POLISCI 157. Sampling and Surveys—(Graduate students register for 357.) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.

5 units, not given this year

ADVANCED UNDERGRADUATE SEMINARS

INTERNATIONAL RELATIONS

POLISCI 210R. International Conflict Resolutions and Management—(Graduate students register for 310R; same as IPS 250, LAW 656.) Interdisciplinary; approaches include social psychology, political science, game theory, and international law. Theoretical insights and practical experience in managing and resolving inter-group and international conflicts. Personal, strategic, and structural barriers that can impede the achievement of efficient solutions to conflicts. Focus is on themes that faculty affiliated with the Stanford Center of International Conflict and Negotiation (SCICN) have found useful in their research.

2-5 units, Win (Weiner, A; Holloway, D; Ross, L; Bland, B)

POLISCI 211. Political Economy of East Asia—Comparative and international political economy of E.and S.E. Asia. Industrial development and the Asian miracle, economic integration, regional cooperation, the Asian financial crisis, and contemporary challenges.

5 units, Spr (Lipscy, P)

POLISCI 212. Managing Global Complexity—(Same as IPS 201.) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.

3 units, Spr (Krasner, S; Stedman, S)

POLISCI 215. Explaining Ethnic Violence—What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER:DB-SocSci

5 units, Aut (Fearon, J)

POLISCI 216. Law, Economics, and Politics of International Trade—(Same as LAW 306.) Legal architecture of the WTO system; questions about its design and wisdom. Economics and politics of international cooperation on trade; the WTO as an institution and its obligations. Topics may include: the choice between regional and global approaches to trade cooperation; interface between international trade obligations and domestic regulation of health, safety and the environment; regulation of subsidies; dispute settlement system; and differential treatment of developing countries. Recommended: ECON 51 or POLISCI 110C or X.

3-5 units, Win (Sykes, A; Goldstein, J)

POLISCI 217. International Organizations—(Graduate students register for 317.) The role of international organizations in interstate cooperation. Theoretical approaches and applications. The UN, International Monetary Fund, World Bank, World Trade Organization, and regional and supranational organizations.

5 units, Spr (Lipscy, P)

POLISCI 218. U.S. Relations in Iran—The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci

5 units, Aut (Milani, A)

POLISCI 219. Directed Reading and Research in International Relations—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

AMERICAN POLITICS

POLISCI 221. Tolerance and Democracy—The value of tolerance and its implications for the principles and practices of democracy. Tolerance as understood by political philosophers and citizens. Readings include: John Stuart Mill's *On Liberty*, Isaiah Berlin's *Two Concepts of Liberty*, and modern studies of public opinion. Topics include: ideas and liberty; value pluralism; the interplay of authority and obedience; the role of political elites and mass publics in democratic societies; multiculturalism. Principal forms of value conflict in contemporary liberal democracies.

5 units, Spr (Sniderman, P)

POLISCI 221E. Seminar on Race in Institutional Contexts—The extent to which the representation of Black Americans in higher education, politics, and social discourse is reflective of a more fair, just, and open society. Emphasis is on the 2008 presidential election cycle and impacts on public policy as related to the role of courts. Sources include scholarly research, reports, and data from governmental and nongovernmental agencies, the media, and participant observation. Limited enrollment. Prerequisite: junior standing.

5 units, Spr (Barker, L)

POLISCI 221F. Race and American Politics—How the issue of race has helped define the modern era of American politics. Major theories of political cleavage over public policies dealing with race.
5 units, Spr (Sniderman, P)

POLISCI 222R. Tolerance and Prejudice—Focus is on the contemporary strain in U.S. and W. European liberal democratic politics over accommodation of racial, ethnic, and religious diversity and the major threads of current political discourse including pluralism, diversity, prejudice, multiculturalism, and tolerance. GER:DB-SocSci
5 units, Win (Sniderman, P; Callan, E)

POLISCI 223D. Term Limits and American Democracy—Why voters place constitutional and statutory limits on the number of terms elected officials can serve in an office. Effects of term limits on elections and policy making in the U.S. Presidential, gubernatorial, and state legislator term limits, the congressional term limits movement, and the success of the movement in the American West.
5 units, Win (Frisby, T)

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World—How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America's proper role in the world? GER:DB-SocSci
5 units, Aut (Joffe, J)

POLISCI 224R. Democratic Citizenship: Can Ordinary Citizens Reason about Politics?—The tradition of skepticism about whether ordinary citizens can discharge the responsibilities of democratic citizenship. How this skepticism has been strengthened by recent research on public opinion and electoral behavior. Sources include the interplay of empirical and normative democratic theory. GER:DB-SocSci
5 units, not given this year

POLISCI 227R. Polarized Politics and Special Interest Groups—The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci
5 units, not given this year

POLISCI 229. Directed Reading and Research in American Politics—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 231S. Contemporary Theories of Justice—Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. GER:DB-SocSci, EC-EthicReas
5 units, not given this year

POLISCI 232. Civil Society and the Nonprofit Sector—(Same as URBANST 121.) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.
2-4 units, not given this year

POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector—The historical development and modern structure of civil society emphasizing philanthropy and the nonprofit sector. What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? How do nongovernmental organizations operate domestically and globally? Readings in political philosophy, political sociology, and public policy. WIM
5 units, Spr (Reich, R; Sievers, B)

POLISCI 237. Models of Democracy—(Graduate students register for 337; same as CLASSHIS 137/237, COMM 212/312.) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.
3-5 units, Win (Fishkin, J; Ober, J)

POLISCI 239. Directed Reading and Research in Political Theory—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 242S. Politics of Welfare State Expansion and Reform—Major theories explaining the development of the welfare state and its impact on the organization of the political economy. The relative importance of institutional variables, social cleavages, partisanship, and ideology, and the role of economic openness in explaining cross-national differences in social policy. Recent politics of social policy adjustment, and existing differences among welfare states facing unfavorable economic and demographic developments and political pressures toward welfare state retrenchment.
5 units, not given this year

POLISCI 243R. Research Seminar in Democratization and Human Rights—Goal is to produce a minimum 30-page paper based on field research abroad. Students prepare research problem statement, meet individually with the professor, and circulate drafts for class comment. Graduate students should register for directed reading under the professor's name.
5 units, Aut (Karl, T)

POLISCI 244R. Political Economy of Disease: AIDS in Historical Perspective—Demographic, economic, cultural, and political changes in the wake of AIDS. The social dimensions of infectious diseases and epidemics; the impact of epidemics on political and economic institutions; and the political economy of responses to the AIDS crisis. Students conduct original research on causes and/or consequences of AIDS or AIDS-related policies. GER:DB-SocSci
5 units, not given this year

POLISCI 245R. Politics in Modern Iran—Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Milani, A)

POLISCI 245T. Dictatorship and Democracy in the Middle East—Autocratic stability in the Middle East. Why are there no democracies in the Middle East except for Turkey and Israel? Sources include culture, religion, institutions, geopolitics, and resources. Varieties of authoritarianism and democracy. Conditions under which regimes might change.
5 units, not given this year

POLISCI 246T. Taxation Data and Institutions—Research seminar. How to specify hypotheses, draw logical inferences from data, and build data sets. Focus is on the use of government revenue and tax data. Students build data sets from primary sources, standardize the data according to IMF standards, and analyze it to test hypotheses drawn from the political science literature on rentier states.
2-5 units, not given this year

POLISCI 247R. Politics and Economics in Democracies—Comparative political economy. Why do some countries have larger welfare states than others? Why do some countries provide collective goods more effectively than others? WIM

5 units, Spr (Rodden, J)

POLISCI 248. Mexican Politics—Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime's incentives to redress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypothesis testing with empirical data. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Díaz-Cayeros, A)

POLISCI 248S. Latin American Politics—Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic polices. The nature of this dual transformation. GER:DB-SocSci

5 units, Win (Magaloni, B)

POLISCI 249. Directed Reading and Research in Comparative Politics—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

RESEARCH

POLISCI 299A,B,C. Senior Project—Students conduct independent research work towards a senior honors thesis. See "Honors Program" above.

1-5 units, Aut, Win, Spr (Staff)

POLISCI 299Q. Junior Research Seminar—Required of students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.

2 units, Aut, Win, Spr (Rutten, A)

POLISCI 299R. Senior Research Seminar—Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design. WIM

3 units, Aut (Rutten, A)

POLISCI 299S. Senior Honors Tutorial—Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.

2 units, Win (Rutten, A)

ADVANCED UNDERGRADUATE/GRADUATE

INTERNATIONAL RELATIONS

POLISCI 310A. International Relations Theory, Part I—First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.

5 units, Aut (Schultz, K)

POLISCI 310B. International Relations Theory, Part II—Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.

5 units, Win (Goldstein, J)

POLISCI 310C. Research in International Relations—Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.

5 units, Spr (Tomz, M)

POLISCI 310R. International Conflict Resolutions and Management—(For graduate students; see 210R; same as IPS 250, LAW 656.)

2-5 units, Win (Weiner, A; Holloway, D; Ross, L; Bland, B)

POLISCI 311. Contemporary Issues in Peace Studies—(Same as PSYCH 185/285.) Interdisciplinary. The challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor.

3 units, not given this year

POLISCI 311A,B,C. Workshop in International Relations—For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-5 units, **A:** *Aut,* **B:** *Win (Schultz, K; Sagan, S),* **C:** *not given this year*

POLISCI 313. Ideas and International Security—The role of ideas in international relations and U.S. national security. Constructivist theories of international relations, and applications to real world security issues. The formation and influence of identities and norms. How everyday discourse gives meaning to concepts such as weapons and justice. Applied topics include winning in war, immigration as a security issue, norms and legitimacy in warfare, the use and non-use of weapons of mass destruction, and the influence of transnational social networks on states. Limited enrollment.

5 units, Aut (Atkinson, C)

POLISCI 314D. Democracy, Development, and the Rule of Law—(For graduate students; see 114D; same as IPS 230, INTNLREL 114D.)

5 units, Aut (Stoner-Weiss, K; McFaul, M)

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

POLISCI 316. International History and International Relations Theory—(Same as HISTORY 202/306E.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.

5 units, not given this year

POLISCI 317. International Organizations—(For graduate students; see 217.)

3-5 units, Spr (Lipscy, P)

POLISCI 318R. State and Nation Building in Central Asia—Issues of identity, development, and security consequent upon the dissolution of the Soviet Union and the emergence of five independent states in Central Asia and three new states in the Southern Caucasus. The impact of 9/11, spread of radical Islamist movements in the region, and its growing role as a transit route for drugs, weapons, and possibly nuclear materials. The impact of the Soviet legacy, the nature of political and economic transformations, relations with neighboring countries, particularly Russia, Iran, Turkey, and China, and security challenges. Options facing American policy makers managing American involvement.

5 units, Spr (Lapidus, G)

POLISCI 318S. State Building—Past and present efforts by external actors to influence domestic authority structures. Topics may include: colonialism; protection of minority rights in the 19th and first half of the 20th century; U.S. intervention in the Caribbean and Central America; U.S. and Soviet intervention in Europe after WW II; Afghanistan; and Iraq. For Ph.D. students; others with consent of instructor.

5 units, Spr (Krasner, S)

POLISCI 319. Directed Reading in International Relations—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

AMERICAN POLITICS

POLISCI 321. Creating the American Republic—(Same as HISTORY 251/352, LAW 246.) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.

5 units, Win (Rakove, J)

POLISCI 322. Campaign Finance and Elections—The strategies and behavior of special interest groups, parties, candidates, and voters in the U.S. Emphasis is on statistical models and empirical tests of formal models. Prerequisite: 350B; 351 sequence or 352; or equivalents.

5 units, not given this year

POLISCI 323R. The Press and the Political Process—(Same as COMM 160/260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, Win (Iyengar, S)

POLISCI 323S. Analysis of Presidential Campaigns—(Same as COMM 162/262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged?

4-5 units, Spr (Iyengar, S)

POLISCI 324. Graduate Seminar in Political Psychology—(Same as COMM 308.) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.

1-3 units, Aut, Win, Spr (Krosnick, J)

POLISCI 329. Directed Reading and Research in American Politics—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 330A. History of Political Thought I—(For graduate students; see 130A; same as CLASSHIS 133/333.)

5 units, not given this year

POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(For graduate students; see 130B.)

5 units, not given this year

POLISCI 330C. History of Political Thought III: Freedom, Reason, and Power—(For graduate students; see 130C.)

5 units, not given this year

POLISCI 331S. Politics and Collective Action—(Same as IPS 206A, PUBLPOL 204A.) How public policies are formulated and implemented; preference formation. The role of electoral politics, nongovernmental organizations, ideologies, and social protests. The theory of collective action. Principal agent relationships. How elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, trade, and social welfare policy, given their goals and available tactics. How to evaluate policies and policy making processes.

4 units, Win (Satz, D)

POLISCI 332. Graduate Seminar: John Rawls's Political Philosophy—(Same as PHIL 372D.) Leading ideas in *A Theory of Justice*, *Political Liberalism*, and *The Law of Peoples*.

5 units, Win (Cohen, J)

POLISCI 332R,S. Greek Political Economy—(Same as CLASSHIS 250A,B.) Two-part course. Did large-scale kingdoms radically change the Greek world after Alexander; or had new conditions already emerged from the Peloponnesian War? Continuities and discontinuities across the classical/hellenistic divide. Focus is on states and economies in the 4th and 3rd centuries B.C.E. Sources include primary sources and recent scholarship on Greek economic thought and practices with reference to city states (Athens, Rhodes), federations (Achaean, Aetolian), and empires (Ptolemaic, Seleukid). S: Emphasis on presentation of research by faculty and students.

4-5 units, **R:** *Win,* **S:** *Spr (Manning, J; Ober, J)*

POLISCI 333. Topics in Democratic Theory—(Same as PHIL 377.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.

3-5 units, not given this year

POLISCI 336. Introduction to Global Justice—(For graduate students; see 136R; same as INTNLREL 136R.)

5 units, Spr (Pasternak, A; de Bres, H)

POLISCI 337. Models of Democracy—(For graduate students; see 237; same as CLASSHIS 137/237, COMM 212/312.)

3-5 units, Win (Fishkin, J; Ober, J)

POLISCI 339. Directed Reading and Research in Political Theory—May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 340R. Political Economics—How governments collect revenue, allocate spending, and obtain credit, as determined by variations in institutional and political conditions. The emphasis in a democracy on the provision of public goods and services and representative accountability as against the emphasis in less democratized settings on the extractive capacity of the state, the temporal horizons of rulers, and the purchase of political support with money.

5 units, not given this year

POLISCI 340S. Political Economy of Post-Communism—The sources of the collapse of the communist states in E. Europe and the former Soviet Union. The relationship between political reform and economic change, emphasizing democracy versus dictatorship, liberalization, stabilization and privatization, and the role of external actors in internal change in the region. Models and historical analogs for analyzing the emergence of post-communist politics.

5 units, Spr (McFaul, M)

POLISCI 341T. Comparative Democratization and Regime Change—Issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.

5 units, not given this year

POLISCI 343R. African Civil Wars in Comparative Perspectives: A Research Seminar—Taught jointly with Columbia University via videoconferencing. Topics include causes of civil war, patterns of recruitment and participation, organization of rebel groups, strategies of warring factions, bargaining in the context of peace processes, and civil war termination. Required research paper using original datasets from instructors. Prerequisites: econometric modeling and graduate course work in comparative politics, international relations, and statistics.

5 units, not given this year

POLISCI 344. Politics and Geography—The role of geography in topics in political economy, including development, political representation, voting, redistribution, regional autonomy movements, fiscal competition, and federalism.
3-5 units, Win (Rodden, J)

POLISCI 344U. Political Culture—An approach to culture emphasizing equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions.
5 units, Spr (Laitin, D)

POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern—(Same as HISTORY 378A.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.
5 units, Aut (Haber, S)

POLISCI 347T. Democracy and Dictatorship—Autocracy as the most common form of political regime in the developing world. How autocracies behave; their institutional diversity. Differences among dictatorships in regard to stability, propensities to end in violent conflict, economic development, and levels of repression.
3-5 units, Spr (Magaloni, B)

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform—(For graduate students; see 148.)
5 units, Spr (Oi, J)

POLISCI 348R. Workshop: China Social Science—(Same as SOC 368.) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Walder, A; Zhou, X; Oi, J)

POLISCI 348S. Contemporary Chinese Foreign Relations—Competing approaches to PRC foreign policy including Beijing's evolving goals and policies, the institutions and instruments of PRC foreign policy, and the processes of decision making. Application of these perspectives and methods to a research paper.
5 units, Spr (Miller, A)

POLISCI 349. Directed Reading and Research in Comparative Politics—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL METHODOLOGY

POLISCI 350A,B,C. Political Methodology—(For graduate students; see 150A,B,C.)
A: *5 units, Aut (Rivers, D)*
B: *5 units, Win (Jackman, S)*
C: *3-5 units, Spr (Jackman, S)*

POLISCI 351A. Foundations of Political Economy—(Same as POLECON 680.) Emphasis is on formal models of collective choice, public institutions, and political competition. Topics include interest group politics, bureaucratic behavior, electoral competition, and political decentralization.
4 units, Aut (Hatfield, J)

POLISCI 351B. Economic Analysis of Political Institutions—(Same as POLECON 681.) Applying techniques such as information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations of microeconomic analysis and game theory to political behavior and institutions. Agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.
4 units, Win (Shotts, K)

POLISCI 351C. Testing Models of Governmental Decision Making—(Same as POLECON 682.) Applications of formal models to decision making in the U.S. national government, emphasizing the legislative branch. Topics include strategies of committees, roll call voting, the budget process, policy formation, effects of special rules, congressional/presidential relations, and congressional/agency relations.
4 units, Spr (Krehbiel, K)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science—(For graduate students; see 152.)
3-5 units, Win (Fearon, J)

POLISCI 353A. Workshop in Statistical Modeling—Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.
1-5 units, not given this year

POLISCI 353B. Workshop in Statistical Modeling—Continuation of 353A. Prerequisite: 353A.
1-5 units, not given this year

POLISCI 353C. Workshop in Statistical Modeling—Continuation of 353A. May be repeated for credit. Prerequisite: 353A.
1-5 units, not given this year

POLISCI 354F. Applied Bayesian Analysis—(Same as ANTHSCI 254.) Bayesian modeling in the social sciences emphasizing applications in political science, anthropological science, sociology, and education testing. Topics include: Bayesian computation via Markov chain Monte Carlo; Bayesian hierarchical modeling; Bayesian models for latent variables and latent states (measurement modeling); dynamic models; and Bayesian analysis of spatial models. Implementation of Bayesian approaches (priors, efficient sampling from posterior densities), data analysis, and model comparisons. Final project. Prerequisites: exposure to statistical modeling such as 200-level STATS or POLISCI 150/350B,C, or ANTHSCI 292.
3-5 units, Spr (Jones, J; Jackman, S)

POLISCI 355. Advanced Topics in Research Methods—Applications to American and comparative politics and international relations.
1-5 units, not given this year

POLISCI 357. Sampling and Surveys—(For graduate students; see 157.)
5 units, not given this year

POLITICAL INSTITUTIONS

POLISCI 362. New Economics of Organization—Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.
5 units, Spr (Weingast, B)

POLISCI 364. Politics and Organization—(Same as POLECON 664.) Emphasis is on political institutions and formal organizations, and the norms, expectations, and routines characteristic of informal political structure.
4 units, Win (Bendor, J)

POLISCI 365. Organizational Decision Making—Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.
5 units, not given this year

POLISCI 369. Directed Reading and Research in Political Organizations—Advanced individual study in public administration.
1-10 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

POLISCI 400. Dissertation
1-10 units, Aut, Win, Spr, Sum (Staff)

POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop—(Same as COMM 310.) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See http://mapss.stanford.edu. May be repeated for credit.
1 unit, Aut, Win, Spr (Krosnick, J)

POLISCI 403. International Conflict Resolution Colloquium—(Same as LAW 611, PSYCH 283.) Interdisciplinary. Theoretical insights and practical experience in managing and resolving inter-group and international conflicts. Personal, strategic, and structural barriers that can impede the achievement of efficient solutions to conflicts. Sources include social psychology, political science, game theory, and international law. Themes derived from faculty affiliation and research with the Stanford Center of International Conflict and Negotiation (SCICN).
2-5 units, Win (Weiner, A; Holloway D; Ross, L)

POLISCI 411A,B,C. Research Seminar in International Security and Social Science—Advanced graduate students, faculty, and visitors present current research on contemporary problems in international security.
1 unit, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Eden, L; Sagan, S)*

POLISCI 420A. Approaches to the Study of American Politics—Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.
5 units, Aut (Weingast, B)

POLISCI 420B. Topics in American Political Behavior—For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.
5 units, Win (Sniderman, P)

POLISCI 420C. American Political Institutions—Field seminar. Major theoretical perspectives, controversies, and literature on the substance of American politics, including Congress, the Presidency, federalism, bureaucracy, and the courts. Preparation for performing publishable research. Prerequisites: 420A,B.
5 units, Spr (Ferejohn, J)

POLISCI 422. Campaigns, Elections, and Public Opinion—Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.
2-5 units, Aut, Win, Spr (Sniderman, P; Fiorina, M)

POLISCI 424. Introduction to Political Psychology—Current issues in public opinion and political psychology. The design and analysis of experiments embedded in survey research. Focus is on reviewing the research literature and analyzing relevant data sets.
5 units, not given this year

POLISCI 431. Collective Action in Democratic Athens—(Same as CLASSHIS 431.) How can a collectivity reap the social benefits of cooperation in the face of the tendency of self-seeking individuals to defect? The problem is pressing in democracies, which require cooperation by diverse persons, and in competitive environments such as the classical Greek city states. Focus is on the organizational design of classical Athens as a state; how political institutions organized useful social and technical knowledge.
5 units, not given this year

POLISCI 432. Graduate Seminar: Global Justice—(Same as PHIL 372C.) The applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.
5 units, not given this year

POLISCI 434. Democracy and the Constitution—(Same as PHIL 374C.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter.
5 units, not given this year

POLISCI 435. Topics in the Philosophy of Social Science—Topics relevant to present-day political science practice including: the foundation of probability theory; theories of scientific progress; the scope and limits of rational choice theory; and interpretive social science.
5 units, not given this year

POLISCI 436R. Luck, Law, and Morality—(Same as LAW 431.) The role of luck in moral and political theory and the law. Possible topics include: luck in legal liability and punishment (strict liability, attempts, risk regulation versus harm regulation); the possibility that rightness of conduct or worth of character might depend on luck; whether the point of egalitarianism is to correct for the impact of luck on fate; and whether there is anything left to the person after the impact of luck on life. Readings include Rawls, Williams, Nussbaum, Dworkin, Roemer, Cohen, Nagel, Hart, and Waldron. Prerequisite: graduate standing.
3 units, Win (Cohen, J; Fried, B)

POLISCI 440A. Theories in Comparative Politics—Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.
5 units, Win (Laitin, D; Blaydes, L)

POLISCI 440B. Political Economy of Development—(Same as HISTORY 378E.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.
5 units, Aut (Haber, S)

POLISCI 440C. Methods in Comparative Politics—Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.
5 units, Spr (Laitin, D; Jusko, K)

POLISCI 440D. Workshop in Comparative Politics—Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.
1-5 units, Aut, Win, Spr (Díaz-Cayeros, A; Magaloni, B)

POLISCI 440E. Political Economy of Advanced Industrialized Democracies—Theories of comparative political economy organized as a progression from micro- to macro-level explanations. Sources of political cleavages over economic policies and the formation of political coalitions. Theories positing that differences in the organization of interest groups lead to systematic differences in economic outcomes. The economic and political consequences of differences in partisanship, political institutions, regime types, and the level of economic openness.
5 units, not given this year

POLISCI 441. Politics of Development—Theoretical understanding of how political processes and institutions are reflected in poverty and inequality; the creation of land, labor, and credit markets; and the configuration of fiscal, monetary, and trade policies. The politics of developing countries with emphasis on contrasts between Latin America and Africa.
5 units, Win (Díaz-Cayeros, A)

POLISCI 442. Qualitative and Field Methods—Qualitative methods for data gathering and analysis in political science. Theoretical literature on research design; challenges associated with analysis; techniques for fieldwork. Topics include case selection, levels of analysis, process tracing, ethical concerns in the field, participant observation, interviewing, archival research, survey design, and field experiments. Prerequisites: 440A,B,C.
5 units, not given this year

POLISCI 443S. Political Economy of Reform in China—Content, process, and problems of China's post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in E. Europe and the former Soviet Union.
5 units, Aut (Oi, J)

POLISCI 444. Comparative Political Economy: Advanced Industrial Societies—Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.
3-5 units, Spr (Rodden, J)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

EDUC 260X. Understanding Statistical Models and their Social Science Applications—(Same as HRP 239, STATS 209.)
3 units, Win (Rogosa, D)

FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies
3-5 units, Win (Dupuy, J)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Win (Sommer, M; Wigen, K)

HISTORY 150A. Colonial and Revolutionary America
5 units, Aut (Rakove, J)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present
4-5 units, Win (Baker, K; Sheehan, J)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy
3 units, Spr (Abrams, W)

HUMBIO 172A. Children, Youth, and the Law
5 units, alternate years, not given this year

HUMBIO 172B. Children, Youth, and the Law
5 units, Win (Abrams, W), alternate years, not given next year

INTNLREL 120. The Organization and Behavior of Democracies
5 units, Aut (Mcelwain, K)

INTNLREL 125. Japanese Postwar Politics
5 units, Win (Mcelwain, K)

INTNLREL 133. Introduction to Comparative and International Political Economy
5 units, Spr (Mcelwain, K)

INTNLREL 140B. Theories of International Law
5 units, Win (Steinberg, R)

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

PUBLPOL 102. Organizations and Public Policy
5 units, Aut (Hannan, M)

PUBLPOL 183. Philanthropy and Social Innovation
5 units, Spr (Arrillaga, L)

PUBLPOL 204B. Organizations—(Same as IPS 206B.)
4 units, Spr (Stedman, S; Satz, D)

SOC 117A/217A. China Under Mao
5 units, Aut (Walder, A)

SOC 167A/267A. Asia-Pacific Transformation
5 units, Win (Shin, G)

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

OSPBEIJ 26. Corporate Governance and the Privatization of Chinese Enterprises
5 units, Spr (Klausner, M)

OSPBEIJ 66. Essentials of China's Criminal Justice System
5 units, Aut, Spr (Wang, S)

BERLIN

OSPBER 15. Shifting Alliances? The European Union and the U.S.
4-5 units, Win (Brückner, U)

OSPBER 115X. The German Economy: Past and Present
4-5 units, Aut (Klein, I)

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU
4-5 units, Aut (Brückner, U)

FLORENCE

OSPFLOR 19. Political Institutions and the Language of Politics: A Comparative Study of Italy and the U.S.
4 units, Spr (Pistelli, L)

OSPFLOR 39. Envisioning Rights: Europe and America
5 units, Win (Karl, T)

OSPFLOR 77. Italian Politics Between Europe and the Mediterranean
5 units, Win (Morel, L)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union
5 units, Aut (Morlino, L)

OSPFLOR 97. Current Issues in Human Rights and International Justice
4 units, Spr (Vierucci, L)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society
4 units, Aut (Mammarella, G)

KYOTO

OSPKYOTO 24. Japan in Contemporary International Affairs
5 units, Spr (MacDougall, T)

OSPKYOTO 215X. The Political Economy of Japan
4-5 units, Spr (Hayashi, T)

MOSCOW

OSPMOSC 20. The Soviet Union in World War II
5 units, Aut (Holloway, D)

OSPMOSC 22. Russia and the World
3 units, Aut (Holloway, D)

OSPMOSC 61. Problems and Prospects of Post-Soviet Eurasia
5 units, Aut (Trenin, D)

OXFORD

OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
5 units, Win (McMahon, R)

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective
4-5 units, Aut (McMahon, R)

OSPOXFRD 31. The European Union: Politics and Policy Making
5 units, Aut (Hobolt, S)

OSPOXFRD 35. Modern UK and European Government and Politics
4-5 units, Spr (Cappocia, G)

OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970
5 units, Spr (Jackson, A)

PARIS

OSPPARIS 20. Reforming Europe: The Challenges Ahead
4-5 units, Win (Kahn, S)

OSPPARIS 34. Emerging European Constitutionalism: The Role of Constitutional Courts in Europe since WW II
3 units, Win (Ferejohn, J)

OSPPARIS 35. Political Thought of the French and American Revolutions
5 units, Win (Ferejohn, J)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France
4-5 units, Aut (Mayer, N; Muxel, A)

SANTIAGO

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
5 units, Spr (Correa, G)

OSPSANTG 129X. Latin America in the International System
4-5 units, Win (Fuentes, C)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
5 units, Aut (Micco, S)

MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus Feldman (Biological Sciences), William H. Durham (Anthropology), Paul R. Ehrlich (Biological Sciences), Lawrence H. Goulder (Economics and Freeman Spogli Institute for International Studies), Li Shuzhuo (Xi'an Jiaotong University, China), Shripad Tuljapurkar (Biological Sciences)

Institute Office: 371 Serra Mall (Gilbert 116)
Mail Code: 94305-5020
Phone: (650) 723-7518
Email: morrisoninstitute@stanford.edu
Web Site: http://www.stanford.edu/group/morrinst/

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

COURSES

Many departments offer courses focusing on issues related to the study of populations and resource use. The following course is sponsored by the Morrison Institute.

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.
1 unit, Win (Feldman, M)

PSYCHOLOGY

Emeriti: (Professors) Gordon H. Bower, John H. Flavell, Albert H. Hastorf, Eleanor E. Maccoby, David L. Rosenhan, David E. Rumelhart, Roger N. Shepard, Carl Thoresen, Barbara Tversky, Robert B. Zajonc, Philip G. Zimbardo; (*Senior Lecturer*) Lyn K. Carlsmith

Chair: Brian Wandell

Professors: Albert Bandura, Laura L. Carstensen, Herbert H. Clark, Carol Dweck, Ian H. Gotlib, Leonard M. Horowitz, John D. Krumboltz, Mark R. Lepper (on leave Autumn), Ellen M. Markman (on leave Autumn, Spring), Hazel R. Markus, James L. McClelland, Dale Miller, Lee D. Ross, Claude M. Steele, Ewart A. C. Thomas (on leave Winter, Spring), Brian Wandell, Jeffrey J. Wine

Associate Professors: Jennifer L. Eberhardt, Anne Fernald, James J. Gross, Jeanne L. Tsai (on leave Autumn), Anthony Wagner

Assistant Professors: Lera Boroditsky, Kalanit Grill-Spector, Susan C. Johnson, Brian Knutson, Samuel M. McClure, Benoît Monin, Michael Ramscar, Gregory M. Walton

Associate Professor (Teaching): Catherine Heaney

Lecturers: Amie Haas, Beverly Hartman, Jeanne Lepper, Adrienne Lomangino, Teceta Thomas Tormala

Courtesy Professors: William C. Dement, Gary H. Glover, Jon Krosnick, William T. Newsome, Anne C. Petersen, Richard J. Shavelson

Other Affiliation: Albert Ahumada, Jr., Donald Norman, Andrew B. Watson

Director, Bing Nursery School: Jeanne Lepper

Department Offices: Jordan Hall, Building 420
Mail Code: 94305-2130
Department Phone: (650) 725-2400
Web Site: http://psychology.stanford.edu/

Courses given in Psychology have the subject code PSYCH. For a complete list of subject codes, see Appendix.

The courses and research opportunities in the Department of Psychology introduce students to the corpus of data on, and explanations of, human nature and human behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The research programs of the faculty and students focus on the study of basic psychological mechanisms and, where appropriate, on relating basic research to the analyses and solutions of important societal problems.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminal master's degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master's degree except as noted below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Major Requirements—Students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units can be taken outside of the Psychology department but must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a field of study. Courses taken to satisfy the 70-unit requirement must be taken for a grade of 'C-' or better (except for courses offered only on a satisfactory/no credit basis). Majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following ten core Psychology courses, with a minimum of two from each area A and B:

Area A Courses:
BIOSCI 20. Introduction to Brain and Behavior
PSYCH 30. Introduction to Perception
PSYCH 45. Introduction to Learning and Memory
PSYCH 55. Introduction to Cognition and the Brain

Area B Courses:
PSYCH 60. Introduction to Developmental Psychology
PSYCH 70. Introduction to Social Psychology
PSYCH 75. Introduction to Cultural Psychology
PSYCH 80. Introduction to Personality Psychology
PSYCH 90. Introduction to Clinical Psychology
PSYCH 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the *Stanford Bulletin* yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study. and practica (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill the core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

Beyond the Minimal Requirements—The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the senior honors program, described below.
3. The student may elect to pursue one of four fields of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.

MINOR

Declaration—Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

Requirements—Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor. The minor must include three of ten core courses, with a minimum of one from each of two areas (A: BIOSCI 20; PSYCH 30, 45, 55; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units. Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the ten core courses. Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses. Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor. All courses used to fulfill the requirements of the minor must be passed with a grade of 'C-' or better, except for courses offered only on a satisfactory/no credit basis. No more than 10 units of transfer credit may be counted toward the Psychology minor.

CREDIT FROM OUTSIDE THE DEPARTMENT

Psychology majors must complete at least 60 units of course work toward their major at Stanford within the Psychology department. Psychology minors may count no more than a total of 10 units credit from outside the department toward the minor. Both majors and minors may use only one course from outside the department to fulfill core course requirements. Additional courses may be used to fulfill the 70-unit major requirement, but may not be counted as core courses.

There are two types of credit from outside the department: external transfer credit for courses taken at institutions other than Stanford and credit for courses in other Stanford departments. A student must have already declared Psychology as a major or minor in order to submit a petition for transfer credit. Stanford credit for courses completed at other institutions must have been granted by the External Credit Evaluation section of the Registrar's Office; those units may be applied toward the 180 units required for graduation. To have credit from outside the department evaluated to fulfill requirements toward the Psychology major or minor, students complete an Undergraduate Petition form, available from the student services office, and submit it with a course syllabus. Students requesting external transfer credit must also submit a copy of the signed transcript from the External Credit Evaluation section of the Registrar's Office showing the number of Stanford units granted for the course. The Psychology department then evaluates external credit courses and courses from other Stanford departments to determine if they can be applied toward Psychology major or minor requirements.

FIELDS OF STUDY

Students in the major program, including those in the senior honors program, may elect to specialize in one of four fields of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Fields of study consist of a coherent set of courses leading to advanced undergraduate or even graduate-level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student's preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a field of study is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a field of study must meet the requirements for the major plus the additional requirements designated for the field of study. Typically the courses required for a field of study include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the field of study count toward satisfying the major requirements. Courses from other departments listed for the field of study may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser.

The Mind, Culture, and Society field of study includes a two quarter research practicum; students are encouraged to apply for this track by Autumn Quarter of their junior year. Application forms are available from the student services office. There is no application for the other fields of study, but all fields of study are declared on Axess and students must submit a field of study form that can be found at http://www-psych.stanford.edu/undergraduate_forms.html or at the student services office. Completion of a field of study is noted on a student's transcript, but not on the diploma. Information about the required and recommended courses for each field of study is available from the student services office.

HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student's junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) two letters of recommendations by faculty and/or graduate students. Applications are available late Spring Quarter and are to be turned in to the student services office with a current transcript and recommendations by June 2, prior to the student's senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar. Initially, discussions are on general methods and issues in psychological research, but most of the sessions are devoted to discussions of students' presentations of their proposed research. During the quarter, students meet with their advisers to develop their experimental program and begin data collection. At the end of Autumn Quarter, students turn in a written proposal. Winter and Spring quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention, scheduled for the day between classes and exams. This convention is attended by undergraduates, graduate students, and faculty.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Psychology normally offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. Admission to the program is by Psychology faculty nomination only. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

Stanford undergraduates who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services office. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student's master's degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department's deadline for the submission of an application to the coterminal program is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants also consult with the student services office.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master's degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student's adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology.

Courses to be counted toward the master's degree must be passed with a grade of 'B-' or better, unless the course is offered only on a satisfactory/no credit basis. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates, such as undergraduate honors courses, and courses offered in the Summer Quarter may not be counted toward the master's program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master's degree. This demonstration entails completion of a master's thesis containing original research. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master's level research by the student's adviser and the department's Committee on Graduate Studies. If the student has completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit this research in a written report which, together with the completed honors thesis, would constitute the master's thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report in June. Applicants to the coterm program must have an adviser in the department, or approved by the department, who agrees to supervise the student's research. Students in the program may be terminated at the beginning of the Winter Quarter if they do not have an adviser, or if they are not making satisfactory progress in research or course work.

Area A Courses:

202. Cognitive Neuroscience
205. Foundations of Cognition
210. Memory and Learning
221. Applied Vision and Image Systems
228. Ion Transport
251. Affective Neuroscience
261. Emotion
261A. Learning and Cognition in Activity

Area B Courses:

211. Developmental Psychology
212. Social Psychology
213. Personality and Psychopathology
215. Mind, Culture, and Society
217. Topics and Methods in Cultural Psychology
259. Emotions: History, Theories, Research
271. Applications of Social Psychology

DOCTOR OF PHILOSOPHY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in Psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are recommended.

General University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

First-Year Course Requirements—During the first year of graduate study, the student must take PSYCH 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list following:

202. Neuroscience
205. Foundations of Cognition
211. Developmental Psychology
212. Social Psychology
    or 215. Mind, Culture, and Society
213. Personality

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., normally taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is June 1.

Second Year Course Requirements—By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

Third-Year and Beyond—Students are expected to form a research committee, which must include the dissertation reading committee, before the initiation of the dissertation research. The research committee includes the dissertation adviser and consists of at least three faculty members, at least two of whom should be in the Psychology department. For University guidelines for the composition of the dissertation reading committee, see the "Graduate Degrees" section of this bulletin.

The research committee must meet no later than the first day of classes of Spring Quarter of the third year, and determines the timeline for further development of the dissertation research project. Subsequent meetings are triggered by the completion of one of two documents: a dissertation proposal (DP) or a conceptual analysis of the dissertation area (CADA). The timing and sequencing of the DP and CADA are developed by the student in consultation with the committee. As a general guide, one of the two preliminary elements (CADA or DP) should be completed by the end of the third Summer Quarter and the second should be completed by the end of the fourth Spring Quarter. Students are free to alter the membership of the committee at any time during the process, subject to consultation with the adviser.

The DP should be a description of the proposed research. The CADA provides a framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature.

Advanced Course or Minor Requirements—The candidate must complete 12 units of advanced graduate course work or a Ph.D. minor in another department. If a student waives the minor requirement in favor of the 12 advanced units, the student must fulfill the advanced course requirement by taking (a) non-core graduate courses required by a particular area, *or* (b) graduate-level courses in other departments comparable in quality to Psychology's graduate courses. If there is any question about comparability, the student should consult the adviser, student services, and, in some cases, the graduate education committee chair before taking the course.

Orals—The candidate must pass the University oral examination, which also serves as a dissertation defense. A committee is formed to review the oral examination, including the research committee and one oral examination committee chair from outside of the Psychology department. The oral examination consists of a 40-45-minute presentation to the department of the completed dissertation research. Parents and friends are welcome to attend. Following the presentation, the student and the committee convene for a discussion of the dissertation and the presentation.

Dissertation Requirements—The candidate must complete a dissertation satisfactory to the dissertation reading committee prior to the oral examination. Minor revisions to formatting may be made after the oral examination.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation—It is the department's policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 2. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:

1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year Evaluation—A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student must concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the people or animals being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 10 units of course work per quarter.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for at least five Psychology courses during their graduate study. Of the courses, two must be PSYCH 1, Introduction to Psychology, and/or PSYCH 10, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of 'B-' or better (unless the course is offered only on a satisfactory/no credit basis).

COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside psychology. For information or course approval, contact the student services office.

PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

SUMMER SESSION

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced by Stanford Summer Session at http://summer.stanford.edu.

STANFORD INTRODUCTORY SEMINARS

PSYCH 8N. Life Span Development—Stanford Introductory Seminar. Preference to freshmen. People continue to change in systematic ways throughout life, but developmental psychology has focused mostly on childhood. Focus is on conceptual models that direct developmental research on adulthood and old age, and the empirical literature concerning developmental changes in cognition, motivation, and emotion. GER:DB-SocSci

3 units, Spr (Carstensen, L)

PSYCH 12N. Self Theories—Stanford Introductory Seminar. Preference to freshmen. The impact on motivation and performance in school, business, sports, and relationships of people's beliefs in a fixed self versus a self that can be developed. How such self theories develop and can be changed. Readings include research articles and popular writings. GER:DB-SocSci

3 units, Aut (Dweck, C)

PSYCH 16N. Amines and Affect—Stanford Introductory Seminar. Preference to freshmen. How serotonin, dopamine, and norepinephrine influence people's emotional lives. GER:DB-SocSci

3 units, Win (Knutson, B)

PSYCH 17N. Language and Society: How Languages Shape Lives—Stanford Introductory Seminar. Preference to freshmen. Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci

3 units, Aut (Boroditsky, L)

PSYCH 18N. Early Social Cognitive Development—Stanford Introductory Seminar. Preference to freshmen. Focus is on the development of attachment and its impact on psychological functioning.

3 units, Spr (Johnson, S)

OPEN TO ALL STUDENTS

PSYCH 1. Introduction to Psychology—Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci

5 units, Aut (Gross, J), Win (Monin, B), Spr (Knutson, B)

PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Thomas, E), Win (Walther, G), Spr, Sum (Staff)

PSYCH 30. Introduction to Perception—Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics include anatomy and physiology of the eye and ear, and of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth and motion perception, and object and face recognition. Recommended: 1. GER:DB-NatSci

3 units, Win (Grill-Spector, K)

PSYCH 45. Introduction to Learning and Memory—The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.

3 units, Spr (Wagner, A)

PSYCH 55. Introduction to Cognition and the Brain—Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning. WIM

4 units, Win (Boroditsky, L)

PSYCH 60. Introduction to Developmental Psychology—Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci

3 units, Aut (Johnson, S)

PSYCH 60A. Introduction to Developmental Psychology Section—Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.

2 units, Aut (Hartman, B; Lomangino, A)

PSYCH 70. Introduction to Social Psychology—The influence of other people on individuals' thoughts, emotions, and behaviors. Factors that affect how people perceive themselves and others; what causes people to like, dislike, love, help, or hurt others; and how social psychology helps to understand questions about law, business, and health. Recommended: 1. GER:DB-SocSci, WIM

4 units, Spr (Tormala, T)

PSYCH 75. Introduction to Cultural Psychology—The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. GER:DB-SocSci, EC-GlobalCom

5 units, alternate years, not given this year

PSYCH 80. Introduction to Personality Psychology—Concepts and research methods, major theoretical approaches, and related empirical findings. The psychodynamic, trait, biological, humanistic, behavioral, social learning, cognitive, and cultural perspectives. Prerequisite: PSYCH 1. GER:DB-SocSci

3 units, Spr (Tsai, J)

PSYCH 90. Introduction to Clinical Psychology—Topics include the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci

3 units, Aut (Haas, A)

PSYCH 95. Introduction to Abnormal Psychology—Theories of and approaches to understanding the phenomenology, etiology, and treatment of psychological disorders among adults and children. Research findings and diagnostic issues. Recommended: PSYCH 1. GER:DB-SocSci

3 units, Win (Staff)

PSYCH 101. Community Health Psychology—(Same as HUMBIO 128.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

PSYCH 102. Longevity—(Same as NENS 202.) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. GER:DB-SocSci

3 units, Win (Rando, T; Carstensen, L)

PSYCH 110. Research Methods and Experimental Design—Structured research exercises and design of an individual research project. Prerequisite: consent of instructor.

5 units, not given this year

PSYCH 119. Public Policy and Psychology—(Same as PUBLPOL 172.) Applications of psychology to public and social policy. Topics include the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. How psychological theory can be used to shape policies and policy making in areas such as environment, education, criminal justice, and health.

5 units, Spr (Tormala, T)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior—(Same as BIOSCI 153.) Neural interactions underlying behavior. Prerequisites: 1 or basic biology. GER:DB-NatSci

4 units, Aut (Wine, J)

PSYCH 121. Ion Transport and Intracellular Messengers—(Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community—(Same as CTL 130.) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

3 units, Win (Glickman, A)

PSYCH 130. Introduction to Cognitive Science—(Same as LINGUIST 144, PHIL 190, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Davies, T)

PSYCH 131. Language and Thought—(Graduate students register for 262.) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci

4 units, Aut (Clark, H)

PSYCH 133. Human Cognitive Abilities—(Same as EDUC 369.) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci
3 units, not given this year

PSYCH 134. Seminar on Language and Deception—Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci
3 units, Win (Clark, H)

PSYCH 137. Birds to Words: Cognition, Communication, and Language—(Graduate students register for 239A; same as HUMBIO 145.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci
4 units, Aut (Fernald, A; Ramscar, M)

PSYCH 141. Cognitive Development—Topics and issues on cognitive development, developmental changes in memory, conceptual organization, logical reasoning, and communication skills. Prerequisite: 1. GER:DB-SocSci
3 units, not given this year

PSYCH 143. Developmental Anomalies—For advanced students. Developmental disorders and impairments. What the sparing of mental abilities in otherwise devastating disorders (or vice versa) tells about the mind and its development in the normal case. Examples of disorders and impairments: autism, congenital blindness, deafness, mental retardation, attachment disorder, and Williams syndrome. Limited enrollment. Prerequisites: 60, 141, and consent of instructor. GER:DB-SocSci
3 units, Spr (Johnson, S)

PSYCH 145. Seminar on Infant Development—For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data.
1-2 units, Spr (Fernald, A)

PSYCH 146. Observation of Children—Learning about children through guided observations at Bing Nursery School, Psychology's lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60.
3-5 units, Win, Spr (Hartman, B; Lomangino, A)

PSYCH 147. Development in Early Childhood—Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching/learning environment. May be repeated for credit. Recommended: 60 or 146, or consent of instructor.
3-5 units, Aut, Win, Spr (Winters, J; Chandra, P)

PSYCH 149. The Infant Mind: Cognitive Development over the First Year—How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:DB-SocSci
3 units, not given this year

PSYCH 152. Mediation for Dispute Resolution—(Same as EDUC 131.) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize chances for success. Simulated mediation sessions.
3 units, Aut (Krumboltz, J)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity—(Same as CSRE 196C, ENGLISH 172D.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci
5 units, Win (Moya, P; Markus, H)

PSYCH 158. Emotions: History, Theories, and Research—(Graduate students register for 259.) Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.
1-3 units, Win (Zajonc, R)

PSYCH 161. Emotion—(Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci
3 units, Win (Gross, J)

PSYCH 163. Interpersonal Basis of Abnormal Behavior—The role of interpersonal problems and processes in producing forms of psychopathology including mild and severe disorders. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: PSYCH 1. GER:DB-SocSci
3 units, Win (Horowitz, L)

PSYCH 165. Peace Studies—(Same as POLISCI 111.) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci
5 units, not given this year

PSYCH 166. Seminar on Personal and Social Change—Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.
3 units, Win (Bandura, A)

PSYCH 167. Seminar on Aggression—The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.
3 units, not given this year

PSYCH 168. Emotion Regulation—(Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci
3 units, Spr (Gross, J)

PSYCH 171. Research Seminar on Aging—Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.
4 units, Aut, Win, Spr (Carstensen, L)

PSYCH 177. Senior Seminar on Mind, Culture, and Society—For seniors in the Mind, Culture, and Society track.
3 units, Aut (Markus, H)

PSYCH 179. The Psychology of Everyday Morality—(Graduate students register for 270.) For graduate students, coterms, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units, not given this year

PSYCH 180C. Asian American Sexualities—(Same as ASNAMST 180C, CSRE 180C.) Seminar. Mutual constitution of culture and sexuality among Asian Americans; attitudes, behaviors, taboos, and identity. How masculinity and femininity are portrayed in the media; cultural attitudes toward homosexuality; and sexual politics. Social, political, and psychological implications.

5 units, Win (Chiang, I)

PSYCH 183. Mind, Culture, and Society Labwork—Required of and limited to research assistants in the mind, culture, and society lab. The development of analytical thinking with reference to how social identities such as race, class, gender, and culture affect psychological experiences across domains including education, law, business, and health.

2-3 units, Aut, Win, Spr (Eberhardt, J; Markus, H)

PSYCH 184. Applied Social Psychology—Combination of social psychology with solving problems in the real world. Methodological and theoretical foundations associated with conducting applied research on social issues such as violence, stereotyping and prejudice, work satisfaction, the justice system, education, the environment, the health care industry, the welfare system, and the mass media. Recommended: 1, 70.

4 units, Win (Tormala, T)

PSYCH 185. Contemporary Issues in Peace Studies—(Graduate students register for 285; same as POLISCI 311.) Interdisciplinary. The challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, not given this year

PSYCH 189. Stanford Center on Longevity Practicum—Student involvement in an interdisciplinary center aimed at changing the culture of human aging using science and technology.

3 units, Aut, Win, Spr, Sum (Carstensen, L)

PSYCH 192. Career and Personal Counseling—(Same as EDUC 134/234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments. Case studies of bicultural role conflict. Informal experience in counseling.

3 units, Spr (Krumboltz, J)

PSYCH 193. Special Laboratory Research—May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut, Win, Spr, Sum (Dweck, C)

PSYCH 194. Reading and Special Work—Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

PSYCH 195. Special Laboratory Projects—Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut, Win, Spr, Sum (Staff)

PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications—Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department's areas: social, personality, developmental, neuroscience, and cognitive psychology. Faculty present current research. Discussions led by advanced graduate students in the field represented by that week's guest. Students write research proposals. Small grants available to students to conduct a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor.

3 units, Aut (Clark, H)

PSYCH 197. Advanced Research—Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Eberhardt, J)

PSYCH 198. Senior Honors Research—Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.

1-4 units, Win, Spr (Eberhardt, J)

PSYCH 199. Temptations and Self Control—(Graduate students register for 299.) Why do people do things that that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

2 units, Aut (Magen, E)

PRIMARILY FOR GRADUATE STUDENTS

Undergraduates admitted only by consent of instructor.

PSYCH 201. Social Psychology Lecture Series—Required of social psychology graduate students. Guest lecturers from Stanford and other institutions. May be repeated for credit.

3 units, not given this year

PSYCH 202. Cognitive Neuroscience—Graduate core course. The anatomy and physiology of the brain. Methods: electrical stimulation of the brain, neuroimaging, neuropsychology, psychophysics, single-cell neurophysiology, theory and computation. Neuronal pathways and mechanisms of attention, consciousness, emotion, language, memory, motor control, and vision. Prerequisite: 207 or consent of instructor.

3 units, Spr (Wandell, B; Grill-Spector, K)

PSYCH 204A. Computational Neuroimaging—Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). The physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.

1-3 units, Spr (Wandell, B)

PSYCH 204B. Computational Neuroimaging: Analysis Methods—Data analysis techniques for neuroimaging data using real and simulated data sets. Basic MR physics and BOLD signals. Topics include: linearity of the fMRI signal; time versus space resolution tradeoffs; and correlation analysis. Reverse engineering: can cognitive states be predicted from brain activation?

1-3 units, Aut (Wandell, B; Grill-Spector, K)

PSYCH 205. Foundations of Cognition—Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.

1-3 units, Win (Ramscar, M)

PSYCH 207. Professional Seminar for First-Year Ph.D. Graduate Students—Required of and limited to first-year Ph.D. students in Psychology. Major issues in contemporary psychology with historical backgrounds.

2-3 units, Aut (Wandell, B)

PSYCH 208. Advanced Topics in Self-Defense—Seminar. Threats to the self and how people deal with them. Readings from social psychological areas including social comparison, self-affirmation, self-completion, self-discrepancy, shame and guilt, terror management, dimensions of self-worth, self-regulation, self-presentation, psychophysiology, and moral identity. Enrollment limited to 15.
1-3 units, Win (Monin, B)

PSYCH 209A. The Neural Basis of Cognition: A Parallel Distributed Processing Approach Lab—Models and data to support the notion that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning and development occur primarily through the adjustment of the strengths of the connections between the neurons. How models may be used to explain aspects of human cognition, development, and effects of brain damage on cognition. Prerequisites: linear algebra, differential equations, a programming course, and two courses in psychology or neuroscience.
4-6 units, Win (McClelland, J)

PSYCH 209B. Applications of Parallel Distributed Processing Models to Cognition and Cognitive Neuroscience—Research seminar. Builds on project proposal developed in 209A. Hands-on use of computational models to address phenomena in cognitive psychology and cognitive neuroscience. Classic and modern papers, and student presentations of their own projects. Final paper in the form of a journal article submission. Prerequisite: 209A.
4 units, Spr (McClelland, J)

PSYCH 210. Foundations of Memory—Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural architectures of working, declarative, and nondeclarative memory.
3 units, Aut (Wagner, A)

PSYCH 211. Developmental Psychology—Prerequisite: 207 or consent of instructor.
1-3 units, Win (Markman, E; Dweck, C)

PSYCH 212. Social Psychology—Prerequisite: 207 or consent of instructor.
1-3 units, Win (Lepper, M; Ross, L)

PSYCH 213. Personality and Psychopathology—Theory and research. Prerequisite: 207 or consent of instructor.
1-3 units, Spr (Horowitz, L)

PSYCH 215. Mind, Culture, and Society—Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and polity. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.
3 units, Win (Markus, H; Steele, C)

PSYCH 216. Public Policy and Social Psychology: Implications and Applications—(Same as IPS 207B, PUBLPOL 205B.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.
4 units, Spr (Ross, L)

PSYCH 217. Topics and Methods Related to Culture and Emotion—Theories and research on culture and emotion, including applications to clinical, educational, and occupational settings. May be repeated for credit.
1-3 units, Win (Tsai, J)

PSYCH 218. Early Social Cognitive Development—Current literature on social and cognitive development in infancy emphasizing the interface between the two domains. May be repeated for credit.
1-3 units, not given this year

PSYCH 221. Applied Vision and Image Systems—The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.
1-3 units, Win (Wandell, B)

PSYCH 223. Social Norms—(Same as OB 630.) Research and theory on the origins and function of social norms. Topics include the estimation of public opinion, the function of norms as ideals and standards of judgment, and the impact of norms on collective and individual behavior. How to identify and formulate tractable research questions.
4 units, Spr (Miller, D)

PSYCH 227. Seminar in Psycholinguistics: Models of Human and Machine Speech and Language Processing—(Same as LINGUIST 247.) May be repeated for credit.
2-4 units, not given this year

PSYCH 228. Ion Transport and Intracellular Messengers—(Undergraduates register for121; see 121.)
1-3 units, Spr (Wine, J)

PSYCH 230. Aping: Imitation, Control and the Development of the Human Mind—Seminar. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.
1-3 units, Spr (Ramscar, M)

PSYCH 232. Brain and Decision Making—Neuroeconomics combines experimental techniques from neuroscience, psychology, and experimental economics, such as electrophysiology, fMRI, eye tracking, and behavioral studies, and models from computational neuroscience and economics. May be repeated for credit. Prerequisite: consent of instructor.
3 units, not given this year

PSYCH 233. MATLAB and Psychtoolbox for the Behavioral Sciences—Topics such as experiment design, stimulus presentation, counterbalancing, response collection, data analysis, and plotting. Programming experiments. Final project programming a complete behavioral experiment relevant to student's research. Prerequisite: introductory programming such as CS 105 or 106, or consent of instructor.
1-3 units, Win (Yoon, J; Toskos, A; Chen, J)

PSYCH 234. Topics in Affective Disorders—Current research topics including epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, given next year

PSYCH 239A. Birds to Words: Cognition, Communication, and Language—(Undergraduates register for 137; see 137; same as HUMBIO 145.)
4 units, Aut (Fernald, A; Ramscar, M)

PSYCH 243. General Development Seminar—May be repeated for credit. Prerequisite: consent of instructors.
1-2 units, Win (Markman, E; Fernald, A; Johnson, S)

PSYCH 244. Psychology of Aging—Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, not given this year

PSYCH 249. Human Motivation—Current research and theory including questions concerning the nature of human motives, intrinsic motivation, self-regulation, the roles of affect and cognition, and lifespan and cultural influences on motivation. Prerequisite: graduate standing in Psychology or consent of instructors.
1-3 units, Spr (Dweck, C; Lepper, M)

PSYCH 250. High-level Vision—Theories and ongoing research. Topics: behavioral studies pertaining to representation of objects; generalization and invariances; learning new categories; neuropsychological deficits; properties of high-level visual areas in monkeys and human beings; and theories and models of object and face recognition.
1-3 units, Spr (Grill-Spector, K), alternate years, not given next year

PSYCH 251. Affective Neuroscience—Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.
3 units, Win (Knutson, B)

PSYCH 252. Statistical Methods for Behavioral and Social Sciences—(Same as NENS 202.) For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent.
1-6 units, Aut (Thomas, E)

PSYCH 253. Statistical Theory, Models, and Methodology—Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.
3 units, alternate years, not given this year

PSYCH 255. Topics in Personality and Abnormal Psychology—Topic varies every year. This year's topic is personality disorders. May be repeated for credit. Prerequisites: 207, 213.
1-3 units, Aut (Horowitz, L)

PSYCH 257. Individually Supervised Practicum—Satisfies INS requirements for curricular practical training. Relevant experience for graduate students as part of their program of study. May be repeated for credit. Prerequisites: graduate standing in Psychology, consent of adviser.
3-5 units, Aut, Win, Spr, Sum (Staff)

PSYCH 258. Graduate Seminar in Social Psychology Research—For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.
1-3 units, Aut, Win, Spr (Zajonc, R)

PSYCH 259. Emotions: History, Theories, and Research—(Undergraduates register for 158; see 158.)
1-3 units, Win (Zajonc, R)

PSYCH 261. Emotion—(Undergraduates register for 161; see 161.)
3 units, Win (Gross, J)

PSYCH 261A. Learning and Cognition in Activity—(Same as EDUC 295.) Methods and results of research on learning, understanding, reasoning, problem solving, and remembering, as aspects of participation in social organized activity. Principles of coordination that support cognitive achievements and learning in activity settings in work and school environments.
3 units, not given this year

PSYCH 262. Language and Thought—(Undergraduates register for 131; see 131.)
4 units, Aut (Clark, H)

PSYCH 266. Current Debates in Learning and Memory—Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP).
1-3 units, not given this year

PSYCH 267. Human Memory: Facts, Fallacies, and Fragile Powers—Seminar. Applications of memory concepts in everyday life and in social and clinical settings. Topics include personal identity, childhood amnesia, autobiographic memory, emotions and memory, memory distortions, illusions, self-serving biases, recovery of repressed memories, false memories, implicit memories, and unconscious influences on social behavior, with applications to psychopathology.
1-3 units, not given this year

PSYCH 268. Emotion Regulation—(Undergraduates register for 168; see 168.)
3 units, Spr (Gross, J)

PSYCH 269. Graduate Seminar in Personality Research—May be repeated for credit. Prerequisite: graduate standing in Psychology.
1 unit, Aut, Win, Spr (Gotlib, I)

PSYCH 270. The Psychology of Everyday Morality—(Undergraduates register for 179; see 179.)
4 units, not given this year

PSYCH 272. Special Topics in Psycholinguistics—May be repeated for credit. Prerequisite: consent of instructor.
1-3 units, Spr (Clark, H)

PSYCH 273. Graduate Seminar on Language, Cognition, and Perception—Current topics and debates. Readings from psychology, linguistics, neuroscience, ethology, anthropology, and philosophy. May be repeated for credit.
3 units, Aut (Boroditsky, L)

PSYCH 275. Graduate Research—Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

PSYCH 279. Topics in Cognitive Control—The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence.
1-3 units, Win (Wagner, A)

PSYCH 281. Practicum in Teaching—Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

PSYCH 282. Practicum in Teaching PSYCH 1—Logistical TA training including: preparing for sections; creating, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.
1-2 units, Aut (Gross, J), Win (Monin, B), Spr (Knutson, B)

PSYCH 283. International Conflict Resolution Colloquium—(Same as LAW 611, POLISCI 403.) Interdisciplinary. Theoretical insights and practical experience in managing and resolving inter-group and international conflicts. Personal, strategic, and structural barriers that can impede the achievement of efficient solutions to conflicts. Sources include social psychology, political science, game theory, and international law. Themes derived from faculty affiliation and research with the Stanford Center of International Conflict and Negotiation (SCICN).
2-5 units, Win (Weiner, A; Ross, L)

PSYCH 285. Contemporary Issues in Peace Studies—(Undergraduates register for 185; see 185; same as POLISCI 311.)
3 units, not given this year

PSYCH 290. Graduate Research Methods—Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.
2 units, Win (Staff)

PSYCH 291. Psychology Teaching Methods—Open to graduate students and advanced undergraduates. Principles of good teaching. Students practice teaching skills.
1-2 units, Aut (Marshall, S; Master, A; Rattan, A)

PSYCH 296. Methods in Personality and Social Psychology—Experimental survey and multivariate methods. Topics: archival and correlational studies; experimental and quasi-experimental design; formulating the research problem; going from abstract ideas to concrete instances; handling research artifacts; measuring and analyzing change data; observational techniques; organizing data: professional and ethical issues; triangulation; validity and reliability of measurement. Practicum format. Research proposal. Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, not given this year

PSYCH 297. Seminar for Coterminal Master of Arts—Contemporary issues and student research. Student and faculty presentations.
1-2 units, Aut, Win, Spr (Clark, H)

PSYCH 299. Temptations and Self Control—(Undergraduates register for 199; see 199.)
2 units, Aut (Magen, E)

PSYCH 459. Frontiers in Interdisciplinary Biosciences—(Crosslisted in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.
1 unit, Aut, Win, Spr (Robertson, C)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 150/250. Human Behavioral Biology—(Same as HUMBIO 160.)
5 units, Spr (Sapolsky, R), alternate years, not given next year

COMM 308. Graduate Seminar in Political Psychology—(Same as POLISCI 324.)
1-3 units, Aut, Win, Spr (Krosnick, J)

EDUC 233A. Adolescent Development and Mentoring in the Urban Context
3 units, Aut (LaFromboise, T)

EDUC 252. Introduction to Test Theory
3-4 units, Spr (Haertel, E)

LINGUIST 140/240. Language Acquisition I
4 units, Aut (Clark, E)

LINGUIST 241. Language Acquisition II
1-4 units, Win (Clark, E)

POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop—(Same as COMM 310.)
1 unit, Aut, Win, Spr (Krosnick, J)

PUBLIC POLICY PROGRAM

Director: Bruce M. Owen (Stanford Institute for Economic Policy Research)

Deputy Director: Gregory L. Rosston (Stanford Institute for Economic Policy Research)

Associate Director and Senior Lecturer: Geoffrey Rothwell (Economics, Public Policy)

Executive Committee: Laurence Baker (Medicine), Jonathan Bendor (Business), David Brady (Political Science, Hoover Institution), Timothy Bresnahan (Economics), Samuel Chiu (Management Science and Engineering), Morris Fiorina (Political Science), Judith Goldstein (Freeman Spogli Institute for International Studies, Political Science), David Grusky (Education), Stephen Haber (Hoover Institution), Eric A. Hanushek (Hoover Institution), Deborah Hensler (Law), Daniel Kessler (Business and Law), David Kreps (Graduate School of Business), Roger Noll (Stanford Institute for Economic Policy Research), Leonard Ortolano (Civil and Environmental Engineering), Bruce Owen (Stanford Institute for Economic Policy Research), Sean Reardon (Education), Lee Ross (Psychology), Gregory Rosston (Stanford Institute for Economic Policy Research), Debra Satz (Philosophy), John B. Shoven (Stanford Institute for Economic Policy Research), Stephen Stedman (Freeman Spogli Institute for International Studies)

Affiliated Faculty: Donald Barr (Sociology), Jayanta Bhattacharya (Medicine), Coit Blacker (Freeman Spogli Institute for International Studies), Timothy Bresnahan (Economics), Paul Brest (Law), Jeremy Bulow (Graduate School of Business), John Cogan (Hoover Institution), Eamonn Callan (Education), Martin Carnoy (Education), Joshua Cohen (Political Science), Lynn Eden (Freeman Spogli Institute for International Studies), Lawrence Friedman (Law), Judith Goldstein (Freeman Spogli Institute for International Studies, Political Science), Lawrence Goulder (Economics, Freeman Spogli Institute for International Studies), Eric A. Hanushek (Hoover Institution), Thomas C. Heller (Law, Freeman Spogli Institute for International Studies), Nicholas Hope (Stanford Center for International Development), Jon A. Krosnick (Communications, Political Science), Thomas MaCurdy (Economics), Mark McClellan (Economics, School of Medicine; on leave), Robert McGinn (Management Science and Engineering), Milbrey McLaughlin (Education), Terry Moe (Political Science), Norman Nie (Political Science), A. Mitchell Polinsky (Law), Lee Ross (Psychology), John B. Shoven (Economics, Hoover Institution, Stanford Institute for Economic Policy Research), Jeff Strnad (Law), Barton Thompson (Law), Michael Tomz (Political Science), David Victor (Law), Jonathan Wand (Political Science), Barry Weingast (Political Science), Frank Wolak (Economics)

Lecturers: Laura Arrillaga, Ward Hanson (Stanford Institute for Economic Policy Research), Jonathan D. Greenberg (Law), Anjini Kochar (Stanford Institute for Economic Policy Research), Eva Meyersson Milgrom (Stanford Institute for Economic Policy Research), Joe Nation, Mary Sprague (Political Science), Scott Wallsten, Patrick Windham

Teaching Fellows: Sebastien Gay, Kirsten Oleson, Hiroki Takeuchi

Program Office: Encina Hall West, Room 204
Mail Code: 94305-6050
Program Phone: (650) 725-0109
Web Site: http://www.stanford.edu/dept/publicpolicy/

Courses given in Public Policy Program have the subject code PUBLPOL. For a complete list of subject codes, see Appendix.

The undergraduate Public Policy curriculum is intended to expose students to the basic concepts and tools used in evaluating public policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analysis. Although the concepts and tools are of wider applicability, the institutional context is chiefly American. Economics and quantitative analyses are central to but not sufficient for modern public policy analysis; political science, law, philosophy, organizational behavior, and cognitive psychology are among other necessary disciplinary perspectives. Political philosophy and ethics form the foundations of public policy. Political science offers insights to the decision making process and information needs of a democracy. Organizational behavior focuses on the decisions made outside the market environment in hierarchies, bureaucracies, and teams. Nearly all public policy is formulated as law, and economic analysis of legal rules and institutions is key to effective implementation of policy decisions.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The core courses in the Public Policy Program develop the skills necessary to assess the performance of alternative approaches to policy implementation, evaluate the effectiveness of policies, understand the political constraints faced by policy makers, and appreciate the conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address specific fields of public policy, types of institutions, or a deeper development of the tools of policy analysis. Students design their own concentrations with the help of their academic advisers and the approval of the program director. Students must submit a list of their proposed concentration course work and a brief written defense of its coherence in advance of taking concentration courses. Areas of concentration are not declared on Axess; they do not appear on the transcript or diploma.

Recent areas of concentration include:

Advanced Methods of Policy Analysis
Design of Public Institutions
Development and Growth Policies
Education
Environment, Resources, and Population
Health Care
International Policies
Law and the Legal System
Social Policy: Discrimination, Crime, Poverty

Completion of the program in Public Policy requires 87 units of course work.

1. Prerequisite courses, 44 units: POLISCI 2; ECON 1A, 1B, 50, 51, 102A, 102B; MATH 51; and MS&E 180. ECON 50 and 51 must be taken for a letter grade. A maximum of 10 units of the other prerequisite courses may be taken credit/no credit.
2. Core courses: a 25-unit sequence of 5-unit PUBLPOL courses (101, 102, 103A, B, or C, 104, and 106), which students should plan to complete by the end of junior year. All core courses must be completed for a letter grade.
3. Concentration: majors must complete at least 15 units of course work in a concentration. The post-core course work must be approved by a concentration adviser and the director. Concentration course work must be completed for a letter grade.
4. Seniors are required to participate in one quarter (at least 3 units) of the Senior Seminar (PUBLPOL 200A, B, or C). Majors also must submit at least one research paper during the senior year and present it during the Senior Seminar. The senior paper may be a term paper or report for either the senior seminar or another course, or an honors thesis. PUBLPOL 200B (Winter Quarter) is organized as a practicum in which small student teams analyze real world policy problems faced by Bay Area agencies and produce a report for use by the client. The senior seminar must be completed for a letter grade.
5. Students must complete the Public Policy core, concentration area courses and the senior seminar with a grade point average (GPA) of 2.3 (C+) or higher.
6. It is recommended that the major be declared by the end of sophomore year but no later than the end of Autumn Quarter of the junior year. Application forms are available in the Public Policy Program office and on the web site.

The Public Policy Program encourages students to attend Stanford in Washington and to participate in appropriate Stanford internship programs, especially those available through the Haas Center for Public Service.

MINORS

The Public Policy Program offers a minor that is intended to provide students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student's major requirements. All courses for the minor must be completed for a letter grade.

For students whose major department or program requires no courses in economics and political science, the requirements for a Public Policy minor are:

Subject and Catalog Number	*Units*
ECON 1A,B, 50, 51	20
POLISCI 2	5
PUBLPOL 101	5
PUBLPOL 104	5

For students who are Economics majors or who satisfy a major requirement by taking ECON 50, but have taken no courses in political science, the requirements for a Public Policy minor are:

ECON 51	5
POLISCI 2	5
PUBLPOL 101	5
PUBLPOL 102	5
PUBLPOL 103A or B or C	5
PUBLPOL 104	5
PUBLPOL 106	5

For students who are Political Science majors or who satisfy a major requirement by taking POLISCI 2 but no courses in Economics, the requirements for a Public Policy minor are:

ECON 1A,B, 50, 51, 102A	25
PUBLPOL 104	5
PUBLPOL 106	5

For Sociology majors, the requirements for a Public Policy minor are:

ECON 1A,B, 50, 51, 102A	25
PUBLPOL 103A or B or C	5
PUBLPOL 104	5

For students who major in another interdepartmental program such as International Relations and who satisfy major requirements by taking ECON 50, POLISCI 2, and an introductory course in statistics such as ECON 102A or STATS 60, the requirements for a Public Policy minor are:

ECON 51, 102B	10
PUBLPOL 101	5
PUBLPOL 102	5
PUBLPOL 103A or B or C	5
PUBLPOL 104	5
PUBLPOL 106	5

HONORS PROGRAM

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of Spring Quarter of the junior year.
2. Complete the requirements for the B.A. in Public Policy and achieve a grade point average (GPA) of 3.5 in the following courses: the Public Policy core; the student's concentration area courses; the Senior Seminar; PUBLPOL 199, Senior Research; and PUBLPOL 105. Students are encouraged to complete PUBLPOL 105 by the end of Spring Quarter of the junior year and PUBLPOL 200A during Autumn Quarter. Courses not taken at Stanford are not included in calculating the GPA.
3. Submit an honors thesis by enrolling in at least 8 but no more than 15 units of PUBLPOL 199, Senior Research, during the senior year and receive a final grade on the senior thesis of at least a 'B+.' The honors thesis must demonstrate mastery of relevant analytical tools and address a policy issue.

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete a senior research project during Spring Quarter. In addition, honors students are encouraged to enroll in PUBLPOL 197, Junior Honors Seminar, during Winter or Spring Quarter; this course focuses on developing a research plan and the research skills necessary to complete a thesis.

To apply, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. The student must obtain the sponsorship of a faculty member who approves of the thesis description and who agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least one of whom is a member of the Public Policy affiliated faculty.

The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. Graduation with honors requires that the thesis be approved by both the adviser and the Director of the Public Policy Program. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis is determined solely by the adviser. In order to be considered for University and department awards, the final thesis must be submitted to the program office no later than the third Wednesday in May in both hard copy and electronic forms. All other theses must be submitted by the last Friday in May in both hard copy and electronic forms.

Members of the core faculty in Public Policy are available to provide assistance in selecting a senior thesis topic and adviser.

GRADUATE PROGRAMS

University requirements for the master's degree are described in the "Graduate Degrees" section of this Bulletin.

The Graduate Program in Public Policy offers two degrees: Master in Public Policy (M.P.P.), a two-year program leading to a professional degree, and Master of Arts in Public Policy (M.A.P.P.), a one-year program not intended as a professional degree. The following joint degree programs are also offered: Juris Doctor/Master in Public Policy (J.D./M.P.P); Doctor of Philosophy in Economics, Education, Psychology, or Sociology with a joint Master in Public Policy (Ph.D./M.P.P); Master of Business Administration with a joint Master in Public Policy (M.B.A./M.P.P.); Master of Arts in International Policy Studies with a joint Master in Public Policy (M.A.I.P.S./M.P.P.). Requirements for the joint degrees differ; details are available from the program office and on the program web site.

Courses in the graduate program in Public Policy offer advanced skills necessary to assess the performance of alternative approaches to policy making and implementation, evaluating program effectiveness, understanding the political constraints faced by policy makers, and appreciating the conflicts in fundamental human values that often animate policy debate. After completing the graduate core curriculum, students apply these skills by focusing their studies in a practicum for the M.P.P., or a master's thesis for the M.A.P.P. Students in the M.P.P. program also complete at least one concentration tailored to the student's primary degree program or the student's interests and skills.

ADMISSIONS

Applications for graduate study in Public Policy are accepted only from Stanford students currently enrolled in any graduate degree program or external applicants seeking a joint degree. External applicants for joint degrees must apply to the department or school offering the primary graduate degree (i.e., Ph.D., M.B.A., or J.D.), indicating an interest in the joint M.P.P.; applicants admitted to the primary degree program are then evaluated for admission to the M.P.P. program. Students currently enrolled in any Stanford graduate program may, with the consent of that program, apply either for the applicable joint degree or for a stand-alone Public Policy degree, adding the M.P.P. or M.A.P.P. to their current degree program. Applications are reviewed and accepted on a rolling basis but must be received no later than May 1.

PROGRAM REQUIREMENTS

The graduate program in Public Policy consists of a common core set of courses requiring approximately one year of study, plus a 10-unit practicum and concentration course work for the M.P.P., or a master's thesis for the M.A.P.P. All graduate degree candidates must submit an acceptable official Master's Degree Program Proposal to the Public Policy office by the end of Autumn Quarter and must amend this proposal formally if plans for meeting the degree requirements change. The stand-alone M.P.P. requires 90 units of course work and requires approximately two years. The stand-alone M.A.P.P. requires 42 units of course work plus a 5-unit master's thesis, and requires approximately one year. The joint M.P.P. degree programs require 90 units of which up to 45 units may also count toward the primary degree. The joint degree programs add approximately one year to the time required for the primary degree. Each joint degree program differs in its extended core and concentration course requirements; details on specific degrees are available at the program office and on the web site.

