APPPHYS 473B. Topics in Condensed Matter Physics: Many Body Physics in Quantum Dots—Coulomb blockade, rate equations, Landauer formula, co-tunneling, the Anderson model, Schrieffer-Wolff transformation, Kondo Hamiltonian. Fermi edge singularity, bosonization, the Coulomb gas representation and their relation to the Kondo effect. Fixed point Hamiltonian, Friedel sum rule, and transport properties. May be repeated for credit. Prerequisite: PHYSICS 231.
3 units, Aut (Oreg, Y)

APPPHYS 473C. Topics in Condensed Matter Physics: Novel Superconductivity—Superconductors whose properties cannot be described by the Bardeen-Cooper-Schrieffer or Ginzburg-Landau theories of superconductivity in their conventional forms. New physical properties: non-S-wave pairing symmetry, magnetic superconductors, time reversal symmetry breaking, odd-frequency superconductors, two-band superconductors, superconductivity in the Bose-Einstein condensation limit, coupled order parameters. Mechanisms of superconductivity beyond the conventional electron-phonon interaction: magnetic fluctuations, excitons, negative-U centers, charge Kondo effect, and bipolarons. May be repeated for credit. Prerequisite: 272 or PHYSICS 172 or equivalent. Recommended: 280.
3 units, Spr (Beasley, M)

APPPHYS 483. Optics and Electronics Seminar—Current research topics in lasers, quantum electronics, optics, and photonics by faculty, students, and invited speakers. May be repeated for credit.
1 unit, Aut (Miller, D), Win (Byer, R), Spr (Fan, S)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 232. Advanced Imaging Lab in Biophysics—(Same as BIOPHYS 232, MCP 232.)
4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

BIOSCI 217. Neuronal Biophysics
4 units, Spr (Schnitzer, M)

EE 222,223. Applied Quantum Mechanics I and II
3 units, **222:** *Aut,* **223:** *Win (Miller, D)*

EE 231. Introduction to Lasers
3 units, Win (Digonnet, M)

EE 232. Laser Dynamics
3 units, Spr (Fan, S)

EE 248. Fundamentals of Noise Processes
3 units, Aut (Yamamoto, Y)

EE 268. Introduction to Modern Optics
3 units, Aut (Byer, R)

EE 346. Introduction to Nonlinear Optics
3 units, Spr (Harris, S)

EE 366. Introduction to Fourier Optics
3 units, Aut (Hesselink, L)

MATSCI 205. Waves and Diffraction in Solids
3-4 units, Win (Clemens, B)

PHYSICS 172. Solid State Physics
3 units, Spr (Manoharan, H)

PHYSICS 210. Advanced Particle Mechanics
3 units, Aut (Laughlin, R)

PHYSICS 212. Statistical Mechanics
3 units, Spr (Peskin, M)

PHYSICS 220. Classical Electrodynamics
3 units, Win (Silverstein, E)

PHYSICS 221. Classical Electrodynamics
3 units, Spr (Tantawi, S)

PHYSICS 230. Quantum Mechanics
3 units, Aut (Shenker, S)

PHYSICS 231. Quantum Mechanics
3 units, Win (Shenker, S)

PHYSICS 372. Condensed Matter Theory I
3 units, Win (Laughlin, R)

PHYSICS 373. Condensed Matter Theory II
3 units, Spr (Laughlin, R)

ARCHAEOLOGY PROGRAM

Director: Ian Hodder (Anthropology)
Professors: Ian Hodder (Anthropology), Richard Klein (Anthropology), Gail Mahood (Geological and Environmental Sciences), Lynn Meskell (Anthropology), Ian Morris (Classics, History), Amos Nur (Geophysics), Michael Shanks (Classics)
Associate Professors: Jody Maxmin (Art History, Classics), John Rick (Anthropology), Jennifer Trimble (Classics)
Assistant Professors: Giovanna Ceserani (Classics), David DeGusta (Anthropology), Ian Robertson (Anthropology), Barbara Voss (Anthropology), Michael Wilcox (Anthropology)
Associated Staff: Laura Jones (Campus Archaeologist), Tom Seligman (Cantor Center)
Fellows: Patrick Hunt, Bill Rathje, James Truncer

Program Offices: Building 500, Main Quad
Mail Code: 94305-2170
Program Phone: (650) 723-5731
Web Site: http://archaeology.stanford.edu

Human beings and their ancestors have roamed the earth for at least five million years, but only invented writing five thousand years ago. And for most of the period since its invention, writing only tells us about small elite groups. Archaeology is the only discipline that gives direct access to the experiences of all members of all cultures, everywhere in the world. Stanford's Archaeology Program is unique in providing students with an interdisciplinary approach to the material remains of past societies, drawing in equal parts on the humanities, social sciences, and natural sciences.

The program has three goals:

1. To provide a broad and rigorous introduction to the analysis of the material culture of past societies, drawing on the questions and methods of the humanities, social sciences, and natural sciences.
2. To relate this analysis to the practice of archaeology in the contemporary world.
3. To help each student achieve a high level of understanding through concentrated study of a particular research area.

The Archaeology curriculum draws on faculty from a wide range of University departments and schools. To complete the requirements for the major, students must take courses from the offerings of the program and from the listings of other University departments. The program culminates in a B.A. in Archaeology.

Archaeology majors are well prepared for advanced training in professional schools such as education, law, and journalism, and, depending on their choice of upper-division courses, graduate programs in the humanities, social sciences, and natural sciences.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The B.A. in Archaeology requires a minimum of 65 units in the major, divided among five components:

1. *Core Program* (20 units), consisting of:
   a) Gateway: ARCHLGY 1, Introduction to Prehistoric Archaeology (5 units)
   b) Intermediate: ARCHLGY 102, Archaeological Methods and Research Design (5 units)
   c) Intermediate: ARCHLGY 103, History of Archaeological Thought (5 units; Writing in the Major)
   d) Capstone: ARCHLGY 107A, Archaeology as a Profession (5 units)

   ARCHLGY 1 is recommended as a first course, and many upper-level courses in Archaeology require this course as a prerequisite. Students should normally take the capstone course in their final year of course work in the major.
2. *Analytical Methods and Computing* (at least 3-5 units): quantitative skills and computing ability are indispensable to archaeologists. It is recommended that students take either ANTHSCI 192, Data Analysis in Anthropological Science, or ANTHSCI 208, Models and Imaging in Archaeological Computing. Other courses that may satisfy this requirement are PSYCH 10/STATS 60, ECON 102A, and GES 160.
3. *Archaeological Skills* (at least 10 units): archaeological skills include archaeological formation processes, botanical analysis, cartography, ceramic analysis, dating methods, faunal analysis, geographic information systems, geology, geophysics, genetics, osteology, remote sensing, soil chemistry, and statistics. Students are required to take at least 5 units from section A, Formation Processes, and at least 5 units from section B, Archaeological Methods. Students are encouraged, whenever possible, to take GES 186, Geoarchaeology, to fulfill the formation processes requirement. With the approval of the instructor and Archaeology director, undergraduates may fulfill part of this requirement from graduate-level courses (i.e., courses with numbers of 200 or higher). Note: this list combines historical and current offerings subject to change; contact the Archaeology program administrator for course planning beyond this year and check the web site.

Section A: Formation Processes

GES 1. Fundamentals of Geology	5
GES 49N. Field Trip to Death Valley and Owens Valley	5
GES 102. Earth Materials	5
GES 144. Fundamentals of Geographic Information Science	4
GES 160. Statistical Methods for Earth and Environmental Sciences: General Introduction	5
GES 186/286. Geoarchaeology	5
GEOPHYS 140. Introduction to Remote Sensing	3

Section B: Archaeological Methods

ANTHSCI 133A. Human Osteology	5
ANTHSCI 133B. Advanced Human Osteology	5
CASA 103. Laboratory Methods in Historical Archaeology	5
CASA 150. Archaeological Methods and Research Design	5
CLASSART 150. Archaeological Fieldwork in the Mediterranean	5

4. *Theory* (at least 10 units): topics include archaeological, art-historical, sociocultural, historical, and material culture theory. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses (i.e., courses with numbers of 200 or higher). Note: the following list is a combination of historical and current offerings; contact the Archaeology administrator for course planning beyond this year and check the web site.

ANTHSCI 143. Ethnoarchaeology	5
ANTHSCI 190. Social Theory in the Anthropological Sciences	5
CASA 108. History of Archaeological Thought	5
CASA 112/212. Archaeology of Modern Urbanism	5
CASA 172. Object Lessons	5

5. *Area of Concentration* (at least 20 units): in consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses should be chosen from the list below. Courses other than those on this list can be used to fulfill this requirement with the prior approval of the student's faculty adviser and the program director. With the approval of the instructor, undergraduates may fulfill part of this requirement from graduate-level courses, typically courses numbered 200 or higher. Some courses, such as ANTHSCI 140, Stone Tools in Prehistory, can be taken either to fulfill the skills requirement or as part of an area of concentration. However, each course may only count toward one component of the program. Students are encouraged to design their own area of concentration, with the prior approval of the student's faculty adviser and the program director.

Concentrations—In addition to the following components, majors must participate in an archaeological field project, and complete a collateral language requirement. Note: this list combines historical and current offerings subject to change. Contact the Archaeology program administrator for course planning beyond this year.

Small Scale Societies:

CASA 117 . Archaeology of the American Southwest	5
ANTHSCI 143. Ethnoarchaeology	5

Archaeology of Complex Societies:

CLASSART 101. Archaic Greek Art	5
CASA 79. Anthropological Perspectives on Israeli-Palestinian Conflict	5
CLASSART 102. Classical and 4th-Century Greek Art	4-5
ARCHLGY 104C/304C. The Archaeology of Ancient China	5

Mediterranean Archaeology:

CASA 79. Anthropological Perspectives on Israeli-Palestinian Conflict	5
CASA 158. Sex, Death and Body in Ancient Egypt	5
CLASSART 61. The Archaeology of the Greek World	5
CLASSART 81. Introduction to Roman Archaeology	5
CLASSART 101. Archaic Greek Art	5
CLASSART 102. Classical and 4th-Century Greek Art	4-5
CLASSART 105. The Body in Roman Art	3-5

New World Archaeology:

ARCHLGY 102B. Intro to Andean Archaeology	5
ANTHSCI 22. Archaeology of North America	5
ANTHSCI 27. Introduction to Mesoamerican Archaeology	5
ANTHSCI 111. Language and Prehistory	5
ANTHSCI 141. Hunter-Gatherers in an Archaeological Perspective	5
ANTHSCI 142. Incas and their Ancestors: Peruvian Archaeology	5
ANTHSCI 144. Urbanism in the Pre-Hispanic New World	5
ANTHSCI 146A. Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology	5
CASA 117/217. Archaeology of the American Southwest	5

Archaeological Fieldwork—Students may meet this requirement in three ways:

1. ANTHSCI 149, Archaeological Field Methods.
2. taking part in a month-long field project directed by a Stanford faculty member, and taking a directed reading during the returning academic year for credit. In 2007-08, field projects are underway in Peru, Rome, Sicily, Switzerland, and Turkey.
3. completing a field school offered by another institution. Such field schools must be approved in advance by the student's undergraduate adviser and by the director of the Archaeology Program.

Collateral Language Requirement—All Archaeology majors must demonstrate competence in a foreign language beyond the first-year level. Students can meet this requirement by completing a course beyond the first-year level with a grade of 'B' or better, and are encouraged to choose a language that has relevance to their archaeological region or topic of interest. Students may petition to take an introductory-level course in a second language to fulfill this requirement by demonstrating the connection between the language(s) and their research interest(s).

To declare a major in Archaeology, students should contact the program administrator, who provides an application form, answers initial questions, and helps the student select a faculty adviser and area of concentration. All majors must complete 65 units, which must form a coherent program of study and be approved by the student's faculty adviser and the program director.

Students who plan to pursue graduate work in Archaeology should be aware of the admission requirements of the particular departments to which they intend to apply. These vary greatly. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINOR

A minor in Archaeology provides an introduction to the study of the material cultures of past societies. It can complement many majors, including but not limited to Anthropology, Applied Physics, Art and Art History, Classics, Earth Systems, Geological and Environmental Sciences, History, and Religious Studies.

To minor in Archaeology, the student must complete at least 27 units of relevant course work, including:

1. *Core Program* (10 units), consisting of:
   a) Gateway: ARCHLGY 1, Introduction to Prehistoric Archaeology (5 units)
   b) Capstone: ARCHLGY 103, History of Archaeological Thought (5 units; Writing in the Major)

   ARHCLGY 1 is recommended as a first course, and many of the upper-level courses in archaeology require this course as a prerequisite. Students should normally take the capstone course in their final year of course work in the minor.
2. *Archaeological Skills* (2-5 units): archaeological skills include dating methods, faunal analysis, botanical analysis, ceramic analysis, geology, geophysics, soil chemistry, remote sensing, osteology, genetics, statistics, cartography, and geographic information systems. The course(s) must be selected from either section in the list above.
3. *Theory* (5 units): topics include archaeological, art-historical, sociocultural, historical, and material-culture theory. The course(s) must be selected from the list given above.
4. *Area of Concentration* (10 units): in consultation with their faculty advisers, students choose an area of concentration in archaeological research. Concentrations can be defined in terms of time and space such as small-scale societies or the archaeology of complex societies, or in terms of research problems such as new world archaeology or Mediterranean archaeology. An area of concentration should provide both breadth and depth in a specific research area. Courses must be selected from the list above. Students are encouraged to design their own area of concentration, with the prior approval of both the student's faculty adviser and the program director.

Students must complete the declaration process (both the planning form submission and Axess registration) by the last day of the quarter, two quarters prior to degree conferral (for example, by the last day of Autumn Quarter if Spring graduation is intended).

HONORS PROGRAM

The honors program in Archaeology gives qualified Archaeology majors the chance to work closely with faculty on an individual research project culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses, independent interests, research on artifacts in Stanford's collections, or fieldwork experiences.

Candidates of sophomore and junior standing with an overall Stanford grade point average (GPA) of 3.0 or better should submit an application to the program administrator no later than the end of the fourth week of the Spring Quarter. It must include a brief statement of the project, a transcript, a short paper, and a letter of recommendation from the faculty member who supervises the honors thesis. Students are notified of their acceptance by the undergraduate committee.

Approved candidates must complete all of the requirements for their major and submit an honors thesis no later than four weeks prior to the end of the quarter in which graduation is anticipated. The thesis is read by the candidate's adviser and a second reader appointed by the undergraduate committee. Honors candidates may enroll in one of the honors or thesis courses in Anthropology, Classics, Geological and Environmental Sciences, or Geophysics for up to three quarters during their senior year (15 units maximum). No more than 5 of those units may count toward the 65-unit degree requirement.

COURSES

CORE COURSES

These courses are required of all Archaeology majors.

ARCHLGY 1. Introduction to Prehistoric Archaeology—(Same as ANTHSCI 3.) Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development are examined for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each. GER:DB-SocSci, EC-GlobalCom

3-5 units, Aut (Robertson, I)

ARCHLGY 99A. Historical Archaeology in the Archive, Lab, and Underground: Methods—The practice of historical archaeology through methodologies including archival research, oral history, material culture analysis, and archaeological excavation; their relationship to big questions of archaeological research. Hands-on exercises.

5 units, Aut (Williams, B)

ARCHLGY 101B/301B. Humanized Landscapes: Archaeological Approaches to Human/Environment Interactions—(Graduate students register for 301B.) Perspectives, methods, and data that archaeology brings to human/environment interaction issues such as environmental variability and change, sustainability, and human impacts. How to use paleoenvironmental data in archaeological research; how to recover and analyze such data to reconstruct human/environment interactions in prehistory.
3-5 units, Aut (Contreras, D)

ARCHLGY 102. Archaeological Methods—(Same as CASA 150.) Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions.
5 units, Spr (Hodder, I)

ARCHLGY 102B. Incas and their Ancestors: Peruvian Archaeology—(Same as ANTHSCI 142/242A.) The development of high civilizations in Andean S. America from hunter-gatherer origins to the powerful, expansive Inca empire. The contrasting ecologies of coast, sierra, and jungle areas of early Peruvian societies from 12,000 to 2,000 B.C.E. The domestication of indigenous plants which provided the economic foundation for monumental cities, ceramics, and textiles. Cultural evolution, and why and how major transformations occurred. GER:DB-SocSci, EC-GlobalCom
3-5 units, Aut (Staff), Spr (Contreras, D)

ARCHLGY 103. History of Archaeological Thought—(Same as CASA 108.) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. WIM
5 units, Aut (Meskell, L)

ARCHLGY 103C/303C. Visualizing Archaeological Knowledge in the Information Age—(Graduate students register for 303C.) Why should archaeologists be concerned with new media? The emergence of new media in the popular and technical realms; why archaeology has begun to use new media and how it can benefit; how representing and distributing archaeological information is being changed, and epistemological and ethical implications. Hands-on application of new media to an archaeological project using blogs, wikis, and 3-D immersive environments.
3-5 units, Win (Webmoor, T)

ARCHLGY 104. Archaeology of Modern Times—(Same as ANTHSCI 147.) Archaeological theory, method, and data are used to approach an issue of contemporary public concern. Issues include resource and energy management strategies such as the electricity situation in California, biodegradation and solid waste management, the relationship between human beings and dogs, ethnic wars in the Balkans and elsewhere, and Bill Gates' strategies in the rise of Microsoft. GER:DB-SocSci
5 units, not given this year

ARCHLGY 104C/304C. The Archaeology of Ancient China—(Graduate students register for 304C.) Early China from the perspective of material remains unearthed from archaeological sites; the development of Chinese culture from early hominid occupation nearly 2 million years ago through the development of agriculture in the Neolithic period and complex society in the Bronze Age to the political unification of China under the Qin Dynasty. Continuity of Chinese culture from past to present, history of Chinese archaeology, relationships between archaeology and politics, and food in early China.
5 units, Spr (Reinhart, K)

ARCHLGY 105A/305A. Global Heritage and Cultural Property—(Graduate students register for 305A.) Focus is on the international trade in antiquities, and associated ethical and legal issues.
3-5 units, Spr (Staff)

ARCHLGY 106A/306A. Museums and Collections—(Graduate students register for 306A.) Global organization of museums; their history and roles in society. Social issues involved in the management of collections, and their public role. The role of the curator in contemporary society.
3-5 units, Spr (Staff)

ARCHLGY 107A. Archaeology as a Profession—Academic, contract, field, laboratory, museums, and heritage aspects of the archaeological profession.
5 units, Win (Camp, S)

ARCHLGY 108A. Archaeological Field Methods—Student participation in on-campus excavation at the site of the old gymnasium. Excavation skills, laboratory processing, and primary recording.
5 units, Win (Jones, L)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 3. Introduction to Prehistoric Archaeology—(Same as ARCHLGY 1.)
3-5 units, Aut (Robertson, I)

ANTHSCI 6/206. Human Origins—(Same as BIOSCI 106, HUMBIO 6.)
5 units, Win (Klein, R)

ANTHSCI 13. Bioarchaeology
3-5 units, not given this year

ANTHSCI 14. Introduction to Anthropological Genetics—(Same as HUMBIO 14.)
3-5 units, Win (Jobin, M), Spr (Horsburgh, K)

ANTHSCI 22. Archaeology of North America
3-5 units, Win (Truncer, J)

ANTHSCI 28. Australia and New Guinea Ethnology
4 units, not given this year

ANTHSCI 106B. Maya Mythology and the Popol Vuh
5 units, Win (Fox, J)

ANTHSCI 111/211. Language and Prehistory
3 units, Aut (Ruhlen, M; Fournier, R)

ANTHSCI 114/214. The Biology and Evolution of Language
4-5 units, Spr (Fox, J)

ANTHSCI 115/215. Maya Hieroglyphic Writing
5 units, not given this year

ANTHSCI 117/217. Introduction to the Language and Culture of the Aztecs
3-5 units, not given this year

ANTHSCI 130C/230C. Current Issues in Paleoanthropology—(Same as BIOSCI 130.)
1 unit, Aut, Win, Spr (DeGusta, D; Klein, R)

ANTHSCI 133A/233A. Human Osteology—(Same as HUMBIO 180.)
5 units, Win (DeGusta, D)

ANTHSCI 133B/233B. Advanced Human Osteology
5 units, Spr (DeGusta, D)

ANTHSCI 141/241. Hunter-Gatherers in Archaeological Perspective
4-5 units, Aut (Truncer, J)

ANTHSCI 143/243. Ethnoarchaeology
3-5 units, Spr (Bird, D)

ANTHSCI 144/244. Ancient Cities in the New World
3-5 units, Spr (Robertson, I)

ANTHSCI 144B. India's Forgotten Empire: The Rise and Fall of Indus Civilization
3 units, Aut (Truncer, J)

ANTHSCI 144C/204. Archaeology of Central Mexico
3-5 units, not given this year

ANTHSCI 145B/245B. Evolution of Civilizations
3-5 units, not given this year

ANTHSCI 146A. The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology
3-5 units, Win (Robertson, I)

ANTHSCI 149B/208. Digital Methods in Archaeology
3-5 units, Win (Contreras, D)

ANTHSCI 190. Social Theory in the Anthropological Sciences
5 units, Win (Brown, M)

ANTHSCI 191A/291A. Communicating Science: Proposals, Talks, Articles
4-5 units, Win (DeGusta, D)

ANTHSCI 192/292. Data Analysis in the Anthropological Sciences
5 units, Spr (Robertson, I)

ANTHSCI 242. Beginnings of Social Complexity
5 units, not given this year

ANTHSCI 290B. Advanced Evolutionary Theory in Anthropological Sciences
5 units, Win (Bird, R)

ARTHIST 203. Greek Art in and out of Context—(Same as CLASSART 109.)
5 units, Aut (Maxmin, J)

ARTHIST 204A. Appropriations of Greek Art—(Same as CLASSART 110.)
5 units, Spr (Maxmin, J)

CASA 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America
5 units, not given this year

CASA 94. Postfield Research Seminar
5 units, Aut (Burce, A)

CASA 103/203. Laboratory Methods in Archaeology
5 units, not given this year

CASA 112/212. The Archaeology of Modern Urbanism
5 units, Win (Voss, B)

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates
5 units, not given this year

CASA 137E/237E. Excavation at Catalhoyuk, Turkey
3-5 units, Spr (Hodder, I)

CASA 138/238. Archaeology of Sex, Sexuality, and Gender
5 units, Spr (Voss, B)

CASA 152/252. Archaeology: World Cultural Heritage
5 units, not given this year

CASA 156. Interpreting Space and Place: An Introduction to Mapmaking
5 units, Aut (Engel, C)

CASA 158/258. Sex, Death, and the Body in Ancient Egypt
5 units, Win (Meskell, L)

CASA 172/272. Object Lessons
3-5 units, Aut (Meskell, L)

CASA 346A. Sexuality Studies in Anthropology
5 units, not given this year

CASA 360. Archaeological Methods and Research Design
5 units, Spr (Hodder, I)

CASA 373. Introduction to Archaeological Theory
5 units, Win (Hodder, I)

CASA 375. Archaeology and Globalism
4-5 units, not given this year

CASA 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau
5 units, Win (Voss, B)

CLASSART 61. Introduction to Greek Archaeology
3-5 units, Aut (Krotscheck, U)

CLASSART 81. Introduction to Roman Archaeology
4-5 units, Win (Butler, M)

CLASSART 101/201. Archaic Greek Art—(Same as ARTHIST 101/301.)
4 units, Aut (Maxmin, J)

CLASSART 102/202. Classical and 4th-Century Greek Art—(Same as ARTHIST 102/302.)
4 units, Win (Maxmin, J)

CLASSART 126. Alpine Archaeology
3-5 units, Spr (Hunt, P)

CLASSART 250. Cultural Heritage and Classical Antiquities
5 units, Win (Trimble, J)

CLASSART 323. Archaeology of the Roman Economy
5 units, Spr (Trimble, J)

EE 140. The Earth From Space: Introduction to Remote Sensing
3 units, Win (Zebker, H)

GEOPHYS 190. Near-Surface Geophysics
3 units, not given this year

GES 1. Dynamic Earth: Fundamentals of Earth Science
4 units, Aut, Spr (Scherer, H)

GES 7A. An Introduction to Wilderness Skills
1 unit, Aut (Bird, D)

GES 49N. Field Trip to Death Valley and Owens Valley
3 units, Win (Mahood, G)

GES 102. Earth Materials
5 units, Aut (Brown, G; Mattinson, C)

GES 144. Fundamentals of Geographic Information Science (GIS)—(Same as EARTHSYS 144.)
4 units, Spr (Seto, K)

GES 160. Statistical Methods for Earth and Environmental Sciences: General Introduction
3 units, Spr (Switzer, P)

GES 185. Volcanology
3-4 units, Spr (Mahood, G), alternate years, not given next year

GES 186/286. Geoarchaeology
5 units, alternate years, not given this year

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
5 units, Aut, Win (Steiner, F)

PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.)
5 units, Aut (Thomas, E), Win (Walther, G), Spr, Sum (Staff)

ART AND ART HISTORY

Emeriti: (Professors) Keith Boyle, Kristina Branch, Elliot Eisner, Lorenz Eitner, Suzanne Lewis, Frank Lobdell, Dwight C. Miller, Nathan Oliveira, Richard Randell, Michael Sullivan, Paul V. Turner
Chair: Kristine Samuelson
Area Director for Art History: Maria Gough
Area Director for Film and Media Studies: Kristine Samuelson
Area Director for Studio Art and Director of Undergraduate Studies for Studio Art: Enrique Chagoya
Director of Undergraduate Studies for Art History: Jody Maxmin
Director of Undergraduate Studies for Film and Media Studies: Scott Bukatman
Directors of Graduate Studies in Art History: Pavle Levi
Director of Graduate Studies in Studio Art: Gail Wight
Director of Graduate Studies in Documentary Film: Jan Krawitz
Professors: Wanda M. Corn (American Art), David Hannah (Painting/Drawing), Matthew S. Kahn (Design), Jan Krawitz (Documentary Film), Michael Marrinan (18th- and 19th-century European Art), Kristine Samuelson (Documentary Film), Melinda Takeuchi (Japanese Art), Richard Vinograd (Chinese Art; on leave Autumn and Winter), Bryan Wolf (American Art)
Associate Professors: Scott Bukatman (Film Studies; on leave Winter and Spring), Enrique Chagoya (Painting/Drawing/Printmaking), Paul DeMarinis (Electronic Media), Maria Gough (Modern Art), Pamela M. Lee (Contemporary Art; on leave), Jody Maxmin (Ancient Art), Gail Wight (Electronic Media; on leave)
Assistant Professors: Morten Hansen (Renaissance Art), Pavle Levi (Film Studies), Jean Ma (Film Studies), Barbaro Martinez-Ruiz (African Art; in Oxford Spring), Jamie Meltzer (Documentary Film), Bissera Pentcheva (Medieval Art; on leave)
Professor (Teaching): Joel Leivick (Photography)
Fellow: Ara Merjian (Modern Art)
Lecturers: Robert Dawson (Photography), John Edmark (Design), Lukas Felzmann (Photography)
Visiting Assistant Professor: Jennifer Marshall (American Art)
Affiliated Professor: John H. Merryman (Law; emeritus)

Department Offices: Room 101, Cummings Art Building
Mail Code: 94305-2018
Phone: (650) 723-3404
Web Site: http://art.stanford.edu

Courses given in Art have the subject codes ARTHIST, ARTSTUDI, FILMSTUD, and FILMPROD. For a complete list of subject codes, see Appendix.

The department offers courses of study in: (1) the history of art, (2) the practice of art (studio), and (3) film and media studies, leading to the following degrees: B.A. degrees in Art with fields of study in: Art History and Studio Art; B.A. degrees in Film and Media Studies with fields of study in: Film History; Film and Culture; Avant Garde Aesthetics and Performance; Film, Media, and Technology; and Writing, Criticism, and Practice in Film and Media Studies; M.F.A. degrees with fields of study in: Design; New Genres; Painting; Photography; and Sculpture; an M.F.A. degree in Documentary Film and Video; Ph.D. degrees in Art with fields of study in: Art History and Humanities; and History of Art; and a joint Ph.D. in Art History and Humanities.

The undergraduate program is designed to help students to think critically about the visual arts and visual culture. Courses focus on the meaning of images and media, and their historical development, roles in society, and relationships to disciplines such as literature, music, and philosophy. Work performed in the classroom, studio, and screening room is designed to develop a student's powers of perception, capacity for visual analysis, and knowledge of technical processes.

The Iris and B. Gerald Cantor Center for Visual Arts at Stanford University is a major resource for the department. The center offers a 22,000 object collection on view in rotating installations in 18 galleries, the Rodin Sculpture Garden, and special exhibitions, educational programs, and events. Through collaborations with the teaching program, student internships, and student activities, the center provides a rich resource for Stanford students.

ART HISTORY

Over the past two decades the study of Art History has changed dramatically to include the study of art forms made far afield from the traditional core of Western Europe and to re-examine its objects in light of new critical frameworks. The Art History program promotes a plurality of approaches to the study of art by encouraging majors to construct a program of study drawn from the offerings of the Art History curriculum and the University at large.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Art majors with an Art History field of study are defined by a passion for the visual; for traditional fine arts, including painting, sculpture, architecture, prints, and the decorative arts; for the study of everyday objects, including advertisements, billboards, commercial signs, and visual culture; and for film, new media, and computer graphics. They share close observation and curiosity about how society represents itself. Students majoring in Art with an Art History field of study pursue the ways in which cultures express themselves through the arts, and acquire the tools for visual analysis and historical understanding. They learn to analyze works of art in many media as they become proficient in cultural analysis and historical interpretation.

Majors combine courses in art, film, and visual culture with an area of concentration tailored to individual interests. The requirements are grouped into three clusters: foundation courses introduce students to visual analysis and provide an overview of the fields within Art History; distribution courses acquaint students with the art of different historical periods and geographical regions; individual areas of concentration, developed in consultation with a faculty adviser, allow students to pursue their specific interests. Majors are also required to take the junior seminar, offered each year in Autumn Quarter, in which they investigate methods and theories that have defined art historical scholarship. In their senior year, majors may elect to write an honors thesis, exploring a single topic in depth across several quarters of study in close collaboration with several professors.

Students who want to major in Art History declare the Art major with a field in Art History on Axess. All courses for the major must be taken for a letter grade.

Foundation Courses—Focus is on visual analysis, introducing students to the specialized vocabulary, forms of analysis, and principal concerns of Art History. ARTHIST 1, Introduction to the Visual Arts, provides training in art analysis and cultural interpretation; this course is required of majors and should be taken early in a student's career.

Other foundation courses introduce students to the broad concerns of Asian art (ARTHIST 2), architecture (ARTHIST 3), and film (FILMSTUD 4). In addition to ARTHIST 1, majors are required to take at least one other foundation course.

Majors are also required to complete at least one introductory Studio Art course using the traditional materials of painting, sculpture, drawing, photography, or printmaking.

Distribution Courses—In order for students to acquire a broad overview of different historical periods and different geographic regions, majors must take at least four art history courses distributed among the following categories: ancient and medieval; Renaissance and early modern; modern, contemporary, and the United States; Asia, Africa, and the Americas; and film studies.

Area of Concentration—The department encourages students to pursue their interests by designing an area of concentration tailored to their own intellectual concerns. This area of concentration provides the student with an in-depth understanding of a coherent topic in Art History. It must consist of five courses: two must be seminars or colloquia; four of the five courses must be in a single field or concentration constructed by the student in consultation with a faculty adviser.

There are no pre-defined areas of concentration; students create their own concentrations based on individual interests by focusing on topics, questions of genre, or historical or national traditions. Students with a strong interest in topics that cross disciplines may create an interdisciplinary concentration.

Students submit an area of concentration form, signed by their faculty adviser, during the Winter Quarter of the junior year. The form includes a brief statement defining the concentration and a list of the courses to be taken to complete it. Students must consult with their adviser in the Autumn Quarter of senior year to insure that all requirements for the major are being met.

Sample Areas of Concentration—

1. *Topical concentrations*: art and gender; art, politics, race, and ethnicity; art, science, and technology; urban studies; or any other concentration created by the student and approved by a faculty adviser.
2. *Genre concentrations*: architecture; painting; sculpture; film studies; prints and media; or decorative arts and material culture.
3. *Historical and national concentrations*: ancient and medieval; Renaissance and early modern; modern and contemporary; American; African; Asian; or the Americas.
4. *Interdisciplinary concentration*: students choosing the interdisciplinary concentration must take two upper-division courses outside Art History on topics related to their concentration; these courses are counted with three other courses within Art History to complete the concentration. Sample interdisciplinary areas of concentration include: art and literature, art and history; art and religion; art and economics; or any other interdisciplinary combination designed by the student and approved by a faculty adviser. The two outside courses for the interdisciplinary concentration are counted among the 13 courses required for the major.

Junior Seminar—This course is designed to introduce all majors to methods and theories underlying the practice of Art History. The seminar is offered annually in Autumn Quarter. Students are encouraged to take the seminar at the start of their junior year. The goals of the seminar are: to create a shared intellectual experience among all majors; provide majors with in-depth knowledge of their own discipline; and enrich the understanding that majors bring to other courses in Art History.

Research—An essential component of the major requires that students become familiar with works of art and how to write about them. This entails a familiarity with library research, the mechanics of art historical scholarship, the practice of focusing research on clearly defined problems, and the experience of presenting findings in written or oral form. Research requirements are designed to ensure that majors leave Stanford with a mastery of these skills.

Majors are required to attend an orientation session, presented by the professional staff of the Art Library, that introduces the tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the major declaration. In addition, majors are permitted to place materials on reserve in the Art Library to facilitate research for seminars or other projects such as honors theses (see below).

Majors are required to include within their program of study at least two research-oriented seminars that entail preparation of a research paper, a formal presentation, or both. In some cases, students are allowed to substitute a colloquium for one of these seminars, although in such cases it is understood that the course requirements must include a substantial research component.

HONORS THESIS

The purpose of the honors thesis is to extend and deepen work done in an art history class; the topic should have focus and clear parameters. Typically, an honors thesis is not an exploration of a new area that the student has never studied before.

The minimum requirement for admission to the honors program is an overall GPA of 3.5, and at least 3.5 in Art History courses. Students wishing to write an honors thesis must announce their intention by submitting a form signed by the thesis adviser (who need not be the student's academic adviser) by February 1 of their junior year. It is recommended, but not mandatory, that the thesis adviser be on campus and in residence during the candidate's senior year.

Candidates for the honors program must submit to the art history faculty a five-page thesis proposal, including bibliography and illustrations, and one completed paper that demonstrates the student's ability to conceptualize and write about issues. This complete proposal must be submitted to the department's undergraduate coordinator no later than the third week of Spring Quarter of the candidate's junior year so that it can be read, discussed, and voted upon at the faculty's regular meeting in early May. A candidate is accepted into the honors program by a simple majority.

Once admitted to the honors program, students work with their thesis advisers to define the scope of the study, establish a research and writing timetable, and enlist one other faculty member to serve on the thesis reading committee. The summer between junior and senior years is usually devoted to refining the topic and pursuing any off-campus research. Students may apply for UAR research grants to help finance trips or expenses relative to preparing the research for their honors thesis.

During the senior year, students may register for up to 10 units of ARTHIST 297, Honors Thesis Writing, 5 units of which may count towards the student's concentration in Art History. To aid the process of research and writing, students preparing an honors thesis are paired with a graduate student mentor. Students should contact the graduate student mentor in their junior year as soon as they begin to think about writing an honors thesis. Through regular meetings, mentors guide students through the proposal process and the research and writing year.

Students and thesis advisers should plan their schedule of work so that a complete, final manuscript is in the hands of each member of the thesis reading committee by the beginning of the seventh week of the student's final quarter at Stanford. The thesis adviser assigns a letter grade; both faculty readers must approve the thesis for honors before the student is qualified to graduate with honors.

REQUIREMENTS FOR THE ART (HISTORY OF ART) MAJOR

Foundation:	*Number of courses*
ARTHIST 1 and one other introductory-level course, from among ARTHIST 2, 3, or FILMSTUD 4	2
One introductory course in Studio Art	1
Distribution:	
Four Art History courses distributed among the following five categories: ancient and medieval; Renaissance and early modern; modern, contemporary, and the U.S.; Asia, Africa and the Americas; film studies	4
Concentration:	
Five courses, of which two must be seminars or colloquia. At least 4 of the 5 must be in a single field or concentration constructed by the student in consultation with an adviser	5
Junior Seminar:	
A methods and theory seminar to be taken by all majors, preferably in Autumn Quarter of junior year	1
Honors Essay (optional)	
Total number of courses	13

MINOR IN ART HISTORY

A student declaring a minor in Art History must complete 25 units of course work in one of the following four tracks: Open, Modern, Asian, or Architecture. Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student's departmental file. Only one class may be taken for credit outside of the Stanford campus (this includes the Stanford Overseas Studies Programs). All minors are required to attend an orientation session presented by the professional staff of the Art Library, which introduces the many tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

Requirements for the Open Track: ARTHIST 1 plus five lecture courses, colloquia or seminars in any field.

Requirements for the Modern Track: ARTHIST 1 plus five lecture courses, colloquia, or seminars in any aspect of 19th- to 20th-century art.

Requirements for the Asian Track: ARTHIST 2 plus five lecture courses, colloquia, or seminars in Asian art (ARTHIST 1 may be one of the five courses).

Requirements for the Architecture Track: ARTHIST 3 plus five lecture courses, colloquia, or seminars in architectural history (ARTHIST 1 may be one of the five courses).

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Art and Art History offers M.A. and Ph.D. degrees. The M.A. is granted as a step toward fulfilling requirements for the Ph.D. The department does not admit students who wish to work only toward the master's degree.

The University's basic requirements for the master's degree are set forth in the "Graduate Degrees" section of this bulletin. Completing the University's requirements for a B.A. degree in Art with an Art History field of study, or equivalent training, is required of students entering a program of study for the M.A. The required curriculum for entering students is determined by the Director of Graduate Studies through an evaluation of transcripts and records during an individual meeting scheduled with each student prior to the opening of Autumn Quarter to discuss course deficiencies.

Requirements for the Degree—The requirements for the M.A. degree in Art are:

1. *Units:* completing a total of at least 45 units of graduate work at Stanford in the history of art in courses at the 200 level, including a seminar in art historiography/visual theory.
2. *Languages:* reading knowledge of two foreign languages, preferably German and French or Italian. Students in Chinese and Japanese art are ordinarily expected to demonstrate reading competence in modern and classical Chinese or Japanese depending on the student's area of focus. Final determination is made in consultation with the student's primary adviser.
3. *Papers:* submission for consideration by the faculty of two term papers from among those written during the year.
4. *Area Coverage:* demonstration to the faculty, by course work and/or examination, that the student has adequate knowledge of the major areas of the history of art.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree are set forth in the "Graduate Degrees" section of this bulletin. An expanded explanation of department requirements is given in the *Art History Graduate Student Handbook.*

Residence—To be eligible for the doctoral degree, the student must complete three years of full-time graduate work in Art History, at least two years of which must be in residence at Stanford.

Unit Requirements—To be eligible for the doctoral degree, the student must complete 135 units. Of these 135, the student must complete at least 100 units of graduate course work at the 200 level or above, including all required courses, with a minimum of 62 units in Art History lecture courses and seminars.

Collateral Studies—The student is required to take at least three courses in supporting fields of study (such as anthropology, classics, history, literature, or philosophy), determined in consultation with the department advisers. These courses are intended to strengthen the student's interdisciplinary study of art history.

Graduate Student Teaching—As a required part of their training, all graduate students in Art History, regardless of their source of funding, must participate in the department's teaching program. At least two one-quarter assignments in ARTHIST 1, 2, 3, or FILMSTUD 4 are required, with concurrent registration in the Seminar in Teaching Praxis (ARTHIST 610). Students receiving financial aid are required to serve as a teaching assistant for a minimum of four quarters. Further opportunities for teaching may be available.

Admission to Candidacy—A graduate student's progress is formally reviewed at the end of Spring Quarter of the second year. The applicant for candidacy must put together a candidacy file showing that he/she has completed the requirements governing the M.A. program in the History of Art (see above), and at least an additional 18-24 units by the end of Winter Quarter of the second year. The graduate student does not become a formal candidate for the Ph.D. degree until he/she has fully satisfied these requirements and has been accepted as a candidate by the department.

Area Core Examination—All graduate students conceptualize an area core and bibliography in consultation with their primary adviser and two other Stanford faculty members, one of whom is drawn from a field other than Art History, or, if in Art History, has expertise outside of the student's main area of interdisciplinary concentration. Students are required to pass an area core examination, in either written or oral form, sometime in the third year of study. To prepare for the exam, students may enroll in up to three five-unit reading courses (ARTHIST 620), no more than one per quarter.

Reading Committee—After passing the area core examination, each student is responsible for the formation of a Dissertation Reading Committee consisting of a principal adviser and three readers. Normally, at least two of the three readers are drawn from the department and one may come from outside the department.

Dissertation Proposal—By the beginning of the fourth year, students should have defined a dissertation subject and written a proposal in consultation with their principal adviser. To prepare the proposal, students may take one five-unit independent study course (ARTHIST 640) and apply for a funded Summer Quarter to research and write the proposal. The proposal is submitted to the Art History faculty at the beginning of the fourth year for comments. The student then meets with the adviser to discuss the proposal and faculty comments no later than 30 days after the submission of the proposal, at which time necessary revisions are determined.

Dissertation—A member of the Art History faculty acts as the student's dissertation adviser and as chair of the reading committee. The final draft of the dissertation must be in all the readers' hands at least four weeks before the date of the oral defense. The dissertation must be completed within five years from the date of the student's admission to the candidacy for the Ph.D. degree. A candidate taking more than five years must apply for an extension of candidacy.

Oral Defense Examination—Each student arranges an oral examination with the four members of the reading committee and a chair chosen from outside the department. The oral examination consists mainly of a defense of the dissertation but may range, at the committee's discretion, over a wider field. The student is required to discuss research methods and findings at some length and to answer all questions and criticisms put by members of the examining committee. At the end of the defense, the committee votes to pass or fail the student on the defense. The committee also makes recommendations for changes in the dissertation manuscript before it is submitted to the University as the final requirement for the granting of the Ph.D. degree in the History of Art. After incorporating the changes, the manuscript is given a final review and approval by the student's principal adviser.

PH.D. MINOR

For a minor in History of Art, a candidate is required to complete 24 units of graduate-level art history courses (200 level or above), in consultation with a department adviser.

JOINT PH.D. IN ART HISTORY AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to the joint Ph.D. in Art History and Humanities. For a description of this program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

PRACTICE OF ART (STUDIO)

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The studio program is designed to develop in-depth skills in more than one area of the visual arts. It emphasizes the expressive potential of an integration of media, often via a crossdisciplinary, interactive path. Through collaboration and connections with scientists, engineers, and humanities scholars, the program addresses a breadth of topical and artistic concerns central to a vital undergraduate education.

The studio program requirements are divided into lower and upper level course work. Lower level courses introduce visual fundamentals through medium-based courses in drawing, painting, photography, video and digital art, printmaking, sculpture, and design, focusing on subject matter from historical motifs such as figure, still life, and landscape, to contemporary design ideas. Upper level courses cross area boundaries and combine practices to expand understanding of materials and techniques. Upper level requirements include a senior capstone experience, ARTSTUDI 249, Advanced Undergraduate Seminar, which emphasizes investigation of visual concepts interpreted by a single medium, by cross-practices, or by collaboration among students working in a variety of materials. Advanced courses with a focus such as design, photography, or painting are offered on a rotational basis. Independent study supervised by a member of the permanent faculty is available to advanced students.

Students are encouraged to move through the requirements for the major in the sequence outlined. Students are exposed to a range of practices early in their development in order to have a good basis of comparison if they choose to concentrate on a particular medium.

The Art major program in the Practice of Art (Studio) must total 64 units and include the following:

1. Six lower level courses (23 units) including ARTSTUDI 30 and five courses from ARTSTUDI 60, 70, 80, 130, 131, 136, 138, 140, 145, 148, 151, 161, 166, 167, 170, 176, 177, 178, 179, 276.
2. Six upper level courses (24 units) including ARTSTUDI 249, Advanced Undergraduate Seminar, and five courses from ARTSTUDI 132, 135, 137, 141, 142, 146, 147, 149, 152, 160, 169, 171, 172, 174A, 177A, 179A, 184, 248, 268, 269, 270, 271.
3. Four art history courses (17 units) including ARTHIST. At least one of the courses must be in the modern art series, ARTHIST 140-159.
4. Total units: 64. Required course work must be taken for a letter grade. University units earned by placement tests or advanced placement work in secondary school are not counted within the 64 units.
5. Each undergraduate major is required to attend an Art Library orientation session no later than the quarter following the major declaration. Majors are to consult with the Art Library staff for scheduling information.
6. Studio majors are required to meet with both their adviser and the department's undergraduate curriculum adviser during the first two weeks of each quarter to have course work approved and to make certain they are meeting degree requirements. The adviser's role is important both in regard to guiding the student's decisions within the program as well as in discussing plans for summer study and graduate work. An adviser is chosen by the student or assigned by the department.

Transfer Credit Evaluation—Upon declaring an Art major, with a field of study in Studio Art, a student transferring from another school must have his or her work evaluated by a Department of Art and Art History adviser. A maximum of 13 transfer units are applied toward the 64 total units required for the major. A student wishing to have more than 13 units applied toward the major must submit a petition to the adviser and then have his or her work reviewed by a studio committee.

MINOR

The minor program in the Practice of Art (Studio) must include the following:

1. Three lower level courses (11 units) including ARTSTUDI 30 and five courses from ARTSTUDI 60, 70, 80, 130, 131, 136, 138, 140, 145, 148, 151, 161, 166, 167, 170, 176, 177, 178, 179, 276.
2. Three Upper Level courses (12 units) including ARTSTUDI 249, Advanced Undergraduate Seminar, and five courses from ARTSTUDI 132, 135, 137, 141, 142, 146, 147, 149, 152, 160, 169, 171, 172, 174A, 177A, 179A, 184, 248, 268, 269, 270, 271.
3. Three art history courses (13 units), including ARTHIST 1 and one course from the modern art series ARTHIST 140-159.
4. Total units: 36. All required course work must be taken for a letter grade. University units earned by placement tests or advanced placement work in secondary school are not counted within the 36 units.
5. Each undergraduate minor is required to attend an Art Library orientation session no later than the quarter following the minor declaration. Minors are to consult with the Art Library staff for scheduling information.
6. Minors are required to meet with both their adviser and the department's undergraduate curriculum adviser during the first two weeks of each quarter to have course work approved and to make certain they are meeting degree requirements.

OVERSEAS CAMPUS CREDIT

A minimum of 51 of the 64 units required for the Studio Art major and a minimum of 32 of the 36 units required for the Studio Art minor must be taken at the Stanford campus. A student must meet with his or her adviser before planning an overseas campus program.

GRADUATE PROGRAMS

MASTER OF FINE ARTS

Fields of study for the M.F.A. degree are offered in Painting, Sculpture, New Genres, Photography, and Product or Visual Design.

PROGRAM IN PAINTING, SCULPTURE, NEW GENRES, AND PHOTOGRAPHY

The program provides a demanding course of study designed to challenge advanced students. Participants are chosen for the program on the basis of work that indicates artistic individuality, achievement, and promise. Candidates should embody the intellectual curiosity and broad interests appropriate to, and best served by, work and study within a university context.

Admission Requirements for the M.F.A.—

1. Applicants must have a B.A. or B.S. from an accredited school. It is expected that the applicant have a strong background in studio art, either an undergraduate degree or at least three years of independent studio practice.
2. Applications and portfolios for the studio program must be submitted by January 15, 2008. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.
3. Portfolio Specifications: 20 slides of creative work. Some of these can be drawings if relevant to the overall project. Send in a Kodak Universal carousel; no actual work is accepted. All slides must be labeled with the applicant's name and an accompanying slide list must be included indicating the size, date, and medium of each work.

Requirements for the M.F.A. Degree—

1. Completing a minimum of two years (six quarters) of graduate work in residence or its equivalent at Stanford.
2. Completing 48 units of study. Students must discuss their programs of study with the department's student services administrator to ensure that the most favorable registration arrangement is made.
3. Six quarters of the Master's Project, which includes two weekly seminars (the Object Seminar and the Concept Seminar) and Studio Practice, which is an individual tutorial with a selected member of the faculty. In addition, three courses of academic electives are required in the first year. These courses can be chosen from a large variety of disciplines in consultation with the faculty adviser.
4. The student is expected to pass three faculty reviews: (1) at the end of the first quarter (anyone judged to be making inadequate progress is placed on probation and requires an additional review at the end of the second quarter), (2) at the end of the third quarter, and (3) at the time

of the M.F.A. exhibition. The purpose of these reviews is to evaluate development and to assess the progress of the student.

5. During the final quarter in the program, students must write a thesis paper addressing the development of their work over the two-year period at Stanford. Participation in the M.F.A. exhibition at the end of the year is required.
6. All students, regardless of their source of funding, are required to assist with the department's teaching program for a minimum of eight hours per week over the period of six quarters; the particulars of this assignment are at the department's convenience.

The studio faculty reserve the right to make use of graduate paintings, sculpture, and photographs in exhibitions serving the interests of the graduate program.

Graduate students must remain in residence at Stanford for the duration of the program.

THE GRADUATE PROGRAM IN DESIGN

Working jointly, the departments of Art and Art History and Mechanical Engineering offer graduate degrees in product and visual design. A large physical environment, the Design Yard, provides professional caliber studio space and well equipped shops. Flexible programs may include graduate courses in fields such as engineering design, biotechnology, marketing, microcomputers, or the studio and art history curriculum. The program centers on a master's project and may also include work in advanced art and design. The program is structured to balance independent concentration with use of the University and community, and interaction with the students and faculty of the graduate Design program. Crossdisciplinary interaction is encouraged by a four-person graduate Design faculty.

Admission Requirements for the M.F.A.—

1. Applicants must have a B.A. or B.S. from an accredited school. It is expected that the applicant have a strong background in studio art, either an undergraduate degree or at least three years of independent studio practice.
2. Applications and portfolios for the design program must be submitted by January 15, 2008. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.
3. *Portfolio Specifications:* 12 slides or photographs of creative work. Slides must be labeled with the applicant's name. If a carousel is sent, an accompanying slide list must be included indicating the size, date, and medium of each work; otherwise, slides should be labeled with the same information and sent in the standard cardboard box received from processing.

Requirements for the Degree—The M.F.A. degree with a specialization in design requires:

1. Completing a minimum of two years (six quarters) of graduate work in residence or its equivalent at Stanford.
2. Completing 54 units of course work chosen in consultation with an adviser. At least 18 of the 54 units must be in ARTSTUDI 360A,B,C and ME 316 A,B,C.
3. Participating in a weekly seminar in which the student's work is criticized and discussed in detail.
4. Graduate students must remain in residence at Stanford for the duration of the program.

FILM AND MEDIA STUDIES

The undergraduate major in Film and Media Studies is designed to develop the critical vocabulary and intellectual framework for understanding the role of cinema and related media within broad cultural and historical contexts.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Bachelor of Arts in Film and Media Studies provides an introduction to film aesthetics, national cinematic traditions, modes of production in narrative, documentary, and experimental films, the incorporation of moving image media by contemporary artists, and the proliferation of new forms of digital media. After completing a nine-course core that combines the history of cinema with an overview of the theory, techniques, and institutions central to moving images, students pursue a concentration tailored to their interests.

All undergraduate majors complete a minimum of 65 units and 16 courses of 3-5 units each, or 15 courses plus an honors thesis. All courses for the major must be taken for a letter grade.

CORE COURSES

Students considering a major in film and media studies should take ARTHIST 1, Introduction to the Visual Arts, or FILMSTUD 4, Introduction to Film Study, during their freshman or sophomore year. These courses anchor the major through exposure to film language, genre, and visual and narrative structures. Majors are also required to take at least one course in the fundamentals of film and video production and should take a studio course in new media.

FIELDS OF STUDY

Advanced undergraduate courses are offered in five fields of study: Film History; Film and Culture; Film, Media, and Technology; Writing, Criticism, and Practice; and Avant Garde Aesthetics and Performance. Working with a faculty adviser, students select at least six courses in their field from course offerings in Art and Art History and other departments across the University. These fields are declared on Axess.

SENIOR SEMINAR

FILMSTUD 290, Movies and Methods, offered once a year, represents the culminating intellectual experience for Film Studies majors choosing not to write an honors thesis. Honors thesis writers may also take the senior seminar. Seniors who may not be in residence in the quarter that the senior seminar is offered may enroll in the junior year. Movies and Methods provides majors with an opportunity to synthesize their previous work in Film Studies and work in an advanced setting with a faculty member. The senior seminar must be taken for a letter grade.

HONORS THESIS

Students who want to write an honors thesis should consult with a potential adviser by the beginning of junior year. The adviser must be a faculty member in residence during the student's senior year who can oversee the student's progress throughout the project.

The minimum requirements for admission to the honors program in the department are an overall GPA of 3.5 and at least 3.5 in Film and Media Studies courses. Students wishing to write an honors thesis must announce their intention by submitting a form signed by the thesis adviser, who need not be the student's academic adviser, by February 1 of their junior year. It is recommended, but not mandatory, that the thesis adviser be on campus and in residence during the candidate's senior year.

Candidates for the honors program must submit to the Film and Media Studies faculty a 3-5 page thesis proposal outlining the themes of the thesis, a bibliography, a tentative schedule for research and writing, and one completed paper that demonstrates the student's ability to conceptualize and write about ideas. This complete proposal must be submitted to the department's undergraduate coordinator no later than the third week of Spring Quarter of the candidate's junior year so that it can be read, discussed, and voted upon at the faculty's regular meeting in early May. A candidate is accepted into the honors program by a simple majority.

Once admitted to the honors program, students work with their thesis advisers to research, organize, and write the thesis, and to enlist one other faculty member to serve on the thesis reading committee.

To aid the process of research and writing, students preparing an honors thesis are paired with a graduate student mentor. Students should contact the graduate student mentor in their junior year as soon as they begin to think about writing an honors thesis. Honors thesis writers may register for up to 10 units of FILMSTUD 199, Independent Study, while working on the thesis. Students may apply for UAR research grants to help finance trips or expenses relative to preparing the research for their honors thesis.

Students and thesis advisers should plan the work schedule so that a final manuscript is in the hands of each member of the thesis reading committee by the beginning of the seventh week of the student's final quarter at Stanford. The thesis adviser assigns a letter grade; both faculty readers must approve the thesis for honors before the student is qualified to graduate with honors.

FILM AND MEDIA STUDIES MAJOR REQUIREMENTS

	Number of courses
Core:	9
ARTHIST 1	
FILMSTUD 4	
FILMSTUD 5 *or* FILMSTUD 101	
FILMSTUD 100A,B,C	
FILMSTUD 102	
FILMPROD 114	
One course in new media, from a list supplied by the department	
Concentration:	6
Six courses, four of which must be in a single film and media studies concentration developed by the student in consultation with an adviser. Concentration areas are: film history; film and culture; avant garde aesthetics and performance; film, media, and technology; and writing, criticism, and practice. The remaining two courses must be related, situating the student's concentration in a broader context.	
FILMSTUD 290. Senior Seminar	1
Total number of courses	16

FILM AND MEDIA STUDIES MINOR

A minor in Film Studies requires four core courses and three elective courses for a total of seven courses. The required core courses are: FILMSTUD 4, Introduction to Film Study; FILMSTUD 102, Theories of the Moving Image; one course from the film history sequence FILMSTUD 100A,B,C; and either a course in a national cinema or an additional course in film history. Electives can be chosen from courses in other departments approved for the Film Studies minor by the coordinator and core faculty for their stress on methods of film analysis. These may include courses in national cinemas, film genres, experimental and documentary film, or film theory. Courses must focus on film and use the method of film study to be used towards completion of the minor; courses that use film to illustrate a cultural topic are not eligible. Film Production and Studio Art courses may not be used towards the requirements.

Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student's departmental file. Only one class may be taken for credit outside the Stanford campus, including Stanford Overseas Studies programs. Minors are required to attend an orientation session presented by the professional staff of the Art Library, which introduces the many tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

GRADUATE PROGRAMS

MASTER OF FINE ARTS

PROGRAM IN DOCUMENTARY FILM AND VIDEO

The Master of Fine Arts program in documentary production provides a historical, theoretical, and critical framework within which students master the conceptual and practical skills for producing nonfiction film and video. The M.F.A. is a terminal degree program with a two-year, full-time curriculum representing a synthesis of film praxis and film and media history, theory, and criticism. Courses provide an intellectual and theoretical framework within which students' creative work is developed. Students proceed through the program as a cohort. The program does not allow leaves of absence.

The M.F.A. degree is designed to prepare students for professional careers in film, video, and digital media. Graduates are qualified to teach at the university level. The philosophy of the program is predicated on a paradigm of independent media that values artistic expression, aesthetics, social awareness, and an articulated perspective. Students become conversant with the documentary tradition as well as with alternative media and new directions in documentary. Training in documentary production is combined with the development of research skills in film criticism and analysis. The film studies, art history, and elective courses provide an intellectual and theoretical framework within which creative work is realized. The dual emphasis on production and film studies courses prepares students for an academic position that typically requires the teaching of both film studies and media production.

DEPARTMENTAL REQUIREMENTS

A minimum of 81 units is required for the M.F.A. degree. In the production core, students are required to conceptualize and visualize their ideas in a series of writing and producing courses that focus on documentary story structure. These courses are taken in tandem with project-based production courses that provide training in the technical and conceptual aspects of cinematography, sound recording, and editing. An ongoing discussion of form and content is a signature component of the writing and production courses. The production core is complemented by a series of core film studies courses plus elective courses in the history, aesthetics, ideology, and theory of all genres of moving image media. Core film production courses are offered S/NC only. All other courses must be taken for a letter grade.

COURSE ASSISTANTSHIPS

Course assistants for the program are chosen during Spring Quarter of the first year. The appointment is made on a quarterly basis in the second year. Course assistants begin working several days prior to the academic term and may be required to work several days after the last day of finals in order to close down the facilities in an orderly manner. Course assistants are chosen on the basis of faculty and staff's assessment of the applicant's technical competence and ability to work with others. In addition to salary, compensation includes some tuition remission in the second year, depending on the number of hours worked.

M.F.A. THESIS PROJECT

In the second year of the program, each student produces a 20-minute film or video documentary that constitutes the thesis project. In FILMPROD 405, students choose a topic, research and develop their project, and write a proposal for submission. A project may not begin production until the final proposal has been approved. Most of the production and post-production occurs in FILMPROD 406A,B. Once a project has been approved, the student is eligible to submit it to the Enersen Foundation for possible funding.

CURRICULUM

Core Production Courses: (8 courses, 32 units)—Core courses must be taken in sequence.

FILMPROD 400. Film/Video Writing and Directing
FILMPROD 401. Nonfiction Film Production
FILMPROD 402. Digital Video
FILMPROD 403. Advanced Documentary Directing
FILMPROD 404. Advanced Film and Video Production
FILMPROD 405. Producing Practicum
FILMPROD 406A,B. Documentary MFA Thesis Seminar I and II

Core Film Studies Courses: (6 courses, 25 units)

FILMSTUD 4. Introduction to Film Study
FILMSTUD 302. Theories of the Moving Image
FILMSTUD 315. Contemporary Issues in Documentary
FILMSTUD 316. International Documentary
FILMSTUD 410A,B. Documentary Perspectives I and II

Electives: (7 courses, 28 units)—To be chosen in consultation with the student's adviser.

Art History: (1 course, 4 units)—Choose one lecture or seminar in the history of visual art, not including film studies.

Studio Art and/or Communications: (3 courses, 12 units)

Film Studies: (3 courses, 12 units)

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

HISTORY OF ART

BASIC

ARTHIST 1. Introduction to the Visual Arts—Multicultural rather than historical approach. GER:DB-Hum, WIM

5 units, Aut (Marrinan, M)

ARTHIST 2. Asian Art and Culture—(Same as JAPANGEN 60.) Religious and philosophical ideas and social attitudes of India, China, and Japan; how they are expressed in architecture, painting, woodblock prints, sculpture, and in forms such as garden design and urban planning. GER:DB-Hum, EC-GlobalCom

5 units, Win (Takeuchi, M)

ARTHIST 3. Introduction to the History of Architecture—From antiquity to the 20th century, mostly Western with some non-Western topic. Buildings and general principles relevant to the study of architecture. GER:DB-Hum

5 units, not given this year

ARTHIST 99A. Student Guides at the Cantor Center for the Visual Arts—Open to all Stanford students. Introduction to museum administration; art registration, preparation, and installation; rights and reproductions of images; exhibition planning; and art storage, conservation, and security. Skill building in public speaking, inquiry methods, group dynamics, theme development, and art-related vocabulary. Students research, prepare, and present discussions on art works of their choice.

1 unit, Aut (Young, P)

OVERVIEW COURSES

THE CLASSICAL WORLD

ARTHIST 101/301. Archaic Greek Art—(Same as CLASSART 101/201.) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum

4 units, Aut (Maxmin, J)

ARTHIST 102/302. Classical and 4th-Century Greek Art—(Same as CLASSART 102/202.) The formation of the classical ideal in 5th-century Athenian art, and its transformation and diffusion in the 5th and 4th centuries against changing Greek history, politics, and religion. GER:DB-Hum

4 units, Win (Maxmin, J)

THE MEDIEVAL WORLD

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.—Art-historical developments, and monuments and works of art. Topics include: the transition from naturalism to abstraction; imperial art and court culture; pilgrimage and cult of saints; and secular art and luxury objects. GER:DB-Hum

4 units, not given this year (Pentcheva, B)

ARTHIST 106A/306A. Historical Monuments in Jerusalem: Signs and Symbols of the Three Monotheistic Religions—Architectural roles of Judaism, Christianity, and Islam in manifesting the symbolic significance attributed to the city by these religions. Architectural history of the city from foundation to the present, emphasizing historical events which have determined its alternating urban layouts. The Islamic period whose historical monuments dominate the skyline of the Old City. GER:DB-Hum

4 units, Spr (Shani, R)

ARTHIST 107/307. Age of Cathedrals—Gothic art and architecture in W. Europe, 1150-1500. The structuring of a modern visual discourse within the ideological framework of a new monarchical church and state, emerging towns and universities, the rise of literacy, the cultivation of self, and the consequent shifts in patterns of art patronage, practice, and reception in Chartres, Paris, Bourges, Strasbourg, Canterbury, London, Oxford, and Cambridge. GER:DB-Hum

4 units, not given this year (Pentcheva, B)

ARTHIST 108/308. Virginity and Power: Mary in the Middle Ages—The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies though which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia. GER:DB-Hum

4 units, not given this year (Pentcheva, B)

EUROPE 1400-1900

ARTHIST 114/314. Vision and Emblem: Netherlandish Painting from Van Eyck to Brueghel—How 15th-century pictorial illusionism transformed the devotional image and portraiture, calling for a new kind of engagement with the image on the part of the beholder. How 16th-century humanist knowledge influenced the creation of new pictorial subjects and representational forms. The reflection of religious crises triggered by the Reformation in art. GER:DB-Hum

4 units, Win (Hansen, M)

ARTHIST 116/316. European Baroque Sculpture—Characteristics of and innovations in sculpture in 17th-century Europe. The integration of sculpture with architecture in theatrical settings by Gian Lorenzo Bernini. Idealized images of statehood for mercantile republics, absolutist monarchs, and the papacy. Smaller works for private contemplation, ideas of classical versus modern style, and workshop practices. GER:DB-Hum

4 units, Spr (Hansen, M)

ARTHIST 121/321. 18th-Century Art in Europe, ca 1660-1780—Major developments in painting across Europe including the High Baroque illusionism of Bernini, the founding of the French Academy, and the revival of antiquity during the 1760s, with parallel developments in Venice, Naples, Madrid, Bavaria, and London. Shifts in themes and styles amidst the emergence of new viewing publics. Artists: the Tiepolos, Giordano, Batoni, and Mengs; Ricci, Pellegrini, and Thornhill; Watteau and Boucher; Chardin and Longhi; Reynolds and West; Hogarth and Greuze; Vien, Fragonard, and the first works by David. Additional discussion for graduate students. GER:DB-Hum

4 units, not given this year (Marrinan, M)

ARTHIST 122/322. The Age of Revolution—Painting in Europe during the French Revolution and the Napoleonic conquest. As political events altered social formations, practices in the visual arts were similarly affected by shifts in patronage, public, and the social function of image making. An attempt to align ruptures in the tradition of representation with the unfolding historical situation. The first manifestations of a romantic alternative to the canons of classical beauty and stylistic restraint. GER:DB-Hum

4 units, Aut (Marrinan, M)

ARTHIST 124/324. The Age of Naturalism, ca 1830-1874—The origins, development, and triumph of naturalist painting in Europe. The creative tensions that emerged between traditional forms of history painting and the challenge of modern subjects drawn from contemporary life. Emphasis is on the development of open-air painting as an alternative to traditional studio practice, and to the rise of new imaging technologies, such as lithography and photography, as popular alternatives to the hand-wrought character and elitist appeal of high art. GER:DB-Hum

4 units, Spr (Marrinan, M)

ARTHIST 126/326. Post-Naturalist Painting—How conceptual models from language, literature, new technologies, and scientific theory affected picture making following the collapse of the radical naturalism of the 1860s and 1870s. Bracketed in France by the first Impressionist exhibition (1874) and the first public acclamation of major canvases by Matisse and Picasso (1905), the related developments in England, Germany, Belgium, and Austria. Additional weekly discussion for graduate students. Recommended: some experience with 19th-century art. GER:DB-Hum

4 units, not given this year (Marrinan, M)

BRITAIN AND AMERICA 1600-1900

ARTHIST 132/332. American Art and Culture, 1528-1860—The visual arts and literature of the U.S. from the beginnings of European exploration to the Civil War. Focus is on questions of power and its relation to culture from early Spanish exploration to the rise of the middle classes. Cabeza de Vaca, Benjamin Franklin, John Singleton Copley, Phillis Wheatley, Charles Willson Peale, Emerson, Hudson River School, American Genre painters, Melville, Hawthorne and others. GER:DB-Hum

4 units, not given this year (Wolf, B)

MODERN EUROPE

ARTHIST 142/342. Varieties of Modern Architecture—The development of competing versions of modern and postmodern architecture and design in Europe and America, from the early 20th century to the present. Recommended: 141. GER:DB-Hum

4 units, Win (Beischer, T)

ARTHIST 144A/344A. Apollinaire's Avant Gardes: Modernism in Paris, 1910-1920—Focus is on cubism, futurism, orphism, simultanéism, and early metaphysical painting. Artists include: Picasso, Braque, Picabia, de Chirico, Delaunay, Boccioni, Léger, Matisse, Severini, Friesz, Laurencin, and Chagall. Collaborations among painters, poets, and critics. Themes include: the problem of literary painting and the legacies of symbolism; emergence of abstraction; tensions and polemics between cubism and futurism; sub-sects of cubism; rise of collage; role of journals and salons in the development of the avant garde.

4 units, Aut (Merjian, A)

ARTHIST 145/345. European Modernism and the International Avant Gardes, 1895-1945—How modern and avant garde artists have interrogated the nature of signification or how form produces meaning; their relationship to revolutionary politics. Fauvism and cubism in Paris, German expressionism, Italian futurism, pittura metafisica, Berlin Dada, Mondrian and de Stijl in the Netherlands, suprematism, Russian constructivism, and surrealism. Vocabulary and analytical and visual tools to come to grips with the works and debates in European modernism and the international avant gardes. Readings include manifestos, artists' writings, and art criticism. GER:DB-Hum

4 units, Aut (Gough, M)

ARTHIST 145A/345A. Art of Postwar Europe—Major movements, themes, figures, and critical issues. Focus is on the art of France, Germany, Italy, and England as distinct from and intertwined with the aesthetic production of postwar U.S. The question of a political, engaged, or committed art and the status of the avant garde; the rise of consumer culture and the practice of everyday life. Recommended: some art history.

4 units, not given this year (Lee, P)

ARTHIST 149/349. Art Between the Wars: Dada, De Stijl, Constructivism, Surrealism—Historical avant garde movements and anti-modernist tendencies such as socialist realism and Nazi art. Issues: artistic responses to wartime trauma; attempts to develop the progressive potential of technology and the political utility of art; and attempts to reorder relations between body and machine, art object and commodity, and private and public life. Artists: Richter, Heartfield, Tzara, Rodchenko, Tatlin, Bellmer, Man Ray, and Ernst. Readings: the modern subject, mass culture, the modernism/anti-modernism debates of the 30s, and the uses of art in totalitarian regimes. GER:DB-Hum

4 units, Spr (Gough, M)

MODERN AMERICA

ARTHIST 143A/343A. American Architecture—A historically based understanding of what defines American architecture. What makes American architecture American, beginning with indigenous structures of pre-Columbian America. Materials, structure, and form in the changing American context. How these ideas are being transformed in today's globalized world. GER:DB-Hum

4 units, not given this year (Beischer, T)

ARTHIST 153A/353A. American Art, 1900-1945—Painting, sculpture, photography, and design. Focus is on the emergence of diverse cultural forms in the search for a modern, American form of artistic expression. Topics include: Robert Henri and the Ash Can school; the Armory Show and the influence of European modernism; Marcel Duchamp and plumbing; futurism, cubism, and the machine aesthetic; Stuart Davis and jazz; Dorothea Lange and documentary photography; Alfred Stieglitz and his Seven Americans; Thomas Hart Benton and regionalism; the arts of the WPA; and the role of artists in wartime propaganda. GER:DB-Hum

4 units, Spr (Marshall, J)

ARTHIST 158A/358A. History of Photography—From its invention in 1839 to the present. Emphasis is on the evolution of photography as a fine art. Photographs as a universal democratic art form to record familial events and express personal creativity. Development of photography as it relates to other art forms, journalism, architecture, portraiture, landscape, documentation, time, and personal expression. The technology of photography; photographic techniques. GER:DB-Hum

4 units, Spr (Dawson, R)

ARTHIST 159A/359A. Photography in America—The history of American photography as fine art and social tool. Topics include: defense of photography as a legitimate art form; role of portraits and photo albums in social self-fashioning; technological and market aspects of photography; politics of straight or documentary aesthetics; role of women; and how the idea of America has been shaped by photographs. Artists include Mathew Brady, Alfred Stieglitz, Edward Weston, Walker Evans, Dorothea Lange, Robert Frank, Garry Winogrand, William Eggleston, and Mary Ellen Mark. GER:DB-Hum

4 units, Win (Marshall, J)

ASIA

ARTHIST 182/382. Arts of China, 900-1500: Cultures in Competition—The era from the Five Dynasties and Song to the mid-Ming period was marked by competition in cultural arenas such as between Chinese and formerly nomadic regimes, or between official court art modes and scholar-official and literati groups. Topics include: innovations in architectural and ceramic technologies; developments in landscape painting and theory; the proliferation of art texts and discourses; the rise of educated artists; official arts and ideologies of the Song, Liao, Jin, Yuan, and Ming regimes; new roles for women as patrons and cultural participants; and Chan and popular Buddhist imagery. GER:DB-Hum, EC-GlobalCom

4 units, not given this year (Vinograd, R)

ARTHIST 184/384. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting—The changes marking the transition from medieval to early modern Japanese society generated a revolution in visual culture. This paradigm shift as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch. GER:DB-Hum

4 units, Aut (Takeuchi, M)

ARTHIST 185/385. Art in China's Modern Era—From the late Ming period to contemporary arts. Topics: urban arts and print culture; commodification of art; painting theories; self portrayals; court art, collection, and ideological programs; media and modernity in Shanghai; politics and art in the People's Republic; and contemporary avant garde and transnational movements. GER:DB-Hum

4 units, not given this year (Vinograd, R)

ARTHIST 186A/386A. Japanese Art Since 1850—Visual culture of modern and contemporary Japan, emphasizing Japan's reaction to and engagement with the West. Two-dimensional arts before 1950 including painting, prints, photography; and two- and three-dimensional arts after 1950. GER:DB-Hum

4 units, not given this year (Takeuchi, M)

AFRICA

ARTHIST 190/390. African Art and Writing Traditions—Classic African graphic writings south of the Sahara in historical and social context. What makes an African graphic writing system, and how they are used as visual art, and as markers of identity, religion, and moral philosophy. Civilizations include Mali, Asante, Yoruba, Ejagham, and Kongo.

4 units, not given this year (Martinez-Ruiz, B)

ARTHIST 192/392. Introduction to African Art—Form, space, media, medium, and visual expression in African art. Rock art to contemporary art production. Major works and art expression in terms of function and historical context. GER:DB-Hum

4 units, Win (Martinez-Ruiz, B)

ARTHIST 193A/393A. Caribbean and Latin American Art: Empire, Identity, and Society—Visual culture from 1505 to 1889 and its relation to current debates on cultural identity, hybridity, syncretism, and creolization. Painting, travel books, and printmaking by artists including De Bry, Belisario, Rugendas, Debret, and Landaluce. Visual analysis of works at the Yale Center for the British Art and Stanford's Green Library. GER:DB-Hum

4 units, not given this year (Martinez-Ruiz, B)

ARTHIST 195/395. Introduction to Black Atlantic Visual Traditions—African cultural expression in the Americas. How politics, religion, and culture influence the art of the Black Atlantic. Focus is on the period when cultures were brought from Africa to the Americas through the slave trade and came into contact and conflict with western colonial powers. GER:DB-Hum

4 units, not given this year (Martinez-Ruiz, B)

SEMINARS AND COLLOQUIA

ARTHIST 203. Greek Art in and Out of Context—(Same as CLASSART 109.) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life.

5 units, Aut (Maxmin, J)

ARTHIST 204A. Appropriations of Greek Art—(Same as CLASSART 110.) The history of the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet.

5 units, Spr (Maxmin, J)

ARTHIST 212. Renaissance Florence, 1440-1540—Notions of cultural superiority in light of changes in Florentine society as it went from being a republic to a duchy ruled by the Medici. Artists and architects such as Donatello, Brunelleschi, Botticelli, Michelangelo, and Pontormo praised as having revived the arts and returned them to a level of ancient splendor. The role of the sacred in daily life and uses of the pagan past for poetic and scholarly expressions and as vehicles for contemporary experience.

5 units, Spr (Hansen, M)

ARTHIST 232. Rethinking American Art—Painting and some sculpture of the 18th and 19th centuries, focusing on works in the de Young Museum. Each student studies a single work using documents of social and cultural history. Emphasis is on recent scholarship, genre, and the biography of objects as they shift in context and meaning over time. Weekly meetings at the de Young with Professor Margaretta Lovell and UC Berkeley students.

5 units, not given this year (Wolf, B)

ARTHIST 233. The Art Museum: History and Practice—Workshop. Contemporary museum culture emphasizing the collecting and exhibiting practices of art museums. Readings, field trips, and discussions with museum professionals. Each student creates a detailed proposal for a museum exhibition and presents it to a panel of faculty and curators.

5 units, Spr (Marshall, J)

ARTHIST 234A. The Harlem Renaissance—African American artistic expression in the 20s that reflected changing conditions of urban modernity and racial identity. The forms and meanings of African American modernism; social politics of black self-representation and white patronage; and how high culture became the primary front in the struggle for racial uplift. Cultural figures include: Aaron Douglas, W.E.B. Du Bois, Marcus Garvey, Langston Hughes, Jacob Lawrence, Zora Neale Hurston, and Carl Van Vechten. Sources include painting, sculpture, music, and literature.

5 units, not given this year (Marshall, J)

ARTHIST 235A. Art and the Machine Age—Artistic and intellectual responses to modernization. Topics include: artistic uses of the machine as a metaphor for nature, the body, and sexuality; adaptation of mechanical technologies to art making; appreciation of machines as works of art; and how changing technologies in the industrial sphere impacted the artist's role in the cultural sphere. The place of the machine in architecture; historical role of industrial design; machine-themed museum exhibitions; and works by Fernand Léger, Le Corbusier, Rube Goldberg, Charles Sheeler, Charlie Chaplin, Raymond Loewy, and George Gershwin.

5 units, Aut (Marshall, J)

ARTHIST 244A. Prints and Visual Communication: History and Techniques—Examination of original examples of major printmaking techniques including relief, intaglio, lithography, and monotype by artists including Dürer, Rembrandt, Goya, Whistler, Picasso, and Johns. Phototransfer techniques and printed textiles. Historical background. Sources include prints in the Mary Tanenbaum seminar room at the Cantor Arts Center, demonstrations, and field trips to printmaking studios. Team-taught by curators, professors, and printmakers.

5 units, Win (Fryberger, W)

ARTHIST 249. Picasso and Cubism

5 units, not given this year (Gough, M)

ARTHIST 252A. Place: Making Space Now—Premise is that architects are place makers; what that means in the contemporary world. The difference between place and space. Traditional notions of place by scale such as home, city, and nation state. Challenges to traditional notions of place such as: being out of place; nomadic place; and how architects can design for non-places. Reconceptualizations of contemporary space such as the role of digital and cyber technologies; how locality is constructed in a global world; and the sense of place in the in-between places created by a world in flux.

5 units, Win (Beischer, T)

ARTHIST 254. Utopia and Reality in Modern Urban Planning—(Same as URBANST 164.) Primarily for Urban Studies and Art majors. Utopian urbanist thinkers such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:DB-Hum

5 units, Spr (Stout, F; Turner, P)

ARTHIST 281A. Making Art History in Republican China—The construction of modern art historical discourses under a new national regime and within an international context; the role of public institutions and media such as museums, art academies, and art journals in forming a new public role for art and art collecting; and the cultural politics of art production.

5 units, not given this year (Vinograd, R)

ARTHIST 282A. Imagining the Imperial: Images of the Court in Late Ming Dynasty Public Culture—Themes of palace and court life popular in vernacular painting, print illustrated books, and fiction. Dimensions of the imperial palace and court in late Ming public imaginary, including strategies of historical displacement, disguised political critique, commerce in imperial objects, the taste for scandal, and mythologies of court life.

5 units, not given this year (Vinograd, R)

ARTHIST 283A. Paris and Shanghai, 1880-1940: Mediating the City—Offered in conjunction with the Stanford Humanities Laboratory. Mediations of the cosmopolitan cities of Shanghai and Paris as frames and stages for representation and social presentation, including: conventional visual, pictorial, and art media such as painting, lithography, photography, and film; and complex, multimedia and social spaces such as illustrated periodicals, cabarets, theaters, shopping streets, and expositions. The materiality of media, social and economic systems, cultural spaces, and the construction of urban imaginaries.

5 units, Spr (Vinograd, R)

ARTHIST 287. Pictures of the Floating World: Images from Japanese Popular Culture—Printed objects produced during the Edo period (1600-1868), including the *Ukiyo-e* (pictures of the floating world) and lesser-studied genres such as printed books (*ehon*) and popular broadsheets (*kawaraban*). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles. Prerequisites: 2, 186, 187, 188. GER:DB-Hum

5 units, not given this year (Takeuchi, M)

ARTHIST 290. Mapping Africa: Cartography and Architecture—Visual forms of spatial representation of Africa and implications for understanding the cultures they depict. Examples include early Renaissance cartography and written accounts by explorers, travelers, geographers, and missionaries. African concepts of design, meaning in architecture, and spatial solutions. Case studies of African models.

5 units, Win (Martinez-Ruiz, B)

ARTHIST 291. African and Afro-Atlantic Graphic Writing Systems—African notions of communication and visual writing informed by Western linguistic and semiotic theory. Examples of African graphic writing systems emphasizing rupestrian art, wall painting, scarification, textiles, furniture, pottery, and metal work. Gestures, music, and oral literature. Negotiations between traditional practices and modernity.

5 units, not given this year (Martinez-Ruiz, B)

ARTHIST 292A. Researching Africa: Problem and Theory in African Art

5 units, not given this year (Martinez-Ruiz, B)

ARTHIST 293. Latino American Avant Garde—African contribution to modern art practices in Latino America. Mexico, Brazil, and Cuba as models. Cultural and historical context.

5 units, not given this year (Martinez-Ruiz, B)

ARTHIST 296. Junior Seminar: The Practice of Art Criticism—Historiography and methodology.

5 units, Win (Corn, W)

ARTHIST 297. Honors Thesis Writing—May be repeated for credit.

1-5 units, Aut, Win, Spr (Staff)

ARTHIST 298. Individual Work: Art History—For approved independent research with individual faculty members. Letter grades only.

1-15 units, Aut, Win, Spr (Staff)

ARTHIST 299. Research Project: Art History

1-15 units, Aut, Win, Spr (Staff)

GRADUATE SEMINARS

HISTORICAL STUDIES

ARTHIST 410. Aesthetics of the Icon—How medieval objects were experienced through sight, touch, sound, smell, and taste; how this multisensory richness has been reduced to visual studies of medieval art. Focus is on the Byzantine icon to restore its synaesthetic power; how its performance is tied to culturally-specific modes of seeing. Byzantine liturgy, prayer, epigrams, and literary genres of description such as ekphrasis.

5 units, not given this year (Pentcheva, B)

ARTHIST 412. Problems in Italian Mannerism—Questions of the bella maniera, anti-classicism, and center and periphery in mannerist art in light of developments in scholarship from the 70s to the present. Authors include Arasse, Cropper, Cole, Nova, Summers, and Vickers.

5 units, Aut (Hansen, M)

ARTHIST 430A. Modernity and 19th-Century Visual Culture—The relationship between visuality and modernity; the privileged role played by seeing. Sources include paintings and literary texts organized around questions of perception. Topics include: visuality and the public sphere; landscape and depoliticized speech; genre and hegemony; race and identity; post-liberal and postmodern culture.

5 units, Spr (Wolf, B)

ARTHIST 430B. Modernity and 19th-Century Visual Culture—Writing workshop and reading group. The relationship between publication and professionalization. Students submit publishable papers to an appropriate journal. Recommended: 430A.

5 units, not given this year (Wolf, B)

ARTHIST 437. The Art of Visual Humor—Humor in 19th- and 20th-century painting, sculpture, cartoons, and caricatures. How visual differs from literary and oral humor. Readings on theories of humor and puns, parodies, in-jokes, and unconscious humor in modern images. Students select projects to research and interpret.

5 units, Win (Corn, W)

ARTHIST 443A. Untimely Aesthetics: Nietzsche and Early 20th-Century Modernism—Nietzsche's philosophies of art and their adaptation and expropriation by specific authors and artist including: Gabriele d'Annunzio, Giorgio de Chirico, F.T. Marinetti, Georges Bataille, Louis Aragon, and Pierre Klossowski. Texts include *The Birth of Tragedy*, *The Gay Science*, *Thus Spoke Zarathustra*, *The Case of Wagner*, *Nietzsche Contra Wagner*. Topics include: modernism and anti-positivism; theory of the avant garde; Nietzsche and nationalist propaganda; the relationship between painting and philosophy; and fascism and aesthetics.

5 units, Spr (Merjian, A)

ARTHIST 446. The Russian and Soviet Avant Garde

5 units, Aut (Gough, M)

ARTHIST 447. Extreme Drawing—What happened to drawing in the mass-media-saturated environment of the 20s and beyond? The impact of advances in photolithographic reproduction, film, and radio. The role of drawing in urban environments and social spaces, and transgression of the medium's traditional constraints through the introduction of montage, cut-outs, and unconventional supports. Focus is on the 20s (Le Corbusier, El Lissitzky, Klucis, Vesnin, and Leonidov), and the 50s-60s (Constant, Price, Archigram, Friedman, the NER group, and Superstudio).

5 units, not given this year (Gough, M)

ARTHIST 448. Theories and Practices of Abstraction—Focus is on Europe and the Americas: movements such as Orphism, Suprematism, Neoplasticism, Constructivism, concrete art, Concretism, Neoconcretismo, Kineticism, Minimalism, op art, and neo-geo. The relative significance of form and historical context in the determination of meaning in abstract art. How abstract artists theorized their struggle against representation in relation to self-reflexivity, universalism, mysticism, socialism, utopia, scientific rationality, furniture, and interior design. Readings from artists under study, and Brett, Fer, Bois, Krauss, Wagner, Clark, Fried, Greenberg, Schapiro, Cooper, Lee, Mehring, Leja, Buchloh, and Foster.

5 units, not given this year (Gough, M)

ARTHIST 473. Minimalism: Seriality, Systems, Repetition—Minimalist or minimal art, primary structures, or ABC art in the 60s. New scholarship on the theories, criticism, and genealogies of minimalism in sculpture, painting, performance, music, and film. Considerations of the afterlife of minimalism in contemporary art.

5 units, not given this year (Lee, P)

ARTHIST 485. The Situation of the Artist in Traditional Japan—(Same as JAPANGEN 220.) Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons' desires and artists' modes of production.

5 units, Spr (Takeuchi, M)

CRITICAL STUDIES

ARTHIST 501. The Vision of Art History—How the project of art history connects to general issues of historical writing and evidence. Focus is on modes of vision, such as the perceptual, conceptual, and historical, and the clusters of related limitations they bring to the problem of art history. The overlapping areas of blindness inherent in art-historical scholarship. How options within the field are conditioned and shaped by the central, founding activity of the discipline.

