for 1-2 units (no more than 5 units total over two quarters).
   g. enroll in ANTHRO 444, Anthropology Colloquium, and attend the departmental colloquia series each quarter.
   h. submit a Graduate Research Proposal to the adviser and the graduate committee on or before May 15 in Spring Quarter of the first year. Receive approval for the proposal from the adviser and the graduate committee by the first day of finals week in Spring quarter of the first year.
   i. submit at least one extramural funding application within the first year.
   j. complete the appropriate CITI tutorial and submit a non-medical human subjects protocol, based on the pre-dissertation research proposal, to the Institutional Review Board before departing for summer field research in the first year.
   k. complete the appropriate CITI tutorial for Responsible Conduct of Research on or by May 15 in Spring Quarter.
4. In the second year:
   a. as required by the chosen track, pass with a grade of 'B+' or higher: ANTHRO 308, Proposal Writing Seminar (offered Spring Quarter). For all tracks, submit the dissertation proposal to the adviser and the graduate committee by the first day of finals week in Spring quarter of the second year. Receive approval for the proposal from the adviser and the graduate committee on or by the first day of the following Summer Quarter.
   b. complete at least 40 units of course work in the second year for a total of at least 85 units of course work (95 units overall) by the end of the second year.
   c. pass with grade of 'B+' or better remaining ANTHRO subject code review courses to complete the six course requirement.
   d. *Ecology and Environment students track only*—pass the second of two required methods courses, if both were not completed in the first year:
      1. ANTHRO 304, Data Analysis for Quantitative Research
      2. ANTHRO 305, Research Methods in Ecological Anthropology
      3. *or* comparable, approved courses at the ANTHRO 200 level.
   e. at the beginning of Autumn Quarter in the second year, attend the teaching assistantship training workshop.
   f. serve as a teaching assistant for at least one quarter in the second year.

g. submit a second-year doctoral program report of degree progress on or by May 15 in Spring Quarter of the second year. Receive approval from the adviser and the graduate committee by the first day of finals week in Spring Quarter of the second year.
h. For those whose language is English, either pass a foreign language exam or petition the department's language committee for exemption from a foreign research or field language examination, based on a description of previous field or research training.
For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by completion of the first two years of graduate study.
i. Upon completion of the above requirements, and upon recommendation of the Anthropology faculty, petition the University for candidacy by the end of Spring Quarter of the second year.
j. Upon completion of the above requirements, and upon recommendation of the Anthropology faculty, request the Master's degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.

5. In the third year, complete the following:
a. by the end of finals week in Autumn Quarter in the third year, submit three dissertation research grant proposals, the grant application, and the approved non-medical human subjects protocol, to the faculty adviser.
b. by the first day of finals in the Autumn Quarter of the third year, provide a statement to the graduate committee declaring the proposed date planned for the oral examination and submit a declaration of the oral examination committee, inclusive of the external committee chair, the committee adviser, and the three committee members.
c. complete the qualifying examinations for topic and area (two separate exams to be scheduled approximately one week apart) by the last day of the second week in Spring Quarter of the third year.
d. by the last day of of the fourth week in Spring Quarter of the third year, complete the University oral examination. During this exam, file the dissertation reading committee form and confirm the committee's required revisions for the dissertation proposal to begin fieldwork and dissertation research.
e. confirm approval for the revised dissertation proposal; confirm approval of non-medical human subjects protocol status; and obtain approval if necessary before leaving for dissertation fieldwork.

6. In the fourth year, complete the following requirements:
a. submit a fourth-year Doctoral Program Report of degree progress on or by May 15 in the Spring Quarter of the fourth year.

7. In the fifth year, complete the following requirements:
a. during the fifth year and after returning from field work, complete one or more teaching assistant quarters in the department.
b. during Autumn, Winter, Spring quarters in the fifth year, students attend a minimum of four of five class meetings of ANTHRO 400, Dissertation Writers Seminar (required of Culture and Society track, recommended for students in both the Archaeology and the Ecology and Environment tracks). Each quarter, chapter drafts of the dissertations must be handed in to the dissertation reading committed for review. Eligibility for department support is based on seminar attendance as well as on San Francisco Bay Area residency (the Bay Area is defined as Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, or Sonoma counties).
c. after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation is to be submitted for the Ph.D. degree, students may schedule and deliver an oral presentation of the dissertation in the department.

REQUIRED COURSES

1. *Archaeology Track*—Required courses include the following:
ANTHRO 310G. Introduction to Graduate Studies in Anthropology
ANTHRO 311G. Introduction to Culture and Society Studies in Anthropology (recommended)
ANTHRO 303. Introduction to Archaeological Theory
ANTHRO 307. Archaeological Methods and Research Design
ANTHRO 308. Proposal Writing Seminar (recommended)
ANTHRO 444. Anthropology Colloquium
2. *Culture and Society Track*—Required courses include the following:
ANTHRO 310G. Introduction to Graduate Studies in Anthropology
ANTHRO 311G. Introduction to Culture and Society Studies in Anthropology
ANTHRO 301. History of Anthropological Theory
ANTHRO 300. Reading Theory through Ethnography
ANTHRO 306. Anthropological Research Methods
ANTHRO 308. Proposal Writing Seminar
ANTHRO 444. Anthropology Colloquium
3. *Ecology and Environment Track*—Required courses include the following:
ANTHRO 310G. Introduction to Graduate Studies in Anthropology
ANTHRO 302. History and Theory in Evolution and Ecology (or comparable, approved ANTHRO 200 level course)
ANTHRO 304. Data Analysis in the Anthropological Sciences (or comparable, approved ANTHRO 200 level course)
ANTHRO 305. Research Methods in Ecological Anthropology (or comparable, approved ANTHRO 200 level course)
ANTHRO 444. Anthropology Colloquium

PH.D. MINOR IN ANTHROPOLOGY

Prospective applicants should see http://anthropology.stanford.edu for further information about the application process and the department's requirements for the Ph.D. Minor in Anthropology. The requirements for a Ph.D. minor in Anthropology include the following:

1. Complete 30 units of ANTHRO subject code courses at the 300 level with a grade of 3.0 ('B') or higher. Course work for a minor cannot also be used to meet requirements for a master's degree.
2. Enlist a faculty member within the Department of Anthropology who will provide written consent to serve as the adviser for the minor and serve on the student's oral examination and dissertation.
3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. degree program.
4. Pass with a grade of 'B+' or higher three ANTHRO theory courses, and one ANTHRO course in a geographical or theoretical area.

OVERSEAS STUDIES COURSES IN ANTHROPOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

SANTIAGO

OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom

SPRING QUARTER

CAPE TOWN

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington

KYOTO

OSPKYOTO 47. Introduction to Japanese Anthropology. 5 units, Miyako Inoue

OSPKYOTO 48. City and Sounds in Kyoto. 5 units, Miyako Inoue

APPLIED PHYSICS

Emeriti: (Professors) Malcolm R. Beasley, Arthur Bienenstock, Steven Chu, Alexander L. Fetter, Theodore H. Geballe, Stephen E. Harris, Walter A. Harrison, Peter A. Sturrock; (*Professors, Research*) Calvin F. Quate, Helmut Wiedemann, Herman Winick; (*Courtesy*) Gordon S. Kino

Chair: Hideo Mabuchi

Professors: Steven M. Block, Philip H. Bucksbaum, Robert L. Byer, Sebastian Doniach, Martin M. Fejer, Daniel S. Fisher, Harold Y. Hwang, Aharon Kapitulnik, Mark A. Kasevich, Hideo Mabuchi, Vahé Petrosian, Zhi-Xun Shen, Yoshihisa Yamamoto

Associate Professors: Ian R. Fisher, Kathryn A. Moler, David A. Reis, Mark J. Schnitzer

Professor (Research): Michel J-F. Digonnet

Lecturer: Tobias Beetz

Visiting Professor: Assa Auerbach

Courtesy Professors: Bruce M. Clemens, James S. Harris, Lambertus Hesselink, David A. B. Miller, W. E. Moerner, Douglas D. Osheroff, Stephen R. Quake, Shoucheng Zhang

Consulting Professors: Thomas M. Baer, Raymond G. Beausoleil, Richard G. Brewer, John D. Fox, Bernardo A. Huberman, John R. Kirtley, Richard M. Martin, Stuart S. P. Parkin, Daniel Rugar

Department Office: 348 Via Pueblo Mall - Applied Physics Room 116

Mail Code: 94305-4090

Phone: (650) 723-4027

Web Site: http://appliedphysics.stanford.edu

Courses offered by the Department of Applied Physics are listed under the subject code APPPHYS on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Applied Physics offers qualified students with backgrounds in physics or engineering the opportunity to do graduate course work and research in the physics relevant to technical applications and natural phenomena. These areas include accelerator physics, biophysics, condensed matter physics, nanostructured materials, quantum electronics and photonics, quantum optics and quantum information, space science and astrophysics, synchrotron radiation and applications. Student research is supervised by the faculty members listed above and also by various members of other departments such as Biology, Chemistry, Electrical Engineering, Materials Science and Engineering, Physics, the SLAC National Accelerator Laboratory, and faculty of the Medical School who are engaged in related research fields. Research activities are carried out in laboratories including the Geballe Laboratory for Advanced Materials, the Edward L. Ginzton Laboratory, the Hansen Experimental Physics Laboratory, the SLAC National Accelerator Laboratory, the Center for Probing the Nanoscale, and the Stanford Institute for Materials and Energy Science.

The number of graduate students admitted to Applied Physics is limited. Applications should be received by January 4, 2011. Graduate students normally enter the department only in Autumn Quarter.

GRADUATE PROGRAMS IN APPLIED PHYSICS

Admission requirements for graduate work in Applied Physics include a bachelor's degree in Physics or an equivalent engineering degree. Students entering the program from an engineering curriculum should expect to spend at least an additional quarter of study acquiring the background to meet the requirements for advanced degrees in Applied Physics.

MASTER OF SCIENCE IN APPLIED PHYSICS

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. The minimum requirements for the degree are 45 units, of which at least 39 units must be graduate-level courses in applied physics, engineering, mathematics, and physics. The required program consists of the following:

1. Courses in Physics and Mathematics to overcome deficiencies, if any, in undergraduate preparation.
2. Basic graduate courses (letter grade required):
   a. *Advanced Mechanics*—one quarter, 3 units: PHYSICS 210, *or* approved substitute 211
   b. *Electrodynamics*—two quarters, 6 units: PHYSICS 220, 221
   c. *Quantum Mechanics*—two quarters, 6 units: PHYSICS 230, 231, *or* approved substitutes 232, 330, 331, 332, 370
3. 30 units of additional advanced courses in science and/or engineering. 15 of the 30 units may be any combination of advanced courses, Directed Study (APPPHYS 290), and 1-unit seminar courses, to complete the requirement of 45 units. Examples of suitable courses include BIO 217; EE 222, 223, 231, 232, 248, 268, 346; PHYSICS 372, 373. At least 15 of these 30 units must be taken for a letter grade.
4. A final overall grade point average (GPA) of 3.0 (B) is required for courses used to fulfill degree requirements.

There are no department or University examinations, and a thesis is not required. If a student is admitted to the M.S. program only, but later wishes to change to the Ph.D. program, the student must apply to the department's admissions committee.

DOCTOR OF PHILOSOPHY IN APPLIED PHYSICS

The University's basic requirements for the Ph.D. including residency, dissertation, and examinations are discussed in the "Graduate Degrees" section of this bulletin. The program leading to a Ph.D. in Applied Physics consists of course work, research, qualifying for Ph.D. candidacy, a research progress report, a University oral examination, and a dissertation as follows:

1. Course Work:
   a. Courses in Physics and Mathematics to overcome deficiencies, if any, in undergraduate preparation.
   b. Basic graduate courses* (letter grades required):
      1. *Advanced Mechanics*—one quarter: PHYSICS 210, *or* approved substitute 211
      1. *Statistical Physics*—one quarter: PHYSICS 212
      2. *Electrodynamics*—two quarters: PHYSICS 220, 221
      3. *Quantum Mechanics*—two quarters: PHYSICS 230, 231, *or* approved substitutes 232, 330, 331, 332, 370
      4. *Laboratory*—one quarter: APPPHYS 207, 208, 232, 304, 305; EE 234, 410; MATSCI 171, 172, 173; PHYSICS 301.
   c. 18 units of additional advanced courses in science and/or engineering, not including Directed Study (APPPHYS 290), Dissertation Research (APPPHYS 390), and 1-unit seminar courses. Examples of suitable courses include BIO 217; EE 222, 223, 231, 232, 248, 268, 346; PHYSICS 372, 373. Only 3 units at the 300 or above level may be taken on a satisfactory/no credit basis.

   d. 96 units of additional courses to meet the minimum residency requirement of 135. Directed study and research units as well as 1-unit seminar courses can be included.
   e. A final average overall grade point average (GPA) of 3.0 (B) is required for courses used to fulfill degree requirements.
   f. Students are normally expected to complete the specified course requirements by the end of their third year of graduate study.
2. *Research:* may be conducted in a science/engineering field under the supervision of a member of the Applied Physics faculty or appropriate faculty from other departments.
3. *Ph.D. Candidacy:* satisfactory progress in academic and research work, together with passing the Ph.D. candidacy qualifying examination, qualifies the student to apply for Ph.D. candidacy, and must be completed before the third year of graduate registration. The examination consists of a seminar on a suitable subject delivered by the student before the faculty academic adviser (or an approved substitute) and two other members of the faculty selected by the department.
4. *Research Progress Report:* normally before the end of the Winter Quarter of the fourth year of enrollment in graduate study at Stanford, the student arranges to give an oral research progress report of approximately 45 minutes, of which a minimum of 15 minutes should be devoted to questions from the Ph.D. reading committee.
5. *University Ph.D. Oral Examination*: consists of a public seminar in defense of the dissertation, followed by private questioning of the candidate by the University examining committee.
6. *Dissertation:* must be approved and signed by the Ph.D. reading committee.

* Requirements for item '1b' may be totally or partly satisfied with equivalent courses taken elsewhere, pending the approval of the graduate study committee.

ARCHAEOLOGY

Director: Lynn Meskell (Anthropology)
Professors: Ian Hodder (Anthropology), Richard Klein (Anthropology), Mark Lewis (History, Asian Languages), Li Liu (East Asian Languages and Cultures), Mike Moldowan (Geological and Environmental Sciences), Gail Mahood (Geological and Environmental Sciences), Ian Morris (Classics, History), Amos Nur (Geophysics), Michael Shanks (Classics), Peter Vitousek (Biology)
Associate Professors: Rebecca Bird (Anthropology), Jody Maxmin (Art and Art History, Classics), John Rick (Anthropology), Jennifer Trimble (Classics), Barb Voss (Anthropology)
Assistant Professors: Doug Bird (Anthropology), Giovanna Ceserani (Classics), Ian Robertson (Anthropology), Michael Wilcox (Anthropology)
Lecturers: Nigel Crook, James Truncer
Post Doctoral Fellows: Melissa Chatfield
Teaching Affiliates: Ignacio Cancino, Joshua Samuels, Bryn Williams
Associated Staff: Laura Jones (Campus Archaeologist), Lisa Newble (Collections Manager), Tom Seligman (Cantor Arts Center)
Fellow: Bill Rathje (on leave)
Program Offices: Building 500
Mail Code: 94305-2170
Program Phone: (650) 723-5731
Web Site: http://archaeology.stanford.edu

Courses offered by the Archaeology Program are listed under the subject code ARCHLGY on the *Stanford Bulletin's* ExploreCourses web site.

Archaeology is the study of the past through its material remains that survive into the present. Archaeology is a discipline that offers direct access to the experiences of a wide range of people in numerous cultures across the globe. Increasingly, archaeology bridges past and present societies through the study of the human heritage and its role in contemporary societies. Stanford's Archaeology Program provides students with an interdisciplinary approach to the material remains of past societies, drawing in equal parts on the humanities, social sciences, and natural sciences.

The Archaeology curriculum draws on faculty from a wide range of University departments and schools. To complete the requirements for the major, students must take courses from the offerings of the program and from the listings of other University departments. The program culminates in a B.A. in Archaeology.

MISSION OF THE UNDERGRADUATE PROGRAM IN ARCHAEOLOGY

The mission of the undergraduate program in Archaeology is to provide students with a broad and rigorous introduction to the analysis of the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences. Students in the major learn to relate these analyses to the practice of archaeology in the contemporary world. The program seeks to help each student achieve a high level of understanding through concentrated study of a particular research area. Courses in the major complete a comprehensive curriculum that draws on faculty from a wide range of University departments and programs. Archaeology majors are well prepared for advanced training in professional schools such as education, law, and journalism and, depending upon their choice of upper-division course, graduate programs in the humanities, social sciences, and natural sciences.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.
2. an ability to relate this analysis and understanding to the practice of archaeology in the contemporary world.
3. a high level of understanding in a particular research area.

BACHELOR OF ARTS IN ARCHAEOLOGY

To declare a major in Archaeology, students should contact the student services specialist at (650) 721-1361, who provides an application form, answers initial questions, and helps the student choose a faculty adviser and area of concentration. All majors must complete 65 units, which must form a coherent program of study and be approved by the student's faculty adviser and the program director.

Students who plan to pursue graduate work in Archaeology should be aware of the admission requirements of the particular departments to which they intend to apply. These vary greatly. Early planning is advisable to guarantee completion of major and graduate school requirements.

REQUIREMENTS

The B.A. in Archaeology requires a minimum of 65 units in the major, divided among five components:

1. *Core Courses (20 units)—*
   a. Gateway: ARCHLGY 1, Introduction to Prehistoric Archaeology (5 units)
   b. Intermediate: ARCHLGY 102, Archaeological Methods and Research Design (5 units)
   c. Intermediate: ARCHLGY 103, History of Archaeological Thought (5 units; Writing in the Major)
   d. Capstone: ARCHLGY 107A, Archaeology as a Profession (5 units)

   ARCHLGY 1 is recommended as a first course, and many upper-level courses in Archaeology require this course as a

prerequisite. Students should normally take the capstone course in their final year of course work in the major.

2. *Analytical Methods and Computing* (at least 3-5 units)—Quantitative skills and computing ability are indispensable to archaeologists. It is recommended that students take ANTHRO 98B, General Methods in Archaeology. Other courses that may be used to satisfy this requirement are PSYCH 10/STATS 60, ECON 102A, and EESS 161.
3. *Archaeological Skills (at least 10 units)*—Archaeological skills include archaeological formation processes, botanical analysis, cartography, ceramic analysis, dating methods, faunal analysis, geographic information systems, geology, geophysics, genetics, osteology, remote sensing, soil chemistry, and statistics. With the approval of the instructor and Archaeology director, undergraduates may fulfill part of this requirement from graduate-level courses (typically courses with catalog numbers of 200 or higher).
   - ARCHLGY 106. Museums and Collections, 5 units
   - ARCHLGY 112. Roman Archaeology and Heritage, 5 units
   - ARCHLGY 125. Archaeological Survey Methods, 5 units
   - ANTHRO 91A. Archaeological Methods and Research Design, 5 units
   - ANTHRO 98B. Digital Methods in Archaeology, 5 units
   - ANTHRO 113. Faunal Analysis, 5 units
   - ANTHRO 115. Introduction to Archaeological Geophysical Prospection, 5 units
   - ANTHRO 214. Prehistoric Stone Tools, 5 units
   - CLASSART 114. Ceramics: Art and Science, 5 units
   - GES 1A. Fundamentals of Geology, 5 units
   - GES 49N. Field Trip to Death Valley and Owens Valley, 5 units
   - GES 102. Earth Materials, 5 units
   - EESS 164. Fundamentals of Geographic Information Science, 5 units
   - EESS 161. Statistical Methods for Earth and Environmental Sciences, 5 units
4. *Theory* (at least 10 units)—Topics include archaeological, art-historical, sociocultural, historical, and material culture theory. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses (typically courses with catalog numbers of 200 or higher).
   - ARCHLGY 137. Ethnographic Archaeologies
   - ANTHRO 135H. Race, Gender and Class at Stanford, 5 units
   - ANTHRO 90B. Theory of Social and Cultural Anthropology, 5 units
   - CLASS ART 113. Ten Things: An Archaeology of Design, 5 units
   - ANTHRO 103. The Archaeology of Modern Urbanism, 5 units
   - ANTHRO 134. Object Lessons, 5 units
   - ANTHRO 121. Language and Prehistory, 5 units
1. *Area of Concentration (at least 20 units)*—In consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses should be chosen from the list below. Courses other than those on this list can be used to fulfill this requirement with the prior approval of the student's faculty adviser and the program director. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses, typically courses numbered 200 or higher. However, each course may only count toward one component of the program. Students are encouraged to design their own area of concentration, with the prior approval of the student's faculty adviser and the program director.
   a. Small Scale Societies—
      - ANTHRO 16. Native Americans in the 21st Century, 5 units
      - ANTHRO 22. Archaeology of North America, 5 units
   b. *Archaeology of Complex Societies*—
      - ARCHLGY 111. Emergence of Chinese Civilizations from Caves to Palaces, 5 units
      - ARCHLGY 112. Roman Archaeology and Heritage, 5 units
      - ARCHLGY 201. Art & Archaeology of Korea
      - ANTHRO 100C. Chavin de Huantar Research Seminar, 5 units
      - ANTHRO 106. Incas and Their Ancestors, 5 units
      - ARTHIST 203. Greek Art In and Out of Context, 5 units
      - ARTHIST 204A. Appropriations of Greek Art, 5 units
      - CLASSART 21Q. Eight Great Archaeological Sites in Europe, 5 units
      - CLASSART 101. Archaic Greek Art , 5 units
      - CLASSART 112. Ancient Urbanism, 5 units
      - CLASSGEN 123. Urban Sustainability: Long Term Archaeological Perspectives, 5 units
      - CLASSHIST 135A. Ancient War, 5 units
   c. *Mediterranean Archaeology*—
      - ARTHIST 203. Greek Art In and Out of Context, 5 units
      - ARTHIST 204A. Appropriations of Greek Art, 5 units
      - CLASSART 101. Archaic Greek Art, 5 units
      - CLASSART 142. The Archaeology of Roman Slavery, 5 units
   d. *New World Archaeologyy*—
      - ANTHRO 200C. Chavin de Huantar Research Seminar, 5 units
      - ANTHRO 16. Native Americans in the 21st Century, 5 units
      - ANTHRO 106. Incas and Their Ancestors, 5 units
      - ANTHRO 22. Archaeology of North America, 5 units
   e. *Heritage*-
      - ANTHRO 134. Object Lessons
      - ANTHRO 16. Native American's in the 21st Century
      - ARCHLGY 112. Roman Archaeology and Heritage
   f. *Urbanism & Cities*-
      - ANTHRO 100A. India's Forgotten Empire
      - ANTHRO 205. Ancient Cities in the New World
      - CLASSART 21Q. Eight Great Archaeological Sites
      - CLASSSGEN 123. Urban Sustainability
2. *Archaeological Fieldwork*—Students may meet this requirement in two ways:
   a. Taking part in a month-long field project directed by a Stanford faculty member, and taking a directed reading during the returning academic year for credit. In 2010, field projects were underway in Peru, New Mexico, England, Jordan, and Turkey.
   b. Completing a field school offered by another institution. Such field schools must be approved in advance by the student's undergraduate adviser and by the director of the Archaeology Center.
3. *Collateral Language Requirement*—All Archaeology majors must demonstrate competence in a foreign language beyond the first-year level. Students can meet this requirement by completing a course beyond the first-year level with a grade of 'B' or better, and are encouraged to choose a language that has relevance to their archaeological region or topic of interest. Students may petition to take an introductory-level course in a second language to fulfill this requirement by demonstrating the connection between the language(s) and their research interest(s).

HONORS PROGRAM

The honors program in Archaeology gives qualified majors the chance to work closely with faculty on an individual research pro-

ject culminating in an honors thesis. Students may begin honors research from a number of starting points, including topics introduced in the core or upper-division courses, independent interests, research on artifacts in Stanford's collections, or fieldwork experiences.

Interested Archaeology majors of junior standing may apply for admission by submitting an honors application form, including a 4-5 page statement of the project, a transcript, and a letter of recommendation from the faculty member supervising the honors thesis to the student services specialist, no later than the end of the fourth week of the Spring Quarter. Archaeology majors are eligible to apply for honors candidacy. The thesis is due in early May of the senior year and is read by the candidates advisor and a second reader appointed ny the undergraduate committee.

COGNATE COURSES

Students are advised to meet with their adviser about degree requirements and the applicability of these courses to a major or minor program.

ANTHRO 1. Introduction to Cultural and Social Anthropology
ANTHRO 3. Introduction to Prehistoric Archaeology
ANTHRO 4. Language and Culture
ANTHRO 15. Sex and Gender
ANTHRO 22. Archaeology of North America
ANTHRO 22N. Ethnographies of North America
ANTHRO 90C. Introduction to Theory in Ecological and Environmental Anthropology
ANTHRO 98B. Digital Methods in Archaeology
ANTHRO 100A. India's Forgotten Empire: The Rise and Fall of Indus Civilization
ANTHRO 100C. Chavin de Huantar Research Seminar
ANTHRO 102A. Ancient Civilizations: Complexity and Collapse
ANTHRO 103. Archaeology of Modern Urbanism
ANTHRO 106. Incas and Their Ancestors
ANTHRO 113. Faunal Analysis
ANTHRO 115A. Environmental Crisis and State Collapse
ANTHRO 116. Quantitative Analysis in Archaeological and Anthropological Research
ANTHRO 118. Heritage, Environment and Sovereignty in Hawaii
ANTHRO 134. Object Lessons
ANTHRO 135H. CSRE House Seminar: Race, Gender, and Class at Stanford
ARTHIST 101. Archaic Greek Art (same as CLASSART 101)
ARTHIST 203. Greek Art in and out of Context (same as CLASSART 109)
ARTHIST 204A. Appropriations of Greek Art (same as CLASSART 110)
CLASSART 21Q. Eight Great Archaeological Sites in Europe
CLASSART 42. Pompeii
CLASSART 112. Ancient Urbanism
CLASSART 113. Ten Things: Science, Technology, and Design (same as STS 112)
CLASSART 114. Ceramics: Art and Science
CLASSART 142. The Archaeology of Roman Slavery
CLASSGEN 119. Gender and Power in Ancient Rome
CLASSGEN 123. Urban Sustainability: Long-Term Archaeological Perspectives
CLASSHIST 235B. Ancient War
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
EESS 160. Statistical Methods for Earth and Environmental Sciences: General Introduction
EESS 164. Fundamentals of Geographic Information Science (GIS) (same as EARTHSYS 144)
EE 140. The Earth From Space: Introduction to Remote Sensing (same as GEOPHYS 140)
GEOPHYS 190. Introduction to Geophysical Field Methods
GES 1. Dynamic Earth: Fundamentals of Earth Science
GES 49N. Field Trip to Death Valley and Owens Valley
GES 102. Earth Materials
STATS 60. Introduction to Statistical Methods: Precalculus (same as PSYCH 10)
URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives

MINOR IN ARCHAEOLOGY

A minor in Archaeology provides an introduction to the study of the material cultures of past societies. It can complement many majors, including but not limited to Anthropology, Applied Physics, Art and Art History, Classics, Earth Systems, Geological and Environmental Sciences, History, and Religious Studies.

Students must complete the declaration process, including the planning form submission and Axess registration, by the last day of the quarter, two quarters prior to degree conferral; for example, by the last day of Autumn Quarter if Spring graduation is the intended quarter of graduation.

To minor in Archaeology, the student must complete at least 27 units of relevant course work, including:

1. *Core Program (10 units)*—
   a. Gateway Course: ARCHLGY 1. Introduction to Prehistoric Archaeology (5 units)
   b. Capstone Course: ARCHLGY 103. History of Archaeological Thought (5 units)

   ARCHLGY 1 is recommended as a first course, and many of the upper-level courses in Archaeology require this course as a prerequisite. Students should normally take the capstone course in their final year of course work in the minor.
2. *Archaeological Skills* (2-5 units)—
   Archaeological skills include dating methods, faunal analysis, botanical analysis, ceramic analysis, geology, geophysics, soil chemistry, remote sensing, osteology, genetics, statistics, cartography, and geographic information systems. The course(s) must be chosen from the list of courses under Archaeological Skills (requirement 3) in the "Bachelor of Arts in Archaeology" section of this bulletin.
3. *Theory (5 units)*—
   Topics include archaeological, art historical, sociocultural, historical, and material culture theory. The course(s) must be chosen from the list of courses under Theory (requirement 4) in the "Bachelor of Arts in Archaeology" section of this bulletin.
4. *Area of Concentration* (10 units)—
   In consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area.
   Courses must be chosen from the lists of courses under Area of Concentration (requirement 5) in the "Bachelor of Arts in Archaeology" section of this bulletin. Students are encouraged to design their own area of concentration, with the prior approval of both the student's faculty adviser and the program director.

OVERSEAS STUDIES COURSES IN ARCHAEOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

OSPAUSTL 40. Australian Studies. 3 units, Bill Casey, Ian Lilley, GER:DB:SocSci, EC:GlobalCom

WINTER QUARTER

CAPETOWN

OSPCPTWN 65. Western Cape Sites of Memory. 3-5 units, Grant Parker, GER:EC:GlobalCom

SPRING QUARTER

CAPETOWN

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 5 units, John Parkington

ART AND ART HISTORY

Emeriti: (Professors) Keith Boyle, Kristina Branch, Wanda M. Corn, Elliot Eisner, David Hannah, Matthew S. Kahn, Suzanne Lewis, Frank Lobdell, Dwight C. Miller, Nathan Oliveira, Richard Randell, Michael Sullivan, Paul V. Turner

Chair: Nancy Troy

Area Director for Art History: Nancy Troy

Area Director for Film and Media Studies: Kristine Samuelson

Area Director for Art Practice: Joel Leivick

Director of Undergraduate Studies in Art History: Jody Maxmin

Director of Undergraduate Studies in Art Practice: Terry Berlier

Director of Undergraduate Studies in Film and Media Studies: Scott Bukatman

Director of Graduate Studies in Art History: Bissera Pencheva

Director of Graduate Studies in Art Practice: Paul DeMarinis

Director of Graduate Studies in Documentary Film: Jan Krawitz

Professors: Enrique Chagoya (Painting/Drawing/Printmaking), Paul DeMarinis (Electronic Media), Jan Krawitz (Documentary Film), Pamela M. Lee (Contemporary Art, on leave), Michael Marrinan (18th- and 19th-century European Art, on leave Winter, Spring), Kristine Samuelson (Documentary Film), Melinda Takeuchi (Japanese Art), Richard Vinograd (Chinese Art), Bryan Wolf (American Art), Xiaoze Xie (Painting/Drawing)

Associate Professors: Scott Bukatman (Film Studies), Jody Maxmin (Ancient Art), Bissera Pentcheva (Medieval Art), Gail Wight (Electronic Media)

Assistant Professors: Terry Berlier (Sculpture), Morten Steen Hansen (Renaissance Art), Pavle Levi (Film Studies), Jean Ma (Film Studies, on leave), Barbaro Martinez-Ruiz (African Art), Jamie Meltzer (Documentary Film)

Professor (Teaching): Joel Leivick (Photography)

Lecturers: Kevin Bean (Drawing/Painting), Robert Dawson (Photography), John Edmark (Design), Brendan Fay (History of Photography), Lukas Felzmann (Photography), Julie Russo (Media Studies), Adam Tobin (Screenwriting)

Affiliated Professor: John H. Merryman (Law, emeritus)

Department Offices: Room 101, Cummings Art Building

Mail Code: 94305-2018

Phone: (650) 723-3404

Web Site: http://art.stanford.edu

Courses offered by the Department of Art & Art History are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes ARTHIST (Art History), ARTSTUDI (Art Practice), FILMSTUD (Film Studies), and FILMPROD (Film Practice).

MISSION OF THE DEPARTMENT OF ART AND ART HISTORY

The department offers courses of study in: (1) the history of art, (2) the practice of art (studio), and (3) film and media studies, leading to the following degrees: B.A. degree in Art History; B.A. degree in Art Practice; B.A. degree in Film and Media Studies; M.F.A. degree in Art Practice; M.F.A. degree in Design; M.F.A. degree in Documentary Film and Video; Ph.D. degree in Art History.

The undergraduate program is designed to help students think critically about the visual arts and visual culture. Courses focus on the meaning of images and media, and their historical development, roles in society, and relationships to disciplines such as literature, music, and philosophy. Work performed in the classroom, studio, and screening room is designed to develop a student's powers of perception, capacity for visual analysis, and knowledge of technical processes.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. knowledge and awareness of art terminology and concepts.
2. ability to develop effective and nuanced lines of interpretation.
3. improved critical thinking skills using primary and secondary source materials.
4. improvement in analytical writing skills and close reading skills.
5. ability to form and validate their own and others' opinions through knowledge of artistic movements and sociohistorical events.

IRIS AND B. GERALD CANTOR CENTER FOR VISUAL ARTS

The Iris and B. Gerald Cantor Center for Visual Arts at Stanford University is a major resource for the department. The center offers a 22,000-object collection on view in rotating installations in 18 galleries, the Rodin Sculpture Garden, and special exhibitions, educational programs, and events. Through collaborations with the teaching program, student internships, and student activities, the Center provides a rich resource for Stanford students.

ART HISTORY

UNDERGRADUATE PROGRAMS IN ART HISTORY

The discipline of Art History teaches students how to analyze and interpret works of fine art (paintings, drawings, prints, and sculpture), photography and moving image media (film, video, television, and digital art), material culture (ritual objects, fashion, advertisements, and the decorative, applied, and industrial arts), and the built environment (architecture, urbanism, and design). The department takes it as axiomatic that the skills of visual literacy and analysis are not innate but may be acquired through training and practice. Objects of study are drawn from the cultures of Africa, Asia, the Americas, from the Middle East; from Western, Central, and Eastern Europe; and from antiquity to the present.

Art History is a historical discipline that seeks to reintegrate the work of art into the original context of its making and reception, foregrounding its significant status as both historical document and act of social communication. At the same time, Art History seeks to understand the ways in which the work of art transcends the historical moment of its production, taking on different meanings in later historical periods, including the present. As part of their visual training, students of Art History become proficient in cultural analysis and historical interpretation. Art History thus envisions itself as uniquely well positioned to train students from a variety of disciplines in the light of the dramatic visual turn that has gripped the humanities and the sciences over the course of the last decade, with more and more disciplines becoming vitally interested in visual forms and modes of communication.

GRADUATE PROGRAMS IN ART HISTORY

The doctoral program in Art History at Stanford is relatively small, and affords the graduate student the opportunity to work intensively with individual members of the faculty. The Doctor of Philosophy degree is taken in a particular field, supported by a background in the general history of art. Doctoral candidates also

undertake collateral studies in other graduate departments or in one of the University's interdisciplinary programs.

BACHELOR OF ARTS IN ART HISTORY

SUGGESTED PREPARATION FOR THE MAJOR

Students considering a major in art history should take ARTHIST 1, Introduction to the Visual Arts (WIM course), during their freshman or sophomore year.

FIELDS OF STUDY OR DEGREE OPTIONS

Students who wish to major in Art History declare the Art History major on Axess. Concentrations within the major are approved by the faculty adviser and are not declared on Axess. Sample concentrations include:

1. Topical concentrations: art and gender; art, politics, race, and ethnicity; art, science, and technology; urban studies
2. Genre concentrations: architecture; painting; sculpture; film studies; prints and media; decorative arts and material culture
3. Historical and national concentrations: ancient and medieval; Renaissance and early modern; modern and contemporary; America; Africa; Asia; the Americas
4. Interdisciplinary concentrations: art and literature; art and history; art and religion; art and economics; art and medicine (with adviser consent a maximum of two concentration courses may be taken outside the department).

DEGREE REQUIREMENTS

All undergraduate majors complete a minimum of 61 units (14 courses of 4-5 units each). Students are required to complete two foundation courses (including ARTHIST 1), five Art History distribution courses, five concentration courses, one studio course, and the junior seminar. Courses must be taken for a letter grade. To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

Required Courses—

1. Foundation Courses (10 units):
   a. ARTHIST 1. Introduction to the Visual Arts (WIM course)
   b. One other course from ARTHIST 2, ARTHIST 3, FILMSTUD 4
2. Distribution Courses (20 units): In order that students acquire a broad overview of different historical periods and different geographic regions, majors must take five Art History lecture courses, one from each of the following five categories:
   a. Ancient and medieval: ARTHIST 101, 102, 105, 106, 106A, 107, 108, 204A
   b. Renaissance and early modern: ARTHIST 111, 114, 116, 117, 118, 120, 121, 122, 124, 126, 132, 133
   c. Modern, contemporary, and the U.S.: ARTHIST 142, 145, 147, 149, 155, 158A, 159B, 162A, 173, 176, 182
   d. Asia, Africa, and the Americas: ARTHIST 182, 184, 185, 185B, 187, 188A, 190, 194, 196
   e. Film studies: FILMSTUD 100A, 100B, 100C, 101, 102, 111, 112, 113, 115, 116, 120B, 130, 131, 132, 137, 141, 150, 156, 167
3. Area of Concentration (22 units): The department encourages students to pursue their interests by designing an area of concentration tailored to their own intellectual concerns. This area of concentration provides the student with an in-depth understanding of a coherent topic in Art History. It must consist of five Art History courses: two must be seminars or colloquia; four of the five courses must be in a single field or concentration constructed by the student in consultation with their faculty adviser. Students must submit an area of concentration form, signed by their faculty adviser, during Winter Quarter of their junior year.
4. Capstone Seminar (5 units): ARTHIST 296, Junior Seminar: Methods and Historiography of Art History. This course is designed to introduce majors to methods and theories underlying the practice of Art History. The seminar is offered annually, typically during Autumn Quarter.
5. Studio Course (4 units): Majors are required to complete at least one introductory Studio Art course.

HONORS PROGRAM

The purpose of the honors thesis is to extend and deepen work done in an Art History class; the topic should have focus and clear parameters. Typically an honors thesis is not an exploration of a new area that the student has never studied before. The minimum requirement for admission to the honors program is an overall GPA of 3.7, and at least 3.7 in Art History courses. Students must complete at least five Art History courses at Stanford by the end of their junior year; four must be completed by the end of winter quarter. Students interested in the honors program should consult their potential adviser by the beginning of junior year. Thesis advisers must be in residence during fall quarter senior year, and it is highly recommended that they are in residence during the rest of senior year. Students wishing to write an honors thesis must announce their intention by submitting an intent form signed by their thesis adviser (who need not be the student's academic adviser) by February 1 of their junior year.

Candidates for the honors program must submit to the Art History faculty a five-page thesis proposal, including bibliography and illustrations, and one completed paper that demonstrates the student's ability to conceptualize and write about issues. The complete proposal must be submitted to the department's undergraduate coordinator no later than the third week of Spring Quarter of the candidate's junior year so it can be read, discussed, and voted upon at the faculty's regular meeting in early May. A candidate is accepted into the honors program by a simple majority.

Once admitted to the honors program, students work with their thesis advisers to define the scope of study, establish a research and writing timetable, and enlist one other faculty member to serve on the thesis reading committee. The summer between junior and senior years is usually devoted to refining the topic and pursuing any off-campus research. Students may apply for UAR research grants to help finance trips or expenses related to preparing the research for their honors thesis.

During their senior year, students must register for 10 units of ARTHIST 297, Honors Thesis Writing, 5 units of which may count towards the student's concentration in Art History. Students are required to register for two to five units each quarter during their senior year, for a total of ten units. To aid the process of research and writing, students preparing an honors thesis are paired with a graduate student mentor. Students must contact the graduate student mentor in their junior year as soon as they begin to think about writing an honors thesis. Through regular meetings, mentors guide students through the proposal process and the research and writing year.

Students and thesis advisers should plan their work so that a complete, final manuscript is in the hands of each member of the student's reading committee by the beginning of the seventh week of the student's final quarter at Stanford (one year from proposal to final manuscript). The thesis adviser assigns a letter grade; both faculty readers must approve the thesis for honors before the student is qualified to graduate with honors.

Required Courses—

- ARTHIST 297. Honors Thesis Writing

MINOR IN ART HISTORY

A student declaring a minor in Art History must complete 25 units of course work in one of the following four tracks: Open, Modern, Asian, or Architecture. Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student's departmental file. Only one class may be taken for credit outside of the Stanford campus;

this includes courses taken in the Overseas Studies Program. Minors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

Requirements—A student with a minor in Art History must complete six Art History courses for a total of 25 units.

1. *Open Track*—ARTHIST 1 plus five Art History lecture courses, colloquia, or seminars in any field.
2. *Modern Track*—ARTHIST 1 plus five Art History lecture courses, colloquia, or seminars in any aspect of 19th- to 20th-century art.
3. *Asian Track*—ARTHIST 2 plus five Art History lecture courses, colloquia, or seminars in Asian Art (ARTHIST 1 may be one of the five courses).
4. *Architecture Track*—ARTHIST 3 plus five Art History lecture courses, colloquia, or seminars in architectural history (ARTHIST 1 may be one of the five courses).

MASTER OF ARTS IN ART HISTORY

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

The department offers M.A. and Ph.D. degrees, although the M.A. is only granted as a step toward fulfilling requirements for the Ph.D. The department does not admit students who wish to work only toward the M.A. degree. Please see the Ph.D. section for admissions information.

DEGREE REQUIREMENTS

1. *Units*—completing a total of at least 45 units of graduate work at Stanford in the history of art in courses at the 200 level and above, including a seminar in art historiography/visual theory.
2. *Languages*—reading knowledge of two foreign languages, preferably German and French or Italian. Students in Chinese and Japanese art are ordinarily expected to demonstrate reading competence in modern and classical Chinese or Japanese, depending on the student's area of focus. Final determination is made in consultation with the student's primary adviser.
3. *Papers*—submission for consideration by the faculty two papers from among those written during the year.
4. *Area Coverage*—demonstration to the faculty, by course work and/or examination, that the student has adequate knowledge of the major areas of the history of art.

DOCTOR OF PHILOSOPHY IN ART HISTORY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. An expanded explanation of department requirements is given in the Art History Graduate Student Handbook.

ADMISSION

In addition to University requirements, the department requires a research paper of approximately 15-20 pages demonstrating the student's capacity to pursue independent investigation of an art historical problem as part of the application. All applicants must have been awarded a B.A., B.F.A., or B.S. from an accredited university.

DEGREE REQUIREMENTS

To be eligible for the doctoral degree, the student must complete a minimum of three years of full-time graduate work in Art History, at least two years of which must be in residence at Stanford. Doctoral students must complete a minimum of 135 units. Of these 135, the student must complete at least 100 units of graduate course work at the 200 level or above, including all required courses, with a minimum of 62 units in Art History lecture courses and seminars.

1. *Collateral Studies*—The student is required to take at least three courses in supporting fields of study (such as anthropology, classics, history, literature, or philosophy), determined in consultation with the department advisers. These courses are intended to strengthen the student's interdisciplinary study of art history.
2. *Graduate Student Teaching*—As a required part of their training, graduate students in Art History, regardless of their source of funding, must participate in the department's teaching program. At least one, one-quarter assignment in ARTHIST 1, 2, 3, or FILMSTUD 4 is required (with concurrent registration in ARTHIST 610, Seminar in Teaching Praxis for ARTHIST 1 only). Students receiving financial aid are required to serve as a teaching assistant for a minimum of four quarters. Further opportunities for teaching may be available.
3. *Admission to Candidacy*—A graduate student's progress is formally reviewed at the end of Spring Quarter of the second year. The applicant for candidacy must put together a candidacy file showing that he/she has completed the requirements governing the M.A. program in the History of Art (see above), and at least an additional 18-24 units by the end of Winter Quarter of the second year. The graduate student does not become a formal candidate for the Ph.D. degree until he/she has fully satisfied these requirements and has been accepted as a candidate by the department.
4. *Area Core Examination (ACE)*—All graduate students conceptualize an area core and bibliography in consultation with their primary adviser and two other Stanford faculty members, one of whom is drawn from a field other than Art History, or, if in Art History, has expertise outside of the student's main area of interdisciplinary concentration. Students are required to pass an area core examination, in either written or oral form, at some time in the third year of study. To prepare for the exam, students may enroll in up to three, 5-unit reading courses (ARTHIST 620), no more than one per quarter.
5. *Dissertation and Oral Defense Requirements*—
   a. Reading Committee—After passing the Area Core Examination (ACE), each student is responsible for the formation of a dissertation reading committee consisting of a principal adviser and three readers. Normally, at least two of the three readers are drawn from the department and one may come from outside the department.
   b. Dissertation Proposal—By the beginning of the fourth year, students should have defined a dissertation subject and written a proposal in consultation with their principal adviser. To prepare the proposal, students may take one 5-unit independent study course (ARTHIST 640) and apply for a funded Summer Quarter to research and write the proposal. The proposal is submitted to the Art History faculty at the beginning of the fourth year for comments. The student then meets with the adviser to discuss the proposal and faculty comments no later than 30 days after the submission of the proposal, at which time necessary revisions are determined.
   c. Dissertation—A member of the Art History faculty acts as the student's dissertation adviser and as chair of the reading committee. The final draft of the dissertation must be in all the readers' hands at least four weeks before the date of the oral defense. The dissertation must be completed within five years from the date of the student's admission to candidacy for the Ph.D. degree. A candidate taking more than five years must apply for an extension of candidacy.
   d. Oral Defense Examinations—Each student arranges an oral examination with the four members of the reading committee and a chair chosen from outside the department. The oral examination consists mainly of a defense of the dissertation but may range, at the committee's discretion, over a wider field. The student is required to discuss research methods and findings at some length and to answer all questions and criticisms put by members of the examining committee. At the end of the defense, the committee

votes to pass or fail the student on the defense. The committee also makes recommendations for changes in the dissertation manuscript before it is submitted to the University as the final requirement for the granting of the Ph.D. degree in the History of Art. After incorporating the changes, the manuscript is given a final review and approval by the student's principal adviser.

PH.D. MINOR IN ART HISTORY

For a minor in Art History, a candidate is required to complete 24 units of graduate-level Art History courses (200 level or above) in consultation with a department adviser.

PH.D. IN ART HISTORY AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Art History and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact Denise Winters at 650-724-1333 for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

ART PRACTICE (STUDIO)

UNDERGRADUATE PROGRAMS IN ART PRACTICE (STUDIO)

The Art Practice program offers production-based courses founded on the concepts, skills and cultural viewpoints that characterize contemporary art practice. The goal is to educate students, both majors and minors, in the craft, culture, and theory of current fine art practices to prepare them for successful careers as artists. The art practice program is designed to develop in-depth skills in more than one area of the visual arts. It emphasizes the expressive potential of an integration of media, often via a cross-disciplinary, interactive path. Through collaboration and connections with scientists, engineers, and humanities scholars, the program addresses a breadth of topical and artistic concerns central to a vital undergraduate education.

GRADUATE PROGRAM IN ART PRACTICE (STUDIO)

The program provides a demanding course of study designed to challenge advanced students. Participants are chosen for the program on the basis of work that indicates high artistic individuality, achievement, and promise. Candidates should embody the intellectual curiosity and broad interests appropriate to, and best served by, work and study within the University context.

BACHELOR OF ARTS IN ART PRACTICE (STUDIO)

DEGREE REQUIREMENTS

All undergraduate majors complete a minimum of 65 units including six lower level courses, six upper level courses, and four art history courses. All courses must be taken for a letter grade. University units earned by placement tests or advanced placement work in secondary school are not counted within the 65 units. The studio requirements are divided into lower level (introductory) and upper level (advanced) course work. At the lower level, students focus on a range of subject matter from historical motifs (figure, still life, landscape) to contemporary ideas in art. Upper level courses are designed to stretch the student's understanding of materials, techniques, site, and social relevance. Experimental and challenging in nature, these courses cross area boundaries. Independent study supervised by a member of the permanent faculty is also available to the advanced student.

Students are encouraged to move through the requirements for the major in the sequence outlined. Students are exposed to a range of practices early in their development in order to have a good basis of comparison if they choose to focus on a particular medium. This sequence of courses also broadens the students' skills and enables them to combine materials and methods. In all courses, students are expected to pass mid-term and final reviews and critiques of their work.

To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Art Practice majors are required to meet with both their adviser and the undergraduate coordinator during the first two weeks of each quarter to have course work approved and make certain they are meeting degree requirements. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

Required Courses—

1. Six lower level courses (24 units): Six courses from ARTSTUDI 60, 70, 80, 130, 131, 136, 138, 140, 141, 145, 148, 148A, 149B, 151, 153, 154, 155, 161, 167, 170, 173, 177, 178, 179, 276.
2. Six upper level courses (24 units):
   a. ARTSTUDI 230. Interdisciplinary Art Survey: Concepts and Strategies. Focus is on direct experiences of multidisciplinary art and art practices.
   b. ARTSTUDI 249. Advanced Undergraduate Seminar. Emphasis is on investigation of visual concepts interpreted by a single medium, by cross-practices, or by collaboration among students working in a variety of materials. This seminar gives the student an opportunity to be exposed to the work of other majors in a critique-based forum directed by a visiting artist or critic.
   c. Four other courses from ARTSTUDI 139, 141, 146, 149, 152, 160, 169, 172, 175A, 177A, 179A, 184, 185, 248, 268, 265A, 269, 270, 271.
3. Four Art History courses (17 units): ARTHIST 1 (WIM course) and three other art history courses. At least one course must be in the modern art series, ARTHIST 140-159. Students may substitute one Art History course with a Film Studies course.

Transfer Credit Evaluation—Upon declaring an Art Practice major, a student transferring from another school must have his or her work evaluated by a Department of Art and Art History adviser. A maximum of 13 transfer units are applied toward the 65 total units required for the major. A student wishing to have more than 13 units applied toward the major must submit a petition to the adviser and then have his or her work reviewed by a studio committee.

OVERSEAS STUDY OR STUDY ABROAD

A minimum of 52 of the 65 units required for the Art Practice major and a minimum of 32 of the 36 units required for the Art Practice minor must be taken at the Stanford campus. A student must meet with his or her adviser and undergraduate coordinator before planning an overseas campus program.

MINOR IN ART PRACTICE (STUDIO)

A student declaring a minor in Art Practice must complete 36 units of Art Practice and Art History course work. All minors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the internet. Minors are required to meet with both their adviser and the undergraduate coordinator during the first two weeks of each quarter to have course work approved and to make certain they are meeting degree requirements.

Requirements—A student with a minor in Art Practice must complete nine courses for a total of 36 units.

1. Three lower level courses (12 units) selected from ARTSTUDI 60, 70, 80, 130, 131, 136, 138, 140, 141, 145, 148, 148A, 149B, 151, 153, 154, 155, 161, 167, 170, 173, 177, 178, 179, 276.
2. Three upper level courses (11 units):
   a. ARTSTUDI 249: Advanced Undergraduate Seminar. Emphasis is on investigation of visual concepts interpreted by a single medium, by cross-practices, or by collaboration among students working in a variety of materials. This seminar gives the student an opportunity to be exposed to the work of other majors in a critique-based forum directed by a visiting artist or critic. Minors should enroll for three units.
   b. Two other courses from ARTSTUDI 139, 141, 146, 149, 152, 160, 169, 172, 175A, 177A, 179A, 184, 185, 230, 248, 265A, 268, 269, 270, 271.
3. Three Art History Courses (13 units): ARTHIST 1 and two other art history courses. At least one of the courses must be in the modern art series, ARTHIST 140-159.

MASTER OF FINE ARTS IN ART PRACTICE (STUDIO)

University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

THE GRADUATE PROGRAM IN PAINTING, SCULPTURE, NEW GENRES, AND PHOTOGRAPHY

ADMISSION

The applicant must have a B.A., B.F.A, or B.S. from an accredited school. It is expected that the applicant will have a strong background in art practice, either an undergraduate degree or at least three years of independent studio practice. Applications and portfolios for the Art Practice program must be received by January 11, 2011. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.

*Portfolio Specifications—S*ee the department web site at http://art.stanford.edu/graduate/admission/ for portfolio requirements.

FIELDS OF STUDY OR DEGREE OPTIONS

Fields of study for the M.F.A. degree are offered in Painting, Sculpture, New Genres, and Photography. These fields of study are not declared on Axess; they are not printed on the transcript or the diploma.

DEGREE REQUIREMENTS

1. *Residency*—Completing a minimum of two years (six quarters) of graduate work in residence at Stanford.
2. *Units*—The student must complete 48 units of study. Students must discuss their programs of study with their academic adviser and the department's student services administrator to ensure that an appropriate program of study is chosen.
   a. *Seminar Requirement*—Six quarters (36 units) of ARTSTUDI 342, Master's Project, which includes two weekly seminars (the Object Seminar and the Concept Seminar) and Studio Practice, which is an individual tutorial with a selected member of the faculty.
   b. *Elective Requirement*—Three courses of academic electives (12 units) are required in the first year. These courses can be chosen from a large variety of disciplines in consultation with the Director of Graduate Studies.
3. *Faculty Reviews*—The student is expected to pass three faculty reviews:
   a. at the end of the first quarter; any student judged to be making inadequate progress is placed on probation and requires an additional review at the end of the second quarter
   b. at the end of the third quarter
   c. at the time of the M.F.A. exhibition

   The purpose of these reviews is to evaluate development and to assess the progress of the student.
4. *Thesis*—During the fifth quarter in the program, students must write a thesis paper addressing the development of their work over the two-year period at Stanford. Participation in the M.F.A. exhibition at the end of the year is required.
5. *Graduate Student Teaching*—Regardless of their source of funding, students are required to assist with the department's teaching program for a minimum of eight hours per week over the period of six quarters; the particulars of this assignment are at the department's convenience.

The studio faculty reserves the right to make use of graduate paintings, sculptures, and photographs in exhibitions serving the interests of the graduate program.

Graduate students must remain in residence at Stanford for the duration of the program.

MASTER OF FINE ARTS IN DESIGN

University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

THE GRADUATE PROGRAM IN DESIGN

Working jointly, the departments of Art and Art History and Mechanical Engineering offer graduate degrees in product and visual design. A large physical environment, the Design Yard, provides professional studio space and well-equipped shops. Flexible programs may include graduate courses in fields such as engineering design, biotechnology, marketing, microcomputers, or the studio and art history curriculum. The program centers on a master's project and may also include work in advanced art and design. The program is structured to balance independent concentration with the use of the University and community, and interaction with the students and faculty of the graduate Design program. Crossdisciplinary interaction is encouraged by a four-person graduate Design faculty.

ADMISSION

1. The applicant must have a B.A., B.F.A., or B.S. from an accredited school. It is expected that the applicant will have a strong background in studio art, either an undergraduate degree or at least three years of independent studio practice.
2. Applications and portfolios for the design program must be received by January 11, 2011. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.
3. Portfolio Specifications:
   a. A portfolio or book containing 12-24 photographs, originals, or printouts of creative work, appropriately labeled and identified.
   b. A DVD showing works in action. Total run time should not exceed five minutes, and the disc should be playable in any standard DVD player. CD-ROMs are not accepted.

FIELDS OF STUDY OR DEGREE OPTIONS

Fields of study for the M.F.A. degree are offered in Product or Visual Design.

These fields of study are not declared on Axess; they are not printed on the transcript or the diploma.

DEGREE REQUIREMENTS

1. *Residency*—The student must complete a minimum of two years (six quarters) of graduate work in residence at Stanford.
2. *Units*—The student must complete 57 units of course work chosen in consultation with an adviser in the department. At least 18 of the 57 units must be in ARTSTUDI 360A,B,C, Master's Project: Design and ME 316A,B,C, Product Design: MS Project (9 units in the ARTSTUDI series and 9 units in the ME series). Typically, students working for the M.F.A. degree are encouraged to take full advantage of both sides of the Joint

Program in Design, as well as courses that tap the broader resources of the university.

3. *Required Courses (6 courses, 19-22 units)—*
   1. ARTSTUDI 60. Design I: Fundamental Visual Language
   2. ARTSTUDI 160. Design II: The Bridge
   3. ME 203. Design and Manufacturing
   4. ME 312. Advanced Product Design: Formgiving
   5. ME 313. Human Values and Innovation in Design
   6. Any one course sponsored by the d.school
4. *One course from the following (4 units)—*
   1. ARTSTUDI 169. Professional Design Exploration
   2. ARTSTUDI 268. Design Synthesis
   3. ARTSTUDI 269. Advanced Creative Studies
5. *Two courses from the following (6-8 units)—*
   1. ARTSTUDI 80. Color
   2. ARTSTUDI 161. Catalyst for Design
   3. ARTSTUDI 163. Paper
   4. ARTSTUDI 166. Design in Motion
   5. ARTSTUDI 167. Introduction to Animation
   6. ME 120. History and Philosophy of Design
   7. ME 216A. Advanced Product Design: Needfinding
6. *Thesis Requirements (6 courses, 18 units)—*
   1. ARTSTUDI 360A,B,C (9 units)
   2. ME 316A,B,C (9 units)
7. *Electives (2 courses, 6 units)*—Any two courses at student's discretion.

FILM AND MEDIA STUDIES

UNDERGRADUATE PROGRAMS IN FILM AND MEDIA STUDIES

The Bachelor of Arts in Film and Media Studies provides an introduction to film aesthetics, national cinematic traditions, modes of production in narrative, documentary, and experimental films, the incorporation of moving image media by contemporary artists, and the proliferation of new forms of digital media. The program is designed to develop the critical vocabulary and intellectual framework for understanding the role of cinema and related media within broad cultural and historical concepts.

GRADUATE PROGRAMS IN DOCUMENTARY FILM AND VIDEO

The Master of Fine Arts program in documentary production provides a historical, theoretical, and critical framework within which students master the conceptual and practical skills for producing nonfiction film and video. The M.F.A. is a terminal degree program with a two-year, full-time curriculum representing a synthesis of film praxis and film and media history, theory, and criticism. Courses provide an intellectual and theoretical framework within which students' creative work is developed. Students proceed through the program as a cohort. The program does not permit leaves of absence.

The M.F.A. degree is designed to prepare graduate students for professional careers in film, video, and digital media. Graduates are qualified to teach at the university level. The philosophy of the program is predicated on a paradigm of independent media that values artistic expression, social awareness, and an articulated perspective. Students become conversant with the documentary tradition as well as with alternative media and new directions in documentary. Training in documentary production is combined with the development of research skills in film criticism and analysis. Electives in film studies, art history, and studio art provide an intellectual and theoretical framework within which creative work is realized. The parallel focus on production and studies prepares students for an academic position that may require teaching both film studies and production.

BACHELOR OF ARTS IN FILM AND MEDIA STUDIES

SUGGESTED PREPARATION FOR THE MAJOR

Students considering a major in film and media studies should take ARTHIST 1, Introduction to the Visual Arts, and FILMSTUD 4, Introduction to Film Study, during their freshman or sophomore year. These courses anchor the major through exposure to film language, genre, and visual and narrative structures. Majors are required to take one course in the fundamentals of film and video production.

Suggested or Recommended Courses—

- ARTHIST 1. Introduction to the Visual Arts (WIM course for Art History)
- FILMSTUD 4. Introduction to Film Study

FIELDS OF STUDY OR DEGREE OPTIONS

Advanced undergraduate courses are offered in five fields of study:

- Film History
- Film and Culture
- Film, Media, and Technology
- Writing, Criticism, and Practice
- Aesthetics and Performance

Working with a faculty adviser, students choose five courses in their field from course offerings in Art and Art History and one course from another department in the University. These fields are declared on Axess.

DEGREE REQUIREMENTS

All undergraduate majors complete a minimum of 65 units (16 courses of 3-5 units each), or 15 courses plus an honors thesis. All courses for the major must be taken for a letter grade. To declare the major, students must meet with the undergraduate coordinator. At that time the student selects a faculty adviser. Majors are required to attend an orientation session presented by the professional staff of the Art and Architecture Library, which introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration.