The graduate Public Policy core curriculum is required for all graduate degree programs. Core courses must be taken for a letter grade. The core must be completed with a grade point average (GPA) of 3.0 (B) or better. Students are expected to devote one year full-time to the M.P.P. core; for joint-degree students, typically this is the second year at Stanford. Students are required to participate in the weekly colloquia series. Students for whom any given core course would duplicate prior studies may substitute a more advanced course in the same subject matter.

Prerequisites—Graduate students in Public Policy are expected to be literate in mathematics, statistics, and economics at the level of MATH 41, ECON 50, and STATS 60.

Core curriculum consisting of the following courses—PUBLPOL 201A,B, 202A,B, 203A,B, 204A,B, 205A,B, 206 (M.P.P. only), 207. (46 units for M.P.P.; 42 units for M.A.P.P.)

Practicum (M.P.P. students)—10 units of PUBLPOL 209.

Concentration (M.P.P. students)—M.P.P. students complete course work in a specialized field or fields, chosen from existing Stanford courses with the prior approval of the student's adviser and the program director.

Master's Thesis (M.A.P.P. students only)—The 5-unit thesis must be submitted to the Public Policy Program office in both electronic and hard copy no later than the last Friday in May.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

PUBLPOL 101. Politics and Public Policy—(Same as POLISCI 123.) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:DB-SocSci

5 units, Aut (Sprague, M)

PUBLPOL 102. Organizations and Public Policy—Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A. GER:DB-SocSci

5 units, Aut (Hannan, M)

PUBLPOL 103A. Introduction to Political Philosophy—(Same as PHIL 30.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas

5 units, Aut (Hussain, N)

PUBLPOL 103B. Ethics and Public Policy—(Same as MS&E 197, STS 110.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas

5 units, Win (McGinn, R)

PUBLPOL 103C. Justice—(Same as PHIL 171.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

5 units, Aut (Cohen, J)

PUBLPOL 104. Economic Policy Analysis—(Same as ECON 150.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisite: ECON 50.

5 units, Spr (Cogan, J)

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy—Reviews material covered in prerequisites with applications of qualitative independent variable techniques to labor market data. Maximum likelihood estimation and qualitative dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: ECON 102A,B. GER:DB-SocSci

5 units, Spr (Rothwell, G)

PUBLPOL 106. Economics of Legal Rules and Institutions—(Same as ECON 154.) The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic efficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: ECON 50. WIM

5 units, Aut (Owen, B)

PUBLPOL 117. Econometrics for Public Policy Majors—Descriptive statistics, regression analysis, analysis of variance, heteroskedasticity, serial correlation, errors in variables, and simultaneous equations. Prerequisites: Public Policy major; ECON 50 and 102A.

5 units, not given this year

PUBLPOL 121. Policy and Climate Change—Science and economics, including recent findings. History and evolution of local, state, regional, national, and international policy. California's recent landmark climate change bill. Future policy prospects, emphasizing national and international levels.

5 units, Aut (Nation, J)

PUBLPOL 125. Law and Public Policy—How the U.S. government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, stem cell research, government surveillance, and digital copyright. Prerequisite: POLISCI 2. GER:DB-SocSci

5 units, Aut (Greenberg, J)

PUBLPOL 154. Politics and Policy in California—State politics and policy making, including the role of the legislature, legislative leadership, the governor, special interests, campaign finance, the public, ballot initiatives, the state constitution, the media, and the role of research organizations. Case studies may include pension reform, health care, term limits and other political reform measures, open primaries, infrastructure improvements, and the budget. Changes in constitutional and in state statutes that can improve policy making in California.

5 units, Win (Nation, J)

PUBLPOL 156. Health Care Policy and Reform—Competing health care reform proposals at the state and local levels. Focus is on California including proposals for expanding coverage for children, a single payer system, employer and individual mandates. Recent proposals in other states including Massachusetts, Maine, and Vermont; their relation to national efforts. Attention to local reform efforts, including in San Francisco. Prospects for future policy.
5 units, Spr (Nation, J)

PUBLPOL 168. Global Organizations: Managing Diversity—(Same as SOC 168/268.) Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci
5 units, Win (Meyersson Milgrom, E)

PUBLPOL 172. Public Policy and Psychology—(Same as PSYCH 119.) Applications of psychology to public and social policy. Topics include the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. How psychological theory can be used to shape policies and policy making in areas such as environment, education, criminal justice, and health.
5 units, Spr (Tormala, T)

PUBLPOL 183. Philanthropy and Social Innovation—Philanthropy's role in modern society and the translation of its vision and capital into social action. Topics: individual giving; philanthropic history and industry; foundation models and infrastructure; philanthropic strategy and grantmaking; accountability and board governance; global and corporate philanthropy; and public policy engagement. Readings: business school cases and industry articles. Guest speakers include individual donors and foundation presidents. Final project: students evaluate grant proposals and make funding recommendations. Enrollment limited to 15. GER:DB-SocSci
5 units, given next year (Arrillaga, L)

PUBLPOL 184. Poverty and Policies in Developing Economies—Economic models of growth and poverty, differences in growth rates among countries, and the persistence of poverty. Models of physical and human capital accumulation, and recent theories of the importance of institutions, social capital, and political factors. The effectiveness of social policies in developing countries, emphasizing India, in the light of theories of growth and poverty, and in terms of immediate goals and long-term consequences. Policies include schooling and health, anti-poverty, banking, and political decentralization. Prerequisites: ECON 1A,B. GER:DB-SocSci
5 units, Win (Kochar, A)

PUBLPOL 194. Technology Policy—How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, stem-cell research, government surveillance, and digital copyright. Prerequisite: POLISCI 2.
5 units, Win (Windham, P)

PUBLPOL 197. Junior Honors Seminar—(Same as ECON 198.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.
5 units, Win (Staff), Spr (Rothwell, G)

PUBLPOL 198. Directed Readings in Public Policy—May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

PUBLPOL 199. Senior Research—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

PUBLPOL 199B. Senior Honors Seminar—Research, statistical, and writing support for Public Policy honors students.
1 unit, Win (Gay, S)

PUBLPOL 200A,B,C. Senior Seminar—Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.
3-5 units, **A:** *Aut,* **B:** *Win (Sprague, M),* **C:** *Spr (Gay, S)*

PUBLPOL 201A. Microeconomics—(Same as IPS 204A.) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.
4 units, Aut (Bulow, J)

PUBLPOL 201B. Cost-Benefit Analysis and Evaluation—(Same as IPS 204B.) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Behavioral economics: psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.
4 units, Spr (Kessler, D)

PUBLPOL 202A. Introduction to Law—Differences between common and civil law systems; judge-made law and judicial process; courts and litigation; legislation and its interpretation; administrative law and regulation. Separation of powers and federalism; constitutional law and civil liberties; criminal justice; empirical studies of the legal profession and legal behavior; social change and its impact on the legal order; law and economic development.
2 units, Win (Friedman, L)

PUBLPOL 202B. Economic Analysis of Law—(Same as LAW 277.) How legal rules and institutions can correct market failures. The economic function of contrasts; role of legal remedies to resolve disputes when contracts fail. The choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors such as regulatory authorities. Economics of litigation; how private incentives to bring lawsuits differ from the social value of litigation. Economic motives to commit crimes; optimal governmental response to crime. Prerequisites: intermediate-level microeconomics; some calculus.
4 units, Win (Polinsky, M)

PUBLPOL 203A. Principles of Research Design and Analysis: Methods—(Same as IPS 205A.) How professionals in non-research fields can be informed consumers of policy-related empirical research. Qualitative and quantitative research techniques and methodological requirements for sound research results. Formulating research questions. Experimental design. Choosing appropriate research strategies. Survey research design. Case study methods. Interviewing and observational techniques. Measurement including financial, cost, national income, and regulatory accounting.
4 units, Aut (Louie, T)

PUBLPOL 203B. Principles of Research Design and Analysis: Tools—(Same as IPS 205B, LAW 366.) Policy analysis tools for government, research institutes, and academic settings, and for empirical issues in litigation, investment banking, consulting, and finance. Multiple regression analysis, multilevel modeling, and Bayesian analysis. Topics include hypothesis testing, regression specification, logistic regression, probit, heteroscedasticity, serial correlation, errors in the variables, instrumental variables, simultaneous equations, generalized linear models, simulation, model checking, causal inference, and missing data imputation. Hands-on analysis using popular statistical packages.

4 units, Win (Strnad, J)

PUBLPOL 204A. Politics and Collective Action—(Same as IPS 206A, POLISCI 331S.) How public policies are formulated and implemented; preference formation. The role of electoral politics, nongovernmental organizations, ideologies, and social protests. The theory of collective action. Principal agent relationships. How elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, trade, and social welfare policy, given their goals and available tactics. How to evaluate policies and policy making processes.

4 units, Win (Satz, D)

PUBLPOL 204B. Organizations—(Same as IPS 206B.) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.

4 units, Spr (Stedman, S; Eden, L)

PUBLPOL 205A. Judgment and Decision Making—(Same as IPS 207A, LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.

4 units, Aut (Brest, P)

PUBLPOL 205B. Public Policy and Social Psychology: Implications and Applications—(Same as IPS 207B, PSYCH 216.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other; links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.

4 units, Spr (Ross, L)

PUBLPOL 206. Writing and Rhetoric for Policy Audiences—Techniques of effective writing and argument for addressing decision makers, interest groups, and the public. The importance of apparent simplicity; uses and misuses of history and historical analogies; and incentives, cognitive limits, and biases of audiences. Why some arguments become traditional. Sources include historical briefing papers and oral arguments. Students write briefing papers and make oral arguments, individually and in teams. Enrollment limited. Prerequisite: consent of instructor.

4 units, Spr (Owen, B)

PUBLPOL 207. Justice—(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 136S.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

5 units, Aut (Cohen, J)

PUBLPOL 209. Practicum—(Same as IPS 209.) Applied policy exercises. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.

10 units, given next year

PUBLPOL 231. Political Economy of Health Care in the United States—(Same as MGTECON 331, HRP 391.) Economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients' bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries' health care systems evolved, and what the U.S. can learn from their experiences.

4 units, Spr (Kessler, D; Bundorf, K)

STANFORD IN WASHINGTON

Certain courses offered at Stanford in Washington are approved for the Public Policy major, including the core. Contact the program office for details.

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ECON 1A. Introductory Economics A

5 units, Aut (Clerici-Arias, M), Win (Makler, C), Sum (Staff)

ECON 1B. Introductory Economics B

5 units, Win (Amador, M), Spr (Cojoc, D), Sum (Staff)

ECON 50. Economic Analysis I

5 units, Aut (Abramitzky, R), Spr (Tendall, M), Sum (Staff)

ECON 51. Economic Analysis II

5 units, Aut (Tendall, M), Win (Einav, L), Sum (Staff)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists

5 units, Aut, Win (Steiner, F)

ECON 102B. Introduction to Econometrics

5 units, Win (Mahajan, A), Spr (Staff)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy

3 units, Spr (Abrams, W)

MATH 51. Linear Algebra and Differential Calculus of Several Variables

5 units, Aut, Win (Staff), Spr (Lucianovic, M), Sum (Staff)

MS&E 180. Organizations: Theory and Management

4 units, Aut (Siino, R), Spr (Eisenhardt, K)

POLISCI 2. Introduction to American National Government and Politics

5 units, Win (Fiorina, M; Frisby, T)

OVERSEAS STUDIES

Courses approved for the Public Policy major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time

4-5 units, Win (Fessler, J)

RELIGIOUS STUDIES

Emeriti: (Professors) Arnold Eisen, René Girard, Edwin M. Good, Robert C. Gregg, Van Harvey, David S. Nivison
Chair: Hester G. Gelber
Professors: Carl W. Bielefeldt, Hester G. Gelber, Paul Harrison, Thomas Sheehan, Lee Yearley
Associate Professors: Shahzad Bashir, Charlotte Fonrobert, Brent Sockness
Assistant Professor: Behnam Sadeki
Lecturers: Keila Diehl, Linda Hess, Naoko Kumada, Ariella Radwin
Acting Associate Professor: Fabrizio Pregadio
Acting Assistant Professor: Barbara Pitkin
Visiting Professors: J. Rebecca Lyman, David Malkiel
Visiting Associate Professor: Jennifer Rose
Affiliated Faculty: Jean-Pierre Dupuy (French and Italian), Maud Gleason (Classics), Jack Kollmann (Russian, East European and Eurasian Studies)

Department Offices: Building 70
Mail Code: 94305-2165
Phone: (650) 723-3322
Web Site: http://www.stanford.edu/dept/relstud/

Courses given in Religious Studies have the subject code RELIGST. For a complete list of subject codes, see Appendix.

The purpose of Religious Studies is to understand and interpret the history, literature, thought, and social structures of various religious traditions and cultures. The department offers courses at several levels, described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The goal of the Religious Studies undergraduate curriculum is to give students exposure to the set of phenomena called religion and the leading theories and methods by which religion is studied in the modern university. The department's courses are designed to engage students existentially and to assist them in thinking about intellectual, ethical, and sociopolitical issues in the world's religions. No less important, the department faculty seek to provide tools for understanding the complex encounters among religious ideas, practices, and communities, and the past and present cultures which have shaped and been shaped by religion. Courses therefore expose students to leading concepts in the field of religious studies such as god(s), sacrifice, ritual, scripture, prophecy, and priesthood; to approaches developed over the past century, including the anthropological, historical, psychological, philosophical, and phenomenological, that open religion to closer inspection and analysis; and to major questions, themes, developments, features, and figures in the world's religious traditions. The department encourages and supports the acquisition of languages needed for engagement with sacred texts and interpretive traditions as well as study abroad at Stanford's overseas centers where religions can be observed and experienced in their culture of origins.

MAJOR

The curriculum for majors is designed to move students sequentially from foundational courses, through deeper investigations, culminating in integrative research courses. Thus, the introductory sequence is designed to lead to a wide array of courses which build on this foundation, with topics including: particular traditions such as Judaism or Buddhism; comparative studies such as nonviolence in Hinduism and Buddhism, or Muslim and Christian interpretations of scripture; specific topics such as mysticism, gender and religion, or theodicy; and distinctive approaches such as the philosophy of religion or ritual studies. Majors complete their careers with integrative courses which afford opportunity for research and consolidation of the knowledge and skills gained earlier.

A Bachelor of Arts in Religious Studies requires 60 units of course work. At least 44 units are taken in courses numbered above 100. Ten units out of the 60 may be taken for the grade of 'CR/NC.'

1. At least eight of the 60 units must be courses at the introductory level. Students may satisfy this requirement by taking either:
   a) IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or
   b) one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and academic approaches to the study of religion (courses numbered 51-99). In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.
2. At least 29 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. Language courses relating to students' study of religion within the department, such as Arabic, biblical Hebrew, New Testament Greek, Chinese, or Japanese, but not counted towards the University language requirement may, with departmental approval, be counted among these 29 units.
3. 15 units in integrative courses:
   a) *Majors' Seminar:* RELIGST 290, Theories of Religion (5 units; Winter Quarter of junior year; fulfills WIM requirement)
   b) *Senior Essay or Honors Thesis Research:* RELIGST 297 (3-5 units; up to 10 units over two quarters)
   c) *Senior Majors' Colloquium:* RELIGST 298 (5 units, Spring Quarter, graded S/NC)
   d) completion of either a senior essay or honors thesis. See below concerning the difference between these options.
4. Each student, in consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem which cuts across traditions such as ritual, ethics, scripture, or gender.

SENIOR ESSAY

A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student's proposal by the end of the third quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued with more questions or from a new perspective, or research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student's adviser and one other member of the Religious Studies faculty.

HONORS THESIS

A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student's adviser and one other member of the Religious Studies faculty. Theses earning a grade of 'B+' or above receive honors.

MINOR

A minor in Religious Studies requires a minimum of 30 graded units. Students must declare the minor no later than the last day of the quarter, two quarters before degree conferral.

Requirements for the minor include:

1. Two introductory courses. To satisfy this requirement, students take either:
   a) IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or

   b) one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and academic approaches to the study of religion (courses numbered 51-99). In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.
2. Five intermediate lecture and seminar courses, 100-289.
3. One course in directed reading (RELIGST 199) may count towards the minor.
4. Students may petition for other Stanford courses to fulfill minor requirements, but they must take courses from at least two Religious Studies faculty members.
5. Students are strongly encouraged to focus their program of study either in a religious tradition or in a theme which cuts across traditions. In consultation with their advisers, students may design the minor in Religious Studies to complement their major.

MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY

The departments of Religious Studies and Philosophy jointly nominate for the B.A. students who have completed a major in the two disciplines. See a description of this joint major under the "Philosophy" section of this bulletin, or in the guidelines available from the undergraduate director of either department.

GRADUATE PROGRAMS

MASTER OF ARTS

University regulations pertaining to the M.A. are listed in the "Graduate Degrees" section of this bulletin. The following requirements are in addition to the University's basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including either the RELIGST 290, Majors Seminar, or 304A or B, Theories and Methods, with consent of instructor. Residence may be completed by three quarters of full-time work or the equivalent.

The student's plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken. No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are found in the "Graduate Degrees" section of this bulletin. The following requirements are in addition to the University's basic requirements.

Residence—Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

Field of Study—The Ph.D. signifies special knowledge of a field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department's strengths and those of other Stanford departments cohere. They are: East Asian religions, Christianity, Judaism, religious ethics, and modern Western religious thought. Students who wish to specialize in other fields must obtain early approval by the faculty.

Stages of Advancement—

1. In the first two years, the student refines an area of specialization within the chosen field of study in preparation for candidacy.
2. After attaining candidacy, the student concentrates on the area of specialization in preparation for the qualifying examination.
3. The student writes a dissertation and defends it in the University oral examination.

Languages—Each student demonstrates a reading knowledge of two foreign languages, including French or German. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

Courses—Each student satisfactorily completes the two graduate seminars (304A,B), two quarters of the pedagogy seminar (391), and one reading seminar before the candidacy decision. Other courses are taken with the approval of a faculty adviser in consideration of the student's field of study.

Candidacy—At the end of each academic year, the department's faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student's candidacy dossier which includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years.

Paper-in-Field—During the third year, under the supervision of their advisers, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department.

Teaching Internship—At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a project of academic training and not of employment.

Qualifying Examination—To qualify for writing a dissertation, the student must pass a comprehensive examination in the chosen field and the area of specialization. The student must complete the second language requirement before taking the qualifying examination.

Dissertation—The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate's dissertation adviser and at least two other members of the Academic Council. The University oral examination is a defense of the completed dissertation.

PH.D. MINOR IN RELIGIOUS STUDIES

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies. The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in "Theories and Methods."

JOINT PH.D. IN RELIGIOUS STUDIES AND HUMANITIES

Religious Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in Religious Studies and Humanities, described in the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Religious Studies department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in Religious Studies are advised to consider satisfying their GER:IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 68A. Approaching Religion—Two quarter sequence. Challenges facing the world's religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Christianity, Islam, Hinduism, and Buddhism underwent transformations, grappling with the tension between making necessary changes and preserving tradition. Encounters between these religious traditions and the forces of contemporary social change. GER:IHUM-2,3

IHUM 68A: *4 units, Win (Sheehan, T; Bashir, S)*
IHUM 68B: *4 units, Spr (Hess, L; Bielefeldt, C)*

INTRODUCTORY

RELIGST 5N. Three Sacred Stories of Judaism, Christianity, and Islam—Stanford Introductory Seminar. Preference to freshmen. Interpretations of the scriptural narratives of Sarah and Hagar/Hajar, Jonah/Yunus and the great fish, and Mary/Maryam, the mother of Jesus/'Isa, by the rabbis, the first Christian theologians, and early commentators on the Qur'ân, and by artists in the three traditions. GER:DB-Hum, EC-GlobalCom

3-4 units, Aut (Gregg, R)

RELIGST 7N. The Divine Good: Secular Ethics and Its Discontents—Stanford Introductory Seminar. Preference to freshmen. What is the good and how does it orient human choice and activity? Is it natural to human beings, or in some way transcendent? How do people come to know it? Why do people often fail to do the good they know? What human capacities and dispositions enable its enactment or attainment? What resources does religion offer for its reparation? Classical and modern readings in moral theory emphasizing the difference that religious aspiration makes for moral reflection. GER:DB-Hum, EC-EthicReas

4 units, Win (Sockness, B)

RELIGST 8N. Francis of Assisi: An Exemplary Saint—Stanford Introductory Seminar. Preference to freshmen. The making of a new model of saint at a time of cultural change in the Middle Ages. What Francis as a paradigm of the model self reveals about the ethical and religious imagination, past and present. Texts include Francis' writings and primary documents that chronicle the founding of the Franciscan order. GER:DB-Hum

3 units, Aut (Gelber, H)

RELIGST 10C. A Global Focus on Current Affairs—Required of priority residents in Castano; open to others. May be repeated for credit. (AU)

1 unit, Spr (Gelber, H)

RELIGST 10L. Lantana Humanities Seminar—Required of focus residents in Lantana; open to other Lantana residents. May be repeated for credit. (AU)

1 unit, Aut, Win, Spr (Sockness, B; Pitkin, B)

RELIGST 11. Religious Classics of Asia: India's *Ramayana* Epic—The *Ramayana* as one of the most important religious and cultural texts of India. Its heroes, Rama and Sita, as incarnations of the supreme God and Goddess and models for ideal manhood and womanhood. Textual and performative versions including Valmiki's 2,000-year-old Sanskrit poem, medieval vernacular versions, rural women's folk songs, and the TV serial of 1988-89. *Ramayana* traditions through the lenses of religion, literature, performance, popular culture, gender, and politics. GER:DB-Hum, EC-GlobalCom

3 units, not given this year

RELIGST 12. Introduction to Hinduism—Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender. GER:DB-Hum, EC-GlobalCom

4 units, Win (Hess, L)

RELIGST 14. Introduction to Buddhism—From its beginnings to the 21st century. Principal teachings and practices, institutional and social forms, and artistic and iconographical expressions. GER:DB-Hum, EC-GlobalCom

4 units, Win (Harrison, P)

RELIGST 18. Introduction to Zen Buddhism—Classical Zen thought in China, and its background, origins, and development. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 20. Introduction to the Zoroastrian Religion—The origins of Zoroastrianism, its role in the Iranian empires, and its relation to Judaism, Christianity, Manichaeism, and Islam, and its later forms and function in Iran, India, and its diaspora. The impact of the religion on European literati such as Voltaire, Mozart, the romantic poets, and Nietzsche. GER:DB-Hum

3 units, Win (Rose, J)

RELIGST 23. Introduction to Judaism—The historical development of Jewish religious thought and practice, from the biblical period to the present. Scriptural, liturgical, midrashic, legal, historical, and philosophical texts reflecting that development. The Sabbath, and annual festivals and sacred days. GER:DB-Hum

4 units, Aut (Radwin, A)

RELIGST 24. Introduction to Christianity—The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity's major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum

4 units, Spr (Pitkin, B)

RELIGST 27. Introduction to Islam—Ideas, foundation texts, competing interpretive hegemonies, and historical compromises and syntheses that shaped and inform Islam. Readings from the Qur'ân, hadîth, and seminal theological texts in translation. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 35. Introduction to Chinese Religions—(Formerly 55.) Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:DB-Hum, EC-GlobalCom

4 units, Win (Pregadio, F)

RELIGST 46. Introduction to Daoism—(Formerly 56.) Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture. GER:DB-Hum

4 units, not given this year

RELIGST 52. The Problem of God—(Formerly 32.) Monotheism is a belief for which people continue to live and die. Philosophical inquiry into the concept of God through its classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:DB-Hum

4 units, not given this year

RELIGST 54. The Roots of Right and Wrong in Christianity, Judaism, and Islam—What Christian, Jewish, and premodern Muslim thinkers have to say about these questions: what makes an act right or wrong; can a basis for right and wrong be identified independently of revealed religion; is observing commands and prohibitions sufficient to lead a life of virtue and refinement? Readings in primary texts. GER:DB-Hum

4 units, Win (Sadeki, B)

RELIGST 57. Millennium, Messiahs, and Mayhem—How the apocalypse has captured the imaginations and influenced the behaviors of many Jews and Christians who predict the end of the world during their lifetimes, whether facilitated by the arrival of a human or divine emissary, preceded by a cataclysm, or announced by a renunciation of normative morals. Examples include the Book of Revelations, the Dead Sea Scrolls, the Brotherhood of the Free Spirit, Shabtai Tzvi, Jacob Frank, the Mormons, and Chabad Chasidism.
4 units, Aut (Levinsky, D)

RELIGST 62. Philosophy of Religion—(Formerly 42.) Classic and modern questions through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and implications of science. Readings from traditional and modern texts. GER:DB-Hum
4 units, not given this year

RELIGST 82. Approaches to the Study of Religion: Christianity—Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:DB-Hum
4 units, not given this year

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity—The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum
4 units, not given this year

UNDERGRADUATE LECTURES

RELIGST 101. Islamic Theology, 700-1300 C.E.—How did attitudes towards God's nature define and distinguish different theological movements in premodern Islam? Were theological differences due to different methods of interpreting the Qur'ân? God's power, free will versus predestination, the age of the Universe. Political and social contexts. Readings mostly in primary sources. GER:DB-Hum
3 units, Aut (Sadeki, B)

RELIGST 104. Views of the Human Body in Daoism—The human body as seen in Daoist traditions and related areas, particularly cosmology and medicine. Major sources including images and charts, and the views of the human being that they reflect. GER:DB-Hum
4 units, not given this year

RELIGST 107. Hindus and Muslims in South Asia—The history of Hindus and Muslims living together in S. Asia for over 1,000 years. Peace and conflict, composite cultures, and interdependent social worlds. Partition in 1947 and the creation of separate nations. Religion, arts, society, and politics. GER:DB-Hum, EC-GlobalCom
4 units, not given this year

RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions—Miraculous births, wandering in the wilderness, encounters with angels: stories of Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender
4 units, not given this year

RELIGST 113A. Sacred Space and the Supernatural in Japanese Religion—Ties to place in Japanese religious history, legends, and religious practices. The role of Japan's mountains in the religious imagination.
4 units, Aut (Klonos, G)

RELIGST 114A. Sacred Journeys in Chinese Religion—Journey themes in Shamanic, Buddhist, Daoist, and popular Chinese religion from ancient to early modern period. Genres and traditions such as ancient shamanesses and their ecstatic trysts with nature deities, Daoist poets and their literary flights, and monks and their legendary westward journeys in search of Buddhist scripture.
4 units, Spr (Cook, T)

RELIGST 116. Daoist Thought, Daoist Religion—Main traditions and lineages of Daoism over its two and a half millennia of history. Sources include translated primary sources and secondary studies.
4 units, Spr (Pregadio, F)

RELIGST 118. Gandhi, King, and Nonviolence—(Same as HISTORY 105.) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today.
4 units, Win (Carson, C; Hess, L)

RELIGST 124. Sufi Islam—The complex of Islamic intellectual and social perspectives subsumed under the term Sufism. Sufi mystical philosophies and historical and social evolution. Major examples include: Qushayrî, Râbi'a, Junayd, Hallâj, Sulamî, Ibn al-'Arabî, Rûmî, Nizâm al-Dîn Awliyâ'. Social and political roles of Sufi saints and communities. Readings include original prose and poetry in translation, secondary discussions, and ethnography.
4 units, Aut (Bashir, S)

RELIGST 126. Protestant Reformation—16th-century evangelical reformers (Luther, Calvin) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum
4 units, not given this year

RELIGST 129. Modern Jewish Thought—From the early Enlightenment to the present. Universalism, subjectivity, and redemption within Judaism's encounter with modernity as reflected on by Jewish intellectuals within the Western philosophical tradition; how modern Jewish intellectuals have shaped and been shaped by current debates. Challenges to religious identity by secularism, capitalism, and the nation state. Messianism, mysticism, reactionary romanticism, critical theory, post-Holocaust philosophy, spirituality, and feminism. Thinkers include Spinoza, Marx, Freud, Buber, Strauss, the Frankfurt school, Benjamin, Arendt, and Levinas.
4 units, Spr (Lerner, A)

RELIGST 132. Jesus the Christ—How did Jesus of Nazareth, who never claimed to be Christ or divine, become the son of God after his death? Sources include the history of first-century Judaism and Christianity. GER:DB-Hum
4 units, Win (Sheehan, T)

RELIGST 133. Inventing Christianity in Late Antiquity—The transformation of an apocalyptic sect into an imperial religion from 200 to 600 C.E. Shifts in structures of authority, worship, and belief mapped against shifts in politics, economics and religion in the larger Roman empire. Cultural visions of this history including Edward Gibbon's *Decline and Fall of the Roman Empire*, Dan Brown's conspiracy theory in *The Da Vinci Code*, and Elaine Pagels' *The Secret Gospel of Thomas*. GER:DB-Hum
4 units, Spr (Lyman, R)

RELIGST 135. Daoist Ideals of Sainthood—Differing representations of the ideal of sainthood in Daoist texts from different backgrounds. Views of the Dao and application to self-cultivation, ethics, and government. GER:DB-Hum
4 units, Win (Pregadio, F)

RELIGST 136. Buddhist Yoga—Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER:DB-Hum, EC-GlobalCom
4 units, Win (Bielefeldt, C)

RELIGST 140. Crusades: Interdisciplinary Approaches—(Same as ENGLISH 103, HISTORY 215, MEDVLST 165.) Causes, meanings, meaningfulness, and commemoration of the Christian expeditions against Muslims, pagans, and heretics. Primary and secondary sources.
3-5 units, Spr (Buc, P; Summit, J; Gelber, H)

RELIGST 144. John Calvin and Christian Faith—Close reading and analysis of Calvin's *Institutes of the Christian Religion* as a classic expression of Christian belief. GER:DB-Hum
4 units, Aut (Pitkin, B)

RELIGST 148. From Jesus to Paul—Jesus considered himself God's definitive prophet, but he did not think he was God, and had no intention of founding a new religion. How did this Jewish prophet become the gentile God and the founder of Christianity? The role of Paul. GER:DB-Hum
4 units, not given this year

RELIGST 151/251. Indian Devotional Poetry—(Graduate students register for 251.) Poetry is a major vehicle of religious expression and understanding in India, but it is also music, performance, social experience. Lyric poetry devoted to Shiva, Krishna, Kali, and the God said to be beyond names and forms. Oral and written transmission, folklore, and performance theory. The transformations that occur when religious literature becomes song. GER:DB-Hum
4 units, Spr (Hess, L)

RELIGST 154. Buddhism Today: Responses to New Global Challenges—How do the traditions of Buddhism cope with new social, ethical, and global challenges? Case studies from Sri Lanka, Japan, and the West. The historical position of Buddhist social thought. Buddhism's ascetic and meditative legacy: friend or foe of social engagement? GER:DB-Hum, EC-GlobalCom
4 units, not given this year

RELIGST 156. Goddesses and Gender in Hinduism—India's tradition of worshiping female forms of the divine, including Kali, Durga, Lakshmi, Saraswati, Radha, Sita, and local deities. The stories, histories, iconographies, theologies, arts, and practices associated with these goddesses. How the worship of goddesses impacts the lives of women. Readings include *Is the Goddess a Feminist?* GER:DB-Hum, EC-Gender
4 units, not given this year

RELIGST 159. Music and Religion in South Asia—Music and religion have been closely related for millennia in the India subcontinent. Topics include theories of sound, mantra, music as yoga, guru-disciple relationship, devotional singing, gods and their relation to music, aesthetic theory, classical and folk forms, and Hindu and Muslim traditions. Practical instruction in music. GER:DB-Hum, EC-GlobalCom
4-5 units, not given this year

RELIGST 164. Ritual Musics of the World—(Same as CASA 164.) The roles of music in human ritual life. Psychological and physical effects of music in healing and trance-inducing rituals; its power to create and affirm communities and other affective ties; and its effectiveness as a medium for spiritual knowledge. What can be learned about people, places, and cultures through sound; how does music express and shape social identity and culture; how are belief systems and patterns of social interaction encoded and made manifest in musical practices? GER:DB-Hum, EC-GlobalCom
4 units, Aut (Diehl, K)

RELIGST 167. Medieval Religious Philosophy—(Same as PHIL 101.) Focus is on God, world, and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and *The Book of the World* as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham. GER:DB-Hum
4 units, not given this year

RELIGST 172. Sex, Body, and Gender in Medieval Religion—Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:DB-Hum, EC-Gender
4 units, not given this year

UNDERGRADUATE DIRECTED READING

RELIGST 199. Individual Work—Prerequisite: consent of instructor and department. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

UNDERGRADUATE SEMINARS

RELIGST 201/301. Classical Islamic Law—(Graduate students register for 301; same as LAW 586.) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts.
4-5 units, Win (Sadeki, B)

RELIGST 210. Translating the *Daode Jing*—One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum
4 units, not given this year

RELIGST 212. *Chuang Tzu*—The *Chuang Tzu (Zhuangzi)* in its original setting and as understood by its spiritual progeny. Limited enrollment. GER:DB-Hum
5 units, Win (Yearley, L)

RELIGST 216. Japanese Buddhism—Recent scholarship.
4 units, Spr (Bielefeldt, C)

RELIGST 217/317. Japanese Studies of Religion in China—(Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.
3 units, Aut (Kumada, N)

RELIGST 217A. Tibetan Ritual Life—(Same as CASA 127.) The human life cycle, the calendar year, and pilgrimage as organizing principles to examine Tibetan Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Material culture and performative aspects of Tibetan rituals, the meanings of these rituals to those who participate in them, and the role of ritual in human culture. GER:DB-Hum, EC-GlobalCom
5 units, Win (Diehl, K)

RELIGST 222. Literature and Society in Medieval Islam—The development of literary traditions, 600-1500. Major poetic and prose topoi through examples from Arabic, Persian, and Turkish literature in translation. Literature's place in Islamic societies and biographies of significant authors. The religious value of literary forms. Literary canons as unifying agents in different parts of the medieval Muslim world. Comparison between high and folk literatures. The role of aesthetic paradigms in the formation of Islamic religious and cultural identities.
4 units, Aut (Bashir, S)

RELIGST 223. Studying Islam: History, Methods, Debates—Islam as a subject of academic inquiry since the 19th century. Origins and critiques of major methodological perspectives in Islamic studies such as philology, religious studies, history, art history, and anthropology. Landmarks in the development of the field and the work of major scholars. Academic debates regarding unity versus diversity, orientalism, fundamentalism and Islamism, Sufism, and gender. Current trends in scholarship on medieval and modern Muslim societies. Prerequisite: course work in Islamic studies or methodology in religious studies.
4 units, Win (Bashir, S)

RELIGST 226/326. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period—(Graduate students register for 326.) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.
5 units, Win (Malkiel, D)

RELIGST 227/327. The Qur'ân—(Graduate students register for 327.) Early history, themes, structure, chronology, and premodern interpretation. Relative chronology of passages.

5 units, Aut (Sadeki, B)

RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries—To what extent are Judaism and Christianity products of the Roman Empire, and shaped by its politics? Literature concerning Jewish and Christian perceptions of power, and archaeological and artistic traces of both religions in the imperial city of Rome. What roles did strategies of resistance and accommodation play in the formation of these religious communities' emerging identities? Possible optional field trip to Rome over Spring break. GER:DB-Hum

5 units, Win (Gregg, R; Fonrobert, C)

RELIGST 238. Christian Neo-Platonism, East and West—Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine.

4 units, Spr (Sheehan, T)

RELIGST 245. Religion, Reason, and Romanticism—(Same as HUMNTIES 196B.) The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:DB-Hum

5 units, Aut (Sockness, B)

RELIGST 247. Chinese Buddhist Texts—From the first millennium C.E., including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese.

4 units, Spr (Harrison, P)

RELIGST 250. Classics of Indian Buddhism—Texts in English translation including discourses (sutras), philosophical treatises, commentaries, didactic epistles, hymns, biographies, and narratives.

4 units, Spr (Harrison, P)

RELIGST 251/351. Readings in Indian Buddhist Texts—(Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit.

1-5 units, not given this year

RELIGST 254. Recent Contributions to Buddhist Studies—May be repeated for credit.

4 units, Win (Harrison, P)

RELIGST 257/357. Readings in Daoist Texts—Readings from primary sources. Prerequisite: classical Chinese.

4 units, Spr (Pregadio, F)

RELIGST 258. Japanese Buddhist Texts—Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese.

4 units, Win (Bielefeldt, C)

RELIGST 263. Judaism and the Body—Representations and discourses of the body in Jewish culture; theories of body and ritual. Case studies of circumcision, menstrual impurity, and intersexuality. Readings include classical texts in Jewish tradition and current discussions of these textual traditions. GER:DB-Hum, EC-Gender

4 units, not given this year

RELIGST 271A,B. Dante's Spiritual Vision—Mysticism, poetry, ethics, and theology in Dante's *Divine Comedy*. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:DB-Hum

4-5 units, not given this year

RELIGST 274/374. From Kant to Kierkegaard—(Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum

3-5 units, not given this year

RELIGST 275/375. Kierkegaard and Religious Existentialism—(Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, *Concluding Unscientific Postscript to Philosophical Fragments*, in its early 19th-century context. GER:DB-Hum

3-5 units, not given this year

RELIGST 278/378. God, the Self, and Heidegger—(Graduate students register for 378.) What would it mean to own one's own life without appeal to the supernatural? The death of God in 19th-century thought; the discovery of the existential self in Heidegger's philosophy; and his method for coming to grips with one's life. Prerequisite: consent of instructor. GER:DB-Hum

4 units, not given this year

RELIGST 279/379. Heidegger and the Holy—(Graduate students register for 379.) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of *Being and Time* as an introduction to the question of the holy.

4 units, not given this year

RELIGST 280/380. Schleiermacher—(Graduate students register for 380.) Idealist philosopher, Moravian pietist, early German Romantic, cofounder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context.

3-5 units, Spr (Sockness, B)

RELIGST 290. Majors Seminar—Theories of religion versus religions themselves: attempts to define the phenomenon of religion in anthropology, psychology, sociology, and cultural studies, such as Sigmund Freud, Karl Marx, Emile Durkheim, Mircea Eliade, Max Weber, and Clifford Geertz; critical perspectives on the study of religion, such as gender and postcolonialism. WIM

4 units, Win (Gelber, H)

RELIGST 297. Senior Essay/Honors Essay Research—Guided by faculty adviser. May be repeated for credit. Prerequisite: consent of instructor and department.

3-5 units, Aut, Win, Spr (Staff)

RELIGST 298. Senior Colloquium—For Religious Studies majors writing the senior essay or honors thesis. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities.

5 units, Spr (Pitkin, B)

GRADUATE SEMINARS, RESEARCH, AND TEACHING

RELIGST 304A,B. Theories and Methods—Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, **A:** *Aut (Yearley, L),* **B:** *alternate years, not given this year*

RELIGST 308. Medieval Japanese Buddhism—Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film.

3-5 units, not given this year

RELIGST 312. Buddhist Studies Proseminar—Research methods and materials for the study of Buddhism. May be repeated for credit. Prerequisite: reading knowledge of Chinese or Japanese.
1-5 units, not given this year

RELIGST 321. The Talmud—Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew.
4 units, Spr (Fonrobert, C)

RELIGST 350. Modern Western Religious Thought Proseminar—Research methods and materials. May be repeated for credit.
1-5 units, Aut (Sheehan, T)

RELIGST 370. Comparative Religious Ethics—The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor.
4 units, Win (Yearley, L)

RELIGST 389. Individual Work for Graduate Students—May be repeated for credit. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

RELIGST 390. Teaching in Religious Studies—Required supervised internship for PhDs.
4 units, Aut, Win, Spr (Staff)

RELIGST 391. Pedagogy—Required of Ph.D. students. May be repeated for credit.
1 unit, Aut (Peskin, J)

RELIGST 392. Candidacy Essay—Prerequisite: consent of graduate director. May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

RELIGST 395. Master of Arts Thesis
2-9 units, Aut, Win, Spr (Staff)

RELIGST 399. Recent Works in Religious Studies—Readings in secondary literature for Religious Studies doctoral students. May be repeated for credit.
1-2 units, Spr (Sockness, B)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CLASSGEN 18. Greek Mythology
3-5 units, Win (Martin, R; Jones, E)

ENGLISH 301B. Medieval Devotion
5 units, Aut (Summit, J)

Courses given by the Center for Russian, East European and Eurasian Studies have the subject code REES. For a complete list of subject codes, see Appendix.

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University's teaching, research, and extracurricular activities related to the former Soviet Union and Eastern Europe, and administers two interdisciplinary academic programs: an undergraduate minor and an M.A. graduate degree program. Information on center programs and activities is available at http://CREEES.stanford.edu. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The programs draw on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia and East Europe.

UNDERGRADUATE PROGRAMS

MINOR

The minor in Russian, East European and Eurasian Studies (REEES) is an interdisciplinary area studies program that allows the participating student significant opportunity to select REEES courses in various departments according to his or her interests.

REQUIREMENTS

1. Two core courses: one on Russia and one on Eastern Europe or Eurasia, to be chosen by the student from an annual list of qualifying courses issued by CREEES.
2. At least four additional REEES courses, totaling at least 20 units.
3. The student's courses, core and additional, must be distributed among at least three departments. In addition to REEES courses in the departments of History, Political Science, and Slavic Languages and Literatures, REEES courses in departments such as Anthropology, Economics, and Sociology, when offered, may qualify. The CREEES academic coordinator determines which courses qualify for the minor.
4. A capstone experience in REEES, including, but not limited to, one of the following:
   a) a departmental seminar course for advanced undergraduates
   b) directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar
   c) participation in the Stanford Overseas Studies Program in Moscow.

Foreign Language—The REEES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of the former Soviet Union or Eastern Europe (excluding German) may be counted towards the REEES minor, up to a maximum of 3 units per academic quarter, 9 units total.

Additional Information—The total number of courses applied to the REEES minor must be at least six, but the minor should total no more than 36 units. Courses counting towards the REEES minor may not be counted towards the student's major. Courses taken at Stanford overseas campuses (particularly the Moscow campus) may count towards the REEES minor, with the approval in each case of the CREEES academic coordinator; at least three courses for the minor must be taken in residence at Stanford.

Approval of CREEES Academic Coordinator—Students interested in pursuing the REEES minor should consult the CREEES academic coordinator. The minor is declared online using the Axess system. Students declaring the REEES minor must do so no later than three quarters prior to their intended quarter of degree conferral. Approval of minor declarations and certification of requirements are made by the academic coordinator.

Students pursuing the REEES minor work with the CREEES academic coordinator, who is responsible for determining that requirements for the minor are satisfied.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

To qualify for a coterminal M.A. degree in Russian, East European and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master's degree conferral date. Applications and instructions may be obtained at http://registrar.stanford.edu/shared/publications.htm#Coterm. The deadline for all coterminal applications to the M.A. program in Russian, East European, and Eurasian Studies is January 8, 2008.
2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES academic coordinator in drafting this schedule. The application also should include: (a) a current Stanford transcript; (b) a one-page statement of purpose; and (c) two letters of recommendation from Stanford professors. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.
3. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor's degree, a minimum of 48 units for the master's degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master's degree. Requirements for completion of the M.A. degree are summarized below; a more detailed description of the program and requirements is available from the center.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding, and appreciation of Russia, the former Soviet Union, and Eastern Europe.

OVERSEAS STUDIES PROGRAMS

Undergraduate students interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia, and Eastern Europe can apply to study at the Stanford centers in Moscow and Berlin. Participation in these programs is encouraged and easily integrated into the REEES minor. Information about these programs is available at http://osp.stanford.edu.

GRADUATE PROGRAMS

MASTER OF ARTS

CREEES offers a one-year intensive interdisciplinary master's degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the former Soviet Union and Eastern Europe. This core curriculum consists of three core courses and REES 200, Core Seminar Series. The program may be taken separately or coterminally with a B.A. degree program. The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, or law, and who wish to establish competence in Russian, East European and Eurasian studies.
2. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials.
3. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European and Eurasian studies.

ADVISING

The advising structure is two-tiered: each M.A. candidate works with the CREEES academic coordinator who advises on the program of course work and monitors the student's progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

ADMISSION

Applicants are encouraged to apply electronically; see http://gradadmissions.stanford.edu/ for a link to the electronic application and general information regarding graduate admission. In addition, prospective applicants are strongly encouraged to consult with the academic coordinator at CREEES regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.
2. Applicants must have completed at least three years of college-level Russian language study or the equivalent prior to beginning the program. Other languages of Eastern Europe or the former Soviet Union may be accepted on a case-by-case basis.

3. Applicants whose native language is not English are ordinarily expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.
4. All applicants must take the General Test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

The deadline for submission of applications for admission and for financial aid is January 8, 2008. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation, and a persuasive statement of purpose explaining why and how the program fits the applicant's academic and career goals.

DEGREE REQUIREMENTS

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the "Graduate Degrees" section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREEES academic coordinator, selects courses according to the student's interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. *Core courses:* students must complete three, one quarter core courses. Each year, four to six courses, typically from the History, Political Science, and Slavic Languages and Literatures departments, are designated as M.A. core courses; students may select three of these to meet the core course requirement. Courses selected as core courses examine subject areas of fundamental importance within modern Russian, East European and Eurasian Studies, and address questions of research, methodology, and current scholarship.
2. *Core seminar:* 200, Current Issues in Russian, East European and Eurasian Studies, is required of all students in the M.A. program for a total of three academic quarters. The goal of this course is to survey current methodological and substantive issues in Russian, East European and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.
3. *Interdisciplinary course work:* a minimum of five graduate courses in Russian, East European and Eurasian studies must be completed and distributed among at least three departments. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.
4. *Language study*: students in the program are expected to study Russian or another language of the former Soviet Union or Eastern Europe. Credit towards the 48-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work; in the case of Russian, "advanced" is defined as third-year Russian language instruction and above. Similar standards apply for other languages.
5. All course work qualifying for the 48-unit minimum (except REES 200) must have a letter grade of 'B' or higher. ('B-' does not count for degree credit, nor does 'S' or 'CR'.)
6. All courses counting towards the 48-unit minimum must be approved by the CREEES academic coordinator, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements.

A description of the M.A. program is also available on the web at http://CREEES.stanford.edu/GraduatePrograms.html and by request from the Center for Russian, East European and Eurasian Studies.

FINANCIAL AID

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants in the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships in the Graduate School of Business, the School of Medicine, and the School of Law. Consult the CREEES academic coordinator for further information about the application and award process. Applications for FLAS fellowships can be obtained at http://CREEES.st anford.edu/FellowshipsGrants.html.

DOCTORAL PROGRAMS

Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Political Science, or Slavic Languages and Literatures.

COURSES

REES 200. Current Issues in Russian, East European, and Eurasian Studies—Enrollment limited to REEES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.
1 unit, Aut (Safran, G; Kollmann, J), Win, Spr (Dunlop, J; Kollmann, J)

REES 299. Directed Reading
1-12 units, Aut, Win, Spr (Staff)

COGNATE COURSES

The following courses deal at least in part with Russia, the former Soviet Union, or Eastern Europe. See the respective department listings for course descriptions. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly *Time Schedule* or contact the Center for Russian, East European and Eurasian Studies. Students in the area studies M.A. program must have their course list approved each quarter by the academic coordinator prior to enrollment. For relevant language courses, see the "Language Center" section of this bulletin.

ARTHIST 446. The Russian and Soviet Avant Garde
5 units, Aut (Gough, M)

CASA 114/214. Minaret and Mahallah: Women, Music, and Islam in Central Eurasia
5 units, Spr (Kunanbaeva, A)

CASA 173/273. Nomads of Eurasia: Culture in Transition
4-5 units, Win (Kunanbaeva, A)

FILMSTUD 131/331. Politics and Aesthetics in East European Cinema
4 units, Aut (Levi, P)

HISTORY 23S. Living and Killing in the Ethnic Borderlands: Eastern Europe, 1914-48
5 units, Aut (Ward, K)

HISTORY 62N. The Atomic Bomb in Policy and History
5 units, Spr (Bernstein, B)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)
5 units, Spr (Holloway, D)

HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008
5 units, Spr (Patenaude, B)

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jolluck, K)

HISTORY 137/337. The Holocaust
4-5 units, Spr (Felstiner, M)

HISTORY 204E/307E. Origins of Totalitarianism
4-5 units, Aut (Weiner, A)

HISTORY 221B. The Woman Question in Modern Russia
5 units, Aut (Jolluck, K)

HISTORY 221D/321D. Women's Activism in War and Peace
4-5 units, Spr (Jolluck, K)

HISTORY 226E. The Creation and Destruction of Yugoslavia
5 units, Aut (Knezevic, J)

HISTORY 226G/326G. Civilians and War in Modern Europe
4-5 units, Spr (Knezevic, J)

HISTORY 226H/326H. Nationalism in the Habsburg Empire, 1848-1918
4-5 units, Win (Knezevic, J)

HISTORY 227A/327A. The History of Genocide
4-5 units, Win (Naimark, N)

HISTORY 229/329. Poles and Jews
4-5 units, Win (Jolluck, K)

HISTORY 252/355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
4-5 units, Aut (Bernstein, B)

HISTORY 299X/399A. Design and Methodology for International Field Research
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 424A. The Soviet Civilization
4-5 units, Win (Weiner, A)

HISTORY 424B. The Soviet Civilization
4-5 units, Spr (Weiner, A)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as IPS 230, POLISCI 114D/314D.)
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries
5 units, Aut (Bojic, J)

INTNLREL 166. Russia and Islam
5 units, Win (Dunlop, J)

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music
3 units, Win (Zemtsovsky, I)

POLISCI 114S. International Security in a Changing World
5 units, Win (Sagan, S; Blacker, C)

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.)
5 units, Spr (Blacker, C)

POLISCI 318R. State and Nation Building in Central Asia
5 units, Spr (Lapidus, G)

POLISCI 340S. Political Economy of Post-Communism
5 units, Spr (McFaul, M.)

SLAVGEN 13N. Russia and the Russian Experience
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol
3-4 units, Aut (Fleishman, L)

SLAVGEN 110/210. The Gogol Bordello: Ukraine as a Meeting House of Cultures
3-5 units, Spr (Labov, J)

SLAVGEN 125/225. Martyrs, Monks, and Missionaries: An Introduction to Orthodox Sainthood
3-4 units, Aut (White, M)

SLAVGEN 145/245. Age of Experiment: From Pushkin to Gogol
3-4 units, Aut (Fleishman, L)

SLAVGEN 146/246. The Great Russian Novel: History and Transgression in Tolstoy and Dostoevsky
3-4 units, Win (Greenleaf, M)

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present
4-5 units, Spr (Freidin, G)

SLAVGEN 150/250. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry
3-4 units, Aut (Fleishman, E)

SLAVGEN 151/251. Dostoevsky and His Times—(Same as COMPLIT 119/219.)
4 units, Win (Frank, J)

SLAVGEN 169/269. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory
3-5 units, Spr (Zemtsovsky, I)

SLAVLIT 184/284. The History of the Russian Literary Language
4-5 units, Win (Schupbach, R)

SLAVLIT 188/288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century
3-4 units, Win (Fleishman, L)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature
4 units, Aut (Freidin, G)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies
2-3 units, Aut (Fleishman, L)

SLAVLIT 305. Russian Critical Traditions
4 units, Aut (Safran, G)

SCIENCE, TECHNOLOGY, AND SOCIETY

Emeriti: James Adams (Management Science and Engineering, Mechanical Engineering), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)

Director: Robert McGinn (Management Science and Engineering; Science, Technology, and Society)

Program Committee: Stephen Barley (Management Science and Engineering, on leave), Hank Greely (Law), Ursula K. Heise (English), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication, on leave)

Lecturers: Henry Lowood, Rebecca Slayton, Patrick Windham

Consulting Professor: Naushad Forbes (Science, Technology, and Society)

Affiliated Faculty and Staff: Stephen Barley (Management Science and Engineering, on leave), Barton Bernstein (History), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Jean-Pierre Dupuy (French), Paula Findlen (History, on leave), Hank Greely (Law), Ursula K. Heise (English), Sarah Jain (Anthropology), Joseph Manning (Classics), Brad Osgood (Electrical Engineering), Robert Proctor (History), Jessica Riskin (History), Eric Roberts (Computer Science), Scott Sagan (Political Science), Londa Schiebinger (History), Michael Shanks (Classics, Anthropology), Fred Turner (Communication, on leave), Gavin Wright (Economics)

Mail Code: 94305-2120
Phone: (650) 723-2565
Web Site: http://sts.stanford.edu

Courses given in Science, Technology, and Society have the subject code STS. For a complete list of subject codes, see Appendix.

Technology and science are activities of central importance in contemporary life, intimately bound up with society's evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human well-being, they and their effects on society and the individual must be better understood by non-technical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and their ethical, social, and environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is an interdisciplinary program devoted to understanding the natures, consequences, and shaping of technological and scientific activities in modern and contemporary societies. Achieving this understanding requires critical analysis of the interplay of science and technology with human values and world views, political and economic forces, and cultural and environmental factors. Hence, students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either literacy (B.A.) or a solid grasp of fundamentals (B.S.) in some area of engineering or science.

GENERAL INFORMATION

STS courses may be used, individually or in groups, for purposes such as:

1. To satisfy University General Education Requirements
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS Honors Program complementing any major (see below)
5. To satisfy requirements for majors in STS (see below)
6. To satisfy requirements for a minor in STS (see below)

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology and science-related aspects of modern society and culture.

The STS Program is a unit of the Center for the Interdisciplinary Study of Science and Technology (CISST). For further information about CISST see the "Academic Centers" section of this bulletin.

UNDERGRADUATE PROGRAMS

Degree programs in STS are interdisciplinary curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the B.A. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, issue, problem, or area of personal interest related to science and technology in society. Those seeking the B.S. degree complete at least 50 structured units in technology, science, and/or mathematics. The particular technical courses chosen reflect the student's special interest in science and technology in society. Specific requirements for the bachelor's degree in STS are as follows:

BACHELOR OF ARTS

1. *STS Core* (eight courses):
   - a) Interdisciplinary Foundational course: STS 101 or 101Q
   - b) Disciplinary Analyses (five courses with at least one in each category):
     - 1) philosophical/ethical perspectives: STS 110, 112, 114; PHIL 61
     - 2) historical perspectives: STS 120, 125, 128, 134, 141; CLASSGEN 133; ECON 116; HISTORY 208A, 232F
     - 3) social science perspectives: CASA 82, 132; COMM 120, 169; MS&E 181, 184, 185, 193; POLISCI 114S, 116
   - c) Advanced courses (one course in each category):
     - 1) disciplinary analysis: STS 210, 211, 221, 225, 234; CS 201; COMM 268; ECON 224, 226; HISTORY 232G, 243G, 244C; ME 314; MS&E 281
     - 2) senior colloquium: STS 200
2. *Technical Literacy* (five courses):
   - a) CS 105 or 106A or equivalent; and
   - b) A four-course sequence (minimum of 12 units) in one field of engineering or science (sample sequences available in the STS office); *or*
   - c) Four of the following Engineering Fundamentals courses: Engineering 10, 14, 15, 20, 25, 30, 31, 40, 50, 50M, 60, 62, 70A (see course descriptions in the "School of Engineering" section of this bulletin).
3. *Thematic Concentration* (minimum of 20 units, at least five courses, one each from among those designated on the appropriate concentration course list as foundational and advanced). Thematic concentrations are organized around an STS-related problem or area. The following thematic concentrations have been pre-certified as declarable fields of study on Axess: The Intersections of Technology and Science with Aesthetics; Development; History and Philosophy; Information and Society; Public Policy; Social Change; and Work and Organizations. These fields of study appear on the transcript but not on the diploma.

   Course lists for these thematic concentrations are available in the STS office. A student choosing one of the certified topics may include one or more courses not on the corresponding course list if they are germane to the concentration and meet the student's special interests.

   Alternatively, the student may choose to design a thematic concentration topic and course package subject to program approval. A self-designed thematic concentration is not declared on Axess.

Each thematic concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the program director for details.

BACHELOR OF SCIENCE

The student pursuing the B.S. degree shall complete the STS Core and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science. Introductory courses in mathematics or physics (for example, MATH 19 or PHYSICS 19) are not normally counted as parts of this technical depth component.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit technical depth requirement:

1. *Focused Depth:* at least seven courses amounting to at least 25 units in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in sequences of at least three courses each in other fields of science or engineering. For example, a focused depth package might contain eight mechanical engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry. At least four of the seven courses in the focused depth area must be advanced, that is, not normally taken in the first year of study in that field.
2. *Clustered Depth:* two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a clustered depth package might contain five-course clusters in computer science, electrical engineering, and physics, three courses in civil engineering, and one course each in biology and chemical engineering. At least two courses in each cluster area must be advanced.

It is recommended that B.S. majors complete CS 106A or equivalent.

MINOR

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

Requirements—The STS minor requires successful completion of six courses satisfying the following requirements:

1. Foundational Course: STS 101 or 101Q
2. One disciplinary analysis course from each of the following categories:
   a) Philosophical/Ethical Perspectives: STS 110, 112, 114, 115; PHIL 61
   b) Historical Perspectives: STS 120, 125, 128, 134, 141, 144; CLASSGEN 133; ECON 116; HISTORY 208A, 232F
   c) Social Science Perspectives: CASA 82, 132; COMM 120, 169; ENGR 145; MS&E 181, 184, 185, 193; POLISCI 114S, 116; PUBLPOL 194
3. Two advanced courses, from one or two of the following categories, building on courses taken under requirements 1 and 2:
   a) Philosophical/Ethical Perspectives: STS 210, 211; CS 201; ME 314
   b) Historical Perspectives: STS 221, 225, 234; ECON 224, 226; HISTORY 232G, 243G, 244C
   c) Social Science Perspectives: STS 279; COMM 268; ECON 224, 226; MS&E 281
4. At least one of the courses taken under requirements 1 to 3 should incorporate a weekly, small group discussion.
5. With at most one exception, all courses taken to satisfy STS minor requirements must be taken for a letter grade where available. The exception cannot be STS 101 or 101Q.
6. The six courses taken under requirements 1-3 should be chosen so as to realize a measure of intellectual coherence and interrelatedness.

Note—Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. For details, inquire at the STS office, Building 370, Room 109.

HONORS PROGRAM

STS offers a limited number of students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field (including STS). Students accepted for this program carry out an honors project, typically beginning in Spring Quarter of junior year and finishing by the end of senior year. Students who want their theses to be considered for a Firestone Award must submit them to STS by May 21; all theses must be submitted to STS by June 7. STS thesis projects entail writing an honors thesis, although occasionally students have also chosen to produce a technical artifact or carry out some other work that itself represents original thinking. When a project results in a work other than an essay, students must also submit an accompanying scholarly exegesis of the work in question.

ADMISSION

Application for admission to the STS honors program is typically made during the last quarter of the student's junior year. By the end of that quarter, interested students must have completed all courses required to satisfy honors requirements 1-5 listed below. Each applicant must also have submitted a formal proposal for her or his project to the STS Honors Committee, including the name of the primary thesis adviser. For proposal parameters, see the document *STS Honors Program*, available in the STS office. Students whose proposals are approved are encouraged to apply to attend Honors College in early September to get a running start on their theses. STS honors students are also encouraged to sign up for 1-5 units of credit per quarter in STS 195A,B,C for work on the honors project. While not required, doing so leaves the student sufficient time to finish the thesis in three quarters. Writing a senior honors thesis while simultaneously carrying a full academic load each quarter is a very difficult task to complete with distinction. STS majors pursuing honors take STS 200 for 2 units instead of 4 and do not write a research paper for this required course. However, failure to complete the thesis requires additional research work in STS 200.

REQUIREMENTS

For non-STS majors:

1. Foundational Course: STS 101 or 101Q
2. One Philosophical/Ethical Perspectives course: STS 110, 112, 114 115, 210, 211; CS 201; PHIL 61
3. One Historical Perspectives course: STS 120, 125/225, 128, 134/234, 141, 221, CLASSGEN 133; ECON 116, 224, 226; HISTORY 208A, 232F, 232G, 243G, 244C
4. One Social Science Perspectives course: STS 218, 279; CASA 82, 132; COMM 120, 169; ECON 224, 226; MS&E 181, 184, 185, 193, 281; POLISCI 114S, 116
5. Honors Seminar: STS 190 (typically taken in the spring quarter of the junior year)
6. Honors Project: an original critical essay (or investigative project with accompanying explanatory essay) on an STS topic of general importance. Past honors projects are on file in the STS office library.

For STS majors:

1. Completion of STS core.
2. Requirements 5 and 6 above.

To earn honors, the project must receive a grade of at least 'B' on the completed thesis. The student not majoring in STS must also achieve a grade point average (GPA) of at least 3.4 in the courses taken to satisfy requirements 1-5 above. In the case of STS majors, the student must compile a GPA of at least 3.4 in the entire STS core. If all these requirements are met, the designation "Honors Program in Science, Technology, and Society" is affixed to the student's permanent record and appears in the commencement program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

See http://sts.stanford.edu for updated course scheduling information, course syllabi, faculty and staff information, and information about how to declare a major or a minor in STS.

INTRODUCTORY

STS 101. Science, Technology, and Contemporary Society—(Graduate students register for 201; same as ENGR 130.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci

4-5 units, Aut (McGinn, R)

STS 101Q. Technology in Contemporary Society—Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci

4 units, Aut (McGinn, R)

PHILOSOPHICAL/ETHICAL PERSPECTIVES

STS 110. Ethics and Public Policy—(Same as MS&E 197, PUBLPOL 103B.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM

5 units, Win (McGinn, R)

STS 115. Ethical Issues in Engineering—(Same as ENGR 131.) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum

4 units, alternate years, not given this year

COGNATE COURSES—PHILOSOPHICAL/ETHICAL PERSPECTIVES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

PHIL 61. Science, Religion, and the Birth of Modern Philosophy—(Same as HPS 61.)

5 units, Win (Friedman, M)

HISTORICAL PERSPECTIVES

STS 128. Science and Technology in WW II and What Happened Afterward—(Same as EE 45.) The efforts of engineers, mathematicians, and scientists during WWII. The effect on the postwar world in areas such as information, communication, transportation, materials, and medicine. Science and engineering in the war effort, and what became of them after the war, drawn from: encryption and computation; radar, communication, and electronics; control and optimization; materials; drugs and medicine. GER:DB-EngrAppSci

3 units, Win (Osgood, B)

STS 134. History of the Senses—(Graduate students register for 234; same as HISTORY 241G/341G.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci

4-5 units, not given this year

STS 144. Game Studies: Issues in Design, Technology, and Player Creativity—What can be learned about innovation from digital games? Digital game technologies, communities, and cultures. Topics include game design, open source ideas and modding, technology studies, player/consumer-driven innovation, fan culture, transgressive play, and collaborative co-creation drawn from virtual worlds and online games.

4 units, Spr (Lowood, H)

COGNATE COURSES—HISTORICAL PERSPECTIVES

ECON 116. American Economic History

5 units, Spr (Wright, G)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)

5 units, Spr (Holloway, D)

HISTORY 208A/308A. Science and Law in History

4-5 units, Spr (Riskin, J)

HISTORY 232F/332F. The Scientific Revolution

4-5 units, Win (Riskin, J)

SOCIAL SCIENCE PERSPECTIVES

STS 160. Controversy and Closure: The Politics of Technical Expertise—What are the causes and consequences of global warming? Do birth control pills increase the risk of cancer? Was there prewar evidence of WMD in Iraq? How political institutions, culture, and technology shape techno-political advice and common assumptions about who counts as an expert.

4 units, Win (Slayton, R)

STS 165. Science and Engineering in the Security State—How defense research changes how scientists and engineers work. How the research projects of the Cold War shaped practices in disciplines including computing, physics, biology, medicine, environmental sciences, and social sciences. Challenges faced by scientists and engineers in the context of heavy defense spending.

4 units, not given this year

STS 170. Technology in Modern Security Discourse—Technology's central role in discussions of international security issues including nuclear proliferation or containment, ballistic missiles or anti-missiles, biological weapons or vaccines, and data mining or computer security. What uses can and should technology serve in diplomacy? Why are some weapons stigmatized while others are deemed acceptable? How does discourse itself become a weapon? The history of the technologies and the discourses about them.

4 units, not given this year

STS 176. Technology and Politics—The impact of politics, scientific advice, and government actors on new technologies; their effects on political life. How politics have shaped the development, use, and regulation of information, bio-, nano-, space-based weapons, nuclear power, and greenhouse gas technologies. How technologies such as television, the Internet, and large computer databases have affected democratic politics, freedom, privacy, equality, civil society, and political participation. Focus is on U.S. politics; attention to developments elsewhere.
5 units, Aut (Windham, P)

COGNATE COURSES—SOCIAL SCIENCE PERSPECTIVES

CASA 82/282. Medical Anthropology
4-5 units, Win (Kohrman, M)

CASA 132. Science, Technology, and Gender
3-5 units, not given this year

COMM 120/220. Digital Media in Society
4-5 units, not given this year

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass, C)

ENGR 145. High Technology Entrepreneurship
4 units, Aut (Gould, A; Kosnik, T), Win (Byers, T; Kosnik, T)

MS&E 181. Issues in Technology and Work for a Post-Industrial Economy
3 units, Spr (Nelson, A)

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

POLISCI 114S. International Security in a Changing World—(Same as IPS 241.)
5 units, Win (Sagan, S; Blacker, C)

PUBLPOL 194. Technology Policy
5 units, Win (Windham, P)

HONORS AND INDEPENDENT STUDY

STS 190. Honors Seminar—For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.
4 units, Spr (Slayton, R)

STS 195A,B,C. Honors Research—For students in STS honors program. 195A for submission of proposal; 195B for continued study and writing; 195C for final work on project.
1-5 units, Aut, Win, Spr (Staff)

STS 199. Individual Work
1-5 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

STS 200. Senior Colloquium—Analytical and theoretical texts treating the natures and interplay of science, technology, and society. Only STS majors writing senior honors theses may register for 2 units. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
2-4 units, Win (Dupuy, J), Spr (Heise, U)

PHILOSOPHICAL/ETHICAL PERSPECTIVES

STS 201. Science, Technology, and Contemporary Society—(Same as 101, ENGR 130; see 101.)
4-5 units, Aut (McGinn, R)

STS 210. Ethics, Science, and Technology—Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum
4 units, Spr (McGinn, R), alternate years, not given next year

STS 211. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Same as FRENGEN 258E.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology.
3-5 units, alternate years, not given this year

COGNATE COURSES—PHILOSOPHICAL/ETHICAL PERSPECTIVES

CS 201. Computers, Ethics, and Social Responsibility
3-4 units, Win (Johnson, M)

ME 314. Good Products, Bad Products
3-4 units, Win (Beach, D)

HISTORICAL PERSPECTIVES

STS 221. The Politics and Ethics of Modern Science and Technology—(Same as HISTORY 257/347.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-SocSci
4-5 units, not given this year

STS 234. History of the Senses—(Same as 134, HISTORY 241G/341G; see 134.)
4-5 units, not given this year

COGNATE COURSES—HISTORICAL PERSPECTIVES

ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David, P)

ECON 226. U.S. Economic History
2-5 units, Spr (Wright, G)

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo
4-5 units, not given this year

HISTORY 241F/341F. History of the Modern Fact
4-5 units, not given this year

HISTORY 243G/343G. Tobacco and Health in World History
4-5 units, Aut (Proctor, R)

HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
4-5 units, not given this year

SOCIAL SCIENCE PERSPECTIVES

STS 279. Technology, Policy, and Management in Newly-Industrializing Countries—Technology as the key to development and prosperity. Building technological capability in newly industrializing countries at the national and firm levels. Government intervention, the concept of technology leader and follower environments, technology transfer from leader countries, indigenous technological capability, human capital, culture and innovation, the role of small firms and new enterprises. How innovation is different in technology followers, organizing for shop floor innovation, building an innovation culture, the role of R&D, design, and technology strategy in followers. Cases from Korea, India, Brazil, Singapore, and other NICs.
2-4 units, Spr (Forbes, N), offered occasionally

COGNATE COURSES—SOCIAL SCIENCE PERSPECTIVES

COMM 268/368. Experimental Research in Advanced User Interfaces
1-5 units, Win, Spr (Nass, C)

MS&E 184. Technology and Work
3 units, Aut (Bailey, D)

MS&E 185. Global Work
4 units, not given this year

MS&E 281. Management and Organization of Research and Development
3 units, Aut (Nelson, A)

INDEPENDENT STUDY

STS 299. Advanced Individual Work
1-5 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Science, Technology, and Society major and taught overseas can be found in the "Overseas Studies" section of this bulletin, in the Overseas Studies office, or at http://osp.stanford.edu/.

FLORENCE

OSPFLOR 134F. Modernist Italian Cinema
5 units, Aut (Campani, E)

SLAVIC LANGUAGES AND LITERATURES

Emeriti: (Professors) Joseph Frank,* Joseph A. Van Campen
Chair: Gregory Freidin
Director of Graduate Studies: Lazar Fleishman
Director of Undergraduate Studies: Gabriella Safran
Professors: Lazar Fleishman, Gregory Freidin, Richard D. Schupbach
Associate Professors: Monika Greenleaf, Gabriella Safran
Senior Lecturer: Rima Greenhill
Lecturers: Eugenia Khassina, Monica White (Humanities Fellow)
Visiting Professor: Izaly Zemtsovsky

---

* Recalled to active duty.

Department Offices: Building 240, Room 102
Mail Code: 94305- 2006
Phone: (650) 723-4438
Email: slavic@stanford.edu
Web Site: http://slavic.stanford.edu

Courses given in Slavic Languages and Literatures have the subject codes SLAVGEN, SLAVLANG, and SLAVLIT. For a complete list of subject codes, see Appendix.

Systematic study of Russian literature in this country developed against the backdrop of political tensions following the Bolshevik revolution in 1917. With the disintegration of the Soviet Union and the fall of Communism, new perspectives on the literatures and cultures of this region have opened up. The study of Russian and other Slavic languages continues to attract students seeking careers in diplomacy and teaching, but it now also offers gateways to a world of cultures responding to the post-socialist challenge. It also prepares students for careers in business, law, human rights, policy, and academia.

The study of Slavic and East European literatures, arts, and cinema draws upon culture studies, literary theory, and other humanistic disciplines. Formerly invisible topics of study include smaller ethnic groups, gender, Eastern Orthodoxy and literature, and interactions between Slavs and Islam and Buddhism.

Slavic studies students make use of Stanford's faculty and library resources, as well as the Center for Russian, East European and Eurasian Studies and the Hoover Institution and its Slavic and East European collections. Undergraduates are invited to study at Stanford's Moscow campus.

The department's graduate and undergraduate teaching and advising emphasize language mastery; students are encouraged to reach out to other disciplines and turn unexpected corners in their own research.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Slavic Languages and Literatures (Slavic) offers two fields of study for undergraduate majors: Russian Language and Literature; and Russian Language, Culture, and History. These fields of study are declared on Axess and appear on the transcript but not on the diploma. The department also offers a degree option in Russian and Philosophy. This option is not declared on Axess and does not appear on the transcript or the diploma.

Writing in the Major—Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement by passing SLAVGEN 146.

RUSSIAN LANGUAGE AND LITERATURE

The Russian Language and Literature field of study is designed for those students who desire to gain command of the Russian language and to study the nation's literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. Students may explore historically related literary traditions (for example, English, French, German), as well as other related fields. The Russian Language and Literature field of study also welcomes students with an interest in Russian and Slavic linguistics.

Prerequisites—Completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a Russian Language and Literature field of study must complete an additional 52 units according to the following distribution:

Russian Language—A minimum of 12 units from: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

Russian Literature—The 16-unit core literature sequence consisting of: SLAVGEN 145, 146, 147 or 148; SLAVLIT 187 or 188.

Electives—Students must take 24 units of electives embracing at least two of the following categories: (1) Russian language or linguistics; (2) Russian literature; and (3) historically related literatures. These courses are chosen in consultation with the undergraduate director. With department permission, work in related academic fields may be applied toward the degree requirements. Students who have completed IHUM 28A,B, Poetic Justice: Order and Imagination in Russian Culture, with a grade of 'B' or better may count these 10 units towards elective courses required for the major in Russian Languages and Literature or the major in Russian Language, Culture, and History.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

RUSSIAN LANGUAGE, CULTURE, AND HISTORY

The Russian Language, Culture, and History field of study is for students who would like to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature and other expressive media including film, as well as cultural traditions and institutions. Emphasis is placed on the relation of the Russian literary tradition to disciplines that have enriched the historical understanding of Russian literature: primarily history, but also anthropology, communications, political science, and sociology.

Prerequisites—Completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a Russian Language, Culture, and History field of study must complete an additional 52 units according to the following distribution.

Russian Language—A minimum of 12 units from: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

19th-Century Russian Literature and History—A minimum of 8 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 145, 146
HISTORY 120B

20th-Century Russian Literature and History—A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 147 or 148
HISTORY 120C

Electives—In order to complete the basic degree requirements, students must take 24 additional units of course work embracing at least two of the following categories: (1) Russian language; (2) Russian literature; and (3) Russian history. These courses are chosen in consultation with the undergraduate director. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors in the Russian Language, Culture, and History field of study must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

RUSSIAN AND PHILOSOPHY

The Russian and Philosophy option offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, with administrative staff in the DLCL. This option is not declared on Axess.

Prerequisites—Completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

Russian Language—A minimum of 12 units selected from: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

Russian Literature—A minimum of 16 units of Russian literature, including the following:

1. SLAVGEN 145 and 146
2. SLAVGEN 147 or 148
3. SLAVLIT 187 or 188

Electives—At least 12 units of electives in Russian language and literature, selected in consultation with the undergraduate director.

Philosophy and Literature Gateway Course (4 units)—SLAVGEN 181 (same as PHIL 81).

Philosophy Writing in the Major (5 units)—PHIL 80; prerequisite: introductory philosophy course.

Philosophy Core—12 units, including the following:

1. *Value Theory:* a course in the PHIL 170 series
2. *Theories of Mind, Language, Action:* a course in the PHIL 180 series
3. *History of Philosophy:* a course from the PHIL 100-139 series

Related Course—An upper-division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

Capstone Seminar—this year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.

Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major. Courses in other departments may not, in general, be counted toward the Russian language, Russian literature, and elective requirements, but may be counted toward the other requirements.