5 units, not given this year (Marrinan, M)

ARTHIST 507. Medieval Image Theory—The Middle Ages saw the development of a theoretical framework on visual representation in response to charges of idolatry. The defenders of religious images drew on the dogma of Incarnation; as the Virgin gave human flesh to the Logos/Christ, the image offered a material manifestation of the divine. Focus is on the change in perception and staging of the image. Early in the period, the icon or relic expressed the presence of the sacred; later in the period, visual representation was designed to trigger an emotional response that led the viewer to a union with the divine.

5 units, not given this year (Pentcheva, B)

ARTHIST 512. The Time of the Object—How artists, art historians, philosophers, and critics have theorized the temporality of the art object. Topics: the origin of the work of art, duration, repetition, entropy, kineticism, the monument, the end of death of art, schizophrenia. Writers: Bergson, Deleuze, Focillon, Fried, Hegel, Heidegger, Jameson, Kubler, Krauss, Riegl.

5 units, not given this year (Lee, P)

ARTHIST 513. Methods and Historiography of Art History

5 units, not given this year (Lee, P)

ARTHIST 516. Narrative Theory and Visual Form—The theoretical terrain of narrative studies in literary criticism and historiography. The critical implications of narrative analysis for the writing of history in general. Readings integrated with students' current research projects.

5 units, not given this year (Marrinan, M)

ARTHIST 521A. Material Culture Studies: Theories and Methodologies—The interdisciplinary roots of contemporary material culture studies, including: the Frankfurt School and British cultural studies; archaeology and ethnographic anthropology; psychoanalysis and feminist theory; and art history and connoisseurship. How objects mean differently than images, and what this thingness means for the practice of art history. Readings include Karl Marx, Theodor Adorno, Daniel Miller, Ian Hodder, Igor Kopytoff, Sigmund Freud, William Pietz, Jules Prown, James Deetz, Bill Brown, Alexander Nemerov, and Christina Kiaer.

5 units, not given this year (Marshall, J)

RESEARCH

ARTHIST 600. Art History Bibliography and Library Methods

3 units, Aut (Staff)

ARTHIST 601. Graduate Studies in Art History—For first-year art history graduate students only. Fields, issues, and practices in art history.

2 units, Aut (Staff)

ARTHIST 610. Teaching Praxis

1-5 units, Aut, Win, Spr (Staff)

ARTHIST 620. Area Core Examination Preparation—For Art History Ph.D. candidates. Prerequisite: consent of instructor.

5 units, Aut, Win, Spr, Sum (Staff)

ARTHIST 640. Dissertation Proposal Preparation

5 units, Aut, Win, Spr, Sum (Staff)

ARTHIST 650. Dissertation Research

5 units, Aut, Win, Spr, Sum (Staff)

ARTHIST 660. Independent Study—For graduate students only. Approved independent research projects with individual faculty members.

1-15 units, Aut, Win, Spr, Sum (Staff)

ARTHIST 670. Dissertation Seminar—For graduate students writing and researching dissertations and dissertation proposals. How to define research projects, write grant proposals, and organize book-length projects.

3-5 units, not given this year

PRACTICE OF ART

ARTSTUDI 14. Drawing for Non-Majors

2 units, Spr (Rodriguez, L)

ARTSTUDI 16. Sculpture for Non-Majors

2 units, Aut (Jones, M)

ARTSTUDI 17. Photography for Non-Majors

2 units, Win (Vanderkindren, N)

ARTSTUDI 30. Introductory Survey: Concepts and Strategies—The diversity of artistic concepts and strategies; artists who use the different media taught in the department's studio program such as painting, drawing, video and digital art, printmaking, photography, and sculpture. Field trips to local museums and collections, artists studios, and libraries. Student research. Priority to Art Studio majors and minors.

3 units, Win (Staff)

ARTSTUDI 60. Design I : Fundamental Visual Language—Formal elements of visual expression (color, composition, space, and process) through hands-on projects. Two- and three-dimensional media. Emphasis is on originality and inventiveness. Content is realized abstractly. Centered in design; relevant to visual art study and any student seeking to develop visual perception. (lower level)

3-4 units, Aut (Kahn, M), Win, Spr (Edmark, J)

ARTSTUDI 70. Introduction to Photography—Critical, theoretical, and practical aspects of creative photography through camera and lab techniques. Field work. Cantor Art Center and Art Gallery exhibitions. 35mm camera required. (lower level)

4 units, Aut, Win, Spr (Dawson, R; Felzmann, L)

ARTSTUDI 80. Color—Hands-on study of color to develop color sensitivity and the ability to manipulate color to exploit its expressive potential. Guided experimentation and observation. Topics include color relativity, color and light, color mixing, color harmony, and color and content. (lower level)

3-4 units, Aut (Edmark, J)

ARTSTUDI 130. Interactive Art I: Objects—The basics of sensors, processors, and actuators needed to create artworks that interact, record, and communicate. Emphasis is on the sculpture and interactive dimensions. (lower level)

4 units, not given this year (DeMarinis, P)

ARTSTUDI 131. Sound Art I—Acoustic, digital and analog approaches to sound art. Familiarization with techniques of listening, recording, digital processing and production. Required listening and readings in the history and contemporary practice of sound art. (lower level)

4 units, Aut (DeMarinis, P)

ARTSTUDI 136. Future Media, Media Archaeologies—Hand-on. Media technologies from origins to the recent past. Students create artworks based on Victorian era discoveries and inventions, early developments in electronic media, and orphaned technologies. Research, rediscover, invent, and create devices of wonder and impossible objects. Readings in history and theory. How and what media technologies mediate. (lower level)

3-4 units, Spr (DeMarinis, P)

ARTSTUDI 138. Sound and Image—Practices that combine audio and visual media. Topics include synesthesia, visual music, film soundtracks, and immersive multimedia practices that combine sound, music, still and moving images, projections, and performance. (lower level)

4 units, Win (DeMarinis, P)

ARTSTUDI 140. Drawing I—Functional anatomy and perspective as they apply to problems of drawing the form in space. Individual and group instruction as students work from still life set-ups, nature, and the model. Emphasis is on the development of critical skills and perceptual drawing techniques for those with little or no previous experience with pastels, inks, charcoal, conte, and pencil. Lectures alternate with studio work. (lower level)

4 units, Aut (Bean, K), Win (Chagoya, E), Spr (Bean, K)

ARTSTUDI 141. Drawing II—Intermediate/advanced. Observation, invention, and construction. Development of conceptual and material strategies, with attention to process and purpose. May be repeated for credit. Prerequisite: 140 or consent of instructor. (upper level)

4 units, Win (Bean, K)

ARTSTUDI 145. Painting I—Introduction to techniques, materials, and vocabulary in oil painting. Still life, landscape, and figure used as subject matter. Emphasis is on painting and drawing from life. (lower level)

4 units, Aut, Win, Spr (Staff)

ARTSTUDI 146. Painting II—Symbolic, narrative, and representational self-portraits. Introduction to the pictorial strategies, painting methods, and psychological imperatives of Dürer, Rembrandt, Cézanne, Kahlo, Beckmann, Schiele, and Munch. Students paint from life, memory, reproductions, and objects of personal significance to create a world in which they describe themselves. Prerequisites: 140, 145, or consent of instructor. (upper level)

4 units, Aut (Bean, K), Spr (Chagoya, E)

ARTSTUDI 148. Printmaking—Introduction to printmaking using monotype, a graphic art medium used by such artists as Blake, Degas, Gauguin, and Pendergast. May be repeated for credit. Prerequisite: 140. (upper level)

4 units, Aut (Chagoya, E), Win, Spr (Staff)

ARTSTUDI 149. Collage—The generative principles of this characteristic 20th-century art form. Along with assemblage (its three dimensional equivalent) and montage (its counterpart in photography, film, and video), collage introduced crucial aesthetic issues of the modern and postmodern eras. Typically, collage creates an expressive visual language through juxtaposition and displacement, and through materiality, difference, and event. Issues of location (where it happens), object (what it is), process (how it is realized), and purpose (why it is). Prerequisites: 140, 145, or consent of instructor. (upper level)

4 units, Win (Hannah, D)

ARTSTUDI 151. Sculpture I—(lower level)

4 units, Aut, Win (Berlier, T)

ARTSTUDI 152. Sculpture II—Three dimensional understanding of form, time, and space, and applications to topics such as installation, special materials and processes, and site-specific works. Demonstrations, slide lectures, and discussion of work. Technical and conceptual skills. (upper level)

4 units, Spr (Berlier, T)

ARTSTUDI 160. Design II: The Bridge—The historical spectrum of design including practical and ritual. The values and conceptual orientation of visual fundamentals. Two- and three-dimensional projects sequentially grouped to relate design theory to application, balancing imaginative and responsible thinking. Prerequisite: 60. (upper level)

3-4 units, Win (Kahn, M), Spr (Edmark, J)

ARTSTUDI 161. Catalysts for Design—Nature and science as sources of design inspiration. Projects in natural pattern formation, biological growth and form, Fibonacci numbers and the golden section, planar and spatial symmetry, mechanics, chaos, and fractals. Emphasis is on importance of creative synthesis to the design process. Projects take the form of physical constructions as opposed to renderings or computer models. Field trips. (lower level)

3-4 units, not given this year

ARTSTUDI 166. Design in Motion—Design areas for which movement and transformation are essential. Experimentation with mechanical means such as linking, hinging, inflating, and rotating. Projects in lighting, automata, tools and utensils, chain reactions, toys and games, festival props, and quasi-architecture emphasize the creation of works in which motion is a significant agent for aesthetic gratification. No experience in mechanical engineering required. (lower level)

3-4 units, Aut (Edmark, J)

ARTSTUDI 167. Introduction to Animation—Projects in animation techniques including flipbook, cutout/collage, stop-motion such as claymation, pixilation, and puppet animation, rotoscoping, and time-lapse. Films. Computers used as post-production tools, but course does not cover computer-generated animation. (lower level)

3-4 units, Win (Edmark, J)

ARTSTUDI 169. Professional Design Exploration—Six to eight mature projects are stimulated by weekly field trips into significant areas of design activity or need. (upper level)

4 units, not given this year (Kahn, M)

ARTSTUDI 170. Projects in Photography—Students pursue a topic of their own definition. Further exploration of darkroom and other printing techniques; contemporary theory and criticism. (lower level)

4 units, Aut (Felzmann, L), Win (Dawson, R)

ARTSTUDI 171. Color Photography—Intermediate. Topics include techniques, history, color theory, and perception of color. Contemporary color photography issues and concepts. Students work with color slides and negatives, digital color, and non-traditional techniques. Field trip to a color lab. Prerequisite: 70. (upper level)

4 units, Aut (Dawson, R)

ARTSTUDI 172. Alternative Processes—Priority to advanced students. Technical procedures and the uses of primitive and hand-made photographic emulsions. Enrollment limited to 10. Prerequisites: 70, 170, 270, or consent of instructor. (upper level)

4 units, Spr (Leivick, J)

ARTSTUDI 175A. Light as a Sculptural Element—The application of light as a transformative medium in visual art practices. Artists such as Thomas Wilfred, Nam June-Paik, James Turrell, Ann Hamilton, Won Ju Lim, Diana Thater, Wolfgang Laib, Cai Guo-Qiang, Robert Irwin, Shirin Neshat, Bill Viola, and Olafur Eliasson.

4 units, Win (Buckholtz, E)

ARTSTUDI 177. Video Art I—Students create experimental video works. Conceptual, formal, and performance-based approaches to the medium. The history of video art since the 70s and its influences including experimental film, television, minimalism, conceptual art, and performance and electronic art. Topics: camera technique, lighting, sound design, found footage, cinematic conventions, and nonlinear digital editing. (lower level)

4 units, Aut (Hicks, A)

ARTSTUDI 177A. Video Art II—Advanced. Video, criticism, and contemporary media theory investigating the time image. Students create experimental video works, addressing the integration of video with traditional art media such as sculpture and painting. Nonlinearity made possible by Internet and DVD-based video. Prerequisite: 177 or consent of instructor. (upper level)

4 units, Win (Hicks, A)

ARTSTUDI 178. Electronic Art I—Analog electronics and their use in art. Basic circuits for creating mobile, illuminated, and responsive works of art. Topics: soldering; construction of basic circuits; elementary electronics theory; and contemporary electronic art. (lower level)

4 units, Aut (McKay, J)

ARTSTUDI 179. Digital Art I—Contemporary electronic art focusing on digital media. Students create works exploring two- and three-dimensional, and time-based uses of the computer in fine art. History and theoretical underpinnings. Common discourse and informative resources for material and inspiration. Topics: imaging and sound software, web art, and rethinking the comptuer as interface and object. (lower level)

4 units, Spr (Hicks, A)

ARTSTUDI 179A. Digital Art II—Advanced. Interactive art works using multimedia scripting software. Experimental interfaces, computer installation work, and mobile technologies. Contemporary media art theory and practice. (upper level)
4 units, not given this year (Wight, G)

ARTSTUDI 184. Art and Biology—Rather than how art has assisted the biological sciences as in medical illustration, focus is on how biology has influenced art making practice. New technologies and experimental directions, historical shifts in artists' relationship to the living world, the effects of research methods on the development of theory, and changing conceptions of biology and life. Projects address these themes and others that emerge from class discussions and presentations. (upper level)
4 units, Spr (Tromble, M)

ARTSTUDI 246. Individual Work: Drawing and Painting—Prerequisites: two quarters of painting or drawing and consent of instructor.
1-15 units, Aut, Win, Spr (Staff)

ARTSTUDI 248. Advanced Printmaking—Continuation of monotype, dealing with advanced technical and aesthetic problems in the medium. Prerequisite: 148. (upper level)
1-15 units, not given this year (Chagoya, E)

ARTSTUDI 249. Advanced Undergraduate Seminar—Capstone experience for majors in Studio Art. Interdisciplinary. Methods of research, crossmedia critiques, and strategies for staging and presenting work. Guest artists from the Bay Area. (upper level)
4 units, Win (Bell, C)

ARTSTUDI 250. Individual Work: Sculpture—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

ARTSTUDI 260. Individual Work: Design—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

ARTSTUDI 268. Design Synthesis—Mature semi-elective problems in composite and multimedia design areas. May be repeaed for credit. Prerequisites: two design courses above 160. (upper level)
4-6 units, Spr (Kahn, M)

ARTSTUDI 269. Advanced Creative Studies—Seminar based on elective design projects in areas of individual specialization. May be repeated for credit. Prerequisite: consent of instructor. (upper level)
1-15 units, Aut, Win (Kahn, M)

ARTSTUDI 270. Advanced Photography Seminar—Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit. (upper level)
1-5 units, Aut (Leivick, J), Win (Felzmann, L), Spr (Leivick, J)

ARTSTUDI 271. The View Camera: Its Uses and Techniques—For students of photography who wish to gain greater control and refine skills in image making. 4x5 view cameras provided. Enrollment limited to 8. (upper level)
4 units, Win (Leivick, J)

ARTSTUDI 272. Individual Work: Photography—Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

ARTSTUDI 273. Individual Work: Digital Media—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

ARTSTUDI 274. Individual Work: Digital Art—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

ARTSTUDI 276. The Photographic Book—Grouping and sequencing photographic images to produce a coherent body of work with a thematic structure. (lower level)
4 units, Spr (Felzmann, L)

ARTSTUDI 310A,B,C. Directed Reading: Studio
1-15 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

ARTSTUDI 342. MFA Project: Studio—Two weekly seminars, studio practice, and individual tutorials. Object seminar: student work is critiqued on issues of identity, presentation, and the development of coherent critical language. Concept seminar: modes of conceptualization to broaden the base of cognitive and generative processes. May be repeated for credit.
1-15 units, Aut (Chagoya, E; DeMarinis, P), Win (Hannah, D), Spr (Staff)

ARTSTUDI 360A,B,C. Master's Project: Design
1-15 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Kahn, M)*

COGNATE COURSES

See degree requirements above or the department's student services office for applicability of these courses to a major or minor program. See sponsoring department for course description.

CEE 139. Design Portfolio Methods
3 units, Spr (Barton, J)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts
5 units, Win (Elam, H)

ME 120. History and Philosophy of Design
3-4 units, Spr (Katz, B)

URBANST 113. Introduction to Urban Design: Contemporary Urban Design in Theory and Practice
5 units, Win (Gast, G)

FILM STUDIES

INTRODUCTORY

FILMSTUD 4. Introduction to Film Study—Formal, historical, and cultural issues in the study of film. Classical narrative cinema compared with alternative narrative structures, documentary films, and experimental cinematic forms. Issues of cinematic language and visual perception, and representations of gender, ethnicity, and sexuality. Aesthetic and conceptual analytic skills with relevance to cinema. GER:DB-Hum
5 units, Aut (Ma, J)

FILMSTUD 100A/300A. History of World Cinema I, 1895-1929—From cinema's precursors to the advent of synchronized sound. GER:DB-Hum
4 units, Aut (Bukatman, S)

FILMSTUD 100B/300B. History of World Cinema II, 1930-1959—The impact of sound to the dissolution of Hollywood's studio system. GER:DB-Hum
4 units, Win (Todd, J)

FILMSTUD 100C/300C. History of World Cinema III, 1960-Present—From the rise of the French New Wave to the present. GER:DB-Hum
4 units, Spr (Ma, J)

FILMSTUD 101/301. Fundamentals of Cinematic Analysis—The close analysis of film. Emphasis is on formal and narrative techniques in structure and style, and detailed readings of brief sequences. Elements such as cinematography, mise-en-scène, composition, sound, and performance. Films from various historical periods, national cinemas, directors, and genres. Recommended: 4 or equivalent. GER:DB-Hum
4 units, not given this year

FILMSTUD 102/302. Theories of the Moving Image—Major theoretical arguments and debates about cinema: realism, formalism, poststructuralism, feminism, postmodernism, and phenomenology. Prerequisites: ARTHIST 1, FILMSTUD 4. GER:DB-Hum, WIM
4 units, Spr (Levi, P)

FILMSTUD 103/303. History of Experimental Film—The avant garde as locating cinematic art in spatio-temporal experiments against the background of film's novelty in the early 20th century and movements towards an art derivative of literature and theater. How the avant gardes of Europe, the U.S.S.R., and the U.S. produced films that opposed narrative cinematic conventions through a reflexive engagement with the medium's metamorphic fluidity, film produced abstraction, political argument, an entry into the rhetoric of the unconscious and the realm of cognition, refusals of meaning, and explorations of perception.
4 units, not given this year

GENRE

FILMSTUD 111/311. The Body in American Genre Film: From Chaplin to *The Matrix*—The American genre film as a mass form that shares elements with a carnivalesque, folk culture such as a rejection of politeness and piety, and an emphasis on the physical. Genres include comedy, western, war, science fiction, musical, horror, melodrama, gangster, and cult, exploitation, and blaxploitation films. The place of the body onscreen. How does the body exist in relation to the world, other bodies, and the act of perception? What meaning does bodily movement have in relation to narrative? GER:DB-Hum
4 units, not given this year (Bukatman, S)

FILMSTUD 112/312. Hollywood Musicals, 1927-1944—The sense of physical, emotional, aesthetic, and social liberation in early film musicals. Musicals as a place for the staging of issues of identity, including the impact of African American and Jewish culture, and issues of gay reception and interpretation. Attention to technologies of sound and color, the relation to Broadway, and ethnic and aesthetic diversity. GER:DB-Hum, EC-AmerCul
4 units, not given this year (Bukatman, S)

FILMSTUD 112A/312A. Hollywood Musicals, 1945-1971—Musicals as the epitome of filmic illusionism; the implications of their seduction of audiences; the meaning of spectacle. The era of Cole Porter, the Arthur Freed unit at MGM, the Gene Kelly/Stanley Donan collaborations, self-examination in Vicente Minnelli's work, choreographers such as Bob Fosse and Eugene Loring, and 60s road-show Broadway adaptations. GER:DB-Hum
4 units, not given this year (Bukatman, S)

FILMSTUD 113/313. Gender and Desire: Feminist Perspectives—The representation of gender in narrative cinema. How theories such as feminist and queer studies approach narrative cinema's engendering of men and women. Filmic structures that shape how spectators view men and women on the screen. Desire as a literal and figurative subject and engine of narrative. Focus is on classical American cinema.
4 units, Win (Staff)

FILMSTUD 115/315. Documentary Issues and Traditions—Issues include objectivity/subjectivity, ethics, censorship, representation, reflexivity, responsibility to the audience, and authorial voice. Parallel focus on form and content. GER:DB-SocSci
4 units, Aut (Krawitz, J)

FILMSTUD 116/316. International Documentary—Historical, aesthetic, and formal developments of documentary through nonfiction films in Europe, Asia, Latin America, and Africa. GER:DB-Hum
4 units, not given this year (Samuelson, K)

FILMSTUD 118A/318A. Gender, Globalism, Cinema—Political and aesthetic dimensions of gender and global cinematic practices. Focus is on borders, nationalism and nationalist liberation movements, and the notion of the global from conquest to the present. Militant cinemas from Africa, Asia, and the Americas; relationships among cinema, culture, colonialism, decolonization, and globalization. How gendered discourses and practices influence the ideological orientation and infrastructural implementation of border policing. nationalist liberation, and capitalist economic processes and realities. GER:DB-Hum
4 units, Win (Campos, D)

AUTHOR STUDIES

FILMSTUD 120B/320B. Studies in Authorship: The Films of Vincente Minnelli—GER:DB-Hum
4 units, not given this year (Bukatman, S)

NATIONAL CINEMAS

FILMSTUD 130/330. Italian Cinema: Neorealism and Beyond—The post-WW II era. Aesthetic and sociopolitical dimensions of neorealism; 60s cinema of economic miracle; and Italian variations on popular film genres such as the spaghetti western. Filmmakers include Rossellini, De Sica, Visconti, Pasolini, and Antonioni. GER:DB-Hum
4 units, Win (Levi, P)

FILMSTUD 131/331. Politics and Aesthetics in East European Cinema—From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film. Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica. GER:DB-Hum
4 units, Aut (Levi, P)

FILMSTUD 132/332. East Asian Cinema—Social, historical, and aesthetic dimensions of the cinemas of Japan, Hong Kong, Taiwan, mainland China, and Korea. Topics such as nation and gender, form and genre, and local and transnational conditions of practice and reception. Screenings include popular and art films from the silent to contemporary eras, including, directors Zhang Yimou, Wong Kar-wai, Hou Hsiao-hsien, Ozu Yasujiro, Kurosawa Akira, and Im Kwon-taek.
4 units, not given this year (Ma, J)

AESTHETICS

FILMSTUD 141/341. Cinematic Spectacle—How cinematic spectacle has been theorized; the adoption of new technologies such as sound, color, or special effects; theories of the sublime and the grotesque. Spectacle as a vehicle for propaganda or pedagogy, and its relation to narrative and gender. The role of spectacle in experimental cinema and its deconstruction by Godard and others. Recommended: 4 or equivalent. GER:DB-Hum
4 units, not given this year

FILMSTUD 144/344. Experimental Video Workshop—Theory and practice of the moving image. Students work on video exercises and experiments as applied theory: attempts at practically implementing, verifying, or challenging ideas about sound, image, and performance. Prerequisites: FILMPROD 114 or equivalent, and consent of instructor.
4 units, not given this year (Levi, P)

OTHER

FILMSTUD 152/352. Cinema-Machine—The film medium as culmination of the industrial and electronic revolutions of the 19th and 20th centuries, and the apotheosis of modernist impulses around the problematic of a perfect vision and visibility. The ideal of cinema in relation to its technological basis: the film apparatus as mechanical artifact, desiring machine, phenomenological toy, and instrument of knowledge. Screenings. GER:DB-Hum
4 units, not given this year (Bukatman, S; Levi, P)

SEMINARS

FILMSTUD 230. Cinema and Ideology—The relationship between cinema and ideology from theoretical and historical perspectives, emphasizing Marxist and psychoanalytic approaches. The practice of political filmmaking, and the cinema as an audiovisual apparatus and socio-cultural institution. Topics include: dialectics; revolutionary aesthetics; language and power; commodity fetishism; and nationalism. Filmmakers include Dziga Vertov, Jean-Luc Godard, Bruce Conner, and Marco Ferreri. Theoretical writers include Karl Marx, Sergei Eisenstein, and Slavoj Zizek. Prerequisite: consent of instructor.
5 units, not given this year (Levi, P)

FILMSTUD 290. Senior Seminar: Movies and Methods—Capstone course for majors. Topics vary year to year. Focus is on historiography and theory.
5 units, Win (Ma, J)

FILMSTUD 299. Independent Study: Film and Media Studies—May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

GRADUATE SEMINARS

FILMSTUD 400. Cinema and Surrealist Imagination—Theoeretical and practical approaches to cinema in the framework of ideas and aesthetic principles pursued by 20s and 30s European writers and artists associated with Dada and Surrealism. Forms of avant garde filmmaking and cine-writing engaged in a rebellion against reason and logic, and invested in explorations of the unconscious through automatism, oneirism, chance, and visualization of desire. Writers include Breton, Bataille, and Artaud; filmmakers include Buñuel, Dali, Man Ray, and Duchamp.
5 units, not given this year (Levi, P)

FILMSTUD 404. Postwar American Avant Garde Cinema—History and theory of post-WW II American independent and experimental film. Emphasis is on issues of audiovisual form, structure, and medium specificity. Films and writings include Maya Deren, Stan Brakhage, Michael Snow, and Hollis Frampton.
5 units, Aut (Levi, P)

FILMSTUD 410A. Documentary Perspectives I—Restricted to M.F.A. documentary film students. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.
4 units, Win (Krawitz, J)

FILMSTUD 410B. Documentary Perspectives II—Restricted to M.F.A. documentary film students. Continuation of 402A. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.
4 units, not given this year

FILMSTUD 660. Independent Study—For graduate students only. Approved independent research projects with individual faculty members.
1-15 units, Aut, Win, Spr, Sum (Staff)

PRACTICE OF FILM

FILMPROD 101/301. Screenwriting—Priority to Film and Media Studies majors. Craft, form, and approaches to writing for the screen. Prerequisites: ENGLISH 90, 190F, and consent of instructor.
5 units, Spr (Staff)

FILMPROD 114. Introduction to Film and Video Production—Hands-on. Techniques of film and video making including conceptualization, visualization, story structure, cinematography, sound recording, and editing.
5 units, Aut (Staff), Spr (Meltzer, J)

FILMPROD 400. Film/Video Writing and Directing—Restricted to M.F.A. documentary students. Emphasis is on the development of the research, conceptualization, visualization, and preproduction skills required for nonfiction filmmaking. Prerequisite: consent of instructor.
4 units, Aut (Meltzer, J)

FILMPROD 401. Nonfiction Film Production—Restricted to M.F.A documentary students. 16mm production techniques and concepts. Final project is a short black-and-white film with multitrack sound design. Prerequisite: consent of instructor.
4 units, Aut (Krawitz, J)

FILMPROD 402. Digital Video—Restricted to M.F.A. documentary students. Fundamentals of digital storytelling. Working with small format cameras, interviewing techniques, and nonlinear editing skills. Prerequisite: consent of instructor.
4 units, Win (Samuelson, K)

FILMPROD 403. Advanced Documentary Directing—Restricted to M.F.A. documentary students. Further examination of structure, emphasizing writing and directing nonfiction film. Prerequisite: consent of instructor.
4 units, Spr (Samuelson, K)

FILMPROD 404. Advanced Film and Video Production—Restricted to M.F.A. documentary students. Techniques of visual storytelling and observational shooting. Final quarter of professional training in 16mm motion picture production. Prerequisite: consent of instructor.
4 units, Spr (Meltzer, J)

FILMPROD 405. Producing Practicum—Restricted to M.F.A. documentary students. Advanced producing principles through the preproduction of the M.F.A. thesis project, including development of a professional film proposal. Practical training in fundraising. Prerequisite: consent of instructor.
4 units, Aut (Samuelson, K)

FILMPROD 406A. Documentary M.F.A. Thesis Seminar I—Restricted to M.F.A. documentary students. Production of film or video project. Focus is on shooting strategies, ethical challenges, and practical production issues. Prerequisite: consent of instructor.
4 units, Win (Meltzer, J)

FILMPROD 406B. Documentary M.F.A. Thesis Seminar II—Restricted to M.F.A. documentary students. Editing and post-production of film or video project. Emphasis is on aesthetic choices (structure, narration, music), distribution, contracts, and audience. Prerequisite: consent of instructor.
6 units, Spr (Krawitz, J)

COGNATE COURSES

COMM 1B. Media, Culture, and Society
5 units, not given this year

ENGLISH 190F. Fiction Writing for Film
5 units, Win (O'Keefe, J)

OVERSEAS STUDIES

BERLIN

OSPBER 17. Split Images: A Century of Cinema
4-5 units, Aut (Kramer, K)

OSPBER 55. Filmed Experience: Berlin at Eye-Level
5 units, Spr (Maerker, C)

OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin
4-5 units, Aut (Pabsch, M)

OSPBER 67. Sissy Sits, Lola Runs: Gender Moves in German Movies
5 units, Win (Kramer, K)

FLORENCE

OSPFLOR 34. The Woman in Florentine Art
4 units, Aut (Verdon, T)

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice
3-5 units, Aut (Rossi, F)

OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition
4 units, Win (Rossi, F; Verdon, T)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
5 units, Win (Campani, E)

OSPFLOR 54. High Renaissance and Maniera
5 units, Spr (Verdon, T)

OSPFLOR 55. Academy of Fine Arts: Studio Art
1-5 units, Aut, Win, Spr (Staff)

OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future
3-5 units, Spr (Rossi, F)

OSPFLOR 94. Photography in Florence
4 units, Win (Loverme, C)

OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence
4 units, Win (Verdon, T)

OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization
4 units, Aut (Verdon, T)

OSPFLOR 134F. Modernist Italian Cinema
5 units, Aut (Campani, E)

KYOTO

OSPKYOTO 28. Kyoto: History of Urban and Architectural Space
4-5 units, Spr (Langner-Teramoto, B)

OXFORD

OSPOXFRD 84. African Art and Writing Traditions
5 units, Spr (Martinez-Ruiz, B)

OSPOXFRD 85. African Art and Museum Display
5 units, Spr (Martinez-Ruiz, B)

OSPOXFRD 221Y. Art and Society in Britain
4-5 units, Aut (Tyack, G)

PARIS

OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design
4 units, Spr (Halevi, E)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France
4 units, Aut (Deremble, C; Deremble, J)

OSPPARIS 120X. French Painting
4 units, Win (Halevi, E)

OSPPARIS 42. EAP: Drawing with Live Models
2 units, Aut, Win, Spr (Halevi, E)

OSPPARIS 43. EAP: Painting and Use of Color
2 units, Aut, Win, Spr (Halevi, E)

OSPPARIS 44. EAP: Graphic Art
2 units, Aut, Win, Spr (Halevi, E)

ASIAN LANGUAGES

Emeriti: (Professors) Albert E. Dien, David S. Nivison, Makoto Ueda; *(Associate Professor)* Susan Matisoff; *(Senior Lecturer)* Yin Chuang*
Chair: Steven D. Carter
Directors of Graduate Studies: Indra Levy (Japanese), Chao Fen Sun (Chinese)
Directors of Undergraduate Studies: Steven D. Carter (Japanese), Yiqun Zhou (Chinese)
Professors: Steven D. Carter, Mark E. Lewis (Asian Languages, History), Melinda Takeuchi (Asian Languages, Art and Art History), Ban Wang, John C. Y. Wang
Associate Professors: Yoshiko Matsumoto, James Reichert, Chao Fen Sun
Assistant Professors: Indra Levy, Yiqun Zhou
Senior Lecturer: Kazuko Busbin
Consulting Professor: Richard Dasher
Visiting Professor: Stuart Sargent
Postdoctoral Fellows: Alexander Cook (Humanities Fellow), Elena Chiu (Center for East Asian Studies), Michael Dylan Foster (Freeman Spogli Institute for International Studies), Daniel O'Neill (Freeman Spogli Institute for International Studies), Ayelet Zohar (Freeman Spogli Institute for International Studies)

Chinese-Japanese Area Studies Faculty:
Professors: Masahiko Aoki (Economics, emeritus), Carl W. Bielefeldt (Religious Studies), Richard Dasher (Integrated Systems), Peter Duus (History, emeritus), Harold L. Kahn (History, emeritus), Lawrence Lau (Economics), John W. Lewis (Political Science, emeritus), Jean Oi (Political Science), Daniel I. Okimoto (Political Science), David Palumbo-Liu (Comparative Literature), Richard Vinograd (Art and Art History), Andrew Walder (Sociology), Arthur P. Wolf (Anthropology), Lee H. Yearley (Religious Studies)
Associate Professors: Matthew Sommer (History), Kären Wigen (History)
Assistant Professors: Melissa Brown (Anthropology), Miyako Inoue (Anthropology), Matthew Kohrman (Anthropology), Jean Ma (Film Studies), Thomas Mullaney (History), Jun Uchida (History)

Department Office: Building 250, Room 103
Mail Code: 94305-2034
Phone: (650) 725-2742
Email: asianlanguages@stanford.edu
Web Site: http://asianlanguages.stanford.edu

Courses given in Asian Languages have subject codes CHINGEN, CHINLIT, JAPANGEN, JAPANLIT, and KORGEN. For a complete list of subject codes, see Appendix.

The Department of Asian Languages offers programs for students who want to engage with the cultures of China and Japan as articulated in language, linguistics, literature, film, and the newly developing field of cultural studies. Students emerge with a sophisticated understanding of culture as a dynamic process embodied in language and other representational forms, especially the verbal and visual forms that are central to humanistic study. Department faculty represent a broad range of research interests and specialties, and visiting scholars and postdoctoral fellows from the Stanford Humanities Center, the Freeman Spogli Institute for International Studies, and the Center for East Asian Studies add to the intellectual vitality of the department.

Asian Languages offers a full range of courses at the undergraduate and graduate levels. Undergraduate courses concentrate on language, literature, and other cultural forms from the earliest times to the present, covering traditional and contemporary topics from Confucian conceptions of self and society to inflections of gender in the twentieth century, from traditional arts such as Peking opera to recent developments in animé. Emphasis in classes is on developing powers of critical thinking and expression to serve students well no matter what their ultimate career goals. Graduate programs offer courses of study involving advanced language training, engagement with primary texts and other materials, and training in research methodologies and critical approaches.

---

* Recalled to active duty.

Asian language skills provide a foundation for professional careers in fields such as business, diplomacy, education, and law. The department also offers opportunities for students who choose to double-major or minor in other academic disciplines, including anthropology, art, economics, education, history, linguistics, philosophy, political science, religious studies, and sociology.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy in Chinese and Japanese. It also offers an undergraduate degree and a Ph.D. minor in Chinese or Japanese language and literature.

For information concerning other opportunities for study about Asian history, societies, and cultures, see the following departments and programs: Anthropology, Art and Art History, Business, Comparative Literature, East Asian Studies, Economics, History, Interdisciplinary Studies in Humanities, Law, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology. Courses in Chinese, Japanese, and Korean language instruction are listed in the "Language Center" section of this bulletin. Students interested in Asian languages not listed should contact the Special Language Program at the Language Center.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The B.A. degree is granted both in Chinese and in Japanese. The following courses and their prerequisites must be completed with a grade point average (GPA) of 2.0 or better:

1. Concentrations in Chinese:
   a) CHINGEN 91 and JAPANGEN 92
   b) Chinese language requirement:
      1) first-year modern Chinese (one of the following series: CHINLANG 1, 2, 3, or CHINLANG 1B, 2B, 3B, or CHINLANG 5)
      2) second-year modern Chinese (one of the following series: CHINLANG 21, 22, 23, or CHINLANG 21B, 22B, 23B, or CHINLANG 25)
      3) third-year modern Chinese (one of the following series: CHINLANG 101, 102, 103, or CHINLANG 101B, 102B, 103B, or CHINLANG 105) *or* beginning classical Chinese (CHINLIT 125, 126, 127)
   c) three courses offered by Asian Languages at the 100 level with one in each of the following areas, pre-modern China, modern China, and Chinese language/linguistics
   d) four other content courses dealing with China primarily at the 100 level, as approved by the undergraduate adviser
   e) CHINGEN 133 is the required Writing in the Major (WIM) course.
2. Concentrations in Japanese:
   a) CHINGEN 91 and JAPANGEN 92
   b) Japanese language requirement:
      1) first-year modern Japanese (one of the following series: JAPANLNG 1, 2, 3, or JAPANLNG 7B, 8B, 9B, or JAPANLNG 10)
      2) second-year modern Japanese (one of the following series: JAPANLNG 21, 22, 23, or JAPANLNG 17B, 18B, 19B, or JAPANLNG 20)
      3) third-year modern Japanese (one of the following series: JAPANLNG 101, 102, 103, or JAPANLNG 127B, 128B, 129B, or JAPANLNG 130)
   c) three courses offered by Asian Languages at the 100 level with one in each of the following areas: premodern Japan, modern Japan, and Japanese language/linguistics
   d) four other content courses dealing with Japan primarily at the 100 level, as approved by the undergraduate adviser
   e) JAPANGEN 138 is the required WIM course.

   JAPANGEN 71N can be used to satisfy the Japanese language/linguistics area requirement. JAPANGEN 51/251 and JAPANLNG 130 are not counted toward the major. Students who complete third-year Japanese at KCJS satisfy the language requirement but are required to take a placement test if they wish to enroll in JAPANLNG 211, 212, 213.

Students who want to concentrate in Chinese or Japanese language/linguistics can substitute the four other content courses primarily at the 100 level with LINGUIST 1 and three other linguistic courses at the 100 level, as approved by the undergraduate adviser in consultation with the student's academic adviser.

These requirements are in addition to the University's basic requirement for the bachelor's degree. Letter grades are mandatory for all required courses.

MINORS

The undergraduate minor in Asian Languages has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Chinese (Mandarin) or Japanese language, as well as an introduction to the culture and civilization of East Asia. The minor consists of:

1. Completion of one year of language study at the second-year level (that is, CHINLANG 21, 22, 23 or JAPANLNG 21, 22, 23 or 17B, 18B, 19B) for students with no previous training in Chinese or Japanese. Students who already have first-year competence in Chinese or Japanese must complete the third-year course (CHINLANG 101, 102, 103 or JAPANLNG 101, 102, 103 or 127B, 128B, 129B) before undertaking any training in the Department of Asian Languages. Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in either Chinese or Japanese. These courses may be language courses such as the third-year sequence mentioned above, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student in question.
2. The core courses, CHINGEN 91, Traditional East Asian Civilization: China, and JAPANGEN 92, Traditional East Asian Civilization: Japan.
3. Two courses selected from among the department's other offerings in the literature, linguistics, and civilization of a given minor area. All courses for the minor must be completed with a GPA of 2.0 or better.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

HONORS PROGRAM

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, when the student may enroll in CHINLIT 189B or JAPANLIT 189B for 2 units of credit for independent study. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. In Winter Quarter, students enroll for 5 units in directed reading (CHINLIT 189A or JAPANLIT 189A) with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than the end of the Winter Quarter in the senior year. Students who did not enroll in a 189B course in junior year may enroll in CHINLIT 189B or JAPANLIT 189B in Spring Quarter of senior year while revising the thesis, if approved by the thesis supervisor. 10-12 units of credit are granted for honors course work and the finished thesis.

COTERMINAL PROGRAMS

With department approval, students may be able to combine programs for the B.A. and M.A. degrees in Chinese or Japanese. Prospective applicants must consult with the graduate adviser. A Graduate Record Examination (GRE) score is not required. For details, see the "Graduate Degrees" section of this bulletin or http://registrar.stanford.edu/shared/publications.htm#Coterm.

EAST ASIAN STUDIES THEME HOUSE

EAST House, located at Governor's Corner, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of East Asia. Assignment is made through the regular undergraduate housing draw.

SUMMER PROGRAM

A nine-week summer program of intensive instruction is offered, on three different levels, in both Chinese and Japanese. The intensive courses provide the equivalent in instruction to regular academic-year courses. (See courses CHINLANG 5, 25, 105, and JAPANLNG 10, 20, 130, as described in the "Language Center" section of this bulletin.) For detailed information about these and other aspects of the summer program, inquire at the Language Center.

GRADUATE PROGRAMS

Admission—All students contemplating application for admission to graduate study must have a creditable undergraduate record. The applicant need not have majored in Chinese or Japanese as an undergraduate, but must have had the equivalent of at least three years of training in the language in which he or she intends to specialize, and must also demonstrate a command of English adequate for the pursuit of graduate study. Applicants should not wish merely to acquire or improve language skills, but to pursue study in one of the following fields: Chinese history (premodern), Chinese linguistics, Chinese literature, Chinese philosophy, Japanese cultural history, Japanese literature, and Japanese linguistics.

MASTER OF ARTS

The M.A. is granted in Chinese and in Japanese. The normal length of study for the degree is two years.

Applicants who wish to obtain only the M.A. and who do not intend to proceed to the Ph.D. are considered only if no financial aid is requested.

Students who wish to spend the first year of graduate study at the Beijing or Yokohama centers must obtain department approval first.

Candidates for the degree must be in residence at Stanford in California during the final quarter of registration.

A thesis or an annotated translation of a text of suitable literary or historical worth is required for the M.A. degree. Under special circumstances, a paper approved by the graduate adviser may be substituted.

The University's basic requirements for the master's degree, including a 45-unit minimum requirement, are given in the "Graduate Degrees" section of this bulletin. Department requirements are set forth below.

CHINESE

The candidate must:

1. Meet department's requirements for the B.A. in Chinese or equivalent.
2. Demonstrate proficiency in both modern and classical Chinese through either:
   a. completion for a letter grade of 'B' or higher of third-year Chinese through CHINLANG 103 and advanced classical Chinese through CHINLANG 223, or
   b. passing examinations to certify that the student has attained the equivalent level of proficiency
3. Complete the following for a letter grade of 'B' or higher:
   a. four courses in Chinese literature or linguistics numbered between CHINLIT 230 and 292
   b. CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies
   c. two upper-division or graduate-level courses in fields such as Chinese anthropology, art, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser
   d. a master's thesis; CHINLIT 299. Master's Thesis or Translation

JAPANESE

The candidate must:

1. Meet department's requirements for the B.A. in Japanese or equivalent.
2. Demonstrate proficiency in both modern and pre-modern Japanese through either:
   a. completion for a letter grade of 'B' or higher of fourth-year Japanese through JAPANLANG 213 and classical Japanese through JAPANLANG 246 and 247, or
   b. passing examinations to certify that the student has attained the equivalent level of proficiency
3. Complete the following for a letter grade of 'B' or higher:
   a. four courses in Japanese literature or linguistics numbered between JAPANLIT 260 and 298
   b. JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese
   c. two upper-division or graduate-level courses in fields such as Japanese anthropology, art, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser
   d. a master's thesis; JAPANLIT 299. Master's Thesis or Translation

DOCTOR OF PHILOSOPHY

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature, an adequate command of both languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University's basic requirements for the Ph.D. are given in the "Graduate Degrees" section of this bulletin. Department requirements are set forth below.

ADMISSION TO CANDIDACY

Students admitted with a B.A. only are evaluated by the graduate faculty during the Autumn Quarter of their second year at Stanford. The evaluation is based on written work and at least a portion of the M.A. thesis or translation. If the faculty have serious doubts about a student's ability to work for the Ph.D., they convey this to the student. During the subsequent Spring Quarter, the faculty formally decides whether a student should be admitted to candidacy for the Ph.D. or be terminated. In the case of a student who already has an M.A. in Chinese or Japanese when admitted to the department, the evaluation takes place in the Spring Quarter of the student's first year. If a student goes to the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama (see "Study Abroad" below) during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Admission to candidacy does not mean that the student has fulfilled all requirements for the degree except the dissertation, but that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D. and that, subject to continued satisfactory progress, the student's status in this department is secure.

REQUIREMENTS

A candidate must fulfill the following requirements:

1. Meet the department's requirements for the M.A. in Chinese or Japanese.
2. Acquire or demonstrate reading proficiency in at least one supporting language, normally an East Asian or European language, chosen in consultation with the adviser(s) in accordance with the student's research goals. Reading proficiency is certified through written examination or an appropriate amount of course work determined on an individual basis. Students specializing in premodern Japanese literature are normally expected to demonstrate proficiency in classical Chinese equivalent to one year of classical Chinese at Stanford, and to acquire proficiency in *kanbun* by completing JAPANLIT 248 or 249. Course work must be completed with a letter grade of 'B' or higher. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.

3. Complete two relevant seminars at the 300 level. These seminars must be in different subjects.
4. Pass a set of four comprehensive written examinations, one of which tests the candidate's methodological competence in the relevant discipline. The remaining three fields are chosen, with the approval of the graduate adviser in consultation with the student's individual adviser, from the following: anthropology, art, Chinese literature, history, Japanese literature, linguistics, philosophy, and religion. With the adviser's approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these four examinations.
5. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter, and taking APPLLING 201, The Learning and Teaching of Second Languages.

University Oral Examination—General regulations governing the oral examination are found in the "Graduate Degrees" section of this bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

Dissertation—The candidate must write a dissertation demonstrating ability to undertake original research based on primary materials in Chinese or Japanese.

PH.D. MINOR

A student taking a minor in Asian Languages must complete at least 30 units of work within the department at the 200 and 300 level, chosen in consultation with a department adviser. The student must elect either CHINLIT or JAPANLIT 201 unless the department is satisfied that work done elsewhere has provided similar training. The student must also pass a written examination in the Chinese or Japanese language.

STUDY ABROAD

Students interested in Japanese language, history, culture, and social organization are encouraged to apply to the Kyoto Center for Japanese Studies (KCJS), a two-semester academic program primarily for undergraduates wishing to do advanced work in the Japanese language and in Japanese studies.

In Spring Quarter, the Stanford Center for Technology and Innovation (SCTI), also in Kyoto, focuses on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries, followed by an optional two-to-three month internship in an agency, firm, or laboratory in Japan. For information about either program in Kyoto, students should contact the Overseas Studies office in Sweet Hall.

Undergraduates interested in studying Chinese language, history, culture, and society are encouraged to apply to the Stanford Program in Beijing also offered through the Overseas Studies Program in Sweet Hall. This program is located at Peking University and is open Autumn and Spring quarters.

Students should take note of the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University (http://ieas.berkeley.edu/iup/; iub@socrates.berkeley.edu; 510-642-3873) and the Inter-University Center (IUC) for Japanese Language Studies in Yokohama (http://www.stanford.edu/dept/IUC/; stacey.campbell@stanford.edu; 650-725-1490). Stanford is a member of these consortia programs.

Students interested in the exchange program with the Department of Chinese at Peking University in Beijing should consult the chair of the department early in the academic year.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Program in Modern Thought and Literature.

Undergraduate and graduate majors should also consult the listings of the Division of Literatures, Cultures, and Languages.

Since unavoidable changes occasionally have to be made in course offerings after the *Stanford Bulletin* has gone to print, students are advised to consult the department each quarter.

For possible future offerings, see http://www.stanford.edu/dept/asianlang/courses/

GENERAL

These courses are open to all undergraduates and graduate students, are taught in English, and do not require a knowledge of an Asian language.

CHINESE

CHINGEN 51. Chinese Calligraphy—Practice in writing Chinese characters with a brush, emphasizing standardized script and the composition of the characters and improving handwriting. Limited enrollment. May be repeated for credit. Prerequisite: CHINLANG 3 or equivalent.
1-2 units, Spr (Chuang, Y)

CHINGEN 91. Traditional East Asian Culture: China—Required for Chinese and Japanese majors. Introduction to Chinese culture in a historical context. Topics include political and socioeconomic institutions, religion, ethics, education, and art and literature. GER:DB-Hum, EC-GlobalCom
5 units, Aut (Chiu, E)

CHINGEN 131/231. Chinese Poetry in Translation—(Graduate students register for 231.) From the first millennium B.C. through the 12th century. Traditional verse forms representative of the classical tradition; highlights of the most distinguished poets. History, language, and culture. Chinese language not required. GER:DB-Hum, EC-GlobalCom
4 units, Aut (Sargent, S)

CHINGEN 132/232. Chinese Fiction and Drama in Translation—(Graduate students register for 232.) From early times to the 18th century, emphasizing literary and thematic discussions of major works in English translation. GER:DB-Hum, EC-GlobalCom
4 units, Win (Wang, J)

CHINGEN 133/233. Literature in 20th-Century China—(Graduate students register for 233.) Required for Chinese majors. The historical and cultural context of modern Chinese writing; critical approaches to its study. Themes include: the politics of representing gender and romance in literature; dislocations of colonial modernity; and political, cultural, and economic revolution. Sources include elite and popular fiction. In English. GER:DB-Hum, EC-GlobalCom, WIM
4 units, Aut (Cook, A)

CHINGEN 134/234. Early Chinese Mythology—(Graduate students register for 234.) The definition of a myth. Major myths of China prior to the rise of Buddhism and Daoism including: tales of the early sage kings such as Yu and the flood; depictions of deities in the underworld; historical myths; tales of immortals in relation to local cults; and tales of the patron deities of crafts.
3-5 units, Win (Lewis, M)

CHINGEN 136/236. The Chinese Family—(Graduate students register for 236.) History and literature. Institutional, ritual, affective, and symbolic aspects. Perspectives of gender, class, and social change.
3-5 units, Spr (Zhou, Y)

CHINGEN 137/237. Modern Chinese Literature: Tradition, Memory, and Modernity—(Graduate students register for 237.) How modern Chinese culture makes connections to its past when its traditional structures have been altered by the processes of modernity. Traumatic theory, redemptive narratives, and cultural transformations. Sources include fiction and film clips. Chinese language not required.
4 units, Win (Wang, B)

CHINGEN 138. Passion and Love in Chinese Film—How films work as expressions of desire, impulse, emotional connection, and communal attachment during times of social upheaval and reconstruction. Film theory and aesthetics, and alternative paradigms about world and social relations. Chinese language not required.
4 units, Win (Wang, B)

CHINGEN 200. Directed Readings in Asian Languages—For Chinese literature. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

JAPANESE

JAPANGEN 51/251. Japanese Business Culture—(Graduate students register for 251.) Japanese group dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Strategies for managing intercultural differences.
3-5 units, Win (Dasher, R)

JAPANGEN 60. Asian Art and Culture—(Same as ARTHIST 2.) The religious and philosophical ideas and social attitudes of India, China, and Japan and how they are expressed in architecture, painting, woodblock prints, sculpture, and in such forms as garden design and urban planning. GER:DB-Hum, EC-GlobalCom
5 units, Win (Takeuchi, M)

JAPANGEN 71N. Language and Gender in Japan: Myths and Reality—Stanford Introductory Seminar. Preference to freshmen. Ideology and practice of gender in the Japanese society as reflected in and created by stylistic choices in the Japanese language. Past and present speech styles of women and men, speech situations, age, class, identities of the individual speakers and their relationships with others. How belief and reality are refracted through mass media and fictional representations. Comparisons with similar phenomena in other cultures. GER:DB-SocSci, EC-Gender
4 units, Spr (Matsumoto, Y)

JAPANGEN 75N. Around the World in Seventeen Syllables: Haiku in Japan, the U.S., and the Digital World—Stanford Introductory Seminar. Preference to freshmen. Origins of the haiku form in Japan, its place in the discourse of Orientalism during the 19th and early 20th centuries in the West, its appropriation by U.S.devotees of Zen and the beat poets after WW II, and its current transformation into a global form through the Internet.
3-4 units, Aut (Carter, S)

JAPANGEN 84. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting—Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.
4 units, Aut (Takeuchi, M)

JAPANGEN 92. Traditional East Asian Culture: Japan—Required for Chinese and Japanese majors. Introduction to Japanese culture in historical context. Focus is on shifting paradigms of gender relations and performance. Topics include ancient mythology, court poetry and romance, medieval war tales, and the theaters of Noh, Bunraku, and Kabuki. GER:DB-Hum, EC-GlobalCom
5 units, Win (Levy, I)

JAPANGEN 138/238. Survey of Modern Japanese Literature in Translation—(Graduate students register for 238.) Required for Japanese majors. Japanese literature since 1868. Authors include Futabatei Shimei, Higuchi Ichiyo, Natsume Soseki, and Yoshimoto Banana. WIM
2-4 units, Spr (Reichert, J)

JAPANGEN 149/249. Screening Japan: Issues in Crosscultural Interpretation—(Graduate students register for 249.) Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required. GER:DB-Hum
3-4 units, Aut (Levy, I)

JAPANGEN 200. Directed Reading in Asian Languages—For Japanese literature. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

JAPANGEN 201. Teaching East Asian Humanities—Prepares graduate students to teach E. Asian humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.
1 unit, Win (Levy, I)

JAPANGEN 220. The Situation of the Artist in Traditional Japan—(Same as ARTHIST 485.) Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons' desires and artists' modes of production.
5 units, Spr (Takeuchi, M)

CHINESE

CHINESE LANGUAGE COURSES

The following courses in Chinese language instruction represent a typical sequence for three years of Chinese language study. Majors and prospective majors should consult the requirements for a B.A. in Chinese above. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, see the "Language Center" section of this bulletin.

CHINLANG 1,2,3. First-Year Modern Chinese
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Zeng, H)*

CHINLANG 21,22,23. Second-Year Modern Chinese
5 units, **21:** *Aut,* **22:** *Win,* **23:** *Spr (Chung, M; Wang, Y)*

CHINLANG 101,102,103. Third-Year Modern Chinese
5 units, **101:** *Aut,* **102:** *Win,* **103:** *Spr (Wang, H)*

CHINESE COURSES: ADVANCED UNDERGRADUATE AND GRADUATE

CHINLIT 125,126,127. Beginning Classical Chinese—(Graduate students register for 205.) Goal is reading knowledge of classical Chinese. Students with no background in classical Chinese who are taking 127 to satisfy Chinese major requirements must begin with 125. Basic grammar and commonly used vocabulary. Prerequisite: CHINLANG 23 or equivalent.
2-5 units, **125:** *Aut,* **126:** *Win (Sun, C),* **127:** *Spr (Zhou, Y)*

CHINLIT 174/274. Modern Chinese Literature: Short Stories—(Graduate students register for 274.) From the May Fourth movement to the 40s. Themes include enlightenment, democracy, women's liberation, revolution, war, urban culture, and love. Prerequisite: advanced Chinese.
4 units, Spr (Wang, B)

CHINLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

CHINLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

CHINLIT 192/292. The History of Chinese—(Graduate students register for 292.) Emphasis is on syntactic and semantic changes in the last 2,000 years and grammaticalization. Students use a computer corpus to do research on the history of Chinese. Prerequisite: 206 or consent of instructor. GER:DB-SocSci
4 units, Aut (Sun, C)

CHINLIT 199. Individual Reading in Chinese—Asian Language majors only. Prerequisite: CHINLANG 103 or consent of instructor. Units by arrangement.
1-4 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

CHINLIT 200. Directed Reading in Chinese
1-12 units, Aut, Win, Spr, Sum (Staff)

CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies—Bibliographic and research methods in Chinese studies. Prerequisite: 127/207 or equivalent.
5 units, Win (Zhou, Y)

CHINLIT 221. Advanced Classical Chinese: Philosophical Texts—Prerequisite: 207 or equivalent.
3-5 units, Spr (Lewis, M)

CHINLIT 222. Advanced Classical Chinese: Historical Narration—Prerequisite: 127/207 or equivalent.
2-5 units, Win (Wang, J)

CHINLIT 234. The World of Confucius—Society in late Bronze Age China, 1000-250 B.C.E. Social structure, human relationships, religion, ritual, poetry, and material culture.
4-5 units, Win (Zhou, Y)

CHINLIT 265. Major Figures in Classical Chinese *Shi* Poetry—Focus is on a major poet and relationships to previous and later poetry. Poetic form, including meter and rhyme schemes. Historical context. This year's poet is Tao Yuanming. May be repeated for credit. Prerequisites: 201, 207.
2-4 units, Win (Sargent, S)

CHINLIT 271. Traditional Chinese Fiction: Short Stories—Early times to Qing. Prerequisite: 127/207 or consent of instructor.
2-4 units, Spr (Wang, J)

CHINLIT 273. Chinese Drama—Yuan, Ming, and Qing periods emphasizing literary not theatrical qualities. Prerequisite: 127/207 or consent of instructor.
2-4 units, Spr (Wang, J)

CHINLIT 289. Revolution and Social Change: Cinema and History in Modern China—Films that depict the Chinese Revolution, critiques of it, and reforms since the 90s. Film theory, politics, revolutionary aesthetics, and social movements.
3-5 units, Spr (Wang, B)

CHINLIT 299. Master's Thesis or Translation—A total of 5 units taken in one or more quarters.
1-5 units, Aut, Win, Spr, Sum (Staff)

CHINLIT 371. Seminar in Chinese Literary Criticism—Chinese critical texts in relation to Western literary theories. May be repeated for credit. Prerequisite: 127/207 or consent of instructor.
5 units, Spr (Wang, J)

CHINLIT 399. Dissertation Research
1-12 units, Aut, Win, Spr, Sum (Staff)

CHINLIT 400. Advanced Language Training—For students in the Inter-University Program for Chinese Language Studies in Beijing or Taipei. For more information, contact the consortium office at UC Berkeley: (510) 642-3873.
1-15 units, Aut, Win, Spr (Staff)

JAPANESE

JAPANESE LANGUAGE COURSES

The following courses in Japanese language instruction represent a typical sequence for three years of Japanese language study. Majors and prospective majors should consult the requirements for a B.A. in Japanese above. For descriptions, other information, and additional courses including advanced, special emphasis, and summer intensive courses, see the "Language Center" section of this bulletin.

JAPANLNG 7B,8B,9B. First-Year Japanese Language, Culture, and Communication B
5 units, **7B:** *Aut,* **8B:** *Win,* **9B:***Spr (Lipton, H)*

JAPANLNG 17B,18B,19B. Second-Year Japanese Language, Culture, and Communication B
5 units, **17B:** *Aut,* **18B:** *Win,* **19B:** *Spr (Lowdermilk, M)*

JAPANLNG 127B,128B,129B. Third-Year Japanese Language, Culture, and Communication B
5 units, **127B:** *Aut,* **128B:** *Win,* **129B:** *Spr (Tomiyama, Y)*

JAPANESE COURSES: ADVANCED UNDERGRADUATE AND GRADUATE

JAPANLIT 170/270. The *Tale of Genji* and Its Historical Reception—(Graduate students register for 270.) Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (*manga*) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent. GER:DB-Hum
4 units, Win (Carter, S)

JAPANLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

JAPANLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

JAPANLIT 199. Individual Reading in Japanese—Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.
1-4 units, Aut, Win, Spr, Sum (Staff)

JAPANLIT 200. Directed Reading in Japanese
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

JAPANLIT 210. Japanese Tales of the Strange, 18th Century to the Present—Japanese texts dealing with strange, supernatural, or mysterious occurrences. Historical continuity and change in the representation of the strange, emphasizing notions of the outsider or stranger. Readings include literary fiction, urban legends, popular ghost stories, local folklore, and critical historical and theoretical texts. Prerequisite: consent of instructor.
3-5 units, Aut (Foster, M)

JAPANLIT 235,236. Academic Readings in Japanese—Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.

2-4 units, **235:** *Win,* **236:** *Spr (Matsumoto, Y)*

JAPANLIT 266. Introduction to Sino-Japanese—Readings in Sino-Japanese (*kambun*) texts of the Heian, Kamakura, and Muromachi periods, with focus on grammar and reading comprehension. Prerequisite: 246 or equivalent.

3-5 units, Spr (Carter, S)

JAPANLIT 267. Readings in Sino-Japanese—Readings in Sino-Japanese (*kambun*) texts of the Edo and Meiji periods, with focus on grammar and reading comprehension. Prerequisite: 264 or equivalent.

2-5 units, given next year

JAPANLIT 281. Japanese Pragmatics—Sociocultural and discourse factors reflected in the choice of linguistic forms, and their theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.

4 units, Win (Matsumoto, Y)

JAPANLIT 298. The Theory and Practice of Japanese Literary Translation—Theory and cultural status of translation in modern Japanese and English. Comparative analysis of practical translation strategies. Final project is a literary translation of publishable quality. Prerequisite: fourth-year Japanese or consent of instructor.

2-5 units, Aut (Levy, I)

JAPANLIT 299. Master's Thesis or Translation—A total of 5 units, taken in one or more quarters.

1-5 units, Aut, Win, Spr, Sum (Staff)

JAPANLIT 396. Modern Japanese Literature—May be repeated for credit. Prerequisite: JAPANLNG 213.

3-5 units, Win (Reichert, J)

JAPANLIT 399. Dissertation Research—For doctoral students in Japanese working on dissertations.

1-12 units, Aut, Win, Spr, Sum (Staff)

JAPANLIT 400. Advanced Language Training—For students at the Yokohama Center. For more information, see the program description under the "Inter-University Center for Japanese Studies in Yokohama" section in this bulletin.

1-15 units, Aut, Win, Spr (Staff)

COGNATE COURSE

DLCL 189. Honors Thesis Seminar

5 units, Aut (Surwillo, L)

OVERSEAS STUDIES

Courses approved for the Asian Languages major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

ASTRONOMY COURSE PROGRAM

Emeriti: (Professors) Ronald N. Bracewell, Von R. Eshleman, Peter A. Sturrock, G. Leonard Tyler, Robert V. Wagoner

Committee in Charge: Vahé Petrosian *(Director),* Roger W. Romani, Sarah Church

Professors: Roger Blandford (Physics, SLAC), Blas Cabrera (Physics), Steven Kahn (Physics, SLAC), Peter Michelson (Physics, SLAC), Vahé Petrosian (Physics, Applied Physics), Roger W. Romani (Physics)

Associate Professors: Tom Abel (Physics, SLAC), Sarah Church (Physics)

Assistant Professors: Steve Allen (Physics, SLAC), Stefan Funk (Physics, SLAC), Chau-Lin Kuo (Physics, SLAC), Risa Wechsler (Physics, SLAC)

Professor (Research): Philip H. Scherrer (Physics)

Program Offices: Varian, Room 316

Mail Code: 94305-4060

Phone: (650) 723-1439

Web Site: http://www.stanford.edu/dept/astro/

Astronomy courses are offered primarily through the Physics Department with subject code PHYSICS. For a complete list of subject codes, see Appendix.

Although Stanford University does not have a degree program in astronomy or astrophysics, teaching and research in various branches of these disciplines are ongoing activities in the departments of Applied Physics, Electrical Engineering, and Physics. For the convenience of students interested in astronomy, astrophysics, and cosmology, a course program for undergraduate and graduate study is listed below.

The program provides introductory courses for the student who wishes to be informed about the fields of astronomy without the need for prerequisites beyond high school algebra and physics. Astronomy courses numbered below 100 are designed to serve this group of students.

Astronomy courses numbered 100-199 serve the student interested in an initial scientific study of astronomy. The courses numbered 200 and above are for graduate students and advanced undergraduates, subject to prior approval by the course instructor.

UNDERGRADUATE PROGRAMS

The University does not offer a separate undergraduate major in Astronomy. Students who intend to pursue graduate study in astronomy or space science are encouraged to major in physics, following the advanced sequence if possible, or in electrical engineering if the student has a strongly developed interest in radioscience. The course descriptions for these basic studies are listed under the appropriate department sections of this bulletin. Students desiring guidance in developing an astronomy-oriented course of study should contact the chair of the Astronomy Program Committee. The following courses are suitable for undergraduates and are recommended to students considering advanced study in astronomy or astrophysics: PHYSICS 100, Introduction to Observational and Laboratory Astronomy; PHYSICS 160, Introduction to Stellar and Galactic Astrophysics; PHYSICS 161, Introduction to Extragalactic Astrophysics and Cosmology; GES 222, Planetary Systems: Dynamics and Origins. Students planning study in astronomy beyond the B.S. are urged to take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and to consider an undergraduate thesis (PHYSICS 169) or honors thesis in an astrophysics related area. The above-mentioned courses are required for physics majors who choose the curriculum with a concentration in astrophysics (see the "Physics" section of this bulletin). The student observatory, located in the hills to the west of the campus and equipped with a 24-inch and other small reflecting telescopes, is used for instruction of the observation-oriented courses.

MINORS

The minor program in Astronomy is described in the "Physics" section of this bulletin. The non-technical minor, intended for students whose major does not require the PHYSICS 40 series, requires 10 units of Physics courses (PHYSICS 21, 23, 25/26) and 9-10 units of Astronomy courses (3-4 units of PHYSICS 50 or 100, and 6 units of PHYSICS 15, 16, 17). The technical minor for other students consists of 14 units of PHYSICS 70, 100, 160, 161, and EE 164, in addition to the 40 series.

To be accepted to the minor program, students need to obtain an adviser selected from the faculty in the Astronomy Course Program. The minor declaration deadline is three quarters before graduation (that is, beginning Autumn Quarter if the student is graduating at the end of Spring Quarter). All courses for the minor must be taken at Stanford University, and a letter grade of 'C' or better must be received for all units applied toward the minor.

GRADUATE PROGRAMS

Graduate programs in astronomy and astrophysics and related topics are carried out primarily in the Department of Physics but also the departments of Applied Physics and Electrical Engineering. Students should consult the course listings, degree requirements, and research programs of these departments for more detailed information. Graduate research opportunities are available in many areas of theoretical and observational astronomy, including research projects using the Hobby Eberly telescope, a 10-meter-class telescope located at McDonald Observatory in Texas. Other observational and experimental opportunities are in ground-based observations of CMB and in the future, space observations by GLAST. For further information on graduate research opportunities see the "Center for Space Science and Astrophysics" section of this bulletin and the Kavli Institute of Particle Astrophysics and Cosmology at http://kipac.stanford.edu.

Students planning to conduct research in astronomy and astrophysics are required to take PHYSICS 360, Physics of Astrophysics, and at least one of the following: PHYSICS 361, Stellar and Galactic Astrophysics, 362, Extragalactic Astrophysics and Cosmology, or 363, Solar and Solar-Terrestrial Physics. Students lacking a background in astrophysics, gravitation, and plasma physics should take PHYSICS 260 and 262, Introduction to Astrophysics and to Gravitation, and PHYSICS 312, Basic Plasma Physics. Students with special interests in gravitation should take PHYSICS 364, Advanced Gravitation.

Students interested in research programs in space physics involving spacecraft studies of the planets, their satellites, and their near-space environments should see the "Center for Space Science and Astrophysics" section of this bulletin.

COURSES

ELEMENTARY LECTURES

The following courses provide a descriptive knowledge of astronomical objects and astrophysics of the universe. PHYSICS 15, 16, and 17 are for students not majoring in the sciences and are taught in different quarters by different instructors, and may be taken individually or in any order.

PHYSICS 15. The Nature of the Universe
3 units, Aut (Romani, R), Sum (Staff)

PHYSICS 16. Cosmic Horizons
3 units, Win (Linde, A)

PHYSICS 17. Black Holes
3 units, Spr (Abel, T)

OBSERVATORY

The following courses are intended to familiarize students with observational methods and analysis of astronomical data. PHYSICS 100 involves more advanced observations and is intended for students with a college level background in physics.

PHYSICS 50. Astronomy Laboratory and Observational Astronomy
3 units, Aut (Church, S), Sum (Staff)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy
4 units, Spr (Church, S)

ADVANCED UNDERGRADUATE

The following courses are for students with a more advanced knowledge of basic physics and mathematics, and form the core courses for a concentration in astrophysics for Physics majors.

EE 106. Planetary Exploration
3 units, Spr (Fraser-Smith, A)

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
3 units, Win (Petrosian, V)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology
3 units, Spr (Michelson, P)

PHYSICS 169A,B,C. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem
1-9 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

GRADUATE

GES 222. Planetary Systems: Dynamics and Origins
3-4 units, Aut (Lissauer, J; Marley, M)

PHYSICS 260. Introduction to Astrophysics and Cosmology
3 units, Aut (Petrosian, V)

PHYSICS 262. Introduction to Gravitation
3 units, Win (Wagoner, R)

PHYSICS 301. Astrophysics Laboratory
3 units, alternate years, not given this year

PHYSICS 312. Basic Plasma Physics
3 units, alternate years, not given this year

PHYSICS 360. Physics of Astrophysics
3 units, Win (Romani, R)

PHYSICS 361. Stellar and Galactic Astrophysics
3 units, alternate years, not given this year

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
3 units, Spr (Wechsler, R)

PHYSICS 363. Solar and Solar-Terrestrial Physics
3 units, Win (Kosovichev, A)

PHYSICS 364. Advanced Gravitation
3 units, alternate years, not given this year

PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology
3 units, alternate years, not given this year

ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

Emeriti: (Professor) Wesley K. Ruff; *(Athletic Director)* Joseph H. Ruetz; *(Associate Director)* Robert C. Young; *(Assistant Director)* Shirley Schoof

Athletic Director: Bob Bowlsby

Deputy Athletic Director, Facilities, Operations, and Events: Ray Purpur

Senior Associate Athletic Director, Intercollegiate Services/Senior Woman Administrator: Beth Goode

Senior Associate Athletic Director, External Affairs: Chris Hutchins

Senior Associate Athletic Director, Intercollegiate Sports: Earl Koberlein

Senior Associate Athletic Director, Development: Jeff Shilling

Senior Associate Athletic Director, Program Services: Darrin Nelson

Associate Athletic Director, Development: Mike Izzi

Associate Athletic Director, Athletic Services: Scott Schuhmann

Associate Athletic Director, Physical Education, Recreation, and Wellness: Eric Stein

Senior Assistant Athletic Director, Media Relations: Gary Migdol

Assistant Athletic Director, Compliance Services: Megan Boone

Assistant Athletic Director, Facilities: Skip Braatz

Assistant Athletic Director, Student Services: Susan Burk

Assistant Athletic Director, Marketing, Tickets: Bob Carruesco

Assistant Athletic Director, Human Resources: Ron Coverson

Assistant Athletic Director, Physical Education, Club Sports, Intramurals, and Recreation: Sherry Posthumus

Assistant Athletic Director, Events and Operations: Carl Reed

Assistant Athletic Director, Capital Planning: David Schinski

Senior Lecturer: Anne Gould

Sport Directors: Al Acosta (Lightweight Crew, women), Craig Amerkhanian (Crew, men), John Dunning (Volleyball, women), Yasmin Farooq (Crew, women), Edrick Floreal (Track and Field, women), Lele Forood (Tennis, women), Thom Glielmi (Gymnastics, men), Jim Harbaugh (Football), Lesley Irvine (Field Hockey), Trent Johnson (Basketball, men), Jay Kehoe (Sailing), Skip Kenney (Swimming, men), John Kosty (Volleyball, men), Mark Marquess (Baseball), Lea Maurer (Swimming, women), Kerry McCoy (Wrestling), Lisa Milgram (Fencing), Caroline O'Connor (Golf, women), Heather Olson (Synchronized Swimming), George Pogosov (Fencing), Paul Ratcliffe (Soccer, women), Conrad Ray (Golf, men), John Rittman (Softball), Richard Schavone (Diving), Bret Simon (Soccer, men), Kristen Smyth (Gymnastics, women), Mark Talbott (Squash, women), John Tanner (Water Polo, women), Peter Tegen (Cross Country), Michele Uhlfelder (Lacrosse), Tara VanDerveer (Basketball, women), John Vargas (Water Polo, men), Robert Weir (Track and Field, men), John Whitlinger (Tennis, men)

Sport Assistant Coaches: Jessica Allister (Softball), Lance Anderson (Football), Jon Barnea (Water Polo, men), Alison Bartosik (Synchronized Swimming), Rob Becerra (Soccer, men), Jason Borrelli (Wrestling), Frankie Brennan (Tennis, women), Andy Buh (Football), Jay Cooney (Soccer, women), Denise Corlett (Volleyball, women), Chris Dalman (Football), Tim Drevno (Football), DJ Durkin (Football), Matt Ellis (Wrestling), Trisha Ford (Softball), Peter Giese (Crew, men), Donny Guerinoni (Basketball, Men), Bobbie Kelsey (Basketball, women), Ted Knapp (Swimming, men), Kris Mack (Track and Field), Jason Mansfield (Volleyball, women), Dave Nakama (Baseball), Valeriy Naulo (Fencing), Sarah Kate Noftsinger (Soccer, women), Doug Oliver (Basketball, men), Susan Ortwein (Water Polo, women), Jon Pascale (Soccer, men), Kate Paye (Basketball, women), Sam Puryear (Golf, men), J.D. Reive (Gymnastics, men), John Rembao (Track and Field), Nick Robinson (Basketball, men), Scott Shafer (Football), David Shaw (Football), Ken Shibuya (Volleyball, men), Jordan Steele (Field Hockey), Dean Stotz (Baseball), Chris Swircek (Gymnastics, women), Willie Taggart (Football), Amy Tucker (Basketball, women), David Vidal (Cross Country/Track and Field), Shane Whildin (Swimming, women), Clayton White (Football), Nicole Younts (Lightweight Crew, women)

Department Offices: Arrillaga Family Sports Center

Mail Code: 94305-6150

Phone: (650) 723-4591

Web Site: http://suwellness.stanford.edu

Courses in Athletics, Physical Education, and Recreation have the subject code ATHLETIC. For a complete list of subject codes, see Appendix.

From the founding of the University, Stanford's leaders have believed physical activity is valuable for its own sake and complementary to the educational purpose of the University. The mission of the Department of Athletics, Physical Education, and Recreation is to offer the widest possible range of quality programs for athletic participation and physical fitness at all levels of skill and interest. Within the limitations of its resources, the department provides a broad range of instructional, recreational, and intramural competitive programs for all who wish to participate. The intrinsic value to the participant is the primary criterion by which the worth of the programs should be judged.

The goals of the department's programs are to promote understanding of the value and role of physical activity as an important dimension of the human condition, to develop performance skills in sport, to develop the habit of participation, and to provide leadership opportunities in aquatics, sports, and other physical activities. To this end, the program encompasses a diversity of learning and participating opportunities from informal recreation through organized intramural competition, basic instructional classes, and theoretical study to, and including, intercollegiate athletic competition.

PROGRAMS

No degrees are offered in Physical Education.

INTERCOLLEGIATE ATHLETICS

In keeping with American university tradition, Stanford offers a broad intercollegiate athletic program. The objectives are to provide the opportunity to compete at the highest possible level without jeopardizing the integrity of the individual or the institution; to adhere strictly to all University, association, and conference rules governing athletic participation; and to encourage effectively the achievement of academic goals by student athletes at the same rate as other University students. As a member of the National Collegiate Athletic Association (NCAA), Stanford fields both men's and women's varsity teams. Those for men are baseball, basketball, crew, cross country, fencing, football, golf, gymnastics, sailing, soccer, swimming and diving, tennis, track and field, volleyball, water polo, and wrestling. Those for women are basketball, crew, cross country, fencing, field hockey, golf, gymnastics, lacrosse, sailing, soccer, softball, squash, swimming and diving, synchronized swimming, tennis, track and field, volleyball, and water polo.

Both men's and women's teams are affiliated with the Pacific Ten Conference, one of the premier athletic conferences in the nation. Additional or alternative intercollegiate athletic competition is available for all teams.

CLUB SPORTS

The Stanford Club Sports program provides competition in sports not included in the intercollegiate varsity program and instruction in classes or activities not included in the Physical Education program. It also develops student leadership in organizing, administering, and funding activities. The club program is actively supervised by the Coordinator of Club Sports, but the emphasis is on student interest and leadership to initiate, organize, and conduct the respective clubs. Those students in clubs that meet the criteria for inclusion in the formal curriculum may apply for units of credit.

INTRAMURAL SPORTS (IM)

Students interested in participating in intramural sports should visit the intramural web site: http://www.stanford.edu/group/intramurals/ for more information. They may visit the IM Office in Ford/Burnham. The program includes formal competition in fifteen team and individual sports using both league and single elimination tournament play structure. Individuals are encouraged to check the web site at the beginning of each quarter to obtain registration and league information. Registration occurs on the second Monday and Tuesday of each quarter, with mandatory captain meetings held that Thursday evening. Intramural leagues are offered in Autumn, Winter, Spring, and Summer quarters.

RECREATION

The department provides facility use for faculty, staff, and students (and, for some activities, their immediate families) to participate in aquatics, conditioning, and sports for general recreation. Specific recreation hours for all the facilities are posted throughout the year at the respective facilities and at http://suwellness.stanford.edu.

The golf course and driving range are available for faculty, staff, and student use on a fee basis; information is available from the Golf Pro Shop.

Recreational classes are offered in areas such as rock climbing, indoor cycling, and golf.

FACILITIES

Athletic facilities are located throughout the campus. On the west side of campus are the Golf Course, the Golf Driving Range, the Red Barn Stables, Roble Field and Pool, the Sand Hill Intramural Fields, and the West Campus Tennis Courts. Centrally located is the Tresidder Fitness Center. On the east side of campus are the Arrillaga Center for Sports and Recreation, the Arrillaga Family Sports Center, Avery Aquatic Center, Burnham Pavilion, Cobb Track and Angell Field, the Ford Center for Sports and Recreation, the Manzanita Basketball Court and Field, Maples Pavilion, Taube South Tennis Courts, and Taube Tennis Stadium.

Off-campus facilities include the Morrison Boathouse, a sailing and rowing facility.

CURRICULUM AND SERVICES

The diverse instructional program strives to accommodate the sports interests of all undergraduate and graduate students. Only intercollegiate varsity men's and women's teams are limited to undergraduates. Skill groupings and limited class sizes enable the beginning student or the advanced performer to achieve success within the limits of individual motivation and potential. Skill level in, and knowledge about, a specific activity as well as available space are the only limitations to enrollment. Physically disabled students are encouraged to contact Eric Stein (elstein@stanford.edu) for enrollment advice.

Academic Credit—Activity classes carry 1 unit of credit for satisfactory completion of work. Although there is no limitation on the number of activity classes in which a student may enroll, no more than 8 units of these activity classes (and/or other University activity classes) may be applied toward undergraduate graduation requirements (see the "Undergraduate Degrees" section of this bulletin).

Auditing—No auditing is allowed in activity classes. Faculty and staff may take an activity class as space is available with instructor consent after student enrollment is completed.

Class Fees—Fees are charged for enrollment in all physical education classes and club sports.

Class fees are payable only by check or money order payable to Stanford University. Cash is not acceptable. Fees are payable at the first, and are required by the second, class meeting for a student to remain in class. Late enrollees must submit fees no later than the second time they attend the class.

Full refund is given to students who drop a class during the first two weeks of classes and request a refund at that time. No refund is given if a student either neglects to request a refund under the conditions listed previously or drops the class after the second week.

Class Sign-ups—Information on sign-up procedures can be found on http://suwellness.stanford.edu or under Athletics in the *Time Schedule*. Students must attend the first class meeting. If accepted into the class, they can register for that class through Axess.

Deadline for Adding a Class—Students who have never appeared in a class may not enroll in that class after the fourth class meeting has passed. Students may add the class after the fourth meeting if they have been in attendance and, for whatever reason, did not get registered until the beginning of the fourth week (the University deadline for adding courses).

Equipment—Information on equipment and recommended class attire is available from the department or instructor.

Lockers—Lockers are available for rent to faculty/staff and students at the Arrillaga Family Sports Center and Roble Gym. The fee for faculty/staff is $20 per quarter or $50 per year. The fee for students is $15 per quarter or $35 per year.

COURSES

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum). See http://www.stanford.edu/dept/pe for further information on courses and sign-up procedures.

PHYSICAL EDUCATION AND SPORTS THEORY

ATHLETIC 73. Mind, Body, Spirit—Spiritual features of everyday life primarily from a psychological perspective with a focus on health. Topics include cultivating gratitude, forgiveness, life purpose, and kindness; mind/body/spirit solutions to everday problems. Meditation and other stress management practices.

2 units, Aut, Win, Spr (Luskin, F)

ATHLETIC 75. Introduction to Nutrition—Optimize nutrition for health and performance. Macronutrients, fad diets, sugar addiction, low-calorie sweeteners, caloric restriction, disease prevention, and nutrition.

1-2 units, Aut, Spr, Sum (Wilson, C)

ATHLETIC 123. Sports Nutrition with Clinical Applications—Principles governing fluid and energy balance under conditions of exercise stress and recovery; how these principles correlate to health and disease. Prerequisites: 74. HUMBIO 120, 155; or consent of instructor.

1-3 units, Spr (Wilson, C)

ATHLETIC 190. Analysis of Human Movement—Overview of skeletal and muscular anatomy. The mechanical principles of movement as related to efficient performance in aquatics, dance, and sports.

2-4 units, Win (Wilson, C)

LEADERSHIP OPPORTUNITIES IN PHYSICAL EDUCATION

ATHLETIC 85. Manager: Athletic Team—For student managers of intercollegiate teams. Prerequisite: consent of respective varsity team head coach. (AU)

1 unit, Aut, Win, Spr (Staff)

ATHLETIC 87. Outdoor Leadership—Skills needed to lead basic multi-day backpacking trips. Classroom sessions and wilderness trips. Topics include group dynamics and leadership, technical skills, and wilderness first aid. Class may require work over several quarters. See http://www.stanford.edu/group/spot/training/.

1 unit, Aut, Win, Spr (Staff)

AQUATIC ACTIVITY

ATHLETIC 83. Lifeguard Training—Priority to those wanting to guard at Stanford during the year. Lifeguard characteristics and responsibilities, recognition of hazards and emergencies, patron and facility surveillance, interaction with the public, rescue skills. Community first aid and CPR for the professional rescuer. Fee. Prerequisite: pass swim test (swimmer/advanced swimmer level).