Required Courses—

1. ARTHIST 1. Introduction to the Visual Arts (preferred) *or* an Art History elective
2. FILMSTUD 4. Introduction to Film Study
3. FILMSTUD 6. Introduction to Digital Media
4. FILMSTUD 100A, B, C. History of World Cinema I, II, III
5. FILMSTUD 101. Fundamentals of Cinematic Analysis (WIM course)
6. FILMSTUD 102. Theories of the Moving Image
7. FILMPROD 114. Introduction to Film and Video Production
8. *Concentration*—Five courses, four of which must be in a single film and media studies concentration developed by the student in consultation with an adviser. Concentration areas are: film history; film and culture; aesthetics and performance; film, media, and technology; and writing, criticism, and practice. The remaining course must be related, situating the student's concentration in a broader context.
9. *Capstone Experience*—FILMSTUD 290. Senior Seminar: Movies and Methods, offered once a year. The Senior Seminar represents the culminating intellectual experience for Film Studies majors choosing not to write an honors thesis. Honors thesis writers may also take the senior seminar. Seniors who may not be in residence in the quarter that the senior seminar is offered may enroll in their junior year. Movies and Methods provides majors with an opportunity to synthesize their previous work in Film Studies and work in an advanced setting with a faculty member.

HONORS PROGRAM

Students who want to write an honors thesis should consult with a potential adviser by the beginning of junior year. The adviser must be a faculty member in residence during the student's senior year who can oversee the student's progress throughout the project.

The minimum requirements for admission to the honors program in the department are an overall GPA of 3.7 and at least 3.7 in Film and Media Studies courses. Students must complete at least five Film and Media Studies courses at Stanford by the end of their junior year; four must be completed by the end of Winter Quarter. Students wishing to write an honors thesis must announce their intention by submitting a form signed by the thesis adviser, who need not be the student's academic adviser, by February 1 of their junior year.

Candidates for the honors program must submit to the Film and Media Studies faculty a 3-5 page thesis proposal outlining the themes of the thesis, a bibliography, a tentative schedule for research and writing, and one completed paper that demonstrates the student's ability to conceptualize and write about ideas. This complete proposal must be submitted to the department's undergraduate coordinator no later than the third week of Spring Quarter of the candidate's junior year so that it can be read, discussed, and voted upon at the faculty's regular meeting in early May. A candidate is accepted into the honors program by a simple majority.

Once admitted to the honors program, students work with their thesis advisers to research, organize, and write the thesis, and to enlist one other faculty member to serve on the thesis reading committee.

To aid the process of research and writing, students preparing an honors thesis are paired with a graduate student mentor. Students should contact the graduate student mentor in their junior year as soon as they begin to think about writing an honors thesis. Honors thesis writers must register for 10 units of FILMSTUD 297, Honors Thesis Writing, while working on the thesis. Students are required to register for two to five units each quarter during their senior year, for a total of ten units. Students may apply for UAR research grants to help finance trips or expenses related to preparing the research for their honors thesis.

Students and thesis advisers should plan the work schedule so that a final manuscript is in the hands of each member of the thesis reading committee by the beginning of the seventh week of the student's final quarter at Stanford (one year from proposal to final manuscript). The thesis adviser assigns a letter grade; both faculty readers must approve the thesis for honors before the student is qualified to graduate with honors.

Required Courses—

- FILMSTUD 297. Honors Thesis Writing

MINOR IN FILM AND MEDIA STUDIES

A minor in Film Studies requires four core courses and three elective courses for a total of seven courses. Courses must focus on film and use the method of film study to be used towards completion of the minor; courses that use film to illustrate a cultural topic are not eligible. Film Production and Studio Art courses may not be used towards the requirements.

Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student's departmental file. Only one class may be taken for credit outside the Stanford campus, including Stanford Overseas Studies programs. Minors are required to attend an orientation session presented by the professional staff of the Art Library, which introduces the many tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

Requirements—The minor in Film Studies requires seven courses for a minimum of 29 units.

Required Courses for the Minor—

FILMSTUD 4. Introduction to Film Study
FILMSTUD 102. Theories of the Moving Image
One course from FILMSTUD 100A,B,C. History of World Cinema I, II, III
One course in a national cinema or an additional course in film history

Optional Courses for the Minor—Three elective courses. Electives can be chosen from courses in other departments and must be approved for the Film Studies minor by the Film Studies coordinator and core faculty for their stress on methods of film analysis. These may include courses in national cinemas, film genres, experimental and documentary film, or film theory.

MASTER OF FINE ARTS IN DOCUMENTARY FILM AND VIDEO

University requirements for the M.F.A. are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

The program requires residency for two consecutive years. The admissions committee seeks applicants who have some work experience beyond their undergraduate years and can articulate why they want to learn documentary film and video production. The committee looks for evidence of the likelihood of success in a rigorous academic program that emphasizes creative work. The conceptual and technical skills required for documentary work are sufficiently different from fictional narrative to make the Stanford program inappropriate for students interested in narrative filmmaking. Each year, eight students are admitted to the program. Applications and portfolios must be received by January 11, 2011. Students accepted into the program must enroll in Autumn Quarter of 2011. The program does not allow for deferred admission or a mid-year enrollment.

Portfolio—The department requires a DVD (NTSC only) copy of film or video work for which the applicant has had creative control. The sample work must be well labeled and accompanied by a brief synopsis, running time of the clips, the circumstances of production, and the applicant's role. Total running time for the work sample should not exceed 15 minutes and may consist of more than one project. Work on which the applicant had only a production assistant role is not appropriate for submission. Student work, however, is appropriate for consideration. Applicants who have had only minimal film or video production experience should submit an example of their best creative work in any medium.

FIELDS OF STUDY OR DEGREE OPTIONS

Fields of study for the M.F.A. degree are offered in Documentary Film.

DEGREE REQUIREMENTS

1. *Residency*—Completing two years (six quarters) of graduate work in residence at Stanford.
2. *Units*—A minimum of 80 units is required for the M.F.A. degree. In the production core, students are required to conceptualize and visualize their ideas in a series of writing and producing courses that focus on documentary story structure. These courses are taken in tandem with project-based production courses that provide training in the technical and conceptual aspects of cinematography, sound recording, and editing. Discussion of form and content is a signature component of the writing and production courses. The production core is complemented by a series of required film studies courses in documentary plus elective courses in the history, aesthetics, ideology, and theory of all genres of moving image media. Core film production courses are offered S/NC only. All other courses must be taken for a letter grade.
3. *M.F.A. Thesis Project*—In the second year of the program, each student produces a 20-minute film or video documentary that constitutes the thesis project. In FILMPROD 405, students choose a topic, research and develop their project, and write a

proposal for submission. A project may not begin production until the final proposal has been approved. Most of the production and post-production occurs in FILMPROD 406A and 406B in Winter and Spring quarters.

4. *Required Courses—*
   a. *Core Production courses (eight courses, 32 units)*—Core courses must be taken in sequence.
      - FILMPROD 400. Film/Video Writing and Directing
      - FILMPROD 401. Nonfiction Film Production
      - FILMPROD 402. Digital Video
      - FILMPROD 403. Advanced Documentary Directing
      - FILMPROD 404. Advanced Film and Video Production
      - FILMPROD 405. Producing Practicum
      - FILMPROD 406A,B. Documentary MFA Thesis Seminar I and II

   b. *Core Film Studies courses (six courses, 25 units)—*
      - FILMSTUD 302. Theories of the Moving Image
      - FILMSTUD 315. Documentary Issues and Traditions
      - FILMSTUD 316. International Documentary
      - FILMSTUD 410A,B. Documentary Perspectives I and II

   c. *Electives (seven courses, 28 units)*—To be chosen in consultation with the student's adviser
      1. Art History—one course, 4 units
      2. Studio Art and/or Communications—two courses, 8 units
      3. Film Studies—three courses, 12 units
      4. Choice Elective—one course, 4 units

ART HISTORY AND FILM STUDIES COURSE CATALOG NUMBERING SYSTEM

The first digit of the ARTHIST and FILMSTUD course number indicates its general level of sophistication.

001-099	Introductory
100-199	Undergraduate level lectures
200-299	Undergraduate seminars/individual work
300-399	Graduate level lectures
400-599	Graduate seminars/individual work

The course numbers below indicate the area of Art History and Film Studies addressed.

Art History

001-099	Introductory
100-104	Ancient
105-109	Medieval
110-119	Renaissance
120-139	Early Modern
140-159	Modern
160-179	Contemporary
180-189	Asia
190-195	Africa and the Americas
200-299	Seminars and Colloquia
410-499	Historical Studies
500-599	Critical Studies
600-699	Graduate Research

Film Studies

004-103	Introductory
111-118	Genre
130-139	National Cinemas
140-149	Aesthetics
150-159	Other
220-299	Seminars
400-660	Graduate Seminars

OVERSEAS STUDIES COURSES IN ART AND ART HISTORY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BERLIN

- OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin. 5 units, Matthias Pabsch, GER:DB:Hum

FLORENCE

- OSPFLOR 34. The Woman in Florentine Art. 4 units, Timothy Verdon, GER:DB:Hum, EC:Gender
- OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice. 3-5 units, Filippo Rossi
- OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-3 units, Ermelinda Campani
- OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization. 4 units, Timothy Verdon, GER:DB:Hum
- OSPFLOR 134F. Modernist Italian Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

MADRID

- OSPMADRD 37. Madrid in Film. 3-5 units, Jorge Ruffinelli, GER:DB:Hum
- OSPMADRD 46. Drawing with Four Spanish Masters: Goya, Velázquez, Picasso and Dalí. 3 units, Oscar Sánchez Fuster

OXFORD

- OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850. 4-5 units, Geoffrey Tyack, GER:DB:Hum

PARIS

- OSPPARIS 42. EAP: Drawing with Live Model. 2 units, Staff
- OSPPARIS 43. EAP: Painting and Use of Color. 2 units, Staff
- OSPPARIS 44. EAP: Graphic Art. 2 units, Staff
- OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France. 4 units, Colette Deremble, Jean Paul Deremble, GER:DB:Hum

WINTER QUARTER

BERLIN

- OSPBER 17. Split Images: A Century in Cinema. 4 units, Karen Kramer, GER:DB:Hum, EC:GlobalCom

FLORENCE

- OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
- OSPFLOR 49. The Cinema Goes to War: Fascism and World War II As Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum
- OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-5 units, Ermelinda Campani
- OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence. 4 units, Timothy Verdon, GER:DB:Hum

OXFORD

- OSPOXFRD 67. Art in Oxford. 3 units, Geoffrey Tyack

MADRID

- OSPMADRD 45. Women in Art: Case Study in the Madrid Museums. 4 units, Julia Doménech López, GER:DB:Hum, EC:Gender

PARIS

- OSPPARIS 42. EAP: Drawing with Live Model. 2 units, Staff

- OSPPARIS 43. EAP: Painting and Use of Color. 2 units, Staff
- OSPPARIS 44. EAP: Graphic Art. 2 units, Staff
- OSPPARIS 54. The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France. 4 units, Estelle Halevi, GER:DB:Hum

SPRING QUARTER

FLORENCE

- OSPFLOR 54. High Renaissance and Maniera. 5 units, Timothy Verdon, GER:DB:Hum
- OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-5 units, Ermelinda Campani
- OSPFLOR 58. Space as History: Urban Change and Social Vision: Florence 1059-2008. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
- OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality and the Image. 4 units, Ermelinda Campani, GER:DB:Hum, EC:Gender
- OSPFLOR 71. Becoming an Artist in Florence: The Contemporary Artistic Craftmanship in Tuscany and the New Tendencies in the Visual Future. 3-5 units, Filippo Rossi, GER:

OXFORD

- OSPOXFRD 61.Castles and Satanic Mills: the Medieval in British Art, Architecture and Literature, 1750-1914. 4 units, Rosemary Hill

PARIS

- OSPPARIS 42. EAP: Drawing with Live Model. 2-2 units, Staff
- OSPPARIS 43. EAP: Painting and Use of Color. 2-2 units, Staff
- OSPPARIS 44. EAP: Graphic Art. 2-2 units, Staff
- OSPPARIS 60. Representation of Women in Christian Art: Boldness and Virtue. 4 units, Brigitte Gallini
- OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design. 4-4 units, Estelle Halevi, GER:DB:Hum

ASTRONOMY

Emeriti: (Professors) Von R. Eshleman, Peter A. Sturrock, G. Leonard Tyler, Robert V. Wagoner
Committee in Charge: Vahé Petrosian *(Director)*, Roger W. Romani, Sarah Church
Professors: Roger Blandford (Physics, SLAC), Blas Cabrera (Physics), Sarah Church (Physics), Steven Kahn (Physics, SLAC), Peter Michelson (Physics, SLAC), Vahé Petrosian (Physics, Applied Physics), Roger W. Romani (Physics)
Associate Professors: Steve Allen (Physics, SLAC), Tom Abel (Physics, SLAC),
Assistant Professors: Stefan Funk (Physics, SLAC), Chau-Lin Kuo (Physics, SLAC), Risa Wechsler (Physics, SLAC)
Professor (Research): Philip H. Scherrer (Physics)
Program Offices: Varian, Room 316
Mail Code: 94305-4060
Phone: (650) 723-1439
Web Site: http://www.stanford.edu/dept/astro

Astronomy courses are offered primarily through the Physics department, with subject code PHYSICS on the *Stanford Bulletin's* ExploreCourses web site.

Although Stanford University does not have a degree program in astronomy or astrophysics, teaching and research in various branches of these disciplines are ongoing activities in the departments of Applied Physics, Electrical Engineering, and Physics.

For the convenience of students interested in astronomy, astrophysics, and cosmology, a course program for undergraduate and graduate study is listed in the "Astronomy Cognate Courses" section of this bulletin. The list provides introductory courses for the student who wishes to be informed about the fields of astronomy without the need for prerequisites beyond high school algebra and physics. Courses in astronomy numbered below 100 are designed to serve this group of students. Astronomy courses numbered 100-199 serve the student interested in an initial scientific study of astronomy. The courses numbered 200 and above are for graduate students and advanced undergraduates, subject to prior approval by the course instructor.

UNDERGRADUATE PROGRAMS IN ASTRONOMY

The University does not offer a separate undergraduate major in Astronomy. Students who intend to pursue graduate study in astronomy or space science are encouraged to major in physics, following the advanced sequence if possible, or in electrical engineering if the student has a strongly developed interest in radioscience. The course descriptions for these basic studies are listed under the appropriate department sections of this bulletin. Students desiring guidance in developing an astronomy-oriented course of study should contact the chair of the Astronomy Program Committee. The following courses are suitable for undergraduates and are recommended to students considering advanced study in astronomy or astrophysics: PHYSICS 100, Introduction to Observational and Laboratory Astronomy; PHYSICS 160, Introduction to Stellar and Galactic Astrophysics; PHYSICS 161, Introduction to Extragalactic Astrophysics and Cosmology; GES 222, Planetary Systems: Dynamics and Origins. Students planning study in astronomy beyond the B.S. are urged to take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and to consider an undergraduate thesis (PHYSICS 169) or honors thesis in an astrophysics related area. The above-mentioned courses are required for physics majors who choose the curriculum with a concentration in astrophysics (see the "Physics" section of this bulletin). The student observatory, located in the hills to the west of the campus and equipped with a 24-inch and other small reflecting telescopes, is used for instruction of the observation-oriented courses.

MINOR IN ASTRONOMY

The minor program in Astronomy is described in the "Physics" section of this bulletin. The non-technical minor, intended for students whose major does not require the PHYSICS 40 series, requires 10 units of Physics courses (PHYSICS 21, 23, 25/26) and 9-10 units of Astronomy courses (3-4 units of PHYSICS 50 or 100, and 6 units of PHYSICS 15, 16, 17). The technical minor for other students consists of 14 units of PHYSICS 70, 100, 160, 161, and EE 106, in addition to the 40 or 60 series.

To be accepted to the minor program, students need to obtain an adviser selected from the faculty in the Astronomy Course Program. The minor declaration deadline is three quarters before graduation (that is, beginning Autumn Quarter if the student is graduating at the end of Spring Quarter). All courses for the minor must be taken at Stanford University, and a letter grade of 'C-' or better must be received for all units applied toward the minor.

GRADUATE PROGRAMS IN ASTRONOMY

Graduate programs in astronomy and astrophysics and related topics are carried out primarily in the Department of Physics but also the departments of Applied Physics and Electrical Engineering. Students should consult the course listings, degree requirements, and research programs of these departments for more detailed information. Graduate research opportunities are available in many areas of theoretical and observational astronomy, including research projects using the Hobby Eberly telescope, a 10-meter-class telescope located at McDonald Observatory in Texas. Other observational and experimental opportunities are in ground-based observations of CMB and space-based gamma-ray observations with Fermi and in the future, X-ray observations with NuSTAR. For further information on graduate research opportunities, see the

"Center for Space Science and Astrophysics" section of this bulletin and the Kavli Institute of Particle Astrophysics and Cosmology at http://kipac.stanford.edu.

Students planning to conduct research in astronomy and astrophysics are required to take PHYSICS 360, Physics of Astrophysics, and at least one of the following: PHYSICS 361, Stellar and Galactic Astrophysics; 362, Extragalactic Astrophysics and Cosmology; or 363, Solar and Solar-Terrestrial Physics. Students lacking a background in astrophysics, gravitation, and plasma physics should take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and PHYSICS 312, Basic Plasma Physics. Students with special interests in gravitation should take PHYSICS 364, Advanced Gravitation.

Students interested in research programs in space physics involving spacecraft studies of the planets, their satellites, and their near-space environments should see the "Center for Space Science and Astrophysics" section of this bulletin.

ASTRONOMY COGNATE COURSES

ELEMENTARY LECTURES

The following courses provide a descriptive knowledge of astronomical objects and astrophysics of the universe. PHYSICS 15, 16, and 17 are for students not majoring in the sciences and are taught in different quarters by different instructors, and may be taken individually or in any order.

PHYSICS 15. The Nature of the Universe
PHYSICS 16. Cosmic Horizons
PHYSICS 17. Black Holes

OBSERVATORY

The following courses are intended to familiarize students with observational methods and analysis of astronomical data. PHYSICS 100 involves more advanced observations and is intended for students with a college level background in physics.

PHYSICS 50. Astronomy Laboratory and Observational Astronomy
PHYSICS 100. Introduction to Observational and Laboratory Astronomy

ADVANCED UNDERGRADUATE

The following courses are for students with a more advanced knowledge of basic physics and mathematics, and form the core courses for a concentration in astrophysics for Physics majors.

EE 106. Planetary Exploration
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology
PHYSICS 169A,B,C. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem

GRADUATE

GES 222. Planetary Systems: Dynamics and Origins
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 301. Observational and Laboratory Astronomy
PHYSICS 312. Basic Plasma Physics
PHYSICS 360. Physics of Astrophysics
PHYSICS 361. Stellar and Galactic Astrophysics
PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
PHYSICS 363. Solar and Solar-Terrestrial Physics
PHYSICS 364. Advanced Gravitation
PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology

ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

Emeriti: (Professor) Wesley K. Ruff; *(Associate Director)* Robert C. Young; *(Assistant Director)* Shirley Schoof; (*Athletic Director*) Ted Leland
Athletic Director: Bob Bowlsby
Deputy Athletic Director: Ray Purpur
Senior Associate Athletic Director, Intercollegiate Services/Senior Woman Administrator: Beth Goode
Senior Associate Athletic Director, External Relations: Chris Hutchins
Senior Associate Athletic Director, Intercollegiate Sports: Earl Koberlein
Senior Associate Athletic Director, Program Services: Darrin Nelson
Senior Associate Athletic Director, Development: Jeff Shilling
Senior Associate Athletic Director, Physical Education, Recreation, and Wellness: Eric Stein
Associate Director of Development for Major Gifts: Scott Alexander
Associate Director of Development for Major Gifts: Darcie Bransford
Senior Assistant Athletic Director, Media Relations: Jim Young
Assistant Athletic Director, Compliance Services: Megan Boone
Assistant Athletic Director, Marketing: Marie Vasquez
Assistant Athletic Director, Human Resources: Ron Coverson
Assistant Athletic Director, Capital Planning: David Schinski
Sport Directors: Al Acosta (Lightweight Crew, women), Craig Amerkhanian (Crew, men), Amy Bokker (Lacrosse), Jason Borrelli (Wrestling), Johnny Dawkins (Basketball, men), Jason Dunn (Cross Country), John Dunning (Volleyball, women), Yasmin Farooq (Crew, women), Edrick Floreal (Track and Field, women), Lele Forood (Tennis, women), Thom Glielmi (Gymnastics, men), Jim Harbaugh (Football), Lesley Irvine (Field Hockey), Skip Kenney (Swimming, men), John Kosty (Volleyball, men), Mark Marquess (Baseball), Lea Maurer (Swimming, women), Lisa Milgram (Fencing), Caroline O'Connor (Golf, women), Heather Olson (Synchronized Swimming), George Pogosov (Fencing), Paul Ratcliffe (Soccer, women), Conrad Ray (Golf, men), John Rittman (Softball), Richard Schavone (Diving), Bret Simon (Soccer, men), Kristen Smyth (Gymnastics, women), Mark Talbott (Squash, women), John Tanner (Water Polo, women), John Vandemoer (Sailing), Tara VanDerveer (Basketball, women), John Vargas (Water Polo, men), John Whitlinger (Tennis, men)
Sport Assistant Coaches: Lance Anderson (Football), Jon Barnea (Water Polo, men), Rob Becerra (Soccer, men), Frankie Brennan (Tennis, women), Andy Buh (Football), Jay Cooney (Soccer, women), Denise Corlett (Volleyball, women), Ray Blake (Wrestling), Brandon Coupe (Tennis, men), Dick Davey (Basketball, men), Tim Drevno (Football), DJ Durkin (Football), Trisha Ford (Softball), Matt Gentry (Wrestling), Mandy Hart (Field Hockey), Vaclav Kacir (Crew, women), Bobbie Kelsey (Basketball, women), Ted Knapp (Swimming, men), Sara Lowe (Synchronized Swimming), Jason Mansfield (Volleyball, women), Salimah Mussani (Golf, women), Dave Nakama (Baseball), Andrew Ninow (Track and Field), Gregg Olson (Soccer, men), Susan Ortwein (Water Polo, women), Kate Paye (Basketball, women), J. D. Reive (Gymnastics, men), Greg Roman (Football), David Shaw (Football), Ken Shibuya (Volleyball, men), Jordan Steele Marotta (Field Hockey), Dean Stotz (Baseball), Katherine Sweet (Lightweight Crew, women), Chris Swircek (Gymnastics, women), Willie Taggart (Football)
Department Offices: Arrillaga Family Sports Center
Mail Code: 94305-6150
Phone: (650) 723-4591
Web Site: http://suwellness.stanford.edu

Courses offered by the Department of Athletics, Physical Education, and Recreation are listed under the subject code ATHLETIC on the *Stanford Bulletin's* ExploreCourses web site.

From the founding of the University, Stanford's leaders have believed physical activity is valuable for its own sake and complementary to the educational purpose of the University. The mission of the Department of Athletics, Physical Education, and Recreation is to offer the widest possible range of quality programs for athletic participation and physical fitness at all levels of skill and interest. Within the limitations of its resources, the department provides a broad range of instructional, recreational, and intramural competitive programs for all who wish to participate. The intrinsic value to the participant is the primary criterion by which the worth of the programs should be judged.

The goals of the department's programs are to promote understanding of the value and role of physical activity as an important dimension of the human condition, to develop performance skills in sport, to develop the habit of participation, and to provide leadership opportunities in aquatics, sports, and other physical activities. To this end, the program encompasses a diversity of learning and participating opportunities from informal recreation through organized intramural competition, basic instructional classes, and theoretical study to, and including, intercollegiate athletic competition.

PROGRAMS IN ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

No degrees are offered in Physical Education.

INTERCOLLEGIATE ATHLETICS

In keeping with American university tradition, Stanford offers a broad intercollegiate athletic program. The objectives are to provide the opportunity to compete at the highest possible level without jeopardizing the integrity of the individual or the institution; to adhere strictly to all University, association, and conference rules governing athletic participation; and to encourage effectively the achievement of academic goals by student athletes at the same rate as other University students. As a member of the National Collegiate Athletic Association (NCAA), Stanford fields both men's and women's varsity teams. Those for men are baseball, basketball, crew, cross country, fencing, football, golf, gymnastics, sailing, soccer, swimming and diving, tennis, track and field, volleyball, water polo, and wrestling. Those for women are basketball, crew, cross country, fencing, field hockey, golf, gymnastics, lacrosse, sailing, soccer, softball, squash, swimming and diving, synchronized swimming, tennis, track and field, volleyball, and water polo.

Both men's and women's teams are affiliated with the Pacific Ten Conference, one of the premier athletic conferences in the nation. Additional or alternative intercollegiate athletic competition is available for all teams.

CLUB SPORTS

The Stanford Club Sports program provides competition in sports not included in the intercollegiate varsity program and instruction in classes or activities not included in the Physical Education program. It also develops student leadership in organizing, administering, and funding activities. The club program is actively supervised by the Coordinator of Club Sports, but the emphasis is on student interest and leadership to initiate, organize, and conduct the respective clubs. Those students in clubs that meet the criteria for inclusion in the formal curriculum may apply for units of credit.

INTRAMURAL SPORTS (IM)

Students interested in participating in intramural sports should visit the intramural web site: http://www.stanford.edu/group/ intramurals for more information. They may visit the IM Office in Ford/Burnham. The program includes formal competition in fifteen team and individual sports, using both league and single elimination tournament play structure. Individuals are encouraged to check the web site at the beginning of each quarter to obtain registration and league information. Registration occurs on the second Monday and Tuesday of each quarter, with mandatory captain meetings held that Thursday evening. Intramural leagues are offered in Autumn, Winter, Spring, and Summer quarters.

RECREATION

The department provides facility use for faculty, staff, and students (and, for some activities, their immediate families) to participate in aquatics, conditioning, and sports for general recreation. Specific recreation hours for all the facilities are posted throughout the year at the respective facilities and at http://suwellness.stanford.edu.

The golf course and driving range are available for faculty, staff, and student use on a fee basis; information is available from the Golf Pro Shop.

Recreational classes are offered in areas such as rock climbing, indoor cycling, and golf.

FACILITIES

Athletic facilities are located throughout the campus. On the west side of campus are the Golf Course, the Golf Driving Range, the Red Barn Stables, Roble Field and Pool, the Sand Hill Intramural Fields, and the West Campus Tennis Courts. Centrally located is the Tresidder Fitness Center. On the east side of campus are the Arrillaga Center for Sports and Recreation, the Arrillaga Family Racquetball Center, the Arrillaga Family Sports Center, Avery Aquatic Center, Burnham Pavilion, Cobb Track and Angell Field, the Ford Center for Sports and Recreation, the Manzanita Basketball Court and Field, Maples Pavilion, Taube South Tennis Courts, and Taube Tennis Stadium.

Off-campus facilities include the Morrison Boathouse, a sailing and rowing facility.

CURRICULUM AND SERVICES

The diverse instructional program strives to accommodate the sports interests of all undergraduates and graduate students. Only intercollegiate varsity men's and women's teams are limited to undergraduates. Skill groupings and limited class sizes enable the beginning student or the advanced performer to achieve success within the limits of individual motivation and potential. Skill level in, and knowledge about, a specific activity as well as available space are the only limitations to enrollment. Physically disabled students are encouraged to contact Eric Stein (elstein@stanford.edu) for enrollment advice.

Academic Credit—Activity classes carry 1 unit of credit for satisfactory completion of work. Although there is no limitation on the number of activity classes in which a student may enroll, no more than 8 units of these activity classes (and/or other University activity classes) may be applied toward undergraduate graduation requirements (see the "Undergraduate Degrees" section of this bulletin).

Auditing—No auditing is allowed in activity classes. Faculty and staff may take an activity class as space is available with instructor consent after student enrollment is completed.

Class Fees—Fees are charged for enrollment in all physical education activity classes and club sports. Class fees are posted directly to the student's university account.

Class Sign-ups—Students sign up for classes on Axess. For classes with limited enrollment, students must attend the first class meeting or contact the instructor to guarantee their space in class.

Deadline for Adding a Class—Students who have never appeared in a class may not enroll in that class after the fourth class meeting has passed. Students may add the class after the fourth meeting if they have been in regular attendance, but must add the class to their study list by the study list deadline, Friday of the third week of the quarter.

Equipment—Information on equipment and recommended class attire is available from the department or instructor.

Lockers—Lockers are available for rent to faculty/staff and students at the Arrillaga Family Sports Center, Ford Center and Roble Gym. The fee for faculty/staff is $20 per quarter or $50 per year. The fee for students is $15 per quarter or $35 per year.

BIOLOGY

Emeriti: (Professors) Bruce S. Baker, Winslow R. Briggs, Allan M. Campbell, David Epel, Donald Kennedy, Peter Ray, Robert Schimke, Norman K. Wessells, Dow O. Woodward, Charles Yanofsky

Chair: Robert D. Simoni

Professors: Barbara A. Block, Steven M. Block, Martha S. Cyert, Gretchen C. Daily, Mark W. Denny, Rodolfo Dirzo, Paul R. Ehrlich, Marcus W. Feldman, Russell D. Fernald, Christopher B. Field, Judith Frydman, William F. Gilly, Deborah M. Gordon, Elizabeth A. Hadly, Philip C. Hanawalt, H. Craig Heller, Patricia P. Jones, Richard G. Klein, Ron R. Kopito, Sharon R. Long, Liqun Luo, Susan K. McConnell, Fiorenza Micheli, Harold A. Mooney, W. James Nelson, Stephen R. Palumbi, Dmitri Petrov, Joan Roughgarden, Robert M. Sapolsky, Carla J. Shatz, Michael A. Simon, Robert D. Simoni, George N. Somero, Tim P. Stearns, Stuart H. Thompson, Shripad Tuljapurkar, Peter Vitousek, Virginia Walbot, Ward B. Watt

Professor (Teaching): Carol L. Boggs

Associate Professors: Mary Beth Mudgett, Kang Shen

Assistant Professors: Dominique Bergmann, Hunter B. Fraser, Tadashi Fukami, Or Gozani, Christopher Lowe, Ashby Morrison, Mark J. Schnitzer, Jan M. Skotheim

Courtesy Professors: Joseph Berry, Daniel Fisher, Wolf Frommer, Arthur R. Grossman, Irving Weissman, Wing Wong

Courtesy Associate Professors: Kathryn Barton, Zhiyong Wang

Courtesy Assistant Professors: David Ehrhardt, Sue Rhee

Lecturers: Daria Hekmat-Scafe, Waheeda Khalfan, Shyamala D. Malladi, Patricia Seawell, Andrew Todhunter, James Watanabe

Consulting Professors: Cathy Laurie, Marc Tessier-Lavigne

Librarian: Michael Newman

Main Department Office and Phone: Gilbert Building, Room 109 – (650) 723-2413

Student Services Office and Phone: Gilbert Building, Room 108 – (650) 723-1826

Mail Code: 94305-5020

Web Site: http://biology.stanford.edu

Courses offered by the Department of Biology are listed under the subject code BIO on the *Stanford Bulletin's* ExploreCourses web site.

The department provides: (1) a major program leading to the B.S. degree; (2) a minor program; (3) a coterminal program leading to the M.S. degree; (4) a doctoral program leading to the Ph.D. degree; and (5) courses designed for the non-major.

MISSION OF THE UNDERGRADUATE PROGRAM IN BIOLOGY

The mission of the undergraduate program in Biology is to provide students with in-depth knowledge in the discipline, from molecular biology to ecology. Students in the program learn to think and analyze information critically, to draw connections among the different areas of biology, and to communicate their ideas effectively to the scientific community. The major exposes students to the scientific process through a set of core courses and electives from a range of subdisciplines. The Biology major serves as preparation for professional careers, including medicine, dentistry, veterinary sciences, teaching, consulting, research, and field studies.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to use discipline-specific tools and content knowledge to analyze and interpret scientific data, to evaluate the significance of the data, and to articulate conclusions supportable by the data.
2. the ability, independently and collaboratively, to formulate testable scientific hypotheses and to design approaches to obtain data to test the respective hypotheses.
3. the ability to communicate content understanding and research outcomes effectively using various media.

GRADUATE MISSION STATEMENT

For graduate-level students, the department offers resources and experience learning from and working with world-renowned faculty involved in research on ecology, neurobiology, population biology, plant and animal physiology, biochemistry, immunology, cell and developmental biology, genetics, and molecular biology.

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience.

The training for a Ph.D. in Biology is focused on learning skills required to be a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

FACILITIES

The facilities and personnel of the Department of Biology are housed in the Gilbert Biological Sciences Building, Herrin Laboratories, Herrin Hall, Jasper Ridge Biological Preserve, James H. Clark Center, Lorry I. Lokey Laboratory Building, Jerry Yang and Akiko Yamazaki Environment & Energy Building, and the Carnegie Institution of Washington (all on the main campus); and Hopkins Marine Station in Pacific Grove on Monterey Bay.

Jasper Ridge Biological Preserve (JRBP) is located near Stanford University's campus in the eastern foothills of the Santa Cruz Mountains. The preserve encompasses geologic, topographic, and biotic diversity within its 1,189 acres and provides a natural laboratory for researchers from around the world, educational experiences for students and docent-led visitors, and refuge for native plants and animals. See http://jrbp.stanford.edu.

Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. For more information, including courses taught at Hopkins Marine Station with the subject code BIOHOPK, see the "Biology, Hopkins Marine Station" section of this bulletin.

The department's large collections of plants (Dudley Herbarium), fish, reptiles, and amphibians, as well as smaller collections of birds, mammals, and invertebrates, are housed at the California Academy of Sciences in San Francisco, where they, and extensive collections of the academy, are available to those interested in the systematics of these groups. Entomological collections, restricted to those being used in particular research projects, are housed in the Herrin Laboratories. No general collections are maintained except for teaching purposes.

The Falconer Biology Library in Herrin Hall (http://library.stanford.edu/depts/falconer) contains over 1,200 current subscriptions and an extensive collection of monographs and reference works. A specialized library is maintained at Hopkins Marine Station.

BACHELOR OF SCIENCE IN BIOLOGY

The undergraduate major in Biology can serve as a stepping-stone for a wide variety of career opportunities. For students planning to attend medical, dental, or veterinary school, or graduate school in biological and applied sciences, the biology major provides a strong foundation in the basic life sciences. This foundation of knowledge, plus laboratory experience, also prepares students well for research and technical positions in universities, government, and industry.

While a major in Biology provides an excellent background for these technical careers, it can also serve as a valuable and satisfying focus of a liberal arts education for those not planning careers in science-related fields. An understanding of basic biological principles is of increasing importance in today's world. A knowledgeable and concerned citizenry is the best guarantee that these issues will be resolved most effectively. Finally, an understanding of the processes of life can heighten our perception and appreciation of the world around us, in terms of its beauty, variety, and uniqueness.

ADVISING

Members of the Biology faculty are available for advising on such academic matters as choice of courses, research, suggested readings, and career plans. The student services office maintains a current list of faculty advisers, advising availability, and research interests.

The student services office staff and BioBridge, the department's peer advising group, are prepared to answer questions on administrative matters, such as requirements for the major, approved out-of-department electives, transfer course evaluations, and petition procedures. This office also distributes the department's *Bachelor of Science Handbook*, which delineates policies and requirements, as well as other department forms and informational handouts.

Each undergraduate interested in the Biology major is required to select a department faculty adviser as part of the major declaration process.

REQUIREMENTS

Candidates for the general Biology B.S. degree must complete the following, which range from 90-105 total units:

Core Courses—must be taken for a letter grade:

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5
BIO 44X	5
BIO *or* BIOHOPK 44Y*	5
may be replaced by 4 units of BIOHOPK 175H	

* BIO 44Y not required if completing honors program. Failure to complete honors program results in student being required to complete BIO 44Y.

Required Foundational Breadth Courses—two courses may be taken credit/no credit:

Subject and Catalog Number	*Units*
CHEM 31A,B, *or* 31X	4-8
CHEM 33, 35, 36, 130*, 131	18
CHEM 135 *or* 171	3
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 19, 20, 21 *or* 41, 42 *or* 51**	5-10
*may not also count as foundational breadth	
One additional Foundational Breadth Course from this list:	
BIOHOPK 174H***	3
BIO/STATS 141***	4-5
CS 106A *or* 106X	3-5
MATH 51** or beyond	5
STATS 60/PSYCH 10	5

* May be substituted with MATH 100 or beyond if student is interested in the fields of ecology and evolutionary biology.

** May be counted either toward the math requirement or foundational breadth, but not both.

*** If taken to fulfill the foundational breadth requirement, these courses do not count toward the 24 elective unit requirement.

Electives—24 units required, distributed as follows:

- Biology (BIO) or Hopkins Marine Station (BIOHOPK) courses numbered 100 or above.
- Approved out-of-department electives (list also available in the student services office).
- No more than 6 units from any combination of individual instruction courses (BIO 198, 198X, 199, 199X, 290, 290X, 291; BIOHOPK 175H, 198H, 199H, or 290H) may be applied toward the total number of elective units. No more than 6 units applied toward the elective unit requirement may be taken CR/NC.
- One course from at least three of the four central menu areas (listed below). The purpose of the central menu is to expose students to a wide range of topics studied within the field of biology and is intended to give students a breadth of knowledge. Please note—this requirement is only for the general major. Students pursuing a specialized field of study should consult the specific degree requirements listed in the "Fields of Study" section below.

Central Menu Areas:

1. *Molecular (Area 1)*
   - BIO 104. Advanced Molecular Biology
   - BIO 113. Fundamentals of Molecular Evolution[3]
   - BIO 118. Genetic Analysis of Biological Processes[1]
   - BIO 160A. Developmental Biology I[1]
   - BIO 160B. Developmental Biology II[1]
   - BIO 188. Biochemistry I
   - BIO 189. Biochemistry II
   - BIO 230. Molecular and Cellular Immunology[1]
   - CBIO 101. Cancer Biology[1]
   - CEE 274A. Environmental Microbiology I
2. *Cell/Developmental (Area 2)*
   - BIO 118. Genetic Analysis of Biological Processes[1]
   - BIO 129A. Cellular Dynamics I: Cell Motility and Adhesion
   - BIO 129B. Cellular Dynamics II: Building a Cell
   - BIO 137. Plant Genetics[1]
   - BIO 154. Molecular and Cellular Neurobiology[2]
   - BIO 158. Developmental Neurobiology[2]
   - BIO 160A. Developmental Biology I[1]
   - BIO 160B. Developmental Biology II[1]
   - BIO 171. Principles of Cell Cycle Control
   - BIO 230. Molecular and Cellular Immunology[1]
   - CBIO 101. Cancer Biology[1]
   - CEE 274A. Environmental Microbiology I
3. *Organismal (Area 3)*
   - BIO 112. Human Physiology
   - BIO 153. Cellular Neuroscience
   - BIO 154. Molecular and Cellular Neurobiology[2]
   - BIO 158. Developmental Neurobiology[2]
   - BIO 163. Neural Systems and Behavior
   - BIOHOPK 161H. Invertebrate Zoology
   - BIOHOPK 162H. Comparative Animal Physiology
   - BIOHOPK 167H. Nerve, Muscle, and Synapse
   - BIOHOPK 169H. Neurobiology and Behavior
   - BIOHOPK 171H. Ecological and Evolutionary Physiology
   - MI 185. Topics in Microbiology
4. *Ecology and Evolution (Area 4)*
   - BIO 101. Ecology
   - BIO 113. Fundamentals of Molecular Evolution
   - BIO 121. Biogeography
   - BIO 136. Evolutionary Paleobiology
   - BIO 143. Evolution
   - BIO 144. Conservation Biology
   - BIO 145. Behavioral Ecology
   - BIOHOPK 163H. Oceanic Biology

- BIOHOPK 185H. Ecology and Conservation of Kelp Forest Communities
- BIOHOPK 172H. Marine Ecology
- CEE 274A. Environmental Microbiology I

1. May be used to satisfy either area I or area II requirement.
2. May be used to satisfy either area II or area III requirement.
3. May be used to satisfy either area I or area IV requirement.
4. May be used to satisfy either area III or area IV requirement.
5. May be used to satisfy area I, area II, or area IV requirement.

Students intending to pursue research careers in biology, especially in ecology, population genetics, or theoretical biology, should be aware that MATH 19, 20, 21, or MATH 41, 42 are minimum mathematics requirements for the B.S. degree in Biology. Substantial additional training in mathematics, including differential equations, linear algebra, and probability theory, is often highly advisable. Students should consult the Biology faculty to discuss individual needs.

Additionally, even though only two or three quarters of physics are required, students should be aware that many graduate and professional schools (for example, Medicine) require a year of general physics with lab. Biology majors are therefore advised to take the year-long physics sequence PHYSICS 21, 22, 23, 24, 25, 26 if they plan to attend graduate or medical school.

For students considering study at Hopkins Marine Station or an overseas program, the department recommends fulfilling as many University General Education Requirements as possible in the first two years at Stanford.

HOPKINS MARINE STATION

For more information on the Hopkins Marine Station, see the "Hopkins Marine Station" section of this bulletin. Students can go to Hopkins as early as Spring Quarter in the sophomore year, and can also go in the junior and/or senior year to take elective courses. Full descriptions of Hopkins Marine Station courses may be viewed on the *Stanford Bulletin's* Explore Courses web site. The following Hopkins Marine Station courses may be used toward the Biology degree requirements:

Core—

- BIOHOPK 43. Plant Biology, Evolution, and Ecology (equivalent to BIO 43)
- BIOHOPK 44Y. Core Experimental Laboratory (equivalent to BIO 44Y)
- BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology (can be used in place of BIO 44Y)*

* 4 units count toward the BIO 44Y requirement, with the remaining units counting as research/teaching under the upper-division elective requirement.

Electives—

- BIOHOPK 161H. Invertebrate Zoology (central menu area 3)
- BIOHOPK 162H. Comparative Animal Physiology (central menu area 3)
- BIOHOPK 163H. Oceanic Biology (central menu area 4)
- BIOHOPK 164H. Marine Botany
- BIOHOPK 166H. Molecular Ecology
- BIOHOPK 167H. Nerve, Muscle, and Synapse (central menu area 3)
- BIOHOPK 170H. Topics in Marine Biology
- BIOHOPK 171H. Ecological and Evolutionary Physiology (central menu area 3)
- BIOHOPK 172H. Marine Ecology (central menu area 4)
- BIOHOPK 173H. Marine Conservation Biology
- BIOHOPK 174H. Experimental Design and Probability
- BIOHOPK 178H. Polar Biology
- BIOHOPK 182H. Stanford at Sea (6 units maximum)
- BIOHOPK 184H. Holistic Biology: Monterey Bay and the Sea of Cortez (6 units maximum)
- BIOHOPK 185H. Ecology and Conservation of Kelp Forest Ecology
- BIOHOPK 187H. Sensory Ecology
- BIOHOPK 274. Hopkins Microbiology Course (6 units maximum)
- BIOHOPK 277H. Biomechanics, Ecological Physiology, and Genetics of Intertidal Communities

Research and/or Teaching (maximum 6 units combined)—

- BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology
- BIOHOPK 198H. Directed Instruction or Teaching
- BIOHOPK 199H. Undergraduate Research
- BIOHOPK 290H. Teaching of Biological Science
- BIOHOPK 300H. Research

See Biology degree requirements above for further information. Many of the Hopkins Marine Station courses may be used to fulfill department major requirements.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM

FIRST YEAR

Subject and Catalog Number	*Qtr. and Units*		
	A	W	S
CHEM 31X*, 33, 35, 36. Chemical Principles and Organic Chemistry	4	4	7
MATH 19, 20, 21. Calculus and Analytic Geometry	3	3	4
Freshman requirements, seminars, or GERs	8	8	6
Totals	15	15	17

* This schedule varies slightly if the student takes CHEM 31A,B.

SECOND YEAR

BIO 41. Genetics, Biochemistry, and Molecular Biology*	5		
BIO 42. Cell Biology and Animal Physiology*		5	
BIO *or* BIOHOPK 43. Plant Biology, Evolution, and Ecology*			5
BIO 44X. Core Experimental Laboratory		5	
BIO *or* BIOHOPK 44Y. Core Experimental Laboratory			5
CHEM 130, 131. Organic Chemistry	4	3	
General Education Requirements	6	5	8
Totals	15	17	18

* Letter grade only.

THIRD YEAR

CHEM 135 (or 171). Physical Chemistry	3		
PHYSICS 21, 22, 23, 24. Introductory Physics	4	4	
General Education Requirements and/or electives	8	11	15
Totals	15	15	15

FOURTH YEAR

General Education requirements and/or Electives	15	15	15

FIELDS OF STUDY

In addition to the undergraduate major program described above, the department offers these six fields of study for students wishing to concentrate their studies in particular areas of biology:

1. Biochemistry and Biophysics
2. Ecology and Evolution
3. Marine Biology
4. Microbes and Immunity
5. Molecular and Cellular Biology
6. Neurobiology

These fields of study are declared on Axess at the time of the major declaration; they appear on the transcript but not on the diploma. Candidates for the B.S. degree in Biology with a field of study are required to complete the departmental honors program as well as the set of requirements outlined below.

BIOCHEMISTRY AND BIOPHYSICS

Candidates for the Biochemistry and Biophysics field of study must complete the following, which range from 99-115 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5

BIO *or* BIOHOPK 43	5

WRITING IN THE MAJOR (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIO 145*	4
BIOHOPK175H*	10

* These courses can also be used to count toward the elective requirement.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36, 130	15
CHEM 135 *or* 171	3
PHYSICS 41, 43, 45	12
MATH 51, 52	10
STATS 60 *or* BIO 141	4-5

REQUIRED BIOLOGY COURSES (MUST BE TAKEN FOR A LETTER GRADE):

BIO 104	3
BIO 118	5
BIO 129A *or* 129B	4
BIO 188	3

APPROVED BIOCHEMISTRY AND BIOPHYSICS COURSES (THREE OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

APPPHYS 136/BIOC 236	3
APPPHYS 192/292	3
BIO 132/232/APPPHYS/BIOPHYS/MCP 232	4
BIO 152/MCP 222	3
BIO 154/254/NBIO 254	4
BIO 189/289/CHEM 183/CHEMENG 183/283	3
BIO 214/BIOC 224	2-5
BIO 217	4
BIOE/RAD 220	3
BIOMEDIN 210	3
BIOMEDIN/BIOE/GENE 214/CS 274	3-4
BIOPHYS/SBIO 228	3
BIOPHYS/SBIO 241	3-5
CHEM 184	4
CHEM 185	3
EE 268	3
MCP 256	4
PHYSICS 105	4

Electives—7 units required. Electives must be 100-level or above and chosen from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

ECOLOGY AND EVOLUTION

Candidates for the Ecology and Evolution field of study must complete the following, which range from 97-126 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5
BIO 101* *or* BIOHOPK 172H*	3 or 5

* This course cannot also be used to count toward the elective requirement.

WRITING IN THE MAJOR (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIO 145*	4
BIOHOPK 175H*	10

* This course can also be used to count toward the elective requirement.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36	11
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 41, 42 *or* 51	5-10

REQUIRED EVOLUTIONARY BIOLOGY COURSE (ONE OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

BIO 113	4
BIO 136	4
BIO 143	3
BIOHOPK 166H	5

REQUIRED QUANTITATIVE METHODS COURSE (ONE OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

BIO 141	4-5
BIOHOPK 174H	3
CS 106A *or* 106X	3-5
STATS 60 *or* beyond	5

Electives—30 units required. Only one course can be taken credit/no credit. Electives must be from this approved list: BIO 101, 102, 117, 118, 121, 122, 125, 139, 144, 145, 146, 147, 175, 183, 184, 186, 215, 216; BIOHOPK 161H, 162H***, 163H, 166H, 171H, 172H, 173H*, 174H, 175H***, 182H***, 185H***; CHEM 130, 131; EARTHSYS 144/EESS 164; EESS 134, 158; GES 123, 240; OSPAUSTL 10**, 20**, 30**.

* Only 1 unit can count.

** Only 2 units can count.

***Only 6 units can count.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

MARINE BIOLOGY

Candidates for the Marine Biology field of study must complete the following, which range from 92-129 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5

WRITING IN THE MAJOR (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIO 145	4
BIOHOPK 175H*	10

* This courses can also be used to count toward the approved courses.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 41, 42 *or* 19, 20, 21 *or* 51	5-10
STATS 60 *or* BIO 141 *or* BIOHOPK 174H	3-5

REQUIRED BIOLOGY COURSES (MUST BE TAKEN FOR A LETTER GRADE):

BIO 101	3
BIO 118	5
BIO 143	3

APPROVED COURSES (THREE OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

BIOHOPK 161H	5
BIOHOPK 162H	5-8
BIOHOPK 163H	4
BIOHOPK 164H	5
BIOHOPK 166H	5
BIOHOPK 171H	4

BIOHOPK 172H	5
OSPAUSTL 10, 20, and 30	9

APPROVED COURSES (ONE OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

BIOHOPK 175H	10
BIOHOPK 182H	16
BIOHOPK 184H	16

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

MICROBES AND IMMUNITY

Candidates for the Microbes and Immunity field of study must complete the following, which range from 87-121 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5

WRITING IN THE MAJOR AND INTRODUCTION TO LABORATORY SCIENCE (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIOHOPK 175H*	10

* This course can also be used to count toward the elective requirement.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 19, 20, 21 *or* 41, 42 *or* 51	5-10
BIO 141* *or* BIOHOPK 174H*	3-5

* This course cannot also be used to count toward the elective requirement.

REQUIRED COURSES IN MICROBIOLOGY, IMMUNOLOGY, MOLECULAR EVOLUTION (FOUR OF THE FOLLOWING; MUST BE TAKEN FOR A LETTER GRADE):

BIO 113	4
BIO 177	3
BIO 230	4
BIOHOPK 274	9-12
CEE 177	4
CEE 274A	3
CEE 274B	3
CEE 274D	3
IMMUNOL 185	3
IMMUNOL 202	3
MI 104	3
MI 211	3

REQUIRED COURSE IN READING SCIENTIFIC LITERATURE (ONE OF THE FOLLOWING, MUST BE TAKEN FOR A LETTER GRADE):

BIO 178	3
MI 185	3

Electives—12 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

MOLECULAR AND CELL BIOLOGY

Candidates for the Molecular and Cell Biology field of study must complete the following, which range from 97-118 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5

WRITING IN THE MAJOR (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIO 145*	4
BIOHOPK175H*	10

* These courses can also be used to count toward the elective requirement.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36, 130, 131	18
CHEM 135 *or* 171	3
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 41, 42 *or* 19, 20, 21 *or* 51	10
STATS 60 *or* BIO 141*	4-5

* This course cannot also be used to count toward the elective requirement.

REQUIRED BIOLOGY COURSES (MUST BE TAKEN FOR A LETTER GRADE):

BIO 104	3
BIO 118	5
BIO 129A, 129B	8
or BIO 160A, 160B	8

Electives—15 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

NEUROBIOLOGY

Candidates for the Neurobiology field of study must complete the following, which range from 98-120 total units:

CORE COURSES (MUST BE TAKEN FOR A LETTER GRADE):

Subject and Catalog Number	*Units*
BIO 41	5
BIO 42	5
BIO *or* BIOHOPK 43	5

WRITING IN THE MAJOR (ONE OF THE FOLLOWING):

BIO 44X	5
BIO *or* BIOHOPK 44Y	5
BIO 145*	4
BIOHOPK175H*	10

* These courses can also be used to count toward the elective requirement.

REQUIRED FOUNDATIONAL BREADTH COURSES (TWO COURSES MAY BE TAKEN CREDIT/NO CREDIT):

CHEM 31A,B *or* 31X	4-8
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45 *or* 28, 29	8-12
MATH 41, 42 *or* 19, 20, 21 *or* 51	10
STATS 60 *or* BIO 141*	4-5

* This course cannot also be used to count toward the elective requirement.

REQUIRED BIOLOGY COURSES (MUST BE TAKEN FOR A LETTER GRADE):

BIO 118 *or* 104	5
BIO 129A *or* 129B *or* 160A *or* 160B	4
BIO 150 *or* 163	4-5
BIO 154	4
BIO 158	4

Electives—15 units required. Electives must be at the 100-level or above and selected from the offerings in the Department of Bi-

ology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and/or research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIO 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIO or BIOHOPK are permitted.

HONORS

To graduate with departmental honors, a student must conduct an independent research project typically over the course of at least one year; projects are started no later than Autumn or Winter quarter of the junior year. Research must be done in a Biology Department lab or a lab in the Medical School for which the student has obtained prior approval. Administrative steps include:

1. Submit an honors proposal to the department's student services office two quarters prior to graduation. For instance, students graduating Spring Quarter must submit petitions no later than mid-Autumn Quarter.
2. Complete at least 10 units of an approved research project in BIO 199, 199X, or BIOHOPK 199H. Only research units from BIO or BIOHOPK are permitted.
3. Obtain at least a 3.0 (B) grade point average (GPA) in all Biology major requirements taken at Stanford (foundational breadth, core, and elective courses). Grades earned from teaching (BIO or BIOHOPK 290 and BIO 291) and research (BIOHOPK 175H, 199H; BIO 199, 199X) are not computed into this GPA.
4. If graduating in June, participate in the Biology Honors Symposium by presenting a poster or giving an oral presentation. The symposium is typically at the end of May. If graduating Autumn, Winter, or Summer Quarter, produce a poster to be displayed at the symposium.
5. Complete and submit, by the end of the quarter of graduation, two signed and bound copies of an honors thesis approved by at least two readers (one of whom must be from the faculty of the Department of Biology and both must be Academic Council members). In addition, students must submit two copies of the honors thesis abstract (one paper copy and one electronic copy), which include student name, thesis title, research sponsor, and sponsor's department.

Further information on the honors program is available in the student services office in Gilbert 108, as well as on the web at http://biohonors.stanford.edu.

MINOR IN BIOLOGY

Students interested in the minor in Biology must declare the minor and submit their course plan online via Axess no later than two quarters prior to the student's intended quarter of degree conferral. The Biology minor requires a minimum of six courses meeting the following criteria:

1. All courses must be taken for a letter grade.
2. All courses must be worth 3 or more units.
3. All courses, other than the Biology Core (41, 42, 43), must be at or above the 100-level. Stanford Introductory Seminars may not be used to fulfill the minor requirements.
4. Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (minor or major).
5. At least one course from the Biology Core (41, 42 or 43) must be taken.
6. The Biology Core Laboratory courses (BIO 44X and BIO/BIOHOPK 44Y) do not count towards the minor.
7. Courses must be chosen from the offerings of the Department of Biology or the Hopkins Marine Station, or from the list of approved out-of-department electives (also available in the student services office).
8. Elective credit for research (BIO 199 or BIOHOPK 199H) is limited to a maximum of 3 units. BIO 199X is not allowable.

MASTER OF SCIENCE IN BIOLOGY

For information on the University's basic requirements for the M.S. degree, see the "Graduate Degrees" section of this bulletin. Students considering this degree option should meet with staff in the student services office prior to applying.

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience. Students who have majored in related fields are eligible to apply, but course work equivalent to the preparation of a Stanford B.S. in Biology is strongly recommended. This includes course work in biology, chemistry, physics, and mathematics. The M.S. program does not have an M.S. with thesis option.

ADMISSIONS

The department only accepts M.S. program applications from matriculated Stanford students:

1. undergraduates wishing to pursue a coterminal MS degree.
2. graduate students from other Stanford programs wishing to pursue an MS degree.
3. current Biology PhD students wishing to leave the PhD program with an MS degree.

Undergraduates must apply in mid-January to start the program in Spring, Autumn, or the following Winter Quarter. Graduate students may apply by the third week of any academic quarter.

Required application materials—

1. Application for Admission, Preliminary Program Proposal, and Course Transfer Form
2. A statement of purpose which explains why the student wishes to enter the program and what the student plans to accomplish while in the program. The statement should also supply information about the student's science capabilities if his or her undergraduate academic record does not accurately reflect them.
3. Unofficial Stanford transcript
4. Two letters of recommendation, preferably from Biology faculty members in this department (if two such letters are not available, letters from faculty familiar with the student's ability to succeed in a graduate science curriculum are acceptable).
5. Application fee: an application fee is charged to all students regardless of outcome; application fee is applied directly to students' accounts.

GENERAL REQUIREMENTS

The M.S. program consists of Department of Biology and/or Hopkins Marine Station course work, approved out-of-department electives, and foundational breadth courses totaling at least 45 units at or above the 100-level, distributed as follows:

1. A minimum of 23 of the 45 units must be courses designated primarily for graduate students (200-level or higher).
2. A minimum of 36 units must be chosen from the offerings in the Department of Biology (BIO), Hopkins Marine Station (BIOHOPK), the list of approved out-of-department electives, research and teaching, and/or foundational breadth courses.
   a. a maximum of 18 of the 36 units may be a combination of Biology research, directed reading, and/or teaching (BIO 198, 198X, 290, 290X, 291, 300, 300X; BIOHOPK 175H, 198H, 290H, or 300H).
   b. a maximum of 9 units may be foundational breadth courses in chemistry, mathematics, statistics, computer science, and/or physics beyond the level required for the undergraduate degree in Biology and at least at the 100-level.
3. No more than 9 units may be other Stanford course work relevant to a student's professional development. Students are required to petition for courses that fall into this category using the General Petition form, (also available in the student services office).

Each candidate designs a coherent program of study in consultation with her or his department adviser. Although there are no

specific courses required, program proposals must adhere to department parameters.

In addition to the unit requirements outlined above, students must adhere to the following:

1. A program proposal, signed by the student's adviser and approved by the chair of the M.S. committee, must be filed by the third week of the first quarter of enrollment.
2. Students may take only 6 units CR/NC.
3. Students must maintain a GPA of 3.0 or higher.
4. Students must receive a grade of 'B-' or better in all courses taken for the degree.

Students not meeting these minimum requirements are subject to departmental academic review and/or dismissal.

The department's *Master of Science Handbook* has additional information about the program, University policy, and the department.

DOCTOR OF PHILOSOPHY IN BIOLOGY

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" section of this bulletin. The training for a Ph.D. in Biology is focused on learning skills required for being a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

ADMISSIONS

Preparation for Graduate Study—Students seeking entrance to graduate study in Biology ordinarily should have the equivalent of an undergraduate major in Biology at Stanford. However, students from other disciplines, particularly the physical sciences, are also encouraged to apply. Such students are advised at the time of initial registration on how they should complete background training during the first year of graduate study. In addition to the usual basic undergraduate courses in biology, it is recommended that preparation for graduate work include courses in chemistry through organic chemistry, general physics, and mathematics through calculus.

Application, Admission, and Financial Aid—Prospective graduate students must apply via Stanford's online graduate application.

The department's program is divided into three separate areas of concentration:

- ecology/evolution/population studies
- integrative/organismal
- molecular/cellular/developmental/genetic/plant

Included in these concentrations is the option to conduct research at Hopkins Marine Station. These concentrations are recorded in the department as part of the admissions process and for tracking degree progress for admitted students; they do not appear on official university records.

Applicants are required to take the Graduate Record Examination (GRE) general test. The GRE subject test is not required. Applicants should plan on taking the GRE at least one month prior to the application deadline to ensure that official scores are available when applications are evaluated.

Admission to the Ph.D. program is competitive, and in recent years it has been possible to offer admission to approximately 10 percent of the applicants.

Applicants who are eligible should apply for nationally competitive predoctoral fellowships, especially those offered by the National Science Foundation.

Admitted students are typically offered financial support in the form of Stanford Graduate Fellowships, research assistantships, NIH traineeships, or Biology fellowships.