DIGITAL HUMANITIES MODULE

The Slavic department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Russian major and the digital humanities module must fulfill the following requirements in addition to the general Russian major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab gateway core seminar, HUMNTIES 198J/ENGLISH 153H, Digital Humanities: Literature and Technology (5 units)
3. Complete the HUMNTIES 201, Digital Humanities Practicum (2-5 units), in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project. For more information on the Digital Humanities Lab, see http://shl.stanford.edu.

MINORS

The Department of Slavic Languages and Literatures offers three undergraduate minor options in Slavic Languages and Literature.

The minor is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture, whether through (1) Russian language courses, or (2) a combination of minimal proficiency in Russian and courses in the history of Russian culture, or (3) courses on Russian literature in translation and, depending on the student's interest, other forms of the country's cultural expression and social institutions. Students seeking a Slavic minor are encouraged to take advantage of the Bing Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units of IHUM credit towards their electives.

RUSSIAN LANGUAGE

Prerequisites—The minor option in Russian Language requires completion of SLAVLANG 51, 52, 53, or a demonstrated equivalent competence, as determined by the departmental Russian language placement examination.

Requirements—Candidates for the B.A. degree with a minor option in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution: 12 to 15 units selected from SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183; the remaining 9-12 units should be chosen from SLAVGEN 145, 146, 147, 148, SLAVLIT 187, 188, other monograph courses offered by the department, or, with the approval of the department's undergraduate adviser, in history, politics, linguistics, or other relevant programs.

RUSSIAN LANGUAGE, LITERATURE, AND CULTURE

Prerequisites—The minor option in Russian Language, Literature, and Culture requires completion of SLAVLANG 1, 2, 3, or the equivalent, as determined by the departmental Russian language placement examination.

Requirements—Candidates for the B.A. degree with the minor option in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:

1. A minimum of 16 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: two quarters in the SLAVGEN 145, 146, 147, 148 sequence, Russian Literature in English Translation, or one quarter in the SLAVGEN 145, 146, 147, 148 sequence and one quarter in the SLAVLIT 187, 188 sequence, Russian Poetry (prerequisite: second-year Russian); and at least one monograph course focusing on a single writer.

2. 12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department's undergraduate adviser, in History, Linguistics, Political Science, or other relevant programs.

RUSSIAN CULTURE

Candidates for the B.A. degree with the minor option in Russian Culture must complete 36 units according to the following distribution: a minimum of 20 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: three quarters in the SLAVGEN 145, 146, 147, 148 sequence, Russian Literature in English Translation, and two monograph courses focusing on a single writer. In addition, one course in Russian history is selected from HISTORY 120B or 120C. No knowledge of Russian is required.

Electives—11 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department's undergraduate adviser, in Art, History, Linguistics, Political Science, or other relevant programs.

The deadline for minor declarations in all options is no later than the last day of the third quarter before degree conferral.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

HONORS PROGRAM

Majors in any track or option with a grade point average (GPA) of 3.3 (B+) or better in their major courses are eligible to participate in the department's honors program. Prospective honors students may enroll for 2 units of credit in SLAVLIT 189B in Spring Quarter of the junior year to conduct preliminary research and draft an honors proposal. In addition to the program requirements above, students must also complete the following:

1. Majors who propose a senior project in literature must take a course in literary or cultural theory; this requirement may be fulfilled by enrollment in DLCL 189 or, with approval of the thesis adviser, in an advanced course related to the area of the student's expected research. Students concentrating in Russian Language, Culture, and History, and pursuing a project in cultural history must take a course in literary or cultural theory, a graduate seminar in the area of their topic, or DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. DLCL 189 is taken in Autumn Quarter of the senior year. Students concentrating in Russian Language and Literature who propose a senior project in Russian language select their course in consultation with the Director of Undergraduate Studies.
2. SLAVLIT 189A, taken for 5 units of credit while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in SLAVLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser.

To qualify for honors, the candidate must receive a grade of 'B' or better on the thesis or project completed during this period. A total of 10-12 units may be awarded for completion of honors course work, independent study, and the finished thesis.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers opportunities for students to expand their knowledge, understanding, and appreciation of Russia, Eastern Europe, and Eurasia.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with a concentration on Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.
2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the M.A. degree are discussed in the "Graduate Degrees" section of this bulletin.

Admission—The requirements for admission to the master's degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work in an area of specialization.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant's previous academic training in Russian language and literature normally serves as an indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries.

Before registering for the first quarter's work in the department, entering graduate students are required to take placement examinations in Russian. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Course work in third-year Russian and below carries no credit toward either the M.A. or the Ph.D. degree.

Course Requirements—Candidates for the M.A. who are not also candidates for the Ph.D. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Ph.D. candidates should attempt to include as many of the department's basic course offerings as possible in the first-year program to ensure sufficient time to complete the M.A. thesis during the fifth quarter of registration. In any case, course work should be planned in consultation with the graduate adviser, whose approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department. The other 9 units may, with approval of the candidate's adviser, be selected from courses in related fields. Of the 36 units in the department, a minimum of 9 may be in language and a minimum of 9 in literature. The remaining 18 units may be distributed in accordance with the needs and interests of the student, and with the advice and approval of the department adviser.

No credit toward the M.A. degree is allowed for first- or second-year courses in non-Slavic languages required for the Ph.D. degree.

The M.A. Thesis—A requirement for candidates for a Ph.D., the M.A. thesis represents a complete article-length research paper (6-9,000 words) that, in both form and substance, qualifies for submission to English-language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the fifth quarter and approved no later than the sixth quarter of registration.

Final Examination—Students not enrolled in the Ph.D. program may either submit an M.A. thesis or take a final examination. In the latter case, regardless of the area of specialization, the student must demonstrate in a written examination: (1) command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level; (2) an ability to read contemporary Standard Russian sufficient to assist students studying contemporary Russian poetry or literary prose; and (3) sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with the chosen period of specialization.

The examination should be taken at the end of the final quarter of required course work.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements:

1. *Minor or Related Fields:* during the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field.
    - a) *Related Field:* a student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the Department of Slavic Languages and Literatures. The choice of patterns is one of the following:
        - 1) a sequence of three courses in one West European literature, selected in consultation with the adviser, or
        - 2) three basic courses in comparative literature chosen in consultation with the graduate adviser and the Department of Comparative Literature or the Department of German Studies
        - 3) a sequences of three courses in another department, selected in consultation with the advisor.
    - b) *Minor:* students electing a minor should take six graduate courses in that department with a minimum of 20 units at the graduate level, according to the minor requirements established by that department. Students considering minors should consult with their adviser, the chair of Slavic Languages and Literatures, and the chair of the minor department. Students who wish to enroll in the Graduate Program in the Humanities should apply there.
2. *Admission to Candidacy:* candidates should read carefully the general regulations governing the degree, as described in the “Graduate Degrees” section of this bulletin. No student is accepted as a candidate until the equivalent of the M.A. degree requirements, including the M.A. thesis described above, are completed. Admission to candidacy is determined early in the sixth quarter of graduate studies. The candidate by that time must have demonstrated commitment to graduate studies by completion of a minimum of 60 quarter units of credit with a grade point average (GPA) of 3.3 (B+) or better, and submission of a complete draft of an M.A. thesis. Failure to do so results in termination of enrollment for the Ph.D. The terminated student may, at the discretion of the faculty, be given the opportunity to take the M.A. written examinations. If successful, the student is then awarded the M.A. degree.
3. *Proficiency Test:* administered for all entering graduate students, this test determines whether the student’s knowledge of Russian language and literature falls below the department’s standard. Students who fail to meet the standard in this test are asked to complete appropriate courses in the first year of graduate study.
4. *Course Requirements:* before qualifying for the department oral and written examinations, a Ph.D. candidate is expected to accumulate at least 72 quarter units of credit for courses taken while in graduate school. No less than half of this course work (36 units) must be done in the Department of Slavic Languages and Literatures, including at least 24 units of credit for seminar-level courses. Entering graduate students must enroll in SLAVLIT 200.
5. *Foreign Languages:* a candidate must demonstrate reading knowledge of French or German, plus another language useful for the student’s area of concentration, by passing written examinations, or receiving a grade of ‘A-’ or better in a class.
6. *Examinations:* a candidate must pass the departmental general qualifying examinations, which has written and oral parts. The written part covers the history of Russian literature from the medieval period through the twentieth century. The departmental oral exam part follows shortly after completion of the comprehensive exams. The student makes a 20-minute presentation of a scholarly paper, possibly the master’s thesis. Each examiner questions the student on the presentation and related topics. Following the departmental examinations, a candidate must pass a University oral examination, which is a defense of a dissertation proposal covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the research.

Continuation—Continuation in the Ph.D. program is contingent on: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, an M.A. thesis, which should be completed no later than the end of the second quarter of the second year.

Course Work, Breadth Requirements, and Overall Scheduling—

1. Candidates for the Ph.D. degree are allowed as much freedom as possible in the selection of course work to suit their individual program of study. However, candidates are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department’s offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:
    - a) Russian poetry
    - b) the Russian novel
    - c) 20th-century Russian literature
    - d) 19th-century Russian literature (the Age of Pushkin and after)
    - e) 18th-century Russian literature (the early 1700s to the Age of Pushkin)
    - f) Medieval Russian literature
    - g) a monograph course on a major Russian author
    - h) theory of literature

    The department’s general qualifying examinations must be taken by the end of the first quarter of the third year of study; they may be taken during the second year if the student and the adviser feel this is appropriate. During the two quarters following the general qualifying examinations, the student should be concerned primarily with preparation for the departmental and the University oral examinations, which should take place no later than the end of the third quarter of the third year. The fourth and fifth years should be devoted to research and writing leading to completion of the Ph.D. dissertation.
2. Students possessing the equivalent of the Stanford M.A. are normally expected to adhere to the schedule for the second, third, and fourth years of work outlined under item 1 above.
3. Students in the Ph.D. program are required to do five quarters of teaching, including three quarters of first-year Russian and one quarter of literature as a teaching assistant to a faculty member, usually for one of the survey courses in translation: SLAVGEN 145, 146, 147, 148. Students are required to take a one quarter TA training course, APPLLING 201, during their second year.

Non-Slavic Language Requirements—Credit toward either the M.A. or the Ph.D. degrees is not given for first- or second-year courses in non-Slavic languages. It is assumed that, on entering the program, the student has a reading knowledge of either German or French. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study. Both language examinations must be passed before the candidate takes the University oral examination, that is, before the end of the third year.

JOINT PH.D. IN SLAVIC LANGUAGES AND LITERATURES AND HUMANITIES

The Department of Slavic Languages and Literatures participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Slavic Languages and Literatures and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University activity unit limitation (8 unit maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

RUSSIAN LANGUAGE COURSES

The following courses in Russian language instruction represent a typical sequence for three years of Russian language study. Majors and prospective majors should consult the requirements for a B.A. in Russian above. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, and for other Slavic languages under the SPECLANG subject code, see the "Language Center" section of this bulletin.

SLAVLANG 1,2,3. First-Year Russian
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Staff)*

SLAVLANG 51,52,53. Second-Year Russian
5 units, **51:** *Aut,* **52:** *Win,* **53:** *Spr (Khassina, E)*

SLAVLANG 111,112,113. Third-Year Russian
4 units, **111:** *Aut,* **112:** *Win,* **113:** *Spr (Staff)*

GENERAL

This curriculum covers topics of general interest. Courses are open to all students and have no prerequisites. Some courses may be taken for graduate credit. Additional work in the original language may be arranged with individual instructors. The courses:

1. introduce students to the major authors and texts in the Russian literary and cultural tradition,
2. offer broad conceptual frameworks for understanding the material covered, and
3. demonstrate the dynamic interaction between cultural texts and a variety of contexts (literary, intellectual, and sociopolitical).

SLAVGEN 13N. Russia and the Russian Experience—Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol—Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukranian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum
3-4 units, Aut (Fleishman, L)

SLAVGEN 110/210. The Gogol Bordello: Ukraine as a Meeting House of Cultures—The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, German, and Russian cohabitants. Possible authors include: Andrukhovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko.
3-5 units, Spr (Labov, J)

SLAVGEN 122/222. Yiddish Story—The humor, drama, anger, and artistry of modern of European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshteyn. In English. GER:DB-Hum, EC-GlobalCom
5 units, not given this year

SLAVGEN 123/223. The Yiddish Novel—How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish. GER:DB-Hum
3-4 units, not given this year

SLAVGEN 125/225. Martyrs, Monks, and Missionaries: An Introduction to Orthodox Sainthood—The Christian cult of saints in Russian religious culture from earliest times; its Byzantine forms and flowering in medieval Rus and the Balkans. The roots of Russian veneration of holy people in the early Christian and Byzantine worlds from which it borrowed, adapted, and reinterpreted many traditions. Primary sources in including hagiography and icons.
3-4 units, Aut (White, M)

SLAVGEN 127/227. Poetess: The Grammar of the Self when the Poet is a Woman—(Same as COMPLIT 128/228.) Seminar. Lyrical works by women poets from the U.S., Russia, E. Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsvetaeva, Sachs, Plath, Cisneros, Angelou, Graham, Howe, and Szymborska.) Theoretical and practical issues: breaking and entering the male preserve of high poetry; the interaction of written and oral, political, and performative modes of expression; representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration. GER:DB-Hum, EC-Gender
4 units, not given this year

SLAVGEN 145/245. Age of Experiment: From Pushkin to Gogol—The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin's *Eugene Onegin, The Belkin Tales,* and *The Captain's Daughter;* Lermontov's *Hero of Our Time;* and Gogol's *Petersburg Tales* and *Dead Souls.* GER:DB-Hum, EC-GlobalCom
3-4 units, Aut (Fleishman, L)

SLAVGEN 146/246. The Great Russian Novel: History and Transgression in Tolstoy and Dostoevsky—Tolstoy's *War and Peace,* Dostoevsky's *Demons,* and Turgenev's *Fathers and Sons,* written in the decade following the emancipation of the serfs and the great legal reforms, ask how much one person can change history for good or ill. Chekhov's *Ward Number Six* as an example of the deformation and adaptation of this tradition at the end of the age of realism. Historical and philosophical context and literary-critical techniques. GER:DB-Hum, EC-GlobalCom, WIM
3-4 units, Win (Greenleaf, M)

SLAVGEN 147/247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s—First of two-part sequence. Russian modernism and the avant garde. The Russian Revolution, the era of the NEP, Soviet civilization, and the literature of opposition following Stalin's death. Texts in English translation. GER:DB-Hum, EC-GlobalCom
4 units, not given this year

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present—From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, *samizdat*, village and urban prose, literature of the new emigration, late Soviet underground, *sots-art*, *perestroika*, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for 399. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Freidin, G)

SLAVGEN 150/250. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry—(Same as SLAVGEN 250.) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian.

3-4 units, Aut (Fleishman, E)

SLAVGEN 151/251. Dostoevsky and His Times—(Same as COMPLIT 119/219.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum

4 units, Win (Frank, J)

SLAVGEN 155/255. Anton Chekhov and the Turn of the Century—Chekhov's art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov's letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:DB-Hum

4 units, not given this year

SLAVGEN 156/256. Nabokov and Modernism—(Same as COMPLIT 115/215.) Nabokov's stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author's control. Readings include *Bend Sinister*, *Lolita*, *Pale Fire*, *Speak Memory*, and *Ada*. GER:DB-Hum

3-5 units, not given this year

SLAVGEN 163. Gender in Postwar Russian Culture—(Same as SLAVGEN 263.) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies. GER:EC-Gender

3-4 units, not given this year

SLAVGEN 165/265. Poetry, Painting, and Music of the Russian Avant Garde—Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music. Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, Spr (Fleishman, L)

SLAVGEN 169/269. Mermaids, the Firebird, and the Singing Tree: Russian Folklore and Its Theory—Russian culture through its oral folklore and music. Theory, current data and its interpretation, how scholars collect and understand traditional oral poetry, and the lessons of folklore. GER:DB-Hum

3-5 units, Spr (Zemtsovsky, I)

SLAVGEN 181. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

ADVANCED UNDERGRADUATE AND GRADUATE

SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse—The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian. GER:DB-Hum

4 units, not given this year

SLAVLIT 179/279. Literature from Old Rus' and Medieval Russia—From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.

4 units, not given this year

SLAVLIT 184/284. The History of the Russian Literary Language—Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.

4-5 units, Win (Schupbach, R)

SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries—Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. Lectures/discussions in Russian.

3 units, not given this year

SLAVLIT 188/288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century—Required of majors in Russian literature. Developments in 20th-century Russian poetry including symbolism, acmeism, futurism, and literature of the absurd. Emphasis is on close readings of individual poems. Discussions in Russian.

3-4 units, Win (Fleishman, L)

SLAVLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

SLAVLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Aut (Staff)

SLAVLIT 199. Individual Work for Undergraduates—Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature—Required for graduate students and honors undergraduates in Slavic; first-year Slavic graduate students must enroll during their first quarter. Introduction to graduate study in Russian literature and culture: profession, discipline, and approaches to the study of literature and culture. Theoretical readings, practical exercises in the analysis of verse and narrative, and recent monographs on Russian literature.

4 units, Aut (Freidin, G)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies—Required of first-year Slavic graduate students. Major Western and Slavic language sources and search methodologies pertaining to Russian and E. European area studies. Tailored to students' research interests.

2-3 units, Aut (Fleishman, L)

SLAVLIT 200B. Proseminar in Russian Literary Theory—Corequisite: 305.
1 unit, not given this year

SLAVLIT 203. Academic Russian—How to read and analyze secondary sources, formulate arguments, and present intellectual work in Russian. In Russian. Prerequisite: four years of Russian or equivalent.
3 units, not given this year

SLAVLIT 211. Introduction to Old Church Slavic—The first written language of the Slavic people. Grammar. Primarily a skills course, with attention to the historical context of Old Church Slavic.
3 units, not given this year

SLAVLIT 212. Old Russian and Old Church Slavic—Continuation of 211. Readings in additional canonical Old Church Slavic texts, following the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the *Primary Chronicle, Boris and Gleb,* and *The Life of Theodosius*.
3 units, not given this year

SLAVLIT 215. Russian Poetry after Brodsky—The Bronze Age of Russian poetry in the 70s-80s as a time of enthusiasm for poetic diction and achievement, attempts to reclaim connections with Russian and European traditions, and avant garde experimentation. The new metaphysics, the problem of the poet's self, new forms, and the limitations of the poetic domain. Poets include Leonid Aronzon, Victor Krivulin, Elena Shvartz, Ivan Zhdanov, Petr Cheigin, Gennadii Aigui, and Leonid Gubanov. Readings in Russian. Undergraduates require consent of instructor.
3-4 units, not given this year

SLAVLIT 225. Readings in Russian Realism—Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.
4 units, not given this year

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde—The works of Pasternak and his contemporaries Vladimir Mayakovsky and Marina Tsvetaeva; cultural context and the features of Russian avant garde poetics. Readings in Russian.
3-4 units, not given this year

SLAVLIT 269. Pushkin: Tying and Untying the Threads of the Golden Age—Graduate seminar. The formation of a simultaneously imperial and Enlightenment culture under Catherine the Great, and how Pushkin and his contemporaries realized its potentials and contradictions. Literary texts in light of other verbal discourses and artistic media; the field of 18th-century and imperial studies in Russia. Undergraduates require consent of instructor.
3 units, not given this year

SLAVLIT 271. *Poema*: Russia's Long Narrative Poem—Russian long narrative poems of the 19th and 20th centuries in literary and historical context.
3-4 units, Win (Fleishman, L)

SLAVLIT 272. Osip Mandelstam and the Modernist Paradigm—His poetry, prose, cultural criticism as an expression of Russian modernism in contexts including: symbolism, acmeism, and the avant garde; NEP culture; and Stalinism. Mandelstam's legacy in art and Russian postmodernism. Myth of the poet. The cultural paradigm of Soviet civilization. Knowledge of Russian desirable but not necessary. See http://www.stanford.edu/class/slavic272.
2-4 units, not given this year

SLAVLIT 299. Individual Work for Graduate Students—For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 305. Russian Critical Traditions—The Russian intelligentsia invested its literature with esthetic and ethical value, and developed critical apparatuses that have inspired Western approaches to text. Readings in theorists from the 19th-20th centuries including positivists and formalists. Possible topics: 19th-century radicals, futurist manifestos, formalists, Freudian and Marxist models, Bakhtin, and the Tartu semioticians. Readings in English. Prerequisite: some familiarity with the Russian canon.
4 units, Aut (Safran, G)

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film—Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias's civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdidge). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskaia; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.
2-4 units, not given this year

SLAVLIT 399. Advanced Research Seminar in Russian Literature—Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.
2-4 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

Slavic majors are advised to consult the "Literatures, Cultures, and Languages" section of this bulletin for additional offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the Director of Undergraduate Studies to discuss applicability of these courses to a major or minor program.

DLCL 189. Honors Thesis Seminar
5 units, Aut (Surwillo, L)

OVERSEAS STUDIES

Courses approved for the Slavic Languages and Literatures major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SOCIOLOGY

Emeriti: (Professors) Joseph Berger, Bernard P. Cohen, Sanford M. Dornbusch, Alex Inkeles, Seymour M. Lipset, James G. March, John W. Meyer, W. Richard Scott, Morris Zelditch Jr.
Chair: Karen Cook
Professors: Lawrence Bobo, Karen Cook, Paula England, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, Gi-Wook Shin, C. Matthew Snipp, Nancy B. Tuma, Andrew Walder, Xueguang Zhou
Assistant Professors: Henning Hillmann, Monica McDermott, Michael Rosenfeld, Rebecca L. Sandefur
Associate Professor (Teaching): Donald Barr
Courtesy Professors: Anthony Bryk, Glenn Carroll, Michele Landis Dauber, Larry Diamond, Clifford J. Nass, Walter Powell, Francisco Ramirez
Courtesy Associate Professors: Sean Reardon, Daniel McFarland, Jesper Sorensen
Lecturers: Alexandra Gerbasi, Gili Drori
Consulting Professors: George Bohrnstedt, Patricia Chang, Ruth Cronkite
Consulting Associate Professor: Annemette Sorensen
Visiting Associate Professors: Eva-Maria Meyersson Milgrom, Patricia Thornton

Department Offices: Building 120, Room 160
Mail Code: 94305-2047
Phone: (650) 723-3956
Web Site: http://sociology.stanford.edu/

Courses given in Sociology have the subject code SOC. For a complete list of subject codes, see Appendix.

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically motivated both by the desire to better understand the principles of social life and by the conviction that understanding these principles may aid in the formulation of enlightened and effective social policy. Sociology provides an intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor's, master's, or doctoral levels. The department organizes its courses by fields of study to assist students in tailoring their education and research to their academic interests and career goals.

FIELDS OF STUDY

Organizations, Business, and the Economy—Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross; some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or non-market allocation, through organizations, or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this field include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

Race and Ethnic Relations—Focus is on issues surrounding the emergence, persistence, and dynamics of conflict and cooperation among race and ethnic groups in the United States and elsewhere. Course topics include racial identity, sources of prejudice and hostility, emergence of minority rights movements, indigenous peoples' movements, ethnic genocide, ethnic collective violence, and cooperation among groups.

Social Movements, Comparative Politics, and Social Change—Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this field include law, public policy, government service, nonprofit and international nongovernmental organizations, business organizations (especially those with international interests), consulting, and managerial jobs.

Social Psychology and Interpersonal Processes—Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This field provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

Social Stratification and Inequality—Focus is on forms of social inequality, including fields such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and lifestyles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

UNDERGRADUATE PROGRAMS

The departments offers two options leading to the B.A. degree: the general Sociology major and the Sociology major with a field of study. The general major consists of a core curriculum plus elective courses intended to provide breadth of exposure to the variety of areas encompassed by sociology. The major with a field of study consists of a core curriculum plus a concentrated set of courses in one specialized area of sociology.

To graduate with a B.A. in Sociology, students must complete a minimum of 65 units of course work in the major. Units applied to the major must be taken for a letter grade (except for SOC 190-193) and a grade point average (GPA) of 2.0 (C) or better must be achieved. Related course work from other departments may fulfill part of this requirement; such work must be pre-approved by the Sociology student services office and a faculty adviser and may not exceed 15 units.

CORE CURRICULUM FOR ALL MAJORS

Students are required to complete a minimum of 45 units of core and foundation course work as detailed below.

CORE COURSES REQUIRED FOR THE MAJOR

The following core courses (30 units) are required of majors. It is recommended that students complete SOC 181B, SOC 180A, and SOC 180B in this order.

1. SOC 1. Introduction to Sociology. Students should take this course early in their program.
2. SOC 170. Classics of Modern Social Theory.
3. SOC 181B. Sociological Methods: Statistics, or another introductory statistics course such as STATS 60, PSYCH 10, or equivalent.
4. SOC 180A. Foundations of Social Research

5. SOC 180B. Evaluation of Evidence
6. SOC 200. Junior/Senior Seminar for Majors. It is recommended that students take this course in Spring Quarter of the junior year or Autumn Quarter of the senior year. This course fulfills the Writing in the Major (WIM) requirement. Students considering honors are encouraged to enroll in SOC 202, Preparation for Honors Thesis, in the junior year; see "Honors Program" below.

FOUNDATION COURSES REQUIRED FOR THE MAJOR

In addition to core courses, students pursuing the B.A. in Sociology must complete at least three foundation courses (15 units). To ensure breadth of course work, each foundation course must represent a different field of study. For detailed information about Sociology concentration areas, see section on Fields of study (above). Foundation courses, classified by field of study, are as follows:

1. Organizations, Business, and the Economy: SOC 114 or 160
2. Race and Ethnic Relations: SOC 145 or 147A or 148
3. Social Movements, Comparative Politics, and Social Change: SOC 110 or 118 or 130
4. Social Psychology and Interpersonal Processes: SOC 120 or 121
5. Social Stratification and Inequality: SOC 140

GENERAL SOCIOLOGY MAJOR

To declare a major in Sociology, students must email the Sociology student services office once they have declared in Axess; see http://sociology.stanford.edu for contact information. It is recommended that new majors schedule a meeting with their assigned faculty adviser promptly after declaring the major.

In addition to the 45 units required in core and foundation course work, students pursuing the general Sociology major must complete 20 elective units of Sociology course work. Students may choose their elective courses according to personal interest; however, students are encouraged to complete some course work at the 200-level. Sociology majors are encouraged to participate in directed research or undertake independent research with Sociology faculty. Students who wish to engage in more in-depth study in a specific area may do so by declaring a field of study.

SOCIOLOGY MAJOR WITH FIELD OF STUDY

The Sociology major with a field of study allows students to pursue a more focused program in one of five fields of study. To complete the requirements for the B.A. degree in Sociology with a field of study, a student must complete all core and foundation course work requirements for the major plus 20 units of course work in the chosen field of study. At least one foundation course must be in the declared field of study (see above) and students are encouraged to take as many foundation courses within their field of study as possible. Sociology courses are listed by field of study in this bulletin. Fields of study are declared on Axess; students must also submit a Field of Study Declaration form to the Sociology student services office by the end of the first quarter of the senior year. Interested students should contact the Sociology student services office for additional information or to request a concentration declaration form. Fields of study are noted on the transcript; they do not appear on the diploma.

MINOR

Students must complete a minimum of 35 units in Sociology for the minor. Courses must be taken for a letter grade, and a minimum grade point average (GPA) of 2.0 (C) must be achieved. Students are encouraged to complete a course in sociological theory, such as SOC 170, and to obtain exposure to one of the fields of study. Students who wish to declare a minor in Sociology must do so no later than the deadline for their application to graduate.

Course requirements for a minor in Sociology are as follows:

	Units
SOC 1. Introduction to Sociology	5
SOC 180A. Foundations of Social Research, *and/or* SOC 180B. Evaluation of Evidence	5
Two foundation courses; see foundation courses required for the major above	10
Additional course work in the department (100- or 200-level courses)	15
Total course work required	35

HONORS PROGRAM

Sociology majors who wish to complete an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department's honors program. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work. Applicants are required to identify a Sociology faculty member to advise on the research and writing of the essay. With the approval of the director of the undergraduate studies committee, students may work with faculty advisers in other departments.

The honors project is typically initiated when a student enrolls in SOC 202, Preparation for Honors Thesis, or SOC 200, Junior/Senior Seminar. Students undertaking an honors project are encouraged to enroll in SOC 202 or 200 in the junior year. Students begin designing their honors project in connection with this seminar and in consultation with the seminar leader. If the student is admitted to the program, the honors project is completed during the senior year.

To apply to the honors program, students must complete the application form available from the Sociology student services office or from the department's web site. This form requires the faculty adviser's endorsement, a brief description of the proposed project, and a copy of the student's unofficial undergraduate transcript. Applicants must submit the completed application to the Sociology student services office no later than the fourth quarter before graduation, typically Spring Quarter of the junior year.

Honors students may earn up to 12 independent study units for work leading to completion of the required honors thesis, excluding units associated with the Junior/Senior Seminar. Completion of honors in Sociology requires: (1) completion of all requirements for the major; and (2) completion of a thesis of honors quality (a grade of 'A-' or higher). The thesis is due on or before the beginning of the End-Quarter period in the student's final quarter before graduating. If the thesis adviser is a faculty member outside the department, the thesis must be submitted to both that sponsor and to the Sociology student services office, who coordinates appointment of a departmental reader to evaluate the paper. Both the honors adviser and the reader must agree that the paper merits honors. In every case, two copies of the final paper must be submitted; one is retained by the department and becomes a part of the department's permanent collection. If a grade of 'A-' is not earned, the thesis credit counts toward meeting the standard major requirements.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Sociology offers an M.A. degree only to students concurrently enrolled at Stanford. General University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin. The department does not have a terminal M.A. program for external applicants.

COTERMINAL M.A.

Stanford undergraduates, regardless of undergraduate major, who wish to pursue an M.A. in Sociology may apply for the coterminal master's program. The coterminal M.A. in Sociology is a flexible, self-designed program. Most students complete their M.A. in a fifth year at Stanford; occasionally students are able to complete their B.A. and coterminal M.A. in the fourth year. Typically, undergraduates apply in Autumn or Winter Quarter of their senior year.

Application and admission—Undergraduates must be admitted to the program and enrolled as a graduate student for at least one quarter prior to their B.A. conferral. A cumulative GPA of at least 3.5 in previous undergraduate work is required for admission. It is recommended that applicants have completed at least one Sociology course at the 100 level with a grade of 'B' or better. GRE test scores are not required. The department accepts applications the last day of classes each quarter. For the 2007-08 academic year, quarterly application deadlines are: Autumn, December 7; Winter, March 14; Spring, June 4; Summer, August 14. All application materials are submitted directly to the Sociology graduate student services office. Most applicants choose a field of study to focus their sociological studies; see "Fields of Study" above. To apply for admission to the Sociology coterminal M.A. program, students should submit the coterminal application and the following: (1) a 2-3 page statement of purpose stating the applicant's field of study; (2) a preliminary program proposal that specifies at least 45 units of course work relevant to the degree program with at least 35 units in Sociology; (3) a current unofficial undergraduate transcript; and (4) two letters of recommendation from Stanford faculty familiar with the student's academic work. The department does not fund coterminal M.A. students.

Program requirements—Coterminal M.A. students are required to take 45 units of course work during their graduate career; 35 of these units must be in Sociology courses. All units for the coterminal M.A. must be taken at or above the 100 level; advanced-level course work is encouraged and a minimum of 20 units must be taken at the 200 level. Students with a field of study must complete 20 units of course work in the field of study, including at least one foundation course from their field of study; see "Core Curriculum for Majors" above. Sociology courses are listed by field of study in this bulletin. Students who want to take courses outside the department must seek prior approval from the Sociology student services office; coterminal master's students are limited to 10 units from outside of the department. Students may transfer a maximum of 10 units from their undergraduate career; to be eligible for transfer, courses must have been taken in the two quarters preceding admission to the M.A. program. All units applied to the coterminal master's degree must be taken for a letter grade and an overall grade point average (GPA) of 3.0 (B) or better is required for the degree. Because research methods are an important component of graduate training in the social sciences, coterminal students are encouraged to take SOC 180A, Foundations of Social Research, and 180B, Evaluation of Evidence, in sequence when possible. These methods courses provide skills for research opportunities within the department and in academic or professional careers. Coterminal M.A. students should meet with their assigned faculty adviser upon acceptance to the program.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/pdf/CotermApplic.pdf.

M.A. FOR CURRENT GRADUATE STUDENTS

The M.A. degree in Sociology is available to current Ph.D. candidates in Sociology and to students in advanced degree programs (Ph.D., J.D., M.D.) from other Stanford departments and schools. Sociology Ph.D.s typically receive their M.A. in their second or third year of graduate study. Students must complete a minimum of 45 units of Sociology course work with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty and must be taken for a letter grade if possible. Research and directed reading courses are acceptable, but are limited to 15 units and must be approved in advance. Interested students should contact the Sociology student services office for additional information and approval of programs. University regulations pertaining to the M.A. are listed in the "Graduate Degrees" section of this bulletin. Students are not expected to choose a field of study, but may do so if desired. No thesis is required. While formal application to the M.A. program is not required, applicants from outside of the Sociology department must submit: (1) a completed Graduate Authorization Petition form (available from the Office of the University Registrar); (2) a completed Program Proposal for an M.A. form (available from the Office of the University Registrar); and (3) a short statement of purpose to the Sociology student services office.

DOCTOR OF PHILOSOPHY

The Ph.D. curriculum and degree requirements are designed to provide students with the knowledge and skills to become proficient scholars and teachers. Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' in each course. Any grade of 'B' or below is considered to be less than satisfactory.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. Students must enroll in SOC 305, Graduate Proseminar, in Autumn Quarter of the first year; the course provides an introduction and orientation to the field of sociology, and the department and faculty. One unit of credit is given for this course; grading is on a satisfactory/no credit basis.
2. Students must complete three quarters of research experience, working under the supervision of one or more faculty members, including regular, emeritus, and affiliated faculty. The experience may involve paid work as a research assistant (RA), or unpaid work as a research apprentice. With prior approval, this requirement may be met through work on research projects conducted outside the department or University. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.
3. Students must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Work as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. Students are required to take SOC 300, Workshop: Teaching Development, in Spring Quarter of the first year. In addition, students are encouraged to take advantage of department and University teacher training programs. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.
4. Students must complete four broad survey courses to demonstrate command of a range of sociological literatures. Each year the department specifies which courses meet this requirement, and undertakes to ensure that an adequate selection of such courses is offered. A list of courses that fulfill this requirement is listed in the requirements section below. Students should consult with their adviser to ensure that the combination of courses chosen to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency.
5. Students must take one course in classical sociological theory (SOC 370A or B, or equivalent), and one course on the development of theory and research design (SOC 372 or equivalent). It is recommended that students complete SOC 370A and B, although only one of these courses is formally required.
6. Students must complete the series of required research methods courses listed in the requirements section below. Students with little background in statistics are encouraged to take SOC 281B or equivalent.
7. Beginning in year two, doctoral students are required to enroll in at least one workshop each quarter. Due to unit constraints, students may petition the Sociology student services office to attend a workshop without enrolling; such attendance is not noted on the transcript.
8. Students must complete a paper in the second year of residency on any sociological topic; it may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and is considered an important piece of evidence in the decision to advance to candidacy. A two-person committee that includes the primary adviser evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and affiliated faculty may also serve as readers. The two readers of the second-year paper committee provide a review that speaks to: (1) whether the paper is publishable; and (2) what types of revisions, insofar as the paper is publishable, the student should pursue to ready the paper for publication. These comments are shared with the Director of Graduate Studies. Additionally, the committee meets with the student in June of the second year to discuss these reviews. To ensure that students are making adequate progress on their paper, students are required to provide a first draft of the paper to readers by April 1. The final deadline for paper submission is May 15. This deadline applies to students who entered the department in 2006-07 and later.
9. Students are required to present at least two papers at a major professional meeting in their first five years of graduate study.

10. Students must prepare a dissertation prospectus and pass the University oral examination. The oral exam is intended to evaluate the dissertation prospectus or a partial draft of the dissertation and to assess the student's knowledge of the theory and research in the area in which the project intends to contribute. This requirement must be completed by December 1 of the fourth year of residency.
11. Each student must complete a doctoral dissertation. At the choice of the student, and in consultation with the adviser, the dissertation requirement may be met either by submitting the standard book-style document or by submitting three independent papers. The latter papers may address the same topic, but should be written as stand-alone, single-authored papers in standard journal format. None of these papers may overlap substantially with the second-year paper or with one another. The main criterion in judging substantial overlap is whether any standard journal, such as *The American Journal of Sociology*, would regard the papers as too similar to publish both. The dissertation must be submitted to all committee members at least 30 days in advance of the filing deadline. Assessment of satisfactory completion is determined by the student's doctoral committee members. Students are invited to present their dissertation findings at an informal department colloquium.

The faculty is responsible for providing students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough; each student's performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the second year of residency, the faculty again review the progress of all doctoral students in the program. Students who are performing well, as indicated by their course work, teaching and research apprenticeship performance, and second-year paper, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are still on probation at this stage may be (1) advanced to candidacy; (2) retained on probation with specification of the steps still required to be removed from this status; or (3) terminated from the program.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

REQUIREMENTS

SURVEY COURSES

Students must complete four courses from an approved list. This list is updated and circulated to students at the start of each academic year. *Note:* class offerings rotate; not all approved survey courses are offered every year. The following courses typically fulfill the survey course requirement:

308. Social Demography
310. Political Sociology
314. Economic Sociology
316. Historical and Comparative Sociology
318. Social Movements and Collective Action
320. Foundations of Social Psychology
322. Social Interaction, Social Structure, and Social Exchange
340. Social Stratification
342B. Gender and Social Structure
345. Comparative Race and Ethnic Relations
360. Foundations of Organizational Sociology
363A. Seminar on Organizational Theory

RESEARCH METHODS

The following course requirements apply to students who entered the Ph.D program in 2005-06 or later. Students are also expected to complete one elective from a list of approved courses that is updated and circulated at the start of each academic year. Students are required to enroll in 384, Sociology Methodology IV: New Models and Methods, in their first or second year of the program; this course is offered in alternate years.

281B. Statistics (not required but recommended for students with little statistical background)
381. Sociological Methodology I: Introduction
382. Sociological Methodology II: The General Linear Model
383. Sociological Methodology III: Advanced Models for Discrete Outcomes
384. Sociology Methodology IV: New Models and Methods
385A. Research Practicum I
385B. Research Practicum II

The following course requirements apply to students who entered the Ph.D program in 2004-05 or earlier.

281B. Statistics (recommended for students with little statistical background)
381A. Sociological Methodology I: Computer Assisted Data Analysis
382. Sociological Methodology II: The General Linear Model
383. Sociological Methodology III: Advanced Models for Discrete Outcomes
388. Advanced Models for Analysis of Tabular Arrays
  or 389. Mixed Method Research Design

THEORY

370A. Sociological Theory: Social Structure, Inequality, and Conflict
  or 370B. Sociological Theory: Social Interaction and Group Processes
372. Theoretical Analysis and Design

Students must complete additional course work sufficient to prepare them to write their second-year paper.

PH.D. MINOR

Sociology offers a minor for currently enrolled doctoral students in other Stanford departments and schools. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty with the following exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a letter grade. Research and directed reading courses are acceptable, but are limited to 15 units and must be approved in advance. The program must be approved by a Sociology adviser and filed with the Sociology student services office. While there is not a formal application process, candidates must submit a short statement of purpose (2 pages), and a completed Application for Ph.D Minor, available from the Office of the University Registrar) to the Sociology student services office. The Application for Ph.D. Minor must have all Sociology or other courses to be applied to the minor listed including course number, units, and final grades.

JOINT PROGRAMS WITH THE SCHOOL OF LAW

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or to a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during the first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master's degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student's academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student's applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study.

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student's course of study regardless of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 54 semester (81 quarter) hours of approved courses may be counted toward both degrees, but no more than 24 semester (36 quarter) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 183 quarter units to complete both degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.

For more information, see the Sociology web site at http://sociology.stanford.edu/, and the Law School web site on the J.D./Ph.D. at http://www.law.stanford.edu/program/degrees/joint/sociology/.

COURSES

Courses are open to all students without prerequisites, unless indicated. Courses numbered below 100 are introductory courses intended for undergraduates. Courses numbered 100 - 202 are undergraduate-level courses. Courses numbered 203-299 are open to advanced undergraduates and graduate students. Courses numbered 300 and above are normally offered to matriculated doctoral students only.

OPEN TO ALL STUDENTS

INTRODUCTORY

SOC 1. Introduction to Sociology—Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci

5 units, Aut (McAdam, D), Spr (Snipp, C)

SOC 15N. The Transformation of Socialist Societies—Stanford Introductory Seminar. Preference to freshmen. The impact of societal organization on the lives of ordinary people in socialist societies and in the new societies arising through the processes of political, economic, and social transformation. Do the concepts of democratization and marketization suffice to characterize ongoing changes? Enrollment limited to 16. GER: DB-SocSci, EC-GlobalCom

3 units, Win (Tuma, N)

SOC 22N. The Roots of Social Protest—Stanford Introductory Seminar. Preference to freshmen. The conditions under which social protest occurs and the emergence, success, and viability of contemporary social movements. Examples include women's civil rights, ecology, and antiwar and anti-globalization movements in the U.S. and elsewhere. Sociological theories to explain the timing, location, and causes of mobilization; how researchers evaluate these theories. Comparison of tactics, trajectories, and outcomes. Enrollment limited to 16. GER: DB-SocSci. EC-GlobalCul

3 units, Aut (Olzak, S)

SOC 45Q. Understanding Race and Ethnicity in American Society—Stanford Introductory Seminar. Preference to sophomores. A brief historical overview of race in America, race and violence, race and socioeconomic wellbeing, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities—Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci

3 units, Spr (Rosenfeld, M)

SOC 103A. Tutoring: Seeing a Child through Literacy—(Same as EDUC 103A.) For undergraduates to engage in the real world of teaching; required of all STEP elementary credential candidates. Focus is on teaching struggling young readers. The role of instruction in literacy development; supervised tutoring of a child; seeing the worlds of school, print, and learning through the eyes of a child. Ravenswood Reads tutors encouraged to enroll.

4 units, Aut (England, P; Juel, C)

SOCIAL MOVEMENTS, COMPARATIVE POLITICS, AND SOCIAL CHANGE

SOC 109. Sociology of Terrorism—(Graduate students register for 209.) Multidisciplinary, including psychology, sociology, political science, economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Guest lecturers. Sources include movies, novels, and research literature.

5 units, Spr (Meyersson Milgrom, E)

SOC 110. Politics and Society—(Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world. GER:DB-SocSci

5 units, Aut (Beck, C)

SOC 111. State and Society in Korea—(Graduate students register for 211.) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience. GER:DB-SocSci, EC-GlobalCom

5 units, alternate years, not given this year

SOC 116. Understanding Social Changes in China: A Global Perspective—(Graduate students register for 216; same as EASTASN 116/216.) Since 1949. Mao's accession to power. Deng Xiaoping's economic reforms that started the transformation of Chinese society. New policies to address increasing social problems and rapid urbanization. Employment and labor market reform, urban housing, urban health care, and pension reform. Focus is on changing patterns of social structures and groups, family and marriage, education, and social welfare programs.

5 units, Win (Quiang, L)

SOC 117A. China Under Mao—(Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: the creation of a socialist economy, the reorganization of rural society and urban workplaces, the emergence of new inequalities of power and opportunity, and the new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath. GER: DB-SocSci, EC-GlobalCom
5 units, Aut (Walder, A)

SOC 118. Social Movements and Collective Action—(Graduate students register for 218.) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war. GER:DB-SocSci
5 units, not given this year

SOC 130. Education and Society—(Graduate students register for 230; same as EDUC 220C.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci
4-5 units, Aut (Ramirez, F)

SOC 136. Sociology of Law—(Graduate students register for 236; same as LAW 538.) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci
3-5 units, Aut (Dauber, M)

SOC 138. American Indians in Comparative Historical Perspective—(Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty.
5 units, Win (Snipp, C)

SOC 139. American Indians in Contemporary Society—(Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:EC-AmerCul
5 units, Spr (Snipp, C)

SOC 143. Prejudice, Racism, and Social Change—(Graduate students register for 243.) Ethno-racial attitudes and beliefs in the U.S. since 1965. Conflict including urban riots and cooperation including interracial dating, marriage, and mixed-race identity. Changes in racial prejudice and racism and their influence in domains of life such as jobs, housing, political power, and everyday interactions.
5 units, not given this year

SOC 144. Race and Crime in America—(Graduate students register for 244.) Theories of involvement in crime and deviance emphasizing youth gangs, poverty, the impact of racial residential segregation on involvement in crime, and the impact of high rates of incarceration. The role of the media in fostering fear of crime and racial stereotypes. Public policy questions such as post-incarceration disenfranchisement and reintegration.
5 units, not given this year

SOC 147A. Comparative Ethnic Conflict—(Graduate students register for 247A.) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights' movements around the world. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Olzak, S)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 120. Interpersonal Relations—(Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci
5 units, Aut (Ridgeway, C)

SOC 121. The Individual in Social Structure: Foundations in Sociological Social Psychology—(Graduate students register for 221.) Dynamics of the relationship between the individual and social structure, the relationship between the individual and immediate social context, and relationships between individuals. Focus is on the dominant theoretical perspectives in sociological social psychology: social structure and personality, structural social psychology, and symbolic interactionism. GER:DB-SocSci
5 units, Spr (Chin, L)

SOC 123. Sex and Love in Modern Society—(Graduate students register for 223.) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:DB-SocSci, EC-Gender
3-5 units, Aut (England, P)

SOC 125A. Understanding Religion in a Global Context—(Graduate students register for 225A.) American and western scholarly thought about religion from social and sociological perspectives. Challenges to assumptions in the 21st century. A framework for understanding issues such as global religious movements, religious nationalism, secular nationalism, and violence as a means to religious ends. Topics include American religious history, contemporary American religions, legal and social interpretations of freedom of religion, definitions of religious rights across the global culture, and strategic responses by policymakers. GER:DB-SocSci
5 units, Spr (Chang, P)

SOC 126. Introduction to Social Networks—(Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations. GER:DB-SocSci
5 units, Aut (Hillmann, H)

SOC 127. Bargaining, Power, and Influence in Social Interaction—(Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci
5 units, not given this year

SOC 155. The Changing American Family—(Graduate students register for 255.) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rosenfeld, M)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 135. Poverty, Inequality, and Social Policy in the United States—(Graduate students register for 235.) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies. GER:DB-SocSci

5 units, Win (Wimer, C)

SOC 138. American Indians in Comparative Historical Perspective—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.

5 units, Win (Snipp, C)

SOC 139. American Indians in Contemporary Society—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.

5 units, Spr (Snipp, C)

SOC 140. Introduction to Social Stratification—(Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:DB-SocSci

5 units, Win (Sandefur, R)

SOC 141. Controversies about Inequality—(Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality. GER:DB-SocSci

5 units, Spr (Grusky, D)

SOC 141B. Race, Ethnicity, Religion, and Health—(Graduate students register for 241B.) Differences in health status and access to care. Current research.

5 units, Spr (Gonzalez, M)

SOC 142. Sociology of Gender—(Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender

3-5 units, Win (Ridgeway, C)

SOC 143. Prejudice, Racism, and Social Change—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.

5 units, not given this year

SOC 144. Race and Crime in America—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.

5 units, not given this year

SOC 147A. Comparative Ethnic Conflict—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.

5 units, Win (Olzak, S)

SOC 147B. Introduction to African and African American Studies—(Graduate students register for 247B; same as AFRICAAM 105.) Interdisciplinary. Central themes in African American culture and history related to race as a definitive American phenomenon. Possible topics: African survivals and interpretations of slavery in the New World, contrasting interpretations of the Black family, African American literature, and art. Possible readings: Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B. DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcolm X, Alice Walker, and bell hooks. Focus may vary each year. GER:DB-Hum, EC-AmerCul

5 units, Spr (Staff)

SOC 149. The Urban Underclass—(Graduate students register for 249; same as URBANST 112.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Rosenfeld, M)

SOC 149X. Urban Politics—(Graduate students register for 249X; same as POLISCI 121, URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

5 units, Aut (Bischoff, K)

SOC 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class—(Same as CHICANST 165G, CSRE 165G.) How does the Mexican American population stand in relation to the attainment of middle-class status? Topics include immigration, religion, political participation, the labor market, marriage, and pan-ethnic identification. Introduction to sociological methodology. Final project.

5 units, Win (Gonzalez, M)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 114. Economic Sociology—(Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:DB-SocSci

5 units, Aut (Granovetter, M)

SOC 115. Topics in Economic Sociology—(Graduate students register for 215.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:DB-SocSci

5 units, Win (Granovetter, M)

SOC 126. Introduction to Social Networks—For description, see "Social Psychology and Interpersonal Processes" subsection above.
5 units, Aut (Hillmann, H)

SOC 160. Formal Organizations—(Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies. GER:DB-SocSci
5 units, Win (Zhou, X)

SOC 161. The Social Science of Entrepreneurship—(Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:DB-SocSci
5 units, Spr (Thornton, P)

SOC 167A. Asia-Pacific Transformation—(Graduate students register for 267A.) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Shin, G)

SOC 175. Global Cities and the Transnational Economy—(Graduate students register for 275; same as URBANST 175.) How key cities command and coordinate the global economy. Why a division of labor exists amongst a global hierarchy of cities. How economic globalization creates a need for sophisticated information analysis and decision making capabilities. Why corporate headquarters and advanced services are concentrated in a handful of cities. Cluster-oriented development strategies. Case studies. Concepts, theories, and tools from economic sociology and regional economics.
5 units, Spr (Choi, J)

RACE AND ETHNIC RELATIONS

SOC 109. Sociology of Terrorism—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, Spr (Meyersson Milgrom, E)

SOC 138. American Indians in Comparative Historical Perspective—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, Win (Snipp, C)

SOC 139. American Indians in Contemporary Society—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, Spr (Snipp, C)

SOC 141B. Race, Ethnicity, Religion, and Health—For description, see "Social Stratification and Inequality" subsection above.
5 units, Spr (Gonzalez, M)

SOC 143. Prejudice, Racism, and Social Change—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, not given this year

SOC 144. Race and Crime in America—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, not given this year

SOC 145. Race and Ethnic Relations—(Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:EC-AmerCul
5 units, not given this year

SOC 147A. Comparative Ethnic Conflict—For description, see "Social Movements, Comparative Politics, and Social Change" subsection above.
5 units, Win (Olzak, S)

SOC 147B. Introduction to African and African American Studies—For description, see "Social Stratification and Inequaltiy" subsection above.
5 units, Aut (Staff)

SOC 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class—For description, see "Social Stratification and Inequaltiy" subsection above.
5 units, Win (Gonzalez, M)

SOCIOLOGICAL THEORY

SOC 170. Classics of Modern Social Theory—(Graduate students register for 270). Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. GER:DB-SocSci
5 units, Win (McDermott, M)

RESEARCH METHODS

SOC 180A. Foundations of Social Research—(Graduate students register for 280A.) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. How social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.
5 units, Aut (Sorensen, A)

SOC 180B. Evaluation of Evidence—(Graduate students register for 280B.) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.
5 units, Win (Hillmann, H)

SOC 181B. Sociological Methods: Statistics—(Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression. GER:DB-Math
5 units, not given this year

SOC 200. Junior/Senior Seminar for Majors—Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. WIM
5 units, Aut (McDermott, M), Spr (Gerbasi, A)

SOC 201. Preparation for Senior Project—(Same as URBANST 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A.
5 units, Win (Kahan, M)

SOC 202. Preparation for Honors Thesis—(Same as URBANST 202.) Primarily for juniors in Sociology or Urban Studies; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. First part of capstone experience for Urban Studies majors pursuing a non-internship based research project or honors thesis. Urban Studies majors enrolling in 202 rather than 201 must arrange an alternative way of fulfilling the internship requirement. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research.
5 units, Win (McAdam, D)

INDIVIDUALIZED LEARNING EXPERIENCES, PRIMARILY FOR UNDERGRADUATE MAJORS

SOC 190. Undergraduate Individual Study—Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 191. Undergraduate Directed Research—Project of student's choice under supervision of a faculty member. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 192. Undergraduate Research Apprenticeship—Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 193. Undergraduate Teaching Apprenticeship—Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 196. Senior Thesis—Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.
1-15 units, Aut, Win, Spr, Sum (Staff)

FOR ADVANCED/COTERMINAL UNDERGRADUATES AND MASTER'S STUDENTS

SOCIAL MOVEMENTS , COMPARATIVE POLITICS, AND SOCIAL CHANGE

SOC 203. The Transnational Workplace—(Graduate students register for 303.) Experiential one-month workshop: October 24-November 24. Challenges posed by multicultural, transnational work environments. The structure of the multinational modern firm, transnational human resource practices, management profiles, and cultural intelligence. Students cooperate with graduate students in other universities worldwide to create virtual work teams and compose the final assignment for the seminar.
5 units, Aut (Drori, G)

SOC 209. Sociology of Terrorism—(For graduate students; see 109.)
5 units, Spr (Meyersson Milgrom, E)

SOC 210. Politics and Society—(For graduate students; see 110.)
5 units, Aut (Staff)

SOC 211. State and Society in Korea—(For graduate students; see 111.)
5 units, alternate years, not given this year

SOC 216. Understanding Social Changes in China: A Global Perspective —(For graduate students; see 116.)
5 units, Win (Quiang, L)

SOC 217A. China Under Mao—(For graduate students; see 117A)
5 units, Aut (Walder, A)

SOC 217B. Chinese Society and Politics—(Ph.D. students register for 317B.) Seminar. Major social trends with implications for China's political and economic future. Topics include inequality, social change, corruption, and rural and urban conflict. Final paper on a topic of the student's choosing. Limited enrollment. GER:DB-SocSci, EC-GlobalCom
3-5 units, Spr (Walder, A)

SOC 218. Social Movements and Collective Action—(For graduate students; see 118.)
5 units, not given this year

SOC 230. Education and Society—(For graduate students; see 130; same as EDUC 220C.)
4-5 units, Aut (Ramirez, F)

SOC 231. World, Societal, and Educational Change: Comparative Perspectives—(Same as EDUC 136/306D.) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture.
4-5 units, Win (Drori, G)

SOC 236. Sociology of Law—(For graduate students; see 136; same as LAW 538.)
3-5 units, Aut (Dauber, M)

SOC 238. American Indians in Comparative Historical Perspective—(For graduate students; see 138.)
5 units, Win (Snipp, C)

SOC 239. American Indians in Contemporary Society—(For graduate students; see 139.)
5 units, Spr (Snipp, C)

SOC 247A. Comparative Ethnic Conflict—(For graduate students; see 147A.)
5 units, Win (Olzak, S)

SOC 257. Causal Inference in Quantitative Educational and Social Science Research—(Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.
3-5 units, Spr (Reardon, S)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 220. Interpersonal Relations—(For graduate students; see 120.)
5 units, Aut (Ridgeway, C)

SOC 221. The Individual in Social Structure: Foundations in Sociological Social Psychology—(For graduate students; see 121.)
5 units, Spr (Chin, L)

SOC 223. Sex and Love in Modern Society—(For graduate students; see 123.)
3-5 units, Aut (England, P)

SOC 225A. Understanding Religion in a Global Context—(For graduate students; see 125A.)
5 units, Spr (Chang, P)

SOC 226. Introduction to Social Networks—(For graduate students; see 126.)
5 units, Aut (Hillmann, H)

SOC 227. Bargaining, Power, and Influence in Social Interaction—(For graduate students; see 127.)
5 units, not given this year

SOC 255. The Changing American Family—(For graduate students; see 155.)
5 units, Spr (Rosenfeld, M)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 235. Poverty, Inequality, and Social Policy in the United States—(For graduate students; see 135.)
5 units, Win (Wimer, C)

SOC 238. American Indians in Comparative Historical Perspective—(For graduate students; see 138 in "Social Movements, Comparative Politics, and Social Change" subsection above.)
5 units, Win (Snipp, C)

SOC 239. American Indians in Contemporary Society—(For graduate students; see 139 in "Social Movements, Comparative Politics, and Social Change" subsection above.)
5 units, Spr (Snipp, C)

SOC 240. Introduction to Social Stratification—(For graduate students; see 140.)
5 units, Win (Sandefur, R)

SOC 241. Controversies about Inequality—(For graduate students; see 141.)
5 units, Spr (Grusky, D)

SOC 241B. Race, Ethnicity, Religion, and Health—(For graduate students; see 141B.)
5 units, Spr (Gonzalez, M)

SOC 242. Sociology of Gender—(For graduate students; see 142.)
3-5 units, Win (Ridgeway, C)

SOC 243. Prejudice, Racism, and Social Change—(For graduate students; see 143.)
5 units, not given this year

SOC 244. Race and Crime in America—(For graduate students; see 144.)
5 units, not given this year

SOC 247A. Comparative Ethnic Conflict—(For graduate students; see 147A.)
5 units, Win (Olzak, S)

SOC 247B. Introduction to African and African American Studies—(For graduate students; see 147B; same as AFRICAAM 105.)
5 units, Spr (Staff)

SOC 249. The Urban Underclass—(For graduate students; see 149; same as URBANST 112.)
5 units, Aut (Rosenfeld, M)

SOC 249X. Urban Politics—(For graduate students; see 149X; same as POLISCI 121, URBANST 111.)
5 units, Aut (Bischoff, K)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 214. Economic Sociology—(For graduate students; see 114.)
5 units, Aut (Granovetter, M), offered once only

SOC 215. Topics in Economic Sociology—(For graduate students; see 115.)
5 units, Win (Granovetter, M)

SOC 216B. Global Projects: An Institutional Perspective—(Same as CEE 245B.) The multifaceted challenges of global projects that involve participants from multiple societal systems through the lens of institutional theory. Sources include sociology, economics, development and engineering literatures.
1-2 units, not given this year

SOC 260. Formal Organizations—(For graduate students; see 160.)
5 units, Win (Zhou, X)

SOC 261. The Social Science of Entrepreneurship—(For graduate students; see 161.)
5 units, Spr (Thornton, P)

SOC 262. Organization and Environment—(Ph.D. students register for 362; same as OB 672.) Leading sociological approaches to analyzing relations of organizations and environments emphasizing dynamics. Theoretical formulations, research designs, and results of empirical studies.
4 units, Aut (Carroll, G)

SOC 267A. Asia-Pacific Transformation—(For graduate students; see 167A.)
5 units, Win (Shin, G)

SOC 275. Global Cities and the Transnational Economy—(For graduate students; see 175.)
5 units, Spr (Choi, J)

SOC 277. Comparing Institutional Forms: Public, Private, and Nonprofit—(Same as EDUC 377, GSBGEN 346.) Seminar. For students interested in the nonprofit sector, and those in the joint Business and Education program. The missions, functions, and capabilities of nonprofit, public, and private organizations. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials. Advanced undergraduates and coterms require consent of instructor.
4 units, Spr (Powell, W)

RACE AND ETHNIC RELATIONS

SOC 209. Sociology of Terrorism—(For graduate students; see 109.)
5 units, Spr (Meyersson Milgrom, E)

SOC 238. American Indians in Comparative Historical Perspective—(For graduate students; see 138.)
5 units, Win (Snipp, C)

SOC 239. American Indians in Contemporary Society—(For graduate students; see 139.)
5 units, Spr (Snipp, C)

SOC 241B. Race, Ethnicity, Religion, and Health—(For graduate students; see 141B.)
5 units, Spr (Gonzalez, M)

SOC 244. Race and Crime in America—(For graduate students; see 144.)
5 units, not given this year

SOC 245. Race and Ethnic Relations—(For graduate students; see 145.)
5 units, not given this year

SOC 247A. Comparative Ethnic Conflict—(For graduate students; see 147A.)
5 units, Win (Olzak, S)

SOCIOLOGICAL THEORY

SOC 270. Classics of Modern Social Theory—(For graduate students; see 170.)
5 units, Win (McDermott, M)

RESEARCH METHODS

SOC 274A,B,C. Research Workshop: Philanthropy and Civil Society—(Ph.D. students register for 374A,B,C; same as EDUC 374A,B,C.) Open to Ph.D. students, coterms, and undergraduates writing honors theses. Activities and institutions that define civil society, emphasizing the interactions between funding sources and nonprofit organizations. May be repeated for credit.
A: *1-3 units, Aut (Powell, W)*
B: *2-3 units, Win (Powell, W)*
C: *2-3 units, Spr (Powell, W)*

SOC 257. Causal Inference in Quantitative Educational and Social Science Research—(Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

3-5 units, Spr (Reardon, S)

SOC 280A. Foundations of Social Research—(For graduate students; see 180A.)

5 units, Aut (Sorensen, A)

SOC 280B. Evaluation of Evidence—(For graduate students; see 180B.)

5 units, Win (Hillmann, H)

SOC 281B. Sociological Methods: Statistics—(For graduate students; see 181B.)

5 units, not given this year

PRIMARILY FOR DOCTORAL STUDENTS

300-level courses are limited to matriculated doctoral students; other students require consent of instructor.

GENERAL

SOC 300. Workshop: Teaching Development—For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.

2 units, Spr (Simmons, A)

SOC 305. Graduate Proseminar—For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.

1 unit, Aut (Grusky, D)

PH.D. WORKSHOPS

SOC 311A,B,C. Workshop: Comparative Studies of Educational and Political Systems—(Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ramirez, F; Meyer, J)*

SOC 312. Workshop: Political Sociology, Social Movements, and Collective Action—Faculty and student presentations of ongoing research on topics including: social movement and organizations, and the relationship between them; democracy movements; legislative and policy outcomes; and collective action tactics, strategies, and trajectories. May be repeated for credit.

1-5 units, Aut, Win, Spr (Walder, A; Olzak, S; McAdam, D; Shin, G; Hillmann, H)

SOC 321. Workshop: Social Psychology and Social Structure—(Same as EDUC 317.) Current theories and research agendas, recent publications, and presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Cook, K; McFarland, D; Ridgeway, C)

SOC 338. Workshop: Sociology of Law—(Same as LAW 581.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. Topics such as the relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

1-5 units, Win (Dauber, M; Friedman, L; Sandefur, R)

SOC 341. Workshop: Inequality—Causes, consequences, and structure of inequality; how inequality results from and shapes social classes, occupations, professions, and other aspects of the economy. Research presentations by students, faculty, and guest speakers. Discussion of controversies, theories, and recent writings. May be repeated for credit. Prerequisite: doctoral student status.

1-5 units, Aut, Win, Spr (Grusky, D; Granovetter, M; Sandefur, R)

SOC 346. Workshop: Ethnography—Restricted to doctoral students. Student research employing ethnographic methods. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (McDermott, M)

SOC 368. Workshop: China Social Science—(Same as POLISCI 348R.) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Walder, A; Zhou, X; Oi, J)

SOC 374A,B,C. Research Workshop: Philanthropy and Civil Society—(For Ph.D. students; see 274A,B,C; same as EDUC 374A,B,C.)

A: *1-3 units, Aut (Powell, W)*
B: *2-3 units, Win (Powell, W)*
C: *2-3 units, Spr (Powell, W)*

SOCIAL MOVEMENTS, COMPARATIVE POLITICS, AND SOCIAL CHANGE

SOC 257. Causal Inference in Quantitative Educational and Social Science Research—(Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

3-5 units, Spr (Reardon, S)

SOC 303. The Transnational Workplace—(For graduate students; see 203.)

5 units, Aut (Drori, G)

SOC 309. Nations and Nationalism—The nation as a form of collective identity in the modern era. Major works in the study of nations and nationalism from comparative perspectives with focus on Europe and E. Asia.

4-5 units, not given this year

SOC 310. Political Sociology—Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.

4-5 units, not given this year

SOC 311A,B,C. Workshop: Comparative Studies of Educational and Political Systems—For description, see "Ph.D. Workshops" subsection above.

1-5 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ramirez, F; Meyer, J)*

SOC 312. Workshop: Political Sociology, Social Movements, and Collective Action—For description, see "Ph.D. Workshops" subsection above.

1-5 units, Aut, Win, Spr (Walder, A; Olzak, S; McAdam, D; Shin, G; Hillmann, H)

SOC 316. Historical and Comparative Sociology—Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
3-5 units, Win (Shin, G)

SOC 317B. Chinese Society and Politics—(For Ph.D. students; see 217B.)
3-5 units, Spr (Walder, A)

SOC 318. Social Movements and Collective Action—Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.
3-5 units, Win (McAdam, D)

SOC 338. Workshop: Sociology of Law—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Win (Dauber, M; Friedman, L; Sandefur, R)

SOC 368. Workshop: China Social Science—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Aut, Win, Spr (Walder, A; Zhou, X; Oi, J)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 320. Foundations of Social Psychology—Major theoretical perspectives, and their assumptions and problems, in interpersonal processes and social psychology. Techniques of investigation and methodological issues. Perspectives: symbolic interaction, social structure and personality, and cognitive and group processes.
3-5 units, Aut (Ridgeway, C)

SOC 321. Workshop: Social Psychology and Social Structure—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Aut, Win, Spr (Cook, K; McFarland, D; Ridgeway, C)

SOC 322. Social Interaction, Social Structure, and Social Exchange—Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.
4-5 units, not given this year

SOC 323. Sociology of the Family—Sociological research on changing family forms. Topics include courtship, marriage, fertility, divorce, conflict, relationship skills and satisfaction, gender patterns, power relations within the family, and class and race differences in patterns.
3-5 units, not given this year

SOC 324. Social Networks—How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.
3-5 units, Win (Hillmann, H)

SOC 327. Frontiers of Social Psychology—Advanced topics, current developments, theory, and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.
4-5 units, not given this year

SOC 342B. Gender and Social Structure—The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.
3-5 units, Spr (England, P)

SOC 361. Social Psychology of Organizations—(Same as OB 671.) Social psychological theories and research relevant to organizational behavior. Current research topics; theories to micro-organizational behavior. Topics include models of attribution, choice and decision making, intergroup behavior, stereotyping, and social influence. Prerequisites: Ph.D student; graduate-level social psychology course.
4 units, Win (Lowery, B)

SOC 364. Perspectives on the Social Psychology of Organizations—(Same as OB 673.) Social psychological and sociological research. How theories and methods change as levels of analysis change; focus is on the meso (intermediate between micro and macro) level of analysis. Topics vary from year to year, but may include: organizational learning or routines; power; emotions in organizations; diversity and demography; organizational identity and legitimacy; culture; contagion and diffusion. Theory development processes. Prerequisite: Ph.D student.
4 units, Win (Flynn, F)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 340. Social Stratification—Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.
3-5 units, not given this year

SOC 341. Workshop: Inequality—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Aut, Win, Spr (Grusky, D; Granovetter, M; Sandefur, R)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 314. Economic Sociology—Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student status or consent of instructor.
3-5 units, Aut (Granovetter, M)

SOC 314A. Social Norms and Corruption in the Economy—Seminar. Comparison of the impact on economic activity of self-interest to that of actors' views of what is socially and morally appropriate. The place of social norms in the economy; their origin, nature, content, enforcement, and consequences. Determinants of corruption, a pervasive phenomenon usually explained by incentives but where norms also play an important role. Prerequisite: doctoral student status or consent of instructor.
3-5 units, offered occasionally

SOC 318A. Historical Methods—Methodological problems in social science history and their solutions. Discrete methodological themes through key works in historical sociology, economic history, and related fields. Topics include path dependence, periodization, the nature of historical events and event sequences, narrative explanation and general theory, microhistory, uses of prosopography and network analysis in historical research, spatial and temporal effects, and the idea of the longue durée.
3-5 units, not given this year

SOC 341. Workshop: Inequality—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Aut, Win, Spr (Grusky, D; Granovetter, M; Sandefur, R)

SOC 361. Social Psychology of Organizations—For description, see "Social Psychology and Interpersonal Processes" subsection above.
4 units, Win (Lowery, B)

SOC 362. Organization and Environment—(For graduate students; see 262; same as OB 672.)
4 units, Aut (Carroll, G)

SOC 363. Social and Political Processes in Organizations—(Same as OB 676.) Cognition, attitudes, and behavior in organizations. Social psychological and sociological research at the meso, or intermediate between micro and macro, level of analysis. Topics vary from year to year, but may include: organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; and cultural perspectives on organizations. Prerequisite: Ph.D student.
4 units, Win (Sorensen, J)

SOC 363A. Seminar on Organizational Theory—(Same as EDUC 375A.) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.
5 units, Aut (Powell, W)

SOC 363B. Seminar on Organizations: Institutional Analysis—(Same as EDUC 375B.) Seminar. Key lines of inquiry on organizational change, emphasizing network, institutional, and evolutionary arguments.
3-5 units, Spr (Powell, W)

SOC 364. Perspectives on the Social Psychology of Organizations—For description, see "Social Psychology and Interpersonal Processes" subsection above.
4 units, Win (Flynn, F)

SOC 366. Organizational Behavior and Analysis—(Same as EDUC 288.) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.
4 units, Aut (Drori, G)

SOC 366A. Organizational Ecology—(Same as OB 601.) Theoretical and methodological. Emphasis is on dynamics at the interface between organizational populations and their audiences.
4 units, Win (Hannan, M)

SOC 367. Institutional Analysis of Organizations—Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.
3-5 units, Aut (Scott, W)

SOC 369. Network Analysis—(Same as EDUC 316.) The educational applications of social network analysis. Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Applications to data on schools and classrooms. (SSPEP)
4-5 units, Aut (McFarland, D)

SOC 376. Perspectives on Organization and Environment—(Same as OB 674.) Workshop. Topics may include ideas and theories of networks, learning, competition, status, and decision making.
4 units, Win (Rao, H)

SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit—(Same as 277, EDUC 377, GSBGEN 346; ; see 277.)
4 units, Spr (Powell, W)

RACE AND ETHNIC RELATIONS

SOC 342A. Race and Ethnic Relations—Presentations of current work by faculty, students, and guest speakers. Recent publications and contemporary issues. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, not given this year

SOC 345. Seminar in Comparative Race and Ethnic Relations—Restricted to Ph.D. students. Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates about the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. Relationships among democracy, immigration, and diversity.
3-5 units, not given this year

SOC 346. Workshop: Ethnography—For description, see "Ph.D. Workshops" subsection above.
1-5 units, Aut, Win, Spr (McDermott, M)

SOCIOLOGICAL THEORY

SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict—Restricted to doctoral students.The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.
3-5 units, Aut (Olzak, S)

SOC 370B. Social Interaction and Group Process—Theoretical strategies for the study of interaction, group, and network processes, including rational choice and exchange theory, the theory of action, symbolic interactionism, formal sociology, and social phenomenology. Antecedent ideas in foundational works and contemporary programs of theoretical research.
3-5 units, Spr (Zelditch, M), alternate years, not given next year

SOC 372. Theoretical Analysis and Design—Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.
3-5 units, Aut (Zelditch, M)

RESEARCH METHODS

SOC 374A,B,C. Research Workshop: Philanthropy and Civil Society—(For Ph.D. students; see 274A,B,C; same as EDUC 374A,B,C.)
A: *1-3 units, Aut (Powell, W)*
B: *2-3 units, Win (Powell, W)*
C: *2-3 units, Spr (Powell, W)*

SOC 380. Qualitative Methods—Priority to Sociology doctoral students. Emphasis is on observational and interview-based research. Limited enrollment.
3-5 units, Win (McDermott, M)

SOC 381. Sociological Methodology I: Introduction—Preference to Sociology students. Basic math and statistics. Types of variables, how to recode and transform variables, and how to manage different types of data sets. Introduction to statistical packages and programming.
2-3 units, Aut (Aven, B; McClintock, E)

SOC 382. Sociological Methodology II: The General Linear Model—Preference to Sociology students. The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Limited enrollment. Prerequisites: 281A,B, or equivalents.
3-6 units, Win (Tuma, N)

SOC 383. Sociological Methodology III: Advanced Models for Discrete Outcomes—Required for Ph.D. in Sociology; preference to Sociology students. The rationale for and interpretation of static and dynamic models for the analysis of discrete variables. Prerequisites: 281A,B and 382, or equivalents.
4-5 units, Spr (Zhou, X)

SOC 384. New Models and Methods in the Social Sciences—Preference to Sociology doctoral students. Two-week intensive course. Emphasis is on applications. Topics may include network models, multilevel models, latent class models, mixed methods, new qualitative methods, growth models, geostatistical tools, survey-based experiments, new methods for estimating causal effects, web-based surveys, advanced discrete choice models, and diffusion models.
2-5 units, Sum (Grusky, D) alternate years, not given next year

SOC 385A,B. Research Practicum—Workshop on research methods. Ongoing student research, methodological problems, and possible solutions.
1-2 units, **A:** *Win,* **B:** *Spr (Zhou, X)*

SOC 388. Log-Linear Models—Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.
3-5 units, Aut (Rosenfeld, M)

SOC 389. Mixed Method Research Design and Analysis—Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.
3-5 units, not given this year

GRADUATE INDIVIDUAL STUDY

SOC 390. Graduate Individual Study—May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 391. Graduate Directed Research—May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 392. Research Apprenticeship—May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 393. Teaching Apprenticeship
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 395. Research Internship—Graduate students integrate internship work into their academic program. Students register in the quarter following internship work and complete a research report outlining their work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets requirements for Curricular Practical Training for students on F-1 visas. Work completed cannot be counted toward the departmental research assistantship requirement.
1-10 units, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the Sociology student services office for applicability of these courses to a major or minor program.

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass, C)

EDUC 378X. Seminar on Social Change Processes and Organizations
3-4 units, Spr (Meyerson, D)

FEMST 260/360. Seminar in Women's Health: Women and Disabilities
5 units, Spr (Krieger, S)

HUMBIO 120A. American Health Policy
3 units, Spr (Heller, G)

LAW 229. Race and the Law
3 units, Win (Banks, R)

POLISCI 147. Comparative Democratic Development
5 units, Win (Diamond, L)

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform
5 units, Spr (Oi, J)

PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.)
5 units, Aut (Thomas, E), Win (Walther, G), Spr, Sum (Staff)

PUBLPOL 168. Global Organizations: Managing Diversity
5 units, Win (Meyersson Milgrom, E)

STATS 60. Introduction to Statistical Methods: Precalculus
5 units, Aut (Thomas, E), Win (Walther, G), Spr, Sum (Staff)

URBANST 132. Concepts and Analytic Skills for the Social Sector
4 units, Win (Kieschnick, M)

OVERSEAS STUDIES

Sociology courses that are taught overseas are listed on the Bing Overseas Studies website http://osp.stanford.edu/ or in the "Overseas Studies" section of this bulletin. Students interested in applying OSP courses to their degree may do so with prior approval. Contact the Sociology student services office for further information.