2 units, Spr (Provoznik, P)

ATHLETIC 99. Sailing, Beginning: Keelboat—Basic skills, theory, and techniques enable beginners to sail a 24'-30' fixed keelboat with confidence. Emphasis is on safety and seamanship skills. Fee. (AU)
1 unit, Spr (Gross-Kehoe, A)

ATHLETIC 100. Sailing, Beginning: Dinghy—Skills, theory, and techniques to enable beginners to sail with confidence in small centerboard boats. Fee. (AU)
1 unit, Aut, Spr (Gross-Kehoe, A)

ATHLETIC 101. Sailing, Intermediate: Dinghy—Refine skills. Introduction to racing. Prerequisite: consent of instructor. Fee. (AU)
1 unit, Aut, Spr (Gross-Kehoe, A)

ATHLETIC 103. Sailing: Beginning Dinghy Racing—Racing rules, strategy, tactics, and more advanced boat handling. Enrollment limited to 14. Fee. (AU)
1 unit, Spr (Kehoe, J)

ATHLETIC 104. Sailing: Assistant Instructor (Beginning Level)
2 units, Aut, Spr (Gross-Kehoe, A)

ATHLETIC 105. Sailing: Assistant Instructor (Intermediate/Advanced Level)
2 units, Aut, Spr (Gross-Kehoe, A)

ATHLETIC 131. Swimming: Beginning—For non-swimmers or those who can swim about 10 yards but are not comfortable in deep water. Safety skills, front crawl, and back stroke. Additional strokes introduced as ability warrants. Fee. (AU)
1 unit, Aut, Sum (Neuhold-Huber, Z), Spr (Vargas, J)

ATHLETIC 132. Swimming: Advanced Beginning—For those with limited swimming and safety skills. Safety skills, crawl, and elementary backstroke or back crawl. Introduction to sidestroke and breaststroke. Increase time and distance of swim. Prerequisite: ability to swim 25-50 yards on front and back. Fee. (AU)
1 unit, Aut (Whildin, S), Win, Spr, Sum (Neuhold-Huber, Z)

ATHLETIC 133. Swimming: Intermediate—Crawl, elementary backstroke, backstroke, and sidestroke. Safety skill work as needed. Introduction to or review of breaststroke. Open turns. Introduction to butterfly, flip turn, and conditioning. Prerequisites: crawl, elementary backstroke, backstroke; some sidestroke and breaststroke; ability to swim approximately 100-200 yards continuously by mixing strokes. Fee. (AU)
1 unit, Aut, Win (Neuhold-Huber, Z), Spr (Whildin, S), Sum (Neuhold-Huber, Z)

ATHLETIC 134. Swimming: Advanced—Review and refine all basic strokes and safety skills. Introduction to or review of butterfly and flip turn. Stroke drills and information on conditioning and designing individual workouts. Prerequisite: average to good strokes; ability to swim approximately 400-500 yards continuously. Fee. (AU)
1 unit, Aut (Tanner, J), Spr (Maurer, L)

ATHLETIC 135. Swim Conditioning—Improve cardio-respiratory endurance through directed swimming workouts. Technique corrections as needed. Prerequisite: advanced swimmer. Fee. (AU)
1 unit, Aut (Kenney, A), Win (Vargas, J), Spr (Knapp, T)

ATHLETIC 136. Synchronized Swimming, Beginning—Basic skills and techniques. Prerequisite: intermediate to advanced swimming skills. Fee. (AU)
1 unit, Aut (Olson, H)

ATHLETIC 168. Water Polo: Beginning—Introduction to basic skills and game play. For those who have never played or have had limited experience. Fee. (AU)
1 unit, Spr (Barnea, J)

ATHLETIC 169. Water Polo: Intermediate/Advanced—Further work on skills. Game strategies. Fee. (AU)
1 unit, Aut (Ortwein, S), Spr (Barnea, J)

FITNESS, INDIVIDUAL, AND TEAM SPORT ACTIVITIES

ATHLETIC 2. Abs and Glutes—Lower body workout to strengthen glutes and thighs, and abdominal training. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 6. Badminton, Beginning/Intermediate—Skills, knowledge, and etiquette including fundamentals such as serving, forehand and backhand shots, drops, and smashes. Score keeping. Strategies for play in singles and doubles. Fee. (AU)
1 unit, Win (Mack, K)

ATHLETIC 7. Band, Sports Activity—(AU)
1 unit, Aut, Win, Spr (Aquilanti, G)

ATHLETIC 14. Body Blast and Sculpt—Full body workout including weights, bands, steps, and body bars. Fee. (AU)
1 unit, Aut, Win, Spr (Mandell, M)

ATHLETIC 17. Core Training—Exercises to build muscular strength and body core endurance, focusing on balance and stability. Equipment includes stability and medicine balls. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 37. Fencing: Beginning—The sport of swordmanship develops quick hands, strong legs, and a strategic mind. Footwork, handwork, and bouting. Emphasis is on foil technique. All equipment provided. Fee. (AU)
1 unit, Aut, Win, Spr (Naulo, V)

ATHLETIC 38. Fencing, Advanced Beginning—Continuation of 37; learn advanced footwork and handwork. Strategy and bouting. Introduction to epee and saber. All equipment provided. Prerequisite: 37. Fee. (AU)
1 unit, Aut, Win, Spr (Naulo, V)

ATHLETIC 43. Fitness for Life—For students who want to improve their overall fitness level. Workouts include brief periods of high intensity exercise interspersed with lower intensity exercise or rest. Short duration agility runs, weight lifting, and cardiovascular improvement. Emphasis is on proper stretching techniques, warm-ups, cool-downs, and monitoring heart rate. Fee. (AU)
1 unit, Win, Spr (Irvine, L)

ATHLETIC 44. Field Hockey, Intermediate—For those with prior experience. Techniques, skills, and strategy. Scrimmages and game-like scenarios. Fee. (AU)
1 unit, Win (Irvine, L)

ATHLETIC 47. Flexibility Training—Increase functional performance and range of motion while decreasing risk of injury with flexibility training techniques for the entire body. Fee. (AU)
1 unit, Aut, Win, Spr (Gittens, D)

ATHLETIC 52. Golf: Beginning—Fundamentals of the golf swing; putting, chipping, and sand play. Golf etiquette and rules. Fee. (AU)
1 unit, Aut Win, Spr, Sum (Staff)

ATHLETIC 53. Golf: Advanced Beginning—Further development of the golf swing and short game. How to practice. Rules and etiquette. Prerequisite: 52 or golf experience. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 54. Golf: Intermediate—Drills and practice on all facets of golf. How to lower scores and manage the game on the course. Prerequisite: 53 or equivalent. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 55. Golf: Advanced—Understand and refine the golf swing and increase power, distance, and accuracy. Course management, mental preparation, visualization techniques. Prerequisites: 54 or experience playing and practicing, and the ability to hit shots with relative accuracy and distance. Fee. (AU)
1 unit, Aut, Win, Spr (Staff)

ATHLETIC 59. Gymnastics: Beginning—Fundamental gymnastics movement for men and women, including flexibility and strength exercises taught on the Olympic apparatus including floor, balance beam, bars, and rings. Fee. (AU)
1 unit, Aut (Swircek, C), Win (Lorenzen, M), Spr (Swircek, C)

ATHLETIC 60. Gymnastics: Intermediate—For students who have completed 59 or have a background in gymnastics. Emphasis is on tumbling and somersaulting. Group work and individualized instruction for men and women. Limited apparatus work. Fee. (AU)
1 unit, Aut, Win, Spr (Staff)

ATHLETIC 64. Hip Hop—Funky, jazzy, hip hop dance for fun and cardiovascular fitness. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 65. Horsemanship: Beginning Riding—No experience needed. Basic horsemanship and riding at the walk, trot and canter. Fee. (AU)
1 unit, Aut, Win, Spr (Bartsch, V)

ATHLETIC 66. Horsemanship: Advanced Beginning Riding—Horsemanship and horse care; the canter and basic jumping. Prerequisite: 65 or equivalent. Fee. (AU)
1 unit, Aut, Win, Spr (Bartsch, V)

ATHLETIC 67. Horsemanship: Intermediate Riding and Jumping—Basic veterinary skills and barn management. Riding at all gaits and jumping basic course up to two feet. Prerequisite: 66 or equivalent. Fee. (AU)
1 unit, Aut, Win, Spr (Bartsch, V)

ATHLETIC 68. Horsemanship: Student Assistant
1 unit, Aut, Win, Spr (Bartsch, V)

ATHLETIC 78. Kickboxing—High intensity cardio workout incorporating kicks, punches, and elbow/knee and other combinations inspired by martial arts and boxing. Fee. (AU)
1 unit, Aut, Win, Spr (Duarte, B; Mandell, M), Sum (Mandell, M)

ATHLETIC 82. Lungs and Legs of Steel: Road Race and Marathon Training—Endurance training for road races and marathons. Dynamic warm-up, drills, interval training, hill training, functional strength training for runners, recover and recovery methods, core strength, nutrition and hydration, and static stretching routines to improve running performance. (AU)
1 unit, Win (Rembao, J)

ATHLETIC 86. Introduction to Martial Arts—Techniques, training methods, history, and culture of Asian martial arts. Three styles per quarter. Warm-ups, fundamental techniques, basic application, and conditioning.
1 unit, Aut, Win, Spr (Ghormley, T)

ATHLETIC 84. Lifestyle Fitness Challenge—Exploration and improvement of overall health. Wellness, physical fitness, nutrition, cardio endurance, muscular strength and endurance, flexibility, and stress management. Introductions to weight and cardio equipment, outdoor workouts, spinning, strength and tone workouts, and yoga. Before and after fitness assessment.
2 units, Aut, Win, Spr (Spanier, J)

ATHLETIC 88. Introduction to Personal Training—Two-part American Council on Exercise university personal training exam preparatory course. Foundational knowledge in health and fitness including human anatomy and exercise science. See http://suwellness.stanford.edu/fitness/certification_opportunities.html.
1-2 units, Aut, Win, Spr (Young, P.)

ATHLETIC 90. Pilates Mat—Balanced sequence of exercises emphasizing grace and balance. Breath work and precision separate Pilates from traditional conditioning methods. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Conniff, N)

ATHLETIC 92. Rock Body Bootcamp—High intensity intervals of cardiovascular and strength training to promote lean muscle and increased metabolism. Fee. (AU)
1 unit, Win, Spr (Staff)

ATHLETIC 95. Touch Rugby—Physical, technical, and tactical abilities relating to invasion games such as touch rugby. Fee.
1 unit, Spr (Staff)

ATHLETIC 112. Social Dance, Beginning—Introduction to the fundamentals of partner dancing. Learn basic steps, styling, and rhythms in several popular social dances such as Tango, Salsa, Waltz, Cha-Cha, and Foxtrot. No experience or partner necessary. Fee.
1 unit, Aut, Win, Spr (Kao, J.)

ATHLETIC 114. Soccer: Intermediate/Advanced—For the player with club or high school experience. Small group offensive and defensive tactics. Drills and small-sided games. Fee.
1 unit, Aut (Pascale, J; Noftsinger, S), Spr (Becerra II, R; Cooney Jr., J)

ATHLETIC 115. Soccer: Advanced for Men—Techniques under pressure; small group and team tactics. Fitness for the soccer player. Prerequisites: consent of instructor, tryouts. Fee. (AU)
1 unit, Win (Simon, B)

ATHLETIC 116. Soccer: Intermediate/Advanced for Women—Techniques under pressure; small group and team tactics. Fitness for the soccer player. Prerequisites: consent of instructor, tryouts. Fee. (AU)
1 unit, Win (Ratcliffe, P)

ATHLETIC 117. Soccer: Indoor, Beginning/Intermediate—For those with little or no playing experience. Skills, rules, small sided games. Fee. (AU)
1 unit, Win (Cooney Jr., J; Becerra II, R)

ATHLETIC 118. Soccer, Indoor: Intermediate/Advanced—Smaller ball and playing area. Emphasis is on individual ball skills through small sided games. Fee. (AU)
1 unit, Win (Pascale, J; Noftsinger, S)

ATHLETIC 124. Beginning Squash—Rules and practice matches. Racquets, balls, and eye guards provided. Limited enrollment. Fee.
1 unit, Aut, Win, Spr (Talbott, M)

ATHLETIC 125. Squash: Intermediate/Advanced—Continuation of 124. Fee. May be repeated for credit. (AU)
1 unit, Aut, Win, Spr (Talbott, M)

ATHLETIC 129. Step and Sculpt—Nonstop synergistic blend of cardiovascular and weight bearing exercises. Hand weights and tubes for strength. Equipment provided. Fee. (AU)
1 unit, Aut, Win, Spr (Gittens, D)

ATHLETIC 130. Synergy—Fusion of martial arts and yoga using linear and spherical movement. Modern approach to ancient practices to increase functional strength, range of motion, and clarity of mind. Fee. (AU)
1 unit, Aut, Win, Spr (McCracken, S)

ATHLETIC 150. Total Body Workout—For all fitness levels; tone and strengthen the entire body. Different equipment used to target all major muscle groups. Fee. (AU)
1 unit, Aut, Win, Spr (Sanders, B)

ATHLETIC 141. Tennis: Beginning—Forehand, backhand, serve, and net play; rules and scoring. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 142. Tennis: Low Intermediate—Fundamental strokes and their use in a game situation. Prerequisites: 141, or knowledge of rules and scoring and average ability in fundamental strokes but limited playing experience. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 143. Tennis: Intermediate—Fundamental stroke review. Singles and doubles tactics. Prerequisites:142 or average ability in fundamental strokes, and regular playing experience; NTRP rating of 3.0 or equivalent. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 144. Tennis: Advanced—Drills emphasize footwork, serve and return, approach shots, volleys, lobs, and overheads. Strategy for competition in singles and doubles. Prerequisites: above average stroking and game playing ability; NTRP rating above 4.0 or equivalent. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 146. Tennis: Analysis—Use of computer for analyzing tennis matches. Assist players and coaches by collecting data on player performance. Prerequisite: consent of instructor. Recommended: excellent knowledge of tennis, background in computers and statistics. (AU)
2 units, Aut, Win, Spr (Forood, L)

ATHLETIC 159. Volleyball: Introduction to Sand—Fundamental skills and rules. Strategy in two- and four-person sand volleyball. Fee. (AU)
1 unit, Aut (Shibuya, K)

ATHLETIC 160. Volleyball: Intermediate Sand—Further development of skills and rules. Strategy in two- and four-person sand volleyball. Fee. (AU)
1 unit, Aut, Spr (Shibuya, K)

ATHLETIC 161. Volleyball: Advanced Sand—Refine and improve skills and game playing strategy in two- and four-person sand volleyball. Must have strong skills and general knowledge of team concepts. Prerequisiste: 160 or consent of the instructor. Fee. (AU)
1 unit, Aut (Kosty, J), Spr (Shibuya, K)

ATHLETIC 163. Volleyball—Drills to improve skills and game playing strategy. As ability indicates, more emphasis on team play and strategy. Fee. (AU)
1 unit, Aut (Corlett, D)

ATHLETIC 174. Weight Training: Beginning—Improving fitness level through progressive resistance exercises using machines and free weights. Individualized weight training programs once basic exercises are learned. Stretching program. Basics of exercise physiology. Fee. (AU)
1 unit, Aut (Weir, R), Spr (Staff)

ATHLETIC 175. Weight Training: Intermediate—Review of exercises and techniques. Emphasis is on individualized programs and learning the use of all available machines and free weights. Exercise physiology. Prerequisite: 174 or equivalent. Fee. (AU)
1 unit, Aut (Staff)

ATHLETIC 176. Weight Training for Women—All levels welcome, but designed for the beginner. Techniques and equipment for weight training. Emphasis is on stretching, proper form and progressions, and injury prevention. The basics of the physiology of strength training and planning individual programs. Fee. (AU)
1 unit, Aut, Win (Allister, J)

ATHLETIC 177. Circuit Aerobic Weight Training—A full-body conditioning workout with weight lifting and aerobic components. Weight training equipment organized into a circuit to maximize workout intensity in a short amount of time. Fee. (AU)
1 unit, Aut, Spr (Nelson, D)

ATHLETIC 179. Wrestling: Beginning/Intermediate—Intercollegiate wrestling. Conditioning, cultivating the spirit of one-on-one competition. Basic skills and high-level sequences of upper- and lower-body technique. Fee. (AU)
1 unit, Spr (Staff)

ATHLETIC 186. Yoga—Mind, body, and spirit meet in yoga. Increase flexibility and restore health to the body. Fee. (AU)
1 unit, Aut, Win, Spr, Sum (Staff)

ATHLETIC 188. Yoga/Pilates Fusion—Combination of power and restorative yoga with strength building Pilates exercises. Fee.
1 unit, Aut, Win, Spr, Sum (Conniff, N; Merlo, A)

INTERCOLLEGIATE ATHLETIC TEAMS

ATHLETIC 9V. Baseball, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Marquess, M; Stotz, D)

ATHLETIC 11V. Basketball, Varsity Men—(AU)
1-2 units, Aut, Win (Johnson, T)

ATHLETIC 12V. Basketball, Varsity Women—(AU)
1-2 units, Aut, Win (VanDerveer, T)

ATHLETIC 19V. Crew, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Amerkhanian, C)

ATHLETIC 20V. Crew, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Farooq, Y)

ATHLETIC 22V. Cross Country, Varsity Men—(AU)
1-2 units, Aut (Tegen, P)

ATHLETIC 23V. Cross Country, Varsity Women—(AU)
1-2 units, Aut (Tegen, P)

ATHLETIC 31V. Diving, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Schavone, R)

ATHLETIC 32V. Diving, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Schavone, R)

ATHLETIC 41V. Fencing, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Posthumus, E)

ATHLETIC 42V. Fencing, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Posthumus, E)

ATHLETIC 45V. Field Hockey, Varsity Women—(AU)
1-2 units, Aut, Spr (Irvine, L)

ATHLETIC 48V. Football, Varsity—(AU)
1-2 units, Aut, Spr (Harbaugh, J)

ATHLETIC 57V. Golf, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Ray, C)

ATHLETIC 58V. Golf, Varsity Women—AU
1-2 units, Aut, Win, Spr (O'Connor, C)

ATHLETIC 61V. Gymnastics, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Glielmi, T)

ATHLETIC 62V. Gymnastics, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Smyth, K)

ATHLETIC 81V. Lacrosse, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Uhlfelder, M)

ATHLETIC 107V. Sailing, Varsity Men—(AU))
1-2 units, Aut, Win, Spr (Kehoe, J)

ATHLETIC 108V. Sailing, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Kehoe, J)

ATHLETIC 119V. Soccer, Varsity Men—(AU)
1-2 units, Aut, Spr (Simon, B)

ATHLETIC 120V. Soccer, Varsity Women—(AU)
1-2 units, Aut, Spr (Ratcliffe, P)

ATHLETIC 122V. Softball, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Rittman, J)

ATHLETIC 127V. Squash, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Talbott, M)

ATHLETIC 137V. Swimming, Synchronized: Varsity—(AU)
1-2 units, Aut, Win, Spr (Olson, H)

ATHLETIC 138V. Swimming, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Kenney, A)

ATHLETIC 139V. Swimming, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Maurer, L)

ATHLETIC 148V. Tennis, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Whitlinger, J)

ATHLETIC 149V. Tennis, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Forood, L)

ATHLETIC 153V. Track and Field, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Weir, R)

ATHLETIC 154V. Track and Field, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Floreal, E)

ATHLETIC 165V. Volleyball, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Kosty, J)

ATHLETIC 166V. Volleyball, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Dunning, J)

ATHLETIC 171V. Water Polo, Varsity Men—(AU)
1-2 units, Aut, Win, Spr (Vargas, J)

ATHLETIC 172V. Water Polo, Varsity Women—(AU)
1-2 units, Aut, Win, Spr (Tanner, J; Ortwein, S)

ATHLETIC 182V. Wrestling, Varsity—(AU)
1-2 units, Aut, Win, Spr (McCoy, K)

CLUB SPORTS

The Stanford Club Sports Program is affiliated with the department but is initiated, organized, and conducted by students. All clubs are coeducational except as specified. Clubs whose instructional classes meet the criteria for academic credit are scheduled for meeting times as published each quarter in the *Time Schedule*. For additional information, contact the Club Sports Coordinator.

ATHLETIC 4C. Archery Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 5C. Badminton Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 15C. Canoe and Kayak Club—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 28C. Cycling Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 34C. Equestrian Club Team—(AU)
1 unit, Aut, Win, Spr (Bartsch, V)

ATHLETIC 69C. Horse Polo Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 71C. Ice Hockey Club Team—Men (AU)
1 unit, Aut, Win (Gross-Kehoe, A)

ATHLETIC 76C. Judo Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 79C. Lacrosse Club Team (Men)—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 93C. Rugby Club Team (Men)—(AU)
1 unit, Aut, Win, Spr (Griffin, P)

ATHLETIC 94C. Rugby Club Team (Women)—(AU)
1 unit, Aut, Win, Spr (Griffin, P)

ATHLETIC 98C. Running Club—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 110C. Ski Club Team—(AU)
1 unit, Win (Gross-Kehoe, A)

ATHLETIC 126C. Squash Club Team (Men)—(AU)
1 unit, Aut, Win, Spr (Talbott, M)

ATHLETIC 140C. Tae Kwon Do Club—(AU)
1 unit, Aut, Win, Spr (Ghormley, T)

ATHLETIC 151C. Triathlon Club Team—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 156C. Ultimate Frisbee Club Team (Men)—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

ATHLETIC 157C. Ultimate Frisbee Club Team (Women)—(AU)
1 unit, Aut, Win, Spr (Gross-Kehoe, A)

BIOLOGICAL SCIENCES

Emeriti: (Professors) Winslow R. Briggs, Donald Kennedy, Peter Ray, Robert Schimke, Norman K. Wessells, Dow O. Woodward, Charles Yanofsky;* *(Professor, Research)* R. Paul Levine*
Chair: Robert D. Simoni
Professors: Bruce S. Baker, Barbara A. Block, Steven M. Block, Allan M. Campbell, Martha S. Cyert, Gretchen Daily, Mark W. Denny, Rodolfo Dirzo, Paul R. Ehrlich, David Epel, Marcus W. Feldman, Russell Fernald, Christopher B. Field, William F. Gilly, Deborah M. Gordon, Philip C. Hanawalt, H. Craig Heller, Patricia P. Jones, Richard G. Klein, Ron R. Kopito, Sharon R. Long, Liqun Luo, Susan K. McConnell, Harold A. Mooney, W. James Nelson, Stephen R. Palumbi, Joan Roughgarden, Robert M. Sapolsky, Stephen H. Schneider, Carla J. Shatz, Michael A. Simon, Robert D. Simoni, George N. Somero, Chris R. Somerville, Stuart H. Thompson, Shripad Tuljapurkar, Peter Vitousek, Virginia Walbot, Ward B. Watt
Professor (Teaching): Carol L. Boggs
Associate Professors: Judith Frydman, Elizabeth A. Hadly, Dmitri Petrov, Tim Stearns
Assistant Professors: Dominique Bergmann, William F. Burkholder, Guowei Fang, Or Gozani, Fiorenza Micheli, Mary Beth Mudgett, Mark J. Schnitzer, Kang Shen
Assistant Professor (Research): Anthony De Tomaso
Courtesy Professors: Joseph Berry, Wolf Frommer, Arthur R. Grossman, Terry Root, Shauna Somerville, Irving Weissman, Wing Wong
Courtesy Associate Professors: Kathryn Barton, Alfred M. Spormann
Courtesy Assistant Professor: Zhiyong Wang
Lecturers: Waheeda Khalfan, Shyamala D. Malladi, Timothy J. Meier, James Watanabe
Consulting Professors: Terrence Gosliner, Nina Jablonski, J. Patrick Kociolek, Cathy Laurie, Catherine Squires, Marc Tessier-Lavigne
Librarian: Michael Newman

---

* Recalled to active duty.

Department Offices: Gilbert, Room 109
Mail Code: 94305-5020
Phone: (650) 723-1826
Web Site: http://www.stanford.edu/dept/biology

Courses given in Biological Sciences have the subject code BIOSCI. For a complete list of subject codes, see Appendix.

The department provides: (1) a major program leading to the B.S. degree; (2) a minor program; (3) a coterminal program leading to the M.S. degree; (4) a terminal program leading to the M.S. degree; (5) a doctoral program leading to the Ph.D. degree; and (6) courses designed for the non-major. An undergraduate major in Biological Sciences serves as preparation for professional careers, including medicine, dentistry, veterinary sciences, teaching, consulting, research, and field studies. Additionally, the major provides a valuable focus of a liberal arts education for those not planning careers in science-related fields. For graduate-level students, the department offers resources and experience learning from and working with world-renowned faculty involved in research on ecology, neurobiology, population biology, plant and animal physiology, biochemistry, immunology, cell and developmental biology, genetics, and molecular biology.

The facilities and personnel of the Department of Biological Sciences are housed in the Gilbert Biological Sciences Building, Herrin Laboratories, Herrin Hall, the Jasper Ridge Biological Preserve, the James H. Clark Center, and the Lorry I. Lokey Laboratory Building on the main campus, and at the Hopkins Marine Station in Pacific Grove on Monterey Bay.

Jasper Ridge Biological Preserve (JRBP) is located near Stanford University's campus in the eastern foothills of the Santa Cruz Mountains. The preserve encompasses geologic, topographic, and biotic diversity within its 1,189 acres and provides a natural laboratory for researchers from around the world, educational experiences for students and docent-led visitors, and refuge for native plants and animals. See http://jrbp.stanford.edu.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. For more information, including courses taught at Hopkins Marine Station with the subject code BIOHOPK, see the "Division of Marine Biology Hopkins Marine Station" section of this bulletin, immediately following this section.

The department's large collections of plants (Dudley Herbarium), fish, reptiles, and amphibians, as well as smaller collections of birds, mammals, and invertebrates, are housed at the California Academy of Sciences in San Francisco, where they, and extensive collections of the academy, are available to those interested in the systematics of these groups. Entomological collections, restricted to those being used in particular research projects, are housed in the Herrin Laboratories. No general collections are maintained except for teaching purposes.

The Falconer Biology Library in Herrin Hall (http://library.stanford.edu/depts/falconer/) contains over 1,200 current subscriptions and an extensive collection of monographs and reference works. A specialized library is maintained at the Hopkins Marine Station.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

ADVISING

Members of the Biological Sciences faculty are available for advising on such academic matters as choice of courses and career plans. The student services office maintains a current list of faculty advisers, advising schedules, and research interests.

The student services office staff and BioBridge, the department's peer advising group, are prepared to answer questions on administrative matters, such as requirements for the major, approved out-of-department electives, transfer course evaluations, and petition procedures. This office also distributes the department's *Bachelor of Science Handbook,* which delineates policies and requirements, as well as other department forms and information handouts.

Each undergraduate interested in the Biological Sciences major is required to select a department adviser as part of the major declaration process. Students who plan to attend medical or graduate school, enroll in the honors or coterminal programs, take courses at Hopkins Marine Station, or attend one of the overseas campuses will find their faculty adviser particularly helpful.

REQUIREMENTS

Candidates for the B.S. degree must complete:

Core Courses and Electives—

Courses	*Units*
BIOSCI 41*	5
BIOSCI 42*	5
BIOSCI or BIOHOPK 43*	5
BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y (may be replaced by 4 units of BIOHOPK 175H or 176H)	4
Total	23
Electives	24

* Letter grade only.

Required Foundational Breadth Courses—Students may take up to two foundational breadth courses credit/no credit (CR/NC).

1. Introductory, organic, and physical chemistry with lab: CHEM 31X (or 31A,B), 33, 35, 36, 130, 131, 135 (or 171). For those interested in ecology and evolutionary biology, an advanced Mathematics course of 100-level or above may be substituted for 130.
2. General Physics: PHYSICS 21, 22, 23, 24; or 41, 43, 45; or 28, 29.
3. Math through calculus: MATH 19, 20, 21; or 41, 42.
4. One foundational breadth course in Mathematics, Statistics, or Computer Science: MATH 51 or beyond; BIOSCI 141*; BIOHOPK 174H*; STATS 60 or beyond; or CS 106A or X.

---

* If taken to fulfill the foundational breadth requirement, these courses do not count toward the 24 elective unit requirement.

Electives—Electives must be 100-level or above and selected from the offerings in the Department of Biological Sciences, Hopkins Marine Station, or from the list of approved out-of-department electives in the student services office or by downloading http://biology.stanford.edu/student_resources/out_of_dept_electives.pdf. Stanford Introductory Seminars may not be used to fulfill this requirement.

The program for the junior and senior year should include a total of 24 elective units beyond the core. The courses making up these units must include at least one course from at least three of the following four central menu areas. The rest of the 24 units can include more courses from this central menu, other Biological Sciences or Hopkins Marine Station courses, courses listed on the approved out-of-department elective list, or advanced courses for which menu courses are prerequisites. A complete central menu course listing including inactive and alternate year courses is available in the student services office or by downloading http://biology.stanford.edu/student_resources/central_menu.pdf. Active central menu courses are:

1. *Molecular*
   BIOSCI 104. Advanced Molecular Biology
   BIOSCI 113. Fundamentals of Molecular Evolution[3]
   BIOSCI 118. Genetic Analysis of Biological Processes[1]
   BIOSCI 133. Genetics of Prokaryotes[1]
   BIOSCI 134. Replication of DNA[1]
   BIOSCI 188. Biochemistry I
   BIOSCI 189. Biochemistry II
   BIOSCI 230. Molecular and Cellular Immunology[1]
   CBIO 101. Cancer Biology[1]
   CEE 274A. Environmental Microbiology I[5]
2. *Cell/Developmental*
   BIOSCI 115. Signal Transduction and Development
   BIOSCI 118. Genetic Analysis of Biological Processes[1]
   BIOSCI 129A. Cellular Dynamics I: Cell Motility and Adhesion
   BIOSCI 129B. Cellular Dynamics II: Building a Cell
   BIOSCI 133. Genetics of Prokaryotes[1]
   BIOSCI 134. Replication of DNA[1]
   BIOSCI 154. Molecular and Cellular Neurobiology[2]
   BIOSCI 158. Developmental Neurobiology[2]
   BIOSCI 160. Developmental Biology
   BIOSCI 230. Molecular and Cellular Immunology[1]
   BIOHOPK 183H. Environmental Cell & Developmental Biology
   CBIO 101. Cancer Biology[1]
   CEE 274A. Environmental Microbiology I[5]
3. *Organismal*
   BIOSCI 112. Human Physiology
   BIOSCI 124. Plant Physiological Ecology[4]
   BIOSCI 138. Ecology and Evolution of Plants[4]
   BIOSCI 153. Cellular Neuroscience
   BIOSCI 154. Molecular and Cellular Neurobiology[2]
   BIOSCI 158. Developmental Neurobiology[2]
   BIOSCI 163. Neural Systems and Behavior
   BIOSCI 213. Biology of Viruses
   BIOHOPK 161H. Invertebrate Zoology
   BIOHOPK 162H. Comparative Animal Physiology
   BIOHOPK 167H. Nerve, Muscle, and Synapse
   BIOHOPK 169H. Neurobiology and Behavior
   BIOHOPK 171H. Ecological and Evolutionary Physiology
   HUMBIO 140. Vertebrate Biology
   MI 185. Topics in Microbiology
4. *Ecology and Evolution*
   BIOSCI 101. Ecology
   BIOSCI 113. Fundamentals of Molecular Evolution[3]
   BIOSCI 121. Biogeography
   BIOSCI 136. Evolutionary Paleobiology
   BIOSCI 142. Topics in Theoretical Ecology
   BIOSCI 143. Evolution
   BIOSCI 144. Conservation Biology
   BIOSCI 145. Behavioral Ecology
   BIOHOPK 163H. Oceanic Biology
   BIOHOPK 172H. Marine Ecology
   CEE 274A. Environmental Microbiology I[5]

---

[1] May be used to satisfy either area I or area II requirement.
[2] May be used to satisfy either area II or area III requirement.
[3] May be used to satisfy either area I or area IV requirement.
[4] May be used to satisfy either area III or area IV requirement.
[5] May be used to satisfy either area I or area II or area IV requirement.

No more than 6 units from any combination of individual instruction courses (BIOHOPK 175H, 176H, 198H, 199H, 290H, 300H; BIOSCI 198, 198X, 199, 199X, 290, 290X, 291, 300, or 300X) may be applied toward the total number of elective units. No more than 6 units applied toward the elective unit requirement may be taken CR/NC.

Students intending to pursue research careers in biology, especially in ecology, population genetics, or theoretical biology, should be aware that MATH 19, 20, 21, or MATH 41, 42 are minimum mathematics requirements for the B.S. degree in Biological Sciences. Substantial additional training in mathematics, including differential equations, linear algebra, and probability theory, is often highly advisable. Students should consult the Biological Sciences faculty to discuss individual needs.

Additionally, even though only two or three quarters of physics are required, students should be aware that many graduate and professional schools (for example, Medicine and Education) require a year of general physics with lab. Biological Sciences majors are therefore advised to take the year-long physics sequence PHYSICS 21, 22, 23, 24, 25, 26 if they plan to attend graduate or medical school.

For students considering study at Hopkins Marine Station during the junior or senior year, or an overseas program, the department recommends fulfilling as many University General Education Requirements as possible in the first two years at Stanford.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM

FIRST YEAR

Subject and Catalog Number	*Qtr. and Units*		
	A	*W*	*S*
CHEM 31X*, 33, 35, 36	4	4	7
MATH 19, 20, 21. Calculus and Analytic Geometry	3	3	4
Freshman requirements, seminars, or GERs	8	8	6
Totals	15	15	17

* This schedule varies slightly if the student takes CHEM 31A,B.

SECOND YEAR

BIOSCI 41. Principles of Biology*	5		
BIOSCI 42. Principles of Biology*		5	
BIOSCI or BIOHOPK 43. Principles of Biology*			5
BIOSCI 44X. Core Experimental Laboratory		4	
BIOSCI or BIOHOPK 44Y. Core Experimental Laboratory			4
CHEM 130, 131, 135 (or 171). Organic and Physical Chemistry	8	3	
General Education Requirements or electives	3	5	8
Totals	16	17	17

* Letter grade only.

THIRD YEAR

PHYSICS 21, 22, 23, 24. Introductory Physics	4	4	
General Education Requirements or electives	11	11	11
Totals	15	15	11

FOURTH YEAR

Electives	15	15	15

FIELDS OF STUDY (SPECIALIZATION TRACKS)

In addition to the undergraduate major program described above, the department offers these six specialized fields of study for students wishing to concentrate their studies in particular areas of biology:

1. Biochemistry and Biophysics
2. Ecology and Evolution
3. Marine Biology
4. Microbes and Immunity
5. Molecular and Cellular Biology
6. Neurobiology

These fields of study are declared on Axess; they appear on the transcript but not on the diploma. Candidates for the B.S. degree in Biological Sciences with a field of study are expected to complete the departmental honors program as well as the set of requirements outlined below. Students in a field of study must have their checklist signed by their advisers and submitted to the student services office by the end of junior year. Students may petition in advance for the substitution of either equivalent or more advanced courses using the General Petition, available in the student services office or by downloading http://biology.stanford.edu/student_resources/general_petition.pdf.

BIOCHEMISTRY AND BIOPHYSICS

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5

Writing in the Major (one of the following):

BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y	4
BIOSCI 145*	4
BIOHOPK175H*	10
BIOHOPK 176H*	12

* These courses can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B, or 31X	8 or 4
CHEM 33, 35, 36, 130	15
CHEM 135 or 171	3
PHYSICS 41, 43, 45	12
MATH 51, 52	10
STATS 60 or BIOSCI 141	5 or 4-5

Required Biology Courses (must be taken for a letter grade):

BIOSCI 104	3
BIOSCI 118	5
BIOSCI 129A or 129B	4
BIOSCI 188	3

Approved Biochemistry and Biophysics Courses (three of the following; must be taken for a letter grade):

APPPHYS 192	3
BIOMEDIN 210	3
BIOSCI 152/MCP 222	3
BIOSCI 154	4
BIOSCI 211	4
CHEM 232/CHEMENG 452	3
MCP 256	4

Electives—7 units required. Electives must be 100-level or above and chosen from the offerings in the Department of Biological Sciences, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

ECOLOGY AND EVOLUTION

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5
BIOSCI 101 or BIOHOPK 172H	3 or 5

Writing in the Major (one of the following):

BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y	4
BIOSCI 145*	4
BIOHOPK175H	10
BIOHOPK 176H	12

* This course can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B or 31X	8 or 4
CHEM 33, 35, 36	11
PHYSICS 21, 22, 23, 24 or 41, 43, 45 or 28, 29	8 or 12
MATH 41, 42	10

Required Evolutionary Biology Course (one of the following; must be taken for a letter grade):

BIOSCI 113/244	4
BIOSCI 136	4
BIOSCI 143	3
BIOHOPK 166H	5

Required Quantitative Methods Course (one of the following; must be taken for a letter grade):

BIOSCI 141	4-5
BIOSCI 142	3
BIOSCI 221	4
BIOHOPK 174H	3
CS 106A or 106X	3-5
STATS 60 or beyond	5

Electives—30 units required. Only one course can be taken credit/no credit. Electives must be from this approved list: ANTHSCI 187; BIOSCI 102, 109Z*, 110Z*, 111Z*, 117, 118, 121, 124, 125, 139, 144, 145, 146, 147, 175, 183, 184, 215, 216; BIOHOPK 163H, 171H; CHEM 130, 131; GEOPHYS 130/231; GES 144, 164, 168, 240.

* Only 2 units can count.

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

MARINE BIOLOGY

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5

Writing in the Major (one of the following):

BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y	4
BIOSCI 145	4
BIOHOPK175H*	10
BIOHOPK 176H*	12

* These courses can also be used to count toward the approved courses.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B or 31X	8 or 4
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 or 41, 43, 45	8 or 12
MATH 41, 42 or 19, 20, 21	10
STATS 60 or BIOSCI 141 or BIOHOPK 174H	5 or 4-5 or 3

Required Biology Courses (must be taken for a letter grade):

BIOSCI 101	3
BIOSCI 118	5
BIOSCI 143	3

Approved courses (three of the following; must be taken for a letter grade):

BIOHOPK 161H	5
BIOHOPK 162H or 171H	5-8 or 4
BIOHOPK 163H	4
BIOHOPK 166H	5
BIOHOPK 172H	5

Approved courses (one of the following; must be taken for a letter grade):

BIOHOPK 175H	10
BIOHOPK 176H	12
BIOHOPK 182H	16

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

MICROBES AND IMMUNITY

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5

Writing in the Major and Introduction to Laboratory Science (one of the following):

BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y	4
BIOHOPK 175H*	10
BIOHOPK 176H*	12

* This course can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B or 31X	8 or 4
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 or 41, 43, 45	8 or 12
MATH 19, 20, 21 or 41, 42	10
BIOSCI 141* or BIOHOPK 174H*	4-5 or 3

* This course cannot also be used to count toward the elective requirement.

Required Courses in Microbiology, Immunology, Molecular Evolution (four of the following; must be taken for a letter grade):

BIOSCI 113	4
BIOSCI 133	4
BIOSCI 213	3
BIOSCI 230	4-5
BIOHOPK 274	9-12
CEE 177	4
CEE 274A	3
CEE 274B	3
CEE 274D	3
MI 104	3
MI 211	3
MI 212	3

Required Course in Reading Scientific Literature (must be taken for a letter grade):

MI 185	3

Electives—12 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biological Sciences, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

MOLECULAR AND CELL BIOLOGY

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5

Writing in the Major (one of the following):

BIOSCI 44X	4
BIOSCI *or* BIOHOPK 44Y	4
BIOSCI 145*	4
BIOHOPK175H*	10
BIOHOPK 176H*	12

* These courses can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B *or* 31X	8 or 4
CHEM 33, 35, 36, 130, 131	18
CHEM 135 or 171	3
PHYSICS 21, 22, 23, 24 *or* 41, 43, 45	8 or 12
MATH 41, 42 *or* 19, 20, 21	10
STATS 60 or BIOSCI 141*	5 or 4-5

* This course cannot also be used to count toward the elective requirement.

Required Biology Courses (must be taken for a letter grade):

BIOSCI 104	3
BIOSCI 118	5
BIOSCI 129A	4
BIOSCI 129B	4

Electives—15 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biological Sciences, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

NEUROBIOLOGY

Core Courses (must be taken for a letter grade):

Subject and Catalog Number	*Units*
BIOSCI 41	5
BIOSCI 42	5
BIOSCI or BIOHOPK 43	5

Writing in the Major (one of the following):

BIOSCI 44X	4
BIOSCI or BIOHOPK 44Y	4
BIOSCI 145*	4
BIOHOPK175H*	10
BIOHOPK 176H*	12

* These courses can also be used to count toward the elective requirement.

Required Foundational Breadth Courses (two courses may be taken credit/no credit):

CHEM 31A,B or 31X	8 or 4
CHEM 33, 35, 36, 130, 131	18
PHYSICS 21, 22, 23, 24 or 41, 43, 45	8 or 12
MATH 41, 42 or 19, 20, 21	10
STATS 60 or BIOSCI 141*	5 or 4-5

* This course cannot also be used to count toward the elective requirement.

Required Biology Courses (must be taken for a letter grade):

BIOSCI 118 or 104	5 or 3
BIOSCI 129A or 129B	4
BIOSCI 150 or 163	5 or 4
BIOSCI 154	4
BIOSCI 158	4

Electives—15 units required. Electives must be at the 100-level or above and selected from the offerings in the Department of Biological Sciences, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and/or research are allowed. Only one course can be taken credit/no credit.

Research Requirement—Admission to the departmental honors program; 10 units of BIOSCI 199, 199X, or BIOHOPK 199H; poster or oral presentation; and honors thesis. Only research units from BIOSCI or BIOHOPK are permitted.

For further information on the fields of study (specialization tracks), including detailed descriptions of their requirements and deadlines, see http://biology.stanford.edu/programs.html.

HONORS PROGRAM

To graduate with departmental honors, a student must:

1. Submit an honors petition proposal to the department's undergraduate research coordinator by the fifth Friday of the quarter, two quarters prior to graduation. For instance, students graduating Spring Quarter must submit petitions no later than mid-Autumn Quarter.
2. Complete at least 10 units of an approved research project in BIOSCI 199, 199X, or BIOHOPK 199H. Only research units from BIOSCI or BIOHOPK are permitted.
3. Obtain at least a 3.0 (B) grade point average (GPA) in all Biological Sciences major requirements taken at Stanford (foundational breadth, core, and elective courses). Grades earned from teaching (BIOSCI or BIOHOPK 290 and BIOSCI 291) and research (BIOHOPK 175H, 176H, 199H; BIOSCI 199, 199X) are not computed into this GPA.

4. If graduating in June, participate in the Biological Sciences Honors Symposium by presenting a poster or giving an oral presentation. The symposium is usually at the end of May. If graduating Autumn, Winter, or Summer Quarter, produce a poster.
5. Complete and submit, by the end of the quarter of graduation, two signed and bound copies of an honors thesis approved by at least two readers (one of whom must be from the faculty of the Department of Biological Sciences and both must be Academic Council members). In addition, students must submit two copies of the honors thesis abstract (one paper copy and one electronic copy), which include student name, thesis title, research sponsor, and sponsor's department.

Further information on the honors program is available in the office of the undergraduate research coordinator in Gilbert 118, as well as on the web at http://biohonors.stanford.edu. Questions should be directed to the undergraduate research coordinator, Dr. Timothy Meier (gastrula@stanford.edu, 650-723-3767, Gilbert 118).

TRANSFER STUDENTS

Because of differences between Stanford undergraduate courses and prerequisites and those of many other institutions, transfer students may face problems not encountered by entering freshmen. Transfer students are urged to visit the student services office in Gilbert 108 during transfer orientation to obtain information on course credit evaluations. Course catalogs, syllabi, and/or lecture notes from the former institution are necessary in the evaluation and accreditation process. Transfer students are encouraged to find a faculty adviser soon after arrival.

All transfer courses intended to fulfill department requirements must be evaluated on Evaluation of Course Content forms available in the student services office or downloadable at http://biology.stanford.edu/student_resources/eval_course_content.pdf; these forms are kept in the student's file. This department procedure is in addition to the Registrar's process of having units earned at other institutions transferred for Stanford credit that appear on the Stanford transcript.

The department authorizes transfer credit only for courses whose content parallels the Stanford courses and that have comparable prerequisites (not merely a comparable course title). To substitute a course taken elsewhere for an upper-division Stanford course, course content must be approved by a department faculty member teaching in the area of the course. Submit as complete a course description as practical (including prerequisites and their descriptions) using the Evaluation of Course Content form available in the student services office before taking an off-campus course. Students must provide exams, reading lists, term papers, and other materials for the evaluation. Credit is not allowed for projects for which the student was paid, nor is credit allowed for work of a purely technical or clinical nature. Credit for natural history, culture biology, and similar courses is rarely appropriate and can be obtained only by meeting the same criteria outlined above. Academic performance is verified upon receipt of the official transcript. Semester units are not converted to quarter units; units awarded for transfer credit are determined by faculty evaluation.

MINOR

Students interested in the minor in Biological Sciences must declare the minor and submit their course plan online via Axess no later than two quarters prior to the student's intended quarter of degree conferral. The Biological Sciences minor requires a minimum of six courses meeting the following criteria:

1. all courses must be taken for a letter grade.
2. all courses must be worth 3 or more units.
3. all courses, other than the Biological Sciences Core (41, 42, 43), must be at or above the 100-level. Stanford Introductory Seminars may not be used to fulfill this requirement.
4. Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (minor or major).
5. At least one course from the Biological Sciences Core (41, 42 or 43) must be taken.
6. The Biological Sciences Core Laboratory (44X and 44Y) does not count towards the minor degree.
7. Courses must be selected from the offerings of the Department of Biological Sciences or the Hopkins Marine Station, or from the list of approved out-of-department electives (available in the student services office or downloadable at http://biology.stanford.edu/student_resources/out_of_dept_electives.pdf).
8. Elective credit for research (BIOSCI 199 or BIOHOPK 199H) is limited to a maximum of 3 units.

REQUIREMENTS FOR PREHEALTH PROFESSIONS

Students who are not biology majors should take at least the following courses in Biological Sciences: 41, 42, 43, 44X, 44Y, and such upper-division electives as may be recommended by Undergraduate Advising and Research, Sweet Hall.

COTERMINAL B.S. AND M.S. DEGREES

The Department of Biological Sciences admits a limited number of undergraduates to the coterminal B.S. and M.S. degree program in Biological Sciences. Students may apply to the program after they have earned a minimum of 120 units toward graduation (UTG) and at least one quarter prior to conferring the undergraduate degree; for example, if a student expects to have the B.S. conferred in Spring Quarter, the student must apply no later than during Winter Quarter. The application includes a statement of purpose, an unofficial Stanford transcript, official GRE score print-out, two letters of recommendation from faculty members in this department (if two such letters are not available, a letter from someone outside the department can be used in lieu of one of those), a program proposal listing the courses in which they intend to enroll to fulfill degree requirements, a course transfer form, and an application fee of $50. Students must meet all requirements except the electives for the B.S. degree, and all requirements for the M.S. degree in Biological Sciences. Unit requirements for a coterminal program are 180 units for the bachelor's degree and 45 units for the master's degree.

Coterminal students are permitted to use course work taken up to two quarters immediately prior to their first graduate quarter toward their graduate degree.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF SCIENCE

For information on the University's basic requirements for the M.S. degree, see the "Graduate Degrees" section of this bulletin.

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience. Students who have majored in related fields are eligible to apply. However, course work equivalent to the Stanford B.S. in Biological Sciences is recommended. The M.S. program does not have an M.S. with thesis option.

ADMISSIONS

Students submit an application for admission to the M.S. program, three letters of recommendation, official transcripts, official Graduate Record Examination (GRE) scores, and TOEFL scores, if applicable. The application is available at http://gradadmissions.stanford.edu. Applicants should plan on taking the GRE at least six weeks prior to the application deadline to ensure that official scores are available when applications are evaluated. Applications are accepted for matriculation to Autumn Quarter only. Financial support for students in this program is not available from either the department or the University.

GENERAL REQUIREMENTS

The M.S. program consists of Department of Biological Sciences and/or Hopkins Marine Station course work, approved out-of-department electives, and foundational breadth courses totaling at least 45 units at or above the 100-level, distributed as follows:

1. A minimum of 23 of the 45 units must be courses designated primarily for graduate students (typically at the 200-level or higher).
2. A minimum of 36 units must be chosen from the offerings in the Department of Biological Sciences (BIOSCI), Hopkins Marine Station (BIOHOPK), the list of approved out-of-department electives, foundational breadth courses, and/or research and teaching.
   a) a maximum of 18 of the 36 units may be a combination of Biological Sciences research, directed reading, and/or teaching (BIOHOPK 175H, 176H, 198H, 290H, 300H; BIOSCI 198, 198X, 290, 290X, 291, 300, or 300X).
   b) a maximum of 9 units may be foundational breadth courses in chemistry, mathematics, statistics, computer science, and/or physics beyond the level required for the undergraduate degree in Biological Sciences and at least at the 100-level.
3. The remaining 9 units may be other Stanford course work relevant to a student's professional development. Students are required to petition for courses that fall into this category using the General Petition form, available in the student services office or downloadable at http://biology.stanford.edu/student_resources/general_petition.pdf.

Each candidate designs a coherent program of study in consultation with her or his department adviser. Although there are no specific courses required, program proposals must adhere to department parameters.

A program proposal, signed by the student's adviser and approved by the chair of the M.S. committee, must be filed by the third week of the first quarter of enrollment. Students may take only 6 units CR/NC and must receive a grade of 'B-' or better in all courses taken for the degree.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, consult the "School of Education" section of this bulletin or address an inquiry to the Credential Administrator, School of Education.

DOCTOR OF PHILOSOPHY

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" section of this bulletin. Training for a Ph.D. in Biological Sciences is focused on learning skills required for being a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of other faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

ADMISSIONS

Preparation for Graduate Study—Students seeking entrance to graduate study in Biological Sciences ordinarily should have the equivalent of an undergraduate major in Biological Sciences at Stanford. However, students from other disciplines, particularly the physical sciences, are also encouraged to apply. Such students are advised at the time of initial registration on how they should complete background training during the first year of graduate study. In addition to the usual basic undergraduate courses in biology, it is recommended that preparation for graduate work include courses in chemistry through organic chemistry, general physics, and mathematics through calculus.

Application, Admission, and Financial Aid—Prospective graduate students should apply online at http://gradadmissions.stanford.edu. The department's program is divided into three separate tracks: ecology/evolution/population biology; integrative/organismal; and molecular/cellular/developmental/genetic/plant. Included in these tracks is the option to conduct research at Hopkins Marine Station. These concentrations are reported to the department; they are not declared on Axess.

Applicants are required to take the Graduate Record Examination (GRE) general test. The GRE subject test is not required. Applicants should plan on taking the GRE at least one month prior to the application deadline to ensure that official scores are available when applications are evaluated.

Admission to the Ph.D. program is competitive, and in recent years it has been possible to offer admission to only 10 percent of the applicants.

Qualified applicants should apply for nationally competitive predoctoral fellowships, especially those from the National Science Foundation.

Admitted students are typically offered financial support in the form of Stanford Graduate Fellowships, research assistantships, NIH traineeships, or Biological Sciences fellowships.

GENERAL REQUIREMENTS

The following requirements must be completed by all students:

1. Course work is planned in consultation with an advising committee assigned for a student's track. In addition, students must take a course on the ethical conduct of research: BIOSCI 312 for the ecology/evolution/population biology track; MED 255 for the integrative/organismal and molecular/cellular/developmental/genetic/plant tracks.
2. Teaching experience and training are part of the graduate curriculum. Each student assists in teaching one course in the department's core lecture (41, 42, or 43) or lab (44X, 44Y) series, and a second course that can be either a core course or other Biological Sciences or Hopkins Marine Station course. Three quarters of teaching are required for ecology, evolution, and population biology students.
3. Graduate seminars devoted to current literature and research in particular fields of biology are an important means of attaining professional perspective and competence. Seminars are presented under individual course listings or are announced by the various research groups. Topics of current biological interest are presented by speakers from Stanford and other institutions. During the first year of study, graduate students are required to attend seminars and make one formal seminar presentation which must be evaluated by a minimum of two faculty members.
4. By June 1, each first-year student is expected to have selected a lab in which to perform dissertation research and to have been accepted by the faculty member in charge. Students and faculty must wait until April 1 to discuss the choice of a dissertation lab.
5. During second year, students are required to write a dissertation proposal which is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. Advancement to candidacy depends on satisfactory completion of the dissertation proposal.
6. Third year and beyond: each student must meet with the advising committee beginning the third year, and each year thereafter prior to the end of the Spring Quarter. Advanced students are required to meet with their committee at least twice a year.
7. Residency requirement: a minimum of 135 units of graduate registration is required of each candidate.
8. The doctoral dissertation must be presented to an oral examination committee comprised of at least five faculty members. In addition, the final dissertation must be approved by the student's reading committee, comprised of at least three faculty members and by a graduate degree progress officer in the Registrar's Office. Upon completion of this final requirement, a student is eligible for conferral of the degree.

TRACK SPECIFIC REQUIREMENTS

In addition to the general requirements listed above, students must also complete requirements within their track.

Molecular, Cellular, Developmental, Genetic, and Plant Track—

1. *First year:*
   a) *advising committee:* shortly after arrival, each entering student meets with the first-year advising committee. The committee reviews the student's previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended. Completion of the core curriculum (below) is required of all students.
   b) *core curriculum:** students are required to take the following courses for a letter grade, unless previous course work has fulfilled these requirements:
      BIOSCI 203. Advanced Genetics
      BIOSCI 214. Cell Biology of Physiological Process
      BIOSCI 301. Frontiers in Biology: satisfies first-year talk requirement; must be taken Autumn and Winter quarters.

One of the following:
- BIOC/SBIO 241. Biological Macromolecules
- MCP 256. Molecular Physiology of Cells
- MPHA 210. Signal Transduction

Three additional courses in the student's area of interest, or as advised by committee.

c) *Lab rotations:** first-year students are required to complete rotations in three different laboratories. The first rotation must be in a lab in the Department of Biological Sciences.

2. *Second year:* each student must pass a qualifying exam.
   a) *dissertation proposal:* during Winter and Spring quarters of the second year, the student must prepare a dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature. An oral examination is held after submission of the proposal to the dissertation advising committee. The student's adviser is a silent member of the examination committee; the other members of the dissertation advising committee can provide feedback. Advancement to candidacy is contingent upon completion of the dissertation proposal and oral exam. The written proposal is due by March 31 and the oral defense must take place no later than May 1. Failure to complete these requirements on schedule results in the withholding of the graduate stipend.
3. *Third year and beyond:*
   a) *dissertation and dissertation defense:* a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

Integrative/Organismal Track—

1. *First year:*
   a) *advising committee:* shortly after arrival, each entering student meets with the first-year advising committee. The committee reviews the student's previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended.
   b) *core curriculum*: Students are required to take BIOSCI 306, Current Topics in Integrative and Organismal Biology. Students specializing in integrative biology may also be asked to take appropriate graduate-level courses such as DBIO 210; MCP 215; NBIO 206, 216; or PSYCH 228.
   c) *first-year paper:* students must submit a paper that is evaluated by the advising committee before the end of Spring Quarter of the first year. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis. The first-year paper must be evaluated by a minimum of two faculty members.
2. *Second year:*
   a) *dissertation proposal:* the dissertation proposal is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. This is to be completed by the end of Spring Quarter of the second year. Advancement to candidacy depends on completion of the dissertation proposal and oral exam.
3. *Third year and beyond:*
   a) *dissertation and dissertation defense:* a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

Ecology, Evolution, and Population Biology Track—

1. *First year:*
   a) *advising committee:* each entering student is assigned a first-year advising committee whose function is to develop a schedule of required and recommended courses and to meet once each quarter with the student during the first year.
   b) *core curriculum:* Students are required to take BIOSCI 302, 303, 304, Current Topics and Concepts in Population Biology, Ecology, and Evolution.
   c) *first-year paper:* each student must submit a paper that is evaluated by the advising committee before the end of Spring Quarter of the first year. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis. The first-year paper must be evaluated by a minimum of two faculty members.
2. *Second year:*
   a) *dissertation proposal:* the dissertation proposal is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. This is to be completed by the end of Spring Quarter of the second year. Advancement to candidacy depends on completion of the dissertation proposal and oral exam.
3. *Third year and beyond:*
   a) *dissertation and dissertation defense:* a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

COURSES

Course and laboratory instruction in the Department of Biological Sciences conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

INTRODUCTORY

BIOSCI 1. Human Evolution and Environment—Human genetic and cultural evolution and how people interact with their environments, from the ancestors of Australopithecus to current events. Issues include race, gender, and intelligence; pesticide and antibiotic resistance; abortion and contraception; ecosystem services; environmental economics and ethics; the evolution of religion; climate change; population growth and overconsumption; origins and spread of ideas and technologies; and the distribution of political and economic power. GER:DB-NatSci

3 units, not given this year (Ehrlich, P)

BIOSCI 2. Current Research Topics in Biological Sciences—Primarily for sophomores interested in majoring in Biological Sciences. Weekly seminars by faculty: molecular biology and genetics; theory and mathematics in biology; ecology, physiology, and the environment; molecular and cellular aspects of neurobiology, immunology, and developmental biology; biological chemistry; behavioral biology; and evolution. May be repeated for credit.

1 unit, Aut, Win (Meier, T)

BIOSCI 3. Frontiers in Marine Biology—An introduction to contemporary research in marine biology, including ecology, conservation biology, environmental toxicology, behavior, biomechanics, evolution, neurobiology, and molecular biology. Emphasis is on new discoveries and the technologies used to make them. Weekly lectures by faculty from the Hopkins Marine Station.

1 unit, Aut (Somero, G)

BIOSCI 8. Frontiers in Organismal Biology—Preference to freshmen and sophomores. How animals work. Research frontiers in organismal biology including integrative physiology, biomechanics, neurobiology, and environmental physiology and ecology.

1 unit, not given this year (Block, B)

BIOSCI 20. Introduction to Brain and Behavior—(Same as HUMBIO 21.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER:DB-NatSci

3 units, alternate years, not given this year (Fernald, R)

---

* Written petitions for exemptions to core curriculum and lab rotation requirements are considered by the advising committee and the chair of the graduate studies committee. Approval is contingent upon special circumstances and is not routinely granted.

BIOSCI 96A,B. Jasper Ridge Docent Training—Two quarter preparation for Stanford and community students to join the Jasper Ridge education program. Multidisciplinary environmental education; hands-on field research. Field ecology and the natural history of plants and animals, archaeology, geology, hydrology, land management, and research projects of the preserve presented by faculty, local experts, and staff. Participants lead research-focused educational tours, assist with classes, and attend continuing education classes available to members of the JRBP community after the course.

2 units, **A:** *Win,* **B:** *Spr (Wilber, C; Vitousek, P)*

STANFORD INTRODUCTORY SEMINARS

BIOSCI 6N. Climate Change: Drivers, Impacts, and Solutions—Stanford Introductory Seminar. Preference to freshmen. The scientific understanding of climate change, and the evidence, driving forces, and options for managing its impacts. GER:DB-NatSci

3 units, Win (Field, C)

BIOSCI 14N. Plants and Civilization—Stanford Introductory Seminar. Preference to freshmen. The role of plants in the development of civilization. Topics: the use of forests, woodlands, and grazing lands; centers of origins and spread of crops; viticulture, and wine and beer making; the spice route and the age of exploration; the use of plants as medicine; the global spread of weeds; engineering plants for the future; the importance of tea, coffee, chocolate, sugar, potatoes, natural dyes, and rubber in societal affairs and change. GER:DB-NatSci

3 units, Win (Mooney, H)

BIOSCI 16N. Island Ecology—Stanford Introductory Seminar. Preference to freshmen. How ecologists think about the world. Focus is on the Hawaiian Islands: origin, geology, climate, evolution and ecology of flora and fauna, and ecosystems. The reasons for the concentration of threatened and endangered species in Hawaii, the scientific basis for their protection and recovery. How knowledge of island ecosystems can contribute to ecology and conservation biology on continents. GER:DB-NatSci

3 units, Spr (Vitousek, P)

BIOSCI 21N. Evolutionary Basis of Animal Sexual Behaviors—Stanford Introductory Seminar. Preference to freshmen. The genetic and evolutionary basis for innate sexual behavioral patterns in animals. Readings from primary scientific literature, and Olivia Judson's *Dr. Tatiana's Sex Advice for All Creation*. GER:DB-NatSci

3 units, Spr (Baker, B)

BIOSCI 24N. From Bread to Genomics: Using Yeast to Study Biology—Stanford Introductory Seminar. Preference to freshmen. The single-celled organism, Saccharomyces cerevisiae or baker's yeast, as a tool in experiments including winemaking, evolution, and cancer. Yeast biology; how yeast genetics is used to examine the properties of cells. Modern genomic techniques in yeast research such as DNA microarrays, high-throughput genetic analysis, protein-interaction studies, and proteomic analyses. Readings from primary scientific literature. Final paper. GER:DB-NatSci

3 units, Aut (Cyert, M)

BIOSCI 25Q. The Molecular Basis of Genetic Disease—Stanford Introductory Seminar. Preference to sophomores. Focus is on two genetic diseases resulting from the production of protein molecules that are unable to fold into their native conformations, called conformational diseases: cystic fibrosis and amyotrophic lateral sclerosis or Lou Gehrig's disease. Hypotheses and controversies surrounding the molecular basis of these disorders, and implications for novel therapeutics. Readings from research literature. GER:DB-NatSci

3 units, Spr (Kopito, R)

BIOSCI 26N. Maintenance of the Genome—Stanford Introductory Seminar. Preference to freshmen. Focus is on DNA repair systems which scan the genome to ensure genomic stability in the face of natural endogenous threats to DNA and those due to radiation and chemicals in the external environment. Redundancy of the genetic message ensured by complementary DNA strands facilitates recovery of information when one of the strands is altered. Predisposition to cancer often implicates a defective DNA repair gene. Relevance for oncology, aging, developmental biology, environmental health, and neurobiology. GER:DB-NatSci

3 units, Spr (Hanawalt, P)

BIOSCI 28N. Molecular Basis of Cancer—Stanford Introductory Seminar. Preference to freshmen. Current knowledge on the molecular basis of cancer. Topics: cell cycle regulation, oncogenes, tumor suppressor genes, telomere biology, angiogenesis, and apoptosis. Current cancer biology literature. GER:DB-NatSci

3 units, Spr (Fang, G)

BIOSCI 31Q. Ants: Behavior, Ecology, and Evolution—Stanford Introductory Seminar. Preference to sophomores. Behavior: the organization of colonies, how they operate without central control, how they resemble other complex systems like brains. Ecology: how populations of colonies change, comparing the ecology of a species in SW American desert and invasive Argentine ants. Evolution: why are there so many species of ants; how are they alike, how do they differ, and why? Ants as the theme for exploring how to do research in animal behavior, ecology, and evolution. Research project will be on the invasive Argentine ant: its distribution on campus, foraging trails, and nest structure.

3 units, Spr (Gordon, D)

BIOSCI 33N. Conservation Science and Practice—Stanford Introductory Seminar. Preference to freshmen. Interdisciplinary. The science and art of conservation today. The power of the human race to change ecological and evolutionary playing fields of macroscopic species. Which elements of ecosystems, including their plants, animals, and microorganisms, most merit protection; what is the scientific basis for deciding? The prospects for aligning economic forces with conservation. Field trip; project. GER:DB-NatSci

3 units, Spr (Daily, G)

BIOSCI 34N. Hunger—Stanford Introductory Seminar. Preference to freshmen. The biology of hunger and satiety, disease states that disrupt normal responses to hunger and satiety, starvation responses and adaptations to starvation in a variety of organisms, food production and distribution mechanisms, historic famines and their causes, the challenges of providing adequate food and energy for the Earth's growing population, local and global efforts to alleviate hunger, and hunger in fiction.

3 units, Aut (Barton, K)

BIOSCI 36N. Physiology of Human Performance—Stanford Introductory Seminar. Preference to freshmen. Laboratory-oriented. Students conduct studies on each other, and possibly on volunteers, involving physical activity and measurement of physiological variables before, during, and after physical activity. Focus is on the physiological systems underlying the capacity for physical activity and on the limits to increasing strength, power output, and endurance. Strenuous physical activity required.

3 units, Aut (Heller, C; Grahn, D; Sims, S)

BIOSCI 106Q. The Heart of the Matter—(Same as GENE 106Q.) Stanford Introductory Seminar. Preference to sophomores. The molecular and biochemical basis of life. Emphasis is on the methods and scientific logic that lead to advances in knowledge. The human heart and circulatory system is the unifying theme for topics such as the constituents and activities of cells, tissues, and organs; the chemicals and proteins that carry on life processes; the biotechnology revolution; the role of genes in human disease and normal functions; and the Human Genome Project. How scientific knowledge is built up through research; how biology initiates advances in medicine; and how science, engineering, and economics interact in biotechnology. Student presentations, demonstrations, and field trips.

3 units, Win (Myers, R; Simoni, R)

CORE

BIOSCI 41, 42, 43. Principles of Biology—The principles of modern biological sciences, taken in sequence, preferably in the sophomore year. Biological Sciences majors must take for a letter grade. Prerequisites: CHEM 31X (or 31A and B), 33, 35; MATH 19, 20, 21, or 41, 42.

BIOSCI 41. Genetics, Biochemistry, and Molecular Biology—Emphasis is on macromolecules (proteins, lipids, carbohydrates, and nucleic acids) and how their structure relates to function and higher order assembly; molecular biology, genome structure and dynamics, gene expression from transcription to translation. GER:DB-NatSci

5 units, Aut (Simoni, R; Bergmann, D)

BIOSCI 42. Cell Biology and Animal Physiology—Cell structure and function; principles of animal physiology (immunology, renal, cardiovascular, sensory, motor physiology, and endocrinology); neurobiology from cellular and developmental to neural regulation of physiology. GER:DB-NatSci

5 units, Win (Sapolsky, R; Jones, P; Cyert, M; Heller, C; Luo, L)

BIOSCI 43. Plant Biology, Evolution, and Ecology—Principles of evolution: macro- and microevolution and population genetics. Ecology: the principles underlying the exchanges of mass and energy between organisms and their environments; population, community, and ecosystem ecology; populations, evolution, and global change. Equivalent to BIOHOPK 43. GER:DB-NatSci

5 units, Spr (Gordon, D; Petrov, D; Mudgett, M)

BIOSCI 44X,Y. Core Experimental Laboratory—Two quarters of lab projects provide a working familiarity with the concepts, organisms, and techniques of modern biological research. Emphasis is on experimental design, analysis of data, and written and oral presentation of the experiments. Lab fee. Prerequisites: CHEM 31X, or 31A,B, and 33. Recommended: Biological Sciences or Human Biology core, and statistics; 44X,Y should be taken sequentially in same year. 44Y equivalent to BIOHOPK 44Y. WIM

4 units, **X:** *Win,* **Y:** *Spr (Malladi, S)*

HOPKINS MARINE STATION

For full descriptions of courses offered at the Hopkins Marine Station, see the "Hopkins Marine Station" section of this bulletin which follows immediately after this section. The following Hopkins Marine Station courses may be used toward the Biological Sciences degree requirements:

Core—

BIOHOPK 43. Plant Biology, Evolution, and Ecology (equivalent to BIOSCI 43)
BIOHOPK 44Y. Core Experimental Laboratory, equivalent to BIOSCI 44Y
BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology (can be used in place of BIOSCI 44Y)*
BIOHOPK 176H. Experimental Neurobiology (can be used in place of BIOSCI 44Y)*

*4 units count toward the BIOSCI 44Y requirement, with the remaining units counting as research/teaching under the upper-division elective requirement

Electives—

BIOHOPK 161H. Invertebrate Zoology (central menu area 3)
BIOHOPK 162H. Comparative Animal Physiology (central menu area 3)
BIOHOPK 163H. Oceanic Biology (central menu area 4)
BIOHOPK 164H. Marine Botany
BIOHOPK 166H. Molecular Biology
BIOHOPK 167H. Nerve, Muscle, and Synapse (central menu area 3)
BIOHOPK 169H. Neurobiology and Behavior (central menu area 3)
BIOHOPK 170H. Topics in Marine Biology
BIOHOPK 171H. Ecological and Evolutionary Physiology (central menu area 3)
BIOHOPK 172H. Marine Ecology (central menu area 4)
BIOHOPK 173H. Marine Conservation Biology
BIOHOPK 174H. Experimental Design and Probability
BIOHOPK 178H. Polar Biology
BIOHOPK 179H. Subtidal Communities
BIOHOPK 182H. Stanford at Sea (6 units maximum)
BIOHOPK 180H. Problems in Subtidal Ecology
BIOHOPK 183H. Environmental Cell & Developmental Biology (central menu area 2)
BIOHOPK 184H. Holistic Biology: Monterey Bay and the Sea of Cortez (6 units maximum)
BIOHOPK 186H. Ocean Pollution: Land, Air and Sea Interactions
BIOHOPK 274. Hopkins Microbiology Course (6 units maximum)
BIOHOPK 277H. Biomechanics, Ecological Physiology, and Genetics of Intertidal Communities

Research and/or Teaching (maximum 6 units combined)—

BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology
BIOHOPK 176H. Experimental Neurobiology
BIOHOPK 198H. Directed Instruction or Teaching
BIOHOPK 199H. Undergraduate Research
BIOHOPK 290H. Teaching of Biological Science
BIOHOPK 300H. Research

See Biological Science degree requirements above for further information. Many of the Hopkins Marine Station courses may be used to fulfill department major requirements.

INTERMEDIATE UNDERGRADUATE AND GRADUATE

BIOSCI 101. Ecology—The principles of ecology. Topics: interactions of organisms with their environment, dynamics of populations, species interactions, structure and dynamics of ecological communities, biodiversity. Prerequisites: 43, or consent of instructor. Recommended: statistics. GER:DB-NatSci

3 units, Aut (Vitousek, P; Dirzo, R)

BIOSCI 102. Demography: Health, Development, Environment—(Same as HUMBIO 119.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biological Sciences or Human Biology core; or consent of instructor. GER:DB-SocSci

3 units, not given this year (Tuljapurkar, S)

BIOSCI 104/200. Advanced Molecular Biology—Molecular mechanisms that govern the replication, recombination, and expression of eukaryotic genomes. Topics: DNA replication, DNA recombination, gene transcription, RNA splicing, regulation of gene expression, protein synthesis, and protein folding. Prerequisite: Biological Sciences core. GER:DB-NatSci

5 units, Win (Fang, G; Frydman, J)

BIOSCI 106. Human Origins—(Same as ANTHSCI 6/206, HUMBIO 6.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER:DB-NatSci

5 units, Win (Klein, R)

BIOSCI 109A/209A. The Human Genome and Disease—(Same as HUMBIO 158.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER:DB-NatSci

3 units, Win (Heller, R)

BIOSCI 109B/209B. The Human Genome and Disease: Genetic Diversity and Personalized Medicine—Continuation of 109A/209A. Genetic drift: the path of human predecessors out of Africa to Europe and then either through Asia to Australia or through northern Russia to Alaska down to the W. Coast of the Americas. Support for this idea through the histocompatibility genes and genetic sequences that predispose people to diseases. Guest lectures from academia and pharmaceutical companies. Prerequisite: Biological Sciences or Human Biology core. GER:DB-NatSci

3 units, Spr (Heller, R)

BIOSCI 112/212. Human Physiology—(Same as HUMBIO 133.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biological Sciences or Human Biology core. GER:DB-NatSci

4 units, Win (Garza, D)

BIOSCI 113/244. Fundamentals of Molecular Evolution—The inference of key molecular evolutionary processes from DNA and protein sequences. Topics include random genetic drift, coalescent models, effects and tests of natural selection, combined effects of linkage and natural selection, codon bias and genome evolution. Prerequisites: Biological Sciences core or graduate standing in any department, and consent of instructor. GER:DB-NatSci

4 units, Spr (Petrov, D)

BIOSCI 114. Field Course on Tropical Biogeochemistry: Amazon as Case Study—(Same as EARTHSYS 114.) Post-field seminar for students who went on the two-week field trip to the Amazon in September with Brazilian students under Professor Martinelli of the University of São Paulo and Stanford Latin American Studies. Land use changes over the last 30 years including the conversion of natural forest for cattle ranching and soy beans in the Amazon, the largest continuous area of tropical forests on Earth with the greatest number of plant and animal species. In English.

3 units, Aut (Vitousek, P)

BIOSCI 115. Signal Transduction and Development—The molecular basis of cell-cell communication during development. The cell biology and biochemistry of signaling by hormones and growth factors; focus is on the set of evolutionarily conserved signaling pathways that underlie crucial developmental processes such as cell fate specification, cellular differentiation, tissue organization, and cellular polarization. Current research literature. Prerequisites: BIOSCI 41, 42. Recommended: BIOSCI 129A, 129B, or 160.

4 units, Spr (Simon, M; Bergmann, D)

BIOSCI 117. Biology and Global Change—(Same as EARTHSYS 111, GEOPHYS 117.) The biological causes and consequences of anthropogenic and natural changes in the atmosphere, oceans, and terrestrial and freshwater ecosystems. Topics: glacial cycles and marine circulation, greenhouse gases and climate change, tropical deforestation and species extinctions, and human population growth and resource use. Prerequisite: Biological Sciences or Human Biology core or graduate standing. GER:DB-NatSci

4 units, Win (Vitousek, P; Arrigo, K)

BIOSCI 118/218. Genetic Analysis of Biological Processes—Genetic principles and their experimental applications. Emphasis is on the identification and use of mutations to study cellular function. Prerequisite: Biological Sciences core. GER:DB-NatSci

5 units, Spr (Baker, B)

BIOSCI 121. Biogeography—Global distributions of organisms through the Phanerozoic, with emphasis on historical causes. Topics: plate tectonics, island biogeography, climatic change, dispersal, vicariance, ecology of invasions, extinction, gradients, diversity. GER:DB-NatSci

3 units, not given this year (Hadly, E)

BIOSCI 125. Ecosystems of California—The diversity and functioning of California ecosystems through time and how human beings have impacted and managed them. Prerequisite: 43, HUMBIO 2A, or EARTHSYS 10. GER:DB-NatSci

3 units, Spr (Mooney, H)

BIOSCI 129A. Cellular Dynamics I: Cell Motility and Adhesion—Cell motility emphasizing role of actin assembly and dynamics coupling actin organization to cell movement. Interaction of cells with extracellular matrix, and remodelling of extracellular matrix in development and disease. Directed cell migration by chemotaxis (neuronal path-finding, immune cells). Cell-cell adhesion, formation of intercellular junctions and mechanisms regulating cell-cell interactions in development and diseases. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, Win (Nelson, W)

BIOSCI 129B. Cellular Dynamics II: Building a Cell—Principles of cell organization; how common biochemical pathways are modified to generate diversity in cell structure and function. Roles of actin and microtubule cytoskeletons in cellular architecture. Mechanisms of protein sorting and trafficking, and protein modules and switches in regulating cell polarity. Yeast to polarized epithelial cells and neurons. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Prerequisite: Biological Sciences core. Recommended: 129A. GER:DB-NatSci

4 units, Spr (Nelson, W)

BIOSCI 130. Current Issues in Paleoanthropology—(Same as ANTHSCI 130C/230C.) Current issues in fossil, archaeological, and genetic evidence for human evolution. Topics chosen by participants. May be repeated for credit.

1 unit, Aut, Win, Spr (DeGusta, D; Klein, R)

BIOSCI 132/232. Advanced Imaging Lab in Biophysics—(Same as BIOPHYS 232, MCP 232.) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor. GER:DB-NatSci

4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

BIOSCI 133. Genetics of Prokaryotes—Genetic approaches for understanding cellular processes in bacteria, including metabolism, adaptive and stress responses, signal transduction, gene expression, genetic exchange and recombination, chromosome dynamics and evolution, cell division, motility, surface attachment, and developmental responses. Emphasis is on the power of effectively combining genetics with biochemistry, microscopy, and genomics. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, alternate years, not given this year (Burkholder, W)

BIOSCI 134. Replication of DNA—Seminar. Modes of DNA replication and their control in prokaryotes and eukaryotes. Structures, properties, and functions of DNA polymerases and associated factors. Emphasis is on experimental approaches and their limitations. Current research literature. Students prepare journal club style report and lead class discussions. Enrollment limited to 20 advanced undergraduates. Prerequisite: Biological Sciences core. Recommended: 118. GER:DB-NatSci

3 units, not given this year (Burhkholder, W)

BIOSCI 135. Biological Clocks—(Same as HUMBIO 186.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER:DB-NatSci

3 units, Spr (Heller, C; Ruby, N)

BIOSCI 136. Evolutionary Paleobiology—A paleontological approach to evolutionary theory. Topics: history of life, speciation, heterochrony, evolutionary constraint, coevolution, macroevolution, the Cambrian Explosion, mass extinctions, taphonomy, life on land, life in the sea, life in the air. GER:DB-NatSci
4 units, not given this year (Hadly, E)

BIOSCI 137/237. Plant Genetics—Gene analysis, mutagenesis, transposable elements; developmental genetics of flowering and embryo development; biochemical genetics of plant metabolism; scientific and societal lessons from transgenic plants. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci
3 units, Spr (Walbot, V), alternate years, not given next year

BIOSCI 139. Biology of Birds—How birds interact with their environments and each other, emphasizing studies that had impact in the fields of population biology, community ecology, and evolution. Local bird communities. Emphasis is on field research. Enrollment limited to 20. Prerequisites: 43 or equivalent, and consent of instructor. Recommended: birding experience. GER:DB-NatSci
3 units, Spr (Root, T)

BIOSCI 140. Population Biology of Butterflies—Field work on Euphydryas populations under study on campus and elsewhere in California. Course offered as participation in research when conditions permit; decisions not made until Winter Quarter. Prerequisites: 43 and consent of instructor.
2-5 units, not given this year (Ehrlich, P)

BIOSCI 141. Biostatistics—(Same as STATS 141.) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. See http://www-stat.stanford.edu/~rag/stat141/. GER:DB-Math
4-5 units, Aut (Rogosa, D)

BIOSCI 142/242. Topics in Theoretical Ecology—Issues include foraging theory, demography and life history theory, population dynamics and species interactions including ecosystem stability, ecological economics and marine reserve design, evolutionary theory, evolutionary ecology, and evolution of gender sexuality and family structure. Prerequisites: 43 or 101, calculus, and computer programming. Recommended: linear algebra and differential equations. GER:DB-NatSci
3 units, alternate years, not given this year (Roughgarden, J)

BIOSCI 143/243. Evolution—The basic facts and principles of the evolution of all life. The logic of and evidence for the correctness of Darwin's argument for evolution by natural selection. How Mendelian genetics was integrated into evolutionary thinking. The integration of physiological and ecological perspectives into the study of evolutionary adaptation within species. Species formation and evolutionary divergence among species. Patterns of evolution over long time scales. GER:DB-NatSci
3 units, Aut (Watt, W)

BIOSCI 144. Conservation Biology—(Same as HUMBIO 112.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. 4 units if taken with a service learning component. Prerequisite: BIOSCI 101, or BIOSCI 43 or HUMBIO 2A with consent of instructor. GER:DB-NatSci
3-4 units, Win (Boggs, C; Launer, A)

BIOSCI 145/245. Behavioral Ecology—Animal behavior from an evolutionary and ecological perspective. Topics: foraging, territoriality, reproductive behavior, social groups. Lecture/seminar format; seminars include discussion of journal articles. Independent research projects. Prerequisites: Biological Sciences or Human Biology core, or consent of instructor. Recommended: statistics. GER:DB-NatSci, WIM
4 units, Spr (Gordon, D)

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.
1 unit, Win (Feldman, M)

BIOSCI 147/247. Controlling Climate Change in the 21st Century—(Same as EARTHSYS 147/247, HUMBIO 116.) The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes, and tradable permits; joint implementation, consensus, and division in the EU; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. GER:DB-NatSci
3 units, alternate years, not given this year (Schneider, S)

BIOSCI 149/249. The Neurobiology of Sleep—(Same as HUMBIO 161.) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER:DB-NatSci
4 units, not given this year (Heller, C)

BIOSCI 150/250. Human Behavioral Biology—(Same as HUMBIO 160.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER:DB-NatSci
5 units, Spr (Sapolsky, R), alternate years, not given next year

BIOSCI 151. Mechanisms of Neuron Death—For Biology majors with background in neuroscience. Cell and molecular biology of neuron death during neurological disease. Topics: the amyloid diseases (Alzheimer's), prion diseases (kuru and Creutzfeldt-Jakob), oxygen radical diseases (Parkinson's and ALS), triplet repeat diseases (Huntington's), and AIDS-related dementia. Student presentations. Enrollment limited to 15; application required.
3 units, Aut (Sapolsky, R)

BIOSCI 152. Imaging: Biological Light Microscopy—(Same as MCP 222, NBIO 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core. GER:DB-NatSci
3 units, Spr (Smith, S)

BIOSCI 153. Cellular Neuroscience: Cell Signaling and Behavior—(Same as PSYCH 120.) Neural interactions underlying behavior. Prerequisites: PSYCH 1 or basic biology. GER:DB-NatSci
4 units, Aut (Wine, J)

BIOSCI 154/254. Molecular and Cellular Neurobiology—(Same as NBIO 254.) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences core or equivalent, or consent of instructors. GER:DB-NatSci
4-5 units, alternate years, not given this year (Luo, L; Shen, K; Clandinin, T)

BIOSCI 157/257. Plant Biochemistry—The biochemistry of plants relevant to their physiology and cell biology. Topics include: the biosynthesis, assembly, function, and regulation of cell walls; lipids; pigments; photoreceptors; transporters; and the response of plants to pathogens and stresses. Prerequisite: Biological Sciences core or equivalent, or consent of instructors. GER:DB-NatSci

3-4 units, Spr (Mudgett, M)

BIOSCI 158. Developmental Neurobiology—For advanced undergraduates and coterminal students. The principles of nervous system development from the molecular control of patterning, cell-cell interactions, and trophic factors to the level of neural systems and the role of experience in influencing brain structure and function. Topics: neural induction and patterning cell lineage, neurogenesis, neuronal migration, axonal pathfinding, synapse elimination, the role of activity, critical periods, and the development of behavior. Prerequisite: 42 or equivalent. GER:DB-NatSci

4 units, alternate years, not given this year (McConnell, S; Shen, K; Garner, C)

BIOSCI 159/259. Chromatin Biology in Health and Disease—Molecular principles of chromatin dynamics, such as modification and remodeling, in the regulation of nuclear functions, and the relationship of these activities to human diseases. Topics include the role of chromatin biology in gene expression, gene silencing, DNA damage responses and repair, DNA recombination, and epigenetics. The molecular mechanisms behind chromatin signaling networks, and their perturbations in disease processes. Students identify open questions in the field and design experimental strategies to address these issues. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, Spr (Gozani, O; Chua, K)

BIOSCI 160. Developmental Biology—Focus is on the strategies and molecular mechanisms used to generate diverse cell types and tissues during embryonic and post-embryonic development in animals. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, Aut (Simon, M)

BIOSCI 163/263. Neural Systems and Behavior—(Same as HUMBIO 163.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIOSCI 42, HUMBIO 4A, or equivalents. GER:DB-NatSci

4 units, Aut (Fernald, R), alternate years, not given next year

BIOSCI 164/264. Biosphere-Atmosphere Interactions—Physiological, ecological, and physical aspects of ecosystem function, emphasizing how ecosystems influence and are influenced by the atmosphere. Prerequisites: 42, 43; or consent of instructor. GER:DB-NatSci

4 units, alternate years, not given this year (Field, C; Berry, J)

BIOSCI 165/265. Cellular and Molecular Therapeutic Approaches to Neurological Disorders—Current therapeutic research for neurological conditions, including stroke, epilepsy, neurodegenerative disorders, depression, anxiety, and aging. Sources include primary literature. Guest lecturers.

1 unit, Win (Sapolsky, R)

BIOSCI 175. Tropical Ecology and Conservation—Field trip to a field station at Los Tuxtlas, Mexico; lectures at Stanford. How to address scientific questions concerning ecology and conservation. Field trip includes natural history observations and group research projects. Symposium based on project results. Recommended: 43, 101, and 141 or STATS 60.

5 units, Spr (Dirzo, R)

BIOSCI 180/280. Fundamentals of Sustainable Agriculture—(Same as EARTHSYS 180/280.) Ecological, economic, and social dimensions of sustainable agriculture in the context of a growing world population. Focus is on management and technological approaches, and historical content of agricultural growth and change, organic agriculture, soil and water resource management, nutrient and pest management, biotechnology, ecosystem services, and climate change. GER:DB-NatSci

3 units, alternate years, not given this year (Naylor, R; Daily, G)

BIOSCI 183/283. Theoretical Population Genetics—Models in population genetics and evolution. Selection, random drift, gene linkage, migration, and inbreeding, and their influence on the evolution of gene frequencies and chromosome structure. Models are related to DNA sequence evolution. Prerequisites: calculus and linear algebra, or consent of instructor.

3 units, Win (Feldman, M)

BIOSCI 188/288. Biochemistry I—(Same as CHEMENG 181/281, CHEM 181; CHEMENG and CHEM offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Pre- or corequisites: CHEM 131; and CHEM 135 or 171. GER:DB-NatSci

3 units, Aut (Staff)

BIOSCI 189/289. Biochemistry II—(Same as CHEMENG 183/283, CHEM 183; CHEMENG and CHEM offerings formerly listed as 189/289.) Metabolism. Glycolysis, gluconeogenesis, citric acid cycle, oxidative phosphorylation, pentose phosphate pathway, glycogen metabolism, fatty acid metabolism, protein degradation and amino acid catabolism, protein translation and amino acid biosynthesis, nucleotide biosynthesis, DNA replication, recombination and repair, lipid and steroid biosynthesis. Medical consequences of impaired metabolism. Therapeutic intervention of metabolism. Prerequisite: BIOSCI 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288). GER:DB-NatSci

3 units, Win (Khosla, C)

UNDERGRADUATE, INVOLVING INDIVIDUAL WORK

Students majoring in Biological Sciences are encouraged to pursue directed reading and research opportunities. An introduction to research is provided by BIOSCI 2.

BIOSCI 191. Research in Bird Biology—Semi-independent field research in ornithology emphasizing ecological relationships. Projects involve research, planned and carried out by the student in consultation with the instructor. Results are written in publication format. Enrollment limited. Prerequisites: 43, concurrent or subsequent enrollment in 139, and consent of instructor.

1-4 units, Win, Spr (Root, T)

BIOSCI 193. Undergraduate Journal Club—Weekly discussion, led by students and facilitated by faculty, for reading scientific literature and presenting papers. Contact Tim Meier (gastrula@stanford.edu) by the fifth week of the previous quarter if requesting a particular research topic. Minimum enrollment required. Prerequisites: Biological Sciences core and consent of instructor. Recommended: 199 or 199X.

1 unit, Aut, Win, Spr (Meier, T)

BIOSCI 198. Directed Reading in Biological Sciences—Individually arranged under the supervision of members of the faculty.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 198X. Out-of-Department Directed Reading—Individually arranged under the supervision of members of the faculty. Credit for work arranged with out-of-department faculty is restricted to Biological Sciences majors and requires department approval. See http://biohonors.stanford.edu for information and petitions, or email gastrula@stanford.edu for more information.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 199. Advanced Research Laboratory in Experimental Biology—Individual research taken by arrangement with in-department instructors. See http://biohonors.stanford.edu for information on research sponsors, units, and credit for summer research, or email gastrula@stanford.edu.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 199X. Out-of-Department Advanced Research Laboratory in Experimental Biology—Individual research by arrangement with out-of-department instructors. Credit for 199X is restricted to declared Biological Sciences majors and requires department approval. See http://biohonors.stanford.edu for information on research sponsors, units, petitions, deadlines, credit for summer research, and out-of-Stanford research, or email gastrula@stanford.edu.