GENERAL REQUIREMENTS

The following requirements must be completed by all students:

1. *First year advising.* Each entering student meets with the first-year advising committee within the first two weeks of Autumn Quarter and again no later than May 15. The committee reviews the student's previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended. Completion of the core curriculum listed below under "Track Specific Requirements" is required of all students.
2. *Ethics*. Students must take a course on the ethical conduct of research: BIO 312 for ecology/evolution/population studies; MED 255 for integrative/organismal and molecular/cellular/developmental/genetic/plant.
3. *Teaching.* Teaching experience and training are part of the graduate curriculum. Each student assists in teaching one course in the department's core lecture (41, 42, or 43) or lab (44X, 44Y) series, and a second course that can be either a core course or other Biology or Hopkins Marine Station course. A third quarter of teaching is required for ecology, evolution, and population studies students.
4. *Seminars.* Graduate seminars devoted to current literature and research in particular fields of biology are an important means of attaining professional perspective and competence. Seminars are presented under individual course listings or are announced by the various research groups. Topics of current biological interest are presented by speakers from Stanford and other institutions. During the first year of study, graduate students are required to attend seminars and make one formal seminar presentation which must be evaluated by a minimum of two Academic Council faculty members.
5. *Fellowship application.* All eligible first and second year students must apply for a National Science Foundation fellowship.
6. *Adviser/lab selection.* By April, each first-year student is required to have selected a lab in which to perform dissertation research and to have been accepted by the faculty member in charge.
7. *Qualifying exam and advancement to candidacy.* During the second year, students are required to write a dissertation proposal which is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. Track-specific deadlines are listed below. Advancement to candidacy depends on satisfactory completion of the dissertation proposal.
8. *Advising meetings.* Students must meet regularly with their advising committees. For more details, see the Biology PhD Handbook.
9. *Publishable manuscript.* Each student must complete one publishable manuscript (paper) for which s/he is the major contributor.
10. *Residency requirement.* A minimum of 135 units of graduate registration is required of each candidate at the time of graduation.
11. *Doctoral dissertation.* A completed draft of the dissertation must be turned in to the student's oral examination at least one month before the oral exam is scheduled to take place. The dissertation must be presented to an oral examination committee comprised of at least five faculty members. In addition, the final written dissertation must be approved by the student's reading committee (a minimum of three approved faculty), and submitted to the Registrar's Office. Upon completion of this final requirement, a student is eligible for conferral of the degree.

TRACK SPECIFIC REQUIREMENTS

In addition to the general requirements listed above, students must also complete requirements within their concentration.

Molecular, Cellular, Developmental, Genetic, and Plant—

1. *First year:*
   a. *core curriculum:** Students are required to take the following courses for a letter grade:
      BIO 203. Advanced Genetics
      BIO 214/BIOC 224/MCP 221. Advanced Cell Biology
      BIO 301. Frontiers in Biology
      (satisfies first-year talk requirement; must be taken Autumn and Winter quarters)
      And one of the following for a letter grade :
      BIOC/BIOPHYS/SBIO 241. Biological Macromolecules
      BIOC 201. Advanced Molecular Biology
      CSB 210. Signal Transduction Pathways and Networks
      MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology
      And three additional courses in the student's area of interest, or as advised by committee. These courses must be offered for at least three units and must be taken for a letter grade.
   b. *lab rotations:** First-year students are required to complete rotations in at least two but not more than three different laboratories. The first rotation must be in a lab in the Department of Biology.

* Written petitions for exemptions to core curriculum and lab rotation requirements are considered by the advising committee and the chair of the graduate studies committee. Approval is contingent upon special circumstances and is not routinely granted.

2. *Second year:* Each student must pass a two-part qualifying exam.
   a. *dissertation proposal:* During Autumn quarter of the second year, the student must prepare a written dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature; deadline is November 1. An oral examination is held after submission of the written proposal to the dissertation advising committee; deadline is November 15. The student's adviser is a silent member of the examination committee; the other members of the dissertation advising committee can provide feedback. Advancement to candidacy is contingent upon completion of the dissertation proposal and oral exam.

Integrative/Organismal—

1. *First year:*
   a. *core curriculum*: Students are required to take BIO 306. Current Topics in Integrative and Organismal Biology. Students specializing in integrative biology may also be asked to take appropriate graduate-level courses as advised by committee.
   b. *first-year paper:* Students must submit a paper that is evaluated by a minimum of two Academic Council faculty members by May 1. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis.
2. *Second year:* Each student must pass a two-part qualifying exam.
   a. *dissertation proposal:* During Spring Quarter of the second year, the student must prepare a written dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature. An oral examination is held after submission of the written proposal to the dissertation advising committee comprised of three faculty members. Advancement to candidacy depends on completion of the dissertation proposal and oral exam. The written proposal is due by May 15, and the oral defense must take place no later than June 15. Advancement to candidacy depends on completion of the dissertation proposal and oral exam.

Ecology, Evolution, and Population Studies—

1. *First year:*
   a. *core curriculum:* Students are required to take BIO 302, 303, 304: Current Topics and Concepts in Population Biology, Ecology, and Evolution.
   b. *first-year paper:* The paper should be read, commented upon, and agreed to as satisfactory by two EcoEvo faculty by May 15. This can be satisfied in a number of ways which all involve new writing**,** undertaken since entering the Stanford program. These may include:
      1. a new draft research manuscript (a previously published paper is not acceptable).
      1. some other piece of new writing, such as a review paper from a course, or an initial literature review of a potential thesis topic. In this case the paper should ordinarily be not less than 10 double-spaced pages in usual sized font, and not more than 10 single spaced pages, plus references. It should be written in the style of a standard scientific paper.
2. *Second year:* Each student must pass a two-part qualifying exam.
   a. *dissertation proposal:* The student should form her/his thesis committee well before the anticipated date of dissertation proposal defense, and should consult committee members in a timely manner to make sure their expectations are clearly understood, and to allow time to produce a professionally effective written proposal. In general, the student should prepare a written document and spoken presentation sufficient to support a 30 minute presentation of the goals of the thesis, typically including preliminary data, models, etc. as appropriate which are relevant to at least the first goal, and should be prepared thereafter to discuss questions raised by the committee in professional scientific depth. An oral examination is held after submission of the written proposal to the dissertation advising committee comprised of three faculty members. The written proposal is due by May 15, and the oral defense must take place no later than June 15. Advancement to candidacy depends on completion of the dissertation proposal and oral exam.

OVERSEAS STUDIES COURSES IN BIOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site or the Bing Overseas Studies web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems. 3 units (2 allowable for the Biology major), Kevin Arrigo, Sophie Dove, Selina Ward, GER:DB:EngrAppSci

OSPAUSTL 20. Coastal Resource Management. 3 units (2 allowable for the Biology major), Ron Johnstone, GER:DB:EngrAppSci

OSPAUSTL 30. Coastal Forest Ecosystems. 3 units (2 allowable for the Biology major), Norman Duke, John Hall, GER:DB:EngrAppSci

WINTER QUARTER

SANTIAGO

OSPSANTG 27. Humans and the Environment: the Great Transition. 3 units, Shripad Tuljapurkar, GER:DBHumanities

SPRING QUARTER

SANTIAGO

OSPSANTG 85. Marine Ecology of Chile and the South Pacific. 5 units, Alvaro Palma, GER:DB:NatSci

BIOLOGY, HOPKINS MARINE STATION

Emeritus: (Professor) David Epel
Director: Stephen R. Palumbi
Associate Director: George N. Somero
Professors: Barbara A. Block, Mark W. Denny, William F. Gilly, Fiorenza Micheli, Stephen R. Palumbi, George N. Somero, Stuart H. Thompson
Assistant Professor: Christopher J. Lowe
Lecturer: James Watanabe
Station Offices: 120 Oceanview Blvd., Pacific Grove, CA 93950
Phone: (831) 655-6200
Email: information@marine.stanford.edu
Web Site: http://hopkins.stanford.edu

Courses offered by Hopkins Marine Station have the subject code BIOHOPK, and are listed in the "Biology, Hopkins Marine Station [BIOHOPK] Courses" section of this bulletin.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. The modern laboratory facilities on the 11-acre campus on Cabrillo Point house nine faculty, all members of the Department of Biology. The Miller Library has a collection of literature in marine science. The Hopkins faculty offers undergraduate and graduate courses in biology which focus on the marine realm and involve topics including oceanography, environmental and comparative physiology, molecular evolution, biomechanics, cellular biology, conservation biology, and neurobiology and behavior. Most courses have laboratory sections that exploit the potential of working with readily available marine plants and animals. Small class sizes encourage close student-faculty interactions. Undergraduates have opportunities to carry out research projects with Hopkins faculty during the academic year or summer months. Courses are offered in Winter, Spring, and Summer quarters.

Courses at Hopkins Marine Station can satisfy many requirements, from the Natural Sciences GER to major and minor requirements in departments housed in the Schools of Engineering, Humanities and Sciences, and Earth Sciences. Students are encouraged to check with their department's student services office to see which courses at Hopkins may be used to fulfill major or minor requirements.

SUMMER PROGRAM AT HOPKINS MARINE STATION

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer's study of marine life. Applications, deadlines, and further information are available at http://hopkins.stanford.edu.

BIOPHYSICS

Emeritus: Harden M. McConnell (Chemistry)
Director: Vijay Pande (Chemistry)
Professors: Russ Altman (Genetics, Medical Informatics), Steve Block (Applied Physics, Biology), Steven Boxer (Chemistry), Axel Brunger (Molecular and Cellular Physiology), Gilbert Chu (Oncology), Mark Davis (Microbiology and Immunology), Sebastian Doniach (Physics, Applied Physics), James Ferrell (Chemical and Systems Biology), Daniel Fisher (Applied Physics), K. Christopher Garcia (Molecular and Cellular Physiology, Structural Biology), Gary Glover (Radiology), Philip C. Hanawalt (Biology), Daniel Herschlag (Biochemistry), Keith O. Hodgson (Chemistry), Theodore Jardetzky (Structural Biology), Chaitan Khosla (Chemical Engineering, Chemistry), Brian Kobilka (Molecular and Cellular Physiology), Eric Kool (Chemistry), Ron Kopito (Biology), Roger D. Kornberg (Structural Biology), Michael Levitt (Structural Biology), Richard Lewis (Molecular and Cellular Physiology), Uel J. McMahan (Neurobiology), Tobias Meyer (Chemical and Systems Biology), W. E. Moerner (Chemistry), Norbert Pelc (Bioengineering, Radiology), Joseph D. Puglisi (Structural Biology), Stephen Quake (Bioengineering), Stephen J. Smith (Molecular and Cellular Physiology), Edward I. Solomon (Chemistry), James A. Spudich (Biochemistry, Developmental Biology), William I. Weis (Structural Biology, Molecular and Cellular Physiology), Richard N. Zare (Chemistry)
Associate Professors: Annelise Barron (Bioengineering), Judith Frydman (Biology), Pehr Harbury (Biochemistry), Craig Levin (Radiology), Vijay Pande (Chemistry), Julie Theriot (Biochemistry)
Assistant Professors: Zev Bryant (Bioengineering), Lynette Cegelski (Chemistry), Xiaoyuan Chen (Radiology), Jennifer Cochran (Bioengineering), Bianxiao Cui (Chemistry), Rhiju Das (Biochemistry), Alexander Dunn (Chemical Engineering), Miriam Goodman (Molecular and Cellular Physiology), KC Huang (Bioengineering), Merritt Maduke (Molecular and Cellular Physiology), Jianghong Rao (Radiology), Ingmar Riedel-Kruse (Bioengineering), Mark Schnitzer (Biology, Applied Physics), Jan Skotheim (Biology), Andrew Spakowitz (Chemical Engineering)

Program Offices: Fairchild Building D118
Mail Code: 94305-5126
Phone: (650) 723-7576
Email: biophysics@med.stanford.edu
Web Site: http://med.stanford.edu/biophysics

Courses offered by the Biophysics Program are listed under the subject code BIOPHYS on the *Stanford Bulletin's* ExploreCourses web site.

The Biophysics Program offers instruction and research opportunities leading to the Ph.D. in Biophysics. Students admitted to the program may perform their graduate research in any appropriate department.

GRADUATE PROGRAM IN BIOPHYSICS

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" section of this bulletin.

A small number of qualified applicants are admitted to the program each year. Applicants should present strong undergraduate backgrounds in the physical sciences and mathematics. The graduate course program, beyond the stated requirements, is worked out for each student individually with the help of appropriate advisers from the Committee on Biophysics. The requirements and recommendations for the Ph.D. degree include:

1. Training in a major with connections to biophysics such as physics, chemistry, or biology, with a quantitative background equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a. CHEM 131, 171, 173, and 175
   b. BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a. SBIO 241 and 242
   b. at least four additional graduate level courses in physical or biological science, with at least one in physical science and one as a literature-based biological science course
   c. BIOPHYS 250
   d. MED 255
4. Opportunities for teaching are available during the first nine quarters, at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken, including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least

three members, including the principal research adviser and at least one member from the Biophysics Program. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.

6. The student must present a Ph.D. dissertation as the result of independent investigation that expresses a contribution to knowledge in the field of biophysics.
7. The student must pass the University oral exam, taken only after the student has substantially completed the dissertation research. The examination is preceded by a public seminar in which the research is presented by the candidate.

CHEMISTRY

Emeriti: (Professors) Hans C. Andersen, John I. Brauman, James P. Collman, Carl Djerassi, Harden M. McConnell, Robert Pecora, John Ross
Chair: Richard N. Zare
Vice Chair: Wray H. Huestis
Professors: Steven G. Boxer, Hongjie Dai, Michael D. Fayer, Keith O. Hodgson, Wray H. Huestis, Chaitan Khosla, Eric T. Kool, Todd J. Martinez, W. E. Moerner, Edward I. Solomon, Barry M. Trost, Robert M. Waymouth, Paul A. Wender, Richard N. Zare
Associate Professors: Christopher E. D. Chidsey, Justin Du Bois, Vijay S. Pande, T. Daniel P. Stack
Assistant Professors: Lynette Cegelski, Bianxiao Cui, Matthew Kanan
Courtesy Professors: Stacey F. Bent, Curtis W. Frank, Daniel Herschlag, Thomas J. Wandless
Courtesy Associate Professors: James K. Chen, Karlene A. Cimprich
Courtesy Assistant Professor: Jianghong Rao
Lecturers: Charles Cox, John A. Flygare, Hillary Hua, Jennifer Schwartz
Director of Undergraduate Laboratories: Hillary Hua

* The curriculum leading to the B.S. degree in Chemical Engineering is described in the "School of Engineering" section of this bulletin.

Department Offices: 121 S. G. Mudd
Mail Code: 94305-5080
Phone: (650) 723-2501
Web Site: http://stanford.edu/dept/chemistry

Courses offered by the Department of Chemistry are listed under the subject code CHEM on the *Stanford Bulletin's* ExploreCourses web site.

Chemistry is central to many scientific disciplines and plays an important role in the emerging areas of biotechnology, catalysis, health, and materials science. Developing new probes of biological molecules, modeling of protein folding and reactivity, manipulation of carbon nanotubes, development of new oxidation and polymerization catalysts, and synthesis of organic molecules for probing ion-channels are all research areas that are pursued actively in the Chemistry Department. The overarching theme of these pursuits is a focus at the atomic and molecular levels, whether this concerns probing the electronic structure and reactivity of molecules as small as dihydrogen or synthesizing large polymer assemblies. The ability to synthesize new molecules and materials and to modify existing biological structures allows the exploration of properties of well-defined systems.

MISSION OF THE UNDERGRADUATE PROGRAM IN CHEMISTRY

The mission of the undergraduate program in Chemistry is to provide students with the fundamental concepts driving the molecular sciences. Students in the program acquire in-depth knowledge of the principles of chemistry, the methodologies necessary to solve problems in the field's subdisciplines through course work and laboratory experiences, and the ability to articulate their ideas effectively to the scientific community. The Chemistry program also has a long-standing tradition of encouraging undergraduate majors to become involved in research during the academic year and through a ten-week summer research program. The major is designed to provide students with excellent preparation for further study in graduate or professional schools as well as careers in chemistry.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. that they understand the mechanics of working problems by correctly solving basic problems using mathematical and theoretical tools.
2. a conceptual understanding of the theory required to execute problems.
3. that they are able to obtain chemical insight from working problems relevant to chemical questions.
4. that they are able to make connections between their solutions to theoretical problems and the physical world.
5. an understanding of the relationship between theory and experiment in order to use theory to determine chemically important information from experimental data.

CHEMISTRY PREMEDICAL RECOMMENDATIONS

The department recommends that students interested in a health profession take the following courses for a letter grade: 31A,B or 31X, 33, 35, 36, 130, 131, 135 or 171, and 181. Historically, these courses have fulfilled the chemistry requirements at most medical schools. For information on medical school advising and resources, please download the Undergraduate Advising and Research publication at http://ual.stanford.edu/pdf/uar_medschool.pdf.

GRADUATE PROGRAMS IN CHEMISTRY

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

CHEMISTRY GENERAL REQUIREMENTS

Placement Examinations—Each new graduate student must take placement examinations upon entrance. These consist of three written examinations of two hours each in the fields of inorganic, organic, and physical chemistry, and cover such material as ordinarily is given in a rigorous one-year undergraduate course in each of these subjects. Students majoring in biophysical chemistry or chemical physics must take examinations in biophysical or chemical physics, physical chemistry, and organic or inorganic chemistry. All placement examinations are given the week before instruction begins in Autumn Quarter, and must be taken at that time. Each new graduate student meets with a member of the graduate study committee to define a program of courses based on results of the placement examinations.

Candidates for advanced degrees must have a minimum grade point average (GPA) of 3.0 for all Chemistry lecture courses as well as for all courses taken during graduate study. Required courses must be taken for a letter grade. Most course work ends in the second year of studies, and students will then focus on full-time dissertation research. All prospective Ph.D. candidates, regardless of the source of financial support, are required to gain teaching experience as an integral part of graduate training. During the period in which a dissertation is being read by members of the faculty, candidates must be available for personal consultation until the dissertation has received final department approval.

CHEMISTRY FELLOWSHIPS AND SCHOLARSHIPS

In addition to school fellowships and scholarships open to properly qualified students, there are several department fellowships in chemistry. Undergraduate scholarships are administered through the Financial Aid Office. Teaching assistantships and research assistantships are open to graduate students. Graduate fellowships, scholarships, and teaching assistantships are administered through the Department of Chemistry.

BACHELOR OF SCIENCE IN CHEMISTRY

Entrance Preparation—Entrance credit in the preparatory subjects of chemistry, physics, and especially mathematics provides

flexibility in creating a four-year schedule for students intending to major in Chemistry.

Requirements—

Chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 132, 134, 151, 153, 171, 173, 174, 175, 176; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43, 44, 45, 46.

Biological chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 132, 134, 151, 171, 173, 176, 181, 183, 184, 185; BIO 42; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43; a graduate-level elective course related to the student's biochemical interests, selected from: CHEM 221, 223, 225, 227, 235, 255, 271, 285, 297, CSB 220, 260, BIOC 241, BIOPHYS 232, BIOE 214, 222B, 300A, 331, 335, BIO 203, 213, 214, 230, or 232; with a strong recommendation for CHEM 227.

In addition, CS 106A and B are recommended for students planning graduate study. All degree courses must be taken for a letter grade. For further information on the undergraduate program, see http://www.stanford.edu/dept/chemistry/academic/under.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM: CHEMISTRY OPTION

FIRST YEAR

Subject and Catalog Number	*Qtr. and Units*		
	A	*W*	*S*
CHEM 31X. Chemical Principles	4		
CHEM 33. Structure and Reactivity		4	
CHEM 35. Organic Monofunctional Compounds			4
CHEM 36. Organic Chemistry Laboratory I			3
MATH 41,42,51. Calculus, Linear Equations	5	5	5

SECOND YEAR

CHEM 130. Organic Chemistry Laboratory II	4		
CHEM 131. Organic Polyfunctional Compounds	3		
CHEM 132. Synthesis Laboratory		3	
CHEM 134. Analytical Chemistry Laboratory			5
MATH 53. Differential Equations			5
PHYSICS 41,43,44. Mechanics, Electricity and Magnetism		4	5

THIRD AND FOURTH YEARS

CHEM 151,153. Inorganic Chemistry		3	3
CHEM 171,173,175. Physical Chemistry	3	3	3
CHEM 174,176. Physical Chemistry Laboratory		4	3
PHYSICS 45,46. Light and Heat	5		

* Elective courses must be used to complete the University Writing, General Education, and Language Requirements. They may also be used to broaden one's background in science and non-science areas and to provide an opportunity for advanced study in Chemistry. Courses offered by other departments that may be of interest to Chemistry majors include BIO 41, 42, 43; CHEMENG 20, 120A,B, 130; CS 106A,B; ECON 1; ENGR 50; MATH 52, 106, 109, 113, 131; MATSCI 50; PHYSICS 110; STATS 60, 110, 116.

American Chemical Society Certification

Students who wish to be certified as having met the minimum requirements of the American Chemical Society for professional training must complete, in addition to the above requirements, CHEM 181 and 183, and 6 units of CHEM 190.

HONORS PROGRAM

A B.S. degree in Chemistry with honors is available to those students interested in chemical research. Admission to the honors program requires a scientific grade point average (GPA) of 3.3 and an overall GPA of 3.0 in all University courses. Beyond the standard B.S. course requirements for each track, 9 units of CHEM 190 research credit, and 9 units of course work need to be completed during the junior and senior academic years. A thesis, approved by a Chemistry research adviser, must be completed during the senior year. Theses must be completed by May 15 to be considered for the Firestone or Golden award. The use of a single course for multiple requirements for honors, major, minor, or coterminal requirements is not allowed. Students who wish to be admitted to the honors program should register in the department student services office in the Mudd Chemistry Building in Spring Quarter of their junior year.

CHEM 190 research units towards honors may be completed, once accepted into the program, in any laboratory within Chemistry or with courtesy faculty in Chemistry. Other chemical research can be approved through a formal petitioning of the undergraduate studies committee. At least 3 units of CHEM 190 must be completed during the senior year. Participation in a summer research program in an academic setting between junior and senior years may be used in lieu of 3 units of CHEM 190. For each quarter, a progress report reflecting the units undertaken is required. This report must be signed by the Chemistry faculty adviser and filed in the department student services office in Mudd Chemistry before the last day of finals in the quarter during which the research is performed.

The 9 units of course work must be completed from courses approved by the undergraduate studies committee and taken for a letter grade. At least six of these units need to be taken from the following CHEM courses: 153, 174, 175, 181, 183, 185, 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 297. Courses from Mathematics (MATH 114 or higher), Physics (PHYSICS 100 or higher), Engineering, and Structural Biology or Biochemistry in the School of Medicine can be used to fulfill this requirement.

CHEMISTRY TEACHING CREDENTIALS

The requirements for certification to teach chemistry in the secondary schools of California may be ascertained by consulting the section on credentials under the "School of Education" section of this bulletin and the Credential Administrator of the School of Education.

MINOR IN CHEMISTRY

Courses required for a minor are CHEM 33, 35, 36, 130, 131, 134, 151, 171. MATH 51 is a pre-requisite for CHEM 171.

MASTER OF SCIENCE IN CHEMISTRY

The Master of Science is available only to current Ph.D. students or as part of a coterminal program. Applicants for the M.S. degree in Chemistry are required to complete, in addition to the requirements for the bachelor's degree, a minimum of 45 units of work and a M.S. thesis. Of the 45 units, approximately two-thirds must be in the department and must include at least 12 units of graduate level lecture courses exclusive of the thesis. Of the 12 units, at least 6 units must be from CHEM 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 276, 277, 280, 285, or 297.

PH.D. MINOR IN CHEMISTRY

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in chemistry must complete, with a GPA of 3.0 or higher, 20 graduate-level units in Chemistry including four lecture courses of at least 3 units each.

CHEMISTRY COURSES

WIM indicates that the course satisfies the Writing in the MAjor requirements.

Note—Lab fees are a minimum of $75 per quarter and are not refundable.

DOCTOR OF PHILOSOPHY IN CHEMISTRY

Graduate students are eligible to become formal candidates for the Ph.D. degree after taking the department placement examinations, satisfactorily completing most of the formal lecture course requirements, and beginning satisfactory progress on a dissertation research project. They then file for admission to candidacy for the Ph.D. degree. This filing must be done before June of the second year of graduate registration.

After taking the departmental placement examinations, students select research advisers by first interviewing members of the Chemistry faculty about their research. Students then file an Application to Start Research form with the Department of Chemistry

graduate study committee and begin research on their Ph.D. dissertation under the supervision of the adviser. All students in good standing are required to start research by the end of Winter Quarter of the first year of graduate registration.

There is no foreign language requirement for the Ph.D. degree.

Candidates for the Ph.D. degree are required to participate continually in the department colloquium (CHEM 300), and in the division seminar of the major subject. In addition, continuous enrollment in CHEM 301 is expected after the student has chosen a research supervisor. As part of graduate training, Ph.D. candidates are required to gain experience as teaching assistants.

Before candidates may request scheduling of the University oral examination, clearance must be obtained from the major professor and the chair of the department's Graduate Study Committee. Conditions that must be fulfilled before clearance is granted vary with the different divisions of the department and may be ascertained by consulting the chair of the committee.

It is the policy of the department to encourage and support in every possible way the pursuit of research and other advanced work by qualified students. Information about faculty members with lists of their recent research publications is found in *Chemistry at Stanford, the Directory of Graduate Research* published by the American Chemical Society, and at http://www.stanford.edu/dept/chemistry/faculty.html.

COURSE REQUIREMENTS

Students may major in biophysical, inorganic, organic, or physical chemistry. All graduate students are required to take six graduate-level lecture courses (course numbers greater than 199) of at least 3 units each in chemistry or related disciplines (for example, biochemistry, electrical engineering, mathematics, pharmacology, physics, and so on), to be selected in consultation with their research adviser and the Graduate Study Committee. At least four of these courses should be taken by the end of the first year. Required courses must be taken for a letter grade.

In addition, students majoring in organic chemistry must take 3 units of CHEM 231 in the second year and 3 units of 233 in the second and third year. Students in physical or biophysical chemistry or chemical physics must take CHEM 271, 273, and 275 in the first year, and 2 units of CHEM 278 in the second and third year. Students majoring in inorganic chemistry must take 3 units of CHEM 258 in the second, third, and fourth year.

CHEMICAL PHYSICS

Students with an exceptionally strong background in physics and mathematics may, upon special arrangement, pursue a program of studies in chemical physics.

CLASSICS

Emeriti: (Professors) Mark W. Edwards, Marsh H. McCall, Jr.,* Susan Treggiari, Michael Wigodsky; (*Professor, Teaching*) Edward Spofford
Chair: Richard Martin (Interim)
Graduate Director: Jennifer Trimble
Undergraduate Director: Maud Gleason
Professors: Alessandro Barchiesi, Andrew M. Devine, Richard P. Martin, Ian Morris (Classics, History), Reviel Netz, Andrea Nightingale (Classics, Comparative Literature; on leave Winter), Josiah Ober (Classics, Political Science), Anastasia-Erasmia Peponi (*Teaching*), M. Rush Rehm (Classics, Drama), Richard Saller (Classics, History), Walter Scheidel (on leave), Michael Shanks, Susan A. Stephens
Associate Professors: Jody Maxmin (Art and Art History, Classics), Grant Parker, Jennifer Trimble
Assistant Professors: Giovanna Ceserani, Christian Kaesser
Courtesy Professors: Chris Bobonich, Ian Hodder, Bissera Pentcheva, Yiqun Zhou
Lecturers: Maud Gleason, John Klopacz

* Recalled to active duty.

Department Offices: Building 110, Main Quad
Mail Code: 94305-2145
Phone: (650) 723-0479
Email: classics@stanford.edu
Web Site: http://classics.stanford.edu

Courses offered by the Department of Classics are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes CLASSART (Classics Art/Archaeology), CLASSGEN (Classics General), CLASSGRK (Classics Greek), CLASSHIS (Classics History), and CLASSLAT (Classics Latin).

The study of Classics has traditionally centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, Classics also explores connections with other ancient cultures and with the modern world, as well as specialized fields such as ancient economics, law, papyrology, and science. The department's faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal, and thematic territories. Studying ancient epic poetry can lead to looking at modern cinema afresh; ancient Athenian politics opens new perspectives on modern politics; and the study of Rome presents parallels with other empires just as Latin illuminates the history of English and the Romance languages. In short, Classics at Stanford is an interdisciplinary subject concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

MISSION OF THE UNDERGRADUATE PROGRAM IN CLASSICS

The mission of the undergraduate program in Classics is to provide students with a broad background centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, students in the Classics program also explore the connections between ancient cultures and the modern world as well as specialized fields such as ancient economics, law, papyrology, and science. The program's faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal and thematic territories. The program is concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. The ability to develop effective and nuanced lines of interpretation.
2. Critical thinking skills using primary source materials.
3. Facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. Well-developed analytical writing skills and close reading skills.

The department offers the following fields of study for undergraduate degrees in Classics:

- Classical Studies
- Ancient History
- Greek
- Latin
- Greek and Latin

The Classical Studies, Greek, and Latin fields of study may also be taken with a Philosophy and Literature focus. The Classics major can be completed in conjunction with a second major in the

sciences or in other humanities departments.

The department also offers minors in: Classical Languages, Ancient History, Literature and Philosophy, and Classical Studies.

BACHELOR OF ARTS IN CLASSICS

Those interested in majoring in Classics are encouraged to declare by the beginning of their junior year, but are urged to discuss their plans with the undergraduate director as early as possible. Students who choose the Greek and Latin field of study (option 5 below) should begin the curriculum as soon as possible because it is difficult to complete the language requirements without an early start; those with no previous knowledge of Latin or Greek should begin study in the freshman year, in a summer program following freshman year, or at the beginning of the sophomore year.

To declare the major, a student must fill out the Declaration of Major on Axess and meet with the undergraduate director in the Department of Classics. At that time, the undergraduate director assigns the student a department adviser. To build a mentoring relationship, students meet with their adviser at least once a quarter. The student should then schedule an orientation with the student services officer. Each student's progress towards fulfillment of the major requirements is recorded in a file kept in the student services officer's office. It is the student's responsibility to work with the adviser to keep this file up to date.

A letter grade is required in all courses taken for the major. No course receiving a grade lower than 'C' is counted toward fulfilling major requirements. Enrollment in an independent study section (CLASSGEN 160) requires the prior approval of the undergraduate director, and a maximum of three such enrollments for a maximum total of 10 units may be counted toward the major.

The B.A. degree may be earned by fulfilling the requirements for one of the following fields of study. Option 6 below describes how to add a Philosophy and Literature focus to some of the maior plans.

1. *Classical Studies:* This field of study is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. This major is recommended for students who wish to study classical civilizations in depth but do not wish to study the languages to the extent required by options 4, 5 and 6. It is not suitable for students who wish to do graduate work in Classics or to teach Latin or Greek in high school, as the language work is insufficient for these purposes. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 176. Majors Seminar (WIM).
   b. at least two courses in Latin or Greek at the 100 level or higher, *or* one course in one of the languages at the 100 level or higher, plus the series 1, 2, 3, or 51, 52 in the other language (or an equivalent approved by the department).
   c. remaining units fulfilled by courses with the prefix CLASSART, CLASSGEN, CLASSHIS, CLASSLAT or CLASSGRK (or IHUM 39A,B or IHUM 69A). Courses listed in the department's cognate course list may also count towards the major with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
2. *Ancient History:* This field of study is declared on Axess. Courses chosen must be approved in advance and in writing by the undergraduate director. Approval should be submitted to the student services officer for the student's academic file. With the written approval of the instructor and the undergraduate director, students may substitute graduate seminars in ancient history for some of these courses. Students are also encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses and must satisfy four requirements:
   a. CLASSGEN 176. Majors Seminar (WIM).
   b. *Core requirement:* majors must take at least two survey courses in ancient history.
   c. *Depth requirement:* majors must take at least 33 units of ancient history and civilization courses, drawn from courses with CLASSHIS, CLASSGEN and CLASSART prefixes. IHUM 39A,B, Inventing Classics, or IHUM 69A, History of the World, may be counted toward this requirement. CLASSGRK and CLASSLAT courses may also count toward this requirement if approved by the undergraduate director.
   d. *Breadth requirement:* majors must take at least 4 units in each of the following areas: archaeology and art; comparative ancient civilizations; and historical and social theory. IHUM 39A,B, Inventing Classics, may be counted toward this requirement. The courses chosen must be approved in advance by the undergraduate director, and are normally chosen from the list of areas below, although courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director. Written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
      1. archaeology and art: for example, any CLASSART course; IHUM 40B, ARCHLGY 1/ANTHRO 3, or any 100-level archaeology course.
      2. comparative ancient civilizations: majors must take a course on the ancient world outside the Mediterranean and western Asia, such as ANTHRO 3, 97/297, 142, 100A.
      3. historical and social theory: for example, ANTHRO 1/201, 90B; SOC 1, 140, 142, 170.
3. *Greek:* This field of study is declared on Axess. Beginning courses in Greek, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 176. Majors Seminar (WIM).
   b. a minimum of 31 units in Greek courses at the 100 level or higher. It is recommended that one of these courses be CLASSGRK 175A, although this course should not be taken until students have completed three years of Greek.
   c. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS (also IHUM 39A,B or IHUM 69A). Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
   d. the introductory Latin sequence CLASSLAT 1, 2, 3, *or* 51, 52, *or* one 100-level course in Latin (recommended); or the Sanskrit sequence SPECLANG 183A,B,C.
   e. it is recommended that students take a course in ancient history.
4. *Latin:* This field of study is declared on Axess. Beginning courses in Latin, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:

a. CLASSGEN 176. Majors Seminar (WIM).
b. a minimum of 31 units in Latin courses at the 100 level or higher. It is recommended that one of these courses be CLASSLAT 175A, although this course should not be taken until students have completed three years of Latin.
c. at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
d. the introductory sequence CLASSGRK 1, 2, 3, *or* 51, 52, *or* one 100-level course in Greek (recommended); or the Sanskrit sequence SPECLANG 183A,B,C.
e. it is recommended that students take a course in ancient history.

5. *Greek and Latin:* This field of study is declared on Axess. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a. CLASSGEN 176. Majors Seminar (WIM).
   b. 30 units in Greek courses and the same number in Latin. It is recommended that students take either or both CLASSGRK or CLASSLAT 175A, although these courses should not be taken until students have completed three years of the respective language.
   c. it is recommended that students take a course in ancient history and/or the Sanskrit sequence SPECLANG 183A,B,C.
6. *Philosophy and Literature Focus*: Students who wish to add a Philosophy and Literature focus to the Classical Studies, Greek, Latin, or Greek and Latin majors should also take the courses listed below:
   a. PHIL 81. Philosophy and Literature.
   b. PHIL 80. Writing in the Major (WIM) in the Philosophy department.
   c. one course in each of the following areas:
      1. aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2. philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3. history of philosophy (above 100 level).
   d. two related courses in Classics or Philosophy. Students may double count a Classics course in Philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
   e. *Philosophy and Literature capstone seminar*—This year's capstone seminars are COMPLIT 226/GERLIT 242: Narrative and Ethics (Winter), FRENGEN 284/ITALGEN 284: Poetry and Philosophy (Autumn), and RELIGST 271A: Dante's Spiritual Vision (Autumn). One of these courses must be taken in the student's senior year.

Note 1: University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major program in the department; work done in other universities or colleges is subject to department evaluation.

HONORS PROGRAM

A minimum grade point average (GPA) of 3.6 within the major is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. A preliminary proposal, approved by the supervisor, is due April 15 of the junior year, and a final version is due at the beginning of the senior year. The proposal must outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if a suitable faculty supervisor is available and if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers, such as art, Greek, Latin, history, literature, or philosophy. If the proposal is approved, the student may sign up for CLASSGEN 199, Undergraduate Thesis: Senior Research, during the senior year for a maximum of 6 units per term, up to an overall total of 10 units. Honors are awarded only if the essay receives a grade of 'B+' or higher from the supervisor and a second reader, who is chosen by the department. In addition, students must graduate with a GPA of 3.6 or higher within the major to receive honors.

STUDY ABROAD

Funding—Undergraduates whose record in Classics indicates that they are qualified may apply for funding from the Department of Classics. Students must submit a proposal to the undergraduate director as part of the Undergraduate Summer Research Grant Application; see the undergraduate page at http://classics.stanford.edu for the application. The proposal should include an itemized list of expenses based on the fees charged by the program, including room, board, tuition, and other expenses. Food expenses are not normally reimbursed unless they are an integral part of the program package. Limited funding is available each year; preference is shown to students with strong records.

Programs—

1. *Rome:* Classics majors are encouraged to apply for the Intercollegiate Center for Classical Studies in Rome, which is managed by Duke University for about 50 constituent colleges and universities (http://studyabroad.duke.edu/home/Programs/Semester/ICCS_Rome). It is open to Stanford majors in Classics, History, and Art History. All courses receive full credit at Stanford and may be applied to the respective major. Students interested in this program should consult the undergraduate director and the ICCS representative in the Department of Classics as early as possible in their career at Stanford to plan their course preparation and application. Competition is strong, and applicants are expected to have taken one or more courses in Roman history and at least one year of Latin before they arrive in Rome. Brochures are available at the department office. ICCS now also offers a program in Sicily, http://studyabroad.duke.edu/home/Programs/Semester/ICCS_Sicily.
   Other programs offer a quarter, semester, or summer session in Rome. Interested students should consult with the Bing Overseas Studies Program (http://bosp.stanford.edu).
2. *Greece:* students are encouraged to apply for the summer session at the American School of Classical Studies in Athens (http://ascsa.edu.gr). The school is recommended principally for Classics majors with at least two years of ancient Greek. A student wishing to apply should prepare by taking courses in Greek history, archaeology, and art; beginning modern Greek is strongly recommended. Applicants should see the undergraduate director early in the academic year. Other programs such as College Year in Athens (http://cyathens.org) offer a quarter, semester, or summer session in Greece. Interested students should visit the Bing Overseas Studies Program in Sweet Hall.

MINOR IN CLASSICS

The undergraduate director meets with each student who opts for a minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Students who minor in Classics are required to take CLASSGEN 176, Majors Seminar, which is writing intensive.

Students may choose among four minors in Classics:

1. *Classical Language*s: students are required to take a minimum of five courses in Greek or in Latin. In addition to the five re-

quired courses, students must take CLASSGEN 176, Majors Seminar. Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all above the 100 level; for example, CLASSGRK 1, 10, plus CLASSLAT 103, 111, 175.

2. *Ancient History:* students are required to take a minimum of five courses in history, art history, and archaeology. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on historical topics or authors may count toward this minor.
3. *Literature and Philosophy:* students are required to take a minimum of five courses in classical literature or philosophy, including classical science. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor.
4. *Classical Studies*: students are required to take a minimum of five courses in Classics (CLASSART, CLASSGEN, CLASSGRK, CLASSHIS, CLASSLAT) plus the majors seminar (CLASSGEN 176).

MASTER OF ARTS IN CLASSICS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

I and II. Language and Literature, and Philosophy Fields of Study—Students who have completed an undergraduate major in Classics (Greek, Latin, or Greek and Latin fields of study) or equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies fields of study) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.
2. Completion of one Greek course at the 100 level (if the undergraduate major field of study was Latin) or one Latin course at the 100 level (if the undergraduate major field of study was Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin field of study).
3. Passing an examination testing the candidate's ability to translate into English from a selected list of Greek and/or Latin authors.
4. Completion of the 275A,B sequence in at least one language (Latin or Greek).
5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
6. A reading examination in French or German; these examinations are administered every quarter.
7. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In this case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above.

III. Classical Archaeology—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field, may be accepted as candidates for the M.A. degree in Classics with a Classical Archaeology field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.
2. Completion with a grade of 'B' or higher of at least 15 units of graduate-level courses in classical archaeology, not including CLASSART 302.
3. Passing an examination designed to test the candidate's ability to translate into English from either ancient Greek or Latin.
4. Completion with a grade of 'B' or higher of CLASSART 302, Classical Archaeology: Experiences of the Discipline, or an equivalent course on the history of thought in classical archaeology approved by the Classics department's graduate committee.
5. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
6. Passing a reading examination in French, German, or Italian. These examinations are administered every quarter.
7. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In their case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above.

IV. Ancient History—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field may be accepted as candidates for the M.A. degree in Classics with an Ancient History field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing 30 units of graduate courses and 15 additional units of work at the 100 level or higher.
2. Satisfactory completion of 20 units of graduate-level courses in Classics and of 10 units of graduate-level courses in other programs.
3. Satisfactory completion of 15 additional units of courses in either ancient Greek or Latin.
4. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the Graduate Committee as

an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
5. Passing a reading examination in French, German, or Italian. These examinations are administered every quarter.
6. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also (on the recommendation of the department) become candidates for the M.A. degree. In their case, requirement 4 above is waived provided that they have completed some work beyond the course requirements listed under requirements 1 and 2 above.

COTERMINAL BACHELOR'S AND MASTER'S DEGREE IN CLASSICS

Stanford students in the undergraduate major who are interested in postgraduate work in Classics may apply for Stanford's coterminal master's program. Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in Classics, as well as general and major requirements for the B.A. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree. Applicants must have a minimum GPA of 3.7 in the major, and no incompletes on record. Undergraduate course work in Greek and Latin is normally a prerequisite for graduate-level work. To apply, students should submit the Application for Admission to Coterminal Master's Program form, two letters of recommendation from Classics faculty, a sealed, official copy of their undergraduate transcript, a 1-3 page statement of purpose and a 10-15 page writing sample. GRE scores are not required. Applications are due in early January of your intended graduation year; please see the departmental website, http://classics.stanford.edu for the specific deadline.

For University coterminal degree program rules and University application forms, see the Undergraduate Academic Life web site. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin.

DOCTOR OF PHILOSOPHY IN CLASSICS

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and ancient philosophy.

I. *Language and Literature*—Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. These must include:
   a. Greek and Latin survey sequence (CLASSGEN 207-208).
   b. Greek and Latin syntax sequence (CLASSGRK 275A,B *and* CLASSLAT 275A,B).
   c. Semantics of grammar sequence (CLASSGEN 205A,B).
   d. Twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department. The other two seminars may be in Classics, from other departments (with the graduate director's approval), and/or directed readings. However, no more than two directed readings can be taken. Classics seminars are generally offered for 4-5 units. In some cases, instructors allow a student to complete a seminar for 4 units without requiring a written paper but with completion of all other requirements.
2. Examinations:
   a. Students must take Greek and Latin translation exams at the end of each survey sequence (the end of the first and second years). These exams are based on the Greek and Latin reading lists available on the Classics Department web site at: http://classics.stanford.edu. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the same year if the student chooses. However, students are obligated to take the exam in the language which the survey has covered that year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of 'B-' or higher, on every passage, is required to pass. If a student does not attain a 'B-', the exam must be retaken later in the summer before registering for the Autumn Quarter, in order to continue in the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at his or her own expense; the department does not cover tuition in these instances. The exam can only be retaken once.
   b. Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French, with consent of the graduate director. Students arrange with the student services officer to take the exam. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   c. At the beginning of Autumn Quarter of the third year, students take general examinations in four of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, and Roman history. Students select the fields in consultation with the graduate director no later than June of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent); students need to confer with the professor overseeing the exam. General examinations must be taken by October of the third year.
   d. The University oral examination, which is a defense of the candidate's dissertation.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.
5. A typical program for a graduate student in Classics is as follows. First year: CLASSLAT 275A,B (6 units), CLASSGRK 275A,B (6 units), CLASSGEN 205A,B, Semantics (3 units), either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units), and three elective seminars (12-15 units). Second year: either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units),

five to nine elective seminars (20-45 units), and one to three teaching assistantships (9-27 units). Third year: three to eight elective seminars (12-40 units), one to three teaching assistantships (9-27 units). Fourth year: three quarters of predoctoral dissertation research assistantship (30 units).

II. *Classical Archaeology*—Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the candidate's fourth year.
   These must include:
   a. At least three graduate (200 or 300) level courses in Latin and/or Greek literature.
   b. History of Classical Archaeology (CLASSART 201), to be taken as early as possible in the candidate's Stanford career.
   c. The interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeology theory and a course on archaeological methods.
   d. At least one further course outside the Classics department.
   e. At least five graduate seminars in classical archaeology.
   f. At least three graduate seminars in ancient history.
   g. Students may petition to count independent study courses in place of up to two required courses, but no more.
   h. Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.
   i. Students are urged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training.
   j. All students are expected to take part in archaeological fieldwork in the classical world areas.
   k. At least three consecutive quarters of course work must be taken at Stanford.
2. Examinations:
   a. As soon as students arrive, they must take a diagnostic exam in either Greek or Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
   b. Reading examinations in two of the following languages: French, German, Italian, and modern Greek. Candidates may petition to substitute a different modern language for one of these, if their area of specialization requires it. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   c. A translation examination from Latin or Greek into English. This examination must be taken either at the end of the first year or at the end of the second year. A grade of 'B-' or higher on every passage is required to pass. If a student does not attain a 'B-,' the exam must be retaken later in the summer before registering for Autumn Quarter, in order to continue in the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at his or her own expense; the department does not cover tuition in these instances. The exam can only be retaken once.
   d. General examinations in Greek archaeology and Roman archaeology, and two of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, Roman history. Candidates select the fields in consultation with the graduate director no later than the first week of Spring Quarter of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year.
   e. The University oral examination, which is a defense of the candidate's dissertation.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

III. Ancient History—Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. These must include:
   a. In the Autumn Quarter of the first year, Approaches to History (HISTORY 304), offered in the History department.
   b. Two proseminars. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. The department should offer one each year, but students may also fulfill this requirement by doing a directed reading, or (with the approval of the ancient history track adviser) by taking a course at another university with which Stanford has an exchange agreement.
   c. Three skills courses relevant to the individual student's chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. The skills courses can also be used to learn other ancient or modern languages, either by course work or directed reading. Students need to consult with their advisers and the graduate director to determine appropriate skills courses.
   d. Ten graduate seminars: These normally have course numbers in the 200s, 300s, or 400s. Most of these are taken in the department, but students may also take seminars outside the department or at another university with which Stanford has an exchange agreement. Approval from the ancient history adviser and the graduate director must be obtained prior to exercising this option. While only two of the ten seminars can be replaced by directed readings, up to three additional seminars may be taken outside the department. This leaves five ancient history seminars that must be chosen from those in the department. Other Classics graduate seminars may be substituted for these ancient history seminars, with approval of the ancient history track adviser.
   e. The range and sequence of other courses to be taken depend on which of the following two options the student selects within the Ancient History track.
      1. *Option 1*: Students focus more on one language. This requires students to take: the three quarter survey

course in either Greek or Latin (CLASSGEN 207A-C or CLASSGEN 208 A-C); the fifteen-week syntax course in the same language (CLASSGRK 275A,B or CLASSLAT 275A,B); one quarter of the survey course sequence in the other language; and the two quarter Semantics of Grammar sequence (CLASSGEN 205A,B).

1. *Option 2:* Students emphasize broader linguistic skills. This requires students to take the three quarter survey sequence in both Greek and Latin (CLASSGEN 207A-C and 208A-C).

2. Examinations:
   a. As soon as students arrive, they take diagnostic exams in two areas of ancient history. Choices are: Egyptian, Greek, and Roman history. The test is mainly on narrative history, especially important names, dates, and events. Depending on performance, students may be asked to sit in on the undergraduate history courses and take directed reading or a graduate survey if offered. Reading lists are available upon request.
   b. Students must take the final offered at the end of each quarter of Greek or Latin survey (for Option 1 above) or both Greek and Latin surveys (for Option 2 above). Students must earn a 'B-' or higher on each final to pass.
   c. Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French with consent of the graduate director. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   d. Students must pass general exams in two areas in history (Egyptian, Greek, or Roman) and two of the following fields: Greek literature, Latin literature, Greek archaeology, Roman archaeology, or ancient philosophy. Students select the fields in consultation with the graduate director no later than June of their second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year. In preparing for the general examinations, candidates are expected to make full use of relevant secondary material in modern languages. They should therefore plan to satisfy the requirements in French and German as soon as possible, preferably before the translation examinations.
   e. The University oral examination which is a defense of the candidate's dissertation.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Candidates are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

IV. Joint Program in Ancient Philosophy—This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

Candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. These must include:
   a. All the requirements listed for the language and literature specialization in the graduate program in Classics (see "I" above).
   b. Three courses in the Philosophy department (including 100/200 and two courses at the 200 level or higher). These include:
      1. one course in logic which can be fulfilled at the 100 level or higher
      1. one course in aesthetics, ethics, or political philosophy
      2. one course in metaphysics, epistemology, philosophy of mind, or philosophy of science.
   c. At least three courses in ancient philosophy at the 200 level or above, one of which must be in the Philosophy department.
   d. All courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12 seminar requirement in the Language and Literature track in the Classics department).
2. *Examinations:* The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

PH.D IN CLASSICS AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Classics and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being

accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact Denise Winters at 650-724-1333 for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the Stanford Bulletin's ExploreCourses web site.

CLASSICS AND A MINOR FIELD

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities, or classical linguistics. Requirements for the minor field vary, but might be expected to involve about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam (dissertation defense). Such a program is expected to take five years. The department encourages such programs for especially able and well prepared students. See the department *Graduate Handbook* for more information. The following timetable would be typical for a five-year program:

First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.

Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.

Third Year: course work, both in Classics and the minor field. General examinations in Classics.

Fourth Year: remaining course work, both in Classics and the minor field. General examination in the minor field. Preparation for dissertation.

Fifth Year: dissertation, University oral examination.

PH.D. MINOR IN CLASSICS

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the 100 level or above, and at least one course at the graduate (200) level.

OVERSEAS STUDIES COURSES IN CLASSICS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

WINTER QUARTER

FLORENCE

- OSPFLOR 43.The Invention of the Book. 3-5 units, Reviel Netz, GER:DB:Hum
- OSPFLOR 45. Harmony: Ancient Science in the Italian Renaissance. 3-5 units, Reviel Netz, GER:DB:Hum

COMMUNICATION

Emeriti: (Professors) Henry S. Breitrose, Donald F. Roberts; *(Professor, Teaching)* Marion Lewenstein
Chair: James S. Fishkin
Director, Institute for Communication Research: James S. Fishkin
Director, John S. Knight Fellowships for Professional Journalists: James R. Bettinger
Director, Media Studies: Byron Reeves
Director, Undergraduate Studies: Fred Turner
Deputy Director, John S. Knight Fellowships for Professional Journalists: Dawn E. Garcia
Director, Journalism: Ann Grimes
Professors: James S. Fishkin, Theodore L. Glasser, Shanto Iyengar, Jon Krosnick, Clifford Nass, Byron B. Reeves
Associate Professors: Jeremy Bailenson, Fred Turner
Courtesy Professors: Jan Krawitz, Walter W. Powell, Kristine M. Samuelson
Visiting Lorry I. Lokey Professorship in Professional Journalism: Ann Grimes
Visiting Hearst Professional in Residence: Joel Brinkley
Lecturers: Thomas Hayden, Geri Migielicz, Gary Pomerantz, Howard Rheingold, Alice Siu, David Voelker, James Wheaton
Department Offices: McClatchy Hall, Building 120, Room 110
Mail Code: 94305-2050
Phone: (650) 723-1941
Web Site: http://comm.stanford.edu

Courses offered by the Department of Communication are listed under the subject code COMM on the *Stanford Bulletin's* ExploreCourses web site.

Stanford's Department of Communication focuses on media in all its forms. The department studies the processes and effects of mass communication: the nature and social role of the various media; their structure, function, and ethics; and their impact on the political system, culture, and society. In this context, it considers not only traditional mass media, such as newspapers, magazines, radio, television, and film, but also information technology, online media, virtual reality, and the Internet. Students are trained as social scientists who can study the media and as potential practitioners in the use of the media in journalism, mass communications, and digital media. The department combines theory and practice and fosters individual research opportunities for its students, employing both quantitative and qualitative approaches.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The Institute for Communication Research offers research experience primarily to advanced Ph.D. students.

The John S. Knight Fellowships Program brings outstanding journalists to the University to study and do research for an academic year. While here, they focus on issues, challenges and opportunities of journalism innovation, entrepreneurship and leadership. The John S. and James L. Knight Foundation sponsors twelve U.S. journalists. They are joined by eight International Fellows sponsored by the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, Yahoo! Inc., the Shinyoung Journalism Fund and others.

MISSION OF THE UNDERGRADUATE PROGRAM IN COMMUNICATION

The mission of the undergraduate program in Communication is to expose students to a broad-based understanding of communication theory and research. Students in this major are expected to become familiar with the fundamental concerns, theoretical approaches, and methods of the field, and to acquire advanced knowledge in one or more sub-areas of the discipline. This is accomplished by several levels of study: a core curriculum; intermediate-level electives; and internships. Majors also have the opportunity to do advanced research projects. The department is committed to providing students with analytical and critical skills needed for success in graduate programs, professional schools, or immediate career entry.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of communications.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of communications.

ADMISSION

Prospective Undergraduates—Applications are available online at http://admission.stanford.edu

Prospective Coterminal Students—Applications are available online at http://studentaffairs.stanford.edu/sites/default/files/registrar/files/CotermApplic.pdf

Prospective Graduate Students—Applications are available online at at http://gradadmissions.stanford.edu.

The department requires that applicants for graduate admission submit verbal and quantitative scores from the Graduate Record Examination (GRE). Admission to each graduate degree program is competitive, based on the pool of applicants each year rather than on standard criteria that can be stated in advance. The GRE should be taken no later than early November prior to the early December application deadline.

THE INSTITUTE FOR COMMUNICATION RESEARCH

The Institute is an office of project research for the faculty of the Department of Communication and operates under grants to faculty from government, industry, and non-profit organizations. Research assistantships are often available to qualified Ph.D. students in Communication.

BACHELOR OF ARTS IN COMMUNICATION

PREPARATION

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

COMM 1A. Media Technologies, People, and Society or COMM 1B. Media, Culture, and Society

COMM 106. Communication Research Methods

COMM 108. Media Processes and Effects

Students interested in declaring the major should apply via Axess and meet with the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

PROGRAM OF STUDY

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concerns, theoretical approaches and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication: institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities including professional print journalism, some of which are funded by the department's Rebele Internship Program.

The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum, intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of senior projects and honors theses.

All undergraduate majors are required to complete a set of core communication courses which include COMM 1A. Media Technologies, People, and Society (5 units) or COMM 1B. Media, Culture, and Society (5 units); COMM 106. Communication Research Methods (5 units); COMM 108. Media Processes and Effects (5 units), and COMM 120. Digital Media in Society (WIM, 5 units). Core courses are usually given only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106. Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the areas described below. Many of the courses require core courses as prerequisites. Majors select a total of four area courses, taking at least one from each area.

Area I: Communication Processes and Effects—Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals and include the following courses: COMM 137, 160, 162, 166, 168, 169, 172, 326.

Area II: Communication Systems and Institutions—Area II considers the roles and interaction of institutions such as broadcasting, journalism, constitutional law, and business within communication and mass communication contexts and includes the following courses: COMM 104, 116, 117, 120, 125, 131, 140, 147, 182, 212.

The remainder of the 60 required units may be fulfilled with any elective Communication courses or cross listed courses in other departments.

To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately 12 courses) in the department. No more than 10 units of course work outside of the department, transfer credit, or Summer Session credit may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the major. Only courses with a grade of C- or above count towards the major.

HONORS PROGRAM

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units, culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have: (1) successfully completed both a research methods and statistics course, (2) selected an adviser, and (3) submitted an application to the department by the end of their junior year. An application may be picked up outside Room 110, Building 120.

Students are expected to make steady progress on their honors thesis throughout the year.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill communication elective credit but must be completed and a letter grade submitted prior to graduation. A student

failing to fulfill all honors requirements may still receive independent study credit for work completed, which may be applied toward fulfilling major requirements.

The designation "with honors" is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:

1. complete an honors thesis;
2. maintain a distinguished GPA in all Communication course work;
3. are recommended by the Communication faculty.

MINOR IN COMMUNICATION

PREPARATION

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following:

- COMM 1A. Media Technologies, People, and Society or COMM 1B. Media, Culture, and Society
- COMM 106. Communication Research Methods
- COMM 108. Media Processes and Effects

Students interested in declaring the minor should do so no later than Spring Quarter of their junior year by applying via Axess and meeting with the student services administrator in Building 120, Room 110A, during scheduled office hours.

PROGRAM OF STUDY

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

Students are required to take 35 units (approximately 7 courses), not counting statistics, to complete the minor. The curriculum consists of three introductory communication core courses that include COMM 1A. Media Technologies, People, and Society (5 units), or COMM 1B. Media, Culture, and Society (5 units); COMM 106. Communication Research Methods (5 units); and COMM 108. Media Processes and Effects (5 units). The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106. Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 35 units to complete the Communication minor.

The remainder of the 35 required units may be fulfilled with any intermediate-level elective Communication courses or cross-listed courses in other departments. No more than 5 units of course work outside of the department, transfer credit, or Summer Session credit may be applied to meet department requirements. Communication minors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the minor. Only courses with a grade of C- or above count towards the minor. Some courses are not given every year. Refer to ExploreCourses for details.

Core courses are usually offered only once annually:

Prerequisite—introductory statistics course (for example, PSYCH 10)

Core Courses—COMM 1A or 1B, 106, 108

Area I: Communication Processes and Effects—a minimum of one course from COMM 137, 160, 162, 166, 168, 169, 172, 326

Area II: Communication Systems/Institutions—a minimum of one course from COMM 104, 116, 117, 120, 125, 131, 140, 147, 182, 212

Elective courses—totaling 10 units.

MEDIA STUDIES COTERMINAL MASTER'S PROGRAM

The Department of Communication offers current Stanford University undergraduates a one-year coterminal program with an M.A. emphasis in Media Studies specializing in either social sciences or journalism. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

Admission—Applications for coterminal study must be submitted at least four quarters in advance of the expected master's degree conferral date. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications must be submitted no later than November 17, 2010 for admission beginning in either Winter or Spring Quarter 2010-11 or Autumn Quarter 2011-12. Journalism track students may begin the program only in Spring Quarter of their senior year. Requirements include: Application for Admission to Coterminal Master's Program form, preliminary program proposal, statement of purpose, three letters of recommendation from Stanford professors, a written statement from a Communication professor agreeing to act as a graduate adviser (social sciences track only), three samples of writing (journalism track only), and a current unofficial Stanford transcript. GRE scores are not required. Coterminal applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

Requirements—The Media Studies coterminal master's program provides a broad introduction to scholarly literature in mass communication and offers a social sciences or journalism track. Journalism track students may begin the program only in Spring Quarter of their senior year during which time one elective course is taken towards the master's program and any remaining requirements for the undergraduate degree are completed. In the following academic year journalism track students follow the same curriculum as students in the Graduate Program in Journalism (see Master of Arts-Journalism section), less one elective course. Journalism track students may be required to complete more than 45 units. Social Science track students need to satisfy the following four basic requirements:

1. *Required Units and GPA:* students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. Courses must be taken for a letter grade if offered. Courses in related areas outside the department must be approved by the student's adviser. A minimum of 36 units must be in the Communication department. No more than two courses (not including the statistics prerequisite) may be below the 200 level. To remain in good academic standing students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.
2. *Core Requirements:* students must complete COMM 206, 208, and a statistics course. Typically, the statistics requirement is met with STATS 160. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units.
3. *Six Media Studies Courses:* students must complete a minimum of six additional Communication courses from the following list concerned with the study of media. Not all the listed courses are offered every year, and the list may be updated from one year to the next. In addition to the core requirements and a minimum of six courses listed below, students may choose additional courses from the list and any related course approved by the student's adviser.
   - COMM 211. Media Technologies, People, and Society
   - COMM 216. Journalism Law
   - COMM 217. Digital Journalism
   - COMM 220. Digital Media in Society

- COMM 225. Perspectives on American Journalism
- COMM 231. Media Ethics and Responsibility
- COMM 237. The Dialogue of Democracy
- COMM 240. Digital Media Entrepreneurship
- COMM 247. History and Future of Journalism
- COMM 260. The Press and the Political Process
- COMM 262. Analysis of Political Campaigns
- COMM 266. Virtual People
- COMM 268. Experimental Research in Advanced User Interfaces
- COMM 269. Computers and Interfaces: Psychology and Design
- COMM 272. Media Psychology
- COMM 277. Specialized Writing and Reporting
- COMM 326. Human Virtual Representation

4. *The Media Studies M.A. Project:* students following the social sciences track enroll in COMM 290 to complete a project over two consecutive quarters that must be pre-approved and supervised by the adviser. The completed M.A. project must be submitted to the adviser no later than the last day of classes of the second consecutive quarter.