BERLIN

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture
3 units, Win (Junghanns, W)

FLORENCE

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon
5 units, Aut (Allam, K)

OXFORD

OSPOXFRD 117W. Social Change in Modern Britain
4 units, Spr (Palmer, A)

PARIS

OSPPARIS 22. Immigration in France
4-5 units, Aut (Strudel, S)

SANTIAGO

OSPSANTG 111. Social Heterogeneity in Latin America
5 units, Aut (Valdés, T)

CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Emeriti: (Professors) Ronald N. Bracewell, Robert Cannon, I-Dee Chang, Daniel B. DeBra, W.Gary Ernst (Geological and Environment Sciences), Von R. Eshleman, Robert A. Helliwell, Ronald J. P. Lyon, Laurence A. Manning, Bradford W. Parkinson, J. David Powell, Peter A. Sturrock, G. Leonard Tyler (Electrical Engineering), Robert V. Wagoner, Alan T. Waterman; *(Professors, Research)* Donald L. Carpenter, Aldo V. daRosa, Antony Fraser-Smith, Henry T. Howard

Director: Robert V. Wagoner

Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer

Professors: Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Tune Kame (SLAC), Peter F. Michelson (Physics), Vahé Petrosian (Physics), Roger W. Romani (Physics), Norman H. Sleep (Geophysics)

Associate Professors: Tom Abel (Physics, SLAC), Sarah Church (Physics), Bruce B. Lusignan (Electrical Engineering, emeritus), Guenther Walther (Statistics), Howard Zebker (Electrical Engineering, Geophysics)

Assistant Professors: Steve Allen (Physics, SLAC), Stefan Funk (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Risa Wechler (Physics, SLAC)

Professors (Research): C-W. Francis Everitt (HEPL), Philip H. Scherrer (Physics)

Consulting Professors: Alan M. Title, Martin Walt (Electrical Engineering)

SLAC Staff Physicist: Grzegorz Madejski

Center Offices: Varian, Room 316
Mail Code: 94305-4060
Phone: (650) 723-1439
Email: danav@stanford.edu
Web Site: http://www.stanford.edu/group/CSSA/

The center is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the Stanford Linear Accelerator Center. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, including gravitational waves (LIGO, LISA), guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, theoretical astrophysics, x-ray astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research the NASA/Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in Houston, Texas; the University Corporation for Atmospheric Research in Boulder, Colorado; and the San Diego Supercomputing Consortium.

Stanford is the lead institution for the GLAST gamma-ray observatory, Gravity Probe B, and the Solar Oscillations Investigation on the Solar and Heliospheric Observatory spacecraft (SOHO). Stanford is also a member of the Hobby-Eberly Telescope Consortium which operates a 10-meter telescope at the McDonald Observatory of the University of Texas. Members are also involved in the design of the Large Synoptic Survey Telescope (LSST).

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

Further information is available from the director.

SPANISH AND PORTUGUESE

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Isabel Magaña Schevill, Sylvia Wynter; *(Professor, Teaching)* María-Paz Haro
Chair: Joan Ramon Resina
Director of Graduate Studies: Michael Predmore
Director of Undergraduate Studies: Lisa Surwillo
Professors: Michael P. Predmore, Joan Ramon Resina, Jorge Ruffinelli, Guadalupe Valdés, Yvonne Yarbro-Bejarano
Assistant Professor: Lisa Surwillo
Senior Lecturers: Susan Cashion (by courtesy), Irene Corso, Lyris Wiedemann
Courtesy Professors: John Felstiner, Roland Greene, Hans U. Gumbrecht, Ramón Saldívar
Courtesy Associate Professors: James A. Fox, Paula Moya
Visiting Professor: Luiz Costa Lima
Director of Iberian Studies Program: Joan Ramon Resina
Spanish Language Program Coordinator: Alice Miano
Portuguese Language Program Coordinator: Lyris Wiedemann
Catalan Language Program Coordinator: Joan Molitoris

Department Offices: Building 260, Room 214
Mail Code: 94305-2014
Phone: (650) 723-4977
Email: span-port@stanford.edu
Web Site: http://span-port.stanford.edu

Courses given in Spanish and Portuguese have the subject codes SPANLIT and PORTLIT. For courses in Catalan, Portuguese, and Spanish language instruction with the subject codes CATLANG, PORTLANG and SPANLANG, see the "Language Center" section of this bulletin. For a complete list of subject codes, see Appendix.

The department is committed to four main educational purposes: (1) to provide students with expert training in the Spanish, Portuguese, and Catalan languages at all levels and to enable them to develop their skills in these languages according to their goals and interests; (2) to acquaint students with the literatures and cultures of the Iberian Peninsula from the Middle Ages to the present, of the Spanish and Portuguese speaking countries of Latin America, and of the Spanish-speaking communities of the United States; (3) to prepare undergraduates for advanced study in those areas and/or in language education; and (4) to provide doctoral students with advanced training as research scholars and teachers, in preparation for careers as university teachers or in related roles.

The faculty represent a broad range of interests and approaches. In general, the department's programs are characterized by: (1) a commitment to undergraduate and graduate teaching at the highest intellectual level; (2) a strong interdisciplinary focus that combines the study of literature with that of other forms of cultural expression; (3) a large scope including Iberian, Latin American, and U.S. Latino/Chicano fields; and (4) language study tailored to a range of intellectual goals and native and non-native experience with the Spanish, Portuguese, and Catalan languages.

The department works with the Freeman Spogli Institute for International Studies, the Mediterranean Studies and Iberian Studies programs, the Center for Latin American Studies, Comparative Studies in Race and Ethnicity, El Centro Chicano, and several overseas programs in Spain and Latin America. It makes extensive use of the resources of the language laboratory and the Language Center. The University library maintains world class collections in Latin American and Iberian Studies and one of the largest research archives in the country in Chicano history and literature. The Hoover Library is a valuable resource for research topics in Iberian and Latin American intellectual history; it holds one of the largest and most important collections of Spanish Civil War materials in the world. Department faculty teach in the School of Education, Comparative Studies in Race and Ethnicity, Drama, Feminist Studies, Film Studies, Introduction to the Humanities Program, and Modern Thought and Literature. The department houses the Ginebre Serra Visiting Chair in Catalan Studies, and hosts visiting faculty from the Iberian Peninsula and Latin America on a regular basis.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The major in Spanish is designed to acquaint students with the diversity of literary and cultural traditions from the Iberian Peninsula and Spanish- and Portuguese-speaking Latin America. Optional courses permit students to develop a concentration in an area of interest, or to enhance their knowledge of the areas they come to know through the core courses. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well.

The major in Spanish requires 56 units of course work. Courses must be taken for a letter grade and a maximum of 20 units of course work from abroad may be applied towards the major. At the discretion of the Director of Undergraduate Studies, up to 10 units of course work from outside the department, clearly related to the study of literature and culture in the areas and traditions taught by the department, may be counted towards the degree.

The core courses (requirements 1, 2, and 3 below) may not be taken abroad. Exceptional cases for any of these requirements must be referred to the Director of Undergraduate Studies who, in consultation with the chair, makes a final decision.

PREREQUISITES

Students planning to declare the major must have complete the second-year sequence of Spanish language courses through SPANLANG 13, or equivalent. SPANLANG 101 is recommended.

GENERAL COURSE REQUIREMENTS

1. Two Writing in the Major (WIM) courses are required and these are prerequisites for every subsequent course in the major; concurrent enrollment is allowed.
    a) SPANLANG 102 (5 units)
    b) SPANLIT 120 (3 units)
2. Core courses in literature. Students are required to take:
    a) SPANLIT 157. Introduction to Medieval and Early Modern Iberian Literatures
    b) SPANLIT 136. Introduction to Modern Iberian Literature
    c) SPANLIT 161. Introduction to Modern Latin American Literature
3. Core course in culture, history, and civilization. Choose at least one:
    a) SPANLIT 130. Cultural Perspectives in Iberia
    b) SPANLIT 131. Cultural Perspectives in Latin America
4. A senior seminar, SPANLIT 278 or 278A. Topics vary. Two options are offered per year.
5. Up to two courses of introductory language classes may be applied towards the major, such as CATLANG 1A and 2A or PORTLANG 1A and 2A. This is recommended but not required.
6. Any additional 100- or 200-level Spanish or Portuguese literature courses above 103 to complete the required 56 units. One course above 103 and one core course, or consent of the instructor, are prerequisites for 200-level courses. When choosing courses, students are encouraged to consult the Director of Undergraduate Studies who makes recommendations about a course of study related to the student's academic interests. IHUM courses taught at least partially by a faculty member of the department may count towards these electives.

Course work for the major is grouped under the following tracks, from which students may choose the courses necessary to complete the required units.

1. *Iberian Studies*—This tack is designed for students who want to acquire a command of the major languages and literatures of the Iberian Peninsula, Spanish, Portuguese, and Catalan, against the background of 1,000 years of cultural history and the societies where these languages arose. Emphasis is on the study of language, literature, and film to gain knowledge of a complex society and its cultural traditions.
2. *Latin American Studies (including Brazil)*—This track includes the study of oral and textual aesthetic production of indigenous peoples and the intellectual and literary productions of the periods that followed the conquest: colonial, and the 18th, 19th, and 20th centuries in the Spanish- and Portuguese-speaking countries of the Latin American continent.

3. *U.S. Latino/Chicano Studies*—This track offers students the opportunity to study the cultural productions of the people of Mexican and Latin American origin living in the United States. Emphasis is on language, literature, performance, visual art, and film in sociohistorical context.
4. *Language in the Spanish-speaking World*—This track is designed for students who want to acquire advanced linguistic competence in the Spanish-speaking world through the areas of second language or dialect acquisition, Spanish dialectology, language use in the Chicano community, and theory and issues in the study of bilingualism from a sociolinguistic perspective.

How to Declare a Major—Students interested in declaring a Spanish major should see the Director of Undergraduate Studies.

Double Majors—The major in Spanish and Portuguese is designed to combine with a second major in another field and with study abroad. Students may not count the same courses to fulfill requirements in both majors.

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the "Language Center" section of this bulletin for these courses.

MINORS

The minors in Spanish and Portuguese are for students who want to develop advanced linguistic competence in Spanish or Portuguese, or who wish to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking worlds. With the consent of the student's adviser, up to 5 units of relevant course work outside the department, and up to 10 units of relevant course work taken abroad, may count toward these minors. All courses must be taken for a letter grade in order to count towards the minor. Courses other than those listed as eligible may only count toward the minor with the approval of the minors coordinator or the Director of Undergraduate Studies. To apply for either of these minors or for more information, see the undergraduate student services office in the Division of Literatures, Cultures, and Languages.

MINOR IN SPANISH

30 units of course work taken for a letter grade. Up to 5 units of coursework outside the department may count towards the minor, with the approval of the minors coordinator. Up to 10 units of course work from abroad may be applied towards the minor.

Requirements—

1. SPANLANG 102.
2. A 100- or 200-level course in Iberian literature.
3. A 100- or 200-level course in Latin American literature.
4. Any additional 100- or 200-level courses in literature and culture to complete 30 units. IHUM courses taught at least partially by a faculty member of the department count towards these electives.

MINOR IN PORTUGUESE

Requirements—30 units of course work in Portuguese at any level, and in courses related to Portugal, Brazil, or other Lusophone cultures either within or outside the department. Courses not listed below must be approved by the minors coordinator or the Director of Undergraduate Studies to count toward the minor. Students must take at least two courses at the 100 level or higher related to Brazil or Portugal, choosing from one or more of the following subject areas:

1. Luso-Brazilian language, literature, and culture. Suggested courses include: PORTLANG 101, 102; PORTLIT 193Q; HISTORY 276.
2. Iberian studies courses that include Lusophone components. Suggested courses include: SPANLIT 136, 218, 278.
3. Latin American courses that include Lusophone components. Suggested courses include: SPANLIT 167, 240; CSRE 192.
4. Courses that include Luso-Brazilian immigration groups.
5. Language in the Portuguese-speaking world; any Portuguese language course.

Consult with the minors coordinator or the Coordinator of the Portuguese Language Program, Lyris Wiedemann, for more information on recommended courses. Minors must be approved by the minors coordinator or the Director of Undergraduate Studies.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

HONORS PROGRAM

Spanish and Portuguese majors with a grade point average (GPA) of 3.3 (B+) or better in major courses may apply to the honors program in Spring Quarter of the junior year. Students should submit an application for the honors program and a proposal outline and may enroll for 2 units of SPANLIT 189B, for the drafting or revision of the thesis proposal and preliminary research. Honors students are encouraged to participate in the honors college coordinated by the Division of Literatures, Cultures, and Languages and offered at the end of the summer before the senior year. In Autumn Quarter of the senior year, students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in SPANLIT 189A while composing the thesis during Winter Quarter. Each honors student must write an honors essay of 20-25 pages under the direction of a faculty member who serves as adviser, and the completed thesis must be submitted by the end of Winter Quarter. Students who do not enroll in a 189B course in the junior year may enroll in SPANLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Students should consult their undergraduate advisers for additional information on the honors program.

STUDY ABROAD

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Office of the University Registrar. Depending on course selections, up to 20 units of course work taken abroad may be applied toward the major and 10 units toward the minor in Spanish or Portuguese. Students planning to study abroad, or returning from study programs, are encouraged to consult with the Director of Undergraduate Studies, the minors coordinator, or an undergraduate adviser to coordinate the course work from abroad with their degree program.

The department and Bechtel International Center maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs, although the department does not sponsor any one in particular. Students considering different options are encouraged to speak with the Chair of the department or the Director of Undergraduate Studies.

STANFORD IN SANTIAGO, CHILE AND MADRID, SPAIN

The Bing Overseas Studies programs in Santiago, Chile and Madrid, Spain require one year of college-level Spanish (SPANLANG 3). Course work is primarily in Spanish. Information and course offerings, are listed in the "Overseas Studies" section of this bulletin or at http://osp.stanford.edu. Internships and research opportunities may be arranged for two quarter students.

SPAIN

The Department of Spanish and Portuguese recommends study in Spain with the Barcelona Consortium administered by Brown University, with which Stanford is associated. This program combines courses at the program's center with open access to courses at three Barcelona universities: Universitat Pompeu Fabra, University of Barcelona, and Autonomous University of Barcelona. Visiting faculty from Brown, Chicago, and Northwestern complement the offerings of these three major universities. Admission is competitive, presupposing competence in Spanish at the time of application. An introductory, three-week program in Mediterranean culture and Barcelona history prior to the beginning of the semester familiarizes students with the history and culture of the area.

The department also supports the Hamilton College Academic Year in Spain program, administered by the Department of Romance Languages of Hamilton College in cooperation with faculty members of Williams and Swarthmore colleges. It has its own facilities located on the outskirts of the University of Madrid campus. Spanish must be spoken at all times, in and outside class, and students are required to sign a pledge to this effect before their arrival. See http://www.hamilton.edu/academics/hcays/.

Other programs are also recognized by the department, and students are encouraged to discuss their interests with the Chair or with the Director of Undergraduate Studies.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estadual do Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil or Portugal should contact Lyris Wiedemann.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

COTERMINAL B.A. AND M.A.

The requirements for the coterminal B.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. Contact Graduate Admissions at the Registrar’s Office for information.

For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

STEP COTERMINAL TEACHING PROGRAM

The Department of Spanish and Portuguese, in cooperation with the Stanford Teacher Education Program (STEP) of the School of Education, offers a special course of study for students interested in becoming teachers. By following this course of study in Spanish Language, Literatures, and Cultures and enrolling in the STEP Coterminal Teaching Program, students can, after 5 years, receive a B.A. in Spanish and Portuguese, an M.A. in Education, and a California Teaching Credential.

The Spanish Language, Literatures, and Cultures curriculum consists of approximately 56 quarter units in addition to demonstrated proficiency in the language, defined as listening, speaking, reading, and writing at a level equivalent to advanced on the ACTFL Oral Proficiency Interview. This course of study fulfills all the major requirements of the Department of Spanish and Portuguese and includes coursework in linguistics and language diversity studies, the history of the Spanish-speaking world, and Spanish literature and cultures.

Students enrolled in the STEP Coterminal Teaching Program are also expected to complete a series of core courses during their undergraduate years. These include one course in developmental psychology; one course in cognitive psychology; one course in the social foundations of education; one course on the role of race, class, and ethnicity in American society; a structured internship experience in a community-based organization serving youth and/or their families; and a teaching practicum offered by the School of Education.

For more information about this option, consult Professor Valdés or the coordinator of the STEP Coterminal Teaching Program in CERAS 309; (650) 725-6321 or (650) 725-0652.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS IN SPANISH AND PORTUGUESE

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of 3.0 or above.

The requirements for the M.A. are:

1. One course in literary or cultural theory
2. Two 200 or above courses in Latin American (including Brazilian) or Latino/Chicano literature and culture
3. Two 200 or above courses in Iberian Studies
4. One 300-level course in Iberian Studies and one in Latin American (including Brazilian)
5 Reading knowledge of Portuguese or Catalan for students concentrating in Spanish, or Spanish or Catalan for students concentrating in Portuguese.

Independent study courses (SPANLIT 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by permission of the Director of Graduate Studies.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY

The requirements of the Ph.D. are:

1. 135 units of graduate-level course work with a grade point average (GPA) of 3.0 (B) or above. Units completed toward the M.A. degree can be counted for the Ph.D.
2. One course on introduction to literary theory, which may be fulfilled with COMPLIT 369.
3. A reading knowledge of Portuguese and Catalan, or one of these and one other foreign language.
4. The qualifying paper, the comprehensive examination, and the University oral examination, as described below.
5. Teaching of three to five courses in the department.
6. Completion of a dissertation.

Independent study courses (299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Director of Graduate Studies in consultation with the student’s graduate adviser. For residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s *Graduate Student Handbook*.

In preparation for teaching, Ph.D. candidates may elect to take APPLLING 201 in the first year.

In consultation with the adviser, students choose one major field of study from the following:

1. Medieval and Early Iberian Literature
2. Modern Iberian Literature and Film
3. Latin American Literature to Independence
4. Latin American Literature and Culture of the 19th and 20th Centuries, including Brazil
5. Chicano Literature and Culture.

In addition, candidates choose two secondary areas of study outside the major field from any of the above

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area. Students whose major field is in Latin American or Latino/Chicano Literature must choose one secondary area in Iberian literature and vice versa.

In addition to the department’s course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as the graduate programs in Comparative Literature, Feminist Studies, History, Humanities, Linguistics, or Modern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Not more than 20 units should be taken outside the department.

After the first year of study, the student’s progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper of approximately 20 pages, called the qualifying paper, by the third week of Winter Quarter of the second year. The requirements for this paper are outlined in the *Graduate Student Handbook*.

If approval of the qualifying paper is granted, the student should file a formal application for candidacy no later than the end of the second year, as prescribed by the University. Course requirements are usually completed by the third year of study. A written comprehensive examination on the major field and secondary areas is then taken. The examination is based on a list of readings, selected in consultation with the adviser, which integrates major and secondary topics in both Iberian and Latin American or Latino/Chicano Studies. At this time, students hand in a long research paper to be evaluated by the faculty. For further details, consult the *Graduate Student Handbook*.

Following the comprehensive examination, students should find a topic requiring extensive original research and request that a member of the department serve as dissertation adviser. The student must complete the Reading Committee form and request that the chair approve a committee to supervise the dissertation. The committee may advise extra preparation within or outside the department, and time should be allowed for such work. The University oral examination usually takes place one or two quarters after passing the comprehensive examination. The oral examination covers plans for the dissertation based on a prospectus approved by the committee (15 to 20 pages), and may be taken in English, Spanish, Portuguese, or Catalan, depending on the committee's composition.

The dissertation must be submitted to the reading committee in substantially final form at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Candidates taking more than five years must apply for reinstatement of candidacy.

PH.D. MINOR

For a minor in Spanish or Portuguese, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students who choose a minor in another department should consult with advisers in that department.

JOINT PH.D. PROGRAMS

The Department of Spanish and Portuguese participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Spanish and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, the Department of Philosophy, and in the Division of Literatures, Cultures, and Languages.

OVERVIEW

1. Stanford Introductory Seminars, freshman and sophomore preference
2. Literature, Culture, Linguistics, and Theory (120-399)
   a) Undergraduate Courses (130-199)
   b) Courses for Advanced Undergraduates and Graduates (200-299)
      Language, Linguistics, and Theory (200-212)
      Iberian Literature (213-239)
      Latin American Literature (240-279)
      Latino/Chicano Literature (280-289)
      Individual Work (299)
3. Graduate Seminars (300-399)
      Linguistics, Methodology, and Literary Theory (300-313)
      Iberian Literature (314-339)
      Latin American Literature (excluding Brazil) (340-369)
      Luso-Brazilian Literature (370-379)
      Chicano Literature (380-389)
      Individual Work (399)
      Dissertation Research (802)

Courses bearing the suffix 'E' are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages or bilingually.

SPANISH, PORTUGUESE, AND CATALAN LANGUAGE COURSES

The following courses represent a typical sequence for three years of Spanish or Portuguese language study, or two years of Catalan. Majors and prospective majors should consult the requirements for a B.A. in Spanish above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Yost House, see the "Language Center" section of this bulletin.

SPANLANG 1,2,3. First-Year Spanish
5 units, Aut, Win, Spr (Alexander, A; Catoira, L; Del Carpio, C; Flores, F; Junguito, M; Méndez Barletta, L; Miano, A; Ortiz Cuevas, C; Sánchez, K; Reinhold, V; Urruela, M)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis
4-5 units, Aut, Win, Spr (Burgos Jara, C; Catoira, L; Guzmán, C; Kenna, C; Méndez Barletta, L; Molitoris, J; Ortiz Cuevas, C; Perales, O; Schmidt, S; Urruela, M)

SPANLANG 100. Advanced Oral Communication
3 units, Aut, Win, Spr (Perales, O)

SPANLANG 101. The Structure of Spanish
3-5 units, Aut (Valdés, G)

SPANLANG 102. Composition and Writing Workshop
3-5 units, Aut (Staff)

SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students—WIM
3-5 units, Win (Miano, A)

PORTLANG 1,2,3. First-Year Portuguese
5 units, **1:** *Aut (Sotelino, K),* **2:** *Win (Delgado, A),* **3:** *Spr (Staff)*

PORTLANG 11A,12A. Accelerated Second-Year Portuguese
3-5 units, Aut, Win, Spr (Delgado, A)

PORTLANG 101. Reading Brazil
3-4 units, Aut (Delgado, A)

PORTLANG 102. Brazil in Text: Advanced Grammar and Composition—WIM
3-4 units, Win (Wiedemann, L)

PORTLANG 103. Advanced Conversation: Brazil Today
3 units, Spr (Wiedemann, L)

CATLANG 1A,2A. Accelerated First-Year Catalan
5 units, **1A:** *Aut,* **2A:** *Win (San Juan Pastor, M)*

CATLANG 11A, 12A. Accelerated Second-Year Catalan
3-5 units, **11A:** *Spr (San Juan Pastor, M),* **12A:** *not given this year*

STANFORD INTRODUCTORY SEMINARS

SPANLIT 101N. Visual Studies and Chicana/o Art—Stanford Introductory Seminar. Preference to freshmen. Images, context, and spectatorship. Who is seen and not seen in visual contexts? Whose gaze is privileged? Which aspects of the past are circulated as visual representations? Whose fantasies are fed by which visual images? In what circumstances is looking and returning the gaze an act of political resistance? How do people interact with images to make and remake the world in the shape of their own desires and fantasies? GER:DB-Hum, EC-AmerCul
3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 104N. Race and Slavery in Literature of the Nineteenth-Century Spanish Empire—Stanford Introductory Seminar. Preference to freshmen. How race, slavery, and abolition were discussed in the Spanish context and how this differed from parallel debates in the Anglo-American world. 19th-century writers from Cuba and Spain who questioned the

validity of race as a concept and the morality of colonial slavery. Sources include Cuban and Spanish novels, plays, and poetry, and authors who may include Sab, Cecilia Valdez, Don Alvaro, Carolina Coronado, and Christopher Schmidt-Nowara. GER:EC-GlobalCom
3-4 units, Aut (Surwillo, L)

SPANLIT 108Q. Latin American Cinema: Politics and Aesthetics—Stanford Introductory Seminar. Preference to sophomores. What is cinema? What makes a film work as drama or art? How is a story presented to an audience for a political and social interest? Is society or the individual more important for these films? Films since the 60s about the Cuban revolution, the Argentinean dirty war, the Falkland Islands war, the disappeared in Chile and Uruguay, political science fiction, transnational cinema, and horror fantasy.
3-4 units, Win (Ruffinelli, J)

SPANLIT 114N. Lyric Poetry—Stanford Introductory Seminar. Preference to freshmen. For students with considerable competence in Spanish. Elements and expressive devices of lyric poetry: multidimensional language, denotation, connotation, image, metaphor, symbol, allegory, paradox, irony, meaning, idea, rhythm, and meter. Poets of Spain and Latin America of the late 19th and early 20th century including G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, García Lorca, Pablo Neruda, and Gabriela Mistral. In English and Spanish.
3-5 units, Spr (Predmore, M)

SPANLIT 119N. Buenos Aires, Havana, Mexico City: Modernism and the Latin American City—Preference to freshmen. The influence of architectural, artistic, and literary modernism on three Latin American cities during the 50s. The urban planning theories of Le Corbusier as adopted by architects including Clorindo Testa, Mario Pani, and Ricardo Porro. Authors include Le Corbusier, Marshall Berman, Jane Jacobs, Julio Cortázar, Guillermo Cabrera Infante, and Carlos Fuentes. Films: *I Am Cuba, Los Olvidados*, and *Sucedió en Buenos Aires*.
3-4 units, Win (Gallo, R)

SPANLIT 178N. Del Otro Lado: Latina/o Performance Art in the U.S.—(Same as DRAMA 17N.) Stanford Introductory Seminar. Preference to freshmen. Works by U.S. Latina/o performance artists from the margins of the mainstream Euro-American theater world. How performance art serves as a dramatized essay, producing transgressive explorations of queer and national and ethnic identities. Artists: Luis Alfaro, Nao Bustamante, the Coatlicue Theater Company, Guillermo Gómez-Peña, Celia Herrera Rodríguez, Ana Mendieta, and Carmelita Tropicana. Creation and performance of a short original piece; performance viewings. GER:DB-Hum, EC-AmerCul
3 units, Win (Moraga, C)

PORTLIT 193Q. Spaces and Voices of Brazil through Films—Stanford Introductory Seminar. Preference to sophomores. Brazilian culture through films that portray its five cultural-geographical regions. Focus is on movies and complementary texts on Brazilian culture to understand the forces that shaped the multicultural reality of modern Brazil.
3-4 units, Aut (Wiedemann, L)

LITERATURE, CULTURE, LINGUISTICS, AND THEORY

UNDERGRADUATE

SPANLIT 120. Introduction to Literary and Scholarly Research—Strategies and tactics for research and writing in the humanities; focus is on the Spanish-speaking world. How to write a research proposal; how to conduct research online and in the library; annotated bibliographies; bibliographical essays; rhetorical strategies; and common logical fallacies. WIM
3 units, Win (Surwillo, L)

SPANLIT 124. Beyond Spanglish: Bilingual Chicana/o Cultural Productions—The use of Spanglish by those who embrace it as part of a cultural identity and those who oppose it as a denigration of Spanish and English languages. Sociolinguistic perspectives on language mixing.
3-5 units, Aut (Madrigal, D)

SPANLIT 125. The Forms of Wonder—The representation of wonder in early colonial texts written by European chroniclers, its problematic re-appropriation by the magic realist novel, and eventual exhaustion within Latin American literature.
3-5 units, Win (Arellano, J)

SPANLIT 130. Cultural Perspectives in Iberia—Historical trends and cultural tropes in the Iberian Peninsula. Topics and authors vary.
3-5 units, not given this year

SPANLIT 131. Cultural Perspectives in the Luso-Hispanic Americas—Major theoretical debates about the construction of Latin American identities, from the 19th century to the present. Readings by writers, poets, philosophers, and historians, including Rodo, Retamar, O'Gorman, Vasconcelos, Henríquez-Ureña, Ramos, Paz, Carpentier, Lezama Lima, Borges, and Fuentes.
3-5 units, Win (Gallo, R)

SPANLIT 136. Survey of Modern Iberian Literature—1800 to the present. Topics include: romanticism; realism and its variants; the turn of the century; modernism and the avant garde; the Civil War; and the second half of the 20th century. Authors may include Mariano José de Larra, Gustavo Adolfo Bécquer, Rosalía de Castro, Benito Pérez Galdós, Joan Maragall, Eugeni d'Ors, Antonio Machado, Fernando Pessoa, Federico García Lorca, Salvador Espriu, Mercè Rodoreda, António Lobo Antunes, Manuel Rivas, Bernardo Atxaga, and Josep Maria Benet i Jornet. GER:DB-Hum
3-5 units, Win (Resina, J)

SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis—Focus is on the question of the limits of the literary through textual analysis of dramatic and nonfiction works. Sources include canonical Latin American and peninsular Spanish works from 1500 to the present, and culturally significant texts such as the *Edict of Expulsion*, Civil War materials, and current newspaper essays. In Spanish.
3-5 units, Spr (Surwillo, L)

SPANLIT 157. Introduction to Medieval and Early Modern Iberian Literatures—(Same as PORTLIT 157.) Topics may include: lyric poetry and poetic performance; Jewish and Muslim literatures; the development of Castilian, Catalan, and Portuguese prose; the Valencian golden age; texts of the Renaissance and Baroque; the literature of imperial expansion into Africa, Asia, and the Americas. Authors may include: Alfonso X, Gonzalo de Berceo, Calderón de la Barca, Luis de Camões, Miguel de Cervantes, Cristóbal Colón, Luis de Góngora, Ramon Llull, Ausiàs March, Joanot Martorell, Fernão Mendes Pinto, Bernardim Ribeiro, Fernando de Rojas, Juan Ruiz, Garcilaso de la Vega, and María de Zayas. In Spanish.
3-5 units, Aut (Barletta, V)

SPANLIT 161. Survey of Latin American Literature—From independence to the present. Topics include romantic allegories of the nation; modernism and postmodernism; avant garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors may include Rubén Darío, Gabriela Mistral, Pablo Neruda, Vicente Huidobro, César Vallejo, Jorge Luis Borges, José María Arguedas, Gabriel García Márquez, Octavio Paz, Rosario Castellanos, Nancy Morejón, Rigoberta Menchú, Joaquim Machado de Assis, and Clarice Lispector. GER:DB-Hum
3-5 units, Spr (Ruffinelli, J)

SPANLIT 180E. Introduction to Chicana/o Studies—(Same as CHICANST 180E, CSRE 180E.) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship. GER:DB-Hum, EC-AmerCul
5 units, Spr (Yarbro-Bejarano, Y; Palafox, J)

SPANLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

SPANLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

SPANLIT 193. The Cinema of Pedro Almodóvar—The evolution of Spain's most recognizable director from marginal, transgressive amateur cinema to polished visual style. The deliberate blurring of frontiers between mass and high culture; his use of metafilmic allusions and attention to sexuality, extreme experiences, and marginal characters. From his early work to recent award-winning films. Prerequisite: spoken Spanish. GER:DB-Hum
3-5 units, Spr (Resina, J)

SPANLIT 199. Individual Work—Open only to students in the department, or by consent of instructor.
1-12 units, Au, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATES AND GRADUATE STUDENTS

LANGUAGE, LINGUISTICS, AND THEORY

SPANLIT 206. Language Use in the Chicano Community—(Same as EDUC 242, APPLLING 206.) The significance and consequences of language diversity in the culture and society of the U.S. Experiences of non-English background individuals through focus on Spanish-English bilingual communities.
3-5 units, Spr (Valdés, G)

SPANLIT 207. Theory and Issues in the Study of Bilingualism—(Same as EDUC 149, EDUC 249.) Sociolinguistic perspective. Emphasis is on typologies of bilingualism, the acquisition of bilingual ability, description and measurement, and the nature of societal bilingualism. Prepares students to work with bilingual students and their families and to carry out research in bilingual settings. (SSPEP)
3-5 units, Aut (Valdés, G)

IBERIAN LITERATURE

SPANLIT 215/315. Nineteenth-Century Spanish Serials—Focus is on the serial novel *María o la hija de un jornalero* by Wenceslao Ayguals de Izco, which tackled contemporary social concerns including the death penalty, prisons, Catholic church, empire, slavery, and the decline of the aristocracy. Form and content; and similarities in reading behaviors and strategies between the 19th and 21st centuries. Students simulate 19th-century subscription practices and receive weekly electronic installments.
3-5 units, Win (Surwillo, L)

SPANLIT 216. Other Words: Crypto-Muslims in Early Modern Iberia—Literature by and related to the large minority community of Muslim converts to Christianity in early modern Spain and Portugal. Introduction to literature in *Aljamiado* (Ibero-Romances written in Arabic script). Theoretical bases for the study of Muslim discourse in the West. Authors include Jaume Bleda, Miguel de Cervantes, Iça de Gebir, Lope de Vega, el Mançebo de Arévalo, Francisco Núñez Muley, and Juan de Ribera.
3-5 units, Spr (Barletta, V)

SPANLIT 224. The Spanish Republic, the Civil War, and the Aftermath—The significance of the civil war in Spanish, European, and world history. The International Brigades. The effect of war on the literary and cultural life of the country and the response of writers from Spain (Alberti, Lorca, Machado) and Latin America (Guillén, Neruda, Vallejo). Literary protest during the Franco regime by Aleixandre, Alonso, Cela, and Sender.
3-5 units, Aut (Predmore, M)

LATIN AMERICAN LITERATURE

SPANLIT 240. Brazilian and Spanish American Novellas—(Same as PORTLIT 240.) The novella as literary genre in contemporary Latin American fiction. Texts by Clarice Lispector, Mario Vargas Llosa, and Adolfo Bioy Casares.
3-5 units, Spr (Hatoum, M)

SPANLIT 242. The Rise of the Latin American Novel and Its Reception in Spain—60s Latin American novels that changed the paradigm in Spanish language novel writing. Focus is on Vargas Llosa (*La ciudad y los perros*), García Márquez (*Cien años de soledad*), Cortazar (*Rayuela*), and Donoso (*El obsceno pájaro de la noche*), emphasizing their critical reception in Spain from 1960 to 1980, as expressed in the collection *La llegada de los bárbaros* and related critical works.
3-5 units, Spr (Ruffinelli, J)

SPANLIT 244. The Formation of a Nation—(Same as PORTLIT 244.) Hispanic American and Brazilian processes of independence. Topics include: D. João VII in Rio de Janeiro; Rio as capital of a vanishing empire; English protection; agricultural economy and the role of slavery; the relation between the manor house and cities. Focus is on themes of a dependent economy, based on exportation of agricultural products and estate domination; case study of the Canudos war in the hinterland of Bahia. Challenges in the 20th century: dictatorships and the dilemmas of democracy in a globalized world.
3-5 units, Win (Costa-Lima, L)

SPANLIT 249. Reading Cinema Today—The relationship between cinema and literature, from the point of view of film movements and authors crucial to the constitution of a new film language. Syntactic and stylistic innovations that have led the complexity of image movement to a breaking point. Image time which transformed the traits of the classic cinema. Changes in film aesthetics. Texts include Rohmer, Deleuze, Tarkovski, Bazin, Buñuel, Morin, Metz, Godard, Bresson, and Robbe-Grillet.
3-5 units, Win (Sánchez, C)

SPANLIT 278. Senior Seminar: 1640, Revolution, and the Iberian Baroque—Iberian Baroque literature in the context of revolutions in Portugal and Catalonia. The relation between art and nationalist politics. Authors include: Pedro Calderón de la Barca, Alexandre de Ros, Francesc Fontanella, Luis de Góngora, Francisco Manuel de Melo, Francisco Quevedo, Jaume Romeu, António de Saldanha, António de Sousa de Macedo, and António Vieira. In Spanish. May be repeated for credit. WIM
3-5 units, Win (Barletta, V)

SPANLIT 278A. Senior Seminar: Freud in Latin America—The reception of Freudian writings and psychoanalytic theory in Latin America in the early 20th century. Readings including Honorio Degado (Peru), Martínez Estrada (Argentina), and Paz and Ramos (Mexico). WIM
3-5 units, Spr (Gallo, R)

LATINO/CHICANO LITERATURE

SPANLIT 282. Creative Non-Fiction Writing Workshop
3-5 units, Spr (Moraga, C)

SPANLIT 286/386. The Films of Lourdes Portillo—Focus is on the representation of Latina/o identity, human rights, social justice, and Latin American realities. Formal features, emphasizing experimentation with the documentary form. Films include: *After the Earthquake; Señorita Extraviada; Las Madres: The Mothers of Plaza de Mayo; La Ofrenda: The Days of the Dead; The Devil Never Sleeps; Corpus*.
3-5 units, Aut (Yarbro-Bejarano, Y)

SPANLIT 289. The Body in Chicana/o Cultural Representations—What cultural representations show about how the body is socially situated, constructed, and interpreted through race, gender, sex, class, and ability. Social meanings of the body as depicted in Chicana/o literature, film, and visual art. The body as: location of knowledge and resistance; target and challenger of racism, misogyny, class oppression, and homophobia; conforming or refusing to conform to discourses of the ideal citizen; and as site and agent of desire. Writers and artists may include Manuel Muñoz, Lourdes Portillo, Delilah Montoya, and Cherríe Moraga.
5 units, Aut (Yarbro-Bejarano, Y)

BRAZILIAN LITERATURE

PORTLIT 240. Brazilian and Spanish American Novellas—(Same as SPANLIT 240; see SPANLIT 240.)
3-5 units, Spr (Hatoum, M)

PORTLIT 244. The Formation of a Nation—(Same as SPANLIT 244; see SPANLIT 244.)
3-5 units, Win (Costa-Lima, L)

INDIVIDUAL WORK

PORTLIT 299. Individual Work—Open to department undergraduates or graduate students by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 299. Individual Work—Open to department undergraduates or graduate students by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE SEMINARS

Open to undergraduates with consent of instructor.

IBERIAN LITERATURE

SPANLIT 314. Poetic Form and Performance: The Medieval Iberian Lyric—Poetic composition and performance in relation to language and social life in medieval Iberia. How performative genres mediate the processes by which the social is shaped and reconfigured. Themes of love, suffering, body, power, gender, and death. Texts include: Andalusian *muwashshahat* and *azjal* in Spanish, Galician-Portuguese *cantigas*, *Razón de amor*, Castilian *cancionero* poetry, and the Valencian *segle d'or*.
3-5 units, Win (Barletta, V)

SPANLIT 315. Nineteenth-Century Spanish Serials—(Same as 215; see 215.)
3-5 units, Win (Surwillo, L)

SPANLIT 324. Modern Catalan Literature—The recent resurgence of Catalan and cultural production centered in Barcelona. Writers from the 20th-century canon, including Maragall, d'Ors, Pla, Sagarra, Rodoreda, Espriu, and Benet i Jornet. In Spanish.
3-5 units, Aut (Resina, J)

SPANLIT 336. Early 20th-Century Peninsular Spanish Poetry—Poetry in restoration Spain, 1871-1930, against the background of the democratic tradition of Spanish liberalism. Emphasis is on stylistic analysis and concepts such as the generation of 1898, modernism, Krausism, pure poetry, and symbolic systems.
3-5 units, Spr (Predmore, M)

LATIN AMERICAN LITERATURE

SPANLIT 357. The Novel and Latin American Sociopolitical History—(Same as PORTLIT 357.) The modern European conception of literature as in Schlegel's *Fragments* and the break with the belles lettres tradition. Topics include: the 19th-century gap between Europe and Latin American society; absence of middle classes and rise of the intellectual in spheres of power; colonial heritage; role of positivism (Comte) and evolutionism, including Sarmiento's *Facundo* and Euclides da Cunha's *Os Sertões;* documentalism and national identity; slow growth of intellectual presence. Notable exception: Machado de Assis' novels *D. Casmurro* and *Esaú e Jacó*.
3-5 units, Win (Costa-Lima, L)

SPANLIT 386. The Films of Lourdes Portillo—(Same as 286; see 286.)
3-5 units, Aut (Yarbro-Bejarano, Y)

BRAZILIAN LITERATURE

PORTLIT 357. The Novel and Latin American Sociopolitical History—(Same as SPANLIT 357; see SPANLIT 357.)
3-5 units, Win (Costa-Lima, L)

INDIVIDUAL WORK

PORTLIT 399. Individual Work—For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 399. Individual Work—For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 103/262C. Cultural Diversity, Ethnicity, and Governance in Indigenous Latin America
3-5 units, Spr (Karp-Toledo, E)

CHICANST 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class—(Same as CSRE 165G, SOC 165G.)
5 units, Win (Gonzalez, M)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective—(Same as CSRE 181S.)
5 units, Spr (Palafox, J)

DANCE 43. Afro-Peruvian and Afro-Brazilian Dance
1 unit, Win (Cashion, S)

DLCL 189. Honors Thesis Seminar
5 units, Aut (Surwillo, L)

DRAMA 177/277. Playwriting
5 units, Win (Moraga, C)

OVERSEAS STUDIES

Courses approved for the Spanish and Portuguese majors and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANTIAGO

OSPSANTG 42. Women's Representation in the Cinema of the Southern Cone
3 units, Win (Staff)

OSPSANTG 56. Contemporary Chilean Women Writers
3-5 units, Spr (Haro, P)

OSPSANTG 104X. Modernization and Culture in Latin America
5 units, Aut (Subercaseaux, B)

OSPSANTG 111. Social Heterogeneity in Latin America
5 units, Aut (Valdés, T)

OSPSANTG 118X. Artistic Expression in Latin America
5 units, Win (Albornoz, C)

STATISTICS

Emeriti: Theodore W. Anderson, Albert Bowker, Ingram Olkin, Charles Stein
Chair: Trevor J. Hastie
Professors: Thomas M. Cover, Amir Dembo, Persi Diaconis, David L. Donoho, Bradley Efron, Jerome H. Friedman, Trevor J. Hastie, Iain M. Johnstone, Tze L. Lai, Art Owen, Joseph P. Romano, David O. Siegmund, Paul Switzer, Robert J. Tibshirani, Wing H. Wong
Associate Professors: Jonathan Taylor, Guenther Walther
Assistant Professors: Andrea Montanari, Nancy Zhang
Professor (Teaching): Susan Holmes
Courtesy Professor: Richard A. Olshen
Courtesy Associate Professors: Simon Jackman, David Rogosa
Consulting Professor: Charles Chui

Mail Code: 94305-4065
Phone: (650) 723-2620
Web Site: http://www-stat.stanford.edu

Courses given in Statistics have the subject code STATS. For a complete list of subject codes, see Appendix.

The department's goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in Statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Olshen, Tibshirani, Wong), Mathematics (Dembo, Diaconis), Political Science (Jackman), and the Stanford Linear Accelerator Center (Friedman). The research activities of the department reflect an interest in applied and theoretical statistics and probability. There are workshops in biology/medicine and in environmental factors in health.

In addition to courses for Statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include several networked Unix servers and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and our own faculty.

UNDERGRADUATE PROGRAMS

MAJOR

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Science. This interdepartmental program is administered in the Department of Statistics and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the "Mathematical and Computational Science" section of this bulletin.

MINOR

The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.

1. *Qualifying Courses:* at most, one of these two courses may be counted toward the six course requirement for the minor: MATH 52; STATS 191.
2. *Required Courses:* STATS 116 and 200.
3. *Elective Courses:* at least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department and these may be counted toward the course requirement. Examples of elective course sequences are:

   STATS 202, 203, emphasizing data analysis and applied statistics
   STATS 205, 206, (207), emphasizing statistical methodology
   STATS 206, ECON 160, emphasizing economic optimization
   STATS 206, PSYCH 156, emphasizing psychology modeling and experiments
   STATS 207, EE 264, (279), emphasizing signal processing
   STATS 217, BIOSCI 283, emphasizing genetic and ecologic modeling
   STATS 217, 218, emphasizing probability and its applications
   STATS 240, 250, emphasizing mathematical finance

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE

The department requires that the student take 45 units of work from offerings in the Department of Statistics or from authorized courses in other departments. Ordinarily, four or five quarters are needed to complete all requirements.

Students must fulfill the following requirements for the M.S. degree:

1. STATS 116, 200, 191, and 217. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.
2. One of MATH 103, 113, 115, 171; and one of CS 106A, 106X, 137. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.
3. At least four additional courses from graduate offerings in the department (202-399). Consent of the adviser is required in order to take more than 6 units of STATS 260A,B,C, 390, or 399.
4. Additional units to complete the requirements may be chosen from the list available from the department web site. Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student's program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying to the Ph.D. program.

Statistics courses required for the M.S. degree must be taken for letter grades, and an overall 2.75 grade point average (GPA) is required.

DOCTOR OF PHILOSOPHY

The department looks for students who want to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master's level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also encouraged to apply for admission. The program normally takes four years to complete.

Program Summary—STATS 300A,B,C, 305, 306A,B, and 310A,B,C (first-year core program); pass two of three parts of the qualifying examination (beginning of second year); breadth requirement (second or third year); University oral examination (end of third year or beginning of fourth year); dissertation (fourth year).

In addition, students are required to take 9 units of advanced topics courses offered by the department (including at least two of the following: 314, 317, 318, 315A, or 315B, but not including literature, research, or consulting), and 3 units of statistical consulting. All students who have passed the qualifying exam but have not yet passed the University oral examination must take 319 at least once per year.

First-Year Core Courses—STATS 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is a measure-theoretic course in probability theory, beginning with basic concepts of the law of large numbers and martingale theory. Students who do not have enough mathematics background can take 310 after their first year but need to have their first-year program approved by the Ph.D. program adviser.

Qualifying Examinations—These are intended to test the student's level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics, and probability theory, and all are typically taken during the summer between the student's first and second years. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

Breadth Requirement—Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:

Computational Biology and Statistical Genomics—Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIOSCI 203, as well as 9 units of classes in Statistical Genetics or Bioinformatics, GENE 344A,B, STATS 345, STATS 366, STATS 367.

Machine Learning—Courses can be chosen from the following list:
Statistical Learning: STATS 315A and 315B
Data Bases: CS 245, 346, 347
Probabilistic Methods in AI: CS 221, 354
Statistical Learning Theory and Pattern Classification: CS 229

Applied Probability—Students are expected to take 15 units of graduate courses in some of the following areas:
Control and Stochastic Calculus: MS&E 322, 351, MATH 237, EE 363
Finance: STATS 250, FINANCE 622, MATH 236
Information Theory: EE 376A, 376B
Monte Carlo: STATS 318, 345, 362, MS&E 323
Queuing Theory: GSB 661, 663, MS&E 335
Stochastic Processes: STATS 317, MATH 234

Earth Science Statistics—Students are expected to take:
STATS 317, 318, 352
and three courses from the GES or Geophysics departments, such as GES 144 or GEOPHYS 210.

Social and Behavioral Sciences—Students are expected to take three advanced courses from the department with an applied orientation such as:
STATS 261/262, 324, 343, 354
and three advanced quantitative courses from departments such as Anthropology, Economics, Political Science, Psychology, and Sociology, and the schools of Education, Business, or Medicine.

University Oral Examination—The University oral examination is taken on the recommendation of the student's research adviser after the thesis problem has been well defined and some research progress has been made. Usually, this happens early in the student's fourth year. The oral examination consists of a 40-minute presentation on the thesis topic, followed by two question periods. The first question period relates directly to the student's presentation; the second is intended to explore the student's familiarity with broader statistical topics related to the thesis research.

Financial Support—Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are strongly encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

PH.D. MINOR

The Department of Statistics devises individual Ph.D. minor programs, but the department urges all graduate students in other fields who wish to have a subspecialty in statistics to study for an M.S. degree instead. The unit requirement for an M.S. degree is 45 units, whereas the number of units required for a minor averages around 30. This difference of 15 units can be made up by the student by including in the M.S. program courses from his or her own field which are related to statistics or applications of statistics.

COURSES

INTRODUCTORY

Introductory courses for any student with an interest in the problems of descriptive statistics and statistical inferences are STATS 30, 50, 60, and 141. These courses have no mathematical prerequisites. STATS 60 and 141 explain the techniques and methods of statistical inference. STATS 60 emphasizes applications in the social sciences and STATS 141 applications in the biological sciences. STATS 60 and 141 can be followed by STATS 191 which explains more advanced methods and their applications.

STATS 110, 116, 200, 217-218 are introductory but have a calculus prerequisite. STATS 110 covers the most important techniques used in the analysis of experimental data in engineering and science. STATS 110 can be followed by STATS 191. STATS 116 provides a general introduction to the theory of probability. It may be followed by STATS 200, which deals with statistical theory, or by 217 and 218, which deal with stochastic processes. The sequence 116, 200 is a two quarter sequence in basic mathematical statistics; the sequence 116, 217, 218 is a one-year course in basic probability theory.

STATS 43N. Displaying Data: Principles, Computer Graphics, and the Internet—Stanford Introductory Seminar. Preference to freshmen. Principles of displaying data and envisioning information based on literature and historical examples. Application of these principles to media such as computer graphics and the Internet. Student projects. GER:DB-Math
3 units, Spr (Walther, G)

STATS 47N. Breaking the Code?—Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math
3 units, Spr (Holmes, S)

STATS 50. Mathematics of Sports—(Same as MCS 100.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

3 units, Spr (Cover, T)

STATS 60. Introduction to Statistical Methods: Precalculus—(Graduate students register for 160; same as PSYCH 10.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

STATS 110. Statistical Methods in Engineering and the Physical Sciences—Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math

4-5 units, Aut (Srinivasan, B), Sum (Staff)

STATS 116. Theory of Probability—Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the laws of large numbers and central limit theorem. Prerequisites: MATH 52 and familiarity with infinite series, or equivalent. GER:DB-Math

3-5 units, Aut (Donoho, D), Spr (Wong, W), Sum (Staff)

STATS 141. Biostatistics—(Same as BIOSCI 141.) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. See http://www-stat.stanford.edu/~rag/stat141/. GER:DB-Math

4-5 units, Aut (Rogosa, D)

STATS 160. Introduction to Statistical Methods: Precalculus—(Same as 60, PSYCH 10; see 60.)

5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

STATS 166. Computational Biology—(Graduate students register for 366; same as BIOMEDIN 366.) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.

2-3 units, Aut (Holmes, S)

STATS 191. Introduction to Applied Statistics—Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math

3-4 units, Win (Zhang, N)

STATS 199. Independent Study—For undergraduates.

1-15 units, Aut, Win, Spr, Sum (Staff)

CONTINUATION

Courses in this category are designed for use in applications. Generally, they have introductory statistics or probability as prerequisites.

STATS 200. Introduction to Statistical Inference—Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.

3 units, Win (Romano, J), Sum (Staff)

STATS 202. Data Analysis—Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.

3 units, Aut (Srinivasan, B), Sum (Staff)

STATS 203. Introduction to Regression Models and Analysis of Variance—Modeling and interpretation of observational and experimental data using linear and nonlinear regression methods. Model building and selection methods. Multivariable analysis. Fixed and random effects models. Experimental design. Pre- or corequisite: 200.

3 units, Win (Switzer, P)

STATS 205. Introduction to Nonparametric Statistics—Nonparametric analogs of the one- and two-sample t-tests and analysis of variance; the sign test, median test, Wilcoxon's tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.

3 units, Spr (Zhang, N)

STATS 206. Applied Multivariate Analysis—Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.

3 units, Aut (Holmes, S), Sum (Staff)

STATS 208. Introduction to the Bootstrap—The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.

3 units, not given this year

STATS 209. Understanding Statistical Models and their Social Science Applications—(Same as EDUC 260X, HRP 239) Information that statistical modeling can provide in experimental and non-experimental settings emphasizing misconceptions in social science applications such as causal modeling. Text is *Statistical Models: Theory and Practice*, by David Freedman. See http://www-stat.stanford.edu/~rag/stat209. Prerequisite: intermediate-level statistical methods including multiple regression, logistic regression, and log-linear models.

3 units, Win (Rogosa, D)

STATS 211. Topics in Quantitative Methods: Meta-Analysis—Meta-analysis as a quantitative method for combining the results of independent studies enabling researchers to evaluate available evidence. Examples of meta-analysis in medicine, education, and social and behavioral sciences. Statistical methods include nonparametric methods, contingency tables, regression and analysis of variance, and Bayesian methods. Project involving an existing published meta-analysis. Prerequisite: basic sequence in statistics.

1-3 units, Win (Olkin, I)

STATS 212. Applied Statistics with SAS—Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.
3 units, Sum (Staff)

STATS 215. Statistical Models in Biology—Poisson and renewal processes, Markov chains in discrete and continuous time, branching processes, diffusion. Applications to models of nucleotide evolution, recombination, the Wright-Fisher process, coalescence, genetic mapping, sequence analysis. Theoretical material approximately the same as in STATS 217, but emphasis is on examples drawn from applications in biology, especially genetics. Prerequisite: 116 or equivalent.
3 units, Spr (Siegmund, D)

STATS 217. Introduction to Stochastic Processes—Discrete and continuous time Markov chains, point processes, random walks, branching processes, first passage times, recurrence and transience, stationary distributions.
3 units, Win (Rajaratnam, B), Sum (Staff)

STATS 218. Introduction to Stochastic Processes—Renewal theory, Brownian motion, Gaussian processes, second order processes, martingales.
3 units, Sum (Staff)

STATS 219. Stochastic Processes—(Same as MATH 136.) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent.
3 units, Aut (Ross, K), Win (Dembo, A)

STATS 220. Continuous Time Stochastic Control—Optimal control of diffusion processes. Dynamic programming, maximum principles, Hamilton-Jacobi-Bellman equations, verification theorems, viscosity solutions, singular control, optimal stopping, numerical solution methods, control with partial information, and adaptive control. Applications to financial mathematics, including optimal consumption and portfolio selection, super-replication under portfolio constraints, and irreversible investment. Prerequisite: MATH 236. Recommended: partial differential equations at the level of MATH 220B.
3 units, Spr (Ross, K)

STATS 225. Bayesian Analysis—Bayesian inference; decision theory; computational methods in Bayesian statistics; Monte Carlo simulation; Markov chain process; Markov chain Monte Carlo sampling; Bayesian regression and classification models; Bayesian analysis of real data; Gaussian process priors for regression and classification; Dirichlet process mixtures for unsupervised learning.
3 units, Aut (Shahbaba, B)

STATS 237. Time Series Modeling and Forecasting—Box-Jenkins and Bayesian approaches. State-space and change-point models. Application to revenue prediction, forecasting product demand, and other real world problems. Development and assessment of models and forecasts in practical applications. Hands-on experience with real data.
3 units, Sum (Staff)

STATS 239A,B. Workshop in Quantitative Finance—Topics of current interest. B may be repeated for credit.
*1 unit, **A:** Aut, **B:** Spr (Lai, T)*

STATS 240. Statistical Methods in Finance—(SCPD students register for 240P.) Regression analysis and applications to pricing and investment models. Principal components and multivariate analysis. Parametric influence. Financial time series. Estimation and modeling of volatilities. Statistical methods for portfolio management. Hands-on experience with financial data.
3-4 units, Aut (Lai, T)

STATS 240P. Statistical Methods in Finance—For SCPD students. See 240.
3 units, Aut (Lai, T)

STATS 241. Statistical Modeling in Financial Markets—(SCPD students register for 241P.) Nonparametric regression and yield curve smoothing. Advanced time series modeling and forecasting. Market risk measures. Substantive and empirical modeling approaches in financial markets. Statistical trading strategies. Prerequisite: 240 or equivalent.
3-4 units, Spr (Lai, T)

STATS 241P. Statistical Modeling in Financial Markets—For SCPD students. See 241.
3 units, Spr (Lai, T)

STATS 243. Introduction to Mathematical Finance—Interest rate and discounted value. Financial derivatives, hedging, and risk management. Stochastic models of financial markets, introduction to Ito calculus and stochastic differential equations. Black-Scholes pricing of European options. Optimal stopping and American options. Prerequisites: MATH 53, STATS 116, or equivalents.
3-4 units, Sum (Staff)

STATS 250. Mathematical Finance—(Same as MATH 238.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.
3 units, Win (Papanicolaou, G)

STATS 252. Data Mining and Electronic Business—The Internet and related technologies have caused the cost of communication and transactions to plummet, and consequently the amount of potentially relevant data to explode. The underlying principles, statistical issues, and algorithmic approaches to data mining and e-business, with real world examples.
3 units, Sum (Staff)

STATS 253. Spatial Statistics—(Graduate students register for 352.) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials. GER:DB-Math
3 units, Aut (Switzer, P)

STATS 260A,B,C. Workshop in Biostatistics—(Same as HRP 260A,B,C) Applications of statistical techniques to current problems in medical science.
*1-2 units, **A:** Aut, **B:** Win, **C:** Spr (Olshen, R)*

STATS 261. Intermediate Biostatistics: Analysis of Discrete Data—(Same as BIOMEDIN 233, HRP 261.) The 2x2 table. Chi-square test. Fisher's exact test. Odds ratios. Sampling plans; case control and cohort studies. Series of 2x2 tables. Mantel Hantzel. Other tests. k x m tables. Matched data logistic models. Conditional logistic analysis, application to case-control data. Log-linear models. Generalized estimating equations for longitudinal data. Cell phones and car crashes: the crossover design. Special topics: generalized additive models, classification trees, bootstrap inference.
3 units, Win (Sainani, K)

STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis—(Same as HRP 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.
3 units, Spr (Sainani, K)

STATS 297. Practical Training—For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit. Prerequisite: consent of adviser.
1-3 units, Aut, Win, Spr, Sum (Lai, T)

STATS 298. Industrial Research for Statisticians—Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program, prior to candidacy.
1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 299. Independent Study—For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

Sequences 300A,B,C, 305, 306A,B, and 310A,B,C comprise the fundamental sequence which serves as a general introduction to and prerequisite for further work.

STATS 300. Advanced Topics in Statistics—May be repeated for credit.
3 units, Sum (Staff)

STATS 300A,B,C. Theory of Statistics—Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.
2-4 units, **A:** *Aut (Romano, J),* **B:** *Win (Walther, G),* **C:** *Spr (Seigmund, D)*

STATS 305. Introduction to Statistical Modeling—The linear model: simple linear regression, polynomial regression, multiple regression, anova models; and with some extensions, orthogonal series regression, wavelets, radial basis functions, and MARS. Topics: normal theory inference (tests, confidence intervals, power), related distributions (t, chi-square, F), numerical methods (QR, SVD), model selection/regularization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies including bootstrap inference, and cross-validation. Emphasis is on problem sets involving substantial computations with data sets, including developing extensions of existing methods. Prerequisites: consent of instructor, 116, 200, applied statistics course, CS 106A, MATH 114.
2-4 units, Aut (Hastie, T)

STATS 306A. Methods for Applied Statistics—Extension of modeling techniques of 305: binary and discrete response data and nonlinear least squares. Topics include regression, Poisson loglinear models, classification methods, clustering. May be repeated for credit. Prerequisite: 305 or equivalent.
2-4 units, Win (Owen, A)

STATS 306B. Methods for Applied Statistics—Unsupervised learning techniques in statistics, machine learning, and data mining.
2-4 units, Spr (Donoho, D)

STATS 310A. Theory of Probability—Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.
2-4 units, Aut (Dembo, A)

STATS 310B. Theory of Probability—Stopping times, 0-1 laws, Kolmogorov consistency theorem. Uniform integrability. Radon-Nikodym theorem, branching processes, conditional expectation, discrete time martingales. Exchangeability. Large deviations. Laws of the iterated logarithm. Birkhoff's and Kingman's ergodic theorems. Recurrence, entropy. Prerequisite: 310A or MATH 230A.
2-4 units, Win (Siegmund, D)

STATS 310C. Theory of Probability—Infinitely divisible laws. Continuous time martingales, random walks and Brownian motion. Invariance principle. Markov and strong Markov property. Processes with stationary independent increments. Prerequisite: 310B or MATH 230B.
2-4 units, Spr (Lai, T)

STATS 314. Advanced Statistical Methods—May be repeated for credit.
2-3 units, not given this year

STATS 315A. Modern Applied Statistics: Learning—Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisite: 315A,B, 305, 306A,B, or consent of instructor.
2-3 units, Aut (Tibshirani, R)

STATS 315B. Modern Applied Statistics: Data Mining—Three-part sequence. New techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a predictive goal, viewed from a statistical perspective as computer automated exploratory analysis of large complex data sets.
2-3 units, Win (Friedman, J)

STATS 315C. Modern Applied Statistics: Transposable data—Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisite: 315A,B, 305/306A,B, or consent of instructor.
2-3 units, Spr (Owen, A)

STATS 316. Stochastic Processes on Graphs—Local weak convergence, Gibbs measures on trees, cavity method, and replica symmetry breaking. Examples include random k-satisfiability, the assignment problem, spin glasses, and neural networks. Prerequisite: 310A or equivalent.
1-3 units, Aut (Montanari, A; Dembo, A)

STATS 318. Modern Markov Chains—Tools for understanding Markov chains as they arise in applications. Random walk on graphs, reversible Markov chains, Metropolis algorithm, Gibbs sampler, hybrid Monte Carlo, auxiliary variables, hit and run, Swedson-Wong algorithms, geometric theory, Poincare-Nash-Cheger-Log-Sobolov inequalities. Comparison techniques, coupling, stationary times, Harris recurrence, central limit theorems, and large deviations.
2-3 units, Spr (Diaconis, P)

STATS 319. Literature of Statistics—Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.
1-3 units, Aut (Walther, G), Spr (Donoho, D)

STATS 324. Multivariate Analysis—Classic multivariate statistics: properties of the multivariate normal distribution, determinants, volumes, projections, matrix square roots, the singular value decomposition; Wishart distributions, Hotelling's T-square; principal components, canonical correlations, Fisher's discriminant, the Cauchy projection formula.
2-3 units, Win (Efron, B)

STATS 327. Software for Data Analysis—Principles and techniques for writing statistical data analysis software using the S language, specifically the R software, as the main medium. Software project. Prerequisite: experience with S.
2-3 units, Win (Chambers, J)

STATS 345. Computational Molecular Biology—Gene expression microarrays: preliminary data analysis and processing computation of expression indices, supervised and unsupervised learning methods, incorporation of information from gene ontology and biological knowledge base. Sequence analysis: alignment and search algorithms, hidden Markov models, stochastic models for sequence motifs and regulatory modules. Introduction to transcriptional regulatory network.
2-3 units, Spr (Zhang, N)

STATS 350. Topics in Probability Theory: Probabilistic Concepts in Statistical Physics and Information Theory—Concentration of measure techniques. Mean field models for disordered systems: infinite size limit, computing the free energy, ultrametricity, dynamics. Interpolation techniques and infinite size limit in information theory and coding. May be repeated once for credit. Prerequisite: 310A or equivalent.
1-3 units, Win (Dembo, A; Montanari, A)

STATS 352. Spatial Statistics—(Same as 253; see 253.)
3 units, Aut (Switzer, P)

STATS 362. Monte Carlo Sampling—Fundamentals of Monte Carlo methods. Generating uniform and nonuniform variables, random vectors and processes. Monte Carlo integration and variance reduction. Quasi-Monte Carlo sampling. Markov chain Monte Carlo, including Gibbs sampling and Metropolis-Hastings. Examples, problems and motivations from Bayesian statistics, computational finance, computer graphics, physics.
2-3 units, Aut (Owen, A)

STATS 364. Splines and Multi-Level Representations—Splines as a tool for data processing and representation; the property of multi-level approximation of B-splines facilitates the construction and integration of their associated basis functions, wavelets, for data analysis and editing. Univariate and bivariate splines and wavelets. Extension of polynomial splines to achieve properties such as orthogonality and reduced support size; applications to curve and surface fitting and subdivisions.
3 units, Win (Chui, C)

STATS 366. Computational Biology—(Same as 166, BIOMEDIN 366; see 166.)
2-3 units, Aut (Holmes, S)

STATS 367. Statistical Models in Genetics—Stochastic models and related statistical problems in linkage analysis of qualitative and quantitative traits in humans and experimental populations; sequence alignment and analysis; and population genetics/evolution, both classical (Wright-Fisher-Kimura) and modern (Kingman coalescent). Computational algorithms as applications of dynamic programming, Markov chain Monte Carlo, and hidden Markov models. Prerequisites: knowledge of probability through elementary stochastic processes and statistics through likelihood theory.
2-3 units, Win (Siegmund, D)

STATS 374. Large Deviations—(Same as MATH 234.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.
3 units, not given this year

STATS 390. Consulting Workshop—Skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department's drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.
1-3 units, Aut (Owen, A), Win (Tibshirani, R), Spr (Olshen, R), Sum (Staff)

STATS 398. Industrial Research for Statisticians—Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. May be repeated for credit. Prerequisite: Statistics Ph.D. candidate.
1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 399. Research—Research work as distinguished from independent study of nonresearch character listed in 199. May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

EE 374. Inference in Graphical Models
3 units, not given this year

EE 376A. Information Theory
3 units, Win (Cover, T)

EE 376B. Information Theory
3 units, not given this year

GENE 211. Genomics
3 units, Win (Cherry, J; Myers, R; Sidow, A; Sherlock, G)

GENE 244. Introduction to Statistical Genetics
3 units, Aut (Tang, H)

MATH 236. Introduction to Stochastic Differential Equations
3 units, Win (Papanicolaou, G)

POLISCI 350B. Political Methodology II—(Same as POLISCI 150B)
5 units, Win (Jackman, S)

PROGRAM IN SYMBOLIC SYSTEMS

Director: Ivan A. Sag
Program Coordinator: Todd Davies
Program Committee: Lera Boroditsky, Todd Davies, Scott Klemmer, Byron Reeves, Eric Roberts, Ivan A. Sag, Paul Skokowski, Kenneth A. Taylor, Thomas A. Wasow
Program Faculty:
Art and Art History: Scott Bukatman (Associate Professor)
Applied Physics: Bernardo Huberman (Consulting Professor)
Classics: Reviel Netz (Professor)
Communication: Jeremy Bailenson (Assistant Professor), Clifford Nass (Professor), Byron Reeves (Professor), Frederick Turner (Assistant Professor)
Computer Science: David Dill (Professor), Brian Jeffrey Fogg (Consulting Assistant Professor), Michael Genesereth (Associate Professor), Margaret Johnson (Senior Lecturer), Oussama Khatib (Professor), Scott Klemmer (Assistant Professor), Daphne Koller (Professor), Jean-Claude Latombe (Professor), Marc Levoy (Professor), Christopher Manning (Associate Professor), John McCarthy (Professor Emeritus), Andrew Ng (Assistant Professor), Nils Nilsson (Professor Emeritus), Vaughan Pratt (Professor Emeritus), Eric Roberts (Professor, Teaching), Tim Roughgarden (Assistant Professor), Mehran Sahami (Associate Professor, Teaching), Sebastian Thrun (Associate Professor), Terry Winograd (Professor)
Economics: Muriel Niederle (Assistant Professor)
Education: Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Professor)
Electrical Engineering: John R. Koza (Consulting Professor), Krishna Shenoy (Assistant Professor)
French and Italian: Jean-Pierre Dupuy (Professor)
Genetics: Russ B. Altman (Professor)
Graduate School of Business: Baba Shiv (Associate Professor)
History: Jessica G. Riskin (Associate Professor)
Linguistics: Arto Anttila (Assistant Professor), Joan Bresnan (Professor), Eve Clark (Professor), Vivienne Fong (Lecturer), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Associate Professor), Stanley Peters (Professor), Ivan A. Sag (Professor), Thomas A. Wasow (Professor), Annie Zaenen (Consulting Professor)
Management Science and Engineering: Pamela Hinds (Associate Professor)
Mathematics: Keith Devlin (Consulting Professor), Persi Diaconis (Professor), Solomon Feferman (Professor Emeritus)
Medicine: Russ B. Altman (Professor), John R. Koza (Consulting Professor)
Music: Jonathan Berger (Associate Professor), Christopher Chafe (Professor), Eleanor Selfridge-Field (Consulting Professor), William L. Verplank (Lecturer)
Neurobiology: Ben Barres (Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor)
Philosophy: Michael Bratman (Professor), Alexis Burgess (Assistant Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor Emeritus), Dagfinn Føllesdal (Professor), David Israel (Consulting Associate Professor), Krista Lawlor (Assistant Professor), Grigori Mints (Professor), Marc Pauly (Assistant Professor), Raymond Perrault (Consulting Associate Professor), John Perry (Professor), Brian Skryms (Professor), Kenneth Taylor (Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor)
Psychiatry and Behavioral Sciences: Vinod Menon (Associate Professor, Research)
Psychology: Lera Boroditsky (Assistant Professor), Herbert H. Clark (Professor), Anne Fernald (Associate Professor), Susan Johnson (Assistant Professor), Brian Knutson (Assistant Professor), Ellen Markman (Professor), James McClelland (Professor), Michael Ramscar (Assistant Professor), Samuel McClure (Assistant Professor), Barbara Tversky (Professor Emeritus), Anthony Wagner (Associate Professor), Brian Wandell (Professor)
Statistics: Persi Diaconis (Professor), Susan P. Holmes (Professor, Teaching)
Symbolic Systems: William Byrne (Consulting Assistant Professor), Todd Davies (Lecturer), Tracy King (Consulting Associate Professor), Pat Langley (Consulting Professor), Jeff Shrager (Consulting Associate Professor), Paul Skokowski (Consulting Associate Professor)
Other Affiliates: David Barker-Plummer (CSLI Engineering Research Associate), Daniel Flickinger (CSLI Senior Research Engineer), John Kunz (Senior Research Engineer), Stephan Oepen (CSLI Senior Research Engineer)

Program Offices: Margaret Jacks Hall, Building 460, Room 40A
Mail Code: 94305-2150
Phone: (650) 723-4284
Email: ssp-af@csli.stanford.edu
Web Site: http://symsys.stanford.edu/

Courses given in the Program in Symbolic Systems have the subject code SYMBSYS. For a complete list of subject codes, see Appendix.

The observation that both human beings and computers can manipulate symbols lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. Computer programs, natural languages, the human mind, and the Internet embody concepts whose study forms the core of the Symbolic Systems curriculum, such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines like philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these disciplines to study questions such as: in what ways are computers and computer languages like human beings and their languages; how can the interaction between people and computers be made easier and more beneficial?

The core requirements of the Symbolic Systems Program (SSP) include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. These courses prepare students with the vocabulary, theoretical background, and technical skills needed for study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers B.S. and M.S. degree programs. Both programs require students to master a common core of required courses and to choose an area of specialization.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a field of study consisting of six additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of 'C-' or better. Students who receive a grade lower than this in a core course must alert the program of this fact so that a decision can be made about whether the student should continue in the major.

CORE REQUIREMENTS

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. Some of these courses have other courses as prerequisites; students are responsible for completing each course's prerequisites before they take it.

1. *Cognitive Science*: SYMBSYS 100. Introduction to Cognitive Science
2. *Computer Programming*:
   a) CS 106A. Programming Methodology *and* 106B. Programming Abstractions; *or* 106X. Programming Methodology and Abstractions (Accelerated); *and*
   b) CS 107. Programming Paradigms
3. *Logic*:
   a) PHIL 150. Basic Concepts in Mathematical Logic; *or* 150X. Basic Concepts in Mathematical Logic, *and* CS 103A. Discrete Mathematics for Computer Science, *or* 103X. Discrete Structures (Accelerated); *and*
   b) PHIL 151. First-Order Logic
4. *Computational Theory*:
   a) CS 103B. Discrete Structures; *or* 103X. Discrete Structures (Accelerated); *and*
   b) CS 154. Introduction to Automata and Complexity Theory; *or* PHIL 152. Computability and Logic
5. *Probability*: one of the following:
   CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers
   EE 178. Probabilistic Systems Analysis
   MATH 151. Introduction to Probability Theory
   MS&E 120. Probabilistic Analysis
   STATS 110. Statistical Methods in Engineering and the Physical Sciences
   STATS 116. Theory of Probability
   STATS 121. Probability, Induction, Statistics
6. *Philosophical Foundations*:
   a) an introductory course in Philosophy must be taken prior to the required PHIL 80, from among the following:
   PHIL 10. God, Self, and World: An Introduction to Philosophy
   PHIL 20. Introduction to Moral Philosophy
   PHIL 30. Introduction to Political Philosophy
   PHIL 60. Introduction to Philosophy of Science
   PHIL 102. Modern Philosophy, Descartes to Kant
   IHUM 23A,B. The Fate of Reason
   and
   b) PHIL 80. Mind, Matter, and Meaning (WIM)
7. *Cognitive Psychology*: PSYCH 55. Introduction to Cognition and Brain; *or* PSYCH 40. Introduction to Cognitive Psychology
8. *Language and Mind:* one of the following:
   LINGUIST 1. Introduction to Linguistics
   LINGUIST 140. Language Acquisition I
   PHIL 181. Philosophy of Language
   PSYCH 131. Language and Thought
   PSYCH 137. Birds to Words: Cognition, Communication, and Language
9. *Linguistic Theory*: one of the following:
   LINGUIST 120. Introduction to Syntax
   LINGUIST 130A. Introduction to Linguistic Meaning
   LINGUIST 180. Introduction to Computational Linguistics
   LINGUIST 230A. Introduction to Semantics and Pragmatics
10. *Artificial Intelligence*: CS 121. Introduction to Artificial Intelligence, *or* 221. Artificial Intelligence: Principles and Techniques
11. *Advanced Small Seminar:** an upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMBSYS 201 through 209 are acceptable, as are other courses which are announced at the beginning of each academic year.

---

* A course taken to fulfill one of these requirements can also be counted toward another requirement, as part of either the core or a student's concentration (see below), but not both.

FIELDS OF STUDY

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a field of study consisting of six courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers. The field of study is declared on Axess; it appears on the transcript but not on the diploma.

Applied Logic
Artificial Intelligence
Cognitive Science
Computer Music
Decision Making and Rationality
Human-Computer Interaction
Learning
Natural Language
Neurosciences
Philosophical Foundations

MINOR

Students may minor in Symbolic Systems by completing either item 1 or item 2 below.

1. One course in each of the following core areas (please note that several of these courses have prerequisites):
   a) *Cognition*: SYMBSYS 100* *or* PSYCH 40 *or* 55
   b) *Logic and Computation*: PHIL 150 *or* 151, *or* CS 103B, 103X, *or* 154
   c) *Computer Programming*: CS 106B, 106X, *or* 107
   d) *Philosophical Foundations*: SYMBSYS 100* *or* PHIL 80
   e) *Formal Linguistics*: LINGUIST 120, 130A, *or* 130B
   f) *Artificial Intelligence*: CS 121 *or* 221
2. SYMBSYS 100, plus an interdisciplinary SSP concentration listed on the SSP web site at http://symsys.stanford.edu. To qualify, the selection of courses used for the minor must be interdisciplinary: it must either include courses from at least three departments, or include more than one course from each of two departments.