1-15 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

BIOSCI 203. Advanced Genetics—(Same as DBIO 203, GENE 203.) For graduate students in Bioscience programs; may be appropriate for other graduate students. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

BIOSCI 205. DNA Repair and Genomic Stability—Interactions of endogenous and environmental mutagens with cellular DNA. Cellular responses to damaged DNA including molecular mechanisms for DNA repair, translesion DNA synthesis, and genetic recombination. Inducible repair responses and error-prone mechanisms. Human hereditary diseases that predispose to cancer. Relationships of DNA repair to mutagenesis, carcinogenesis, aging, and human genetic disease. Current research literature. Prerequisites: 41 and 118, or consent of instructor.

3 units, Spr (Hanawalt, P; Ford, J)

BIOSCI 206. Field Studies in Earth Systems—(Same as EARTHSYS 189.) For advanced upper-division undergraduates and graduate students. Field-based, focusing on the components and processes by which terrestrial ecosystems function. Topics from biology, chemistry, ecology, geology, and soil science. Lecture, field, and lab studies emphasize standard field techniques, experimental design, analysis of data, and written and oral presentation. Small team projects test the original questions in the functioning of natural ecosystems. Admission by application; see Time Schedule. Prerequisites: BIOSCI 141 or GES 160, or equivalent.

5 units, alternate years, not given this year

BIOSCI 213. Biology of Viruses—Principles of virus growth, genetics, architecture, and assembly. The relation of temperate viruses and other episomes to the host cell. Prerequisite: Biological Sciences core. Recommended: 118.

3 units, Win (Campbell, A)

BIOSCI 214. Cell Biology of Physiological Processes—(Same as BIOC 224.) For Ph.D. students. Current research on cell structure, function, and dynamics. Topics include complex cell phenomena such as cell division, apoptosis, compartmentalization, transport and trafficking, motility and adhesion, differentiation, and multicellularity. Current papers from the primary literature. Prerequisite for advanced undergraduates: BIOSCI 129A,B, and consent of instructor.

2-5 units, Win (Theriot, J; Kopito, R; Nelson, W; Straight, A)

BIOSCI 215. Biochemical Evolution—Biochemical viewpoints on the evolutionary process. Topics: prebiotic biochemistry and the origins of life; adaptive organization of metabolism; enzyme polymorphisms and other biochemical aspects of population genetics; macromolecular phylogeny and protein clocks. Prerequisites: Biological Sciences core or substantial equivalent.

3 units, Win (Watt, W)

BIOSCI 216. Terrestrial Biogeochemistry—Nutrient cycling and the regulation of primary and secondary production in terrestrial, freshwater, and marine ecosystems; land-water and biosphere-atmosphere interactions; global element cycles and their regulation; human effects on biogeochemical cycles. Prerequisite: graduate standing in science or engineering; consent of instructor for undergraduates or coterminal students.

3 units, Spr (Vitousek, P), alternate years, not given next year

BIOSCI 217. Neuronal Biophysics—Biophysical descriptions and mechanisms of passive and excitable membranes, ion channels and pumps, action potential propagation, and synaptic transmission. Introduction to dynamics of single neurons and neuronal networks. Emphasis is on the experimental basis for modern research applications. Interdisciplinary aspects of biology and physics. Literature, problem sets, and student presentations. Prerequisites: undergraduate physics, calculus, and biology.

4 units, Spr (Schnitzer, M)

BIOSCI 221. Methods of Theoretical Population Biology—Formulation and analysis of problems in population biology using theoretical and computational numerical methods. Topics include deterministic and stochastic models, structured populations, stability and bifurcations, and data-driven models with applications in ecology and genetics. Prerequisites: recent courses in advanced calculus and linear algebra.

4 units, not given this year (Tuljapurkar, S)

BIOSCI 222. Exploring Neural Circuits—Seminar. The logic of how neural circuits control behavior; how neural circuits are assembled during development and modified by experience. Emphasis is on primary literature. Topics include: neurons as information processing units; simple and complex circuits underlying sensory information processing and motor control; and development and plasticity of neural circuits. Advanced undergraduates with background in physical science, engineering, and biological science may apply to enroll. Recommended: background in neuroscience.

3 units, not given this year (Luo, L)

BIOSCI 223. Stochastic and Nonlinear Dynamics—(Same as APPPHYS 223.) Theoretical analysis of dynamical processes: dynamical systems, stochastic processes, and spatiotemporal dynamics. Motivations and applications from biology and physics. Emphasis is on methods including qualitative approaches, asymptotics, and multiple scale analysis. Prerequisites: ordinary and partial differential equations, complex analysis, and probability or statistical physics.

3 units, Spr (Fisher, D)

BIOSCI 230. Molecular and Cellular Immunology—For graduate students and advanced undergraduates. Components of the immune system: structure and functions of antibody molecules; cellular basis of immunity and its regulation; molecular biology and biochemistry of antigen receptors and signaling pathways; genetic control of immunity and disease susceptibility. Emphasis is on key experimental approaches. Prerequisite for undergraduates: Biological Sciences or Human Biology core, or consent of instructor.

4 units, Aut (Jones, P)

BIOSCI 230A. Molecular and Cellular Immunology Literature Review—Supplement to 230. Corequisite: 230.

1 unit, Aut (Staff)

BIOSCI 258. Neural Development—For Ph.D. students. Seminar; students also attend BIOSCI 158 lectures. Topics: neural induction and patterning, cell lineage, neurogenesis, neuronal migration, axonal pathfinding, synapse elimination, the role of activity, critical periods, and the development of behavior.

4 units, not given this year (McConnell, S; Shen, K; Garner, C)

BIOSCI 261A. Advanced Topics in Behavioral Biology—Seminar. The biological roots of aggression, competition, cooperation, and altruism. Prerequisite: 150/250, and consent of instructor.

3 units, alternate years, not given this year (Sapolsky, R)

BIOSCI 261B. Advanced Topics in Behavioral Biology—Seminar. The biological roots of aggression, competition, cooperation, and altruism. Prerequisite: 150/250, and consent of instructor.
3 units, alternate years, not given this year (Sapolsky, R)

BIOSCI 267. Molecular Mechanisms of Neurodegenerative Disease—(Same as NENS 267.) The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.
4 units, Win (Kopito, R; Reimer, R; Wyss-Coray, A), alternate years, not given next year

BIOSCI 290. Teaching of Biological Sciences—Open to upper-division undergraduates and graduate students. Practical experience in teaching lab biology or serving as an assistant in a lecture course. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

BIOSCI 290X. Out-of-Department Teaching of Biological Science—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

BIOSCI 291. Development and Teaching of Core Experimental Laboratories—Preparation for teaching the core experimental courses (44X and 44Y). Emphasis is on lab, speaking, and writing skills. Focus is on updating the lab to meet the changing technical needs of the students. Must be taken prior to teaching either of the above courses. May be repeated for credit. Prerequisite: selection by instructor.
1-2 units, Aut, Win (Malladi, S)

BIOSCI 294. Cellular Biophysics—(Same as APPPHYS 294.) Physical biology of dynamical and mechanical processes in cells. Emphasis is on qualitative understanding of biological functions through quantitative analysis and simple mathematical models. Sensory transduction, signaling, adaptation, switches, molecular motors, actin and microtubules, motility, and circadian clocks. Prerequisites: differential equations and introductory statistical mechanics.
3 units, Aut (Fisher, D)

PRIMARILY FOR GRADUATE STUDENTS

BIOSCI 300. Graduate Research—For graduate students only. Individual research by arrangement with in-department instructors.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 300X. Out-of-Department Graduate Research—Individual research by arrangement with out-of-department instructors. Master's students: credit for work arranged with out-of-department instructors is restricted to Biological Sciences students and requires approved department petition. See http://biohonors.stanford.edu for information on research sponsors, units, petitions, deadlines, credit for summer research, and out-of-Stanford research, or email gastrula@stanford.edu. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 301. Frontiers in Biology—Limited to and required of first-year Ph.D. students in molecular, cellular, and developmental biology. Current research in molecular, cellular, and developmental biology emphasizing primary research literature. Held in conjunction with the department's Monday seminar series. Students and faculty meet weekly before the seminar for a student presentation and discussion of upcoming papers
1-3 units, Aut, Win (Gozani, O; Bergmann, D)

BIOSCI 302. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, not given this year

BIOSCI 303. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, not given this year

BIOSCI 304. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, Spr (Staff)

BIOSCI 306. Current Topics in Integrative Organismal Biology—Limited to and required of graduate students doing research in this field. At Hopkins Marine Station.
1 unit, Aut (Somero, G)

BIOSCI 312. Ethical Issues in Ecology and Evolutionary Biology—Focus is on ethical issues addressed in Donald Kennedy's *Academic Duty* and others of importance to academics and scientists in the fields of ecology, behavior, and evolutionary biology. Discussions led by faculty and outside guests. Satisfies ethics course requirement for ecology and evolutionary biology. Prerequisite: graduate standing in the ecology and evolutionary biology or marine program, or consent of instructor.
1 unit, Aut (Ehrlich, P)

BIOSCI 315. Seminar in Biochemical Evolution—Literature review and discussion of current topics in biochemical evolution and molecular evolutionary genetics. Prerequisite: consent of instructor.
1-3 units, Spr (Watt, W)

BIOSCI 325. The Evolution of Body Size—(Same as GES 325.) The influence of organism size on evolutionary and ecological patterns and processes. Focus is on integration of theoretical principles, observations of living organisms, and data from the fossil record. What are the physiological and ecological correlates of body size? Is there an optimum size? Do organisms tend to evolve to larger size? Does productivity control the size distribution of consumers? Does size affect the likelihood of extinction or speciation? How does size scale from the genome to the phenotype? How is metabolic rate involved in evolution of body size? What is the influence of geographic area on maximum body size?
2 units, not given this year (Hadly, E; Payne, J)

BIOSCI 342. Plant Biology Seminar—Topics announced at the beginning of each quarter. Current literature. May be repeated for credit. See http://carnegiedpb.stanford.edu/seminars/seminars.php.
1-3 units, Aut, Win, Spr (Walbot, V)

BIOSCI 344. Advanced Seminar in Cellular Biology—Enrollment limited to graduate students directly associated with departmental research groups working in cell biology.
1 unit, Aut, Win, Spr (Burkholder, W; Fang, G; Frydman, J; Kopito, R; Stearns, T; Cyert, M)

BIOSCI 346. Advanced Seminar on Prokaryotic Molecular Biology—Enrollment limited to graduate students associated with departmental research groups in genetics or molecular biology.
1 unit, Aut, Win, Spr (Long, S; Campbell, A; Burkholder, W; Spormann, A; Grossman, A; Yanofsky, C)

BIOSCI 358. Advanced Topics in Biological Sciences—Restricted to doctoral and medical students in neurobiology labs. May be repeated for credit.
1 unit, Aut, Win, Spr (Baker, B; Fernald, R; Luo, L; McConnell, S; Shen, K), Sum (Staff)

BIOSCI 383. Seminar in Population Genetics—Literature review, research, and current problems in the theory and practice of population genetics and molecular evolution. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Feldman, M)

BIOSCI 384. Theoretical Ecology—Recent and classical research papers in ecology, and presentation of work in progress by participants. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Roughgarden, J)

BIOSCI 385. Speaking About Science—Communication about science occurs in settings such as presenting scientific work to an audience of peers, communicating difficult concepts in a classroom, or describing a new finding to a reporter. Focus is on practice in speaking about science, emphasizing strategies for making difficult ideas easy to understand and integrating visual aids into oral presentations. Limited to Ph.D. students.

2 units, Spr (McConnell, S), alternate years, not given next year

BIOSCI 459. Frontiers in Interdisciplinary Biosciences—(Same as BIOC 459, BIOE 459, CHEMENG 459, CHEM 459, PSYCH 459.) (Crosslisted in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut, Win, Spr (Robertson, C)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the department's student services office for applicability of these courses to a major or minor program.

CEE 274A. Environmental Microbiology I—(Same as CHEMENG 174/274.)

3 units, Aut (Spormann, A), Sum (Sepulveda-Torres, L)

CEE 274B. Metabolic Biochemistry of Microorganisms—(Same as CHEMENG 456.)

3 units, Win (Spormann, A), alternate years, not given next year

DBIO 210. Developmental Biology

5 units, Spr (Villeneuve, A; Fuller, M)

SBIO 241. Biological Macromolecules—(Same as BIOC 241, BIOPHYS 241.)

3-5 units, Aut (Herschlag, D; Puglisi, J; McKay, D; Garcia, K; Ferrell, J; Block, S; Pande, V; Weis, W)

OVERSEAS STUDIES

These courses are approved for the Biological Sciences major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin, or at the Overseas Studies Office, 126 Sweet Hall.

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems

3 units, Aut (Hoegh-Guldberg, O; Ward, S; Arrigo, K; Anthony, K)

OSPAUSTL 20. Coastal Resource Management

3 units, Aut (Johnstone, R; Chiffings, T)

OSPAUSTL 30. Coastal Forest Ecosystems

3 units, Aut (Hall, J; Duke, N)

SANTIAGO

OSPSANTG 25. The Evolution and Ecology of the South American Biota

3 units, Aut (Hadly, E)

OSPSANTG 85. Marine Ecology of Chile and the South Pacific

5 units, Win (Palma, A)

DIVISION OF MARINE BIOLOGY HOPKINS MARINE STATION

Emeriti: (Professor) John H. Phillips, Jr.
Director: George N. Somero
Professors: Barbara A. Block, Mark W. Denny, David Epel, William F. Gilly, Stephen R. Palumbi, George N. Somero, Stuart H. Thompson
Assistant Professor: Fiorenza Micheli
Assistant Professor (Research): Anthony DeTomaso
Lecturer: James Watanabe

Station Offices: Oceanview Blvd., Pacific Grove, CA 93950
Phone: (831) 655-6200
Email: information@marine.stanford.edu
Web Site: http://hopkins.stanford.edu

Courses given in Marine Biology at the Hopkins Marine Station have the subject code BIOHOPK. For a complete list of subject codes, see Appendix.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. The modern laboratory facilities on the 11-acre campus on Cabrillo Point house ten faculty, all members of the Department of Biological Sciences. The Miller Library has a collection of literature in marine science. The Hopkins faculty offers undergraduate and graduate courses in biology which focus on the marine realm and involve topics including oceanography, environmental and comparative physiology, molecular evolution, biomechanics, cellular biology, conservation biology, and neurobiology and behavior. Most courses have laboratory sections that exploit the potential of working with readily available marine plants and animals. Small class sizes encourage close student-faculty interactions. Undergraduates have opportunities to carry out research projects with Hopkins faculty during the academic year or summer months. Courses are offered in Winter, Spring, and Summer quarters.

COURSES

BIOHOPK 43. Plant Biology, Evolution, and Ecology—Introduction to biology in a marine context. Principles of plant biology: physiology, structure, diversity. Principles of evolution: macro and microevolution, population genetics. Ecology: the principles governing the distribution and abundance of organisms; population, community, and ecosystem ecology. Equivalent to BIOSCI 43. GER:DB-NatSci

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

BIOHOPK 44Y. Core Experimental Laboratory—Laboratory and field projects provide working familiarity with the concepts, organisms, and techniques of plant and evolutionary biology, and ecology. Emphasis is on hands-on experimentation in the marine environment, analysis of data, and written and oral presentation of the experiments. Lab fee. Equivalent to BIOSCI 44Y. Corequisite: BIOHOPK 43. GER:DB-NatSci, WIM

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

BIOHOPK 56H. History and Philosophy of Science—The nature of scientific inquiry, its logic, historical patterns, and sociology. Emphasis is on the unique aspects of the biological sciences.

2 units, alternate years, not given this year (Somero, G)

BIOHOPK 161H/261H. Invertebrate Zoology—(Graduate students register for 261H.) Survey of invertebrate diversity emphasizing form and function in a phylogenetic framework. Morphological diversity, life histories, physiology, and ecology of the major invertebrate groups, concentrating on local marine forms as examples. Current views on the phylogenetic relationships and evolution of the invertebrates. Lectures, lab, plus field trips. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

5 units, Win (Watanabe, J)

BIOHOPK 162H/262H. Comparative Animal Physiology—(Graduate students register for 262H.) How animals work. Topics: physiology of respiration, circulation, energy metabolism, thermal regulation, osmotic regulation, muscle physiology, and locomotion. Evolutionary and ecological physiology. Lectures, lab, and field research. An option to combine the course work with a more intensive research focus, with more units, is available. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

5-8 units, not given this year (Block, B)

BIOHOPK 163H/263H. Oceanic Biology—(Graduate students register for 263H.) How the physics and chemistry of the oceanic environment affect marine plants and animals. Topics: seawater and ocean circulation, separation of light and nutrients in the two-layered ocean, oceanic food webs and trophic interactions, oceanic environments, biogeography, and global change. Lectures, discussion, and field trips. Recommended: PHYSICS 21 or 51, CHEM 31, Biological Sciences core, or consent of instructor. GER:DB-NatSci

4 units, not given this year (Denny, M; Somero, G)

BIOHOPK 164H/264H. Marine Botany—(Graduate students register for 264H.) Introduction to plants in the sea. Phytoplankton and oceanic productivity; macrophytes and nearshore ecology; marine angiosperms from taxonomical, physiological, and ecological perspectives. Lectures, lab. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

5 units, alternate years, not given this year

BIOHOPK 166H/266H. Molecular Ecology—(Graduate students register for 266H.) How modern technologies in gene sequencing, detection of nuclear nucleotide polymorphisms, and other approaches are used to gather data on genetic variation that allow measurement of population structure, infer demographic histories, inform conservation efforts, and advance understanding of the ecology of diverse types of organisms. GER:DB-NatSci

5 units, Win (Palumbi, S)

BIOHOPK 167H/267H. Nerve, Muscle, and Synapse—(Graduate students register for 267H.) Fundamental aspects of membrane excitability, nerve conduction, synaptic transmission, and excitation-contraction coupling. Emphasis is on biophysical, molecular, and cellular level analyses of these processes in vertebrate and invertebrate systems. Labs on intra- and extracellular recording and patch clamp techniques. Lectures, discussions, and labs. Prerequisites: PHYSICS 23, 28, 43, or equivalent; CHEM 31, 135; calculus; or consent of instructor. GER:DB-NatSci

5 units, alternate years, not given this year (Gilly, W)

BIOHOPK 169H/269H. Neurobiology and Behavior—(Graduate students register for 269H.) The neural mechanism responsible for generating animal behavior. Topics: sensory ecology, neuronal excitability, synaptic plasticity, and neural circuits. Lectures, discussions, demonstrations, and lab. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

5 units, Win (Thompson, S)

BIOHOPK 170H/270H. Topics in Marine Biology—(Graduate students register for 270H.) A topic of current interest to marine science explored through primary literature. Prerequisite: Biological Sciences core or consent of instructor. May be repeated for credit.

1 unit, Win (Epel, D; De Tomaso, A)

BIOHOPK 171H/271H. Ecological and Evolutionary Physiology—(Graduate students register for 271H.) The interplay between environmental factors, such as temperature, light, nutrient supply, salinity, and oxygen availability, and adaptive change at the physiological level. Emphasis is on marine species and the roles played by physiological adaptations in establishing their distribution and performance. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

4 units, not given this year (Somero, G)

BIOHOPK 172H/272H. Marine Ecology—(Graduate students register for 272H.) Focus is on quantitative approaches to questions in marine ecology and ecophysiology. Statistical methods, including multivariate statistical approaches and meta-analysis. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

5 units, Win (Micheli, F)

BIOHOPK 173H/273H. Marine Conservation Biology—(Graduate students register for 273H.) The science of preserving marine diversity. Goal is to introduce students to major conservation issues associated with marine ecosystems. Topics include decline of open ocean fisheries, salmon conservation, bycatch issues in fisheries, use of marine reserves, marine invasions, marine pollution, and global warming. Includes five lecturers from other universities who specialize in marine conservation.

1-3 units, Spr (Micheli, F; Palumbi, S)

BIOHOPK 174H/274H. Experimental Design and Probability—(Graduate students register for 274H.) Variability is an integral part of biology. Introduction to probability and its use in designing experiments to address biological problems. Focus is on analysis of variance, when and how to use it, why it works, and how to interpret the results. Design of complex, but practical, asymmetrical experiments and environmental impact studies, and regression and analysis of covariance. Computer-based data analysis. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

3 units, Spr (Watanabe, J)

BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology—Field-based, emphasizing individual and small group research for advanced undergraduates. Students learn field and laboratory techniques to address ecological, ecophysiological, and biomechanical problems faced by marine organisms. Original research projects may be integrated with ongoing research programs in the Hopkins Marine Life refuge. Prerequisites: Biological Sciences core, consent of instructor. GER:DB-NatSci, WIM

10 units, Spr (Epel, D; Somero, G)

BIOHOPK 176H. Experimental Neurobiology—Lab, emphasizing methods in the neurosciences, including electrophysiological, biochemical, molecular, behavioral, and histological techniques. Students work on individual original research projects under guidance of the faculty. Prerequisites: strong interest in neurobiology and previous relevant course work, consent of instructors. GER:DB-NatSci, WIM

6-12 units, Spr (Thompson, S)

BIOHOPK 178H/278H. Polar Biology—(Graduate students register for 278H.) Seminar. Adaptation to extreme environments by Arctic and Antarctic organisms, from microbes to diving mammals. The effects of global change on polar environments. Prerequisites: Biological Sciences core or consent of instructor.

2 units, alternate years, not given this year (Somero, G)

BIOHOPK 182H/323H. Stanford at Sea—(Graduate students register for 323H; same as EARTHSYS 323.) Five weeks of marine science including oceanography, marine physiology, policy, maritime studies, conservation, and nautical science at Hopkins Marine Station, followed by five weeks at sea aboard a sailing research vessel in the Pacific Ocean. Shore component comprised of three multidisciplinary courses meeting daily and continuing aboard ship. Students develop an independent research project plan while ashore, and carry out the research at sea. In collaboration with the Sea Education Association of Woods Hole, MA. Only 6 units may count towards the BioSci major. GER:DB-NatSci

16 units, alternate years, not given this year (Block, B; Dunbar, R; Micheli, F)

BIOHOPK 183H/283H. Environmental Cell and Developmental Biology—(Graduate students register for 283H.) How external signals alter cell activity and developmental trajectory. Survey of cell and developmental phenomena. GER:DB-NatSci

4 units, Spr (Epel, D)

BIOHOPK 184H/284H. Holistic Biology: Monterey Bay and the Sea of Cortez—(Graduate students register for 284H.) For majors and non-majors. Complexity in natural systems from complementary points of view, including scientific, historical, philosophical, and literary. The work and writings of Ed Ricketts and John Steinbeck and historical and contemporary works concerning marine ecology and fisheries. Field work, laboratory studies with living invertebrates, and an individual research project. Course includes a component in Baja California, Mexico. Only 6 units may count towards the BioSci major. GER:DB-NatSci

16 units, Spr (Gilly, W) alternate years, not given next year

BIOHOPK 186H/286H. Ocean Pollution: Land, Air, and Sea Interactions—(Graduate students register for 286H.) The scientific basis of environmental pollution; how organisms protect themselves against toxicants; how protection can be overcome; policy issues in government regulation of pollution.

3 units, Win (Epel, D)

BIOHOPK 198H. Directed Instruction or Reading—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research. Credit for work arranged with out-of-department instructors restricted to Biological Sciences majors and requires department approval.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOHOPK 199H. Undergraduate Research—Qualified undergraduates undertake individual work in the fields listed under 300H. Arrangements must be made by consultation or correspondence.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOHOPK 290H. Teaching of Biological Science—Open to upper-division undergraduates and graduate students. Practical experience in teaching lab biology or serving as an assistant in a lecture course. Prerequisite: consent of instructor.

1-15 units, Win, Spr, Sum (Staff)

BIOHOPK 300H. Research—Graduate study involving original work undertaken with staff in the fields indicated:

B. Block: Comparative Vertebrate Physiology—biomechanics, metabolic physiology and phylogeny of pelagic fishes, evolution of endothermy.

M. Denny: Biomechanics—the mechanical properties of biological materials and their consequences for animal size, shape, and performance.

A. De Tomaso: Developmental and Comparative Immunology, Stem Cell Biology—evolution of self/non-self recognition systems.

D. Epel: Developmental Biology—physiology and regulation of early embryonic development. Embryonic adaptation to environmental stress.

W. Gilly: Neurobiology—analysis of giant axon systems in marine invertebrates from molecular to behavioral levels.

F. Micheli: Marine Ecology—species interactions and community ecology, scale-dependent aspects of community organization, marine conservation and design of multi-species marine protected areas, behavioral ecology.

S. Palumbi: Molecular Evolution—mechanisms of speciation, genetic differentiations of populations, use of molecular tools in conservation biology, design of marine protected areas.

G. Somero: Ecological and Evolutionary Physiology—adaptations of marine organisms to the environment: temperature, pressure, desiccation, and oxygen availability.

S. Thompson: Neurobiology—neuronal control of behavior and mechanisms of ion permeation, signal transduction, calcium homeostasis, and neurotransmission.

J. Watanabe: Marine Ecology—kelp forest ecology and invertebrate zoology.

SUMMER PROGRAM

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer's study of marine life. Applications and further information may be obtained by writing to Hopkins Marine Station, Pacific Grove, CA 93950. Completed applications should be submitted by April 15. Applications received later are considered if space is still available.

Summer Quarter is divided into two terms. It is possible to register for either term, or for the full quarter. Registration is possible for only one course during each term.

FIRST TERM

BIOHOPK 179H/279H. Subtidal Communities—(Graduate students register for 279H.) Lectures, lab, and field trips treating shallow water marine communities. Emphasis is on local habitats and the introduction of physical environmental parameters, community composition, aspects of the biology of constituent species, and methods for subtidal studies. Prerequisites: scuba certification, scuba equipment, ocean diving experience, and some background in biology. GER:DB-NatSci

6 units, Sum (Watanabe, J)

BIOHOPK 274. Hopkins Microbiology Course—(Same as BIOSCI 274S, CEE 274S, GES 274S.) Four-week, intensive. The interplay between molecular, physiological, ecological, evolutionary and geochemical processes that constitute, cause, and maintain microbial diversity. How to isolate key microorganisms driving marine biological and geochemical diversity, interpret culture-independent molecular characterization of microbial species, and predict causes and consequences. Laboratory component: what constitutes physiological and metabolic microbial diversity; how evolutionary and ecological processes diversify individual cells into physiologically heterogeneous populations; and the principles of interactions between individuals, their population, and other biological entities in a dynamically changing microbial ecosystem. Prerequisites: CEE 274A,B, or equivalents.

9-12 units, Sum (Spormann, A; Francis, C)

BIOHOPK 277H. Biomechanics, Ecological Physiology, and Genetics of Intertidal Communities—Introduction to the mechanical and physiological design of wave-swept organisms. How different abiotic stresses (wave exposure, wind speed, temperature, light) influence marine animals and plants, and adaptive responses to these stresses. Lab introduces methods for measuring environmental stress and organismal responses. Recommended: background in algology, intertidal ecology, or invertebrate zoology; basic physics and calculus.

4 units, alternate years, not given this year
(Denny, M; Palumbi, S; Somero, G)

SECOND TERM

BIOHOPK 180H/280H. Problems in Subtidal Ecology—(Graduate students register for 280H.) Group and individual research projects focus on shallow water marine communities. Daily lectures, SCUBA dives, labs. Prerequisites: SCUBA certification; advanced or comparable experience, or 179H. GER:DB-NatSci

6 units, Sum (Watanabe, J)

BIOPHYSICS PROGRAM

Emeritus: Harden M. McConnell (Chemistry)

Director: William I. Weis

Professors: Russ Altman (Genetics, Medical Informatics), Steve Block (Applied Physics, Biological Sciences), Steven Boxer (Chemistry), Axel Brunger (Molecular and Cellular Physiology), Douglas Brutlag (Biochemistry), Gilbert Chu (Oncology), Mark Davis (Microbiology and Immunology), Sebastian Doniach (Physics, Applied Physics), James Ferrell (Chemical and Systems Biology), K. Christopher Garcia (Molecular and Cellular Physiology, Structural Biology), Gary Glover (Radiology), Philip C. Hanawalt (Biological Sciences), Daniel Herschlag (Biochemistry), Keith O. Hodgson (Chemistry), Chaitan Khosla (Chemical Engineering, Chemistry), Brian Kobilka (Molecular and Cellular Physiology), Eric Kool (Chemistry), Ron Kopito (Biological Sciences), Roger D. Kornberg (Structural Biology), Michael Levitt (Structural Biology), Richard Lewis (Molecular and Cellular Physiology), David B. McKay (Structural Biology), Uel J. McMahan (Neurobiology), Tobias Meyer (Chemical and Systems Biology), W. E. Moerner (Chemistry), Norbert Pelc (Bioengineering, Radiology), Joseph D. Puglisi (Structural Biology), Stephen Quake (Bioengineering), Stephen J. Smith (Molecular and Cellular Physiology), Edward I. Solomon (Chemistry), James A. Spudich (Biochemistry, Developmental Biology), William I. Weis (Structural Biology, Molecular and Cellular Physiology), Richard N. Zare (Chemistry)

Associate Professors: Judith Frydman (Biological Sciences), Pehr Harbury (Biochemistry), Craig Levin (Radiology), Vijay Pande (Chemistry), Julie Theriot (Biochemistry)

Assistant Professors: Zev Bryant (Bioengineering), Xiaoyuan Chen (Radiology), Jennifer Cochran (Bioengineering), Miriam Goodman (Molecular and Cellular Physiology), Merritt Maduke (Molecular and Cellular Physiology), Jianghong Rao (Radiology), Mark Schnitzer (Biological Sciences, Applied Physics)

Program Offices: Fairchild Building D118
Mail Code: 94305-5126
Phone: (650) 723-7576
Email: biophysics@med.stanford.edu
Web Site: http://med.stanford.edu/biophysics/

Courses given in Biophysics have the subject code BIOPHYS. For a complete list of subject codes, see Appendix.

The Biophysics Program offers instruction and research opportunities leading to the Ph.D. in Biophysics. Students admitted to the program may perform their graduate research in any appropriate department.

GRADUATE PROGRAM

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" section of this bulletin.

A small number of qualified applicants are admitted to the program each year. Applicants should present strong undergraduate backgrounds in the physical sciences and mathematics. The graduate course program, beyond the stated requirements, is worked out for each student individually with the help of appropriate advisers from the Committee on Biophysics. The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a) CHEM 131, 171, 173, and 175
   b) BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a) SBIO 241 and 242
   b) at least four additional graduate level courses in physical or biological science
   c) BIOPHYS 250
   d) MED 255
4. Opportunities for teaching are available during the first nine quarters, at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken, including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Biophysics Program. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of biophysics.
7. The student must pass the University oral exam, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

COURSES

BIOPHYS 227. Functional MRI Methods—(Same as RAD 227.) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics. Recommended: neuroscience.
3 units, alternate years, not given this year

BIOPHYS 228. Computational Structural Biology—(Same as SBIO 228.) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.
3 units, Aut, Spr (Levitt, M)

BIOPHYS 232. Advanced Imaging Lab in Biophysics—(Same as BIOSCI 132/232, MCP 232.) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor.
4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

BIOPHYS 241. Biological Macromolecules—(Same as BIOC 241, SBIO 241.) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.
3-5 units, Aut (Herschlag, D; Puglisi, J; Garcia, K; Ferrell, J; Block, S; Pande, V; Weis, W)

BIOPHYS 242. Methods in Molecular Biophysics—(Same as SBIO 242.) The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biophysics from theoretical and practical stand-points. Emphasis is on X-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods. Prerequisite: physical chemistry or consent of instructor.

3 units, alternate years, not given this year

BIOPHYS 250. Seminar in Biophysics—Required of Biophysics graduate students. Presentation of current research projects and results by faculty in the Biophysics program. May be repeated for credit.

1 unit, Aut, Win (Weis, W)

BIOPHYS 297. Bio-Inorganic Chemistry—(Same as CHEM 297.) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: CHEM 153 and 173, or equivalents.

3 units, Win (Solomon, E)

BIOPHYS 300. Graduate Research—Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOPHYS 399. Directed Reading in Biophysics—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOC 210. Advanced Topics in Membrane Trafficking

3 units, Spr (Staff)

BIOSCI 205. DNA Repair and Genomic Stability

3 units, Spr (Hanawalt, P; Ford, J)

MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology

4 units, Spr (Maduke, M; Goodman, M)

CHEMISTRY*

Emeriti: (Professors) William A. Bonner, James P. Collman, Carl Djerassi, Harden M. McConnell, John Ross, Douglas A. Skoog, Eugene E. van Tamelen

Chair: Richard N. Zare

Vice Chair: Wray H. Huestis

Professors: Hans C. Andersen, Steven G. Boxer, John I. Brauman, Hongjie Dai, Michael D. Fayer, Keith O. Hodgson, Wray H. Huestis, Chaitan Khosla, Eric T. Kool, W. E. Moerner, Robert Pecora, Edward I. Solomon, Barry M. Trost, Robert M. Waymouth, Paul A. Wender, Richard N. Zare

Associate Professors: Christopher E. D. Chidsey, Justin Du Bois, Vijay S. Pande, T. Daniel P. Stack

Assistant Professors: Dmitry V. Yandulov

Courtesy Professors: Stacey F. Bent, Curtis W. Frank, Daniel Herschlag

Courtesy Associate Professor: Karlene A. Cimprich

Courtesy Assistant Professors: James K. Chen, Thomas J. Wandless

Lecturers: John A. Flygare, Hillary Hua, Christopher R. Moylan

Director of Undergraduate Laboratories: Christopher R. Moylan

---

* The curriculum leading to the B.S. degree in Chemical Engineering is described in the "School of Engineering" section of this bulletin.

Department Offices: 121 S. G. Mudd

Mail Code: 94305-5080

Phone: (650) 723-2501

Web Site: http://www.stanford.edu/dept/chemistry/

Courses given in Chemistry have the subject code CHEM. For a complete list of subject codes, see Appendix.

Chemistry is central to many scientific disciplines and plays an important role in the emerging areas of biotechnology and material science. Fluorescent imaging of biological molecules, modeling of protein folding, manipulation of carbon nanotubes, development of new oxidation and polymerization catalysts, and synthesis of organic molecules for probing ion-channels are all research areas that are pursued actively in the Chemistry department. The overarching theme of these pursuits is a focus at the atomic and molecular levels, whether this concerns probing the reactivity of molecules as small as dihydrogen or synthesizing large polymer assemblies. The ability to synthesize new molecules and materials and to modify existing structures allows the exploration of properties of well-defined systems through systematic modification. The Chemistry department has a long-standing tradition of encouraging undergraduate majors to become involved in research during the academic year and through the 10-week Bing Summer Research Program.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

Entrance Preparation—Entrance credit in the preparatory subjects of chemistry, physics, and especially mathematics provides flexibility in creating a four-year schedule for students intending to major in Chemistry.

Requirements—

Chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 153, 171, 173, 174, 175, 176; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43, 44, 45, 46.

Biological chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 171, 173, 176, 181, 183, 184, 185; BIOSCI 41, 42, 44X; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43; an approved, elective, graduate-level class related to the student's biochemical interests.

In addition, CS 106A and B are recommended for students planning graduate study. All degree courses must be taken for a letter grade. For further information on the undergraduate program, see http://www.stanford.edu/dept/chemistry/academic/under.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM: CHEMISTRY OPTION

FIRST YEAR

Subject and Catalog Number	*Qtr. and Units*		
	A	*W*	*S*
CHEM 31X. Chemical Principles	4		
CHEM 33. Structure and Reactivity		4	
CHEM 35. Organic Monofunctional Compounds			4
CHEM 36. Organic Chemistry Laboratory I			3
MATH 41, 42, 51. Calculus, Linear Equations	5	5	5

SECOND YEAR

CHEM 130. Organic Chemistry Laboratory II	4		
CHEM 131. Organic Polyfunctional Compounds	3		
CHEM 134. Analytical Chemistry Laboratory			5
CHEM 136. Synthesis Laboratory		3	
MATH 53. Differential Equations			5
PHYSICS 41, 43, 44. Mechanics, Electricity and Magnetism		4	5

THIRD AND FOURTH YEARS

CHEM 151, 153. Inorganic Chemistry		3	3
CHEM 171, 173, 175. Physical Chemistry	3	3	3
CHEM 174, 176. Physical Chemistry Laboratory		4	3
PHYSICS 45, 46. Light and Heat	5		

---

* Elective courses must be used to complete the University Writing, General Education, and Language Requirements. They may also be used to broaden one's background in science and nonscience areas and to provide an opportunity for advanced study in Chemistry. Courses offered by other departments that may be of interest to Chemistry majors include BIOSCI 41, 42, 43; CHEMENG 20, 120A,B, 130; CS 106A,B; ECON 1; ENGR 50; MATH 52, 106, 109, 113, 131; MATSCI 50; PHYSICS 110; STATS 60, 110, 116.

MINORS

Courses required for a minor are CHEM 33, 35, 36, 130, 131, 134, 151, 171; MATH 51; and PHYSICS 21, 23, 25, or 28, 29, or 41, 43, 45 (no substitutions). All courses must be taken for a letter grade.

PRE-MEDICAL RECOMMENDATIONS

The department recommends that pre-med students take the following courses for a letter grade: 31A,B or 31X, 33, 35, 36, 130, 131, 135 or 171, and 181. Historically, these courses have fulfilled the chemistry requirements at most medical schools. For information on medical school advising and resources, download the Undergraduate Advising and Research publication at http://uar.stanford.edu/pdfs/MedSchool.pdf.

AMERICAN CHEMICAL SOCIETY CERTIFICATION

Students who wish to be certified as having met the minimum requirements of the American Chemical Society for professional training must complete, in addition to the above requirements, CHEM 181 and 183, and 6 units of CHEM 190.

HONORS PROGRAM

A B.S. degree in Chemistry with honors is available to those students interested in chemical research. Admission to the honors program requires a scientific grade point average (GPA) of 3.3 and an overall GPA of 3.0 in all University courses. Beyond the standard B.S. course requirements for each track, 9 units of CHEM 190 research credit, 9 units of course work need to be completed during the junior and senior academic years. A thesis, approved by a Chemistry research adviser, must be completed during the senior year. Theses must be completed by May 31 to be considered for the Firestone or Golden award. The use of a single course for multiple requirements for honors, major, minor, or coterminal requirements is not allowed. Students who wish to be admitted to the honors program should register in the department student services office in the Mudd Chemistry building in Spring Quarter of the junior year.

CHEM 190 research units towards honors may be completed, once accepted into the program, in any laboratory within Chemistry or with courtesy faculty in Chemistry. Other chemical research can be approved through a formal petitioning of the undergraduate studies committee. At least 3 units of CHEM 190 must be completed during the senior year. Participation in a summer research program in an academic setting between junior and senior years may be used in lieu of 3 units of CHEM 190. For each quarter, a progress report reflecting the units undertaken is required. This report must be signed by the Chemistry faculty adviser and filed in the department student services office in Mudd Chemistry before the last day of finals in the quarter during which the research is performed.

The 9 units of course work must be completed from courses approved by the undergraduate studies committee and taken for a letter grade. At least six of these units need to be taken from following CHEM courses: 153, 174, 175, 181, 183, 185, 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 297. Courses from Mathematics (MATH 114 or higher), Physics (PHYSICS 100 or higher), Engineering, and Structural Biology or Biochemistry in the School of Medicine can be used to fulfill this requirement.

TEACHING CREDENTIALS

The requirements for certification to teach chemistry in the secondary schools of California may be ascertained by consulting the section on credentials under the "School of Education" section of this bulletin and the Credential Administrator of the School of Education.

GRADUATE PROGRAMS

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

GENERAL REQUIREMENTS

Placement Examinations—Each new graduate student must take placement examinations upon entrance. These consist of three written examinations of two hours each in the fields of inorganic, organic, and physical chemistry, and cover such material as ordinarily is given in a rigorous one-year undergraduate course in each of these subjects. Students majoring in biophysical chemistry or chemical physics must take examinations in biophysical or chemical physics, physical chemistry, and organic or inorganic chemistry. All placement examinations are given the week before instruction begins in Autumn Quarter, and must be taken at that time. Each new graduate student meets with a member of the graduate study committee to define a program of courses based on results of the placement examinations.

Candidates for advanced degrees must have a minimum grade point average (GPA) of 3.0 for all Chemistry lecture courses as well as for all courses taken during graduate study. Required courses must be taken for a letter grade. Most course work ends in the second year of studies and students will then focus on full-time dissertation research. All prospective Ph.D. candidates, regardless of the source of financial support, are required to gain teaching experience as an integral part of graduate training. During the period in which a dissertation is being read by members of the faculty, candidates must be available for personal consultation until the dissertation has had final department approval.

MASTER OF SCIENCE

The Master of Science is available only to current Ph.D. students or as part of a coterminal program. Applicants for the M.S. degree in Chemistry are required to complete, in addition to the requirements for the bachelor's degree, a minimum of 45 units of work and a M.S. thesis. Of the 45 units, approximately two-thirds must be in the department and must include at least 12 units of graduate-level lecture courses exclusive of the thesis. Of the 12 units, at least 6 units must be from CHEM 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 276, 277, 280, or 297.

DOCTOR OF PHILOSOPHY

Graduate students are eligible to become formal candidates for the Ph.D. degree after taking the department placement examinations, satisfactorily completing most of the formal lecture course requirements, and beginning satisfactory progress on a dissertation research project. They then file for admission to candidacy for the Ph.D. degree. This filing must be done before June of the second year of graduate registration.

After taking the departmental placement examinations, students select research advisers by first interviewing members of the Chemistry faculty about their research. Students then file an Application to Start Research form with the Department of Chemistry graduate study committee and begin research on their Ph.D. dissertation under the supervision of the adviser. All students in good standing are required to start research by the end of the Winter Quarter of the first year of graduate registration.

There is no foreign language requirement for the Ph.D. degree.

Candidates for the Ph.D. degree are required to participate continually in the department colloquium (CHEM 300), and in the division seminar of the major subject. In addition, continuous enrollment in CHEM 301 is expected after the student has chosen a research supervisor. As part of graduate training, Ph.D. candidates are required to gain experience as teaching assistants.

Before candidates may request scheduling of the University oral examination, clearance must be obtained from the major professor and the chair of the department's Graduate Study Committee. Conditions that must be fulfilled before clearance is granted vary with the different divisions of the department and may be ascertained by consulting the chair of the committee.

It is the policy of the department to encourage and support in every possible way the pursuit of research and other advanced work by qualified students. Information about faculty members with lists of their recent research publications is found in *Chemistry at Stanford, the Directory of Graduate Research* published by the American Chemical Society, and at http://www.stanford.edu/dept/chemistry/faculty.html.

COURSE REQUIREMENTS

Students may major in biophysical, inorganic, organic, or physical chemistry. All graduate students are required to take six graduate-level lecture courses (course numbers greater than 199) of at least 3 units each in chemistry or related disciplines (for example, biochemistry, electrical engineering, mathematics, pharmacology, physics, and so on), to be selected in consultation with their research adviser and the Graduate Study Committee. At least four of these courses should be taken by the end of the first year. Required courses must be taken for a letter grade.

In addition, students majoring in organic chemistry must take 3 units of CHEM 231 in the second year and 3 units of 233 in the second and third year. Students in physical or biophysical chemistry or chemical physics must take CHEM 271, 273, and 275 in the first year, and 2 units of CHEM 278 in the second and third year. Students majoring in inorganic chemistry must take 3 units of CHEM 258 in the second, third, and fourth year.

CHEMICAL PHYSICS

Students with an exceptionally strong background in physics and mathematics may, upon special arrangement, pursue a program of studies in chemical physics.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in chemistry must complete, with a GPA of 3.0 or higher, 20 graduate-level units in Chemistry including four lecture courses of at least 3 units each.

FELLOWSHIPS AND SCHOLARSHIPS

In addition to school fellowships and scholarships open to properly qualified students, there are several department fellowships in chemistry. Undergraduate scholarships are administered through the Financial Aid Office. Teaching assistantships and research assistantships are open to graduate students. Graduate fellowships, scholarships, and teaching assistantships are administered through the Department of Chemistry.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Note—Lab fees are a minimum of $75 per quarter and are not refundable.

UNDERGRADUATE

CHEM 22N. Naturally Dangerous—Stanford Introductory Seminar. Preference to freshmen. Topics from Collman's *Naturally Dangerous: Surprising Facts About Food, Health, and the Environment*. Designed for nonscientists, but also of interest to scientists and engineers.
2 units, Aut (Collman, J)

CHEM 24N. Nutrition and History—Stanford Introductory Seminar. Preference to freshmen. Intended to broaden the introductory chemistry experience. The biochemical basis of historically important nutritional deficiencies (vitamins, minerals, starvation, metabolic variants that predispose to disease) and environmental toxins is related to physiological action and the sociological, political, and economic consequences of its effect on human populations. Prerequisite: high school chemistry. Recommended: 31A,B, or 31X, or 33.
2 units, Spr (Huestis, W)

CHEM 25N. Science in the News—Stanford Introductory Seminar. Preference to freshmen. Possible topics include: diseases such as avian flu, HIV, SARS, and malaria; environmental issues such as climate change, and atmospheric pollution, and human population; evolution; stem cell research; nanotechnology; and drug development. The scientific basis for these topics to have an intelligent discussion of societal and political implications. Sources include the popular media and scientific media for the nonspecialist, especially those available on the web. GER:DB-NatSci
3 units, Aut (Andersen, H)

CHEM 27N. Lasers: The Light Fantastic—Stanford Introductory Seminar. Preference to freshmen. Introduction to lasers and their impact on everyday life. The operation of lasers using concepts of atomic and molecular energy levels, optics, and resonance. The use of lasers to produce guide stars for astronomy, sculpt the cornea, measure molecules in the ozone layer, transmit optical information over the web, measure the distance to the moon, and observe a single protein molecule in action. Prerequisites: CHEM 31A or X, or PHYSICS 23 and 25, or equivalents. GER:DB-NatSci
3 units, Win (Moerner, W)

CHEM 31A. Chemical Principles I—For students with moderate or no background in chemistry. Stoichiometry; periodicity; electronic structure and bonding; gases; enthalpy; phase behavior. Emphasis is on skills to address structural and quantitative chemical questions; lab provides practice. Recitation. GER:DB-NatSci
4 units, Aut (Chidsey, C)

CHEM 31B. Chemical Principles II—Chemical equilibria; acids and bases; oxidation and reduction reactions; chemical thermodynamics; kinetics. Lab provides practice. Recitation. Prerequisite: 31A. GER:DB-NatSci
4 units, Win (Andersen, H)

CHEM 31X. Chemical Principles—Accelerated; for students with substantial chemistry background. Chemical equilibria concepts, equilibrium constants, acids and bases, chemical thermodynamics, quantum concepts, models of ionic and covalent bonding, atomic and molecular orbital theory, periodicity, and bonding properties of matter. Recitation. Prerequisites: AP chemistry score of 5 or passing score on chemistry placement test. Recommended: high school physics. GER:DB-NatSci
4 units, Aut (Waymouth, R; Fayer, M), Sum (Staff)

CHEM 33. Structure and Reactivity—Organic chemistry, functional groups, hydrocarbons, stereochemistry, thermochemistry, kinetics, chemical equilibria. Recitation. Prerequisite: 31A,B, or 31X, or an AP Chemistry score of 5. GER:DB-NatSci
4 units, Win (Stack, T; Du Bois, J), Spr (Wender, P), Sum (Staff)

CHEM 35. Organic Monofunctional Compounds—Organic chemistry of oxygen and nitrogen aliphatic compounds. Recitation. Prerequisite: 33. GER:DB-NatSci
4 units, Aut, Spr (Huestis, W), Sum (Staff)

CHEM 36. Organic Chemistry Laboratory I—Techniques for separations of compounds; distillation, crystallization, extraction, and chromatographic procedures. Lecture treats theory; lab provides practice. Limited enrollment Spring Quarter; preference to students who have completed 33 or by consent of instructor. GER:DB-NatSci
3 units, Aut (Moylan, C), Spr (Hua, Y), Sum (Moylan, C)

CHEM 110. Directed Instruction/Reading—Undergraduates pursue a reading program under supervision of a faculty member in Chemistry; may also involve participation in lab. Prerequisites: superior work in 31A,B, 31X, or 33; and consent of instructor and the Chemistry undergraduate study committee.
1-2 units, Aut, Win, Spr, Sum (Staff)

CHEM 111. Exploring Chemical Research at Stanford—Preference to freshmen and sophomores. Department faculty describe their cutting-edge research and its applications.
1 unit, Win (Yandulov, D)

CHEM 130. Organic Chemistry Laboratory II—Diels-Alder, reduction, and Wittig reactions; qualitative analysis. Lab. Limited enrollment Autumn Quarter. Prerequisite: 36. Corequisite: 35. GER:DB-NatSci
4 units, Aut, Win (Hua, Y)

CHEM 131. Organic Polyfunctional Compounds—Aromatic compounds, polysaccharides, amino acids, proteins, natural products, dyes, purines, pyrimidines, nucleic acids, and polymers. Prerequisite: 35. GER:DB-NatSci
3 units, Aut (Kool, E), Win (Trost, B)

CHEM 134. Analytical Chemistry Laboratory—Methods include gravimetric, volumetric, spectrophotometric, and chromatographic. Writing instruction includes communications, full papers, research proposals, and referee papers. Lab. Prerequisite: 130. GER:DB-NatSci
5 units, Spr (Moylan, C)

CHEM 135. Physical Chemical Principles—Terminal physical chemistry for non-chemistry majors. Emphasis is on portions of physical chemistry most useful for students of the life sciences. Introduction to chemical thermodynamics: rate laws, integration of rate laws, reaction mechanisms, enzyme kinetics, first, second, and third laws, thermochemistry, entropy, free energy, chemical equilibrium, osmotic pressure, other colligative properties. Prerequisites: 31A,B, or 31X, calculus. GER:DB-NatSci
3 units, Win (Pecora, R)

CHEM 136. Synthesis Laboratory—Advanced synthetic methods in organic and inorganic laboratory chemistry. Prerequisites: 35, 130. GER:DB-NatSci
3 units, Win (Yandulov, D)

CHEM 137. Special Topics in Organic Chemistry—(Formerly 181.) Chemical view of the biological processes of life. Topics include: structure and function of proteins, peptides, and nucleic acids; and how to use chemistry to mediate biological processes. GER:DB-NatSci
3 units, Win (Flygare, J)

CHEM 151. Inorganic Chemistry I—Theories of electronic structure, stereochemistry, and symmetry properties of inorganic molecules. Topics: ionic and covalent interactions, electron-deficient bonding, and molecular orbital theories. Emphasis is on the chemistry of the metallic elements. Prerequisites: 35. Recommended: 171. GER:DB-NatSci
3 units, Win (Dey, A)

CHEM 153. Inorganic Chemistry II—The theoretical aspects of inorganic chemistry. Group theory; many-electron atomic theory; molecular orbital theory emphasizing general concepts and group theory; ligand field theory; application of physical methods to predict the geometry, magnetism, and electronic spectra of transition metal complexes. Prerequisites: 151, 173. GER:DB-NatSci
3 units, Spr (Solomon, E)

CHEM 155. Advanced Inorganic Chemistry—(Same as 255; graduate students register for 255.) Chemical reactions of organotransition metal complexes and their role in homogeneous catalysis. Analogous patterns among reactions of transition metal complexes in lower oxidation states. Physical methods of structure determination. Prerequisite: 151, one year of physical chemistry.
3 units, Spr (Waymouth, R)

CHEM 171. Physical Chemistry—Chemical thermodynamics; fundamental principles, Gibbsian equations, systematic deduction of equations, equilibrium conditions, phase rule, gases, solutions. Prerequisites: 31A,B, or 31X, 35; MATH 51. GER:DB-NatSci
3 units, Aut (Pande, V)

CHEM 173. Physical Chemistry—Introduction to quantum chemistry: the basic principles of wave mechanics, the harmonic oscillator, the rigid rotator, infrared and microwave spectroscopy, the hydrogen atom, atomic structure, molecular structure, valence theory. Prerequisites: MATH 51, 53; PHYSICS 41, 43. Recommended: PHYSICS 45. GER:DB-NatSci
3 units, Win (Boxer, S)

CHEM 174. Physical Chemistry Laboratory I—Experimental investigations in spectroscopy, thermodynamics, and electronics. Students take measurements on molecular systems, design and build scientific instruments, and computer-automate them with software that they write themselves. Prerequisites: 134, MATH 51, PHYSICS 44. Corequisite 173. GER:DB-NatSci
4 units, Win (Moylan, C)

CHEM 175. Physical Chemistry—Introduction to kinetic theory and statistical mechanics: molecular theory of matter and heat, transport phenomena in gases, Boltzmann distribution law, partition functions for ideal gases. Introduction to chemical kinetics: measurement of rates of reactions, relationship between rate and reaction mechanism, consideration of specific reactions, transition-state theory of reaction rates. Prerequisites: 171, 173. GER:DB-NatSci
3 units, Spr (Moerner, W)

CHEM 176. Physical Chemistry Laboratory II—Use of chemical instrumentation to study physical chemical time-dependent processes. Experiments include reaction kinetics, fluorimetry, and nuclear magnetic and electron spin resonance spectroscopy. Lab. Prerequisite: 173. GER:DB-NatSci
3 units, Spr (Dai, H)

CHEM 181. Biochemistry I—(Same as BIOSCI 188/288, CHEMENG 181/281; CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Pre- or corequisites: CHEM 131; and CHEM 135 or 171. GER:DB-NatSci
3 units, Aut (Zare, R; Elrad, D; Altman, D)

CHEM 183. Biochemistry II—(Same as BIOSCI 189/289, CHEMENG 183/283; CHEMENG offerings formerly listed as 189/289.) Metabolism. Glycolysis, gluconeogenesis, citric acid cycle, oxidative phosphorylation, pentose phosphate pathway, glycogen metabolism, fatty acid metabolism, protein degradation and amino acid catabolism, protein translation and amino acid biosynthesis, nucleotide biosynthesis, DNA replication, recombination and repair, lipid and steroid biosynthesis. Medical consequences of impaired metabolism. Therapeutic intervention of metabolism. Prerequisite: BIOSCI 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288). GER:DB-NatSci
3 units, Win (Khosla, C)

CHEM 184. Biological Chemistry Laboratory—Modern techniques in biological chemistry including protein purification, characterization of enzyme kinetics, heterologous expression of His-tagged fluorescent proteins, site-directed mutagenesis, and single-molecule fluorescence microscopy. Prerequisite: 181. GER:DB-NatSci
4 units, Spr (Elrad, D; Kool, E; Zare, R; Altman, D)

CHEM 185. Biochemistry III—Advanced biophysical chemistry. Topics may include spectroscopy and other structure elucidation techniques, photochemistry, advanced quantum mechanics and statistical mechanics, and polymer structure and dynamics, emphasizing biological macromolecules and higher order systems. Prerequisites: 171, 173, 183. GER:DB-NatSci
3 units, Spr (Boxer, S)

GRADUATE

CHEM 221. Advanced Organic Chemistry—Molecular orbital theory and orbital symmetry. Thermochemistry and thermochemical kinetics. Unimolecular reaction rate theory. Methods of determining organic reaction mechanisms from a theoretical and experimental point of view. Prerequisites: 137, 175.
3 units, Aut (Du Bois, J)

CHEM 223. Advanced Organic Chemistry—Continuation of 221 with emphasis on physical methods. Prerequisite: 221 or consent of instructor.
3 units, Win (Trost, B)

CHEM 225. Advanced Organic Chemistry—Continuation of 223. Organic reactions, new synthetic methods, conformational analysis, and exercises in the syntheses of complex molecules. Prerequisite: 223 or consent of instructor.
3 units, Spr (Wender, P)

CHEM 227. Topics in Organic Chemistry—Possible topics: synthetic organic chemistry, photochemistry, inorganic-organic chemistry, bioorganic chemistry, reaction mechanisms, stereochemistry, structural chemistry of organic and biological molecules. May be repeated for credit.
3 units, Aut (Du Bois, J)

CHEM 229. Organic Chemistry Seminar—Required of graduate students majoring in organic chemistry. Students giving seminars register for 231.
1 unit, Aut, Win, Spr (Kool, E)

CHEM 231. Organic Chemistry Seminar Presentation—Required of graduate students majoring in organic chemistry for the year in which they present their organic seminar. Second-year students must enroll all quarters.
1 unit, Aut, Win, Spr (Waymouth, R)

CHEM 233A,B,C. Creativity in Organic Chemistry—Required of second- and third-year Ph.D. candidates in organic chemistry. The art of formulating, writing, and orally defending a research progress report (A) and two research proposals (B, C). Second-year students register for A and B; third-year students register for C.
1 unit, **A:** *Aut,* **B:** *Spr,* **C:** *Spr (Waymouth, R)*

CHEM 235. Applications of NMR Spectroscopy—The uses of NMR spectroscopy in chemical and biochemical sciences, emphasizing data acquisition for liquid samples and including selection, setup, and processing of standard and advanced experiments.
3 units, Win (Lynch, S)

CHEM 237. Electrochemistry—Principles of electrochemistry and their application to redox systems, electron transfer, electroanalysis, electrodeposition, electrocatalysis, batteries, and fuel cells. Prerequisite: 171 or equivalent.
3 units, not given this year

CHEM 251. Advanced Inorganic Chemistry—Chemical reactions of inorganic compounds with focus on mechanisms of reactions mediated by inorganic and organometallic complexes. The structural and electronic basis of reactivity including oxidation and reduction; kinetics and thermodynamics of inorganic reactions. Prerequisite: one year of physical chemistry.
3 units, Aut (Yandulov, D)

CHEM 253. Advanced Inorganic Chemistry—Electronic structure and physical properties of transition metal complexes. Ligand field and molecular orbital theories, magnetism and magnetic susceptibility, electron paramagnetic resonance including hyperfine interactions and zero field splitting and electronic absorption spectroscopy including vibrational interactions. Prerequisite: 153 or the equivalent.
3 units, not given this year

CHEM 255. Advanced Inorganic Chemistry—(Same as 155; see 155.)
3 units, Spr (Waymouth, R)

CHEM 258A,B,C. Research Progress in Inorganic Chemistry—Required of all second-, third-, and fourth-year Ph.D. candidates in inorganic chemistry. Students present their research progress in written and oral forms (A); present a seminar in the literature of the field of research (B); and formulate, write, and orally defend a research proposal (C). Second-year students register for A; third-year students register for B; fourth-year students register for C.
1 unit, **A:** *Win,* **B:** *Spr,* **C:** *Aut, Win (Yandulov, D)*

CHEM 259. Inorganic Chemistry Seminar—Required of graduate students majoring in inorganic chemistry.
1 unit, Aut, Win, Spr (Solomon, E)

CHEM 271. Advanced Physical Chemistry—The principles of quantum mechanics. General formulation, mathematical methods, and elementary applications of quantum theory to the structure of atoms and molecules, including variational procedures, perturbation theory, operator and matrix methods, theory of angular momentum, and elements of the electronic structure of atoms. Prerequisite: 175.
3 units, Aut (Fayer, M)

CHEM 273. Advanced Physical Chemistry—Topics in advanced quantum mechanics: vibrations and rotations of polyatomic molecules (normal modes, anharmonicity, wavefunctions and energy levels of rigid rotations, vibration-rotation interaction), ab initio electronic structure theory (Hartree-Fock, configuration interaction, multiconfiguration self-consistent-field, and many-body perturbation theory techniques), angular momentum theory (operators and wavefunctions, Clebsch-Gordan coefficients, rotation matrices), time-dependent quantum mechanics (time evolution operator, Feynman path integrals, scattering theory, Born approximation, Lipmann-Schwinger equation, correlation functions), interaction of radiation and matter (semiclassical and quantum theories of radiation, transition probabilities, selection rules). Prerequisite: 271 or PHYSICS 230.
3 units, Win (Dai, H)

CHEM 275. Advanced Physical Chemistry—The principles and methods of statistical mechanics from the ensemble point of view, statistical thermodynamics, heat capacities of solids and polyatomic gases, chemical equilibria, equations of state of fluids, and phase transitions. Prerequisite: 271.
3 units, Spr (Pande, V)

CHEM 276. Advanced Physical Chemistry—Time-dependent statistical mechanics: ensemble theory for equilibrium and nonequilibrium systems; static and dynamic correlation functions for fluctuating equilibrium systems; the relationship of correlation functions, spectroscopy, and transport; dynamical models used in chemistry, including classical mechanics, quantum mechanics, Brownian dynamics, Smoluchowski dynamics, and Markov processes. Applications to topics in physical chemistry. Prerequisite: 275.
3 units, Spr (Andersen, H)

CHEM 277. Topics in Physical Chemistry—Possible topics: structure elucidation using diffraction techniques, advanced statistical mechanics, crystal field theory, advanced quantum mechanics, magnetic relaxation, advanced thermodynamics, chemical applications of group theory. May be repeated for credit. Prerequisite: 275 or consent of instructor.
3 units, Aut (Pecora, R)

CHEM 278A,B. Research Progress in Physical Chemistry—Required of all second- and third-year Ph.D. candidates in physical and biophysical chemistry and chemical physics. Second-year students present their research progress and plans in brief written and oral summaries (A); third-year students prepare a written progress report (B).
1 unit, **A:** *Win,* **B:** *Win (Pecora, R)*

CHEM 279. Physical Chemistry Seminar—Required of graduate students majoring in physical chemistry. May be repeated for credit.
1 unit, Aut, Win, Spr (Chidsey, C)

CHEM 280. Single-Molecule Spectroscopy and Imaging—Theoretical and experimental techniques necessary to achieve single-molecule sensitivity in laser spectroscopy: interaction of radiation with spectroscopic transitions; systematics of signals, noise, and signal-to-noise; modulation and imaging methods; and analysis of fluctuations; applications to modern problems in biophysics, cellular imaging, physical chemistry, single-photon sources, and materials science. Prerequisites: 271, previous or concurrent enrollment in 273.

3 units, not given this year

CHEM 297. Bio-Inorganic Chemistry—(Same as BIOPHYS 297.) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: 153 and 173, or equivalents.

3 units, Win (Solomon, E)

CHEM 299. Teaching of Chemistry—Required of all teaching assistants in Chemistry. Techniques of teaching chemistry by means of lectures and labs.

1-3 units, Aut, Win, Spr (Moylan, C)

CHEM 300. Department Colloquium—Required of graduate students. May be repeated for credit.

1 unit, Aut, Win, Spr (Du Bois, J)

CHEM 301. Research in Chemistry—Required of graduate students who have passed the qualifying examination. Open to qualified graduate students with the consent of the major professor. Research seminars and directed reading deal with newly developing areas in chemistry and experimental techniques. May be repeated for credit. Search for adviser name on Axess.

2 units, Aut, Win, Spr, Sum (Staff)

CHEM 309. Navigating Career Options for Ph.D. Chemists—Planning a post-graduate career. Topics include career options, job search strategies, job application process, long-term career planning, and minority issues in science careers. Workshops focused on developing professional skills working with CDC and CTL, and panel discussions with chemistry Ph.D.s working in a range of fields.

1 unit, Sum (Zare, R)

CHEM 459. Frontiers in Interdisciplinary Biosciences—(Same as BIOC 459, BIOE 459, BIOSCI 459, CHEMENG 459, PSYCH 459.) (Crosslisted in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut, Win, Spr (Robertson, C)

RESEARCH AND SPECIAL ADVANCED WORK

CHEM 190. Introduction to Methods of Investigation—Limited to undergraduates admitted under the honors program or by special arrangement with a member of the teaching staff. For general character and scope, see 200. Prerequisite:130. Corequisite: 300.

1-5 units, Aut, Win, Spr, Sum (Staff)

CHEM 200. Research and Special Advanced Work—Qualified graduate students undertake research or advanced lab work not covered by listed courses under the direction of a member of the teaching staff. For research and special work, students register for 200.

1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSICS

Emeriti: (Professors) Mark W. Edwards, Marsh H. McCall, Jr.,* Susan Treggiari, Michael Wigodsky; (*Professor, Teaching*) Edward Spofford
Chair: Richard P. Martin
Graduate Director: Joseph Manning
Undergraduate Director: Maud Gleason
Professors: Alessandro Barchiesi, Andrew M. Devine, Richard P. Martin, Ian Morris (Classics, History), Reviel Netz, Andrea Nightingale (Classics, Comparative Literature), Josiah Ober (Classics, Political Science), M. Rush Rehm (Classics, Drama), Richard Saller (Classics, History), Walter Scheidel, Michael Shanks, Susan A. Stephens
Associate Professors: Joseph Manning, Jody Maxmin (Art and Art History, Classics), Anastasia-Erasmia Peponi, Jennifer Trimble
Assistant Professors: Giovanna Ceserani, Grant Parker
Courtesy Professors: Ian Hodder, Chris Bobonich, Eva Prionas
Lecturers: Maud Gleason, Patrick Hunt, Norbert Lain

Courses given in Classics have the subject codes CLASSART, CLASSGEN, CLASSGRK, CLASSHIS, and CLASSLAT. For a complete list of subject codes, see Appendix.

The study of Classics has traditionally centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, Classics also explores connections with ancient Egypt, ancient China, and the modern world; and specialized fields such as ancient economics, law, papyrology, and science. The department's faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal, and thematic territories. Studying ancient epic poetry can lead to looking at modern cinema afresh; ancient Athenian politics opens new perspectives on modern politics; and Roman studies present cultural parallels just as Latin illuminates the history of English and the Romance languages. In short, Classics at Stanford is an interdisciplinary subject concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

UNDERGRADUATE PROGRAMS

The department offers the following fields of study for degrees in Classics: Classical Studies; Ancient History; Greek; Latin; and Greek and Latin. The Classical Studies, Greek, and Latin fields of study may also be taken with a Philosophy and Literature focus. The Classics major can be completed in conjunction with a second major in the sciences or in other humanities departments. The department also offers minors in Classical Languages; History; and Literature and Philosophy.

BACHELOR OF ARTS

Those interested in majoring in Classics are encouraged to declare by the beginning of their junior year, but are urged to discuss their plans with the undergraduate director as early as possible. Students who choose the Greek and Latin field of study (option 8 below) should begin the curriculum as soon as possible because it is difficult to complete the language requirements without an early start; those with no previous knowledge of Latin or Greek should begin study in the freshman year or as early as possible in the sophomore year.

To declare the major, a student must fill out the Declaration of Major on Axess and meet with the undergraduate director in the Department of Classics. At that time, the undergraduate director assigns the student a department adviser; a student should meet with the adviser at least once a quarter. The student should then schedule an orientation with the student services officer. Each student's progress towards fulfillment of the major requirements is recorded in a file kept in the student services officer's office. It is the student's responsibility to work with the adviser to keep this file up to date.

A letter grade is required in all courses taken for the major. No course receiving a grade lower than 'C' is counted toward fulfilling major requirements.

The B.A. degree may be earned by fulfilling the requirements for one of the following fields of study or fields of study with a focus:

1. *Classical Studies:* This field of study is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. This major is recommended for students who wish to study classical civilizations in depth but do not wish to study the languages to the extent required by options 4, 5, 6, 7, and 8. It is not suitable for students who wish to do graduate work in Classics or to teach Latin or Greek in high school, as the language work is insufficient for these purposes. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a) CLASSGEN 176. Majors Seminar
   b) at least two courses in Latin or Greek at the 100 level or higher, *or* one course in one of the languages at the 100 level or higher, plus the series 1, 2, 3, or 51 and 52 in the other language (or an equivalent approved by the department)
   c) at least five courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
2. *Classical Studies with a Philosophy and Literature Focus:* Students should declare the Classical Studies field of study on Axess, and meet with the undergraduate director concerning the Philosophy and Literature focus, and to discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs.html. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
   a) CLASSGEN 176. Majors Seminar
   b) at least five courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
   c) two courses in Latin or Greek at the 100 level or higher, or one course in one of the languages at the 100 level or higher plus the series 1,2,3, or 51,52 in the other language
   d) Writing in the Major (WIM) in the Philosophy department (one introductory Philosophy course)
   e) one course in each of the following areas:
      1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3) history of philosophy (above 100 level)
   f) PHIL 81. Philosophy and Literature
   g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
   h) Philosophy and Literature capstone seminar. This year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.
3. *Ancient History:* This field of study is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students complete at least 60 units of approved courses and must satisfy four requirements:
   a) CLASSGEN 176. Majors Seminar
   b) *core requirement:* majors must take at least three survey courses in ancient history
   c) *depth requirement:* majors must take at least 40 units of ancient history and civilization courses, drawn from courses with CLASSHIS and CLASSGEN prefixes. IHUM 31A,B, The Ancient Empires, may be counted toward this or the core requirement. Courses chosen must be approved in advance and in writing by the undergraduate director. Approval should be submitted to the student services officer for the student's academic file. With the written approval of the instructor and the undergraduate director, students may substitute graduate seminars in ancient history for some of these courses.
   d) *breadth requirement:* majors must take at least 4 units in each of the following areas: archaeology and art; comparative ancient civilizations; and historical and social theory. The courses chosen must be approved in advance by the undergraduate director, and are normally chosen from the list of areas below though courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
      1. archaeology and art: for example, any CLASSART course; ARTHIST 120A, 200, 200C; CASA 1/201, 90, 301
      2. comparative ancient civilizations: majors must take a course on the ancient world outside the Mediterranean and western Asia, such as ANTHSCI 3, 7, 103, 141; HISTORY 192
      3. historical and social theory: for example, CASA 1/201, 90; HISTORY 107, 206; SOC 1, 110, 113, 140, 142, 170
4. *Greek:* This field of study is declared on Axess. Beginning courses in Greek, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
   a) CLASSGEN 176. Majors Seminar
   b) a minimum of 31 units in Greek courses at the 100 level or higher. It is recommended that one of these courses be CLASSGRK 175A, although this course should not be taken until students have completed three years of Greek.
   c) at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
   d) the introductory Latin sequence CLASSLAT 1,2,3, *or* 51,52, *or* one 100-level course in Latin (recommended)
5. *Greek with a Philosophy and Literature Focus*: Students should declare the Greek field of study on Axess, and meet with the undergraduate director concerning the Philosophy and Literature focus, and to discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
   a) CLASSGEN 176. Majors Seminar
   b) at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval

must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.

c) 31 units in Greek courses at the 100 level or higher
d) Writing in the Major (WIM) in the Philosophy Department (one introductory Philosophy course)
e) one course in each of the following areas:
    1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
    2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
    3) history of philosophy (above 100 level)
f) PHIL 81. Philosophy and Literature
g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
h) Philosophy and Literature capstone seminar; this year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.

6. *Latin:* This field of study is declared on Axess. Beginning courses in Latin, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
    a) CLASSGEN 176. Majors Seminar
    b) a minimum of 31 units in Latin courses at the 100 level or higher. It is recommended that one of these courses be CLASSLAT 175A, although this course should not be taken until students have completed three years of Latin.
    c) at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
    d) the introductory sequence CLASSGRK 1,2,3, *or* 51,52, *or* one 100-level course in Greek (recommended)
7. *Latin with a Philosophy and Literature Focus:* Students should declare the Latin field of study on Axess, and meet with the undergraduate director concerning the Philosophy and Literature focus, and to discuss options for pursuing a period of study in the Mediterranean region. See http://philit.stanford.edu/programs. Courses counted for the degree must be taken for a letter grade. Students must complete at least 65 units of approved courses including:
    a) CLASSGEN 176. Majors Seminar
    b) at least three courses with the prefix CLASSART, CLASSGEN, or CLASSHIS. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken.
    c) 31 units in Latin courses at the 100 level or higher
    d) Writing in the Major (WIM) in the Philosophy Department (one introductory Philosophy course)
    e) one course in each of the following areas:
        1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
        2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
        3) history of philosophy (above 100 level)
    f) PHIL 81. Philosophy and Literature
    g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
    h) Philosophy and Literature capstone seminar. This year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.
8. *Greek and Latin:* This field of study is declared on Axess. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Courses counted for the degree must be taken for a letter grade. Students must complete at least 60 units of approved courses including:
    a) CLASSGEN 176. Majors Seminar
    b) 30 units in Greek courses and the same number in Latin. It is recommended that students take either or both CLASSGRK or CLASSLAT 175A, although these courses should not be taken until students have completed three years of the respective language.
    c) it is recommended that students take a course in ancient history

---

Note 1: University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major program in the department; work done in other universities or colleges is subject to department evaluation.

MINORS

The undergraduate director meets with each student who opts for a minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Students may organize their curriculum according to different principles: for example, they may wish to focus on a specific historical period (classical Athens, imperial Rome), or on a specific theme or topic (women in antiquity). After consulting with the adviser, each student must submit (in writing) a proposed curriculum to the undergraduate director. Students may proceed with the minor when the undergraduate director has approved the proposal. Courses offered in Greek and Latin above the 100 level may count toward the minor, provided the subject matter is suitable. Students who minor in Classics are required to take CLASSGEN 176, Majors Seminar, which is writing intensive.

Students may choose among three minors in Classics:

1. *Classical Languages*: students are required to take a minimum of five courses in Greek or in Latin. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 176, Majors Seminar. Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all above the 100 level; for example, CLASSGRK 1, 10, plus CLASSLAT 103, 111, 175.
2. *History:* students are required to take a minimum of five courses in history, art history, and archaeology. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on historical topics or authors may count toward the minor.
3. *Literature and Philosophy:* students are required to take a minimum of five courses in classical literature or philosophy, including classical science. Courses listed in the department's cognate course list may be substituted for one or more of these courses with prior written approval

from the undergraduate director; written approval must be submitted to the student services officer for inclusion in the student's academic file prior to the end of the term in which the course is taken. In addition to the five required courses, students must take CLASSGEN 176, Majors Seminar. Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor.

HONORS PROGRAMS

A minimum grade point average (GPA) of 3.3 in Classics courses is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. Together with the supervisor, the student writes a two- to three-page proposal at the beginning of the senior year. The proposal should outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers, such as art, Greek, Latin, history, literature, or philosophy. If the proposal is approved, the student may sign up for CLASSGEN 199, Undergraduate Thesis: Senior Research, during one or two quarters of the senior year for a maximum of 6 units a term, up to an overall total of 10 units. Honors are awarded only if the essay receives a grade of 'B+' or higher from the supervisor and a second reader.

HUMANITIES

The honors program in Humanities is available for Classics majors with appropriate interests; see the "Interdisciplinary Studies in Humanities" section of this bulletin.

DIGITAL HUMANITIES MODULE

The Classics department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's undergraduate director who facilitates coordination with the Humanities Lab. Students planning to combine a Classics major and the digital humanities module must fulfill the following requirements in addition to the general Classics major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab gateway core seminar, HUMNTIES 198J/ENGLISH 153H, Digital Humanities: Literature and Technology (5 units)
3. Complete the HUMNTIES 201, Digital Humanities Practicum (2-5 units), in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project. For more information on the Digital Humanities Lab, see http://shl.stanford.edu.

STUDY ABROAD

Funding—Students whose record in Classics indicates that they are qualified may apply for funding from the Department of Classics. Students must submit a proposal to the undergraduate director as part of the Undergraduate Summer Research Grant Application; see the undergraduate page at http://classics.stanford.edu/ for the application. The proposal should include an itemized list of expenses based on the fees charged by the program, including room, board, tuition, and other expenses. Limited funding is available each year; preference is shown to students with strong records.

Programs—

1. *Rome:* Classics majors are encouraged to apply for the Intercollegiate Center for Classical Studies (http://studyabroad.duke.edu/iccs/index.php) in Rome which is managed by Duke University for about 50 constituent colleges and universities. It is open to Stanford majors in Classics, History, and Art History. All courses receive full credit at Stanford and may be applied to the respective major. Students interested in this program should consult the undergraduate director and the ICCS representative in the Department of Classics as early as possible in their career at Stanford to plan their course preparation and application. Competition is strong and applicants are expected to have taken one or more courses in Roman history and at least two years of Latin before they arrive in Rome. Brochures are available at the department office.

   Other programs offer a quarter, semester, or summer session in Rome. Interested students are urged to visit Bechtel International Center.
2. *Greece:* students are encouraged to apply for the summer session at the American School of Classical Studies in Athens (http://www.ascsa.edu.gr). The school is recommended principally for Classics majors with at least two years of ancient Greek. A student wishing to apply should prepare by taking courses in Greek history, archaeology, and art; beginning modern Greek is strongly recommended. Applicants should see the undergraduate director early in the academic year. Other programs such as College Year in Athens (http://www.cyathens.org) offer a quarter, semester, or summer session in Greece. Interested students should visit Bechtel International Center.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

I and II. Language and Literature, and Philosophy Fields of Study—Students who have completed an undergraduate major in Classics (Greek, Latin, or Greek and Latin fields of study) or equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies fields of study) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.
2. Completion of one Greek course at the 100 level (if the undergraduate major field of study was Latin) or one Latin course at the 100 level (if the undergraduate major major field of study was Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin field of study).
3. Passing an examination testing the candidate's ability to translate into English from a selected list of Greek and/or Latin authors.
4. Completion of the 275A,B sequence in at least one language (Latin or Greek).
5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
6. A reading examination in French or German; these examinations are administered every quarter.
7. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In this case, requirement '5' above is waived provided that the student has completed some work beyond the course requirements listed under requirements '1' and '2' above.

III. Classical Archaeology—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field, may be accepted as candidates for the M.A. degree in Classics with a Classical Archaeology field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.
2. Completion with a grade of 'B' or higher of at least 15 units of graduate-level courses in classical archaeology, not including CLASSART 302.
3. Passing an examination designed to test the candidate's ability to translate into English from either ancient Greek or Latin.
4. Completion with a grade of 'B' or higher of CLASSART 302, Classical Archaeology: Experiences of the Discipline, or an equivalent course on the history of thought in classical archaeology approved by the Classics department's graduate committee.
5. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
6. Passing a reading examination in French, German, or Italian. These examinations are administered every quarter.
7. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In their case, requirement '5' above is waived provided that the student has completed some work beyond the course requirements listed under requirements '1' and '2' above.

IV. Ancient History—Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field may be accepted as candidates for the M.A. degree in Classics with an Ancient History field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing 30 units of graduate courses and 15 additional units of work at the 100 level or higher.
2. Satisfactory completion of 20 units of graduate-level courses in Classics and of 10 units of graduate-level courses in other programs.
3. Satisfactory completion of 15 additional units of courses in either ancient Greek or Latin.
4. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the Graduate Committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.
5. Passing a reading examination in French, German, or Italian. These examinations are administered every quarter.
6. Completion and approval of a Program Proposal for a Master's Degree form before the end of the first quarter of enrollment.

Candidates for the Ph.D. degree may also (on the recommendation of the department) become candidates for the M.A. degree. In their case, requirement "4" above is waived provided that they have completed some work beyond the course requirements listed under requirements "1" and "2" above.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and ancient philosophy.

I. Language and Literature—Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year.

   This includes:
   a) Greek and Latin survey sequence (CLASSGEN 207-208)
   b) Greek and Latin syntax sequence (CLASSGRK 275A,B *and* CLASSLAT 275A,B)
   c) semantics of grammar sequence (CLASSGEN 205A,B)
   d) twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department. The other two seminars may be in Classics, from other departments (with the graduate director's approval), and/or directed readings. However, no more than two directed readings can be taken. Classics seminars are generally offered for 4-5 units. In some cases, instructors allow a student to complete a seminar for 4 units without requiring a written paper but with completion of all other requirements.
2. Examinations:
   a) Students must take Greek and Latin translation exams at the end of each survey sequence (the end of the first and second years). These exams are based on the Greek and Latin reading lists available on the Classics Department web site at: http://www.stanford. edu/dept/classics. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the same year if the student chooses. However, students are obligated to take the exam in the language which the survey has covered that year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of 'B-' or higher, on every passage, is required to pass. If a student does not attain a 'B-', the exam must be retaken later in the summer before registering for the Autumn Quarter, in order to continue in the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at their own expense; the department does not cover tuition in these instances. The exam can only be retaken once.
   b) Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French, with consent of the graduate director. Students arrange with the student services officer to take the exam. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   c) At the beginning of Autumn Quarter of the third year, students take general examinations in four of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, and Roman history. Students select the fields in consultation with the graduate director no later than June of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent); students need to confer with the professor overseeing the exam. General examinations must be taken by October of the third year.
   d) the University oral examination, which is a defense of the candidate's dissertation
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year.

If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.
5. A typical program for a graduate student in Classics is as follows. First year: CLASSLAT 275A,B (6 units), CLASSGRK 275A,B (6 units), CLASSGEN 205A,B, Semantics (3 units), either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units), and three elective seminars (12-15 units). Second year: either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years) (15 units), five to nine elective seminars (20-45 units), and one to three teaching assistantships (9-27 units). Third year: three to eight elective seminars (12-40 units), one to three teaching assistantships (9-27 units). Fourth year: three quarters of predoctoral dissertation research assistantship (30 units).

II. Classical Archaeology—Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the candidate's fourth year.

   These must include:
   - a) at least three graduate (200) level courses in Latin and/or Greek literature
   - b) History of Classical Archaeology (CLASSART 201), to be taken as early as possible in the candidate's Stanford career
   - c) the interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeology theory and a course on archaeological methods.
   - d) at least one further course outside the Classics department
   - e) at least five graduate seminars in classical archaeology
   - f) at least three graduate seminars in ancient history
   - g) Students may petition to count independent study courses in place of up to two required courses, but no more.
   - h) Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.
   - i) Students are urged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training
   - j) All students are expected to take part in archaeological fieldwork in the classical world areas.
   - k) At least three consecutive quarters of course work must be taken at Stanford.
2. Examinations:
   - a) As soon as students arrive, they must take a diagnostic exam in either Greek or Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
   - b) reading examinations in two of the following languages: French, German, Italian, and modern Greek. Candidates may petition to substitute a different modern language for one of these, if their area of specialization requires it. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   - c) a translation examination from Latin or Greek into English. This examination must be taken either at the end of the first year or at the end of the second year. A grade of 'B-' or higher on every passage is required to pass. If a student does not attain a 'B-,' the exam must be retaken later in the summer before registering for Autumn Quarter, in order to continue in the program. In order to retake an exam during Summer Quarter, a student must be registered at Stanford at their own expense; the department does not cover tuition in these instances. The exam can only be retaken once.
   - d) general examinations in Greek archaeology and Roman archaeology, and two of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, Roman history. Candidates select the fields in consultation with the graduate director no later than the first week of Spring Quarter of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year.
   - e) the University oral examination, which is a defense of the candidate's dissertation
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

III. Ancient History—Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. This includes:
   - a) in the Autumn Quarter of the first year, Approaches to History (HISTORY 304), offered in the History department
   - b) two proseminars. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. The department should offer one each year, but students may also fulfill this requirement by doing a directed reading, or (with the approval of the ancient history track adviser) by taking a course at another university with which Stanford has an exchange agreement.
   - c) three skills courses relevant to the individual student's chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. The skills courses can also be used to learn other ancient or modern languages, either by course work or directed reading. Students need to consult with their advisers and the graduate director.
   - d) 10 graduate seminars: These normally have course numbers in the 200s, 300s, or 400s. Most of these are taken in the department, but students may also take seminars outside the department or at another university with which Stanford has an exchange agreement. Approval from the ancient history adviser and the graduate director must be obtained prior to exercising this option. While only two of the ten seminars can be replaced by directed readings, up to three additional seminars may be taken outside the department. This leaves five ancient history seminars that must be chosen from those in the department. Other Classics graduate seminars may be substituted for these ancient history seminars, with approval of the ancient history track adviser.

   e) The range and sequence of other courses to be taken depend on which of the following two options the student selects within the Ancient History track.
      1. *Option 1*: Students focus more on one language. This requires students to take: the three quarter survey course in either Greek or Latin (CLASSGEN 207A,B,C or CLASSGEN 208 A,B,C); the fifteen-week syntax course in the same language (CLASSGRK 275A,B or CLASSLAT 275A,B); one quarter of the survey course sequence in the other language; and the two quarter Semantics of Grammar sequence (CLASSGEN 205A,B).
      2. *Option 2:* Students emphasize broader linguistic skills. This requires students to take the three quarter survey sequence in both Greek and Latin (CLASSGEN 207A,B,C and 208A,B,C).
2. Examinations:
   a) As soon as students arrive, they take diagnostic exams in two areas of ancient history. Choices are: Egyptian, Greek, and Roman history. The test is mainly on narrative history, especially important names, dates, and events. Depending on performance, students may be asked to sit in on the undergraduate history courses and take directed reading or a graduate survey if offered. Reading lists are available upon request.
   b) Students must take the final offered at the end of each quarter of Greek or Latin survey (for Option 1 above) or both Greek and Latin surveys (for Option 2 above). Students must earn a 'B-' or higher on each final to pass.
   c) Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French with consent of the graduate director. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   d) Students must pass general exams in two areas in history (Egyptian, Greek, or Roman) and two of the following fields: Greek literature, Latin literature, Greek archaeology, Roman archaeology, or ancient philosophy. Students select the fields in consultation with the graduate director no later than June of their second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year. In preparing for the general examinations, candidates are expected to make full use of relevant secondary material in modern languages. They should therefore plan to satisfy the requirements in French and German as soon as possible, preferably before the translation examinations.
   e) the University oral examination which is a defense of the candidate's dissertation.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Candidates are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

IV. Joint Program in Ancient Philosophy—This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

Candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. This includes:
   a) all the requirements listed for the language and literature specialization in the graduate program in Classics (see "I" above).
   b) three courses in the Philosophy department (including 100/200 and two courses at the 200 level or higher). These include:
      1. one course in logic which can be fulfilled at the 100 level or higher
      2. one course in aesthetics, ethics, or political philosophy
      3 one course in metaphysics, epistemology, philosophy of mind, or philosophy of science
   c) at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Philosophy department
   d) all courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12 seminar requirement in the Language and Literature track in the Classics department).
2. *Examinations:* The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

PH.D. MINOR

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the 100 level or above, and at least one course at the graduate (200) level.