Additional courses are chosen in consultation with an academic adviser.

MASTER OF ARTS IN COMMUNICATION

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The department awards a terminal M.A. degree in Communication with a field of study in Journalism. Applicants for this program are evaluated for admission on different criteria. Work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Stanford students who are completing an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition on Axess. Such students are considered alongside all other doctoral applicants.

JOURNALISM

Stanford's graduate program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues and digital media. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students' understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program's objective is twofold: (1) to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and (2) to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods of their reporting and the quality of their writing.

CURRICULUM

The curriculum includes several required courses, examples of which are shown below, and a master's project:

- COMM 216. Journalism Law
- COMM 217. Digital Journalism
- COMM 225. Perspectives on American Journalism
- COMM 240. Digital Media Entrepreneurship
- COMM 273,274. Public Issues Reporting I,II
- COMM 275. Multimedia Storytelling
- COMM 289. Journalism M.A. Project
- COMM 291. Graduate Journalism Seminar

Additionally, students are usually required to take two specialized writing courses, chosen from a list of four or five, and two approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 45 units.

Except for the Graduate Journalism Seminar and the Journalism Project, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

JOURNALISM PROJECT

The Journalism master's project, a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during Winter Quarter and continues through Spring Quarter. Completed master's projects must be submitted to the project adviser no later than the last day of classes in the Spring Quarter. The project represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students' ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily news media.

DOCTOR OF PHILOSOPHY IN COMMUNICATION

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master's degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication Theory and Research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, human-computer interactions, information processing, information technology, law, online communities, politics and voting, virtual reality, and youth and media. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four years of graduate study (subsequent to completion of the B.A. degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements with grades of 'B+'' or above. Currently these courses include COMM 206, 208, 301, 311, 314, 317, and 318. Students are also required to take STATS 160 and two advanced methods courses.
2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the third academic year of study.
3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, a foreign language, computer programming, or other technical skills.
4. Complete at least two pre-dissertation research projects (the Major Project and the Complementary Project).
5. Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course (COMM 1A, 1B, 106, and 108).

6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.
7. Apply for candidacy by the end of the second year of graduate study.
8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member outside of the Department of Communication.
9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student.

Ph.D. candidacy is valid for five years.

Other requirements and details of the requirements can be found in the document, *Official Rules and Procedures for the Ph.D. in the Department of Communication*, available from the student services administrator of the department.

PH.D. MINOR IN COMMUNICATION

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

OVERSEAS STUDIES COURSES IN COMMUNICATION

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II As Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

COMPARATIVE LITERATURE

Emeriti: (Professors) Joseph Frank, John Freccero, René Girard, Herbert Lindenberger, Mary Pratt; *(Courtesy Professors)* W. B. Carnochan, Gerald Gillespie, David G. Halliburton, Marjorie G. Perloff

Director: David Palumbo-Liu

Chair of Graduate Admissions: Monika Greenleaf

Chair of Graduate Studies: Hans U. Gumbrecht

Chair of Undergraduate Studies: Margaret Cohen

Professors: John Bender (English, Comparative Literature, on leave Spring), Russell Berman (German Studies, Comparative Literature), Margaret Cohen (Comparative Literature), Amir Eshel (German Studies, Comparative Literature), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Iberian and Latin American Cultures, Comparative Literature), Franco Moretti (English, Comparative Literature), Elisabeth Mudimbe-Boyi (French and Italian, Comparative Literature), Andrea Nightingale (Classics, Comparative Literature, on leave Winter), David Palumbo-Liu (Comparative Literature), Patricia Parker (English, Comparative Literature, on leave Autumn), José David Saldívar (Comparative Literature), Ramón Saldívar (English, Comparative Literature), Jeffrey T. Schnapp (French and Italian, Comparative Literature, on leave), Ban Wang (Asian Languages, Comparative Literature)

Associate Professor: Monika Greenleaf (Slavic Languages and Literatures, Comparative Literature)

Courtesy Professors: Nancy Ruttenberg

Lecturers: Petra Dierkes-Thrun

Visiting Professors: Sibylle Baumbach (Winter), Anne Marie Guglielmo (Winter), Kurt Mueller-Vollmer (Winter)

Department Offices: Building 260, Room 108

Mail Code: 94305-2031

Phone: (650) 723-3566

Email: comparativelit@stanford.edu

Web Site: http://complit.stanford.edu

Courses offered by the Department of Comparative Literature are listed under the subject code COMPLIT on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts and Doctor of Philosophy.

The field of Comparative Literature provides students the opportunity to study imaginative literature in all its forms. While other literary disciplines focus on works of literature as parts of specific national or linguistic traditions, Comparative Literature draws on literature from all contexts in order to examine the nature of literary phenomena from around the globe and from different historical moments, while exploring how literary writing interacts with other elements of culture and society. The field studies literary expression through examinations of genres such as novels, epics, drama, and poetry, and new aesthetic forms such as cinema and electronic media. Although Comparative Literature does not restrict its focus to single traditions or periods, it does investigate the complex interplay of the literary imagination and historical experience. Attention is also paid to questions of literary theory, aesthetic philosophy, and cultural interpretation.

Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena with additional tools of inquiry such as literary theory, the relationship between literature and philosophy, and the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the dissemination of particular genres. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read analytically and critically, and a more global knowledge of literature.

MISSION OF THE UNDERGRADUATE PROGRAM IN COMPARATIVE LITERATURE

The mission of the undergraduate program in Comparative Literature is to enhance students' verbal and written communication skills, their ability to read analytically and critically as well as to develop their global knowledge of literature. The program provides students with the opportunity to study imaginative literature in all of its forms, investigating the complex interplay of the literary imagination and the historical experience. Courses in the program focus on literary theory, aesthetic philosophy, as well as cultural interpretation. The program prepares students for a variety of career paths as well as for further study in graduate or professional schools as students learn to think, adapt, and communicate effectively.

The department's undergraduate programs are designed to enhance students' appreciation of literature in all its diversity, particularly through introductory courses that include treatments of

the primary literary genres. The course of study at intermediate and advanced levels is flexible in order to accommodate student interest in areas such as specific geographical regions, historical periods, and interdisciplinary connections between literature and other fields such as philosophy, music, the visual arts, and the social sciences. A Comparative Literature major prepares a student to become a better reader and interpreter of literature, through enhanced examination of texts and the development of a critical vocabulary to discuss them. Attention to verbal expression and interpretive argument serves students who plan to proceed into careers requiring strong language skills. In addition, the major in Comparative Literature provides preparation for students who intend to pursue an advanced degree as a gateway to an academic career.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to interpret a literary text in a non-native language or to compare literary texts from different linguistic traditions, which may be read in translation.
2. a self-reflective understanding of the critical process necessary to read and understand texts.
3. skills in writing effectively about literature.
4. skills in oral communication and public speaking about literature.

GRADUATE PROGRAMS IN COMPARATIVE LITERATURE

The department offers a Doctor of Philosophy and a Ph.D. minor in Comparative Literature.

COMPARATIVE LITERATURE COURSE CATALOG NUMBERING SYSTEM

Course numbering system:

Course Topic	*Number*
Authors	10–19
Genre	20–29
Periods and Movements	30–39
Cultures	40–49
Philosophy and Theory	50–59
Required courses:	101, 121, 122, 123, 199, 369, 396L

BACHELOR OF ARTS IN COMPARATIVE LITERATURE

The major in Comparative Literature requires students to enroll in a set of core courses offered by the department, to complete electives in the department, and to enroll in additional literature courses, or other courses approved by the Chair of Undergraduate Studies, offered by other departments. This flexibility to combine literature courses from several departments and to address literature from multiple traditions is the hallmark of the Comparative Literature major. Students may count courses which read literature in translation; however, students, and especially those planning to pursue graduate study in Comparative Literature, are encouraged to develop a command of non-native languages.

Declaring the Major—Students declare the major in Comparative Literature through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

Advising—Students majoring in Comparative Literature should consult with the Chair of Undergraduate Studies at least once a year. The chair monitors progress to completion of the degree. Students are also encouraged to develop relationships with other faculty members who may act as mentors.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Chair of Undergraduate Studies and is contingent upon the Office of the University Registrar's approval of transfer credit. To that end, students abroad are advised to save syllabi, notes, papers, and correspondence.

Honors College—The Department of Comparative Literature encourages honors students to enroll in the honors college scheduled during the weeks preceding the beginning of every academic year. Applications to the college are available from the DLCL student affairs officer. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

REQUIREMENTS

All majors in Comparative Literature (including honors) are required to complete the following courses:

1. COMPLIT 101, What is Literature? (5 units). This gateway to the major is normally taken by the end of sophomore year. It provides an introduction to literature and its distinctions from other modes of linguistic expression, and a fundamental set of interpretive skills. This course fulfills the Writing in the Major requirement.
2. *The genre core—*
   a. COMPLIT 121, Poems, Poetry, Worlds: An Introductory Course
   b. COMPLIT 122, Literature as Performance
   c. COMPLIT 123, The Novel, the World (5 units each)
   Students should complete these courses as soon as possible. Each course draws on examples from multiple traditions to ask questions about the logic of the individual genres.
3. COMPLIT 199 (5 units). This senior seminar is designed as a culmination to the course of study while providing reflection on the nature of the discipline. Topics vary.
4. *Electives*—Majors must complete at least 40 units of electives. Three of these electives must be Comparative Literature courses. The remaining courses may be drawn from Comparative Literature offerings, from other literature departments, or from other fields of interdisciplinary relevance to the student's interest. Up to 10 units of IHUM or SLE courses may be counted towards the elective requirement. Electives are subject to adviser consultation and approval.
   Examples of possible Comparative Literature electives include:
   - COMPLIT 61Q. Culture and Conflict in Contemporary Europe
   - COMPLIT 125A. The Gothic Novel
   - COMPLIT 127A. Short Stories from the Arab World
   - COMPLIT 151. Theories of Poetic Life
   - COMPLIT 211. Albert Camus and Jean-Paul Sartre: French Existentialism in the Post-World War II Period
   - COMPLIT 223. Courtly Love in Classical Persian Poetry
   - COMPLIT 242A. China and the World: Aesthetics, Ethics and Literature
   - COMPLIT 246A. Literature and Film of Modern Iran
   - COMPLIT 248A. CSI Vienna: American Culture in Austria since 1980
5. *Total unit load*—Students must complete course work for a total of at least 65 units.

PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Comparative Literature with a special track in interdisciplinary studies at the intersection of literature and philosophy. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and

Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student schedules and course of study must be approved in writing by the adviser, the Chair of Undergraduate Studies of Comparative Literature, and the Chair of Undergraduate Studies of the program. See http://philit.stanford.edu.

A total of 65 units must be completed for this option, including the following requirements:

1. Seven courses taught by Comparative Literature faculty. Of the seven, the following five are required courses:
   - COMPLIT 101, What is Literature?
   - COMPLIT 121, Poems, Poetry, Worlds: An Introductory Course
   - COMPLIT 122, Literature as Performance
   - COMPLIT 123, The Novel, the World
   - COMPLIT 199, Senior Seminar. (5 units each)
   - The remaining two courses must be instructed by Comparative Literature faculty and approved by the Chair of Undergraduate Studies.
2. *Philosophy and Literature Gateway Course* (4 units)—COMPLIT 181 (same as PHIL 81, CLASSGEN 81, ENGLISH 81, FRENGEN 181 and ITALGEN 181). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. *Philosophy Writing in the Major* (5 units)—PHIL 80. Prerequisite: introductory philosophy class.
4. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units)—One course from the PHIL 170 series.
5. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units)—One course from the PHIL 180 series.
6. *History of Philosophy* (ca. 8 units)—Two courses in the history of philosophy, numbered above PHIL 100.
7. *Related Courses* (ca. 8 units)—Two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.
8. One course, typically in translation, in a literature distant from that of the student's concentration and offering an outside perspective on that literary tradition.
9. *Capstone Seminar* (ca. 4 units)—In addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student's choice of a capstone seminar must be approved in writing by the Chair of Undergraduate Studies of Comparative Literature and by the Chair of Undergraduate Studies of the program. For a list of current capstone courses, see http://philit.stanford.edu/programs/capstone.html.
10. *Seminar Paper Requirement—S*tudents must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Chair of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

HONORS PROGRAM

The honors option offers motivated Comparative Literature majors the opportunity to write a senior honors paper. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies and submit a thesis proposal (2-5 pages), an outline of planned course work for the senior year, and proof of a 3.5 GPA or higher within the student's Comparative Literature course work to date. During this quarter, the student may enroll for 2 units of credit for independent research in COMPLIT 189B to prepare this statement and undertake initial planning for the honors paper. The proposal is reviewed by the honors committee, including the Chair of Undergraduate Studies and the chair of the department.

The Chair of Undergraduate Studies designates a faculty tutor appropriate to the topic and a second reader for approved honors papers.

Students in the honors program enroll in DLCL 189 (5 units) in Autumn Quarter of the senior year to refine the project description and begin research in preparation for composing the honors paper. During Winter Quarter of the senior year, the student enrolls in COMPLIT 189A (5 units), independent study with the faculty tutor, to draft the honors paper.

At the end of the quarter, the student submits a completed draft to the tutor. If approved, two copies are forwarded to the honors committee, which ultimately awards honors. If revisions are advised, the student has until the fifth week of Spring Quarter to submit the final paper. Students who did not enroll in a 189B course in the junior year may enroll in COMPLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser. 10-12 units of course work associated with the honors paper (DLCL 189 and COMPLIT 189A and 189B) may be counted toward the 65 units required for the major.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Typically, however, honors papers are 40-70 pages.

Honors Awards—The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-wide awards. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

MINORS IN COMPARATIVE LITERATURE

The undergraduate minor in Comparative Literature represents an abbreviated version of the major. It is designed for students who are unable to pursue the major but who nonetheless seek an opportunity to gain a deeper understanding of literature. Plans for the minor should be discussed with the Chair of Undergraduate Studies. The minimum number of units required for a minor at Stanford is 20. Requirements for the minor in Comparative Literature include:

1. COMPLIT 101. What is Literature?
2. One course from the genre core: COMPLIT 121, 122, or 123
3. At least two other Comparative Literature courses.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

DOCTOR OF PHILOSOPHY IN COMPARATIVE LITERATURE

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program is designed for students whose linguistic background, breadth of interest in literature, and curiosity about

the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Language courses at the 100- or 200- level may be taken with approval from the Chair of the department or the Chair of Graduate Studies. Applicants are expected to take an intensive course in the third language before entrance.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available, from a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work closely with faculty throughout the period of study. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant's present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.
2. A description of the applicant's area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate their most likely prospective primary field, including the literatures on which they intend to concentrate.
3. All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.
4. Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.
5. Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.
6. Completed applications are due on December 7, 2010.

For further information see the Graduate Admissions web site.

DEGREE REQUIREMENTS

Residence—A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation. At least three consecutive quarters of course work must be taken at Stanford.

Languages—Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student's three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching—Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department's minimum teaching requirement is a total of three quarters.

Minimum Course Requirements—Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student's primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.

Examinations—Three examinations are required. The first two are one-hour exams, taken at the end of the first and second year of study. The first of these is on literary genre, designed to demonstrate the student's knowledge of a substantial number of literary works in a single genre, ranged over several centuries and over at least three national literatures. This exam is also designed to demonstrate the student's grasp of the theoretical problems involved in his or her choice of genre and in the matter of genre in general. The second of these examinations is on literary theory and criticism, designed to demonstrate the student's knowledge of a particular problem in the history of literary theory and criticism, or the student's ability to develop a particular theoretical position. In either case, this exam should demonstrate wide reading in theoretical and critical texts from a variety of periods. The third and last is the University oral examination.

1. *First One-Hour Examination*: The genre exam is generally administered the second week of April of the student's first year. All first-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Chair of Graduate Studies well in advance of the exam. Students are urged to focus on poetry, drama, or the novel or narrative, combining core recommendations from the department with selections from their individual areas of concentration. Any student who does not pass the exam has the opportunity to retake the exam the second week of May of the same quarter. Students who do not pass this exam a second time may be dismissed from the program.
2. *Second One-Hour Examination*: The theory exam is generally administered the second week of April of the student's second year. All second-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Chair of Graduate Studies well in advance of the exam. Any student who does not pass the exam has the opportunity to retake the exam the second week of May of the same quarter. Students who do not pass this exam a second time may be dismissed from the program.
3. *University Oral Examination*: Students are urged to complete this exam by the end of their third year. The oral exam is individually scheduled, with a committee established by the student in consultation with the Chair of Graduate Studies. The exam covers a literary period, to consist of in-depth knowledge of a period of approximately a century in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures—The department meets at the end of each year to review student progress. Performance on the first one-hour examination, together with class performance and general progress, are taken into consideration. Students are admitted to candidacy upon completion of the first one-hour examination and departmental review. As soon as the student has completed the qualifying procedures, the chair recommends the student for admission to candidacy for the Ph.D.

Colloquium—The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee are ordinarily drawn from the University oral examination committee.

PH.D. IN COMPARATIVE LITERATURE AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a Ph.D. degree in Comparative Literature and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the Stanford Bulletin's ExploreCourses web site.

PH.D. MINOR IN COMPARATIVE LITERATURE

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.
2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE)

Director: José David Saldívar
Associate Director: Tania D. Mitchell
Curriculum Committee: Arnetha Ball, Cheryl Brown, Charlotte Fonrobert, Teresa LaFromboise, Tania Mitchell, David Palumbo-Liu, Gary Segura, Vered Shemtov
Affiliated Faculty and Teaching Staff: Arnetha Ball (Education), David Abernethy (Political Science, emeritus), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Sociology), Karen Biestman (Native American Studies), Albert Camarillo (History), James T. Campbell (History), Martin Carnoy (Education), Clayborne Carson (History), Prudence Carter (Education), Gordon Chang (History), Kathleen Coll (Chicana/o Studies), Karen Cook (Sociology), Michele Dauber (Law), Linda Darling-Hammond (Education), Sergio De La Mora (Chicana/o Studies), Carolyn Duffey (Comparative Studies in Race and Ethnicity), Jennifer Eberhardt (Psychology), Paulla Ebron (Anthropology), Penny Eckert (Linguistics), Harry Elam (Drama), Michele Elam (English), James Ferguson (Anthropology), Shelley Fisher-Fishkin (English), James Fishkin (Communication), Charlotte Fonrobert

(Religious Studies), Estelle Freedman (History), Susana Gallardo (Chicana/o Studies), Gabriel Garcia (Medicine), Leah Gordon (Education), David Grusky (Sociology), Sean Hanretta (History), Georgina Hernandez (Comparative Studies in Race and Ethnicity), Allyson Hobbs (History), Miyako Inoue (Anthropology), Shanto Iyengar (Communication), Tomás Jiménez (Sociology), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Ju Yon Kim (Comparative Studies in Race and Ethnicity), Matthew Kohrman (Anthropology), Jan Krawitz (Art and Art History), Jon Krosnick (Communication), Teresa LaFromboise (Education), David Laitin (Political Science), Sandra Lee (Asian American Studies), Julie Lythcott-Haims (Associate VPUE, Dean of Freshmen and Undergraduate Advising), Liisa Malkki (Anthropology), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Monica McDermott (Sociology), Melissa Michelson (Chicana/o Studies), Tania Mitchell (Comparative Studies in Race and Ethnicity, Education), Cherríe Moraga (Drama), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), Thomas S. Mullaney (History), Stephen Murphy-Shigematsu (Asian American Studies), Hilton Obenzinger (Undergraduate Advising and Research), Susan Olzak (Sociology), Amado Padilla (Education), David Palumbo-Liu (Comparative Literature), Celine Parreñas Shimizu (Asian American Studies), Arnold Rampersad (English), Delphine Red Shirt (Native American Studies), Robert Reich (Political Science), John Rickford (Linguistics), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Michael Rosenfeld (Sociology), José David Saldívar (Comparative Literature), Ramón Saldívar (English), Joel Samoff (History), Stephen Sano (Music), Debra Satz (Philosophy), Gary Segura (Political Science), Vered Shemtov (Division of Literatures, Cultures and Languages), JoEllen Shively (Native American Studies), C. Matthew Snipp (Sociology), Paul Sniderman (Political Science), Stephen Sohn (English), Jayashiri Srikantiah (Law), James Steyer (Comparative Studies in Race and Ethnicity), Ewart Thomas (Psychology), Jeanne L. Tsai (Psychology), Linda Uyechi (Music), Guadalupe Valdés (Education), Gregory Walton (Psychology), Richard White (History), Jeremy Weinstein (Political Science), Michael Wilcox (Anthropology), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Anthropology), Yvonne Yarbro-Bejarano (Iberian and Latin American Cultures), Steven Zipperstein (History)

Teaching Fellows: Regina Arnold, Shantal Marshall, Manwai Ku
Program Office: Building 360, Room 361D
Mail Code: 2152
Email: sgamino@stanford.edu
Phone: (650) 724-2088
Web Site: http://csre.stanford.edu

The Undergraduate Program in Comparative Studies in Race and Ethnicity is home to four areas of study: Asian American Studies, Chicano/a Studies, Comparative Studies, and Native American Studies. Students can pursue a major or minor in any of these four areas, and are encouraged to build their interdisciplinary study around a focus or theme. Students can then select from more than 150 course options from across departments and schools to customize a curriculum. The major requires 60 units of study and a culminating research project (either a senior paper or thesis).

Courses offered by the Program in Comparative Studies in Race and Ethnicity are listed under the subject code CSRE on the Stanford Bulletin's ExploreCourses web site.

Courses offered by Asian American Studies are listed under the subject code ASNAMST on the Stanford Bulletin's ExploreCourses web site.

Courses offered by Chicana/o Studies are listed under the subject code CHICANST on the Stanford Bulletin's ExploreCourses web site.

Courses offered by Native American Studies are listed under the subject code NATIVEAM on the Stanford Bulletin's ExploreCourses web site.

MISSION OF THE UNDERGRADUATE PROGRAM IN COMPARATIVE STUDIES IN RACE AND ETHNICITY

The Interdepartmental Program in Comparative Studies in Race and Ethnicity (CSRE) is an interdisciplinary program offering students the opportunity to investigate the significance of race and ethnicity in all areas of human life.

Devoted to a rigorous analysis of race and ethnicity and using a comparative and interdisciplinary approach, CSRE is committed to promoting and deepening student's understanding of the multiple meanings of racial diversity in the United States and abroad in ways that prepare students for living and working effectively in a multicultural society.

The interdisciplinary and integrated nature of our academic programs means that students take courses from across the university including: anthropology, art, communication, drama, economics, education, history, languages, linguistics, literature, music, philosophy, political science, psychology, sociology, and religion, among others.

LEARNING OUTCOMES

The IDP in CSRE expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the undergraduate program. Students will:

1. Demonstrate an understanding of interdisciplinary approaches to the knowledge of experiences related to race and ethnicity in the United States.
2. Demonstrate the ability to employ diverse analytical resources and comparative modes of study as tools to frame and address research questions.
3. Be critical readers of both primary and secondary sources, who can use and properly cite both types of evidence in their written work.
4. Actively and critically engage in verbal and/or written discussion of issues.
5. Demonstrate analytical writing skills that convey their understanding of the topic.
6. Expand their ability to think critically about issues in political, social, scientific, economic and cultural life stemming from the diversity of experiences related to race an ethnicity.

UNDERGRADUATE PROGRAM IN COMPARATIVE STUDIES IN RACE AND ETHNICITY

MAJORS: CORE CURRICULUM

The Interdepartmental Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Chicana/o Studies, Comparative Studies, and Native American Studies) are offered as part of the the IDP in CSRE. All courses taken for the major must be taken for a letter grade. The directors of the program and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the four majors participate in a common curriculum consisting of at least two core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the core curriculum. African and African American Studies majors take one CSRE core course as part of their program of study.

There are two types of introductory courses taught by senior CSRE-affiliated faculty: core courses that are interdisciplinary and compare across racial and ethnic groups; and foundational courses that focus on a specific racial or ethnic group. The core requirements illustrate how different disciplines approach the study and

interpretation of race and ethnicity and provide a foundation for the student's program of study.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved course list, two of which must be core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading or research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

Courses that fulfill directed reading and research requirements:
ASNAMST 200R. Directed Research (1-5 units)
ASNAMST 200W. Directed Reading (1-5 units)
CHICANST 200R. Directed Research (1-5 units)
CHICANST 200W. Directed Reading (1-5 units)
CSRE 200R. Directed Research (1-5 units)
CSRE 200W. Directed Reading (1-5 units)
NATIVEAM 200R. Directed Research (1-5 units)
NATIVEAM 200W. Directed Reading (1-5 units)

SENIOR SEMINAR

Research and writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X, Senior Seminar, offered in Autumn Quarter. The course takes students through the process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing. This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter.

SPECIAL PROGRAMS

CSRE majors have several unique opportunities available to them. The program supports full-time paid summer research internships for those who apply to complete a self-designed research project in collaboration with a community agency. The Public Policy Institute is a two week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. CSRE also sponsors quarterly luncheons and community programs for all majors and minors.

MURRAY HOUSE

Murray House, 566 Governor's Avenue, is an undergraduate residence with a CSRE focus that is devoted to developing an intellectual community amongst students interested in the study of race and ethnicity. Programs, including an in-house seminar, are developed with the guidance of CSRE faculty to increase the understanding of issues of race and ethnicity amongst its residents through social events and discussions. Students may apply for pre-assignment to Murray House to participate in the CSRE Focus. Contact Residential Education for more information.

HONORS

Majors in each of the study areas who meet academic qualifications (a grade point average of at least 3.5 in courses for their major) may apply for honors. Majors are expected to participate in a Pre-Honors Seminar in Autumn Quarter of Junior year to prepare for honors thesis research. Honors students take CSRE 200X, Senior Seminar (which fulfills the program's WIM requirement), and also enroll in CSRE 200Y and 200Z in Winter and Spring quarters to continue to get peer and faculty support as they write their thesis. An honors colloquium held near the end of Spring Quarter affords students an opportunity to present their research formally. Prizes for best undergraduate honors thesis are awarded annually by the CSRE curriculum committee.

Courses that fulfill honors requirements:
CSRE 199. Pre-Honors Seminar (1-2 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
CSRE 200Y. CSRE Senior Honors Research (1-10 units)
CSRE 200Z. CSRE Senior Honors Research (1-10 units)

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)

Director: Arnetha Ball

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the "African and African American Studies" section of this bulletin.

ASIAN AMERICAN STUDIES

Director: David Palumbo-Liu

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term "Asian American," the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

BACHELOR OF ARTS IN ASIAN AMERICAN STUDIES

A total of 60 units of course work is required for the major.

1. *Core Curriculum*—Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.
2. *Foundational Course*—Majors are required to take one foundational course in Asian American Studies. This may be either HISTORY 59, Introduction to Asian American History, or COMPLIT 148, Introduction to Asian American Cultures.
3. *Area Study*—Majors must complete an additional 40 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five other courses must have an Asian American focus and must be selected from social science and humanities departments. Majors must take two courses offering a comparative perspective on race and ethnicity.
4. *Language Study (optional)*—Students may obtain credit for their study of a related Asian language towards their degree. If students take 15 or more units of an Asian language relevant to Asian American Studies, they may apply 5 of those units toward their Asian American Studies degree.
5. *Senior Paper or Honors Thesis*—All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

ASIAN AMERICAN STUDIES MINOR

A total of 30 units of approved course work is required for the minor. Two CSRE core courses and at least one foundational

course are needed to fulfill the requirements for the minor. Proposals must be approved by the director.

COURSES

Students in Asian American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

CORE COURSES

ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

FOUNDATIONAL COURSES

COMPLIT 148. Introduction to Asian American Cultures (3-5 units)
HISTORY 59. Introduction to Asian American History (5 units)

THEMATIC COURSES

ASNAMST 146S/CSRE 146S/COMPLIT 146. Asian American Culture and Community (5 units)
ASNAMST 173S/CSRE 173S. Transcultural and Multiethnic Lives: Contexts, Controversies, and Challenges (5 units)
ASNAMST 161/CSRE 161. Asian American Immigration and Health (3-5 units)

COGNATE COURSES

COMPLIT 41Q. Ethnicity and Literature (3-5 units)
EDUC 193F. Psychological Well-Being on Campus: Asian American Perspectives (1 unit)
ENGLISH 261B. Bright Lights, Global Cities: Reading Transnational Asia/Pacific Spatial Geographies (5 units)
ENGLISH 362S. Phantoms That Follow: Trauma and Disillusionment in Asian American Literature (5 units)
HISTORY 265. Writing Asian American History (5 units)
MUSIC 17Q. Perspectives in North American Taiko (4 units)

CHICANA/O STUDIES

Director: Gary Segura

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education. Established in 1997, the Chicana/o Studies program affords students an opportunity to explore the culture, society, economy, and politics of this important and growing segment of our national population.

BACHELOR OF ARTS IN CHICANA/O STUDIES

A total of 60 units of course work are required for the major.

1. *Core Curriculum*—Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.
2. *Foundational Courses*—Majors are required to take one foundational course in Chicana/o Studies. This may be either CHICANST 180E, Introduction to Chicana/o Studies or SOC 166, Mexicans, Mexican Americans, and Chicanos in American Society.
3. *Thematic Concentration*—Chicana/o Studies majors select a thematic concentration which allows students to customize their curriculum and to synthesize course work taken across various departments into a coherent focus. Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser.
4. *Senior Paper or Honors Thesis*—All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

CHICANA/O STUDIES MINOR

Students who wish to minor in Chicana/o Studies must complete one core introductory course and one foundational course, either CHICANST 180E or SOC 166. Minors will also select a thematic concentration and choose four additional courses relevant to that theme to customize their curriculum. A total of 30 units of approved course work is required for each minor.

COURSES

Students in Chicana/o Studies may find the following courses useful in fulfilling course requirements in the major or minor.

CORE COURSES

ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

FOUNDATIONAL COURSES

CHICANST 180E/CSRE 180E. Introduction to Chicana/o Studies (5 units)
SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society (5 units)

THEMATIC COURSES

CHICANST 160N/CSRE 160N/DRAMA 17N. Salt of the Earth: Docudrama in (Latino) America (3-5 unis)
CHICANST 189W/CSRE 189W. Language and Minority Rights (3-5 units)
CHICANST 197/CSRE 197/NATIVEAM 197/DRAMA 355. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)
CHICANST 201B/CSRE 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post-Civil Rights Era (5 units)

COGNATE COURSES

EDUC 149. Theory and Issues in the Study of Bilingualism (3-5 units)
EDUC 177. Education of Immigrant Students: Psychological Perspectives (4 units)
EDUC 178X. Latino Families, Languages, and Schools (3-5 units)
EDUC 193B. Peer Counseling in the Chicano/Latino Community (1 unit)
ENGLISH 45/145. Another Way to be: Writing by Women of Color (3-5 units)
ENGLISH 64N. Growing Up in America (3 units)
HISTORY 165. Mexican American History through Film (4-5 units)
ILAC 117N. Film, Nation, *Latinidad* (3-4 units)

ILAC 389E. Race, Gender, and Sexuality in Cultural Representations (3-5 units)
ILAC 280. Latina/o Literature (3-5 units)
POLISCI 125S. Chicano/Latino Politics (5 units)
POLISCI 327. Minority Behavior and Representation (5 units)
SOC 164. Immigration and the Changing United States (5 units)
SPANLIT 193. The Cinema of Pedro Almodóvar (3-5 units)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

Director: José David Saldívar

Comparative Studies in Race and Ethnicity does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

BACHELOR OF ARTS IN COMPARATIVE STUDIES IN RACE AND ETHNICITY

A total of 60 units of course work are required for the major.

1. *Core Curriculum*—All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course may be counted toward the 15-unit core requirement.
2. *Thematic Concentration*—Comparative Studies majors complete another 45 units of course work relevant to the thematic concentration they have chosen in consultation with the adviser.
3. *Senior Paper or Honors Thesis*—All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

COMPARATIVE STUDIES MINOR

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list. Two core courses (or one core and one foundational course) are needed to fulfill the minor requirements.

COURSES

Students in Comparative Studies may find the following courses useful in fulfilling course requirements in the major or minor.

CORE COURSES

ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

FOUNDATIONAL COURSES

ANTHRO 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America (5 units)
CHICANST 180E/CSRE 180E. Introduction to Chicana/o Studies (5 units)
COMPLIT 148. Introduction to Asian American Cultures (3-5 units)
HISTORY 59. Introduction to Asian American History (5 units)
SOC 138. American Indians in Comparative Historical Perspective (5 units)
SOC 139. American Indians in Contemporary Society (5 units)
SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society (5 units)

THEMATIC COURSES

CSRE 183/AMSTUD 183. Border Crossings and American Identities (5 units)
CSRE 145A/AFRICAAM 145A. Poetics and Politics of Caribbean Women's Literature (5 units)
CSRE 146. Community Matters: Research and Service with Community Organizations (2 units)
CSRE 146S. Asian American Culture and Community (5 units)

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the "Jewish Studies" section of this bulletin.

NATIVE AMERICAN STUDIES

Director: Teresa LaFromboise

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term Native American, the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska, as well as Native Hawaiian communities.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be chosen in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

BACHELOR OF ARTS IN NATIVE AMERICAN STUDIES

A total of 60 units of course work are required for the major.

1. *Core Curriculum*—Native American Studies majors must take the 15-unit CSRE core curriculum, including two introductory core courses and a senior seminar taken in Autumn Quarter of

the senior year. One foundational course that focuses on a non-Native American group may be counted toward the 15-unit core requirement.

2. *Foundational Courses*—Majors are required to take one foundational course in Native American Studies. This may be either SOC 138, American Indians in Comparative Historical Perspective; SOC 139, American Indians in Contemporary Society; or ANTHRO 16, Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America.
3. *Area Study*—Majors complete an additional 40 units of course work that satisfy three categories in their area of study: Native American focus, comparative focus, and a methodology/research course.
4. *Language Study (optional)*—Students may obtain credit for their study of a related native language towards their degree. If students take 15 or more units of a native language relevant to Native American Studies, they may apply 5 of those units toward their Native American Studies degree.
5. *Senior Paper or Honors Thesis*—All CSRE-related majors complete a culminating research paper under the supervision of a faculty adviser.

NATIVE AMERICAN STUDIES MINOR

Students who wish to minor in Native American Studies must complete two core courses and four additional courses relevant to the area of concentration selected by the student in consultation with a faculty adviser. A total of 30 units of approved course work is required for the minor. Proposals must be approved by the director.

COURSES

Students in Native American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

CORE COURSES

ANTHRO 88. Theories of Race and Ethnicity (5 units)
CSRE 196C/ENGLISH 172D/PSYCH 155. Introduction to Race and Ethnicity (5 units)
CSRE 200X. CSRE Senior Seminar (WIM; 5 units)
EDUC 245. Understanding Racial and Ethnic Identity Development (3-5 units)
HISTORY 64. Introduction to Race and Ethnicity in 20th Century America (5 units)
HISTORY 255D. Racial Identity in the American Imagination (4-5 units)
PSYCH 75. Introduction to Cultural Psychology (5 units)
SOC 147A/247A. Comparative Ethnic Conflict (5 units)
SOC 148. Racial Identity (5 units)

FOUNDATIONAL COURSES

ANTHRO 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America (5 units)
SOC 138. American Indians in Comparative Historical Perspective (5 units)
SOC 139. American Indians in Contemporary Society (5 units)

THEMATIC COURSES

NATIVEAM 109A/CSRE 109A. Federal Indian Law (5 units)
NATIVEAM 109B/CSRE 109B. Indian Country Economic Development (5 units)
NATIVEAM 116/CSRE 116. Language, Culture, and Education in Native North America (5 units)
NATIVEAM 117S/CSRE 117S. History of California Indians (5 units)
NATIVEAM 123/CSRE 123. American Indians and the Cinema (5 units)
NATIVEAM 197/CHICANST 197/CSRE 197/DRAMA 355M. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)

COGNATE COURSES

EDUC 193N. Peer Counseling in the Native American Community (1 unit)
MUSIC 37N. Ki ho'alu: The New Renaissance of a Hawaiian Musical Tradition (3 units)
SOC 45Q. Understanding Race and Ethnicity in American Society (5 units)

THEMATIC CONCENTRATION IN THE INSTITUTE FOR DIVERSITY IN THE ARTS (IDA)

Students in any major in the Comparative Studies in Race and Ethnicity undergraduate program can choose a concentration in the Institute for Diversity in the Arts. The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in IDA should contact the CSRE undergraduate program office.

A minimum of 60 units is required for the thematic concentration in IDA. Students take two of the CSRE core courses (10 units), one of which must focus on the arts; in addition, CSRE 200X is required of students in the IDA concentration and is taken in Autumn Quarter of the senior year (5 units, WIM). As a capstone experience, majors must write an honors thesis or senior paper.

IDA concentration students must also complete a senior project. Possible senior projects include a stage production, CD, or arts workshop curriculum in a community setting. Students who elect to write an honors thesis may incorporate their project as the basis for their thesis.

In addition to the core curriculum, students complete 45 units drawing from new and existing courses in departments and programs such as Art and Art History, Music, Drama, and Comparative Literature, African and African American Studies; Asian American Studies; Chicana/o Studies; Comparative Studies; and Native American Studies. Thematic courses may focus on performance, visual aesthetics, writing for performance, critical studies in art and performance, and critical arts theory.

Students may find the following courses useful in fulfilling requirements in the Institute for Diversity in the Arts (IDA) thematic concentration.

ARTHIST 160A. Twentieth Century African American Art (4 units)
ARTHIST 256A. Critical Race Art History (5 units)
CHICANST 160N/CSRE 160N/DRAMA 17N. Salt of the Earth: Docudrama in (Latino) América (3-5 units)
DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (5 units)
COMPLIT 142/ ENGLISH 172E. Literature of the Americas (5 units)
CSRE 179G/DRAMA 179G. Indigenous Identity in Diaspora People of Color Art Practice in North America (5 units)
CSRE 177/DRAMA 177. Writing for Performance: The Fundamentals (5 units)
CSRE 197/CHICANST 197/NATIVEAM 197/DRAMA 355. The Rite to Remember: Performance and Chicana Indigenous Thought (3-5 units)
CSRE 201B/CHICANST 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era (5 units)

THEMATIC CONCENTRATION IN PUBLIC SERVICE

The Public Service thematic concentration is open to students in any major in the Comparative Studies in Race and Ethnicity Undergraduate Program. The concentration allows a student to develop an area of study focused on community development, public service, and social change. Studying how issues of race and ethnicity impact and are impacted by community and social problems, this concentration is designed to ensure that students inter-

ested in service and community have access to a structured curriculum that provides a solid grounding in the theory and practice of community and civic engagement in order to provide the skills and experiences that enable students to become leaders and actors in the sphere of public life.

Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 units, including two approved CSRE core courses and the CSRE 200X, Senior Seminar taken Autumn Quarter of the senior year. Public Service concentration students should also prepare to complete 25 units (at least 5 courses) relevant to the theme of public service. Three of these courses must include a service learning component (i.e., require the student to participate in service in the local community as a central component to the course).

Students who select a thematic concentration in public service must complete an internship as part of their program of study. This internship can be completed during the academic year for credit or during the summer, but must be at least 300 hours.

Finally, students who pursue the concentration in public service should select a topic for their senior paper or honors thesis that reflects their interest in community work (i.e., service or organizing) or a community issue or concern that is addressed through public service.

This concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in this thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

Students may find the following courses useful in fulfilling requirements for the Public Service thematic concentration:

ASNAMST 146S/CSRE 146S/COMPLIT 146. Asian American Culture and Community (5 units)
CHICANST/CSRE 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post-Civil Rights Era (5 units)
CSRE 146. Community Matters: Research and Service with Community Organizations (2 units)
CSRE 198. Internship for Public Service (1-5 units)
CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century (5 units)
DANCE 197. Art and Community: Dance in Prisons (4 units)
EDUC 116X. Service Learning as an Approach to Teaching (3 units)
EDUC 270A. Learning to Lead in Public Service Organizations (3-5 units)
HISTORY 260. California's Majority Minority Cities (5 units)
HISTORY 251A. Poverty and Homelessness in America (5 units)
POLISCI 133. The Ethics and Politics of Public Service (5 units)
POLISCI 137R. Justice at Home and Abroad: Civil Rights in the 21st Century (5 units)
SOC 118. Social Movements and Collective Action (5 units)
SOC 135. Poverty, Inequality, and Social Policy in the United States (5 units)
SOC 141. Controversies about Inequality (5 units)
URBANST 112. The Urban Underclass (5 units)

THEMATIC CONCENTRATION IN AMERICAN DIVERSITY

The American Diversity concentration is designed for students who wish to explore how the United States was and is constituted with relation to issues of race and ethnicity. The concentration investigates how American domestic and foreign policy, law, history, culture, and society are formed within conversations, debates, policies and studies regarding race and ethnicity. Issues of immigration, citizenship, empire and expansion, defense, diplomacy, human rights, public welfare, social justice and law, educational rights and other topics are explored from the angle of how racial and ethnic difference impacts debate and policy.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the American Diversity thematic concentration should contact the CSRE undergraduate program office.

The American Diversity concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete 45 units of course work relevant to the thematic concentration.

Students may find the following courses useful in fulfilling requirements in the American Diversity thematic concentration.

CSRE 201B/CHICANST 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era (5 units)
CSRE 203A. Changing Face of America: Strategies for Civil Rights and Education in the 21st Century (5 units)
EDUC 177. Education of Immigrant Students: Psychological Perspectives (4 units)
EDUC 201. History of Education in the U.S. (5 units)
POLISCI 141. Global Politics of Human Rights (5 units)
POLISCI 327. Minority Politics (5 units)
SOC 164. Immigration and the Changing United States (5 units)

THEMATIC CONCENTRATION IN RACE AND THE AMERICAN CITY

The Race and the American City concentration is designed for students who wish to develop methodologies, data, and theoretical and conceptual materials concerning how urban life, infrastructure, and policies are influenced by race and ethnicity. As virtual laboratories of social interaction, cities embody negotiations around resources, residences, financial districting, economic flow, health and educational resources, environmental policies, and city planning. A primary goal is for students to learn how they might contribute to the social and political discourse on race and ethnicity in the U.S. Participation in a public service internship and/or Stanford in Washington is encouraged.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the Race and the American City concentration should contact the CSRE undergraduate program office.

The Race and the American City concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM), taken Autumn Quarter of the senior year. One single-group core course may be counted toward the 15 unit core requirement. In addition to the core requirements, students must take an additional 45 units of course work relevant to the thematic concentration which may include courses such as:

HISTORY 260. California's Minority-Majority Cities (5 units)
SOC 148. The Urban Underclass (5 units)
URBANST 114. Cities in Comparative Perspective (5 units)
URBANST 173. Suburbs and Sprawl (5 units)
URBANST 162. Managing Local Governments (5 units)

DRAMA

Emeriti: (Professors) Helen W. Schrader, Carl Weber; *(Associate Professor)* William S. Eddelman; *(Senior Lecturers)* Susan Cashion, Patricia Ryan
Chair: Peggy Phelan
Drama Division
Professors: Jean-Marie Apostolidès (French and Italian; Drama), Harry J. Elam, Jr. (Humanities; Vice Provost for Undergraduate Education), Peggy Phelan (Drama; English), Alice Rayner (Drama; Graduate Studies Committee Chair), Rush Rehm (Drama; Classics; Stanford Summer Theater)
Assistant Professors: Branislav Jakovljevic (Undergraduate Faculty Adviser), Jisha Menon
Professors (Teaching): Michael F. Ramsaur, Janice Ross
Associate Professors (Teaching): Helen Paris, Leslie Hill
Senior Lecturer: Connie Strayer
Lecturers: Jeffrey Bihr, Erik Flatmo Gambatese, Daniel Klein, Kathryn Kostopoulos
Visiting Artists: Ann Carlson, Robert Perillo, Joanna Settle, Mary Ellen Strom
Guest Lecturers: Linda Apperson, Nadine George-Graves
Artists in Residence: Amy Freed, Cherríe Moraga
Institute for Diversity in the Arts and Black Performing Arts Division
IDA Faculty Director: Harry J. Elam, Jr.
Executive Director (IDA): Georgina Hernandez
Director (CBPA): Robert Moses
Dance Division
Director: Janice Ross
Lecturers: Kristine Elliott, Diane Frank, Aleta Hayes, Richard Powers, Ronnie Reddick
Visiting Artist: Muriel Maffre
Artist in Residence: Robert Moses
Mail Code: Drama, 94305-5010; Dance, 94305-8125
Drama Department Office: 551 Serra Mall, Memorial Auditorium, Room 144
Dance Division Office: 375 Santa Teresa Street, Roble Gym, Room *2*
Phone: Drama (650) 723-2576; Dance (650) 723-1234
Student Services Email: sdbaker@stanford.edu
Web Site: Drama, http://drama.stanford.edu
Web Site: Dance, http://dance.stanford.edu

Courses offered by the Department of Drama are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes DRAMA and DANCE.

MISSION OF THE DEPARTMENT OF DRAMA

The Drama Department integrates theory, criticism, and performance. Convinced that scholarship is strengthened by direct engagement in performance, and that performance is enhanced by practitioners whose analytic skills have been honed in scholarship, the department produces more than a dozen productions each academic school year, including canonical plays, commissioned dance works, experimental projects, and the works of visiting artists.

MISSION OF THE UNDERGRADUATE PROGRAMS IN DRAMA AND DANCE

The mission of the undergraduate program in Drama is to provide a strong non-conservatory program for students studying Drama and Dance in a liberal arts context. Joining academic research with performance and technical practice, department majors pursue areas of interest in acting, directing, playwriting, dance, design, stage management, performance theory, and cultural studies. Students explore these fields in a collaborative environment with close faculty contact. One of the requirements of the major is to fulfill a stage management course, generally in the junior year, which allows students practical exposure to managing and/or crewing a production. It is essential that students understand the concrete workings of theater in order to appreciate its history and literature. With faculty collaboration, students of Drama and Dance integrate research, theory, intellectual engagement, and performance. During the senior year, students have the option of completing a senior project in addition to completing the 60 units required for the major.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to find organic and meaningful ways of integrating theory and practice.
2. the ability to perform critical and theoretical analysis within the discipline.
3. effective research and writing skills that complement practical work.

MISSION OF THE GRADUATE PROGRAM IN DRAMA

The mission of the graduate program in Drama is to produce students who work on the leading edge of both scholarly and performance practice. The Ph.D. program in Drama emphasizes the combination of theory and practice. Graduate students complete a program with a study of critical theory and textual history and an understanding that such theory is informed by practical elements in directing, acting, writing, and design.

BACHELOR OF ARTS IN DRAMA

The requirements for the B.A. degree in Drama are designed to integrate the critical and historical study of drama with the study and experience of performance. A total of 60 units are required to obtain a B.A. degree in Drama. The major provides aesthetic and critical opportunities for students to develop special aptitudes. Students are encouraged to declare a major in their sophomore year.

SUGGESTED PREPARATION FOR THE MAJOR

Prospective majors in the first two years of study at Stanford are encouraged to take part in casting opportunities in department productions or independent undergraduate performing arts groups.

Recommended Preparatory Courses—Two years of a college-level foreign language.

DEGREE REQUIREMENTS

Required Courses—60 units total for the major

A course may be listed in more than one area; however, each course can only satisfy one major requirement. There is no double credit for a course. Additionally, you can petition to the department undergraduate advisor to have additional courses offered by the department count towards requirements in areas 2, 3, and 4. All introductory courses are required with no exceptions.

1. *Introductory Core Courses*—14 units
   DRAMA 30. How Theater is Designed (4 units)
   DRAMA 34. Stage Management Techniques (2 units)
   DRAMA 101H. How Theater Thinks (4 units)
   DRAMA 101P. How Practice Practices (4 units)
2. *Theatrical Literature/History*—14 units
   Any course between DRAMA 150-169. The following courses are offered in 2010-11:
   DRAMA 150T. Racial Erotics
   DRAMA 151T. Great Books
   DRAMA 151. Greek Tragedy
   DRAMA 1552. Beckett
   DRAMA 156H. Dance and Theater

DRAMA 160. Performance, Dance, and History: From Postwar to Postmodernism
DRAMA 166H. Historiography of Theater
DRAMA 167. Avant Garde Theater
DRAMA 169A. Cultural Traffic

3. *Theatrical Performance Courses: Acting, Directing, and Playwriting*—8 units
Any course with the subject code DANCE
Acting courses between DRAMA 20-29, 120-129, 210. The following courses are offered in 2010-11:
DRAMA 20. Acting for Non-Majors
DRAMA 120A,B. Fundamentals of Acting
DRAMA 120V. Vocal Production and Audition
DRAMA 121C: Physical Characterization
DRAMA 121S. Acting Shakespeare
DRAMA 122. Contemporary Vernacular Dance in New Musical Theater
DRAMA 122P. Undergraduate Acting Project
DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (IDA)
Playwriting and Dramaturgy courses between DRAMA 70-79. The department is not offering any courses in the 70 series in 2010-11.
Directing, Playwriting and Dramaturgy courses between DRAMA 170-179. The following courses are offered in 2010-11:
DRAMA 170A. Concepts of Directing
DRAMA 170B. Advanced Directing
DRAMA 177. Writing for Performance
DRAMA 178. Playwriting
4. *Theatrical Production*—12 units
DRAMA 134. Stage Management Project (4 units)
DRAMA 39. Theater Crew (3 units)
Design, Stage Management, and Production courses between DRAMA 31-38, 131-133, 135-139. The following courses are offered in 2010-11:
DRAMA 28. Makeup for the Stage
DRAMA 31. Introduction to Lighting and Production
DRAMA 42. Costume Construction
DRAMA 131. Lighting Design
DRAMA 132. Costume Design
DRAMA 133. Stage Scenery Design
DRAMA 137. Hand Drafting for Designers
5. *Senior Project*—2 units
DRAMA 200. Senior Project
Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student has the option of writing an essay associated with the project. Students receive credit for senior projects through DRAMA 200 or DRAMA 205. Students pursuing senior projects should consult with both the undergraduate adviser and a faculty adviser in the project's specialty area early in the junior year. Students must petition for approval of senior projects through the department's undergraduate adviser. Projects are typically approved by department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year. The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a 1-2 page abstract of the associated essay if an essay is part of the project.
6. *Electives*—10 units
Any courses with the subject code DRAMA or DANCE.
7. *WIM*—Writing in the Major. The following courses are offered in 2010-11:
DRAMA 101H. How Theater Thinks
DRAMA 160. Performance, Dance, and History: From Postwar to Postmodernism

HONORS PROGRAM

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student's work to date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below 'B-' in any course that constitutes part of their Drama major.
2. Student must have a Stanford cumulative grade point average above a 'B-' to be admitted into the Honors Program. For transfer students, at the time of transfer the same GPA requirement applies.
3. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived. Transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.
4. Students must have completed half of the courses in their specialization by the end of their junior year.
5. Students must complete 4 units in the honors colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter's colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
6. GPA in courses counting towards the major must be 3.5 by the time of graduation.
7. By the end of the seventh week of the quarter in which they plan to graduate, students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.
8. On the basis of a student's work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.
9. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.
10. Entry into the Honors program does not guarantee an Honors degree. The final decision to confer an Honors degree will be made by the student's thesis committee, upon evaluating the quality of the Senior Project and the thesis.

Honors Colloquia and Thesis—The honors colloquia aim to engage honors program students in important issues in the field focusing on the students' areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. Students discuss their work in the department and present and discuss their research for their honors thesis. Students must enroll in DRAMA 202, Honors Thesis.

The honors thesis typically consists of a long essay (40-60 pages) presenting the student's research on an important issue or subject, determined by the student. The honors program adviser, the senior project adviser, and another faculty member constitute the student's honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. Additionally, students have the option of using their own senior project as a case study. In these situations, the honors thesis will critically analyze the strengths and weaknesses of the creative work. Generally, these essays tend to be shorter (about 20-25 pages) because the creative work constitutes one-half of the honors project.

Honors in Humanities—An honors program in Humanities is

available for Drama majors who wish to supplement their major with related, guided studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for a description of the honors program. Students who enroll in this program may take HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.

MINOR IN DRAMA

The requirements for the Minor in Drama are designed to integrate the critical and historical study of drama with the study and experience of performance. A total of 30 units are required to obtain a Minor in Drama. The minor provides aesthetic and critical opportunities for students to develop special aptitudes. Students are encouraged to declare a minor in their sophomore year.

MINOR REQUIREMENTS

Required Courses—30 units total for the minor

A course may be listed in more than one area; however, each course can only satisfy one minor requirement. There is no double credit for a course. A student may petition to the department Undergraduate Adviser to have additional courses offered by the department count towards requirements in areas 2 and 3. All introductory courses are required with no exceptions.

Introductory Core Courses—14 units

DRAMA 30. How Theater is Designed (4 units)
DRAMA 34. Stage Management Techniques (2 units)
DRAMA 101H. How Theater Thinks (4 units)
DRAMA 101P. How Practice Practices (4 units)

1. *Theatrical Literature/History*—3 units
   Any course between DRAMA 150-169. The following courses are offered in 2010-2011:
   DRAMA 150T. Racial Erotics
   DRAMA 151T. Great Books
   DRAMA 151. Greek Tragedy
   DRAMA 1552. Beckett
   DRAMA 156H. Dance and Theater
   DRAMA 160. Performance, Dance, and History: From Postwar to Postmodernism
   DRAMA 166H. Historiography of Theater
   DRAMA 167. Avant Garde Theater
   DRAMA 169A. Cultural Traffic
2. *Theatrical Performance Courses: Acting, Directing, and Playwriting*—3 units
   Any course with the subject code DANCE
   Acting courses between DRAMA 20-29, 120-129, 210. The following courses are offered in 2010-11:
   DRAMA 20. Acting for Non-Majors
   DRAMA 120A,B. Fundamentals of Acting
   DRAMA 120V. Vocal Production and Audition
   DRAMA 121C. Physical Characterization
   DRAMA 121S. Acting Shakespeare
   DRAMA 122. Contemporary Vernacular Dance in New Musical Theater
   DRAMA 122P. Undergraduate Acting Project
   DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts (IDA)
   Playwriting and Dramaturgy courses between DRAMA 70-79. The department is not offering any courses in the 70 series in 2010-11.
   Directing, Playwriting and Dramaturgy courses between DRAMA 170-179. The following courses are offered in 2010-11:
   DRAMA 170A. Concepts of Directing
   DRAMA 170B. Advanced Directing
   DRAMA 177. Writing for Performance
   DRAMA 178. Playwriting
3. *Theatrical Production*—4 units
   DRAMA 39. Theater Crew (4 units)
4. *Electives*—6 units
   Any courses in Drama or Dance.

DOCTOR OF PHILOSOPHY IN DRAMA

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. Candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

Admission—Applicants for the Ph.D. program can visit our web site at http://drama.stanford.edu or write directly to the Department of Drama, Attention: Graduate Admissions, for information. Online graduate applications are available at http://gradadmissions.stanford.edu. In addition to the required statement of purpose, applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Drama begin study in Autumn Quarter of each academic year; there are no mid-year admissions. Graduate students must be degree candidates.

The Department of Drama awards a number of fellowships to students in the Ph.D. program.

DEGREE REQUIREMENTS

Department requirements 2 through 9 following are in addition to the University's basic requirements for the doctorate.

1. *Units and Course Requirements*—
   a. A minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
   b. Core seminars: DRAMA 300A, 300B, 301, 302 or 303, and 304.
   c. Three additional graduate seminars within the Department of Drama to be worked out with the adviser.
   d. Four workshops in directing: DRAMA 370, 372, 373, 374. In the first two years, students take: DRAMA 370, Concepts of Directing; DRAMA 372, Actor and Director Dialogue; and DRAMA 373, Directing and Dramaturgy. Students take DRAMA 374, Projects in Directing, to stage a more fully developed production chosen in consultation with the faculty. DRAMA 374, Projects in Directing is advanced creative work approved by the GSC and supervised by a faculty member.
   e. Students are allowed to take up to 6 units of DRAMA 390, Drama Tutorial/Directed Reading, to count towards their degree program and towards the 135 units requirement.
2. *Language Requirement*—The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:
   a. achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
   b. a reading examination given each quarter by the various language departments, except for Latin and Greek.
   c. pass with a grade of 'B' or higher courses in Literature/History numbered 100 or higher in a foreign language department at Stanford.
3. *Examinations*—Candidates must complete three examinations (comprehensive, qualifying, and department oral) by the end of the first three years of study at Stanford.

a. *First-Year Comprehensive*—The comprehensive examination is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the start of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.
b. *Second-Year Qualifying*—The qualifying examination, which must be completed before advancement to candidacy at the end of the second year, consists of two 25-35-page essays. Each of these essays should demonstrate a broad knowledge of two different historical periods (pre-20th century), with emphasis on particular dramatic texts and/or performance practices. Essay topics should be designed and written up in consultation with a faculty adviser. The reading list for each period should be approved by the end of the first quarter. These essays should not duplicate any written work from seminars. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays. For the first qualifying examination, candidates must choose from the following historical periods:
   1. Classical
   2. Medieval and Renaissance
   3. 17th, 18th, or early 19th century
c. *Third-Year Department Oral*—The department oral examination requires three faculty members, at least two from the Department of Drama, who most likely form the dissertation reading committee. This exam is based on a 2-3 page summary of the project and a 40-page review of the literature for the dissertation that the student creates in conjunction with the committee. This exam should be taken by the end of Spring Quarter in the third year.

4. *Dissertation Prospectus*—The dissertation prospectus must be approved by the candidate's adviser and by the departmental Graduate Studies Committee two quarters after taking the department oral. This should be done in the Autumn Quarter of the fourth year. Within 30 days of approval, a student should schedule a prospectus colloquium with the proposed reading committee (the dissertation director and two other faculty members). The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. The prospectus should be approximately 15-20 pages and minimally cover three things:
   a. the research question and context
   b. the methodology for research
   c. a lay-out of a complete chapter by chapter plan
5. *University Oral Examination*—The University oral examination is a defense of the dissertation based on a full draft submitted at least 75 days before the proposed degree conferral. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners.
6. *Assistantships*
   a. *Research Assistantship*—Three quarters of research assistantship with faculty members are required. Generally, this requirement is fulfilled in the third year.
   b. *Teaching Assistantship*—Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.
7. *Application for Candidacy*—By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
   a. the core seminars: DRAMA 300A, 300B, 301, 302 or 303, and 304
   b. the directing workshop series (DRAMA 370-374), including the successful production of at least one work in public performance
   c. a foreign language
   d. successful completion of the comprehensive and qualifying exams

   Based on its evaluation of the student's progress, the Graduate Studies Committee certifies the student's qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year. By University policy, candidacy is valid for five years unless terminated by the department.
8. *Dissertation*—Normally, the Ph.D. program in Drama is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.
9. *Satisfactory Progress, Annual Review*—The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the Graduate Studies Committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student's work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Failure to make satisfactory progress may result in dismissal from the program. University policy states that all requirements including dissertation must be completed before candidacy expires.