---

*SYMBSYS 100 may not be counted for both areas 'a' and 'd'.

UNDERGRADUATE RESEARCH

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

1. *Summer Internships:* students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.
2. *Research Assistantships:* other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.
3. *Independent Study*: under faculty supervision. For course credit, students should enroll in SYMBSYS 196.

Contact SSP for more information on any of these possibilities, or see http://symsys.stanford.edu/. In addition, the Undergraduate Advising and Research office offers grants and scholarships supporting student research projects at all levels; see http://urp.stanford.edu/.

HONORS PROGRAM

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMBSYS 190, Honors Tutorial, for any quarters while a student is working on an honors project. Juniors who are interested in doing an honors project during their senior year are advised to take SYMBSYS 91, Junior Honors Seminar. SYMBSYS 191, Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program's web site for more information on the honors program, including deadlines and policies.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program (see below), the Department of Philosophy offers a special Symbolic Systems track for interdisciplinary graduate level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems, and in two years or less by other students depending upon level of preparation. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the "Undergraduate Degrees" section of this bulletin (see "Coterminal Bachelor's and Master's Degrees"). Applicants to the M.S. program are reviewed each Winter Quarter. Information on deadlines, procedures for applying, and degree requirements are available from the program's student services coordinator in the Linguistics Department office (460-127E) and at http://symsys.stanford.edu/ssp_static?page=masters.html.

REQUIREMENTS

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better, and any course taken to fulfill requirements A, B, or C below must be taken for a letter grade unless the course is offered S/NC only. The 45 units may include no more than 21 units of courses from those listed below under Requirements A and B. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree.

Each candidate for the M.S. degree must fulfill the following requirements:

REQUIREMENT A

Demonstrated competence in the core requirements for the B.S. degree in Symbolic Systems. Candidates who have gone through the Symbolic Systems undergraduate program satisfy this requirement in the course of the B.S. degree in Symbolic Systems. Other students admitted as candidates for a Symbolic Systems M.S. degree must complete or show evidence of having passed equivalent courses covering all the Symbolic Systems undergraduate core requirements, with the exception of the advanced small seminar requirement.

REQUIREMENT B

1. Submission to and approval by the Symbolic Systems Program office of these pre-project research documents:
   a) project area statement, endorsed with a commitment from the student's prospective project adviser due no later than May 1 of the academic year prior to the expected graduation year; and
   b) qualifying research paper due no later than the end of the Summer Quarter prior to the expected graduation year.
2. Completion of two additional skill requirements:
   a) *Computer Programming:* CS 108, Object-Oriented Systems Design; *and*
   b) *Empirical Methods:* one of the following:
      COMM 206. Communication Research Methods
      COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives
      COMM 268. Experimental Research in Advanced User Interfaces
      LINGUIST 280/CS 224N. Natural Language Processing
      PSYCH 110. Research Methods and Experimental Design
      PSYCH 252. Statistical Methods for Behavioral and Social Science (for 3 or more units)
      PSYCH 253. Statistical Theory, Models, and Methodology (for 3 units)
      STATS 191. Introduction to Applied Statistics
      STATS 200. Introduction to Statistical Inference
      a Statistics course numbered higher than 200
3. Completion of three quarters of the Symbolic Systems Program M.S. Seminar (SYMBSYS 291).

REQUIREMENT C

Completion of an approved specialization track. All tracks of the Symbolic Systems M.S. program require students to do a substantial project. The course requirements for each track are designed to prepare a student to undertake such a project. The nature of the project depends on the student's focus, but it should be academic in nature (contributing to generalizable knowledge) and it should relate to the subject matter of symbolic systems more or equally appropriately as it does to other master's degree programs at Stanford. In all cases, a written thesis or paper describing the project is required. The project normally takes three quarters, and work on the project may account for up to 15 units of a student's program. The thesis must be read and approved for the master's degree in Symbolic Systems by two qualified readers approved by the program, at least one of whom must be a member of the academic council. Each track of the Symbolic Systems M.S. program has its own core requirements, as well as unit requirements from a set of elective courses. The tracks and their requirements are as follows.

The Human-Computer Interaction (HCI) Track—The HCI Core: a course in Computer Science numbered 141-179 (excluding 147), *or* CS 241-279 (excluding 247A), *or* CS 295, Software Engineering; *and* CS 147, Introduction to Human-Computer Interaction Design; *and* CS 247A, Human-Computer Interaction: Interaction Design Studio*; and* CS 376, Research Topics in Human-Computer Interaction.

For HCI electives, at least 9 additional units of HCI courses, chosen in consultation with the student's adviser. The following are examples of themes around which an elective program might be built: animation, business systems, computer-aided design, computer graphics, data interfaces, decision systems, design for disabilities, design principles, dialogue systems, digital art, digital media, education technology, game design, history of computers, information retrieval, intelligent interfaces, interaction design, Internet design, medical informatics, multimedia design, object-oriented design, philosophy of computation, social aspects of computing, usability analysis, virtual reality, and workplace computing.

The Natural Language Technology (NLT) Track—For the NLT core, in addition to the courses below, students must complete LINGUIST 280/CS 224N, Natural Language Processing, which can be used as the empirical methods course for Requirement B above.

1) An in-depth theory of English grammar course such as LINGUIST 221A, Foundations of English Grammar
2) A graduate-level semantics course (if not already taken as part of Requirement A) such as LINGUIST 232A, Lexical Semantics, or 230B, Semantics and Pragmatics
3) A two-course sequence in Computational Linguistics:
   LINGUIST 180. Introduction to Computer Speech and Language Processing, *and*
   LINGUIST 283. Programming and Algorithms for Natural Language Processing

For NLT electives, at least 9 additional units of natural language technology courses, chosen in consultation with the student's adviser.

The Individually Designed Option—Students wishing to design their own M.S. curriculum in Symbolic Systems must present a project plan as part of their application. This plan must be endorsed by the student's adviser prior to admission to the Symbolic Systems M.S. program. The application must also specify at least 20 units of course work that the student will take in support of the project.

Students are admitted under this option only if they present well-developed plans whose interdisciplinary character makes them inappropriate for any departmental master's program, but appropriate for Symbolic Systems.

COURSES

SYMBSYS 10. Symbolic Systems Forum—A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.
1 unit, Aut, Win, Spr (Davies, T)

SYMBSYS 100. Introduction to Cognitive Science—(Same as LINGUIST 144, PHIL 190, PSYCH 130.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Davies, T)

SYMBSYS 145. Cognition in Interaction Design—Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system. GER:DB-SocSci
3 units, Win (Shrager, J)

SYMBSYS 170/270. Decision Behavior: Theory and Evidence—(Graduate students register for 270.) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.
3-4 units, not given this year (Davies, T)

SYMBSYS 205. Systems: Theory, Science, and Metaphor—Systems science explores abstract properties of systems such as network connectivity, complexity, and emergence, with applications in natural, social, and artificial domains. How useful are these theories? Are their claims testable or generalizable? Do they change the way people think and talk? Topics announced during the previous quarter on course web site. Limited enrollment. Prerequisites: Symbolic Systems undergraduate core course in each of philosophy, psychology or linguistics, and computer science.
3 units, not given this year (Davies, T)

SYMBSYS 206. Topics in the Philosophy of Neuroscience—Does understanding the brain or computational models of the brain allow understanding of the mind? Recent literature on neurophilosophical and neuroskeptical approaches to the mind including perception, neurophenomenology, sensorimotor accounts, computational models, and eliminativism. Prerequisites: PHIL 80, and familiarity with philosophy or neuroscience, or consent of instructor. May be repeated for credit.
3 units, Aut (Skokowski, P)

SYMBSYS 209. Battles Over Bits—The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks, contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMBSYS 202.
3 units, Aut (Davies, T)

SYMBSYS 210. Learning Facial Emotions: Art versus Psychology—Differences between art and psychology approaches to learning to recognize, feel, and empathetically respond to facial expressions. Computational learning theory, motivation measurement, and emotion and empathetic response measurement. Experiments with human subjects. Art lab. Prerequisites: Psychology or Computer Science course in learning, emotions, or HCI.
3 units, Win (Wilkins, D; Davis-Kivelson, P)

RESEARCH

SYMBSYS 91. Junior Honors Seminar—Recommended for juniors doing an honors project during the following year. Defining a topic, choosing an adviser, considering overall goals. Resources at Stanford and some experiences of seniors discussed with guest speakers.
2 units, Win (Davies, T)

SYMBSYS 190. Senior Honors Tutorial—Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 191. Senior Honors Seminar—Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students discuss, and present their honors project.
2 units, Aut (Davies, T)

SYMBSYS 196. Independent Study—Independent work under the supervision of a faculty member. Can be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 290. Master's Degree Project
1-15 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 291. Master's Program Seminar—Enrollment limited to students in the Symbolic Systems M.S. degree program. May be repeated for credit.
1 unit, Aut, Win, Spr (Davies, T)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 150/250. Human Behavioral Biology—(Same as HUMBIO 160)
5 units, Spr (Sapolsky, R), alternate years, not given next year

CME 106. Introduction to Probability and Statistics for Engineers—(Same as ENGR 155C.)
3-4 units, Win, Sum (Khayms, V)

COMM 106/206. Communication Research Methods
4-5 units, Win (Gauthier, L; Groom, V)

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass, C)

CS 103A. Discrete Mathematics for Computer Science
3 units, Aut, Win (Plummer, R)

CS 103B. Discrete Structures
3 units, Win, Spr (Sahami, M)

CS 103X. Discrete Structures (Accelerated)
3-4 units, Win (Koltun, V)

CS 106A. Programming Methodology—(Same as ENGR 70A.)
3-5 units, Aut (Sahami, M), Win, Spr (Young, P), Sum (Staff)

CS 106B. Programming Abstractions—(Same as ENGR 70B.)
3-5 units, Aut (Staff), Win (Zelenski, J), Spr, Sum (Staff)

CS 106X. Programming Abstractions (Accelerated)—(Same as ENGR 70X.)
3-5 units, Aut (Zelenski, J), Win (Cain, G)

CS 107. Programming Paradigms
3-5 units, Aut, Spr (Cain, G)

CS 108. Object-Oriented Systems Design
3-4 units, Aut, Win (Parlante, N)

CS 121. Introduction to Artificial Intelligence
3 units, Spr (Latombe, J), Sum (Staff)

CS 147. Introduction to Human-Computer Interaction Design
3-4 units, Aut (Klemmer, S)

CS 154. Introduction to Automata and Complexity Theory
3-4 units, Aut (Dill, D), Spr (Motwani, R), Sum (Staff)

CS 161. Design and Analysis of Algorithms
3-4 units, Aut (Plotkin, S), Win (Roughgarden, T), Sum (Staff)

CS 201. Computers, Ethics, and Social Responsibility
3-4 units, Win (Johnson, M)

CS 205A. Mathematical Methods for Robotics, Vision, and Graphics
3 units, Aut (Fedkiw, R)

CS 221. Artificial Intelligence: Principles and Techniques
3-4 units, Aut (Ng, A)

CS 223A. Introduction to Robotics
3 units, Win (Khatib, O)

CS 223B. Introduction to Computer Vision
3 units, Win (Kosecka, J)

CS 224M. Multi-Agent Systems
3 units, Win (Shoham, Y)

CS 228. Probabilistic Models in Artificial Intelligence
3 units, Win (Koller, D)

CS 229. Machine Learning
3 units, Aut (Ng, A)

CS 247. Human-Computer Interaction Design Studio
3-4 units, Win (Winograd, T)

CS 249B. Advanced Object-Oriented Programming
3 units, Win (Cheriton, D)

ECON 51. Economic Analysis II
5 units, Aut (Tendall, M), Win (Einav, L), Sum (Staff)

ECON 160. Game Theory and Economic Applications
5 units, Win (Cojoc, D)

EDUC 218. Topics in Cognition and Learning: Play
3 units, Aut (Schwartz, D)

EE 178. Probabilistic Systems Analysis
3 units, Win (El Gamal, A)

EE 376A. Information Theory
3 units, Win (Cover, T)

ENGR 62. Introduction to Optimization—(Same as MS&E 111.)
4 units, Aut (Goel, A), Spr (Van Roy, B)

FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies
3-5 units, Win (Dupuy, J)

LINGUIST 1. Introduction to Linguistics
4 units, Aut (Eckert, P; Sag, I), Spr (Staff)

LINGUIST 105/205A. Phonetics
4 units, Spr (Staff)

LINGUIST 110. Introduction to Phonetics and Phonology
4 units, Spr (Anttila, A)

LINGUIST 120. Introduction to Syntax
4 units, Aut (Wasow, T)

LINGUIST 124A/224A. Introduction to Formal Universal Grammar
4 units, Spr (Bresnan, J)

LINGUIST 130A. Introduction to Linguistic Meaning
4 units, Spr (Staff)

LINGUIST 130B. Introduction to Lexical Semantics
4 units, Win (Fong, V)

LINGUIST 140/240. Language Acquisition I
4 units, Aut (Clark, E)

LINGUIST 180. Introduction to Computational Linguistics
4 units, Aut (Jurafsky, D)

LINGUIST 187/287. Grammar Engineering
1-4 units, Win (Flickinger, D; Oepen, S)

LINGUIST 210A. Phonology
4 units, Aut (Anttila, A)

LINGUIST 210B. Advanced Phonology
4 units, Win (Anttila, A)

LINGUIST 222A. Foundations of Syntactic Theory I
2-4 units, Aut (Levin, B)

LINGUIST 230A. Introduction to Semantics and Pragmatics
2-4 units, Win (Peters, S)

LINGUIST 232A. Lexical Semantics
2-4 units, Spr (Levin, B)

LINGUIST 241. Language Acquisition II
1-4 units, Win (Clark, E)

MATH 103. Matrix Theory and Its Applications
3 units, Aut (Milanov, T), Win, Spr (Nedelec, L), Sum (Staff)

MATH 113. Linear Algebra and Matrix Theory
3 units, Aut (Vasy, A), Win (Cohen, R)

MATH 151. Introduction to Probability Theory
3 units, Win (Liu, T)

ME 115. Human Values in Design
3 units, Win (Boyle, B)

MS&E 120. Probabilistic Analysis
5 units, Aut (Shachter, R)

MS&E 121. Introduction to Stochastic Modeling
4 units, Win (Glynn, P)

MS&E 201. Dynamic Systems
3-4 units, Spr (Tse, E)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians
4 units, Spr (Berger, J)

MUSIC 220A. Fundamentals of Computer-Generated Sound
2-4 units, Aut (Chafe, C; Wang, G)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing
2-4 units, Win (Wang, G)

MUSIC 250A. HCI Theory and Practice
3-4 units, Aut, Win (Staff)

MUSIC 253. Musical Information: An Introduction
1-4 units, Win (Selfridge-Field, E)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation
1-4 units, Spr (Selfridge-Field, E)

NBIO 206. The Nervous System
7-8 units, Win (Clandinin, T)

NBIO 218. Neural Basis of Behavior
4 units, Spr (Raymond, J; Knudsen, E), alternate years, not given next year

PHIL 20. Introduction to Moral Philosophy—(Same as ETHICSOC 20)
5 units, Spr (Schapiro, T)

PHIL 30. Introduction to Political Philosophy—(Same as ETHICSOC 30, POLISCI 3.)
5 units, Aut (Hussain, N)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60)
5 units, Aut (Longino, H)

PHIL 80. Mind, Matter, and Meaning—WIM for Symbolic Systems majors.
5 units, Win (Lawlor, K), Spr (Burgess, A)

PHIL 102. Modern Philosophy, Descartes to Kant
4 units, Aut (Dunlop, K)

PHIL 150/250. Basic Concepts in Mathematical Logic
4 units, Aut (Wasow, T)

PHIL 150X. Basic Concepts in Mathematical Logic
2 units, Aut (Wasow, T)

PHIL 151. First-Order Logic—(Same as PHIL 251)
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic
4 units, Spr (Pauly, M)

PHIL 154/254. Modal Logic
4 units, Aut (Mints, G)

PHIL 162/262. Philosophy of Mathematics—(Same as MATH 161.)
4 units, Spr (Feferman, S)

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
4 units, Aut (Ryckman, T)

PHIL 167B/267B. Philosophy, Biology, and Behavior
4 units, Win (Longino, H)

PHIL 181/281. Philosophy of Language
4 units, Win (Føllesdal, D)

PHIL 184/284. Theory of Knowledge
4 units, Spr (Lawlor, K)

PHIL 186/286. Philosophy of Mind
4 units, Win (Perry, J)

PHIL 358. Rational Agency and Intelligent Interaction—(Same as CS 222.)
3 units, Spr (Shoham, Y; van Benthem, J)

PSYCH 30. Introduction to Perception
3 units, Win (Grill-Spector, K)

PSYCH 45. Introduction to Learning and Memory
3 units, Spr (Wagner, A)

PSYCH 55. Introduction to Cognition and the Brain
4 units, Win (Boroditsky, L)

PSYCH 70. Introduction to Social Psychology
4 units, Spr (Tormala, T)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior—(Same as BIOSCI 153.)
4 units, Aut (Wine, J)

PSYCH 131/262. Language and Thought
4 units, Aut (Clark, H)

PSYCH 137/239A. Birds to Words: Cognition, Communication, and Language—(Same as HUMBIO 145.)
4 units, Aut (Fernald, A; Ramscar, M)

PSYCH 143. Developmental Anomalies
3 units, Spr (Johnson, S)

PSYCH 202. Cognitive Neuroscience
3 units, Spr (Wandell, B; Grill-Spector, K)

PSYCH 204A. Computational Neuroimaging
1-3 units, Spr (Wandell, B)

PSYCH 250. High-level Vision
1-3 units, Spr (Grill-Spector, K), alternate years, not given next year

PSYCH 251. Affective Neuroscience
3 units, Win (Knutson, B)

PSYCH 252. Statistical Methods for Behavioral and Social Sciences—(Same as NENS 202.)
1-6 units, Aut (Thomas, E)

PSYCH 272. Special Topics in Psycholinguistics
1-3 units, Spr (Clark, H)

SOC 126/226. Introduction to Social Networks
5 units, Aut (Hillmann, H)

STATS 110. Statistical Methods in Engineering and the Physical Sciences
4-5 units, Aut (Srinivasan, B), Sum (Staff)

STATS 116. Theory of Probability
3-5 units, Aut (Donoho, D), Spr (Wong, W), Sum (Staff)

STATS 191. Introduction to Applied Statistics
3-4 units, Win (Zhang, N)

STATS 200. Introduction to Statistical Inference
3 units, Win (Romano, J), Sum (Staff)

PROGRAM ON URBAN STUDIES

Director: Doug McAdam (Sociology)
Associate Director: Michael Kahan (Lecturer, Urban Studies)
Executive Committee: Albert Camarillo (History), Karen Cook (Sociology), Milbrey McLaughlin (Education), Walter Scheidel (Classics), Jeff Wachtel (President's Office)
Affiliated Faculty: Lawrence Bobo (Sociology), Scott Bukatman (Art and Art History), Albert Camarillo (History), Prudence Carter (Education), Samuel Chiu (Management Science and Engineering), Karen Cook (Sociology), Paulla Ebron (Anthropology), Charlotte Fonrobert (Religious Studies), Richard Ford (Law), Zephyr Frank (History), Steven Gorelick (Geological and Environmental Sciences), David Grusky (Sociology), Miyako Inoue (Anthropology), Sarah Jain (Anthropology), Raymond Levitt (Civil and Environmental Engineering), Carolyn Lougee (History), Monica McDermott (Sociology), Raymond McDermott (Education), Daniel McFarland (Education), Milbrey McLaughlin (Education), William McLennan (Office of Religious Life), Ian Morris (Classics), Josiah Ober (Classics, Political Science), Susan Olzak (Sociology), Leonard Ortolano (Civil and Environmental Engineering), Rob Reich (Political Science), Ian Robertson (Anthropology), Michael Rosenfeld (Sociology), Rebecca Sandefur (Sociology), Walter Scheidel (Classics), Karen Seto (Geological and Environmental Sciences), Jennifer Trimble (Classics), Nancy Brandon Tuma (Sociology, Hoover Institution), Paul Turner (Art and Art History), Barbara Voss (Anthropology)
Lecturers: Karin Cotterman, Melanie Edwards, Dehan (Danno) Glanz, Michael Kahan, Patricia Karlin-Neumann, Michael Kieschnick, Joseph Kott, Joanne Sanders, Laura Scher, Jackie Schmidt-Posner, Frederic Stout
Visiting Associate Professor: Gerald Gast

Department Offices: Building 120, Room 160
Mail Code: 94305-2048
Phone: (650) 723-3956
Email: urbanstudies@stanford.edu
Web Site: http://urbanstudies.stanford.edu

Courses given in the Program on Urban Studies have the subject code URBANST. For a complete list of subject codes, see Appendix.

The Urban Studies program treats urbanism as an interdisciplinary field; it brings together students, faculty, and outside specialists concerned with cities, and the impacts of cities on society and people's lives. The Urban Studies major encourages students to inquire deeply into the nature of cities and the techniques used to modify urban environments. It prepares students to address urbanization, and gives students a knowledge base and theoretical, analytical, and practical skills to understand urban social systems and effect social change.

A major in Urban Studies prepares students for careers and advanced academic pursuits in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country. Information on careers and graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

UNDERGRADUATE PROGRAMS

The Urban Studies major requires students to complete four types of courses totaling at least 73 units: 19 units in the core; at least 8 units of skills courses; at least 25 units in an area of concentration; and 13 units in the capstone sequence. If units in these categories total less then 73, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 100 or higher (except URBANST 198 and 199). Majors must also complete two prerequisites: ECON 1A, Introductory Economics A; and SOC 1, Introduction to Sociology; the units for these prerequisite courses do not count toward the 73 units required for the major. URBANST 198, URBANST 199, and prerequisites for required courses and for electives also do not count towards the 73-unit minimum.

Urban Studies students interested in graduate school in business or urban planning are advised to obtain basic quantitative skills by completing MATH 19, 20, and 21, or MATH 41 and 42, preferably before the junior year. A course in statistical methods, such as STATS 60, ECON 102A, POLISCI 150A or 151B, or SOC 181B, is recommended for students interested in business or urban planning.

Urban Studies students carry out an internship in an urban organization in the public or private sector, typically by enrolling in URBANST 201A during Winter Quarter of the junior year. This internship, or an appropriate substitution where necessary, should be arranged no later than Autumn Quarter of the junior year. Urban Studies majors who wish to receive academic credit for additional internship work may enroll once in URBANST 194. Students can consult the Haas Center for Public Service for other courses with internship placements at community organizations.

Urban Studies students are encouraged to spend at least one quarter studying overseas to learn how cities vary across societies. Some Urban Studies core course requirements, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. Students may arrange to fulfill the internship requirement through a summer placement at one of Stanford's overseas locations.

Courses counted toward the 73-unit graduation requirement for the major (except URBANST 201A) must be taken for a letter grade, and a minimum grade of 'C' is required. Qualified students may write a senior honors thesis and graduate with honors; see details in "Honors Program" below. Students interested in declaring Urban Studies as a major are required to meet first with the student services administrator and one of the program's advisers; they then declare the Urban Studies major on Axess.

URBAN STUDIES CORE

Urban Studies majors should complete URBANST 110, Introduction to Urban Studies, before Spring Quarter of the junior year. The following courses, totaling 19 units, are required:

URBANST 110. Introduction to Urban Studies
URBANST 112. The Urban Underclass
URBANST 113. Introduction to Urban Design
URBANST 114. Cities in Comparative Perspective

SKILLS

A minimum of 8 units are required. The following courses may be used to fulfill the skills requirement; consult an adviser to determine if additional courses may be available:

GES 144. Fundamentals of Geographic Information Systems
SOC 180A. Foundations of Social Research

CONCENTRATIONS

Students must complete at least 25 units in one of the following concentrations. Courses may not be double counted. Students should consult an adviser to develop a program that meets their intellectual goals; relevant courses not listed here, including research methods courses taken in preparation for the capstone project, may be counted toward the concentration with the prior consent of an adviser.

These concentrations are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

CITIES IN COMPARATIVE AND HISTORICAL PERSPECTIVE

Focus is on how cities have evolved over time, and how they are continuing to change today in societies around the world, drawing on disciplinary approaches including anthropology, archaeology, art history, geography, and history. By placing urban issues in perspective, students improve their comprehension of the present as well as the past.

Students in this concentration are encouraged to study off campus, and preferably overseas, for at least one quarter. Many courses offered through the Overseas Studies Program can be counted toward the concentration. Similarly, internships offered at many of Stanford's overseas locations can be used to fulfill the Urban Studies internship requirement. Students should also consider enrolling in one of the Stanford Overseas Seminars, intensive courses taught in September in locations which do not have overseas campuses.

The following course is required for the cities in comparative and historical perspective concentration:

CASA 112. The Archaeology of Modern Urbanism

The following courses may be counted toward the cities in comparative and historical perspective concentration:

ANTHSCI 128B. Globalization and Japan
ANTHSCI 142. Incas and their Ancestors: Peruvian Archaeology
ANTHSCI 144. Urbanism in the Prehispanic New World
ANTHSCI 145B. Evolution of Civilizations
ANTHSCI 146A. The Aztecs and their Ancestors: Introduction to Mesoamerican Archaeology
ANTHSCI 151. Anthropology and Demography
ARTHIST 3. Introduction to the History of Architecture
ARTHIST 141. The Invention of Modern Architecture
ARTHIST 212. Renaissance Florence 1400-1540
ARTHIST 252A. Place: Making Space Now
CASA 36. Life on the Streets: Anthropology of U.S. Urban Life
CASA 133. City and Sounds
CASA 134. Archaeology of Architecture
CASA 137E. Excavation at Catalhoyuk, Turkey
CLASSGEN 36. Projecting Rome
CLASSGEN 60. The Life and Death of a Roman City: Pompeii
CLASSHIS 60. The Romans
CLASSHIS 101. The Greeks
CLASSHIS 105. History and Culture in Ancient Egypt
GES 138. Urbanization, Global Change, and Sustainability
GES 142. Remote Sensing of Land Use and Land Cover
HISTORY 106A. Global Human Geography: Asia and Africa
HISTORY 106B. Global Human Geography: Europe and Americas
HISTORY 110C. Introduction to Modern Europe
HISTORY 150C. The United States in the 20th Century
HISTORY 234. Paris and Politics, 1600-2008
HISTORY 252G. Environmental History of Urban America
HISTORY 260. Race and Ethnicity in the American Metropolis: Cities of Color – Los Angeles and East Palo Alto
HISTORY 267F. Cities in the North American West, 1840-1940
HISTORY 276. Modern Brazil
HISTORY 291B. The City in Imperial China
ME 120. History and Philosophy of Design
OSPBER 11. The Vanishing City: Lost Architecture and the Art of Commemoration in Berlin
OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin
OSPFLOR 36. Introduction to the International Economy: The State, the Firm, and the Region
OSPFLOR 115Y. The Duomo and the Piazza della Signoria: Symbols of a Civilization
OSPKYOTO 28. Kyoto: History of Urban and Architectural Space
OSPOXFRD 65. Oxford: The City as a Work of Art
OSPPARIS 25. Literature and the City
OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design
POLISCI 110A. Sovereignty and Globalization
POLISCI 110C. America and the World Economy
RELIGST 237. Jewish and Christian Rome in the 1st to 6th Centuries
URBANST 161. American Urban History since 1920
URBANST 164. Utopia and Reality in Modern Urban Planning
URBANST 175. Global Cities and the Transnational Economy

URBAN EDUCATION

The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master's degree in the Stanford Teacher Education Program (STEP) or the Policy, Organization, and Leadership Studies Program (POLS). Students planning to pursue a coterminal master's should take one of the three practica: EDUC 103A, B, and C (for the STEP elementary coterm); EDUC 101X (for the STEP secondary coterm); or EDUC 270A (for the POLS coterm). Application and admission to a coterminal degree in these programs occurs during the Autumn Quarter of the junior year and is handled by the School of Education.

Opportunities to obtain teaching and advising experience are available in nearby schools through Upward Bound and other programs administered by the Haas Center for Public Service and through courses offered by the School of Education.

Students who choose this concentration may be eligible for the undergraduate honors program of the School of Education, in which case they should enroll in EDUC 199A,B, or C during their senior year.

The following course is required for the urban education concentration:

EDUC 212X. Urban Education

The following courses may be counted toward the urban education concentration:

AFRICAST 211. Education for All? The Global and Local in Public Policy Making in Africa
EDUC 101. Undergraduate Teaching Practicum
EDUC 103A/SOC 103A. Tutoring: Seeing a Child through Literacy
EDUC 103B. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices
EDUC 103C. Educational Policy, Diversity, and English Learners
EDUC 104X. Conduct of Research with and in Communities
EDUC 115Q. Identities, Race, and Culture in Urban Schools
EDUC 116X. Service Learning as an Approach to Teaching
EDUC 177. Education of Immigrant Students: Psychological Perspectives
EDUC 179. Urban Youth and Their Institutions: Research and Practice
EDUC 198X. Tutoring with Adolescents: Ravenswood Writes
EDUC 201. History of Education in the United States
EDUC 201A. History of African American Education
EDUC 201B. Education for Liberation
EDUC 202. Introduction to Comparative and International Education
EDUC 204. Introduction to the Philosophy of Education
EDUC 220A. Introduction to the Economics of Education
EDUC 220B. Introduction to the Politics of Education
EDUC 220C. Education and Society
EDUC 220D. History of School Reform: Origins, Policies, Outcomes, and Explanations
EDUC 221A. Policy Analysis in Education
EDUC 233A, B. Adolescent Development and Mentoring in the Urban Context
EDUC 287. Culture and Learning
HUMBIO 142. Adolescent Development
or PSYCH 60: Introduction to Developmental Psychology
SOC 132. Sociology of Education: The Social Organization of Schools

URBAN SOCIETY AND SOCIAL CHANGE

Focus is on issues in contemporary urban society and the tools and concepts that planners, policy makers, and citizens use to address those issues. Topics include environmental challenges, racial and class inequality, and the provision of adequate urban infrastructure. Students learn how community action, urban planning and design, and organizations in nonprofit, for-profit, and government sectors address urban social and environmental problems. This concentration prepares students to enter graduate programs concerned with urban affairs, community service, and public policy, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

The following course is required for the urban society and social change concentration:

POLISCI 133. Ethics and Politics of Public Service

The following courses may be counted toward the urban society and social change concentration:

CASA 88. Theories in Race and Ethnicity
CASA 115. Race and the American City
CEE 64. Air Pollution: From Urban Smog to Global Change
CEE 100. Managing Sustainable Building Projects
CEE 131. Architectural Design Process
CEE 142A. Sustainable Development
CEE 171. Environmental Planning Methods
CEE 172. Air Quality Management
EARTHSYS 124. Environmental Justice: Local, National, and International Dimensions
ECON 150. Economic Policy Analysis
ECON 155. Environmental Economics and Policy
EDUC 270A. Learning to Lead in Public Service Organizations
ENGR 150. Social Innovation and Entrepreneurship
GES 138. Urbanization, Global Change and Sustainability
GES 142. Remote Sensing of Land Use and Land Cover Change
HISTORY 105. Gandhi, King and Non-Violence
HISTORY 252G. Environmental History of Urban America
HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice
HISTORY 260. California's Minority-Majority Cities
MS&E 196. Transportation Systems and Urban Development
POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
POLISCI 221F. Race and American Politics
POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
PUBLPOL 180. Social Innovation
PUBLPOL 183. Philanthropy and Social Innovation
PUBLPOL 185. Managing Public Policy
SOC 118. Social Movements and Collective Action
SOC 137. Homelessness: Its Causes, Consequences, and Policy Solutions
SOC 140. Introduction to Social Stratification
SOC 141. Controversies About Inequality
SOC 141A. Social Class, Race, Ethnicity, Health
SOC 143. Prejudice, Racism, and Social Change
SOC 144. Race and Crime in America
SOC 145. Race and Ethnic Relations
SOC 160. Formal Organizations
  or MS&E 180. Organizations: Theory and Management
URBANST 111. Urban Politics
URBANST 126. Spirituality and Nonviolent Urban and Social Transformation
URBANST 131. Social Innovation and the Social Entrepreneur
URBANST 132. Concepts and Analytic Skills for the Social Sector
URBANST 133. Social Entrepreneurship Collaboratory
URBANST 162. Managing Local Governments
URBANST 163. Land Use Control
URBANST 165. Sustainable Urban and Regional Transportation Planning
URBANST 171. Urban Design Studio

SELF-DESIGNED

Students who wish to concentrate in an area of urban studies other than one of the above concentrations must complete the Urban Studies core, skills, and capstone requirement, and design additional units to bring the total to at least 73 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. Proposals for courses in the self-designed portion of the concentration should include a list of courses and a description of how each course meets the student's educational objectives. A proposal for a self-designed concentration must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the student's plan.

Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the middle of the second quarter of the student's junior year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of their sophomore year.

CAPSTONE

All majors are required to complete an internship and a sequence of two seminars, totaling 13 units, in which students participate in the work of an urban organization related to their area of interest, design a senior project, and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 201A and 201 or 202 should be taken in the junior year, and URBANST 203 in the senior year.

URBANST 201. Preparation for Senior Project (WIM)
  or URBANST 202. Preparation for Honors Thesis (WIM)
URBANST 201A. Capstone Internship in Urban Studies
URBANST 203. Senior Seminar

MINOR

The minor in Urban Studies is designed to introduce students to several disciplinary approaches to the study of cities, and provides the opportunity to explore one of three specialized options: cities in comparative and historical perspective; urban education; or urban society and social change.

The minor in Urban Studies requires completion of seven courses for a letter grade, including the four core courses, the required course in the student's chosen concentration area, and two additional courses in that option as listed above.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must

1. declare a major in Urban Studies and complete at least 30 of the 73 required units including all prerequisites and core classes
2. complete URBANST 201 or 202 (offered Winter Quarter)
3. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
4. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford's Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than the last day of classes in Spring Quarter of the junior year, and it must then be approved by the Director of the Urban Studies honors program.

Honors students are expected to complete a portion of their honors work in URBANST 203, Senior Seminar, in Autumn Quarter. Additionally, they must register for 5-10 units total in URBANST 199, Senior Honors Thesis, over the course of their senior year. The units of URBANST 199 do not count towards the 73-unit requirement for graduating with a B.A. in Urban Studies. Honors work is considered to be above and beyond regular graduation standards.

URBANST 201 or 202 should be taken during the junior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 201 or 202 in the Winter Quarter of their sophomore year. All honors students are required to present their theses at the Senior Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least 'A-' in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

COTERMINAL PROGRAMS

Undergraduates in Urban Studies may enter coterminal master's degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Communications, and Sociology, and with the School of Education. Information and applications for coterminal degree programs are available at Undergraduate Advising and Research. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COURSES

Further descriptions and details of current courses offered by the Program on Urban Studies may be obtained from the program office before each quarter.

URBANST 10. Documenting the Urban Community: Image and Text—Cities as forces in the development of society, culture, and individual personality.What is community and how does it serve the needs of individuals and the whole population? How does community affect educational development, jobs, neighborhood sociability, and democratic self-governance? How do community values intersect with market and government values?

1 unit, Sum (Staff)

URBANST 110. Introduction to Urban Studies—The study of cities and urban civilization. History of urbanization and current issues such as suburbanization, racial discrimination, globalization, terrorism, and the environment. Public policies designed to address these issues. GER:DB-SocSci, EC-AmerCul

4 units, Aut, Win (Stout, F)

URBANST 111. Urban Politics—(Same as POLISCI 121, SOC 149X/249X.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor.

5 units, Aut (Bischoff, K)

URBANST 112. The Urban Underclass—(Same as SOC 149/249; graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Rosenfeld, M)

URBANST 113. Introduction to Urban Design: Contemporary Urban Design in Theory and Practice—Issues in urban development and conservation. Neighborhood livability, central city revitalization, historic preservation, and regional growth through comparative case studies from N. America and abroad. Projects focus on neighborhood, downtown, and regional issues in San Francisco and the Bay Area. Two Saturday field workshops in San Francisco. GER:DB-SocSci

5 units, Win (Gast, G)

URBANST 114. Cities in Comparative Perspective—(Same as CASA 111.) Core course for Urban Studies majors. The city as interdisciplinary object. Discourses about cities such as the projects, practices, plans, representations, and sensibilities that combine to create what people know about urban spaces. Local, national, and transnational spatial scales. Conversations across regional boundaries; geographies of difference. Case studies.

3-5 units, Aut (Ebron, P)

URBANST 121. Civil Society and the Nonprofit Sector—(Same as POLISCI 232.) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.

2-4 units, not given this year

URBANST 123. Approaching Research and the Community—How experience with community organizations provides a starting point for developing community-based senior theses or independent research projects. Principles and practice of doing community-based research as a collaborative enterprise between academic researchers and community members; how academic scholarship can be made useful to community organizations. Guest speakers from community organizations, faculty, and alumni of the Public Service Scholars Program.

2 units, Aut (Cotterman, K)

URBANST 126. Spirituality and Nonviolent Urban and Social Transformation—A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and William Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. GER:DB-SocSci

5 units, Win (Karlin-Neumann, P; Mclennan, W; Sanders, J)

URBANST 131. Social Innovation and the Social Entrepreneur—Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.

1 unit, Aut (Staff)

URBANST 132. Concepts and Analytic Skills for the Social Sector—Analytical methods, marketing, language, organizational mission, strategy, and finance in the for-profit and nonprofit social sectors. Focus is on the integration of theory and application. Opportunities and limits of methods from the profit sector to meet social goals. Enrollment limited to 20. Prerequisite: ECON 1A. GER:DB-SocSci

4 units, Win (Kieschnick, M)

URBANST 133. Social Entrepreneurship Collaboratory—Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team's research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisites: 131 and 132, or consent of instructor.

4 units, Aut (Edwards, M), Spr (Scher, L)

URBANST 161. U.S. Urban History since 1920—Possible topics include: the end of European immigration and its impact on cities; the rise of the automobile; mass culture and consumerism; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Kahan, M)

URBANST 162. Managing Local Governments—In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci

3-4 units, not given this year

URBANST 163. Land Use Control—Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci

4 units, not given this year

URBANST 164. Utopia and Reality in Modern Urban Planning—(Same as ARTHIST 254.) Primarily for Urban Studies and Art majors. Utopian urbanist thinkers such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:DB-Hum

5 units, Spr (Stout, F; Turner, P)

URBANST 165. Sustainable Urban and Regional Transportation Planning—Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER:DB-SocSci

4-5 units, Spr (Kott, J)

URBANST 171. Urban Design Studio—The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.

5 units, Spr (Glanz, D)

URBANST 175. Global Cities and the Transnational Economy—(Same as SOC 175/275.) How key cities command and coordinate the global economy. Why a division of labor exists amongst a global hierarchy of cities. How economic globalization creates a need for sophisticated information analysis and decision making capabilities. Why corporate headquarters and advanced services are concentrated in a handful of cities. Cluster-oriented development strategies. Case studies. Concepts, theories, and tools from economic sociology and regional economics.

5 units, Spr (Choi, J)

URBANST 190. Urban Professions Seminar—Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work.

1 unit, not given this year

URBANST 194. Internship in Urban Studies—For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings.

2-4 units, Aut, Win, Spr (Staff)

URBANST 195. Special Projects in Urban Studies

1-5 units, Aut, Win, Spr (Staff)

URBANST 197. Directed Reading

1-5 units, Aut, Win, Spr (Staff)

URBANST 198. Senior Research in Public Service—Limited to seniors approved by their departments for honors thesis, and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public and community service? How can communities benefit from research? Theory and practice of research as a form of public service. Readings in research theory and methods of participatory action research; presentations on research as service; workshops on each participant's thesis work-in-progress; public presentation of completed research; and thesis evaluation by a community-based reader. May be repeated for credit. Corequisite: 199.

1-3 units, Aut, Win, Spr (Schmidt-Posner, J)

URBANST 199. Senior Honors Thesis

1-10 units, Aut, Win, Spr (Staff)

URBANST 200A. Choosing a Topic and Questions for a Senior Project—For juniors and sophomores majoring in Urban Studies or Sociology. Students choose a topic and narrow it to a manageable research question. Preparation for URBANST 201 or 202.

1-2 units, not given this year

URBANST 201. Preparation for Senior Project—(Same as SOC 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Individually arranged internship beginning in Winter Quarter, 8 hours per week. Prospective students must consult with internship coordinator early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal, which may submitted for funding. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Corequisite: URBANST 201A. WIM

5 units, Win (Kahan, M)

URBANST 201A. Capstone Internship in Urban Studies—Restricted to Urban Studies majors. Students work at least 80 hours with a supervisor, establish learning goals, and create products demonstrating progress. Reflection on service and integration of internship with senior research plans. Must be completed by start of Winter Quarter senior year. May continue for additional quarter as 194. Corequisite: 201 or consent of instructor.

3 units, Aut, Win, Spr (Staff)

URBANST 202. Preparation for Honors Thesis—(Same as SOC 202.) Primarily for juniors in Sociology or Urban Studies, sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. First part of capstone experience for Urban Studies majors pursuing a non-internship based research project or honors thesis. Urban Studies majors enrolling in 202 rather than 201 must arrange an alternative way of fulfilling the internship requirement. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. WIM

5 units, Win (McAdam, D)

URBANST 203. Senior Seminar—Conclusion of capstone sequence. Students write a substantial paper based on the research project developed in 201 or 202. Students in the honors program may incorporate paper into their thesis. Guest scholar chosen by students.

5 units, Aut (Kahan, M)

OVERSEAS STUDIES

Courses approved for the Urban Studies major and taught overseas can be found in the "Overseas Studies" section of this bulletin, in the Overseas Studies office, 126 Sweet Hall, or at http://osp.stanford.edu/.

BERLIN

OSPBER 11. The Vanishing City: Lost Architecture and the Art of Commemoration in Berlin
4-5 units, Spr (Ebeling, K)

OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin
4-5 units, Aut (Pabsch, M)

FLORENCE

OSPFLOR 36. Introduction to the International Economy: The State, the Firm and the Region
5 units, Spr (Di Minin, A)

OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization
4 units, Aut (Verdon, T)

KYOTO

OSPKYOTO 28. Kyoto: History of Urban and Architectural Space
4-5 units, Spr (Langner-Teramoto, B)

OXFORD

OSPOXFRD 65. Oxford: The City as a Work of Art
2 units, Win, Spr (Chance, H)

PARIS

OSPPARIS 25. Literature and the City
4 units, Win (Rullier, F)

OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design
4 units, Spr (Halevi, E)

STANFORD IN WASHINGTON

Director: Adrienne Jamieson

Stanford in Washington provides highly-qualified undergraduates with an opportunity to work and study in the nation's capital. In addition to providing students with an understanding of public policymaking, the program offers an opportunity to take advantage of the city's unique cultural resources.

Central in the student's educational experience is an internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the White House, the National Institutes of Health, the Smithsonian Institution, CNN, the departments of State, Justice, Education, and Health and Human Services.

In addition to the internship, students must also complete an academic course of study consisting of small tutorials taught by policy experts (5 units), and weekly policy seminars taught by Stanford faculty members (5 units). Frequently, speakers from the Washington policy community join students and faculty for discussions. Students usually write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

Stanford in Washington offers stretch quarters in the Autumn and Spring (early September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or the first quarter of their senior year. Applications must be completed two quarters in advance. For Autumn Quarter, apply early Winter Quarter of the previous year. For Winter Quarter, apply early Spring Quarter of previous year. For Spring Quarter, apply early Autumn Quarter. Students interested in the program should contact the Public Policy Program, Encina Hall West, room 204, (650) 725-0109, or publicpolicy@stanford.edu.

SCHOOL OF LAW

Emeriti: (Professors) Barbara Allen Babcock, Wayne G. Barnett, John H. Barton, Paul Brest, William Cohen, Lance E. Dickson, Marc A. Franklin, Jack H. Friedenthal, Robert A. Girard, William B. Gould IV, Thomas C. Grey, John Henry Merryman, Margaret Jane Radin, David Rosenhan, Kenneth E. Scott, Byron D. Sher, William H. Simon, Michael S. Wald, Howard R. Williams

Dean: Larry D. Kramer

Vice Dean: Mark G. Kelman

Associate Dean for Curriculum: Norman W. Spaulding

Associate Dean for Graduate Studies: Deborah R. Hensler

Associate Dean for Public Interest and Clinical Education: Lawrence C. Marshall

Senior Associate Dean and Chief Financial Officer: Frank Brucato

Associate Deans: Faye Deal, Catherine Glaze, Sabrina Johnson, Catherine Nardone, Susan Robinson

Professors: Janet Cooper Alexander, Joseph Bankman, R. Richard Banks, Gerhard Casper (on leave), Joshua Cohen, G. Marcus Cole, Richard Craswell, Mariano-Florentino Cuéllar, Robert M. Daines, Michele Landis Dauber, George Fisher, Richard T. Ford, Barbara H. Fried, Lawrence M. Friedman, Ronald J. Gilson (on leave Autumn), Paul Goldstein, Henry T. Greely, Joseph A. Grundfest, Thomas C. Heller, Deborah R. Hensler, Pamela S. Karlan, Mark G. Kelman, Michael Klausner (on leave Spring), Larry D. Kramer, Mark A. Lemley, Lawrence Lessig, Lawrence C. Marshall, Miguel A. Méndez, A. Mitchell Polinsky, Robert L. Rabin (on leave) , Deborah L. Rhode, Jane Schacter, Norman W. Spaulding, James F. Strnad II, Kathleen M. Sullivan (on leave), Alan O. Sykes, Barton H. Thompson Jr., David G. Victor, Robert Weisberg

Associate Professors: Amalia D. Kessler (on leave), Jenny S. Martinez, Alison D. Morantz

Assistant Professors: Daniel Ho, Barbara van Schewick

Professor (Teaching): William S. Koski (on leave Spring)

Associate Professors (Teaching): Juliet M. Brodie, Jeffrey L. Fisher, Jayashri Srikantiah

Courtesy Professors: Daniel P. Kessler, Maureen F. McNichols, Paul C. Pfleiderer, Madhav Rajan, Jack Rakove

Senior Lecturers: Margaret R. Caldwell, Janet Martinez, David W. Mills, Helen Stacy, Allen S. Weiner

Visiting Professors: John Harrison, Timothy Holbrook, Yifat Holzman-Gazit, Barbara Olshansky, Rogelio Perez-Perdomo, William H. Taft, IV, Jennifer Urban, Joanthan Zittpain

Legal Research and Writing Instructors: Brooke Coleman, John Greenman, Stephen Lee, Hillel Levin, Beth McLellan, Jeanne Merino, Nirej Sekhon

Lecturers: Simao J. Avila, James Baer, Marilyn Bautista, Karen Biestman, Gary Born, Scott Bristol, Andrew Coan, Susan Diamond, Michael Dickstein, Robert Fairbank,Randee G. Fenner, Jeremy Fogel, David Forst, Larry Franklin, Edward Frueh, James Fuller, Miei Gechlik, Thomas C. Goldstein, Jennifer Granick, Jonathan Greenberg, Lucas Guttentag, Timothy H. Hallahan, Brad Handler, Amy Howe, Erik Jensen, David Johnson, Danielle Jones, Julie Kennedy, Jeffery Kobrick, Charles Koob, Paul Lomio, John Lyons, Amichai Magen, Michael McConnell, Jay Mitchell, Richard Morningstar, Roberta J. Morris, Tom Nolan, Jessica Notini, Ralph Pais, B. Howard Pearson, Lisa M. Pearson, Brian Quinn, Stephan Ray, Melissa Rodgers, Michael Romano, Matthew Rossiter, Kevin Russell, Richard Salgado, Derek Shaffer, Dan Siciliano, Rachelle Silberberg, Deborah A. Sivas, Stephanie Smith, Jamie Staples-King, Tara Twomey, Roland Vogl, Fred von Lohmann, Bruce Wagman, Michael Wara, Erika Wayne, Dana Weintraub, Robert Wexler, Kate Wilko, George D. Wilson, Katherine C. Wright

Affiliated Faculty: Alexandria Boehm (Engineering), Judith Goldstein (Political Science, SIEPR), Joy Ishii (GSB), Stephen Krasner (Political Science, SIEPR), Erica Plambeck (GSB), Robert Staiger (Economics, SIEPR)

Courses given in Law have the subject code LAW or LAWGEN. For a complete list of subject codes, see Appendix.

The School of Law, established 1893, provides a legal education for students who are fitted by their maturity and academic training to pursue professional study under University methods of instruction. The curriculum leading to the first professional degree in law, the Doctor of Jurisprudence (J.D.), constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws (L.L.M.), Master of the Science of Law (J.S.M.), and Doctor of the Science of Law (J.S.D.), and a non-professional degree, Master of Legal Studies (M.L.S.), is also offered. For the full curriculum, see http://lawreg.stanford.edu. Stanford Law School offers joint or dual degree options in combination with other Stanford graduate departments and universities across the country; see the "Joint and Dual Degree" section below.

The school is on a two-term academic calendar: Autumn term classes begin for first-year students August 27, 2007 and on September 4, 2007 for all other students; the term ends on December 5, 2007. Winter term classes begin on January 8, 2008, and the term ends on April 23, 2008. In addition, the Law School offers classes on the quarter schedule. Law classes taught on the Autumn Quarter schedule begin September 24, 2007 and end on December 7, 2007; Law classes taught on the Winter Quarter schedule begin January 8, 2008 and end on March 14, 2008.

For further information about admission, programs, curriculum, and faculty, see http://www.law.stanford.edu/.

JOINT AND DUAL DEGREES

Formal admission to both the Law School and to the other cooperating school or department in accordance with the established admission standards of each school or department is required. In addition to the formal joint degree programs offered, the school considers requests for a dual program on an individually designed basis. For additional information on Law School joint or dual degree programs, see http://www.law.stanford.edu/program/degrees/. See relevant web sites or department sections of this bulletin for degree requirements.

Formal joint degree programs at Stanford:

School of Business—See http://www.gsb.stanford.edu/mba/.

J.D./M.B.A. Master of Business Administration

School of Earth Sciences—

J.D./M.S. Interdisciplinary Graduate Program in Environment and Resources (IPER)

J.D./Ph.D. Interdisciplinary Graduate Program in Environment and Resources (IPER)

School of Education—

J.D/M.A. Policy, Organization, and Leadership Studies (POLS)

School of Engineering—

J.D./M.S. Management Science and Engineering (MS&E)
J.D./Ph.D. Management Science and Engineering (MS&E)

School of Humanities and Sciences—

J.D./M.A. Economics
J.D./Ph.D. Economics
J.D./M.A. History
J.D./Ph.D. History

J.D./M.A. in degree granting programs in the Division of International Comparative and Area Studies (ICA): African Studies, East Asian Studies, International Policy Studies, Latin American Studies, and Russian, East European and Eurasian Studies

J.D./Ph.D. Philosophy
J.D./Ph.D. Political Science
J.D./Ph.D. Psychology
J.D./M.A. Sociology
J.D./Ph.D. Sociology

School of Medicine—

J.D./M.S. Health Research and Policy (HRP)

Formal joint degree programs with other Universities—

J.D./M.P.A. with the Woodrow Wilson School of Public and International Affairs at Princeton University

J.D./M.A. with the Paul H. Nitze School of Advanced International Studies at Johns Hopkins University

COURSES

Courses listed in this section are open to Stanford non-Law students with consent of instructor. Each course indicates whether it is on the quarter or semester schedule. Non-Law students who register for courses with a LAW subject code are awarded quarter units upon completion of the course; semester unit values are converted into quarter unit values for non-Law students at the time of enrollment. (Courses with non-LAW subject codes that are crosslisted with LAW courses have quarter-based units, and no conversion is performed for undergraduates or graduate students. See the respective department's section of this bulletin for such unit values.)

Students intending to enroll in any course with a LAW subject code must consult the School of Law Registrar's Office in the Stanford Law School Administration Building, room 100, or see http://www.law.stanford.edu/school/offices/registrar/.

For additional detailed course information, see the Office of the Law School web site at http://www.law.stanford.edu/program/courses/.

NONPROFESSIONAL: UNDERGRADUATE AND GRADUATE

The following courses may not be counted toward professional degrees in Law. Unit values listed in LAWGEN courses are quarter-based.

LAWGEN 106. Introduction to American Law—(Same as AMSTUD 179, POLISCI 122.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.

3-5 quarter units, Aut quarter schedule (Friedman, L)

LAWGEN 107Q. Legal Craft and Moral Intuitions—(Same as POLISCI 33Q.) Stanford Introductory Seminar. Preference to sophomores. The conflict between translating rules for social interaction into legal practices versus deciding what constitutes impermissible harm-causing, coercion, or discrimination. Approaches to this conflict through cases such as: can government forbid wetland development without compensating property owners; why might private nurses or Playboy bunnies but not flight attendants be selected on the basis of gender; why is gender equality in resource distribution provided for college athletes but not math graduate students? GER:DB-SocSci, EC-EthicReas

4 quarter units, Win quarter schedule (Kelman, M)

LAWGEN 109Q. The History of Punishment and Sentencing in California—Stanford Introductory Seminar. Preference to sophomores. From the passage of the first criminal statute in 1850 through present-day sentencing and prison reform efforts. The 1976 Determinate Sentencing Act and subsequent problems in the sentencing system. This course will trace the history of California's criminal sentencing system in an attempt to uncover possible explanations for this remarkable evolution. The 1994 Three Strikes Law in 1994. Sources include historical documents and policy analysis. Interdisciplinary historical inquiry. Final research paper.

3 quarter units, Aut quarter schedule (Weisberg, R; Dansky, K)

LAWGEN 206. Core Legal Concepts: Thinking Like a Lawyer—(Same as GSBGEN 382.) Restricted to graduate students. Core concepts of the law; how lawyers analyze and structure their work. Topics such as contracts, litigation, intellectual property, securities, and employment law.

3 quarter units, Aut quarter schedule (Kelman, M; Kramer, L)

LAWGEN 209. Stanford Community Police Academy—For graduate students. Practical experience. The duties, responsibilities, decisions, and constraints that face law enforcement officers. Prerequisites: minimum 18 years of age; valid driver's license; background check.

1 quarter unit, Win quarter schedule (Wilson, L)

GRADUATE

The following courses are open to qualified graduate students in other departments of the University with consent of instructor.

LAW 220. Regulated Industries—Major theories and cases studies from electricity and utilities, oil and gas, telecommunications, and food and drugs. Regulatory oversight; how regulators contend with their often limited ability to obtain accurate information; and the effects of regulation on technological innovation. Procedures for public engagement in regulatory decision making; the relationship between regulators and political authorities. Comparisons with other countries and the role of international institutions such as the World Trade Organization that constrain national regulation.

2.5 semester or 3.75 quarter units, Win quarter schedule (Victor, D)

LAW 229. Race and the Law—Historical and contemporary issues. Sources include judicial opinions, psychology, sociology, history, and legal scholarship.

2.5 semester or 3.75 quarter units, Win quarter schedule (Banks, R)

LAW 233. Antitrust—Legal and economic concepts of competition and monopoly; policy and judicial interpretations of the Sherman and Clayton acts and their applications to business practices and industrial structure. Ethical considerations.

3.4 semester units or 5.1 quarter units, Aut quarter schedule (Koob, C)

LAW 236. Art and the Law—International law and the fate of works of art in wartime. International trade in stolen and illegally exported art and antiquities. Artist rights such as moral right, copyright, and resale right. Artistic freedom and its limits. Artist relationships with dealers, commissions, live-work space, toxic hazards, taxes, estate planning, and legal services . The collector. Counterfeit art. The legal character and obligations of museums, and their trustees, directors, and staff. The National Endowment for the Arts and Humanities. Guest lecturers.

2.5 semester or 3.75 quarter units, Win quarter schedule (Merryman, J)

LAW 238. Administrative Law and Regulatory Policy—What government agencies do; constitutional rules and political pressures; statutes including the Administrative Procedure Act; how the executive branch tries to control agency actions; how bureaucracies make judgments about costs and benefits of regulatory policies; and how courts review agency action. Cases and examples from: separation of powers doctrine; constitutional law of due process; health, safety, and environmental policy; criminal justice; and national security law. Political pressures that the law seeks to regulate effectively; and lawyers' roles as litigators, lobbyists, institutional designers, and political actors.

3.4 semester or 5.1 quarter units, Win quarter schedule (Cuellar, M)

LAW 243. Bayesian Statistics and Econometrics—Linear and nonlinear regression, covariance structures, panel data, qualitative variable models, nonparametric and semiparametric methods, time series, Bayesian model averaging and variable selection. Bayesian methodology including Markov chain Monte Carlo methods, hierarchical models, model checking, mixture models, empirical Bayes approaches, approximations, and computational issues and foundations. Prerequisite: graduate-level econometrics or equivalent.

2-4 semester or 3-6 quarter units, Aut quarter schedule (Strnad, J)

LAW 245. Chinese Law and Business—Chinese legal rules and principles that regulate business. Foreign investment laws, securities regulation, intellectual property, labor, and dispute resolution. Case studies. Recommended: 549.

3.4 semester or 5.1 quarter units, Win quarter schedule (Gechlik, M)

LAW 246. Creating the American Republic—(Same as HISTORY 251/352, POLISCI 321.) Concepts and developments in the late 18th-century invention of American constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources.

1.7 semester or 2.55 quarter units, Win quarter schedule (Rakove, J)*

---

*See respective department course listings for unit values of crosslisted offerings.

LAW 248. Corporate Reorganization—Reorganization of a fictitious, financially distressed company under chapter 11 of the Bankruptcy Code, including: out-of-court workout; chapter 11 filing; chapter 11 operating issues; and the negotiation, formulation, and confirmation of a plan of reorganization. Developments in actual pending chapter 11 cases, through media reports. Cases previously considered include Adelphia, Delta Airlines, Enron, PG&E, Refco, and United Airlines.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Ray, S)

LAW 262. Corporate Finance I—For those with little background in finance; not open to J.D. or M.B.A. students. Financial concepts and analytical tools needed to make financial decisions and value securities. Capital structures, the design of corporate securities, corporate transactions, executive compensation, and bankruptcy proceedings. Focus is on problem solving.

2.5 semester or 3.75 quarter units, Win quarter schedule (Ishii, J)

LAW 277. Economic Analysis of Law—Core course for Public Policy master's students. How legal rules and institutions can correct market failures.The economic function of contrasts; role of legal remedies to resolve disputes when contracts fail. The choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors such as regulatory authorities. Economics of litigation; how private incentives to bring lawsuits differ from the social value of litigation. Economic motives to commit crimes; optimal governmental response to crime. Prerequisites: intermediate-level microeconomics; some calculus.

2.8 semester or 4.2 quarter units, Win quarter schedule (Polinsky, M)

LAW 291. Evidence, Advanced—Goal is to develop witness interrogation skills. Direct and cross examination of lay and expert witnesses, introduction of documentary evidence, and use of illustrative evidence in California and federal courts. The art of examining friendly and hostile witnesses. Enrollment limited to six. Prerequisite: 290, application.

2.5 semester or 3.75 quarter units, Win quarter schedule (Mendez, M)

LAW 306. Law, Economics, and Politics of International Trade—(Same as POLISCI 216.) Legal architecture of the WTO system; questions about its design and wisdom. Economics and politics of international cooperation on trade; the WTO as an institution and its obligations. Topics may include: the choice between regional and global approaches to trade cooperation; interface between international trade obligations and domestic regulation of health, safety and the environment; regulation of subsidies; dispute settlement system; and differential treatment of developing countries. Recommended: ECON 51 or POLISCI 110C or X.

3.4 semester or 5.1 quarter units, Win quarter schedule*
(Sykes, A; Staiger, R; Goldstein, J)

LAW 307. Gender, Law, and Public Policy—Topics include equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family. Non-law students require consent of instructor.

3 semester or 4.5 quarter units, Win semester schedule (Rhode, D)

LAW 313. Health Law and Policy I—(Same as HRP 210.) Open to Law and medical students and undergraduates by consent of instructor. Introduction to the American health care system; its legal and policy problems. Topics: special characteristics of medical care compared to other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Greely, H)*

LAW 318. History of American Law—(Same as HISTORY 352B). From the colonial period to the present. Topics include: slavery and race relations; the evolution of criminal justice and correctional systems; the growth of the legal profession; and the role of the legal system in the development of the economy. The relationship between developments in law and in the larger society. Undergraduates by consent of instructor.

3 semester or 4.5 quarter units, Win semester schedule (Friedman, L)*

LAW 319. Legislation—Statutes and legislative institutions. Laws governing access to legislative power; procedures for producing statutes; and how agencies, courts, and legislatures interpret statutes. Bribery laws, lobbying and indirect influence on legislative activity, and campaign finance regulations. Framework laws for organizing the legislature, federal budget process, rules governing intelligence oversight and national security functions; and Homeland Security Act as a case study. How legislatures in other countries and international institutions make collective decisions. Statutory interpretation process in courts, agencies, and legislatures.

2.5 semester or 3.75 quarter units, Win quarter schedule (Cuellar, M)

LAW 330. International Human Rights Clinic—Emphasis on international human rights treaties and agreements, international and regional human rights courts and tribunals, and governmental and nongovernmental international human rights organizations. The postwar emergence of civil and political human rights, development of social and economic human rights, and articulation of collective and group human rights. Normative justifications for enforcing human rights beyond the bounds of national sovereignty, and challenges to these justifications under the forces of globalization.

2.5 semester or 3.75 quarter units, Win quarter schedule (Martinez, J)

LAW 333. Judgment and Decision Making—(Same as PUBLPOL 205A, IPS 207A.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.

3.4 semester or 5.1 quarter units, Aut quarter schedule (Brest, P)*

LAW 336. International Jurisprudence—Ideas underpinning modern international law such as sovereignty, self-determination, legitimate war, humanitarian intervention, economic aid, and human rights; the influence of industrialization, postcolonialism, and globalization. Current issues such as the globalization of trade, human trafficking and child labor, Darfur and Kosovo, the U.S. invasions of Afghanistan and Iraq, the international organizations such as the International Criminal Court and the World Trade Organization. Writers such as Grotius, Hobbes, Kant, Marx, Rawls, Hart, Sen, and Okin.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Stacy, H)

LAW 338. Land Use—Pragmatic rather than theoretical aspects of contemporary land use law and policy. Nuisance as a land use tool and foundation for modern land use law; use and abuse of the police power and the legal basis for land use control; zoning flexibility; vested property rights, development agreements, and takings; redevelopment; growth control; and direct democracy. How land use decisions affect environmental quality and how land use decision making addresses environmental impacts. Balancing legal, political, economic, and public interest considerations in land use advocacy and decision making.

3.4 semester or 5.1 quarter units, Aut quarter schedule
(Caldwell, M; Diamond, S)

LAW 342. Law and Development in India—Connections among law, legal institutions, and growth in India against disparities in growth. Institutions and their role in economic growth, including general and specialized courts, general bureaucracy, and specialized regulatory authorities. Intellectual property, information technology, and services outsourcing; labor entry and exit; capital markets and bankruptcy; and business and infrastructure development. Federalism and the Indian legal system. Challenges in conducting empirical research on legal systems. Case studies and working papers in conjunction with an ongoing rule of law research project.

2.5 semester or 3.75 quarter units, Win quarter schedule
(Heller, T; Jensen, E)

---

*See respective department course listings for unit values of crosslisted offerings.

LAW 343. Scientific Evidence and Expert Testimony: Patent Litigation—How to explain science to judge and jury; how litigators determine which legal issues to argue. Patent and expert testimony law. Student teams choose patents for final simulation projects, prepare claim charts, devise a design-around, and present oral arguments or summaries of expert declarations for a Markman claim construction hearing.
3 semester or 4.5 quarter units, Aut semester schedule (Morris, R)

LAW 351. International Development—How do political institutions determine economic policy choices; how do economic structures affect political processes? Micro- and macro-level political and economic processes shaping prospects for development. Case studies illustrate how markets function, why inefficient institutions survive, and why governments can adopt policies detrimental to development. Topics include: political economy of corruption; role of foreign aid; efficacy of governance reforms; and relationship between democracy and development.
2.5 semester or 3.75 quarter units, Aut quarter schedule (Singh, S)

LAW 357. Current Issues in International Economics Law and Policy—(Same as ECON 164.) Legal architecture of the World Trade Organization system; questions about its design and wisdom. Economics and politics of international cooperation on trade. The WTO as an institution and its core obligations. Topics may include: choice between regional and global approaches to trade cooperation; interface between international trade obligations and domestic regulation of health, safety, and environment; regulation of subsidies; design and operation of dispute settlement system; and special and differential treatment of developing countries. Prerequisite: ECON 51 or equivalent.
1.7 semester or 2.55 quarter units, Win quarter schedule*
(Sykes, A; Staiger, R)

LAW 364. Law, Litigation, and Educational Policy—(Same as EDUC 326.) Restricted to Education and Law students. Interplay among educational law and policy, administrative decision making, and practice. Issues include the relationship between schooling and the state, nature and scope of students' substantive and procedural rights inside the schoolhouse, and how law and litigation have advanced or stymied the goal of equality of educational opportunity.
2.66 semester or 3.99 quarter units, Aut quarter schedule (Koski, W)*

LAW 365. Minority Rights in Israel—Seminar. Comparative context of minority rights in divided Western democracies such as N. Ireland and Canada. Topics such as: status of the Arabic language in Israel; right to vote and be elected; allocation of state funds to minority projects and municipalities; representation in decision making institutions; land allocation and land rights; economic subsidy schemes such as for housing; military service; and the Arab educational system. The status of the Bedouin community under Israeli law.
2 semester or 3 quarter units, Win semester schedule (Holzman-Gazit, Y)

LAW 366. Principles of Research Design and Analysis: Tools—(Same as PUBLPOL 203B, IPS 205B.) Policy analysis tools for government, research institutes, and academic settings, and for empirical issues in litigation, investment banking, consulting, and finance. Multiple regression analysis, multilevel modeling, and Bayesian analysis. Topics include hypothesis testing, regression specification, logistic regression, probit, heteroscedasticity, serial correlation, errors in the variables, instrumental variables, simultaneous equations, generalized linear models, simulation, model checking, causal inference, and missing data imputation. Hands-on analysis using popular statistical packages.
3 semester or 4.5 quarter units, Win quarter schedule (Strnad, J)

LAW 367. Principles of Research Design and Analysis: Advanced Mathematical and Computational Methods—Adjunct to 366 for students who wish to work at a deeper mathematical level. Corequisite: 366.
1 semester or 1.5 quarter units, Win quarter schedule (Strnad, J)

LAW 368. Law and the Biosciences—(Same as HRP 211.) For medical students; graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in the biosciences. Focus is on human genetics; also advances in assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement.
2 semester or 3 quarter units, Win semester schedule (Greely, H)*

LAW 407. International Deal Making—Open to Law, GSB, and graduate students. The application of legal and business knowledge to real world international transactions. Deal structuring, identifying and resolving legal and business concerns, negotiations, documentation, and deal closing. Case studies. Legal issues that arise in cross-border transactions. How to read the documents which describe a business transaction. The role of a legal adviser. Students strategize, structure, and negotiate real world, substantive, international business deals. Prerequisite: consent of instructor.
1.7 semester or 2.55 quarter units, Aut quarter schedule (Franklin, L)

LAW 409. Introduction to Intelletual Property—For non-specialists and first-year Law students. Patents, copyrights, trademarks, and trade secrets. Commonalities and differences among systems of intellectual property protection.
3.4 semester or 5.1 quarter units, Win quarter schedule (Lemley, M)

LAW 414. Corruption, Governance, and the International System—Research workshop. International efforts to improve the quality of governance, reduce corruption, and foster the rule of law. Effects and capacities on behavior and institutions in domestic systems of programs such as the Millennium Challenge Account, Extractive Industries Transparency Initiative, and World Bank Rule of Law Assistance Funding. Impacts of such programs on incentives for economic growth and democratic forms of national governance. Research design.
2.5 semester or 3.75 quarter units, Win quarter schedule
(Heller, T; Krasner, S)

LAW 428. Local Initiatives—Two-part, year-long research. Local policy and rights initiatives and problems that may give rise to innovative problem solving that influences broader policy. Local government law, sociological case studies, and political theory. Students work individually on a local initiative in a specific town or city. Library and field research; refining research agendas; and performing research on campus and in the field including local archives and interviews. Final reports of publishable quality. Enrollment limited to 10. May be repeated once for credit. Prerequisite: application including research proposal.
2 semester or 3 quarter units, Aut, Win semester schedule (Ford, R)

LAW 429. Corporate Fraud—Open to Law, GSB, and graduate students. Real world issues in civil and criminal corporate fraud. Focus is on case studies: Enron and Homestore.com. Attention to other corporate frauds such as WorldCom and AOL Time Warner. Stock options backdating; the implementation of Sarbanes Oxley; the Thompson and McNulty memoranda and attorney-client and work-product waiver issues; pretexting; and the KPMG tax scheme. Guest lecturers. Students teams present results of their independent investigation of a major corporate fraud to a hypothetical Board of Directors. Research paper. Prerequisite: consent of instructor.
2.5 semester or 3.75 quarter units, Aut quarter schedule (Fairbank, R)

LAW 431. Luck, Law, and Morality—(Same as POLISCI 436R.) The role of luck in moral and political theory and the law. Possible topics include: luck in legal liability and punishment (strict liability, attempts, risk regulation versus harm regulation); the possibility that rightness of conduct or worth of character might depend on luck; whether the point of egalitarianism is to correct for the impact of luck on fate; and whether there is anything left to the person after the impact of luck on life. Readings include Rawls, Williams, Nussbaum, Dworkin, Roemer, Cohen, Nagel, Hart, and Waldron. Prerequisite: graduate standing.
3 semester or 4.5 quarter units, Win quarter schedule*
(Cohen, J; Fried, B)

LAW 458. FDA's Regulation of Health Care—(Same as HRP 209.) Open to law or medical students; graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.
2.5 semester or 3.75 quarter units, Win quarter schedule (Greely, H)*

---

*See respective department course listings for unit values of crosslisted offerings.

LAW 467. Quantitative Methods: Finance—The time value of money. Present and future value analysis; discounting; net present value; IRR; bond valuations; and a critique of other project valuation methods. Diversification, the risk-return trade-off, portfolio performance measurement, and market efficiency. Arbitrage and tax considerations. Emphasis is on applications in legal settings.

1.7 semester or 2.55 quarter units, Win quarter schedule (Siciliano, F)

LAW 501. Modern Traditions I—(Same as MTL 334A.) The development over the modern period of ideas about state regulatory power and legal rationality; recent critiques of those ideas. Focus is on justice, legal interpretation, individual agency and moral choice, equality, punishment, legislation, the nation state, and international society. Readings from Sophocles, Grotius, Kant, Rousseau, Hegel, Montesquieu, Wollstonecraft, Austin, Bentham, Marx, Weber, Arendt, Foucault, Said, Spivak, Butler, Habermas, MacKinnon, Rose, and Kennedy.

3.33 semester or 4.99 quarter units, Aut quarter schedule (Stacy, H)*

LAW 514. The California Coast: Science, Policy, and Law—(Same as CEE 175A/275A, EARTHSYS 175/275.) Interdisciplinary. Legal, science, and policy dimensions of managing California's coastal resources. Coastal land use and marine resource decision making. Physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and institutional framework shaping public and private decision making. How experts from different disciplines work to resolve coastal policy questions.

3.4 semester or 5.1 quarter units, Win quarter schedule (Caldwell, M; Boehm, A; Sivas, D)*

LAW 538. Sociology of Law—(Same as SOC 136/236.) Historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; law in action versus law on the books; organizational responses to law in the context of labor and employment; roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Dauber, M)*

LAW 539. Law and Policy of the European Union—From the 1951 European Coal and Steel Community (ECSC) to the crafting of a constitution. Nature and sources of EU law; single market and supranational judicial system; community powers; legislation and adjudication; goods, services, capital, and workers; corporate and competition policy; and human rights law. The EU as a foreign policy actor; U.S.-EU trade and antitrust issues; regulatory requirements for American business; and U.S.-EU cooperation in defense, development, and promoting the rule of law.

3 semester or 4.5 quarter units, Win quarter schedule (Morningstar, R; Magen, A)*

LAW 549. Chinese Legal System—Legal institutions, major areas of substantive and procedural law, and the gap between law on the books and in action. Topics include the World Trade Organization, the Communist Party's recognition of private property, and reforms of financial system and human rights protection mechanisms.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Gechlik, M)

LAW 577. Regulation of Political Process—Restrictions on the franchise. Constitutional and statutory constraints on apportionment under the equal protection clause emphasizing: one person, one vote; political gerrymandering; the Voting Rights Act; and judicial remedies for elections gone bad. Topics may include regulation of political parties and direct democracy.

2 semester or 3 quarter units, Aut quarter schedule (Karlan, P)

LAW 581. Workshop in Sociology of Law—(Same as SOC 338.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. The relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

.66-3.33 semester or 1-5 quarter units, Win quarter schedule (Dauber, M; Friedman, L; Sandefur, R)*

LAW 586. Classical Islamic Law—(Same as RELIGST 201/301.) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts.

3.33 semester or 4.99 quarter units, Win quarter schedule (Sadeki, B)*

LAW 604. Environmental Law Workshop: Water Policy—Current research. Guest academics, practitioners, and policy. Students lead discussions. May be repeated for credit.

2.5 semester or 3.75 quarter units, Win quarter schedule (Caldwell, M)

LAW 605. International Environmental Law: Climate Change—Legal, scientific, political, economic, and organizational issues. Climate change, emphasizing current regimes and post-Kyoto negotiations. The Montreal Protocol for Ozone Depleting Substances, International Convention for Regulation of Whaling, and U.N. Convention on Straddling Fish Stocks and Highly Migratory Fish Stocks. Interactions among law, science, and economics in shaping choice of treaty instrument and implementation of environmental regimes. Environmental markets as solutions to global commons problems. Sustainable development, common heritage of mankind, and common but differentiated responsibilities of nations.

2.5 semester or 3.75 quarter units, Aut quarter schedule (Wara, M)

LAW 608. Environmental Science for Managers and Policy Makers—(Same as IPER 335, OIT 338.) Core course for joint J.D. or M.B.A. and M.S. in Environment and Resources. How to apply scientific understanding to business operations, strategy, and the design of market-based environmental policy. Fundamentals of earth systems and environmental science. Spreadsheet modeling, optimization, and Monte Carlo simulation.