CLASSICS AND A MINOR FIELD

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities, or classical linguistics. Requirements for the minor field vary, but might be expected to involve about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam (dissertation defense). Such a program is expected to take five years. The department encourages such programs for especially able and well prepared students. See the department *Graduate Handbook* for more information. The following timetable would be typical for a five-year program:

First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.
Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.
Third Year: course work, both in Classics and the minor field. General examinations in Classics.
Fourth Year: remaining course work, both in Classics and the minor field. General examination in the minor field. Preparation for dissertation.
Fifth Year: dissertation, University oral examination.

GRADUATE PROGRAM IN HUMANITIES

The Department of Classics participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Classics and Humanities. For a description of that program see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages. For courses in modern Greek language with the subject code SPECLANG, see the "Language Center" section of this bulletin.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Classics department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in Classics are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 39A,B. Inventing Classics: Greek and Roman Literature in Its Mediterranean Context—Two quarter sequence. The ancient Mediterranean world was as consumed with questions about the nature of human society and human existence as is present-day society. Sources include influential literary texts from Greece and Rome, and from other cultures in the Mediterranean and the Near East, organized by literary genre. The origins of such genres. GER:IHUM-2,3

IHUM 39A: *4 units, Win (McCall, M)*
IHUM 39B: *4 units, Spr (Martin, R)*

GREEK

UNDERGRADUATE

Courses in Greek have the subject code CLASSGRK. Classics majors and minors must take courses for letter grade.

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Greek should consult their department advisers to determine the precise nature of that department's requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

CLASSGRK 1,2,3. Beginning Greek—No knowledge of Greek is assumed. Classics majors and minors must take course for letter grade. Vocabulary and syntax of the classical language. Separate section for Biblical Greek. CLASSGRK 3 fulfills University language requirement.

3-5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Porta, F)*

CLASSGRK 10. Intensive Beginning Greek—Equivalent to CLASSGRK 1, 2, and 3. Attic Greek morphology and syntax. Classics majors and minors must take course for letter grade. CLASSGRK 10 fulfills the University language requirement.

7-9 units, Sum (Staff)

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSGRK 3 or 10, or on the basis of previous work in secondary school or elsewhere. Usually two to three years of secondary school Greek qualifies a student for 101, three to four years for 111. Students with previous knowledge of Greek should consult the Undergraduate Director in Classics to determine the course for which they are best suited.

CLASSGRK 101. Intermediate Greek: Lucian—Selections from Lucian's satires including *True History*. Focus is on grammar, syntax, style, and comprehension of a literary text. Literary and cultural contexts. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Jones, E)

CLASSGRK 102. Intermediate Greek: Greek Tragedy—Close reading of Aeschylus' *Prometheus Bound*. Classics majors and minors must take course for letter grade. May be repeated for credit.

4-5 units, Win (McCall, M)

CLASSGRK 103. Intermediate Greek: Homer—Selections from the *Iliad*. Focus is on reading Homeric poetry with fluency and rapid comprehension. Style, meter, poetic techniques, and cultural background. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Haas, C)

CLASSGRK 112. Advanced Greek: Lyric Poetry—Invectives, love songs, drinking songs, elegies, and choral odes from 700-500 B.C.E. Readings include Sappho, Alcaeus, Archilochus, Mimnermus, Alcman, Solon, and Pindar. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Peponi, A)

CLASSGRK 113/213. Advanced Greek: Palaeography—(Graduate students register for 213.) Reading Greek scientific texts; introduction to reading from parchment codices, emphasizing current digital practice. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Netz, R)

CLASSGRK 175A,B/275A,B. Greek Syntax: Prose Composition—(First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins sixth week of Winter Quarter and continues through Spring Quarter. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Greek.

2 units, **A:** *Win,* **B:** *Spr (Clayton, B)*

LATIN

UNDERGRADUATE

Courses in Latin have subject code CLASSLAT.

Students with previous knowledge of Latin should consult the undergraduate director in Classics to determine the course for which they are best suited. Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Latin should consult their department's advisers to determine the precise nature of those requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

CLASSLAT 1,2,3. Beginning Latin: Vocabulary and Syntax—Vocabulary and syntax of the classical language, preparing students for readings including Cicero, Caesar, and Catullus. No previous knowledge of Latin is assumed. Classics majors and minors must take course for letter grade. CLASSLAT 3 fulfills the University language requirement.

3-5 units, **1:** *Aut,* **2:** *Win (Lain, N),* **3:** *Spr (Janda, S; Lain, N)*

CLASSLAT 10. Intensive Beginning Latin—Equivalent to CLASSLAT 1, 2, 3; or 51 and 52. Goal is to read easy Latin prose and poetry by the end of the quarter. Classics majors and minors must take course for letter grade. CLASSLAT 10 fulfills the University language requirement.

7-9 units, Sum (Staff)

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSLAT 3 or 10, or on the basis of previous work in secondary school or elsewhere and the results of a placement exam offered at the beginning of the school year. Usually two to three years of secondary school Latin qualifies a student for 101, three to four years for 111.

CLASSLAT 101. Intermediate Latin: Introduction to Literature—Phonology, morphology, semantics, and syntax. Readings in prose and poetry. Analysis of literary language, including rhythm, meter, word order, narrative, and figures of speech.
3-5 units, Aut (Lain, N)

CLASSLAT 102. Intermediate Latin: Cicero—The life and work of Cicero. Close reading for grammar; questions of style and the genres of his written work including philosophy and courtroom drama. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Win (Roby, C)

CLASSLAT 103. Intermediate Latin: Horace—His epodes, satires, epistles, and odes; literary and historical analysis. Classics majors and minors must take course for a letter grade. May be repeated for credit.
3-5 units, Spr (Schiesaro, A)

CLASSLAT 111. Advanced Latin: Ovid—From Ovid's earliest love elegy to the *Metamorphoses*, emphasizing literary, historical, and cultural contexts. The development of Ovid's poetic style, his use of myth, and his role as an Augustan poet. Classic majors and minors must take course for a letter grade. May be repeated for credit.
3-5 units, Aut (Totten, D)

CLASSLAT 112. Advanced Latin: Seneca—Letters of Seneca; their philosophical, literary, and cultural background. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Win (Bailey, M)

CLASSLAT 113. Advanced Latin: Tacitus Annales—Close reading of the first book of the *Annals:* Tiberius' accession following the death of Augustus in 14 C.E., the persistence of monarchy, and the diminution of a Republican constitution. Nuances and style; Tacitus' place in the tradition of ancient historical writing; and the later reception of his writings.
3-5 units, Spr (Parker, G)

CLASSLAT 175A,B/275A,B. Latin Syntax—(First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the fifth week of Winter Quarter. See CLASSGEN 205A,B for supplemental courses. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Latin.
4 units, **A:** *Aut,* **B:** *Win (Devine, A)*

GRADUATE

These courses have subject code CLASSGEN.

CLASSGEN 205A,B. The Semantics of Grammar—Supplements CLASSLAT/CLASSGRK 275. Introduction to the grammatical encoding of semantic and pragmatic meaning. 205A: morphology-semantics interface (gender, tense, aspect, case). 205B: syntax-pragmatics interface (Latin word order). Begins in Autumn Quarter and continues through 5th week of Winter Quarter.
2 units, **A:** *Aut,* **B:** *Win (Devine, A)*

CLASSGEN 207A,B,C/208A,B,C. Survey of Greek and Latin Literature—Required two-year sequence. Focus is on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years. All major genres of Latin literature through Cicero. The social contexts of their production and consumption.

CLASSGEN 207A. Survey of Greek and Latin Literature: Republican Latin
4-5 units, alternate years, not given this year

CLASSGEN 207B. Survey of Greek and Latin Literature: Augustan Age Latin
4-5 units, alternate years, not given this year

CLASSGEN 207C. Survey of Greek and Latin Literature: Imperial Latin
4-5 units, alternate years, not given this year

CLASSGEN 208A. Survey of Greek and Latin Literature: Archaic Greek
4-5 units, Aut (Martin, R)

CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek
4-5 units, Win (Nightingale, A)

CLASSGEN 208C. Survey of Greek and Latin Literature: Hellenistic and Late Greek
4-5 units, Spr (Bowie, E)

COURSES IN TRANSLATION

These courses have subject code CLASSGEN.

UNDERGRADUATE

CLASSGEN 9. Greek and Latin Roots of English—Goal is to improve vocabulary, comprehension of written English, and standardized test scores through learning the Greek and Latin components of English. Focus is on patterns and processes in the formation of the lexicon. Terminology used in medicine, business, education, law, and humanities; introduction to principles of language history and etymology. Greek or Latin not required.
3 units, Sum (Staff)

CLASSGEN 18. Greek Mythology—The heroic and divine in the literature, mythology, and culture of archaic Greece. Interdisciplinary approach to the study of individuals and society. Illustrated lectures. Readings in translation of Homer, Hesiod, Herodotus, and the poets of lyric and tragedy. GER:DB-Hum
3-5 units, Win (Martin, R)

CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money—Stanford Introductory Seminar. Preference to freshmen. The technological keys to the growth of civilization that enabled the creation of complex societies and enhanced human cognition. The role of cognition in shaping history and the role of history in shaping cognition. Global perspective, emphasizing the Western tradition and its ancient Greek roots. GER:DB-Hum
4-5 units, Spr (Netz, R)

CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos—Stanford Introductory Seminar. Preference to freshmen. Sappho's surviving fragments in English; traditions referring to or fantasizing about her disputed life. How her poetry and legend inspired women authors and male poets such as Swinburne, Baudelaire, and Pound. Paintings inspired by Sappho in ancient and modern times, and composers who put her poetry to music. GER:DB-Hum, EC-Gender
4-5 units, Spr (Peponi, A)

CLASSGEN 34. Ancient Athletics—The cultural history of ancient athletics, including funerary games described in Homer and Virgil. The balance between soul and body sought by ancient philosophers including Plato. Striving for excellence, finding glory without seeking it, and aiming for self-mastery in athleticism and intellectual training. Scholar-athletes at Nemea, Delphi, and Isthmia; city-state festivals hosted by Athens and Sparta. GER:DB-Hum
3-5 units, Aut (Hunt, P)

CLASSGEN 36. Projecting Ancient Rome—How films about ancient Rome entertain audiences and address political and social concerns of the present. How contemporary audiences relate to ancient Romans on the screen and whether films are historically accurate or not. How cinematic traditions have interpreted and misinterpreted ancient Rome. Sources include Hollywood and Italian cinema. GER:DB-Hum
4-5 units, Aut (Pieraccini, L)

CLASSGEN 47. Hannibal—Hannibal's strategic crossing of the Alps with an army and elephants in 218 B.C.E. and his subsequent engagements with the Romans. Background on Punic Carthage and the First and Second Punic Wars in N. Africa, Gaul, and Italy. Primary source texts include Polybius and Livy. Primary research from instructor's current sponsored fieldwork under the National Geographic Society. GER:DB-Hum

4-5 units, Win (Hunt, P)

CLASSGEN 60. The Life and Death of a Roman City: Pompeii—The development of Pompeii from its early settlements to its luxurious urban center. Focus is on aspects of daily life such as family, slavery, economy, women, politics and religion. The décor of private houses and civic buildings, including the imperial display of power. The impact of Pompeii on the modern world, including art, architecture, and urban design. GER:DB-Hum

4-5 units, Win (Pieraccini, L)

CLASSGEN 66. Herodotus—For Ancient History field of study majors; others by consent of instructor. Close reading technique. Historical background to the Greco-Persian Wars; ancient views of empire, culture, and geography; the wars and their aftermath; ancient ethnography and historiography, including the first narrative of ancient Egypt. GER:DB-Hum

4-5 units, Win (Manning, J)

CLASSGEN 81. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature focus: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

CLASSGEN 94. Ethics of Pleasure—The concept of pleasure in Greek culture, thought, poetry, and philosophy. How physical, sensual, and intellectual types of pleasure are described and defined in Greek texts and visual arts. The relationship between individual and public/political experiences of pleasure; the intersection between aesthetics and ethics. GER:DB-Hum, GER: EC-EthicReas

3-5 units, Spr (Peponi, A)

CLASSGEN 111. Croesus and Solon: Polemical Interpretation of *Olbos*—Croesus, ruler of Lydia in the 6th century B.C.E. until the kingdom was absorbed into the Persian Empire; how he became a part of Greek culture. Historical, artistic, and poetic sources relating to his personality and reign. The concept of *olbos* or prosperity. Readings include the Athenian legislator and poet Solon, Herodotus, and the praise poet Bacchylides. GER:DB-Hum

4-5 units, Spr (González de Tobia)

CLASSGEN 176. Majors Seminar: Exemplary Lives—The ancients were conditioned by the paradigmatic figures of their own past, and for centuries this continued to be the chief reason that people studied the classics. Focus is on a return to this practice and its history. Sources include ancient refractions of Socrates, Plato, Alcibiades, Scipio, Epictetus, Cicero, Marcus Aurelius, Diogenes Laertius, and Plutarch. Biographical material on saints and martyrs: how the concept of the paradigmatic life was carried forward into the Christian era. GER:DB-Hum, WIM

4-5 units, Win (Gleason, M)

CLASSICS/HISTORY

These courses have subject code CLASSHIS.

CLASSHIS 60. The Romans—How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. GER:DB-Hum

3-5 units, alternate years, not given this year

CLASSHIS 101. The Greeks—Greek history from the rise of the city state through Alexander the Great's conquest of Persia. Economics, society, culture, and technology. Competition and cooperation within and between states; the emergence of strong forms of citizenship along with chattel slavery and gender inequality; the origins and practices of democracy; and relations with non-Greek peoples. Focus is on ancient sources and archaeological remains. GER:DB-Hum

4-5 units, Win (Ober, J)

CLASSHIS 105. History and Culture of Ancient Egypt—From 3000-30 B.C.E. Emphasis is on long-term social and economic development. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Manning, J)

CLASSHIS 106/206. Life and Death in China's Late Antiquity—Multidisciplinary, heuristic approach. How to piece together the worldview of life and death during the Eastern Han dynasty and subsequent Three Kingdoms period; the emergence of a new elite that would dominate the sociopolitical landscapes of medieval China and the birth of the Silk Road, the world's first international highway of commerce, culture, and religion. Sources include: materials and methods of archaeology, history, textual studies, and art history to interpret excavated evidence; and visual and interactive resources. GER:DB-Hum

4-5 units, Win (Hsu, H)

CLASSHIS 137/237. Models of Democracy—(Same as COMM 212/312, POLISCI 237/337.) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, Win (Fishkin, J; Ober J.)

CLASSICS, ART/ARCHAEOLOGY

These courses have subject code CLASSART.

CLASSART 61. Introduction to Greek Archaeology—The material remains of Greek civilization, including architecture, art, and written sources, and how to interpret them; what they reveal about the world of the Greeks and about current western civilization. How has reception of the classical past influenced modern political and social development? Topics include: the palace societies of the Bronze Age, the archaic age of colonization and the rise of the polis; the beginnings of classical Athenian democracy; and the conquests of Alexander the Great. GER:DB-Hum

3-5 units, Aut (Krotscheck, U)

CLASSART 81. Introduction to Roman Archaeology—Methods and materials, from the 8th century B.C.E. to the 4th century C.E. The physical remains of the Roman world and their relationship to today. What material culture reveals about the Romans; the legacy of the Romans in the modern world. Sculpture, wall painting, mosaics, tombs, and architecture; and practical, field-oriented approaches. Settlement patterns; development of artistic and architectural expertise; monumentalization in the late republic and early empire; and shifts and tensions in social norms. GER:DB-Hum

4-5 units, Win (Butler, M)

CLASSART 101/201. Archaic Greek Art—(Same as ARTHIST 101/301.) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum

4 units, Aut (Maxmin, J)

CLASSART 102/202. Classical and 4th-Century Greek Art—(Same as ARTHIST 102/302.) The formation of the classical ideal in 5th-century Athenian art, and its transformation and diffusion in the 5th and 4th centuries against changing Greek history, politics, and religion. GER:DB-Hum

4 units, Win (Maxmin, J)

CLASSART 109. Greek Art in and Out of Context—(Same as ARTHIST 203.) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life. GER:DB-Hum

5 units, Aut (Maxmin, J)

CLASSART 110. Appropriations of Greek Art—(Same as ARTHIST 204A.) The history of the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet. GER:DB-Hum

5 units, Spr (Maxmin, J)

CLASSART 126. Alpine Archaeology—What distinguishes archaeological research in high montane environments with year-round cold temperatures from other archaeological contexts and fieldwork? Comparison with other global field methodologies. Emphasis is on Gallo-Roman, Celtic, and medieval finds. Required for students participating in Stanford's late summer dig in the Grand-St-Bernard pass in the Alps. GER:DB-Hum

3-5 units, Spr (Hunt, P)

INDIVIDUAL STUDY

CLASSGEN 160. Directed Readings (Undergraduate)

1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 199. Undergraduate Thesis: Senior Research

2-10 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 260. Directed Reading in Classics (Graduate Students)

1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 360. Dissertation Research in Classics

1-10 units, Aut, Win, Spr, Sum (Staff)

GRADUATE SEMINARS

Graduate seminars vary each year. The following are given this year.

GENERAL (CLASSGEN)

CLASSGEN 220. Family, Gender, and Production in Ancient Rome—(Same as HISTORY 311A.) Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.

4-5 units, Win (Saller, R)

CLASSGEN 225. Metamorphoses of Dido—Focus is on Dido in Virgil; the complexities of her characterization and its bearing on an overall view of the poem, her scant previous appearances, and intertextual models. The continuing fascination with Dido by later authors from Ovid to the 20th century. Possible topics include Latin and Christian authors, medieval rewritings, Chaucer, Marlowe, and Dido in music and painting.

4-5 units, Spr (Schiesaro, A)

CLASSGEN 235. Petronius and Apuleius—Petronius' *Satyricon* and Apuleius' *Metamorphoses* represent the surviving Latin novel. Differences between them. Readings include Petronius' dinner at Trimalchio's and Apuleius' love story of Cupid and Psyche. Philological analysis, history of the novel, and social history of the Roman empire. The afterlife of these texts. Recent scholarship.

4-5 units, Spr (Parker, G)

CLASSGEN 237. Augustine on the Body—(Same as COMPLIT 337.) Ideas of the body in Greek and Roman literature and philosophy. Focus is on Augustine; his concepts of the edenic body, human body, and resurrected body. Asceticism in pagan and Christian culture in late antiquity. How did pagan and Christian cultural ideologies affect ascetic practices? To what extent did the Christians diverge from pagan practices of self-control in the 3rd and 4th centuries; how did philosophers and theologians treat sexuality and procreation in the context of elite self-fashioning?

4-5 units, Spr (Nightingale, A)

CLASSGEN 245. Roman Receptions of Hellenistic Poetry—The beginnings of Latin literature in Greek literature, primarily in texts transmitted through imperial courts of the Greek east such as Alexandria and Pergamum. Aesthetic, formal, and theoretical aspects of transmission; cultural contexts of reception, including Ennius and Lucilius, Catullus and Cicero, Horace and Vergil, and Propertius and Ovid.

4-5 units, Aut (Stephens, S)

CLASSGEN 283. Catullus: Textual Criticism and Related Points of Interest—Housman's definition of textual criticism as the science of discovering error in texts and the art of removing it. How scholars have attempted to emend problematic passages in Catullus.

4-5 units, Aut (Lain, N)

CLASSGEN 314. Fragments—The reconstruction and interpretation of fragmentary texts; how to deal with Latin poetry in fragments, emphasizing the Republican and Augustan ages. Sources include anthologies by E. Courtney and Adrian Hollis. Techniques of analysis including philology, textual criticism, and questions about Greek models. The importance of fragments for literary and cultural history.

4-5 units, Win (Barchiesi, A)

CLASSGEN 321. Classical Seminar—(Same as HUMNTIES 321.) Topic this year is interpreting antiquity: methodologies and interpretations of ancient texts. The dialogue between literature and philosophy in Greek and Roman cultures. Sources include Homer, Greek tragedy, Plato, Aristotle, Virgil, Petronius, Augustine, and Nietzsche's *Birth of Tragedy*.

3-5 units, Aut (Nightingale, A)

CLASSGEN 324. Choral Poetry and Performance—Representative readings of choral lyric poetry. Interpretation of the most complex choral discourse developed in archaic and classical Greece. The cultural context in which choral performances took place in the Greek polis.

4-5 units, Win (Peponi, A)

CLASSGEN 352. Ovid's *Metamorphoses*—Competing 20th-century approaches. Emphasis is on new research and how to compose research papers. Topics include: narratology, reception, gender, poetics, time and space, mythology, material culture, hellenization, romanization, orientalism, allusion and intertextuality, and emotions.

4-5 units, Win (Barchiesi, A)

HISTORY (CLASSHIS)

CLASSHIS 206. Life and Death in China's Late Antiquity—(Graduate section; see 106.)

4-5 units, Win (Hsu, H)

CLASSHIS 237. Models of Democracy—(Graduate section; see 137.)

3-5 units, Win (Fishkin, J; Ober J.)

CLASSHIS 250A,B. Greek Political Economy—(Same as POLISCI 332R,332S.) First of two-part course. Did large-scale kingdoms radically change the Greek world after Alexander; or had new conditions already emerged from the Peloponnesian War? Continuities and discontinuities across the classical/hellenistic divide. Focus is on states and economies in the 4th and 3rd centuries B.C.E. Sources include primary sources and recent scholarship on Greek economic thought and practices with reference to city states (Athens, Rhodes), federations (Achaean, Aetolian), and empires (Ptolemaic, Seleukid). Spring Quarter emphasis is on presentation of research by faculty and students.

4-5 units, **250A:** *Win,* **250B:** *Spr (Manning, J; Ober, J)*

CLASSHIS 365. The First Great Divergence: Late Antique and Early Medieval Europe and China—Divergences in long-term trends in state formation in E. and W. Eurasia after the fall of the Roman and Han empires: contexts, causes, and consequences. Students attend presentations of the Mellon Sawyer seminar. See http://classics.stanford.edu/news/divergence.

4-5 units, Aut (Morris, I; Scheidel, W)

ART AND ARCHAEOLOGY (CLASSART)

CLASSART 201. Archaic Greek Art—(Graduate section; see 101; same as ARTHIST 101/301

4 units, Aut (Maxmin, J)

CLASSART 202. Classical and 4th-Century Greek Art—(Graduate section; see 102; same as ARTHIST 102/302

4 units, Win (Maxmin, J)

CLASSART 250. Cultural Heritage and Classical Antiquities—Comparative analysis of American and Italian cultural heritage practices concerning Greek and Roman antiquities. Themes include ethical, cultural, and legal situations of classical artifacts in American museums; constructions of the classical past in national contexts and the role of antiquities museums; and changing concepts of material relationships with the past. One-week field trip to Rome to compare installation and presentation practices in major museums.

5 units, Win (Trimble, J)

CLASSART 323. Archaeology of the Roman Economy—Recent developments. Focus is on changing frameworks, including Mediterraneanization and concepts of growth; differences between historians' and archaeologists' interests and methods; problems of scale and integration; relationships of models, fieldwork design, and archaeological data. Case studies may include the olive oil industry; the marble trade and connections of art and economics; and the Roman army and its economic workings and impact.

5 units, Spr (Trimble, J)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ARCHLGY 99A. Historical Archaeology in the Archive, Lab, and Underground: Methods

5 units, Aut (Williams, B)

ARCHLGY 101B/301B. Humanized Landscapes: Archaeological Approaches to Human/Environment Interactions

3-5 units, Aut (Contreras, D)

ARCHLGY 103C/303C. Visualizing Archaeological Knowledge In the Information Age

3-5 units, Win (Webmoor, T)

ARCHLGY 105A/305A. Global Heritage and Cultural Property

3-5 units, Spr (Staff)

ARCHLGY 106A/306A. Museums and Collections

3-5 units, Spr (Staff)

ARCHLGY 107A. Archaeology as a Profession

5 units, Win (Camp, S)

ARCHLGY 108A. Archaeological Field Methods

5 units, Win (Jones, A)

ARTHIST 233 The Art Museum: History and Practice

5 units, Spr (Marshall, J)

CASA 108. History of Archaeological Thought—(Same as ARCHLGY 103.)

5 units, Aut (Meskell, L)

CASA 138/238. Archaeology of Sex, Sexuality, and Gender

5 units, Spr (Voss, B)

CASA 150. Archaeological Methods

5 units, Spr (Hodder, I)

CASA 156. Interpreting Space and Place: An Introduction to Mapmaking

5 units, Aut (Engel, C)

CASA 158/258. Sex, Death, and the Body in Ancient Egypt

5 units, Win (Meskell, L)

CASA 172/272. Object Lessons

3-5 units, Aut (Meskell, L)

CASA 360. Archaeological Methods and Research Design

5 units, Spr (Hodder, I)

CASA 373. Introduction to Archaeological Theory

5 units, Win (Hodder, I)

COMPLIT 123. The Novel, The World—(Same as ENGLISH 184.)

5 units, Spr (Moretti, F)

ECON 114. Economy and Economics of Ancient Greece

5 units, Win (Amemiya, T)

ENGLISH 51N. Drama Queens: Powerful Women on Stage

3 units, Aut (Friedlander, L)

ENGLISH 103. Crusades: Interdisciplinary Approaches—(Same as HISTORY 215, MEDVLST 165, RELIGST 140.)

3-5 units, Spr (Buc, P; Summit, J; Gelber, H)

ENGLISH 112A. Wicked Witches of the West: Dangerous Women in Greek and Shakespearean Tragedy

5 units, Win (Friedlander, L)

ENGLISH 270. From Plato to Postmodernism: The Anglo-American Critical Tradition

5 units, Win (Evans, M)

ENGLISH 302A,B. The History of the Book

5 units, **A:** *Aut,* **B:** *Win (Orgel, S)*

ENGLISH 314. Epic and Empire—(Same as COMPLIT 320A.)

5 units, Win (Parker, P)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present

4-5 units, Win (Baker, K; Sheehan, J)

HISTORY 205B/305B. Quantitative Methods in Historical Research

4-5 units, Aut (Klein, H)

HISTORY 305. Graduate Workshop in Teaching

1 unit, Spr (Kollmann, N; Roberts, R)

HPS 154. What is Science? Explaining Nature from Pythagoras to Popper

3-5 units, Aut (McCaskey, J)

PHIL 10. God, Self, and World: An Introduction to Philosophy

5 units, Win (Perry, J)

PHIL 20. Introduction to Moral Philosophy—(Same as ETHICSOC 20.)

5 units, Spr (Schapiro, T)

PHIL 30. Introduction to Political Philosophy—(Same as ETHICSOC 30, POLISCI 3.)
5 units, Aut (Hussain, N)

PHIL 100. Greek Philosophy
4 units, Aut (Bobonich, C)

PHIL 113/213. Hellenistic Philosophy
4 units, Aut (Bobonich, C)

PHIL 170/270. Ethical Theory—(Same as ETHICSOC 170.)
4 units, Aut (Jaworska, A)

PHIL 173A. Aesthetics: Metaphor across the Arts
4 units, Spr (Hills, D)

PHIL 173B/273B. Metaethics
4 units, Spr (Hussain, N)

PHIL 312. Aristotle's Psychology
4 units, Win (Bobonich, C)

RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries
3-5 units, Win (Gregg, R; Fonrobert, C)

OVERSEAS STUDIES

Students should discuss with their major advisers which overseas courses best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin, at the Overseas Studies office, 126 Sweet Hall, or at http://osp.stanford.edu/.

BERLIN

OSPBER 24. Greek Tragedy and German Culture: An Artistic Symbiosis
3-5 units, Aut (Rehm, R)

COMMUNICATION

Emeriti: (Professors) Henry S. Breitrose, Richard A. Brody, Donald F. Roberts; *(Professors, Teaching)* Ronald Alexander, Marion Lewenstein, James Risser
Chair: James Fishkin
Director, Institute for Communication Research: James Fishkin
Director, John S. Knight Fellowships for Professional Journalists: James R. Bettinger
Director, Media Studies: Jeremy Bailenson
Director, Undergraduate Studies: Shanto Iyengar (on leave Autumn)
Deputy Director, John S. Knight Fellowships for Professional Journalists: Dawn E. Garcia
Acting Director, Journalism: Ann Grimes
Professors: James Fishkin, Theodore L. Glasser, Shanto Iyengar, Jon Krosnick, Clifford Nass, Byron B. Reeves (on leave)
Associate Professor: Marcyliena Morgan
Assistant Professors: Jeremy Bailenson, Fred Turner (on leave)
Courtesy Professors: Jan Krawitz, Lawrence Lessig, Walter W. Powell, Kristine M. Samuelson
Lecturers: John Markoff, Gary Pomerantz, Howard Rheingold, James Wheaton, Gregg Zachary
Visiting Lorry I. Lokey Professorship in Professional Journalism: Joel Brinkley, Ann Grimes
Visiting Associate Professor: Beth Noveck
Visiting Hearst Professional in Residence: Glenn Frankel
Consulting Lecturer: Felicity Barringer

Department Offices: McClatchy Hall, Building 120, Room 110
Mail Code: 94305-2050
Phone: (650) 723-1941
Web Site: http://communication.stanford.edu

Courses given in Communication have the subject code COMM. For a complete list of subject codes, see Appendix.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The Institute for Communication Research offers research experience primarily to advanced Ph.D. students.

The John S. Knight Fellowships program brings outstanding mid-career journalists to the University to study for an academic year. The John S. and James L. Knight Foundation sponsors twelve U.S. journalists. They are joined by eight International Fellows sponsored by the Shinyoung Journalism Fund, the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, the Fulbright Program, the Koura Foundation, Yahoo Inc., and others.

ADMISSION

Prospective Undergraduates—Write to the University's Office of Undergraduate Admissions, Stanford University, Stanford, California 94305-3020.

Prospective Coterminal Students—Applications are available online at http://registrar.stanford.edu/shared/publications.htm#Coterm.

Prospective Graduate Students—Online applications are preferred and can be submitted on the web at http://gradadmissions.stanford.edu.

The department requires that applicants for graduate admission submit verbal and quantitative scores from the Graduate Record Examination (GRE). Admission to each graduate degree program is competitive, based on the pool of applicants each year rather than on standard criteria that can be stated in advance. The GRE should be taken no later than early November prior to the early December application deadline.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

PREPARATION

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

COMM 1A (formerly COMM 1) or COMM 1B
COMM 106
COMM 108

Students interested in declaring the major should see the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

PROGRAM OF STUDY

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concerns, theoretical approaches, and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities including professional print journalism, some of which are funded by the department's Rebele Internship Program.

The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum, intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of senior projects and honors theses.

All undergraduate majors are required to complete a set of core communication courses which include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 104W, Reporting, Writing, and Understanding the News (WIM, 5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units). Core courses are usually given only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the areas described below. Many of the courses require core courses as prerequisites.

Area I: Communication Processes and Effects—Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals. A minimum of two courses must be taken from COMM 146, 149, 160, 162, 166, 169, 170, 172.

Area II: Communication Systems/Institutions—Area II considers the roles and interaction of institutions such as broadcasting, journalism, constitutional law, and business within communication and mass communication contexts. A minimum of two courses must be taken from COMM 104W, 116, 117, 120, 125, 131, 136, 140, 147, 148, 182.

Options—The Communication curriculum is designed to provide a theoretical base that can be effectively applied to numerous environments. The potential options listed below are not required, but are examples of how to focus interests.

1. Communication Technologies
   a) Department of Communication (COMM):
      120. Digital Media in Society
      166. Virtual People
      169. Computers and Interfaces: Psychology and Design
      172. Psychological Processing of Media
   b) Affiliated department offerings (elective credit toward the major):
      1) Computer Science (CS)
         105. Introduction to Computers
         106A. Programming Methodology
         147. Introduction to HCI
         201. Computers, Ethics, and Social Responsibility
         247. Human Computer Interaction: Interaction Design Studio
      2) Science, Technology, and Society (STS)
         101. Science, Technology, and Contemporary Society
2. Communication and Public Affairs
   a) Department of Communication (COMM)
      125. Perspectives on American Journalism
      136. Democracy and the Communication of Consent
      160. The Press and the Political Process
      162. Analysis of Presidential Campaigns
      170. Communication and Children
   b) Affiliated department offerings (elective credit toward the major)
      1) Department of Political Science (POLISCI)
         123. Politics and Public Policy
      2) Department of Psychology (PSYCH)
         75. Cultural Psychology
         167. Seminar on Aggression
         180. Social Psych. Perspectives on Stereotyping and Prejudice
      3) Public Policy Program (PUBLPOL)
         104. Economic Policy Analysis
         194. Technology Policy
3. Media Practices and Performance
   a) Department of Communication (COMM)
      120. Digital Media in Society
      125. Perspectives on American Journalism
      131. Media Ethics and Responsibilities
      160. The Press and the Political Process

The remainder of the 60 required units may be fulfilled with any elective Communication courses, or crosslisted courses in other departments.

To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately twelve courses) in the department. No more than 10 units of transfer credit or Summer Session may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and maintain a grade point average (GPA) of 2.0 (C) in courses towards the major.

MINORS

PREPARATION

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following:

COMM 1A (formerly COMM 1) or COMM 1B
COMM 106
COMM 108

Students interested in declaring the minor should apply via Axess. Students are required to take 35 units (approximately 7 courses), not counting statistics, to complete the minor.

PROGRAM OF STUDY

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

The minor in Communication consists of three introductory Communication core courses that include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units), or COMM 1B, Media, Culture, and Society (5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units).

In addition to the three core courses, the minor requires a minimum of four intermediate-level elective courses approved by the department. The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods. It is recommended that the course in statistics be taken as early as possible, preferably in the Autumn Quarter of the junior year. The Statistics course does not count toward the 35 units to complete the Communication minor.

Students interested in declaring a minor must do so no later than registration day in the Spring Quarter of the junior year. Core courses are usually offered only once annually, and they constitute a sequence:

Prerequisite—introductory statistics course (for example, PSYCH 10)

Core Courses—COMM 1A or 1B, 106, 108

Area I: Communication Processes and Effects—a minimum of one course from COMM 146, 149, 160, 162, 166, 169, 170, 172

Area II: Communication Systems/Institutions—a minimum of one course from COMM 104, 116, 117, 120, 125, 131, 136, 140, 147, 148, 182

Elective courses—totaling 10 units.

Some courses are not given every year. Refer to the *Time Schedule* for details.

HONORS PROGRAM

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units, culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have: (1) successfully completed both a research methods and statistics course, (2) selected an adviser, and (3) submitted an application to the department by the end of their junior year. An application may be picked up outside Room 110, Building 120.

Students are expected to make steady progress on their honors thesis throughout the year. Students who fail to submit a satisfactory draft Autumn Quarter will be dropped from the program.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill communication elective credit but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed and it may be applied toward fulfilling major requirements.

The designation "with honors" is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:

1. complete an honors thesis
2. maintain a distinguished GPA in all Communication course work
3. are recommended by the Communication faculty

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

The Department of Communication offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies specializing in either social sciences or journalism; see "Media Studies Program" below for more information.

Applications for coterminal study must be submitted at least four quarters in advance of the expected master's degree conferral date. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications may be submitted no later than November 19, 2007 for admission beginning in either Winter or Spring Quarter 2007-08 or Autumn Quarter 2008-09. There is no rolling admission in the Communication department. Requirements include: Application for Admission to Coterminal Master's Program form, preliminary program proposal, statement of purpose, three letters of recommendation from Stanford professors, a written statement from a Communication professor agreeing to act as a graduate adviser and a current, unofficial Stanford transcript. GRE scores are not required. Coterminal applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The department awards a terminal M.A. degree in Communication with a field of study of Journalism. Applicants for this program, and for doctoral work, are evaluated for admission on different criteria. Work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Students who complete an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition application that may be picked up at the Registrar's Information Windows or at http://registrar.stanford.edu/shared/publications.htm#GradStud. Such students are considered alongside all other doctoral applicants.

The M.A. degree in Media Studies is available only to current Stanford University undergraduates who are majoring in another department.

JOURNALISM

Stanford's graduate program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues and digital media. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students' understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program's objective is twofold: (1) to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and (2) to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods of their reporting and the quality of their writing.

CURRICULUM

The curriculum includes several required courses, examples of which are shown below, and a master's project:

216. Journalism Law
217. Digital Journalism
220. Digital Media in Society
225. Perspectives on American Journalism
240. New Media Entrepreneurship
273. Public Issues Reporting I
274. Public Issues Reporting II
289. Journalism M.A. Project
291. Graduate Journalism Seminar

Additionally, students are usually required to take two specialized writing courses, chosen from a list of seven or eight, and three approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 49 units.

Except for the Graduate Journalism Seminar and the Journalism Project, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

JOURNALISM PROJECT

The Journalism master's project, a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during Winter Quarter and continues through Spring Quarter. It represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students' ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily news media.

MEDIA STUDIES COTERMINAL MASTER'S PROGRAM

The Media Studies coterminal master's program provides a broad introduction to scholarly literature in mass communication and offers a social sciences or journalism track. This one-year program is designed for current Stanford University undergraduates. Media Studies students need to satisfy four basic requirements including 1, 2a or 2b, 3, and either 4 or 5 depending on which track is being followed:

1. *Required Units and GPA:* students must complete a minimum of 45 units in Communication and related areas, including items 2a or 2b, and 3 below. Courses, except for COMM 290, Media Studies M.A. Project, and COMM 289, Journalism Master's Project, must be taken for a letter grade if offered. Courses in related areas outside the department must be approved by the student's adviser. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

2a. *Core Requirements Social Science Track:* students must complete COMM 206, 208, and a statistics course. Typically, the statistics requirement is met with STATS 160. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units.

2b. *Core Requirements Journalism Track:* students must complete COMM 104, 273, 274, and a statistics course. Typically, the statistics requirement is met with STATS 160. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units. It is recommended that Journalism track students also complete COMM 291, a 1-unit seminar, each quarter.

3. *Six Media Studies Courses:* students must complete a minimum of six additional Communication courses from the following list concerned with the study of media. Journalism track students must include one course from the COMM 277, Specialized Writing and Reporting, series as part of these six media studies courses. Social Science track students have the option of including a maximum of one course from this series as part of these six courses. Any additional course taken from the COMM 277 series is considered elective credit for students from either track. Not all the listed courses are offered every year and the list may be updated from one year to the next. In addition to the core requirements and a minimum of six courses listed below, students may choose additional courses from the list and any related course approved by the student's adviser.

   208. Media Processes and Effects*
   211. Media Technologies, People, and Society
   216. Journalism Law
   217. Digital Journalism
   220. Digital Media in Society
   225. Perspectives on American Journalism
   231. Media Ethics and Responsibility
   236. Democracy and the Communication of Consent
   238. Democratic Theory
   240. New Media Entrepreneurship
   246. Language and Discourse: Race, Class, and Gender
   248. Hip-Hop and Don't Stop: Introduction to Modern Speech Communities
   249. Ethnography of Modern Speech Communities
   260. The Press and the Political Process
   262. Analysis of Presidential Campaigns
   266. Virtual People
   268. Experimental Research in Advanced User Interfaces
   269. Computers and Interfaces: Psychology and Design
   270. Communication and Children
   272. Psychological Processing of Media
   277. Specialized Writing and Reporting
   291. Graduate Journalism Seminar**
   314. Doctoral Research Methods IIB***
   318. Doctoral Research Methods II***

* May be taken as one of the six media studies courses by Journalism track students only. It is a core requirement for the Social Science track students.

** May be taken by Journalism track students only.

*** These courses are designed for Ph.D. students. Master's students require consent of faculty.

4. *The Media Studies M.A. Project:* students following the Social Science track enroll in COMM 290 to complete a project over two consecutive quarters that must be pre-approved and supervised by the adviser.
5. *The Journalism Master's Project:* students following the Journalism track usually begin work on the project during Winter Quarter and continue through Spring Quarter when credit is awarded. Students enroll for COMM 289 in the second quarter. See above, "Master of Arts, Journalism."

Additional courses are chosen in consultation with an academic adviser. A course in statistical methods is recommended.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master's degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication Theory and Research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, human-computer interactions, information processing, information technology, law, online communities, politics and voting, virtual reality, and youth and media. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four years of graduate study (subsequent to completion of the B.A. degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements with grades of 'B+' or above. Currently these courses include COMM 206, 208, 311, 314, 317, and 318. Students are also required to take STATS 160 and two advanced methods courses.
2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the third academic year of study.
3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, computer programming, a foreign language, or other technical skills.
4. Complete at least two pre-dissertation research projects (the Major Project and the Complementary Project).
5. Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course (COMM 1A, 1B, 106, and 108).
6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.

7. Apply for candidacy by the end of the second year of graduate study. The requirements and procedures for applying for candidacy can be found in the document, "Official Rules and Procedures for the Ph.D. in the Department of Communication," available from the student services administrator of the department.
8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member not in the Department of Communication.
9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student.

Ph.D. candidacy is valid for five years.

Other requirements and details of the requirements can be found in the document, *Official Rules and Procedures for the Ph.D. in the Department of Communication*, available from the student services administrator of the department.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

THE INSTITUTE FOR COMMUNICATION RESEARCH

The Institute is an office of project research for the faculty of the Department of Communication and operates under grants to faculty from government, industry, and non-profit organizations. Research assistantships are often available to qualified Ph.D. students in Communication.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

PRIMARILY FOR UNDERGRADUATES

COMM 1A. Media Technologies, People, and Society—(Graduate students register for 211.) Open to non-majors. Introduction to the concepts and contexts of communication. A topics-structured orientation emphasizing the field and the scholarly endeavors represented in the department. GER:DB-SocSci

5 units, Aut (Nass, C)

COMM 1B. Media, Culture, and Society—The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media's shifting relationships to politics, commerce, and identity. GER:DB-SocSci

5 units, not given this year (Iyengar, S; Turner, F)

COMM 104W. Reporting, Writing, and Understanding the News—Techniques of news reporting and writing. The value and role of news in democratic societies. GER:DB-SocSci, WIM

5 units, Aut (Zachary, G), Win (Frankel, G), Spr (Grimes, A)

COMM 106. Communication Research Methods—(Graduate students register for 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research in communication. Pre- or corequisite: STATS 60 or consent of instructor. GER:DB-SocSci

5 units, Win (Gauthier, L; Groom V)

COMM 107. The First Amendment in the Digital Age—(Graduate students register for 207.) Interdisciplinary. Legal, institutional, sociological, and technological framework for free expression in democracy. History, values, and principles of the First Amendment. The challenge of new technology to old doctrine. Impact of the Internet on issues of free speech, such as political criticism, fair use, defamation, low value speech, professional privilege, and public forum in an era of private networks. How do new social networking technologies produce the expertise and accountability promoted by the First Amendment?

5 units, Spr (Noveck, B)

COMM 108. Media Processes and Effects—(Graduate students register for 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1. GER:DB-SocSci

5 units, Aut (Bailenson, J)

COMM 116. Journalism Law—(Graduate students register for 216.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.

5 units, Aut (Wheaton, J)

COMM 117. Digital Journalism—(Graduate students register for 217.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.

5 units, Win (Rheingold, H)

COMM 118Q. Theories of Film Practice—Stanford Introductory Seminar. Preference to sophomores. How theory connects with practice in the production of film and television. Film and television from the perspectives of practitioners who have theorized about their work in directing, editing, screenwriting, cinematography, and sound, and social scientists whose research has explored similar issues empirically. Write-2

4 units, Win (Breitrose, H)

COMM 120. Digital Media in Society—(Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. GER:DB-SocSci

5 units, not given this year (Turner, F)

COMM 125. Perspectives on American Journalism—(Graduate students register for 225.) Issues, ideas, and concepts in the development of American journalism, emphasizing the role of the press in society, the meaning and nature of news, and professional norms that influence conduct in and outside the newsroom. Prerequisite: 1 or junior standing. GER:DB-SocSci

5 units, Aut (Glasser, T)

COMM 131. Media Ethics and Responsibilities—(Graduate students register for 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism. GER:DB-SocSci

5 units, Win (Glasser, T)

COMM 136. Democracy and the Communication of Consent—(Graduate students register for 236; same as POLISCI 134.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci

5 units, Aut (Fishkin, J)

COMM 140. New Media Entrepreneurship—(Graduate students register for 240.) Primarily for graduate journalism and computer science students. Silicon Valley's new media culture, digital storytelling skills and techniques, web-based skills, and entrepreneurial ventures. Guest speakers.
5 units, Spr (Grimes, A)

COMM 146. Language and Discourse: Race, Class, and Gender—(Graduate students register for 246.) Theories concerning the discursive construction of identity and representation of cultures. Relationships between power and powerful speech. How language mediates and constructs identity; how it is associated with race, class and gender; and how people resist and manipulate these associations. Sources include conversation, public and popular culture, education, literature, and film. GER:DB-SocSci
5 units, Spr (Morgan, M)

COMM 147. History and Future of Journalism—(Graduate students register for 247.) History of U.S. journalism. Problems in the industry today: can the nation's newspapers survive in the era of online journalism; can online news sites and blogs take their place; can television be a reliable source for serious news?
5 units, Spr (Brinkley, J)

COMM 148. Hip-Hop and Don't Stop: Introduction to Modern Speech Communities—(Graduate students register for 248.) Focus this year is hip-hop and the media. Hip-hop as a global phenomenon with social influences beyond the music and entertainment industries. The development of standards. Hip-hop in the U.S. and its role as a cultural, political, social, and artistic resource for youth. Perspectives include cultural and linguistic anthropology, and media studies. Guest lecturers.
5 units, Win (Morgan, M)

COMM 149. Ethnography of Modern Speech Communities—(Graduate students register for 249.) Concepts and analytical techniques in the social sciences that privilege observation, participation, video recording, and transcription of spontaneous interaction rather than experimental tasks or introspection. Interconnections among communications, social sciences, linguistics, and sociocultural anthropology. Focus is on details of everyday activities in communities and interactive environments. Topics include language socialization, literacy, music, and the visual arts, the power of language, miscommunication, and universal and culture-specific properties of human communication.
5 units, not given this year (Morgan, M)

COMM 160. The Press and the Political Process—(Graduate students register for 260; same as POLISCI 323R.) The role of mass media and other channels of communication in political and electoral processes. GER:DB-SocSci
5 units, Win (Iyengar, S)

COMM 162. Analysis of Presidential Campaigns—(Graduate students register for 262; same as POLISCI 323S.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged? GER:DB-SocSci
5 units, Spr (Iyengar, S)

COMM 166. Virtual People—(Graduate students register for 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication.
5 units, Spr (Bailenson, J)

COMM 167. Advanced Seminar in Virtual Reality Research—Restricted to students with previous research experience in virtual reality. Experimental methods and other issues.
1-3 units, Aut (Bailenson, J)

COMM 169. Computers and Interfaces—(Graduate students register for 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate responses to textual, voice-based, pictorial, metaphoric, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of products or services for developing countries. GER:DB-SocSci
5 units, Win (Nass, C)

COMM 170. Communication and Children I—(Graduate students register for 270.) Developmental approach to how children come to use and process mass media, what information they obtain, and how their behavior is influenced by the media. Prerequisite: 1, PSYCH 1, or SOC 1. GER:DB-SocSci
5 units, not given this year (Roberts, D)

COMM 172. Psychological Processing of Media—(Graduate students register for 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening. GER:DB-SocSci
5 units, not given this year (Reeves, B)

COMM 177C. Specialized Writing and Reporting Environmental Journalism—(Graduate students register for 277C.) The development of journalism with an environmental focus. Emphasis is on climate change and associated issues of energy and mobility. Students cover subjects such as the rise of the environmental movement, businesses' relationship to the environment, toxic waste, endangered species, and water and air pollution. Prerequisite: 104 or consent of instructor.
5 units, Spr (Barringer, F)

COMM 177D. Specialized Writing and Reporting: Magazine Journalism—(Graduate students register for 277D.) How to report, write, edit, and read magazine articles, emphasizing long-form narrative. Tools and templates of story telling such as scenes, characters, dialogue, and narrative arc. How the best magazine stories defy or subvert conventional wisdom and bring fresh light to the human experience through reporting, writing, and moral passion. Prerequisite: 104 or consent of instructor.
5 units, Aut (Frankel, G)

COMM 177F. Specialized Writing and Reporting: Literary Journalism—(Graduate students register for 277F.) Using the tools of literature to tell the true stories of journalism. Characterization, narrative plotting, scene-setting, point of view, tone and style, and the techniques of reporting for literary journalism, interviewing, and story structure. Prerequisite: 104 or consent of instructor.
5 units, Win (Bettinger, J)

COMM 177G. Specialized Writing and Reporting: Covering a Business Beat—(Graduate students register for 277G.) How to write news and feature stories about companies and personalities in the business world. Prerequisite: 104 or consent of instructor.
5 units, Win (Grimes, A)

COMM 177K. Specialized Writing and Reporting: Human Rights Journalism—(Graduate students register for 277K.) The evolution of human rights law and enforcement, and the role of journalists in uncovering, pursuing, and publicizing political violence, detention, and torture. Case studies from S. Africa, Latin America, Israel and Palestine, N. Ireland, Bosnia, Rwanda, and Sudan and Darfur. Human rights issues in the U.S. in the aftermath of 9/11. Students conduct research and write journalistic reports on foreign and domestic issues. Prerequisite: 104 or consent of instructor.
5 units, Spr (Frankel, G)

COMM 177R. Specialized Writing and Reporting: Covering Silicon Valley—(Graduate students register for 277R.) Techniques to write and report about Silicon Valley technologies. Visits from professional writers. Prerequisite: 104 or consent of instructor.
5 units, Spr (Zachary, G; Markoff, J)

COMM 177S. Specialized Writing and Reporting: Sports Journalism—(Graduate students register for 277S.) Workshop. The history of sports writing from the 20s to present. Reporting, interviewing, deadline writing, and how to conceptualize and develop stories. Students write features and news stories for publication in a new sports section in The Cardinal Inquirer, an online publication of the graduate program in journalism. Prerequisite: 104 or consent of instructor.
5 units, Spr (Pomerantz, G)

COMM 177Y. Specialized Writing and Reporting: Foreign Correspondence: Working in the Middle East—(Graduate students register for 277Y.) Issues and techniques for working as a journalist in a dangerous part of the world. Prerequisite: 104 or consent of instructor.
5 units, Aut (Brinkley, J)

COMM 182. Virtual Communities and Social Media—(Graduate students register for 282.) Taught by the originator of the terms virtual community and smart mobs. How the concept of community has changed from agricultural to industrial to networked societies. Much class discussion takes place in social cyberspaces.
5 units, Aut (Rheingold, H)

COMM 190. Senior Project—Research project. Prerequisite: senior standing.
5 units, Aut, Win, Spr, Sum (Staff)

COMM 195. Honors Thesis—Qualifies students to conduct communication research. Student must apply for department honors thesis program during Spring Quarter of junior year.
5 units, Aut, Win, Spr, Sum (Staff)

COMM 199. Individual Work—For students with high academic standing. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR MASTER'S STUDENTS

COMM 206. Communication Research Methods—(Graduate section; see 106.)
4 units, Win (Gauthier, L; Groom, V)

COMM 207. The First Amendment in the Digital Age—(Graduate section; see 107.)
4 units, Spr (Noveck, B)

COMM 208. Media Processes and Effects—(Graduate section; see 108.)
4 units, Aut (Bailenson, J)

COMM 211. Media Technologies, People, and Society—(Graduate section; see 1A.)
4 units, Aut (Nass, C)

COMM 212. Models of Democracy—(For undergraduates and M.A. students; Ph.D. students register for 312; same as CLASSHIS 137/237, POLISCI 237/337.) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.
3-5 units, Win (Fishkin, J; Ober, J)

COMM 216. Journalism Law—(Graduate section; see 116.)
4 units, Aut (Wheaton, J)

COMM 217. Digital Journalism—(Graduate section; see 117.)
4 units, Win (Rheingold, H)

COMM 220. Digital Media in Society—(Graduate section; see 120.)
4 units, not given this year (Turner, F)

COMM 225. Perspectives on American Journalism—(Graduate section; see 125.)
4 units, Aut (Glasser, T)

COMM 231. Media Ethics and Responsibilities—(Graduate section; see 131.)
4 units, Win (Glasser, T)

COMM 236. Democracy and the Communication of Consent—(Graduate section; see 136; same as POLISCI 134.)
4 units, Aut (Fishkin, J)

COMM 236G. Democracy, Justice, and Deliberation—(For undergraduates and M.A. students; Ph.D. students register for 336G.) Decision processes that make a normative claim to resolve questions of public choice, at any of these levels of choice: first principles, constitutions, public policies, or particular outcomes. Topics include democratic theory, the theory of justice and issues of deliberation in small groups, public consultations, conventions, juries, and thought experiments popular in contemporary political theory. Readings include Madison, de Tocqueville, Mill, Marx, Rawls, Nozick, Ackerman, and Schudson. Preference to graduate students. Prerequisite: consent of instructor.
1-5 units, not given this year (Fishkin, J)

COMM 238. Democratic Theory: Normative and Empirical Issues—(For undergraduates and M.A. students; Ph.D. students register for 338.) Conflicting visions in terms of normative conflicts and empirical evidence. How citizens communicate with each other and their representatives, and how their representatives deliberate. Topics include theories of deliberation, how democracy is transformed when brought to the mass public, how informed a public is needed, and potential pathologies of small group communication in settings including juries, town meetings, and contemporary public consultations. Readings include Madison, Burke, Mill, Lippmann, Dewey, Schumpeter, Dahl, Sunstein, and Mansbridge.
1-5 units, not given this year (Fishkin, J)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives—The social and psychological processes involved in asking and answering questions via questionnaires for the social sciences; optimizing questionnaire design; open versus closed questions; rating versus ranking; rating scale length and point labeling; acquiescence response bias; don't-know response options; response choice order effects; question order effects; social desirability response bias; attitude and behavior recall; and introspective accounts of the causes of thoughts and actions.
4 units, not given this year (Krosnick, J)

COMM 240. New Media Entrepreneurship—(Graduate section; see 140.)
4 units, Spr (Grimes, A)

COMM 244. Democracy, Press, and Public Opinion—(For undergraduates and M.A. students; Ph.D. students register for 344.) The democratic tradition provides conflicting visions of what a democracy is or might be, offering different views of the role of the press and citizens in engaging public issues. Focus is on democratic theory with empirical work on public opinion and the role of the media. Topics include campaigns, the effects of new technology, competing strategies of public consultation, public journalism, and possibilities for citizen deliberation. Prerequisite: consent of instructor.
1-4 units, not given this year (Fishkin, J)

COMM 246. Language and Discourse: Race, Class, and Gender—(Graduate section; see 146.)
4 units, Spr (Morgan, M)

COMM 247. History and Future of Journalism—(Graduate section; see 147.)
4 units, Spr (Brinkley, J)

COMM 248. Hip Hop and Don't Stop: Introduction to Modern Speech Communities—(Graduate section; see 148.)
4 units, Win (Morgan, M)

COMM 249. Ethnography of Modern Speech Communities—(Graduate section; see 149.)
4 units, not given this year (Morgan, M)

COMM 260. The Press and the Political Process—(Graduate section; see 160; same as POLISCI 323R.)
4 units, Win (Iyengar, S)

COMM 262. Analysis of Presidential Campaigns—(Graduate section; see 162; same as POLISCI 323S.)
4 units, Spr (Iyengar, S)

COMM 266. Virtual People—(Graduate section; see 166.)
4 units, Spr (Bailenson, J)

COMM 268. Experimental Research in Advanced User Interfaces—(For undergraduates and M.A. students; Ph.D. students register for 368.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. Prerequisite: consent of instructor.
1-5 units, Win, Spr (Nass, C)

COMM 269. Computers and Interfaces—(Graduate section; see 169.)
4 units, Win (Nass, C)

COMM 270. Communication and Children I—(Graduate section; see 170.)
4 units, not given this year (Roberts, D)

COMM 272. Psychological Processing of Media—(Graduate section; see 172.)
4 units, not given this year (Reeves, B)

COMM 273. Public Issues Reporting I—Reporting and writing on government and public policies and issues; their implications for the people and the press. Required for journalism M.A. students.
4 units, Aut (Grimes, A)

COMM 274. Public Issues Reporting II—Student teams study one major public policy issue that has broad societal impact. Students report and write individually, and as a team produce a body of journalism that advances the understanding of a new issue each year, published on a web site and offered for publication to newspapers and other media outlets. Prerequisites: 273, Journalism M.A. student.
4 units, Win (Brinkley, J)

COMM 277C. Specialized Writing and Reporting Environmental Journalism—(Graduate section; see 177C.)
4 units, Spr (Barringer, F)

COMM 277D. Specialized Writing and Reporting: Magazine Journalism—(Graduate section; see 177D.)
4 units, Aut (Frankel, G)

COMM 277F. Specialized Writing and Reporting: Literary Journalism—(Graduate section; see 177F.)
4 units, Win (Bettinger, J)

COMM 277G. Specialized Writing and Reporting: Covering a Business Beat—(Graduate section; see 177G.)
4 units, Win (Grimes, A)

COMM 277K. Specialized Writing and Reporting: Human Rights Journalism—(Graduate section; see 177K.)
4 units, Spr (Frankel, G)

COMM 277R. Specialized Writing and Reporting: Covering Silicon Valley—(Graduate section; see 177R.)
4 units, Spr (Zachary, G; Markoff, J)

COMM 277S. Specialized Writing and Reporting: Sports Journalism—(Graduate section; see 177S.)
4 units, Spr (Pomerantz, G)

COMM 277Y. Specialized Writing and Reporting: Foreign Correspondence: Working in the Middle East—(Graduate section; see 177Y.)
4 units, Aut (Brinkley, J)

COMM 282. Virtual Communities and Social Media—(Graduate section; see 182.)
4 units, Aut (Rheingold, H)

COMM 289. Journalism Master's Project
4 units, Spr (Staff)

COMM 290. Media Studies M.A. Project—Individual research for coterminal Media Studies students.
1 unit, Aut, Win, Spr, Sum (Staff)

COMM 291. Graduate Journalism Seminar—Required of students in the graduate program in Journalism. Forum for current issues in the practice and performance of the press. Journalists in or visiting the Bay Area are often guest speakers. May be repeated for credit.
1 unit, Aut (Grimes, A), Win (Staff), Spr (Bettinger, J)

COMM 299. Individual Work
1-4 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

COMM 308. Graduate Seminar in Political Psychology—(Same as POLISCI 324.) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.
1-3 units, Aut, Win, Spr (Krosnick, J)

COMM 310. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop—(Same as POLISCI 402.) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See http://mapss.stanford.edu. May be repeated for credit.
1 unit, Aut, Win, Spr (Krosnick, J)

COMM 311. Theory of Communication—Required of Communication doctoral students.
1-5 units, Win (Roberts, D)

COMM 312. Models of Democracy—(Same as 212; see 212; same as CLASSHIS 137/237, POLISCI 237/337.)
3-5 units, Win (Fishkin, J; Ober, J)

COMM 314. Doctoral Research Methods II B—Part of the doctoral research methods sequence. Focus is on the logic of qualitative research methods and modes of inquiry relevant to the study of communication and meaning. Prerequisite: Communication Ph.D. student, or consent of instructor.
1-5 units, Spr (Glasser, T)

COMM 317. Doctoral Research Methods I—Approaches to social science research and their theoretical presuppositions. Readings from the philosophy of the social sciences. Research design, the role of experiments, and quantitative and qualitative research. Cases from communication and related social sciences. Prerequisite: consent of instructor.
1-5 units, not given this year (Fishkin, J)

COMM 318. Doctoral Research Methods II—Prerequisite: consent of instructor.
1-5 units, Win (Krosnick, J)

COMM 319. Doctoral Research Methods III—Prerequisite: consent of instructor.
1-5 units, not given this year

COMM 320G. Advanced Topics in New Media and American Culture—Primarily for Ph.D. students. Prerequisite: 220 (formerly 219) or consent of instructor.
1-5 units, not given this year (Turner, F)

COMM 325G. Comparative Studies of News and Journalism—Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism's commitment to political participation.
1-5 units, not given this year (Glasser, T)

COMM 326. Advanced Topics in Human Virtual Representation—Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: consent of instructor.
1-5 units, Win (Bailenson, J)

COMM 331G. Communication and Media Ethics—Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.
1-3 units, not given this year (Glasser, T)

COMM 336G. Democracy, Justice, and Deliberation—(Same as 236G; see 236G.)
1-5 units, not given this year (Fishkin, J)

COMM 338. Democratic Theory: Normative and Empirical Issues—(Same as 238; see 238.)
1-5 units, not given this year (Fishkin, J)

COMM 344. Democracy, Press, and Public Opinion—(Same as 244; see 244.)
1-4 units, not given this year (Fishkin, J)

COMM 348. Gender, Culture, and Communication—The field of gender and communication and principal questions in feminist theory in the context of linguistics, media studies, and sociolinguistics. Historiographical and theoretical perspectives on feminism and technology. International and multicultural focus. Areas include discourse and interaction, gender and culture, communication theory, gender and media, cultural studies, political economy, and symbolic communication. How everyday interactions, media, film, popular culture, and journalism incorporate gender and sexuality and perpetuate stereotypes of men, women, and sexuality. Prerequisite: consent of instructor.
1-5 units, not given this year (Morgan, M)

COMM 349. Ethnography of Communication—Ethnographic methods and the study of discourse and interaction. The impact of ethnography on research and field methods; how results validate knowledge across disciplines. The relationship of ethnography of communication to disciplines such as anthropology, linguistics, communications, and sociology. Focus is on the integration of ethnography and other research techniques for the documentation of communication and its role in the establishment and management of social encounters. Prerequisite: consent of instructor.
1-5 units, Win (Morgan, M)

COMM 360G. Political Communication—Limited to Ph.D. students. Advanced topics. Prerequisite: 260 or consent of instructor.
1-5 units, not given this year (Iyengar, S)

COMM 361. Field Experimentation in Political Communication Research—The design of large-scale field experiments. Recent developments in analysis of experimental data including matching, propensity scores, and other techniques that address the problem of selection bias. Prerequisite: consent of instructor.
4 units, not given this year

COMM 368. Experimental Research in Advanced User Interfaces—(Same as 268; see 268.)
1-5 units, Win, Spr (Nass, C)

COMM 370G. Communication and Children—Limited to Ph.D. students. Prerequisite: 270 or consent of instructor.
1-5 units, not given this year (Roberts, D)

COMM 372G. Seminar in Psychological Processing—Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.
1-5 units, not given this year (Reeves, B)

COMM 374G. Freedom and Control of Communication—The meaning of freedom of public communication in democratic communities, focusing on the tensions between freedom and control, rights and opportunities, individual liberty and political equality.
1-5 units, not given this year (Glasser, T)

COMM 379. History of the Study of Communication—The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.
1-5 units, Win (Glasser, T)

COMM 380. Curriculum Practical Training—Practical experience in the communication industries. Prerequisites: graduate standing in Communication, consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. May be repeated four times for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

COMM 397. Complementary Project—Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 398. Major Research Project—Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 399. Advanced Individual Work
1-9 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the Communication major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
5 units, Win (Campani, E)

COMPARATIVE LITERATURE

Emeriti: (Professors) Joseph Frank, John Freccero, René Girard, Herbert Lindenberger, Mary Pratt; *(Courtesy Professors)* W. B. Carnochan, Gerald Gillespie, Marjorie G. Perloff

Chair: Russell Berman

Director of Admissions: Russell Berman

Director of Graduate Studies: Hans Ulrich Gumbrecht

Director of Undergraduate Studies: Andrea Nightingale

Chair of Curriculum Committee: Andrea Nightingale

Professors: John Bender (English, Comparative Literature), Russell Berman (German Studies, Comparative Literature), Margaret Cohen (Comparative Literature, on leave), Amir Eshel (German Studies, Comparative Literature, on leave Autumn, Spring), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Spanish and Portuguese, Comparative Literature), Seth Lerer (English, Comparative Literature, on leave Autumn, Winter), Franco Moretti (English, Comparative Literature), Elisabeth Mudimbe-Boyi (French and Italian, Comparative Literature), Andrea Nightingale (Classics, Comparative Literature), David Palumbo-Liu (Comparative Literature, on leave), Patricia Parker (English, Comparative Literature), Ramón Saldívar (English, Comparative Literature), Jeffrey T. Schnapp (French and Italian, Comparative Literature)

Associate Professor: Monika Greenleaf (Slavic Languages and Literatures, Comparative Literature, on leave Autumn, Spring)

Courtesy Professors: David G. Halliburton, John Wang

Lecturers: Andrea Bachner (Humanities Fellow), Marisa Galvez, Ann Gelder, Jessie Labov, Shafiq Shamel

Consulting Professor: Hayden White

Visiting Professors: Karl Heinz Bohrer (German Studies, Comparative Literature, Spring), Dan Miron (Comparative Literature, Winter)

Department Offices: Building 260, Room 209
Mail Code: 94305-2031
Phone: (650) 723-3566
Email: comparativelit@stanford.edu
Web Site: http://complit.stanford.edu

Courses given in Comparative Literature have the subject code COMPLIT. For complete list of subject codes, see Appendix.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts and Doctor of Philosophy.

The field of Comparative Literature provides students the opportunity to study imaginative literature in all its forms. While other literary disciplines focus on works of literature as parts of specific national or linguistic traditions, Comparative Literature draws on literature from all contexts in order to examine the nature of literary phenomena from around the globe and from different historical moments, while exploring how literary writing interacts with other elements of culture and society. The field studies literary expression through examinations of genres such as novels, epics, and poetry, and new aesthetic forms such as cinema and electronic media. Although Comparative Literature does not restrict its focus to single traditions or periods, it does investigate the complex interplay of the literary imagination and historical experience. Attention is also paid to questions of literary theory, aesthetic philosophy, and cultural interpretation.

Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena with additional tools of inquiry such as literary theory, the relationship between literature and philosophy, and the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the dissemination of particular genres. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read analytically and critically, and a more global knowledge of literature.

UNDERGRADUATE PROGRAM

BACHELOR OF ARTS

The Department's undergraduate programs are designed to enhance students' appreciation of literature in all its diversity, particularly through introductory courses that include treatments of the primary literary genres. The course of study at intermediate and advanced levels is intentionally flexible in order to accommodate student interest in areas such as specific geographical regions, historical periods, and interdisciplinary connections between literature and other fields such as philosophy, music, the visual arts, and the social sciences. A Comparative Literature major prepares a student to become a better reader and interpreter of literature, through enhanced examination of texts and the development of a critical vocabulary to discuss them. It prepares students for a lifetime of reading literature and the enrichment and enjoyment that entails. However the attention to verbal expression and interpretive argument also serves students who plan to proceed into careers requiring strong language skills. In addition, the major in Comparative Literature provides preparation for those students who intend to pursue an advanced degree as a gateway to an academic career.

The major in Comparative Literature requires students to enroll in a set of core courses offered by the department, to complete electives in the department, and to enroll in additional literature courses, or other courses approved by the adviser, offered by other departments. This flexibility to combine literature courses from several departments and addressing literature from multiple traditions is the hallmark of the Comparative Literature major. Students may count courses which read literature in translation; however, students, and especially those planning to pursue graduate study in Comparative Literature, are encouraged to develop a command of non-native languages.

Declaring the Major—Students declare the major in Comparative Literature through Axess. Students should meet with the Director of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and seminars.

Advising—Students majoring in Comparative Literature should consult with the Director of Undergraduate Studies at least once a year. The director monitors progress to completion of the degree. Students are also encouraged to develop relationships with other faculty members who may act as mentors.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Director of Undergraduate Studies and is contingent upon the Office of the University Registrar's approval of transfer credit. To that end, students abroad are advised to save syllabi, notes, papers, and correspondence.

Honors College—The Department of Comparative Literature encourages honors students to enroll in the honors college scheduled during the weeks preceding the beginning of every academic year. Applications to the college are available from the department administrator. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

REQUIREMENTS

All majors in Comparative Literature (including honors) are required to complete the following courses

1. COMPLIT 101, What is Literature? (5 units) This gateway to the major is normally taken by the end of sophomore year. It provides an introduction to literature and its distinctions from other modes of linguistic expression, and a fundamental set of interpretive. This course fulfills the Writing in the Major requirement for 2007-08.
2. *The genre core:* COMPLIT 121, Poems, Poetry, Worlds: An Introductory Course; 122, Literature as Performance; 123, The Novel, the World (5 units each). Students should complete these courses as soon as possible. Each course draws on examples from multiple traditions to ask questions about the logic of the individual genres.

3. COMPLIT 199, Lives in Literature. (5 units) This senior seminar is designed as a culmination to the course of study. It provides an outlook on careers in literature and reflection on the nature of the discipline.
4. *Comparative Literature electives:* Majors must enroll in at least three additional Comparative Literature courses in consultation with their adviser.
5. *Other electives:* Students must complete course work for a total of at least 65 units. These electives may be drawn from Comparative Literature offerings, from other literature departments, or from other fields of interdisciplinary relevance to the student's interest, in consultation with the adviser.

MAJOR TRACKS

Students may choose to structure their elective choices or to enroll in supplementary course work in literature beyond the required 65 units in order to achieve a particular emphasis in their studies at Stanford. Students may choose to pursue concentrations in literary studies, in interdisciplinary approaches to literature, or in philosophy and literature. Students may also design their own area of emphasis within the major. To explore these options, students should discuss study plans with their adviser; see http://complit.stanford.edu/undergrad/core.html. Examples of tracks include:

Literary Studies—Literary works are shaped by a complex interplay of historical forces and constraints, including contacts between differing cultures and traditions; the evolution of literary genres, practices, and conventions; shifts in media and technologies of reproduction and diffusion; and the imitation of model authors. By combining in-depth work in a primary literature with work in a second literature, this option emphasizes the study of such phenomena.

Students pursuing this option would typically take courses in both languages with a similar focus such as a specific literary genre, a historical epoch, or a theoretical question. Students in this option would also typically write at least one seminar paper that is comparative in nature.

Interdisciplinary Approaches to Literature—Literary creation is a complex human enterprise that intersects with other fields of human endeavor and creation. An interdisciplinary approach is designed to promote the focused study of intersections between literature and the arts (including film, music, and painting), and other disciplines (including anthropology, feminist studies, history, history of science, linguistics, and philosophy).

Students pursuing this option would typically take a series of courses focused upon an interdisciplinary approach to a topic such as: a single discipline or closely related cluster of disciplines; the cultural history of a single historical epoch; one or more of the fine arts, media, or film studies; or area studies. Students in this option would also typically write at least one seminar paper that is interdisciplinary in nature.

Philosophical and Literary Thought—Undergraduates may major in Comparative Literature with a special track in interdisciplinary studies at the intersection of literature and philosophy. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student schedules and course of study must be approved in writing by the adviser, the Director of Undergraduate Studies of Comparative Literature, and the Director of Undergraduate Studies of the program. See http://philit.stanford.edu/programs.

A total of 65 units must be completed for this option, including the following requirements:

1. Five courses using materials in the original language and making up an intellectually coherent program in the literature of a language other than the student's native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language. The coherence of this program must be approved in writing by the Director of Undergraduate Studies of Comparative Literature.
2. *Philosophy and Literature Gateway Course* (4 units): COMPLIT 181 (enroll in PHIL 81, FRENGEN 181, OR ITALGEN 181). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
5. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
6. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
7. *Related Courses* (ca. 8 units): two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.
8. One course, typically in translation, in a literature distant from that of the student's concentration and offering an outside perspective on that literary tradition.
9. *Capstone Seminar* (ca. 4 units): in addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student's choice of a capstone seminar must be approved in writing by the Director of Undergraduate Studies of Comparative Literature and by the Director of Undergraduate Studies of the program.
10. *Seminar Paper Requirement:* students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Director of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

DIGITAL HUMANITIES MODULE

The Comparative Literature department, in collaboration with the Humanities Lab, offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Comparative Literature major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab gateway core seminar, HUMNTIES 198J/ENGLISH 153H, Digital Humanities: Literature and Technology (5 units)
3. Complete the HUMNTIES 201, Digital Humanities Practicum (2-5 units), in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project. For more information on the Digital Humanities Lab, see http://shl.stanford.edu.

MINORS

The undergraduate minor in Comparative Literature represents an abbreviated version of the major. It is designed for students who are unable to pursue the major but who nonetheless seek an opportunity to gain a deeper understanding of literature. Plans for the minor should be discussed with the Director of Undergraduate Studies. The minimum number of units required for a minor at Stanford is 20. Requirements for the minor in Comparative Literature include:

1. COMPLIT 101: What is Literature?
2. One course from the genre core: COMPLIT 121, 122, or 123
3. At least two other Comparative Literature courses

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. These minors draw on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about these minors and their requirements.

HONORS PROGRAM

The honors option offers motivated Comparative Literature majors the opportunity to write a senior honors paper. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Director of Undergraduate Studies and submit a thesis proposal (2-5 pages), along with an outline of planned course work for the senior year. During this quarter, the student may enroll for 2 units of credit for independent research in COMPLIT 189B to prepare this statement and undertake initial planning for the honors paper. The proposal is reviewed by the honors committee, including the Director of Undergraduate Studies and the chair of the department.

The Director of Undergraduate Studies designates a faculty tutor appropriate to the topic and a second reader for approved honors papers.

Students in the honors program enroll in DLCL 189 (5 units) in Autumn Quarter of the senior year to refine the project description and begin research in preparation for composing the honors paper. During Winter Quarter of the senior year, the student enrolls in COMPLIT 189A (5 units), independent study with the faculty tutor, to draft the honors paper.

At the end of the quarter, the student submits a completed draft to the tutor. If approved, two copies are forwarded to the honors committee, which ultimately awards honors. If revisions are advised, the student has until the fifth week of Spring Quarter to submit the final paper. Students who did not enroll in a 189B course in the junior year may enroll in COMPLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis advisor. 10-12 units of course work associated with the honors paper (DLCL 189 and COMPLIT 189A and 189B) may be counted toward the 65 units required for the major.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Typically, however, honors papers are 40-70 pages.

Honors Awards—The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-wide awards. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program is designed for a small group of students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Applicants are expected to take an intensive course in the third language before entrance.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available, from a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work closely with faculty throughout the period of study. Completed applications are due December 4. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant's present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.
2. A description of the applicant's area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate what they think will be their primary field, including the literatures on which they intend to concentrate.

All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.

Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.

Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.

DEGREE REQUIREMENTS

Residence—A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation, of which at least 72 units must be within the department. At least three consecutive quarters of course work must be taken at Stanford.

Languages—Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student's three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching—Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department's minimum teaching requirement is a total of three quarters.

Minimum Course Requirements—Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student's primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program.

Examinations—Three examinations are required. The first two are one-hour exams, taken at the end of the first and second year of study. One of these is on literary genre, designed to demonstrate the student's knowledge of a substantial number of literary works in a single genre, ranged over several centuries and over at least three national literatures. This exam is also designed to demonstrate the student's grasp of the theoretical problems involved in his or her choice of genre and in the matter of genre in general. The other of these examinations is on literary theory and criticism, designed to demonstrate the student's knowledge of a particular problem in the history of literary theory and criticism, or the student's ability to develop a particular theoretical position. In either case, this exam should demonstrate wide reading in theoretical and critical texts from a variety of periods. The third and last is the University oral examination.

1. *First One-Hour Examination*: students are urged to make this the genre exam, though they may be granted permission to take the theory/criticism exam at this point. This exam is administered toward the close of the Spring Quarter of the student's first year. All first-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Director of Graduate Studies well in advance of the exam. Students are urged to focus on poetry, drama, or the novel or narrative, combining core recommendations from the department with selections from their individual areas of concentration. Any student who does not pass the exam in Spring Quarter would have the opportunity to retake the exam the following Autumn Quarter. Students who do not pass the exam a second time may merit department action or review.
2. *Second One-Hour Examination*: students are urged to make this the theory/criticism exam though they may be granted permission to take the genre exam at this point. This exam is administered toward the close of the Spring Quarter of the student's second year. All second-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Director of Graduate Studies well in advance of the exam. Any student who does not pass the exam may merit department action or review.
3. *University Oral Examination*: students are urged to complete this exam by the end of their third year. The oral exam is individually scheduled, with a committee established by the student in consultation with the Director of Graduate Studies. The exam covers a literary period, to consist of in-depth knowledge of a period of approximately a century in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures—The department meets at the end of each year to review student progress. Performance on the first one-hour examination, together with class performance and general progress, are taken into consideration. Students are admitted to candidacy upon completion of the first one-hour examination and departmental review. As soon as the student has completed the qualifying procedures, the chair recommends the student for admission to candidacy for the Ph.D. At this time, the student is also recommended for the Master of Arts degree in Comparative Literature if 45 units of work at Stanford have been completed and the student has not already completed an M.A. before entering the program.

Colloquium—The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

PH.D. MINOR

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.
2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

Course Numbering System:

Course Topic	*Number*
Authors	10–19
Genre	20–29
Periods and Movements	30–39
Cultures	40–49
Philosophy and Theory	50–59
Required courses:	101, 121, 122, 123, 199, 369, 396L

GENERAL

These courses are aimed at freshmen and sophomores who are non-majors (and/or potential majors) and provide an entry point to the discipline of Comparative Literature.

All majors are required, as soon as possible after declaration, to complete COMPLIT 101. During the senior year, majors enroll in 199.

COMPLIT 10N. Shakespeare and Performance in a Global Context—Stanford Introductory Seminar. Preference to freshmen. The problem of performance including the performance of gender through the plays of Shakespeare. In-class performances by students of scenes from plays. The history of theatrical performance. Sources include filmed versions of plays, and readings on the history of gender, gender performance, and transvestite theater. GER:DB-Hum, EC-Gender

3 units, Spr (Parker, P)

COMPLIT 11Q. Shakespeare, Playing, Gender—Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER:DB-Hum, EC-Gender

3 units, Win (Parker, P)

COMPLIT 30N. Fascism and Culture—(Same as ITALGEN 30N.) Stanford Introductory Seminar. Preference to freshmen. Intellectual and political roots of fascism, its critique of liberal democracy and communism, and legacies. Themes include: fascism versus nazism; collectivism versus individualism; radical right attitudes towards technology and industrialization; and comparisons between mid-20th century fascisms and subcultures of the contemporary new right including Jean-Marie Le Pen's Front National and what has been called Islamofascism. Readings from key fascist thinkers and theorists; case studies of artists, writers, architechts, and filmmakers who embraced fascism including Ezra Pound, Leni Riefenstahl, F.T. Marinetti, and Mario Sironi.