PH.D. IN DRAMA AND HUMANITIES

The Drama department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Drama and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact Denise Winters at 650-724-1333 for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

INSTITUTE FOR DIVERSITY IN THE ARTS AND BLACK PERFORMING ARTS DIVISION

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression. The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, and symposia. The division produces annual student productions and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture. The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A.

programs, public service, government and politics, arts administration, and teaching. Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major; students can also emphasize Black performance through the African and African American Studies major.

DANCE DIVISION

The Stanford Dance Division offers a range of broadly diverse approaches to dance as a performing art, cultural practice, political act and embodiment of ideology and beliefs. All of the dimensions through which one comes to experience dance, from studying a range of dance techniques, choreographing and performing, to viewing and critically and historically assessing dance, are represented in the course offerings of the Dance Division.

MINOR IN DRAMA WITH DANCE CONCENTRATION

A student declaring a minor in Drama with a Dance Concentration must complete 30 units of course work in Dance/Drama. Upon declaring the minor, a proposed course of study must be submitted by each student in consultation with the Dance Director, Janice Ross, jross@stanford.edu, and approved by her no later than one quarter following the declaration. Declaration of the Drama/Dance Minor should also be made on-line at http://axess.stanford.edu.

The minor includes the following core requirements, and an individual program of study shaped in consultation with the minor adviser in Dance, Janice Ross. Please note that the special elective dance classes are offered every year; the list below includes some, but not all of the classes that fulfill the requirements. Other classes may be substituted with adviser's consent.

Requirements—30 total units

1. *Technique Classes*: Studio Classes: Minimum of six studio dance classes (10 units)
   a. A concentration of at least three classes chosen from a specific dance form (e.g., Contemporary, Modern, Jazz, Hip-Hop, Ballet, Social), and the attainment of intermediate or advanced level (at least two classes) in a style other than the concentration
2. *Dance Studies Classes:* Minimum of two courses (8 units) of the following
   a. DANCE 156H. Dance and Theatre: Twentieth Century German Encounters (4 units)
   b. DANCE 160. Dance and History: From Postwar to Postmodernism (4 units)
   c. DANCE 197. Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation (4 units)
   d. DANCE 191 or 290. Special Project (3-5 units)
3. *Choreography/Repertory/Performance Classes* (4 units)
   a. DANCE 27. Faculty Choreography (1 unit)
   b. DANCE 30. Chocolate Heads (1 unit)
   c. DANCE 52. The Dance Jam: Process and Performance (1 unit)
   d. DANCE 56. Ballet Repertory (1 unit)
   e. DANCE 57. Dance Repertory (1 unit)
   f. DANCE 100. Student Choreography (1 unit)
   g. DANCE 105. Contemporary Afro Styles and Dance Making (1 unit)
   h. DANCE 106. Essence of Contemporary Dance Performance (1 unit)
4. *Drama Core Courses*: Minimum of 2 courses (8 units)
   a. DRAMA 30. How Theater is Designed (4 units)
   b. DRAMA 34. Stage Management Techniques (2 units)
   c. DRAMA 101H. How Theater Thinks (4 units)
   d. Drama 101P. How Practice Practices (4units)

OVERSEAS STUDIES COURSES IN DRAMA

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

EAST ASIAN LANGUAGES AND CULTURES

Emeriti: (Professors) Albert E. Dien, David S. Nivison, Makoto Ueda, John Wang*; *(Associate Professor)* Susan Matisoff; *(Senior Lecturer)* Yin Chuang*

Chair: Chao Fen Sun

Directors of Graduate Studies: James Reichert (Japanese), Ban Wang (Chinese)

Directors of Undergraduate Studies: Melinda Takeuchi (Japanese), Yiqun Zhou (Chinese)

Professors: Steven D. Carter, Mark E. Lewis (East Asian Languages and Cultures, History), Li Liu, Chao Fen Sun, Melinda Takeuchi (East Asian Languages and Cultures, Art and Art History), Ban Wang (East Asian Languages and Cultures, Comparative Literature)

Associate Professors: Yoshiko Matsumoto, James Reichert

Assistant Professors: Haiyan Lee, Indra Levy, Yiqun Zhou

Consulting Professor: Richard Dasher

Visiting Professor: Stuart Sargent

Postdoctoral Fellows: Paul Festa, Minku Kim

Chinese-Japanese Area Studies Faculty:

Professors: Carl W. Bielefeldt (Religious Studies, on leave), Gordon Chang (History, on leave), Richard Dasher (Center for Integrated Systems), Paul Harrison (Religious Studies), Jean Oi (Political Science), David Palumbo-Liu (Comparative Literature), Gi-Wook Shin (Sociology), Richard Vinograd (Art and Art History), Andrew Walder (Sociology), Kären Wigen (History), Arthur P. Wolf (Anthropology), Lee H. Yearley (Religious Studies), Xueguang Zhou (Sociology)

Associate Professors: Jindong Cai (Music), Matthew Sommer (History), Miyako Inoue (Anthropology), Matthew Kohrman (Anthropology)

Assistant Professors: Jennifer Adams (Education), Melissa Brown (Anthropology), Phillip Lipscy (Political Science), Jean Ma (Art and Art History), Yumi Moon (History), Thomas Mullaney (History, on leave), Jun Uchida (History)

* Recalled to active duty.

Department Office: Building 250, Room 106

Mail Code: 94305-2000

Phone: (650) 725-2742

Email: asianlanguages@stanford.edu

Web Site: http://asianlanguages.stanford.edu

Courses offered by the Department of East Asian Languages and Cultures are listed on the *Stanford Bulletin's* Explore Courses web site under the subject codes CHINGEN (Chinese General), CHINLIT (Chinese Literature), JAPANGEN (Japanese General), JAPANLIT (Japanese Literature), and KORGEN (Korean General). Courses with the suffix -GEN do not require reading knowledge of an Asian language. Language courses are listed on the *Stanford Bulletin's* Explore Courses web site under CHINLANG (Chinese Language), JAPANLNG (Japanese Language), and KORLANG (Korean Language).

The Department of East Asian Languages and Cultures offers programs for students who wish to engage with the cultures of China, Japan, and Korea as articulated in language, linguistics, literature, film, cultural studies, and visual arts. Students emerge with a sophisticated understanding of culture as a dynamic process embodied in language and other representational media, especially the verbal and visual forms that are central to humanistic study. Department faculty represent a broad range of research interests and specialties, and visiting scholars and postdoctoral fellows from the Stanford Humanities Center, the Andrew W. Mellon Fellowship of Scholars in the Humanities, the Freeman Spogli Institute for International Studies, and the Center for East Asian Studies add to the intellectual vitality of the department.

East Asian Languages and Cultures offers a full range of courses at the undergraduate and graduate levels. Undergraduate courses concentrate on language, literature, and other cultural forms from the earliest times to the present, covering traditional and contemporary topics from Confucian conceptions of self and society to inflections of gender in the twentieth century. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals. Graduate programs offer courses of study involving advanced language training, engagement with primary texts and other materials, literary history, and training in research methodologies and critical approaches.

East Asian language skills provide a foundation for advanced academic training and professional careers in fields such as business, diplomacy, education, and law. The department also offers opportunities for students who choose to double-major or minor in other academic disciplines, including anthropology, art history, economics, education, history, linguistics, philosophy, political science, religious studies, and sociology.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy in Chinese and Japanese, and Bachelor of Arts in East Asian Studies. It also offers undergraduate minors and the Ph.D. minor in Chinese or Japanese language and literature.

For information concerning other opportunities for study about Asian history, societies, and cultures, see the following departments and programs: Anthropology, Art and Art History, Business, Comparative Literature, East Asian Studies, Economics, History, Law, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology.

UNDERGRADUATE MISSION STATEMENTS FOR EAST ASIAN LANGUAGES AND CULTURES

CHINESE MAJOR

The mission of the undergraduate program in Chinese is to expose students to a variety of perspectives in Chinese language, culture, and history by providing them with training in writing and communication, literature, and civilization. Emphasis in courses is on developing powers of critical thinking and expression that serve students well no matter what their ultimate career goals are. The program prepares students for diverse professions and enterprises, including business, government service, and academia.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in the studies of Chinese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

JAPANESE MAJOR

The mission of the undergraduate program in Japanese is to expose students to a variety of perspectives in Japanese language, culture, and history by providing students with training in writing and communication, literature, and civilization. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals are. The program prepares students for diverse professions and enterprises, including business, government service, and academia.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in the studies of Japanese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

EAST ASIAN STUDIES MAJOR

The mission of the program in East Asian Studies is to enable students to obtain a comprehensive understanding of East Asia broadly conceived, which is the area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors are expected to have a good mastery of an East Asian language, and focus on a particular sub-region or a substantive issue involving the region as a whole. Emphasis in classes is on developing powers of critical thinking and expression to serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in East Asian studies.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

OVERSEAS STUDIES

Courses approved for the East Asian Languages and Cultures majors which are taught overseas can be found in the "Overseas Studies" section of this Bulletin, or in the Overseas Studies office, Sweet Hall. To find course offerings in Explore Courses, click on OSPKYOTO or OSPBEIJ.

STUDY ABROAD

Students interested in Japanese language, history, culture, and social organization are encouraged to apply to the Kyoto Center for Japanese Studies (KCJS), a two-semester academic program primarily for undergraduates wishing to do advanced work in the Japanese language and in Japanese studies.

In Spring Quarter, the Stanford Center for Technology and Innovation (SCTI), also in Kyoto, focuses on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries, followed by an optional two-to-three month internship in an agency, firm, or laboratory in Japan. For information about either program in Kyoto, students should contact the Bing Overseas Studies Program office in Sweet Hall.

Undergraduates interested in studying Chinese language, history, culture, and society are encouraged to apply to the Stanford Program in Beijing, also offered through the Bing Overseas Studies Program. This program is located at Peking University and is open Autumn and Spring Quarters.

Students should take note of the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University (http://ieas.berkeley.edu/iup; iub@socrates.berkeley.edu; 510-642-3873) and the Inter-University Center (IUC) for Japanese Language Studies in Yokohama (http://stanford.edu/dept/IUC; stacey.campbell@stanford.edu; 650-725-1490). Stanford is a member of these consortia.

Students interested in the graduate exchange program with the Department of Chinese at Peking University in Beijing should consult the chair of the department early in the academic year.

EAST ASIAN STUDIES THEME HOUSE

EAST House, located at Governor's Corner, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of East Asia. Assignment is made through the regular undergraduate housing draw.

SUMMER PROGRAM

A nine-week summer program of intensive instruction is offered in both Chinese and Japanese. The intensive courses provide the equivalent in instruction to regular academic-year courses. (See courses CHINLANG 5, 25, 105, and JAPANLNG 10, 20, 130, as described in the "Language Center" section of this bulletin.) For detailed information about these and other aspects of the summer program, inquire at the Language Center.

GRADUATE PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

ADMISSION

All students contemplating application for admission to graduate study must have a creditable undergraduate record. The applicant need not have majored in Chinese or Japanese as an undergraduate, but must have had the equivalent of at least three years of training in the language in which he or she intends to specialize, and must also demonstrate a command of English adequate for the pursuit of graduate study. Applicants should not wish merely to acquire or improve language skills, but to pursue study in one of the following fields: Chinese history (pre-modern), Chinese linguistics, Chinese literature, Chinese philosophy, Japanese cultural history, Japanese literature, Japanese linguistics, and Japanese visual culture.

BACHELOR OF ARTS PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

BACHELOR OF ARTS IN CHINESE OR JAPANESE

The B.A. degree is granted both in Chinese and in Japanese. The following courses and their prerequisites must be completed with a grade point average (GPA) of 2.0 or better:

1. Concentration in Chinese:
   a. CHINGEN 91 and JAPANGEN 92
   b. Chinese language requirement:
      1. first-year modern Chinese (one of the following series: CHINLANG 1, 2, 3, or CHINLANG 1B, 2B, 3B, or CHINLANG 5)
      1. second-year modern Chinese (one of the following series: CHINLANG 21, 22, 23, or CHINLANG 21B, 22B, 23B, or CHINLANG 25)
      2. beginning classical Chinese (CHINLIT 125, 126, 127)
   c. three CHINGEN or CHINLIT courses at the 100 level with one in each of the following areas: pre-modern China, modern China, and Chinese linguistics
   d. four other content courses dealing with China, primarily at the 100 level, as approved by the undergraduate adviser
   e. CHINGEN 133 is the required Writing in the Major (WIM) course
   f. CHINGEN 198, Senior Colloquium: completion of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.
2. Concentration in Japanese:
   a. CHINGEN 91 and JAPANGEN 92
   b. Japanese language requirement:
      1. first-year modern Japanese (one of the following series: JAPANLNG 1, 2, 3, or JAPANLNG 7, 8, 9, or JAPANLNG 5)
      2. second-year modern Japanese (JAPANLNG 17, 18, 19, or JAPANLNG 20)
      3. third-year modern Japanese (JAPANLNG 117, 118, 119)
   c. three JAPANGEN or JAPANLIT courses at the 100 level with one in each of the following areas: pre-modern Japan, modern Japan, and Japanese linguistics
   d. four other content courses dealing with Japan primarily at the 100 level, as approved by the undergraduate adviser
   e. JAPANGEN 138 is the required Writing in the Major (WIM) course
   f. JAPANGEN 198, Senior Colloquium: completion of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.

   JAPANGEN 71N can be used to satisfy the Japanese linguistics requirement. JAPANGEN 51/251 is not counted toward the major. Students who complete third-year Japanese at KCJS satisfy the language requirement but are required to take a placement test if they wish to enroll in JAPANLNG 211, 212, 213.

Students who want to concentrate in Chinese or Japanese linguistics can substitute the four other content courses primarily at the 100 level with LINGUIST 1 and three other linguistics courses at the 100 level, as approved by the undergraduate adviser in consultation with the student's academic adviser.

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

HONORS PROGRAM

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in CHINLIT 189A or JAPANLIT 189A for 2-5 units of credit for independent study. In Winter Quarter, students enroll for five units in independent study (CHINLIT 199 or JAPANLIT 199) with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than the end of the Winter Quarter in the senior year. Students enroll in CHINGEN 198 or JAPANGEN 198 in Spring Quarter of the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis.

BACHELOR OF ARTS IN EAST ASIAN STUDIES

Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year. Majors must complete at least 75 units of course work on China, Japan, and/or Korea in addition to a one unit Senior Colloquium. Courses to be credited toward major requirements must be completed with a grade of 'C' or better. Requirements are:

1. *Language:* proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.
2. *Area Courses:* a minimum of three area courses, one in each category below (courses listed are examples and by no means exhaustive--if uncertain whether a particular course fits into one of these categories, please contact the department to check).
   a. Art, Literature and Religion
      ARTHIST 2. Asian Art and Culture [Same as JAPANGEN 60]
      CHINGEN 91. Traditional East Asian Civilization: China
      JAPANGEN 92. Traditional East Asian Civilization: Japan
      RELIGST 14. Introduction to Buddhism
   b. History
      HISTORY 93. Late Imperial China
      HISTORY 94B. Japan in the Age of the Samurai
      HISTORY 95. Modern Korean History
      HISTORY 98. The History of Modern China
   c. Contemporary Social Sciences
      ANTHRO 148. Health, Politics and Culture of Modern China
      POLISCI 140L. China in World Politics
      POLISCI 148. Chinese Politics: The Transformation and the Era of Reform
      OSPKYOTO 215X. The Political Economy of Japan
3. *Substantive Concentration:* additional courses on East Asia, one of which must be a seminar above the 100 level. Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. At least four courses must have a thematic coherence built around a topic. Examples include:
      East Asian religions and philosophies
      Culture and society of modern Japan
      Ethnic identities in East Asia
      Arts and literature in late imperial China
      Foreign policy in East Asia
      Social transformation of modern Korea
      China's political economy

   These courses are listed at the East Asian Studies website, and under CHINGEN, CHINLIT, JAPANGEN, and JAPANLIT.
4. *Capstone Essay:* completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student's thematic interest. CHINGEN or JAPANGEN 198, Senior Colloquium (1 unit), is required of majors during Winter Quarter of their senior year to develop and present the capstone essay or honors paper.
5. At least one quarter overseas in the country of focus.
6. An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133 and JAPANGEN 138 satisfy the WIM requirement.
7. The courses for the major must add up to at least 76 units, comprised of the one-unit Senior Colloquium (taken satisfactory/no credit) and at least 75 additional units, all taken for a letter grade. Courses must be at least three units to be counted towards the degree.

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

HONORS PROGRAM

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in 2-5 units of credit for independent study. In Winter Quarter, students enroll for five units in independent study with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than the end of the Winter Quarter in the senior year. Students enroll in CHINGEN 198 or JAPANGEN 198 in Spring Quarter of the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis. One advanced level colloquium or seminar dealing with China, Japan, or Korea is required as well.

MINORS IN EAST ASIAN LANGUAGES AND CULTURES

MINOR IN CHINESE OR JAPANESE

The undergraduate minors in Chinese and Japanese have been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Chinese or Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of:

1. Completion of language study through the second-year level (that is, the one year sequence of CHINLANG 21, 22, 23 or 21B, 22B, 23B; or JAPANLNG 17, 18, 19) for students with no previous training in Chinese or Japanese. Students who already have first-year competence in Chinese or Japanese must complete the third-year course (CHINLANG 101, 102, 103 or 101B, 102B, 103B; or JAPANLNG 117, 118, 119). Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in either Chinese or Japanese. These courses may be language courses such as the third-year sequence mentioned above, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.
2. The core courses, CHINGEN 91, Traditional East Asian Civilization: China, and JAPANGEN 92, Traditional East Asian Civilization: Japan.

3. Two courses selected from among the department's other offerings in the literature, linguistics, and civilization of a given minor area (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT). All courses for the minor must be taken for a letter grade and completed with a GPA of 2.0 or better.

MINOR IN EAST ASIAN STUDIES

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three area courses, one in each category (see major for listing of area courses).
2. One undergraduate seminar above the 100 level and two other courses from among those listed as approved for East Asian Studies majors, including literature courses but excluding language courses. These courses are listed under East Asian Studies (EASTASN) in this bulletin, and under CHINGEN, CHINLIT, JAPANGEN, and JAPANLIT.

Applications for the minor should be submitted online through Axess and are due no later than the second quarter of the junior year.

COTERMINAL B.A. AND M.A. PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

With department approval, students may be able to combine programs for the B.A. and M.A. degrees in Chinese or Japanese. Prospective applicants must consult with the graduate adviser. For details, see the "Graduate Degrees" section of this bulletin or http://registrar.stanford.edu/shared/publications.htm#Coterm.

For those interested in a coterminal program with an M.A. in East Asian Studies, please contact the Center for East Asian Studies for application procedures and deadlines, or visit the center's web site at http://ceas.stanford.edu.

MASTER OF ARTS PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

The M.A. is granted in Chinese and in Japanese. The normal length of study for the degree is two years.

No financial aid is available for those applicants who wish to obtain the M.A. only.

Students who wish to spend the first year of graduate study at the Beijing or Yokohama centers must obtain department approval first.

Candidates for the degree must be in residence at Stanford in California during the final quarter of registration.

A thesis or an annotated translation of a text of suitable literary or historical worth is required for the M.A. degree. Under special circumstances, a paper approved by the graduate adviser may be substituted.

The University's basic requirements for the master's degree, including a 45-unit minimum requirement, are given in the "Graduate Degrees" section of this bulletin. Department requirements are set forth below.

REQUIREMENTS FOR THE M.A. IN CHINESE

The M.A. program in Chinese is designed for students with strong academic records and an interest in pursuing postgraduate research in Chinese literature, history (pre-modern), philosophy, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (*Note:* Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Chinese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must:

1. Demonstrate proficiency in both modern and classical Chinese through:
   a. completion with a letter grade of 'B' or higher of third-year Chinese through CHINLANG 103 and
   b. one of three advanced classical Chinese courses in the series CHINLIT 221-223.

(*Note:* qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.)

2. Complete the following for a letter grade of 'B' or higher:
   a. four courses in Chinese literature or linguistics numbered between CHINLIT 230 and 292
   b. CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies
   c. two upper-division or graduate-level courses in fields such as Chinese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser
   d. a master's thesis; CHINLIT 299. Master's Thesis or Translation.

REQUIREMENTS FOR THE M.A. IN JAPANESE

The M.A. program in Japanese is designed for students with strong academic records and an interest in pursuing postgraduate research in Japanese literature, cultural history, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (*Note:* Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Japanese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must:

1. Complete third-year Japanese (JAPANLANG 117, 118, 119) plus one of the following for a letter grade of 'B' or higher:
   a. fourth-year Japanese through JAPANLANG 213, or
   b. classical Japanese through JAPANLIT 246 and 247.

(*Note:* qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.)

2. Complete the following with a letter grade of 'B' or higher:
   a. four adviser-approved courses in Japanese literature, culture, or linguistics from among the offerings of the Department of East Asian Languages and Cultures, not including courses taken to fulfill the language requirement
   b. JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese
   c. two upper-division or graduate-level courses in fields such as Japanese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser
   d. a master's thesis; JAPANLIT 299. Master's Thesis or Translation.

DOCTOR OF PHILOSOPHY PROGRAMS IN EAST ASIAN LANGUAGES AND CULTURES

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature and linguistics, an adequate command of relevant languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University's basic requirements for the Ph.D. are given in the "Graduate Degrees" section of this bulletin. Department requirements are set forth below.

ADMISSION TO CANDIDACY

Students admitted with a B.A. only are evaluated by the graduate faculty during the Autumn Quarter of their second year at Stanford. The evaluation is based on written work and at least a portion of the M.A. thesis or translation. If the faculty have serious doubts about a student's ability to work for the Ph.D., they convey this to

the student. During the subsequent Spring Quarter, the faculty formally decides whether a student should be admitted to candidacy for the Ph.D. or be terminated. In the case of a student who already has an M.A. in Chinese or Japanese when admitted to the department, the evaluation takes place in the Spring Quarter of the student's first year. If a student goes to the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Admission to candidacy does not mean that the student has fulfilled all requirements for the degree except the dissertation, but that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D. and that, subject to continued satisfactory progress, the student's status in this department is secure.

REQUIREMENTS FOR DOCTOR OF PHILOSOPHY IN CHINESE

The Ph.D. program in Chinese is designed to prepare students for a doctoral degree in Chinese literature, history (pre-modern), philosophy, or linguistics. Applicants must have a minimum of three years of Chinese language study at Stanford or the equivalent to be considered for admission. Students on the Ph.D. track will complete the M.A. as described above on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Chinese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Chinese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. track. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

1. Complete advanced classical Chinese through CHINLIT 223 and the department's requirements for the M.A. in Chinese.
2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.
3. Complete both CHINLIT 201 and CHINGEN 201.
4. Complete two relevant seminars at the 300 level. These seminars must be in different subjects.
5. Pass a set of three comprehensive written examinations, one of which tests the candidate's methodological competence in the relevant discipline. The remaining two fields are chosen, with the approval of the graduate adviser in consultation with the student's individual adviser, from the following: archaeology, anthropology, art, Chinese literature, history, Japanese literature, linguistics, philosophy, and religion. With the adviser's approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these three examinations.
6. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter, and taking DLCL 201. The Learning and Teaching of Second Languages.
7. Pass the University Oral Examination—General regulations governing the oral examination are found in the "Graduate Degrees" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
8. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Chinese.

REQUIREMENTS FOR DOCTOR OF PHILOSOPHY IN JAPANESE

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese literature, cultural history, or linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission. Students on the Ph.D. track will complete an M.A. thesis on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. track. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations.
   a. fourth-year Japanese through JAPANLANG 213
   b. classical Japanese through JAPANLIT 246 and 247.
2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.
   Students concentrating in classical Japanese literature are normally expected to fulfill this requirement by completing
   a. kanbun (JAPANLIT 248 and/or 249), and
   b. first-year classical Chinese (CHINLIT 205, 206, 207).
3. Complete eight adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least four of these eight courses must be advanced seminars numbered above 300. At least one of these eight courses must deal with Japanese linguistics. For students focusing on modern literature, at least two of these eight courses must deal with premodern material, and for students focusing on premodern literature, at least two of the eight courses must deal with modern material.
4. Complete two upper-division or graduate-level courses in two supporting fields, for a total of four courses outside of Japanese literature or linguistics. Supporting fields, to be determined in consultation with the student's primary adviser, may include Japanese anthropology, art, history, philosophy, politics, and religion, Chinese literature, comparative literature, etc.
5. Complete JAPANLIT 201. Introduction to Graduate Study in Japanese.
6. Pass a comprehensive qualifying examination that tests the candidate's breadth and depth in the primary field of research and methodological competence in the relevant discipline.
7. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 201. The Learning and Teaching of Second Languages.
8. Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
9. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

A candidate specializing in Japanese linguistics must fulfill the following requirements.

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations.
   a. fourth-year Japanese through JAPANLANG 213
   b. classical Japanese through JAPANLIT 246 and 247
2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.
3. Complete six adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least one of these six courses must be advanced seminars numbered above 300. At least one of these six courses must deal with Japanese literature.
4. Complete five upper-division or graduate-level courses in linguistics and other supporting fields. Supporting fields, to be determined in consultation with the student's primary adviser, may include applied linguistics, Chinese linguistics, psychology, education, anthropology, sociology, etc.
5. Complete JAPANLIT 279. Research in Japanese Linguistics.
6. Submit two qualifying papers presenting substantial research in two different subfields of Japanese linguistics to be approved by a committee of the specific qualifying paper.
7. Submit an annotated bibliography pertaining to the topic of dissertation to the primary adviser.
8. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 201. The Learning and Teaching of Second Languages.
9. Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
10. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

PH.D. MINOR IN EAST ASIAN LANGUAGES AND CULTURES

A student taking a Ph.D. minor in Chinese or Japanese must complete at least 30 units of work within the department at the 200 and 300 level, chosen in consultation with a department adviser. The student must take either CHINLIT 201 or JAPANLIT 201 unless the department is satisfied that work done elsewhere has provided similar training. The student must also pass a written examination in the Chinese or Japanese language.

EAST ASIAN STUDIES

Director: Kären Wigen
Affiliated Faculty and Staff:
Anthropology: Harumi Befu (emeritus), Melissa Brown, Lisa M. Curran, Miyako Inoue, Matthew Kohrman, Sylvia Yanagisako
Art and Art History: Jean Ma (on leave), Melinda Takeuchi, Richard Vinograd, Xiaoze Xie
Biology: Marcus W. Feldman
Business: Hau Lee, Bruce R. McKern, William F. Miller (emeritus), John Roberts, Kenneth Singleton
Center for International Security and Cooperation: Undraa Agvaanluvsan, Chaim Braun
Civil and Environmental Engineering: David Freyberg, Renate Fruchter, Leonard Ortolano
Communications: James Fishkin
Comparative Literature: David Palumbo-Liu
Earth Sciences: Stephan Graham, Rosamond L. Naylor
East Asian Languages and Cultures: Steven Carter, Richard Dasher, Albert E. Dien (emeritus), Paul Festa (postdoctoral fellow), Haiyan Lee, Indra Levy, Mark E. Lewis, Li Liu, Yoshiko Matsumoto, James Reichert, Stuart Sargent, Chao Fen Sun, Melinda Takeuchi, Ban Wang, John C. Y. Wang (emeritus), Yiqun Zhou
East Asian Studies: Karen Eggleston, Scott Rozelle (on leave), Suyoung Son (postdoctoral fellow)
Economics: Ronald McKinnon (emeritus)
Education: Jennifer Adams, Anthony L. Antonio, Martin Carnoy, Francisco Ramirez, Christine M. Wotipka
Electrical Engineering: Richard Dasher
Freeman Spogli Institute for International Studies: Thomas Fingar
History: Gordon Chang (on leave), Mark E. Lewis, Mark Mancall, Yumi Moon, Thomas Mullaney (on leave), Matthew Sommer, Jun Uchida, Lyman P. Van Slyke (emeritus), Kären Wigen
Ho Center for Buddhist Studies: Tenzin Tethong
Hoover Institution: Richard Allen, Larry Diamond, Thomas Henriksen, Alex Inkeles (emeritus), Tai-Chun Kuo, Hsiao-ting Lin, Alice L. Miller, Ramon Myers (emeritus), Toshio Nishi, Mark Peattie, William Perry, Alvin Rabushka, William Ratliff, Henry Rowen, Charles Wolf Jr.
Human Biology: Arthur P. Wolf
Law: Eric Feldman, Thomas Heller, Erik Jenson
Linguistics: Dan Jurafsky
Management Science and Engineering: Siegfried S. Hecker, Edison Tse, Yinyu Ye
Materials Science and Engineering: Pamela Hinds, Robert Sinclair
Medicine: Scott W. Atlas, Joseph Helms, David Katzenstein, Samuel LeBaron
Music: Jingdong Cai, Jaroslaw Kapuscinski, Stephen Sano, Linda Uyechi, Daisy You
Political Science: Masahiko Aoki (emeritus), Phillip Lipscy, Jean C. Oi
Religious Studies: Carl Bielefeldt (on leave), Megan Bryson, Robert Gimello, Paul Harrison, Irene Lin, Christian Luczanits
Shorenstein APARC: Michael Armacost, Rafiq Dossani, Karen N. Eggleston, Donald K. Emmerson, Scott Rozelle (on leave)
Sociology: Gi-Wook Shin, Andrew Walder, Xueguang Zhou
Stanford Language Center: Kazuko M. Busbin, Yin Chuang, Marina Chung, Robert Clark, Sik Lee Dennig, Michelle DiBello, Hee-sun Kim, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Hua Qian, Yu-hwa Liao Rozelle, Yoshiko Tomiyama, Huazhi Wang, Hong Zeng, Youping Zhang, Qi Zhu
Center Offices: 615 Crothers Way, 100 Encina Commons
Mail Code: 6023
Phone: (650) 736-1759, 723-3362; *fax:* (650) 725-3350
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) coordinates University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. CEAS is part of the Division of International Comparative and Area Studies in the School of Humanities and Sciences.

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN on the *Stanford Bulletin's* ExploreCourses web site.

The EASTASN courses listed on ExploreCourses deal primarily with China, Japan, and/or Korea. Literature courses are listed with the subject codes of CHINGEN, CHINLIT, JAPANGEN, and JAPANLIT on ExploreCourses. Many other theoretical and methodological courses within departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and a list of current applicable courses from outside departments may be found in the "Master of Arts in East Asian Studies" section of this bulletin. For courses in

Chinese, Japanese, and Korean language instruction use the subject codes CHINLANG, JAPANLNG, and KORLANG. For courses in Classical Chinese, search under the subject code CHINLIT.

UNDERGRADUATE PROGRAMS IN EAST ASIAN STUDIES

Undergraduates interested in East Asia can become involved by attending CEAS events, taking courses in the subject codes listed above, or earning a Minor or Bachelor of Arts degree in East Asian Studies. These undergraduate degrees in East Asian Studies are now administered by the Department of East Asian Languages and Cultures. The Bing Overseas Study Program also offers study abroad opportunities and internships in East Asia.

For language study, CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February each year. Deadlines and application information can be found on the CEAS web site. In addition, undergraduates can obtain a coterminal M.A. degree in East Asian Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

GRADUATE PROGRAMS IN EAST ASIAN STUDIES

MASTER'S PROGRAMS

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are Anthropology, Art and Art History, Comparative Literature, Earth Sciences, East Asian Languages and Cultures, Economics, Education, History, Human Biology, Linguistics, Music, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.

POSTDOCTORAL PROGRAMS

The Center for East Asian Studies offers postdoctoral fellowships in Chinese Studies each year. Postdoctoral fellowships in other areas are also available from the Freeman-Spogli Institute of International Studies and the Walter H. Shorenstein Asia-Pacific Research Center.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see http://ceas.stanford.edu/students/fellowships.php.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN EAST ASIAN STUDIES

The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. Applications are accepted once a year during the regular CEAS M.A. application cycle. The deadline for the 2011-12 academic year is January 11, 2011. Students may apply after completing 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Applicants are expected to meet the same standards as those seeking admission to the M.A. program, and they must submit the following directly to the Center's office in 100 Encina Commons:

- a written statement of purpose
- an unofficial Stanford transcript
- three letters of recommendation, at least two of which should be from members of the department of concentration
- copy of scores from the General Test of the Graduate Record Exam (official score should be sent to Stanford's school code 4704)
- a list of courses the applicant intends to take to fulfill degree requirements.

Coterm applications are reviewed along with peer applications by the M.A. Admissions Committee of the Center for East Asian Studies (CEAS). See also http://ceas.stanford.edu/admissions/apply.php.

Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units. Coterms are not eligible for University financial aid, but are eligible to apply for Foreign Language and Area Studies (FLAS) Fellowships administered by CEAS.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF ARTS IN EAST ASIAN STUDIES

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns preliminary faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language (TOEFL). Applications for admission and financial aid should be made online; see http://gradadmissions.stanford.edu. The deadline for submitting applications for the 2011-2012 academic year is January 11, 2011.

The requirements for the M.A. in East Asian Studies are as follows:

Language Requirement—Students must complete the equivalent of Stanford's first three years of language training in Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This necessitates completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese, Japanese, or Korean are used, for as long as they are in the program. Language courses above the third-year level may be applied to the Area Studies requirement discussed below. Please note that the language used to meet the three year language proficiency requirement should match the student's country of focus. Students in the M.A. program are also eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree's language requirement. Language courses are listed in the bulletin under the following subject codes on the *Stanford Bulletin's* ExploreCourses web site: CHINLANG, JAPANLNG, and KORLANG.

Area Studies Requirement—Students must complete the 1-unit core course, EASTASN 330, and at least nine additional courses related to East Asia numbered 100 or above for a minimum total of 45 units. These nine courses must be 3 or more units each, and taken for a letter grade. At least 23 units must be designated primarily for graduate students, typically at the 200-300 levels. As training in research methodologies and demonstrated research ability in a specific discipline are integral parts of the program, three of the nine courses must be taken within a single department, and at least one of these must be a seminar, colloquium, or advanced course which requires a research paper on East Asia. The six additional area studies courses may be taken in departments of the student's choosing so long as the courses are focused on East Asia. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Language courses numbered 100-199 do not count toward the nine courses required for the degree. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program, however students may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the University Registrar.

M.A. Thesis Requirement—A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course.

Because East Asian Studies is an interdisciplinary major, the majority of the courses that apply towards the degree are listed under other departments. In addition to courses listed under the EASTASN subject code, students should check the list below, as well as on the *Stanford Bulletin's* ExploreCourses site for courses in other departments that will meet the degree requirements for East Asian Studies; such departments include Anthropology, East Asian Languages and Cultures, History, Political Science, Religious Studies, and Sociology.

To meet requirements for the master's degree, students must take courses at the 100 level or above, and at least 23 units at the 200 level or above. In general, M.A. students should register for classes with the higher course number (for example, graduate students should register for ANTHRO 282 and undergraduates should register for ANTHRO 82 if the class is open to both graduate students and undergraduates). Please note that some of the courses listed are intended for undergraduates only (courses below 100, and courses with "OSP" catalog numbers) and are meant to be applied to the East Asian Studies minor or B.A. degrees, not the East Asian Studies M.A. degree. Not all courses offered by other departments that have East Asia content may be listed below or on the CEAS web site. If there is a course not listed here that has East Asia content, check with the Center for East Asian Studies to verify whether or not it can be used to fulfill the degree requirements.

The following course list represents courses that may, with the adviser's approval be used to fulfill degree requirements:

- ANTHRO 25N. Contemporary Japanese Popular Culture
- ANTHRO 147A. Folklore, Mythology, and Islam in Central Asia
- ANTHRO 148A/248A. Nomads of Eurasia: Culture in Transition
- ANTHRO 153A/253A. Japan's Postwar Cultural History
- ANTHRO 355. Cities in Global Perspective
- ANTHRO 380A. Topics in the Anthropology of China and Taiwan
- ANTHRO 380B. Gender Bias in the Past and Future of Asia: Kinship & Society
- ANTHRO 380C. Gender Bias in the Past and Future of Asia: Governance
- ARCHLGY 111. Emergence of Chinese Civilization from Caves to Palaces (Same as CHINGEN 141, CHINGEN 241)
- ARCHLGY 201. Art and Archaeology of Korea (Same as KORGEN 170)
- ARCHLGY 302. Constructing National History in East Asian Archaeology (Same as CHINLIT 218)
- ARTHIST 185/385. Art in China's Modern Era
- ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868 (Same as JAPANGEN 185)
- ARTHIST 481. Colloquium on Song and Yuan Dynasty Painting Studies
- ARTHIST 482. Chinese Art of the 1970's and 1980's
- CHINGEN 51. Chinese Calligraphy
- CHINGEN 70N. Marvelous Creatures: Animals and Humans in Chinese Literature
- CHINGEN 91. Traditional East Asian Culture: China
- CHINGEN 117/217. Worship of Buddhist Images in Medieval China
- CHINGEN 131/231. Chinese Poetry in Translation
- CHINGEN 133/233. Literature in 20th-Century China
- CHINGEN 136/236. The Chinese Family
- CHINGEN 140/240. Chinese Justice: Law, Morality, and Literature
- CHINGEN 141/241. Emergence of Chinese Civilization from Caves to Palaces (Same as ARCHLGY 111)
- CHINGEN 142. Early Chinese Thought
- CHINLIT 125/205. Beginning Classical Chinese, First Quarter
- CHINLIT 126/206. Beginning Classical Chinese, Second Quarter
- CHINLIT 127/207. Beginning Classical Chinese, Third Quarter
- CHINLIT 161/261A. Passion in Late Imperial Literature
- CHINLIT 174/274. Modern Chinese Novel: Theory, Aesthetics, History
- CHINLIT 190/290. Chinese Cultural Revolution: Performance, Politics, and Aesthetics
- CHINLIT 191/291. The Structure of Modern Chinese
- CHINLIT 218. Constructing National History in East Asian Archaeology (Same as ARCHLGY 302)
- CHINLIT 223. Advanced Classical Chinese: Literary Essays
- CHINLIT 265. Major Figures in Classical Chinese Shi Poetry
- CHINLIT 273. Chinese Drama
- CHINLIT 279. For Love of Country: National Narratives in Chinese Literature and Film
- CHINLIT 369. Late Imperial Chinese Fiction
- EASTASN 113/213. Comparative Southeast Asian Politics: Democratic Governance, Corruption and Development
- EASTASN 114/214. Chinese Imagination of Death
- EASTASN 117/217. Health and Healthcare Systems in East Asia
- ECON 168/268. International Finance and Exchange Rates
- EDUC 109X/309X. Educational Issues in Contemporary China

- EDUC 202. Introduction to Comparative and International Education
- EDUC 306B. Politics, Policy Making, and Schooling Around the World
- EE 402A. Topics in International Technology Management
- EE 402T. Entrepreneurship in Asian High Tech Industries
- FILMSTUD 116/316. International Documentary
- HISTORY 62N. The Atomic Bomb in Policy and History
- HISTORY 91C/191C/391C. Early Imperial China
- HISTORY 92S. What is China; Who are Chinese?: Cultural Identity in Ancient and Medieval China
- HISTORY 93/193/393C. Late Imperial China
- HISTORY 94B/194B. Japan in the Age of the Samurai
- HISTORY 95/195. Modern Korean History
- HISTORY 95C/195C. Modern Japanese History
- HISTORY 98/198. The History of Modern China
- HISTORY 106A. Global Human Geography: Asia and Africa (Same as INTNLREL 161A)
- HISTORY 197. Southeast Asia: From Antiquity to the Modern Era
- HISTORY 198B. The Construction of Modern China through Space and Time
- HISTORY 291D/391D. Colonialism and Collaboration in East Asia
- HISTORY 292/392. The Two Koreas
- HISTORY 292D/392D. Japan in Asia, Asia in Japan
- HISTORY 292F/392F. Traditional Korea: History and Culture
- HISTORY 396D. Modern Japan
- HISTORY 495A. Qing Legal Documents
- HISTORY 495B. Qing Legal Documents
- HUMBIO 148. Kinship and Marriage
- JAPANGEN 51/251. Japanese Business Culture
- JAPANGEN 92. Traditional East Asian Culture: Japan
- JAPANGEN 121/221. Translating Japan, Translating the West
- JAPANGEN 137/237. Classical Japanese Literature in Translation
- JAPANGEN 138/238. Survey of Modern Japanese Literature in Translation
- JAPANGEN 141/241. Japanese Performance Traditions
- JAPANGEN 185. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868 (Same as ARTHIST 187/387)
- JAPANLIT 157/257. Points in Japanese Grammar
- JAPANLIT 235. Academic Readings in Japanese I
- JAPANLIT 260. Japanese Poetry and Poetics
- JAPANLIT 266. Introduction to Sino-Japanese
- JAPANLIT 279. Research in Japanese Linguistics

JOINT AND DUAL DEGREE PROGRAMS IN EAST ASIAN STUDIES

EAST ASIAN STUDIES AND LAW

This joint degree program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or Korean. Up to 45 units of approved courses may be counted towards both degrees. For more information, see the "Joint Degree Programs" section of this bulletin. Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

EAST ASIAN STUDIES AND EDUCATION

This dual degree program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

EAST ASIAN STUDIES AND BUSINESS

This dual degree program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three

academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language.

ECONOMICS

Emeriti: (Professors) Takeshi Amemiya, Theodore Anderson, Masahiko Aoki, Kenneth J. Arrow, Paul A. David, Victor R. Fuchs, John G. Gurley, Peter J. Hammond, Donald Harris, Bert G. Hickman, Mordecai Kurz, Lawrence J. Lau, Ronald I. McKinnon, Roger G. Noll, Nathan Rosenberg, Thomas Sargent, David A. Starrett, Joseph E. Stiglitz

Honorary Emerita: (Professor) Anne O. Krueger

Chair: Lawrence Goulder

Professors: Kyle Bagwell, B. Douglas Bernheim, Michael J. Boskin, Timothy F. Bresnahan, Lawrence Goulder, Avner Greif, Robert E. Hall, Han Hong, Caroline Hoxby, Matthew O. Jackson, Peter Klenow, Jonathan Levin, Thomas E. MaCurdy, Paul R. Milgrom, John H. Pencavel, Monika Piazzesi, Joseph Romano, K. Martin Schneider, Ilya Segal, John B. Shoven, Robert Staiger, John B. Taylor, Frank Wolak, Gavin Wright

Associate Professors: Nicholas A. Bloom, Liran Einav, Muriel Niederle, Luigi Pistaferri

Assistant Professors: Ran Abramitzky, Manuel Amador, Giacomo DeGiorgi, Doireann Fitzgerald, Kyna Fong, Peter R. Hansen, Matthew Harding, Seema Jayachandran, Jakub Kastl, Fuhito Kojima, Pablo Kurlat, Aprajit Mahajan, Kalina Manova, Petra Moser, Florian Scheuer, Michele Tertilt

Senior Lecturer: Geoffrey Rothwell

Lecturers: Moussa Blimpo, Marcelo Clerici-Arias, Doru Cojoc, Maria Fitzpatrick, Gopi Shah Goda, Alexander Gould, Ward Hanson, Hamilton Helmer, Camille Landais, Peter Nilson, Nicholas Sanders, F. Victor Stanton, Faye Steiner, Mark Tendall

Courtesy Professors: Anat Admati, Lawrence Baker, David Baron, Jay Bhattacharya, Jeremy Bulow, Walter Falcon, John Ferejohn, Alan Garber, Judith Goldstein, Ilan Guttman, Stephen Haber, Peter Blair Henry, Saumitra Jha, David Kreps, N. Grant Miller, Rosamond Naylor, Maria Ogneva, Bruce Owen, A. Mitchell Polinsky, Peter C. Reiss, D. John Roberts, James Strnad, Alan Sykes, Barry Weingast, Robert Wilson

Visiting Professor: Enrico Moretti

Visiting Assistant Professor: John Lynham

Mail Code: 94305-6072

Phone: (650) 725-3266

Web Site: http://economics.stanford.edu

Courses offered by the Department of Economics are listed under the subject code ECON on the *Stanford Bulletin's* ExploreCourses web site.

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The faculty interests and research cover a wide spectrum of topics in most fields of economics, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, environmental economics, and public finance.

MISSION OF THE UNDERGRADUATE PROGRAM IN ECONOMICS

The mission of the undergraduate program in Economics is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. The program introduces students to macro- and microeconomic theory, teaches them to think and write clearly about economic problems and policy issues and to apply the basic tools of economic analysis. The undergraduate major provides an excellent background for those who plan careers in government and private enterprise as well as those pursuing graduate degrees in professional schools or in the field of economics.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of core knowledge within Economics.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively and communicate ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

GRADUATE PROGRAMS IN ECONOMICS

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

GRADUATE FIELDS

A. ECONOMIC DEVELOPMENT

To receive credit for this field, students must complete two courses from 214, 216 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

B. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses: 224, 225, 226, 227, 228, 229.

C. MONETARY THEORY AND ADVANCED MACROECONOMICS

Requirements for this field are completion of two courses from 233, 234, and 235.

D. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

E. ECONOMICS OF LABOR

To receive credit for this field, students must complete two courses from 246, 247, and 248.

F. ECONOMICS OF INDUSTRY

To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

G. INTERNATIONAL ECONOMICS

To receive credit for this field, students must complete 265 and 266. Taking one or more of 267, 268, or 269 is recommended. A research paper from any of these courses must also be submitted.

H. ECONOMETRICS

A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:

1. *H-1:* Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273 and 274.
2. *H-2:* Applied Econometrics: To receive credit in the applied econometrics subfield, students must complete 273 and either 275 or 276. Students must also complete a course or set of courses that is empirically oriented. The last requirements must be approved by the Director of Graduate Study in consultation with the instructor of 275 or 276.

I. MICROECONOMIC THEORY

To receive credit for this field, students must complete two courses from the following: 280, 281, 282, 283, 284, 286, 287, 289, 291.

J. ENVIRONMENTAL ECONOMICS

To receive credit for this field, students must complete 250 and 251. Students can petition to substitute another environment/natural resource course (e.g., MS&E 248) for either of these.

K. POLITICAL ECONOMY

To receive credit for this field, students must complete 220 and 221.

OTHER PROGRAMS

Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combines with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see http://www.law.stanford.edu/program/degrees.

FELLOWSHIPS AND ASSISTANTSHIPS

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are typically awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

BACHELOR OF ARTS IN ECONOMICS

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-6 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of 'B' or better.

REQUIREMENTS FOR THE ECONOMICS MAJOR (80 UNITS)

1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
3. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
4. ECON 50 (5 units, grade of 'B' or better): basic price theory. Prerequisites: ECON 1A and MATH 51 (letter grade required).
5. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
6. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B.
7. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units)—Four courses must be chosen from among ECON 111, 115, 118, 126, 137, 140,* 141, 144, 145, 147, 149, 153, 157, 158, 160, 164, 165, 166, 168, 169, 179 (5 units each).

Writing in the Major Course (must be taken at Stanford in California; 5 units)—This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 113, 114, 115, 136, 151, 171, 175; or STATS 200, 206, 207, 217, 218, 237.

A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Students scoring a 5 on both the advanced placement microeconomics and advanced placement macroeconomics exam may petition the Director of Undergraduate Studies to have the ECON 1A (but not 1B) course requirement waived. Students do not receive units credit for placing out of ECON 1A.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements

(see the *Information Book for Economics Majors)*. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for Stanford course substitution or transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of 'incomplete' are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department's *Information Book for Economics Majors*, available at http://economics.stanford.edu/undergraduate. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 80 units required of the Economics major. See details in the *Information Book for Economics Majors.*
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 85 units overall.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

MINOR IN ECONOMICS

The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
3. ECON 50 (5 units, grade of 'B' or better): basic price theory. Prerequisites: ECON 1A and MATH 51 (letter grade required).
4. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
5. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B.
6. Two field courses (10 units; must be taken at Stanford in California) must be chosen from the following list: ECON 102A, 102B, 111, 115, 118, 126, 137, 140,* 141, 144, 145, 147, 149, 153, 157, 158, 160, 165, 166, 168, 179.

*Students may not count units from both ECON 135 and 140 towards their minor as the courses are too similar in content.

OTHER REQUIREMENTS

If the candidate's major requires basic Economics courses (items 1 through 5), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional Economics courses numbered from 100 through 198.

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

MASTER OF ARTS IN ECONOMICS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may, but need not, elect to add this degree in addition to their current Ph.D. degree. A master's option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements—A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202. Undergraduate courses must be numbered 105 or higher (with the exception of the ECON 102A,B,C sequence listed below). No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 and 271, or by receiving a grade of 'B-' or above in each of ECON 102A, B, and C.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement. In lieu of this paper requirement, students may elect to take two additional 200+ level Economics courses.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY IN ECONOMICS

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D.—A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).
2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, environmental economics, political economy, and public finance.

   Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade of 'B' or better.
3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above. Satisfactory presentation of this paper or another research paper is required in Autumn Quarter of the third year, along with an additional presentation of an expanded research paper in Spring Quarter is also required for admission to candidacy.

It is expected that the student meet, and indeed exceed, the above standards by the end of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the third year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree—

1. *Distribution Requirement*: Students must complete four other graduate-level courses meeting the following requirements:
   a. at least one course from the area of economic history, unless history is one of the two fields of specialization.
   b. courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
   c. with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.
2. *Teaching Experience:* Each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.
3. *Seminar Participation:* Each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).
4. *Ph.D. Dissertation:* The process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

PH.D. MINOR IN ECONOMICS

PH.D MINOR

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department's comprehensive examinations where appropriate.

JOINT DEGREE PROGRAM IN PH.D. IN ECONOMICS AND MASTER OF PUBLIC POLICY

The Ph.D./M.P.P. joint degree is designed for students who wish to prepare themselves for careers in areas relating to both policy and economics. Students interested in this degree first apply to the Economics Department, indicating an interest in the joint program. There is one admissions application and one fee. If the decision is made by the department to admit the applicant, the file is then forwarded to the M.P.P. program. An admission decision, based on the information in the Ph.D. application, is made promptly, and the department informs the student of the decision.

Students may also apply to the M.P.P. after having commenced study in the Economics Department at Stanford, by first receiving the consent of the Director of Graduate Studies in Economics and then applying to the Public Policy program.

Students must have a faculty adviser from the Economics Department to assist with the planning and supervising of the joint program. The adviser is usually chosen from among the department's Public Policy-affiliated faculty.

Tuition and financial aid arrangements are made through the Economics Department.

Requirements for the M.P.P./Ph.D. in Economics: Core M.P.P. curriculum of 45 units: PUBLPOL 301B (4 units), 302A (2 units), 302B (4 units), 304A (4 units), 304B (4 units), 305A (4 units), 305B (4 units), 306 (4 units), 307 (4 units), 309 (10 units), 311 (1 unit)

JOINT DEGREE PROGRAMS IN ECONOMICS WITH THE SCHOOL OF LAW

J.D./M.A. AND J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 45 quarter hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 quarter hours of approved courses may be counted toward both degrees. In either case, no more than 36 quarter hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 5 quarter hours in the case of the M.A. and 10 quarter hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled.

For more information, see http://www.law.stanford.edu/program/degrees.

OVERSEAS STUDIES COURSES IN ECONOMICS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BEIJING

- OSPBEIJ 24. China's Economic Development. 5 units, Scott Rozelle, GER:DB:SocSci

BERLIN

- OSPBER 115X. German Economy: Past and Present. 4-5 units, Ingo Klein, GER:DB:SocSci, EC:GlobalCom

FLORENCE

- OSPFLOR 35. European Economic and Monetary Integration. 5 units, Pompeo Della Posta, GER:DB:SocSci, EC:GlobalCom

MADRID

- OSPMADRD 54. Contemporary Spanish Economy and the European Union. 5 units, Miguel Buñuel, GER:DB:SocSci

MOSCOW

- OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia. 5 units, Vladimir Mau, Vadim Novikov, GER:DB:SocSci, EC:GlobalCom

OXFORD

- OSPOXFRD 45. British Economic Policy since World War II. 5 units, James Forder, GER:DB:SocSci

PARIS

- OSPPARIS 124X. Building the European Economy: Economic Policies and the Challenges Ahead. 5 units, Jacques Le Cacheux, GER:DB:SocSci

WINTER QUARTER

BERLIN

- OSPBER 161X. The German Economy in the Age of Globalization. 4-5 units, Ingo Klein, GER:DB:SocSci, EC:GlobalCom

PARIS

- OSPPARIS 91. Globalization and its Effect on France and the European Union. 5 units, Eloi Laurent, Jacques Le Cacheux, GER:DB:SocSci, EC:GlobalCom

SPRING QUARTER

BEIJING

- OSPBEIJ 46. Introduction to Chinese Economy. 5 units, Dong Chen, GER:DB:SocSci, EC:GlobalCom

KYOTO

- OSPKYOTO 215X. Political Economy of Japan. 4-5 units, Toshihiko Hayashi, GER:DB:SocSci

PARIS

- OSPPARIS 33. The Economics of Climate Change: Policies in Theory and in Practice in the EU and the US. 5 units, Christian de Perthuis, Benoit Leguet, GER:DB:SocSci, EC:GlobalCom

SANTIAGO

- OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies. 5 units, GER:DB:SocSci

ENGLISH

Emeriti: (Professors) George H. Brown, W. B. Carnochan, John Felstiner, Charles N. Fifer, Albert J. Gelpi, Barbara C. Gelpi, David Halliburton, Shirley Heath, John L'Heureux, Herbert Lindenberger, John Loftis, Thomas C. Moser, Nancy H. Packer, Marjorie G. Perloff, Robert M. Polhemus, Arnold Rampersad, Ronald A. Rebholz, David R. Riggs, Lawrence V. Ryan, Wilfred H. Stone, Elizabeth C. Traugott, Wesley Trimpi; *(Associate Professor)* Sandra Drake; *(Professor, Teaching)* Larry Friedlander; *(Senior Lecturer)* Helen B. Brooks

Chair: Jennifer Summit

Director of Creative Writing Program: Eavan Boland

Director of Program in Writing and Rhetoric: Nicholas Jenkins

Professors: John B. Bender (English, Comparative Literature), Eavan Boland, Terry Castle, W. S. Di Piero (on leave Autumn), J. Martin Evans, Kenneth W. Fields, Shelley Fisher Fishkin, Denise Gigante (on leave Autumn), Roland Greene (English, Comparative Literature), Ursula Heise, Gavin Jones (on leave), Andrea A. Lunsford, Franco Moretti (English, Comparative Literature), Stephen Orgel, Patricia A. Parker (English, Comparative Literature), Peggy Phelan (English, Drama), Nancy Ruttenburg, Ramón Saldívar (English, Comparative Literature), Jennifer Summit, Elizabeth Tallent, Tobias Wolff

Associate Professors: Michele Elam, Blair Hoxby, Nicholas Jenkins, Adam Johnson, Paula Moya, Blakey Vermeule (on leave), Alex Woloch (on leave)

Assistant Professors: Claire Jarvis, Michelle Karnes, Saikat Majumdar, G. Vaughn Rasberry, Stephen Sohn, Hannah Sullivan

Senior Lecturers: Judith Richardson, Christopher Rovee

Courtesy Professors: David Palumbo-Liu, Bryan Wolf

Courtesy Associate Professor: Joshua Landy

Lecturers: Molly Antopol-Johnson, Harriet Clark, Marvin Diogenes, Keith Ekiss, John Evans, Sarah Frisch, Andrew Goldstone, Danielle Heard, Skip Horack, Maria Hummel, Scott Hutchins, Matthew Jockers, Tom Kealey, Ammi Keller, Peter Kline, David MacDonald, Sarah Michas-Martin, Hilton Obenzinger, Stephanie Soileau, Justin St. Germain, Alice Staveley, Shimon Tanaka, Karen Zumhagen-Yekplé

Consulting Professors: Valerie Miner, Carol Shloss

Visiting Professors: Charles Baxter, Stephen Dobyns, Nicholas Halmi

Department Offices: Building 460, Room 201

Mail Code: 94305-2087

Phone: (650) 723-2635

Web Site: http://english.stanford.edu

Courses offered by the Department of English are listed under the subject code ENGLISH on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE DEPARTMENT OF ENGLISH

The world is saturated with the written word. The English Department studies the culture of the word in its most sophisticated form, literature, with a focus on literary traditions in English across a range of media. The department's courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practices of reading, writing, and critical analysis. The undergraduate English major provides an excellent background for many professional fields, including law, education, writing, publishing, medicine, and technology. The graduate program features rigorous training in the research and analysis of British, American, and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at the highest levels.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of major theories, methods, and concepts of literary study and critical analysis.
2. an awareness of how authors and texts develop in relation to their historical contexts.
3. a comprehension of the formal qualities of key literary genres, forms, and styles. Alternatively, students pursuing the creative writing emphasis can offer a writing sample that develops particular literary genres or forms.
4. a critical ability to evaluate and appreciate the aesthetic and cultural achievement of literary texts.
5. an effective style of writing and a powerful use of language.

BACHELOR OF ARTS IN ENGLISH

In the undergraduate program, students explore the traditions of literature in English. Courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practices of reading, writing, and critical analysis.

GRADUATE PROGRAM IN ENGLISH

The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at advanced levels.

OTHER PROGRAMS IN ENGLISH

Ph.D. in English and Humanities—The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in English and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the Stanford Bulletin's ExploreCourses web site.

Ph.D. in Modern Thought and Literature—Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the director of the program.

Creative Writing Fellowships—The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

BACHELOR OF ARTS IN ENGLISH

The English major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

SUGGESTED PREPARATION FOR THE MAJOR

Prospective English majors are advised to consider IHUM 34A,B. A Life of Contemplation or Action: Debates in Western Literature and Philosophy, to satisfy their IHUM-2,3 requirements.

Further recommended is any introductory seminar taught by English department faculty offered by Stanford Introductory Studies.

FIELDS OF STUDY OR DEGREE OPTIONS

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. The department offers the following fields of study for degrees in English:

- Literature
- Literature with Creative Writing Emphasis
- Literature with Interdisciplinary Emphasis
- Literature and Foreign Language Literature
- Literature and Philosophy

See below for further information on these fields of study.

DEGREE REQUIREMENTS

Those interested in majoring in English are encouraged to declare during their sophomore year, but no later than the beginning of their junior year. They are urged to discuss their plans with the undergraduate student services specialist as early as possible, and to take recommended preparatory courses for the major in their freshman and sophomore years. To declare the major, a student must fill out the Declaration of Major in Axess; choose a faculty adviser; and submit a completed program proposal form approved by the adviser. It is recommended that a student meet with the adviser at least once per quarter to discuss progress towards degree completion. Students who declared prior to September 2010 should refer to previous guidelines and requirements for the major.

With the exception of the required courses listed below, which must be taken for a letter grade, any two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor. Students may apply as many as four literature courses taken at approved universities towards the English major electives. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar's external credit evaluation section.

The total number of units required to graduate for each degree option is specified in the relevant section following. All courses should be taken for 5 units. Irrespective of field of study or degree option, all English majors must complete the following requirements:

Required Courses (40 units)—

1. Three Methodology courses
   a. ENGLISH 160. Poetry and Poetics (5 units)
   b. ENGLISH 161. Narrative and Narrative Theory (5 units)
   c. ENGLISH 162. Critical Methods (5 units)
2. Four Historical courses
   a. ENGLISH 100A. Literary History I (5 units)
   b. ENGLISH 100B. Literary History II (5 units)
   c. ENGLISH 100C. Literary History III (5 units)
   d. One additional history of literature course (5 units, denoted by H-suffix)
3. One Senior Seminar (5 units, denoted by S-suffix, WIM)

Rules that apply to all English majors irrespective of field of study or degree option—

1. Courses can only be counted once, i.e. can only satisfy one requirement.
2. Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

FIELD OF STUDY I. LITERATURE

This field of study is declared in Axess. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to degree requirements required of all majors and listed above, students must complete at least 30 additional units of courses consisting of:

1. Six additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these six elective courses, students may choose one upper-division course in a foreign literature read in the original language.