2.66 semester or 3.99 quarter units, Win quarter schedule (Plambeck, E; Caldwell, M; Palumbi, S; Daily, G; Kennedy, D; Field, C; Masters, G)*

LAW 611. International Conflict Resolution Colloquium—(Same as POLISCI 403, PSYCH 283.) Interdisciplinary. Theoretical insights and practical experience in managing and resolving inter-group and international conflicts. Personal, strategic, and structural barriers that can impede the achievement of efficient solutions to conflicts. Sources include social psychology, political science, game theory, and international law. Themes derived from faculty affiliation and research with the Stanford Center of International Conflict and Negotiation (SCICN).

1 semester or 1.5 quarter units, Win quarter schedule (Weiner, A)*

LAW 615-01. Negotiation—Representation, ethics, and the place of negotiation in our legal system. Role play. Enrollment limited to 20.

3 semester or 4.5 quarter units, Win quarter schedule (Dickstein, M)

LAW 615-02. Negotiation—Representation, ethics, and the place of negotiation in our legal system. Role play. Enrollment limited to 20.

4 semester or 6 quarter units, Win semester schedule (Martinez, J)

LAW 628. Interpersonal Influence and Leadership—(Same as GSB-GEN 374.) Open to Law, GSB, and graduate students. How to build working relationships; foundational skills of face-to-face leadership. Factors that increase or decrease influence and the ability to work effectively with others. How to work through difficult issues; feedback; and group work. Learning from experience; leading organizations through a changing environment. Prerequisite: consent of instructor.

3.4 semester or 5.1 quarter units, Win quarter schedule (Bristol, S)

LAW 656. International Conflict: Management and Resolution—(Same as IPS 250, POLISCI 210R.) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN).

1.5 semester or 2.25 quarter units, Win quarter schedule (Holloway, D; Weiner, A)*

---

*See respective department course listings for unit values of crosslisted offerings.

SCHOOL OF MEDICINE

Dean: Philip Pizzo
Senior Associate Dean for Graduate Education and Postdoctoral Affairs: John Pringle
Senior Associate Dean for Medical Student Education: Charles Prober

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

UNDERGRADUATE PROGRAMS

At the undergraduate level, a number of the school's courses are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. In the classroom, the school offers courses targeted to undergraduates as well as graduate-level courses where advanced undergraduates with a strong background in the life sciences are welcome. Among these offerings are many Stanford Introductory Seminars for freshmen and sophomores; interested students are encouraged to peruse the complete list of these offerings in the "Stanford Introductory Seminars" section of this bulletin or at http://www.stanford.edu/group/introsems/.

GRADUATE PROGRAMS

M.S. AND PH.D. PROGRAMS

The School of Medicine is home to graduate programs covering a broad range of disciplines within biomedicine leading to Ph.D. or M.S. degrees. These programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to bioscience. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biological Sciences and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at http://med.stanford.edu/ms/ and http://med.stanford.edu/phd/. Application information may be obtained from Graduate Admissions, Office of the University Registrar, Stanford University, 630 Serra Street, Suite 120, Stanford, CA 94305-6032, or at http://gradadmissions.stanford.edu/.

M.D. PROGRAM

The School of Medicine seeks to attract students who are passionate about scholarship and wish to improve the health of the world's people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H. or Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as early as May of the second year. A population health course combines classroom and experiential learning to provide understanding of the socioeconomic determinants of the health of patients and communities.

Scholarly concentrations offer opportunities for developing skills that enhance basic science and clinical training, fostering opportunities for research and innovation in areas such as bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health, health services and policy research, and the molecular basis of medicine. Study in a scholarly concentration typically includes course work and research activities. There are structured opportunities to link scholarly concentration study with programs in clinical areas housed within centers at Stanford such as the Comprehensive Cancer Center, the Cardiovascular Institute, the Neuroscience Institute, the Institute of Immunity, Transplantation, and Infection, and Women's Health at Stanford. Traveling scholars projects may also be conducted overseas.

Students with interests in medical research as a career are encouraged to investigate opportunities available through the Medical Scientist Training Program (MSTP). Stanford also collaborates with the University of California, Berkeley, to offer students opportunities for M.D./M.P.H. training. Details about these programs may be found at http://med.stanford.edu/combined_degree/.

Stanford is committed to representing the diversity of the U.S. and California populations by seeking a diverse body of students who are interested in the intellectual substance of medicine and committed to advancing the field of health care, broadly defined. Provided an applicant to the school has completed basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in advanced biology such as biochemistry, molecular biology, or genetics and the behavioral sciences is recommended because of their importance in understanding health care. Breadth of interests and depth of experiences play an important role in the selection of students from among those applicants having superior academic records.

The M.D. degree requires 13 quarters of full tuition; the joint M.D./Ph.D. degree requires 16 quarters. All additional quarters are charged at the reduced Terminal Medical Registration (TMR) tuition rate, which is $2,081 per quarter in 2007-08. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame. For further details on the M.D. degree, including admission requirements, see http://med.stanford.edu/md/.

MULTIPLE-DEGREE PROGRAMS

MEDICAL SCIENTIST TRAINING PROGRAM

The Medical Science Training Program (MSTP) provides medical students with an opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. It is designed to equip students for careers in academic investigative medicine, and emphasizes individualization of curricular and research programs for each trainee. Training for a combined M.D./Ph.D. should include the same content encountered by students who pursue each degree separately, but the total training time should be less than the sum of the time normally required for each degree. The flexible curriculum at Stanford University School of Medicine allows each student, in consultation with a preceptor and other advisers, to pursue a plan of study that satisfies the requirements for the M.D. degree and allows performance of doctoral-level research leading to the Ph.D. Students interested in joining the MSTP are considered for admission at the time of their application to the School of Medicine M.D. program and are asked to provide supplemental information relevant to their research background. Current Stanford M.D. students may also apply for admission to the MSTP. Further information regarding admission may be obtained from the MSTP administrator; details about the MSTP may be found at http://mstp.stanford.edu.

MASTER OF SCIENCE IN MEDICINE PROGRAM

The Master of Science in Medicine program admits Ph.D. students who have a commitment to translational research, but are not interested in becoming clinicians. The goal of the program is to train researchers in human biology and disease so they are more able to translate new scientific discoveries into useful medical advances. Students offered admission into any Ph.D. program at Stanford may apply for admission to the master's program. During their first five quarters, students take basic biomedical science courses with Stanford M.D. students. The School of Medicine M.D. curriculum is presented in a succinct format that allows time for students to concurrently complete their Ph.D. course requirements and lab rotations. By early in their second year, students choose a lab for their Ph.D. thesis research and complete their medical course work. They also elect a clinical mentor to discuss translational research needs and help to arrange a short clinical experience. Upon completion of the Ph.D., participating students receive an M.S. in Medicine. Details about the program can be found at http://msm.stanford.edu.

COURSES

The following courses are open to undergraduates or graduate students. Additional courses may also be available; see http://www.med.stanford.edu/education/ for more information.

STANFORD INTRODUCTORY SEMINARS

MED 70Q. Cancer and the Immune System—Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions. Write-2

3 units, Spr (Negrin, R)

MED 86Q. Seeing the Heart—Stanford Introductory Seminar. Preference to sophomores. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a cost-effective public screening program. Field trips to Stanford Medical Center imaging centers.

1-2 units, Win (McConnell, M)

MED 87Q. Women and Aging—(Same as HUMBIO 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

MED 88Q. Dilemmas in Current Medical Practice—Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Optional observation of instructors in their medical practices.

3 units, Aut (Croke, J; Jones, H)

MED 108Q. Human Rights and Health—Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. Topics such as: the health status of refugees and internally displaced persons; child labor; trafficking in women and children; torture; poverty, the environment, and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. International conventions on human rights as background for social and political changes that could improve the health of groups and individuals. Optional opportunities to observe at sites where human rights and health are issues.

3 units, Win (Laws, A)

MED 120Q. Pathophysiology of Diseases of the Heart and Blood Vessels—Stanford Introductory Seminar. Preference to sophomores. Anatomic, physiologic, and pathologic states that comprise cardiovascular medicine. Anatomy and physiology of the heart and blood vessels as an introduction to pathologic states such as heart attack, stroke, congestive heart failure, rhythm disturbances of the heart, and sudden cardiac death. Underlying principles of diagnosis and treatment of the disease.

3 units, Spr (Stertzer, S)

UNDERGRADUATE AND GRADUATE

INDE 183I/283I. Early Clinical Experience in International Family and Community Medicine—(Graduate students register for 283I.) For preclinical medical students; undergraduates by special arrangement. Interactive early clinical experience with physicians, community leaders, health care workers, and patients in Mexico, India, China, or Tibet. Emphasis is on community health from local and global perspectives. Social, political, historical, and economic backgrounds of the country and local region. Non-western attitudes, beliefs and practices regarding health care, including herbal and other complementary medicine; local institutions and infrastructure including schools, social services, and the public health care system; and policies that impact health and the provision of care. Prerequisites: conversational Spanish for Mexico; for medical students, completion of first year; for undergraduates, junior standing or higher. Undergraduates apply through International Alliance in Service and Education (IASE) for Mexico; Volunteers in Asia (VIA) for Asian sites. Medical students apply through the Center for Education in Family and Community Medicine.

6-12 units, Aut, Win, Spr, Sum (LeBaron, S)

INDE 199. Undergraduate Directed Reading and Research in Family and Community Medicine—Interested students should contact the Center for Education in Family and Community Medicine administration. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

INDE 244. Ethnicity and Medicine—Weekly lecture series introduces basic information about ethnic and cultural factors that impact patient care. Presents information about culturally sensitive health care services and addresses contemporary research issues involving minority and underserved populations. Topics include health care issues and indigenous medical practices of African Americans, Asians, Latinos, Native Americans, immigrants and refugees in both urban and rural settings. One unit for weekly lectures only; two units require additional discussions facilitated by course director; three units (non-medical graduate students and undergraduates) require weekly response papers and a research paper.

1-3 units, Spr (Garcia, R)

INDE 245. Women and Health Care—Lecture and seminar series. Topics of interest to women as health care consumers and providers. The historical role of women in health care; current and future changes.

1-2 units, Aut (Grudzen, M; LeBaron, S; Massion, C)

INDE 247. The Theater of Illness—The immediacy of disease and illness through descriptions of the human condition by playwright and actor. Mental illness, infectious disease, high technology, and end-of-life issues through plays and films from *King Lear* to *Angels in America*.

2 units, Spr (Zaroff, L)

INDE 253. Rural Health with a Global Perspective—Health status of the population, availability of health services and institutions, personal and environmental factors affecting health and medical care, and present and future models for change. Three-day field trip to San Joaquin Valley and mountain sites.

3-5 units, Spr (LeBaron, S; Jones, E)

INDE 256. Current Controversies in Women's Health—(Same as HUMBIO 125.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; sex and gender differences; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Jacobson, M; Stefanick, M)

MED 147/247. Methods in Community Assessment, Evaluation, and Research—(Graduate students register for 247.) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different

study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.
3 units, Win (Fortmann, S; Kiernan, M)

MED 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MED 207. History of Medicine—The development of Western medical tradition from Babylonian, Egyptian, and Greek cultures to the present.
1 unit, Win (Camargo, C)

MED 217. Technological Frontiers in Digestive Diseases—For engineering, bioengineering, and physical sciences students. Topics include: endoscopes to detect and remove cancer; minimally invasive surgery to treat obesity; measurements of propulsion through the intestine; and technologies to detect and stop internal bleeding. Observations in the clinical setting; visits to laboratories engaged in the development of new technologies. Technologies used in the clinical setting. 1 unit for lecture and observation only; 2-3 units for design and production of a medical device using Stanford's Product Realization Laboratory.
1-3 units, Spr (Lowe, A; Milroy, C)

MED 228. Physicians and Social Responsibility—Social and political context of the roles of physicians and health professionals' role in social change; policy, advocacy, and shaping public attitudes. How physicians have influenced governmental policy on nuclear arms proliferation; environmental health concerns; domestic violence; health and human rights; physicians in government; activism through research; the effects of poverty on health; and gun violence.
1 unit, Aut (Laws, A)

MED 230. Rethinking International Health—Issues and players that shape international health today. A road map for thoughtful, responsible action. Topics include: the role of the physician and health care worker; health as a human right; successful interventions; children's and women's health; issues in immunization; economic development; and NGOs. Online interviews with influential leaders in international health.
2-3 units, Win (Wise, P)

MED 236. Psychosocial and Behavioral Health Interventions—For medical students, graduate students and undergraduates with senior standing in Human Biology or Psychology. Contemporary theory and conceptual frameworks for psychosocial and behavioral change interventions as applied in the context of contemporary models of community medicine. The trans-theoretical model of behavioral change, contemporary behavioral, cognitive behavioral, social cognitive and acceptance-based models of behavioral change. Current models of emotion regulation, goal setting and attainment, and the impact of personality and characterological features on behavior and behavioral change. Application of theory in practicum based community clinic settings. Prerequisite: Stanford HIPAA training.
1 unit, not given this year

MED 242. Physicians and Human Rights—How human rights violations affect health. Topics include torture, domestic violence, regional conflict and health, sweat shops, rape, and war. Guest speakers.
1 unit, Win (Laws, A)

MED 249. Medical Interpreting in Community Clinics—Open to medical students, graduate and undergraduate students. Practical training to serve as a medical interpreter in the Arbor or Pacific Free Clinics, or in other area community health centers. Students must be bilingual. This is not language instruction, but instruction and discussion about the unique role of the medical interpreter in a community-based health care setting, required training in patient privacy, and skill-building. Unit credit also given for service hours in area clinics.
1-2 units, Aut, Win, Spr, Sum (Osterberg, L)

MED 254. Applied Skill-Building in Clinical and Community-Based Research—Skill-building via detailed individualized feedback from instructor on all aspects of research projects. Topics include: grant proposal preparation; study design; field implementation; data entry, analysis and interpretation; and conference abstract/manuscript preparation.
1-6 units, Aut, Win, Spr, Sum (Kiernan, M; Fortmann, S)

MED 255. The Responsible Conduct of Research—Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.
1 unit, Aut, Win, Spr (Karkazis, K)

MED 256. Global HIV/AIDS—(Same as HUMBIO 156.) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures.
3 units, Aut (Katzenstein, D)

MED 257A,B,C. Patient Advocacy in Community Clinics—Early clinical experience for pre-medical and medical students. Structured training and shadowing in preparation for a clinical role working with patients in community health clinics; the context of the work, populations served, and social role of physicians. Regular shifts at one of the course-affiliated clinic sites throughout the academic year. 1-2 units for students attending class meetings and performing clinic shifts. 3-4 units for a year-long, clinic-based project. Prerequisite: application.
1-4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Garcia, G; Banchoff, A)*

MED 258. Advanced Patient Advocacy in Community Clinics—Continuation of 257A,B,C for second-year students in Patient Advocacy Program; open to students who have worked in a clinical capacity in a community clinic setting. Skills training in areas such as health education counseling and group facilitation. Regular shifts at partner clinics. Students partner with clinic staff in developing and carrying out a service-learning or research project designed to meet the clinic's needs. May be repeated for credit. Prerequisites: 257A,B,C or consent of instructor.
1-3 units, Aut, Win, Spr, Sum (Garcia, G; Banchoff, A)

MED 262. Economics of Health Improvement in Developing Countries—(Same as ECON 127, HUMBIO 121.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.
5 units, Win (Miller, N)

MED 272A. Biodesign Innovation: Needs Finding and Concept Creation—(Same as BIOE 374A, OIT 384, ME 374A.) Two quarter sequence. Strategies for interpreting clinical needs, researching literature, and searching patents. Clinical and scientific literature review, techniques of intellectual property analysis and feasibility, basic prototyping, and market assessment. Student entrepreneurial teams create, analyze, and screen medical technology ideas, and select projects for development.
3-4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

MED 272B. Biodesign Innovation: Concept Development and Implementation—(Same as BIOE 374B, OIT 385, ME 374B.) Two quarter sequence. Concept development and implementation. Early factors for success; how to prototype inventions and refine intellectual property. Lectures, guest medical pioneers, and entrepreneurs about strategic planning, ethical considerations, new venture management, and financing and licensing strategies. Cash requirements; regulatory (FDA), reimbursement, clinical, and legal strategies, and business or research plans.
3-4 units, Spr (Yock, P; Zenios, S; Milroy, J; Brinton, T)

MED 275. Introduction to Biopharmaceutical Innovation—Open to all students. Biotechnology and the pharmaceutical industry. Topics include the biopharmaceutical industry, historical trends, and experiences; research and development; intellectual property; drug approval: regulatory issues and agencies; business development; marketing; manufacturing; capital structure and financing; careers in biopharmaceutical industry. 3 units requires team project and final presentation. May be repeated for credit.
2-3 units, Win (Gardner, P)

MED 276. Careers in Medical Technology—Career tracks in biomedical technology for medical, life science, engineering, business, and law students. Guest industry professionals.
1 unit, Spr (Yock, P; Popp, R)

MED 279Y. Interdisciplinary Design for Agile Aging—(Same as CS 379Y, HUMBIO 131.) First of two quarter sequence; students may take 279Y without 279Z; offered by the d.school. Perspectives from computer science, design, social and behavioral sciences, physiology, geriatrics, and biodesign to develop projects that address the potential of people to maintain vitality and mobility as they age. New ways to integrate computer and device technologies with behavioral and social interventions. Focus is on small projects. Prerequisite: background in one of design, computing, medicine, behavioral sciences, communications, or business.
3-4 units, Win (Winograd, C; Winograd, T; Friedlander, A; Yock, P)

MED 279Z. Design Project for Agile Aging—(Same as CS 379Z.) Second of two quarter sequence; students may take 279Y without 279Z; offered by the d.school. Small teams develop projects that can have an impact in the world through products, programs, and practices that affect people's health on a broad scale. Technical interventions, social and contextual design, organizational contexts, and business and distribution issues. Limited enrollment. Prerequisites: 279Y, and master's level skills in one of design, computing, medicine, behavioral sciences, communications, or business.
3-4 units, Spr (Winograd, T; Winograd, C; Friedlander, A; Yock, P)

MED 289. Introduction to Bioengineering Research—(Same as BIOE 390.) Preference to medical and bioengineering graduate students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Topics include: imaging; molecular, cell, and tissue engineering; biomechanics; biomedical computation; biochemical engineering; biosensors; and medical devices. Limited enrollment.
1-2 units, Aut, Win (Taylor, C)

MED 299. Directed Reading in Medicine—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MED 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

NSUR 278A. From Science to Business: Innovation in Neurologic Disease Beyond Neurosurgery—For medical, business, and engineering students. The process of innovation and company building in the medical field, emphasizing the neurosciences. Overview of neurological diseases; business and regulatory aspects of device and biotech product development. Guest speakers on healthcare entrepreneurship. Venture capital and entrepreneurial mentors guide interdisciplinary student teams in evaluating a solution to an unmet clinical need or a project within a biotech company. May be taken for 2 units without the team project.
2-4 units, Win (Kallmeyer, V)

NSUR 279. Concepts in Drug Delivery and Drug Device Combinations—Open to all graduate students. Issues relating to drug-device combination products, including review of recently approved products such as cardiac stent), and development, regulatory, and reimbursement issues. Emphasis is on market evaluation, product development, and regulatory strategies. Lecture only for 2 units; project for 4 units.
2-4 units, (Kallmeyer, V) alternate years, not given this year

ORTHO 222. Anatomy of Movement—Perspectives include orthopedic surgery, neurology, mechanical engineering, computer science, anthropology, and art. Anatomy and pathology affecting the human locomotor system. Normal function and functional deficit from disease or injury. Engineering dilemmas that assist or emulate human movement, such as design of an artificial joint or simulation of tendon transfers for nerve palsy. The expression of human movement in art masterpieces and photography. The evolution of the hand as it became an instrument of purpose. Student team projects. Lecture only for 2 units; project for 4 units.
2-4 units, Win (Ladd, A; Rose, J)

ORTHO 260. Tissue Engineering—Biological principles underlying the use of engineering strategies and biocompatible materials for tissue repair and regeneration. Structure, physiology, and mechanics of articular cartilage, bone, and dense soft connective tissues. Current ideas, approaches, and applications being implemented as therapeutic regimens for arthritis, spinal deformities, and limb salvage. Multidisciplinary constraints on the design and creation of tissue constructs. Prerequisite: familiarity with basic cell and molecular mechanisms underlying tissue differentiation.
3 units, Win (Smith,R)

PEDS 105/215. Health Promotion and the Campus Culture—Multidisciplinary perspectives of public health and health psychology. The prevalence of health risk behaviors on the contemporary college campus and the challenges of risk reduction. Students apply theoretical frameworks to peer health promotion campus projects. Limited enrollment. Prerequisite: consent of instructor following first meeting.
4 units, Win, Spr (Friedman, I; Pertofsky, C)

PEDS 216. Alcohol Issues and the Campus Culture—Multidisciplinary perspectives of public health, health psychology, and sociology. The prevalence and scope of alcohol-related problems; challenges of risk reduction and intervention strategies. Students apply theoretical frameworks to alcohol-related research topics and projects. Limited enrollment. Prerequisite: consent of instructor following first meeting.
4 units, Win (Castro, R)

PSYC 135/235. Sleep and Dreams—Current research on how sleep affects our daily lives. Physiology of non-REM and REM sleep, dreams and dreaming, content, psychophysiological cause, lucid dreaming, sleep need, sleep debt, daytime alertness, and performance; biological clock and circadian rhythms; sleep disorders, insomnia, narcolepsy, sleep apnea, sleepwalking, jet lag, sleeping pills, sleep and mental illness, sleep and memory, and the impact of sleep deprivation and sleep disorders on academic and social life. Multimedia presentations, guest lectures, and projects.
3 units, Win (Dement, W)

PSYC 230. Freud, Human Behavior, and Medical Care—Seminar; applicable to all human behavior disciplines. The role of the unconscious in mental and physical functioning. Freudian psychology on mental functioning and its effect on the body and group behaviors. Topics include Freud's model of the mind, dreams, neurosis and psychosis, psychosomatic illness, eating disorders and addiction, and treatment options.
2 units, Win (Fisk, S)

BIOCHEMISTRY

Emeriti: (Professors) Robert L. Baldwin, Paul Berg, David S. Hogness, Arthur Kornberg, A. Dale Kaiser, I. Robert Lehman
Chair: Mark A. Krasnow
Professors: Patrick O. Brown, Douglas L. Brutlag, Gilbert Chu, Ronald W. Davis, James E. Ferrell, Jr., Daniel Herschlag, Mark A. Krasnow, Suzanne R. Pfeffer, James A. Spudich
Associate Professors: Pehr A. B. Harbury, Julie A. Theriot
Assistant Professor: Aaron F. Straight
Courtesy Professors: Chaitan S. Khosla, Sharon Long

Department Offices: Beckman Center, B400
Mail Code: 94305-5307
Phone: (650) 723-6161
Web Site: http://biochemistry.stanford.edu/

Courses given in Biochemistry have the subject code BIOC. For a complete list of subject codes, see Appendix.

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduate, graduate, and medical school students.

Advanced courses offered in more specialized areas emphasize recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, utilizing the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research utilizes a variety of organisms, from bacteria to animal cells.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

Requirements for the M.S. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas among the 135 total units required for the Ph.D. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of two research proposals which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs, and a journal club presentation. All Ph.D. students are expected to participate actively in the department's seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and analytical, organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December 12.

Applications should be submitted at http://gradadmissions.stanford.edu/. Applicants are notified by March 24 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants are encouraged to submit scores from the GRE Subject Test in either biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid. Applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.

Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatics/protein structure design, and the application of microarrays to problems in human health and disease.

COURSES

BIOC 118Q. Genomics and Medicine—Stanford Introductory Seminar. Preference to sophomores. Knowledge gained from sequencing human, bacterial, and viral genomes and implications for medicine and biomedical research. Novel diagnoses (chips, SNPs and gene expression) and treatment of diseases including gene therapy, stem cell therapy, and rational drug design. Ethical implications of stem cell therapy and uses of genetic information. Use of genome and disease databases to determine gene function in disease, diagnosis, and potential treatments. See http://biochem118.stanford.edu/. GER:DB-EngrAppSci
3 units, Spr (Brutlag, D)

BIOC 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 201. Advanced Molecular Biology—Literature-based lectures and discussion on rapidly developing frontiers in chromosome structure and function and modern insights into the control of gene expression. Emphasis is on experimental approaches and insights. Topics include chromosome organization, novel modes of transcriptional control, RNA-based mechanisms for controlling gene expression and emerging translational regulatory mechanisms. Prerequisite: undergraduate molecular biology.
5 units, not given this year

BIOC 202. Metabolic Biochemistry: Structure, Metabolism, and Energetics—(Review course for medical students only). Structure and function of biological molecules, enzyme kinetics and mechanisms, bioenergetics, pathways of intermediary metabolism and their control, and membrane structure and function. Course offered via online lectures and problem sets, with weekly small-group review sessions.
1-3 units, Aut (Brutlag, D)

BIOC 205. Molecular Foundations of Medicine—Topics include: DNA structure, replication, repair, and recombination; chromosome structure and function; gene expression including mechanisms for regulating transcription and translation; and methods for manipulating DNA, RNA, and proteins. Patient presentations illustrate how molecular biology affects the practice of medicine.
3 units, Aut (Brown, P; Chu, G; Krasnow, M)

BIOC 210. Advanced Topics in Membrane Trafficking—The structure, function, and biosynthesis of cellular membranes and organelles. Current literature. Prerequisite: consent of instructor.

3 units, Spr (Pfeffer, S)

BIOC 215. Frontiers in Biological Research—(Same as DBIO 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, P; Brunet, A; Villeneuve, A)

BIOC 218. Computational Molecular Biology—(Same as BIOMEDIN 231.) Via Internet. For molecular biologists and computer scientists. Representation and analysis of genomes, sequences, and proteins. Strengths and limitations of existing methods. Course work performed on web or using downloadable applications. See http://biochem218.stanford.edu/. Prerequisites: introductory molecular biology course at level of BIOSCI 41 or consent of instructor.

3 units, Aut, Win, Spr (Brutlag, D)

BIOC 220. Chemistry of Biological Processes—(Same as CSB 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

4 units, Aut (Herschlag, D; Chen, J; Bogyo, M; Wandless, T)

BIOC 221. The Teaching of Biochemistry—Required for teaching assistants in Biochemistry. Practical experience in teaching on a one-to-one basis, and problem set design and analysis. Familiarization with current lecture and text materials; evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor.

3 units,Aut, Win, Spr, Sum (Staff)

BIOC 224. Cell Biology of Physiological Processes—(Same as BIOSCI 214.) For Ph.D. students. Current research on cell structure, function, and dynamics. Topics include complex cell phenomena such as cell division, apoptosis, compartmentalization, transport and trafficking, motility and adhesion, differentiation, and multicellularity. Current papers from the primary literature. Prerequisite for advanced undergraduates: BIOSCI 129A,B, and consent of instructor.

2-5 units, Win (Theriot, J; Nelson, W; Straight, A; Bogyo, M; Pfeffer, S)

BIOC 225. Interdisciplinary Approaches to Cell Biology: the Role of the Cytoskeleton—The molecular basis of energy transduction leading to movements generated by microfilament-based and microtubule-based motors. Forms of myosin, dynein, and kinesin and their roles in the cell as a model for understanding the structural, biochemical, and functional properties of biological machines. Topics: structure of the molecular motors and their accessory proteins; regulation of the function of motile assemblies; functions of molecular motors in cells; spatial and temporal controls on the formation of motile assemblies in cells. Experimental approaches: genetic analysis, DNA cloning and expression, reconstitution of functional assemblies from purified proteins, x-ray diffraction, three-dimensional reconstruction of electron microscope images, spectroscopic methods, high-resolution light microscopy, and computational approaches. Prerequisites: basic biochemistry and cell biology.

3 units, Spr (Spudich, J)

BIOC 228. Computational Genomic Biology—Application of computational genomics methods to biological problems. Topics include: assembly of genomic sequences; genome databases; comparative genomics; gene discovery; gene expression analyses including gene clustering by expression, transcription factor binding site discovery, metabolic pathway discovery, functional genomics, and gene and genome ontologies; and medical diagnostics using SNPs and gene expression. Recent papers from the literature and hands-on use of the methods. Prerequisites: introductory course in computational molecular biology or genomics such as BIOC 218 or GENE 211. Via Internet in Winter and Spring.

3 units, Aut, Win, Spr (Brutlag, D)

BIOC 230. Molecular Interventions in Human Disease—For M.D. students who intend to declare a concentration in molecular basis of medicine, MSTP students, and Ph.D. students. Advanced medical biochemistry focusing on cases where molecular-level research has led to new medical treatments or changes in the understanding of important diseases. Different topics each week explore the underlying molecular basis of a variety of diseases and the reasons for success and failure in molecular approaches to treatment. Student-led discussions dissect papers from the primary medical and scientific research literature.

2-3 units, Aut (Theriot, J; Harbury, P)

BIOC 238. Computational Proteomic Biology—Application of computational protein analysis to biological problems. Topics include: protein sequence analysis and comparison including protein sequence databases, amino acid composition, protein alignment, protein motifs, protein families, and probabilistic models of families; protein structure including structure comparison and superposition methods, structural motifs, and structure and domain databases; protein structure prediction including secondary structure, homology modeling, threading, and ab initio structure prediction; protein-protein interaction databases and protein-protein interaction prediction; and protein-DNA interaction motifs and protein-ligand docking. Prerequisite: BIOC 218 or SBIO/BIOPHYS 228. Via Internet in Spring.

3 units, Win, Spr (Brutlag, D)

BIOC 241. Biological Macromolecules—(Same as BIOPHYS 241, SBIO 241.) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.

3-5 units, Aut (Herschlag, D; Puglisi, J; Garcia, K; Ferrell, J; Block, S; Pande, V; Weis, W; Harbury, P)

BIOC 257. Currents in Biochemistry—Seminars by Biochemistry faculty on their ongoing research. Background, current advances and retreats, general significance, and tactical and strategic research directions.

1 unit, Aut (Spudich, J)

BIOC 299. Directed Reading in Biochemistry—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 399. Graduate Research and Special Advanced Work—Investigations sponsored by individual faculty members.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 459. Frontiers in Interdisciplinary Biosciences—(Same as BIOE 459, BIOSCI 459, CHEMENG 459, CHEM 459, PSYCH 459. Students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut, Win , Spr (Robertson, C)

COGNATE COURSES

See respective department listings for course description. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CHEMENG 450. Advances in Biotechnology
3 units, Spr (Hwang, L; Swartz, J)

SBIO 242. Methods in Molecular Biophysics—(Same as BIOPHYS 242.)
3 units, alternate years, not given this year

CENTER FOR BIOMEDICAL ETHICS

Director: David C. Magnus
Director Emeritus: Thomas A. Raffin
Associate Director: Mildred K. Cho
Participating Faculty and Staff: Clarence H. Braddock, Julie A. Collier, LaVera M. Crawley, Maren Grainger-Monsen, Henry Greely, Agnieszka Jaworska, Katrina A. Karkazis, Sandra S. Lee, Jose R. Maldonado, Christopher T. Scott, Audrey Shafer, Sara L. Tobin, Lawrence I. Zaroff
Center Offices: 701 Welch Road, Building A, Suite 1105
Mail Code: 94304-5748
Phone: (650) 723-5760
Web Site: http://bioethics.stanford.edu/

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities to medical students. This program allows medical students to study in depth the ethical and humanistic dimensions of research and practice. Additional information on requirements for the scholarly concentration, and a comprehensive list of other related courses is available at http://bioethics.stanford.edu/education/bemh/.

COURSES

MEDICINE

INDE 212. The Human Condition: Medicine, Arts, and Humanities—The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performing arts, film, and literary genres such as poetry, fiction, and scholarly writing. For medical students in the Biomedical Ethics and Medical Humanities Scholarly Concentration; all students welcome.
2 units, Aut (Zaroff, L; Shafer, A)

INDE 226. History of Medicine Online—Topics include: ancient medicine, Egypt and Babylonia, ancient Greece and Rome, Europe in the Middle Ages and the Renaissance, 18th-century schools of thought, and technological medicine. Sources include Kleinman's core clinical functions, and text, pictures, hypertext links, and sound clips.
1 unit, Aut, Win, Spr, Sum (Shafer, A)

INDE 238. Current Concepts and Dilemmas in Genetic Testing—(Same as GENE 238.) Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. For M.D., biomedical graduate, and genetic counseling students.
2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

INDE 247. The Theater of Illness—The immediacy of disease and illness through descriptions of the human condition by playwright and actor. Mental illness, infectious disease, high technology, and end-of-life issues through plays and films from *King Lear* to *Angels in America*.
2 units, Spr (Zaroff, L)

MED 250A. Medical Ethics I—Required for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics, including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Values that arise in different situations and clinical encounters. Issues include: genetics and stem cell research, rationing, ethical issues in care at the end of life, organ transplantation issues.
2 units, Win (Magnus, D)

MED 250B. Medical Ethics II—The integration of ethical theory with applications of theory or conceptual issues in medicine, health care, and the life and social sciences. Topic varies by year. Possible topics include: ethical issues in stem cell research; death and dying; genetics and ethics; concepts of health and disease; the ethics of international research; and ethical implications of new reproductive technology.
2 units, Spr (Magnus, D)

MED 255. The Responsible Conduct of Research—Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.
1 unit, Aut, Win, Spr, Sum (Karkazis, K)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CASA 160/260. Race, Genetics, and Interpreting Difference
5 units, Aut (Lee, S)

HRP 209. FDA's Regulation of Health Care—(Same as LAW 458.)
3-4 units, Win (Greely, H)

HRP 210. Health Law and Policy I—(Same as LAW 313.)
3-4 units, Aut (Greely, H)

HRP 211. Law and the Biosciences—(Same as LAW 368.)
3 units, Win (Greely, H)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice
4 units, Aut (Zaroff, L)

HUMBIO 174. Foundations of Bioethics
3 units, Win (Magnus, D)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts
3 units, Aut (Zaroff, L)

HUMBIO 175S. Novels and Theater of Illness
4 units, Spr (Zaroff, L)

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.)
4 units, Win (Jaworska, A)

PHIL 170/270. Ethical Theory—(Same as ETHICSOC 170.)
4 units, Aut (Jaworska, A)

BIOMEDICAL INFORMATICS PROGRAM

Committee: Russ B. Altman *(Chair and Program Director)*; Mark A. Musen *(Co-Director)*; Betty Cheng, Lawrence M. Fagan *(Associate Directors)*; Atul Butte, Amar K. Das, Parvati Dev, Teri E. Klein, David Paik

Participating Faculty and Staff by Department:

Reserach opportunities are not limited to faculty and departments listed.

Anesthesia: David M. Gaba (Professor)

Biochemistry: Douglas L. Brutlag (Professor), Ron Davis (Professor), Julie Theriot (Associate Professor)

Biological Sciences: Dmitri Petrov (Associate Professor)

Bioengineering: Russ B. Altman (Professor), Markus Covent (Assistant Professor)

Chemistry: Vijay Pande (Associate Professor)

Chemical and Systems Biology: James Ferrell (Professor)

Civil and Environmental Engineering: Raymond E. Levitt (Professor)

Computer Science: Serafim Batzoglou (Assistant Professor), Gill Bejerano (Assistant Professor), Leo Guibas (Professor), Daphne Koller (Associate Professor), Jean-Claude Latombe (Professor), Gio Wiederhold (Professor, Research, emeritus)

Developmental Biology: Gill Bejerano (Assistant Professor), Stuart Kim (Professor)

Genetics: Russ B. Altman (Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor), Teri E. Klein (Senior Research Scientist), Richard M. Myers (Professor), Gavin Sherlock (Assistant Professor)

Health Research and Policy: Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Robert Tibshirani (Professor)

Management Science and Engineering: Margaret Brandeau (Professor), Ross D. Shachter (Associate Professor)

Mathematics: Samuel Karlin (Professor, emeritus)

Medicine: Russ B. Altman (Professor), Terrance Blaschke (Professor, emeritus), Atul Butte (Assistant Professor), Robert W. Carlson (Professor), Amar K. Das (Assistant Professor), Parvati Dev (Senior Research Scientist), Lawrence M. Fagan (Associate Director), Alan M. Garber (Professor), Mary Goldstein (Professor), Michael Higgins (Consulting Associate Professor), Peter D. Karp (Consulting Assistant Professor), David Katzenstein (Professor, Research), John Koza (Consulting Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Associate Professor), Robert W. Shafer (Assistant Professor, Research), P.J. Utz (Associate Professor)

Microbiology and Immunology: Karla Kirkegaard (Professor), Garry Nolan (Associate Professor)

Obstetrics and Gynecology: W. LeRoy Heinrichs (Professor, emeritus)

Pathology: Arend Sidow (Assistant Professor)

Pediatrics: Atul Butte (Assistant Professor)

Psychiatry and Behavioral Sciences: Amar K. Das (Assistant Professor)

Radiation Oncology: Lei Xing (Assistant Professor, Research)

Radiology: Sam Gambhir (Professor), Gary H. Glover (Professor), Sandy A. Napel (Professor), David Paik (Assistant Professor), Norbert J. Pelc (Professor), Sylvia Plevritis (Associate Professor), Geoffrey Rubin (Associate Professor)

Statistics: Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor), Balaji Srinivasan (Lecturer)

Structural Biology: Michael Levitt (Professor)

Surgery: Thomas Krummel (Professor), Charles Taylor (Assistant Professor, Research)

Program Offices: MSOB 215
Mail Code: 94305-5479
Phone: (650) 723-6979
Web Site: http://bmi.stanford.edu

Courses given in Biomedical Informatics Program have the subject code BIOMEDIN. For a complete list of subject codes, see Appendix.

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

GRADUATE PROGRAMS

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements outlined below, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging. Candidates must maintain a 3.0 GPA in each of the five core areas, and an overall GPA of 3.0. If the candidate's GPA does not meet the minimum requirement, the executive committee may require corrective courses of action. In addition, prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of biomedical informatics fundamentals and a potential for research by passing a qualifying exam.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and experience of the student. Deviations from the core curriculum outlined below must be justified in writing and approved by the student's Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training may have the curriculum adjusted to eliminate requirements met as part of prior training.

CORE CURRICULUM

Students are expected to participate regularly in the Biomedical Informatics Student Seminar (201) and Colloquia (200), regardless of whether they register for credit in those courses. In addition, all students are expected to fulfill requirements in the following five categories:

1. *Core Biomedical Informatics* (17 units): students are expected to understand current applications of computers in biology and medicine and to develop a broad appreciation for research in the management of biomedical information. Required courses are: BIOMEDIN 200, 201, 210, 211, 212, 214, and 217, all of which should be taken during the first and second year in the program. BIOMEDIN 200 and 201 are required courses but are not counted toward the core or elective units. Students must also take an additional 3 units of Biomedical Informatics course work (which may include crosslisted courses from other departments, but not including BIOMEDIN 200, 201, 299, 302, 303, or 305), selected in consultation with the academic adviser.
2. *Computer Science* (9 units): the student is expected to acquire a knowledge of the use of computers, computer organization, programming, and symbolic systems. It is assumed that students have had by matriculation computing experience at least equivalent to a course introducing the fundamentals of data structures and algorithms such as CS 103A,B, 103X, 106A,B, 106X, or other courses approved by academic adviser or executive committee. Students are required to take a minimum of 9 units of courses in the Department of Computer Science. If similar courses have not been taken previously, these units must include CS 121 or 221, 161, and a course that requires significant programming and knowledge of machine architectures (for example,

CS 108, or the CS 193 series). For those who have taken such courses previously, replacement units may be taken from any other course in CS selected by the student and approved by the academic adviser. A course in databases is especially recommended. With the exception of CS 108, all other courses applied to the degree requirements must be numbered 137 or higher.

3. *Probability, Statistics, and Decision Science* (9 units): students are required to take at least three courses that span the following five topics: basic probability theory, Bayesian statistics, decision analysis, machine learning, and experimental-design techniques. Prior courses in statistics at least equivalent to STATS 60 and calculus equivalent to MATH 42 are prerequisites. A prior course in linear algebra equivalent to MATH 103 or 113 is recommended. For the probability requirements, students may, for example, take MS&E 120, STATS 116, or MS&E 221. For the statistics requirements, students should take STATS 141, if they have not had an equivalent class prior to entry to the program. Otherwise, sequences (taken after STATS 116) may include STATS 200 followed by a course in stochastic modeling, machine learning or data mining, such as STATS 202 or 315A,B, or CS 228 or 229. Options for decision analysis include MS&E 152 or 252, or cost effectiveness analysis (BIOMEDIN 432). Specific courses should be chosen in consultation with the student's academic adviser. Also recommended is a course in the psychology of human problem solving.
4. *Biomedical Domain Knowledge* (6 units): students are expected to acquire an understanding of pertinent life sciences and how to analyze a domain of application interest. Prior courses in biology at least equivalent to BIOSCI 41 and 42 are prerequisites. All students must have completed a course in basic biochemistry, molecular biology, or genetics. Other areas of basic biology may be an acceptable alternative. Exposure to laboratory methods in biology is encouraged. All students without formal health care training are encouraged to take IMMUNOL 230 (formerly BIOMEDIN 207).
5. *Social and Ethical Issues* (4 units): candidates are expected to be familiar with issues regarding ethics, public policy, financing, organizational behavior, management, and pertinent legal topics. Students may choose at least 3 units from suitable courses, including BIOMEDIN 432; CS 201; MS&E 284, 197; HRP 391, 392; or any other advanced course in policy and social issues proposed by the student and approved by the Biomedical Informatics academic adviser.

The core curriculum generally entails a minimum of 45 units of course work for master's students and 54 units of course work for Ph.D. students, but can require substantially more or less depending upon the courses selected and the previous training of the student. All courses must be taken for a letter grade. Students may request an elective course be taken for a grade of credit/no credit by submitting a petition to the BMI executive committee. BIOMEDIN 299 and BIOMEDIN 802 may be taken for satisfactory/no credit (S/NC). The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected.

PROGRAM REQUIREMENTS FOR THE ACADEMIC M.S., PROFESSIONAL M.S., AND COTERMINAL DEGREES

Students enrolled in any of the M.S degrees must complete the program requirements in order to graduate. Programs of at least 45 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum.
2. A minimum of 6 additional units of courses in Computer Science numbered 135 or higher, courses in Management Science and Engineering or Statistics numbered 200 or higher, PSYCH 256 or 225, or relevant courses in other departments approved by the student's academic adviser.
3. Electives: additional courses to bring the total to 45 or more units.

The University requirements for the M.S. degree are described in the "Graduate Degrees" section of this bulletin.

MASTER OF SCIENCE (ACADEMIC)

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics with research, typically supported with fellowship funding. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

MASTER OF SCIENCE (HONORS COOPERATIVE PROGRAM)

This degree is primarily designed for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. All classes necessary for the degree are available online. The professional M.S. is offered in conjunction with Stanford Center of Professional Development (SCPD), which establishes the rates of tuition and fees. The program uses the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

MASTER OF SCIENCE (COTERMINAL)

The coterminal degree program allows undergraduates to study for a master's degree while completing their bachelor's degree(s) in the same or a different department. Please refer to the "Coterminal Bachelor's and Master's Degrees" section under "Undergraduate Degrees and Programs" in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is only available to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees" section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Interdisciplinary Committee:

1. A student plans and completes a coherent program of study including the core curriculum and additional requirements for the master's program. In addition, doctoral candidates are expected to take at least three more advanced courses (see categories under item '2' of the master's program requirements) and must complete a total of 54 units. In the first year, two or three research rotations are encouraged. The master's requirements should be completed by the end of the second year in the program (six quarters of study, excluding summers). Doctoral students are generally advanced to Ph.D. candidacy after passing the qualifying exam, which takes place during the end of the second year of training or early in the third year. A student's

academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Biomedical Informatics executive committee.

2. To remain in the Ph.D. program, each student must attain a grade point average (GPA) of 3.0 (B) in each of the five core areas. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student's research activities is expected of all doctoral candidates.
3. During the third year of training, generally in the Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans and allows program faculty to assure that the student is making good progress toward the definition of a doctoral dissertation topic.
4. By the end of nine quarters (excluding summers), each student must orally present a written thesis proposal and an oral university defense of this proposal to a dissertation committee that generally includes at least one member of the Biomedical Informatics executive committee. The committee determines whether the student's general knowledge of the field and the details of the planned thesis are sufficient to justify proceeding with the dissertation.
5. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by the Biomedical Informatics executive committee; one should be completed in the first two years of study.
6. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser need not be an active member of the Biomedical Informatics program faculty, but all committees should include at least one participating BMI faculty member.
7. No official additional oral examination is required upon completion of the dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement. At the completion of training, the student should give a final talk describing their results.
8. The student is expected to demonstrate an ability to present scholarly material and research in a lecture at a formal seminar.
9. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student's academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.
10. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University.

COURSES

BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution—(Same as GENE 109Q.) Stanford Introductory Seminar. Preference to sophomores. For non-science majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

BIOMEDIN 156/256. Economics of Health and Medical Care—(Graduate students register for 256; same as ECON 126, HRP 256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisites: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

BIOMEDIN 200. Biomedical Informatics Colloquium—Series of colloquia offered by program faculty, students, and occasional guest lecturers. Credit available only to students in a Biomedical Informatics degree program. May be repeated three times for credit.

1 unit, Aut, Win, Spr (Musen, M)

BIOMEDIN 201. Biomedical Informatics Student Seminar—Participants report on recent articles from the Biomedical Informatics literature or their research projects. Goal is to teach presentation skills. Credit available only to students in a Biomedical Informatics degree program. May be repeated three times for credit.

1 unit, Aut, Win, Spr (Musen, M)

BIOMEDIN 202. Introductory Biomedical Informatics—Via Internet. Current research problems and computational approaches to them. Topics include medical security and privacy, electronic medical records, controlled terminologies and biomedical ontologies, electronic retrieval, technology-assisted learning environments, medical decision making and support, sequence analysis, phylogenetics, biological networks and pathways, microarray analysis, natural language processing, and protein structural analysis and prediction. Graduate students in the Biomedical Informatics training program may not take this class for credit.

1 unit, Aut, Win, Spr, Sum (Altman, R)

BIOMEDIN 204. Pharmacogenomics—Via Internet. Genetically determined responses to drugs; applications focusing on the PharmGKB database, a publicly available Internet tool to aid researchers in understanding how genetic variation among individuals contributes to differences in reactions to drugs. Topics include: introduction to pharmacogenomics and pharmacology; the genome and genetics; human polymorphisms, frequencies, significance, and populations; informatics in pharmacogenomics; genotype to phenotype and phenotype to genotype approaches; drug discovery and validation; genomic variation discovery and genotyping; adverse drug reactions and interactions; pathways of drug metabolism; and cancer pharmacogenomics. Prerequisites: two of BIOSCI 41, 42, 43, and 44X,Y or consent of instructor.

1 unit, Aut, Win, Spr, Sum (Altman, R)

BIOMEDIN 205. Biomedical Informatics for Medicine—Primarily for M.D. students; open to others. Emphasis is on practical applications of bioinformatics and medical informatics for medicine, health care, clinicians, and medical research. Topics may include: methods to analyze genetic conditions; integrative methods for microarray, proteomic, and genomic data to understand the etiology of disease; clinical information systems in local healthcare facilities, and pharmacogenomics. Applications such as BLAST (sequence alignment), PharmGKB (matches allelic variation to drug response), and statistical packages such as R. Background in programming or medicine not required. May be repeated for credit.

2 units, Aut, Spr (Butte, A)

BIOMEDIN 210. Introduction to Biomedical Informatics: Fundamental Methods—(Same as CS 270.) Methods for modeling biomedical systems and for making those models explicit in the context of building software systems. Emphasis is on intelligent systems for decision support. Topics: knowledge representation, controlled terminologies, ontologies, reusable problem solvers, and knowledge acquisition. Recommended: exposure to object-oriented systems, basic knowledge of biology.

3 units, Aut (Musen, M)

BIOMEDIN 211. Biomedical Informatics: Biomedical Systems Engineering.—(Same as CS 271.) Focus is on undertaking design and implementation of computational and information systems for life scientists and healthcare providers. Case studies illustrate what design factors lead to success or failure in building systems in complex biomedical environments. Topics: requirements analysis, workflow and organizational factors, functional specification, knowledge modeling, data heterogeneity, component-based architectures, human-computer interaction, and system evaluation. Prerequisite: 210, or consent of instructor.

3 units, Win (Das, A)

BIOMEDIN 212. Introduction to Biomedical Informatics Research Methodology—(Same as BIOE 212, CS 272, GENE 212.) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: 210, 211 or 214, or consent of instructor.
3 units, Aut (Altman, R; Cheng, B; Klein, T)

BIOMEDIN 214. Representations and Algorithms for Computational Molecular Biology—(Same as BIOE 214, CS 274, GENE 214.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units.
3-4 units, Spr (Altman, R)

BIOMEDIN 216. Lectures on Representations and Algorithms for Molecular Biology—Lecture series for BIOMEDIN 214. Recommended: familiarity with biology.
1 unit, Spr (Altman, R)

BIOMEDIN 217. Translational Bioinformatics—(Same as CS 275.) Analytic, storage, and interpretive methods to optimize the transformation of genetic, genomic, and biological data into diagnostics and therapeutics for medicine. Topics: access and utility of publicly available data sources; types of genome-scale measurements in molecular biology and genomic medicine; analysis of microarray data; analysis of polymorphisms, proteomics, and protein interactions; linking genome-scale data to clinical data and phenotypes; and new questions in biomedicine using bioinformatics. Case studies. Prerequisites: programming ability at the level of CS 106A and familiarity with statistics and biology.
4 units, Win (Butte, A)

BIOMEDIN 218. Translational Bioinformatics—Same content as 217; for medical and graduate students who attend lectures and participate in limited assignments and final project.
2 units, Win (Butte, A)

BIOMEDIN 231. Computational Molecular Biology—(Same as BIOC 218.) Via Internet. For molecular biologists and computer scientists. Representation and analysis of genomes, sequences, and proteins. Strengths and limitations of existing methods. Course work performed on web or using downloadable applications. See http://biochem218.stanford.edu/. Prerequisites: introductory molecular biology course at level of BIOSCI 41 or consent of instructor.
3 units, Aut, Win, Spr (Brutlag, D)

BIOMEDIN 233. Intermediate Biostatistics: Analysis of Discrete Data—(Same as HRP 261, STATS 261.) The 2x2 table. Chi-square test. Fisher's exact test. Odds ratios. Sampling plans; case control and cohort studies. Series of 2x2 tables. Mantel Hantzel. Other tests. k x m tables. Matched data logistic models. Conditional logistic analysis, application to case-control data. Log-linear models. Generalized estimating equations for longitudinal data. Cell phones and car crashes: the crossover design. Special topics: generalized additive models, classification trees, bootstrap inference.
3 units, Win (Sainani, K)

BIOMEDIN 234. Biomedical Genomics—Genomic technologies, bioinformatics methods, and clinical and epidemiological applications for the study of human pathogens. DNA sequencing and gene expression and proteomics as applied to the genomes of humans and human pathogens. Core concepts in bioinformatics, molecular phylogenetics, and population genetics; how to retrieve, manipulate, and analyze sequence data; and use of web databases and online programs. Recommended for those with limited biology course work: consent of instructor.
3 units, Spr (Shafer, R)

BIOMEDIN 251. Outcomes Analysis—(Same as HRP 252.) Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.
3 units, Spr (Bhattacharya, J)

BIOMEDIN 262. Computational Genomics—(Same as CS 262.) Applications of computer science to genomics, and concepts in genomics from a computer science point of view. Topics: dynamic programming, sequence alignments, hidden Markov models, Gibbs sampling, and probabilistic context-free grammars. Applications of these tools to sequence analysis: comparative genomics, DNA sequencing and assembly, genomic annotation of repeats, genes, and regulatory sequences, microarrays and gene expression, phylogeny and molecular evolution, and RNA structure. Prerequisites: 161 or familiarity with basic algorithmic concepts. Recommended: basic knowledge of genetics.
3 units, Win (Batzoglou, S)

BIOMEDIN 273A. A Computational Tour of the Human Genome—(Same as CS 273A, DBIO 273A.) Genomes as the ultimate biological information medium, carrying instructions for every organism's development, life cycle, and reproduction. Bioinformatics perspective. Advances in biology resulting from sequencing of human and related organisms. Genome sequencing: technologies, assembly, personalized sequencing. Functional landscape: genes, regulatory modules, repeats, RNA genes. Genome evolution: processes, comparative genomics, ultraconservation, exaptation. Topics may include population genetics and personalized genomics, ancient DNA, and metagenomics. Prerequisities: computational biology at the level of 262, 274, or BIOC 218.
3 units, Aut (Batzoglou, S; Bejerano, G)

BIOMEDIN 299. Directed Reading and Research—For students wishing to receive credit for directed reading or research time. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOMEDIN 301. Special Topics in Biomedical Informatics
1-6 units, Sum (Staff)

BIOMEDIN 303. Statistics for Research—Statistical methods commonly used in research. Emphasis is on when and how to use the methods rather than on proofs. How to describe data and detect unusual values, compare treatment effects, interpret p-values, detect and quantify trends, detect and measure association and correlation, determine the sample size and power for an experiment, and choose statistical tests and software. Topics include descriptive statistics (mean, median, standard deviation, standard error), probability, paired and unpaired t-tests, analysis of variance, correlation, regression, chi-square, discriminant analysis, and power and sample size. Statistical analysis software including Excel and Statistica.
1 unit, Spr (Walker, M; Musen, M), alternate years, not given next year

BIOMEDIN 366. Computational Biology—(Same as STATS 166, STATS 366.) Methods to understand sequence alignments and phylogenetic trees built from molecular data, and general genetic data. Phylogenetic trees, median networks, microarray analysis, Bayesian statistics. Binary labeled trees as combinatorial objects, graphs, and networks. Distances between trees. Multivariate methods (PCA, CA, multidimensional scaling). Combining data, nonparametric inference. Algorithms used: branch and bound, dynamic programming, Markov chain approach to combinatorial optimization (simulated annealing, Markov chain Monte Carlo, approximate counting, exact tests). Software such as Matlab, Phylip, Seq-gen, Arlequin, Puzzle, Splitstree, XGobi.

2-3 units, Aut (Holmes, S)

BIOMEDIN 374. Algorithms in Biology—(Same as CS 374.) Algorithms and computational models applied to molecular biology and genetics. Topics vary annually. Possible topics include biological sequence comparison, annotation of genes and other functional elements, molecular evolution, genome rearrangements, microarrays and gene regulation, protein folding and classification, molecular docking, RNA secondary structure, DNA computing, and self-assembly. May be repeated for credit. Prerequisites: 161, 262 or 274, or BIOCHEM 218, or equivalents.

2-3 units, Spr (Batzoglou, S)

BIOMEDIN 390A,B,C. Curricular Practical Training—Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut, Win (Staff), Spr, Sum (Musen, M)

BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care—(Same as MGTECON 332, HRP 392.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber, A; Owens, D)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CS 228. Probabilistic Models in Artificial Intelligence

3 units, Win (Koller, D)

CS 329. Topics in Artificial Intelligence

3 units, offered occasionally

CS 348B. Computer Graphics: Image Synthesis Techniques

3-4 units, Spr (Hanrahan, P)

CS 379. Interdisciplinary Topics

3 units, Aut (Staff)

MS&E 355. Influence Diagrams and Probabilistics Networks

3 units, Win (Shachter, R), alternate years, not given next year

CANCER BIOLOGY PROGRAM

Program Director: Amato Giaccia (Radiation Oncology)

Committee on Cancer Biology: Nicholas Denko (Radiation Oncology), Howard Chang (Dermatology), Jeffrey Axelrod (Pathology), Katrin Chua (Medicine, Endocrinology), Julien Sage (Pediatrics), Alexandro Sweet-Cordero (Pediatrics), Timothy Stearns (Biological Sciences, Genetics)

Program Office: Alway Building, 300 Pasteur Drive, Room M105I
Mail Code: 94305-5121
Phone: (650) 723-6198
Email: dalima@stanford.edu
Web Site: http://www.stanford.edu/group/cancerbio/

Courses given in Cancer Biology have the subject code CBIO. For a complete list of subject codes, see Appendix.

The Cancer Biology Program at Stanford University is an interdisciplinary program leading to the Ph.D. degree. During the past three decades, understanding of cancer has increased with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, chromatin remodeling, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis and cancer stem cell biology. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has resulted in the first successful cancer chemotherapies and immunotherapies based on the knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the schools of Medicine, Humanities and Sciences, and Engineering are located on a single campus

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cell biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar on the Pacific Ocean provides students with an opportunity to present their research to one another and to faculty. The expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 60 graduate students located in basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described under the "Graduate Degrees" section of this bulletin.

A small number of applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During the first year, each student is required to complete a minimum of three, one quarter laboratory rotations. Students must choose a dissertation adviser prior to the end of Summer Quarter, first year, but not before the end of Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:

1. Training in biology equivalent to that of an undergraduate biology major at Stanford.

2. Completion of the following courses:
   a) CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer
   b) GENE 203. Advanced Genetics
   c) BIOSCI 214. Cell Biology of Physiological Processes
   d) CSB 210. Signal Transduction Pathways and Networks. Students can take GENE 211, Genomics, or SBIO 214, Biological Macromolecules in lieu of CSB 210.
   e) CBIO 280. Cancer Biology Journal Club; required for first- and second-year graduate students in Autumn, Winter, and Spring quarters.
   f) MED 255. Responsible Conduct in Research; with consent, may be audited.
3. At least 6 units of additional cancer biology-related, graduate-level courses. Course work taken is determined in consultation with the student's adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference on at least three occasions, at least one being an oral presentation.
5. Completion of a qualifying examination in Cancer Biology is required for admission to Ph.D. candidacy. The exam consists of an NIH-style written grant proposal not to exceed ten pages (excluding references), and an oral examination. The examining committee consists of three faculty members from the Cancer Biology Program and does not include the student's dissertation adviser. The composition of this committee is chosen by the student and dissertation adviser and must be submitted to and approved by the program director prior to the end of Autumn Quarter, second year. The qualifying examination must be taken prior to the end of Spring Quarter, second year. If necessary, one retake is permitted prior to the end of Summer Quarter, second year. After the qualifying examination has been completed, the student is required to form a dissertation reading committee that includes the student's adviser and three other members of the Academic Council with appropriate expertise. Each student is required to arrange annual meetings (more frequently, if necessary) of the dissertation reading committee, at which time oral presentations of progress during the past year and a plan of study for the coming year are presented and discussed. Completion of each annual committee meeting must be communicated in writing to the program director by the adviser by the end of Spring Quarter each year.
6. The major accomplishment of each successful Ph.D. student is the presentation of a written dissertation resulting from independent investigation that contributes to knowledge in the area of cancer biology. An oral examination is also required for the Ph.D. degree. In the Cancer Biology Program, a public seminar (one hour) is presented by the Ph.D. candidate, followed by a closed-door oral examination. The oral examination committee consists of at least four examiners (the members of the doctoral dissertation reading committee) and a chair. The oral examination chair may not have a full or joint appointment in the adviser's or student's home department. However, a courtesy appointment does not affect eligibility. The oral examination chair may be from the same department as any other member(s) of the examination committee. All members of the oral examination committee are normally members of the Academic Council, as the oral examination chair must be. With the prior approval of the program director or school dean, one of the examiners may be a person who is not a member of the Academic Council if that individual contributes expertise not otherwise available. Official responsibility for selecting the oral examination chair rests with the program. Cancer Biology delegates this to the student and dissertation adviser.

COURSES

Course and lab instruction in the Cancer Biology Program conform to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

CBIO 101. Cancer Biology—(Same as PATH 101.) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisite: Biological Sciences or Human Biology core or equivalent, or consent of instructor.
4 units, Spr (Lipsick, J)

CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer—Core course required of first-year Cancer Biology graduate students. Focus is on key experiments and classic primary research papers in cancer biology. Letter grade required. Undergraduates require consent of course director.
5 units, Aut (Giaccia, A)

CBIO 260. Teaching in Cancer Biology—Practical experience in teaching by serving as a teaching assistant in a cancer biology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student.
1-10 units, Aut (Giaccia, A), Win (Staff), Spr (Lipsick, J)

CBIO 280. Cancer Biology Journal Club—Required of and limited to first- and second-year graduate students in Cancer Biology. Recent papers in the literature presented by graduate students. When possible, discussion relates to and precedes cancer-related seminars at Stanford. Attendance at the relevant seminar required.
1 unit, Aut, Win, Spr (Giaccia, A)

CBIO 299. Directed Reading in Cancer Biology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

CBIO 399. Graduate Research—Investigations sponsored by individual faculty members. Cancer Biology Ph.D. students must register as soon as they begin dissertation-related research work.
1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 203. Advanced Genetics—(Same as DBIO 203, GENE 203.)
4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

BIOSCI 214. Cell Biology of Physiological Processes—(Same as BIOC 224.)
2-5 units, Win (Theriot, J; Nelson, W; Straight, A; Bogyo, M; Pfeffer, S)

CHEMICAL AND SYSTEMS BIOLOGY

Emeriti: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, Oleg Jardetzky, James P. Whitlock
Chair: James E. Ferrell, Jr.
Professors: James E. Ferrell, Jr., Tobias Meyer, Daria Mochly-Rosen, Richard A. Roth
Associate Professor: Karlene A. Cimprich
Assistant Professors: James K. Chen, Thomas J. Wandless, Joanna K. Wysocka
Courtesy Professors: Beverly S. Mitchell, Paul A. Wender
Courtesy Assistant Professors: Matthew Bogyo, Jennifer J. Kohler, Calvin J. Kuo
Consulting Professor: Juan Jaen

Web Site: http://casb.stanford.edu

Courses given in Chemical and Systems Biology have the subject code CSB. For a complete list of subject codes, see Appendix.

In Autumn of 2006, the Department of Molecular Pharmacology changed its name to become the Department of Chemical and Systems Biology. The department has established a new Ph.D. program in Chemical and Systems Biology. Molecular Pharmacology Ph.D. students who enrolled prior to Autumn 2007 have the option of receiving their Ph.D. in either Molecular Pharmacology or Chemical and Systems Biology. Ph.D. students matriculating in Autumn 2007 and thereafter are admitted to Chemical and Systems Biology. Further details about degree requirements are available from the department.

GRADUATE PROGRAMS

MASTER OF SCIENCE

Students in the Ph.D. program may apply for an M.S. degree after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Department of Chemical and Systems Biology offers interdisciplinary training to prepare students for independent careers in biomedical science. The main focus of the program is cell signaling, chemical biology, and systems biology.

The program leading to the Ph.D. degree includes formal and informal study in chemical biology, systems biology, drug discovery, biochemistry, and other areas of relevance to the interests of particular students. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student's interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

COURSES

Course and lab instruction in the Department of Chemical and Systems Biology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www. stanford.edu/dept/DoR/rph/8-2.html.

Open to all University students; consent of instructor required prior to registration. Students should consult with the instructor about the adequacy of their preparation.

CSB 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

CSB 210. Signal Transduction Pathways and Networks—The molecular mechanisms through which cells receive and respond to external signals. Emphasis is on principles of cell signaling, the systems-level properties of signal transduction modules, and experimental strategies through which cell signaling pathways are being studied. Prerequisite: working knowledge of biochemistry and genetics.
4 units, Win (Ferrell, J; Meyer, T)

CSB 220. Chemistry of Biological Processes—(Same as BIOC 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.
4 units, Aut (Herschlag, D; Chen, J; Bogyo, M; Wandless, T)
alternate years, not given next year

CSB 240. Drug Discovery—The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug emphasizing molecular and genetic issues. Prerequisite: biochemistry, chemistry, or bioengineering.
4 units, alternate years, not given this year

CSB 260. Quantitative Chemical Biology—Current topics including protein and small molecule engineering, cell signaling sensors and modulators, molecular imaging, chemical genetics, combinatorial chemistry, in vitro evolution, and signaling network modeling. Prerequisites: undergraduate organic chemistry, and biochemistry or cell biology.
4 units, Spr (Chen, J), alternate years, not given next year

CSB 270. Research Seminar—Guest speakers and discussion on current research in pharmacology.
1-2 units, not given this year (Staff)

CSB 278. Introduction to Systems Biology—(Same as CS 278.) For biologists, engineers, and computer scientists. Experimental and computational approaches to modeling and analysis of complex biological systems. Topics: biological noise; simple signaling circuits (cascades, feedback, and feed-forward circuits); bistability and oscillations; large scale models; synthetic biology; and analysis of omics-scale data sets. Computational approached include ODE modeling, stochastic simulation, boolean networks, Bayesian approaches, and hybrid modeling.
4 units, Spr (Dill, D; Brutlag, D; Koller, D; Covert, M; Ferrell, J)

CSB 299. Directed Reading in Chemical and Systems Biology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

CSB 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE MEDICINE

Chair: Linda C. Cork
Professor: Linda C. Cork
Associate Professors: Donna Bouley, Paul Buckmaster, Sherril Green, Shaul Hestrin
Assistant Professor: Corinna Darian-Smith

Department Offices: Edwards Building, Room R321
Mail Code: 94305-5342
Phone: (650) 498-5080
Web Site: http://med.stanford.edu/compmed/

Courses given in Comparative Medicine have the subject code COMPMED. For a complete list of subject codes, see Appendix.

The Department of Comparative Medicine is a clinical department that offers residency training in laboratory animal medicine for veterinarians, although it does not offer degrees. Its faculty offer courses at the undergraduate and graduate levels and participate in teaching in other departments. Both clinical faculty members, who are specialists in a veterinary medical specialty, and basic science faculty also accept students to participate in ongoing research projects within the department and assist students with special research projects.

The discipline of Comparative Medicine use the differences and similarities among species to understand biologic and disease mechanisms. It incorporates spontaneous or induced disease models as one of several approaches to research. The research interests of faculty are in neuroscience, infectious diseases, neuropathology, cancer, and molecular genetics.

COURSES

Course and lab instruction in the Department of Comparative Medicine conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

COMPMED 81N. Comparative Anatomy and Physiology of Mammals—Stanford Introductory Seminar. Preference to freshmen. Comparative approach to common mammals, laboratory, and domestic species. The unique adaptations of each species in terms of its morphological, anatomical, and behavioral characteristics. How these species interact with human beings and other animals. GER: DB-NatSci

3 units, Win (Bouley, D)

COMPMED 83Q. Horse Medicine—Stanford Introductory Seminar. Preference to sophomores. The most common equine diseases, ranging from colic to lameness. Equine anatomy and physiology relevant to topics in equine medicine. Equine infectious diseases, care of the newborn foal, medical emergencies, and neurological disorders.

1-2 units, Aut (Green, S)

COMPMED 106. A Primate Perspective on Brain Evolution—How to distinguish primate subgroups; how to place primates among mammals, and humans among primates, with respect to body structure, brain organization, and function. The unique characteristics of primates; what factors contributed to the evolution of primate groups, hominids, and modern human beings. The role of the hand in primate evolution. What extant primates reveal about language acquisition. How these changes are reflected in the sensorimotor organization of the primate brain. Prerequisite: freshman biology.

3 units, not given this year

COMPMED 107/207. Comparative Neuroanatomy—(Graduate students register for 207.) Functional organization and evolution of the vertebrate nervous system. Topics include paleoneurology, cladistic analysis, allometry, mosaic versus concerted evolution, and evolution of brain region structure, connectivity, and neurons. Comparisons between structure and function of vertebrate forebrains including hippocampi. Evolution of the primate visual and sensorimotor central nervous system as related to vocalization, socialization, and intelligence.

4 units, not given this year

COMPMED 110. Pre-Vet Advisory—For students interested in a career in veterinary medicine. Guest speakers present career options in veterinary medicine. Networking with other pre-vet students. How to meet the academic and practical experience prerequisites for admission to veterinary school. Prerequisite: consent of instructor.

1 unit, Aut, Win, Spr (Bouley, D)

COMPMED 198. Undergraduate Directed Reading in Comparative Medicine—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, Aut, Win, Spr, Sum (Staff)

COMPMED 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

FOR GRADUATE STUDENTS

COMPMED 299. Directed Reading in Comparative Medicine—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COMPMED 399. Graduate Research—Investigations sponsored by individual faculty members.Opportunities are available in comparative medicine and pathology, immuno-histochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neurophysiology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DEVELOPMENTAL BIOLOGY

Emeriti: (Professors) David S. Hogness, A. Dale Kaiser
Chair: Roeland Nusse
Associate Chair: Lucy Shapiro
Professors: Ben Barres, Philip Beachy, Gerald Crabtree, Margaret Fuller, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, James Spudich, William Talbot, Irving Weissman
Associate Professors: Seung Kim, Anne Villeneuve
Assistant Professors: Gill Bejerano, Joanna Wysocka
Associate Professor (Teaching): Ellen Porzig
Professor (Research): Harley McAdams

Courses given in Development Biology have the subject code DBIO. For a complete list of subject codes, see Appendix.

A fundamental problem in biology is how the complex set of multicellular structures that characterize an adult animal is generated from the fertilized egg. Recent advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, molecular biology, and genomics. People in the department have a major interest in regenerative medicine and stem cell biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

GRADUATE PROGRAM

MASTER OF SCIENCE

University requirements for the M.S. are described in the "Graduate Degrees" section of this bulletin.

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master's degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to complete at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are expected to attend Developmental Biology seminars and journal clubs.

Completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must pass the University oral examination, taken only after the student has substantially completed research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course and lab instruction in the Department of Developmental Biology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

DBIO 12Q. The Evolution and Development of the Human Hand—Stanford Introductory Seminar. Preference to sophomores. Evolution of the human hand in the context of primate evolution; roles of the human hand in tool use, manufacture, art, music, and communication. Development of the hand: embryonic axes, appearance of the digit program, roles of cell death, molecular bases of normal and abnormal hand patterns. Prerequisite: advanced placement biology.

3-4 units, Win (Porzig, E)

DBIO 156. Human Developmental Biology and Medicine—(Same as HUMBIO 141.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, not given this year

DBIO 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 201. Development and Disease Mechanisms—Mechanisms that direct human development from conception to birth. Conserved molecular and cellular pathways regulate tissue and organ development; errors in these pathways result in congenital anomalies and human diseases. Topics: molecules regulating development, cell induction, developmental gene regulation, cell migration, programmed cell death, pattern formation, stem cells, cell lineage, and development of major organ systems. Emphasis on links between development and clinically significant topics including infertility, assisted reproductive technologies, contraception, prenatal diagnosis, multiparity, teratogenesis, inherited birth defects, fetal therapy, adolescence, cancer, and aging.

4 units, Aut (Porzig, E; Kim, S; Kingsley, D; Scott, M)

DBIO 202. Assisted Reproductive Technologies—(Same as OBGYN 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization covering micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Prerequisite: DBIO 201 recommended, or consent of instructors.

1-3 units, Win (Porzig, E; Behr, B)

DBIO 203. Advanced Genetics—(Same as BIOSCI 203, GENE 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. The use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

DBIO 210. Developmental Biology—Current areas of research in developmental biology. How organismic complexity is generated during embryonic and post-embryonic development. The roles of genetic networks, induction events, cell lineage, maternal inheritance, cell-cell communication, and hormonal control in developmental processes in well-studied organisms such as vertebrates, insects, and nematodes. Team-taught. Students meet with faculty to discuss current papers from the literature. Prerequisite: graduate standing, consent of instructor. Recommended: familiarity with basic techniques and experimental rationales of molecular biology, biochemistry, and genetics.

5 units, Spr (Villeneuve, A; Fuller, M; Beachy, P)

DBIO 215. Frontiers in Biological Research—(Same as BIOC 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, P; Brunet, A; Villeneuve, A)

DBIO 221. Current Issues in Aging—(Same as GENE 221, NENS 221.) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

1-2 units, Win (Kim, S; Brunet, A; Rando, T), Spr (Kim, S)

DBIO 232. Topics in Regenerative Medicine—(Same as MI 232.) Forum. Students and researchers discuss current developments in regenerative medicine at Stanford to spark collaboration. Topics include novel applications in biological and chemical engineering, stem cell biology, biotechnology, and human disease. May be repeated for credit.

2 units, Aut, Win, Spr (Blau, H; Fuller, M)

DBIO 257. The Stem Cell: Science, Ethics, and Politics—(Same as HUMBIO 157.) The biology of stem cells. Their role in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisites: HUMBIO 2A,B, or consent of instructor.

3 units, Spr (Nusse, R; Fuller, M; Porzig, E)

DBIO 273A. A Computational Tour of the Human Genome—(Same as BIOMEDIN 273A, CS 273A.) Genomes as the ultimate biological information medium, carrying instructions for every organism's development, life cycle, and reproduction. Bioinformatics perspective. Advances in biology resulting from sequencing of human and related organisms. Genome sequencing: technologies, assembly, personalized sequencing. Functional landscape: genes, regulatory modules, repeats, RNA genes. Genome evolution: processes, comparative genomics, ultraconservation, exaptation. Topics may include population genetics and personalized genomics, ancient DNA, and metagenomics. Prerequisities: computational biology at the level of 262, 274, or BIOC 218.

3 units, Aut (Batzoglou, S; Bejerano, G)

DBIO 296. Stem Cell Biology and Regenerative Medicine—(Same as PATH 296.) For graduate and medical students. Embryonic and adult stem cells, including origin, regulation, self-renewal, differentiation, fate, and relationship to cancer; biological mechanisms and methods to translate findings to therapeutic applications. Medical students must enroll for 5 units; graduate students may choose to take only the basic science part for 3 units. Prerequisites: DBIO 201 and 210, or consent of instructor.