4 units, Aut (Schnapp, J)

COMPLIT 101. What is Literature?—How do scholars distinguish literary texts from other written genres such as history, philosophy, journalism, memoirs, biographies, lyrics, graffiti, or billboards? Who decides what is literature? What are the boundaries between literary and nonliterary texts. To what extent do literary texts offer a moral or political message? What are the aesthetic effects of literary as opposed to nonliterary texts? Sources include various genres, texts, and interpretive theories and methodologies. GER:DB-Hum, WIM

5 units, Spr (Nightingale, A)

COMPLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

COMPLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Spr (Staff)

COMPLIT 194. Independent Research

1-5 units, Aut, Win, Spr (Staff)

COMPLIT 199. Senior Seminar: Lives in Literature—Required of Comparative Literature seniors; others by consent of instructor. Literary careers and professions; graduate study and scholarly careers; teaching literature in schools; creative writing as a career; libraries and archives; opportunities for literary critics; the publishing industry; book retailing; literature in theater and museums. Literature as avocation: how to cultivate reading for pleasure. Guest speakers and field trips. GER:DB-Hum

5 units, Aut (Berman, R)

UNDERGRADUATE/GRADUATE

COMPLIT 119/219. Dostoevsky and His Times—(Same as SLAVGEN 151/251.) Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum

4 units, Win (Frank, J)

COMPLIT 121. Poems, Poetry, Worlds: An Introductory Course—What is poetry? How does it speak in many voices? Why does it matter? Poetry as genre, a field in literary studies, and indispensable to an educated person's world view. Poetry in crosscultural comparison as experience, invention, form, sound, knowledge, and part of the world. Readings include medieval to modern poetry of western Europe and the Americas; contemporary poetry of Europe, Latin America, Africa, and the U.S.; and present-day experimental digital, sound, and visual poetry. GER:DB-Hum

5 units, Aut (Greene, R)

COMPLIT 122. Literature as Performance—(Same as FRENGEN 122.) Theater as performance and as literature. The historical tension between performance and sexuality in the Western tradition since Greek antiquity. Non-European forms and conventions of performance and theatricality. The modern competition between theater and other forms of performance and media such as sports, film, and television. Sources include: classical Japanese theater; ancient Greek tragedy and comedy; medieval theater in interaction with Christian rituals and its countercultural horizons; the classical age of European theater including Shakespeare, Lope de Vega, and Molière. GER:DB-Hum

5 units, Win (Gumbrecht, H)

COMPLIT 123. The Novel, The World—(Same as ENGLISH 184.) Combining perspectives of the novels of the world as anthropological force with the sense of reality, and as protean form that has reshaped the literary universe. Readings from: ancient Greece; medieval Japan and Britain; and early modern Spain, China, and Britain; romantic theories of the novel; 19th-century realism and popular fiction; modernist experiments; and postmodern pastiches. GER:DB-Hum

5 units, Spr (Moretti, F)

COMPLIT 126A. Medieval Theatre: The Profane Staging of Sacrality—Mystery, miracle, and carnival plays of different literary traditions including liturgical and vernacular drama. How to define medieval theatre in relation to other contemporary genres; how it incorporated profane, everyday life into religious subject matter. The changing social context of medieval theatre in terms of dramatic characters, comedy in religious subject matter, and the growth of urban centers and acting fraternities. GER:DB-Hum

3-5 units, Spr (Galvez, M)

COMPLIT 127. Postcolonial *Bildungsroman*—Narratives of personal development which dramatize the clash of traditional and modern modes of individuation in postcolonial cultures. The problem of postcolonial education historically and formally as it emerges in fiction from Africa, the Arab world, and the Caribbean. The postcolonial endeavor to imagine alternative modernities; practical literary explorations of modernity's cultural imperatives.
3-5 units, Win (Tanoukhi, N)

COMPLIT 129. From Poetry of Praise to the Abolition of the Rhyme—Major poetic forms in Persian poetry. The relationship between form and content. Themes such as praise, nature, love, and authorship. The role of Sufism in the development of Persian poetry. The reception of Persian poetry in Europe and the U.S.. Writers include Sa'di, Rumi, Nizami Arozi, Khayam, Hafiz, and Nima. GER:DB-Hum
5 units, Spr (Shamel, M)

COMPLIT 132. The Literature of the New Europe—(Same as COMPLIT 232.) Premise is that a reconfigured canon of new European literature which better fits Europe's expanding and transnational contours would focus on texts of a shifting, complex cultural heritage, including texts by immigrants, and those that anticipate integration and assimilation issues. Attention to early modern authors with multiple allegiances and transnational backgrounds, and 20th-century bilingual, bicultural authors writing outside the nation. GER:DB-Hum
3-5 units, Win (Labov, J)

COMPLIT 141. Literature and Society in Africa and the Caribbean—(Same as FRENLIT 133.) Major African and Caribbean writers. Issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean. Topics include colonization and change, quest for identity, tradition and modernity, and new roles and status for women. Readings in fiction and poetry. Authors include Laye Camara, Mariama Ba, and Joseph Zobel. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Boyi, E)

COMPLIT 142. The Literature of the Americas—(Same as ENGLISH 172E.) Comparative perspective, emphasizing continuities and crises common to N., Central, and S. American literatures and distinctive national and cultural elements. Topics include: modes of representation of an American new world experience; myths of America as utopia; and critiques of notions of self and nation to which such myths give rise in political, historical, and literary forms. GER:DB-Hum, EC-AmerCul
5 units, Aut (Greene, R; Saldívar, R)

COMPLIT 147. Comparative Approaches to African American and Asian American Literature—(Same as ASNAMST 147A, CSRE 147A.) Cultural nationalism, feminism, multiculturalism, and literary canonization. Case studies comparing novels by Zora Neale Hurston and Maxine Hong Kingston, Ralph Ellison and Chang-rae Lee, and Toni Morrison and Fae Myenne Ng. Thematic and formal similarities; cultural, historical, and critical contexts.
5 units, Spr (Tang, A)

COMPLIT 149. What is Nobel Literature? Reading, Assessing, and Interpreting the Nobel Novels on the World Stage—Recent Nobel laureates in literature: Gabriel García Márquez, Nadine Gordimer, Toni Morrison, Kenzaburo Oe, and V.S. Naipaul. These writers come from different locations, yet each participates in a global conversation about the human condition. The impact of their identities upon their thought and writing. How the Nobel prize is awarded. The role of literature in the world, and analytical skills for reading literary texts. GER:DB-Hum, EC-GlobalCom
5 units, Sum (Palumbo-Liu, D)

COMPLIT 154. Heidegger on Hölderlin—(Same as GERLIT 154.) The encounter of Friedrich Hölderlin, a poet with philosophical passions in the first half of the 19th century, and Martin Heidegger, a philosopher who wrote poetically in the 20th century. What Hölderlin's poems and Heidegger's philosophy reveal about the essence and potential of lyrical texts: how neither attributes representational function to poetic texts, but sees them as existential and historical sites in which events can take place. In English; texts also available in German. GER:DB-Hum
5 units, Aut (Gumbrecht, H)

COMPLIT 155. Of Beauties and Beasts: Tales of Transformation from Antiquity to the Present—Representative texts from the literary traditions initiated by Ovid's Metamorphoses, concerning transformation: human to animal, man to woman, beast to beauty, nose to man. A conceptual toolbox for understanding the social and cultural function of narratives about transformation across time and place. Theoretical readings from history, mythology, psychology, and literary studies.
5 units, Spr (Pojarska, E)

COMPLIT 156. Weather in Literature: The Aesthetics of Time—From antiquity to the present. Mythological and biblical weather; the relationship between weather and representations of landscape; extreme weather and climate change; literary weather and the experience of time. Texts include *The Odyssey, Exodus, The Tempest, Robinson Crusoe,* and *Walden.*
5 units, Aut (Marno, D)

COMPLIT 157. Imitation of Life—What happens when authors create human characters, and when readers create them from authors' words? How do readers decide whether a character seems real, and what if the characterization is a bit off from their sense of reality? What are the relationships between external and internal characterizations, and how does each strategy foster or frustrate the sense of a human presence? When is characterization an impersonation, and what are the ethical and aesthetic concerns of speaking in another person's voice whether the other is fictional or a self-portrait? GER:DB-Hum
3-5 units, Win (Gelder, A)

COMPLIT 181. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Win (Anderson, L; Landy, J)

COMPLIT 214/314. Thomas Mann—(Same as GERLIT 285/385.) Key work, including short fiction, major novels, and essays. Mann's relation to naturalism and modernism, the conservative revolution and democracy; his American exile. Engagement with myth and the reception of romanticism, Wagner, and Nietzsche. Music in literature. Mann and Adorno. Readings in German include *Death in Venice, The Magic Mountain,* and *Doctor Faustus.* GER:DB-Hum
3-5 units, Win (Berman, R)

COMPLIT 218. Sholem Aleichem and Jewish Minority Discourse—Theories of minority discourse and minority literature; their applicability to modern Jewish writing, using Sholem Aleichem as a test case. How modern Hebrew and Yiddish literatures reacted to their purported minority, emphasizing Aleichem's reaction to these problems. Texts available in English.
5 units, Win (Miron, D)

COMPLIT 242. Framing the Other: Intercultural Projections between China and the West—Crosscultural intersections and mutual projections between the West and China emphasizing the 20th century. The production of representations of the other and their contexts; rethinking cultural contact. Possible alternatives to frequently biased and flawed projections of the other. Can orientalist and occidentalist fantasies be reshaped into grounds for an openness toward the other? GER:DB-Hum
5 units, Win (Bachner, A)

COMPLIT 247. The Modern Jewish Literary Complex—Does a unified modern Jewish canon exist; if not, what interactions among Jewish literatures have evolved through the last two centuries? Focus is comparative. Writers such as Reb Nakhman, Heine, Kafka, Bialik, Agnon, Amichai, Sholem Aleichem, I. L. Peretz, Bashevis-Singer, Y. Glatshteyn, Primo Levi, Jean Amery, Charles Reznikoff, Henry Roth, and Cynthia Ozick. Texts are available in English.
5 units, Win (Miron, D)

COMPLIT 249. Tradition and Modernity in Contemporary Iranian Literature—Modern Iranian literary texts in light of narrative theory and cultural alterity. Formal aesthetic aspects and social historical contexts. The problem of censorship in Iranian literary history. Were the sources of Iranian and Muslim modernity derived from the West or as an indigenous development? GER:DB-Hum, EC-GlobalCom
5 units, Aut (Milani, A)

COMPLIT 250. Literature, History, and Representation—(Same as FRENLIT 248.) Literary works as historical narratives; texts which envision ways of reconstructing or representing an ancient or immediate past through collective or individual narratives. Narration and narrator; relation between individual and collective history; historical events and how they have shaped the narratives; master narratives; and alternative histories. Reading include Glissant, Césaire, Dadié, Cixous, Pérec, Le Clézio, Mokkedem, Benjamin, de Certeau, and White.
3-5 units, Spr (Boyi, E)

COMPLIT 257C/357C. Crowds—(Same as FRENGEN 317, ITALGEN 317.) The place of human multitudes in the Western sociopolitical imagination from 1789 to the present. Theories of collectivity in works such as Tarde's *Laws of Imitation*, Le Bon's *Psychology of Crowds*, Freud's writings on mass psychology, and Canetti's *Crowds and Power*. Representations of crowds in literature, art, theater, and film. How modern mythologies are informed by premodern precedent and reflect upon the question of multitudes in postindustrial societies. Students write semantic histories and curate a virtual gallery.
3-5 units, Aut (Schnapp, J)

COMPLIT 311. Shakespeare, Islam, and Others—(Same as ENGLISH 373D.) Shakespeare and other early modern writers in relation to new work on Islam and the Ottoman Turk in early modern studies. *Othello, Twelfth Night, Titus Andronicus, The Merchant of Venice,* and other Shakespeare plays. Kyd's *Solyman and Perseda*, Daborne's *A Christian Turned Turk*, Massinger's *The Renegado*, Marlowe's *The Jew of Malta,* and literary and historical materials.
5 units, Spr (Parker, P)

COMPLIT 320A. Epic and Empire—(Same as ENGLISH 314.) Focus is on Virgil's *Aeneid* and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Win (Parker, P)

COMPLIT 320P. Materials and Methods for the Study of Poetry—(Same as ENGLISH 350C.) For graduate students in all national literatures and for comparatists. The intellectual and professional tools relevant to scholarship on poetry in any language. Theoretical issues and practical knowledge of forms, techniques, and cultural formations in verse. Topics such as voice, tropes, lineation, stanzas, meters, visuality, sound, prose poems, and translation.
3-5 units, Win (Greene, R)

COMPLIT 321. Present Pasts: History, Fiction, Temporality—(Same as GERLIT 299.) Relationship among history, memory, and literature in contemporary novels that engage with recent history. Theories of this relationship, including the proposition that Western culture in the second half of the 20th century is characterized by a crisis of temporality and an aversion to or dissatisfaction with traditional conceptions of the past. Readings include: Toni Morrison, J.M. Coetzee, Amos Oz, Orhan Pamuk, and Haruki Murakami; and theoretical works including Adorno, Heidegger, Benjamin, Jameson, Elias, and Huyssen.
5 units, Win (Eshel, A; White, H)

COMPLIT 329. Novel of the Americas—(Same as ENGLISH 309A.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalist ideologies but open to the consequences of transnational forces. How America has been invented as a category in sociocultural terms; the form the American novel has taken. Readings include Chopin's *The Awakening,* Cather's *Death Comes for the Archbishop,* Faulkner's *Absalom, Absalom,* Asturias's *Men of Maize,* Carpentier's *The Kingdom of this World,* Paredes's *The Shadow,* Silko's *Almanac of the Dead, and* Proulx's *Accordion Crimes.*
5 units, Spr (Saldívar, R)

COMPLIT 331C. Institutions of Enlightenment: The Invention of the Public Sphere—(Same as ENGLISH 303F.) The cultural foundations of the Enlightenment as public sphere and its relationship to the private or intimate sphere. The invention and naturalization of fundamental institutions of the Enlightenment such as the public, the private, the market, public opinion, literature, the individual, society, culture, knowledge, and politics.
5 units, Spr (Bender, J)

COMPLIT 334. German Romanticism—(Same as GERLIT 320.) Prose, lyrics, and aesthetic theory of the earlier Jena Romantics and late Romanticism. Why literary Romanticism was later understood as a revolutionary step toward modernity. Readings include Tieck, Novalis' *Hymnen an die Nacht,* Schlegel's *Rede über die Mythologie,* Brentano, Eichendorff, and Hoffmann.
3-4 units, Spr (Bohrer, K)

COMPLIT 335. F. T. Marinetti and Futurism—(Same as ITALGEN 353E.) Futurist artistic and literary theory and practice from its foundation by Marinetti through its avatars around the world. Focus is on readings from Marinetti; attention to writers and visual artists including Apollinaire, Mayakovsky, and Léger. Topics include: machines and culture; the futurist theater of surprise; poetry and performance; visual poetics and war; futurism's ties to bolshevism and fascism; and aeropainting and aeropoetry.
4 units, Spr (Schnapp, J)

COMPLIT 337. Augustine on the Body—(Same as CLASSGEN 237.) Ideas of the body in Greek and Roman literature and philosophy. Focus is on Augustine; his concepts of the edenic body, human body, and resurrected body. Asceticism in pagan and Christian culture in late antiquity. How did pagan and Christian cultural ideologies affect ascetic practices? To what extent did the Christians diverge from pagan practices of self-control in the 3rd and 4th centuries; how did philosophers and theologians treat sexuality and procreation in the context of elite self-fashioning?
4-5 units, Spr (Nightingale, A)

COMPLIT 352. Decadence and Vitalism—(Same as GERLIT 325.) A major motif in European literature from 1890 to 1920, the interdependence of the topics and their ideological and political implications. Readings include Nietzsche, Wilde, H.v.Hofmannsthal, Mann, Chekhov, D'Annunzio, Jünger, Marinetti, D.H. Lawrence, and Musil.
3-4 units, Spr (Bohrer, K)

COMPLIT 353. Theme, Thematics, Thematology in Postmodern Writing—Theorization of the concept of theme, the writing practice of thematization, and how theme negotiates the crossing of literal, figurative, moral, and mystical levels of significance in a discourse. Readings include Pynchon's *The Crying of Lot 49,* Coetzee's *Disgrace,* Sebald's *Austerlitz,* Levy's *Survival in Auschwitz,* Barthes' *S/Z,* and Jameson.
3-5 units, Win (White, H)

COMPLIT 359A .Philosophical Reading Group—(Same as FRENGEN 395, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.
1 unit, Aut, Win, Spr (Gumbrecht, H)

COMPLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as GERLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, Aut (Berman, R)

COMPLIT 370. Anthropology of Speed—(Same as FRENGEN 370, ITALGEN 370.) Ideas about accelerated motion; its significance and effects on cultures, from prehistory to the present. Impact of transportation revolutions on beliefs regarding selfhood and society. The rise of forms of intelligence and human skill sets that interact with, resist, or enable such revolutions. Topics include: speed and divinity; the evolution of conventions and techniques for capturing accelerated movement; speed and accident; velocity and liminal states such as inspiration, transport, and intoxication; and cognitive implications of sped-up states and their impact on cultural norms.

3-5 units, Spr (Schnapp, J)

COMPLIT 395. Research

1-15 units, Aut, Win, Spr (Staff)

COMPLIT 396L. Pedagogy Seminar I—(Same as ENGLISH 396L.) Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Jones, G)

COMPLIT 399. Dissertation

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

Comparative Literature majors are advised to consult the "Literatures, Cultures, and Languages" section of this bulletin for additional offerings.

DLCL 189. Honors Thesis Seminar

5 units, Aut (Surwillo, L)

COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE)

Director: C. Matthew Snipp

Curriculum Committee: Gordon Chang, Michele Elam, Charlotte Fonrobert, Vera Grant, Vered Shemtov, Yvonne Yarbro-Bejarano

Affiliated Faculty and Teaching Staff: David Abernethy (Political Science, emeritus), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Sociology), Joel Beinin (History), Karen Biestman (Native American Studies), Lawrence Bobo (Sociology), Albert Camarillo (History), Martin Carnoy (Education), Clayborne Carson (History), Gordon Chang (History), I-Chant Chiang (Asian American Studies), Karen Cook (Sociology), Michele Dauber (Law), Linda Darling-Hammond (Education), Carolyn Duffey (Comparative Studies in Race and Ethnicity), Jennifer Eberhardt (Psychology), Paulla Ebron (Anthropology), Penny Eckert (Linguistics), Harry Elam (Drama), Michele Elam (English), James Ferguson (Anthropology), Shelley Fisher-Fishkin (English), James Fishkin (Communication), George Fredrickson (History, emeritus), Estelle Freedman (History), Mariaelena Gonzalez (Chicana/o Studies), Vera Grant (African and African American Studies), David Grusky (Sociology), Georgina Hernandez (Comparative Studies in Race and Ethnicity), Korina Jocson (Asian American Studies), Miyako Inoue (Anthropology), Shanto Iyengar (Communication), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Matthew Kohrman (Anthropology), Jan Krawitz (Art and Art History), Jon Krosnick (Communication), Teresa LaFromboise (Education), David Laitin (Political Science), Liisa Malkki (Anthropology), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Monica McDermott (Sociology), Elisabeth Mudimbe-Boyi (French and Italian), James Montoya (Comparative Studies in Race and Ethnicity), Cherríe Moraga (Drama), Marcyliena Morgan (Communication), Paula Moya (English), Na'ilah Nasir (Education), Hilton Obenzinger (Undergraduate Advising and Research), Susan Olzak (Sociology), Amado Padilla (Education), José Palafox (Chicana/o Studies), David Palumbo-Liu (Comparative Literature), Arnold Rampersad (English), Robert Reich (Political Science), John Rickford (Linguistics), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (Center for African Studies), Stephen Sano (Music), Debra Satz (Philosophy), JoEllen Shively (Native American Studies), C. Matthew Snipp (Sociology), Paul Sniderman (Political Science), Stephen Sohn (English), Claude Steele (Psychology), James Steyer (Comparative Studies in Race and Ethnicity), Amy Tang (Asian American Studies), Nirvana Tanoukhi (Comparative Studies in Race and Ethnicity), Ewart Thomas (Psychology), Jeanne Tsai (Psychology), Linda Uyechi (Music), Guadalupe Valdés (Education; Spanish and Portuguese), Richard White (History), Michael Wilcox (Anthropology), Joy Williamson (Education), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Bob Zajonc (Psychology, emeritus), Steven Zipperstein (History)

Teaching Fellows: MarYam Hamedani, Julie Arvil Minich, Marcela Maria Muñiz

Program Offices: Building 360, Room 361D
Mail Code: 94305-2152
Phone: (650) 723-8449
Email: mibarra@stanford.edu
Web Site: http://ccsre.stanford.edu

Courses given in CSRE have the subject code CSRE. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

MAJORS

CORE CURRICULUM

The Interdisciplinary Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Comparative Studies, Chicana/o Studies, and Native American Studies) are offered as part of CSRE. All courses taken for the major must be taken for a letter grade. In addition, majors in the Program in African and African American Studies enroll in the core curriculum offered by CSRE. The directors of the programs and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the five majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum.

There are two types of introductory, interdisciplinary core courses taught by senior CSRE-affiliated faculty: regular core courses that compare across racial and ethnic groups; and single-group core courses that focus on a specific racial or ethnic group.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved CSRE course list, two of which must be introductory core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

SENIOR SEMINAR

Research and the writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X, Senior Seminar, offered in Autumn Quarter. The course takes students through the process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing. This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter.

RELATED PROGRAMS

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer internships for those who apply to work in a non-profit or government agency in a public policy-related area. The CSRE Public Policy/Leadership Institute is a two week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues and is taught by a leading faculty member. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly career workshops and informal luncheons for all majors and minors.

HONORS

Majors in each of the study areas who meet academic qualifications (at least a grade point average of 3.5 in CSRE-related courses) may apply for honors. Majors are expected to participate in a Spring Quarter junior workshop in preparation for honors thesis research. Prizes for best undergraduate honors theses are awarded annually by the CSRE curriculum committee.

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)

Director: Michele Elam

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES

Director: Gordon Chang

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term “Asian American,” the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

REQUIREMENTS

Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

Majors are required to take one foundational thematic course in Asian American Studies, such as COMPLIT 148, Introduction to Asian American Cultures. Majors must complete an additional 40 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five other courses must have an Asian American focus and must be selected from social science and humanities departments. Majors must take two courses offering a comparative perspective on race and ethnicity. Students may obtain credit for their study of a related Asian language towards their degree. A total of 60 units of course work is required for the major.

Students who wish to minor in Asian American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work is required for the minor.

CHICANA/O STUDIES

Director: Yvonne Yarbro-Bejarano

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education.

REQUIREMENTS

Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.

Majors are required to take CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies. Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser. A total of 60 units of course work are required for the major.

Students who wish to minor in Chicana/o Studies must complete two core introductory courses, including CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies, and one additional course from the approved list available from the CSRE undergraduate program office, and four additional courses related to the thematic concentration. A total of 30 units of approved course work is required for each minor.

COMPARATIVE STUDIES IN RACE AND ETHNICITY

Director: C. Matthew Snipp

Comparative Studies in Race and Ethnicity, the largest of the five major/minors offered in the program, does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

REQUIREMENTS

All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course may be counted toward the 15-unit core requirement.

Comparative Studies majors complete another 45 units of course work relevant to the thematic concentration they have chosen in consultation with the adviser.

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the “Jewish Studies” section of this bulletin.

NATIVE AMERICAN STUDIES

Director: C. Matthew Snipp

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term “Native American,” the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

REQUIREMENTS

Native American Studies must take the 15-unit CSRE core curriculum, including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Native American group may be counted toward the 15-unit core requirement.

Majors complete an additional 45 units of course work that satisfy three categories of their thematic concentration: Native American focus, comparative focus, and a methodology/research course. A total of 60 units of coursework are required for the major.

Students who wish to minor in Native American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work is required for the minor.

THEMATIC CONCENTRATION IN THE INSTITUTE FOR DIVERSITY IN THE ARTS (IDA)

Students in any major in the Comparative Studies in Race and Ethnicity undergraduate program can choose a concentration in the Institute for Diversity in the Arts. The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in IDA should contact the CSRE undergraduate program office.

A minimum of 60 units is required for the thematic concentration in IDA. Students take two of the CSRE core courses (10 units), one of which must focus on the arts; in addition, CSRE 200X is required of students in the IDA concentration and is taken in Autumn Quarter of the senior year (5 units, WIM). As a capstone experience, majors must write an honors thesis or senior paper.

IDA concentration students must also complete a senior project. Possible senior projects include a stage production, CD, or arts workshop curriculum in a community setting. Students who elect to write an honors thesis may incorporate their project as the basis for their thesis.

In addition to the core curriculum, students complete 45 units drawing from new and existing courses in departments and programs such as Art and Art History, Music, Drama, and Comparative Literature, as well as the five CSRE major areas of study: African and African American Studies; Asian American Studies; Chicana/o Studies; Comparative Studies; and Native American Studies. Thematic courses may focus on performance, visual aesthetics, writing for performance, critical studies in art and performance, and critical arts theory.

THEMATIC CONCENTRATION IN PUBLIC SERVICE

The Public Service thematic concentration is designed to ensure that CSRE students interested in public service have access to a structured curriculum providing a solid grounding in the theory and practice of public service that enables them to become future leaders in the sphere of public life. This concentration is not declared on Axess; it does not appear on the transcript or diploma. This thematic concentration can be completed within any of the majors within CSRE. Students should consult with the CCSRE undergraduate program director and the chair of African and African American Studies, Asian American Studies, Chicana/o Studies, or Native American Studies to ensure that the courses chosen for the Public Service thematic concentration also fulfill the requirements of the respective majors. Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 credits of approved CSRE core courses, including CSRE 200X, CSRE Senior Seminar, in which students with a thematic concentration in public service may select a topic for their senior paper or honors thesis that reflects their interest in public or experience with a past internship.

In addition to the usual core requirements expected of all CCSRE majors, students who wish to pursue a thematic concentration in Public Service must take an additional 40 units organized around four subject matter areas: organization and leadership; inquiry and assessment; serving diverse communities; and service learning. They also must complete 5 units in a public service internship. Students interested in the Public Service thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

THEMATIC CONCENTRATION IN AMERICAN DIVERSITY

The American diversity concentration is designed for students who wish to explore how the United States was and is constituted with relation to issues of race and ethnicity. The concentration investigates how American domestic and foreign policy, law, history, culture, and society are formed within conversations, debates, policies and studies regarding race and ethnicity. Issues of immigration, citizenship, empire and expansion, defense, diplomacy, human rights, public welfare, social justice and law, educational rights and other topics are explored from the angle of how racial and ethnic difference impacts debate and policy.

The concentration is not declared on Axess, it does not appear on the transcript or diploma. Students interested in the American diversity thematic concentration should contact the CSRE undergraduate program office.

The American diversity concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM) taken Autumn Quarter of the senior year. One single-group core course may be counted toward the 15 unit core requirement. In addition to the core requirements, students must take an additional 45 units of course work relevant to the thematic concentration which may include courses such as:

ARTHIST 178. Ethnicity and Dissent in the U.S. and Literature
COMM 148. Hip Hop and Don't Stop: Introduction to Modern Speech Communities
COMPLIT 148. Comparative Fictions of Ethnicity
CSRE 203A. Changing Face of America: Strategies for Civil Rights and Education in the 21st Century
EDUC 177. Education of Immigrant Students
EDUC 201. History of Education in the U.S.

THEMATIC CONCENTRATION IN RACE AND THE AMERICAN CITY

The race and the American city concentration is designed for students who wish to develop methodologies, data, and theoretical and conceptual materials concerning how urban life, infrastructure, and policies are influenced by race and ethnicity. As a virtual laboratories of social interaction, cities embody negotiations around resources, residences, financial districting, economic flow, health and educational resources, environmental policies, and city planning. A primary goal is for students to learn how they might contribute to the social and political discourse on race and ethnicity in the U.S. Participation in a public service internship and or Stanford in Washington is encouraged.

The concentration is not declared on Axess, it does not appear on the transcript or diploma. Students interested in the race and the American city concentration should contact the CSRE undergraduate program office.

The race and the American city concentration requires 15 units including two approved CSRE core courses and CSRE 200X, Senior Seminar (WIM) taken Autumn Quarter of the senior year. One single-group core course may be counted toward the 15 unit core requirement. In addition to the core requirements, students must take an additional 45 units of course work relevant to the thematic concentration which may include courses such as:

COMM 148. Hip Hop and Don't Stop: Introduction to Modern Speech Communities
NATIVEAM 117A. Diversity in American Indian Cultures
HISTORY 260. Race and Ethnicity in the American Metropolis
SOC 144. Race and Crime in America

COURSES

CORE

ANTHROPOLOGY

CASA 88. Theories of Race and Ethnicity
5 units, Aut (Yanagisako, S)

COMPARATIVE LITERATURE

COMPLIT 142. Literature of the Americas—(Same as English 172E).
5 units, Aut (Greene, R; Saldívar, R)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity—(Same as ENGLISH 172D, PSYCH 155.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci
5 units, Win (Moya, P; Markus, H)

CSRE 200X. CSRE Senior Seminar
5 units, Aut (Snipp, C; Hamedani, M)

EDUCATION

EDUC 177/277. Education of Immigrant Students: Psychological Perspectives
4 units, Win (Padilla, A)

EDUC 245. Understanding Racial and Ethnic Identity Development
3-5 units, Aut (LaFromboise, T)

PHILOSOPHY

PHIL 177. Philosophical Issues of Race and Racism
4 units, Win (Satz, D)

PSYCHOLOGY

PSYCH 75. Introduction to Cultural Psychology
5 units, alternate years, not given this year

SOCIOLOGY

SOC 147A/247A. Comparative Ethnic Conflict
5 units, Win (Olzak, S)

THEMATIC FOR MAJORS AND MINORS

AFRICAN AND AFRICAN AMERICAN STUDIES

For courses in African and African American Studies with the subject code AFRICAAM, see the "African and African American Studies" section of this bulletin.

ASIAN AMERICAN STUDIES

ASNAMST 147A. Comparative Approaches to African American and Asian American Literature—(Same as COMPLIT 147, CSRE 147A.) Cultural nationalism, feminism, multiculturalism, and literary canonization. Case studies comparing novels by Zora Neale Hurston and Maxine Hong Kingston, Ralph Ellison and Chang-rae Lee, and Toni Morrison and Fae Myenne Ng. Thematic and formal similarities; cultural, historical, and critical contexts.
5 units, Spr (Tang, A)

ASNAMST 180C. Asian American Sexualities—(Same as CSRE 180C, PSYCH 180C.) Seminar. Mutual constitution of culture and sexuality among Asian Americans; attitudes, behaviors, taboos, and identity. How masculinity and femininity are portrayed in the media; cultural attitudes toward homosexuality; and sexual politics. Social, political, and psychological implications.
5 units, Win (Chiang, I)

ASNAMST 181K. New Media Literacies and Popular Culture—(Same as CSRE 181K.) Individual and social uses of new media literacies. Students develop a Wikipedia page, class blog, and new media final project for public screening and exhibition.
5 units, Aut (Jocson, K)

ASNAMST 200R. Directed Research—May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

ASNAMST 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

CHICANA/O STUDIES

CHICANST 121C. Chicana/o Film Practices—(Same as CSRE 121C.) The ideological parameters of Chicanismo, including migration, labor, organized state violence, collectivism, familialism, spirtual practices, gender, and sexual politics. The cultural, aesthetic, and political dimensions of film form, including formal and textual analysis.
5 units, not given this year

CHICANST 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class—(Same as CSRE 165G, SOC 165G.) How does the Mexican American population stand in relation to the attainment of middle-class status? Topics include immigration, religion, political participation, the labor market, marriage, and pan-ethnic identification. Introduction to sociological methodology. Final project.
5 units, Win (Gonzalez, M)

CHICANST 180E. Introduction to Chicana/o Studies—(Same as CSRE 180E, SPANLIT 180E.) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship. GER:DB-Hum, EC-AmerCul
5 units, Spr (Yarbro-Bejarano, Y; Palafox, J)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective—(Same as CSRE 181S.) The border as zone of political, social, economic, and cultural interaction, conflict, and interdependence from before the U.S.-Mexico War. Manifest destiny, the incorporation of the boundary into the capitalist world system, and contemporary boundary issues including the border industrialization program, urbanization and migration, and the function of borders in reinforcing global apartheid.
5 units, Spr (Palafox, J)

CHICANST 187C. Latino Children: Cultural and Social Contexts of Development—(Same as CSRE 187C.) Ecological contexts, including family, school, and society, that shape the psychosocial and educational outcomes of Latino children. Sources include developmental and cultural psychology, anthropology of education, and sociology.
5 units, not given this year

CHICANST 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

CHICANST 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 11. Making and Unmaking Race, Ethnicity, and Difference in the 21st Century—Guest speakers, panel presentations, films screenings, and sartistic performances. May be repeated for credit.
1 unit, Aut (Markus, H)

CSRE 131A. Race and Reconciliation in Post-Apartheid Literature—How the writers of the new S. Africa have narrated the past as a way of imagining its future. Racial reconciliation in new S. African literature, and the relationship between literary aesthetics and racial politics for a society in transition. Negotiation and invention motivated by a desire to surmount racial differences through integration into a national culture and a yearning for racial identity through the revival of diverse ethnic origins.
5 units, Spr (Tanoukhi, N)

CSRE 145A. Poetics and Politics of Caribbean's Women Literature—(Same as CASA 145A.) Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization. GER: DB-SocSci, EC-Gender
5 units, Win (Duffey, C)

CSRE 190. Disciplinary Boundaries: Research Methods in the Academy—Faculty presentations from Anthropology, English, Psychology, Political Science, History, Sociology, and Drama. Collaborative research, and feminist ethnographic methods.
3 units, not given this year

CSRE 192. Race and Slavery in Brazil and the United States—Did race motivate enslavement or was racial profiling a product of slavery? Brazilian or American slavery and what it means to be a person of color in these countries today. Love, hatred, and endurance in two divided societies. Sources include historical narratives, literature, film, music, and iconography.
5 units, not given this year

CSRE 198. Internship for Public Service—Restricted to CSRE comparative studies majors with a concentration in public service. Students consult with the CSRE undergraduate program director and CSRE affiliated faculty to develop an internship. Group meetings. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

CSRE 199. Pre-Honors Seminar—For students interested in writing a senior honors thesis. Conceptualizing and defining a manageable honors project, conducting interdisciplinary research, the parameters of a literature review essay, and how to identify a faculty adviser.
1 unit, Win (Hamedani, M)

CSRE 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

CSRE 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

CSRE 200Y. CSRE Senior Honors Research
1-10 units, Win (Hamedani, M)

CSRE 200Z. CSRE Senior Honors Research
1-10 units, Spr (Hamedani, M)

CSRE 201B. Building Community: Art, Culture, and Social Change—How creative projects build and strengthen communities of common concern. Projects focus on cultural reclamation, multiculturalism, cultural equity and contemporary cultural wars, media literacy, independent film, and community-based art. Guest artists and organizers, films, and case studies.
5 units, Aut (Hernandez, G)

CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century—For students with leadership potential who have studied these topics in lecture format. Race discrimination strategies, their relation to education reform initiatives, and the role of media in shaping racial attitudes in the U.S.
5 units, Spr (Montoya, J; Steyer, J)

NATIVE AMERICAN STUDIES

NATIVEAM 109B. Indian Country Economic Development—(Same as CSRE 109B.) The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.
5 units, Aut (Biestman, K)

NATIVEAM 117S. History of California Indians—(Same as CSRE 117S.) Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system. GER:EC-AmerCul
5 units, Win (Shively, J)

NATIVEAM 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

NATIVEAM 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

AFRICAAM 101. African American Lecture Series
1-3 units, Aut, Win, Spr (Grant, V)

AFRICAAM 105. Introduction to African and African American Studies—(Same as SOC 147B/247B.)
5 units, Spr (Staff)

AFRICAST 111. Education for All? The Global and Local in Public Policy Making in Africa
5 units, Spr (Samoff, J)

AFRICAST 212. AIDS, Literacy and Land in Africa: Foreign Aid and Development in Africa
5 units, Win (Samoff, J)

AMSTUD 183. Border Crossings and American Identities—(Same as CASA 183.)
5 units, Aut (Duffey, C)

ARTHIST 192. Introduction to African Art
4 units, Win (Martinez-Ruiz, B)

ARTHIST 193A/393A. Caribbean and Latin American Art: Empire, Identity, and Society
4 units, not given this year (Martinez-Ruiz, B)

ARTHIST 195/395. Introduction to Black Atlantic Visual Traditions
4 units, not given this year (Martinez-Ruiz, B)

ARTHIST 292A. Researching Africa: Problem and Theory in African Art
5 units, not given this year (Martinez-Ruiz, B)

CASA 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America
5 units, not given this year

CASA 88. Theories in Race and Ethnicity
5 units, Aut (Yanagisako, S)

CASA 113/213. Women in Islam: The Central Asian Case
5 units, not given this year

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates
5 units, not given this year

COMM 148/248. Hip Hop and Don't Stop: Introduction to Modern Speech Communities
4-5 units, Win (Morgan, M)

COMPLIT 41Q. Ethnicity and Literature
3-5 units, not given this year

COMPLIT 141. Literature and Society in Africa and the Caribbean
4 units, Spr (Boyi, E)

COMPLIT 142. The Literature of the Americas—(Same as ENGLISH 172E.)
5 units, Aut (Greene, R; Saldívar, R)

COMPLIT 144. Arab Minorities in a Transnational Context: Fictions of Race, Ethnicity, Periphery
3-5 units, not given this year

COMPLIT 148. Introduction to Asian American Cultures
3-5 units, not given this year

DANCE 42. Dances of Latin America
2 units, Aut, Spr (Cashion, S)

DANCE 43. Afro-Peruvian and Afro-Brazilian Dance
1 unit, Win (Cashion, S)

DANCE 168. Dance and Culture in Latin America
4 units, Spr (Cashion, S)

DRAMA 17N. *Del Otro Lado:* Latina/o Performance Art in the U.S.—(Same as SPANLIT 178N.)
3 units, Win (Staff)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts
5 units, Win (Elam, H)

DRAMA 160/260. Performance, Dance History, and Gender
4 units, Aut (Staff)

DRAMA 177/277. Playwriting
5 units, Win (Moraga, C)

DRAMA 179G. Indigenous Identity in Diaspora People of Color Art Practice in North America
5 units, Spr (Moraga, C)

EDUC 115Q. Identities, Race, and Culture in Urban Schools
3 units, Spr (Nasir, N)

EDUC 146X. Perspectives on the Education of Linguistic Minorities—(Same as APPLLING 207.)
3-5 units, Spr (Valdés, G)

EDUC 149/249. Theory and Issues in the Study of Bilingualism—(Same as SPANLIT 207.)
3-5 units, Aut (Valdés, G)

EDUC 165/265. History of Higher Education in the U.S.—(Same as HISTORY 158C.)
3-4 units, Aut (Staff)

EDUC 179. Urban Youth and Their Institutions: Research and Practice
4-5 units, Aut (McLaughlin, M)

EDUC 181/381. Multicultural Issues in Higher Education
4 units, Win (Antonio, A)

EDUC 193B. Peer Counseling in the Chicano/Latino Community
1 unit, Aut (Martinez, A)

EDUC 193C. Peer Counseling in the African American Community
1 unit, Aut (Edwards, S)

EDUC 193F. Psychological Well-Being on Campus: Asian American Perspectives
1 unit, Spr (Brown, N)

EDUC 193N. Peer Counseling in the Native American Community
1 unit, Win (Simms, W)

EDUC 201. History of Education in the United States—(Same as HISTORY 158B.)
3-4 units, Spr (Staff)

EDUC 201B. Education for Liberation
3-4 units, not given this year

EDUC 233A. Adolescent Development and Mentoring in the Urban Context
3 units, Aut (LaFromboise, T)

EDUC 245. Understanding Racial and Ethnic Identity Development
3-5 units, Aut (LaFromboise, T)

EDUC 340. Psychology and American Indian Mental Health
3-5 units, not given this year

ENGLISH 43/143. Introduction to African American Literature
3-5 units, Aut (Elam, M)

ENGLISH 43A/143A. American Indian Mythology, Legend, and Lore
3-5 units, Win (Fields, K)

ENGLISH 43B/143B. Introduction to Chicana/o Literature and Culture
3-5 units, Aut (Moya, P)

ENGLISH 43C/143C. Introduction to Asian American Literature
3-5 units, Aut (Sohn, S)

ENGLISH 138C. *Huckleberry Finn* and American Culture—(Same as AMSTUD 138C.)
5 units, Win (Fishkin, S)

ENGLISH 140A. Creative Resistance and the Holocaust
5 units, Win (Felstiner, J)

ENGLISH 146C. Hemingway, Hurston, Faulkner, and Fitzgerald
5 units, Aut (Jones, G)

ENGLISH 172B. Introduction to Feminist Studies—(Same as FEMST 101.)
5 units, Aut (Elam, M)

FEMST 120. Introduction to Queer Studies
4-5 units, Win (Hunter, M)

FEMST 208. Bernice Johnson Reagon and the Cultural Politics of Racial and Gender Justice
2 units, offered once only

HISTORY 54S. America's Cold War in Asia from Korea to Vietnam, 1945-1975
5 units, Aut (Kim, K)

HISTORY 55S. Border Lives, Border Identities: The History of Mexican American Women in the United States
5 units, Win (Flores, L)

HISTORY 59. Introduction to Asian American History
5 units, Aut (Chang, G)

HISTORY 150C. The United States in the Twentieth Century
5 units, Spr (Camarillo, A; Chang, G)

HISTORY 161. U.S. Women's History, 1890s-1990s
5 units, Spr (Freedman, E)

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle
4-5 units, Aut (Carson, C)

HISTORY 248S/448A. African Societies and Colonial States
4-5 units, not given this year

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice
5 units, Spr (Staff)

HISTORY 258/358. History of Sexuality in the U.S.
4-5 units, not given this year

HISTORY 260. California's Minority-Majority Cities
5 units, Spr (McKibben, C)

HISTORY 265/365. New Research in Asian American History
4-5 units, not given this year

HUMBIO 122S. Social Class, Race, Ethnicity, Health
4 units, offered next year

LINGUIST 150. Language in Society
4 units, Win (Rickford, J)

LINGUIST 156. Language and Gender
4 units, not given this year

MUSIC 17Q. Perspectives in North American Taiko
4 units, Spr (Sano, S)

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.)
5 units, not given this year

POLISCI 133. Ethics and Politics of Public Service—(Same as ETHICSOC 133.)
5 units, Aut (Reich, R)

POLISCI 141. The Global Politics of Human Rights
5 units, not given this year

POLISCI 221E. Seminar on Race in Institutional Contexts
5 units, Spr (Barker, L)

POLISCI 221F. Race and American Politics
5 units, Spr (Sniderman, P)

PSYCH 215. Mind, Culture, and Society
3 units, Win (Markus, H; Steele, C)

PSYCH 217. Topics and Methods Related to Culture and Emotion
1-3 units, Win (Tsai, J)

SOC 45Q. Understanding Race and Ethnicity in American Society
5 units, Aut (Snipp, C)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities
3 units, Spr (Rosenfeld, M)

SOC 120/220. Interpersonal Relations
5 units, Aut (Ridgeway, C)

SOC 136/236. Sociology of Law
3-5 units, Aut (Dauber, M)

SOC 138/238. American Indians in Comparative Historical Perspective
5 units, Win (Snipp, C)

SOC 139/239. American Indians in Contemporary Society
5 units, Spr (Snipp, C)

SOC 140/240. Introduction to Social Stratification
5 units, Win (Sandefur, R)

SOC 141B. Race, Ethnicity, Religion, and Health
5 units, Spr (Gonzalez, M)

SOC 142/242. Sociology of Gender
3-5 units, Win (Ridgeway, C)

SOC 143/243. Prejudice, Racism, and Social Change
5 units, not given this year

SOC 149/249. The Urban Underclass—(Same as URBANST 112.)
5 units, Aut (Rosenfeld, M)

SOC 155/255. The Changing American Family
5 units, Spr (Rosenfeld, M)

SPANLIT 101N. Visual Studies and Chicana/o Art
3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 193. The Cinema of Pedro Almodóvar
3-5 units, Spr (Resina, J)

SPANLIT 206. Language Use in the Chicano Community—(Same as EDUC 242, APPLLING 206.)
3-5 units, Spr (Valdés, G)

SPANLIT 286/386. The Films of Lourdes Portillo
3-5 units, Aut (Yarbro-Bejarano, Y)

SPANLIT 289. The Body in Chicana/o Cultural Representations
5 units, Aut (Staff)

DRAMA

Emeriti: (Professors) Helen W. Schrader, Carl Weber; *(Associate Professor)* William S. Eddelman; *(Senior Lecturer)* Patricia Ryan

Chair: Peggy Phelan

Drama Division

Professors: Jean-Marie Apostolidès (French and Italian, Drama), Harry J. Elam, Jr., Peggy Phelan (Drama, English), Alice Rayner, Rush Rehm (Drama, Classics)

Assistant Professor: Branislav Jakovljevic

Professor (Teaching): Michael F. Ramsaur

Associate Professor (Teaching): Janice Ross

Senior Lecturer: Connie Strayer

Lecturers: Maya Arad, Cynthia Bassham, Jeffrey Bihr, Alison Duxbury, Erik Flatmo, Daniel Klein, Kathryn Kostopoulos, Kris Salata, Leticia Samonte

Visiting Assistant Professors: Patrick Anderson, Jisha Menon

Artists in Residence: Amy Freed, Cherríe Moraga

Institute for Diversity in the Arts and Black Performing Arts Division

Division Director: Harry J. Elam, Jr.

Associate Director (IDA): Georgina Hernandez

Director (CBPA): Robert Moses

Joint IDA/BPA Steering Committee: Suzanne Abel (Haas Center for Public Service), Jan Barker Alexander (Black Community Services Center), Elena Becks (Staff), Enrique Chagoya (Associate Professor, Studio Art), Regina Covington (King Papers), Alice Endamne (*Black Arts Quarterly*), Diane Frank (Lecturer, Dance), Vera Grant (African and African American Studies), Tony Kramer (Senior Lecturer, Dance), Barbaro Martinez-Ruiz (Associate Professor, Art History), Julia Melancon (Staff), Cindy Ng (Asian American Activities Center), Janice Ross (Associate Professor, Teaching, Drama), Stephen Sano (Associate Professor, Teaching, Music), Laura Selznick (VPUE), Yvonne Yarbro-Bejarano (Professor, Chicana/o Studies), Patience Young (Cantor Arts Center)

Dance Division

Director: Tony Kramer

Senior Lecturers: Susan Cashion, Tony Kramer

Lecturers: Kristine Elliott, Diane Frank, Aleta Hayes, Muisi-Kongo Malonga, Rika Onizuka, Richard Powers, Ronnie Reddick

Artist in Residence: Robert Moses

Mail Code: Drama, 94305-5010; Dance, 94305-8125

Courses given in Drama have the subject code DRAMA. Courses given in Dance have the subject code DANCE. For a complete list of subject codes, see Appendix B.

DRAMA DIVISION

The Department of Drama bases its undergraduate and graduate programs on the integration of theory and performance. The faculty commit themselves to the idea that artists must be able to analyze their creative work and that scholars must approach their own specializations creatively. The department prepares students for continued work at the graduate level, either in the academy or in conservatory programs that educate artists for careers in the theater within a comprehensive liberal arts education. The Ph.D. program, which demands that its candidates work as both scholars and theater artists, prepares the students to pursue a career in university teaching and research, and to undertake further work in professional and university theaters.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The requirements for the B.A. degree in Drama are designed to integrate the critical and historical study of drama with the study and experience of performance. The major provides aesthetic and critical opportunities for students to develop special aptitudes. For example, a student may elect an emphasis in acting, directing, design, or critical theory, or may combine areas of emphasis. Examples of how students can structure course work to take advantage of such an emphasis are available from the major adviser. Students are encouraged to declare a major in their sophomore year.

The core program of Drama courses required of all majors is:

1. Performance/Literature/History: two courses with suffix 'H' (designating history) and two courses with suffix 'T' (designating topic) from 150-169
2. Stage Management Project: 134 or 34 plus two of 39A,B,C, or D
3. Senior Project: Drama majors must complete an approved senior project in the area of their specialization: a minimum of 2 units in DRAMA 200 or 205.

Two years of a college-level foreign language are recommended.

All majors, in addition to completing the core described above, are required to complete one of the following seven specializations:

1. *Acting:*
    a) DRAMA 120A,B, Fundamentals of Acting; DRAMA 121M, Movement and Character; DRAMA 121V, Voice and Stage Speech
    b) The student must have completed at least 4 units of DRAMA 29 and acted in at least two department productions.
    c) DRAMA 28, Makeup for the Stage
    d) 2 units of studio class in Dance
    e) three additional acting classes
    f) one course in dramatic literature
    g) 5 units of approved electives in Drama or Dance
    h) one of DRAMA 39A,B,C, or D
2. *Directing:*
    a) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
    b) one course in dramatic literature
    c) DRAMA 30, Introduction to Theatrical Design
    d) DRAMA 31, Introduction to Lighting and Production
    e) one course in acting
    f) one of 39A,B,C, or D
    g) 9 units of approved electives in Drama
3. *Playwriting/Dramaturgy:*
    a) DRAMA 177, Playwriting
    b) DRAMA 178, Intensive Playwriting
    c) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
    d) DRAMA 176, Undergraduate Dramaturgy Project
    e) one course in dramatic literature
    f) one course in acting
    g) one of 39A,B,C, or D
    h) 4 units of approved electives in Drama
4. *Design:*
    a) DRAMA 30, Introduction to Theatrical Design
    b) DRAMA 31, Introduction to Lighting and Production
    c) two of 131, 132, 133, or 135
    d) 2 units each: 39A,B, and C
    e) two of 231, 232, 233, or 235
    f) 11 units of approved electives in Drama or Art
5. *Technical Production/Stage Management:*
    a) DRAMA 30, Introduction to Theatrical Design
    b) DRAMA 31, Introduction to Lighting and Production
    c) one of 131, 132, 133
    d) 2 units each: 39A,B, and C
    e) DRAMA 34, Stage Management
    f) DRAMA 136, Drafting or MUSIC 19

   g) DRAMA 135, Sound Design for Theater
   h) 11 units of approved electives in Drama
6. *Dance:*
   a) one of: DANCE 102, Duets Project; DANCE 103, Marriage of Text and Movement; DANCE 105, Contemporary African Styles and Dancemaking; DANCE 106, Essence of Contemporary Dance Performance; DANCE 112, Collaborative Processes and Choreography; DANCE 113, Dual Processing: Movement and Choreography; DANCE 169, Choreography, Creation, Staging, and Reconstruction
   b) one additional dance theory class from DANCE 116, 166, 168, 197, or 242, or DRAMA 160
   c) DRAMA 31, Introduction to Lighting and Production
   d) one of DRAMA 39A,B,C, or D
   e) ten classes of studio work: at least one dance class from modern, jazz, world, ballet, social dance and improvisation plus contact, and acting; and two classes of Dance Performance: 100, 102, 103, 105, 106, 169
   f) 6 units of approved electives in Music and Art
7. *Performance Theory and Cultural Studies:*
   a) ENGLISH 163, Shakespeare
   b) one course in acting
   c) one of 39A,B,C, or D
   d) three courses in dramatic literature
   e) an ethnic drama class
   f) 6 units of course work in dramatic literature, criticism, theater history, history, art history to be determined in consultation with the undergraduate adviser

SENIOR PROJECT

Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student must do a senior project in his or her area of specialization: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies. The project can be a creative or research project, or a combination of both. The student has the option of writing an essay associated with the project. Students receive credit for senior projects through DRAMA 200, Senior Project, or DRAMA 205, Senior Project: Acting.

Students pursuing senior projects should consult with both the Department of Drama undergraduate adviser and a faculty adviser in the project's specialty area. These consultations should take place early in the junior year. Students must petition approval of senior projects through the Department of Drama undergraduate adviser. Projects are typically approved by the department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year.

The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a one-to-two page abstract of the associated essay if an essay is part of the project.

MINOR

For students wishing to minor in Drama, the following core requirements must be met:

1. Three courses in Performance/Literature/History from 150-169.
2. Performance Practice: two of 39A,B,C, or D.
3. A practical production class in technical theater or performance: one of 29, 39A,B,C, or D.
4. Elective courses totaling a minimum of 16 units from the specified courses in any one of the seven specializations listed above would constitute a minor concentration in: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies.

HONORS PROGRAMS

DRAMA

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student's work-to-date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below 'B-' in a course (departmental or otherwise) that constitutes part of their Drama major.
2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived; transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.
3. Students also must have completed half of the courses in their specialization by the end of their junior year.
4. Students must complete 4 units in the Honors Colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter's colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
5. GPA in courses counting towards the major must be 3.5 by the time of graduation.
6. By the end of the seventh week of the quarter in which they plan to graduate, all students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.
7. On the basis of a student's work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.
8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

HONORS COLLOQUIA AND THESIS

The honors colloquia aim to engage honors program students in an ongoing discussion of important issues in the field, with particular focus on the students' areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. The colloquia offer venues for honors students to discuss their work in the department (their senior projects, for example), and to present and discuss their research for their honors thesis. The honors thesis represents an extended engagement with an important issue or subject, determined by the student, the honors program adviser, and the student's senior project adviser. It typically consists of a long essay (7,500-10,000 words) presenting the student's research on the subject. As an honors thesis may deal with issues related to the student's senior project, or with issues related to the student's specialization, the honors program adviser, the senior project adviser, and another faculty member constitute the student's honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. In the case of an honors program student whose senior project does not involve production or performance but takes written form, the requirements for the honors thesis change. In discussions with the student's honors committee, the student develops a performance/production-based project that provides the equivalent of a written honors thesis.

HUMANITIES

An honors program in Humanities is available for Drama majors who wish to supplement their major with related and carefully guided studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for a description of the honors program. Students who enroll in this program may offer HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.

GRADUATE PROGRAMS

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of the bulletin.

All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. All candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

The following department requirements are in addition to the University's basic requirements for the doctorate.

1. *Units and Course Requirements—*
    a) a minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
    b) the core seminars: 300A, 300B, 301, 302, 303, 304
    c) a coherent program of three additional graduate seminars within the Department of Drama to be worked out with the adviser.
    d) the four workshops in directing: DRAMA 370, 372, 373, 374. In the first two years, students take 370, Concepts of Directing, 372, Projects in Directing, and 373, Directing and Dramaturgy. 372 consists of the conceptual development, design, and production of a short play in a multi-form space. In the second year, students take 374, Graduate Directors' Performance Project, to stage a more fully developed production chosen in consultation with the faculty.
    e) three graduate colloquia in directing: 380.
2. *Language Requirement*—The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:
    a) achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
    b) a reading examination given each quarter by the various language departments, except for Latin and Greek
    c) pass with a grade of 'B' or higher a course in literature numbered 100 or higher in a foreign language department at Stanford.
3. *Teaching Requirement*—Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year. During non-teaching quarters in years four and five, students serve as research assistants.
4. *Examinations*—Candidates must complete three examinations (one comprehensive and two qualifying) by the end of the first three years of study at Stanford.
    a) *The comprehensive examination* is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the start of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.
    b) *The first qualifying exam,* which must be completed before advancement to candidacy at the end of the second year, consists of three 25-35-page essays written in consultation with a faculty adviser. These essays should demonstrate mastery of the field such that a student would be able to teach an introductory class in the area. Reading lists for each period should be approved by the end of the first year. Each essay should cover a different period of dramatic literature and theater history. These essays should not duplicate any written work from seminars. After approval by the adviser, the graduate studies committee reads and evaluates these essays, one in each of Autumn, Winter, and Spring quarters. For the first qualifying examination, choose from the following periods of Western drama:
        Classical
        Medieval and Renaissance
        17th, 18th, and early 19th century
        Modern: 1870-1980
        Contemporary: 1980 to the present
    c) *The second qualifying examination* is a departmental oral with three faculty members, at least two from the Department of Drama. This oral is based on a 40-page review of the literature for the dissertation that the student creates in conjunction with the dissertation reading committee.
5. *Satisfactory Progress, Annual Review* —The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the departmental graduate studies committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student's work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Any student not making satisfactory progress is subject to having funding suspended.
6. *Application for Candidacy*—By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
    a) the core seminars: 300A, 300B, 301, 302, 303, 304
    b) The directing workshop series (DRAMA 370-374), including the successful production of at least one work in public performance and three graduate colloquia in directing (DRAMA 380)
    c) A foreign language
    d) At least two examinations

    Based on its evaluation of the student's progress, the graduate studies committee certifies the student's qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year.
7. *Research Assistantship*—Generally, the third year is devoted to graduate study and research assistantships with faculty members.
8. *Dissertation Prospectus*—The dissertation prospectus must be approved by the candidate's adviser and by the departmental graduate studies committee by the end of Spring Quarter of the third year. Within 30 days of approval, a student should schedule a prospectus colloquium with the proposed reading committee.
9. *University Oral Examination*—The University oral examination is a defense of the dissertation based on a full draft submitted at least 75 days before the proposed degree conferral. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners.

10. *Dissertation*—Normally, the Ph.D. program is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. Following formal admission to candidacy (typically at the end of the second year), the dissertation must be completed and approved within five years from the quarter in which candidacy is granted. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.

APPLICATION AND FELLOWSHIPS

Applicants for the Ph.D. program may write directly to the Department of Drama for information. Online graduate applications are available at http://gradadmissions.stanford.edu/. In addition to the required statement of purpose, all applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Drama begin study in the Autumn Quarter of each academic year; there are no mid-year admissions. Graduate students must be degree candidates. Admissions materials must be submitted to the Department of Drama, Memorial Auditorium, Room 144, 551 Serra Mall, Stanford, CA 94305-5010 by December 11.

The Department of Drama awards a number of fellowships to students in the Ph.D. program.

For more information, write to the address above, telephone (650) 723-2576, fax (650) 723-0843, email dramainfo@stanford.edu, or see http://www.stanford.edu/dept/drama/ to download the latest information in .pdf format.

JOINT PH.D. IN DRAMA AND HUMANITIES

The Department of Drama participates in the Graduate Program in Humanities (GPH) leading to a joint Ph.D. degree in Drama and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

INSTITUTE FOR DIVERSITY IN THE ARTS AND BLACK PERFORMING ARTS DIVISION

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression..

The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, symposia, and a literary journal, the *Black Arts Quarterly*. The division produces annual student productions, and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture.

The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, arts administration, and teaching.

Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major. Students can emphasize Black performance through the African and African American Studies major.

DANCE DIVISION

The Dance Division aims to develop trained bodies, inquiring minds, and aesthetic imaginations through movement as well as dance scholarship. The program emphasizes informed and active engagement in dance by stimulating a range of intelligences that honor somatic wisdom.

Since its inception in 1920, dance at Stanford University has positioned itself responsively to the changing needs of the University and society. It offers a range of studio and lecture courses aimed at enhancing the understanding of dance as a way to create and communicate knowledge and meaning. The program encourages students to make connections between dance, other disciplines, culture, and society.

UNDERGRADUATE PROGRAMS

Students who wish to major in Drama with a specialization in Drama with a concentration in Dance, should see the undergraduate adviser, Susan Cashion, in the Dance Division.

MINORS

For students wishing to minor in Drama with a concentration in Dance, see the “Minor” section under Drama above.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Drama department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Drama are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 25A,B. Art and Ideas: Performance and Practice—Two quarter sequence. Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER:IHUM-2,3

IHUM 25A: *4 units, Win (Ross, J)*

IHUM 25B: *4 units, Spr (Rayner, A)*

DRAMA DIVISION

Registration for most drama classes takes place at the first class meeting; further registration information is printed in the *Time Schedule* each quarter. Some class sizes are limited and require advance registration in the Department of Drama, Room 144, Memorial Auditorium.

INTRODUCTORY

DRAMA 4. Creating Lighting and Sound in Performance—(Graduate students register for 204.) Concepts of lighting and sound in addressing storytelling in performative projects.

3 units, Aut (Ramsaur, M; Duxbury, A)

DRAMA 11N. Dramatic Tensions: Theater and the Marketplace—Stanford Introductory Seminar. Preference to freshmen. Tension between artistic and commercial forces in modern theater; the conflicted state of the art form. Sources include major and emerging contemporary figures in commercial, fringe, and nonprofit theater in the U.S. and UK. Visits with writers, directors, and dramaturges. GER:DB-Hum

4 units, Aut (Freed, A)

DRAMA 14N. Shakespeare from Stage to Screen—Stanford Introductory Seminar. Preference to freshmen. The texts, stage practices, and filmic transformations for Shakespearean plays, including *Henry V*, *Hamlet*, *Midsummer Night's Dream*, and *Macbeth*. Close readings of texts and films; the relationship of film technologies to the texts in the production of political and social space; and the cultural assumptions carried by images and characters. GER:DB-Hum

4 units, Aut (Rayner, A)

DRAMA 16N. Beauty or the Beast? Kitsch and Contemporary Culture—Stanford Introductory Seminar. Preference to freshmen. What kind of esthetic experience does kitsch describe? Is it a matter of taste? Kitsch through disciplines such as visual arts, theater, literature, music, advertising, fashion, celebrity culture, and food. GER:DB-Hum

4 units, Win (Jakovljevic, B)

DRAMA 17N. *Del Otro Lado:* Latina/o Performance Art in the U.S.—(Same as SPANLIT 178N.) Stanford Introductory Seminar. Preference to freshmen. Works by U.S. Latina/o performance artists from the margins of the mainstream Euro-American theater world. How performance art serves as a dramatized essay, producing transgressive explorations of queer and national and ethnic identities. Artists: Luis Alfaro, Nao Bustamante, the Coatlicue Theater Company, Guillermo Gómez-Peña, Celia Herrera Rodríguez, Ana Mendieta, and Carmelita Tropicana. Creation and performance of a short original piece; performance viewings. GER:DB-Hum, EC-AmerCul

3 units, Win (Moraga, C)

DRAMA 20. Introduction to Acting—Theater games, vocal and physical exercises, stage terminology, characterization, and rehearsal techniques. Goals is to develop an acting vocabulary and technique appropriate for any role, and a vocal and physical warm-up for relaxation and range. Limited enrollment.

2 units, Aut, Win (Kostopoulos, K), Spr (Freed, A), Sum (Staff)

DRAMA 22. Scene Work—For actors who complete substantial scene work with graduate directors in the graduate workshop.

1-2 units, Aut, Win, Spr (Staff)

DRAMA 28. Makeup for the Stage—Techniques of makeup application for the artist and actor: aging, prosthetics, stylization, characterization, animals, and fantasy make-up.

2 units, Aut (Strayer, C)

DRAMA 29. Theater Performance: Acting—Students cast in department productions receive credit for their participation as actors; 1-2 units for graduate directing workshop projects and 1-3 units for major productions (units determined by instructor). May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

DRAMA 30. Introduction to Theatrical Design—Lecture/lab. Visual communication skills used in stage productions. Design and construction methods for stage scenery, costumes, and lighting.

4 units, Aut (Flatmo, E)

DRAMA 31. Introduction to Lighting and Production—The technical and aesthetic aspects of lighting and the production process.

4 units, Win (Ramsaur, M)

DRAMA 32. Textiles—Introduction to fabric techniques and processes for stage costumes.

2-3 units, Win (Strayer, C)

DRAMA 34. Stage Management Techniques—The production process, duties, and responsibilities of a stage manager. Skills needed to stage manage a production.

2-3 units, Aut (Duxbury, A)

DRAMA 39A. Theater Performance: Scenery and/or Property

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39B. Theater Performance: Lighting/Sound

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39C. Theater Performance: Costumes/Makeup

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39D. Theater Performance: Prosser Stage Management

1-3 units, Aut, Win, Spr (Duxbury, A)

INTERMEDIATE

Primarily for the major, but open to all undergraduates who have the necessary prerequisites.

DRAMA 103. Improvising—The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on *TheatreSports* by Keith Johnstone. Readings, papers, and attendance at performances of improvisational theater. Limited enrollment.

3 units, Aut, Win (Klein, D)

DRAMA 104. Introduction to Sketch Comedy—Writing, directing, and performing original comic scenes, live and on video. Emphasis is on collaborative ensemble process and product. Topics include character, premise, satire, parody, joke writing, and comic timing. Prerequisite: 103 or 121C, or consent of instructor.

3 units, Win (Klein, D)

DRAMA 120A,B. Acting: The Fundamentals—For students who intend to begin serious actor training. First quarter: the basic vocabulary of objective and action. Theater games and improvisation develop the ability to act with focus, intention, and energy. Basics of characterization and transformation. Second quarter: the actor's spontaneity and imagination are used to reveal the life of a play, working with dramatic texts. Approaches to the actor's craft include character biography and moment-to-moment truthful playing. Exercises including from Strasberg, Meisner, Chaikin, and Linklater. Scene and monologue work from primarily naturalistic plays. Outside rehearsal time required. Must be taken in sequence. Prerequisite: 120A or consent of instructor.

3 units, **A:** *Aut (Freed, A), Win (Kostopoulos, K),*
B: *Spr (Kostopoulos, K)*

DRAMA 121M. Movement and Character—Kinesthetic awareness and physical presence of the performer in relationship to others through techniques of focus, spatial intent, task, and choreographic improvisation.

3 units, Win (Bihr, J)

DRAMA 121P. Acting: Period and Style—Expanding the acting range through heightened language. Scenes from non-contemporary dramatic literature including texts from Shakespeare, Shaw, Turgenev, Ibsen, and Strindberg.

3 units, Spr (Freed, A)

DRAMA 121V. Voice and Speech for the Stage—Goal is to strengthen, support, and vary the voice through breath, resonance, articulation, and projection. Speech work includes phonetics, text analysis, and verbal action as it relates to dramatic material.

2 units, Spr (Bassham, C)

DRAMA 123. Building a Character—Creating characters for performance in dramaturgical sources such as realism and the 20th-century avant garde. Directors and playwrights including Stanislavski and Brecht. Textual analysis, research, and physical and vocal methods.

3 units, Aut (Joseph, R)

DRAMA 125. Acting Shakespeare—Formal training in skills needed to perform Shakespeare.

3 units, Aut (Bihr, J)

DRAMA 127. Alternative Acting Methods—Acting methods from practitioners such as Augusto Boal, Anne Bogart, Jerzy Grotowski, and Jacques LeCoq applied to a single text culminating in a final presentation implementing different styles and possibilities.

3 units, Aut (Anderson, R)

DRAMA 131. Lighting Design—Lecture/lab. Practical and aesthetic aspects of lighting: electricity, light sources, color instrumentation, control, drafting, plotting, and the aesthetic principles of lighting design, interpretation, and concept. Prerequisites: 30, 31, or consent of instructor.
4 units, Spr (Ramsaur. M)

DRAMA 132. Costume Design—A visual analysis of the historical styles of costume design, interpreted for the modern theater and developed by the student in various presentational media. Prerequisite: 30 or consent of instructor.
4 units, Spr (Strayer, C)

DRAMA 133. Stage Scenery Design—Creations of increasing complexity involve text analysis, historical and artistic style, visual research, spatial organization, drafting, sketching, model building, and director-designer collaboration. Prerequisite: 30, or consent of instructor.
4 units, Win (Flatmo, E)

DRAMA 133P. Scenic Painting—Techniques of painting for the stage.
2-3 units, Spr (Samonte, L)

DRAMA 134. Stage Management Project—For students stage managing a Department of Drama production.
2-9 units, Aut, Win, Spr (Duxbury, A), Sum (Staff)

DRAMA 135. Sound Design—All aspects of sound for the theater from equipment, acoustics, and editing to the creation of theatrical sound effects, live and recorded.
4 units, Win (Duxbury, A)

DRAMA 137. Drafting and Construction—Creation of working scenery drawings for departmental productions in preparation for construction in departmental scene shop.
2-3 units, Spr (Flatmo, E)

DRAMA 140. Projects in Theatrical Production—Assistant directing; stage, costume, lighting, and sound design; technical production, stage managing, or other work in connection with Department of Drama productions. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 151. Adaptation: Turning into Drama—(Graduate students register for 251.) Adaptation in theater: from script to production, from book to stage and screen, from one period and culture to another. The adaptations that a single author, Chekhov, has undergone: different productions of his plays and different dramatizations of his prose.
4 units, Win (Arad, M)

DRAMA 153T. Irish Drama—(Graduate students register for 253T.) Focus is on the second half of the 20th century and Brendan Behan's *The Hostage*.
4 units, Win (Rehm, R)

DRAMA 155T. Drama of the Holocaust—(Graduate students register for 255T.) The Holocaust as a recurrent theme in American, Israeli, and German drama; issues at the heart of the theatrical experience such as the role of theater as witness, representation of memories, and performance of real-life events on stage. Possible texts: *Ghetto*, *The Investigation*, *Arbeit macht Frei*, *The Kastner Trial*, and *Bent*.
5 units, Spr (Arad, M)

DRAMA 156H. History of Performance Art and Live Art—(Graduate students register for 256H.) From 1950 to the present, emphasizing the U.S. Precedents in visual arts, modern dance, and experimental theater. Modes include happenings, fluxus, body art, everyday performance, solo monologue, and bio art. Sources include surveys, essays, and artists' writings, and visual documentation.
4 units, Win (Sack, D)

DRAMA 157T. Performance and Ethnography—(Graduate students register for 257T.) Focus is on performance as a mode of engagement in fieldwork, as conceptual framework, and as mode of representing cultural data. Readings from Clifford Geertz, Smadar Lavie, Dwight Conquergood, Victor Turner, Richard Schechner, Barbara Meyerhoff, Diana Taylor, Ruth Wilson Gilmore, Antonin Artaud, Soyini Madison, E. Patrick Johnson, Renato Rosaldo, Jon van Maanan, Diane Wolfe.
5 units, Win (Anderson, P)

DRAMA 158T. Performance and Resistance—(Graduate students register for 258T.) Theories of cultural domination and performed resistance; readings from Foucault, Angela Davis, James Scott, Joy James, Kimberle Crenshaw, Dwight Conquergood as well as live performance, film, and other visual arts from Teatro Campesino, Guillermo Gómez-Peña, Coco Fusco, Adrian Piper, William Pope.L, Christian Boltanski, Marina Abramovic, and others.
5 units, Aut (Anderson, P)

DRAMA 161H. Dance and Live Art in the 20th and 21st Centuries—(Graduate students register for 261H; same as DANCE 161H.) History and development of postmodern dance and performance art. Topics include the body as art medium, performance art, experimental dance, and redefinitions of gender in live art. GER:DB-Hum, WIM
4 units, Aut (Ross, J; Thomas, A)

DRAMA 164T. Queer Performance—(Same as FEMST 140P.) History of 20th-century forms of performance including examples from drama, avant-garde theater, cabaret, musical theater and performance art; contemporary critical gender and queer theories. Modes of performance such as Dada and Weimar cabaret, the postdramatic theater of Robert Wilson and the Wooster Group, and self-consciously critical performances such as body and performance art of the 70s and 80s.
5 units, Spr (Hunter, M)

DRAMA 168H. Art and Life: The Second Avant Garde—(Graduate students register for 268H.) Experiments in the second half of the 20th century that produced new genres such as happenings and performance art, and theoretical debates that attempted to reformulate relations between art forms and their changed role in society. How these fundamentals of performance were challenged and reshaped. GER: DB-Hum, WIM
5 units, Win (Jakovljevic, B)

DRAMA 170A. Introduction to Directing—Practices of stage composition, work with the actor, approaches to character, and techniques of storytelling. Prerequisite: consent of instructor.
4 units, Aut (Salata, K)

DRAMA 170B. Advanced Directing—Deconstructing and constructing. Tools for analyzing text and developing directorial concepts, and putting them into practice. Class exercises culminate in a short theater piece written and directed by the student. Prerequisite: 170A or consent of instructor.
4 units, Win (Salata, K)

DRAMA 171. Undergraduate Theater Workshop—Undergraduate directors present one act plays in workshop performances. Credit available for actors and directors. Prerequisite: 170A/170B or consent of instructor.
1-4 units, Spr (Duxbury, A; Salata, K)

DRAMA 174. Workshop on Black Performance—Recent critical work. Course culminates in a weekend workshop with guest instructors February 29-March 2, 2008.
1-2 units, Win (Phelan, P)

DRAMA 175. Bay Area Performance Platform—Year-long workshop. Guidance and a venue for works in progress that challenge ideas about performance in a minimal tech setting. May be repeated for credit.
1-2 units, Aut, Win, Spr (Salata, K; Phelan, P)

DRAMA 176. Dramaturgy Project—(Graduate students register for 276.) Serve as a dramaturg on any department production. Research the production's text source, the writing of program notes, the compilation and editing of the playbill, and possible adapting/editing of the performance text or translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 177. Playwriting—(Graduate students register for 277.) The autobiographical monologic and poetic possibilities in performance art explored to learn the elements of playwriting. GER:DB-Hum
5 units, Win (Moraga, C)

DRAMA 179G. Indigenous Identity in Diaspora: People of Color Art Practice in North America—(Graduate students register for 279G.) Gateway course for Institute for Diversity in Arts concentration. People of color aesthetics from contemporary art works in conversation with native (American, African, Asian) origins, gender, and sexuality; the formation of cultural identity. Final project.
4 units, Spr (Moraga, C)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance—Stanford Introductory Seminar. Preference to sophomores. Chomsky's ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum
3 units, Spr (Rehm, R)

DRAMA 185Q. Law and Drama—Stanford Introductory Seminar. Preference to sophomores. The intersection between legal and theater/performance studies, emphasizing overlaps between jurisprudence and drama such as the reconstitution of the past that takes place in drama and in legal procedures, positioning of the audience in relation to the legal/dramatic action, and the importance of witnessing in drama and court trials. Plays include the *Oresteia*, *The Broken Jug*, *The Investigation*, *The Deputy*, and *The Three Trials of Oscar Wilde*.
1-2 units, Spr (Jakovljevic, B)

DRAMA 186Q. The Emergence of the Director—Stanford Introductory Seminar. Preference to sophomores. The role of the director as it emerged in the late 19th century together with modern theater. Those who established the paradigm of the new profession including Antoine, Stanislavski, Eisenstein, and Brecht; their writings, stagings, and documentation.
4 units, Win (Jakovljevic, B)

DRAMA 187Q. The Stage in Dialogue with History—Stanford Introductory Seminar. Preference to sophomores. The practice and ideological positions of European and American theater from the end of WW II to the implosion of the Soviet empire as seen in major playwrights and practitioners who shaped the European theater. Focus is on how plays and their staging responded to and tried to influence history. Plays by Brecht, Miller, Williams, Sartre, Beckett, Müller, Osborne, Bond, Pinter, Weiss, Kipphardt, Mrozek, Havel, Handke, Strauss, and Seidel.
3 units, Aut (Weber, C)

DRAMA 189Q. Mapping and Wrapping the Body—Stanford Introductory Seminar. Preference to sophomores. The concepts behind gender boundaries and clothing systems. GER:DB-Hum, EC-Gender
3 units, Aut (Eddelman, W)

DRAMA 190. Special Research—Individual project on the work of a playwright, period, or genre. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 191. Independent Study—Individual supervision of off-campus internship. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

Courses numbered 200 through 299 are designed for advanced undergraduates and graduates.

DRAMA 200. Senior Project—See "Undergraduate Programs" for description.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium—See "Undergraduate Programs" for description.
1 unit, Aut, Win, Spr (Jakovljevic, B), Sum (Staff)

DRAMA 202. Honors Thesis—See "Undergraduate Programs" for description. May be repeated for credit.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 204. Creating Lighting and Sound in Performance—(Same as 4; see 4.)
3-5 units, Aut (Ramsaur, M; Duxbury, A)

DRAMA 205. Senior Project: Acting—Collaborative work on a project culminating in a production.
2-5 units, Aut, Spr (Kostopoulos, K)

DRAMA 213. Stanford Improv Ensemble—By audition only, for members of the improvisation troupe. Special project work. Prerequisite: 103.
1-2 units, Aut, Win, Spr (Klein, D)

DRAMA 231. Advanced Stage Lighting Design—Individually structured class in lighting mechanics and design through experimentation, discussions, and written reports. Prerequisite: 131 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 232. Advanced Costume Design—Individually structured tutorial for costume designers. May be repeated for credit. Prerequisite: 132 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 233. Advanced Scene Design—Individually structured workshop. May be repeated for credit. Prerequisite: 133 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 234. Advanced Stage Management Project—For students stage managing a Department of Drama production. Prerequisite: 134.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 235. Advanced Sound Design—Individually structured tutorial for sound designers. May be repeated for credit. Prerequisite: 135 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 251. Adaptation: Turning into Drama—(Same as 151; see 151.)
4 units, Win (Arad, M)

DRAMA 253T. Irish Drama—(Same as 153T; see 153T.)
4 units, Win (Rehm, R)

DRAMA 255T. Drama of the Holocaust—(Same as 155T; see 155T.)
5 units, Spr (Arad, M)

DRAMA 256H. History of Performance Art and Live Art—(Same as 156H; see 156H)
4 units, Win (Sack, D)

DRAMA 257T. Performance and Ethnography—(Same as 157T; see 157T.)
5 units, Win (Anderson, P)

DRAMA 261H. Dance and Live Art in the 20th and 21st Centuries—(Same as 161H, DANCE 161H; see 161H.)
4 units, Aut (Ross, J; Thomas, A)

DRAMA 264T. Queer Performance—(Same as 164T; see 164T.)
5 units, Spr (Hunter, M)

DRAMA 268H. Art and Life: The Second Avant Garde—(Same as 168H; see 168H.)
5 units, Win (Jakovljevic, B)

DRAMA 274. Workshop on Black Performance—(Same as 174; see 174.)
1-2 units, Win (Phelan, P)

DRAMA 276. Dramaturgy Project—(Same as 176; see 176.)
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 277. Playwriting—(Same as 177; see 177.)
5 units, Win (Moraga, C)

DRAMA 279G. Indigenous Identity in Diaspora: People of Color Art Practice in North America—(Same as 179G; see 179G.)
4 units, Spr (Moraga, C)

DRAMA 290. Special Research—Individual project on the work of a playwright, period, or genre.
1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

Open to advanced undergraduates with consent of instructor.

DRAMA 300A. Critical Styles I—Literary criticism and theory, emphasizing style as evidence of historical, cultural, and ideological concerns. Assumptions about written texts by authors such as Coleridge, Bradley, and Burke. How style reveals context. Students write in the style of authors discussed.
3-5 units, Aut (Rayner, A)

DRAMA 300B. Critical Styles II—Notions of performance as they relate to gender, race, and globalization in critics such as Derrida, Butler, and Phelan. How style reveals context. Students write in the style of authors discussed.
3-5 units, Win (Rayner, A)

DRAMA 301. Performance and Performativity—Performance theory through topics including: affect/trauma, embodiment, empathy, theatricality/performativity, specularity/visibility, liveness/disappearance, belonging/abjection, and utopias and dystopias. Readings from Schechner, Phelan, Austin, Butler, Conquergood, Roach, Schneider, Silverman, Caruth, Fanon, Moten, Anzaldúa, Agamben, Freud, and Lacan. May be repeated for credit.
3-5 units, Win (Anderson, P)

DRAMA 302. Engendering the Nation—Issues in postcolonial studies; the shifting erotics of race and nation; and the management of sexuality within geopolitical contexts in colonialism, nationalism, and globalization. The historicity of these categories; how race, gender, and nation continue to shape the world.
3-5 units, Aut (Menon, J)

DRAMA 303. Race and Performance—How and if race is performed. Readings from W.E.B. DuBois, Michael Rogin, Paul Gilroy, Lisa Lowe, and Richard Dyer.
3-5 units, Spr (Elam, H)

DRAMA 304. Historiography of Theater—Goal is to design an undergraduate theater history class. Standard theater history textbooks, alternative models of theater history scholarship, and critical literature engaging historiography in general.
3-5 units, Spr (Jakovljevic, B)

DRAMA 320. Basic Approaches to Teaching Acting—Workshop. The pedagogy of acting to prepare graduate student teachers for introductory classes in acting.
1-3 units, alternate years, not given this year

DRAMA 343. Guy Debord: His Life and His Work—(Same as FRENGEN 343.) How Debord's intellectual and artistic productions can be connected to their concrete historical context; their contemporary pertinence. Increased academic visibility for his work and ideas.
5 units, Aut (Apostolidès, J)

DRAMA 358C. Beckett—(Same as ENGLISH 389B.) Beckett's plays and late writing, which have been described as proto-performance art. Recent Beckett scholarship, including new work about his analysis with Bion.
3-5 units, Spr (Phelan, M)

DRAMA 370. Concepts of Directing—Directorial definitions of time, space, movement, and the performer/spectator relationship. Experimentation with texts from literary and other sources, including works from the realistic tradition in drama, using a multi-form performance space.
5 units, Aut (Weber, C)

DRAMA 372. Projects in Directing—Theatrical text and its transformation into performance. Textual analysis, research, evolution of a directorial concept, and its investigation in scene-work with actors. Students design and stage the production of a short play in a multi-form space. Public performance. May be repeated once for credit.
3-5 units, Win (Ramsaur, M; Weber, C)

DRAMA 373. Directing and Dramaturgy—Dramaturgy, directorial methods, and visual concepts in the production of plays from the Elizabethan tradition to postmodernist texts. Work on the text is tested in the staging of scenes.
3-5 units, Aut (Weber, C)

DRAMA 374. Graduate Directors Performance Project—Production of a full-length play, selected in consultation with faculty. Project is designed by graduate students, sometimes in collaboration with undergraduate design students, under the supervision of design faculty. Four to five weeks rehearsal. Public performance.
3-5 units, Aut, Win (Ramsaur, M; Weber, C), Spr (Ramsaur, M; Rehm, R)

DRAMA 376. Graduate Directors Dramaturgy Project—Serve as a dramaturg on any department production. Work includes research on the production's text source, the writing of program notes, and the compilation and editing of the play bill. Possible adapting/editing of the performance text, and translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 377. Graduate Directors Staged Reading Project—Presentation of a new or newly adapted work for the stage, in a mode employed in professional theater for the development of new plays. Two to four rehearsals. Public performance.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 380. Graduate Colloquium in Directing—Topics concerning theory and practice in the theater such as the relationship between the director and other collaborators. May be repeated for credit. Autumn: directing and scene design; the design process from the director's point of view. Winter: directing and choreography; meeting the needs of contemporary live art. Spring: directing and lighting design; the creative possibilities of stage lighting.
2-3 units, Aut (Flatmo, E), Win (Weber, C; Hayes, A), Spr (Ramsaur, M)

DRAMA 390. Tutorial
1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 399. Dissertation Research
1-9 units, Aut, Win, Spr, Sum (Staff)

INSTITUTE FOR THE ARTS AND BLACK PERFORMING ARTS DIVISION

The following is the core course. See also course listings in the "Comparative Studies in Race and Ethnicity" and "African and African American Studies" sections of this bulletin.

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts—Students work with a visiting artist on art projects concerning diversity, culture, and race. Workshop. Service learning within a community population to probe diversity and social change through the arts. GER:DB-Hum
5 units, Win (Elam, H)

DANCE DIVISION

Registration for most dance classes takes place at the first class meeting; further registration information is printed in the *Time Schedule* each quarter. Some class sizes are limited and require advanced registration on Axess. Series classes (I, II, III) should be taken in order or by consent of instructor.

INTRODUCTORY

Open to all students. No previous dance experience needed.

DANCE 40. Introduction to Dance and Movement—Body expression, articulation, and anatomical basics through contemporary art dance. Emphasis is on development of awareness of the body in space. Exploration of improvisation and creativity. May be repeated for credit.
2 units, Aut (Kramer, A), Win, Spr (Hayes, A)

DANCE 41. Mexican Dance—Technique and repertory. May be repeated for credit.
2 units, Aut (Cashion, S)

DANCE 42. Dances of Latin America—Dances of Argentina, Brazil, Chile, Colombia, Cuba, Mexico, Peru, and Puerto Rico. May be repeated for credit.
2 units, Aut, Spr (Cashion, S)

DANCE 43. Afro-Peruvian and Afro-Brazilian Dance—Dances include festejo and zamacueca. May be repeated for credit.
1 unit, Win (Cashion, S)

DANCE 44. Jazz Dance I—Basic techniques emphasizing current jazz style. Historical jazz steps enhance understanding of contemporary jazz forms. May be repeated for credit.
2 units, Win, Spr (Kramer, A)

DANCE 45. Improvisation Plus Contact—The development of improvisation skills as a creative performance practice and as a basis for choreography; techniques of contact improvisation. May be repeated for credit.
2 units, Spr (Kramer, A)

DANCE 46. Social Dances of North America I—Introduction to the partner dances found in American popular culture: waltz, swing, tango, club two step, cha cha, merengue, and salsa. Fee. May be repeated for credit. (AU)
1 unit, Aut, Win, Spr (Powers, R)

DANCE 48. Beginning Ballet—Fundamentals of ballet technique including posture, placement, and the foundation steps of classical ballet. Emphasis is on the development of coordination, strength, and flexibility. May be repeated for credit.
2 units, Aut (Elliott, K), Spr (Onizuka, R)

DANCE 51. Congolese Dance—Open to all levels of dancers. Movements and choreography from Congo and W. African countries. Elements unique to African dance movement: body isolation, polyrhythmic movement, and body posture. Live drumming. May be repeated for credit.
2 units, Aut (Malonga, M)

DANCE 58. Beginning Hip-Hop—Steps and styling in one of America's 21st-century vernacular dance forms. May be repeated for credit.
1 unit, Aut (Reddick, R)

DANCE 59. Intermediate-Advanced Hip-Hop—Steps and styling in one of America's 21st-century vernacular dance forms. May be repeated for credit.
1 unit, Aut (Reddick, R)

INTERMEDIATE

Open to all undergraduates with dance experience.

DANCE 133. History of the Waltz—From Vienna in 1800, Redowa and mazurka, waltz variations, the 20th-century hesitation waltz, Parisian valse musette, and 30s Boston and waltz swing. Studio technique with performance practice for stage.
2 units, Spr (Powers, R)

DANCE 140. Intermediate Modern Dance—Intermediate technique. Improvisation and composition in directed studies. May be repeated for credit.
2 units, Aut (Kramer, A), Win (Moses, R), Spr (Kramer, A)

DANCE 144. Intermediate/Advanced Jazz Dance—Emphasis is on alignment, control, rhythmic coordination, and contemporary mixture of styles. May be repeated for credit.
2 units, Win (Moses, R)

DANCE 146. Social Dances of North America II—Intermediate survey of dances in American popular culture: Lindy hop, Viennese waltz, cross-step waltz, foxtrot, and hustle. May be repeated for credit.
2 units, Aut, Spr (Powers, R)

DANCE 147. Living Traditions of Swing—Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing's crosscultural influences and personal creativity. May be repeated for credit.
2 units, Win (Powers, R)

DANCE 148. Intermediate Ballet—Continuation of 48, repeating the fundamentals with increased complexity and introducing additional movement vocabulary. May be repeated for credit.
2 units, Aut, Win, Spr (Onizuka, R)

ADVANCED

Open to all undergraduates with dance experience.

DANCE 141. Advanced Modern Dance—Intermediate/advanced technique. Complex movement combinations emphasizing performance demands. May be repeated for credit.
2 units, Aut, Win, Spr (Frank, D)

DANCE 149. Advanced Ballet—Professional-level class in a supportive environment. Comprehensive classical ballet technique including pointe work if the student desires. May be repeated for credit.
2 units, Aut, Win, Spr (Elliott, K)

DANCE 156. Social Dances of North America III—Advanced survey of the partner dances found in American popular culture: hustle, waltz, redowa, tango, cha cha, salsa, samba. May be repeated for credit. Prerequisite: 146 or equivalent experience.
2 units, Win (Powers, R)

PERFORMANCE

DANCE 23. Public Performance—For students participating in Dance Division performances. May be repeated for credit.
1 unit, Aut, Win, Spr (Kramer, A)

DANCE 27. Faculty Choreography—Rehearsal and performance of faculty choreography. Selection by audition. May be repeated for credit.
2 units, Aut, Win (Cashion, S; Frank, D), Spr (Kramer, A)

DANCE 57. Guest Artist—Students perform the work of visiting artist Amy Seiwert. Audition required. May be repeated for credit.
2 units, Aut, Win, Spr (Elliott, K)

DANCE 100. Student Choreography: Studio to Stage—Student choreography is mentored to develop composition and performance skills. Required for participation in certain faculty- and student-directed productions. May be repeated for credit.
2 units, Aut (Kramer, A), Win (Frank, D; Kramer, A)

DANCE 105. Contemporary Afro Styles and Dancemaking: Technique, Rhythm, Architecture—Current and traditional African diaspora styles. African polyrhythms, body percussion, and geometric forms, fused with postmodern concepts of composition and space. May be repeated for credit.
2 units, Win (Hayes, A)

DANCE 106. Essence of Contemporary Dance Performance: African Styles on Stage—Contemporary dance technique and repertory based on African diaspora movement styles. Focus is on articulation of expression, enhancement of stage presence, and awareness of individual movement strengths. May be repeated for credit.
2 units, Spr (Hayes, A)

DANCE 112. Collaborative Processes and Choreography—Practical approaches to problem solving in creative situations for the concert stage. May be repeated for credit.
2 units, Aut (Moses, R)

DANCE 113. Dual Processing: Movement and Choreography—The creation of work by and from individuals of different levels of expertise and skill sets and its effect in creation. Movement in collaboration with Robert Moses Kin Dancers. May be repeated for credit.
2 units, Spr (Moses, R)

DANCE 169. Choreography: Creation, Staging, and Reconstruction—Skills and criteria for the choreographic process. Invention, staging, and reconstruction. The creative process and practical considerations in making a dance work.
2 units, Aut (Kramer, A)

THEORY

Classroom or classroom/studio combination courses on topics in Dance and Performance.