FIELD OF STUDY II. LITERATURE WITH CREATIVE WRITING EMPHASIS

This field of study is declared in Axess. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to degree requirements required of all majors and listed above, students must complete at least 30 additional units of approved courses including:

1. One course in literature in English
2. One beginning prose course: ENGLISH 90, Fiction Writing *or* ENGLISH 91, Creative Nonfiction
3. One beginning poetry course: ENGLISH 92, Reading and Writing Poetry
4. Three courses specifically designed for either the prose *or* poetry concentration.

   Prose writers—
   a. ENGLISH 146. Development of the Short Story
   b. Two intermediate or advanced prose classes: any ENGLISH 190 series, 191 series, 198L, or 290.

   Poetry writers—
   a. One literature Course in Poetry approved by a Creative Writing Professor
   b. Two intermediate or advanced poetry classes: any ENGLISH 192 series, 198L, or 292

FIELD OF STUDY III. LITERATURE WITH INTERDISCIPLINARY EMPHASIS

This field of study is declared in Axess. This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. In addition to degree requirements required of all majors and listed above, students must complete at least 35 additional units of approved courses including:

1. Three elective literature courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
2. Four courses related to the area of inquiry. These courses may be chosen from disciplines such as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in this program must write at least one interdisciplinary paper. This may be ENGLISH 197. Senior Honors Essay; ENGLISH 199. Senior Independent Essay; ENGLISH 194 or 198. Individual Research ; or a paper integrating the material in two courses the student is taking in two different disciplines.

FIELD OF STUDY IV. LITERATURE AND FOREIGN LANGUAGE LITERATURE

This major provides a focus in British and American literature with additional work in French literature; German literature; Italian literature; Spanish or Spanish American literature. These are interdepartmental majors declared in Axess. In addition to degree requirements required of all majors and listed above, students must

complete at least 30 additional units of approved courses including:

1. Two elective courses chosen from among those offered by the Department of English, one of which may be a creative writing course.
2. A coherent program of four courses in the foreign language literature, read in the original language, approved by the Director of Undergraduate Studies in English and by the relevant foreign language department.

FIELD OF STUDY V. LITERATURE AND PHILOSOPHY

This field of study is declared in Axess. Students should meet with the undergraduate director concerning the Literature and Philosophy focus. This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole. In addition to degree requirements required of all majors and listed above, students must complete at least 35-40 additional units of approved courses (at least eight 5-unit courses of the total units required must be within the English department) including:

1. PHIL 80. Mind, Matter, and Meaning (Writing in the Major): Prerequisite: introductory philosophy course.
2. Gateway course: ENGLISH 81 (same as PHIL 81, CLASSGEN 81, COMPLIT 181, FRENGEN 181 and ITALGEN 181), Philosophy and Literature. This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 series.
4. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100.
6. Two upper division courses of special relevance to the study of Philosophy and Literature. At least one of these courses needs to be in the English department. A list of approved courses is available from the Director of Undergraduate Studies in English.
7. Capstone seminar of relevance to the study of Philosophy and Literature.

HONORS PROGRAM

Students wishing to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a senior honors essay proposal with a bibliography. Honors students are encouraged to complete before the start of their senior year the three methodology courses that are English major requirements: ENGLISH 160, 161, and 162.

In September before the senior year, students are encouraged to participate in the Bing Honors College. In Autumn Quarter of the senior year, students take a 3-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. In addition, in Autumn Quarter of the senior year, honors students take a 2-unit essay workshop focused on the process of researching and writing the essay. Students who are studying at Oxford or at other institutions may be exempted from these requirements on request and with the approval of the director of the honors program.

In Winter and Spring quarters of the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15. Essays that receive a grade of 'A-' or above are awarded honors.

Students in the honors program complete the requirements of the major and the following:

Required Courses—
ENGLISH 196A. Honors Seminar, 3 units
ENGLISH 196B. Honors Essay Workshop, 2 units
ENGLISH 197. Senior Honors Essay, 10 units

MODULES

Advanced Individual Research—Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for ENGLISH 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

Senior Independent Essay—The senior independent essay gives senior English majors the opportunity to work throughout the year on a sustained piece of critical or scholarly work of around 10,000 words on a topic of their choice, with the close guidance of a faculty adviser. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of the third quarter prior to expected graduation. The senior essay is read and graded by the adviser and one other member of the English faculty. Senior independent essay students register for ENGLISH 199.

OVERSEAS STUDIES OR STUDY ABROAD

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or in a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies" section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

MINOR IN ENGLISH OR IN CREATIVE WRITING

Both the Department of English and the Creative Writing program offer a distinct minor.

MINOR IN ENGLISH LITERATURE

The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature.

Requirements—In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar, for a total of 35 units:

Required Courses for the Minor—

1. Two of the three Methodology courses
   a. ENGLISH 160. Poetry and Poetics (5 units)
   b. ENGLISH 161. Narrative and Narrative Theory (5 units)
   c. ENGLISH 162. Critical Methods (5 units)
2. Two of the three Historical courses
   a. ENGLISH 100A. Literary History I (5 units)
   b. ENGLISH 100B. Literary History II (5 units)
   c. ENGLISH 100C. Literary History III (5 units)

Elective Courses for the Minor—

1. Three elective courses from those offered in the English department, only one of which may be a course in Creative Writing.

MINOR IN CREATIVE WRITING

The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either prose or poetry.

Requirements—In order to graduate with a minor in Creative Writing, students must complete the following program of six 5-unit courses for a total of 30 units. All courses must be taken for a letter grade.

Required Courses for the Minor—

1. ENGLISH 94. Writing Across Genres
2. One beginning prose course: ENGLISH 90. Fiction Writing *or* ENGLISH 91. Creative Nonfiction
3. One beginning poetry course: ENGLISH 92. Reading and Writing Poetry
4. Three courses specifically designed for either the prose OR poetry concentration.

   Prose writers:
   a. ENGLISH 146. Development of the Short Story
   b. Two intermediate or advanced prose classes: any ENGLISH 190 series, 191 series, 198L, or 290.

   Poetry writers:
   a. ENGLISH 160. Poetry and Poetics
   b. Two intermediate or advanced poetry classes: any ENGLISH 192 series, 198L, or 292

MASTER OF ARTS IN ENGLISH

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further postgraduate work in English may apply for Stanford's coterminal master's program. Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master's degree. Students must also take the general GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree. For University coterminal degree program rules and University application forms, see http://ual.stanford.edu/AP/choosing_coterm/Coterm.html. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin.

M.A. candidates must complete with a 3.0 (B) grade point average (GPA) at least nine courses (a minimum of 45 units), at least two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101-199 without the consent of the Director of Graduate Studies, and no more than two courses outside the department. The master's student may take no more than 10 units of directed reading and research (ENGLISH 398). No creative writing courses may be used to fulfill the requirements. M.A. candidates must also demonstrate a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.) Interested students should consult their faculty adviser or the graduate program adviser for further details.

DEGREE REQUIREMENTS

Required Courses—

1. Two courses in literature before 1800
2. Two courses in literature after 1800

Optional Courses—Five elective courses; these courses should represent a mixture of survey and specialized courses chosen to guarantee familiarity with a majority of the works on the reading list for doctoral candidates. Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60 page master's thesis. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of Winter Quarter prior to anticipated graduation. Candidates register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. The thesis is read and graded by the adviser and one other member of the English faculty.

Candidates who write a master's thesis may petition to be excused from up to 10 units of the electives described above. The additional 35 units normally consist of the four required courses and three elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the coterminal teaching program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the coterminal teaching program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY IN ENGLISH

ADMISSION

Students with a bachelor's degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. Applicants for admission to graduate work must take the General Test of the Graduate Record Examination and the Subject Test in Literature. International students whose first language is not English are also required to take the TOEFL examination (with certain exceptions: see http://gradadmissions.stanford.edu).

DEGREE REQUIREMENTS

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Tracks—Doctoral students may follow one of two tracks: English and American Literature or English and Comparative Literature.

Requirements—The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University's basic requirements for the doctorate. Students should consult the most recent edition of *The Ph.D. Handbook*; copies are available in the English graduate studies office.

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor's degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another's classrooms.

I. *English and American Literature*—Students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).
2. Graduate-level (at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
3. Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies (at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the apprentice teaching program described above, and a series of pedagogy workshops during Winter and Spring Quarters. There are no units associated with this work.
7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser's judgment and the candidate's needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
10. *University Oral Examinations*—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.
11. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
12. *Committee*—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student's major department. Normally, all members are on the Stanford Academic Council.

II. *English and Comparative Literature*—The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
2. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.
3. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
4. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
5. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this re-

quirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.

6. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
7. An oral qualifying examination: see item 9 under requirements of the Ph.D. program in English Literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
8. *University Oral Examinations*—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.
9. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
10. *Committee*—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one member must be from the student's major department. Normally, all members are on the Stanford Academic Council.

LANGUAGE REQUIREMENTS

Candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before the qualifying examination), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52 or CLASSLAT 10, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of 'B' or higher.

OVERSEAS STUDIES COURSES IN ENGLISH

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

OXFORD

- OSPOXFRD 17. The Novel of Sensation: Gothic, Detective, Prohibition and Transgression in Victorian Fiction. 5 units, Emma Plaskitt, GER:DB:Hum
- OSPOXFRD 163X. Shakespeare: Critical Commentary. 5 units, Richard Rowley, GER:DB:Hum

SPRING QUARTER

OXFORD

- OSPOXFRD 57. The Rise of the Woman Writer, 1660-1860. 4-5 units, Emma Plaskitt, GER:DB:Hum
- OSPOXFRD 61. Castles and Satanic Mills: the Medieval in British Art, Architecture and Literature, 1750-1914. 4 units, Rosemary Hill

ETHICS IN SOCIETY PROGRAM

Director: Rob Reich

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (School of Medicine), Barton Bernstein (History), Michael Bratman (Philosophy), Eamonn Callan (Education), Albert Camarillo (History), Joshua Cohen (Philosophy, Political Science, Law), Barbara Fried (Law), Leah Gordon (Education), Nadeem Hussain (Philosophy), Allyson Hobbs (History), David Kennedy (History), Aishwary Kumar (History), Scotty McLennan (Dean of Religious Life), Benoît Monin (Psychology), Josiah Ober (Classics, Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), Tamar Schapiro (Philosophy), Mitchell Stevens (Education), David K. Stevenson (Pediatrics), Brent Sockness (Religious Studies), Allen Wood (Philosophy), Sylvia Yanagisako (Anthropology), Lee Yearley (Religious Studies)

Program Offices: Galvez Modular, Room 117

Mail Code: 94305-3099

Phone: (650) 736-2629

Email: akuduk@stanford.edu

Web Site: http://ethicsinsociety.stanford.edu

Courses offered by the Program in Ethics in Society are listed under the subject code ETHICSOC on the *Stanford Bulletin's* ExploreCourses web site. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are crosslisted with the Program in Ethics in Society.

The Program in Ethics in Society, which operates under the umbrella of the Bowen H. McCoy Family Center for Ethics in Society, is designed to foster scholarship, teaching, and moral

reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, science, and public service.

HONORS IN ETHICS IN SOCIETY

The Program in Ethics in Society offers undergraduates the opportunity to write a senior honors thesis within a community of interdisciplinary scholars. The course of study combines the analytical rigor of moral and political philosophy with the subject matter of each student's self-chosen major to develop a sophisticated understanding of problems of social concern. Such problems include: the nature and implications of treating people with equal dignity and respect; the scope of liberty; the legitimacy of government; and the meaning of responsibility. The program poses these issues and others in the context of debates which arise in our common public life. It thus extends moral concern and reflection across disciplines such as medicine, law, economics, political science, sociology, international relations, and public policy.

Students in the program write honors theses on topics which use moral and political philosophy to address practical problems. Previous theses have considered such questions as the just distribution of health care, obligations to future generations, the role of moral values in education, the moral implications of genetic engineering, and the relationship between gender inequality and the structures of work and family. Students in the program have won scholarships to graduate study including Marshall, Rhodes, and Fulbright fellowships. Others have taken the step from moral analysis to moral commitment, pursuing careers of public service.

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or at the beginning of Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade. Students interested in pursuing honors in Ethics in Society should contact the program coordinator for more information and to begin the application process.

REQUIREMENTS

1. ETHICSOC 20. Introduction to Moral Theory (same as PHIL 20); *or* ETHICSOC 170. Ethical Theory (same as PHIL 170)
2. ETHICSOC 171. Justice (same as IPS 208, PHIL 171, POLISCI 136S, PUBLPOL 207)
3. Two 4- or 5-unit undergraduate courses on a subject approved by the faculty director, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them, ideally with the honors thesis in mind.
4. ETHICSOC 190. Honors Seminar
5. ETHICSOC 200 A, B. Honors Thesis. On a subject approved by the honors adviser, with the work spread over two quarters. To receive honors in Ethics in Society, students must receive a grade of 'B+' on their thesis.

Typically, requirements 1 and 2 are completed before the Winter Quarter of the junior year. ETHICSOC 190 is taken in Winter Quarter of the junior year and requirement 3 at any time during the sophomore, junior, or Autumn Quarter of the senior year. The honors thesis is written during Autumn and Winter quarters of the senior year. Exceptions to this must be approved by the faculty director. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors.

COURSES

ETHICS IN SOCIETY

- ETHICSOC 10. Ethics in Theory and Practice (same as PHIL 22)
- ETHICSOC 20. Introduction to Moral Philosophy (same as PHIL 2)
- ETHICSOC 132X. Theories of Civil Society, Philanthropy, and the Nonprofit Sector (same as POLISCI 132X)
- ETHICSOC 136R. Introduction to Global Justice (same as INTNLREL 136R, PHIL 76, POLISCI 136R, POLISCI 336)
- ETHICSOC 137R. Justice at Home and Abroad: Civil Rights in the 21st Century (same as EDUC 261X, POLISCI 137R, POLISCI 337R)
- ETHICSOC 157. Moral Foundations of Capitalism
- ETHICSOC 170. Ethical Theory (same as PHIL 170/270)
- ETHICSOC 171. Justice (same as IPS 208, PHIL 171/271, POLISCI 136S, PUBLPOL 207)
- ETHICSOC 175M. Ethics of War (same as PHIL 80)
- ETHICSOC 177M/277M. Human Rights and Moral Questions (same as PHIL 177M/277M)
- ETHICSOC 178M/278M. Environmental Justice (same as PHIL 178M/278M)
- ETHICSOC 185M. Contemporary Moral Problems (same as PHIL 72)
- ETHICSOC 190. Honors Seminar
- ETHICSOC 200 A and B. Honors thesis credits

COGNATE COURSES

This is a partial list of courses that may be used to fulfill requirement 3. Courses not on this list can be submitted to the faculty director for approval.

- ANTHRO 90A. History of Archaeological Thought (same as ARCHLGY 103)
- ANTHRO 90B. Theory of Cultural and Social Anthropology
- ANTHRO 179. Cultures of Disease: Cancer
- BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution (same as GENE 109Q)
- CLASSGEN 81. Philosophy and Literature (same as PHIL 81)
- COMM 131/231. Media Ethics and Responsibility
- COMPLIT 226. Narrative and Ethics (same as GERLIT 242)
- CS 181. Computers, Ethics, and Public Policy
- EDUC 165/265. History of Higher Education in the U.S. (same as HISTORY 158C)
- EDUC 167. Educating for Equity and Democracy
- EDUC 201. History of Education in the United States (same as HISTORY 158B)
- EDUC 216X. Education, Race, and Inequality in African American History (same as HISTORY 255E)
- EDUC 220C. Education and Society (same as SOC 130/230)
- EDUC 247. Moral Education
- HISTORY 209C. Liberalism and Violence: A Conceptual History
- HUMBIO 122S. Social Class, Race, Ethnicity, Health
- HUMBIO 174. Foundations of Bioethics
- IPS 241. International Security in a Changing World (same as POLISCI 114S)
- MED 83Q. Ethical, Legal, and Social Dimensions of Stem Cell Research
- MS&E 254. The Ethical Analyst
- POLISCI 1. Introduction to International Relations
- POLISCI 123. Politics and Public Policy (same as PUBLPOL 101/201)
- PUBLPOL 183. Philanthropy and Social Innovation
- URBANST 131. Social Innovation and the Social Entrepreneur

MINOR IN ETHICS IN SOCIETY

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life.

Students must declare the minor in Axess no later than the last day of Autumn Quarter of their senior year, although they are advised to declare sooner. The student should discuss the minor with an adviser and prepare a proposal that includes a list of courses planned to fulfill the requirements, theme of minor study, and the name of the faculty adviser. The faculty director approves this proposal. Students interested in pursuing a minor in Ethics in Society should contact the Program Coordinator for more information and to begin the planning process.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units. Required courses must be taken for a letter grade.

REQUIREMENTS

1. ETHICSOC 20. Introduction to Moral Theory (same as PHIL 20) *or* ETHICSOC 170. Ethical Theory (same as PHIL 170)
2. ETHICSOC 171. Justice (same as IPS 208, PHIL 171, POLISCI 136S, PUBLPOL 207)
3. Three courses at the 100 level or above that address some dimension of moral or political theory or practice.
4. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.

See the course list in the "Honors in Ethics and Society" section of this bulletin for courses that fulfill requirements 3 and 4. The program director may approve additional courses.

The 100- and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of requirements 1 and 2.

Subject to the approval of the director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20, 170, or 171. No course credited to the Ethics in Society minor may be double-counted toward major requirements.

FEMINIST STUDIES

Director: Heather Hadlock

Program Committee: Heather Hadlock (Music), Shelley Correll (Sociology), Helen Longino (Philosophy), Valerie Miner (Feminist Studies), Elizabeth Tallent (English), Christine Min Wotipka (Education)

Resource Faculty:

American Studies: Shelley Fisher Fishkin

Anthropology: Melissa Brown, Paulla Ebron, Miyako Inoue, Sarah Jain, Matthew Kohrman, Barbara Voss, Sylvia Yanagisako

Art and Art History: Terry Berlier, Wanda Corn (emerita), Pamela Lee, Melinda Takeuchi

Asian Languages: James R. Reichert, Yoshiko Matsumoto

Biology: Joan Roughgarden

Business: Joanne Martin (emerita)

Classics: Maud Gleason, Susan Stephens

Comparative Literature: Patricia Parker

Developmental Biology: Ellen Porzig

Drama: William Eddelman (emeritus), Harry J. Elam, Cherríe Moraga, Peggy Phelan

Education: Susanna Loeb, Myra Strober (emerita), Christine Min Wotipka

English: Eavan Boland, Helen Brooks, Terry Castle, Michele Elam, Barbara Gelpi (emerita), Andrea Lunsford, Paula Moya, Stephen Orgel, Ramón Saldívar, Stephen Hong Sohn, Jennifer Summit, Elizabeth Tallent

Feminist Studies: Nicole Baran, Kathleen Coll, Patricia Karlin-Neumann, Susan Krieger, Valerie Miner

French and Italian: Carolyn Springer

German Studies: Russell Berman, Kathryn Strachota

History: Philippe Buc, Paula Findlen, Estelle Freedman, Allyson Hobbs, Katherine Jolluck, Nancy Kollmann, Carolyn Lougee Chappell, Paul Robinson (emeritus), Londa Schiebinger, Matthew Sommer, Laura Stokes, Kären Wigen

Human Biology: Anne Firth-Murray, Marcia Stefanick

Iberian and Latin American Cultures: Yvonne Yarbro-Bejarano

Law: Deborah Rhode

Linguistics: Penelope Eckert, Arnold Zwicky

Medical School: Ann Arvin, Helen Blau, Roy King, Cheryl Koopman, Iris Litt (emerita)

Music: Heather Hadlock

Philosophy: Helen Longino, Debra Satz

Web Site: http://feminist.stanford.edu

Courses offered by the Program in Feminist Studies are listed under the subject code FEMST on the *Stanford Bulletin's* ExploreCourses web site.

Each Feminist Studies student builds an individual program of study around a self-defined thematic focus, integrating courses from multiple departments. The Program offers an undergraduate major and minor, and an interdisciplinary honors program that is open to students in all majors. The program encourages work in the arts and supports creative honors theses.

Feminist Studies awards the annual Michelle Z. Rosaldo Prizes and Francisco Lopez Prizes for the best undergraduate scholarship on women, feminism, gender, or sexuality. The Rosaldo Prizes are awarded for the best essay and honors thesis or master's paper in the social sciences, and the Lopez Prizes for the best essay and honors thesis or master's paper in the humanities. See http://stanford.edu/dept/femstudies/opportunities for details.

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office or at http://feminist.stanford.edu. Students interested in Feminist Studies should consult the program mentor.

MISSION OF THE UNDERGRADUATE PROGRAM IN FEMINIST STUDIES

The interdepartmental Program in Feminist Studies provides students with the background and skills to investigate the significance of gender and sexuality in all arenas in human life. The program coordinates courses offered across the University into a curriculum in feminist and queer/LGBT studies, with an emphasis on diversity and transnationality. Feminist Studies majors examine how societies structure gender roles, relations, and identities, and how these intersect with other relations of power, such as class, race, ethnicity, sexuality, and age. Students employ feminist theories and methodologies to expand and reevaluate the assumptions about gender and sexuality that inform the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry. The program prepares majors for graduate study in humanities and social sciences, and for professional schools.

LEARNING OUTCOMES

The program expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the program's undergraduate program. Students are expected to demonstrate:

1. knowledge of the histories of feminist and/or queer social movements and their intersections with other social justice movements.

2. understanding of how the interdisciplinary field of Feminist Studies relates to feminist and/or queer social movements.
3. knowledge and comprehension of feminist and/or queer theories and methods for social and cultural-literary analysis.
4. skill in making and communicating feminist/queer analyses of data, texts, and arguments.

BACHELOR OF ARTS IN FEMINIST STUDIES

The major in Feminist Studies requires 63 units and may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one of multiple majors, none of the 63 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 63 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should be declared before the beginning of the junior year. Students declare the major by developing a proposal with the help of the program mentor and a faculty adviser from the list of resource faculty. The proposal describes the student's thematic focus and outlines a course of study. The proposal must be approved by the student's adviser and the Program Director.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 63 units. The courses are divided among the core, the focus, and electives to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before FEMST 103.
2. Designated feminist theory course. The Feminist Studies web site lists courses that fulfill the theory requirement this year.
3. FEMST 103. Feminist Theories and Methods Across the Disciplines. Prerequisite: FEMST 101
4. FEMST 104A,B. Practicum
5. One Feminist Studies or cognate course in the social sciences. (e.g. Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, or Sociology).
6. One Feminist Studies or cognate course in the humanities (e.g. English, Linguistics, Philosophy, Religious Studies, the arts, and languages).

PRACTICUM

The practicum (FEMST 104 A, B) brings together theory and practical experience. The practicum should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year.

THE FOCUS

Every student designs a thematic focus consisting of at least five courses in addition to the core. These foci are not declared on Axess; they do not appear on the transcript or diploma.

1. The focus should be designed in consultation with the student's advisers. The following are examples, and students are encouraged to develop new ones:
   Chicana Feminisms
   Cross Cultural Perspectives on Gender
   Feminist Perspectives on Science and Technologies
   Gender and Education
   Gender, Race and Nation/Transnational Feminisms
   Gender Justice and Human Rights
   Masculinities
   Queer/LGBT Studies
   Race, Class and Gender
   Women, Creativity, and the Arts
   Gender, Health and Medicine
   Gender, Spirituality and Religion
2. At least three of the focus courses should be Feminist Studies or cognate courses.
3. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.
4. At least one course within the thematic focus should address crosscultural issues.

ELECTIVES

Students are encouraged to take electives that provide intellectual breadth and contribute to the 63-unit requirement..

WRITING IN THE MAJOR (WIM)

Majors in Feminist Studies may satisfy the Writing in the Major (WIM) requirement by taking FEMST 153, Women and the Creative Imagination, or one of the approved WIM cognate courses. Honors students satisfy the WIM requirement through their honors work.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

Admission—The honors program offers an opportunity to do independent research for a senior thesis. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must begin the application process for honors certification by meeting with the program mentor by May 1 of their junior year, but are encouraged to apply earlier. During the application process, students will design a project in consultation with their proposed thesis adviser and the Feminist Studies honors mentor. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the director of the program for final approval. All projects must have a primary focus on gender or sexuality. See the Feminist Studies web site for details.

Requirements—

1. In addition to the normal requirements for the major, students enroll in FEMST 105 with their honors thesis adviser for 10-15 units towards the preparation of the honors thesis. These units may be distributed throughout the academic year.
2. Throughout the senior year, students work with faculty advisers and the honors tutor. The final thesis must be submitted by the last day of classes in the Spring of their senior year. The completed thesis must carry the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see http//feminist.stanford.edu.
3. Each student must participate in a yearlong writing workshop with the honors mentor. See the website for more information.

MAJORS IN OTHER DEPARTMENTS

Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major.

Admission—Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must complete the following courses with a grade of (B+) or better:

1. FEMST 101 and a designated feminist theory course
2. *or* three Feminist Studies courses and/or cognate courses related to the topic of their proposed honors research.

Students must begin the application process for honors by meeting with the program mentor by May 1st of their junior year, but are encouraged to begin earlier. During the application process,

students outline a plan for course work and design an honors project in consultation with their proposed thesis adviser and the honors mentor. The final proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the director of the program for final approval. See the Feminist Studies web site for more details.

Requirements—

1. Students enroll in FEMST 105 with their honors thesis adviser for 10-15 units towards the preparation of the honors thesis. These units may be distributed throughout the academic year.
2. Throughout the senior year, students work with faculty advisers and the honors tutor. The final thesis must be submitted by the last day of classes in the Spring of their senior year. The completed thesis must carry the adviser's signature of approval. Creative projects must include a section of critical analysis. For more information, see http//feminist.stanford.edu.
3. Each student must participate in a yearlong writing workshop with the honors mentor. See the website for more information.

COGNATE COURSES

The following is a partial list of cognate courses for Feminist Studies. Please refer to the program web site for updated lists throughout the year. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program mentor for applicability of these courses to a major or minor program.

AFRICAAM 144. African Women Writers
AFRICAAM 255. Racial Identity in the American Imagination
AMSTUD 156H. History of Women and Medicine in the United States
ANTHRO 111. Archaeology of Sex, Sexuality, and Gender
ANTHRO 151. Women, Fertility, and Work
ANTHRO 180. Science, Technology, and Gender
ANTHRO 218. Literature, Politics, and Gender in Africa
BIO 185. Evolution of Reproductive Social Behavior
CHICANST 122. Introduction to Latina Literature
CHICANST 160N. Salt of the Earth: Docudrama in America
CHICANST 165A. Chicana/o History
CHICANST 197. The Rite to Remember: Performance and Chicana Indigenous Thought
CHINGEN 235. Chinese Bodies, Chinese Selves
CLASSGEN 119. Gender and Power in Ancient Rome
COMPLIT 141. Literature and Society in Africa and the Caribbean

MINOR IN FEMINIST STUDIES

Students interested in minoring in Feminist Studies should consult the program mentor. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses at the 100 level or above for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student's major. The minor in Feminist Studies should be declared by Winter Quarter of a student's junior year.

Requirements—

1. FEMST 101. Introduction to Feminist Studies. This must be taken before 103.
2. Designated feminist theory course, or FEMST 103, Feminist Theories and Methods Across the Disciplines.

Focus—

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed in the "Bachelor of Arts in Feminist Studies" section of this bulletin. One course within the thematic focus should address crosscultural issues.

OVERSEAS STUDIES COURSES IN FEMINIST STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

SPRING QUARTER

FLORENCE

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality and the Image. 4 units, Ermelinda Campani, GER:DB:Hum, EC:Gender

FINANCIAL MATHEMATICS

Director: Tze Leung Lai
Steering Committee: A. Dembo, K. Giesecke, T. Lai, A. Owen, G. Papanicolaou, J. Primbs, K. Singleton
Core Faculty:
Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, P. Hansen, M. Kurz, J. Shoven
Electrical Engineering: T. Cover
Management Science and Engineering: K. Giesecke, P. Glynn, D. Luenberger, J. Primbs
Mathematics: S. Brendle, I. Camilier, A. Dembo, P. Diaconis, G. Papanicolaou
Statistics: T. Cover, A. Dembo, P. Diaconis, D. Donoho, T. Lai, A. Owen, B. Rajaratnam

The departments of Mathematics and Statistics, in close cooperation with the departments of Economics and Management, Science, and Engineering, and the Graduate School of Business, offer an interdisciplinary Master of Science degree in Financial Mathematics. The Financial Mathematics program provides a master's-level education in applied and computational mathematics, statistics, and financial applications.

GRADUATE PROGRAM IN FINANCIAL MATHEMATICS

The department offers a Master of Science in Financial Mathematics. University requirements for the M.S. are described in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE IN FINANCIAL MATHEMATICS

Admission—To be eligible for admission, students are expected to have excelled in the following courses or their equivalent:

1. Linear algebra at the level of MATH 104.
2. Real analysis (Advanced Calculus) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132.
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136/STATS 219.
5. Computer programming at the level of CS 106A,B or X.

Some of these courses (e.g. STATS 116) are usually offered during the Summer Quarter so candidates lacking the required background may take them then.

Candidates for admission must take the general Graduate Record Examination and may take the subject test in Mathematics as well. Information about these exams can be found at http://www.gre.org.

Requirements—The program requires completion of 45 units of course work. Ordinarily, four quarters are needed to complete all requirements. Students who do not complete all requirements within three years of admission are terminated from the program.

Of these 45 units, six courses must be taken from the list of required courses and six must be taken from the list of elective courses, available below and on the program web site at http://finmath.stanford.edu/academics/required.html and http://finmath.stanford.edu/academics/electives.html. These courses must be taken for letter grades, but students may elect to take one of the 12 courses CR/NC. An overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

Any remaining units required to complete the 45 total must be taken from the following options, and may be taken for letter grades or CR/NC:

1. from the approved list of electives with emphasis on computation, information technology or finance
2. STATS 200, STATS 217, STATS 218, MATH 131, MATH 132, MATH 202 or ECON 140
3. additional (practical) CS courses
4. in the form of an industrial internship in the Bay Area or elsewhere, with the approval and supervision of a faculty member. A written report must be submitted upon completion of the internship. Students who choose to take credit for practical training must sign up for STATS 297 (1-3 units).

Required Courses—In partial fulfillment of the M.S. degree in Financial Mathematics, students must fulfill six required courses, with two from each of the following three core areas:

1. Stochastic Processes and Statistics
2. Differential Equations, Modeling, Simulation and Computing
3. Finance

The selection of these courses is to be done in consultation with the Program Director. The following courses can be counted toward the six required courses:

Mathematics:

- MATH 227. Partial Differential Equations and Diffusion Processes
- MATH 236. Introduction to Stochastic Differential Equations
- MATH 238. Mathematical Finance (same as STATS 250)
- MATH 239. Computation and Simulation in Finance

Statistics:

- STATS 240. Statistical Methods in Finance
- STATS 241. Financial Modeling Methodology and Applications
- STATS 242. Algorithmic Trading and Quantitative Strategies
- STATS 243. Statistical Methods and Models for Risk Management and Surveillance
- STATS 315B. Modern Applied Statistics: Data Mining
- STATS 362. Monte Carlo Sampling

Management Science & Engineering:

- MS&E 347. Credit Risk: Modeling and Management

Graduate School of Business:

- FINANCE 622. Dynamic Asset Pricing Theory

At the Program Director's discretion, courses taken previously that are equivalent to the above may be waived; in which case they must be replaced by elective courses in the same subject area.

Elective Courses—Each candidate must take at least six approved elective courses from the list below, with two from each of the three core areas:

1. Stochastic Processes and Statistics
2. Differential Equations, Modeling, Simulation and Computing
3. Finance

Other elective courses may be authorized by the Program Director if they provide skills relevant to financial mathematics and do not overlap with courses in the candidate's program.

Mathematics:

- MATH A136. Stochastic Processes (same as STATS 219)
- MATH 180. Introduction to Financial Mathematics
- MATH 205A/B. Real Analysis
- MATH 220. PDE of Applied Mathematics
- MATH 222A. Computational Methods for Fronts, Interfaces, and Waves
- MATH 227. Partial Differential Equations and Diffusion Processes
- MATH 237. Stochastic Equations and Random Media
- MATH 256A/B. Partial Differential Equations
- MATH 261A/B. Functional Analysis
- MATH 266. Time Frequency Analysis and Wavelets

Statistics:
- STATS 202. Data Mining and Analysis
- STATS 206. Applied Multivariate Analysis
- STATS 207. Introduction to Time Series Analysis
- STATS 212. Applied Statistics with SAS
- STATS 219. Stochastic Processes (same as MATH 136)
- STATS 220. Continuous Time Stochastic Control
- STATS 227. Statistical Computing
- STATS 235. Decision Making in Financial Services
- STATS 237. Time Series Modeling and Forecasting
- STATS 240. Statistical Methods in Finance
- STATS 243. Introduction to Mathematical Finance (summer version of MATH 180)
- STATS 252. Data Mining and Electronic Business
- STATS 254. Correspondence Analysis and Related Methods (one time offering Aut 08-09)
- STATS 305. Introduction to Statistical Modeling
- STATS 306A. Methods for Applied Statistics
- STATS 310A/B/C. Theory of Probability
- STATS 315A/B/C. Modern Applied Statistics
- STATS 317. Stochastic Processes
- STATS 318. Modern Markov Chains
- STATS 322. Function Estimation in White Noise
- STATS 324. Multivariate and Random Matrix Theory
- STATS 343. Time Series Analysis
- STATS 376A. Information Theory

Computer Science:
- CS 106B. Programming Abstractions
- CS 106X. Programming Abstractions (Accelerated)
- CS 193D. C++
- CS 224M. Multi-Agent Systems
- CS 295. Software Engineering
- CS 229. Machine Learning
- CS 249A. Object-Oriented Programming: A Modeling and Simulation Perspective
- CS 261. Optimization and Algorithmic Paradigms
- CS 339. Topics in Numerical Analysis
- CS 365. Randomized Algorithms

Economics:
- ECON 190. Introduction to Financial Accounting
- ECON 202N-203N. Core Economics: Modules 1 and 2, 5 and 6 - For Non-Economics Ph.D. Students
- ECON 210. Core Economics: Modules 3 and 7
- ECON 211. Core Economics: Modules 11 and 12
- ECON 269. International Financial Markets and Monetary Institutions
- ECON 275. Time Series Econometrics
- ECON 281. Economics of Uncertainty
- ECON 284. Topics in Dynamic Economics

Management Science & Engineering:
- MS&E 242H. Investment Science Honors
- MS&E 247G. International Financial Management (same as GSB F323)*
- MS&G 247S. International Investments
- MS&G 272. Entrepreneurial Finance
- MS&E 310 . Linear Programming
- MS&E 311. Optimization
- MS&E 312. Advanced Methods in Numerical Optimization
- MS&E 313. Vector Space Optimization
- MS&E 323. Simulation Theory
- MS&E 339. Approximate Dynamic Programming
- MS&E 341. Advanced Economic Analysis
- MS&E 342. Advanced Investment Science
- MS&E 345. Advanced Topics in Financial Engineering
- MS&E 348. Optimization of Uncertainty and Applications in Finance
- MS&E 349. Capital Deployment
- MS&E 351. Dynamic Programming and Stochastic Control
- MS&E 444. Investment Practice
- MS&E445. Projects in Wealth Management

Computational & Mathematical Engineering:
- CME 340. Computational Methods in Data Mining

Graduate School of Business (GSB), Finance:
- FINANCE 320*. Debt Markets
- FINANCE 326*. Derivative Securities
- FINANCE 328* Portfolio Management
- FINANCE 620*. Financial Markets I
- FINANCE 621*. Financial Markets II
- FINANCE 622*. Dynamic Asset Pricing Theory
- FINANCE 629*. Tax and Finance Seminar

Graduate School of Business (GSB), Economic Analysis and Policy:
- MGTECON 600. Microeconomic Analysis I*
- MGTECON 604. Econometric Methods II*
- MGTECON 609. Applied Econometric and Economics Research*

Graduate School of Business (GSB), Operations, Information, and Technology:
- OIT 667. Revenue Management*

*Indicates courses of limited enrollment and/or that instructor consent is required for registration.

FRENCH AND ITALIAN

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Elisabeth Mudimbe-Boyi, Roberto B. Sangiorgi
Director: Carolyn Springer
Chairs of Graduate Studies: Cécile Alduy (French), Carolyn Springer (Italian)
Chairs of Undergraduate Studies: Dan Edelstein (French), Laura Wittman (Italian)
Professors: Jean-Marie Apostolidès, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Jeffrey T. Schnapp (on leave), Michel Serres, Carolyn Springer
Associate Professors: Cécile Alduy, Dan Edelstein, Joshua Landy
Assistant Professors: Marisa Galvez, Laura Wittman
Lecturers: Sarah Carey (Humanities Fellow), Yann Robert (Humanities Fellow)
Courtesy Professors: Keith Baker, Margaret Cohen, Paula Findlen, Michael Marrinan
Visiting Professors: Remo Ceserani, Samia Kassab-Charfi
Visiting Associate Professor: Ewa Domanska
Visiting Assistant Professor: Gabriele Pedullà
Department Office: Building 260, Room 127
Mail Code: 94305-2010
Department Phone: (650) 723-4183
Department Fax: (650) 723-0482
Email: fren-ital@stanford.edu
Web Site: http://french-italian.stanford.edu

Courses offered by the Department of French and Italian are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes FRENGEN (French General), FRENLIT (French Literature), ITALGEN (Italian General), and ITALLIT (Italian Literature). For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center" section of this bulletin.

FRENCH SECTION

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of French Studies as encompassing the complex of cultural, political, social, scientific, com-

mercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Visiting faculty and instructors contribute regularly to the life of the French section. The section maintains contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, and the Ecole Polytechnique.

A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

France-Stanford Center for Interdisciplinary Studies—The center, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford's departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

La Maison Française—La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

Stanford in Paris—The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Chair of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the "Overseas Studies" section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.

MISSION OF THE UNDERGRADUATE PROGRAM IN FRENCH

The mission of the undergraduate program in French is to expose students to a variety of perspectives in French Language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in French.

ITALIAN SECTION

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Three degree programs are available in Italian: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

La Casa Italiana—La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

Stanford in Italy—The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate students into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program's classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the "Overseas Studies" section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

MISSION OF THE UNDERGRADUATE PROGRAM IN ITALIAN

The mission of the undergraduate program in Italian is to expose students to a variety of perspectives in Italian Language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in Italian.

GRADUATE PROGRAMS IN FRENCH AND ITALIAN

The Department of French and Italian offers three Ph.D. programs: a Ph.D. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian.

Students for each of these programs must complete the requirements outlined in the "General Requirements for the Ph.D. in French or Italian" section of this bulletin, as well as the requirements outlined for their respective Ph.D. program.

ADMISSION TO THE M.A. AND PH.D. PROGRAMS

Applications and admissions information may be obtained from Graduate Admissions at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the "Graduate Degrees" section of this bulletin. Applicants to the French program should have preparation equivalent to an undergraduate major in French; applicants to the Italian program should have done significant course work in Italian literature and/or Italian studies on the undergraduate level; in both cases, applicants should also have reached a high level of speaking and writing proficiency in the language. Previous study of an additional language is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as are two writing samples representative of the applicant's best undergraduate work. One sample should be in English, one in the language of study.

ADVISING

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

BACHELOR OF ARTS IN FRENCH

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department's two-quarter Epic Journeys IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites—Before declaring a French major, a student must be proficient in written and spoken French at an end-of-second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on the French language Advanced Placement (AP) exam; *or*
3. by having demonstrated equivalent proficiency on the Language Center placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

REQUIREMENTS

FRENCH

The French major requires a minimum of 56 units. All courses must be taken for a letter grade and can only be used to fulfill the French major requirements. Courses must be selected in accordance with the following requirements:

1. *Advanced language* (ca. 4 units)—All students must take:
   - FRENLANG 124. Advanced French Grammar
2. *Gateway courses* (ca. 8 units)—Students are recommended to take two courses in the FRENLIT 120 sequence:
   - FRENLIT 120. Coffee and Cigarettes: The Making of French Intellectual Culture
   - FRENLIT 121. French Classics: The Novel
   - FRENLIT 122. Great Moments in French Culture and History
3. *Introductory series on French and Francophone literature and culture* (ca. 12 units)—Three courses must be taken from the FRENLIT 130 sequence. Any one of these courses fulfills the Writing in the Major requirement:
   - FRENLIT 130. Introduction to Medieval and Renaissance French Literature
   - FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France
   - FRENLIT 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France
   - FRENLIT 133. Literature and Society in Africa and the Caribbean
4. *Medieval/Early Modern courses* (ca. 8 units)—At least two courses must concern the period before 1800. Courses fulfilling this requirement within the department must be drawn from the 140 level or above. Courses chosen from outside the department must be preapproved by the Chair of Undergraduate Studies.
   - FRENGEN 172/272. Dream Visions: The Roman de la Rose
   - FRENGEN 219. The Renaissance Body
   - FRENGEN 260. Voltaire's Work and Life, or: Managing Enlightenment
   - FRENLIT 280. Women in Print: Gender, Authorship, and Book Culture in Early Modern France
5. *Capstone course*—At least one course must be taken at the 200-level. For this course, the student writes a final paper of no less than 20 pages that engages critically with at least two secondary sources.
6. *Remaining courses*—In total, at least 32 units of coursework must be taken within the department. Of these courses, only one, for a maximum of 4 units, may be drawn from individual work (FRENLIT 199). No more than four courses numbered lower than 130 may be counted towards the major. Where possible, students are encouraged to complete their written work in French.

   Upper-level French courses—
   - FRENGEN 168. American Writers in 20th-Century Paris
   - FRENGEN 181. Philosophy and Literature
   - FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries
   - FRENGEN 269. Transfigurative Lyric: Baudelaire and Mallarmé
   - FRENGEN 277. Introduction to Rene Girard's Theory: Mimesis, Desire, Violence, and the Sacred
   - FRENGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory
   - FRENGEN 286. Michel Foucault and Literary Theory
   - FRENLIT 152. Fashion and Image in Post-Romantic Paris
   - FRENLIT 159. Confessions in 19th-Century French Literature
   - FRENLIT 204. Revolutions in Prose: The 19th-Century French Novel
   - FRENLIT 244. The Politics of Spectacle in a Time of Revolution
   - FRENLIT 267. National Literatures, *Littérature-monde*: A New Comparatism
   - FRENLIT 272. Francophone Literature: Bilingualism and Cultural Polyphonies in North African Literature
   - FRENLIT 293A,B. Topics in French Literature and Philosophy

Cognate Courses—Credits earned for completion of the following cognate courses may be applied to unit requirements for the departmental major:

- COMPLIT 101. What is Literature?
- DLCL 189. Honors Thesis Seminar
- OSPPARIS 30. The Avant Garde in France through Literature, Art, and Theater
- OSPPARIS 32. Understanding French Politics
- OSPPARIS 45. Notre-Dame de Paris: A Course on French Literature and the History of Paris
- OSPPARIS 58. Tintin as a Hero and a Myth
- OSPPARIS 186F. Contemporary African Literature in French

Relevant courses from other departments or programs may also earn credit toward the major with the consent of the Director of Undergraduate Studies.

FRENCH AND PHILOSOPHY

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Advanced language* (ca. 4 units)—All students must take FRENLANG 124. Advanced French Grammar
2. *Introductory Series on French and Francophone Literature and Culture* (ca. 12 units)—Three courses must be taken from the FRENLIT 130 sequence.
3. *Philosophy Writing in the Major* (5 units)—PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units)—FRENGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units)—One course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units)—One course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units)—Two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division French Courses* (ca. 12 units)—At least three courses numbered FRENLIT/FRENGEN 140 or higher.
9. *Related Courses* (ca. 8 units)—Two upper division courses relevant to the student's chosen area of specialization. One course (4 units) may be FRENLIT 199, Individual Work.
10. *Capstone Seminar* (ca. 4 units)—This year's capstone seminars are:
    - COMPLIT 226/GERLIT 242. Narrative and Ethics
    - FRENGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory
    - RELIGST 271A. Dante's Spiritual Vision

    One of these courses must be taken in the student's senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the initiative in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

French and English Literatures—In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

French and Italian Literatures—In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

FRENCH AND LINGUISTICS

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For details, contact the Department of Linguistics.

MINOR IN FRENCH

Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include FRENLANG 124 (Advanced French Grammar); three of the introductory series on French and Francophone literature and culture (FRENLIT 130-133); and a minimum of two additional courses in language or literature numbered 120 and above. Of these, only one may be taught in English. All courses must be chosen in consultation with the Chair of Undergraduate Studies.

Courses used to satisfy French minor requirements may not be counted toward a student's major or toward a second minor.

HONORS PROGRAM

Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, as well as the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic.

No later than the end of Spring Quarter of the junior year, the student must submit to the Chair of Undergraduate Studies an Application for Honors, the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Chair of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. The Chair of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.

Students may enroll for 2 units of credit in FRENLIT 189B for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in FRENLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser.

A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

BACHELOR OF ARTS IN ITALIAN

REQUIREMENTS

ITALIAN

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus):

- ITALLANG 21. Second-Year Italian, First Quarter
- ITALLANG 22. Second-Year Italian, Second Quarter
- ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department's two quarter Epic Journeys IHUM sequence entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work.

The requirements for the major are:

1. A minimum of 32 units of Italian courses:
   - ITALGEN 155. Mafia in Society, Film, and Literature
   - ITALGEN 181. Philosophy and Literature
   - ITALGEN 172/272. Dream Visions: The Roman de la Rose
   - ITALGEN 230. Italian Renaissance Epic: Ariosto
   - ITALGEN 235E. Inferno
   - ITALGEN 261. Rebels, Outlaws and Iconoclasts: Italian Cinema from 1943 to 1975
   - ITALGEN 275. Pasolini: Cinema and Subversion
   - ITALGEN 281. Novels into Film
   - ITALGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory
   - ITALLIT 142. Literature and the City
   - ITALLIT 282. Solid or Liquid Modernity
   - ITALLIT 292. Machiavelli
2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas:
   a. the Middle Ages (ITALGEN 172/272, ITALGEN 235E); a Dante course may fulfill the Middle Ages requirement.
   b. the early modern period (ITALGEN 230, ITALLIT 292); and
   c. the modern period (ITALGEN 155, 261, 275, 281, 284, ITALLIT 142, 282).
3. The complete intermediate-level survey sequence (any one of these courses fulfills the Writing in the Major Requirement):
   - ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca
   - ITALLIT 128. The Italian Renaissance and the Path to Modernity
   - ITALLIT 129. Modern Italian History and Literature
4. One advanced language course:
   - ITALLANG 113. Italian Cultural Studies
   - ITALLANG 114. Advanced Stylistics and Composition
   - ITALLANG 115. Academic and Creative Writing

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

Cognate Courses—Credits earned for completion of the following cognate courses may be applied to unit requirements for the departmental major:

- COMPLIT 101. What is Literature?
- DLCL 189. Senior Honors Thesis
- OSPFLOR 23. European Universities: The New Renaissance of Italian Higher Education
- OSPFLOR 34. The Woman in Florentine Art
- OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought
- OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition
- OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
- OSPFLOR 54. High Renaissance and *Maniera*
- OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality and the Image
- OSPFLOR 106V. Italy: From an Agrarian to a Post-industrial Society
- OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence
- OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization
- OSPFLOR 134F. Modernist Italian Cinema

Relevant courses from other departments or programs may also earn credit toward the major with the consent of the Chair of Undergraduate Studies.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Italian Survey Sequence* (ca. 12 units): ITALLIT 127, 128, 129.
2. *Advanced Language Course* (ca. 4 units): ITALLANG 113 and above.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division Italian Courses* (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. *Related Courses* (ca. 8 units): two upper division courses relevant to the student's chosen area of specialization.
10. *Capstone Seminar* (ca. 4 units): this year's capstone seminars are:
    - COMPLIT 226/GERLIT 242. Narrative and Ethics
    - FRENGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory
    - RELIGST 271A. Dante's Spiritual Vision

    One of these courses must be taken in the student's senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINOR IN ITALIAN

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond ITALLANG 21 must be completed.

Requirements for the minor include ITALLANG 22 and 23 (or equivalent); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 113 and above. All courses must be chosen in consultation with the Chair of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAM

Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 189B while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in ITALLIT 189B in Spring quarter of the senior year while revising the thesis, if approved by the thesis adviser. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs: the minor in Literature and the minor in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about the minors and their requirements.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN FRENCH OR ITALIAN

Each year the department admits a small number of undergraduates to the coterminal B.A. and M.A. degree in French or in Italian. Applications must be submitted by January 31 of the senior year to the Director of the Department and must include:

- a written statement of purpose
- two letters of recommendation from faculty at Stanford
- a transcript.

Students accepted into the coterminal program must have been undergraduate majors in the relevant language and must meet all requirements both for the B.A. and the M.A.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF ARTS IN FRENCH

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applications for admission to the Masters of Arts program must be received by the last Friday of March in the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the two members of the examination committee, selected each year by the Chair of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate's general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).
   The exam requires that the candidate answer two questions (out of three) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.
   If the student's performance on the exam is deemed a 'pass' by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).
   Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of the Spring Quarter.
2. The oral exam (90 minutes) assumes as its point of departure the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

MASTER OF ARTS IN ITALIAN

The terminal M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers.

Reading knowledge of a second Romance language is required. French is recommended.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+). To fulfill the requirements in one year, students should enroll for an average of 15 units per quarter. The basic course program is nine graduate courses, one of which may be taken outside the department but must be in a related field. The option of substituting a master's thesis for two literature courses is available.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is normally given before the end of Spring Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student's overall progress,

members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by the last Friday of March in the prior academic year. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Candidates for this degree are not eligible for financial aid or teaching assistantships.

GENERAL REQUIREMENTS FOR THE PH.D. IN FRENCH OR ITALIAN

The Department of French and Italian offers three Ph.D. programs: a Ph.D. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian.

Students for each of these programs must complete the requirements following, as well as the requirements outlined for their respective Ph.D. program.

REQUIREMENTS

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department. The remaining units must be selected in consultation with the Chair of Graduate Studies. Of the 72 department units, candidates for the Ph.D. in French must take a minimum of five courses taught in French (FRENLIT) for a minimum of 20 units during the course of their studies; three courses taught in French (FRENLIT) must be taken in the first year.

Students entering with a master's degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units.

The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.

Required Courses—Three courses are required:

1. FRENGEN/ITALGEN 369. Introduction to Graduate Studies: Criticism as Profession, a 5-unit seminar offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: FRENGEN/ITALGEN 301E, New Methods and Sources in French and Italian Studies, a 3 unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. DLCL 201. The Learning and Teaching of Second Languages: The second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Distribution of Elective Courses—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is usually done within the department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

Candidacy—By the sixth quarter of graduate study, students must have satisfied all requirements to advance to candidacy for the Ph.D. The requirements to advance to candidacy are the following:

- Students must have passed the qualifying examination and satisfactorily completed at least 72 units of graduate-level study beyond the bachelor's degree.
- Students cannot have any incompletes.
- Students must have reached an advanced level of proficiency in French or Italian.

A candidacy form, available from the student services officer, should be completed, signed and approved the department. The requirements to advance to candidacy are the following:

TGR status—Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENGEN 802 or ITALGEN 802 for zero units, in the appropriate section for their adviser.

EXAMINATIONS

There are three examinations: the qualifying exam, the field exam, and the University oral examination.

Qualifying Examination—The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his or her aptitude for critical thinking. The examining committee (see below) schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to the present day. The list may be expanded to reflect a student's particular interests, but not abridged.

Half of the exam takes place in the language of study, half in English (with the student free to choose which portion transpires in which language).

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

The examining committee is determined yearly by the Director of the Department.

Two weeks before the exam, the student must also submit three graduate seminar papers which he or she considers representative of the quality of his or her graduate work at Stanford. At least one of these papers must be in French for the Ph.D. in French or Italian for the Ph.D. in Italian.

Students may not take the Qualifying Exam while incompletes are pending.

On the basis of these papers, the results of the qualifying examination, and an evaluation of the student's overall progress, the members of the student's examining committee vote for or against admission to candidacy for the Ph.D. The terminal master's degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Chair of Graduate Studies and the Director of the Department, students already holding an advanced degree in the relevant area may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Chair of Graduate

Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Field Examination—The second oral examination, which normally takes place in the Autumn Quarter of the third year of study, consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the breadth and focus of a book he or she might write or a seminar he or she might teach. The student should discuss the proposed topic with the Chair of Graduate Studies before the end of the quarter preceding the quarter in which he or she plans to take the exam; together they choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Chair of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee. This presentation is followed by a 20-minute discussion.
2. An 80-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chair of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee no later than two weeks preceding the examination; two copies of the final reading list must be given to the student services officer for the Division of Languages, Cultures, and Literatures (one for the student's file and one for a special file which subsequent students can consult).

   Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral—The University Ph.D. examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year (or third year, if the student received four years of funding). Normally students put one, and at most two, full-time quarters of study into preparation for the exam. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination. By the time of the examination, they must have no outstanding incompletes. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements.

Two weeks before the exam, at the latest, the student must submit to the committee a 25-35 page proposal (two other copies must be given to the student services officer of the Division of Languages, Cultures, and Literatures, one of which is added to a file for subsequent students to consult). This proposal must contain the following parts: 1) a clear presentation of the student's central thesis; 2) a synthetic overview of the dissertation; 3) a description of the methodology that is used in the dissertation; 4) an in-depth discussion of current secondary sources on the topic. The student must also append a bibliography, but this does not take the place of 4. The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student's overall preparation as a candidate for the Ph.D. After the University oral, only the certification of the final dissertation by the student's reading committee must be obtained before conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student's preparation to write a dissertation at the highest standards of excellence.

Evaluation—At the end of each examination, the committee meets briefly and immediately informs the student whether he or she has passed. In the week following, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the examination.

DISSERTATION

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

DOCTOR OF PHILOSOPHY IN FRENCH

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies.

Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their

financial support with training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Chair of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program's flexible structure, a number of unique resources are available to students. The French section's exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

REQUIREMENTS

Students must complete the requirements outlined in the "General Requirements for the Ph.D. in French or Italian" section of this bulletin, as well as the requirements outlined following.

LANGUAGE REQUIREMENTS

Attaining a native or near-native fluency in French is the responsibility of all candidates in the Ph.D. program and a requirement to qualify for the Ph.D. degree.

Upon entering the program, candidates must take the OPI (Oral Proficiency Interview) with the Language Center to determine their fluency in French. An advanced level or above must have been reached by the time candidates take their qualifying exams in the Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he or she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve their proficiency in French during the first summer, for instance by applying to a French language program. Candidates should discuss these plans with the Chair of Graduate Studies well in advance.

In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and the adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by completing a third-year level or above undergraduate course; or, more recommended, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. In no case is passage of a standard reading competence exam considered sufficient. In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second-year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master's degree. Completion of the language requirements is a prerequisite for taking the University oral examination.

DOCTOR OF PHILOSOPHY IN ITALIAN

Stanford's Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within a flexible interdisciplinary framework. It is independent of the Ph.D. program in French and aims to encourage students to bring broad methodological and interdisciplinary concerns to bear on the study of Italian literature. While it places primary emphasis on developing a command of Italian literature as a whole, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that balance between period specialization and interdisciplinary breadth is essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon which extends over many disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program's structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

REQUIREMENTS

Students must complete the requirements outlined in the "General Requirements for the Ph.D. in French or Italian" section of this bulletin, as well as the requirements outlined following.

LANGUAGE REQUIREMENTS

As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate's period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

DOCTOR OF PHILOSOPHY IN FRENCH AND ITALIAN

The Department of French and Italian provides students with the opportunity to pursue a Ph.D. in French and Italian studies. This unique program encourages students to construct a highly individualized course of study within an interdisciplinary framework, in order to foster a thorough and creative knowledge of both traditions and their intersections. Students are expected to specialize in one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. Students in the Ph.D. program are normally admitted either as French Fellows or as Italian Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Chair of Graduate Studies in structuring a plan consistent with their needs and interests. Where general requirements call for the participation of a Chair of Graduate Studies, candidates for the Ph.D. in French and Italian should understand that the participation of the chairs of both French and Italian, if they are different, is required.

Aside from the benefits of the program's flexible structure, a number of unique resources are available to students. The French Section's exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris. Students may also be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty.

REQUIREMENTS

Students must complete the requirements outlined in the "General Requirements for the Ph.D. in French or Italian" section of this bulletin, as well as the requirements outlined following.

LANGUAGE REQUIREMENTS

Attaining a native or near-native fluency in both French and

Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.

For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSLAT 101, 102, and 103) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.

For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g. German, Film Studies).

The language requirements should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without a master's degree, and not later than the end of the second year for students who entered the program with an external master's degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

Distribution of Elective Courses—Students must take a minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture.

Qualifying Examination—Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student's particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language).

An M.A. in French and Italian is awarded in the eventuality that a student completes the qualifying examination but whose work is judged insufficient for admission to candidacy for the Ph.D. This M.A. option is open only to students approved for the French and Italian Ph.D., and is not available to coterminal students, to M.A.-only students, or to Ph.D. students in French only or Italian only.

If, at the qualifying exam stage, a student's work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant Chair of Graduate Studies, and the Director of the Department of French and Italian.

Special Topic Examination—The chosen topic must focus equally on French and Italian literature and culture, and actively explore their relationship. Two weeks before the exam, the student must also submit not one but two graduate seminar papers, one in French on a French topic and one in Italian on an Italian topic.

University Oral Examination—The reading list should include works in both French and Italian in all genres relevant to the period covered.

Dissertation—The dissertation topic must include a substantial quotient of material from both the French and the Italian tradition, and the dissertation must include, either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.

Teaching—Out of the five courses the student is required to teach, at least one must be a French language course and at least one an Italian language course.

PH.D. IN FRENCH OR ITALIAN AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to the joint Ph.D. in French and Humanities, or Italian and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

PH.D. MINOR IN FRENCH AND ITALIAN

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their adviser(s).

Ph.D. Minor in French Literature—The department offers a minor in French Literature. The requirement for a minor in French is completion of 24 units of graduate course work in the French section. Interested students should consult the graduate adviser.

Ph.D. Minor in Italian Literature—The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the graduate adviser.

OVERSEAS STUDIES COURSES IN FRENCH AND ITALIAN

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

FLORENCE

- OSPFLOR 34. The Woman in Florentine Art. 4 units, Timothy Verdon, GER:DB:Hum, EC:Gender
- OSPFLOR 106V. Italy: From an Agrarian to a Post-industrial Society. 5 units, Giuseppe Mammarella, GER:DB:SocSci, EC:GlobalCom
- OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization. 4 units, Timothy Verdon, GER:DB:Hum
- OSPFLOR 134F. Modernist Italian Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

PARIS

- OSPPARIS 32. Understanding French Politics. 4-5 units, Patrick Chamorel, GER:DB:SocSci
- OSPPARIS 45. Notre-Dame de Paris: A Course on French Literature and the History of Paris. 5 units, Jean-Marie Apostolidès
- OSPPARIS 58. Tintin as a Hero and a Myth. 5 units, Jean-Marie Apostolidès

WINTER QUARTER

FLORENCE

- OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought. 5 units, Paolo Galluzzi, GER:DB:Hum
- OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum
- OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum
- OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence. 4 units, Timothy Verdon, GER:DB:Hum

PARIS

- OSPPARIS 186F. Contemporary African Literature in French. 4 units, Françoise Rullier, GER:DB:Hum, EC:GlobalCom

SPRING QUARTER

FLORENCE

- OSPFLOR 23. European Universities: The New Renaissance of Italian Higher Education. 3 units, Eric. P. Bettinger
- OSPFLOR 54. High Renaissance and *Maniera*. 5 units, Timothy Verdon, GER:DB:Hum
- OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image. 4 units, Ermelinda Campani, GER:DB:Hum, EC:Gender

PARIS

- OSPPARIS 30. The Avant Garde in France through Literature, Art, and Theater. 4 units, Tiphaine Karsenti, GER:DB:Hum

GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohnes, Katharina Mommsen, Kurt Müller-Vollmer
Director: Russell A. Berman
Chair of Graduate Studies: Amir Eshel
Chair of Undergraduate Studies: Adrian Daub
Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Orrin W. Robinson III (on leave, Autumn)
Assistant Professors: Adrian Daub, Márton Dornbach, Charitini Douvaldzi (on leave Winter)
Senior Lecturers: William E. Petig, Kathryn Strachota
Visiting Professor: Kurt Müller-Vollmer (Winter)
Department Office: Building 260, Room 108
Mail Code: 94305-2030
Phone: (650) 723-3266
Email: germanstudies@stanford.edu
Web Site: http://germanstudies.stanford.edu

Courses offered by the Department of German Studies are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes GERGEN (German General) and GERLIT (German Literature). For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin.