3-5 units, Win (Weissman, I; Fuller, M; Nusse, R)

DBIO 299. Directed Reading in Developmental Biology—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

EPIDEMIOLOGY PROGRAM

Director: Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences)

Advisory Committee: Stephen P. Fortmann (Professor, Medicine), John R. Huguenard (Professor, Neurology and Neurological Sciences), Charles C. Prober (Professor, Pediatrics, and Microbiology and Immunology), Robert Tibshirani (Professor, Health Research and Policy)

Core Faculty and Academic Teaching Staff: Raymond R. Balise (Lecturer, Health Research and Policy), Gary D. Friedman* (Consulting Professor, Health Research and Policy), Victor W. Henderson* (Professor, Health Research and Policy, and Neurology and Neurological Sciences), Abby C. King* (Professor, Health Research and Policy, and Medicine), Philip Lavori (Professor, Health Research and Policy), Yvonne A. Maldonado* (Associate Professor, Pediatrics), Lorene M. Nelson* (Associate Professor, Health Research and Policy), Julie Parsonnet* (Professor, Medicine, and Health Research and Policy), Rita A. Popat (Clinical Assistant Professor, Health Research and Policy), Kristin L. Sainani (Clinical Assistant Professor, Health Research and Policy), Dee W. West* (Professor, Health Research and Policy), Alice S. Whittemore* (Professor, Health Research and Policy)

MASTER OF SCIENCE

The Graduate Interdisciplinary Program in Epidemiology offers instruction and interdisciplinary research opportunities leading to the M.S. degree in Epidemiology. Most core faculty and academic teaching staff are administratively housed within the Department of Health Research and Policy. Affiliated faculty come from a large number of Stanford University departments and centers, and from notable Bay Area research facilities. The program seeks students with the potential to be future leaders in clinical and translational research, epidemiology, and allied disciplines. The program provides researchers from diverse clinical backgrounds the knowledge and skills to become clinical investigators; it also offers an introduction to epidemiology for individuals with research experience in the behavioral and social sciences and for others without a clinical background. Research strengths include cancer epidemiology, cardiovascular disease epidemiology, infectious disease epidemiology, musculoskeletal disease epidemiology, neuroepidemiology, and aspects of epidemiologic methods, genetic epidemiology, reproductive epidemiology and women's health, and environmental and occupational epidemiology.

Two academic tracks lead to the M.S. degree; these tracks are not declared on Axess and they do not appear on the transcript or the diploma. The Clinical Research track is for physicians and others with specific interests in clinical and translational research. Students in this track receive training in epidemiologic methods, statistical analysis, and other areas essential to patient-oriented clinical research. These students are usually clinical investigators with an M.D. or comparable clinical degree, often in the fellowship stage of their postgraduate training, or in an early stage of faculty development. Typically, they are anticipating careers in academic medicine. The Traditional track serves students without prior clinical training. One category of such students consists of behavioral and social scientists who wish to bring an epidemiologic orientation to their research. Students pursuing a Ph.D. in these disciplines may wish to consider a concurrent master's degree in Epidemiology. The Traditional track also serves as an introduction to epidemiology for students with baccalaureate degrees who are considering careers in epidemiology or a related discipline.

University requirements for the M.S. degree are described in the "Graduate Degrees" section of this bulletin.

To receive the M.S. degree, students in both instructional tracks are expected to obtain a grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a master's thesis. Required courses are HRP 225, Design and Conduct of Clinical and Epidemiologic Studies; HRP 226, Advanced Epidemiologic and Clinical Research Methods; HRP 236, Epidemiology Research Seminar, 3 units required); HRP 259, Introduction to Probability and Statistics for Epidemiology; HRP 261, Intermediate Biostatistics; HRP 262, Regression, Prediction, Survival Analysis; and a master's thesis with 12 or more units. Students in the Clinical Epidemiology track must also complete HRP 251, Design and Conduct of Clinical Trials; and MED 255, Responsible Conduct of Research. Students are required to select at least two other courses in Epidemiology. Students are assigned a methodology mentor, who is usually from the Department of Health Research and Policy, and a research mentor, who may be from another department. For the students in the Clinical Research Epidemiology track, the research mentor is often an affiliated faculty member from the department of the student's clinical specialty. Other programmatic requirements are described in *Graduate Program in Epidemiology, Information and Guidelines*, available from the educational coordinator in the Department of Health Research and Policy.

COURSES

The course listings of individual departments participating in the Graduate Interdisciplinary Program in Epidemiology should be consulted for complete descriptions.

GENETICS

Emeritus: (Professor) Luca Cavalli-Sforza, Leonard Herzenberg
Chair: Richard M. Myers
Professors: Russ Altman, Gregory Barsh, Stanley Cohen, Ronald Davis, Andrew Fire, Uta Francke, Margaret Fuller, Mark Kay, Stuart Kim, Joseph Lipsick, Richard Myers, John Pringle, Matthew Scott
Associate Professors: Michele Calos, Arend Sidow, Tim Stearns, Anne Villenueve, Douglas Vollrath
Assistant Professors: Laura Attardi, Julie Baker, Anne Brunet, James Ford, Julien Sage, Man-Wah Tan
Professor (Research): Leonore Herzenberg
Associate Professors (Research): J. Michael Cherry, Zijie Sun
Assistant Professor (Research): Gavin Sherlock
Courtesy Professor: Hank Greely
Consulting Professor: David Cox

Mail Code: 94305-5120
Phone: (650) 723-3335
Email: genetics-info@genome.stanford.edu
Web Site: http://genetics.stanford.edu/

Courses given in Genetics have the subject code GENE. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

University requirements for the Ph.D. degree are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that encompasses both a set of tools and a coherent way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, genetic anthropology, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatic approaches to genome biology and evolution, and includes several genome-scale databases such as the Saccharomyces Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB), the Stanford Human Genome Center (SHGC), and, administered through the Department of Biochemistry, the Stanford Genome Technology Center (SGTC).

Exposure to the intellectual scope of the department is provided by laboratory rotations, dissertation research, advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat of faculty, students, postdoctoral fellows, and staff scientists. Emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty within the department and throughout the campus.

During their first year, graduate students in the department take graduate courses and sample areas of research by doing rotations in three or four laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive advice regularly from other faculty members who serve as members of their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. degree.

There are opportunities for graduate students to teach in graduate-level and professional-school courses. In addition, students are encouraged to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor's, master's, M.D., or Ph.D. degree in related fields may apply for graduate study. Prospective students must have a background in general biology, mathematics, physics, and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates' academic abilities and potential for research and the department's interest in promoting a diverse learning environment. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the Department of Genetics after they have been admitted to the M.D. program in the School of Medicine.

Students begin graduate studies in Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the December deadline. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation and the Stanford Graduate Fellows program.

COURSES

For further information on the availability of courses, consult the quarterly *Time Schedule*, or inquire at the departmental office. Additional courses in or related to genetics are included in the listings of the departments of Biological Sciences, Biochemistry, Developmental Biology, Microbiology and Immunology, Neuroscience, Biomedical Informatics, and Structural Biology.

GENE 106Q. The Heart of the Matter—(Same as BIOSCI 106Q.) Stanford Introductory Seminar. Preference to sophomores. The molecular and biochemical basis of life. Emphasis is on the methods and scientific logic that lead to advances in knowledge. The human heart and circulatory system is the unifying theme for topics such as the constituents and activities of cells, tissues, and organs; the chemicals and proteins that carry on life processes; the biotechnology revolution; the role of genes in human disease and normal functions; and the Human Genome Project. How scientific knowledge is built up through research; how biology initiates advances in medicine; and how science, engineering, and economics interact in biotechnology. Student presentations, demonstrations, and field trips. GER: DB-NatSci

3 units, Win (Myers, R; Simoni, R)

GENE 109Q. Genomics: A Technical and Cultural Revolution—(Same as BIOMEDIN 109Q.) Stanford Introductory Seminar. Preference to sophomores. For non-science majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics. Write-2

3 units, Win (Altman, R)

GENE 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 202. Human Genetics—Theoretical and experimental basis for the genetics of human health and disease. Molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the last. Clinical case discussions. Prerequisites: biochemistry; basic genetics.

4 units, Aut (Ford, J; Myers, R)

GENE 203. Advanced Genetics—(Same as BIOSCI 203, DBIO 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

GENE 206. Epigenetics—(Same as PATH 206.) For graduate students; undergraduates by consent of instructor. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in Drosophila in the 20s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: background in genetics and molecular biology.

2 units, Win (Lipsick, J)

GENE 211. Genomics—Genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with representative computational tools used in genome science; and a beginning working knowledge of PERL.

3 units, Win (Cherry, J; Myers, R; Sidow, A; Sherlock, G)

GENE 212. Introduction to Biomedical Informatics Research Methodology—(Same as BIOE 212, BIOMEDIN 212, CS 272.) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: 210, 211 or 214, or consent of instructor.

3 units, Aut (Altman, R; Cheng, B; Klein, T; Garten, Y)

GENE 214. Representations and Algorithms for Computational Molecular Biology—(Same as BIOE 214, BIOMEDIN 214, CS 274.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units.

3-4 units, Spr (Altman, R)

GENE 215. Frontiers in Biological Research—(Same as BIOC 215, DBIO 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, P; Brunet, A; Villeneuve, A)

GENE 221. Current Issues in Aging—(Same as DBIO 221, NENS 221.) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

1-2 units, Win (Kim, S; Brunet, A; Rando, T), Spr (Kim, S)

GENE 222. Method and Logic in Experimental Genetics—For graduate students only. How experimental strategies are applied to biological questions irrespective of discipline boundaries. Examples include purifying activities from complex mixtures, localizing molecules in space and time, discovering macromolecular interactions, inferences from sequence similarity, using structure to elucidate function, and applying genomics to biological problems. Weekly discussion of two representative papers selected by faculty and a student presentation of a third paper which illustrate principles of biochemistry and cell and molecular biology, and the historical context of important scientific advances.

3 units, Win (Baker, J; Brunet, A)

GENE 233. The Biology of Small Modulatory RNAs—(Same as MI 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, Aut (Fire, A; Chen, C), alternate years, not given next year

GENE 235. *C. Elegans* Genetics—Genetic approaches to *C. elegans*, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.

2 units, Win (Fire, A), not given next year

GENE 238. Current Concepts and Dilemmas in Genetic Testing—(Same as INDE 238.) Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. For M.D., biomedical graduate, and genetic counseling students.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

GENE 244. Introduction to Statistical Genetics—Statistical methods for analyzing human genetics studies of Mendelian disorders and common complex traits. Probable topics include: principles of population genetics; epidemiologic designs; familial aggregation; segregation analysis; linkage analysis; linkage-disequilibrium-based association mapping approaches; and genome-wide analysis based on high-throughput genotyping platforms. Prerequisite: STATS 116 or equivalent or consent of instructor.

3 units, Aut (Tang, H)

GENE 260. Supervised Study—Genetics graduate student lab research from first quarter to filing of candidacy. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 299. Directed Reading in Genetics—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

See respective department listings for course descriptions. See degree requirements above or the program's student services office for applicability of this course to a major or minor program.

MED 255. The Responsible Conduct of Research
1 unit, Aut, Win, Spr, Sum (Karkazis, K)

HEALTH RESEARCH AND POLICY

Emeriti: (Professors) Dan Bloch, John Farquhar, Victor R. Fuchs
Chair: Phil Lavori
Co-Chair: Robert Tibshirani
Professors: Bradley Efron, Trevor Hastie, Victor W. Henderson, Mark Hlatky, Iain M. Johnstone, Abby C. King, Philip W. Lavori, Richard A. Olshen, Julie Parsonnet, Robert Tibshirani, Alice S. Whittemore, Dee W. West, Wing Wong
Associate Professors: Laurence Baker, Lorene M. Nelson, David Rogosa
Assistant Professors: M. Kate Bundorf, Marc Coram, Mei-Chiung Shih
Assistant Professors (Clinical): Rita Popat, Kristin Sainani
Courtesy Professors: Stephen P. Fortmann, Alan M. Garber, Mary Goldstein, Daniel Kessler, Alex Macario, Douglas Owens, Paul Wise
Courtesy Associate Professors: Michael K. Gould, Paul Heidenreich, Yvonne Maldonado, Mark McClellan (on leave), David R. Rogosa, Marilyn Winkleby
Courtesy Assistant Professors: Jay Bhattacharya, Grant Miller
Senior Lecturer: Irene Corso
Lecturers: Raymond Balise, Ellen Chang, Christina Clarke-Dur, Scarlett Gomez, Laurel Habel, Lisa Herrington, Theresa Keegan, De Kun Li, David Lilienfeld, Cynthia O'Malley, Caroline Tanner, Stephen Van Den Eeden
Consulting Professors: Gary Friedman, Elizabeth Holly, Marion Lee, George Lundberg, Peggy Reynolds, Joseph Selby
Consulting Associate Professors: Paul Barnett, Sally Glaser, Pamela Horn-Ross, Esther John, Ciaran Phibbs
Consulting Assistant Professors: Ellen Chang, Christina Clarke-Dur, Theresa Keegan, Bang Nguyen, Ingrid Oakley-Girvan, Rudy Rull, Todd Wagner

Mail Code: 94305-5405
Phone: (650) 723-5456
Web Site: http://hrp.stanford.edu/

Courses given in Health Research and Policy have the subject code HRP. For a complete list of subject codes, see Appendix.

The Department of Health Research and Policy has three principal areas of scholarly interest:

1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology is the study of the distribution and determinants of illness and impairment in human populations. Epidemiology training provides analytic tools for clinical and translational research, including studies of disease etiology, prevention, and therapy.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors.

GRADUATE PROGRAMS

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs, which offer M.S. degrees in Epidemiology and in Health Services Research, are described separately in the relevant sections of this bulletin. Students with an interest in pursuing advanced degrees with an emphasis on biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T138C, Stanford, California 94305-5405.

COURSES

Course and lab instruction in the Department of Health Research and Policy conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www. stanford.edu/dept/DoR/rph/8-2.html.

HRP89Q. Introduction to Crosscultural Issues in Medicine—Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Focus is on culturally unique and non-English speaking populations and developing interpersonal and communication skills with diverse ethnic groups. GER:EC-AmerCul
3 units, Win (Corso, I)

HRP 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

HRP 207,208. Issues and Methods of Health Services and Policy Research—Primarily for students in the Health Services and Policy Research scholarly track. Health care systems and institutions, health insurance, regulation, cost effectiveness analysis, and medical decision making.
2 units, **207:** *Aut (Baker, L; McDonald, K; Haberland, C),*
208: *offered occasionally*

HRP 209. FDA's Regulation of Health Care—(Same as LAW 458.) Open to law or medical students; graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.
3-4 units, Win (Greely, H)

HRP 210. Health Law and Policy I—(Same as LAW 313.) Open to law or medical students and to qualified undergraduates by consent of instructor. Introduction to the American health care system and its legal and policy problems. Topics: the special characteristics of medical care compared to other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.
3-4 units, Aut (Greely, H)

HRP 211. Law and the Biosciences—(Same as LAW 368.) For medical students; graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in the biosciences. Focus is on human genetics; also advances in assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement.
3 units, Win (Greely, H)

HRP 212. Crosscultural Medicine—Interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Explicit and implicit cultural influences operating in formal and informal medical contexts.
3 units, Spr (Corso, I)

HRP 213. Research Protocol Development for Clinical and Translational Research—Primarily for medical students in the Clinical Research Scholarly concentration; open to graduate students except in Epidemiology. Development of research questions and plans for statistical analysis. Study design, sample size and power calculations, and statistical analysis of study data. Analytic methods to carry out statistical power and sample size calculations. Prerequisites: 225, and 258 or 259, or consent of instructor.
2-3 units, not given this year

HRP 214. Scientific Writing—Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.
2-3 units, Win (Sainani, K)

HRP 215. Scientific Writing for Basic and Translational Scientists—Teaches students in the basic sciences how to write clearly, concisely, and effectively. Focuses on the process of writing and publishing a scientific manuscript. Not intended for epidemiology graduate students.
2-3 units, not given this year

HRP 216. Analytical and Practical Issues in the Conduct of Clinical and Epidemiologic Research—Topics include: advanced aspects of study design and data analyses; development of health measurement instruments; methods of summarizing literature and quantifying effect sizes; and multivariable nature of health events in human populations. 3 units requires a term paper. Prerequisites: 225, and 258 or 259, or consent of instructor.
2-3 units, Spr (Popat, R)

HRP 223. Epidemiologic Analysis: Data Management and Statistical Programming—The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.
2-3 units, Aut (Balise, R)

HRP 225. Design and Conduct of Clinical and Epidemiologic Studies—Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: 159/259 or equivalent, or consent of instructor.
3-4 units, Aut (Popat, R)

HRP 226. Advanced Epidemiologic and Clinical Research Methods—The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor.
3-4 units, Win (Nelson, L)

HRP 229. Chronic Disease Epidemiology—Descriptive epidemiology and sources of incidence and mortality data; biological bases of neurological, musculoskeletal, cardiovascular, and other chronic diseases except cancer; methodological issues relevant to chronic epidemiologic research; causal inference; major environmental risk factors; genetic susceptibility; and examples of current research and critiques of literature. Prerequisite: 225 or consent of instructor.
2-3 units, alternate years, not given this year

HRP 230. Cancer Epidemiology—Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.
2-3 units, Win (West, D)

HRP 231. Epidemiology of Infectious Diseases—Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.
3 units, alternate years, not given this year

HRP 234. Foundations of Pharmacoepidemiology—Historical development of the field, the drug development process and pharmacoepidemiology's role in it, pharmacovigilance/drug safety systems, epidemiology in outcomes research, the role of pharmacoepidemiology in risk management, and classic examples of pharmacoepidemiologic investigations.
2-3 units, alternate years, not given this year

HRP 236. Epidemiology Research Seminar—Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.
1 unit, Aut, Win, Spr (Friedman, G; Henderson, V; Whittemore, A)

HRP 239. Understanding Statistical Models and their Social Science Applications—(Same as EDUC 260X, STATS 209.) Information that statistical modeling can provide in experimental and non-experimental settings emphasizing misconceptions in social science applications such as causal modeling. Text is *Statistical Models: Theory and Practice*, by David Freedman. See http://www-stat.stanford.edu/~rag/stat209. Prerequisite: intermediate-level statistical methods including multiple regression, logistic regression, and log-linear models.
3 units, Win (Rogosa, D)

HRP 251. Design and Conduct of Clinical Trials—The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.
3 units, Spr (Henderson, V; Lavori, P)

HRP 252. Outcomes Analysis—(Same as BIOMEDIN 251.) Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.
3 units, Spr (Bhattacharya, J)

HRP 256. Economics of Health and Medical Care—(Same as BIOMEDIN 156/256, ECON 126.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.
5 units, Aut (Bhattacharya, J)

HRP 258. Introduction to Probability and Statistics for Clinical Research—Open to medical and graduate students; required of medical students in the Clinical Research Scholarly Concentration. Tools to evaluate medical literature. Topics include random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis.
3 units, Spr (Sainani, K)

HRP 259. Introduction to Probability and Statistics for Epidemiology—Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.

4-5 units, Aut (Balise, R)

HRP 260A,B,C. Workshop in Biostatistics—(Same as STATS 260A,B,C) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of instructor.

1-2 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Olshen, R)*

HRP 261. Intermediate Biostatistics: Analysis of Discrete Data—(Same as BIOMEDIN 233, STATS 261.) The 2x2 table. Chi-square test. Fisher's exact test. Odds ratios. Sampling plans; case control and cohort studies. Series of 2x2 tables. Mantel Hantzel. Other tests. k x m tables. Matched data logistic models. Conditional logistic analysis, application to case-control data. Log-linear models. Generalized estimating equations for longitudinal data. Cell phones and car crashes: the crossover design. Special topics: generalized additive models, classification trees, bootstrap inference.

3 units, Win (Sainani, K)

HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis—(Same as STATS 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Sainani, K)

HRP 280,281,282. Spanish for Medical Students—(Same as SPANLANG 121M,122M,123M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, **280:** *Aut,* **281:** *Win (Corso, I),* **282:** *Spr (Corso, I)*

HRP 283. Health Services Research Core Seminar—Presentation of research in progress and tutorials in the field of health services research.

1 unit, Aut (Bundorf, M; Baker, L), Win (McDonald, K),
Spr (Baker, L; Hlatky, M), Sum (McDonald, K)

HRP 290. Advanced Spanish Conversation—Oral language skills covering pediatric, gynecological, and other specialty exams; patient health education and counseling; and diseases such as diabetes, asthma, and TB. Prerequisite: Spanish proficiency or consent of instructor.

3 units, Aut, Win, Spr (Corso, I)

HRP 299. Directed Reading in Health Research and Policy—Epidemiology, health services research, preventive medicine, medical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

HRP 351. Innovation and Management in Health Care—(Same as GSBGEN 351.) The workings of the major institutions such as hospitals, health insurance companies, HMOs, Medicare and Medicaid, federal regulators, and the medical establishment. National health expenditures and alternative models for healthcare financing and delivery. Trends in treatment innovations provided by biopharmaceuticals, medical devices, and surgical procedures; delivery innovations facilitated by information systems and new processes. Policy and business challenges raised by these innovations and the health care ecosystems they promote.

4 units, Win (Zenios, S; Chess, R)

HRP 391. Political Economy of Health Care in the United States—(Same as MGTECON 331, PUBLPOL 231.) The economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients' bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries' health care systems evolved, and what the U.S. can learn from their experiences.

4 units, Spr (Kessler, D; Bundorf, K)

HRP 392. Analysis of Costs, Risks, and Benefits of Health Care—(Same as BIOMEDIN 432, MGTECON 332) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber, A; Owens, D)

HRP 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

HEALTH SERVICES RESEARCH PROGRAM

Director: Mark Hlatky (Professor, Health Research and Policy, and Medicine)

Executive Committee: Laurence Baker (Associate Professor, Health Research and Policy), M. Kate Bundorf (Assistant Professor, Health Research and Policy), Alan Garber (Professor, Medicine), Mary Goldstein (Professor, Medicine), Mark Hlatky (Professor, Health Research and Policy, and Medicine), Douglas Owens (Professor, Medicine)

Participating Faculty and Staff by Department:

Anesthesia: Alex Macario (Professor)

Economics: Mark McClellan (Associate Professor, on leave)

Business: Alain Enthoven (Professor, emeritus), Daniel Kessler (Professor)

Health Research and Policy: Laurence Baker (Associate Professor), Paul Barnett (Consulting Associate Professor), M. Kate Bundorf (Assistant Professor), Victor Fuchs (Professor, emeritus), Trevor Hastie (Professor), Mark Hlatky (Professor), Philip Lavori (Professor), Richard Olshen (Professor), Ciaran Phibbs (Consulting Associate Professor), Joseph Selby (Consulting Professor), Robert Tibshirani (Professor)

Law: Henry Greely (Professor)

Management Science and Engineering: Margaret Brandeau (Professor)

Medicine: Jay Bhattacharya (Assistant Professor), Alan Garber (Professor), Mary Goldstein (Professor), Michael Gould (Associate Professor), Paul Heidenreich (Associate Professor), Mark Hlatky (Professor), Mark McClellan (Associate Professor, on leave), Grant Miller (Assistant Professor) Douglas Owens (Professor)

Pediatrics: Paul Wise (Professor)

Psychiatry: Rudolph Moos (Professor)

Sociology: Richard Scott (Professor, emeritus)

Program Offices: HRP Redwood Building, Room T138C
Mail Code: 94305-5405
Phone: (650) 723-5456
Email: hsr-program@med.stanford.edu
Web Site: http://med.stanford.edu/hsr/

GRADUATE PROGRAM

MASTER OF SCIENCE

The Master's Degree Program in Health Services Research seeks to train students in the quantitative analysis of issues in health and medical care. The program emphasizes an individually designed program of course work and completion of a master's project under the mentorship of a faculty member. The typical student in the program is either a physician who has completed residency training and is preparing for a research career, or a student with a strong background in policy analysis who wishes to focus on problems in health or medical care. Faculty interests include outcomes research, health economics, health care organization, health care access, quality of care, decision analysis, clinical guidelines, and assessment of patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of issues in health services research and the quantitative skills necessary for research in this area. Students must take at least 45 units of course work (9 of the units may be double-counted to meet other degree requirements) and write a University thesis. The course work requirements are:

1. At least 8 units from the following group of Health Research and Policy (HRP) core courses: 256, Economics of Health and Medical Care; 391, Political Economy of Health Care in the United States; 392, Analysis of Costs, Risks, and Benefits in Health Care.
2. At least 6 units of graduate-level statistics courses. The sequence of HRP 261 and 262 is strongly recommended.
3. At least 3 units of HRP 283, Health Services Research Core Seminar.
4. At least 15 units of HRP research credit from 299, Directed Reading, or 399, Research.
5. An additional set of approved elective courses to complete the program total of at least 45 units.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T138C, Stanford, California 94305-5405.

COURSES

The course listings of individual departments participating in the Health Services Research Program should be consulted for complete descriptions.

IMMUNOLOGY PROGRAM

Chair, Executive Committee for the Immunology Program: Lawrence Steinman (Professor, Neurology and Neurological Sciences)

Director for Immunology Program: K. Christopher Garcia (Associate Professor, Microbiology and Immunology)

Director for Clinical Immunology Program: C. Garrison Fathman (Medicine/Immunology and Rheumatology)

Participating Departments and Faculty:

Biological Sciences: Anthony W. De Tomaso (Assistant Professor), Patricia P. Jones (Professor)

Chemistry: Harden M. McConnell (Professor, emeritus)*

Genetics: Leonard A. Herzenberg (Professor, emeritus), Lenore A. Herzenberg (Professor, Research), Man-wah Tan (Assistant Professor)

Medicine/Bone Marrow Transplantation Program: Robert Negrin (Professor), David Miklos (Assistant Professor), Judith Shizuru (Associate Professor)

Medicine/Endocrinology: Ajay Chawla (Assistant Professor)

Medicine/Hematology: Calvin Kuo (Assistant Professor), Peter Lee (Associate Professor)

Medicine/Immunology and Rheumatology: C. Garrison Fathman (Professor), William Robinson (Assistant Professor), Samuel Strober (Professor), Paul J. Utz (Associate Professor)

Medicine/Oncology: Gilbert Chu (Professor, and Biochemistry), Dean Felsher (Associate Professor, and Pathology), Ronald Levy (Professor), Shoshana Levy (Professor, Research)

Microbiology and Immunology: Chang-Zheng Chen (Assistant Professor), Yueh-Hsiu Chien (Professor), Mark M. Davis (Professor), Hugh McDevitt (Professor), Garry P. Nolan (Professor), David Schneider (Assistant Professor)

Molecular and Cellular Physiology: K. Christopher Garcia (Associate Professor, and Structural Biology), Richard S. Lewis (Professor)

Neurology and Neurological Sciences: Lawrence Steinman (Professor, and Pediatrics), Tony Wyss-Coray (Associate Professor)

Pathology: Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medicine/Immunology and Rheumatology), Magali Fontaine (Assistant Professor), Joseph S. Lipsick (Professor), Sara Michie (Associate Professor), Raymond A. Sobel (Professor), Irving L. Weissman (Professor, and Developmental Biology)

Pediatrics: Ann Arvin (Professor, and Microbiology and Immunology), Christopher Contag (Associate Professor, Research, and Microbiology and Immunology, and Radiology), David B. Lewis (Professor), Elizabeth Mellins (Associate Professor)

Psychiatry and Behavioral Sciences: Firdaus Dhabhar (Associate Professor)

Structural Biology: Peter Parham (Professor, and Microbiology and Immunology)

Surgery: Sheri Krams (Associate Professor, Research), Olivia Martinez (Professor, Research)

---

* Recalled to active duty

Mail Code: 94305-5121
Phone: (650) 725-5076
Email: mopan@stanford.edu
Web Site: http://immunol.stanford.edu/

Courses given in Immunology have the subject code IMMUNOL. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

MASTER OF SCIENCE

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology, assuming completion of appropriate requirements. Students must complete:

1. Three full-tuition quarters of residency as a graduate student at Stanford.
2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level.
3. 2-3 quarters of graduate research (IMMUNOL 399), consisting of rotations in the labs of 3 faculty members.
4. Course work in Immunology as follows: basic immunology (BIOSCI 230, IMMUNOL 205 or equivalent), advanced Immunology such as IMMUNOL 201, 200, and 203. In addition, the student may take one elective course. Some possible electives are: MPHA 210, Signal Transduction Pathways and Networks, SBIO 241, Biological Macromolecules, Cancer Biology, CBIO 241, or DBIO 210, Developmental Biology. Other required core courses are: GENE 203, Advanced Genetics, IMMUNOL 215, Principles of Biological Technologies, MCP 221, Cell Biology of Physiological Processes.
5. Graduate-level biochemistry and molecular biology (BIOC 187, 200, 201, or equivalents).
6. Course work in IMMUNOL 311, Seminar in Immunology, and IMMUNOL 311A, Seminar Discussion in Immunology.
7. Participation in the Immunology journal club (IMMUNOL 305), and attendance at the weekly Immunology seminar and at the annual Stanford Immunology Scientific Conference.
8. The qualifying examination process in Immunology before admission to Ph.D. candidacy has two parts: an oral exam on many fields in immunology, part I, in the last week in June, first year; the thesis proposal, part II, before December 17th, second year. In addition, an oral presentation is required on the research of one rotation, mid-July, first year.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop investigators who have a solid foundation in immunology and related sciences to carry out innovative research. The program features a flexible choice of courses and seminars combined with extensive research training in the laboratories of participating Immunology faculty.

Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 4. Applications are evaluated by the Immunology predoctoral committee based upon: GRE scores; grades; evi dence of research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Subject tests are not required. Interested Stanford medical students are welcome to apply to the program and should submit a formal application by December 4.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but Immunology graduate students may continue to apply for outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship have an improved chance of acceptance into the program. On matriculation, each student is assisted by a first-year advising committee in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including at least two Immunology faculty, and including the dissertation adviser, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a three-year program of study that includes 72 units of graduate course work and research. At least 3 units must be taken with each of four different Stanford faculty members.

The requirements for the Ph.D. degree in Immunology include:

1. Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.
2. Completion of the following courses (or their equivalents from undergraduate work):
   a) Basic Immunology (BIOSCI 230)
   b) Advanced Immunology (IMMUNOL 201, 202, 203)
   c) Biochemistry and Molecular Biology (BIOC 187, 200, or 201)
   d) Advanced Genetics (GENE 203)
   e) Cell Biology of Physiological Processes (MCP 221)
   f) Biostatistics (BIOSCI 141)
   g) Principles of Biological Technologies (IMMUNOL 215)
   h) One elective course; suggested courses include: MPHA 210, Signal Transduction Pathways and Networks; SBIO 241, Biological Macromolecules; CBIO 241, Cancer Biology; DBIO 210, Developmental Biology.
   i) Responsible Conduct in Science (MED 255)
   j) Immunology Journal Club (IMMUNOL 305)
3. First-year students are required to take both the IMMUNOL 311, Seminar in Immunology, and the companion course, IMMUNOL 311A, Seminar Discussion in Immunology, and participate in IMMUNOL 305, Immunology Journal Club. Students in their second year and above must participate in the IMMUNOL 311, Seminar in Immunology and may opt to take the companion course, IMMUNOL 311A. Students who have not yet achieved TGR status must register for 1 unit for IMMUNOL 311. Students attend the weekly Immunology Seminar Series (4-5 p.m., Tuesdays). Students read the papers of and have dinner with visiting seminar speakers two or three times each quarter, and meet to discuss the material.
4. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.
5. Completion in the first year of three one quarter rotations. Two weeks after taking the oral examination (part 1 of the qualifying examination) at the end of June, students, including MSTP and M.D./Ph.D. students, present their lab rotation research projects to the predoctoral committee. Medical students who have declared Immunology as their scholarly concentration major, and who are accepted into the Ph.D. program, must do at least three rotations.
6. Teaching assistantship in two Immunology courses (IMMUNOL 290, Teaching in Immunology). A teaching assistantship requirement may be fulfilled by proposing a graduate student-initiated course IMMUNOL 315, Topics in Immunology. Before fulfilling their teaching assistantships, Immunology graduate students are required to undertake a teaching assistantship workshop offered at the beginning of every quarter by the Center for Teaching and Learning. MSTP students may submit one of their medical school TAships as partial fulfillment of the TA requirement for the Ph.D. in immunology.
7. For admission to candidacy, completion of two requirements by the end of the Autumn Quarter of the second year: a rotation presentation on one of three lab rotations, and a comprehensive oral examination in immunology and related biomedical sciences must be completed satisfactorily by the middle of Summer Quarter of the first year. Finally, students must prepare and defend a research proposal on their dissertation research by December 17, the end of Autumn Quarter of their second year. Administration and evaluation of these requirements is the responsibility of the student's dissertation committee.
8. Participation (through regular attendance and oral presentation) in the student-run immunology journal clubs for at least the first 2 years (IMMUNOL 305). First- through fourth-year students are also expected to attend the graduate students' journal club, the Tuesday evening immunology seminars, and the annual Stanford Immunology Scientific Conference at Asilomar. Students are required to give one poster and one scientific presentation at these annual Stanford Immunology scientific conferences.
9. Passing the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.
10. Completion of a Ph.D. dissertation, resulting from independent investigation and constituting a contribution to knowledge in the area of immunology.

COURSES

Course and lab instruction in the Immunology Program conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

IMMUNOL 201. Advanced Immunology I—(Same as MI 211.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

IMMUNOL 202. Advanced Immunology II—(Same as MI 212.) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201.

3 units, Spr (Garcia, K)

IMMUNOL 203. Advanced Immunology III—Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212.

3 units, Sum (Staff)

IMMUNOL 205. Immunology in Health and Disease—Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.
2-4 units, Win (Lewis, D)

IMMUNOL 215. Principles of Biological Technologies—(Same as MI 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.
3 units, Spr (Kirkegaard, K)

IMMUNOL 230. Introduction to Medicine—For graduate students in biological sciences, bioengineering, and biomedical informatics. Information and approaches used by physicians to understand human disease. Focus is on diabetes; attention to other diseases. Guest medical school and outside faculty. Field trip to anatomy lab, clinics, and the clinical laboratory. Quarter-long, team projects addressing current medical issues.
2-4 units, Spr (Mellins, E; Aye, T)

IMMUNOL 230A. Independent Study in Medical Sciences—For doctoral students. Completion of team projects begun in 230.
1-4 units, Aut, Win, Spr, Sum (Mellins, E; Aye, T)

IMMUNOL 290. Teaching in Immunology—Practical experience in teaching by serving as a teaching assistant in an immunology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 299. Directed Reading in Immunology—Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 305. Immunology Journal Club—Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.
1 unit, Aut, Win, Spr (Steinman, L)

IMMUNOL 311. Seminar in Immunology—Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in Immunology. Current research topics.
1 unit, Aut, Win, Spr (Steinman, L; Fathman, C)

IMMUNOL 311A. Discussions in Immunology—Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.
1 unit, Aut, Win, Spr (Steinman, L; Fathman, C)

IMMUNOL 315. Special Topics in Immunology—Graduate student-initiated seminar in journal club style. Previous topics include evolutionary immunology and the principles of vaccine development, cytokines, tumor immunology, and neuroimmunology. May be repeated for credit.
1-4 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 399. Graduate Research—For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in Immunology.
1-15 units, Aut, Win, Spr, Sum (Staff)

MICROBIOLOGY AND IMMUNOLOGY

Emeriti: (Professors) Edward S. Mocarski, Sidney Raffel, Leon T. Rosenberg
Chair: Karla Kirkegaard
Associate Chair: Hugh O. McDevitt
Professors: Ann Arvin, Helen Blau, John C. Boothroyd, Yueh-Hsiu Chien, Mark M. Davis, Stanley Falkow, Stephen J. Galli, Harry B. Greenberg, Karla Kirkegaard, A. C. Matin, Hugh O. McDevitt, Peter Parham, Phillip Pizzo, Charles Prober, Peter Sarnow, Gary K. Schoolnik, Lucy S. Tompkins
Associate Professors: Christopher Contag, Garry Nolan, David Relman, Julie Theriot
Assistant Professors: Matthew Bogyo, Chang-Zheng Chen, Denise Monack, David Schneider, Upinder Singh
Associate Professor (Teaching): Robert D. Siegel

Department Offices: D300 Fairchild Building, 299 Campus Drive
Mail Code: 94305-5124
Phone: (650) 725-8541
Email: micro_immuno@lists.stanford.edu
Web Site: http://cmgm.stanford.edu/micro/

Courses given in Microbiology and Immunology have the subject code MI. For a complete list of subject codes, see Appendix.

The Department of Microbiology and Immunology offers a program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas: host/parasite interactions; and the function of the immune system. Laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

GRADUATE PROGRAMS

MASTER OF SCIENCE

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master's degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Application, Admission, and Financial Aid—Prospective Ph.D. candidates should have completed a bachelor's degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 4.

Applicants must file a report of scores on the general subject tests of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford Graduate Fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

Program for Graduate Study—The Ph.D. degree requires course work and independent research demonstrating an individual's creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member; together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student's undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses are requirements of the department: MI 215, Principles of Biological Techniques; MI 209, Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites, Part I; and MI 210, Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites, Part II. Three courses are part of the core curriculum that is required of many graduate students in Stanford Biosciences: BIOSCI 203 /DBIO 203 /GENE 203, Advanced Genetics; BIOSCI 230, Molecular and Cellular Immunology; and MCP 221/BIOSCI 214, Cell Biology of Physiological Processes.

In Autumn Quarter of the second year, a research proposal based on the student's own thesis topic is defended to the thesis committee. In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. This qualifying examination proposal is due to the graduate program steering committee by May 1. Based on successful performance on this proposal, the student is admitted to candidacy. Teaching experience and training are also part of the graduate curriculum. Graduate students are required to act as teaching assistants for two courses. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.

COURSES

MI 25N. Modern Plagues—Stanford Introductory Seminar. Preference to freshmen. Molecular and medical aspects of new and old microorganisms that infect humans. Goal is to place modern human plagues in scientific and historical perspective. Factors that lead to emergence and control. Write-2

3 units, Spr (Boothroyd, J)

MI 104/204. Innate Immunology—(Undergraduates register for 104.) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

3 units, Spr (Schneider, D)

MI 115B. The Vaccine Revolution—(Same as HUMBIO 155B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 115A.

6 units, alternate years, not given this year

MI 155H. Humans and Viruses I—(Same as HUMBIO 155H.) Intensive introduction to Human Virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, Aut (Siegel, R)

MI 155V. Humans and Viruses II—Intensive introduction to Human Virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis on host pathogen interactions and policy issues. Topics: measles and viral epidemiology, rotavirus and world health, rabies and infections of the brain, HPV and cancer -causing viruses, herpes simplex and viral latency, CMV and viral teratogenesis, retrovirology and endogenous viral sequences, HIV and viral treatement, viral hepatitis and chronic infections, prions and diseases of life style. Prerequisite: 155H.

6 units, Win (Siegel, R)

MI 185. Topics in Microbiology—Topics include diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Student papers for presentation on current topics such as antibiotic resistance and molecular approaches to bioremediation. Prerequisites: CHEM 31X, Biological Sciences core.

3 units, Win (Matin, A)

MI 198. Directed Reading in Microbiology and Immunology—Fields of study are decided in consultation with sponsoring professor. Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

MI 199. Undergraduate Research—Investigations sponsored by individual faculty members. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

MI 209. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part I—For graduate students and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. Emphasis is on mechanisms to establish infection in the host and responses of the host to infection. Current literature. Prerequisite: background in biochemistry and molecular biology.

4 units, Win (Sarnow, P)

MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part II—For graduate and medical students, and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Current literature.

4 units, Spr (Chen, C)

MI 211. Advanced Immunology I—(Same as IMMUNOL 201.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in immune system dysfunction. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

MI 212. Advanced Immunology II—(Same as IMMUNOL 202.) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201.

3 units, Spr (Garcia, K)

MI 214. Biodefense and Biosecurity—Science and policy behind American and international biosecurity and biodefense. Is the international community prepared to defend against a naturally-occurring disease or a bioterror attack? Topics include the scope of the problem, agent pathogenesis, threat of biological weapons, responding to a biological attack, microbial forensics, international health, the threat of naturally emerging infectious disease, and policy against these threats. Guest lecturers.

2 units, offered occasionally

MI 215. Principles of Biological Technologies—(Same as IMMUNOL 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.

3 units, Spr (Kirkegaard, K)

MI 232. Topics in Regenerative Medicine—(Same as DBIO 232.) Forum. Students and researchers discuss current developments in regenerative medicine at Stanford to spark collaboration. Topics include novel applications in biological and chemical engineering, stem cell biology, biotechnology, and human disease. May be repeated for credit.
2 units, Aut, Win, Spr (Blau, H; Fuller, M)

MI 233. The Biology of Small Modulatory RNAs—(Same as GENE 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.
2 units, Aut (Fire, A; Chen, C), alternate years, not given next year

MI 250. Frontiers in Microbiology and Immunology—Required of first- and second-year students in Microbiology and Immunology. How to evaluate biological research. Held in conjunction with the Microbiology and Immunology Friday noon seminar series. Before the seminar, students and faculty discuss one or more papers from the speaker's primary research literature on a related topic. After the seminar, students meet informally with the speaker to discuss their research.
1 unit, Aut, Win, Spr (Schneider, D)

MI 299. Directed Reading in Microbiology and Immunology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MI 399. Graduate Research—Students who have completed the necessary foundation courses undertake investigations in general bacteriology, bacterial physiology and ecology, bacterial genetics, microbial pathogenicity, immunology, parasitology, or virology sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MOLECULAR AND CELLULAR PHYSIOLOGY

Chair: Richard S. Lewis
Professors: Axel T. Brunger, Brian K. Kobilka, Richard S. Lewis, W. James Nelson, Stephen J. Smith, Richard W. Tsien, William Weis
Associate Professors: Christopher Garcia, V. Daniel Madison
Assistant Professors: Miriam Goodman, Merritt Maduke
Courtesy Associate Professor: Stefan Heller, John Huguenard, Anson W. Lowe, Tony Ricci
Courtesy Assistant Professor: Richard J. Reimer

Department Offices: Beckman Center, B100
Mail Code: 94305-5345
Phone: (650) 725-7554
Email: schantae@stanford.edu
Web Site: http://mcp.stanford.edu

Courses given in Molecular and Cellular Physiology have the subject code MCP. For a complete list of subject codes, see Appendix.

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and solution NMR, electrophysiology, and *in vitro* and *in vivo* imaging with confocal and multi-photon microscopy.

GRADUATE PROGRAMS

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

DOCTOR OF PHILOSOPHY

Students with undergraduate or master's degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application.

Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions, the Registrar's Office.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses is required. These include four graduate-level courses (200-300 series) and a choice of two out of these three courses: MCP 221, MCP 255, and MCP 256. Students are also required to take the Molecular and Cellular Physiology seminar/Research In Progress series. Each student presents a talk on research in progress to the department at least every other year, starting their second year. Acceptable grades for all course work must be a minimum of 'B-', and at least two grades equal to 'A-' or above are necessary (but not sufficient) for continuation in the program.

Qualifying Examination—At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examinations may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

Dissertation and University Oral Examination—The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

Advisers and Advisory Committees—A graduate advisory committee, currently Professors Lewis and Madison, advises students during the period before the formation of their qualifying committees.

Financial Aid—Students may be funded by their advisers' research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources such as NIH and NSF.

COURSES

Course and lab instruction in the Department of Molecular and Cellular Physiology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

MCP 100Q. The Hippocampus as a Window to the Mind—Stanford Introductory Seminar. Preference to sophomores. Electrical physiology of the brain using the hippocampus as a model system. The seminar builds from basic anatomical and electrical principles of brain structure and function, through the electrical properties of individual neurons and simple neuronal circuits, to the nature of behaviors that emerge from these more basic properties. Also discusses other brain regions where the hippocampal model provides insight into specific neuronal functions. Culminates in a discussion of neuronal disorders such as epilepsy, drug addiction, and obsessive-compulsive disorder that can be better understood on a basis of knowledge of the hippocampal model.

3 units, Spr (Madison, V)

MCP 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 200. Cardiovascular Physiology—Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.

5 units, Spr (Kobilka, B)

MCP 213. Special Topics in Molecular and Cellular Physiology—Introductory and advanced physiological topics agreed on by an instructor and students. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 216. Genetic Analysis of Behavior—(Same as NBIO 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, Win (Goodman, M; Clanindin, T)

MCP 222. Imaging: Biological Light Microscopy—(Same as BIOSCI 152, NBIO 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core.

3 units, Spr (Smith, S; Dolmetsch, R)

MCP 232. Advanced Imaging Lab in Biophysics—(Same as BIOSCI 132/232, BIOPHYS 232.) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology—Open to graduate and medical students, and advanced undergraduates. Dynamic aspects of cell behavior and function, including cellular energetics, homeostasis, heterogeneity of membranes, structure and function of organelles, solute and water transport, signaling and motility. Emphasis is on the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Mathematical models of cell function. Student presentations.

4 units, Spr (Goodman, M; Maduke, M)

MCP 258. Information and Signaling Mechanisms in Neurons and Circuits—(Same as NBIO 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, Aut (Tsien, R; Baccus, S)

MCP 299. Directed Reading in Molecular and Cellular Physiology—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 399. Graduate Research—Investigations sponsored by individual faculty members. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

NEUROBIOLOGY

Emeritus: Denis Baylor, Eric Shooter, Lubert Stryer
Chair: William T. Newsome
Professors: Ben Barres, Eric I. Knudsen, Uel J. McMahan, William T. Newsome
Assistant Professors: Stephen Baccus, Thomas Clandinin, Ricardo Dolmetsch, Tirin Moore, Jennifer Raymond

Department Offices: Fairchild Building, Second Floor
Mail Code: 94305-5125
Web Site: http://www.stanford.edu/dept/nbio/

Courses given in Neurobiology have the subject code NBIO. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include information processing in vertebrate retina; structure, function, and development of auditory and visual systems; development and regeneration in the central and peripheral nervous system; neural mechanisms mediating higher nervous system functions, including perception, learning, attention and decision making.

COURSES

Course and lab instruction in the Department of Neurobiology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The department offers a one quarter course (NBIO 206) on the structure and function of the nervous system, which is open to medical and graduate students and advanced undergraduates. Advanced courses are open to students who have completed the basic course.

NBIO 101/201. Social and Ethical Issues in the Neurosciences—(Graduate students register for 201.) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biological Sciences, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Hurlbut, W; Newsome, W)

NBIO 198. Directed Reading in Neurobiology—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

NBIO 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

NBIO 206. The Nervous System—Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.
7-8 units, Win (Clandinin, T)

NBIO 216. Genetic Analysis of Behavior—(Same as MCP 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.
4 units, Win (Goodman, M; Clandinin, T)

NBIO 218. Neural Basis of Behavior—Advanced seminar. The principles of information processing in the vertebrate central nervous system, and the relationship of functional properties of neural systems with perception and behavior. Emphasis is on the visual and auditory systems. Original papers; student presentations. Prerequisite: 206 or consent of instructor.
4 units, Spr (Raymond, J; Knudsen, E), alternate years, not given next year

NBIO 220. Central Mechanisms in Vision-based Cognition—Contemporary visual neuroscience, emphasizing the neural mechanisms underlying primate vision and visually guided behavior. Seven foundational topics in visual neuroscience; current papers concerning each topic. Student presentations. Computer-based demonstration exercises.
2-4 units, alternate years, not given this year (Newsome, W; Moore, T)

NBIO 221. Frontiers in Translational Medicine—Small group course for first-year MSTP and M.D./Ph.D. students only. Pathways for combining science and medicine during graduate and postdoctoral training and in one's career. Practical aspects of translational medicine. Guest lecturers are physician-scientists who have advanced the frontiers of translational medicine, including Drs. Gilbert Chu, Jamie Topper, Irv Weissman, Ching Wang, Linda Giudice, Geoff Duyk, William Mobley, Judy Shizuru, and David Cox. Prerequisite: consent of instructor.
1 unit, Spr (Barres, B)

NBIO 222. Imaging: Biological Light Microscopy—(Same as BIOSCI 152, MCP 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core.
3 units, Spr (Smith, S; Dolmetsch, R)

NBIO 227. Understanding Techniques in Neuroscience—Techniques commonly used in neuroscience, including molecular/genetic, electrophysiological, and whole brain imaging. Presentations by senior graduate students and examples from the literature. Optional laboratory demonstrations.
2 units, Aut (Carter, M; Villeda, S; Shieh, J)

NBIO 254. Molecular and Cellular Neurobiology—(Same as BIOSCI 154/254.) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences core or equivalent, or consent of instructors.
4-5 units, alternate years, not given this year

NBIO 258. Information and Signaling Mechanisms in Neurons and Circuits—(Same as MCP 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.
5 units, Aut (Baccus,S; Tsien R)

NBIO 299. Directed Reading in Neurobiology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

NBIO 300. Professional Development and Integrity in Neuroscience—Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.
1-2 units, Aut, Win, Spr (Dolmetsch, R)

NBIO 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

PSYCH 204A. Computational Neuroimaging
1-3 units, Spr (Wandell, B)

PSYCH 250. High-level Vision
1-3 units, Spr (Grill-Spector, K), alternate years, not given next year

NEUROSCIENCES PROGRAM

Director: John R. Huguenard (Professor, Neurology and Neurological Sciences)

Committee: Corinna Darian-Smith, Craig Garner, Miriam Goodman, Shaul Hestrin, John R. Huguenard, Jennifer Raymond, Kang Shen, Krishna Shenoy, Anthony Wagner

Participating Faculty:

Anesthesia: Rona Giffard (Professor), M. Bruce MacIver (Associate Professor, Research), Sean Mackey (Assistant Professor), David Yeomans (Associate Professor)

Applied Physics: Mark Schnitzer (Assistant Professor)

Bioengineering: Kwabena Boahen (Associate Professor), Karl Deisseroth (Assistant Professor)

Biological Sciences: Bruce Baker (Professor), Russell D. Fernald (Professor), William F. Gilly (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Professor), Susan McConnell (Professor), Robert M. Sapolsky (Professor), Mark Schnitzer (Assistant Professor), Kang Shen (Assistant Professor), Stuart Thompson (Professor)

Chemical and Systems Biology: Tobias Meyer (Professor), Daria Mochly-Rosen (Professor)

Comparative Medicine: Paul S. Buckmaster (Associate Professor), Corinna Darian-Smith (Assistant Professor), Shaul Hestrin (Associate Professor)

Developmental Biology: Ben Barres (Professor), Matthew P. Scott (Professor)

Electrical Engineering: Krishna Shenoy (Assistant Professor)

Genetics: Anne Brunet (Assistant Professor), David R. Cox (Professor)

Microbiology and Immunology: Helen Blau (Professor)

Molecular and Cellular Physiology: Miriam B. Goodman (Assistant Professor), Brian Kobilka (Professor), Richard S. Lewis (Professor), V. Daniel Madison (Associate Professor), Merritt C. Maduke (Assistant Professor), Stephen Smith (Professor), Richard Tsien (Professor)

Neurobiology: Stephen Baccus (Assistant Professor), Ben Barres (Professor), Tom Clandinin (Assistant Professor), Ricardo Dolmetsch (Assistant Professor), Eric I. Knudsen (Professor), U. J. McMahan (Professor), Tirin Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor)

Neurology and Neurological Sciences: Ben Barres (Professor), Paul Buckmaster (Associate Professor), Robert S. Fisher (Professor), Ting-Ting Huang (Assistant Professor, Research), John A. Huguenard (Associate Professor), Frank Longo (Professor), William C. Mobley (Professor), David A. Prince (Professor), Thomas A. Rando (Associate Professor), Lawrence Recht (Professor), Richard Reimer (Assistant Professor), Terence Sanger (Assistant Professor), Robert M. Sapolsky (Professor), Lawrence Steinman (Professor), Tony Wyss-Coray (Associate Professor, Research), Yanmin Yang (Assistant Professor)

Neurosurgery: Pak H. Chan (Professor), Theo Palmer (Assistant Professor), Gary K. Steinberg (Professor)

Otolaryngology: Stefan Heller (Associate Professor), Anthony Ricci (Associate Professor)

Pathology: Isabella Graef (Assistant Professor), Bingwei Lu (Assistant Professor), Raymond Sobel (Professor)

Pediatrics: Judy Illes (Assistant Professor), Anna Penn (Assistant Professor), Lawrence Steinman (Professor)

Psychiatry and Behavioral Sciences: Karl Deisseroth (Assistant Professor), Luis de Lecea (Associate Professor), Craig Garner (Professor), Terrence A. Ketter (Associate Professor), Robert C. Malenka (Professor), Vinod Menon (Associate Professor, Research), Emmanuel Mignot (Professor), Allan L. Reiss (Professor), Edith Sullivan (Professor, Research)

Psychology: Lera Boroditsky (Assistant Professor), Ian Gotlib (Professor), Kalanit Grill-Spector (Assistant Professor), James J. Gross (Associate Professor), Brian Knutson (Assistant Professor), James McClelland (Professor), Anthony Wagner (Assistant Professor), Brian Wandell (Professor), Jeffrey J. Wine (Professor)

Radiology: Gary H. Glover (Professor)

Structural Biology: U. J. McMahan (Professor)

Program Offices: Alway Building, M-103D
Mail Code: 94305-5121
Phone: (650) 723-9855
Web Site: http://neuroscience.stanford.edu/

Courses given in the Neurosciences Program have the subject code NEPR. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 16 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form.

Since students enter with differing backgrounds, and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction to neurobiology (NBIO 206 or equivalent). Students must also take five advanced courses, four of which must be distributed among four of the following core areas: systems and behavioral neuroscience, molecular and cellular neuroscience, developmental neuroscience, clinical neuroscience, and computational neuroscience. The fifth advanced course is chosen by the student in an area related to the student's research interest, and may be selected from outside the Neurosciences core with prior approval from the program director and the student's adviser.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student's advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation, which is the result of independent investigation contributing to knowledge in an area of neuroscience, and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

COURSES

Course and lab instruction in the Neurosciences Program conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

NEPR 299. Directed Reading in Neurosciences—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

NEPR 399. Graduate Research—Investigations sponsored by individual faculty members.
1-18 units, Aut, Win, Spr, Sum (Staff)

OBSTETRICS AND GYNECOLOGY

Chair: Jonathan S. Berek

Courses given in Gynecology have the subject code OBGYN. For a complete list of subject codes, see Appendix.

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.

COURSES

OBGYN 78Q. Darwin's Evolution and Genomic Revolution—Stanford Introductory Seminar. Preference to sophomores. Topics include evolution based on fossil and genetic evidence, mechanisms of natural selection, the impact of genomic revolution on the study of gene evolution, new gene discovery, human-accelerated selection, Darwinian medicine, and the social implications of evolution.

3 units, Win (Hsueh, A)

OBGYN 199. Undergraduate Research in Reproductive Biology—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

OBGYN 202. Assisted Reproductive Technologies—(Same as DBIO 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization covering micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Prerequisite: DBIO 201 recommended, or consent of instructors.

1-3 units, Win (Porzig, E; Behr, B)

OBGYN 399. Graduate Research - Reproductive Biology—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

PATHOLOGY

Emeriti: (Professor) Ronald Dorfman; Richard L. Kempson; *(Professor, Clinical)* P. Joanne Cornbleet, Lawrence F. Eng, Luis Fajardo, Heinz Furthmayr, F. Carl Grumet

Chair: Stephen J. Galli

Professors: Daniel Arber, Ellen Jo Baron, Gerald J. Berry, Eugene C. Butcher, Michael L. Cleary, Gerald R. Crabtree, Edgar G. Engleman, Andrew Fire, Steven Foung, Stephen J. Galli, Lawrence Tim Goodnough, Michael R. Hendrickson, Sabine Kohler, Jon C. Kosek, Joseph S. Lipsick, Robert V. Rouse, Richard K. Sibley, Raymond Sobel, Howard H. Sussman, Dolly Tyan, Matt van de Rijn, Hannes Vogel, Teresa S. F. Wang, Roger A. Warnke, Irving L. Weissman, James Zehnder

Associate Professors: Jeffrey D. Axelrod, Athena M. Cherry, Tina Cowan, James D. Faix, Dean Felsher, Susan A. Galel, Sharon M. Geaghan, Peter K. Jackson, Teri A. Longacre, Sara A. Michie, Yasodha Natkunam, Bruce Patterson, Donald P. Regula, Arend Sidow

Assistant Professors: Matthew Bogyo, Raffick Bowen, Andrew Connolly, Soheil Dadras, Magali Fontaine, Tracy George, John P. Higgins, Kristin Jensen, Neeraja Kambham, Christina Kong, Bingwei Lu, Jonathan R. Pollack, Iris Schrijver, Erich Schwartz, Uma Sundram, Robert West

Courtesy Professors: Bertil Glader, Lucy Tompkins

Courtesy Associate Professors: Donna Bouley, Robert Shafer

Clinician Educators: Susan Atwater, David Bingham, Barbara Egbert, Dita Gratzinger, Terri Haddix, Melanie Manning, Reetesh Pai, Shalini Pereira, Run Shi, Brent Tan, Maurene Viele

Instructors: Niaz Banaei, Daniel Kraft, Michaela Liedtke

Adjunct Clinical Faculty: Robert Archibald, Jerome S. Burke, Glenn Cockerham, Stephen Shi-Hua Chen, Seth Haber, Maie K. Herrick, Paul W. Herrmann, Simon Hirschl, Charles Lombard, John E. McNeal, Judy Melinek, Joseph O'Hara, Mahendra Ranchod, Thomas W. Rogers, Joshua Sickel

Department Offices: Medical Center, Lane Building, L-235
Mail Code: 94305-5324
Phone: (650) 723-5255
Web Site: http://pathology.stanford.edu

Courses given in Pathology have the subject code PATH. For a complete list of subject codes, see Appendix.

PROGRAMS OF STUDY

The Department of Pathology offers advanced courses in aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to department-based or interdepartmental graduate programs may elect to pursue their thesis requirements in the department's research laboratories. The discipline of pathology has served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of human disease and the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department's research interests extend from fundamental molecular biology to clinical-pathological correlations, with an emphasis on experimental oncology.

Investigation in the department includes basic studies in areas using molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architecture, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, mechanisms of immune and other responses in the central nervous system, and neuro-degenerative diseases. Various studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available at http://pathology.stanford.edu.

COURSES

Course and lab instruction in the Department of Pathology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

PATH 101. Cancer Biology—(Same as CBIO 101.) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisite: Biological Sciences or Human Biology core or equivalent, or consent of instructor.

4 units, Spr (Lipsick, J)

PATH 103Q. Lymphocyte Migration—Stanford Introductory Seminar. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Known as lymphocyte migration, this process involves a complex series of adhesion, activation and diapedesis events. The cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The roles of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.
1 unit, Aut (Michie, S)

PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry—Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.
3 units, Spr (Regula, D)

PATH 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

PATH 206. Epigenetics—(Same as GENE 206.) For graduate students; undergraduates by consent of instructor. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in Drosophila in the 20s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: background in genetics and molecular biology.
2 units, Win (Lipsick, J)

PATH 210. Stem Cells in Development and Disease—Molecular and cellular mechanisms underlying the basic self-renewal and differentiation properties of stem cells in multiple tissues and organisms. How abnormal stem cell behavior may contribute to diseases such as cancer. How to manipulate stem cell behavior in vitro or in vivo for therapeutic purposes. Classical papers and recent literatures in the field of stem cell biology. Open to graduate, medical, and advanced undergraduate students. Prerequisite: consent of instructor.
1-2 units, Spr (Lu, B)

PATH 218. Computational Analysis of Biological Images—Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.
2 units, alternate years, not given this year

PATH 233. The Biology of Small Modulatory RNAs—(Same as GENE 233, MI 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.
2 units, Aut (Fire, A; Chen, C), alternate years, not given next year

PATH 296. Stem Cell Biology and Regenerative Medicine—(Same as DBIO 296.) For graduate and medical students. Embryonic and adult stem cells, including origin, regulation, self-renewal, differentiation, fate, and relationship to cancer; biological mechanisms and methods to translate findings to therapeutic applications. Medical students must enroll for 5 units; graduate students may choose to take only the basic science part for 3 units. Prerequisites: DBIO 201 and 210, or consent of instructor.
3-5 units, Win (Weissman, I; Fuller, M; Nusse, R)

PATH 299. Directed Reading in Pathology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

PATH 399. Graduate Research—Investigations sponsored by individual faculty members. Opportunities at the molecular, cellular, and clinicopathologic levels. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

See department listings for course description. See degree requirements above or the program's student services office for applicability of this course to a major or minor program.

MI 211. Advanced Immunology I—(Same as IMMUNOL 201.)
3 units, Win (Chien, Y)

RADIATION ONCOLOGY

Emeriti: Malcolm A. Bagshaw, Peter Fessenden, Don R. Goffinet, George M. Hahn, Kendric Smith
Chair: Richard T. Hoppe
Professors: J. Martin Brown, Sarah S. Donaldson, Amato J. Giaccia, Steven L. Hancock, Richard T. Hoppe, Quynh-Thu Le, Daniel S. Kapp, Steven A. Liebel
Associate Professors: Iris C. Gibbs, Paul Keall, Christopher R. King, Susan J. Knox, Gary Luxton, Lei Xing
Assistant Professors: Laura Attardi, Daniel Chang, Nicholas Denko, Edward Graves, Albert C. Koong
Consulting Professor: Robert M. Sutherland

Courses given in Radiation Oncology have the subject code RADO. For a complete list of subject codes, see Appendix.

Radiation Oncology focuses on the use of radiation for cancer therapy and research. The department does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in Biophysics and Cancer Biology may perform their thesis research in the department. Undergraduates may arrange individual research projects under supervision of faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes; clinical trials of a new hypoxic cytotoxic agent (tirapazamine); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

COURSES

Course and lab instruction in the Department of Radiation Oncology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The following are open to undergraduates and graduate students.

RADO 101. Readings in Radiation Biology
1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 299. Directed Reading in Radiation Oncology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RADIOLOGY

Emeriti: (Professors) Herbert L. Abrams, Gerald Friedland, David A. Goodwin, Henry H. Jones, Albert Macovski, William H. Northway, Lewis Wexler, Leslie M. Zatz
Chair: Gary M. Glazer
Professors: Scott W. Atlas, Richard A. Barth, Christopher F. Beaulieu, Sanjiv Sam Gambhir, Gary M. Glazer, Gary H. Glover, Michael L. Goris, Robert J. Herfkens, R. Brooke Jeffrey, Barton Lane, Ann Leung, Michael Marks, I. Ross McDougall, Robert E. Mindelzun, Michael Moseley, Sandy Napel, Matilde Nino-Murcia, Norbert J. Pelc, Geoffrey Rubin, George Segall, F. Graham Sommer
Associate Professors: Patrick D. Barnes, Francis Blankenberg, Bruce Daniel, Terry Desser, Huy M. Do, Nancy Fischbein, Dominik Fleischmann, Garry E. Gold, Lawrence Hofmann, Debra M. Ikeda, Beverley Newman, Eric W. Olcott, Daniel M. Spielman, Daniel Y. Sze
Associate Professors (Research): Kim Butts-Pauly, Craig Levin, Sylvia Plevritis
Assistant Professors: Sandip Biswal, Frandics P. Chan, Nishita Kothary, William Kuo, Andrew Quon, Kathryn J. Stevens, Joseph Wu, Greg Zaharchuk
Assistant Professors (Research): Roland Bammer, Xiaoyuan Chen, Rebecca Fahrig, Samira Guccione, Brian Hargreaves, David Paik
Web Site: http://www-radiology.stanford.edu/

Courses given in Radiology have the subject code RAD. For a complete list of subject codes, see Appendix.

The Department of Radiology does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Undergraduates may also arrange individual research projects under the supervision of the department's faculty. This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

COURSES

The following courses are open to undergraduates and graduate students.

RAD 101. Readings in Radiology Research—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RAD 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RAD 208. Experimental Nuclear Medicine—Computer applications in medicine, particularly in the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus.
2 units, Win, Sum (Goris, M)

RAD 220. Introduction to Imaging and Image-Based Human Anatomy—(Same as BIOE 220.) The physics of medical imaging and human anatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and the relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Recommended: basic biology, physics, and math.
3 units, Win (Gold, G; Butts-Pauly, K)

RAD 222A. Multimodality Molecular Imaging in Living Subjects I-(Same as BIOE 222A.) Instruments for imaging molecular and cellular events using novel assays. Instrumentation physics, chemistry of molecular imaging probes, and applications to preclinical models and clinical disease management.
4 units, Aut (Gambhir, S; Rao, J)

RAD 222B. Multimodality Molecular Imaging in Living Subjects II—(Same as BIOE 222B.) In vivo imaging techniques and applications to preclinical models and clinical disease management. Focus on cancer research, neurobiology, cardiovascular and musculoskeletal diseases.
4 units, Win (Gambhir, S; Rao, J)

RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging—Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.
3 units, Win (Spielman, D)

RAD 227. Functional MRI Methods—(Same as BIOPHYS 227.) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics. Recommended: neuroscience.
3 units, alternate years, not given this year

RAD 228. Magnetic Resonance Imaging Programming Seminar—Primarily for students working on research projects involving MRI pulse sequence programming. Introductory and student-initiated topics in seminars and hands-on labs. Image contrast mechanisms achieved by pulse sequences that control radiofrequency and gradient magnetic fields in real time, while acquiring data in an organized manner for image reconstruction. Prerequisites: EE 369B and consent of instructor.
2 units, Aut (Staff), Spr (Hargreaves, B)

RAD 299. Directed Reading in Radiology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RAD 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

STRUCTURAL BIOLOGY

Chair: Joseph D. Puglisi
Associate Chair: Michael Levitt
Professors: Roger D. Kornberg, Michael Levitt, David B. McKay, Peter Parham, Joseph D. Puglisi, William I. Weis
Associate Professor: K. Christopher Garcia
Associate Professor (Research): Yahli Lorch
Professor (Teaching): Patricia Cross
Courtesy Professor: Axel Brunger, Uel J. McMahan
Courtesy Associate Professor: Vijay Pande
Courtesy Assistant Professor: Zev Bryant

Department Offices: Fairchild Building, D100
Mail Code: 94305- 5126
Phone: (650) 723-7576
Email: structuralbio@med.stanford.edu
Web Site: http://www.med.stanford.edu/school/structuralbio

Courses given in Structural Biology have the subject code SBIO. For a complete list of subject codes, see Appendix.

The department offers course work and opportunities for research in structural biology. Courses fall into two categories: (1) a series of one quarter courses that treat topics of current interest in structural biology and biophysics at an advanced level; and (2) INDE 216, Cells to Tissues, a course for medical students that includes lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

GRADUATE PROGRAMS

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal requirement of a Ph.D. degree is the completion of research constituting an original and significant contribution to the advancement of knowledge. The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a) CHEM 131, 171, 173, and 175
   b) BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a) SBIO 241 and 242
   b) At least four additional graduate-level courses in physical or biological science
   c) MED 255
4. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.
7. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor's degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the department before December 15 for notification by April 15. Application to the National Science Foundation for fellowship support is also encouraged. Remission of fees and a personal stipend are available to graduate students in the department. Prospective applicants should contact the Department of Structural Biology for further information.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See http://www.med.stanford.edu/school/structuralbio/ for further information.

COURSES

Course and lab instruction in the Department of Structural Biology conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

SBIO 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

SBIO 228. Computational Structural Biology—(Same as BIOPHYS 228.) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.
3 units, Aut, Spr (Levitt, M)

SBIO 229. The Eukaryote Chromosome—The principles of chromosome structure and function including the structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and basis of chromosome maintenance and sorting in mitosis; mechanism of gene activation with particular regard to enhancer, promoter, and terminator sequences; basis of sequence-specific protein-DNA interaction; and organization and assembly of the cell nucleus. Prerequisite: knowledge of basic biochemistry and cell biology.
3 units, not given this year

SBIO 241. Biological Macromolecules—(Same as BIOC 241, BIOPHYS 241.) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.
3-5 units, Aut (Herschlag, D; Puglisi, J; Garcia, K; Ferrell, J; Block, S; Pande, V; Weis, W; Harbury, P)

SBIO 242. Methods in Molecular Biophysics—(Same as BIOPHYS 242.) The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods. Prerequisite: physical chemistry or consent of instructor.
3 units, alternate years, not given this year

SBIO 274. Topics in Nucleic Acid Structure and Function—Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.
2 units, Spr (Puglisi, J)

SBIO 299. Directed Reading in Structural Biology—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

SBIO 399. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

SURGERY

Chair: Thomas M. Krummel

Division Heads: Craig Albanese (Pediatric General Surgery), James Chang (Plastic and Reconstructive Surgery), Ronald Dalman (Vascular Surgery), Carlos Esquivel (Transplant Surgery), Ralph Greco (General Surgery), Michael Longaker (Research), Robert Norris (Emergency Medicine)

Department Office: 701B Welch Road, Suite 225
Mail Code: 94305-5784
Phone: (650) 498-4292
Website: http://surgery.stanford.edu

Courses given in Surgery have the subject code SURG. For a complete list of subject codes, see Appendix.

COURSES

The following courses are open to undergraduates. For graduate and Medical School course offerings, see http://medcatalog.stanford.edu/.

SURG 67Q. Medical Experience in Foreign Lands—Stanford Introductory Seminar. Preference to sophomores. Topics may include the history and international development of Interplast, a nonprofit organization providing free reconstructive surgery for needy children and adults in developing nations; health care at King Faisal Hospital, Saudi Arabia; medical conditions in S. India; eye care in Africa; teaching experiences in Dar es Salaam; and rural health care in Latin America. The role such activities play in U.S. international relationships.
3 units, Win (Wang, N; Laub, D)

SURG 68Q. Current Concepts in Transplantation—Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific literature, and research and present topics in contemporary transplantation. Write-2
3 units, Spr (Martinez, O; Krams, S)

SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face—Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society. Write-2
3-4 units, Win (Helms, J)

SURG 101. Regional Study of Human Structure—Preference to seniors. Lectures in regional anatomy and dissection of the human cadaver; the anatomy of the trunk and limbs through the dissection process, excluding the head and neck.
5 units, Win (Gosling, J; Whitmore, I)

SURG 111A/211A. Emergency Medical Technician (EMT-1): Training and Application—(Graduate students register for 211A.) Basics of life support outside the hospital setting; readiness training for emergencies on- or off-campus. Topics include emergency patient assessments, and cardiac, respiratory, and neurological emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam.
3 units, Aut (Gilbert, G; Richards, C)

SURG 111B/211B. Emergency Medical Technician (EMT-1): Training and Application—(Graduate students register for 211B.) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111A/211A.
3 units, Win (Gilbert, G; Richards, C)

SURG 111C/211C. Emergency Medical Technician (EMT-1): Training and Application—(Graduate students register for 211C.) Continuation of 111B/211B. Topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisite: 111B/211B.
3 units, Spr (Gilbert, G; Richards, C)

SURG 112/212. Advanced Topics in EMS and Training in Teaching BLS Skills—(Graduate students register for 212.) Topics include advanced airway and stroke management, abdominal emergencies, and prehospital pharmacology. Prerequisites: SURG 111 or 211 A-C (or equivalent), EMT -I and CPR certifications, and consent of instructor.
2-3 units, Aut, Win, Spr (Gilbert, G; D'Souza, P; Richards, C)

SURG 199. Undergraduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

SURG 223. Wilderness Medicine—Wilderness-related illnesses and injuries; framework for dealing with emergencies in the backcountry. Hands-on workshops. Topics include high altitude medicine, diving medicine, hypothermia, snake and spider envenomations, search and rescue, and travel medicine. Open to all students.
2 units, Spr (Weiss, E)

SURG 267. International Health—Issues in public health with an international perspective. Topics include: colonialism and development, reproductive health, women's health issues, environmental health, maternal child health, primary health care and its evolution, health policy, infectious disease, human rights, and social justice. Guest speakers from UCSF and Berkeley School of Public Health.
1 unit, not given this year

ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

Vice Provost and Dean of Research and Dean of the Independent Laboratories, Centers, and Institutes: Ann M. Arvin

Independent Research Laboratories, Centers, and Institutes perform multidisciplinary research that extends beyond the scope of any one of the University's organized schools.

The following laboratories, centers, and institutes report to the Vice Provost and Dean of Research:

Stanford Institute for Economic Policy Research
Geballe Laboratory for Advanced Materials
Edward L. Ginzton Laboratory
Global Climate and Energy Program
W. W. Hansen Experimental Physics Laboratory
Stanford Humanities Center
Freeman Spogli Institute for International Studies
Human-Sciences and Technologies Advance Research Institute
Kavli Institute for Particle Astrophysics and Cosmology
Photon Ultrafast Laser Science and Engineering
Precourt Institute for Energy Efficiency
Stanford Center on Longevity
Stanford Program for Bioengineering, Biomedicine, and Biosciences (BioX)
Stanford Institute for the Quantitative Study of Society
Woods Institute for the Environment
X-Ray Laboratory for Advance Materials

The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost. SLAC is independently operated under a contract with the Department of Energy.

Following is a description of the activities of these organizations and other academic programs and centers, including research activities, and where applicable, courses offered.

GEBALLE LABORATORY FOR ADVANCED MATERIALS

Director: Zhi-Xun Shen
Deputy Director: Paul McIntyre
Web Site: http://www-lam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of more than 20 faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also has a newly remodeled Stanford Nanocharacterization Laboratory which provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. The instruments include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis (XRD), x-ray photoelectron spectroscopy (XPS), and high resolution Auger electron spectroscopy (AES) for characterization and thin film deposition capabilities for synthesis of materials. These facilities are managed by professional staff who also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization. GLAM is also home to the Center for Probing the Nanoscale, a nanoscale science and engineering center sponsored by the National Science Foundation, and to the Stanford Center for Magnetic Nanotechnology. GLAM also maintains a strong link to the X-ray Laboratory for Advanced Materials at the Stanford Synchrotron Radiation Laboratory.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH

Director: John B. Shoven
Deputy Director: Gregory Rosston
Institute Office: 579 Serra Mall
Phone: (650) 725-1874
Web Site: http://siepr.stanford.edu

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) facilitating graduate student and faculty research on economic policy issues; (2) building a community of scholars conducting policy research; (3) disseminating research findings broadly; and (4) linking academics at Stanford with decision makers in business and government.

SIEPR is a University-wide research institute, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in its three research centers and six programs. The Stanford Center for International Development (SCID; Roger G. Noll, Director) fosters research on the economic problems of developing economies and economies in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this center call (650) 725-8730. The Center on Employment and Economic Growth (CEEG; Tim Bresnahan, Director) is focusing on the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force. The program on regulation is part of this center. The Center for Public and Private Finance (CPPF; John B. Shoven and Michael J. Boskin, co-Directors) encompasses work on macroeconomics and monetary policy, tax and budget policy, and finance.

Separate research programs within SIEPR and their directors are the California Policy Program (Thomas MaCurdy); the Energy, Natural Resources, and the Environment Program (James L. Sweeney); the Knowledge Networks and Institutions for Innovation Program (Paul A. David); the Program on the Japanese Economy (Masahiko Aoki); and the Program on Market Design (Susan Athey and Paul Milgrom).

PRECOURT INSTITUTE FOR ENERGY EFFICIENCY

Director: James L. Sweeney
Web Site: piee.stanford.edu

The Precourt Institute for Energy Efficiency (PIEE), founded in October 2006, conducts research and analysis through interdisciplinary teams of faculty, postdoctoral fellows, graduate students, and undergraduates students. The institute's mission is to improve opportunities for and implementation of energy efficient technologies, systems, and practices, with an emphasis on economically attractive deployment. Research includes technology development, economic analysis, policy analysis, and behavioral research.