DANCE 116. Figure and Ground: Site-Specific Performance in Outdoor Environments—Theory and practice, emphasizing historic and aesthetic context, critical analysis, and exploration of creative processes. May be repeated for credit.
2-3 units, Spr (Frank, D)

DANCE 134. Ballet Folklórico—The history of Ballet Folkórico including its roots in Mexican folk and N. American modern dance, Guadalajara choreographic narratives, and U.S. performance ensembles. GER:EC-GlobalCom
3 units, Win (Cashion, S)

DANCE 161H. Dance and Live Art in the 20th and 21st Centuries—History and development of postmodern dance and performance art. Topics include the body as art medium, performance art, experimental dance, and redefinitions of gender in live art. GER:DB-Hum, WIM
4 units, Aut (Ross, J; Thomas, A)

DANCE 166. History of Social Dance in Western Culture—Movement and historic social dance from the past five centuries, including studio technique and history. Performance practices for stage, including deportment, body language, and demeanor distinctive to each era.
2 units, alternate years, not given this year

DANCE 168. Dance and Culture in Latin America—Dance forms of Latin America as aspects of human behavior. Emphasis is on cultural influences (European, African, and indigenous) that have shaped the ritual and social dance forms of Argentina, Brazil, Chile, Cuba, Mexico, and Puerto Rico. May be repeated for credit. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Cashion, S)

DANCE 190. Special Research—Topics related to the discipline of dance. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

DANCE 191. Independent Research—Individual supervision of off-campus internship. Prerequisite: consent of instructor. (Staff)
1-18 units, Aut, Win, Spr (Staff)

ADVANCED THEORY

Courses numbered 200 through 299 are designed for advanced undergraduates and graduate students.

DANCE 290. Special Research—Individual project on the work of any choreographer, period, genre, or dance-related topic. May be repeated for credit.
1-18 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the Drama major and taught overseas can be found in the "Overseas Studies" section of this bulletin, in the Overseas Studies office, 126 Sweet Hall, or at http://osp.stanford.edu.

BERLIN

OSPBER 23. Opera in Berlin
3-5 units, Aut (Rehm, R)

OSPBER 24. Greek Tragedy and German Culture: An Artistic Symbiosis
3-5 units, Aut (Rehm, R)

OSPBER 28. Art and Body Culture: Dance in Germany from Modernism to Fascism and Beyond
4 units, Spr (Ross, J)

OSPBER 29. The Performance of Memory: Tourism of the Third Reich and Holocaust
4 units, Spr (Ross, J)

OSPBER 101A. Contemporary Theater
5 units, Spr (Kramer, K)

EAST ASIAN STUDIES

Director: Chaofen Sun

Affiliated Faculty and Staff:

Anthropological Sciences: Arthur P. Wolf

Anthropology: Harumi Befu (emeritus), Melissa Brown, Miyako Inoue, Matthew Kohrman

Art and Art History: Jean Ma, Melinda Takeuchi, Richard Vinograd (on leave Autumn, Winter)

Asian Languages: Fumiko Arao, Kazuko M. Busbin, Steven Carter, Yin Chuang, Marina Chung, Robert Clark, Richard Dasher, Sik Lee Dennig, Michelle DiBello, Albert E. Dien (emeritus), Momoe Saito Fu, Hee-sun Kim, Indra Levy, Mark E. Lewis, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Yoshiko Matsumoto, Kiyomi Nakamura, James Reichert, Yu-hwa Liao Rozelle, Stuart Sargent, Chaofen Sun, Melinda Takeuchi, Yoshiko Tomiyama, Ban Wang, Huazhi Wang, John C. Y. Wang, Hong Zeng, Youping Zhang, Yiqun Zhou, Qi Zhu

Business: Hau Lee, Bruce McKern, Kenneth Singleton

Comparative Literature: David Palumbo-Liu (on leave)

East Asian Studies: Robert Carlin, Scott Rozelle, David Straub, Hiroaki Yoshihara, Ayelet Zohar

Economics: Masahiko Aoki (emeritus), Ronald McKinnon

Education: Jennifer Adams

Electrical Engineering: Richard Dasher

History: Gordon Chang, Peter Duus (emeritus), Harold L. Kahn (emeritus), Mark E. Lewis, Mark Mancall, Yumi Moon, Thomas Mullaney, Matthew Sommer, Jun Uchida, Kären Wigen

Political Science: John W. Lewis (emeritus), Phillip Lipscy, Alice Lyman Miller, Daniel Okimoto (emeritus), Jean C. Oi

Religious Studies: Carl Bielefeldt, Paul Harrison, Fabrizio Pregadio (Acting Associate Professor), Lee H. Yearley

Sociology: Gi-Wook Shin, Andrew Walder, Xueguang Zhou, Qiang Li

Center Offices: 100 Encina Commons
Mail Code: 94305-6006
Phone: (650) 736-1759, 723-3362; fax: (650) 725-3350
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) coordinates University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. CEAS belongs to the Division of International Comparative and Area Studies in the School of Humanities and Sciences, and collaborates with the Walter H. Shorenstein Asia-Pacific Research Center (http://aparc.stanford.edu/).

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in East Asian Studies enables students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year for approval by the East Asian Studies undergraduate committee.

Majors must complete at least 75 units of course work on China, Japan, and/or Korea. Courses to be credited toward major requirements must be completed with a grade of 'C' or better. Requirements are:

1. *Language:* proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.
2. *Gateway Courses:* a minimum of three gateway courses, one in each area. The gateway courses are:
   a) Art, Literature and Religion
      - ARTHIST 2. Asian Art and Culture
      - CHINGEN 91. Traditional East Asian Civilization: China
      - JAPANGEN 92. Traditional East Asian Civilization: Japan
      - JAPANGEN 149. Screening Japan: Issues in Crosscultural Interpretation
      - RELIGST 14. Introduction to Buddhism

   b) History
      - HISTORY 92A. Historical Roots of Modern East Asia
      - HISTORY 192. China: The Early Empires
      - HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen
      - HISTORY 291C. Chinese Science, Technology, and Medicine through the Ages
      - HISTORY 292D. Japan in Asia, Asia in Japan

   c) Contemporary Social Sciences
      - ANTHSCI 128B. Globalization and Japan
      - EASTASN 185C. Economic Development of Greater China
      - HUMBIO 148. Kinship and Marriage
      - POLISCI 148R. Chinese Politics
      - SOC 117A. China Under Mao
      - SOC 167A. Asia-Pacific Transformation
3. *Substantive Concentration:* additional courses on East Asia, one of which must be a seminar.
4. *Capstone Essay:* completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student's thematic interest. EASTASN 198, Senior Colloquium (1 unit), is required of majors.
5. At least one quarter overseas in the country of focus.

Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. At least four courses must have a thematic coherence built around a topic such as:

East Asian religions and philosophies
Culture and society of modern Japan
Ethnic identities in East Asia
Arts and literature in late imperial China
Foreign policy in East Asia
Social transformation of modern Korea
China's political economy

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and HISTORY 256 satisfy the WIM requirement.

The courses for the major must add up to at least 75 units and all must be taken for a letter grade.

MINORS

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three gateway courses, one in each area (see above for listing of gateway courses).
2. One undergraduate seminar and two other courses from among those listed each quarter as approved for East Asian Studies majors, including literature courses but excluding language courses.

Applications for the minor are due no later than the second quarter of the junior year.

HONORS PROGRAM

Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the final quarter of the junior year. Application entails submitting an honors prospectus to the student's adviser for approval. Admission is granted by the CEAS undergraduate committee, acting on the adviser's recommendation.

Honors requirements are satisfactory completion of:

1. An honors thesis of high quality of approximately 10,000 words to be submitted in lieu of the senior capstone essay.
2. 5 to 10 units of directed individual study in connection with the thesis project.
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. Applications must be submitted by the M.A. application deadline in the junior year. Applicants are expected to meet the same standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommendation, at least two of which should be from members of the department of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. admissions committee of the Center for East Asian Studies. Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

OVERSEAS PROGRAMS

Language Study—CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February.

Internships—Undergraduates of any major may apply for summer internship opportunities in China, Japan, and Korea through the Bing Overseas Studies Program office.

Beijing—Stanford undergraduates may live and study at Peking University through the Overseas Studies Program in Beijing. Classes are taught in English by Stanford faculty-in-residence and Peking University professors. Students are considered enrolled in Peking University and may participate in athletic and musical activities on campus, including Chinese art and calligraphy, tai-chi, and wu shu. See http://osp.stanford.edu/beijing/.

Kyoto—Students interested in the study of Japanese language, history, culture, and social organization may attend one or two quarters at the Kyoto Center for Japanese Studies which is supported by a consortium of 13 American universities including Stanford. The Bing Overseas Studies Program also offers a Spring Quarter program focused on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries at the Stanford Center in Technology and Innovation (SCTI). An internship in a Japanese firm, laboratory, or agency follows the SCTI training program. See http://osp.stanford.edu/kyoto/.

Overseas Seminars—Three-week seminars led by Stanford faculty are offered in late summer before the beginning of Autumn Quarter, with destinations and study topics changing each year. For more information about Bing Overseas Studies programs, visit their office at Sweet Hall, or see http://osp.stanford.edu.

DISTINGUISHED PRACTITIONERS

Eminent professionals whose work in East Asia brings real-life knowledge to the classroom serve as visiting lecturers through the CEAS Distinguished Practitioners from East Asia program. Teaching this year are: Robert Carlin, EASTASN 187K/287K, Media in Korea: Window to Decisions; David Straub, EASTASN 188K/288K, Anti-Americanism in U.S.-Korea Relations; and Hiroaki Yoshihara, EASTASN 182J/282J, Why Businesses Succeed in the Asian and Global Arenas.

ACADEMIC THEME HOUSE

The East Asian Studies Theme House, or EAST House, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of Asia. EAST House is located on campus at Governor's Corner. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies

The master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language. Applications for admission and financial aid should be made online; see http://gradadmissions.stanford.edu/.

The requirements for the M.A. in East Asian Studies are as follows:

Language Requirement—Students must complete the equivalent of Stanford's first three years of language training in Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This necessitates completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses beyond the third-year level may be applied to the Area Studies requirement discussed below.

Students in the M.A. program are eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree's language requirement.

Area Studies Requirement—Students must complete the 1-unit core course, EASTASN 330, and an additional nine courses numbered 100 or above related to East Asia. Chinese and Japanese language courses numbered 100-199 are considered to be at the third-year level and do not count toward the courses required for the degree. The nine courses must be 3 or more units, taken for a letter grade. At least 23 units must be designated primarily for graduate students, typically at the 200-300 levels.

An integral part of the program is training in research and a demonstration of research ability in a discipline. Three courses, one of which must be a seminar, colloquium, or advanced course in which a research paper on China, Korea, or Japan is written, must be within a single department. The six additional area courses may be taken in departments of the student's choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program. Students in this program may, however, take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the Registrar.

M.A. Thesis Requirement—A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course.

DUAL DEGREE PROGRAMS

EAST ASIAN STUDIES AND LAW

This program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or Korean.

EAST ASIAN STUDIES AND EDUCATION

This program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

EAST ASIAN STUDIES AND BUSINESS

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropology, Art and Art History, Asian Languages, Comparative Literature, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.

POSTDOCTORAL PROGRAMS

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Postdoctoral fellowships in Japanese Studies are available from the Freeman-Spogli Institute of International Studies. The Walter H. Shorenstein Asia-Pacific Research Center has a postdoctoral program in contemporary Korean Studies.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language, and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see http://ceas.stanford.edu.

COURSES

The courses listed below deal primarily with China, Japan, and/or Korea. Many other theoretical and methodological courses within the departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and may be found under the department listings in this bulletin.

EAST ASIAN LANGUAGES

For courses in Chinese, Japanese, and Korean language instruction with the subject codes CHINLANG, JAPANLNG, and KORLANG, see the "Language Center" section of this bulletin. For courses in Classical Chinese with the subject code CHINLIT, see the "Asian Languages" section of this bulletin.

UNDERGRADUATE

EASTASN 5. East House Seminar—May be repeated for credit.
1 unit, Aut, Spr (Sun, C)

EASTASN 116. Understanding Social Changes in China: A Global Perspective—(Same as 216, SOC 116/216.) Since 1949. Mao's accession to power. Deng Xiaoping's economic reforms that started the transformation of Chinese society. New policies to address increasing social problems and rapid urbanization. Employment and labor market reform, urban housing, urban health care, and pension reform. Focus is on changing patterns of social structures and groups, family and marriage, education, and social welfare programs.
5 units, Win (Li, Q)

EASTASN 182J. Why Businesses Succeed in the Asian and Global Arenas—(Same as 282J.) Distinguished practitioner course. Attributes of successful global companies. Business issues that affect global competition: vision, strategy, organizational structure, key processes, people development and diversity, cultures and values, corporate governance, and merger and acquisition. How to build trusted relationships in the Asian and global arena. Case studies include global companies based in Japan, China, Korea, and the U.S.
4 units, Aut (Yoshihara, H)

EASTASN 185C. Economic Development of Greater China: Past, Present, and Future—(Same as 285C.) Historical stages, economic and political rationales, and effectiveness of the policies and institutional changes that have shaped China's economic emergence. China's economic reform and transition during the past 20 years. Application of economic theories of incentives, institutions, markets, and economic development. No previous knowledge of economics required.
3-5 units, Aut (Rozelle, S)

EASTASN 187K. Media in North Korea: A Window to Plans, Perceptions, and Decisions—(Same as 287K.) Distinguished practitioner course. Decision making in Pyongyang and patterns of N. Korean behavior through case studies based on official N. Korean statements or media comment. How evidence can be mined and combined to understand N. Korean plans, perceptions, and decisions. History, politics, economics, and foreign policy. Media analysis, cultural variables, and bureaucratic realities.
5 units, Win (Carlin, R)

EASTASN 188J. Desire and Void: The Visual Culture of Contemporary Japanese Photography—(Same as 288J.) Cultural, social, and aesthetic issues. Relationship to traditional Japanese arts and Western trends of contemporary art. Photographic histories, theoretical ideas about the photographic image, value of photography in contemporary culture, gender issues, aesthetics of black and white, video art, and styles.
2-4 units, Spr (Zohar, A)

EASTASN 188K. Anti-Americanism in U.S.-Korean Relations—(Same as 288K.) Distinguished practitioner course. The nature and extent of anti-American sentiment in S. Korea; implications for U.S.-Korean relations and regional security. Lessons for U.S. foreign policy makers; historical, ideological, political, cultural, and geostrategic dimensions of U.S.-Korean relations. Students conduct case studies of incidents in the 1999-2002 anti-American wave in Korea.
5 units, Spr (Straub, D)

ADVANCED

EASTASN 191. Journal of East Asian Studies
1 unit, Aut, Win, Spr (Sun, C)

EASTASN 198. Senior Colloquium in East Asian Studies—Paper writing and presentation.
1 unit, Spr (Sun, C)

EASTASN 199. Directed Reading
1-9 units, Aut, Win, Spr, Sum (Staff)

EASTASN 216. Understanding Social Changes in China: A Global Perspective—(Same as 116, SOC 116/216; see 116.)
5 units, Win (Li, Q)

EASTASN 282J. Why Businesses Succeed in the Asian and Global Arena—(Same as 182J; see 182J.)
4 units, Aut (Yoshihara, H)

EASTASN 285C. Economic Development of Greater China: Past, Present, and Future—(Same as 185C; see 185C.)
3-5 units, Aut (Rozelle, S)

EASTASN 287K. Media in North Korea: A Window to Plans, Perceptions, and Decisions—(Same as 187K; see 187K.)
5 units, Win (Carlin, R)

EASTASN 288J. Desire and Void: The Visual Culture of Contemporary Japanese Photography—(Same as 188J; see 188J.)
2-4 units, Spr (Zohar, A)

EASTASN 288K. Anti-Americanism in U.S.-Korean Relations—(Same as 188K; see 188K.)
5 units, Spr (Straub, D)

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies—For East Asian Studies M.A. students only.
1 unit, Aut (Sun, C)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ASIAN LANGUAGES

See the "Asian Languages" section of this Bulletin for courses in Chinese General Studies (CHINGEN), Chinese Literature (CHINLIT), Japanese General Studies (JAPANGEN), Japanese Literature (JAPANLIT), and Korean Studies (KORGEN).

OTHER COGNATE COURSES

ANTHSCI 128B/228B. Globalization and Japan—(Same as CASA 128B.)
3-5 units, Win (Befu, H)

ARTHIST 184/384. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting
4 units, Aut (Takeuchi, M)

ARTHIST 283A. Paris and Shanghai, 1880-1940: Mediating the City
5 units, Spr (Vinograd, R)

CASA 173/273. Nomads of Eurasia: Culture in Transition
4-5 units, Win (Kunanbaeva, A)

EDUC 309X. Educational Issues in Contemporary China
3-4 units, Spr (Adams, J)

EE 402A. Topics in International Technology Management
1 unit, Aut (Dasher, R)

HISTORY 54S. America's Cold War in Asia from Korea to Vietnam, 1945-1975
5 units, Aut (Kim, K)

HISTORY 62N. The Atomic Bomb in Policy and History
5 units, Spr (Bernstein, B)

HISTORY 90Q. Buddhist Political and Social Theory
4-5 units, Aut (Mancall, M)

HISTORY 91Q. Mao Zedong: The Man Who Would Become China
5 units, Spr (Mullaney, T)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Win (Sommer, M; Wigen, K)

HISTORY 94N. Colonialism and Collaboration
4-5 units, Win (Moon, Y)

HISTORY 97N. Modernizing Women in Japan
5 units, Aut (Wigen, K)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)
5 units, Spr (Holloway, D)

HISTORY 106A. Global Human Geography: Asia and Africa—(Same as INTNLREL 161A.)
5 units, Aut (Lewis, M)

HISTORY 192. China: The Early Empires
3-5 units, Spr (Lewis, M)

HISTORY 195. Modern Korean History
5 units, Aut (Moon, Y)

HISTORY 195C. Modern Japanese History
5 units, Spr (Uchida, J)

HISTORY 198. The History of Modern China
5 units, Win (Mullaney, T)

HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as HISTORY 355.)
4-5 units, Aut (Bernstein, B)

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
4-5 units, Win (Chang, G)

HISTORY 291B. The City in Imperial China—(Same as HISTORY 391B.)
3-5 units, Win (Lewis, M)

HISTORY 291C. Chinese Science, Technology, and Medicine through the Ages
5 units, Spr (Mullaney, T)

HISTORY 292D/392D. Japan in Asia, Asia in Japan
4-5 units, Win (Uchida, J)

HISTORY 295J. Chinese Women's History
5 units, Spr (Sommer, M)

HISTORY 299X/399A. Design and Methodology for International Field Research
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World
3-5 units, Aut (Wigen, K)

HISTORY 390A. Major Topics in Modern Chinese History
4-5 units, Win (Mullaney, T)

HISTORY 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire
4-5 units, Spr (Sommer, M)

HISTORY 396D. Modern Japan
4-5 units, Spr (Uchida, J)

HISTORY 495A,B. Qing Legal Documents
4-5 units, **A:** *Win,* **B:** *Spr (Sommer, M)*

HUMBIO 147. Population and Family History in Europe and China
4 units, Aut (Wolf, A)

HUMBIO 148. Kinship and Marriage
4 units, Spr (Wolf, A)

INTNLREL 125. Japanese Postwar Politics
5 units, Win (Mcelwain, K)

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China
3 units, Spr (Cai, J)

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform
5 units, Spr (Oi, J)

POLISCI 211. Political Economy of East Asia
5 units, Spr (Lipscy, P)

POLISCI 318R. State and Nation Building in Central Asia
5 units, Spr (Lapidus, G)

POLISCI 348S. Contemporary Chinese Foreign Relations
5 units, Spr (Miller, L)

POLISCI 443S. Political Economy of Reform in China
5 units, Aut (Oi, J)

RELIGST 14. Introduction to Buddhism
4 units, Win (Harrison, P)

RELIGST 35. Introduction to Chinese Religions
4 units, Win (Pregadio, F)

RELIGST 113A. Sacred Space and the Supernatural in Japanese Religion
4 units, Aut (Klonos, G)

RELIGST 114A. Sacred Journeys in Chinese Religion
4 units, Spr (Cook, T)

RELIGST 116. Daoist Thought, Daoist Religion
4 units, Spr (Pregadio, F)

RELIGST 135. Daoist Ideals of Sainthood
4 units, Win (Pregadio, F)

RELIGST 136. Buddhist Yoga
4 units, Win (Bielefeldt, C)

RELIGST 210. Translating the *Daode Jing*
4 units, Win (Staff)

RELIGST 212. *Chuang Tzu*
5 units, Win (Yearley, L)

RELIGST 216. Japanese Buddhism
4 units, Spr (Bielefeldt, C)

RELIGST 217/317. Japanese Studies of Religion in China
3 units, Aut (Kumada, N)

RELIGST 247. Chinese Buddhist Texts
4 units, Spr (Harrison, P)

RELIGST 250. Classics of Indian Buddhism
4 units, Spr (Harrison, P)

RELIGST 254. Recent Contributions to Buddhist Studies
4 units, Win (Harrison, P)

RELIGST 257/357. Readings in Daoist Texts
4 units, Spr (Pregadio, F)

RELIGST 258. Japanese Buddhist Texts
4 units, Win (Bielefeldt, C)

RELIGST 370. Comparative Religious Ethics
4 units, Win (Yearley, L)

SOC 117A/217A. China Under Mao
5 units, Aut (Walder, A)

SOC 217B/317B. Chinese Society and Politics
3-5 units, Spr (Walder, A)

SOC 167A267A. Asia-Pacific Transformation
5 units, Win (Shin, G)

SOC 316. Historical and Comparative Sociology
3-5 units, Win (Shin, G)

ECONOMICS

Emeriti: (Professors) Takeshi Amemiya, Masahiko Aoki, Kenneth J. Arrow, Paul A. David, Victor R. Fuchs, John G. Gurley, Peter J. Hammond, Donald Harris, Bert G. Hickman, Lawrence J. Lau, Ronald I. McKinnon, Roger G. Noll, Nathan Rosenberg, Thomas Sargent, David A. Starrett, Joseph E. Stiglitz

Honorary Emerita (Professor): Anne O. Krueger

Chair: Timothy F. Bresnahan

Professors: B. Douglas Bernheim, Michael J. Boskin, Timothy F. Bresnahan, Lawrence Goulder, Avner Greif, Robert E. Hall, Han Hong, Caroline Hoxby, Matthew O. Jackson, Peter Klenow, Mordecai Kurz, Thomas E. MaCurdy, Paul R. Milgrom, John H. Pencavel, Joseph Romano, Ilya Segal, John B. Shoven, Robert Staiger, John B. Taylor, Frank Wolak, Gavin Wright

Associate Professors: Liran Einav, Jonathan Levin, Luigi Pistaferri

Assistant Professors: Ran Abramitzky, Manuel Amador, Nicholas A. Bloom, Giacomo DeGiorgi, Doireann Fitzgerald, Peter Hansen, Matthew Harding, Nir Jaimovich, Seema Jayachandran, Jakub Kastl, Aprajit Mahajan, Kalina Manova, Petra Moser, Muriel Niederle, Michele Tertilt

Senior Lecturer: Geoffrey Rothwell

Lecturers: Doru Cojoc, Ward Hanson, Michael Lovenheim, Gregory Rosston, Faye Steiner

Courtesy Professors: Anat Admati, David Baron, Jay Bhattacharya, Jeremy Bulow, John Ferejohn, Alan Garber, Ilan Guttman, Stephen Haber, Peter Blair Henry, David Kreps, Rosamond Naylor, Bruce Owen, A. Mitchell Polinsky, Peter C. Reiss, D. John Roberts, James Strnad, Barry Weingast, Robert Wilson

Visiting Professors: Edward Miguel, Ernesto Shargrodsky, Jurgen Schroeder

Visiting Assistant Professor: Manuela Angelucci

Acting Instructors: Marcelo Clerici-Arias, Alex Gould, Mark Tendall

Fellow: Latika Chaudhary

Mail Code: 94305-6072

Web Site: http://www-econ.stanford.edu/

Courses given in Economics have the subject code ECON. For a complete list of subject codes, see Appendix B.

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-6 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of 'B' or better.

REQUIREMENTS FOR THE ECONOMICS MAJOR (80 UNITS)

1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
3. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
4. ECON 50 (5 units, grade of 'B' or better): basic price theory. Prerequisites: ECON 1A and MATH 51 (letter grade required).
5. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
6. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B
7. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units)—Four courses must be chosen from among ECON 111, 115, 118, 121, 126, 140,* 141, 145, 149, 157, 160, 164, 165 (5 units each).

Writing in the Major Course (5 units)—This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 113, 114, 115, 136, 151, 171, 175; or STATS 200, 206, 207, 217, 218, 237.

A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

---

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Advanced placement credit cannot be used to substitute for ECON 1A,B. Students who plan to declare Economics as a major or a minor may petition to the Director of Undergraduate Studies to waive the ECON 1A,B requirement for graduation and for prerequisites to other Economics courses.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the *Information Book for Economics Majors)*. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of 'incomplete' are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department's *Information Book for Economics Majors,* available at http://www-econ.stanford.edu/academics/degrees-ugrad.html. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

MINORS (35 UNITS)

The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. ECON 1A (5 units): micro and elementary economics.
2. ECON 1B (5 units): macroeconomics. Prerequisite: ECON 1A.
4. ECON 50 (5 units, grade of 'B' or better): basic price theory. Prerequisites: ECON 1A and MATH 51 (letter grade required).
3. ECON 51 (5 units): intermediate microeconomics. Prerequisite: ECON 50.
5. ECON 52 (5 units): intermediate macroeconomics. Prerequisites: ECON 50 and 1B.
6. Two field courses (10 units; must be taken at Stanford in California) may be chosen from the following list: ECON 102A, 102B, 111, 115, 118, 121, 126, 140,* 141, 145, 149, 157, 160, 165.

---

* Students may not count units from both ECON 135 and 140 towards their minor as the courses are too similar in content.

OTHER REQUIREMENTS

If the candidate's major requires basic economics courses (items 1 through 3), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional economics courses under items 4 and 5.

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 80 units required of the Economics major. See details in the *Information Book for Economics Majors.*
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 85 units overall.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

GRADUATE PROGRAMS

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may, but need not, elect this degree in preparation for the Ph.D. degree. A master's option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements—A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 and 271, or by receiving a grade of 'B-' or above in each of ECON 102A, B, and C.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D.—A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).
2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, and public finance.

   Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade 'B' or better.
3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above.

It is expected that the student meet, and indeed exceed, the above standards by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree—

1. *Distribution Requirement*: Students must complete four other graduate-level courses meeting the following requirements:
   a) at least one course from the area of economic history, unless history is one of the two fields of specialization.
   b) courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
   c) with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.
2. *Teaching Experience:* each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.
3. *Seminar Participation:* each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).
4. *Ph.D. Dissertation:* the process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

PH.D MINOR

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department's comprehensive examinations where appropriate.

JOINT DEGREE PROGRAMS WITH THE SCHOOL OF LAW

J.D./M.A. AND J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 30 semester (45 quarter) hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 36 semester (54 quarter) hours of approved courses may be counted toward both degrees. In either case, no more than 24 semester (36 quarter) hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 3 $^{1}/_{3}$ semester (5 quarter) hours in the case of the M.A. and 6 $^{2}/_{3}$ semester (10 quarter) hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled.

For more information, see http://www.law.stanford.edu/program/degrees/.

OTHER PROGRAMS

Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see http://www.law.stanford.edu/program/degrees/.

FELLOWSHIPS AND ASSISTANTSHIPS

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Applications should be submitted before January 1 to the department admissions committee.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

ECON 1A. Introductory Economics A—The economic way of thinking and the functioning of a market economy. The behavior of consumers and firms, markets for goods and inputs, and principles of international exchange. Applications and policy issues in economics. GER:DB-SocSci

5 units, Aut (Clerici-Arias, M), Win (Makler, C), Sum (Staff)

ECON 1B. Introductory Economics B—Aggregate economic relationships, including output, employment, inflation, interest rates, and exchange rates. Short-run fluctuations and long-run growth. Issues in monetary and fiscal policy. Prerequisite: 1A. GER:DB-SocSci

5 units, Win (Amador, M), Spr (Cojoc, D), Sum (Staff)

ECON 11N. Understanding the Welfare System—Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and overtime rules. Economic principles to understand the effectiveness of these programs and their consequences on the behavior of families. Pre- or corequisite: ECON 1. Recommended: basic understanding of labor markets, taxes, and transfers.

2 units, Aut (MaCurdy, T)

ECON 17N. Energy, the Environment, and the Economy—Stanford Introductory Seminar. Preference to freshmen. The relationship between environmental quality and production and consumption of energy. Can environmentally-friendly energy production and consumption compete with conventional sources? How to estimate and compare environmental impact costs of nonrenewable sources such as fossil fuels and nuclear power versus renewable sources such as solar and wind power. Implicit subsidies in conventional energy sources and the environmental costs of these subsidies. Regulatory and legal barriers to more environmentally friendly energy sources.

2 units, Spr (Wolak, F)

ECON 50. Economic Analysis I—Individual consumer and firm behavior under perfect competition. The role of markets and prices in a decentralized economy. Monopoly in partial equilibrium. Economic tools developed from multivariable calculus using partial differentiation and techniques for constrained and unconstrained optimization. Prerequisites: 1 or 1A and MATH 51. GER:DB-Math

5 units, Aut (Abramitzky, R), Spr (Tendall, M), Sum (Staff)

ECON 51. Economic Analysis II—Neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, intertemporal choice and asset markets, risk and uncertainty, game theory, adverse selection, and moral hazard. Multivariable calculus is used. Prerequisite: 50.

5 units, Aut (Tendall, M), Win (Einav, L), Sum (Staff)

ECON 52. Economic Analysis III—Growth and fluctuations in the economic system as a whole. National income accounts and aggregate relationships among stocks and flows in markets for goods, labor, and financial assets. Economic growth, inflation, and unemployment. The role of macroeconomic policies in the short and long run. Prerequisites: 1B, 50.

5 units, Win (Jaimovich, N), Spr (Klenow, P), Sum (Staff)

ECON 90. Introduction to Financial Accounting—(Graduate students register for 190.) How to read, understand, and use corporate financial statements. Oriented towards the use of financial accounting information (rather than the preparer), and emphasizes the reconstruction of economic events from published accounting reports.

5 units, Aut (Beyer, A), Win (Stanton, F)

ECON 91. Introduction to Cost Accounting—(Graduate students register for 191.) The use of internal financial data for managerial decision making.

5 units, Spr (Stanton, F)

ECON 93Q. Global Capital Markets—Stanford Introductory Seminar. Preference to sophomores. Focus is on the operation of stock markets in the U.S.: the New York and American stock exchanges, and the over-the-counter NASDAQ market, on which high-tech companies are traded. Financial institutions in the U.S. (stock markets, mutual funds) and how they relate to international markets. Inflation, interest-rate trends, U.S. government agencies, and the impact of the Federal Reserve Bank on capital markets and capital flows. Macroeconomic factors that drive capital flows.

3 units, Win (Marotta, G)

ECON 101. Economic Policy Analysis—Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51 and 52, 102B, and two field courses. Some sections require additional prerequisites. WIM

5 units, Aut (Cojoc, D; Angelucci, M), Win (Steiner, F; Rothwell, G; Cojoc, D), Spr (Rosston, G; Clerici-Arias, M; Steiner, F)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists—Description and examples of the use of statistical techniques relevant to economics. Basic rules of probability, conditional probability, discrete and continuous probability distributions. Point estimation, tests of hypotheses, confidence intervals, and linear regression model. Prerequisite: MATH 41 or equivalent. GER:DB-Math

5 units, Aut, Win (Steiner, F)

ECON 102B. Introduction to Econometrics—Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. Prerequisites: 50, 102A or equivalent. Recommended: computer experience.
5 units, Win (Mahajan, A), Spr (Harding, M)

ECON 102C. Advanced Topics in Econometrics—Identification and estimation of the effect of human capital variables on earnings (such as the return to education, tenure), and identification and estimation of labor supply models, focusing on microeconomic data. Topics: instrumental variable estimation, limited dependent variable models (probit, logit, and Tobit models), and panel data techniques (fixed effect and random effect models, dynamic panel data models).
5 units, Spr (Pistaferri, L)

ECON 103. Applied Econometrics—The construction and use of econometric models for analyzing economic phenomena. Students complete individual projects and core material. Topics vary with the instructor. Limited enrollment. Prerequisites: 52, 102B.
5 units, Win (Bloom, N)

ECON 105. Economic Forecasting—Theory and econometric techniques for forecasting macroeconomic and financial time series. Topics include: objectives for forecasting; optimal forecast with economic loss functions; forecast evaluation and comparison; optimal combination of multiple forecasts; time-series models including ARMA and ADL; and empirical applications with macroeconomic and financial time series. Linear algebra and multivariate calculus are used. Prerequisites: 50, 102B.
5 units, Spr (Hansen, P)

ECON 106. World Food Economy—The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on public sector decision making as it relates to food policy.
5 units, not given this year

ECON 111. Money and Banking—Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.
5 units, Aut (Gould, A), Sum (Staff)

ECON 113. Technology and Economic Change—The economic causes and consequences of technological change. The historical experience of advanced industrial countries and the more recent experience of less developed economies. Topics: the origins of modern industry in the U.S. and Europe, technology and the growth of large-scale organizations, late-comers to industrialization (Japan and newly industrializing countries), economic growth and slowdown in mature industrial countries, and present concerns and future prospects (the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change).
5 units, not given this year

ECON 114. Economy and Economics of Ancient Greece—Introduction to the history of Greek civilization from the Mycenaean period to the 4th century B.C. The formalist-substantivist controversy: what behavioral assumptions should be made in order to understand the working of the Athenian economy. The economics and ethical thoughts of Plato and Aristotle in contrast to utilitarianism, which became a foundation of modern economics. Prerequisite: 1. GER:EC-GlobalCom
5 units, Win (Amemiya, T)

ECON 115. European Economic History—Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the pre-WW I world economy. Topics: the role of techniques and sciences, variations of the extent of market activities, institutional changes, international politics, demography. Prerequisite: 51. GER:DB-SocSci
5 units, Win (Chaudhary, L)

ECON 116. American Economic History—From colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in international perspective; the economics of slavery and regional divergence; the origins and consequence of the American system of technology and business organization; recent U.S. economic performance in historical perspective. Prerequisite: 1A. GER:DB-SocSci, EC-AmerCul
5 units, Spr (Wright, G)

ECON 117. Economic History and Modernization of the Islamic Middle East—From the rise of Islam to the present. Transformation of region from economically advanced to underdeveloped. Role of religion in economic successes and failures. Current obstacles to development. Topics: Islamic economic institutions; innovation and change; political economy of modernization; interactions with other regions; and economic consequences of Islamism.
5 units, not given this year

ECON 118. Development Economics—The economic problems and policy concerns of developing countries. Theories of growth and development; inequality and poverty; credit and labor markets; health and education; politics and corruption. Emphasis is on economic models rather than case studies. Prerequisites: 50, 52, 102B. GER:EC-GlobalCom
5 units, Aut (Jayachandran, S)

ECON 120. Socialist Economies in Transition—Privatization, restructuring, and institutional change in E. Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior. Prerequisite: 50. Recommended: 51.
5 units, not given this year

ECON 122. Economic Development of Latin America—High crime levels as consequence and cause of underdevelopment in Latin America. Worldwide theory and evidence on the economics of criminal behavior and public enforcement. Emphasis is on economic determinants of crime, impact of public interventions, methodological issues to assess causality, and evidence from Latin America.
5 units, Win (Schargrodsky, E)

ECON 123. Regulation and Competition in Latin America—The economics and workings of public intervention and control of markets in Latin America. Topics: natural monopoly regulation; institutions and regulatory commitment; infrastructure concessions; regulation and competition in network industries such as telecoms and electricity; liberalization of markets and competition policy; and antitrust with a weak judiciary.
5 units, not given this year

ECON 124. Contemporary Japanese Economy—Comparative and historical perspective. Micro and institutional aspects, such as firms, the employment system, corporate governance and financial institutions, and the macro economy. Elementary applications of macro- and microeconomics. Prerequisite: 50. GER:EC-GlobalCom
5 units, not given this year

ECON 126. Economics of Health and Medical Care—(Same as BIOMEDIN 156/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health;

medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.
5 units, Aut (Bhattacharya, J)

ECON 127. Economics of Health Improvement in Developing Countries—(Same as HUMBIO 121, MED 262.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.
5 units, not given this year

ECON 135. Finance for Non-MBAs—(Same as FINANCE 221, MS&E 245G.) For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Major corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.
4 units, Aut (Admati, A)

ECON 136. Auctions and Market Design—Competitive bidding for asset purchases and procurement of industrial needs; bidder entry decisions; design of mechanisms for complicated resource allocation problems. Prerequisites: 51, 160.
5 units, Win (Milgrom, P)

ECON 137. Information and Incentives—Incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications: executive and employee compensation, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions. Prerequisite: 51.
5 units, not given this year

ECON 138. Risk and Insurance—Nature of economic risk and its effect on allocation of resources. Preferences among risky prospects: expected utility theory and the theory of risk aversion. Subjective versus objective probabilities. Market allocation of risk and the role of insurance markets under complete information. Insurance under asymmetric information, moral hazard, and adverse selection. Can insurance markets function well in a competitive equilibrium? Role of asset markets in allocating risk. How some risks corporations face are associated with price fluctuations and can be hedged in financial markets. Hedging strategies using futures markets, and options and other derivative assets. Hedging credit risks. Prerequisites: 51, 102A.
5 units, not given this year

ECON 139D. Directed Reading—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 140. Introduction to Financial Economics—Modern portfolio theory and corporate finance. Topics: properties of various financial instruments including financial futures, mutual funds, the capital asset pricing model, and models for pricing options and other contingent claims. Prerequisites: 51, 102A.
5 units, Win (Kurz, M), Spr (Shoven, J), Sum (Staff)

ECON 141. Public Finance and Fiscal Policy—What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.
5 units, Aut (Cojoc, D)

ECON 142. Public Economics Seminar—Topics vary annually; examples include social security, tax reform, and economic policy reforms. Students prepare a memorandum to a senior economic policy official on the class topic. Limited enrollment. Prerequisites: 141 and consent of instructor.
5 units, Win (Boskin, M)

ECON 143. Ethics in Economics Policy—Ethical decision theory from an economist's viewpoint. Formulating objectives for economic policy. The role of markets in an economic system. Concepts of equity, efficiency, and rights. Measuring economic performance. The benefits and costs of market liberalization. Prerequisites: 50, 51, and 102A.
5 units, not given next year

ECON 145. Labor Economics—Analysis and description of labor markets. Determination of employment, unemployment, hours of work, wages. Welfare programs and work effort. Wage differentials by schooling, experience, gender, and race. Economics of discrimination. Earnings inequality and changes in inequality. Employment contracts, labor unions, and bargaining. International comparisons. Prerequisites: 50, 51, 102B. GER:EC-Gender
5 units, Aut (DeGiorgi, G)

ECON 146. Economics of Education—Topics may include theories on school choice, the rise in costs of higher education, and the use of incentives to improve student achievement.
5 units, Spr (Hoxby, C)

ECON 147. Economics of Human Resources—Investments in human capital including education, on-the-job training, government training, and health. The effects of human capital accumulation on wages and wage growth and on wage differentials by gender and race. Sample selections and experimental data. Poverty and inequality. Optional research project for public policy organization on labor market/human resources issues. Prerequisite: 51.
5 units, not given this year

ECON 149. Modern Firm in Theory and Practice—Theoretical and institutional analysis of modern corporate firms: industrial relational, motivational, financial, information structural, managerial, and legal. The role of various hybrid institutional forms between the market and the integrated firm: subcontracting, franchising, R&D cooperatives, and consortia. Practices in American, W. European, and Japanese firms. Prerequisite: 51.
5 units, not given this year

ECON 150. Economic Policy Analysis—(Same as PUBLPOL 104.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisite: ECON 50.
5 units, Spr (Staff)

ECON 153. Economics of the Internet—Applications of microeconomic theory to Internet businesses: auctions, online transactions, entry barriers, valuation, pricing of facilities, policy for broadband communications, network economics, standards, economics of information. Prerequisites: 51 and one of 102B, 103, 104, 113, 135, 137, 140, 149, 157, or 160.
5 units, Aut (Hanson, W)

ECON 154. Economics of Legal Rules and Institutions—(Same as PUBLPOL 106.) The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic efficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: ECON 50.

5 units, Aut (Owen, B)

ECON 155. Environmental Economics and Policy—(Same as EARTHSYS 112.) Economic sources of environmental problems and alternative policies for dealing with them (technology standards, emissions taxes, and marketable pollution permits). Evaluation of policies addressing regional air pollution, global climate change, water allocation in the western U.S., and the use of renewable resources. Connections between population growth, economic output, environmental quality, and human welfare. Prerequisite: ECON 50. GER: DB-NatSci

5 units, Win (Goulder, L)

ECON 157. Imperfect Competition—The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, oligopoly, collusion and cartel behavior, anti-competitive practices, the role of information in markets, anti-trust policy, and e-commerce. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: 51.

5 units, Win (Staff)

ECON 158. Antitrust and Regulation—The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasis is on the application of economic concepts in evaluating the performance and policies of government agencies. Prerequisite: 51.

5 units, Spr (Steiner, F)

ECON 160. Game Theory and Economic Applications—Mathematical introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and perfect Bayesian equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and course in calculus, or consent of instructor.

5 units, Win (Cojoc, D)

ECON 162. Monetary Economics—Dynamic analysis of the role of money and monetary policy in the macro economy, using calculus. Topics: the exchange process and the role of money; inside and outside money; inflation and the inflation tax; international monetary systems; the indeterminacy of floating exchange rates; policies to fix the exchange rate and inflationary incentives; currency crises and speculative attacks; money and interest-bearing government debt; the government's budget constraint and the coordination of monetary and fiscal policies; hyperinflations and stabilizations; the effect of the national debt on consumption, savings, investment and output; time consistency of government policies. Prerequisite: 52.

5 units, not given next year

ECON 164. Current Issues in International Economics Law and Policy—(Same as LAW 357.) Legal architecture of the World Trade Organization system; questions about its design and wisdom. Economics and politics of international cooperation on trade. The WTO as an institution and its core obligations. Topics may include: choice between regional and global approaches to trade cooperation; interface between international trade obligations and domestic regulation of health, safety, and environment; regulation of subsidies; design and operation of dispute settlement system; and special and differential treatment of developing countries. Prerequisite: 51 or equivalent.

5 units, Win (Staiger, R)

ECON 165. International Trade and Finance—Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: ECON 1A,B or 1, and 51, 52.

5 units, Aut (Fitzgerald, D), Win (Staiger, R), Sum (Desmet, K)

ECON 166. International Trade—Comparative advantage in production and trade among nations; increasing returns, imperfect competition, and trade; the nature of the gains from trade; winners and losers; trade policy; international trade agreements; theory and evidence.

5 units, Spr (Staff)

ECON 167. European Monetary and Economic Integration—The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal harmonization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.

5 units, Win (Staff)

ECON 168. International Finance and Exchange Rates—(Graduate students register for 268.) Monetary foundations of international exchange; the rules of the game since Bretton Woods. Foreign exchange risk under the world dollar standard. Hedging, forward covering, and interest parity relationships. International capital flows and the current account. Global trade imbalances; China and Japan versus the U.S. Inflation versus exchange rate targeting in developing countries. Prerequisite for undergraduates: 52; recommended: 165.

5 units, Aut (McKinnon, R)

ECON 169. International Financial Markets and Monetary Institutions—(Graduate students register for 269.) How nations are linked financially through money, capital, and exchange markets, emphasizing policy issues including the role of the International Monetary Fund, monetary and exchange rate policy, prevention and resolution of financial crises in emerging markets, current account imbalances, and capital mobility. Development and use of macroeconomic models of international financial linkages and microeconomic models of hedging, optimal selection of currencies for invoice and trade credit, and parity relationships in futures, swaps, and options markets. Prerequisite: 165.

5 units, Spr (Taylor, J)

ECON 170. Intermediate Econometrics I—(Graduate students register for 270.) Probability, random variables, and distributions; large sample theory, theory of estimation and hypothesis testing. Limited enrollment.

5 units, Aut (Hansen, P; Mahajan, A)

ECON 171. Intermediate Econometrics II—(Graduate students register for 271.) Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Limited enrollment. Prerequisite: 270.

5 units, Aut (Wolak, F)

ECON 172. Intermediate Econometrics III—(Graduate students register for 272.) Continuation of 271. Nonlinear estimation, qualitative response models, limited dependent variable (Tobit) models. Limited enrollment. Prerequisite: 271.

2-5 units, Win (MaCurdy, T)

ECON 179. Experimental Economics—Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: 50, 51, 102A.

5 units, Spr (Niederle, M)

ECON 181. Optimization and Economic Analysis—The development of optimization techniques, including calculus, linear and nonlinear programming, the calculus of variations, and control theory. Emphasis is on concepts and results rather than techniques and proofs. Examples: static and dynamic theories of the household and the firm, and problems in aggregative planning and control. Prerequisites: 51 and 102A, and MATH 51 or equivalent.
5 units, not given next year

ECON 190. Introduction to Financial Accounting—(Same as 90; see 90.)
5 units, Aut (Beyer, A), Win (Stanton, F)

ECON 191. Introduction to Cost Accounting—(Same as 91; see 91.)
5 units, Spr (Stanton, F)

ECON 198. Junior Honors Seminar—(Same as PUBLPOL 197.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.
5 units, Win, Spr (Rothwell, G)

ECON 199D. Honors Thesis Research—In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see Stanford Daily for details).
1-10 units, Aut, Win (Rothwell, G), Spr, Sum (Staff)

PRIMARILY FOR GRADUATE STUDENTS

ECON 239D. Directed Reading—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 299. Practical Training—Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program.
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 400. Ph.D. Dissertation
1-15 units, Spr (Staff)

A. CORE ECONOMICS

ECON 202. Core Economics: Modules 1 and 2—(Non-Economics graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.
2-5 units, Aut (Bresnahan, T; Segal, I)

ECON 202N. 202 For Non-Economics Ph.D. Students—Core Economics modules 1 and 2 for non-Economics Ph.D. students.
2-5 units, Aut (Staff)

ECON 203. Core Economics: Modules 5 and 6—(Non-Economics graduate students register for 203N.) Non-cooperative game theory including normal and extensive forms, solution concepts, games with incomplete information, and repeated games. Externalities and public goods. The theory of imperfect competition: static Bertrand and Cournot competition, dynamic oligopoly, entry decisions, entry deterrence, strategic behavior to alter market conditions. Limited enrollment. Prerequisite: 202.
2-5 units, Win (Milgrom, P)

ECON 203N. 203 For Non-Economics Ph.D. Students
2-5 units, Win (Staff)

ECON 204. Core Economics: Modules 9 and 10—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. The theory of resource allocation over time, competitive equilibrium, and intertemporal efficiency. Limited enrollment. Prerequisite: 203.
2-5 units, Spr (Jackson, M)

ECON 210. Core Economics: Modules 3 and 7—Dynamic economics applied to aggregate economic fluctuations and economic growth. Solving dynamic, stochastic rational expectation models using discrete time dynamic programming. Growth theory (neoclassical models, growth accounting, technical change, endogenous growth) using optimal control theory. Limited enrollment.
2-5 units, Aut (Jaimovich, N)

ECON 211. Core Economics: Modules 11 and 12—Capital asset pricing models, equilibrium with securities, pricing of securities, and arbitrage. Overlapping generations models with incomplete market structure and sunspots. Foundations of Bayesian dynamic learning. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market. Limited enrollment. Prerequisite: 210.
2-5 units, Win (Amador, M)

ECON 212. Core Economics: Modules 4 and 8—Monetary theory: economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), dynamic impact of changes in money on the economy, natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: rationale for central bank independence, time inconsistency, the impact of public debt, rules versus discretion, interest rate versus money rules, international monetary policy coordination, rational expectations, econometric policy evaluation. Limited enrollment. Prerequisites: 203, 211.
2-5 units, Spr (Taylor, J)

ECON 301. Microeconomic Workshop
1-10 units, not given this year

ECON 305. Economic Applications Workshop
1-10 units, Aut, Win, Spr (MaCurdy, T; Pencavel, J; Pistaferri, L; Wolak, F; McClellan, M; Bloom, N)

ECON 310. Macroeconomic Workshop
1-10 units, Aut (Hall, R; Klenow, P; Taylor, J; Kurz, M; Amador, M; Jaimovich, N), Win (Hall, R; Klenow, P; Taylor, J; Jaimovich, N; Tertilt, M; Amador, M; Kurz, M), Spr (Hall, R; Klenow, P; Taylor, J; Kurz, M; Amador, M; Jaimovich, N)

B. ECONOMIC DEVELOPMENT

To receive credit for this field, students must complete 214 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

ECON 214. Development Economics I—Microeconomic analysis of markets and institutions in developing countries. Topics: the role of the household; models of savings, credit, and risk; adjustment to aggregate shocks; occupational choice, credit constraints, and credit market imperfections; health and nutrition; new technology; and education. Emphasis is on empirical tests of and evidence for theoretical models. Prerequisites: 202 or 202N, 270.
2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics II—The historical experience of economic development; patterns of economic growth; sources of economic growth; models of economic development (two-gap models, dual economy models, open economy models, new growth models), savings and capital accumulation; the role of money and finance; inflation; taxation; stabilization in closed and open economies with incomplete and/or imperfect markets; human and other forms of intangible capital; infrastructural capital and externalities; income distribution; numerical general equilibrium models.
2-5 units, Win (DeGiorgi, G)

ECON 217. Development Economics III—Banking systems, interest rates, regulatory policies, and productivity of capital in developing countries. Controlling inflation: fiscal and monetary policies for macroeconomic stability. Currency crises, exchange rates, and liberalization of foreign trade. Applications to transitional socialist economies in Asia and E. Europe.
2-5 units, not given this year

ECON 220. Political Economy I—Positive and normative theories of political economy. Positive topics include direct democracy, electoral competition, legislative policy making, agenda setting, lobbying, comparative constitutions, and intergenerational politics, with applications to income taxation, redistribution, and the size of government. Normative topics include social choice theory with and without interpersonal comparisons, Pareto efficiency with public goods, potential Pareto improvements, welfare measurement, cost benefit analysis, and analysis of economic policy reform.
2-5 units, Win (Jackson, M)

ECON 221. Political Economy II—Continuation of 220. Positive and normative theories of political economy. Focus is on how the structure of political institutions affect societal welfare and economic outcomes. Topics include: measurement of the welfare of a society; constitutional design; models of strategic voting behavior; asymmetries of information and voting behavior; lobbying, vote buying, and political influence; the politics of federations of states; and political decision making regarding economic policies such as taxes, redistribution, and public good provision. Prerequisite: 220.
2-5 units, Spr (Harding, M)

ECON 315. Development Workshop
1-10 units, Aut (Mahajan, A; Jayachandran, S),
Win (Jayachandran, S; Mahajan, A; DeGiorgi, G),
Spr (DeGiorgi, G; Mahajan, A; Jayachandran, S)

C. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses.

ECON 224. Science, Technology, and Economic Growth—Upper-division undergraduates may enroll with consent of instructor. The roles played by the growth of scientific knowledge and technical progress in the development of industrial societies. Emphasis is on the interactions between science and technology, and the organizational factors which have influenced their effectiveness in contributing to productivity growth.
2-5 units, Win (David, P)

ECON 225. Economics of Technology and Innovation—The feedback structure of how technological change affects economic transformations and how scientific progress and economic change shape technological progress; conceptual and formal approaches for analyzing these relationships. Forecasting, economic history, and current techno-economic developments.
2-5 units, not given this year

ECON 226. U.S. Economic History—The American economy from colonial times to the present. The role of economic history as a distinctive intellectual approach to the study of economics. Topics: American growth record and its determinants, the origins and character of U.S. technology, slavery, the Great Depression, recent U.S. performance in historical perspective.
2-5 units, Spr (Wright, G)

ECON 227. European Economic History—Economic growth and development in W. Europe from the 11th-20th centuries, emphasizing the formative period up to the 19th century. Emphasis is on the experiences of Britain, France, Germany, and Italy. The interrelations between the growth and distribution of output, demographic trends, technological and organizational changes in trade and industry, and the changing formal and informal institutions governing political and economic activity.
2-5 units, not given this year

ECON 228. Institutions and Organizations in Historical Perspective—Emphasis is on the formative period from the 11th to 18th centuries. Formation, function, and evolution of institutions; alternative conceptual frameworks such as neoclassical, transaction cost economics, institutionalism, and Marxism and neo-Marxism; game theory, mechanism design, and contract theory. Institutions related to trade organization, the organization of production, feudalism, mercantilism, and the state.
2-5 units, Aut (Greif, A)

ECON 229. Topics in Economic History—Emphasis is on institutions and organizations, such as risk-sharing organizations, and property rights, such as patent laws and their effects on technological change and economic growth. Topics include: competing hypotheses for cross-country differences in long-term growth; the importance of institutions to economic growth; formation, function, and persistence of institutions and organizations; role of patent laws in creating incentives for innovation; informal networks as a mechanism to trade property rights; causes and effects of institutional change; tests of contract theory in history; and long-term migration and its effect on economic development.
2-5 units, Win (Abramitzky, R; Moser, P)

ECON 325A,B,C. Economic History Workshop
1-10 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Greif, A; Wright, G; Abramitzky, R; David, P; Moser, P)*

D. MONETARY THEORY AND ADVANCED MACROECONOMICS

Requirements for this field are completion of 233 and 234.

ECON 233,234,235. Advanced Macroeconomics—Topics in the theory of fluctuations and growth.
2-5 units, **233:** *Aut (Amador, M; Jaimovich, N),* **234:** *Win (Klenow, P),* **235:** *Spr (Bloom, N)*

E. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

ECON 241. Public Economics and Political Economy I: Public Policy—Welfare economics. Effects of tax policy, including incidence and efficiency costs. Design of tax systems. Externalities, public goods, and clubs. Cost-benefit analysis. Prerequisites: 202-204, 210, 270, 271, or equivalent with consent of instructor.
2-5 units, Win (Hoxby, C)

ECON 242. Public Finance and Taxation II—Social insurance, comparative political institutions, and federalism. Prerequisites: 202, 203, 204, 210, 270, 271, or equivalent with consent of instructor. Recommended: 241.
2-5 units, Spr (Lovenheim, M)

ECON 243. Economics of Environment—Sources of environmental problems in market economies and policy options for addressing these problems. Topics: choice of policy instruments (taxes, standards, tradeable permits), environmental risk assessment, valuation of non-marketed commodities (environmental amenities, biodiversity), environmental policy making under uncertainty, the optimal mix of corrective and distortionary tax instruments, and the dynamics of economic growth in the presence of non-reproducible natural resources. Upper-division undergraduates require consent of instructor.
2-5 units, not given this year

ECON 244. Psychology and Economics—Experimental and field evidence related to the psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Models of economic choice based on these findings, and how they improve the explanatory and predictive value of standard theories. Prerequisites: 204, 271, or consent of instructor.
2-5 units, not given this year

ECON 341. Public Economics and Environmental Economics Seminar—Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and regulatory policies; their effects on levels and distribution of income, wealth, and environmental quality; alternative policies and methods of evaluation. Workshop format combines student research, faculty presentations, and guest speakers. Prerequisite: 241 or consent of instructor.
1-10 units, Aut (Boskin, M; Shoven, J; Goulder, L), Win, Spr (Boskin, M; Shoven, J)

F. ECONOMICS OF LABOR

To receive credit for this field, students must complete two from 246, 247, and 248.

ECON 246. Labor Economics I—The demand for workers and hours of work, substitution among different types of labor in production, technological change, adjustment costs, restrictions on layoffs. The supply of labor, hours of work, participation, life-cycle models of behavior, welfare programs. Wage differentials by schooling, age, cohort, gender, and race. Changes in these wage differentials and differences across countries. Economics of discrimination. Employment contracts and turnover. Models of labor union behavior. Bargaining. Worker-owned enterprises. Unemployment and mobility. International comparisons.
2-5 units, Aut (Pencavel, J)

ECON 247. Labor Economics II—The economics and econometrics of program evaluation. The impact of public policies on labor demand, labor supply, human capital, and wage determination. Social, natural, and quasi-experiments. Intertemporal consumption and labor supply decisions. Intra-family allocation models.
2-5 units, Spr (Pistaferri, L; Bloom, N)

ECON 345. Applications Workshop
1-10 units, Aut, Win, Spr (MaCurdy, T; Pencavel, J; Pistaferri, L; Wolak, F; Bloom, N; McClellan, M)

G. ECONOMICS OF INDUSTRY

To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

ECON 250A. Natural Resource and Energy Economics—First part of two course sequence. Issues in provision and management of non-renewable and renewable natural resources, and energy products and services. Theory and empirical methods related to: market structure, pricing, and performance of important energy and resource industries; sources of market failure in these industries; and alternative regulatory approaches. Prerequisites: 202, 203, 204, 270, 271, and 272, or equivalents with consent of instructor.
2-5 units, not given this year

ECON 250B. Environmental Economics—Second of two course sequence. Sources of environmental problems in market economies; policy options for addressing these problems. Topics include: alternative environmental policy instruments such as taxes, standards, and tradable permits; valuation of non-marketed commodities such as environmental amenities and biodiversity; and environmental policy making under uncertainty. Applications include global climate change and green tax reform. Prerequisites: 202, 203, 204, 270, and 271, or equivalents with consent of the instructor.
2-5 units, not given this year

ECON 257,258. Economics of Industry—Theoretical and empirical analyses of the determinants of market structure; firm behavior and market efficiency in oligopolies; price discrimination; price dispersion and consumer search; differentiated products; the role of information in markets, including insurance and adverse selection; auctions; collusion and cartel behavior; advertising; entry and market structure; market dynamics; strategic behavior.
2-5 units, **257:** *Aut (Einav, L; Kastl, J),* **258:** *Win (Kastl, J; Wolak, F)*

ECON 260. Topics in Industrial Organization—Current research and policy interest. Topics may include: empirical tests of oligopoly theories; non-price competition; entry and market structure; the role of information in markets; auctions; e-commerce; dynamics of change in regulatory policy; theory of economics institutions; antitrust status of joint ventures; and use of capacity, innovation, and product variety as a barrier to entry. Significant unresolved research issues and promising ways to attack them. Prerequisite: 257. Recommended: 258.
2-5 units, Spr (Bresnahan, T; Einav, L)

ECON 355. Industrial Organization Workshop—Current research in the field by visitors, presentations by students, and discussion of recent papers. Students write an original research paper, make a formal presentation, and lead a structured discussion.
1-10 units, Aut, Win, Spr (Bresnahan, T; Einav, L)

H. INTERNATIONAL ECONOMICS

To receive credit for this field, students must complete 265 and 266. Taking one or more of 267, 268, or 269 is recommended. A research paper from any of these courses must also be submitted.

ECON 265. International Economics I—International macroeconomics and finance, emphasizing current research. Prerequisites: 202, 203, 204, 210, 211, 212.
2-5 units, Aut (Fitzgerald, D)

ECON 266. International Economics II—Determinants of trade and comparative advantage. Trade with imperfectly competitive markets. Income distribution and gains from trade. Commercial policies, tariffs, and quotas. Dynamic comparative advantage. Economic geography and trade. Political economy of trade.
2-5 units, Win (Staiger, R)

ECON 267. Topics in International Trade—Firm-level approach to the decision to export focusing on firm heterogeneity. Firms' decision to invest abroad, and causes and effects of horizontal, vertical, and export-platform foreign direct investment. Trade and the organization of the firm: multi-product and multinational firms, and outsourcing. Trade patterns and institutional frictions, including credit constraints and labor market rigidities. Multilateralism versus preferential trade liberalization. Recent theoretical and empirical developments.
2-5 units, Spr (Manova, K)

ECON 268. International Finance and Exchange Rates—(Same as 168; see 168.)
5 units, Aut (McKinnon, R)

ECON 269. International Financial Markets and Monetary Institutions—(Same as 169; see 169.)
5 units, Spr (Taylor, J)

ECON 365. International Trade Workshop
1-10 units, Aut, Win, Spr (Lau, L; Wright, M; Fitzgerald, D; Staiger, R)

I. ECONOMETRICS

A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:

I-1: Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273A and 273B.

I-2: Applied Econometrics: To receive credit in the applied econometrics subfield, students must complete 273A and either 274 or 275. Students must also complete a course or set of courses that is empirically oriented. The last requirements must be approved by the Director of Graduate Study in consultation with the instructor of 274 or 275.

ECON 270. Intermediate Econometrics I—(Same as 170 see 170.)
5 units, Aut (Hansen, P; Mahajan, A)

ECON 271. Intermediate Econometrics II—(Same as 171; see 171.)
5 units, Aut (Wolak, F)

ECON 272. Intermediate Econometrics III—(Same as 172; see 172.)
2-5 units, Win (MaCurdy, T)

ECON 273. Advanced Econometrics I—Possible topics: parametric asymptotic theory. M and Z estimators. General large sample results for maximum likelihood; nonlinear least squares; and nonlinear instrumental variables estimators including the generalized method of moments estimator under general conditions. Model selection test. Consistent model selection criteria. Nonnested hypothesis testing. Markov chain Monte Carlo methods. Asymptotic hypothesis testing procedures derived for each estimation framework.
2-5 units, Aut (Hong, H)

ECON 274. Advanced Econometrics II—(Formerly 273B.) Possible topics: nonparametric density estimation and regression analysis; sieve approximation; local polynomial regression; spline regression; cross validation; indirect inference; resampling methods: bootstrap and subsampling; quantile regression; nonstandard asymptotic distribution theory; empirical processes; set identification and inference.
3-4 units, Win (Romano, J)

ECON 275. Time Series Econometrics—Stochastic processes and concepts such as stationarity, ergodicity, and mixing. Inference with heteroskedastic and autocorrelated time series; autoregressive and moving average models; unit root processes and asymptotic analysis of such; tests for structural change; vector autoregressive models; cointegration; impulse response analysis; forecasting; ARCH and GARCH volatility models. Prerequisites: 270, 271.
2-5 units, Spr (Hansen, P)

ECON 276. Limited Dependent Variables—(Formerly 274.) Possible topics: discrete choice models; Tobit models; duration models; semiparametric methods; single index models; rank regression; U-statistics; bounds and incomplete models; linear and nonlinear static and dynamic treatment effects; local instrumental variables; matching; propensity score; inverse probability weighting; models with measurement errors and unobserved heterogeneity; stratified sampling. Discrete endogenous variables. Information theoretic alternative to gmm estimation. Nonlinear panel data. Prerequisite: 273 or consent of instructor.
2-5 units, Spr (Hong, H)

ECON 370. Econometrics Workshop
1-10 units, Aut (Hong, H; Hansen, P; Mahajan, A), Win (Hansen, P; Mahajan, A; Han, L), Spr (Hansen, P; Mahajan, A; Hong, H)

J. MICROECONOMIC THEORY

To receive credit for this field, students must complete two courses in one of the following two subfields:

J-1: General Theory: 280, 281, 284, 286, 287, 291

J-2: Decisions, Contracts and Incentives: 282, 283, 286, 289

Note: taking one course from each track does not satisfy the microeconomic theory field requirement.

ECON 279. Experimental Economics—An introduction to experimental economics, its methods, and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another, and allow researchers with different theoretical dispositions to narrow the range of potential disagreement. Prerequisites: 202, 203, 204, or consent of instructor.
2-5 units, Win (Niederle, M)

ECON 281. Normative Decision Theory and Social Choice—Normative principles of behavior, especially in single-person decision trees. Objective and subjective expected utility. Savage, Anscombe-Aumann, and consequentialist axioms. State dependence. Multi-person extensions: social choice, ethics, opinion pooling, and rationalizability in non-cooperative games. Prerequisite: 202 or equivalent.
2-5 units, not given this year

ECON 282. Contracts, Information, and Incentives—Issues and recent developments in mechanism design and the theory of contracts. Topics include: hidden characteristics and hidden action models with one and many agents, role of commitment and renegotiation in long-term relationships, incomplete contracts and applications to the theory of the firm.
2-5 units, Win (Segal, I)

ECON 283. Advanced Topics in Contracts and Organization—Recent developments and promising research. Topics change from year to year, and may include: reputational concerns and implicit contracts in long-term relationships, property rights and the hold-up problem, multilateral contracting, communication requirements of allocation problems, communication without full commitment. Prerequisite: 282 or consent of instructors.
2-5 units, not given this year

ECON 285. Market Design—(Same as MGTECON 602.) Analysis of rules that govern the operation of markets with and without the assistance of prices. Emphasis is on markets in which complicated preferences and constraints, limitations on the use of cash, or variations in contract details among bidders decisively impair the performance of simple market rules. Matching markets such as the National Resident Matching Program and airline slot exchanges, asset auctions such as the spectrum auctions, electricity markets, and Internet procurement services.
4 units, Spr (Niederle, M; Milgrom, P)

ECON 286. Game Theory and Economic Application—Solution concepts for non-cooperative games, repeated games, games of incomplete information, reputation, and experiments. Standard results and current research topics. Prerequisite: 203 or consent of instructor.
2-5 units, not given next year

ECON 287. General Equilibrium Theory—Existence, efficiency, and Walrasian equilibrium in exchange economies. Production, financial markets, incomplete markets, sequence economies with infinitely-lived agents. Prerequisites: 204 or consent of instructor.
2-5 units, not given this year

ECON 290. Multiperson Decision Theory—(Same as MGTECON 608.) Recent research papers on theories and economic applications of decision theory, game theory, and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and topics such as auctions, bargaining, contracting, and computation.
4 units, Spr (Wilson, R)

ECON 291. Social and Economic Networks—Models and techniques for analyzing social and economic networks; how they are measured; and how to represent them. Models to understand how networks are formed; implications of network structure in social and economic behavior, including applications to labor markets, social mobility, crime, and consumer behavior.
2-5 units, Spr (Jackson, M)

ECON 385. Mathematical Economics Workshop
1-10 units, not given this year

ECON 391. Microeconomic Theory Seminar—Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria). Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementaries and diachronic institutional linkage. May be repeated for credit.
1-10 units, Aut (Segal, I; Levin, J; Milgrom, P; Niederle, M; Bernheim, D; Hammond, P; Kurz, M; Jackson, M; Athey, S), Win (Bernheim, D; Levin, J; Milgrom, P; Niederle, M; Segal, I; Jackson, M; Kurz, M), Spr (Bernheim, D; Levin, J; Milgrom, P; Niederle, M)

OVERSEAS STUDIES

Courses approved for the Economics major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

OSPBER 115X. The German Economy: Past and Present
4-5 units, Aut (Klein, I)

OSPBER 161X. The German Economy in the Age of Globalization
4-5 units, Win (Klein, I)

KYOTO

OSPKYOTO 215X. The Political Economy of Japan
4-5 units, Spr (Hayashi, T)

MOSCOW

OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia
5 units, Aut (Mau, V)

PARIS

OSPPARIS 91. Globalization and Its Effect on France and the European Union
5 units, Spr (Le Cacheux, J; Laurent, E)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead
5 units, Aut (Le Cacheux, J)

SANTIAGO

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
5 units, Spr (Munoz, O)

OSPSANTG 130X. Latin American Economies in Transition
5 units, Aut (Di Filippo, A)

OSPSANTG 160X. Latin America in the International Economy
5 units, Win (Di Filippo, A)

Emeriti: (Professors) George H. Brown, W. B. Carnochan, George G. Dekker, Charles N. Fifer, Albert J. Gelpi, Barbara C. Gelpi, David Halliburton, Shirley Heath, John L'Heureux, Herbert Lindenberger, John Loftis, Diane W. Middlebrook, Thomas C. Moser, Nancy H. Packer, Marjorie G. Perloff, Ronald A. Rebholz, Lawrence V. Ryan, Wilfred H. Stone, Elizabeth C. Traugott, Wesley Trimpi; *(Associate Professor)* Sandra Drake; *(Professor, Teaching)* Larry Friedlander; *(Senior Lecturer)* Helen B. Brooks
Chair: Ramón Saldívar
Director of Creative Writing Program: Eavan Boland
Director of Program in Writing and Rhetoric: Andrea A. Lunsford
Professors: John B. Bender (English, Comparative Literature), Eavan Boland, Terry Castle, W. S. Di Piero (on leave Autumn), J. Martin Evans, John Felstiner, Kenneth W. Fields, Shelley Fisher Fishkin, Jay W. Fliegelman (on leave), Roland Greene (English, Comparative Literature), Seth Lerer (English, Comparative Literature; on leave Autumn, Winter), Andrea A. Lunsford (on leave Autumn), Franco Moretti (English, Comparative Literature), Stephen Orgel, Patricia A. Parker (English, Comparative Literature), Peggy Phelan (English, Drama), Robert M. Polhemus, Arnold Rampersad, David R. Riggs, Ramón Saldívar (English, Comparative Literature), Elizabeth Tallent, Tobias Wolff
Associate Professors: Michele Elam, Denise Gigante, Ursula Heise, Blair Hoxby, Gavin Jones, Paula Moya, Jennifer Summit, Blakey Vermeule, Alex Woloch
Assistant Professors: Nicholas Jenkins, Saikat Majumdar, Judith Richardson, Christopher Rovee (on leave), Stephen Sohn
Senior Lecturer: Claude Reichard
Courtesy Professor: Bryan Wolf
Courtesy Associate Professor: Joshua Landy
Lecturers: Andrew Altschul, Rusty Dolleman, Keith Ekiss, Evan Horowitz, Maria Hummel, Scott Hutchins, Adam Johnson, Tom Kealey, David MacDonald, Sara Michas-Martin, Jeff O'Keefe, Angela Pneuman, Rita Mae Reese, Alice Staveley, Edward Steidle, Shimon Tanaka, Michael Wyatt
Acting Professor: Carol Shloss (on leave)
Consulting Professor: Valerie Miner
Consulting Assistant Professor: Matthew Jockers
Visiting Professors: Robert Bly, Gerald Bruns, Sean Shesgreen, Colm Toibin, Abigail Zuger

Department Offices: Building 460, Room 201
Mail Code: 94305-2087
Phone: (650) 723-2635
Web Site: http://english.stanford.edu

Courses given in English have the subject code ENGLISH. For a complete list of subject codes, see Appendix.

The Department of English seeks to teach and promote an understanding of the significance and history of British, American, and Anglophone literatures and to foster an appreciation of the richness and variety of texts in the language. In the undergraduate program, it offers rigorous training in interpretive thinking and precise expression, teaching students to invent ideas, organize them, draw deductions and make connections to new ideas, and articulate them in eloquent and convincing ways. The English graduate program features the study of imaginative language, rhetoric, and the poetic and narrative arts and it focuses on the roles that imaginative writing and representations play in almost every aspect of human experience. Completing the B.A., M.A., or Ph.D. curricula prepares students of English to adapt, to think, and communicate inventively, and to be cultured and humane in their approach to life.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English Major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

PREPARATION FOR THE MAJOR

The following departmental requirements are in addition to the University's basic requirements for the bachelor's degree. With the exception of the course in Poetry and Poetics or any other when taken to satisfy the Writing in the Major (WIM) requirement, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives.

MAJOR IN ENGLISH LITERATURE

This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. ENGLISH 160. Poetry and Poetics
5. One course in critical methods.
6. Five additional elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. Students must choose three of these courses from one of the following concentrations:
   a) a specific genre: drama, film, lyric poetry, or prose fiction
   b) a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
   c) one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors

Consult the English Department for a list of the courses under each of these concentrations for 2007-08. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

At least one of the courses satisfying the major must be a major's seminar, which is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine's College.

Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both junior and senior years, and to take ENGLISH 160, Poetry and Poetics, and the critical methods requirements early in their major career.

Students may apply as many as four English courses taken at other approved universities towards the English major. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar's external credit evaluation section.

Foreign Language Requirement—There is no foreign language requirement for English majors beyond the university requirement, but students who plan to study English at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

EMPHASIS IN THE ENGLISH MAJOR

English with a Creative Writing Emphasis—This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. Students declaring an English major with a Creative Writing Emphasis during Autumn Quarter 2006 and thereafter must take a total of thirteen 5-unit courses offered through the Department of English and the Program in Creative Writing and fulfill the seminar requirement. The thirteen courses must be chosen to fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. ENGLISH 160. Poetry and Poetics
5. One course in critical methods.
6. One course in 20th-century literature.
7. Majors with the Creative Writing Emphasis must take five courses designed for the prose or poetry concentration. Prose writers must first take one beginning prose class (ENGLISH 90, Fiction Writing, or ENGLISH 91, Creative Nonfiction), then two intermediate or advanced prose classes (ENGLISH 190, 190F,G,P,R,V, 191, or 290). Prose writers must also take ENGLISH 146, Development of the Short Story, and ENGLISH 92, Reading and Writing Poetry. Poetry writers must first take ENGLISH 92, Reading and Writing Poetry, then two intermediate or advanced poetry classes (ENGLISH 192, 192P,V, or 292). In addition to the WIM course, ENGLISH 160, Poetry and Poetics, poetry writers must take one other literature course in poetry to be approved by a professor in the Creative Writing program, and one beginning prose class (ENGLISH 90, Fiction Writing, or ENGLISH 91, Creative Nonfiction). Courses taken to satisfy one of the six requirements above cannot also satisfy a Creative Writing requirement. ENGLISH 198 or tutorials taken elsewhere, such as tutorials in the Overseas Studies Program, may not be substituted for required courses.

English with Interdisciplinary Emphasis—This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. Students are required to fulfill the language and seminar requirements listed under the major in English. Students declaring an English major with an interdisciplinary emphasis must choose a total of fourteen 5-unit courses. These courses must fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. ENGLISH 160. Poetry and Poetics
5. One course in critical methods.
6. Three additional elective courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
7. Four courses related to the area of inquiry from disciplines such as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by

the interdisciplinary program director. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

ENGLISH AND PHILOSOPHY

This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole.

Students choosing the English and Philosophy track must complete sixteen courses for a minimum of 70 units, of which at least eight 5-unit courses must be within the English department. At least one course must be in each of American literature and British literature after 1750. At least one course must be an English department seminar. Students must fulfill the following requirements:

Literature—

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 -1900 or American literature before 1900.
3. One course in Shakespeare.
4. English Writing in the Major: ENGLISH 160, Poetry and Poetics.
5. One course in critical methods.

Philosophy—

1. Philosophy Writing in the Major: PHIL 80. Prerequisite: introductory philosophy course.
2. Aesthetics, Ethics, Political Philosophy: a course from PHIL 170 series.
3. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 series.
4. History of Philosophy: two courses in the history of philosophy, numbered above PHIL 100.

Literature and Philosophy—

1. Gateway course in philosophy and literature (ENGLISH 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
2. Two upper division courses of special relevance to the study of philosophy and literature. A list of approved courses is available from the Director of Undergraduate Studies in English.
3. Capstone seminar of relevance to the study of philosophy and literature, drawn from a list approved by the Director of Undergraduate Studies in English.

MINORS

Both the Department of English and the Creative Writing program offer a distinct minor.

English Literature—The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature. In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar:

1. ENGLISH 160. Poetry and Poetics
2. One course from each of the following historical periods:
    a) British literature to 1750
    b) British literature from 1750 to 1900 or American literature before 1900
    c) 20th-century British or American literature
3. One course in Shakespeare
4. Two elective courses

One of the two elective courses may be a course in Creative Writing.

Creative Writing—The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either prose or poetry. All courses must be taken for a letter grade.

1. ENGLISH 94. Introduction to Creative Writing: Form and Structure
2. Four writing workshops, three in the chosen concentration, one outside.
    a) prose writers must first take one beginning prose class (ENGLISH 90, Fiction Writing, or ENGLISH 91, Creative Nonfiction), then two intermediate or advanced prose classes (ENGLISH 190, 190F,G,P,R,V, 191, or 290). Prose writers must also take ENGLISH 92, Poetry Writing.
    b) poetry writers must first take ENGLISH 92, Poetry Writing, then two intermediate or advanced poetry classes (ENGLISH 192, 192P,V, or 292). Poetry writers must also take one beginning prose class (ENGLISH 90 or 91).
3. One literature course: prose writers must take ENGLISH 146, The Development of the Short Story; poetry writers must take ENGLISH 160, Poetry and Poetics.

INTERDEPARTMENTAL MAJORS

English and French Literatures—This major provides a focus in British and American literature with additional work in French literature. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

Students declaring a major in English and French must choose a total of thirteen 5-unit courses, at least one of which must be a seminar. In addition, at least one of the courses must be in American literature and at least one must be in British literature after 1750. These courses are to be selected from the following categories.

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. ENGLISH 160. Poetry and Poetics.
5. One course in critical methods.
6. Two elective courses.
7. A coherent program of four courses in French literature, read in the original.

English and German Literatures—Candidates for the B.A. in this major must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above.

English and Italian Literatures—Candidates for the B.A. in this major must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above.

English and Spanish or Spanish American Literatures—Candidates for the B.A. in this major must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Spanish literature, read in the original, with approval by the departments involved as specified above.

ADVANCED WORK

INDIVIDUAL RESEARCH

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

SENIOR INDEPENDENT ESSAY

The senior independent essay gives senior English majors the opportunity to work throughout the year on a sustained piece of critical or scholarly work of around 10,000 words on a topic of their choice, with the close guidance of a faculty adviser. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of the third quarter prior to expected graduation. The senior essay is read and graded by the adviser and one other member of the English faculty. Senior independent essay students register for ENGLISH 199.

HONORS PROGRAM

Students who wish to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography. Honors students are encouraged to complete the following English major requirements before the start of their senior year: critical methods and ENGLISH 160. Poetry and Poetics.

In the Autumn Quarter of the senior year, students take a 5-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. Students who are studying at Oxford or at other institutions may be exempted from this seminar on request and with the approval of the director of the honors program.

In Winter Quarter of the senior year, honors students take a 3-unit essay workshop focused on the process of researching and writing the essay.

In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15. Essays that receive a grade of 'A-' or above are awarded honors.

Students in the honors program complete the requirements of the major and the following:

Senior seminar and workshop, 8 units total
Senior Honors Essay, 10 units

For other opportunities for extended essay projects, see "Senior Independent Essay" above and ENGLISH 194 and 199.

HONORS PROGRAM IN HUMANITIES

An honors program in Humanities is available for English Literature majors who wish to supplement the major with a related and carefully guided program of studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the "Comparative Literature" section of this bulletin.

THE ENGLISH MAJOR AND THE OVERSEAS CAMPUSES

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies" section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

VISITING STUDENTS

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master's or Ph.D. program, may apply to Graduate Admissions for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter, they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.

GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the "Graduate Degrees" section of this bulletin.

Eligibility—Students with a bachelor's degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the M.A. in English and American Literature. The M.A. program is a terminal, one-year program without financial aid.

MASTER OF ARTS

Candidates may earn the master's degree in English and American Literature by satisfying the following requirements:

1. Successful completion with a 3.0 (B) grade point average (GPA) of at least nine courses (a minimum of 45 units), two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101-199 without the consent of the Director of Graduate Studies. The master's student may take no more than 10 units of directed reading and research (ENGLISH 398). Interested students should consult their faculty adviser or the graduate program adviser for further details.

   During the first two weeks of the first quarter, candidates for the master's degree in English and American Literature should consult the adviser designated by the Director of Graduate Studies in order to draw up a three quarter study plan. The student's program consists of five required courses: ENGLISH 296; two courses in literature before 1800 and two courses in literature after 1800; plus four elective courses representing a mixture of survey and specialized courses chosen to guarantee familiarity with a reasonable proportion of the works on the reading list for doctoral candidates. Students whose undergraduate transcripts do not show courses in the following areas should take courses in these areas as part of their M.A. program: Medieval, Renaissance, 18th century, 19th century, 20th century (the latter two in either British or American literature). Normally, no more than two courses taken outside the department may count toward the degree, but the graduate studies committee considers exceptions. No creative writing courses may be used to fulfill the requirements.

   Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60-page master's thesis. Such candidates may register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. Candidates who write a master's thesis may petition to be excused from up to 10 units of the requirements described above. The additional 35 units normally consist of the five required courses and two elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.
2. Demonstration of a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further postgraduate work in English may apply for Stanford's coterminal master's program. Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master's degree. Students must also take the GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the

M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the Coterminal Teaching Program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who successfully complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the Coterminal Teaching Program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University's basic requirements for the doctorate. (Students should consult the most recent edition of *The Ph.D. Handbook*; copies are available in the English graduate studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor's degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another's classrooms.

ENGLISH AND AMERICAN LITERATURE

All students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students are not excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).
2. Graduate-level (at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
3. Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during Winter and Spring quarters. There are no units associated with this work.
7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser's judgment and the candidate's needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. *Note:* A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
10. A University Oral Examination to be taken no later than the Spring Quarter of the student's third year in the Ph.D. program. This examination covers the field of concentration as defined by the student and the student's adviser.

ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking

10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.

3. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.
4. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
5. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
8. A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.

LANGUAGE REQUIREMENTS

All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of 'B' or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form as prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the chair of the program.

CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

NUMBERING SYSTEM

Pre-1750:	
100-110	Lecture Courses
111-119	Seminar Courses
1750-1900:	
120-129	Lecture Courses
130-139	Seminar Courses
Post-1900:	
140-149	Lecture Courses
150-159	Seminar Courses
Required Courses:	
160-169	
Themes and Topics:	
170-179	Lecture Courses
180-189	Seminar Courses
Courses for Advanced Undergraduates and Graduate Students:	
200-289	
Graduate Colloquia:	
300-313	
Graduate Seminars:	
314-389	
Writing Courses, Workshops, Individual Study:	
90-99, 190-199, 290-299, 390-399	

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by English department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in English are advised to consider satisfying their IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 34 A,B. A Life of Contemplation or Action? Debates in Western Literature and Philosophy—Literary treatments of the debate over the active versus the contemplative life from the classical to the modern era. Changing literary, historical and philosophical contexts. GER:IHUM-2,3

IHUM 34A: *4 units, Win (Summit, J)*

IHUM 34B: *4 units, Spr (Vermeule, B)*

INTRODUCTORY (FOR NON-MAJORS)

Classes for students whose major is undeclared, or who are not majoring in English.