The department's goal is to provide students with the linguistic and analytic ability to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the contours of the present and past can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and intellectual histories of the German-language traditions. Whether interested in German literature or the influence of German thought on other fields in the humanities, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are coterminal programs for the B.A. and M.A. degrees in German Studies. Doctoral students may elect Ph.D. minors in Comparative Literature, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material to the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

MISSION OF THE UNDERGRADUATE PROGRAM IN GERMAN STUDIES

The mission of the undergraduate program in German Studies is to provide students with the linguistic and analytic background necessary to explore the significance of cultural traditions and political histories of the German-speaking countries of Central Europe. In addition, its interdisciplinary component prepares students to evaluate how the literary, artistic, and cultural responses to the belated yet rapid modernization of Germany allow for reflection of its modern condition. Students pursue course work at all levels in the languages, literatures, and intellectual histories of the Germanic nations. The program prepares students for careers in business, social service, and government, and for graduate work in German Studies.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency beyond the interpersonal level with presentational language abilities.
2. writing proficiency beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in German.
4. the ability to develop effective and nuanced lines of interpretation.

STANFORD IN BERLIN

Undergraduates interested in Germany are encouraged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with the Chair of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the Chair of Undergraduate Studies.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

GRADUATE PROGRAMS IN GERMAN STUDIES

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

BACHELOR OF ARTS IN GERMAN STUDIES

Majors must demonstrate basic language skills, either by completing GERLANG 1,2,3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least two courses at the 120-129 level and three core literature courses. Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1,2,3, the total requirement for the B.A. is a minimum of 60 units of work; the German and Philosophy option requires 65 units. At the discretion of the Chair of Undergraduate Studies, appropriate courses offered by other departments or relevant transfer units can be accepted toward this total, up to a maximum of 25 units. All GERLANG courses count as department electives. Courses counted toward degree requirements must be taken for a letter grade unless that grading option is not available.

Requests for exceptions to any of these requirements must be referred to the Chair of Undergraduate Studies who, in consultation with the Director, makes a final decision.

Internships—Internships in Germany are arranged through the Overseas Studies Program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the Director of German Studies and the Chair of the Department of English. See the "Field of Study IV. Literature and Foreign Language Literature" section in the "Bachelor of Arts in English" section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By choosing courses in such disciplines as history, international relations, or economics, students can prepare themselves in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

Degree Requirements—

1. Completion of two GERLIT courses at the 120-level
2. Completion of German Studies Core series:
   a. GERLIT 131. Eighteenth-Century German Literature
   b. GERLIT 132. Nineteenth-Century German Literature
   c. GERLIT 133. Twentieth-Century German Literature
3. GERLIT 190: German Studies (WIM)
   a. Remaining 33 units to be completed through elective courses approved in consultation with the Chair of Undergraduate Studies. A maximum of 27 units of GERLANG courses and/or 25 units from courses covering German material taught in other departments may be applied to these elective units.

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma.

The German and Philosophy major option requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a. completion of two GERLIT courses at the 120-level
   b. completion of German Studies Core series:
      1. GERLIT 131. Eighteenth-Century German Literature
      1. GERLIT 132. Nineteenth-Century German Literature
      2. GERLIT 133. Twentieth-Century German Literature.
   c. GERLIT 190. German Studies (WIM)
2. GERGEN 181/PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
3. Requirements in Philosophy:
   a. Prerequisite: an introductory philosophy class
   b. PHIL 80. Mind, Matter, and Meaning
   c. a course in the PHIL 180 series
   d. a course in the PHIL 170 series
   e. two courses in the history of philosophy numbered above 100
4. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include the GERGEN 120Q, Is God Dead?; GERGEN 122Q, The Culture of Pessimism; GERGEN 125, Varieties of Freedom in Modern German Culture; GERGEN 211, Theodor W. Adorno; GERGEN 212, The Invention of Experience; GERGEN 246, Kant's Third Critique; GERGEN 268A, Freud and the Enterprise of Psychoanalysis; and other advanced seminars in German thought and literature. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
5. *Capstone:* One of the courses must be taken in the student's senior year. When choosing courses, students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
6. Units devoted to meeting the department's language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Chair of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions,

including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

HONORS

Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department, and opportunities to start research projects are offered at the Stanford in Berlin Center. In addition to the requirements listed above, the student must submit a proposal for the honors essay to the German faculty by the end of Spring Quarter of the junior year. During this quarter, students may enroll for 2 units of credit in GERLIT 189B for the drafting or revision of the thesis proposal. In Autumn Quarter of the senior year, the student must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in GERLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in 189B in the junior year may enroll in GERLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis supervisor. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

MINOR IN GERMAN STUDIES

The department offers two minor options; the DLCL offers two additional minor options.

MINOR IN GERMAN LANGUAGE AND CULTURE

Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-139 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

MINOR IN GERMAN CULTURAL STUDIES

Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130- or 140- level.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers undergraduate minor programs in Literature and in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about the minors and their requirements.

MASTER OF ARTS IN GERMAN STUDIES

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY IN GERMAN STUDIES

The requirements for the Ph.D. include:

1. A minimum of 36 graduate units during the first year of graduate study, 45 units for the completion of the M.A., and a minimum of 10 units per quarter during the six quarters following the first year. A total of 135 units is required for the Ph.D.; doctoral candidates are advised to complete at least one course with each member of the department.
2. A reading knowledge of one language other than English and German, normally French. Students in Medieval Studies must also have a reading knowledge of Latin.
3. A master's oral examination, unless the student has an M.A. upon entering the program
4. A qualifying paper
5. A qualifying examination
6. The University oral examination
7. A dissertation

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, students, except those admitted with a master's degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members, two of whom are regular faculty in the department, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate's ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department director, who passes it on for approval by the student's faculty adviser and a second reader appointed by the director in consultation with the Chair of Graduate Studies.

Students who enter the program with a master's degree from another institution must submit, in lieu of a qualifying paper, a master's thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student's chosen adviser, and another faculty member appointed by the director. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure does the department approve the student's admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the

proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and a thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; DLCL 201, The Learning and Teaching of Second Languages, is required. The teaching requirement is five quarters during the second and third years of study and mandatory for continued enrollment or support in the program. Students may request to teach and additional literature course at a latter time in the course of study, contingent upon department need and approval of the director. Such teaching does not extend the length or scope of support.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation, no earlier than the third year, at the colloquium for public discussion. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.

PH.D. IN GERMAN STUDIES AND HUMANITIES

The department of German Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in German and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted.The University remains committed to abroad-based graduate education in the humanities: the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at (650) 724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on Stanford Bulletin's ExploreCourses web site.

GERMAN STUDIES AND A MINOR FIELD

Students may work toward a Ph.D. in German Studies with minors in such areas as Comparative Literature, Modern Thought and Literature, Linguistics, or History. Students obtaining a Ph.D. in such combinations may require additional training.

OVERSEAS STUDIES COURSES IN GERMAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BERLIN

- OSPBER 101A. Contemporary Theater. 5 units, Karen Kramer, GER:DB:Hum

WINTER QUARTER

BERLIN

- OSPBER 62. Shades of Green: Environmental Policy in Germany and the U.S. in Historical Perspective. 5 units, Sylke Tempel, GER:DB:SocSci

SPRING QUARTER

BERLIN

- OSPBER 11. The Vanishing City: Lost Architecture and the Art of Commemoration in Berlin. 4-5 units, Knut Ebelingr, GER:DB:Hum
- OSPBER 101A. Contemporary Theater. 5 units, Karen Kramer, GER:DB:Hum
- OSPBER 174.Sports Culture and Gender in Comparative Perspective. 5 units, Wolf Junghanns, GER:DB:SocSci, EC:Gender

Courses offered by the Department of History are listed under the subject code HISTORY on the *Stanford Bulletin's* ExploreCourses web site.

MISSION OF THE DEPARTMENT OF HISTORY

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influ-

ences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a History major pursue careers and graduate study in law, public service, business, writing, education, and journalism.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of what it means to think historically: locating subjects in time and place and being sensitive to the contingencies of context and to change over time.
2. critical and interpretive thinking skills using course's primary source materials.
3. the ability to identify different types of sources of historical knowledge.
4. analytical writing skills and close reading skills.
5. effective oral communication skills

DEGREES OFFERED

The Department of History offers the following degree programs: Bachelor of Arts, coterminal Bachelor of Arts and Master of Arts, Master of Arts, and Doctor of Philosophy.

GRADUATE PROGRAMS IN HISTORY

The primary goal of the Stanford Department of History's graduate program is the training of scholars. Most students who receive doctorates in the program go on to teach at colleges or universities. Other students have obtained positions in university administration and research.

BACHELOR OF ARTS IN HISTORY

The following History Bachelor of Arts degree requirements apply to students declaring the History major on or after September 1, 2008. Students who declared on or before August 31, 2008 should consult the 2007-08 edition of the *Stanford Bulletin* for the History B.A. degree requirements.

PREREQUISITES FOR THE MAJOR

Before declaring the History major, students must take two lecture courses. Fulfilling this requirement are courses numbered HISTORY 101-199. (Winter/Spring IHUM History offerings are also allowed.) The choices for 2010-11 are:

- IHUM 11A,B. Origins of the World: Europe and Latin America
- HISTORY 102. The History of the International System
- HISTORY 103D. Human Society and Environmental Change
- HISTORY 106A. Global Human Geography: Asia and Africa
- HISTORY 106B. Global Human Geography: Europe and Americas
- HISTORY 107. Introduction to Feminist Studies
- HISTORY 108. Mass Violence in Modern History
- HISTORY 110B. Early Modern Europe
- HISTORY 110C. Introduction to Modern Europe
- HISTORY 110D. Europe in the High and Late Middle Ages, 1000-1500
- HISTORY 125. 20th-Century Eastern Europe
- HISTORY 130A. The Rise of Scientific Medicine
- HISTORY 131. Science, Technology, and Art: The Worlds of Leonardo da Vinci
- HISTORY 132A. Enlightenment and the Arts
- HISTORY 133B. Revolutionary England: The Stuart Age
- HISTORY 135. History of European Law, Medieval to Contemporary
- HISTORY 135A. Globalization and the Making of Modern Europe
- HISTORY 137. The Holocaust
- HISTORY 138A. Germany and the World Wars, 1870-1990
- HISTORY 139.Modern Britain and the Empire
- HISTORY 145B. Africa in the 20th-Century
- HISTORY 147. History of South Africa
- HISTORY 150A. Colonial and Revolutionary America
- HISTORY 150B. 19th-Century America
- HISTORY 150C. The United States in the 20th-Century
- HISTORY 158B. History of Education in the United States
- HISTORY 158C. History of Higher Education in the U.S.
- HISTORY 161. Women in Modern America
- HISTORY 164C. From Freedom to Freedom Now: African American History, 1865-1965
- HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle
- HISTORY 166B. Immigration in 20th-Century America: Ethnicity, Race, Nation
- HISTORY 170. Colonial Latin America
- HISTORY 181B. Formation of the Contemporary Middle East
- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 183. Modern Iran
- HISTORY 185B. Jews in the Modern World
- HISTORY 186D. Jews, Citizenship, and Europe's Others
- HISTORY 187D. Zionism and Its Critics
- HISTORY 191C. Early Imperial China
- HISTORY 191D. China: The Northern and Southern Dynasties
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History
- HISTORY 195C. Modern Japanese History
- HISTORY 196. The Idea of India
- HISTORY 197. Southeast Asia: From Antiquity to the Modern Era
- HISTORY 198. The History of Modern China

BACHELOR OF ARTS REQUIREMENTS

History majors are required to complete the following:

1. Completion of a minimum of 63 units and at least 13 courses of at least 3 units each, to include:
   a. one Sources and Methods seminar (HISTORY 1S-99S)
   Note: Students must complete the Sources and Methods Seminar requirement prior to enrolling in the Research Seminar for Majors.
   b. two 200-level undergraduate colloquia (HISTORY 200-298)
   c. at least one other small group course, to be chosen among the department's undergraduate colloquia, research seminars, or Stanford Introductory Seminars.
   d. two lecture courses, one of which must be either a Europe survey course (such as HISTORY 110A,B,C) or a United States survey course (such as HISTORY 150A,B,C); the second must be a lecture course in African, Asian, Middle East, or Latin American History. Students may count courses they took as prerequisites to the major for this requirement.
2. Courses comprising the 63 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
3. At least nine courses must be taken from within the Stanford Department of History. Transfer students and those who study abroad may be granted exemptions from this requirement at the discretion of the Director of Undergraduate Studies.
4. Completion of the Writing in the Major requirement. This requirement is satisfied by completing a Research Seminar for Majors (HISTORY 209S) and writing a 20-25 page essay based on original research and including at least two drafts. The Research Seminar for Majors may be taken in either the junior or the senior year. Students must complete the Sources & Methods seminar before enrolling in the Research Seminar.
5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare the major by the Autumn Quarter of the third year of study or earlier, if possible.
6. One Directed Writing (299W) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the thirteen courses required for the B.A. in History.
7. Capstone: The History department organizes a series of luncheon workshops in May, at which students present their research essays and honors theses.

Completion of the major requires planning. History majors should plan to meet with their faculty advisers twice yearly, once in the Autumn and once in the Winter or Spring quarters. These meetings should take place within the first three weeks of the quarter, before the add/drop deadline.

The department also encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

Advanced Placement credits do not fulfill any major requirements.

For further information on History courses' satisfaction of major requirements, see http://history.stanford.edu/courses.

WRITING IN THE MAJOR (WIM) REQUIREMENT

History's Writing in the Major requirement is satisfied by completing HISTORY 209S, Research Seminar for Majors.

This course may be taken in either the junior or senior year, but not before completing the sources and methods seminar requirement. Students write a 20-25 page research essay. Original re-

search and revision are important parts of the research essay. Students must conduct substantial research in the libraries and must submit at least two drafts (a rough draft and a final draft) of the essay. Any student wishing to write an honors thesis must take HISTORY 209S, Research Seminar for Majors, in the junior year and use it to begin work on the thesis; this work can take the place of a research essay.

HISTORY 209S fulfills the WIM requirement only. It does not fulfill geographical requirements or small group course requirements.

Students select their research topics based on the general topic of each quarter's offering.

- HISTORY 209S. Research Seminar for Majors
  - Autumn: History and the Arts: Europe since 1600
  - Winter: American Identities and Comparative Colonialism
  - Spring: China to 1000 CE, Early Modern Topics, and State and Nation since 1650

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to Departmental Honors in History. Students accepted for this program, in additional to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to HISTORY 299H, The Junior Honors Colloquium, students must enroll in 11-15 units of Senior Research in the senior year, to be distributed as best fits their specific project. For students in the Honors program, Senior Research units (299A, B, C) are taken in addition to the thirteen required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H) offered in Winter Quarter. An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Students who study abroad for the entire junior year and want to write an honors thesis should plan to take the Research Seminar for Majors in the first quarter following completion of the study abroad program. Under exceptional circumstances, students are admitted to the program in Autumn Quarter of the senior year. Such students must not enroll in any HISTORY 299A,B,C, Senior Research I,II,III units until HISTORY 209S, Research Seminar for Majors, has been completed.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.3 (B+) in the student's previous work in History and in the University. Students completing the thesis with a grade of 'B+' or higher are eligible for Departmental Honors in History. To enter the Honors program, apply at the Department of History office.

Outstanding Honors essays may be considered for the University's Robert M. Golden Medals, as well as for departmental James Birdsall Weter prizes.

Honors Program Requirements—To graduate with Departmental Honors in History, students must: (1) complete HISTORY 299H in the junior year; (2) maintain a 3.3 GPA in History courses and throughout the University during the final 5 quarters of enrollment/thesis preparation: (3) select both a primary thesis adviser (who is a member of the Stanford History faculty) and a secondary adviser (who is a Stanford University faculty member) no later than Autumn quarter of the senior year ; (4) submit on May 16, 2011 by noon a 65-120 page honors thesis including bibliography that receives a grade of 'B+' or better; (5) enroll in the 11-15 units of Senior Research as specified below; and (6) participate in mandatory Honors Program activities throughout senior year (including, but not limited to, writing workshops and the annual Honors Day oral presentations) as specified in the Honors Program Handbook.

HISTORY 299A,B,C do not fulfill any history major requirements other than Honors, but the units do count towards the 180 required for B.A. degree conferral.

Required Courses—

To be taken in the junior year:

- HISTORY 299H. Junior Honors Colloquium
- HISTORY 209S. Research Seminar for Majors

An exception (for HISTORY 299H) may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the Director of the Honors Program prior to going overseas.

To be taken in the senior year:

- HISTORY 299A. Senior Research I (5 units)
- HISTORY 299B. Senior Research II (5 units)
- HISTORY 299C. Senior Research III (1-5 units)

OVERSEAS STUDIES OR STUDY ABROAD

Courses offered by Stanford's Bing Overseas Studies Program and appearing on the History department's cognate course list automatically receive credit towards the major or minor in History. Course work completed in non-Stanford Study Abroad programs is evaluated for major/minor credit by designated History department faculty on a case-by-case basis. Students in non-Stanford Study Abroad programs are advised to take classes with reading and writing components comparable to History department course loads.

HISTORY FIELDS OF STUDY OR DEGREE OPTIONS

The Department of History offers five tracks to the B.A. in History. These tracks are not declared on Axess. The tracks are:

- General History
- History, Literature, and the Arts
- History of Science and Medicine
- History and the Law
- Public History/Public Service

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The four tracks with interdisciplinary emphasis (History, Literature and the Arts, History of Science and Medicine, History and the Law, and Public History/Public Service) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

GENERAL HISTORY TRACK

In addition to completing the requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. Breadth Requirements: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period (Field IV) may also count for Fields I-III. For 2010-2011, these courses are as follows:
   1. *Field I: Africa/Asia/Middle East*
      - HISTORY 43S. Indian Ocean History, 1100-1945
      - HISTORY 45S. Colonial Anthropologists and the Production of Knowledge about Africa
      - HISTORY 48Q. South Africa: Contested Transitions
      - HISTORY 82N. Modern Islamic Movements
      - HISTORY 92S. Cultural Identity in Ancient and Medieval China
      - HISTORY 135. History of European Law, Medieval to Contemporary
      - HISTORY 145B. Africa in the 20th-Century
      - HISTORY 147. History of South Africa
      - HISTORY 181B. Formation of the Contemporary Middle East

- HISTORY 182C. From Prophet to Empire: The Making of the Muslim Middle East, 600-1500
- HISTORY 183. Modern Iran
- HISTORY 187D. Zionism and Its Critics
- HISTORY 191C. Early Imperial China
- HISTORY 193. Late Imperial China
- HISTORY 194B. Japan in the Age of the Samurai
- HISTORY 195. Modern Korean History
- HISTORY 195C. Modern Japanese History
- HISTORY 196. The Idea of India
- HISTORY 197. Southeast Asia from Antiquity to the Modern Era
- HISTORY 198. The History of Modern China
- HISTORY 224B. Modern Afghanistan
- HISTORY 248S. African Societies and Colonial States
- HISTORY 282. The United States and the Middle East since 1945
- HISTORY 284. The Ottoman Turks in Comparative Perspective: The Inner Life of a Eurasian Empire
- HISTORY 287D. Tel Aviv: Site, Symbol, City
- HISTORY 287G. Jews in Colonial North Africa
- HISTORY 287S. Middle East History
- HISTORY 288. Palestine and the Arab-Israeli Conflict
- HISTORY 291D. Colonialism and Collaboration in East Asia
- HISTORY 292. The Korean War: Origins, Outbreak, and Aftermath
- HISTORY 292D. Japan in Asia, Asia in Japan
- HISTORY 292F. Traditional Korea
- HISTORY 293. Law and Society in Late Imperial China

1. *Field II: The Americas*
   - HISTORY 36N: Gay Autobiography
   - HISTORY 51S. Popular Violence in 19th-Century American Culture and Society
   - HISTORY 53S. Rebellion and Revolution in American History: From the Stamp Act to the Civil War
   - HISTORY 58N. Thomas Jefferson and his World
   - HISTORY 58S. Perceptions of Failure in 19th-Century America: Indians, Degenerates, and Debtors
   - HISTORY 60S. International Social Movements in the U.S. from World War I to World War II
   - HISTORY 61S. California Politics since the 1960s
   - HISTORY 62N. The Atomic Bomb in Policy and History
   - HISTORY 62S. The Politics, Culture and Ecology of Food in American History
   - HISTORY 107. Introduction to Feminist Studies
   - HISTORY 130A. The Rise of Scientific Medicine
   - HISTORY 150A. Colonial and Revolutionary America
   - HISTORY 150B. 19th Century America
   - HISTORY 150C. The United States in the 20th Century
   - HISTORY 158B. History of Education in the United States
   - HISTORY 158C. History of Higher Education in the U.S.
   - HISTORY 161. Women in Modern America
   - HISTORY 164C. From Freedom to Freedom Now! African American History, 1865-1965
   - HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle
   - HISTORY 166B. Immigration in 20th-Century America: Ethnicity, Race, Nation
   - HISTORY 170. Colonial Latin America
   - HISTORY 201. Introduction to Public History in the United States, 19th Century to the Present
   - HISTORY 243J. Climate Change in the West: A History of the Future
   - HISTORY 251C. The American Enlightenment
   - HISTORY 251G. Topics in Constitutional History
   - HISTORY 258. Topics in the History of Sexuality: Sexual Violence
   - HISTORY 258D. School: What Is It Good For?
   - HISTORY 260. California's Majority Minority Cities
   - HISTORY 278A. Political Economy of Property Rights
2. *Field III: Europe, Eastern Europe, and Russia*
   - HISTORY 11N. The Roman Empire: Its Grandeur and Fall
   - HISTORY 17S. Princesses, Politicians, and Patronesses: Identities of Early Modern Noble Women
   - HISTORY 20Q. Russia in the Early Modern Imagination
   - HISTORY 30S. Travel, Adventure, Blood, and Espionage: The British Cultural Imagination in Afghanistan, 1813-1907
   - HISTORY 31Q: British History Revealed by the Arts of the Twentieth Century
   - HISTORY 32S. Gender and European Imperial Crisis through Media: 1880-2000
   - HISTORY 35N. Industrial Revolution: The History, Ethics, and Consequences of Modern Economic Development
   - HISTORY 36N. Gay Autobiography
   - HISTORY 37S. Youth in Modern Europe, 1762-1968
   - HISTORY 102. The History of the International System
   - HISTORY 110B. Early Modern Europe
   - HISTORY 110C. Introduction to Modern Europe
   - HISTORY 110D. Europe in the High and Late Middle Ages, 1000-1500
   - HISTORY 125. 20th-Century Eastern Europe
   - HISTORY 131. Science, Technology and Art: The Worlds of Leonardo da Vinci
   - HISTORY 132A. Enlightenment and the Arts
   - HISTORY 133B. Revolutionary England: The Stuart Age
   - HISTORY 135. History of European Law
   - HISTORY 137. The Holocaust
   - HISTORY 138A. Germany and the World Wars, 1870-1990
   - HISTORY 139. Modern Britain and the Empire
   - HISTORY 185B. Jews in the Modern World

   - HISTORY 110B. Early Modern Europe
   - HISTORY 110D. Europe in the High and Late Middle Ages, 1000-1500
   - HISTORY 131. Science, Technology and Art: The Worlds of Leonardo da Vinci
   - HISTORY 132A. Enlightenment and the Arts
   - HISTORY 133B. Revolutionary England: The Stuart Age
   - HISTORY 135. History of European Law
   - HISTORY 170. Colonial Latin America
   - HISTORY 182C. From Prophet to Empire: The Making of the Modern Middle East, 600-1500
   - HISTORY 191C. Early Imperial China
   - HISTORY 193. Late Imperial China
   - HISTORY 194B. Japan in the Age of the Samurai
   - HISTORY 202C. Heretics to Headscarves
   - HISTORY 207C. The Global Early Modern
   - HISTORY 231G. European Reformations
   - HISTORY 233. Reformation, Political Culture, and the Origins of the English Civil War
   - HISTORY 233C. Two British Revolutions
   - HISTORY 233D. Strangers, Barbarians, and Infidels: Crosscultural Encounters in the Pre-Modern World
   - HISTORY 233F. Political Thought in Early Modern Britain
   - HISTORY 284. The Ottoman Turks in Comparative Perspective: The Inner Life of a Eurasian Empire
   - HISTORY 292F. Traditional Korea
   - IHUM 11A. Origins of the World: Europe and Latin America

2. Concentration: to develop some measure of expertise, students must complete four courses in a single area (including one undergraduate colloquium or research seminar). The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must be approved by both the adviser and the department's director of undergraduate studies. Areas of concentration are:
   - Africa
   - Asia
   - Eastern Europe and Russia
   - Europe before 1700
   - Europe since 1700
   - Jewish History
   - Latin America
   - Science and Technology
   - The United States
   - The Middle East
   - International History
   - Comparative Empires and Cultures
   - or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture.
3. Required course: HISTORY 102. The History of the International System is a required course for students who select the International History concentration. This course is offered in Spring quarter.

Certain Introduction to the Humanities (IHUM) courses taught by History faculty in a Winter-Spring sequence count toward the General History major. These are: IHUM 4A,B; 5A,B; 6A,B;11A,B

HISTORY TRACKS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These tracks are designed for students who are interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline, who want to understand how interdisciplinary approaches can deepen their understanding of history, or who are primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their thirteen courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary track. This course introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major track. (*Note:* The History and the Law track has no gateway course requirement.)

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advanced by the student's adviser. See the section on each HMIE for the appropriate historical methods courses. (*Note:* The History and the Law track requires four methodology courses.)

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for appropriate interdisciplinary courses.

Research Seminar for Majors (HISTORY 209S)—Fulfills Writing in the Major Requirement.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track. Introduction to the Humanities courses taught by History faculty may apply to HMIE tracks only insofar as their content is specifically appropriate to the particular methodological or geographic cluster.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts (HLA) track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—HISTORY 132A. Enlightenment and the Arts gives students a broad introduction to the study of literary texts in history. *Note:* The former gateway course, HISTORY 239E, History, Literature and the Arts in Great Britain, may be counted in lieu of 132A.

Methodological Cluster—This three-course cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the pre-approved HLA methodology curriculum. These courses need not be in the student's geographic concentration. For 2010-11, these courses are:

- HISTORY 6N. Utopia: History of Nowhere Land
- HISTORY 17S. Princesses, Politicians, and Patronesses: Identities of Early Modern Noble Women
- HISTORY 31Q. British History Revealed by the Arts of the 20th Century
- HISTORY 32S. Gender and European Imperial Crisis through Media: 1880-2000
- HISTORY 36N. Gay Autobiography
- HISTORY 37S. Youth in Modern Europe, 1762-1968
- HISTORY 95N. Mapping the World: Cartography and the Modern Imagination
- HISTORY 110C. Introduction to Modern Europe
- HISTORY 131. Science, Technology and Art: The Worlds of Leonardo da Vinci
- HISTORY 150A. Colonial and Revolutionary America
- HISTORY 191C. Early Imperial China*
- HISTORY 193. Late Imperial China*
- HISTORY 194B. Japan in the Age of the Samurai*
- HISTORY 196. The Idea of India*
- HISTORY 251C. The American Enlightenment
- HISTORY 292F. Traditional Korea

* Courses marked with an asterisk are non-Western lectures that students in the The History, Literature, and the Arts (HLA) track can use towards both a HLA methodology course and as the non-Western lecture requirement.

Geographical Cluster—Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

Research Seminar for Majors—HISTORY 209S; fulfills Writing in the Major requirement.

General Requirements—Like all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

HISTORY OF SCIENCE, AND MEDICINE

The History of Science, and Medicine (HS&M) track is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for students interested in both sciences and humanities, and in the interactions between the two. It is also especially useful for students contemplating medical school, since it allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the pre-med science requirements.

Gateway Course (one course)—HISTORY 131. Science, Technology, and Art: The Worlds of Leonardo da Vinci (Winter Quarter)

Methodological Cluster (three courses)—These History courses focus on the history of science, technology, and medicine. For 2010-11, these courses are:

- HISTORY 35N. Industrial Revolution: The History, Ethics and Consequences of Modern Economic Development
- HISTORY 103. Human Society and Environmental Change
- HISTORY 234F. Science, Technology, and Empire
- HISTORY 243J. Climate Change in the West: A History of the Future
- AMSTUD 156H. History of Women and Medicine in the United States
- HPS 158. The Social History of Mental Illness
- HPS 220. Nineteenth Century Philosophy of Science

Geographical Cluster (four courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (four courses)—Students select four courses in scientific disciplines and/or in philosophy of science, anthropology of science, or sociology of science. These courses require faculty adviser pre-approval.

Research Seminar for Majors (HISTORY 209S)—Fulfills the Writing in the Major requirement.

General Requirements—Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

HISTORY AND LAW

The History and Law (HL) interdisciplinary track is for students who wish to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least four History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies and a Research Seminar for Majors.

Gateway Course—There is no gateway course for this track. Instead, students take an extra course in the Methodological cluster.

Methodological Cluster (four courses)—Students enroll in at least four History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. (*Note:* The Methodological Cluster for this HIP contains one extra course since there is no Gateway course.)

For 2010-11, these courses are—

- HISTORY 108. Mass Violence in Modern History
- HISTORY 135. History of European Law
- HISTORY 196. The Idea of India
- HISTORY 202C. Heretics to Headscarves
- HISTORY 208S. The Politics of Retrospective Justice
- HISTORY 251G. Topics in Constitutional History
- HISTORY 258. Topics in the History of Sexuality: Sexual Violence

Geographical Cluster (four courses)—Students choose four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa.

Interdisciplinary Cluster (four courses)—Students may select from courses offered in the School of Law, School of Education, and others as appropriate. *Note:* Courses in the School of Law and School of Education require the permission of the instructor before undergraduate students can enroll, since these are graduate-level courses.

Research Seminar for Majors (HISTORY 209S)—Fulfills the Writing in the Major requirement.

General Requirements—Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

PUBLIC HISTORY/PUBLIC SERVICE

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in four History department courses that provide a geographic concentration as well as completing a two-course methodological requirement. In addition, students, in consultation with the PH/PS faculty coordinator, complete four courses from outside the History department drawn from the annual listing of service-learning courses provided by the Haas Center for Public Service; these courses provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway course (one course)—HISTORY 201, Introduction to Public History in the U.S., Nineteenth Century to the Present, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and non-profit organizations, including local historical societies.

Geographical Cluster (four courses)—Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (four courses)—Students select four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Haas Center for Public Service. The faculty coordinator must pre-approve all courses in this cluster.

Examples of appropriate PH/PS interdisciplinary courses are:

- AMSTUD 221. Public and Professional Service: Theories and Ethical Practice of Public and Community
- ETHICSOC 144. Nongovernmental Organizations and Development in Poor Countries
- POLISCI 133. Ethics and Politics In Public Service
- POLISCI 141. Global Politics of Human Rights
- SOC 118. Social Movements and Collective Action
- SOC 137. Homelessness: Its Causes, Consequences, and Policy Solutions

Methodological Cluster (two courses)—Students must enroll in one Sources and Methods seminar course and one additional 200-level History course. The Writing in the Major (WIM) requirement must be completed in a Research Seminar for Majors.

- HISTORY 166B. Immigration in 20th-Century America: Ethnicity, Race, Nation
- HISTORY 260. California's Majority Minority Cities

Public Service/Service Learning Internship (one course)—Students must engage in at least a one quarter internship through a service learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

Students who complete a paid summer internship in lieu of one for academic credit have two options: they can complete an additional history course, or they can enroll in 3 units of HISTORY 299S with the faculty coordinator of the PH/PS track and write a 20-page research paper related to their internship work. This research paper is in addition to that required for the Research Seminar for Majors.)

Two History Department service-learning courses are offered in 2010-11:

- HISTORY 201. Introduction to Public History in the U.S., 19th Century to the Present (Autumn)
- HISTORY 260. California's Minority-Majority Cities (Spring)

If students elect to fulfill the internship requirement through a History Department service-learning course, they must enroll in an additional course in either the geographical cluster or the Interdisciplinary cluster in order to complete the 13 courses required for the major.

Research Seminar for Majors—HISTORY 209S; fulfills Writing in the Major requirement.

General Requirements—Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

HISTORY SECONDARY TEACHER'S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

MINOR IN HISTORY

Students must declare the minor in History no later than Autumn Quarter of the senior year via Axess. Minor declarations are approved by the Department of History and confirmation is sent via email to the student.

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. Students completing the minor may choose to concentrate in such fields as African, American, Asian, British, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

REQUIREMENTS

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at Stanford overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty.

Advanced Placement credits do not fulfill any minor requirements.

Optional Courses for the Minor—History courses taken at non-Stanford Study Abroad programs may count toward the minor (provided the History Department approves them), but at least three of the six courses must be taken from Stanford History faculty. One course from certain Introduction to the Humanities courses (IHUM 4A,B; 5A,B; and 11A,B) may count toward the six-course requirement, but not for the three-course field of concentration. One Directed Research (299S) course may count to-

ward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor.

COTERMINAL B.A. AND M.A. PROGRAM IN HISTORY

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University co-terminal requirements listed in the "Undergraduate Degrees and Programs" section of this bulletin.

ADMISSION

Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

The application filing deadline is December 7, 2010.

The coterminal B.A. and M.A. program is not declarable on Axess.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

MASTER OF ARTS IN HISTORY

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)—The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "School of Education" section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available from Graduate Admissions, the Registrar's Office, 630 Serra Street, Suite 120, or at http://gradadmissions.stanford.edu.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 7, 2010.

DOCTOR OF PHILOSOPHY IN HISTORY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 7, 2010. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see http://gradadmissions.stanford.edu.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 7, 2010.

DEGREE REQUIREMENTS

Required Courses—

- HISTORY 304. Approaches to History—for all first-year Ph.D. students
- HISTORY 305. Graduate Workshop in Teaching—for all first-year Ph.D. students
- HISTORY 351A,B,C,D,E,F. Core in American History—for first-year and second-year Ph.D students in American History
- HISTORY 313,314, Core in Medieval History—for Ph.D. students in Medieval History.

Other Graduate Core Colloquia required for Ph.D. students studying in fields other than the above are listed in the Department of History's Graduate Handbook.

University Oral Examinations—The student is expected to take

the University oral examination in the major concentration in the third graduate year.

Dissertation—The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Dissertation Committee—The reading committee consists of the principal dissertation adviser (first reader), and two additional members of the Department (second and third readers) agreed upon by the adviser and the student.

FINANCIAL SUPPORT

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

RESOURCES

The degree requirements section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1500
   - Europe, 1400-1800
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East and Central Asia
   - South Asia
   - East Asia before 1600
   - China since 1600
   - Japan since 1600
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including colonial America)
   - The History of Science, Medicine, and Technology
   - Transnational, International, and Global
2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   a. One of the concentrations listed above (other than the student's major concentration).
   b. One of the concentrations listed below, which falls largely outside the student's major concentration:
      - The Ancient Greek World
      - The Roman World
      - Europe, 300-1000
      - Europe, 1000-1400
      - Europe, 1400-1600
      - Europe, 1600-1789
      - Europe, 1700-1871
      - Europe since 1848
      - England, 450-1460
      - Britain and the British Empire, 1460-1714
      - Britain and the British Empire since 1714
      - Russia to 1800
      - Russia since 1800
      - Eastern Europe to 1800
      - Eastern Europe since 1800
      - Jewish History
      - Middle East and Central Asia to 1800
      - Middle East and Central Asia since 1800
      - Africa
      - South Asia
      - China before 1600
      - China since 1600
      - Japan before 1600
      - Japan since 1600
      - Latin America to 1825
      - Latin America since 1810
      - The United States (including Colonial America) to 1865
      - The United States since 1850
      - The History of Science, Medicine, and Technology

- Transnational, International, and Global

c. Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
d. A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interconcentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.

5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.
7. The student is expected to take the University oral examination in the major concentration in the third graduate year.
8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

PH.D. IN HISTORY AND HUMANITIES

The department of History participated in the Graduate Program in Humanities leading to a Ph.D. degree in History and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

PH.D. MINOR IN HISTORY

Students pursuing a Ph.D. other than in History may apply for the Ph.D. Minor in History. Ph.D. students cannot pursue a minor in their own program. The minimum University requirement for a Ph.D. minor is 20 units of History course work at the graduate level (courses numbered 300 and above) at Stanford. All units should be in a single field. Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units taken at Stanford. Courses used for a minor may not be used to meet the requirements for a master's degree.

Requirements—20 units of History course work at the graduate level (HISTORY 300-399W and 400-499X) at Stanford. All units should be in a single field.

Optional Courses for the Minor—A Ph.D. minor form outlining the program of study must be approved by the major and minor departments.

OVERSEAS STUDIES COURSES IN HISTORY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BEIJING

- OSPBEIJ 67. China-Africa and Middle East Relations. 4 units, Li, Wang

BERLIN

- OSPBER 34. Science, Medicine, and Technology in Nazi Germany. 5 units, David Holloway

FLORENCE

- OSPFLOR 106V. Italy: From an Agrarian to a Post-industrial Society. 5 units, Giuseppe Mammarella, GER:DB:SocSci, EC:GlobalCom

MOSCOW

- OSPMOSC 78. Russian-American Relations: from the War of Independence to the War on Terror. 5 units, Edward A. Ivanian, GER:DB:SocSci
- OSPMOSC 80. Foundations of Russian Culture through the Visual. 3-5 units, Nancy Kollmann, GER:DB:Hum
- OSPMOSC 81. Six Centuries of Russian History through Architecture: Walking Tour. 2 units, Nancy Kollmann

OXFORD

- OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850. 4-5 units, Geoffrey Tyack, GER:DB:Hum

PARIS

- OSPPARIS 29. Colonization, Decolonization and Immigration: An Overview of French Global History in the 20th Century. 5 units, Choukri Hmed, GER:DB:SocSci, EC:GlobalCom

SANTIAGO

- OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci

WINTER QUARTER

BERLIN

- OSPBER 26. Germany in Europe. 5 units, Philippe Buc

CAPETOWN

- OSPCPTWN 33. From Apartheid to Democracy: Namibia and South Africa. 4 units, Christopher Saunders
- OSPCPTWN 38. Genocide: The African Experience. 4 units, Mohamed Adhikari, GER:DB:SocSci, EC:GlobCom

FLORENCE

- OSPFLOR 43. The Invention of the Book. 3-5 units, Reviel Netz, GER:DB:Hum
- OSPFLOR 45. Harmony: Ancient Science in the Italian Renaissance. 3-5 units, Reviel Netz, GER:DB:HUM
- OSPFLOR 49. The Cinema Goes to War: Fascism and World War II As Represented in Italian and European Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

OXFORD

- OSPOXFRD 92. Britain and the Second World War. 5 units, Geoffrey Tyack, GER:DB:Hum

PARIS

- OSPPARIS 81. France During the Second World War: Between History and Memory. 5 units, Fabrice Virgili, GER:DB:SocSci

SPRING QUARTER

CAPETOWN

- OSPCPTWN 52. The Ethics of Imperialism. 5 units, James P. Daughton, GER:DB:Hum
- OSPCPTWN 53. The South African Environment in Historical Context. 5 units, James P. Daughton

FLORENCE

- OSPFLOR 58. Space as History: Urban Change and Social Vision: Florence 1059 to the Present. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum

MADRID

- OSPMADRD 62. Spanish California: Historical Issues. 5 units, Sylvia Hilton

OXFORD

- OSPOXFRD 70. History of London. 4-5 units, Geoffrey Tyack, GER:DB:SocSci, EC:GlobCom

PARIS

- OSPPARIS 49. French Connections in America: the 18th and 19th Centuries. 5 units, Caroline Winterer, GER:DB:Hum

SANTIAGO

- OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci

HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Jessica Riskin (History)

Committee-in-Charge: Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History, Clayman Institute for Gender Research)

Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), David Kennedy (History), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History, Clayman Institute for Gender Research), Richard White (History), Helen Longino (Philosophy)

Associate Professors: Jessica Riskin (History), Caroline Winterer (History)

Assistant Professors: Sarah Jain (Anthropology), Thomas Mullaney (History), Priya Satia (History), Fred Turner (Communication)

Professor (Research): Rega Wood (Philosophy)

Lecturers: Tom Ryckman (Philosophy), Margo Horn, John McCaskey

Other Affiliation: Henry Lowood (Stanford University Libraries)

Visiting Scholar: Adrienne Mayor (Classics)

Mail Code: 94305-2024

Email: rrogers@stanford.edu

Web Site: http://HPST.stanford.edu

Courses offered by the Program in History and Philosophy of Science and Technology are listed under the subject code HPS on the *Stanford Bulletin's* ExploreCourses web site.

The Program in History and Philosophy of Science and Technology (HPST) teaches students to examine the sciences, medicine and technology from myriad perspectives, conceptual, historical and social. The community of scholars includes core faculty and students in History and Philosophy and affiliated members in Classics, Anthropology, English, Political Science, Communication, and other disciplines. Together, they draw upon the multiple methods of their disciplines to study the development, functioning, applications, and social and cultural engagements of the sciences.

Stanford's Program in History and Philosophy of Science and Technology is a collaborative enterprise of the departments of History and Philosophy. Each department has its own undergraduate and graduate degree programs in this area, but these overlap and interact through the structure of requirements, advising, team-taught courses, an active graduate student community and a shared colloquium series.

The program's courses span from antiquity to the late 20th century, with emphasis on:

- ancient science
- Renaissance science
- the Scientific Revolution
- Enlightenment and transatlantic science
- history of medicine and the body
- history and philosophy of biology
- history and philosophy of modern physics
- history of the philosophy of science in the modern period
- gender, science, and technology

UNDERGRADUATE DEGREES

The Department of History offers an interdisciplinary track in History, Science, and Medicine. The Department of Philosophy offers a degree field in History and Philosophy of Science.

GRADUATE DEGREES

Graduate students in the Program in History and Philosophy of Science and Technology can pursue a Ph.D. either in History, through its Ph.D. field in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. field in Philosophy of Science. Students completing the requirements of the HPST program graduate with a diploma stating their concentration in HPST.

COURSES

The following courses may be used to fulfill optional course requirements.

INTRODUCTORY

- HPS/PHIL 60. Introduction to Philosophy of Science
- PHIL 16N. Values and Objectivity
- PHIL 15N. Freedom, Community, and Morality
- CLASSGEN 133.Invention of Science
- CLASSGEN 16. Archimedes and His Science

SCIENCE IN HISTORY

This sequence is designed to introduce students to the history of Science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

- CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money
- HISTORY 31/STS 125/225. Science, Technology, and Art: The Worlds of Leonardo
- HISTORY 40/140. World HIstory of Science
- HISTORY 41A/141A. The Emergence of Modern Medicine
- HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering
- OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought

MEDICINE IN HISTORY

This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

- AMSTUD 156. History of Women and Medicine in the United States
- HISTORY 243G/343G. Tobacco and Health in World History

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

- FEMST 166/PHIL 184F/284F. Feminist Theories of Knowledge
- HPS 220. Nineteenth-Century Philosophy of Science
- PHIL 107/207. Plato and Heraclitus
- PHIL 115/215. Problems in Medieval Philosophy
- PHIL 163/263. Significant Figures in Philosophy of Science
- PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
- PHIL 165C/265C. Philosophy of Physics: Probability and Relativity
- PHIL 167A/267A. Philosophy of Biology
- PHIL 167B/267B. Philosophy, Biology, and Behavior
- PHIL 167C/267C. Associative Theories of Mind and Brain
- PHIL 224. Kant's Philosophy of Physical Science
- PHIL 224A. Math in Kant's Philosophy
- PHIL 348. Evolution of Signals
- PHIL 360. Core Seminar in Philosophy of Science
- PHIL 365. Seminar in Philosophy of Science: Time
- OSPOXFRD 26. Spirit, Mind, Brain:Evolving Understanding in Neurology/Neuroscience

ADVANCED

HISTORICAL PERSPECTIVES ON SCIENCE

The following courses focus on specific episodes in or approaches to the history of science.

- HPS 154. The History of Scientific Methods, Pythagoras to Popper
- FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies
- HISTORY 142/342. Darwin in History of Life
- HISTORY 208A/308A. Science and the Law in History
- HISTORY 231A/331A. Charles Darwin and the Global 19th Century
- HISTORY 232F/332F. The Scientific Revolution
- HISTORY 234F/334F. Science, Technology, and Empire
- HISTORY 241F/341F. History of the Modern Fact
- HISTORY 241G/341G/STS 134/234. History of the Senses
- HISTORY 241S. Science and Culture Wars
- HISTORY 242A/342A. Technology and Society in the Modern World

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

- HPS 199. Directed Reading
- HPS 299. Graduate Individual Work
- ANTHRO 180. Science, Technology, and Gender
- HISTORY 144/344. Gender in Science, Medicine, and Engineering
- HISTORY 242G. Representing the World: Maps, Statistics, and Photography
- HISTORY 243C/343C. 18th-Century Colonial Science and Medicine
- HISTORY 243S/443A. Human Origins: History, Evidence, and Controversy
- HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
- HUMBIO 175. Healthcare as Seen through Medical History, Literature, and the Arts

OVERSEAS STUDIES COURSES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

WINTER QUARTER

FLORENCE

- OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought. 5 units, Paolo Galluzzi, GER:DB:Hum

HUMAN BIOLOGY

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Luigi Cavalli-Sforza (Genetics), Christos Constantinou (Urology), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Stanley Falkow (Microbiology/Immunology), Albert H. Hastorf (Psychology), Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biology), Carol Winograd (Medicine), Shirley Feldman *(Associate Director)*

Director: Carol Boggs (Biology)

Associate Director: Katherine Preston

Professors: Laurence Baker (Health Research & Policy), Lisa Curran (Anthropology), William H. Durham (Anthropology), Heidi Feldman (Neonatology), Russell D. Fernald (Biology), Paul Fisher (Neurology and Neurological Sciences, Pediatrics), Uta Francke (Genetics), Margaret Fuller (Developmental Biology), Lawrence H. Goulder (Economics), H. Craig Heller (Biology), Richard Klein (Biology and Anthropology), Tanya Luhrmann (Anthropology), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopedic Surgery), Roeland Nusse (Developmental Biology), Amado Padilla (Education), Thomas Rando (Neurology), Natalie Rasgon (Psychiatry and Behavioral Sciences), Thomas Robinson (Pediatrics), Robert Sapolsky (Biology, Neurology and Neurological Sciences), Matthew Scott (Developmental Biology), William Talbot (Developmental Biology), Lucy Tompkins (Infectious Diseases), Shripad Tuljapurkar (Biology), Irving Weissman (Pathology), Jeffrey Wine (Psychology), Paul Wise (Pediatrics), Arthur P. Wolf (Anthropological Sciences)

Associate Professors: Firdaus Dhabhar (Psychiatry and Behavioral Sciences), Anne Fernald (Psychology), James Fox (Anthropology), Brenda Golianu (Anesthesia), James Jones (Anthropology), Jelena Obradovic (Education), John Rick (Anthropology), Randall Stafford (Medicine)

Assistant Professors: Melissa Brown (Anthropology), Daniel Garza (Orthopedic Surgery, Emergency Medicine), Norman G. Miller (Medicine),

Professors (Research): David Katzenstein (Medicine), Marcia Stefanick (Medicine)

Associate Professors (Research): Christopher Gardner (Medicine), David Lyons (Psychiatry and Behavioral Sciences)

Professors (Teaching): Carol Boggs (Biology), Ellen Porzig (Developmental Biology)
Associate Professors (Teaching): Donald Barr (Pediatrics), Catherine Heaney (Psychology, Medicine), David Magnus (Pediatrics), Eunice Rodriguez (Pediatrics), Robert Siegel (Microbiology and Immunology)
Clinical Professor: Laraine Zappert (Psychiatry and Behavioral Sciences)
Clinical Associate Professor: Mary Therese Jacobson (Obstetrics and Gynecology),
Clinical Assistant Professor: Rita Popat (Epidemiology)
Other Teaching Faculty and Staff: William Abrams, Maya Adam-Seef, Wesley F. Alles (Medicine), Judy Chu, Gerda Endemann (Biology), Anne Firth-Murray, Anne Friedlander, Renu Heller (Biology), Camillan Huang, Donald Light, Lisa Medoff, Katherine Preston, Lynn Rothschild, Merritt Ruhlen, Daniel Salkeld (Anthropology), Darvin Scott Smith (Microbiology and Immunology), James Truncer (Anthropology), Beatriz Piedad Urdinola (Latin American Studies), Katherine E. Williams (Psychiatry and Behavioral Sciences), Jennifer Wolf (Education), Nathan Wolfe, Larry Zaroff (Biomedical Ethics)
Course Associates: Kimberly Basurto, Jolene Kokroko, Sophie Lambert, Cooper Lloyd, Heather Roberts, Dane Saksa, Tanya Widmer, Lauren Wood
Honors Chair: Katherine Preston
Program Offices: Building 20
Mail Code: 94305-2160
Phone: (650) 725-0336

Web Site: http://humbio.stanford.edu

Courses offered by the Program in Human Biology are listed under the subject code HUMBIO on the *Stanford Bulletin's* ExploreCourses web site.

The program offers a Bachelor of Arts in Human Biology, as well as a minor and an honors program.

MISSION OF THE UNDERGRADUATE PROGRAM IN HUMAN BIOLOGY

The mission of the undergraduate program in Human Biology is to provide students with an interdisciplinary approach to understanding human beings from biological, behavioral, social, and cultural perspectives. Courses in the major allow students to see connections and parallels with other fields as they learn to formulate and evaluate health, environmental, and other public policies issues that influence human welfare. The program prepares majors to pursue advanced training in professional or graduate programs.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a road map of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at http://humbio.stanford.edu.

LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Human Biology. Students are expected to demonstrate:

1. ability to acquire and synthesize scientific information from a variety of sources.
2. ability to apply analytical tools to evaluate policy.
3. ability to interpret knowledge in meaningful and appropriate ways as they draw conclusions about the significance of their findings.
4. ability to communicate their scientific ideas clearly and persuasively.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as the undergraduate major, each student must meet with one of six student advisers who assist in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. The student advisers also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, Beyond HumBio, and declaration workshops. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program's faculty advising chairs and the student services coordinator to review the program's policies and specific student inquiries and petitions concerning the program.

BACHELOR OF ARTS IN HUMAN BIOLOGY

DECLARING THE MAJOR

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study.

At the time the major is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser.

It is important to declare early, preferably in early spring as soon as students have passed both Autumn and Winter Quarter core courses (2A,B, 3A,B). The University requires students to declare a major by the end of Spring Quarter of the sophomore year. Under special circumstances students may declare as late as Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

REQUIREMENTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 87 units in the major divided among four levels of courses:

1. *Fundamental Program*: at least 38 units, to include
   a. Human Biology Core (30 units)
      - The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See "Human Biology Core" below for more information.
   b. Statistics (4-5 units)
      - Statistics may be chosen from courses such as STATS 60 or 141, PSYCH 10, SOC 181B, and BIO 141. For questions about other statistics courses that might fulfill this requirement, see the program office. The core and statistics courses must be taken for a letter grade by majors.
   c. Internship (HUMBIO 197, 4 units)
      - The internship requirement, a mentored non-classroom project, is graded satisfactory/no credit only.

2. *Foundation Courses*: 20-unit minimum. Total units vary, depending on the focus of study chosen by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. The minimum grade requirement for foundation courses is 'C-.'
3. *Area of Concentration*: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. The area of concentration is individually designed by the student in consultation with the student advisers and faculty adviser. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. The minimum grade requirement for area of concentration courses is 'C-'. The area of concentration generally has an emphasis in one, and sometimes more than one, of the following eight areas:

Area 1: Environment and Environmental Policy
- Environment
- Environmental Policy
- Culture/Demography/Human Ecology

Area 2: Health and Health Policy
- Health Policy
- Public Health
- International Health

Area 3: Human Performance

Area 4: Human Development
- Biological Development
- Psychological Development
- Education

Area 5: Biomedical Science
- Genetics
- Molecular Biology
- Human Physiology
- Infectious Diseases

Area 6: Brain and Behavior

Area 7: Ethics and Medical Humanities

Area 8: Evolution

A non-exclusive list of possible courses for each emphasis is available at the student advisers' office or at http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/474.

4. *Upper-Division Courses:* students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Human Biology cognate courses can be found at http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/1382.

HUMAN BIOLOGY CORE

Required core sequences (HUMBIO 2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses. The Human Biology core consists of the following courses:

- HUMBIO 2A. Genetics, Evolution, and Ecology
- HUMBIO 2B. Culture, Evolution, and Society
- HUMBIO 3A. Cell and Developmental Biology
- HUMBIO 3B. Behavior, Health, and Development
- HUMBIO 4A. The Human Organism
- HUMBIO 4B. Environmental and Health Policy Analysis

HONORS PROGRAM

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences.

Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult the Human Biology Honors Handbook at https://stanford.edu/dept/humbio/cgi-bin/?q=node/1385 and meet with the Human Biology Associate Director or student services officer.

Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194.

Admission to the honors program is by submission of an intention to undertake honors research in early February, followed by the application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year.

The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Honors students then present summaries of their research at the Human Biology Honors Poster Symposium in May.

Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

MINOR IN HUMAN BIOLOGY

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what is known of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology are expected to develop a strong background in the integration between the biological and social aspects of human beings.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of Autumn Quarter to graduate the following Spring Quarter).

To minor in Human Biology, students must take the Human Biology Core (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any HUMBIO course numbered 100-189). The student must earn a minimum letter grade of 'C-'. Courses that count towards the fulfillment of major requirements may not be counted towards the minor.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate resident theme house for Human Biology, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

OVERSEAS STUDIES COURSES IN HUMAN BIOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

AUSTRALIA

- OSPAUSTL 10. Coral Reef Ecosystems. 3 units, Kevin Arrigo, Simon Dunn, Selina Ward, GER:DB:EngrAppSci
- OSPAUSTL 20. Coastal Resource Management. 3 units, Ron Johnstone, GER:DB:EngrAppSci
- OSPAUSTL 30. Coastal Forest Ecosystems. 3 units, Claire Baker, Norman Duke, GER:DB:EngrAppSci

FLORENCE

- OSPFLOR 38. Water Resources Engineering in Italy: An Historical Perspective. 4-5 units, Leonard Ortolano

PARIS

- OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time. 4-5 units, Jean-Marie Fessler

WINTER QUARTER

MADRID

- OSPMADRD 32. Health Care Systems Design: Spain, Europe, and the United States. 4 units, Laurence Baker
- OSPMADRD 72. Issues in Bioethics Across Cultures. 5 units, Pablo de Lora del Toro

PARIS

- OSPPARIS 53. The Shape of Things to Come: the Evolution of Science and Society. 4 units, Jill Helms

SANTIAGO

- OSPSANTG 27. Humans and the Environment: the Great Transition. 3-5 units, Shripad Tuljapurkar

SPRING QUARTER

MADRID

- OSPMADRD 57. Health Care: A Contrastive Analysis between Spain and the U.S. 5 units, Pablo de Lora del Toro, GER:DB:SocSci

IBERIAN AND LATIN AMERICAN CULTURES

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Sylvia Wynter; *(Professor, Teaching)* María-Paz Haro
Director: Jorge Ruffinelli
Chair of Graduate Studies: Michael P. Predmore
Chair of Undergraduate Studies: Héctor Hoyos
Minors Coordinator: Marília Librandi Rocha
Professors: Michael P. Predmore, Joan Ramon Resina, Jorge Ruffinelli, Yvonne Yarbro-Bejarano
Associate Professor: Vincent Barletta
Assistant Professors: Héctor M. Hoyos, Marília Librandi Rocha, Lisa Surwillo (on leave)
Courtesy Professors: John Felstiner, Roland Greene, Hans U. Gumbrecht, Ramón Saldívar
Courtesy Associate Professors: James A. Fox, Paula Moya

Web Site: http://ilac.stanford.edu

Courses offered by the Department of Iberian and Latin American Cultures, formerly the Department of Spanish and Portuguese, are listed under the subject code ILAC on the *Stanford Bulletin's* ExploreCourses web site. For courses in Catalan, Portuguese, and Spanish language instruction with the subject codes CATLANG, PORTLANG and SPANLANG, see the "Language Center" section of this bulletin.

The Department of Iberian and Latin American Cultures offers courses focused on the languages, literatures, and cultures of the Iberian Peninsula, Latin America, and Latina/o populations in the United States. To achieve its goal of training students as experts in the cultures of the Iberian Peninsula and Latin America, the department balances an emphasis on literary studies with philosophical, historical, and social approaches to cultural issues.

The department's faculty includes scholars of modern and contemporary Spanish literature and cinema, contemporary Latin American literature and cinema, medieval and contemporary Catalan literature and culture, Aljamiado and medieval Spanish literature, early modern Portuguese literature, modern and contemporary Brazilian literature, and Chicana/o culture and literature. In general, the department's courses are characterized by an intercultural and interdisciplinary focus that combines the study of literature with wide ranging intellectual concerns.

The department nurtures relationships with other departments and programs at Stanford in areas such as anthropology, philosophy, history, Mediterranean studies, medieval and Renaissance studies, European and Latin American politics, feminist studies, Chicana/o studies, and film studies.

The department is committed to three main educational goals:

1. to provide students with a contextualized knowledge of the literatures and cultures of the Iberian Peninsula from the medieval period to the present, of the Spanish and Portuguese speaking countries of Latin America, and of the Spanish-speaking communities of the United States.
2. to prepare undergraduates for advanced study in those areas and/or in a range of professional fields.
3. to provide doctoral students with advanced training as research scholars and teachers in preparation for careers as university professors or in related roles.

In addition, the department, through the Iberian Studies Program, regularly hosts visiting faculty including the Ginebre Serra Visiting Chair in Catalan Studies, the Eusko Ikaskuntza Visiting Professor in Basque Culture, and the Consello de Cultura Galega Visiting Professor.

The department awards B.A., M.A., and Ph.D. degrees in Iberian and Latin American Cultures to eligible candidates, as well as undergraduate minors in Spanish and Portuguese and a Ph.D. minor in Spanish.

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the "Language Center" section of this bulletin for these courses.

MISSION OF THE UNDERGRADUATE PROGRAM IN IBERIAN AND LATIN AMERICAN CULTURES

The mission of the undergraduate program in Iberian and Latin American Cultures is to expose students to a variety of perspectives in languages, literatures, and cultures of the Iberian Peninsula, Latin America, and Latina/o populations in the United States. The program balances an emphasis on literary studies with a diverse set of approaches to cultural and social issues. Courses in the program provide students with a contextualized knowledge of the literatures and cultures of the Iberian Peninsula from the medieval period to the present; the Spanish and Portuguese speaking countries of Latin America; and the Spanish-speaking communities of the United States. Students in the major are prepared for advanced study in these areas and for a range of professional fields.

LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.
2. critical thinking skills using course's primary source materials.
3. facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. analytical writing skills and close reading skills.
5. expository oral skills.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the "School of Education" section of this bulletin and the credentials administrator, School of Education.

GRADUATE PROGRAMS IN IBERIAN AND LATIN AMERICAN CULTURES

University requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

COTERMINAL B.A. AND M.A.

The requirements for the coterminal M.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

BACHELOR OF ARTS IN IBERIAN AND LATIN AMERICAN CULTURES

The major in Iberian and Latin American Cultures (ILAC) requires 60 units of course work. Courses must be taken for a letter grade and a maximum of 20 units of course work from abroad may be applied towards the major. At the discretion of the Chair of Undergraduate Studies, up to 10 units of course work from outside the department, clearly related to the study of literature and culture in the areas and traditions taught by the department, may be counted towards the degree. The core courses (requirements 1, 2, 3 and 4 below) may not be taken abroad. Exceptional cases for any of these requirements must be referred to the Chair of Undergraduate Studies who, in consultation with the department Director, makes a final decision.

PREREQUISITES

Students planning to declare the major must have completed the second-year sequence of Spanish language courses through SPANLANG 13, or equivalent. SPANLANG 101 is recommended.

How to Declare a Major—Students interested in declaring an ILAC major should see the Chair of Undergraduate Studies.

Double Majors—The major in ILAC is designed to combine with a second major in another field and with study abroad. Students may not count the same courses to fulfill requirements in both majors.

GENERAL COURSE REQUIREMENTS

1. 5 Writing in the Major (WIM) units are required, and these are prerequisite for every course in the major; concurrent enrollment is allowed.
   a. ILAC 120. Introduction to Literary and Scholarly Research (3-5 units)
   b. ILAC 159. *Don Quijote* (3-5 units)
2. Core courses in literature. Students are required to take:
   a. ILAC 157. Medieval and Early Modern Iberian Literatures
   b. ILAC 136. Modern Iberian Literatures
   c. ILAC 161. Modern Latin American Literature
3. Core course in culture, history, and civilization. Choose at least one:
   a. ILAC 130. Cultural Perspectives in Iberia
   b. ILAC 131. Cultural Perspectives in Latin America
4. A senior seminar, ILAC 278 or 278A. Topics vary. Two options are offered each year.
5. Up to three language courses in Spanish, Portuguese, or Catalan (SPAN/PORT/CATLANG), including SPANLANG 102, may count toward the major.
6. Additional 100- or 200-level ILAC literature courses above 100 to complete the required 60 units. One course above 100 and one core course, or consent of the instructor, are prerequisites for 200-level courses. For all ILAC courses taught in Spanish, students must have completed SPANLANG 102 or have tested above this level through the Language Center. When choosing courses, students are encouraged to consult the Chair of Undergraduate Studies who makes recommendations about a course of study related to the student's academic interests. IHUM courses taught at least partially by a faculty member of the department may count towards these electives.

HONORS PROGRAM

ILAC majors with a grade point average (GPA) of 3.3 or better in major courses may apply to the honors program in Spring Quarter of the junior year. Students should submit an application for the honors program and a proposal outline and may enroll for 2 units of ILAC 189B for the drafting or revision of the thesis proposal and preliminary research.

Honors students are encouraged to participate in the honors college coordinated by the Division of Literatures, Cultures, and Languages and offered at the end of the summer before the senior year. In Autumn Quarter of the senior year, students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ILAC 189A while composing the thesis during Winter Quarter.

Each honors student must write a substantial honors essay under the direction of a faculty member who serves as adviser, and the completed thesis must be submitted by the end of Winter Quarter. Students who do not enroll in an ILAC 189B course in the junior year may enroll in ILAC 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser.

A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Students should consult their undergraduate advisers for additional information on the honors program.

MINORS IN SPANISH AND PORTUGUESE

The minors in Spanish and Portuguese are for students who want to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the

Spanish- or Portuguese-speaking worlds. The minors in Spanish and Portuguese require 30 units of course work taken for a letter grade. Up to 5 units of course work outside the department, up to 10 units of relevant course work taken abroad, and up to 10 units of second-year and above Spanish or Portuguese language courses may count toward these minors with the approval of the minors coordinator. To declare either of these minors or for more information, see the minors coordinator or the student affairs officer in the Division of Literatures, Cultures, and Languages.

MINOR IN SPANISH

Requirements—

1. A 100- or 200-level course in Iberian literature
2. A 100- or 200-level course in Latin American literature
3. Any additional 100- or 200-level courses in literature and culture to complete 30 units. IHUM courses with a Hispanophone component taught at least partially by a faculty member of the department may count toward these electives.

MINOR IN PORTUGUESE

Requirements—

1. A 100- or 200-level course in Iberian literature with a Lusophone component
2. A 100- or 200-level course in Latin American literature with a Lusophone component
3. Any additional 100- or 200-level courses in literature and culture to complete 30 units. IHUM courses with a Lusophone component taught at least partially by a faculty member of the department may count toward these electives.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs: the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

STUDY ABROAD PROGRAMS IN IBERIAN AND LATIN AMERICAN CULTURES

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Student Services Center. Depending on course selections, up to 20 units of course work taken abroad may be applied toward the major in ILAC and 10 units toward the minor in Spanish or Portuguese. Students planning to study abroad, or returning from study programs, are encouraged to consult with the Chair of Undergraduate Studies to coordinate the course work from abroad with their degree program.

The department and Bechtel International Center maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs. Students considering different options are encouraged to speak with the Director of the department or the Chair of Undergraduate Studies.

STANFORD IN SANTIAGO, CHILE AND MADRID OR BARCELONA, SPAIN

The Bing Overseas Studies Programs in Santiago, Chile and Madrid, Spain require one year of college-level Spanish (SPANLANG 3). Course work is primarily in Spanish. Information is available in the "Overseas Studies" section of this bulletin or at http://bosp.stanford.edu. Internships and research opportunities may be arranged for students staying for two quarters.

For ILAC majors with an interest in Iberian Studies, the department recommends study in Barcelona through CASB, a consortium of U.S. universities of which Stanford is a participating member. This program combines courses at the program's center with open access to courses at three Barcelona universities: Universitat Popeu Fabra, University of Barcelona, and Autonomous University of Barcelona. Visiting faculty from Brown, Chicago, Stanford, and Northwestern complement the offerings of these three major universities. Admission is highly competitive. Other programs are also recognized by the department, and students are encouraged to discuss their interests with the Director of the department or with the Chair of Undergraduate Studies.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estadual do Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil should contact Professor Marília Librandi Rocha. Students interested in study in Portugal should contact Professor Vincent Barletta.

MASTER OF ARTS IN IBERIAN AND LATIN AMERICAN CULTURES

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must be taken at Stanford. All 45 units must have a letter grade of 'B' or above.

The requirements for the M.A. are:

1. A 200-level or above course in literary or cultural theory
2. Two 200-level or above courses in Latin American (including Brazilian) or Latino/Chicano literature and culture
3. Two 200-level or above courses in Iberian literature and culture
4. One 300-level course in Iberian literature and culture and one in Latin American (including Brazilian) or Latino / Chicano literature and culture
5. At least one 300-level graduate seminar offered in the department each quarter.
6. Knowledge of Portuguese or Catalan equivalent to one year of university study for students concentrating in Spanish, or Spanish or Catalan for students concentrating in Portuguese.

Independent study courses (ILAC 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Chair of Graduate Studies.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY IN IBERIAN AND LATIN AMERICAN CULTURES

The requirements of the Ph.D. in Iberian and Latin American Cultures (ILAC) are:

1. 135 units of graduate-level course work with a grade point average (GPA) of 3.0 or above. All candidates for the Ph.D. degree are expected to fulfill all requirements for the M.A. during their first year in the program. Units completed for the M.A. degree at another institution (up to 45 units) can be counted toward the Ph.D. Independent study courses (ILAC 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Chair of Graduate Studies in consultation with the student's graduate adviser. Students must be enrolled in at least one 300-level graduate seminar offered through the department each quarter before advancing to TGR status.
2. Knowledge of Catalan, Portuguese, and Spanish equivalent to one year of university study must be demonstrated before students take the comprehensive examination. In addition, Ph.D. students must have superior proficiency in one of these languages upon admission to the program.
3. The qualifying paper, the comprehensive examination, and the University oral examination, as described below
4. Teaching of five courses in the department
5. Completion of a dissertation

For residency and candidacy requirements, see the "Graduate Degrees" section of this bulletin. For further information, consult the department's *Graduate Student Handbook*.

In preparation for teaching, Ph.D. candidates are required to take DLCL 201 in the first year.

In consultation with the adviser, students choose one major field of study from the following:

1. Medieval and Early Modern Iberian Literature and Culture
2. Modern Iberian Literature and Culture
3. Modern Latin American Literature and Culture (includes Brazil)
4. U.S. Latino/Chicana/o Literature and Culture

In addition, candidates choose two secondary areas of study outside the major field from any of the above.

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area.

In addition to the department's course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as courses in Comparative Literature, Feminist Studies, History, Linguistics, or Modern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Not more than 20 units may be taken outside the department. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.

After the first year of study, the student's progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper, called the qualifying paper. The qualifying paper should be written in Catalan, English, Portuguese, or Spanish (students must write the paper in a language other than their first language), of no more than 6,000 words, including notes and bibliography, and following current MLA Style. A digital copy of the qualifying paper must be submitted to the department administrator by October 1 of the second year. For more details consult the *Graduate Student Handbook*.

If approval of the qualifying paper is granted, the student should file a formal application for candidacy no later than the end of the second year, as prescribed by the University. Course requirements are usually completed by the third year of study. A written comprehensive examination on the major field and secondary areas is then taken. The examination is based on a list of readings, selected in consultation with the adviser, which integrates major and secondary topics in both Iberian and Latin American or Latino/Chicano Studies. The comprehensive examination must take place in its entirety during the same quarter (usually during the first quarter of the fourth year of graduate study), but not during dead week or finals week. The comprehensive examination consists of three components:

1. A written exam in the major field of study. This exam lasts four hours. Students are given four questions, and they must answer two. Students may write in Catalan, English, Portuguese, or Spanish.

2. A written examination in each of the minor fields of study. These exams last two hours each. For each exam, students are given two questions, and they must answer one. Students may write in Catalan, English, Portuguese, or Spanish.

3. An oral examination. This exam is presented to the Doctoral Dissertation Reading Committee and lasts no more than two hours. It may be conducted in Catalan, English, Portuguese, and /or Spanish depending on the committee, and is based on the student's reading list and written examinations.

The written exams may be taken all on one day or on two consecutive days. The oral examination must take place between two and three weeks after the written examinations. For further details, consult the *Graduate Student Handbook*.

Following the comprehensive examination, students should find a topic requiring extensive original research and request that a member of the department serve as dissertation adviser. The student must complete the Reading Committee form and request that the chair approve a committee to supervise the dissertation. The committee may advise extra preparation within or outside the department, and time should be allowed for such work. The University oral examination usually takes place one or two quarters after the comprehensive examination. The oral examination covers plans for the dissertation based on a prospectus approved by the committee (20 to 25 pages), and may be taken in English, Spanish, Portuguese, or Catalan, depending on the committee.

The dissertation must be submitted to the reading committee at least eight weeks before the University filing deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Candidates taking more than five years must apply for reinstatement of candidacy and may not expect financial support.

PH.D. IN SPANISH AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Spanish and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL student affairs officer at (650) 724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

PH.D. MINOR IN IBERIAN AND LATIN AMERICAN CULTURES

For a minor in Spanish. the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students in the Ph.D. program in ILAC who choose a minor in another department should consult with advisers in that department.

IBERIAN AND LATIN AMERICAN CULTURES COURSE CATALOG NUMBERING SYSTEM

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literary studies should also consult course listings in the departments of East Asian Languages and Cultures, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

OVERVIEW

1. Stanford Introductory Seminars, freshman and sophomore preference (suffix of N or Q)
2. Courses in Literature and Culture (100-399)
   a. Undergraduate Courses (100-199)
   b. Courses for Advanced Undergraduates and Graduates (200-299)
      Iberian Literature (200-239)
      Latin American Literature, including Brazil (240-279)
      Latino/Chicano Literature (280-298)
      Individual Work (299)
3. Graduate Seminars (300-399)
      Iberian Literature (300-339)
      Latin American and Brazilian Literature (340-379)
      Chicano Literature (380-398)

Individual Work (399)
Dissertation Research (802)

Courses bearing the suffix 'E' are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages or bilingually.

OVERSEAS STUDIES COURSES IN IBERIAN AND LATIN AMERICAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

MADRID

- OSPMADRD 37. Madrid in Film. 3-5 units, Jorge Ruffinelli. GER:DB:Hum
- OSPMADRD 40. Introduction to Literary and Cultural Analysis in the Spanish World. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum

SANTIAGO

- OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
- OSPSANTG 66. Latin American Current Affairs. 3-5 units, Héctor Hoyos
- OSPSANTG 67. 21st Century Chilean Literature. 3-5 units, Héctor Hoyos, GER:DB:Hum
- OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom

WINTER QUARTER

MADRID

- OSPMADRD 41. Dissidence and Continuity: Spanish Theater 1907 to the Present. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum
- OSPMADRD 45. Women in Art: Case Study in the Madrid Museums. 4 units, Julia Doménech López, GER:DB:Hum, EC:Gender

SANTIAGO

- OSPSANTG 14. Women Writers in Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC: Gender
- OSPSANTG 118X. Artistic Expression in Latin America. 5 units, César Albornoz, GER:DB:SocSci, EC:GlobalCom

SPRING QUARTER

MADRID

- OSPMADRD 50. Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almodóvar. 4-5 units, Santiago Tejerina-Canal

SANTIAGO

- OSPSANTG 10. Borges and Argentina. 4-5 units, Sergio Missana, GER:DB:Hum

INDIVIDUALLY DESIGNED MAJORS AND INDIVIDUALLY DESIGNED HONORS PROGRAM IN HUMANITIES

The Individually Designed Major (IDM) is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. (See the "Individually Designed Majors in Engineering" section of this bulletin for information about the IDM in Engineering.)

The IDM is intended for exceptional undergraduates interested in pursuing an area of study that, by virtue of its focus and intellectual content, cannot be accommodated by existing departmental or programmatic majors. Students must have a minimum GPA of 3.5 and the IDM cannot be a student's secondary major. IDM curricula are designed by students with the assistance of three faculty members of their choice; all advisers must be members of the Academic Council.

Students must submit a written proposal detailing their course of study. It is recommended that students considering an IDM meet with staff in the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences prior to writing the proposal. Programs must meet the following requirements:

1. A minimum of 75 units, with all courses at or above the 100 level.
2. A maximum of 5 units on a credit/no credit basis.
3. A maximum of 8 units in practical or direct reading, the results of which work must be presented in an academic paper for these units to count.
4. A core sequence in the department of one of the advisers.
5. A WIM course in the department of one of the advisers.
6. None of the units may count towards another major, minor, or other special program.

The proposed major must not be achievable through a major or combination of majors already offered by another degree-granting department or program. IDM students are required to complete a capstone requirement in the form of an honors project.

Each proposal should begin with a statement describing the proposed major. In the statement, the student should make clear the motivation for and goal of the major. The statement should specify how the courses to be taken relate to the major's goals. A proposed title for the major should be included.

The proposal statement should be followed by a four-year study plan that identifies the courses to be taken each quarter. The proposal should include a completed IDM Proposal Application form that has been signed by three faculty member advisers who certify that they endorse the major as described in the proposal and that they agree to serve as the student's permanent advisers. The proposal must be accompanied by a statement from the primary adviser giving an appraisal of the academic value and viability of the proposed major.

Any changes to a previously endorsed major must be endorsed by the adviser and approved by the Associate Dean of Graduate and Undergraduate Studies. A request by a student to make changes in her or his approved curriculum must be made sufficiently far in advance so that, should the request be denied, adequate time remains to complete the original, approved curriculum.

The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year by an IDM Curriculum Committee in H&S. Information about proposal procedures and the procedure for an honors project is available at the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. Proposals should be submitted to the Associate Dean for Graduate and Undergraduate Studies in the School of Humanities and Sciences.

INDIVIDUALLY DESIGNED HONORS PROGRAM IN HUMANITIES

The Individually Designed Honors Program (IDHP) in Humanities is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. This program is available to exceptional students who wish to complete an honors thesis in the Humanities and to have the notation "Honors in Humanities" recorded on their diplomas and transcripts in addition to their primary degree. The requirements for the IDHP are as follows:

1. A minimum GPA of 3.5 for acceptance. The 3.5 GPA must be maintained throughout the course of the student's Stanford undergraduate career.
2. Students must select two advisers for the honors thesis who are members of the Academic Council, at least one of whom is not from the student's major department. Both faculty members must be from humanities and arts departments.
3. Students majoring in a humanities or arts department must complete 25 additional units in the humanities and arts, chosen from areas outside of the major department. Areas of concentration include arts, literature, history, and philosophy. Courses must be chosen in consultation with the student's advisers, and a potential list of such courses submitted with the proposal.
4. Students majoring in a non-humanities and arts department must complete the equivalent of a minor in one humanities and arts department, and an additional 10 units in another. Winter-Spring IHUM courses may be used to satisfy part of this requirement. Courses must be chosen in consultation with the student's advisers, and a potential list of such courses submitted with the proposal.
5. Students must complete a capstone, majors seminar, or honors seminar in a humanities and arts department.
6. The honors thesis may be taken for a minimum of 5 units up to a maximum of 10 units. These units must be in addition to the requirements of 3 or 4 and 5 above. The student should determine the size and scope of the thesis in consultation with his or her two advisers.
7. Students should consult with the Associate Dean for Graduate and Undergraduate Studies in the School of Humanities and Sciences before submitting a proposal.
8. All proposals must be submitted no later than the third week of Autumn Quarter in the student's junior year, and preferably by Spring Quarter of the sophomore year. The H&S Curriculum Committee in the Humanities and Arts reviews and approves all proposals.

INTERDISCIPLINARY STUDIES IN HUMANITIES

Director: Gregory Freidin
Program Coordinator: Alice Staveley
Program Offices: Building 460, Room 216
Mail Code: 94305-2022
Phone: (650) 723-3413
Email: monica.moore@stanford.edu
Web Site: http://ish.stanford.edu

The Program in Interdisciplinary Studies in Humanities is not accepting new students; it will provide courses and advising for students already enrolled. The University remains committed to broad-based undergraduate education in the humanities; a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For updates on this status, see the program web site: http://ish.stanford.edu.

Undergraduates interested in the broad-based humanities honors degree should consult the Associate Dean for Graduate and Undergraduate Studies in the School of Humanities and Sciences for the Individually Designed Honors Program in Humanities.

The Graduate Program in Humanities is not accepting new students; it will provide courses and advising for students already enrolled. The University remains committed to broad-based graduate education in the humanities; the courses, colloquium, and symposium will continue to be offered, and a successor program is under discussion by the faculty of the Division of Literatures, Cultures, and Languages. For updates on this status, see the program web site: http://ish.stanford.edu/programs/graduate.

Courses for undergraduates and graduate students already enrolled in the program are listed under the subject code HUMNTIES on the *Stanford Bulletin's* ExploreCourses web site, as well as the program web site at http://ish.stanford.edu/courses.

DIVISION OF INTERNATIONAL, COMPARATIVE AND AREA STUDIES

Director: Andrew Walder
Advisory Committee: Shahzad Bashir (Religious Studies), Richard Roberts (History), Kenneth Schultz (Political Science), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology), Kären E. Wigen (History)
Directors' Committee: Keith Baker (History), Shazhad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), Robert Crews (History), Rodolfo Dirzo (Biology), Amir Eshel (German Studies), Charlotte Fonrobert (Religious Studies), Thomas Blom Hansen (Anthropology), Paul Harrison (Religious Studies), Abbas Milani (Hoover Institution), Richard Roberts (History), Kenneth Schultz (Political Science), Vered Shemtov (Language Center), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology), Kären E. Wigen (History)
Division Office: Encina Hall West, second floor
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu

The Division of International, Comparative and Area Studies (ICA) supports research and teaching in the cultures and societies of the world, and studies the problems facing developing societies as they seek to end their poverty and social and economic inequalities. ICA promotes new centers of teaching excellence in traditional areas of historical and cultural concerns, as well as promoting interdisciplinary activities related to developing new ideas for dealing with fundamental issues of justice, equality, and growth within nation states, cultures, and regions.

The Division of International, Comparative and Area Studies is comprised of research centers, degree granting programs, and religion and cultural centers: Center for African Studies*; Center for East Asian Studies*; The Europe Center; Center for Latin American Studies* ; Center for Russian, East European and Eurasian Studies*; Center for South Asia; Ford Dorsey Program in International Policy Studies*; France-Stanford Center for Interdisciplinary Studies; Hamid and Christina Moghadam Program in Iranian Studies; Mediterranean Studies Forum; Program in International Relations*; Robert H. N. Ho Family Foundation Center for Buddhist Studies at Stanford University; Sohaib and Sara Abbasi Program in Islamic Studies; and the Taube Center for Jewish Studies*.

Degree granting programs are denoted with an asterisk (*); the Taube Center for Jewish Studies oversees an Individually Designed Major.

CENTER FOR AFRICAN STUDIES

Director: Richard Roberts
Office: Encina Hall West, second floor
Web Site: http://africanstudies.stanford.edu

The Center for African Studies (CAS) is an interdisciplinary research program. CAS offers an undergraduate minor and certifi-

cate, and a Master of Arts (M.A.) degree. For further information, see the “African Studies” section of this bulletin.

CENTER FOR EAST ASIAN STUDIES

Director: Kären E. Wigen
Office: Encina Commons
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) seeks to increase interdisciplinary communication among faculty, students, and outside scholars whose research, teaching, or study focuses on East Asia. CEAS offers a master’s degree program. It sponsors programs that enhance public knowledge and access to the University’s East Asia resources.

For further information, see the “East Asian Studies” section of this bulletin.

THE EUROPE CENTER

Director: Amir Eshel
Office: Encina East 106
Web Site: http://europeanstudies.stanford.edu

The Europe Center is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security.

CENTER FOR LATIN AMERICAN STUDIES

Director: Rodolfo Dirzo
Office: Bolivar House
Web Site: http://las.stanford.edu

The Center for Latin American Studies at Stanford University (CLAS) offers academic programs for students, coordinates academic conferences and lectures, and fosters interdisciplinary research for students and faculty through fellowships and funding opportunities. The Center offers an undergraduate minor, an interdisciplinary honors program for undergraduates, and a master’s degree.

For further information, see the "Center for Latin American Studies" section of this bulletin.

CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Director: Robert Crews
Office: Encina Hall West, second floor
Web Site: http://creees.stanford.edu

The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master’s program in interdisciplinary area studies.

For further information, see the “Center for Russian, East European and Eurasian Studies” section of this bulletin.

CENTER FOR SOUTH ASIA

Director: Thomas Blom Hansen
Office: Encina Hall West, second floor
Web Site: http://southasia.stanford.edu

The Center for South Asia (CSA) serves to coordinate and develop Stanford’s resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

FORD DORSEY PROGRAM IN INTERNATIONAL POLICY STUDIES

Director: Kathryn Stoner-Weiss
Office: Encina Hall West, second floor
Web Site: http://ips.stanford.edu

The Ford Dorsey Program in International Policy Studies (IPS) is a two-year master’s program that seeks to train the next generation of policy analysts to solve key global problems.

For further information, see the "International Policy Studie" section of this bulletin.

FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES

Director: Keith Baker
Office: Building 260, room 105
Web Site: http://francestanford.stanford.edu

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The Center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

HAMID AND CHRISTINA MOGHADAM PROGRAM IN IRANIAN STUDIES

Director: Abbas Milani
Office: Encina Hall West, second floor
Web Site: http://iranian-studies.stanford.edu

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran’s past, present, and future. The program organizes lectures and student research conferences on Iran.

MEDITERRANEAN STUDIES FORUM

Director: Aron Rodrigue
Office: Encina Hall West, second floor
Web Site: http://mediterraneanstudies.stanford.edu

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of North Africa, the Levant, the Balkans, and Southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

PROGRAM IN INTERNATIONAL RELATIONS

Director: Kenneth Schultz
Office: Encina Hall West, second floor
Web Site: http://internationalrelations.stanford.edu

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the “International Relations” section of this bulletin.

ROBERT H. N. HO FAMILY FOUNDATION CENTER FOR BUDDHIST STUDIES AT STANFORD UNIVERSITY

Directors: Carl Bielefeldt, Paul Harrison
Office: Bulding 70, Room 71E
Web Site: http://hcbss.stanford.edu

The Robert H. N. Ho Family Foundation Center for Buddhist Studies at Stanford University (HCBSS) serves to coordinate, support, and develop the University’s resources for Buddhist Studies

in scholarly research, academic communication, teaching, and public outreach. The Center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The Center works closely with the Department of Religious Studies, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley.

SOHAIB AND SARA ABBASI PROGRAM IN ISLAMIC STUDIES

Director: Shazhad Bashir
Office: Encina Hall West, second floor
Web Site: http://islamicstudies.stanford.edu

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov
Office: Building 360, Room 362G
Web Site: http://jewishstudies.stanford.edu

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor and an interdisciplinary major coordinated by the Humanities and Sciences dean's office.

For further information, see the "Jewish Studies" section of this bulletin.

INTERNATIONAL POLICY STUDIES

Director: Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)
Executive Committee Co-chairs: Coit D. Blacker (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology)
Executive Committee: Larry Diamond (Hoover Institution), Nicholas C. Hope (Stanford Institute for Economic Policy Research), Jenny Martinez (Law), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Bruce Owen (Public Policy), Julie Parsonnet (Medicine), Frank Wolak (Economics)
Lecturers: Chonira Aturupane, Alexander Betts, Thomas Fingar, Erica Gould, Ward Hanson, Anja Manuel, Eric Morris, Joe Nation
Affiliated Faculty: Mike Armacost (Freeman Spogli Institute for International Studies), Jonathan Bendor (Business), Paul Brest (Law), Jeremy Bulow (Economics), Gordon Chang (History), John Cogan (Hoover Institution), Joshua Cohen (Political Science), Martha Crenshaw (Freeman Spogli Institute for International Studies), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Lawrence Goulder (Economics), Stephen H. Haber (Political Science), Deborah Hensler (Law), David J. Holloway (History, Political Science), Simon Jackman (Political Science), Seema Jayachandran (Economics), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Daniel P. Kessler (Business), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Claire Lim (Graduate School of Business), Susanna Loeb (Education), Michael McFaul (Political Science, on leave), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean Oi (Political Science), William Perry (Management Science and Engineering), Rob Reich (Political Science), Douglas Rivers (Political Science), Richard Roberts (History), Lee Ross (Psychology), Scott D. Sagan (Political Science), Stephen J. Stedman (Freeman Spogli Institute for International Studies),Peter Stone (Political Science), Jeff Strnad (Law), Michael Tomz (Political Science), Andrew Walder (Sociology), Allen Weiner (Law), Jeremy Weinstein (Political Science)
Program Office: Encina Hall West, Second Floor
Mail Code: 94305-6045
Phone: (650) 725-9155
Web Site: http://ips.stanford.edu

Courses offered by the Ford Dorsey Program in International Policy Studies are listed under the subject code IPS on the *Stanford Bulletin's* ExploreCourses web site.

The Ford Dorsey Program in International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues they will face in international business and public policy, and to develop the skills and knowledge to address those issues. The program allows students to specialize in: democracy, development, and the rule of law; energy, environment, and natural resources; global health; global justice; international negotiation and conflict management; international political economy; or international security and cooperation.

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

IPS is designed for students who have an undergraduate background in economics and political science. To enroll in the program, students must have completed prerequisite courses in calculus-based statistics, microeconomics, macroeconomics, international trade and international finance. Stanford courses satisfying these requirements are ECON 51, 52, 102A or POLISCI 150A, and ECON 165 and 166.

To apply or for information on graduate admission, see http://gradadmissions.stanford.edu.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including:

- a statement setting forth relevant personal, academic, and career plans and goals
- official transcripts
- three letters of recommendation
- Graduate Record Examination (GRE) scores
- a writing sample of at least eight double-spaced pages
- resume or curriculum vitae
- TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction.

Applicants are expected to have a B.A. or B.S. degree from an accredited school.

Applications for admission in Autumn Quarter must be filed with supporting credentials by January 11, 2011.

COTERMINAL PROGRAM

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected comple-

tion of their undergraduate degree. The coterminal application requires the following supporting materials:

- two letters of recommendation from University faculty
- a writing sample of at least eight double-spaced pages
- a statement of relevant personal, academic, and career plans and goals.

Applications must be filed together with supporting materials by January 11, 2011.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

JOINT DEGREE PROGRAM

Students may also choose to pursue a joint J.D./M.A. in IPS degree. The joint degree program supplements the strengths of the Law School with training through IPS. Prospective students interested in the joint J.D./M.A. in IPS program may apply concurrently to both the Stanford Law School and the IPS program. This means that two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to the IPS program.

Students already enrolled at Stanford Law School may apply to the joint J.D./M.A. in IPS program by no later than the end of the second year of Law School. The IPS program will make rolling admissions decisions based on the student's original application materials (GRE scores are not required in addition to LSAT scores in this case). Submission of the following is required for consideration:

- IPS Joint Degree Application Form (available from the IPS web site)
- Law School Joint Degree Petition (available from the Law School Registrar's Office)
- Graduate Program Authorization Petition (submitted via Axess)
- Enrollment Agreement for Students with Multiple Programs (available for download on the University Registrar's forms page)

For further information, see the "Joint Degree Programs" section of this bulletin and the University Registrar's site.

MASTER OF ARTS IN INTERNATIONAL POLICY STUDIES

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the courses listed below. These requirements entail a minimum of 24 units of policy skills courses, a 10-unit practicum or master's thesis, a 5-unit writing and rhetoric seminar, a 5-unit course in international economics, a 1-unit colloquium, a 3-unit course in international relations theory, and a total of six courses at a minimum of 24 units from the concentration curriculum. Only students with two or more years of relevant policy work experience may petition to write a master's thesis instead of taking the practicum. To obtain the M.A. degree in IPS, students must complete a minimum of 72 units over two years.

The IPS program has the following prerequisites:

- ECON 51
- ECON 52
- ECON 102A *or* POLISCI 150A
- ECON 165
- ECON 166

COURSE REQUIREMENTS

Core Courses—

1. IPS 300. Issues in International Policy Studies Colloquium (1 unit)
2. IPS 201. Managing Global Complexity (3 units)

Policy Skills Courses—

1. IPS 205A. Foundations of Statistical Inference (4 units) *and* IPS 205B. Econometrics (4 units)
   or POLISCI 350A. Political Methodology I (5 units) *and* POLISCI 350B. Political Methodology II (5 units).
2. IPS 206A. Politics and Collective Action (4 units)
   or IPS 208. Justice (4 units)
   or POLISCI 336. Global Justice (5 units)
3. IPS 221. International Organizations and Institutions (5 units)
   or POLISCI 317. International Organizations (5 units)
   or POLISCI 364. Theories of Political Institutions (4 units)
   or SOC 260. Formal Organizations (5 units)
   or SOC 268. Global Organizations: Managing Diversity (5 units)
4. IPS 207A. Judgment and Decision Making (4 units)
   or IPS 207B. Public Policy and Social Psychology: Implications and Applications (4 units)
5. Those concentrating in international political economy must choose one of the following:
   - IPS 204A. Microeconomics (4 units)
   - IPS 204B. Cost-Benefit Analysis and Evaluation (4 units)

   Those not concentrating in international political economy must choose one of the following:
   - IPS 204A. Microeconomics (4 units)
   - IPS 204B. Cost-Benefit Analysis and Evaluation (4 units); *must petition and have strong microeconomic background*
   - IPS 202 (5 units) or IPS 203 (5 units); take whichever course is not taken for the international economics requirement

Writing and Rhetoric Seminar—One of the following (5 units):

- IPS 210. The Politics of International Humanitarianism
- IPS 211. The Transition from War to Peace: Peacebuilding Strategies
- IPS 213. International Mediation and Civil Wars
- IPS 221A. Globalization and Its Discontents: An Introduction to International Political Economy
- IPS 314S. Decision Making in U.S. Foreign Policy

International Economics Seminar—One of the following (5 units):

- IPS 202. Topics in International Macroeconomics
- IPS 203. Issues in International Economics

Practicum or Thesis—One of the following (10 units):

- IPS 209. Practicum
- IPS 209A. Master's Thesis. The student must petition and receive program director approval to take this course.

Area of Concentration Curriculum—Students are required to choose one area of concentration from the list below and complete a total of six courses within the concentration at a minimum of 24 total units. Each area of concentration has a gateway course, which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved courses (see list below).

- Democracy, Development, and Rule of Law
  Gateway course: IPS 230. Democracy, Development, and Rule of Law (5 units)
- Energy, Environment, and Natural Resources
  Gateway course: CEE 207A. Energy Resources (4-5 units)
- Global Health
  Gateway course: MED 262. Economics of Health Improvement in Developing Countries (5 units)
- Global Justice
  Gateway course: POLISCI 336. Global Justice (5 units)
- International Negotiation and Conflict Management
  Gateway course: IPS 250. International Conflict: Management and Resolution (3 units)
- International Political Economy
  Gateway course: IPS 202. Topics in International Macroeconomics (5 units) and IPS 203. Issues in

International Economics (5 units); one course counts towards international economics requirement
- International Security and Cooperation
  Gateway course: IPS 241. International Security in a Changing World (5 units)

Language Requirement—Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation. International students who speak English as a second language already meet this requirement.

Grade Requirements—All courses to be counted toward the degree, except IPS 300, must be taken for a letter grade. Overall GPA of 3.0 must be maintained.

Additional Academic Requirements—

1. Students are not required to repeat a course that duplicates material they have already mastered. Students, may, by petition and approval, substitute a different course for a core requirement whose material would be duplicative. This flexibility does not reduce the unit requirements for the M.A. degree.
2. All graduate degree candidates must submit a Master's Degree Program Proposal to the International Policy Studies office by the end of Autumn Quarter; this document must be on file in order to apply to graduate.

Financial Aid—Limited fellowship support is available for graduate students entering the IPS program.

COGNATE COURSES

The courses listed below fulfill elective requirements within the various areas of concentration. Not all courses are applicable for every area of concentration. Additional relevant courses may be offered. For course descriptions, see ExploreCourses.

- ANTHRO 109/209. Archaeology: World Cultural Heritage
- ANTHRO 277. Environmental Change and Emerging Infectious Diseases (same as HUMBIO 114)
- ANTHRO 336. Anthropology of Rights
- ANTHRO 356. The Anthropology of Development
- BIO 180/280. Fundamentals of Sustainable Agriculture (same as EARTHSYS 280)
- BIO 247. Controlling Climate Change in the 21st Century (same as EARTHSYS 247, HUMBIO 116)
- BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care (same as MGTECON 332, HRP 392)
- CEE 242A. Creating Sustainable Development
- CEE 265A. Sustainable Water Resources Development
- CEE 265C. Water Resources Management
- CEE 265D. Water and Sanitation in Developing Countries
- CEE 275A. Law and Science of California Coastal Policy (same as EARTHSYS 275)
- COMM 336G. Democracy, Justice, and Deliberation
- COMM 338. Democratic Theory: Normative and Empirical Issues
- COMM 344. Democracy, Press, and Public Opinion
- ECON 106. World Food Economy
- ECON 127. Economics of Health Improvement in Developing Countries (same as MED 262)
- ECON 214. Development Economics I
- ECON 216. Development Economics II
- ECON 265. International Economics I
- ECON 266. International Economics II
- GES 253. Petroleum Geology and Exploration
- HISTORY 102. The History of the International System
- HISTORY 227/327. East European Women and War in the 20th Century
- HISTORY 257/347. The Politics and Ethics of Modern Science and Technology (same as STS 221)
- HISTORY 304G. War, Culture, and Society in the Modern Age
- HISTORY 326G. Civilians and War in Modern Europe

Web Site: http://internationalrelations.stanford.edu

Courses offered by the Program in International Relations are listed under the subject code INTNLREL on the *Stanford Bulletin's* ExploreCourses web site.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among world actors. Students are equipped with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue a study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. Students must spend at least one quarter overseas and show two-year proficiency in a foreign language.

International Relations offers an undergraduate Bachelor of Arts program, an honors program, and a minor in International Relations.

MISSION OF THE UNDERGRADUATE PROGRAM IN INTERNATIONAL RELATIONS

The undergraduate program in International Relations provides an interdisciplinary approach to the study of the changing political, economic, and cultural relations within the international system of the modern era. Students in the program explore how global, regional, and domestic factors influence relations among world actors. The program equips students with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue study in world politics, including courses in political science, economics, history, and language, focusing on issues such as international security, political economy, economic development, and democratization. Students must spend at least one quarter overseas. The major prepares students for careers in government and the corporate sector, and for admission into graduate programs in law, business, economics, and political science.

LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in International Relations. Students are expected to demonstrate:

1. understanding of core knowledge within International Relations.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively, communicating ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

COTERMINAL PROGRAMS IN RELATED FIELDS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies" section in this bulletin. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see http://studentaffairs.stanford.edu/registrar/publications#Coterm.

BACHELOR OF ARTS IN INTERNATIONAL RELATIONS

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

Requirements for the major (70 units) are as follows; IR core courses are listed in items 1-5:

1. POLISCI 1
2. POLISCI 110A *or* 110B *or* 110C *or* 110D *or* HISTORY 158
3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
4. Two additional upper-division courses with strong economic components from the IR approved course offerings lists
5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60
6. Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses

that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one writing intensive course designated as Writing in the Major (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of 'C' is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program; non-Stanford programs must be pre-approved by the IR program before the student enrolls in the program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:
1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student's functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Functional specializations are not declared on Axess.

The following courses are approved for each functional specialization. Updated lists are made available every quarter on the web and they are also available in the International Relations office.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 114D. Democracy, Development, and the Rule of Law
INTNLREL 116. Politics of Divided Korea
INTNLREL 120.Terrorism and Security in Israel
INTNLREL 125. Japanese Postwar Politics
INTNLREL 131. Globalization and Organizations
INTNREL 136R. Introduction to GLobal Justice
INTNLREL 140A. International Law and International Relations
INTNLREL 140B. Theories of International Law
INTNLREL 163. History and Geography of Contemporary Global Issues
INTNLREL 170. Energy and the Climate
COMM 177K. Specialized Writing and Reporting - Human RIghts Reporting
EASTASN 189K. Politics of Divided Korea
HISTORY 102. The History of the International System (WIM)
HISTORY 120C. 20th-Century Russian and Soviet History
HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008
HISTORY 125. 20th-Century Eastern Europe
HISTORY 137/337. The Holocaust
HISTORY 145B. Africa in the 20th Century
HISTORY 150C. The United States in the Twentieth Century
HISTORY 158. The United States Since 1945
HISTORY 181B. The Middle East in the 20th Century

INDEPENDENT STUDY/HONORS

INTNLREL 197. Directed Reading in International Relations—open only to declared International Relations majors.
INTNLREL 198. Senior Thesis—open only to declared International Relations majors with approved senior thesis proposals.
INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries
INTNLREL 200A. International Relations Honors Field Research
INTNLREL 200B. International Relations Honors Seminar

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen, by completing two years of language study or by passing a second-year, third-quarter proficiency exam.

Check the IR office for updated information about the area specialization requirements. Area specializations are not declared on Axess.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see http://cddrl.stanford.edu.

Students should submit their honors thesis proposal late in Winter Quarter of the junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

MINOR IN INTERNATIONAL RELATIONS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLISCI 1
2. Two of these five courses: POLISCI 110A,B,C,D, or HISTORY 158
3. Four courses from one of the three major tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe).

OVERSEAS STUDIES COURSES IN INTERNATIONAL RELATIONS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

Email: jewish.studies@stanford.edu
Web Site: http://jewishstudies.stanford.edu

The Taube Center for Jewish Studies investigates all aspects of Jewish culture in history, religion, literature, language and education from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, and the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity.

Graduate students enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS IN JEWISH STUDIES

The center does not offer an undergraduate program in Jewish Studies. However, the Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

INDIVIDUALLY DESIGNED MAJOR IN JEWISH STUDIES

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading.

Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student's primary adviser, and from one of the Directors of the Taube Center for Jewish Studies.

The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year.

Details about the written procedures and documents necessary for application for an individually designed major in Jewish Studies can be obtained at the Taube Center for Jewish Studies, Bldg. 360, Main Quad, (650) 725-2789. See also the "Individually Design Majors in Humanities and Sciences" section of this bulletin.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the individually designed major:

HISTORY AND SOCIETY:

Students must take one course in each of the three periods: biblical and ancient, medieval and modern, and contemporary	20 units

RELIGION:

Biblical, rabbinic, medieval, modern	20 units

LITERATURE:

Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish	15 units

HEBREW LANGUAGE (SECOND YEAR OR BEYOND):

Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level modern Hebrew may apply the 12 units required in this category to more work in another category, with the approval of their primary adviser	12 units

ANCILLARY COURSES:

Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity	8-10 units
Total number of units required	75-77 units

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in declaring an Individually Designed Major in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

COURSES

Students interested in pursuing an Individually Designed Major in Jewish Studies are advised to consult the following list of courses in preparing their program.

- JEWISHST 102/AMELANG 127. Land and Literature
- JEWISHST 101A/AMELANG 128A. Beginning Hebrew, First Quarter
- JEWISHST 101BAMELANG 128B. Beginning Hebrew, Second Quarter
- JEWISHST 101C/AMELANG 128C. Beginning Hebrew, Third Quarter

- JEWISHST 225,325/RELIGST 265,365. Research Methods and Resources in Jewish Studies
- JEWISHST 228,328/RELIGST 282,382. King Solomon and the Search for Wisdom

MINOR IN JEWISH STUDIES

The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter three quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Autumn quarter of the same year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, Religious Studies, or the Division of Literatures, Cultures, and Languages, and by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in the Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:

1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).

One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature). No course credited toward the Jewish Studies minor may be double counted toward major requirements.

Director: Elizabeth Bernhardt
Associate Director: Joan Molitoris
Assistant Director: Patricia de Castries

African and Middle Eastern Languages
Senior Lecturers: Khalil Barhoum (Coordinator, and Minor Adviser: Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature)
Lecturers: Salem Aweiss, Estee Greif, Jon Levitow, Catherine Mapunda (Fulbright Scholar), Khalid Obeid, Gallia Porat, Merchades Method Rutechura, Ramzi Salti, Galen Sibanda

Catalan Language
Lecturers: Joan Molitoris (Associate Director, Language Center, Coordinator), Robert Casas Roige

Chinese Language
Coordinator: Chao Fen Sun (Professor, Asian Languages and Cultures)
Lecturers: Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Huazhi Wang, Hong Zeng, Qiong Zhang, Youping Zhang, Xiaofang Zhou, Qi Zhu

English for Foreign Students
Director and Senior Lecturer: Philip Hubbard
Lecturers: Robyn Brinks Lockwood, Carole Mawson, Andrea Kevech, Andrew Oman, Kenneth Romeo, Constance Rylance, Seth Streichler

French Language
Lecturers: Jane Dozer-Rabedeau, Heather Howard (Coordinator), Miranda Kershaw, Marie Lasnier, Fanny-Elisabeth Rollet

German Language
Lecturer: Paul Nissler (Coordinator)
Senior Lecturers: William E. Petig, Kathryn Strachota

Italian Language
Lecturers: Marta Baldocchi, Anna Cellinese (Coordinator), Alessandra McCarty, Giovanni Tempesta

Japanese Language
Coordinator: Yoshiko Matsumoto (Associate Professor, Asian Languages and Cultures)
Senior Lecturer: Kazuko M. Busbin
Lecturers: Hisayo O. Lipton, Momoyo K. Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Momoe Saito Fu

Korean Language
Lecturers: Hee-Sun Kim (Coordinator), Sun Young Kim (Fulbright Scholar)

Portuguese Language
Senior Lecturer: Lyris Wiedemann (Coordinator)
Lecturer: Karen Sotelino

Slavic Language
Senior Lecturer: Rima Greenhill
Lecturer: Eugenia Khassina (Coordinator)

Spanish Language
Senior Lecturer: Irene Corso
Lecturers: Vivian Brates, Loreto Catoira, Citlalli del Carpio, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Nissler, Carimer Ortiz Cuevas, Veronika Reinhold, Kara Sanchez, Cintia Santana, Ana M. Sierra, María Cristina Urruela, Hae-Joon Won

Special Language Program
Lecturers: Sneha Desai, Sharlene Gotico (Fulbright Scholar), Cathy Haas, Eva Prionas (Coordinator, Modern Greek Language and Literature), Pooja Sancheti (Fulbright Scholar)

Tibetan Language Program
Lecturer and Coordinator: Robert W. Clark

Language Center Offices: Building 30
Mail Code: 94305-2015
Department Phone: (650) 725-9222
Email: patricia@stanford.edu
Web Site: http://language.stanford.edu

Courses offered by the Language Center are listed under the following subject codes on the *Stanford Bulletin's* ExploreCourses web site: AMELANG (African and Middle Eastern Languages and Literatures), CATLANG (Catalan Language), CHINLANG (Chinese Language), EFSLANG (English for Foreign Students), FRENLANG (French Language), GERLANG (German Language), ITALLANG (Italian Language), JAPANLNG (Japanese Language), KORLANG (Korean Language), PORTLANG (Portuguese Language), SLAVLANG (Slavic Language), SPANLANG (Spanish Language), SPECLANG (Special Language), and TIBETLNG (Tibetan Language).

The Stanford Language Center oversees all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

The African and Middle Eastern Languages and Literatures Program (AME) offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2010-11 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2011-12 academic year should be made by Spring Quarter of this year to the AME program office by email to khalil@stanford.edu. All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most three-unit language

courses are offered for a two-year, three quarter sequence: 'A' suffix courses are taught Autumn; 'B' suffix courses are taught Winter; 'C' suffix courses are taught Spring. Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for language testing or to request that a language be taught, and for further information on the program, see http://stanford.edu/dept/lc/MEL. Language courses may not be repeated for credit and must be taken in sequence.

PROFICIENCY IN FOREIGN LANGUAGE NOTATION

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript. For further information and details on applying for a Proficiency Notation, see http://language.stanford.edu.

In order for a student to have the proficiency notation appear on the official transcript, the student must:

1. Inform the Language Center at least two quarters prior to graduation that he/she is requesting such a notation.
2. Schedule an Oral Proficiency Interview (OPI) through the Language Center. Since this is a formal proficiency interview, at least two quarters of lead time are essential for scheduling this interview. The interview will be conducted by a certified OPI tester.
3. Upon completion of the oral component, schedule a Writing Proficiency Test (WPT) through the Language Center. As an official writing assessment, it must take place no later than one quarter prior to graduation and as soon as possible after the Oral Proficiency Interview. The WPT is administered on campus and rated by a certified WPT rater.
4. Receive an official rating of 'Advanced Low' on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of oral and writing proficiency, except in the non-cognate languages which require an 'Intermediate High' rating.

MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Middle Eastern and African languages, and to the cultures and civilizations of the Middle East and Africa. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director's discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Completion of six courses in either the Cultural Studies Track or the Language Studies Track.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of 'C' or better.
4. Courses may not overlap with those taken for a major course of study.
5. Relevant courses taken to fulfill a GER may count toward fulfilling both minor and GER requirements.
6. Students pursuing the Cultural Studies Track must complete the prerequisite of beginning level in the respective language, or demonstrate an equivalent competence.

Cultural Studies Track—Requirements are:

1. Completion of the language prerequisite at the beginning level, or a demonstrated equivalent competence.
2. In the case of Arabic, completion of six non-language courses, including three from the AME program.
3. In the case of Hebrew and African languages, completion of six non-language related courses. Consult minor adviser for course options.
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

Language Track—Requirements are:

1. Completion of prerequisite language study at the beginning level, or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level.
3. Completion of three related non-language courses, including one of the AMELANG 30-36 series in the case of Arabic. Consult the minor adviser for course options.

or

1. Completion of prerequisite language study at the advanced level in Arabic, Hebrew, or an African language, for the equivalent of three years of language study.
2. Completion of one African and Middle Eastern literature and culture course relevant to the language studied in the case of Arabic or Hebrew; or, in the case of African languages, completion of one non-language African Studies course relevant to the language studied. Consult the minor adviser (khalil@stanford.edu) for course options.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2010-11 are listed in the "Explore Courses" section of this Bulletin under the Special Languages (SPECLANG) Program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2011-12 academic year should be made by Spring Quarter of this year at the Special Language Program office (eprionas@stanford.edu).

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:

'A' suffix courses are typically taught Autumn.

'B' suffix courses are typically taught Winter.

'C' suffix courses are typically taught Spring.

Beginning, intermediate, and advanced courses are 3 units except modern Greek, Hindi, and ASL. In some circumstances, a beginning or intermediate course may be offered in alternate years.

For more information, see http://www.stanford.edu/dept/SLP. Language courses may not be repeated for credit, and must be taken in sequence.

FULFILLING THE LANGUAGE REQUIREMENT

Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills -- reading, listening comprehension, the use of grammatical structures, and oral and written communication -- through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES PROGRAM

The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2009-10 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2010-11 academic year should be made by Spring Quarter of this year at the AME program office, email: khalil@stanford.edu.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:

All 'A' suffix courses are taught Autumn.

All 'B' suffix courses are taught Winter.

All 'C' suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except Arabic, Hebrew, and Swahili. In some circumstances, a beginning or intermediate course may be offered in alternate years.

FULFILLING THE LANGUAGE REQUIREMENT

Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

OVERSEAS STUDIES COURSES IN THE LANGUAGE CENTER

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (http://explorecourses.stanford.edu) or the Bing Overseas Studies web site (http://bosp.stanford.edu). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

AUTUMN QUARTER

BEIJING

- OSPBEIJ 1C. First-Year Modern Chinese. 5 units, Yan Wang, Xiaoya Zhu
- OSPBEIJ 6C. Beginning Conversational Chinese. 2 units, Staff
- OSPBEIJ 21C. Second-Year Modern Chinese. 5 units, Li Chen
- OSPBEIJ 101C. Third-Year Modern Chinese. 5 units, Xiaoya Zhu
- OSPBEIJ 211C. Advanced Modern Chinese. 5 units, Yan Wang

BERLIN
- OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Splettstoesser, Jochen Wohlfeil
- OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
- OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
- OSPBER 101B. Advanced German. 5 units, Maria Biege

FLORENCE
- OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
- OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
- OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

MADRID
- OSPMADRD 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Camblor Portilla

MOSCOW
- OSPMOSC 10M. Intensive First-Year Russian. 9 units, Liza Kurganova
- OSPMOSC 51M. Second Year Russian I. 5 units, Tatyana Boldyreva
- OSPMOSC 111M. Third Year Russian I. 5 units, Galina Filatova
- OSPMOSC 177M. Fourth Year Russian I. 5 units, Staff

PARIS
- OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reychman
- OSPPARIS 23P. Intermediate French II. 4 units, Florence Mercier
- OSPPARIS 124P. Advanced French I. 4 units, Patrick Guedon

SANTIAGO
- OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
- OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
- OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

WINTER QUARTER

BERLIN
- OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Splettstoesser, Jochen Wohlfeil
- OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
- OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
- OSPBER 101B. Advanced German. 5 units, Maria Biege

FLORENCE
- OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
- OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
- OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

MADRID
- OSPMADRD 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Camblor Portilla

PARIS
- OSPPARIS 22P. Intermediate French I. 4 units, Florence Mercier
- OSPPARIS 23P. Intermediate French II. 4 units, Elizabeth Molkou
- OSPPARIS 125P. Advanced French II. 4 units, Marie-Christine Ricci

SANTIAGO
- OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
- OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
- OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Staff

SPRING QUARTER

BEIJING
- OSPBEIJ 3C. First-Year Modern Chinese. 5 units, Li Chen
- OSPBEIJ 23C. Second-Year Modern Chinese. 5 units, Xiaoya Zhu
- OSPBEIJ 103C. Third-Year Modern Chinese. 5 units, Yan Wang

BERLIN
- OSPBER 2Z. Accelerated German 2nd and 3rd Quarters. 8 units, Jochen Wohlfeil
- OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer
- OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel
- OSPBER 101B. Advanced German. 5 units, Maria Biege

FLORENCE
- OSPFLOR 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli
- OSPFLOR 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli
- OSPFLOR 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

KYOTO
- OSPKYOTO 9K. First Year Japanese Language, Culture, Communication B. 5 units, Staff
- OSPKYOTO 17K. Second Year Japanese Language, Culture, Communication B, First Quarter. 5 units, Staff
- OSPKYOTO 19K. Second Year Japanese Language, Culture, Communication B, Third Quarter. 5 units, Staff
- OSPKYOTO 129K. Third Year Japanese Language, Culture, Communication B. 5 units, Staff
- OSPKYOTO 211K. Advanced Japanese. 5 units, Staff

MADRID
- OSPMADRD 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Camblor Portilla
- OSPMADRD 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Camblor Portilla

PARIS
- OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reychman
- OSPPARIS 23P. Intermediate French II. 4 units, Sonia Gourevitch
- OSPPARIS 125P. Advanced French II. 4 units, Elizabeth Molkou

SANTIAGO

- OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
- OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
- OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

LATIN AMERICAN STUDIES

Director of the Center: Rodolfo Dirzo
Associate Director: Megan Gorman
Tinker Visiting Professors: Ricardo Mar, Paulo Mendes, José Santos, Paulo Suárez, Beatriz Urdinola
Affiliated Faculty and Staff:
Anthropology: Clifford Barnett (emeritus), George Collier (emeritus), Lisa Curran, Carolyn Duffey, William Durham, James Fox, Dominique Irvine, John Rick, Ian Robertson
Art and Art History: Barbaro Martinez-Ruiz
Biology: Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot
Carnegie Institution for Science: Gregory Asner
Comparative Literature: Roland Greene, Hans Ulrich Gumbrecht, José David Saldívar
Dance: Susan Cashion (emerita)
Earth Sciences, School of: Pamela Matson
Economics: Roger Noll (emeritus)
Education, School of: Martin Carnoy, Amado Padilla, Guadalupe Valdés
Engineering, School of: Jenna Davis, Adrian Lew, Bruce Lusignan (emeritus), Leonard Ortolano
English: Ramón Saldívar (also Comparative Literature)
Freeman Spogli Institute for International Studies: Rosamond Naylor, David Victor
History: Zephyr Frank, Stephen Haber, Tamar Herzog
Hoover Institute: William Ratliff
Human Biology: Anne Firth Murray
Iberian and Latin American Cultures: Héctor Hoyos, Marília Librandi Rocha, Michael Predmore, Joan Ramon Resina, Jorge Ruffinelli, Lisa Surwillo, Yvonne Yarbro-Bejarano
International Relations: Thomas O'Keefe
Language Center: José Carlos Fajardo, Caridad Kenna, Alice Miano, Otilia Perales, Ana Sierra, Lyris Wiedemann
Law, School of: Jonathan Greenberg, Thomas Heller (emeritus)
Linguistics: John Rickford
Medicine, School of: Victor Froelicher, Evaleen Jones, Samuel LeBaron, Grant Miller, Julie Parsonnet, Paul Wise
Political Science: Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Gary Segura, Michael Tomz
Religious Studies: Thomas Sheehan
Sociology: Alex Inkeles (emeritus), Tomás Jiménez, Michael Rosenfeld
Stanford University Libraries: Adán Griego, Sergio Stone, Robert Trujillo
Center Offices: Bolívar House, 582 Alvarado Row
Mail Code: 94305-8545
Department Phone: (650) 723-4444
Email: latinamerica@stanford.edu
Web Site: http://las.stanford.edu

Courses offered by the Interdisciplinary Program in Latin American Studies are listed under the subject code LATINAM on the *Stanford Bulletin's* ExploreCourses web site.

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford's various schools and departments. Stanford University Libraries' substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. Stanford offers three formal academic programs in Latin American Studies: an Undergraduate Minor, Interdisciplinary Honors certification, and a Master of Arts degree.

UNDERGRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

Currently, Stanford University does not offer an undergraduate major in Latin American Studies; however, undergraduates may pursue a minor or interdisciplinary honors certification in Latin American Studies. In addition, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as Anthropology, History, Political Science, Iberian and Latin American Cultures, or International Relations. Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

SUMMER INTERNSHIP GRANTS

Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. See http://las.stanford.edu.

GRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology, History, Political Science, or Iberian and Latin American Cultures. Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

Admission—The application deadline for the 2011-12 academic year is January 11, 2011. Applicants submit an online application, including a 500-word statement of purpose, resumé, 10-15 page double-spaced academic writing sample, and three letters of recommendation. In addition, all applicants must submit official transcripts and GRE general test scores. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on university graduate admissions and to access the online application, visit http://gradadmissions.stanford.edu.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master of Arts in Latin American Studies" section of this bulletin.

Financial Aid—The Center for Latin American Studies provides several graduate fellowships as well as limited research and course assistantship positions with the Tinker Visiting Professors each quarter.

MINOR IN LATIN AMERICAN STUDIES

The Minor in Latin American Studies is open to students in any major. Students who wish to complete the minor must declare online (through Axess) and submit a proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Requirements for the minor include:

1. Completion of 25 units as follows:
   a. A 5-unit course surveying Latin America: either HISTORY 170, Colonial Latin America, or OSPSANTG 68, The Emergence of Nations in Latin America (or an approved substitute).
   b. 20 additional units in a number of courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as (but not limited to) culture and identity, political economy, or sustainable development. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   c. At least 10 of the 25 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the minor in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
   a. Successful completion of seven quarters of college-level study of Spanish or Portuguese.
   b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or some other subject, as long as it fulfills the above criteria.
   c. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center for test dates and procedures.
3. Recommended: experience in Latin America such as study abroad, field research, or an internship.

Upon completion of all requirements, the CLAS subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student's transcript.

HONORS IN LATIN AMERICAN STUDIES

The Honors Program in Latin American Studies is open to undergraduate students in any major. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in an honors thesis completed under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), during their sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student's major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
   a. A 5-unit survey course, normally taken in the sophomore year: either HISTORY 170, Colonial Latin America, or OSPSANTG 68, The Emergence of Nations in Latin America (or an approved substitute).
   b. For breadth: two 4-5-unit courses at the 100-level or higher with a focus on Latin America. These courses are normally taken during the sophomore and junior years. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   c. For depth: one 4-5-unit course, approved by the honors adviser, at the 100-level or higher with a focus on Latin America that explores in depth an issue of particular interest to the student. See the "Latin American Studies Cognate Courses" section of this bulletin.
   d. LATINAM 198, Honors Thesis (1-10 units), under the supervision of the honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
   e. Honors Seminar in Latin American social history, taken in the senior year. Please consult the Center for Latin American Studies website for the 2010-11 honors seminar.
   f. Additional courses at the 100-level or higher focusing on Latin America to bring the total to 35 units. Up to 5 units may come from study of Spanish or Portuguese beyond the seventh quarter. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   g. Of the courses applied to 'b' and 'c' above, up to 10 units may be completed in Overseas Studies, and up to 5 units may be taken as directed individual study. For approved Overseas Studies courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
   h. All courses to be counted toward the honors certification must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the honors program in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
   a. Successful completion of seven quarters of college-level study of Spanish or Portuguese.
   b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or another subject, as long as it fulfills the above criteria.
3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center for test dates and procedures.
4. Submit an honors thesis that meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium in late May or early June.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN LATIN AMERICAN STUDIES

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application deadline for the 2011-12 academic year is January 11, 2011.

Coterminal applicants must submit:

- an application form
- a 500-word statement of purpose
- a resumé
- a 10-15 page double-spaced academic writing sample
- three letters of recommendation
- a Stanford transcript
- GRE general test scores

Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at a university third-year level or higher.