PIEE adopts a broad systems approach, examining links among technology, policy, and market diffusion in areas such as: energy-efficiency problems in economic sectors such as buildings, transportation, and electric power; supply- and demand-side barriers and solutions to energy-efficiency challenges; combining engineering, economic, and political expertise in devising solutions to energy-efficiency challenges; and the decision making environment in corporations, public organizations, and households.

GEBALLE LABORATORY FOR ADVANCED MATERIALS

Director: Zhi-Xun Shen
Deputy Director: Paul McIntyre
Web Site: http://www-lam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of more than 20 faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also has a newly remodeled Stanford Nanocharacterization Laboratory which provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. The instruments include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis (XRD), x-ray photoelectron spectroscopy (XPS), and high resolution Auger electron spectroscopy (AES) for characterization and thin film deposition capabilities for synthesis of materials. These facilities are managed by professional staff who also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization. GLAM is also home to the Center for Probing the Nanoscale, a nanoscale science and engineering center sponsored by the National Science Foundation, and to the Stanford Center for Magnetic Nanotechnology. GLAM also maintains a strong link to the X-ray Laboratory for Advanced Materials at the Stanford Synchrotron Radiation Laboratory.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

EDWARD L. GINZTON LABORATORY

Director: Robert L. Byer
Deputy Director: Olav Solgaard
Web Site: http://www.stanford.edu/group/ginzton/

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, and Mechanical Engineering. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for scientific research in the fields of photonic science and engineering, quantum science and engineering, and nanoscience and engineering, including fiber optics, laser physics and applications, mesoscopic devices, microelectromechanical and microacoustic devices and systems, optoelectronic devices and systems, photonics, nanophotonics and photonic crystals, scanning optical microscopy, quantum cryptography and computing, tunneling and force microscopy, and ultrafast and nonlinear optics.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Blas Cabrera
Web Site: http://hepl.stanford.edu/

HEPL is an independent laboratory celebrating over 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu/

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center devoted to the advanced study of politics, economics, and political economy, both domestic and foreign, as well as international affairs. Hoover fellows are the foundation of the research program. This varied and distinguished community of scholars strives to conceive and disseminate ideas defining a free society within the framework of three programs:

American Institutions and Economic Performance—Focus is on interrelationships of U.S. political and legal institutions and economic activity, often referred to as political economy.

Democracy and Free Markets—Focus is on on political economy in countries around the world.

International Rivalries and Global Cooperation—Focus is on interrelationships among countries, by examining issues of foreign policy, security, and trade.

By collecting knowledge, generating ideas, and disseminating both, the Institution seeks to secure and safeguard peace, improve the human condition, and limit government intrusion into the lives of individuals, all of which are consistent with three prominent values: peace, personal freedom, and the safeguards of the American system.

HUMAN SCIENCES AND TECHNOLOGIES ADVANCED RESEARCH INSTITUTE (H-STAR)

Executive Committee: Keith Devlin, Junco Norton, Roy Pea, Byron Reeves, Tom Wasow

Web Site: http://hstar.stanford.edu

H-STAR (Human Sciences and Technologies Advanced Research) is a new Stanford interdisciplinary research institute focusing on how people use technology, how to better design technology to make it more usable and more competitive in the marketplace, how technology affects people's lives, and the innovative use of technologies in research, education, art, business, commerce, entertainment, communication, national security, and other walks of life. Among the problems at the heart of the H-STAR research agendas are:

Reducing complexity of technology to enable its universal uses for work, learning and other vital sectors of life

Closing digital divides across class, race, gender, age, and nations, so that access to and fluencies in technologies provide equal opportunities to learn and work productively

Accelerating innovation in the creation and diffusion of products and services that better meet human needs

Solving security and trust problems of computing, communications, and information systems at home and work and in governmental affairs

Ensuring safety and health with human-centered technology innovations

Within H-STAR are two interdisciplinary centers, CSLI (the Center for the Study of Language and Information) and SCIL (the Stanford Center for Innovations in Learning), and an industry partners program, Media X.

CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION

Director: Tom Wasow
Executive Director: Keith Devlin

Center Offices: Cordura Hall
Mail Code: 94305-4115
Web Site: http://www-csli.stanford.edu/

CSLI supports research at the intersection of the social and computing sciences. It is an interdisciplinary endeavor, bringing researchers together from academe and industry in the fields of artificial intelligence, computer science, engineering, linguistics, logic, education, philosophy, and psychology. CSLI's researchers are united by a common interest in communication and information processing that ties together people and interactive technology.

The technologies of interest at CSLI, at the cutting edge of the information revolution, include natural language processing, voice/user interfaces, ubiquitous computing, collaborative work environments, handheld devices, information appliances, automatic language translation, conversational interfaces, machine learning, intelligent agents, electronic customer relationship management, and distance learning applications.

A primary goal of CSLI is to have a substantial and long-term intellectual impact on the academic and business communities involved with interactive technology. The center's industry research partners and sponsors have access to ideas, faculty, students, and laboratories. Partners can share in the intellectual property of CSLI, and in the governance committees of the center that establish research directions and funding priorities. CSLI accelerates knowledge transfer to products and services by involving executives and researchers in Stanford classrooms. CSLI partners can meet Stanford students studying in over 20 degree programs.

Course work related to the research at CSLI can be found in the "Program in Symbolic Systems" section of this bulletin.

STANFORD CENTER FOR INNOVATIONS IN LEARNING

Director: Roy Pea

Center Offices: Wallenberg Hall (Building 160)
Web Site: http://scil.stanford.edu

The Stanford Center for Innovations in Learning (SCIL) conducts scholarly research to advance the science, technology, and practice of learning and teaching from early childhood through postsecondary education. The center brings together teachers, scholars, and students from around the world to study how to improve formal and informal learning across cultural boundaries.

SCIL is housed in Wallenberg Hall, a state-of-the-art testing ground for technology applications in the classroom. With the support of SCIL technical and advisory staff, more than 70 professors and instructors have taught courses in Wallenberg Hall.

SCIL programs are multidisciplinary and collaborative in nature and include the LIFE Center (Learning in Informal and Formal Environments), a research endeavor funded by the National Science Foundation whose researchers are working toward the development of an integrated multidisciplinary science of learning. Engaging more than 40 faculty members and researchers from the learning sciences, psychology, education, communications, computer science, and developmental, cognitive, and social neuroscience, LIFE is a collaboration with the University of Washington and SRI International.

In addition to its research work, SCIL provides year-round technical and advisory support to University instructors.

MEDIA X

Web Site: http://mediax.stanford.edu/

Media X builds bridges between faculty and student scholars at Stanford and thought leaders from influential companies to address questions of importance within academia and industry. Activities are driven by the inspiration that emerge at the intersections of industry need and academic research, of various disciplines addressing the same question, and of people and technology.

STANFORD HUMANITIES CENTER

Director: John Bender
Associate Director: Matthew Tiews

Web Site: http://shc.stanford.edu/

The Stanford Humanities Center promotes research and education in the humanities at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for Stanford faculty, faculty members from other institutions, and Stanford graduate and undergraduate students; public presentations such as lectures, conferences, and publications; and a research workshop program that brings faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences.

CENTER FOR THE INTERDISCIPLINARY STUDY OF SCIENCE AND TECHNOLOGY

Center Director: Michael Friedman
STS Undergraduate Director: Robert McGinn
HPST Graduate Director: Jessica Riskin
Executive Committee: Keith Baker, Paula Findlen, Michael Friedman, Robert McGinn, Eric Roberts

Phone: (650) 725-0119; 725-0714
Web Site: http://cisst.stanford.edu

The Center for the Interdisciplinary Study of Science and Technology (CISST) brings together faculty, undergraduate and graduate programs, and research initiatives concerned with understanding science and technology in an interdisciplinary context. It is concerned equally with the historical, philosophical, and cultural study of science, technology, and medicine, and with critical analysis of issues raised by scientific and technological innovations in contemporary society. CISST houses two major programs: HPST (History and Philosophy of Science and Technology) and STS (Science, Technology, and Society); see their respective sections in this bulletin for their programs. CISST also sponsors visiting scholars, postdoctoral researchers, workshops, and speakers, providing a bridge between the humanities and social sciences on the one hand, and the sciences and engineering on the other.

At the undergraduate level, CISST houses STS, an undergraduate major that grants both B.A. and B.S. degrees. The STS major is designed to foster understanding of issues raised by the natures, consequences, and social shaping of technology and science in the contemporary world. To this end, the STS curriculum combines interdisciplinary, humanistic, and social scientific studies of science and technology in society with attainment of either technical literacy or fundamental understanding in some area of engineering or science. CISST also offers an honors program in STS that is open not only to STS majors but also to students in other majors who wish to pursue a senior honors project that addresses a research question arising from the relations among science, technology and society. Prospective majors or honors students should consult the STS section in this bulletin.

At the graduate level, CISST houses an interdisciplinary graduate program, the Program in History and Philosophy of Science and Technology (HPST), jointly administered by the History and Philosophy departments; it involves faculty and students in these and other departments in the humanities. Prospective students interested in applying to the graduate program should consult the "History and Philosophy of Science and Technology" section of this bulletin, and the admissions requirements of the department in which they wish to apply for a M.A. or a Ph.D.

FREEMAN SPOGLI INSTITUTE FOR INTERNATIONAL STUDIES

Director: Coit D. Blacker
Deputy Director: Michael A. McFaul

Institute office: Encina Hall, 616 Serra Street
Phone: (650) 723-4581
Web Site: http://fsi.stanford.edu

The Freeman Spogli Institute for International Studies (FSI) is Stanford University's primary forum for interdisciplinary research on contemporary international issues and challenges. Working in partnership with the seven schools at Stanford and the Hoover Institution, FSI undertakes collaborative research and teaching which transcend disciplinary, school, and national boundaries. Priority areas of research include: efforts to prevent nuclear proliferation and ensure effective responses to acts of biological or chemical terrorism; linkages among democracy, development, and the rule of law; trade-offs among energy, food security, and environmental degradation; global healthcare delivery and outcomes; political, economic, and social change in the Asia-Pacific region; and national, regional, and multilateral security concerns in the region.

Opportunities for undergraduate research include the CISAC Interschool Honors Program in International Security and the CDDRL Undergraduate Honors Program. The institute manages 10 undergraduate and graduate fellowship programs.

Constituent centers within FSI include: the Center on Democracy, Development, and the Rule of Law; the Center for Health Policy/Center for Primary Care and Outcomes Research; the Center for International Security and Cooperation; and the Walter H. Shorenstein Asia-Pacific Research Center.

FSI administers the following programs: the Forum on Contemporary Europe; the Program on Food Security and the Environment; the Initiative on Distance Learning; the Inter-University Center for Japanese Language Studies; the Program on Energy and Sustainable Development; the Program on Global Justice; the Stanford Center on International Conflict and Negotiation; and the Stanford Program on International and Cross-cultural Education.

For more information about particular FSI centers and programs, contact the center or program directly (area code 650):

Center on Democracy, Development, and the Rule of Law (CDDRL)—724-7197, http://cddrl.stanford.edu/, Michael McFaul, *Director*

Center for Health Policy/Center for Primary Care and Outcomes Research (CHP/PCOR)—723-1020, http://chppcor.stanford.edu/, Alan M. Garber, *Director*

Center for International Security and Cooperation (CISAC)—723-9625, http://cisac.stanford.edu/, Scott D. Sagan, Siegfried S. Hecker, *Co-Directors*

Walter H. Shorenstein Asia-Pacific Research Center (Shorenstein APARC)—723-9741, http://aparc.stanford.edu, Gi-Wook Shin, *Director*

Program on Food Security and the Environment—725-6851; http://fse.stanford.edu, Rosamond Naylor, *Director*

Forum on Contemporary Europe (FCE)—723-4716, http://fce.stanford.edu/, Amir Eshel, *Director*

Initiative on Distance Learning (IDL)—725-3036, http://idl.stanford.edu, Katherine Kuhns, *Director*

UNDERGRADUATE PROGRAMS

INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY

Co-Directors: Scott D. Sagan and Paul Stockton

The Center for International Security and Cooperation (CISAC) coordinates a University-wide interschool honors program in international security studies. Students selected for the honors program fulfill individual department course requirements, attend a year-long seminar on international security research, intern at a security-related organization, and produce an honors thesis with policy implications. In order to qualify for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken POLISCI 114S, International Security in a Changing World; MS&E 193, Technology and National Security; and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis; STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy; SOC 160, Formal Organizations; PUBLPOL 102/SOC 166, Organizations and Public Policy; POLISCI 110B, Strategy, War, and Politics; and POLISCI 114T, Major Issues in International Conflict Management.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, E223 Encina Hall East, telephone (650) 723-9626, or http://cisac.stanford.edu.

COURSES

IIS 199. Interschool Honors Program in International Security Studies—Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.

10-15 units, Aut, Win, Spr (Stedman)

CDDRL UNDERGRADUATE HONORS PROGRAM

The Center on Democracy, Development, and the Rule of Law (CDDRL) Honors Program provides students majoring in International Relations the opportunity to conduct an independent research project focused on issues of democracy, development, and the rule of law under CDDRL faculty guidance. Students interested in the program consult with their prospective honors advisers in their junior year and must submit their honors thesis proposal in the Spring Quarter of that year. Honors students present a formal defense of their theses in mid-May of the senior year. Prerequisites for the program are a 3.5 grade-point average, a strong overall academic record, and demonstrated skills in writing and conducting independent research.

For more information, contact the Center on Democracy, Development, and the Rule of Law, Encina Hall C100, phone (650) 724-7197; or see http://cddrl.stanford.edu.

COURSES

Required coursework includes INTNLREL 199, an honors research seminar that focuses on democracy, development, and the rule of law in developing countries as well as INTNLREL/POLISCI 114D, CDDRL's flagship undergraduate lecture course taught every Autumn Quarter. Honors students meet bi-weekly with faculty and their peers to present project theses and receive feedback. Students must attend honors college in September before Autumn Quarter classes begin and the weekly CDDRL seminar.

STANFORD INSTITUTE FOR THE QUANTITATIVE STUDY OF SOCIETY

Director: Norman H. Nie

Center Offices: 417 Galvez Mall, Encina Hall West, first floor
Mail Code: 94305-6048
Phone: (650) 723-7242
Web Site: http://www.stanford.edu/group/siqss

Founded in 1998, the Stanford Institute for the Quantitative Study of Society (SIQSS) is a multidisciplinary research institute affiliated with Stanford University's Office of Research and Graduate Policy. The Institute is devoted to producing and sponsoring high-quality empirical social science research about the nature of society and social change.

The central mission of SIQSS is to provide social knowledge for the larger society and to develop the empirical social sciences as a primary tool for understanding social reality. SIQSS seeks to fulfill this mission by undertaking large-scale, socially relevant, theoretically important, and methodologically sound social research. Examples of projects under way include unintended consequences of information and technology in society; education and its social outcomes; conducting the 2000 census under adversity; and an online scholarly journal, *IT & Society* at http://www.stanford.edu/group/siqss/itandsociety/.

Scholars participating in SIQSS research programs and activities are drawn from diverse disciplines throughout Stanford University and from other academic institutions. SIQSS currently supports quantitative research through the following: long-term institute-initiated research programs, Stanford faculty research grants and student research assistantships, Stanford faculty fellows, interdisciplinary seminars, and the American Empirical Series.

MICHELLE R. CLAYMAN INSTITUTE FOR GENDER RESEARCH

Director: Londa Schiebinger
Associate Director: Michelle Cale
Research Director: Andrea Henderson
Program Manager: Jane Gruba-Chevalier
Artist in Residence: Valerie Miner
Art Curator: Karen M. Rapp
Research Fellows: Cynthia M. Friend, Sabine C. Girod, Myra M. Hart, Nancy Hopkins, Michelle Murphy, Kavita Phillip, Sue Rosser, Sheri D. Sheppard

Institute Office: Serra House, 589 Capistrano Way
Mail Code: 94305-8640
Phone: (650) 723-1994
Web Site: http://gender.stanford.edu

Formerly the Institute for Research on Women and Gender, the Clayman Institute contributes to the development of a more equal society for women and men through the creation of innovative research studies and the dissemination of key findings to decision makers in universities, business, communities, and government.

The institute focuses on women and gender issues in science, technology, engineering, and mathematics. It brings together faculty and students in interdisciplinary seminars, and organizes guest lectures and conferences open to the general public. It has three in-house research projects, due to be completed in 2008: on dual career academic couples; on women entrepreneurs; and on why mid-level women leave technology jobs in Silicon Valley. The institute also offers a number of prizes and awards to graduate students and faculty, including seven graduate dissertation fellowships, and hosts up to eight residential research fellows who contribute to the instituteís research studies and broader research agenda.

STANFORD CENTER ON LONGEVITY

Director: Laura Carstensen
Deputy Director: Thomas Rando
Web Site: http://longevity2.stanford.edu/

The aim of the Center is to use increased life expectancy to bring about profound advances in the quality of life from early childhood to old age.

The center sponsors an interdisciplinary mobility project to integrate new technologies and to institute streamlined methods of assisting Stanford faculty with the development of innovative ideas. Major disciplines represented in this project are biology, medicine, engineering, psychology, economics, urban planning, and the d.school.

SOCIAL SCIENCE HISTORY INSTITUTE

Co-Directors: David Brady, Stephen Haber
Institute Office: Building 200, Room 10
Mail Code: 94305-2024
Phone: (650) 723-1466
Email: toney@stanford.edu
Web Site: http://sshi.stanford.edu

The goal of Social Science History Institute (SSHI) is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests (for example, the development of economies, political systems, and social structures), but they approach them with different and complementary methods and bodies of evidence. There is, however, a great deal of potential for historians and social scientists to draw on the strengths of each other's methods to improve their own work and to foster increased interaction among the various disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Institute seeks to realize this potential by transplanting state-of-the-art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline. Toward this end, SSHI offers conferences and research support for faculty and graduate students.

STANFORD LINEAR ACCELERATOR CENTER

Director: Jonathan Dorfan
Web Site: http://www.slac.stanford.edu/

The Stanford Linear Accelerator Center (SLAC) has two academic departments. The Particle and Particle Astrophysics Department includes several areas of research: theoretical and experimental elementary particle physics, particle astrophysics, cosmology, accelerator and beam physics, and detector instrumentation. The Photon Science Department includes all areas of science done at the Stanford Synchrotron Radiation Laboratory (SSRL), the Photon Ultrafast Laser Science and Engineering Center (PULSE), and Linac Coherent Light Source, currently under construction to become a state-of-the-art X-ray laser research facility.

SLAC is located on 425 acres of Stanford property west of the main campus and is operated under a contract with the United States Department of Energy. SLAC is operated by Stanford as a national facility allowing qualified scientists from Stanford and other universities and research centers worldwide to participate in the research programs. Graduate students at Stanford may carry out Ph.D. research with members of the SLAC faculty; graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified Stanford students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Students interested in research in the areas of high energy physics, particle astrophysics, and accelerator physics should first contact Professor Rafe H. Schindler at the SLAC Graduate Studies Office. Students interested in research opportunities in photon science and SPEAR 3 should contact a member of the SSRL faculty, or other members of the Stanford faculty who use SSRL in their research programs; see http://www.ssrl.slac.stanford.edu/faculty/.

KAVLI INSTITUTE FOR PARTICLE ASTROPHYSICS AND COSMOLOGY (KIPAC)

Director: Roger Blandford
Web Site: http://www-group.slac.stanford.edu/kipac

KIPAC is an independent laboratory funded in part by Stanford University and the Department of Energy. KIPAC was founded to explore new fronts and challenges in particle astrophysics and cosmology, including the study of the very large and the study of the very small as a source of fundamental questions.

PHOTON ULTRAFAST LASER SCIENCE AND ENGINEERING (PULSE)

Director: Phil Bucksbaum
Web Site: http://photonscience.slac.stanford.edu/pulse/index.php

PULSE (Photon Ultrafast Laser Science and Engineering) is based on the construction of the world's first x-ray free electron laser. The construction of this new x-ray source, called the Linac Coherent Light Source (LCLS), is funded by the Department of Energy, and its operation is planned to begin toward the end of calendar 2008. LCLS will provide x-ray beams of unprecedented brightness, delivered in femtosecond pulses with full transverse coherence.

PULSE builds on, and leverages existing strengths in, atomic physics, chemistry, biology, and condensed matter physics. The center plans to focus on ultrafast structural and electronic dynamics in materials science, the generation of attosecond laser pulses, single molecule imaging, and the origin of efficient light harvesting and solar energy conversion in molecular systems during the first three years of operation.

STANFORD SYNCHROTRON RADIATION LABORATORY (SSRL)

Director: Joachim Stöhr

Web Site: http://www-ssrl.slac.stanford.edu

SSRL, a division of the Stanford Linear Accelerator Center, is a National User Facility which provides synchrotron radiation, a name given to x-rays or light produced by electrons circulating in a storage ring at nearly the speed of light. These extremely bright x-rays can be used to investigate forms of matter ranging from objects of atomic and molecular size to man-made materials with unusual properties. The obtained information and knowledge is of great value to society, with impact in areas such as the environment, future technologies, health, and national security. Many of SSRL's 22 faculty hold joint appointments with campus departments.

SSRL has research programs in materials science, chemistry, structural biology, and ultrafast science, as well as accelerator physics and development of advanced sources of synchrotron radiation, especially ultra short pulse, x-ray free electron lasers. The lab is interdisciplinary with graduate students pursuing degrees from Stanford campus departments that include Applied Physics, Chemical Engineering, Chemistry, Earth Sciences, Electrical Engineering, Materials Science and Engineering, Physics, and Structural Biology.

Students interested in working at the facility should contact a member of the SSRL faculty, one of the assistant directors, or other members of the Stanford faculty who use SSRL in their research programs; see http://www-ssrl.slac.stanford.edu/faculty/.

X-RAY LABORATORY FOR ADVANCED MATERIALS (XLAM)

Director: Z-X Shen

Web Site: http://photonscience.slac.stanford.edu/xlam/index.php

XLAM, a research unit within the Photon Science Directorate at SLAC, addresses key challenges associated with the Department of Energy's mission in the areas of condensed matter physics and materials science, providing scientific leadership in using and developing photon science devices and detectors and other SLAC facilities. XLAM also provides theoretical leadership and support for photon/materials-based experiments at SLAC. The emphasis of this core group is in scattering, spectroscopy, and imaging using the Stanford Synchrotron Radiation Laboratory (SSRL) and the Linac Coherent Light Source (LCLS).

The SLAC-based core capabilities include x-ray scattering, x-ray absorption and emission spectroscopy, angle-resolved photoemission, time-resolved scattering and spectroscopy, and spectro-microscopy. The emphasis has been the unique photon source at SLAC and its related spectroscopy and scattering expertise; there are plans for a strong computational component of this core to support the interpretation of experimental data. The SLAC photon based experimental techniques have been applied to strongly correlated materials, magnetic materials, low-dimensional materials, molecular solids, materials made of nano-clusters, surfaces and interfaces, and catalysis. XLAM programs plan to extend this effort to include matters under extreme conditions, such as high magnetic field and high pressure.

XLAM serves as a link between SLAC and the intellectual resources in other Stanford schools such as the Geballe Laboratory for Advanced Materials (GLAM). XLAM serves to couple SLAC and the Stanford campus by engaging the larger Stanford community to participate in DOE's basic energy science research enterprise. XLAM programs co-located with GLAM in the McCullough Building include materials synthesis, local probe microscopy, condensed matter theory, and organic/inorganic interfaces.

WOODS INSTITUTE FOR THE ENVIRONMENT

Directors: Jeffrey R. Koseff, Barton H. Thompson, Jr.

Institute Office: Encina Modular C, 429 Arguello Way
Mail Code: 94305-6030
Phone: (650) 725-5778
Web Site: http://environment.stanford.edu/

The Ward W. and Priscilla B. Woods Institute for the Environment serves as a catalyst and hub for interdisciplinary research, teaching, and problem solving. It draws on the experience and expertise of faculty, students, and staff from all seven Stanford schools, and other institutes, centers, and independent labs. The institute's mission is to promote environmental sustainability, and to help societies learn to meet their resource demands without undermining the ability of the planet to provide for future generations. The Woods Institute is at the core of the campus-wide Initiative on the Environment and Sustainability which leverages Stanford's historic strengths in research, teaching, outreach, and technology transfer, and carries out its mission by seeking solutions to major challenges through innovative research, educating and training environmental leaders, and moving ideas into action by collaborating directly with decision makers. The institute also encourages innovation by funding collaborative faculty research and student projects. The Woods Institute currently concentrates its work in four focus areas: energy and global climate systems; freshwater; land use and conservation; and oceans and estuaries.

UNDERGRADUATE PROGRAMS

GOLDMAN INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Woods Institute for the Environment coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with faculty members in the environmental field on an honors thesis that incorporates both scientific principles and policy aspects of environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained by phoning (650) 723-5697.

COURSES

WOODS 195. Interschool Honors Program in Environmental Science, Technology, and Policy—Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study. May be repeated for credit.

1-9 units, Aut, Win, Spr (Naylor, R; Falcon, W; Vitousek, P Freyberg, D)

LIBRARIES AND COMPUTING RESOURCES

STANFORD UNIVERSITY LIBRARIES AND ACADEMIC INFORMATION RESOURCES

University Librarian and Director of Academic Information Resources: Michael A. Keller

Web Site: http://library.stanford.edu/

Stanford University Libraries and Academic Information Resources (SULAIR) includes more than 30 libraries and programs supporting research, teaching, and learning at Stanford University. SULAIR acquires and delivers library collections in all formats, establishes policies and standards to guide the use of academic information resources, develops training and support programs for academic uses of computers, and maintains a broad array of electronic information resources, including the online library catalog and several hundred article and indexing databases and electronic journal subscriptions.

In each library unit, knowledgeable professional staff provide assistance in locating and using print and online information resources. Subject specialists and reference librarians are available for individual consultation, group classes, demonstrations, and special workshops by request.

Libraries throughout campus provide group and individual study spaces, public computers, personal laptop connections, photocopy machines, and digital scanners for use by Stanford faculty, staff, and students.

For information about library hours, see http://libraryhours.stanford.edu/.

In support of the University's academic mission, Academic Computing provides technology expertise, resources and services directly to students and faculty, and to other organizations that in turn support aspects of the mission. Academic Computing provides information on the use of technology in teaching and learning environments; operates and manages classrooms, public and multimedia computer clusters in Meyer Library and a computer cluster in Tresidder; provides faculty-specific computing resources through the Academic Technology Specialist program and Academic Technology Lab; provides technology support to Stanford University Library services; operates and manages residential computing clusters and services; and supports the Stanford course management system.

Information about the library collections, facilities, services, and policies is available at http://library.stanford.edu/.

Further information about library services and resources is available from the Information Center staff in Cecil H. Green Library at http://infocenter.stanford.edu/, and from reference staff in all University libraries.

CENTRAL CAMPUS LIBRARIES

The Cecil H. Green Library (East and Bing Wings) maintains research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number more than 2.2 million volumes. Major services in Green Library include: the Information Center, the Humanities and Area Studies Reading Room, the Jonsson Social Sciences Reading Room, the Bender Room, foreign language and area collections, loan desk and privileges, current periodicals, newspapers, media and microtexts, interlibrary services, course reserves, the Department of Special Collections, and the University Archives.

The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing group of SULAIR and provides instructional support services. In addition, Meyer Library houses the University's Digital Language Lab, computer clusters, technology enhanced classrooms, an Academic Technology Lab, an Assistive Learning Technology Center, and the central offices of Residential Computing and Academic Computing.

BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

Science Branch Libraries include the Branner Earth Sciences Library, Engineering Library, Falconer Biology Library, Mathematical and Computer Sciences Library, Harold A. Miller Library at the Hopkins Marine Station, Physics Library, and Swain Library of Chemistry and Chemical Engineering.

COORDINATE LIBRARIES

J. Hugh Jackson Library, Graduate School of Business
Director: Kathy Long

Lane Medical Library
Director: Debra Ketchell

Crown Law Library
Director: Paul Lomio

Stanford Linear Accelerator Center Library
Director of Technical Information Services: Patricia Kreitz

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu/hila/

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, the publications and records of national and international bodies, both official and unofficial, and books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

INFORMATION TECHNOLOGY SERVICES (IT SERVICES)

Web Site: http://it-services.stanford.edu

IT Services manages the University's central information technology infrastructure and provides hundreds of services and applications for use in academic and business activities. Support is provided in four layers:

- Participation and client-focused leadership in institutional IT planning, including strategies for data center expansion, centrally managed storage and backup, and business continuity and disaster recovery.
- Applications and services for departments and end-users including email, calendaring, wireless connectivity, web authentication, and Windows and Linux server hosting. These services are supported by a help desk, contract-support consultants, online self-help, and training.
- Applications and services that support other campus service providers, including the help desk, change management, and network registration systems.
- A communications and collaboration infrastructure robust enough to support advanced network, voice, and web-based services.

To learn about the variety of information technology resources available at Stanford, see http://computing.stanford.edu. For assistance with technology services at Stanford, contact the Stanford IT Help Desk at (650) 725-HELP (5-4357) or submit a request through http://helpsu.stanford.edu.

THE CONTINUING STUDIES PROGRAM

Dean and Associate Provost: Charles Junkerman
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-2650; Fax: (650) 725-4248
Email: continuingstudies@stanford.edu
Web Site: http://continuingstudies.stanford.edu

The Continuing Studies Program provides adults from Stanford and surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned for the 2007-08 academic year.

The faculty are primarily drawn from the ranks of the University's professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

MASTER OF LIBERAL ARTS PROGRAM

Associate Dean and Director: Linda Paulson
Participating Faculty: David Abernethy (Political Science), Clifford Barnett (Anthropology), Russell Berman (Comparative Literature and German), Marc Bertrand (French, emeritus), Eavan Boland (English), John Bravman (Material Sciences and Engineering), Bliss Carnochan (English), Clayborn Carson (History), Wanda Corn, (Art and Art History), George Dekker (English), Carol Delaney (Anthropology, emeritus), Gerry Dorfman (Hoover Institute and Political Science), Arnold Eisen (Religious Studies), Michele Elam (English), Martin Evans (English), Anne Fernald (Psychology), Paula Findlen (History), John Freccero (French and Italian), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English), Barbara Gelpi (English), Monika Greenleaf (Slavic Languages), Robert Gregg (Religious Studies), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies), Stephen Hinton (Music), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics), Robert McGinn (Management Science and Engineering, and Science, Technology, and Society), Mark Mancall (History), Joseph Manning (Classics), Diane Middlebrook (English, emeritus), Thomas Moser (English), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, and, by courtesy, Philosophy), Jack Rakove (History), Ronald Rebholz (English), Rush Rehm (Drama), John Rick (Anthropological Sciences), John Rickford (Linguistics), Paul Robinson (History), Ramón Saldívar (English), Paul Seaver (History), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Stephen Stedman (Freeman Spogli Institute for International Studies, and, by courtesy, Political Science), Thomas Wasow (Linguistics), Lee Yearley (Religious Studies), Ernlé Young (Center for Biomedical Ethics), Steven Zipperstein (History)

Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-0061
Email: mlaprogram@stanford.edu
Web Site: http://mla.stanford.edu

Program Description—The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Degree Requirements—Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course—During the Autumn, Winter, and Spring following admission to the program, there is a three quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar—During the first quarter of the second year, new students take the core introductory seminar, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars—Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master's Thesis—The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

Enrollment Requirements—MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or (b) be actively working on their theses and regularly attend a minimum of three-quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

Timeline for completion—All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

Registration—Master of Liberal Arts students register for courses online through the Continuing Studies web site.

COURSES

101A. Foundations I—Required for first-year MLA students.
4 units, Aut (Steidle)

101B. Foundations II—Required for first-year MLA students.
4 units, Win (Steidle)

101C. Foundations III—Required for first-year MLA students.
4 units, Spr (Berman)

102. The Plague: An Introduction to Interdisciplinary Graduate Study
4 units, Aut (Paulson)

214. Romanticism and Modernism in 19th-Century Paris
4 units, Aut (Bertrand)

235. Clash of Civilizations? Islam and the West Today
4 units, Aut (Berman)

236. Imagining Rome
4 units, Win (Gelpi, Gelpi)

237. Belief and Doubt in the British Enlightenment
4 units, Win (Bertrand)

238. Nazi Culture and California Exile
4 units, Win (Berman)

239. Slave Narratives
4 units, Win (Elam)

240. Family Fictions
4 units, Spr (Palumbo-Liu)

241. Shakespeare and Music
4 units, Spr (Chang)

242. Eccentric Concord: New England Laboratory of American Liberalism
4 units, Spr (Junkerman)

243. Negotiating for the UN
4 units, Spr (Stedman)

244. Love and Death in the Middle Ages
4 units, Sum (Gelber)

245. Shakespeare through Performance IX
4 units, Sum (Friedlander)

SUMMER SESSION

Associate Dean: Patricia Brandt
Director of Admission and Student Services: Teresa Nishikawa
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 723-3109; Fax: (650) 725-6080
Email: summersession@stanford.edu
Web Site: http://summer.stanford.edu

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or the Summer College program for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may apply to the Summer College program.

Students in Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at http://summer.stanford.edu.

STUDENT AFFAIRS

Vice Provost for Student Affairs: Greg Boardman
Web Site: http://www.stanford.edu/dept/vpsa/

Student Affairs supports the academic mission of the University by fostering a climate conducive to living and learning in a diverse community. The division encompasses programs and services for undergraduates and graduate students which include the Office of Residential Education, the University Registrar, the Vaden Health Center, the Career Development Center, the Office of Accessible Education, the Graduate Life Office, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, and the Office of Student Activities. The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division's units. The Vice Provost interacts with the President, the Provost, the University Cabinet, faculty, schools, department representatives, students, and parents. The Vice Provost also serves as an ex officio member of the Senate of the Academic Council.

OFFICE OF ACCESSIBLE EDUCATION (OAE)

Offices: 563 Salvatierra Walk
Phone: (650) 723-1066; TDD (650) 723-1067
Web Site: http://www.stanford.edu/group/OAE/

The Office of Accessible Education provides services and resources to students with disabilities through its four primary centers.

STUDENT DISABILITY RESOURCE CENTER (SDRC)

The SDRC coordinates academic and other accommodations for undergraduates and graduate students who have disabilities including mobility impairments, chronic illness, sensory disabilities, learning disabilities, and psychological disabilities. The center's goal is to enable students with disabilities to participate fully in the educational experience at Stanford while meeting the academic standards maintained by the university.

In accordance with the provisions of the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, the SDRC offers an array of accommodations and auxiliary aids and services to students with documented disabilities. Direct support services include, but are not limited to, notetaking, Brailling, oral or sign language interpretation, stenocaptioning, books on tape or electronic text, examination accommodations, and special housing arrangements. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who have temporary and permanent mobility impairments or who use a wheelchair. To arrange for an on-campus ride call 725-2484 (5-CHUG).

ASSISTIVE LEARNING TECHNOLOGY CENTER (ALTEC)

ALTeC is the technology arm of the OAE. It provides resources to make information technology and education more accessible for those with disabilities, such as accessible PC and Mac computer workstations, speech recognition and screen reading software, alternative input devices, and numerous non-computer accommodations.

SCHWAB LEARNING CENTER

The Schwab Learning Center offers enhanced services for students with learning differences (LD) and attention deficit hyperactivity disorder (ADHD) including screening assessments for learning differences, individual learning strategy sessions, and tutoring in academic disciplines.

CENTER FOR UNIVERSAL DESIGN IN EDUCATION

Application of the principles of universal design for instruction (UDI) represents a new approach to teaching that promotes proactive design and use of inclusive instructional practices that benefit all students. The center seeks to advance the development of instructional methods, tools, and strategies that are flexible, customizable, and accessible to students from different backgrounds, learning styles, abilities, and disabilities in a variety of learning contexts.

CAREER DEVELOPMENT CENTER

Center Office: 563 Salvatierra Walk
Web Site: http://cardinalcareers.stanford.edu

Counseling Services—Monday, Tuesday, Wednesday, and Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m., Thursday, 9 a.m. to 12 noon, 1 p.m. to 6 p.m.; (650) 725-1789.

Employment Services—Monday through Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

Reference File Services—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 3 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers services such as counseling, workshops, presentations, on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are open to undergraduates and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses and domestic partners.

The following suggestions may assist students in getting the most out of the CDC:

- Visit early in a Stanford career.
- Gather general career information through the career resource library, jobs and internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.
- Use the Cardinal Recruiting Program as a convenient way to interview with employers; or use the Reference File Service to ease the management of applications for graduate school or employment.

COMMUNITY CENTERS

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center: http://www.stanford.edu/group/a3c/
- Black Community Services Center: http://www.stanford.edu/dept/BCSC/
- El Centro Chicano: http://www.stanford.edu/dept/elcentro/
- LGBT Community Resources Center: http://lgbt.stanford.edu/
- Native American Cultural Center: http://www.stanford.edu/dept/nacc/
- Women's Community Center: http://womenscntr.stanford.edu/

DEAN OF STUDENTS

Dean of Students: Maureen H. Powers
Office: Tresidder Memorial Union
Phone: (650) 723-2733
Web Site: http://www.stanford.edu/dept/dos/

The Office of the Dean of Students seeks to ensure that the University is sensitive and responsive to the needs of students. The office is responsible for administrative offices and community centers including: the Asian American Activities Center; Black Community Services Center; El Centro Chicano; Office of Judicial Affairs; Lesbian, Gay, Bisexual, and Transgender Community Resource Center; Native American Cultural Center/American Indian Program Office; Office of Multicultural Education; Old Union; Tresidder Memorial Union; the Office of Student Activities, including Greek Affairs; Organization Conduct Board; and the Women's Community Center. The office also provides consultation and coordination with approximately 600 student organizations, student media, activities, publications, and the Associated Students of Stanford University. Students are welcome to visit the Dean of Students to discuss ideas, personal issues, or general concerns about student life.

GRADUATE LIFE OFFICE

Graduate Life Office: Escondido Village Office, 859 Escondido Road
Graduate Community Center: 750 Escondido Road
Web Site: http://glo.stanford.edu

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The recently constructed Graduate Community Center (GCC) serves as a centrally-located focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University.

GRADUATE STUDENT RESIDENCE PROGRAM

The University's philosophy of graduate student housing is based on the premise that supporting high quality graduate scholarship and research is central to the mission of the University. By providing affordable housing in proximity to academic resources, the University creates an environment conducive to research and intellectual dialogue among students, their peers, and faculty members.

HAAS CENTER FOR PUBLIC SERVICE

The Haas Center for Public Service connects academic study with community and public service to strengthen communities and develop effective public leaders. The Center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in the following areas of work. Through the center's fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations and government agencies locally, nationally, and internationally. The postgraduate public service program helps students, particularly graduating seniors, identify opportunities that will launch their public service careers in nonprofit and government agencies, and in the private sector in service-related positions. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year. With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center's Public Service Scholars Program supports seniors writing honors theses that combine academic research with service to communities. Faculty from Stanford's School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools. Another program trains Stanford students to bring results of scientific research to neighboring schools. The federally supported Community Service Work-Study program, administered in conjunction with the University's Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies. The Public Service Leadership Fellows Program provides an opportunity for students who want to be intentional about their leadership development. Center staff also provides leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.

The Haas Center houses one associated program: the Center on Philanthropy and Civil Society, a program of the Institute for Research in the Social Sciences (IRiSS).

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should visit the Haas Center, see http://haas.stanford.edu, or call (650) 723-0992.

BECHTEL INTERNATIONAL CENTER

Web Site: http://www.stanford.edu/dept/icenter/

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are utilized to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The Center believes that international educational exchange nurtures a lifelong global perspective, and plays a key role in supporting Stanford's standing as a truly international university in the following ways:

- Provides information about and assistance with obtaining and maintaining legal status in the U.S. to foreign students, scholars, and Stanford departments.
- Advises U.S. students who are pursuing scholarships for study and research abroad.
- Enables foreign students, scholars, and their family members at Stanford to receive maximum academic, cultural, and personal benefit from their stays in the U.S.
- Contributes to international activities at Stanford by helping to create a welcoming and supportive environment that is responsive to the needs of the international community.
- Facilitates professional meetings between visiting international delegations and their Stanford counterparts.
- Provides opportunities for Stanford students, faculty, staff, and members of the local community to broaden their horizons by interacting with people from different cultures through programs to increase international awareness and understanding.

JUDICIAL AFFAIRS AND STUDENT CONDUCT

In March 1996, President Gerhard Casper convened the Committee of 15 and requested a review of the student judicial system at the University under the then-existing Legislative and Judicial Charter of 1968. During the following year, the Committee of 15 conducted an extensive review of the existing charter and process and drafted a new charter to take its place. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University's Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University's Office of Judicial Affairs web site at http://judicialaffairs.stanford.edu. The web site also contains the policies, rules, and interpretations, as well as the University's Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs, at Tresidder Memorial Union, 2nd floor, phone (650) 725-2485, fax (650) 736-0247, or email judicial.affairs@stanford.edu.

The primary codes of conduct for students are the Fundamental Standard and Honor Code.

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

"Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University."

Actions that have been found to be in violation of the Fundamental Standard include:

Physical Assault
Property Damage
Forgery
Theft
Sexual harassment or other sexual misconduct
Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
Driving on campus while under the influence of alcohol
Misuse of computer equipment or email
Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

THE HONOR CODE

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

"A. The Honor Code is an undertaking of the students, individually and collectively:
  1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
  2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

"B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

"C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work."

Examples of conduct that have been found to be in violation of the Honor Code include:

Copying from another's examination paper or allowing another to copy from one's own paper
Unpermitted collaboration
Plagiarism
Revising and resubmitting a quiz or exam for regrading without the instructor's knowledge and consent
Representing as one's own work the work of another
Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at http://www.stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode.int.htm. The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a 'No Pass' for the course in which the violation occurred.

OFFICE OF RESIDENTIAL EDUCATION

Web Site: http://www.stanford.edu/dept/resed/

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The conviction behind the Stanford residence program is that formal teaching, informal learning, and personal support in residences play an important role in a Stanford education.

RESIDENTIAL EDUCATION PROGRAM

The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Residential Education programs extend the classroom into the residences and complement the academic curriculum with activities and experiences that contribute to students' preparation for a life of leadership, intellectual engagement, citizenship, and service. An extensive network of staff, including many that live in the residence halls, supports students during their undergraduate careers.

RESIDENCE DEANS

Residence Deans provide assistance to on- and off-campus students. They can advise students about personal matters, occasionally intervene directly in behavioral problems or mental health concerns, and assist with personal emergencies. Advice is also available on issues of academic probation or suspension, leaves of absence, special concerns of women or minorities, and administrative matters. Residence Deans work closely with the Dean of Students and other University offices. They are assigned to specific residences and to off-campus students. For further information, undergraduates should call Residential Education at (650) 725-2800, and graduate students should call the Graduate Life Office at (650) 723-1171.

OFFICE OF STUDENT ACTIVITIES

Web Site: http://www.stanford.edu/dept/OSA/

The Office of Student Activities supports student activities, over 600 student organizations, the ASSU, and sororities and fraternities through such as publications, workshops, one-on-one consultation, and major event planning support. The OSA also provides fundraising expertise for student groups and leadership opportunities for students.

VOLUNTARY STUDENT ORGANIZATIONS

At its March 1963 meeting, the Board of Trustees adopted the following policy:

"Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford.

"All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters.

"Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students.

"Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University."

Voluntary student organizations are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities, Old Union, room 206.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representatives of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean of the Chapel.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms for special occasions; a ticket office, a campus information center; branch offices and ATMs for the Stanford Federal Credit Union, and Wells Fargo; ATMs for Bank of America; a fitness center; and a hair styling shop. Tresidder Express carries groceries, magazines, and sundries.

TMU is also the home of the Dean of Students Office, Judicial Affairs, and the office of the Vice Provost for Student Affairs.

VADEN HEALTH CENTER

Center Office: 866 Campus Drive
Web Site: http://vaden.stanford.edu

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

MEDICAL SERVICES

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services (without charge) include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from the on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.
- Additional services (fees may apply): allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, pediatric immunizations (academic year only), drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services (without charge) include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students' social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

YWCA SEXUAL ASSAULT CENTER AT STANFORD

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday through Thursday, 2:00-4:00 PM. The center also can be reached at its 24-hour campus telephone line (650) 725-9955.

HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.
- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HIV*PACT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, the University-sponsored plan for students, fulfills this requirement. Insured by The Chickering Group, an Aetna Company (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see http://vaden.stanford.edu/insurance/dependent.html. Options for voluntary dental insurance are also offered.

OTHER SERVICES AND PROGRAMS

BOOKSTORE

Web Site: http://www.stanfordbookstore.com

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall, provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries a complete selection of Stanford logo apparel, gifts and souvenirs, periodicals, and a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline. There are five branches in addition to the Stanford Bookstore that also serve the community: the Stanford Professional Bookstore Palo Alto, (650) 614-0280, which carries medical and technical books, supplies, stationery, medical instruments, bestsellers, computers, gifts, and clothing; the Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

STANFORD CONFERENCE SERVICES

Phone: (650) 723-3126
Email: conferenceinquiries@stanford.edu
Web Site: http://conference.stanford.edu

A conference is defined as any student or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for holding a new summer conference during the mid-June through Labor Day time frame, contact Stanford Conference Services by phone or email as listed above. For conferences occurring immediately after Labor Day through early June, contact non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755 or reg-events@stanford.edu, or contact Stanford Events, (650) 723-2551 or stanfordevents@stanford.edu.

Sponsorship by a Stanford department head is required for first time conferences hosted by University departments or by conferences hosted by external organizations interested in meeting at Stanford. Conferences initiated by University departments or external organizations must demonstrate consistency with the University's academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President's Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford's campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through Labor Day.

Stanford Conference Services provides meeting planning and conference registration services for University departments on a year-round basis.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audiovisual aids, signage, and other equipment. During the academic year, housing arrangements for University-sponsored visitors can be made through the Stanford Guest House, (650) 926-2800, or at http://guesthouse.stanford.edu.

OMBUDS

Stanford University Ombuds: David Rasch
Ombuds Office: Mariposa House, 585 Capistrano Way, Room 210
Phone: (650) 723-3682
Mail Code: 94305-8200
Email: rasch@stanford.edu
Web Site: http://www.stanford.edu/dept/ombuds/

School of Medicine Ombuds: Martha McKee
Email: martha.mckee@stanford.edu

The charge to the Ombuds office at Stanford is: "The Ombudsperson's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombudsperson's office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty.

Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the "Non-Academic Regulations" section of this bulletin.

POLICE SERVICES

Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: http://police.stanford.edu

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff's Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the *Stanford Safety and Security Almanac*, available free from Public Safety, or see http://police.stanford.edu.

OFFICE FOR RELIGIOUS LIFE

Office: Memorial Church
Phone: (650) 723-1762
Web Site: http://religiouslife.stanford.edu

The mission of the Office for Religious Life is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford's history from its founding, is a vital part of both its ethos and education.

The Deans for Religious Life oversee and provide support for Stanford Associated Religions (S.A.R.), approximately thirty religious organizations invited to offer their spiritual services to the campus. The deans are committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds. They strive to ensure that students, faculty, and staff have access to honest and supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

STANFORD ALUMNI ASSOCIATION

Web Site: http://www.stanfordalumni.org
Phone: (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association (SAA) seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, Stanford magazine, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association's alumni and student class outreach department provides students with networking opportunities, celebratory and social events, and special programs that enhance their Stanford experience and help connect them to the 200,000 alumni, faculty, and students worldwide who make up the Stanford community. Alumni and student class outreach programs bring students and alumni together through Reunion Homecoming Weekend each autumn and Commencement weekend in the spring, along with alumni networking events throughout the year.

For students, SAA sponsors events such as student tailgates, alumni panels, Senior Send-off, Senior Dinner on the Quad, Class Day, the Graduation Picnic which follows Class Day, and the Senior Graduation Party. The Alumni Association gives out the J.E. Wallace Sterling award and the Stanford Award of Excellence annually to honor graduating seniors for exemplary service to the University. For more information on students programs at the Stanford Alumni Association, see http://www.stanfordalumni.org/students/home.html.

STANFORD EVENTS

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President's office such as: Commencement, Baccalaureate, the University President's inaugurations, New Student Orientation Convocation, Community Day/Founders' Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. For information about University event planning, policies, procedures, and University facilities,see http://stanfordevents.stanford.edu, or call (650) 723-2551.

Stanford Lively Arts, the University's presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see http://livelyarts.stanford.edu, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see http://tickets.stanford.edu, or call (650) 725-ARTS (2787).

AWARDS AND HONORS

FACULTY AND STAFF AWARDS

KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 to recognize of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford's long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

LLOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan's belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President's example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

STUDENT AWARDS

BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT'S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President's Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

DEANS' AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

HOEFER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

FREDERICK EMMONS TERMAN ENGINEERING SCHOLASTIC AWARD

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

PHI BETA KAPPA

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter's election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of 'B-' or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GER) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement they may satisfy. IHUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of '+' or 'CR' is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students' names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.

EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

EXCHANGE PROGRAMS

UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford, and Stanford students may apply to one of these other institutions, for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean's office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers' Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford's transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-4034; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-7602.

COURSES

AIR FORCE ROTC

The following are offered by San Jose State University:

AS 001A,B. The Foundation of the United States Air Force—Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

AS 002A,B. The Evolution of the United States Air and Space Power—Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

AS 131A,B. Air Force Leadership Studies—Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

AS 141A. National Security Affairs—Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

AS 141B. Preparation for Active Duty—Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

Leadership Laboratory (LLAB)—Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and followership skills. Guest speakers.

ARMY ROTC

FRESHMAN YEAR

MILS 11. Leadership and Personal Development—Taught on Stanford campus. Personal challenges and competencies for effective leadership. How life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Development of a personal fitness program under the guidance of an Army master fitness trainer. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field exercise away from the University.

MILS 12. Foundations in Leadership I—Taught on Stanford Campus. Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills. Leadership dimensions and values. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One evening military formal dinner.

MILS 13. Foundations in Leadership II—Taught on Stanford campus. Leadership framework; practical applications in fundamentals such as problem solving, listening, presenting briefs, and effective writing skills. Values, attributes, skills, and actions in the context of practical and interactive exercises. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field training exercise away from the University.

SOPHOMORE YEAR

MILS 21. Innovative Leadership—Taught on Stanford campus. Creative and innovative leadership strategies and styles through historical cases and interactive exercises. Personal motivation and team building through team exercises. Focus is on leadership values and attributes through organizational customs and courtesies. Leadership case studies; individual creeds and organizational ethos. Two 60-minute classes per week. Weekly 3-hour labs required. One four-day weekend field training exercise away from the University.

MILS 22. Leadership in Changing Environments—Taught on Stanford campus. The challenges of leading in contemporary operational environments. Crosscultural challenges and applications to leadership tasks and situations. Case studies. Two 60-minute classes per week. Weekly 3-hour labs required. One evening military formal dinner.

MILS 23. Team Leading Procedures—Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks and the decision making process. Planning techniques to develop orders, briefing plans, and decisions. Two 60-minute classes per week. Five 3-hour labs per quarter. One four-day weekend field training exercise away from the University.

JUNIOR YEAR

MILS 131. Adaptive Team Leadership—Taught at Santa Clara University. Adaptive leadership skills and the demands of the ROTC Leader Development Assessment Course (LDAC). Scenarios related to small-unit tactical operations to develop self awareness and thinking skills. Feedback on student leadership abilities. Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

MILS 132.Situational Leadership I—Taught at Santa Clara University. Skills in leading small units, including decision making, persuading, and motivating team members when under fire. Two 90 minute classes per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.

MILS 133. Situational Leadership II—Taught at Santa Clara University. Applications of situational leadership challenges in decision making, persuading, and motivating team members when under fire. Preparation for ROTC Leader Development Assessment Course (LDAC). Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

SENIOR YEAR

MILS 141. Developing Adaptive Leaders—Taught at Santa Clara University. Planning, executing, and assessing complex operations, functioning as a member of staff , and providing leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Responsibilities of key staff. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

MILS 142. Leadership in a Complex World I—Taught at Santa Clara University. Differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interacting with nongovernmental organizations, civilians on the battlefield, and host nation support. Two 90-minute seminars per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 141.

MILS 143. Leadership in a Complex World II—Taught at Santa Clara University. Preparation for first unit of assignment and transition to Lieutenant. Case studies, scenarios, and exercises to prepare for complex ethical and practical demands as commissioned officers in the U.S. Army. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 142.

MILITARY HISTORY

MILS 199. Dynamics of Leadership in Military History—Taught at Santa Clara University. Dynamics that drive decisions made by history's military leaders and followers. Wars and battles from 1861 to present. Techniques and innovations in military training, weapon systems, political timing, and their effect they have on strategies. Combined arms experiences.

NAVAL ROTC

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years. Students should consult http://navsci.berkeley.edu/ for more information and changes to course offerings.

NS 1. Introduction to Naval Science—Freshman year.

NS 2. Sea Power—Freshman year.

NS 3. Leadership and Management—Sophomore year.

NS 10. Naval Ship Systems I - Engineering—Sophomore year.

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

NS 12A. Navigation and Naval Operations I—Junior year.

NS 12B. Navigation and Naval Operations II—Junior year.

NS 401. Naval Ship Systems—Senior year.

NS 412. Leadership and Ethics—Senior year.

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.

NONACADEMIC REGULATIONS

STATEMENT OF NONDISCRIMINATORY POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

STUDENT ADA (AMERICANS WITH DISABILITIES ACT)/SECTION 504 GRIEVANCE PROCEDURE

For information concerning policies and procedures for students with disabilities, see http://www.stanford.edu/dept/ocr/access/student.html, or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax); see also the Student Disability Resource Center at http://www.stanford.edu/group/DRC/.

POLICY

The following is quoted from the policy:

I. *Policy*

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. *Applicability*

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

A. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
B. Inaccessibility of a program or activity;
C. Harassment or discrimination on the basis of disability;
D. Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the *Stanford Bulletin*) for disability-related grievances.

III. *Compliance Officers*

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA/Section 504 Compliance Officer. The office is located in Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. *Informal Resolution*

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution.

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

V. *Formal Complaint*

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

A. *When to File Complaint:* Complaints shall be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
B. *What to File*: a complaint must be in writing and include the following:
    1. The grievant's name, address, email address, and phone number
    2. A full description of the problem
    3. A description of what efforts have been made to resolve the issue informally
    4. A statement of the remedy requested
C. *Where to File Complaint:* the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).
D. *Notice of Receipt*: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
E. *Investigation*: the Compliance Officer or his or her designee (hereafter collectively referred to as the "grievance officer") shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
F. *Representation*: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
G. *Findings and Notification:* upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Office for good cause (including for reasons relating to breaks in the academic calendar). The final report shall also be provided, where appropriate, to any University officer whose authority

will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.

H. *Final Disposition:* the disposition proposed by the grievance officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. *Urgent Matters*

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. *Remedies*

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the grievance officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. *Appeal*

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar). The decision of the Provost on the appeal is final.

TITLE IX OF THE EDUCATION AMENDENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit discrimination on the basis of sex. The Title IX Compliance Officer is the Special Counselor to the President for Campus Relations and has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title IX and its regulations should contact the Title IX Compliance Officer, the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax). Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the "Student Non-Academic Grievance section" below. See also Administrative Guide Memo 23 at http://adminguide.stanford.edu/23.pdf.

STUDENT GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Statement on Academic Grievance Procedures (see the "Academic Policies and Statements" section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable proceedures with the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

POLICY

The following is the policy:

1. *Applicability*
   a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

      In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Statement of Nondiscriminatory Policy provides in part: "Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, it prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, gender identity, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs."

   b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:
      1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
      2. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
      3. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

   c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student's capacity as a student-employee.

   d. This procedure is available to undergraduate and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter "the Director") may, in his or her discretion, entertain an appeal in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law.

   e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

    1. The Director may be contacted at: Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax); http://www.stanford.edu/dept/ocr/.
    2. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University's Department of Human Resources.

2. *Informal Resolution*
   a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.
   b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.
3. *Formal Grievance*
   a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.
   c. The Director shall promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.
   e. The Director (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline shall be brought to the attention of the appropriate disciplinary process.
4. *Appeal*
   a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4074; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.
   b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.
5. *General Provisions*
   a. *Time Guidelines*—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar).
   b. *Advisers*—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.
   c. *Ombuds*—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds/) and the School of Medicine's Ombuds (http://www.med.stanford.edu/ombuds) are available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although they have no decision making authority, the Ombuds' Offices have wide powers of inquiry.
   d. *Sexual Harassment*—For further information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu.
   e. *No retaliation*—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford University. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at http://adminguide.stanford.edu/15_5.pdf.

COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraires have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which permit copying without permission under limited circumstances. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the Provost's Copyright Reminder, http://www.stanford.

edu/dept/ucomm/provost/copyright_reminder.html. It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly, and Stanford will charge reconnection fees starting at $100 and going up as high as $1,000 for successive DMCA complaints. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law at http://rescomp.stanford.edu/info/dmca/.

DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University's nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 23.2, Sexual Harassment, http://adminguide.stanford.edu/23_2.pdf. It is also available from the Sexual Harassment Policy Office homepage, http://harass.stanford.edu/.

SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

POLICY

The following is quoted from the policy:

1. *In General*
   a. *Applicability and Sanctions for Policy Violations*—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
   b. *Respect for Each Other*—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
   c. *Prompt Attention*—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
   d. *Confidentiality*—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.
   e. *Protection Against Retaliation*—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.
   f. *Relationship to Freedom of Expression*—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.
2. *What Is Sexual Harassment?*

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

   a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; *or*
   b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, (http://adminguide.stanford.edu/23_3.pdf) may also apply when sexual harassment involves physical contact.

3. *What To Do About Sexual Harassment*

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- The Sexual Harassment Policy Office web page at http://harass.stanford.edu.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. *Consultation*—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHadvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or "off the record." This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu/
- Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter/
- Chaplains at Memorial Church
- The University Ombudsperson, http://www.stanford.edu/dept/ombuds/
- The Medical Center Ombudsperson, http://www.med.stanford.edu/ombuds/

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/confidential.html.

For further information on confidentiality, see Section 1(d) above.

b. *Direct Communication*—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. *Third Party Intervention*—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. *Formal Grievance, Appeal, and Disciplinary Processes*—Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. *Grievances and Appeals*—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual's submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:

- "Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy" (also at http://hrweb.stanford.edu/forms/staffresolution.pdf.)
- "Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates"
- "The Dispute Resolution Process (A User's Guide)"

2. *Disciplinary Procedures*—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline and students to the Fundamental Standard. For additional information related to student judicial affairs, see http://www.stanford.edu/dept/vpsa/judicialaffairs.

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. *Procedural Matters*

a. *Investigations*—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

b. *Recordkeeping*—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

c. *Indemnification and Costs*—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, "An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such … ." The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee's duties. In general, see Administrative Guide Memo 15.7 (http://adminguide.stanford. edu/15_7.pdf).

5. *Resources for Dealing with Sexual Harassment*

a. *Advice*—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/SHadvisers.html or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

- *Sexual Harassment Advisers* (http://harass.stanford.edu/SHadvisers.html) serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.
- *The Director of the Sexual Harassment Policy Office* is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu).
- As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons. For more information, see http://harass.stanford.edu/resources.html.

b. *External Reporting*—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. *Consensual Sexual or Romantic Relationships*

a. *In General*—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

b. *With Students*—At a university, the role of the teacher is multifaceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. *Policy Review and Evaluation*

This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

RESOURCES

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at http://harass.stanford.edu, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: harass@stanford.edu.

Director: *Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)*

Assistant Director: *Nanette Andrews*

SEXUAL ASSAULT

The University's Policy on Sexual Assault is published in complete form in the Administrative Guide Memo 23.3, available at http://adminguide.stanford.edu/23_3.pdf, and on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

SUMMARY

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Background—This policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Policy—Sexual assault is unacceptable and will not be tolerated at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University's off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault. A comprehensive website containing a list of resources can be found at http://www.stanford.edu/group/svab/.

Definition—For purposes of this policy, sexual assault is defined as the commission of an unwanted sexual act, occuring without consent of both individuals, or occuring under threat or coercion. It can occur either forcibly and/or against a person's will, or when a person is incapable of giving consent (if under 18 years of age; if intoxicated by drugs or alcohol; if developmentally disabled; if temporarily or permanently mentally or physically unable to do so). Sexual assault includes but is not limited to rape, forcible sodomy, forcible oral copulation, rape with an object, sexual battery, forcible fondling, and threat of sexual assault.

Notification—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

Legal Reporting Requirements—Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

"911" Emergency Network: dial 9-911 from University phones or 911 from outside phones
Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000
YWCA Sexual Assault Center at Stanford, for students, at the Vaden Health Service, telephone (650) 725-9955
Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

Non-Emergency Resources—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy.

Ongoing Case Management Procedures—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University's policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the *Stanford Bulletin*. Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confidential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

Information Requests and Confidentiality—The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

Information about Options—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, the availability of mediation, alternative housing assignments, and academic assistance alternatives.

POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at http://adminguide.stanford.edu/15_1.pdf.

SUMMARY

The following summarizes the policy on Political Actvities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

POLICY

The following is quoted from the policy:

1. *Summary of Legal Requirements and Restrictions*
   - a. *Campaign Activities:* contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.
   - b. *Lobbying:* lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

     Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee—other than the following individuals, on matters under their jurisdiction — may lobby on behalf of the University without specific authorization:

     President
     Provost
     Deans of the Seven Schools
     Vice Provost and Dean of Research
     Vice President for Business Affairs and Chief Financial Officer
     Executive Director of Human Resources
     Director of the Stanford Linear Accelerator Center
     Director of the Hoover Institution
     General Counsel
     Vice President for Public Affairs

     The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.
   - c. *Giving of Gifts to Public Officials and Staff:* almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

     As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.
   - d. *Reporting of Political Activities:* the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.
2. *Prohibited and Restricted Political Activities*
   - a. *In General:*
     1. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.
     2. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.
     3. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.
     4. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.
     5. No person may use for lobbying activities federally-funded contract or grant money received by the University.

     Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.
   - b. *Guidelines for Avoiding Prohibited Partisan Political Activities:* the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3.b., below:
     1. *Use of Name and Seal:* neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.
     2. *Use of Address and Telephones:* no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)
     3. *Use of Title:* the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.
     4. *Use of Services and Equipment:* University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.
     5. *Use of Personnel:* no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

3. *Permissible Activities*
   1. *In General:* as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

      Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:
      1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.
      2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

      To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.
   2. *Limited University Political Activities:* limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.
4. *Responsibility for Interpretation:* the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

CAMPUS DISRUPTIONS

The University's policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/ judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.

2 obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

APPLICATION

The following are examples to illustrate the policy:

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.

USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

POLICY

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

Unscheduled events or activities are prohibited.

Requests for waivers to this policy must be submitted in writing to the Director of Public Events. Exceptions may be granted only in extraordinary cases.

RESOURCES

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Director of University Public Events at (650) 723-2551, http://stanfordevents.stanford.edu/. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, http://www.stanford.edu/dept/OSA/.

NOISE AND AMPLIFIED SOUND

POLICY

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

RESOURCES

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

a. The Office of Student Activities: phone: 723-2733, or see http://osa.stanford.edu/publications/soh/2002-2003/
b. Registrar's Scheduling Office: phone (650) 723-6755, or see http://registrar.stanford.edu/event/.
c. The Stanford Events Office: phone (650) 723-2551, or see http://stanfordevents.stanford.edu.

PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University's policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa.judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

1. The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.
2. The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term "Stanford campus" shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

CONTROLLED SUBSTANCES AND ALCOHOL

STUDENT CONDUCT

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs ("controlled substances")* and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, even death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University's policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

POLICY

The University's policy on controlled substances and alcohol is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.6, available at http://adminguide.stanford.edu/23_6.pdf, and on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa/judicialaffairs/index.html.

The following is quoted from the policy:

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the workplace, or as part of any of the University's activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution.

This policy will be reviewed at least biennially.

APPLICATIONS

The following are examples to illustrate the policy:

No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences, house funds (funds collected by the University Bursar or other University offices) may not by used to buy alcohol because the majority of undergraduates are under the legal drinking age of 21. The decision to use student-collected funds to buy alcohol should be made lawfully, thoughtfully, fairly, and in a way that respects the views of all students. Students must not be required to contribute to a student-collected fund for the purposes of purchasing alcohol. No alcoholic beverages may be served at all-freshman house events in common area spaces (e.g., lounges, hallways, patios/outdoor areas).

Party planners are responsible for planning and carrying out events in compliance with this policy. At least one house or organization officer must assume responsibility for an event's compliance with the policy, and their names must be made available to Stanford's Department of Public Safety and the University upon request.

---

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

Individuals who violate the University Residence Agreement may lose their University student housing privileges and/or be reported to the Judicial Affairs Office.

Individuals who violate the University's terms and conditions for student organization recognition as defined in the *Student Organization Handbook* may be subject to expulsion from the student organization.

Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.

Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot not be specifically measured in terms of dollar amount. For example, pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one's own safety or that of others.
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one's possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

WHERE TO GET HELP

In the event of a life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

Campus Resources—(Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Vaden Health Service's Medical Advice Line, 24 hours (723-4841); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Vaden Health Service: provides information and referral, educational trainings and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: http://www-leland.stanford.edu/dept/OSA/party/ (723-2733).

Community Resources—Alcoholics Anonymous (650) 592-2364, Alanon (650) 873-2356 or (408) 379-1051.

HAZING POLICY

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

DEFINITION OF HAZING AT STANFORD UNIVERSITY

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Judicial Affairs; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

APPLICATIONS

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Some examples of hazing activities or events may be found at http://osa.stanford.edu/publications/soh/critical_policies--hazing.shtml. Questions should be directed to the Office of Student Activities, (650) 723-2733.

SMOKE-FREE ENVIRONMENT

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.4, available at http://adminguide.stanford.edu/23_4.pdf, and Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

Applicability—This policy applies to all academic and administrative units of Stanford University, including SLAC, and all campus student housing. This policy does not supercede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

Note also that the School of Medicine has adopted a more restrictive policy; see http://med.stanford.edu/tobaccofree/.

POLICY

The following is quoted from the policy:

1. *Policy*

   It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.

2. *Guidelines*
   a. *Smoking-Prohibited Areas*—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.
      - Ashtrays will not be provided in any enclosed University building or facility.
      - "Smoking Prohibited" signs will be posted.

   b. *Outdoor Smoking Areas*—Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).

3. *Enforcement*—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.
   a. *Smoking Cessation Information*—Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.

   b. *Repeated Violations*—Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

4. *Implementation and Distribution*—Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violaters of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

COMPUTER AND NETWORK USAGE

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 62, Computer and Network Usage Policy, available at http://adminguide.stanford.edu/62.pdf.

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

CHAT ROOMS, BLOGS, AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at http://adminguide.stanford.edu/66.pdf.

POLICY

The following is quoted from the policy:

1. *Definition*

From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, blogs, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.

2. *Establishment of Forums*
   a. *Connection with University Activities*—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.
   b. *University Role*—Unless specifically sponsored by an academic administrative unit of the University, the University's role in connection with these forums will be solely as a passive Internet service provider.
   c. *Terms of Use*—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled "Terms of Use." The URL is http://www. stanford.edu/home/atoz/terms.html.

3. *Operation of Forums*

All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University's various policies regarding computer facilities and services.

PROTECTION OF CONFIDENTIAL DATA

Stanford University maintains confidential data including Social Security numbers, financial information, health information, and student records. It is incumbent on every member of the Stanford community with lawful access to confidential data to protect it. Confidential data in electronic form should not be stored locally on desktop machines. Members of the Stanford community should familiarize themselves with applicable laws and University policies on privacy as provided by the University, including Administrative Guide Memo 63, Information Security, http://adminguide.stanford.edu/63.pdf, Administrative Guide Memo 64, Identification and Authentication of Systems, http://adminguide.stanford.edu/64.pdf, Administrative Guide Memo 65, Electronic Commerce, http://adminguide.stanford.edu/65.pdf, and Administrative Guide Memo 67, Information Security Incident Response, http://adminguide.stanford. edu/67.pdf.

CAMPUS SAFETY AND CRIMINAL STATISTICS

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the Department of Public Safety web site at http://police.stanford.edu/index2.html.

INDEX

APPENDIX: AXESS SUBJECT CODES

AA	Aeronautics and Astronautics
ACCT	Accounting
AFRICAAM	African and African American Studies
AFRICAST	African Studies, Center For
AMELANG	African and Middle Eastern Languages
AMSTUD	American Studies
ANES	Anesthesia
ANTHSCI	Anthropological Sciences
APPLLING	Applied Linguistics
APPPHYS	Applied Physics
ARCHLGY	Archaeology
ARTHIST	Art History
ARTSTUDI	Art Studio
ASNAMST	Asian American Studies
ASTRNMY	Astronomy
ATHLETIC	Athletics, Physical Education, and Recreation
BIOC	Biochemistry
BIOHOPK	Biological Sciences/Hopkins Marine
BIOE	Bioengineering
BIOMEDIN	Biomedical Informatics
BIOPHYS	Biophysics
BIOSCI	Biological Sciences
CASA	Cultural and Social Anthropology
CBIO	Cancer Biology
CEE	Civil and Environmental Engineering
CHEM	Chemistry
CHEMENG	Chemical Engineering
CHICANST	Chicana/o Studies
CHINGEN	Chinese General
CHINLANG	Chinese Language
CHINLIT	Chinese Literature
CLASSART	Classics Art/Archaeology
CLASSGEN	Classics General
CLASSGRK	Classics Greek
CLASSHIS	Classics History
CLASSLAT	Classics Latin
CME	Computational and Mathematical Engineering
COMM	Communication
COMPLIT	Comparative Literature
COMPMED	Comparative Medicine
CS	Computer Science
CSB	Chemical Systems Biology
CSP	Continuing Studies Program
CSRE	Comparative Studies in Race and Ethnicity
CTL	Center for Teaching and Learning
CTS	Cardiothoracic Surgery
DANCE	Dance
DBIO	Developmental Biology
DERM	Dermatology
DLCL	Division of Literatures, Cultures, and Languages
DRAMA	Drama
EARTHSYS	Earth Systems
EASTASN	East Asian Studies
ECON	Economics
EDUC	Education
EE	Electrical Engineering
EEES	Earth, Energy, and Environmental Sciences
EFSLANG	English for Foreign Students
ENERGY	Energy Resources Engineering
ENGLISH	English
ENGR	Engineering
ETHICSOC	Ethics in Society
FEMST	Feminist Studies
FILMSTUD	Film Studies
FILMPROD	Practice of Film
FINANCE	Finance
FRENGEN	French General
FRENLANG	French Language
FRENLIT	French Literature
GENE	Genetics
GEOPHYS	Geophysics
GERGEN	German General
GERLANG	German Language
GERLIT	German Literature
GES	Geological and Environmental Sciences
GSBGEN	GSB General and Interdisciplinary
HISTORY	History
HPS	History and Philosophy of Science
HRMGT	Human Resource Management
HRP	Health Research and Policy
HUMBIO	Human Biology
HUMNTIES	Interdisciplinary Studies in the Humanities
HUMSCI	Humanities and Sciences
ICA	International Comparative and Area Studies
IHUM	Introduction to the Humanities
IIS	Freeman Spogli Institute for International Studies
IMMUNOL	Immunology
INDE	Medicine Interdisciplinary
INTNLREL	International Relations
IPER	Interdisciplinary Program in Environment and Resources
IPS	International Policy Studies
ITALGEN	Italian General
ITALLANG	Italian Language
ITALLIT	Italian Literature
JAPANGEN	Japanese General
JAPANLIT	Japanese Literature
JAPANLNG	Japanese Language
JEWISHST	Jewish Studies
KORGEN	Korean General
KORLANG	Korean Language
LATINAM	Latin American Studies
LAW	Law
LAWGEN	Law, Nonprofessional
LINGUIST	Linguistics
MATH	Mathematics
MATSCI	Materials Science and Engineering
MCP	Molecular and Cellular Physiology
MCS	Mathematical and Computational Science
ME	Mechanical Engineering
MED	Medicine
MEDVLST	Medieval Studies
MGTECON	Economic Analysis and Policy
MI	Microbiology and Immunology
MKTG	Marketing
MLA	Master of Liberal Arts
MS&E	Management Science and Engineering
MTL	Modern Thought and Literature
MUSIC	Music
NATIVEAM	Native American Studies
NBIO	Neurobiology
NENS	Neurology and Neurological Sciences
NEPR	Neurosciences Program
NSUR	Neurosurgery
OB	Organizational Behavior
OBGYN	Obstetrics and Gynecology
OIT	Operations Information and Technology
OPHT	Ophthalmology
ORTHO	Orthopedic Surgery
OSPAUSTL	Stanford Program in Australia
OSPBEIJ	Stanford Program in Beijing
OSPBER	Stanford Program in Berlin
OSPFLOR	Stanford Program in Florence
OSPGEN	Overseas Seminars
OSPKYOCT	Kyoto Center for Japanese Studies
OSPKYOTO	Stanford Program in Kyoto—SCTI
OSPMOSC	Stanford Program in Moscow
OSPOXFRD	Stanford Program in Oxford
OSPPARIS	Stanford Program in Paris
OSPSANTG	Stanford Program in Santiago
OTOHNS	Otolaryngology
PATH	Pathology
PEDS	Pediatrics
PHIL	Philosophy
PHYSICS	Physics
POLECON	Political Economics
POLISCI	Political Science
PORTLANG	Portuguese Language
PORTLIT	Portuguese Literature
PSYC	Psychiatry
PSYCH	Psychology
PUBLPOL	Public Policy
PWR	Program in Writing and Rhetoric
RAD	Radiology
RADO	Radiation Oncology
REES	Russian, East European, and Eurasian Studies
RELIGST	Religious Studies
SBIO	Structural Biology
SIS	Stanford Introductory Seminars
SIW	Stanford in Washington
SLAVGEN	Slavic General
SLAVLANG	Slavic Language
SLAVLIT	Slavic Literature
SLE	Structured Liberal Education
SOC	Sociology
SOPHCOLL	Sophomore College
SPANLANG	Spanish Language
SPANLIT	Spanish Literature
SPECLANG	Special Language Program
STATS	Statistics
STRAMGT	Strategic Management
STS	Science, Technology, and Society
SURG	Surgery
SYMBSYS	Symbolic Systems
TIBETLNG	Tibetan Language
URBANST	Urban Studies
UROL	Urology