ENGLISH 9. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(English majors and others taking 5 units, register for 109.) Survey. Major and minor English works from the end of the Middle Ages through the end of the Renaissance. GER:DB-Hum

3 units, Win (Riggs, D)

ENGLISH 14Q. John Donne: His Poetry, Prose, and the Early Modern World—Stanford Introductory Seminar. Preference to sophomores. Situating Donne's work within his historical and cultural milieu; how his writing reflects changes on the threshold of the modern era. The influence of his dramatic realism on modern poets such as Browning, Eliot, and Rich, and composers such as Benjamin Britten and Bob Dylan. GER:DB-Hum

4-5 units, Aut (Brooks, H)

ENGLISH 20. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(English majors and others taking 5 units, register for 120.) From the 18th to the 20th centuries. Topics include the rise of the novel, lyric and dramatic poetry, Romanticism, realism, Modernism, characterization, narrative voice, and the influence of history on literature. GER:DB-Hum

3 units, Spr (Gigante, D)

ENGLISH 21. Masterpieces of American Literature: American Nomads from the Frontier to Cyberspace—(English majors and others taking 5 units, register for 121.) How Americans from the first settlers to contemporary Internet users have defined their identity relation to different modes of mobility, travel, and rootedness. Early Puritan encounters with the wilderness; 19th-century romantic images of farm and forest; and 20th-century visions of the modern metropolis, international travel, and cyberspace. Readings include novels, short stories, poetry, and essays by Bradford, Rowlandson, Fenimore Cooper, de Tocqueville, Emerson, Thoreau, Whitman, Turner, Cather, Faulkner, Kerouac, Anzaldúa, Yamashita, and Gibson. GER:DB-Hum

3 units, Aut (Heise, U)

ENGLISH 43. Introduction to African American Literature—(English majors and others taking 5 units, register for 143.) The slave narrative and representative genres (poetry, short stories, essays, novels). Works by Douglass, Jacobs, Chesnutt, Du Bois, Dunbar, Toomer, Hurston, Wright, Baldwin, and Morrison. GER:DB-Hum

3 units, Aut (Elam, M)

ENGLISH 43A. American Indian Mythology, Legend, and Lore—(English majors and others taking 5 units, register for 143A.) GER:DB-Hum

3 units, Win (Fields, K)

ENGLISH 43B. Introduction to Chicana/o Literature and Culture—(English majors and others taking 5 units, register for 143B.) Introduction to the literature and culture of this nation's second largest ethnic minority. Works by Paredes, Gonzales, Alurista, Cervantes, Rivera, Cisneros, Viramontes, Moraga, Anzaldúa, Burciaga, Rodríguez, Gómez, Valdez, Serros. GER:DB-Hum

3 units, Aut (Moya, P)

ENGLISH 43C. Introduction to Asian American Literature—(English majors and others taking 5 units, register for 143C.) Asian American literature as an interdisciplinary field, combining history, politics, and literature to articulate changing group and individual identity. Themes include aesthetics, colonialism, immigration, transnationalism, globalization, gender, and sexuality. GER:DB-Hum, EC-AmerCul

3 units, Aut (Sohn, S)

ENGLISH 45F. American Detective Fiction: From Low Art to High Culture—(English majors and others taking 5 units, register for 145F.) Cultural and literary contexts. Topics include 18th-century criminals, Edgar Allan Poe's stories, Mark Twain's *Pudd'nhead Wilson*, the Lizzie Borden murder case, the influence of Sherlock Holmes, dime novels and pulp fiction, film noir including Hitchcock's *Strangers on a Train*, Raymond Chandler's *The Big Sleep*, and Walter Mosley's *Devil in a Blue Dress*. GER:DB-Hum

3 units, Aut (Moser, J)

ENGLISH 47. Masterpieces of Contemporary Literature—(English majors and others taking 5 units, register for 147.) Prose, poetic and dramatic works from the late 19th century to the present; focus is on British literature. Social, cultural, and historic contexts of writers such as Woolf, Eliot, Forster, and Joyce; how their experimentations with form and narrative voice reflected major technological, political, and aesthetic concerns such as WW I, suffrage debates, and empire. Questions of legacy: how writers in today's postcolonial Britain, such as Zadie Smith and Ian McEwan, are inheritors of literary movements as well as innovators. GER:DB-Hum

3 units, Spr (Staveley, A)

ENGLISH 60. Poetry and Poetics—(English majors and others taking 5 units, register for 160.) Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through diction, imagery, and technical elements of verse. GER:DB-Hum

3 units, Aut (Jenkins, N), Win (Felstiner, J), Spr (Boland, E)

ENGLISH 74. The Novel: Developments in Modern Prose Narrative Fiction—(English majors and others taking 5 units, register for 174.) The genre which has dominated modern literary culture, defined the shared social world, and offered influential models of human consciousness and interiority. Turning points in the history of the novel and how formal breakthroughs are embedded within and speak to history. Possible authors include Defoe, Austen, Dostoevsky, Dickens, Flaubert, Woolf, Beckett, Nabokov, Perec, and McCarthy. GER:DB-Hum

3 units, Aut (Woloch, A)

ENGLISH 81. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

INTRODUCTORY SEMINARS

ENGLISH 51N. Drama Queens: Powerful Women on Stage—Stanford Introductory Seminar. Preference to freshmen. Eight strong women at the center of works of Greek, Shakespearean, and modern theater in the context of social misogyny. How they enact the social and spiritual visions of their creators. Sources include film performances. Students perform simple scene work. No acting experience required. GER:DB-Hum

3 units, Aut (Friedlander, L)

ENGLISH 55N. American Sports, American Lives—Stanford Introductory Seminar. Preference to freshmen. The role of sports in American culture through sources such as autobiographies, biographies, and films. Readings include: an autobiography and biography of Jackie Robinson; the film *The Jackie Robinson Story* in which he played himself; Roger Kahn's *The Boys of Summer*; Bernard Malamud's *The Natural*; Frank DeFord's *Big Bill Tilden: The Triumphs and the Tragedy*; and Arthur Ashe's *Days of Grace: A Memoir*. GER:DB-Hum

3 units, Win (Rampersad, A)

ENGLISH 62N. Eros in Modern American Poetry—Stanford Introductory Seminar. Preference to freshmen. Anne Carson, treating love from Sappho to Socrates, shows how the Greeks derived their philosophy from the erotic poetic tradition. Readings include: Carson's poetry which locates erotic desire in the larger context of the desire for knowledge; classic Japanese haiku masters such as Basho; and William Carlos Williams, Louise Bogan, and C.K. Williams. GER:DB-Hum

3 units, Win (Fields, K)

ENGLISH 66N. Homage: The Art of Influence—Stanford Introductory Seminar. Preference to freshmen. Novels and short stories that illuminate the nature and significance of intertextuality. Emphasis is on playful and exploratory rather than theoretical representations of gender and sexual orientation. Works include Ian McEwan's *Saturday*, E. M. Forster's *Howard's End*, Zadie Smith's *On Beauty*, Virgina Woolf's *Mrs. Dalloway*, and Michael Cunningham's *The Hours*. No background in literary criticism required. GER:DB-Hum

3 units, Aut (Tallent, E)

ENGLISH 69Q. Sources of Global Challenges Today, Possibilities for Global Solutions: A Literary Exploration—Stanford Introductory Seminar. Preference to sophomores. Concerns central to literary study, comparative study in race and ethnicity, and African and African American Studies as expressed in fiction from Africa, the Caribbean, the U.S., and Hawai'i. Issues include: relations between the West and the Muslim world; class and race in the U.S.; the shift of world populations from rural society to the metropolis; international immigration and refugee situations; and how women's lives are impacted by society, and how they shape and change it. Opportunities for dialogue with members of local ethnic and religious communities. GER:DB-Hum

3-5 units, Spr (Drake, S)

ENGLISH 70N. Shakespeare on Film—Stanford Introductory Seminar. Preference to freshmen. Introduction to film studies. *A Midsummer Night's Dream* directed by Reinhardt and Hall; *Romeo and Juliet* by Zeffirelli and Luhrman; *Henry V* by Olivier and Branagh; *Hamlet* by Gade, Olivier, Kozintsev, Zeffirelli, Branagh, and Almeryda. GER:DB-Hum

3 units, Spr (Riggs, D)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination—Stanford Introductory Seminar. Preference to freshmen. Italy as metaphor. English and American images of Italy, its people, and its culture from the Renaissance to the present. GER:DB-Hum

3 units, Aut (Evans, M)

ENGLISH 82Q. Shakespeare's Plays—Stanford Introductory Seminar. Preference to sophomores. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:DB-Hum

5 units, Aut (Rebholz, R)

ENGLISH 83Q. Playwriting: A Workshop in Craft—Stanford Introductory Seminar. Preference to sophomores. The fundamentals of crafting a stage play, including genre, dialogue, characterization, and plot. Professional models for such craft elements, and newer approaches. Students develop a dramatic idea into a more polished version of a scene or short one-act play to demonstrate the elements of stagecraft.

4 units, Aut (DiPirro, K)

ENGLISH 87N. The Graphic Novel: Literature Lite?—Stanford Introductory Seminar. Preference to sophomores. The evolution of funnies to comics and graphic novels. How definitions and representations of this genre have changed over the last century. The controversy over the status of the graphic novel. GER:DB-Hum

5 units, Win (Lunsford, A)

ENGLISH 88Q. Imagining Others: Cosmopolitanism in the Twenty-First Century—Stanford Introductory Seminar. Preference to sophomores. Cosmopolitanism as dealing with the consequences of increased social interactions across cultural, political and spatial boundaries, focusing questions related to globalization, nationalism, citizenship, cultural values, and identity. What is cosmopolitanism, and how can it be achieved? Dangers posed by modern cosmopolitan thought, and how these may be tempered. Relationship to the aspirations of liberal egalitarianism, distributive justice, and human rights.

4 units, Win (Savelson, K)

PRE 1750

Lecture courses: 100-109
Seminar courses: 110-119

ENGLISH 103. Crusades: Interdisciplinary Approaches—(Same as HISTORY 215, MEDVLST 165, RELIGST 140.) Causes, meanings, meaningfulness, and commemoration of the Christian expeditions against Muslims, pagans, and heretics. Primary and secondary sources. GER:DB-Hum

5 units, Win (Fields, K)

ENGLISH 143B. Introduction to Chicana/o Literature and Culture—(Same as 43B; see 43B.) GER:DB-Hum
5 units, Aut (Moya, P)

ENGLISH 143C. Introduction to Asian American Literature—(Same as 43C; see 43C.) GER:DB-Hum, EC-AmerCul
5 units, Aut (Sohn, S)

ENGLISH 145F. American Detective Fiction: From Low Art to High Culture—(Same as 45F; see 45F.) GER:DB-Hum
5 units, Aut (Moser, J)

ENGLISH 146. Development of the Short Story: Continuity and Innovation—Required for Creative Writing emphasis and minor. The project of the short story as the illumination of love, death, desire, violence, and empathy. Writers include Maupassant, Babel, Chopin, D.H. Lawrence, Woolf, and Flannery O'Connor. GER:DB-Hum
5 units, Win (Tallent, E)

ENGLISH 146C. Hemingway, Hurston, Faulkner, and Fitzgerald—Concerns and styles of four writers who marked America's coming-of-age as a literary nation with their experiments in representing the regional and the global, the racial and the cosmopolitan, the macho and the feminist, and the decadent and the impoverished. GER:DB-Hum, EC-AmerCul
5 units, Aut (Jones, G)

ENGLISH 147. Masterpieces of Contemporary Literature—(Same as 47; see 47.) GER:DB-Hum
5 units, Spr (Staveley, A)

ENGLISH 150. Modern Poetry and the Visual Arts—The relationship between photography, painting, and sculpture, and poetry in the 20th century. GER:DB-Hum
5 units, Win (Di Piero, S)

ENGLISH 153H. Digital Humanities: Literature and Technology—(Same as HUMNTIES 198J.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline.
5 units, Aut (Jockers, M)

ENGLISH 154C. Modern British Poetry—Poets include Thomas Hardy, G. M. Hopkins, Thom Gunn, and W. S. Graham. GER:DB-Hum
5 units, Win (Di Piero, S)

ENGLISH 154E. Twentieth-Century Irish Literature—Plays, poems, short stories, and novels. Writers include James Joyce, William Yeats, Mary Lavin, Kate O'Brien, William Trevor, Seamus Heaney, and Samuel Beckett. How the writer can sustain imaginative freedom and literary experiment in the face of a turbulent history. GER:DB-Hum
5 units, Spr (Boland, E)

REQUIRED COURSES

Lecture courses: 160-169; there are no required seminar courses.

ENGLISH 160. Poetry and Poetics—(Same as 60; see 60.) GER:DB-Hum, WIM
5 units, Aut (Jenkins, N), Win (Felstiner, J), Spr (Boland, E)

ENGLISH 163. Shakespeare—Major plays emphasizing theatrical representation of extreme characters. GER:DB-Hum
5 units, Aut, Win (Orgel, S), Spr (Riggs, D)

THEMES AND TOPICS

Lecture courses: 170-179
Seminar courses: 180-189

ENGLISH 171A. English in the World—World literatures in English outside the traditional British and American canons. The emergence of varieties of English worldwide and consequent literary production as a consequence of British colonialism. Major sites of such Anglophone literatures include the former British colonies of sub-Saharan Africa, the Caribbean, and S. Asia; the settler colonies of Australia, New Zealand, and Canada; and Ireland and S. Africa. GER:DB-Hum
5 units, Spr (Majumdar, S)

ENGLISH 172B. Introduction to Feminist Studies—(Same as FEMST 101.) What is feminism and why does it matter today? Debates over the status and meaning of feminism in the 21st century. Feminist theories and practices across topics that intersect with gender inequality such as race, health, socioeconomics, sexual orientation, international perspectives, new media, civil rights, and political change. Perspectives from philosophy, education, visual culture, literary and ethnic studies, performance and expressive arts, and social sciences. GER:DB-SocSci, EC-Gender
5 units, Aut (Elam, M)

ENGLISH 172D. Introduction to Comparative Studies in Race and Ethnicity—(Same as CSRE 196C, PSYCH 155.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci
5 units, Win (Moya, P; Markus, H)

ENGLISH 172E. The Literature of the Americas—(Same as COMPLIT 142.) Comparative perspective, emphasizing continuities and crises common to N., Central, and S. American literatures and distinctive national and cultural elements. Topics include: modes of representation of an American new world experience; myths of America as utopia; and critiques of notions of self and nation to which such myths give rise in political, historical, and literary forms. GER:DB-Hum, EC-AmerCul
5 units, Aut (Greene, R; Saldívar, R)

ENGLISH 172G. Great Works of the African American Literary Tradition—Works such as: Booker T. Washington's *Up from Slavery*; W.E.B Du Bois' *The Souls of Black Folk*; Zora Neale Hurston's *Their Eyes Were Watching God*; Langston Hughes' *Collected Poems*; Lorraine Hansberry's *A Raisin in the Sun*; Ralph Ellison's *Shadow and Act*; and Toni Morrison's *Beloved*. GER:DB-Hum
5 units, Spr (Rampersad, A)

ENGLISH 172P. African American Poetry—Thematic and historical approaches. Topics such as identity, the black woman, Africa, resistance, and love. Poets include Phyllis Wheatley in the 18th century, Langston Hughes in the Harlem Renaissance, and contemporary writers such as Rita Dove, Nathaniel Mackey, and Harryette Mullen. Sources include the *Oxford Anthology of African-American Poetry* and the *Norton Anthology of African American Literature*. GER:DB-Hum
5 units, Win (Rampersad, A)

ENGLISH 174. The Novel: Developments in Modern Prose Narrative Fiction—(Same as 74; see 74.) GER:DB-Hum
5 units, Aut (Woloch, A)

ENGLISH 175. Ecology through Poetry—Can poems create fresh news, ecologic insights, and a saving force for the environment? How does poetry expose human interactions with nonhuman nature? Sources include: Native American songs; haiku; the Psalms; romantic poets (Wordsworth, Keats, Coleridge); early Americans (Whitman, Dickinson); modernists (Hardy, Hopkins, Yeats, Frost, Williams, Jeffers); a female tradition (Millay, Swenson, Bishop, Levertov, Oliver); and contemporaries (Hughes, Walcott, Snyder, Hass). GER:DB-Hum
5 units, Spr (Felstiner, J)

ENGLISH 175J. Voyages, Swims, and Misadventures: The Culture of the Ocean—The sea in iconographic terms as place of life and death. Poetry including the *Anglo-Saxon Seafarer*, G. M. Hopkins, Lear, Baudelaire, Hardy, and Stevie Smith. Novels and novellas including *Treasure Island*, Melville, and Conrad. Films, photography, documentary, and painting. GER:DB-Hum

5 units, Spr (Jenkins, N)

ENGLISH 176. Science Fiction: Human Identity in the Age of Technology—The articulation in the science fiction genre of hopes and fears about modernization, technological innovation, and the limits of the natural and the artificial. How science fiction novels from the 19th century to the present portray the transformation of human minds, bodies, and habitats through new technologies. Readings include novels, short stories, comics, and films from N. America, Latin America, Europe, and Japan. GER:DB-Hum

5 units, Spr (Heise, U)

ENGLISH 181B. *Paradise Lost* to *The Prelude*: The Great Long Poem in English—A close reading of Milton's *Paradise Lost* to prepare students to follow the transformation of poetic style by Augustan and Romantic poets. Authors include Milton, Pope, Keats, and Wordsworth. Attention to poetic form and literary history. GER:DB-Hum

5 units, Spr (Hoxby, B)

ENGLISH 182S. Looking North: Canadian Literature—Writers include Margaret Atwood, Alice Munro, Michael Ondaatje, Rohinton Mistry, Yann Martel, and Carol Shields. Themes of national identity, race, class, gender, postcolonialism, geography, bilingualism, regionalism, and landscape in Canadian writing. The culture and literary productivity of America's northern neighbor. GER:DB-Hum

5 units, Spr (Staveley, A)

ENGLISH 183F. Contemporary Critical Theory—The study and use of critical theory in the humanities from the 20th century onwards; antecedents in the 18th and 19th centuries. The relationship between disciplinary developments in the production of knowledge and the enactment of power in the domains of gender, class, and race. GER:DB-Hum

5 units, Spr (Majumdar, S)

ENGLISH 184. The Novel, The World—(Same as COMPLIT 123.) Combining perspectives of the novels of the world as anthropological force with the sense of reality, and as protean form that has reshaped the literary universe. Readings from: ancient Greece; medieval Japan and Britain; and early modern Spain, China, and Britain; romantic theories of the novel; 19th-century realism and popular fiction; modernist experiments; and postmodern pastiches. GER:DB-Hum

5 units, Spr (Moretti, F)

ENGLISH 184C. Texts in History: Medieval to Early Modern—(Same as HUMNTIES 162.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, self, divine, and the physical universe. Interdisciplinary methods of interpretation. Texts include: Aristotle, *On the Soul*; Attar, *The Conference of the Birds*; Dante, *Inferno*; Chaucer, *Canterbury Tales*; Christine de Pizan, *The Book of the City of Ladies*; Letters of Columbus; Machiavelli, *The Prince*; Luther, *The Bondage of the Will*; Montaigne, *Essays*; Marlowe, *Doctor Faustus*; poems by John Donne and Lady Mary Wroth; Shakespeare, *Othello*; and works of art. GER:DB-Hum

5 units, Win (Brooks, H)

ENGLISH 185. Opera as Cultural History—The history of opera as mirror to the development of modernity in Western culture. Its interdisciplinary and crosscultural nature and its relationship to issues central to cultural studies such as gender, race, class, and nation. How it questions authorship, the meaning and reliability of musical and literary texts, and performance and production practices. Sources include filmed operas. GER:DB-Hum

5 units, Aut (Wyatt, M)

ENGLISH 185A. Writing Medicine—(Same as HUMBIO 176.) Classic and contemporary narrative prose about medicine. Focus is on illness and recovery, and good writing. Topics include being a patient, being a doctor, chronic illness, pain, modern medicine, and the modern hospital. Authors include Didion, Fadiman, Styron, Tolstoy, Williams, and contemporary doctors and patients.

3 units, Win (Zuger, A)

ENGLISH 186A. American Hauntings—Cultural, psychological, social, and political dynamics of haunting in American literature, from the early national period to the late 20th century. Sources include ghost stories and other instances of supernatural, emotional, or mental intervention. Authors include Charles Brockden Brown, Washington Irving, Edgar Allan Poe, Nathaniel Hawthorne, Louisa May Alcott, Charlotte Perkins Gilman, Charles Chesnutt, Henry James, Edith Wharton, Toni Morrison, and Stephen King. GER:DB-Hum

5 units, Win (Richardson, J)

ENGLISH 187G. Brokeback: Queering Western Literature—Seminar. How the West is depicted as a queer region in the 20th century. Readings include Owen Wister, Cherríe Moraga, Allen Ginsburg, Chrystos, John Rechy, Gloria Anzaldúa, Willa Cather, Dennis Cooper, Arturo Islas, David Henry Hwang, Miranda July, Adrienne Rich, Lynn Riggs, and Rebecca Brown. GER:DB-Hum

5 units, Aut (Gano, G)

ENGLISH 188G. The Modern West—Renewal and regeneration in the American west after WW I. Literature and arts of the interwar era, focusing on the influence of the Mexican revolution. Undefiled nature and primitive peoples versus a modern, cosmopolitan space inspiring the modern artist. GER:DB-Hum

5 units, Spr (Gano, G)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

ENGLISH 194. Individual Research—See section above on Undergraduate Programs, Opportunities for Advanced Work, Individual Research.

5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature—Required of students in the English honors program.

5 units, Aut (Summit, J)

ENGLISH 197. Seniors Honors Essay—In two quarters.

1-10 units, Aut, Win, Spr (Staff)

ENGLISH 198. Individual Work—Undergraduates who wish to study a subject or area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not appropriate for 198.

1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 198L. Individual Work: Levinthal Tutorial—Undergraduate writers work individually with visiting Stegner Fellows in poetry, fiction, and if available, nonfiction. Students design their own curriculum; Stegner Fellows act as writing mentors and advisers. Prerequisites: 90, 91, or 92; submitted manuscript.

5 units, Win (Staff)

ENGLISH 199. Senior Independent Essay—Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay; see note under "Honors Program" above. Applicants submit a sample of their expository prose, proposed topic, and bibliography to the Director of Undergraduate Studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty adviser. May be repeated for credit.

1-10 units, Aut, Win, Spr (Staff)

CREATIVE WRITING

ENGLISH 90. Fiction Writing—The elements of fiction writing: narration, description, and dialogue. Students write complete stories and participate in story workshops. May be repeated for credit. Prerequisite: PWR 1.

5 units, Aut (Altschul, A; O'Keefe, J; Kealey, T; Tanaka, S; Hutchins, S), Win (Tanaka, S; Pneuman, A), Spr (Altschul, A; Reese, R; Tanaka, S; Dolleman, R; Hutchins, S), Sum (Staff)

ENGLISH 91. Creative Nonfiction—(Formerly 94A.) Historical and contemporary as a broad genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content.

5 units, Aut, Win, Spr (Hummel, M)

ENGLISH 92. Reading and Writing Poetry—Prerequisite: PWR 1. Issues of poetic craft. How elements of form, music, structure, and content work together to create meaning and experience in a poem. May be repeated for credit.

5 units, Aut (Michas-Martin, S; Ekiss, K), Win (Ekiss, K) , Spr (Michas-Martin, S; Ekiss, K)

ENGLISH 94. Introduction to Creative Writing: Form and Structure—For minors in creative writing. The forms and conventions of the contemporary short story and poem. How form, technique, and content combine to make stories and poems organic. Prerequisite: 90, 91, or 92.

5 units, Win (Johnson, A), Spr (Hummel, M)

ENGLISH 190. Intermediate Fiction Writing—May be taken twice for credit. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 90 or 91.

5 units, Aut, Win (Altschul, A; O'Keefe, J), Spr (O'Keefe, J; MacDonald, D; Tanaka, S)

ENGLISH 190F. Fiction Writing for Film—Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Priority to seniors and Film Studies majors. Prerequisite: 90.

5 units, Win (O'Keefe, J)

ENGLISH 190G. The Graphic Novel—Interdisciplinary. Evolution, subject matter, form, conventions, possibilities, and future of the graphic novel genre. Guest lectures. Collaborative creation of a graphic novel by a team of writers, illustrators, and designers. Prerequisite: consent of instructor.

5 units, Win (Johnson, A; Kealey, T)

ENGLISH 190P. Poetry and Prose in Conversation—Workshop. Dialogue and cross-pollination between poets and prose writers. Students read work that blurs the boundaries of poetry and fiction, produce creative work outside the constraints of their chosen genre, and experiment with hybrid forms of their own devising. Team-taught by fiction writers and poets. Prerequisite: 90 or 92, or consent of instructor.

5 units, Win (Altschul, A)

ENGLISH 190R. Form and Theory of the Novel—(Formerly 95.) Seminar for creative writers. How writers connect detail, description, action, dialog, and thought to create scenes; how the balance of these elements creates an author's voice. The novel in terms of tradition, convention, design, and narrative strategy. Guest instructors from Stanford's Jones Lecturers. Prerequisites: manuscript and consent of instructors.

5 units, Spr (Johnson, A)

ENGLISH 190V. Reading for Writers—Taught by the Stein Visiting Fiction Writer. Prerequisite: 90.

5 units, Win (Toibin, T)

ENGLISH 191. Intermediate Creative Nonfiction—Continuation of 91. Workshop. The application of advanced storytelling techniques to fact-based personal narratives, emphasizing organic writing, discovering audience, and publication. Guest lecturers, collaborative writing, and publication of the final project in print, audio, or web formats. Prerequisite: 91 or 90.

5 units, Spr (Johnson, A)

ENGLISH 192. Intermediate Poetry Writing—May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 92.

5 units, Win (Michas-Martin, S), Spr (Ekiss, K)

ENGLISH 192P. The Prose Poem—Cross-genre workshop. For poets who step away from the line; for prose writers who esperiment with compression. The history and implications of the hybrid form to identify and use techniques inherent to poetry and prose. Prerequisite: 90 or 92, or consent of instructor.

5 units, Aut (Michas-Martin, S)

ENGLISH 192V. The Occasions of Poetry—Taught by the Mohr Visiting Poet. Prerequisite: 92.

5 units, Spr (Bly, R)

ENGLISH 290. Advanced Fiction Writing—Workshop critique of original short stories or novel. Prerequisites: manuscript, consent of instructor, and 190-level fiction workshop.

5 units, Aut (MacDonald, D), Spr (Tallent, E)

ENGLISH 292. Advanced Poetry Writing—Promising student poets write poetry in an atmosphere of mutual aid. Students selected by instructor. Prerequisites: 192, manuscript, consent of instructor.

5 units, Spr (Michas-Martin, S)

ENGLISH 390. Graduate Fiction Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (Tallent, E), Win (Toibin, T), Spr (Wolff, T)

ENGLISH 392. Graduate Poetry Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (Fields, K), Win (Boland, E), Spr (Di Piero, S)

ADVANCED UNDERGRADUATE/GRADUATE

ENGLISH 201. The Bible and Literature—Differences in translations of the Bible into English. Recognizing and interpreting biblical allusion in texts from the medieval to modern periods. Readings from the Bible and from British, Canadian, American, African American, and African literature in English.

5 units, Spr (Parker, P)

ENGLISH 215. What is Tragedy?—Major theorists of tragedy and the plays that embody their critical ideals. Criticism includes Aristotle, Lessing, Coleridge, Hazlitt, Hegel, Nietzsche, and Frye. Tragedies by Sophocles, Euripides, Shakespeare, Racine, and Lessing.

5 units, Win (Hoxby, B)

ENGLISH 219. Representation and Repression in Fiction—Strategies of representation in 19th-century fiction. How do narratives reveal information? Why do many novels revolve around untold, compressed, or hidden events? The interplay between concealment and disclosure at the core of narrative fiction. Emphasis is on narrative construction, sequencing, perspective, and voice in relation to sociopolitical and literary frameworks. Writers such as Austen, Melville, Dickens, Gaskell, Collins, James, Conrad, and Perec.

5 units, Win (Woloch, A)

ENGLISH 223E. Whitman and Dickinson

5 units, Aut (Fields, K)

ENGLISH 235. English Gothic Fiction from Walpole to Bronte—The phantasmagoric side of 18th-century sensibility: literary representation of fantastic events, violations of natural law, and landscapes of terror, pathology, sublimity, and horror. Emphasis is on women and the Gothic; whether there is an encoded sexual plot in classic Gothic fiction; and why

the genre typically emphasizes scenarios of erotic vulnerability, abjection, violation, and perversion. Other sources include recent psychoanalytic, social, and historical treatments of the genre.
5 units, Win (Castle, T)

ENGLISH 235A. Hogarth and his Contemporaries—The excitement of looking. Historical, literary, and social viewpoints. Readings include Hogarth's *Harlot's Progress, Rake's Progress, Four Times of the Day, Industry and Idleness, The Four Stages of Cruelty*, and *Marriage a la Mode*; and works of other artists and writers to whom he is linked. The nature of Hogarth's comic achievement. Recent scholarship and 18th-century commentaries.
5 units, Win (Shesgreen, S)

ENGLISH 240. Jacobean Tragedy—Revenge tragedies such as *Hamlet*, domestic tragedies such as *Othello*, and tragedies of over-reaching such as *Macbeth*. Comparison of Shakespeare's plays to those of Jonson, Webster, Middleton, and Ford. The significance of carnal, bloody, and unnatural acts in these tragedies. Jacobean stage conventions. Modern films. Opportunities for theatrical direction and performance.
5 units, Win (Hoxby, B)

ENGLISH 242. Restoration Literature—Focus is on literature that depicts Satan such as Milton's *Paradise Lost*. Why did Satan become a powerful figure in the cultural imagination of the period after the restoration of Charles Stuart to the throne in 1660? Issues such as transgression, sexuality, regicide, and heroism. The focus of literary production upon the person of the king as charismatic, despite ambivalence toward his dissolution and promiscuity.
5 units, Aut (Vermeule, B)

ENGLISH 259. Experimental Writing by Contemporary Women Poets—Focus is on two contemporary N. American poets, Susan Howe and Lyn Hejinian. Readings include: Howe's *The Nonconformist's Memorial* and *My Emily Dickinson* which locates Dickinson in the tradition of early American antinomians; and Hejinian's *Writing Is an Aid to Memory* and *My Life* in the context of her writings on Gertrude Stein. How Stein's paratactic poetics and Dickinson's experiments with syntax foreground the materiality of language in poets; examples in works by Rosmarie Waldrop, Joan Retallack, Rae Armantrout, and Karen Mac Cormack.
5 units, Spr (Bruns, G)

ENGLISH 260B. The Politics of Language—(Same as FEMST 260B.) While the U.S. was founded on principles of linguistic plurality, the English language has always been dominant in the U.S., with standard English holding most power. The struggle to share linguistic power; how questions of gender, race, and class have shaped and responded to language wars. Varieties of English in contemporary fiction, music, and film.
5 units, Win (Lunsford, A)

ENGLISH 261. California Regionalism in Ethnic American Literature—The space of literary California as represented by ethnic American writers from locations such as San Francisco, Santa Cruz, Central California, Los Angeles, Orange County, and Mexico.
5 units, Aut (Sohn, S)

ENGLISH 261A. Geography, Time, and Trauma in Asian American Literature—The notion that homes can be stable locations for cultural, racial, ethnic, and similarly situated identity categories. The possibility that there really is no place like home for Asian American subjects. How geography, landscape, and time situate traumas within fictional Asian American narratives.
5 units, Win (Sohn, S)

ENGLISH 262A. Studies in American Biography—Topics include: psychoanalysis; the art of narration; problems in objectivity; politics, feminism, and race; oral history; and letters and diaries as evidence. Sources include biographies of Richard Ellman, Leon Edel, and Diane Middlebrook. Guest biographers.
5 units, Spr (Rampersad, A)

ENGLISH 270. From Plato to Postmodernism: The Anglo-American Critical Tradition—Historical study of literary critical theorizing from classical times to the present. Issues such as subjectivity, originality, gender, evaluation, and canonicity.
5 units, Win (Evans, M)

ENGLISH 271B. The Other Chaucer—Chaucer outside the *Canterbury Tales*. Readings include the dream poems, the lyrics, *Troilus and Criseyde*, and his prose. Topics include: medieval traditions of dream and debate; the legacy of classical philosophy; and the manuscript culture of Chaucer's readers.
4-5 units, Spr (Lerer, S)

ENGLISH 279D. James Joyce and *Ulysses*—Close reading of *Ulysses* as one of the most significant literary works of modernism and 20th-century literary history. The nature and variety of its significance, and the meanings that Joyce's epic of modernism generates.
5 units, Win (Polhemus, R)

ENGLISH 293. Literary Translation—Seminar and workshop. For undergraduates and graduate students. The art and practice of literary translation; its tradition, principles, and questions. Final project is a translation and commentary on work of the student's choosing. Recommended: knowledge of a foreign language and experience in imaginative writing.
3-5 units, Spr (Felstiner, J)

ENGLISH 296. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—Required colloquium for incoming M.A. students. Contemporary theoretical movements. Topics such as the role of the intellectual in American life, the place of theory and politics in literary study, and what it means to be an academic writer. How different methodological approaches have been fruitful or not in analyzing specific texts.
5 units, Aut (Vermeule, B)

GRADUATE COLLOQUIA

ENGLISH 301B. Medieval Devotion—Foundational texts of late medieval English devotion, including mystical treatises (Richard Rolle, Julian of Norwich, and *The Cloud of Unknowing*), drama (the Digby *Mary Magdalene*, Croxton *Play of the Sacrament*), and William Langland's allegorical poem, *Piers Plowman*. Focus is on the politics of religious form and practice, including Wycliffite and early Reformation conflicts.
5 units, Aut (Summit, J)

ENGLISH 302A. The History of the Book—First of two quarter sequence. The book as developing concept and material object, from scroll to codex, manuscript to print, cold type to electronic medium. Bibliographical and paleographical techniques. History and theory. The use of books; the history of reading practices, including marginalia and other marks of ownership. Students develop individual projects from Stanford's rare book collection.
5 units, Aut (Orgel, S)

ENGLISH 302B. The History of the Book—Second of two quarter sequence; focus is on individual student projects. The book as developing concept and material object, from scroll to codex, manuscript to print, cold type to electronic medium. Bibliographical and paleographical techniques. History and theory. The use of books; the history of reading practices, including marginalia and other marks of ownership. Students develop individual projects from Stanford's rare book collection. Prerequisite: 302A.
5 units, Win (Orgel, S)

ENGLISH 303F. Institutions of Enlightenment: The Invention of the Public Sphere—(Same as COMPLIT 331C.) The cultural foundations of the Enlightenment as public sphere and its relationship to the private or intimate sphere. The invention and naturalization of fundamental institutions of the Enlightenment such as the public, the private, the market, public opinion, literature, the individual, society, culture, knowledge, and politics.
5 units, Spr (Bender, J)

ENGLISH 304H. Romantic Poetry and Poetics—Major poetic forms including lyrical ballads, songs, conversation poems, closet drama, romantic ode, sonnet, romance, and epic. Poets including Blake, Wordsworth, Coleridge, Shelley, Keats, and Byron.
5 units, Spr (Gigante, D)

ENGLISH 305H. Readings in Close Reading—The difference between reading and reading closely. Is close reading a specific method of literary criticism or theory, or does it describe a sensibility that can accompany any interpretation? Categories and frameworks for this ubiquitous, often undefined critical practice. Traditions of close reading: formalism, psychoanalysis, ideological critique, and hermeneutics. Focus is on Freud, Empson, Barthes, de Man and contemporary critics.
5 units, Aut (Woloch, A)

ENGLISH 307A. Modern British Literature: The Homosexual Tradition from Wilde to Winterson—20th-century British fictional and autobiographical works dealing with male and female homosexuality, by male and female authors. If there is a post-Wildean homosexual tradition in 20-century British literature, what are its features, historical and cultural determinants, and characteristic plots, modes, and tropes? Comparisons between male- and female-authored representations of homosexuality. More pragmatic, literary-historical, and text-based versus theoretical or abstractly philosophical. Recent queer theory scholarship including Sedgwick, Butler, Bristow, Sinfield, and Doan.
5 units, Spr (Castle, T)

ENGLISH 307B. *Entre Deux Guerres*: The Novel in Europe Between the Wars—Nine novels published from 1929 to 1939: a period manifesting memory of WW I, anticipation of WW II, and intense nationalist and internationalist energies. Focus is on works written in English; also contemporary texts originally written in Russian, German, and French. Challenges to the institution of national literatures. Novels by Hemingway, Nabokov, Woolf, Joseph Roth, Céline, Djuna Barnes, Beckett, Bowen, and Isherwood.
5 units, Win (Jenkins, N)

ENGLISH 309A. Novel of the Americas—(Same as COMPLIT 329.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalist ideologies but open to the consequences of transnational forces. How America has been invented as a category in sociocultural terms; the form the American novel has taken. Readings include Chopin's *The Awakening*, Cather's *Death Comes for the Archbishop*, Faulkner's *Absalom! Absalom!*, Asturias's *Men of Maize*, Carpentier's *The Kingdom of this World*, Paredes's *The Shadow*, Silko's *Almanac of the Dead*, and Proulx's *Accordion Crimes*.
5 units, Spr (Saldívar, R)

SEMINARS

ENGLISH 314. Epic and Empire—(Same as COMPLIT 320A.) Focus is on Virgil's *Aeneid* and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Win (Parker, P)

ENGLISH 342. Elizabethan and Jacobean Tragedy—Nine tragedies by Christopher Marlowe, Thomas Kyd, Elizabeth Cary, Thomas Middleton, John Webster, and John Ford. Their literary and cultural settings. Why did Elizabethan and Jacobean playwrights depict extreme forms of sociopathic behavior such as murder, rape, infanticide, incest, and necrophilia? What are the connections between sex and violence in these plays? Why are they still read and performed today? What can be learned from them?
5 units, Aut (Riggs, D)

ENGLISH 346. The Performance of Culture—The analysis of culture as theater, and theater as cultural production. Focus is on sacrifice, king making, carnival, marriage, and death. Primary texts include rituals, festivals, and plays from various periods and cultures. Critics include Victor Turner, Mikhail Bakhtin, Clifford Geertz, and Joseph Roach. Goal is to theorize performance and the function of theater in any period.
5 units, Spr (Hoxby, B)

ENGLISH 350C. Materials and Methods for the Study of Poetry—(Same as COMPLIT 320P.) For graduate students in all national literatures and for comparatists. The intellectual and professional tools relevant to scholarship on poetry in any language. Theoretical issues and practical knowledge of forms, techniques, and cultural formations in verse. Topics such as voice, tropes, lineation, stanzas, meters, visuality, sound, prose poems, and translation.
3-5 units, Win (Greene, R)

ENGLISH 357E. The Avant Garde and the Americas—The aesthetic and political projects of the European avant gardes in the early 20th century, including futurism, vorticism/imagism, Dada, and surrealism. The transfer and transformation of these projects to avant garde movements in the Caribbean, Mexico, and Brazil from the 20s to the 50s, and their reformulation in the U.S. after 1970. Media such as manifestos, poetry, performance, painting, and film. Theories of the avant garde.
5 units, Win (Heise, U)

ENGLISH 360B. The Theory of the Novel—The novel as the most variable of literary genres. How can a theory explain its diversity? What should the relationship be between theory and history of the novel? Focus is on three major theories of the novel (Lukács, Bakhtin, and the formalist-structuralist lineage), and more recent work on morphology, fiction, and realism.
5 units, Spr (Moretti, F)

ENGLISH 362A. The Postcolonial and the Global—Reflexive reading of the relationship between studies of postcoloniality and globalization in their current disciplinary states. Is the difference between them a matter of temporal focus or spatial distribution of power? What explains disciplinary moorings such as postcolonialism's housing in literature and history, and globalization's in law, economics, urban studies, business and finance? Has postcolonial theory been subsumed into globalization studies?
5 units, Win (Majumdar, S)

ENGLISH 363D. Identity, Experience, and Knowledge in Feminist Theory—Debates in contemporary feminist thought focusing on texts that interrelate identity, experience, and knowledge.
5 units, Aut (Moya, P)

ENGLISH 365B. Antebellum American Literature and Culture—The diversity of U.S. literary production between 1820 and the Civil War to place texts in their social, cultural, and political contexts. Recent critical approaches. Authors include Irving, Poe, Melville, Hawthorne, Stowe, Dickinson, Whitman, Douglass, and Jacobs.
5 units, Win (Jones, G)

ENGLISH 370A. Medieval Seminar—(Same as HUMNTIES 322.) The cultural, literary, and artistic evolution of the Middle Ages. The barbarian invasions and the Germanic ethos, the Celtic heritage, and the monastic tradition. Romanesque art and architecture, pilgrimages, and the Crusades. Gothic aesthetics, chivalry and courtly love, scholasticism, and the rise of universities. The late Middle Ages, humanism, and the threshold of the Renaissance. Texts include: *Beowulf*, *Mabinogion*, *Song of Roland*, Chretien de Troyes' *Lancelot* and *Yvain*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, and Chaucer's *Canterbury Tales*.
3-5 units, Win (Steidle, E)

ENGLISH 373D. Shakespeare, Islam, and Others—(Same as COMPLIT 311.) Shakespeare and other early modern writers in relation to new work on Islam and the Ottoman Turk in early modern studies. *Othello*, *Twelfth Night*, *Titus Andronicus*, *The Merchant of Venice*, and other Shakespeare plays. Kyd's *Solyman and Perseda*, Daborne's *A Christian Turned Turk*, Massinger's *The Renegado*, Marlowe's *The Jew of Malta*, and literary and historical materials.
5 units, Spr (Parker, P)

ENGLISH 374. Writing Race and Nation: Mark Twain and Paul Laurence Dunbar—Innovative treatment of issues of race and nation in the work of Twain and Dunbar, and the role their work played in shaping ideas of personal and national identity in the U.S. Sources include: their fiction, nonfiction, and poetry; and a recently recovered novel by Charles Chesnutt.
5 units, Spr (Fishkin, S)

ENGLISH 389B. Beckett—(Same as DRAMA 358C.) Beckett's plays and late writing, which have been described as proto-performance art. Recent Beckett scholarship, including new work about his analysis with Bion.
3-5 units, Spr (Phelan, M)

WORKSHOPS AND DIRECTED READING

ENGLISH 394. Independent Study—Preparation for first-year Ph.D. qualifying examination.
1-10 units, Sum (Staff)

ENGLISH 395. Ad Hoc Graduate Seminar—Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.
1-5 units, Aut, Win, Spr (Staff)

ENGLISH 396. Introduction to Graduate Study for Ph.D. Students—For incoming Ph.D. students. The major historical, professional, and methodological approaches to the study of literature in English.
5 units, Aut (Jones, G)

ENGLISH 396L. Pedagogy Seminar I—(Same as COMPLIT 396L.) Required for first-year Ph.D students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.
2 units, Aut (Jones, G)

ENGLISH 397A. Pedagogy Seminar II—Apprenticeship for second-year graduate students in English, Modern Thought and Literature, and Comparative Literature who teach in the Program in Writing and Rhetoric. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings explore rhetoric, theories and philosophies of composition, and the teaching of writing. Each student designs a syllabus in preparation for teaching PWR 1.
1 unit, Aut (Lunsford, A; Diogenes, M)

ENGLISH 398. Research Course—A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.
1-18 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 398R. Revision and Development of a Paper—Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.
5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 399. Thesis—For M.A. students only. Regular meetings with thesis advisers required.
1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

COMPLIT 157. Imitation of Life
3-5 units, Win (Gelder, A)

COMPLIT 257C/357C. Crowds—(Same as FRENGEN 317, ITALGEN 317.)
3-5 units, Aut (Schnapp, J)

PWR 193. Writing the Honors Thesis
1-5 units, Win, Spr (Obenzinger, H)

OVERSEAS STUDIES

Courses approved for the English major and taught overseas can be found in the "Overseas Studies" section of this bulletin, in the Overseas Studies office, 126 Sweet Hall, or at http://osp.stanford.edu.

OXFORD

OSPOXFRD 17. Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction
5 units, Spr (Plaskitt, E)

OSPOXFRD 82. Jane Austen and the Rise of the Woman Novelist
4-5 units, Aut (Plaskitt, E)

OSPOXFRD 114Z. Close Readings in English Literature, 1509-1642
5 units, Aut (van Es, B)

OSPOXFRD 116Z. Close Readings in English Literature, 1642-1740
5 units, Win (Bullard, P)

OSPOXFRD 154Z. Romantic Literature, 1740-1832
5 units, Spr (Plaskitt, E)

OSPOXFRD 163X. Shakespeare: Critical Commentary
5 units, Aut, Win (Rowley, R)

PROGRAM IN ETHICS IN SOCIETY

Director: Debra Satz

Steering Committee: Eamonn Callan (Education), Joshua Cohen (Philosophy, Political Science, Law), John Ferejohn (Political Science), Barbara Fried (Law School), Agnieszka Jaworska (Philosophy), Scotty McLennan (Dean of Religious Life), Josiah Ober (Classics, Political Science), Rob Reich (Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), Brent Sockness (Religious Studies), Allen Wood (Philosophy), Lee Yearley (Religious Studies)

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Sociology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Nadeem Hussain (Philosophy), David Kennedy (History), Benoît Monin (Psychology), Tamar Schapiro (Philosophy), David K. Stevenson (Pediatrics), Sylvia Yanagisako (Anthropology)

Mail Code: 94305-2155
Phone: (650) 723-0997
Email: joanberry@stanford.edu
Web Site: http://ethicsinsociety.stanford.edu

Courses given in Ethics in Society have the subject code ETHICSOC. For a complete list of subject codes, see Appendix B.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, and science.

Current and planned initiatives of the program include:

1. Supporting and fostering ethics research.
2. Supporting innovative teaching focusing on the ethical dimensions relevant to the different disciplines across the curriculum.
3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.
4. Ethics@Noon, a weekly discussion by faculty, students, and staff on topics of ethical concern.

The program also sponsors several annual public lecture series, including the Tanner Lectures in Human Values and the Wesson Lectures in Problems of Democracy.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are crosslisted with the Program in Ethics in Society. Students should consult the director to determine whether such courses may be applied towards an Ethics in Society honors program or minor.

UNDERGRADUATE PROGRAM

HONORS

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or no later than the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade.

Requirements—

1. Required courses (at least one of a or b must be taken at the 100 level):
   a) ETHICSOC 20. Introduction to Moral Theory; or ETHICSOC 170. Ethical Theory. Normally taken in the sophomore year.
   b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice. Normally taken in sophomore year.
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice. Normally taken after the moral and political philosophy classes listed above.
2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the cognate courses listed below.
3. ETHICSOC 190. Honors Seminar.
4. ETHICSOC 200A,B. Honors Thesis. On a subject approved by the honors adviser, with the work spread over two quarters. To receive honors in Ethics in Society, students must receive a grade of 'B+' on their thesis.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 in the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in the Winter Quarter, ETHICSOC 77 in the Spring Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter quarters of the senior year. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors; Ethics in Society minors may not double count courses.

MINORS

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life. The minor also includes the possibility of pursuing classes around the theme of citizenship.

Students must declare the minor on Axess no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should discuss the minor with an adviser chosen from the Ethics in Society faculty list, and prepare a draft proposal that includes a list of courses planned to fulfill the requirements and the name of the faculty adviser.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units. Required courses must be taken for a letter grade.

Requirements—

1. Three Ethics in Society courses:
   a) ETHICSOC 20. Introduction to Moral Theory; or ETHICSOC 170. Ethical Theory
   b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice
2. Two courses at the 100 level or above that address some dimension of moral or political theory or practice.
3. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.

The 100-level and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 or 170 and 30 or 171.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20/170 or 30/171. No course credited to the Ethics in Society minor may be double-counted toward major requirements.

CITIZENSHIP OPTION

The citizenship option for the minor introduces students to the theory, history, and practice of citizenship in democracies. When a student declares the minor in EIS on Axess, no notation is made of the citizenship option, and this notation does not appear on transcripts or the diploma. All students taking the citizenship option must take ETHICSOC 198, Community Engagement Internship. In addition to the courses listed in (1) above, students must take a total of three additional classes from two of the following categories. Students may petition to have other relevant courses counted towards the minor.

1. Citizenship and Government Action
   - a) ETHICSOC 133. Ethics and Politics of Public Service
   - b) POLISCI 142T. Social Protection Around the World
   - c) PUBLPOL 101. Politics and Public Policy
   - d) PUBLPOL 164. Comparative Public Policy
2. Citizenship and Entrepreneurship
   - a) ETHICSOC 108. Ethics and the Professions
   - b) ME 206A. Entrepreneurial Design to Extreme Affordability
   - c) PUBLPOL 180. Social Innovation
   - d) PUBLPOL 195. Business and Public Policy
   - e) URBANST 131. Social Innovation and the Social Entreprenuer
3. Citizenship and Education
   - a) EDUC 167. Educating for Equity and Democracy
   - b) EDUC 179B. Youth Empowerment and Civic Engagement
   - c) EDUC 220C. Education and Society
   - d) EDUC 247. Moral Education
   - e) EDUC 304. The Philosophical and Educational Thought of John Dewey
4. Global Citizenship and Nongovernmental Organizations
   - a) POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
   - b) POLISCI 232. Civil Society and the Nonprofit Sector
   - c) PUBLPOL 183. Philanthropy and Social Innovation

GRADUATE STUDIES

The program's main provisions for graduate students are seminars on topics in applied ethics.

COURSES

ETHICSOC 20. Introduction to Moral Philosophy—(Same as PHIL 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas
5 units, Spr (Schapiro, T)

ETHICSOC 30. Introduction to Political Philosophy—(Same as PHIL 30, POLISCI 3.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas
5 units, Aut (Hussain, N)

ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice—(Same as PHIL 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
4 units, Spr (Staff)

ETHICSOC 78. Medical Ethics—(Same as PHIL 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas
4 units, Win (Jaworska, A)

ETHICSOC 133. Ethics and Politics of Public Service—(Same as POLISCI 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci
5 units, Aut (Reich, R)

ETHICSOC 170. Ethical Theory—(Same as PHIL 170/270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas
4 units, Aut (Jaworska, A)

ETHICSOC 171. Justice—(Same as IPS 208, PHIL 171/271, POLISCI 136S, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
5 units, Aut (Cohen, J)

ETHICSOC 179M. Libertarianism and Its Critics—Libertarian arguments such as: is it unjust to tax some persons' market incomes in order to provide benefits for others; is such taxation a form of theft; is it morally equivalent to forcing some persons to work for others; is the minimum wage an unjust restriction of freedom?
4 units, Spr (Staff)

ETHICSOC 190. Ethics in Society Honors Seminar—(Same as PHIL 178.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
3 units, Win (Reich, R)

ETHICSOC 198. Community Engagement Internship—Restricted to Ethics in Society minors with the citizenship option. Opportunities for students to engage in community work via the Haas Center for Public Service. Students work with Haas Center staff to design an internship involving community-based research or supported by a Haas Center fellowship or community service work/study, or to serve for an academic year as a tutor in one of the Haas Center's several K-12 programs in East Palo Alto. May be repeated for credit.
3-5 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 199. Independent Studies in Ethics in Society—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200A. Ethics in Society Honors Thesis—Limited to Ethics in Society honors students, who must enroll once in A and once in B.
1-5 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200B. Ethics in Society Honors Thesis—Limited to Ethics in Society honors students, who must enroll once in A and once in B.
1-5 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 191B/291B. Conduct and Misconduct in Science
3-5 units, not given this year

CASA 90. Theory of Cultural and Social Anthropology
5 units, Win (Ebron, P)

CASA 108. History of Archaeological Thought—(Same as ARCHLGY 103.)
5 units, Aut (Meskell, L)

CASA 174. Cultures of Disease: Cancer
5 units, Win (Jain, S)

COMM 131/231. Media Ethics and Responsibilities
4-5 units, Win (Glasser, T)

COMM 236G/336G. Democracy, Justice, and Deliberation
1-5 units, not given this year

COMM 238/338. Democratic Theory: Normative and Empirical Issues
1-5 units, not given this year

ECON 143. Ethics in Economics Policy
5 units, not given this year

ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David, P)

EDUC 167. Educating for Equity and Democracy
3 units, Sum (McDermott, R)

EDUC 179B/279B. Youth Empowerment and Civic Engagement
2-4 units, not given this year

EDUC 137X/237X. Social Justice in Education
3 units, Win (Callan, E)

EDUC 247. Moral Education
3 units, Win (Damon, W)

EDUC 304. The Philosophical and Educational Thought of John Dewey—(Same as PHIL 242.)
4 units, not given this year

FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies
3-5 units, Win (Dupuy, J)

HISTORY 236. The Ethics of Imperialism
5 units, Aut (Daughton, J)

HISTORY 243G/343G. Tobacco and Health in World History
4-5 units, Aut (Proctor, R)

HISTORY 259A. Poverty and Homelessness in America
5 units, not given this year

HISTORY 259B. Poverty and Homelessness in America II
3 units, not given this year

HISTORY 294. Violence, Ethics, Colonialism: Gandhi, Liberalism, and the Politics of Friendship
5 units, Win (Kumar, A)

HUMBIO 122S. Social Class, Race, Ethnicity, Health
4 units, given next year

ME 206A. Entrepreneurial Design for Extreme Affordability—(Same as OIT 333.)
Win, 4 units (Beach, D; Patell, J)

PHIL 174/274. Freedom and the Practical Standpoint
4 units, not given this year

POLISCI 1. Introduction to International Relations
5 units, Spr (Tomz, M)

POLISCI 114S. International Security in a Changing World
5 units, Win (Sagan, S; Blacker, C)

POLISCI 130B/330B. History of Political Thought II: Early Modern Political Thought, 1500-1700
5 units, not given this year

POLISCI 130C/330C. History of Political Thought III: Freedom, Reason, and Power
5 units, not given this year

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.)
5 units, not given this year

POLISCI 136R/336. Introduction to Global Justice—(Same as INTNLREL 136R.)
5 units, Spr (Pasternak, A; de Bres, H)

POLISCI 142T. Social Protection Around the World
5 units, not given this year

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries—(Same as INTNLREL 143.)
5 units, Win (Abernethy, D)

POLISCI 231S. Contemporary Theories of Justice
5 units, not given this year

POLISCI 232. Civil Society and the Nonprofit Sector—(Same as URBANST 121.)
2-4 units, not given this year

POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
5 units, Spr (Reich, R; Sievers, B)

PSYCH 179/270. The Psychology of Everyday Morality
4 units, not given this year

PUBLPOL 101. Politics and Public Policy—(Same as POLISCI 123.)
5 units, not given this year

PUBLPOL 164. Comparative Public Policy
3 units, not given this year

PUBLPOL 180. Social Innovation
4 units, not given this year

PUBLPOL 183. Philanthropy and Social Innovation
5 units, Spr (Arrillaga, L)

SOC 130/230. Education and Society—(Same as EDUC 220C.)
4-5 units, Aut (Ramirez, F)

STS 110. Ethics and Public Policy—(Same as MS&E 197, PUBLPOL 103B.)
5 units, Win (McGinn, R)

URBANST 131. Social Innovation and the Social Entrepreneur
1 unit, Aut (Staff)

FEMINIST STUDIES

Director: Penelope Eckert

Program Committee: Penelope Eckert (Linguistics), Heather Hadlock (Music), Miyako Inoue (Anthropology), Helen Longino (Philosophy), Valerie Miner (Feminist Studies), Londa Schiebinger (History), Elizabeth Tallent (English)

Resource Faculty:

Anthropology: Melissa Brown, Paulla Ebron, Miyako Inoue, Sarah Jain, Matthew Kohrman, Barbara Voss, Sylvia Yanagisako

Art and Art History: Wanda Corn, Pamela Lee, Melinda Takeuchi

Asian Languages: Yoshiko Matsumoto

Biological Sciences: Joan Roughgarden

Business: Joanne Martin

Classics: Maud Gleason, Susan Stephens, Yasmin Syed

Comparative Literature: Patricia Parker

Developmental Biology: Ellen Porzig

Drama: William Eddelman, Harry J. Elam, Cherríe Moraga, Peggy Phelan

Education: Susanna Loeb, Joy Williamson, Christine Min Wotipka

English: Eavan Boland, Terry Castle, Michele Elam, Andrea Lunsford, Paula Moya, Sianne Ngai, Stephen Orgel, Ramón Saldívar, Jennifer Summit, Elizabeth Tallent

Feminist Studies: Patricia Karlin-Neumann, Susan Krieger, Valerie Miner

French and Italian: Carolyn Springer

German Studies: Russell Berman, Kathryn Strachota

History: Philippe Buc, Paula Findlen, Estelle Freedman, Katherine Jolluck, Nancy Kollmann, Carolyn Lougee Chappell, Paul Robinson, Londa Schiebinger, Kären Wigen

Human Biology: Anne Firth-Murray

Law: Deborah Rhode

Linguistics: Penelope Eckert, Arnold Zwicky

Medical School: Ann Arvin, Helen Blau, Roy King, Cheryl Koopman, Iris Litt

Music: Heather Hadlock

Philosophy: Agnieszka Jaworska, Helen Longino, Debra Satz

Political Science: Terry Karl, Carolyn Wong

Psychology: Albert Bandura, Laura Carstensen, Hazel Markus

Religious Studies: Charlotte Fonrobert, Hester Gelber, Linda Hess

Slavic Languages and Literatures: Monika Greenleaf

Sociology: Paula England, Cecilia Ridgeway

Spanish and Portuguese: Yvonne Yarbro-Bejarano

Program Office: Serra House, 589 Capistrano Way
Mail Code: 94305-8640
Phone: (650) 723-2412
Email: zamoram@stanford.edu
Web Site: http://feminist.stanford.edu

The Program in Feminist Studies is an interdisciplinary undergraduate program offering students the opportunity to investigate the significance of gender and sexuality in all areas of human life. Feminist analysis asserts that gender is a central factor in the organization of society, and that definitions of gender, sex, and sexuality are social constructions. As such, they vary across time and place, have strong ideological underpinnings, and serve political ends. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it encourages feminist analysis and teaching at Stanford, in courses within the program and those housed within other programs and departments.

The program committee awards the annual Michelle Z. Rosaldo and Francisco Lopes prizes for the best undergraduate work on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and master's papers written by undergraduates in coterminal degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office in early April for essays and mid-May for theses. See the web site for updates. Essays and theses completed later in Spring or Summer Quarter may be submitted for consideration the following year.

UNDERGRADUATE PROGRAMS

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office or at http://feminist.stanford.edu. Students interested in Feminist Studies should consult the program mentor.

BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one of multiple majors, none of the 62 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 62 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should normally be declared by the beginning of a student's junior year. Majors should choose two faculty advisers from the list of resource faculty, one of whom is usually the director of the Feminist Studies program. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office to declare the major.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 62 units. The courses are divided among the core, the focus, and electives to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 103.
2. Designated feminist theory course. See the Feminist Studies web site to see which courses fulfill the theory requirement this year.
3. FEMST 103. Feminist Theories and Methodologies.
4. FEMST 104A,B. Practicum
5. One Feminist Studies or cognate course in the social sciences. Courses that fulfill this requirement can be found among courses listed under Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology.
6. One Feminist Studies or cognate course in the humanities. Courses that fulfill this requirement can be found among courses listed in English, Linguistics, Philosophy, Religious Studies, the arts, and languages.

THE FOCUS

Every student designs a thematic focus consisting of at least five courses. These focuses are not declared on Axess; they do not appear on the transcript or diploma.

1. At least three of the focus courses should be Feminist Studies or cognate courses.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.
3. At least one course within the thematic focus should address crosscultural issues.

4. The focus should be designed in consultation with the student's advisers. The following are examples of common focuses, but students are also encouraged to develop new one:

   Feminism and the Arts
   Feminist Perspectives on Science, Technologies, and Health
   Gender and Education
   Gender and Popular Culture
   Gender in Language and Symbol
   Gender, Race, and Nation
   Masculinities
   Medieval Gender Studies
   Queer Studies
   Women and Health
   Women and Modernity
   Women and Religion
   Women and Work

WRITING IN THE MAJOR

Majors in Feminist Studies must satisfy the Writing in the Major (WIM) requirement 2007-08 by taking FEMST 260B, The Politics of Language, in Winter Quarter, or FEMST 253, Women and the Creative Imagination, in Spring Quarter. Honors students satisfy the WIM requirement through their honors work.

PRACTICUM

A practicum is required in order to bring together theory and practical experience. The practicum should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, Senior Seminar and Practicum (1 unit), in Autumn Quarter of the senior year.

ELECTIVES

Students are encouraged to take electives that provide intellectual breadth in the program and contribute to the 62-unit requirement.

MINORS

Students interested in minoring in Feminist Studies should consult the program mentor. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses at the 100 level or above for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student's major. The minor in Feminist Studies should be declared by the Winter Quarter of a student's junior year.

Requirements—

1. FEMST 101. Introduction to Feminist Studies. This must be taken before 103.
2. Designated feminist theory course, *or* FEMST 103. Feminist Theories and Methodologies

FOCUS

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

Admission—The honors program offers an opportunity to do independent research for a thesis of superior academic quality. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must apply for honors certification by the end of the junior year, but are encouraged to apply earlier. To apply, students should design a project in consultation with their proposed thesis adviser and the Feminist Studies honors tutor. A proposal describing the project and the number of units to be awarded must be submitted to the director of the program for final approval. See the Feminist Studies web site for details.

Requirements—

1. In addition to the normal requirements for the major, students enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis, and one unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year.
2. Throughout the senior year, students work with faculty advisers and the Feminist Studies honors tutor. The final thesis must be submitted by May 30 and be of acceptable quality to the student's faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis.

MAJORS IN OTHER DEPARTMENTS

Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major.

Admission—Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must have completed the following courses with a grade of (B+) or better:

1. FEMST 101 and a designated feminist theory course
2. *or* three Feminist Studies courses related to the topic of their proposed honors research

To apply, students must first consult the Director of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. Students must apply for honors by the end of the junior year.

Requirements—Students enroll in FEMST 105 for 10-15 units, and 1 unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year. The final thesis must be submitted by May 30, and must be of acceptable quality to the student's faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis. For more information, see http://feminist.stanford.edu.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. Courses listed as cognate courses pay significant attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sex/gender systems in social organization.

FEMINIST STUDIES COURSES

FEMST 101. Introduction to Feminist Studies—(Same as ENGLISH 172B.) What is feminism and why does it matter today? Debates over the status and meaning of feminism in the 21st century. Feminist theories and practices across topics that intersect with gender inequality such as race, health, socioeconomics, sexual orientation, international perspectives, new media, civil rights, and political change. Perspectives from philosophy, education, visual culture, literary and ethnic studies, performance and expressive arts, and social sciences. GER:DB-SocSci, EC-Gender

5 units, Aut (Elam, M)

FEMST 103/203. Feminist Theories and Methods Across the Disciplines—(Graduate students register for 203; same as PHIL 153.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from one of the disciplines in question. GER:EC-Gender

4-5 units, Win (Longino, H)

FEMST 104A. Junior Seminar and Practicum—Restricted to and required of Feminist Studies majors. Preparation for practicum projects. How to identify goals, submit grant proposals, and negotiate ethical issues in feminist praxis. The relationship between potential projects and their academic focus in the major.

1 unit, Win (Staff)

FEMST 104B. Senior Seminar and Practicum—For Feminist Studies majors only. Students present reports on the relation of the practicum to their academic work, submit a draft revised analysis of the practicum, and discuss applications of feminist scholarship. May be repeated once for credit.
2 units, Aut (Staff)

FEMST 105. Honors Work
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 108. Internship in Feminist Studies—For non-majors. Supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national women's organizations. One unit represents approximately three hours work per week. Required paper. May be repeated for credit. Prerequisites: course in Feminist Studies, consent of program office, written consent of faculty sponsor, application.
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 120. Introduction to Queer Studies—Gay, lesbian, bisexual, transgender, transsexual, and queer political movement and theory; sexual identities and feminism; sexual identities and cultural representation; alternative family practices; queer theory in academia. Film screenings, guest speakers, and community field trips.
4-5 units, Win (Hunter, M)

FEMST 138. Violence Against Women: Theory, Issues, and Prevention—Interdisciplinary feminist perspective. Causes of abuse, approaches to ending violence against women, and its relationship to other forms of oppression such as racism, economic exploitation, heterosexism, and social class. Institutional barriers maintaining this violence; individual, community, political, legal, national, and global dimensions of possible solutions. Limited enrollment. Prerequisite: consent of instructor.
2-4 units, Aut (Baran, N)

FEMST 139. Rereading Judaism in Light of Feminism—During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism. GER:EC-Gender
4-5 units, alternate years, not given this year (Karlin-Neumann, P)

FEMST 140M. South Asian Women in the Diaspora—The lives of contemporary Indian and Pakistani women and constructions of gender in the diaspora. Migration from the subcontinent to different cultural contexts. Issues include fundamentalisms, women's bodies and the state, and feminist activism. Are Western categories, such as American liberal feminist discourse, meaningful to these women? How do discourses of postcoloniality, class, sexuality, and nation influence women's lives.
5 units, Spr (Ameeriar, L)

FEMST 140P. Queer Performance—(Same as DRAMA 164T.) History of 20th-century forms of performance including examples from drama, avant garde theatre, cabaret, musical theater, and performance art; contemporary critical gender and queer theories. Modes of performance such as Dada and Weimar cabaret, the postdramatic theatre of Robert Wilson and the Wooster group , and self-consciously critical performances such as the body and performance art movements of the 70s and 80s.
5 units, Spring, (Hunter, M)

FEMST 166. Feminist Theories of Knowledge—(Same as PHIL 184F/284F.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER:DB-Hum, EC-Gender
4 units, not given this year (Longino, H)

FEMST 188N. Imagining Women: Writers in Print and in Person—Stanford Introductory Seminar. Preference to sophomores. Contemporary literature through recent texts and conversations with the authors including Stanford faculty and visiting writers. Analytical and creative writing. Write-2
4-5 units, Spr (Miner, V)

FEMST 191Q. Writing Women's Lives—Stanford Introductory Seminar. Preference to sophomores. Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.
2 units, Aut (Miner, V)

FEMST 195. Directed Reading—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 253. Women and the Creative Imagination—Interdisciplinary. The lives of women artists in different cultures and generations. Students write about art forms, the role of artists in the academy, and their social responsibilities. Similarities and differences among artists. WIM
4-5 units, Aut (Miner, V)

FEMST 260/360. Seminar in Women's Health: Women and Disabilities—(Graduate students register for 360.) Topics include invisible disabilities and identities, sexualities, access, caretaking, self-definition, stigma and passing, and women's psychological as well as physical health. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
5 units, Spr (Krieger, S)

FEMST 260B. The Politics of Language—(Same as ENGLISH 260B.) While the U.S. was founded on principles of linguistic plurality, the English language has always been dominant in the U.S., with standard English holding most power. The struggle to share linguistic power; how questions of gender, race, and class have shaped and responded to language wars. Varieties of English in contemporary fiction, music, and film. WIM
5 units, Win (Lunsford, A)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CASA 116. Women in Muslim and Arab Worlds
5 units, Spr (Staff)

CASA 138/238. Archaeology of Sex, Sexuality, and Gender
5 units, Spr (Voss, B)

CASA 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau
5 units, Win (Voss, B)

COMM 146/246. Language and Discourse: Race, Class, and Gender
4-5 units, Spr (Morgan, M)

CSRE 180C. Asian American Sexualities—(Same as PSYCH 180C.)
5 units, Win (Chiang, I)

CSRE 145A. Poetics and Politics of Caribbean Women's Literature—(Same as CASA 145A.)
5 units, Win (Duffey, Carolyn)

DRAMA 189Q. Mapping and Wrapping the Body
3 units, Aut (Eddelman, W)

EDUC 201. History of Education in the United States—(Same as HISTORY 158B.)
3-4 units, Spr (Staff)

ENGLISH 187G. Brokeback: Queering Western Literature
5 units, Aut (Gano, G)

HISTORY 161. U.S. Women's History, 1890s-1990s
5 units, Spr (Freedman, E)

HISTORY 221B. The Woman Question in Modern Russia
5 units, Aut (Jolluck, K)

HISTORY 221D/321D. Women's Activism in War and Peace
4-5 units, Spr (Jolluck, K)

HISTORY 295J. Chinese Women's History
5 units, Spr (Sommer, M)

HPS 156. History of Women and Medicine in the United States
5 units, Aut (Horn, M)

HUMBIO 129. Critical Issues in International Women's Health
4 units, Win (Murray, A)

INDE 245. Women and Health Care
1-2 units, Aut (Grudzen, M; LeBaron, S; Massion, C)

LAW 307. Gender, Law, and Public Policy
3 units, Win (Rhode, D)

RELIGST 156. Goddesses and Gender in Hinduism
4 units, Spr (Staff)

SOC 123/223. Sex and Love in Modern Society
3-5 units, Aut (England, P)

SOC 142/242. Sociology of Gender
3-5 units, Win (Ridgeway, C)

SPANLIT 101N. Visual Studies and Chicana/o Art
3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 178N. *Del Otro Lado:* Latina/o Performance in the U.S.
3 units, Win (Moraga, C)

SPANLIT 286/386. The Films of Lourdes Portillo
3-5 units, Aut (Yarbro-Bejarano, Y)

SPANLIT 289. The Body in Chicana/o Cultural Representations
5 units, Aut (Yarbro-Bejarano, Y)

OVERSEAS STUDIES

Courses approved for the Feminist Studies major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

OSPBER 28. Art and Body Culture: Dance in Germany from Modernism to Fascism and Beyond
4 units, Spr (Ross, J)

OSPBER 67. Sissy Sits, Lola Runs: Gender Moves in German Movies
5 units, Win (Kramer, K)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective
5 units, Spr (Junghanns, W)

FLORENCE

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image
4 units, Spr (Campani, E)

OSPFLOR 34. The Woman in Florentine Art
4 units, Aut (Verdon, T)

KYOTO

OSPKYOTO 44. Modernizing Women in Japan
4-5 units, Spr (Wigen, K)

SANTIAGO

OSPSANTG 56. Contemporary Chilean Women Writers
3-5 units, Spr (Haro, P)

OSPSANTG 111. Social Heterogeneity in Latin America
5 units, Aut (Valdés, T)

FINANCIAL MATHEMATICS

Director: Tze Leung Lai
Steering Committee: A. Dembo, K. Giesecke, T. Lai, A. Owen, G. Papanicolaou, J. Primbs, K. Singleton, A. Toussaint
Core Faculty:
Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, P. Hansen, M. Kurz, J. Shoven
Electrical Engineering: T. Cover
Management Science and Engineering: K. Giesecke, D. Luenberger, J. Primbs
Mathematics: S. Brendle, A. Dembo, P. Diaconis, G. Papanicolaou, A. Toussaint
Statistics: T. Cover, A. Dembo, P. Diaconis, T. Lai, A. Owen

This is an interdisciplinary program that provides a master's level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills. The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The program requires that the student take 45 units of work. Of these 45 units of work, 12 courses must be taken from the offerings provided on the lists of required and elective courses. These courses must be taken for a letter grade, but students may elect to take one of the 12 courses credit/no credit. An overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

Ordinarily, four quarters are needed to complete all requirements.

Admission—To be eligible for admission, students are expected to have taken the following courses or their equivalent:

1. Linear algebra at the level of MATH 103.
2. Advanced calculus (real analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (basic partial differential equations).
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136.
5. Computer programming at the level of CS 106A.

Some of these courses are offered as summer courses and may be taken by candidates lacking the required background.

Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics as well. Information about these exams can be found at http://www.gre.org.

Requirements—For the M.S. degree in Financial Mathematics, students must fulfill six of the following required courses:

1. In stochastic processes and statistics:
    a) MATH 236. Introduction to Stochastic Differential Equations
    b) STATS 241. Statistical Modeling in Financial Markets
2. In differential equations, simulation, and computing:
    a) MATH 227. Partial Differential Equations and Diffusion Processes *or* STATS 362 Monte Carlo Sampling
    b) MATH 239. Computation and Simulation in Finance
3. In finance and economics:
    a) MS&E 242H. Investment Science Honors *or* MATH 240. Topics in Financial Mathematics: Fixed Income Models
    b) MATH 238/STATS 250. Mathematical Finance

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the web site at http://finmath.stanford.edu/. With the approval of the instructor, credit can be obtained for practical training in industry. Students must sign up for STATS 297 and write a detailed report in order to receive credit.

A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239).

Any remaining units required to complete the 45 total must be taken from the following options:

1. Courses from the approved list of electives with emphasis on computation, information technology, or finance.
2. STATS 200, 217, 218; MATH 131, 132, 202; or ECON 140.
3. Additional practical CS courses.

The requirements must be met within two years of entering the program, or four academic quarters for those already at Stanford.

COURSES

The following are required core courses.

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 242H. Investment Science Honors—Concepts of modern quantitative finance and investments. Basic concepts under certainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, ENGR 60, or equivalents. No prior knowledge of finance required.

3 units, Aut (Giesecke, K)

MATHEMATICS

MATH 227. Partial Differential Equations and Diffusion Processes—Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

3 units, Win (Nolen, J)

MATH 236. Introduction to Stochastic Differential Equations—Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

3 units, Win (Papanicolaou, G)

MATH 238. Mathematical Finance—(Same as STATS 250.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance—Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

3 units, Spr (Toussaint, A)

MATH 240. Topics in Financial Mathematics: Fixed Income Models—Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.

3 units, Spr (Toussaint, A)

STATISTICS

STATS 241. Statistical Modeling in Financial Markets—(SCPD students register for 241P.) Nonparametric regression and yield curve smoothing. Advanced time series modeling and forecasting. Market risk measures. Substantive and empirical modeling approaches in financial markets. Statistical trading strategies. Prerequisite: 240 or equivalent.

3-4 units, Spr (Lai, T)

STATS 362. Monte Carlo Sampling—Fundamentals of Monte Carlo methods. Generating uniform and nonuniform variables, random vectors and processes. Monte Carlo integration and variance reduction. Quasi-Monte Carlo sampling. Markov chain Monte Carlo, including Gibbs sampling and Metropolis-Hastings. Examples, problems and motivations from Bayesian statistics, computational finance, computer graphics, physics.

2-3 units, Aut (Owen, A)

FRENCH AND ITALIAN

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein
Chair: Robert Harrison
Director of Graduate Studies: Jeffrey Schnapp
Directors of Undergraduate Studies: Cécile Alduy (French), Carolyn Springer (Italian)
Professors: Jean-Marie Apostolidès, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Elisabeth Mudimbe-Boyi, Jeffrey T. Schnapp, Michel Serres
Associate Professors: Joshua Landy, Carolyn Springer
Assistant Professors: Cécile Alduy, Dan Edelstein, Laura Wittman
Senior Lecturer: Maria Devine
Lecturers: Dorian Bell (Humanities Fellow), Lorraine Sterritt, Sarah Sussman
Courtesy Professors: Keith Baker, Margaret Cohen, Paula Findlen, Michael Marrinan
Visiting Professors: Rachel Jacoff, Elena Russo

Department Offices: Building 260, Room 122-123
Mail Code: 94305-2010
Department Phone: (650) 723-4183
Email: fren-ital@stanford.edu
Web Site: http://french-italian.stanford.edu

Courses given in French and Italian have the subject codes FRENGEN, FRENLIT, ITALGEN, and ITALLIT. For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center" section of this bulletin. For a complete list of subject codes, see Appendix.

FRENCH SECTION

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of French Studies as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Visiting faculty and instructors contribute regularly to the life of the French section. The section maintains contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, and the Ecole Polytechnique.

A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

France-Stanford Center for Interdisciplinary Studies—The center, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford's departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

La Maison Française—La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

Stanford in Paris—The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Director of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be co-ordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the "Overseas Studies" section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.

ITALIAN SECTION

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Three degree programs are available in Italian: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

La Casa Italiana—La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

Stanford in Italy—The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate students into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program's classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the "Overseas Studies" section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS IN FRENCH

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department's two quarter IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites—Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams; *or*
3. by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

REQUIREMENTS

FRENCH

The French major requires a minimum of 56 units, all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. *Advanced language* (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis.
2. *Introductory series on French and Francophone literature and culture* (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence. Any one of these courses fulfills the Writing in the Major requirement.
3. *Research Seminar* (5 units): a majors-only seminar, DLCL 189, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their senior project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen an adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the senior project or honors thesis.
4. *Ancien Régime courses* (ca. 8 units): at least two courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from the 140 level or above. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.
5. *Upper-level French courses* (ca. 8 units): at least two additional courses must be taken within the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.
6. *Remaining courses* (ca. 22 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the senior project or the honors thesis. These courses must show obvious internal consistency and relevance to the chosen focus, and must be approved by the Director of Undergraduate Studies. Where possible, students are encouraged to complete their written work in French. Of these courses, only one, for a maximum of 4 units, may be drawn from individual work (199).

Senior Project—In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see "Honors Program" below) is required to submit a senior project to the project adviser before May 15 of the senior year. The project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for rework and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

FRENCH AND PHILOSOPHY

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Advanced language* (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis.
2. *Introductory Series on French and Francophone Literature and Culture* (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units): FRENGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division French Courses* (ca. 12 units): at least three courses numbered FRENLIT/FRENGEN 140 or higher.
9. *Related Courses* (ca. 8 units): two upper division courses relevant to the student's chosen area of specialization. One course (4 units) may be FRENLIT 199, Individual Work.
10. *Capstone Seminar* (ca. 4 units): this year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the initiative in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

French and English Literatures—In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

French and Italian Literatures—In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

FRENCH AND LINGUISTICS

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For details, contact the Department of Linguistics.

MINOR IN FRENCH

Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include one advanced language course (at the 120 level); three of the introductory series on French and Francophone literature and culture (FRENLIT 130-133); and a minimum of two additional courses in language or literature numbered 121 and above. Of these, only one may be taught in English. All courses must be chosen in consultation with the Director of Undergraduate Studies.

Double-counting is not permitted; in other words, courses used to satisfy French minor requirements may not be counted toward a student's major or toward a second minor.

HONORS PROGRAM

Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic. No later than the end of the Spring Quarter of the junior year, the student must submit to the Director of Undergraduate Studies an "Application for Honors," the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Students may enroll for 2 units of credit in FRENLIT 189B for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in FRENLIT 189B in Spring quarter of the senior year while revising the thesis, if approved by the thesis advisor. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

BACHELOR OF ARTS IN ITALIAN

REQUIREMENTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus):

ITALLANG 21. Second-Year Italian, First Quarter
ITALLANG 22. Second-Year Italian, Second Quarter
ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department's two quarter Great Works IHUM sequence (see above) entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 100 level.

The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).
2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages; (b) the early modern period; and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.
3. The intermediate-level survey sequence (ITALLIT 127, 128, 129). Any one of these courses fulfills the Writing in the Major Requirement.
4. One advanced language course beyond the level of ITALLANG 114.

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Italian Survey Sequence* (ca. 12 units): ITALLIT 127, 128, 129.
2. *Advanced Language Course* (ca. 4 units): ITALLANG 114 and above.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division Italian Courses* (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. *Related Courses* (ca. 8 units): two upper division courses relevant to the student's chosen area of specialization.
10. *Capstone Seminar* (ca. 4 units): this year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, are not normally permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—In addition to the 32 departmental units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINOR IN ITALIAN

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond ITALLANG 21 must be completed.

Requirements for the minor include ITALLANG 22 and 23 (or equivalent); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAM

Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 189B while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in ITALLIT 189B in Spring quarter of the senior year while revising the thesis, if approved by the thesis advisor. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages (DLCL). The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer in the DLCL.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers two undergraduate minor programs, the minor in Literature and the minor in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about the minors and their requirements.

DIGITAL HUMANITIES MODULE

The French and Italian department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the French major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab gateway core seminar, HUMNTIES 198J/ENGLISH 153H, Digital Humanities: Literature and Technology (5 units)
3. Complete the HUMNTIES 201, Digital Humanities Practicum (2-5 units), in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project. For more information on the Digital Humanities Lab, see http://shl.stanford.edu.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN FRENCH OR ITALIAN

Each year the department admits a small number of highly motivated undergraduates to the coterminal B.A. and M.A. degree in French or in Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate majors in the relevant language and must meet all requirements for the B.A. and the M.A.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

Admission to the M.A. and Ph.D. Programs—Applications and admissions information may be obtained from Graduate Admissions in the Registrar's Office, or at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the "Graduate Degrees" section of this bulletin. Applicants to the French program should have preparation equivalent to an undergraduate major in French; applicants to the Italian program should have done significant course work in Italian literature and/or Italian studies on the undergraduate level; in both cases, applicants should also have reached a high level of speaking and writing proficiency in the language. Previous study of an additional language is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as are two writing samples representative of the applicant's best undergraduate work. One sample should be in English, one in the language of study.

MASTER OF ARTS IN FRENCH

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applications for admission to the Masters of Arts program must be received by the last Friday of March in the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate's general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).

   The exam requires that the candidate answer four questions (out of six) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.

If the student's performance on the exam is deemed a 'pass' by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).

Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of the Spring Quarter.

2. The oral exam (90 minutes) assumes as its point of departure the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

MASTER OF ARTS IN ITALIAN

The terminal M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers.

Reading knowledge of a second Romance language is required. French is recommended.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+). To fulfill the requirements in one year, students should enroll for an average of 15 units per quarter. The basic course program is nine graduate courses, one of which may be taken outside the department but must be in a related field. The option of substituting a master's thesis for two literature courses is available.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is normally given before the end of Spring Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student's overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by the last Friday of March in the prior academic year. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Knowledge of a second Romance language is desirable. Candidates for this degree are not eligible for financial aid or teaching assistantships.

DOCTOR OF PHILOSOPHY

The Department of French and Italian offers three Ph.D. programs: a Ph.D. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian. Requirements for each separate Ph.D. program are listed first, followed by general requirements. All requirements are binding.

FRENCH

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program's flexible structure, a number of unique resources are available to students. The French section's exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

Language Requirements—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master's degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

ITALIAN

Stanford's Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within a flexible interdisciplinary framework. It is independent of the Ph.D. program in French and aims to encourage students to bring broad methodological and interdisciplinary concerns to bear on the study of Italian literature. While it places primary emphasis on developing a command of Italian literature as a whole, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that balance between period specialization and interdisciplinary breadth is essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon which extends over many disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program's structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

Language Requirements—As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate's period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

FRENCH AND ITALIAN

The Department of French and Italian provides students with the opportunity to pursue a Ph.D. in French and Italian studies. This unique program encourages students to construct a highly individualized course of study within an interdisciplinary framework, in order to foster a thorough and creative knowledge of both traditions and their intersections. Students are expected to specialize in one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. Students in the Ph.D. program are normally admitted either as French Fellows or as Italian Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Where general requirements call for the participation of a Director of Graduate Studies, candidates for the Ph.D. in French and Italian should understand that the participation of the directors of both French and Italian, if they are different, is required.

Aside from the benefits of the program's flexible structure, a number of unique resources are available to students. The French Section's exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris. Students may also be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty.

Language Requirements—Attaining a native or near-native fluency in both French and Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.

For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSLAT 101, 102, and 103) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.

For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g. German, Film Studies).

The language requirements should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without a master's degree, and not later than the end of the second year for students who entered the program with an external master's degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

Distribution of Elective Courses—Students must take a minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture.

Qualifying Examination—Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student's particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language).

An M.A. in French and Italian is awarded in the eventuality that a student completes the qualifying examination but whose work is judged insufficient for admission to candidacy for the Ph.D. This M.A. option is open only to students approved for the French and Italian Ph.D., and is not available to coterminal students, to M.A.-only students, or to Ph.D. students in French only or Italian only.

If, at the qualifying exam stage, a student's work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant director of graduate studies, and the chair of the Department of French and Italian.

Special Topic Examination—The chosen topic must focus equally on French and Italian literature and culture, and actively explore their relationship. Two weeks before the exam, the student must also submit not one but two graduate seminar papers, one in French on a French topic and one in Italian on an Italian topic.

University orals—The reading list should include works in both French and Italian in all genres relevant to the period covered.

Dissertation—The dissertation topic must include a substantial quotient of material from both the French and the Italian tradition, and the dissertation must include, either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.

Teaching—Out of the five courses the student is required to teach, at least one must be a French language course and at least one an Italian language course.

GENERAL REQUIREMENTS FOR THE PH.D.

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department. The remaining units must be selected in consultation with the Director of Graduate Studies.

Students entering with a master's degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements may be adjusted accordingly.

Required/Recommended Courses—Three courses are required:

1. FRENGEN/ITALGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: FRENGEN/ITALGEN 301E, New Methods and Sources in French and Italian Studies, a 3 unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. APPLLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Distribution of Elective Courses—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is usually done within the department, in order to ensure an adequate preparation for the qualifying examination. In the second and third years, however, the program of study is tailored to the specific interests of the student.

Candidacy—By the sixth quarter of graduate study, students must have satisfied all requirements to advance to candidacy for the Ph.D. Students must have passed the qualifying examination and satisfactorily completed at least 72 units of graduate-level study beyond the bachelor's degree (incompletes can not be counted). A candidacy form, available from the Student Services Officer, should be completed, signed and approved the department.

TGR status—Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form may request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENGEN 802 or ITALGEN 802 for zero units, in the appropriate section for their adviser.

EXAMINATIONS

There are three examinations: the qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student's knowledge of language and literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to the present day. The list may be expanded to reflect a student's particular interests, but not abridged.

Half of the exam takes place in the language of study, half in English (with the student free to choose which portion transpires in which language).

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examining committee consists of the student's faculty adviser (who chairs the examination), the Director of Graduate Studies of the relevant section, and one additional faculty member from the department.

Two weeks before the exam, the student must also submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student's overall progress, the members of the student's examining committee vote for or against admission to candidacy for the Ph.D. The terminal master's degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in the relevant area may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Special Topic Examination—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses research plans with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the student services officer for the Division of Languages, Cultures, and Literatures: one for the student's file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquy between the student and the examining committee. It concentrates on the conclusions to which the student's research has led him or her, and aims to determine the student's overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The University Orals—The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination. By the time of the examination, they must have no outstanding incompletes.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of non-literary or crossdisciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee's makeup.

The governing principle is that the University oral examination must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination covers the major authors and genres in the student's period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field.

The aim of the University oral is to establish the student's credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements.

The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

   Working with the committee members, the candidate's adviser prepares three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate's reading list and period of specialization, including concerns relevant, but by no means limited, to the student's projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.
2. One hour, 20 minutes: questions on the area of concentration.

Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student's overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student's reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student's preparation as a specialist in a given period, but within a broader context than that provided by a single course, examination, or even the dissertation itself.

Evaluation—At the end of each examination, the committee meets briefly and immediately informs the student whether he or she has passed. In the week following, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the examination.

DISSERTATION

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal—The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student's fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

ADVISING

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

JOINT DEGREES

A candidate may also take a joint degree in French and Humanities, or Italian and Humanities, as described in the "Interdisciplinary Studies in Humanities" section of this bulletin. Minors are possible in related fields, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa.

Students interested in a joint degree should design their course of study with their adviser(s). Joint degree programs frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

MINORS

Students interested in a minor should design their course of study with their adviser(s). A minor requires at lest 24 additional units of work, making completion of course requirements in nine quarters difficult if careful advance planning is not done.

Ph.D. Minor in French Literature—The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French section. Interested students should consult the graduate adviser.

Ph.D. Minor in Italian Literature—The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the graduate adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by French and Italian department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in French or Italian are advised to consider satisfying their IHUM requirements by registering for the following IHUM courses.

IHUM 2,3. Epic Journeys, Modern Quests—Two quarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-2,3

IHUM 2: *4 units, Win (Harrison, R, Jacoff, R)*
IHUM 3: *4 units, Spr (Landy, J; Edelstein, D)*

FRENCH SECTION

Note—Changes in course offerings after this bulletin has gone to print are sometimes necessary. Students are advised to consult the department bulletin board regularly.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

FRENCH LANGUAGE COURSES

The following courses in French language instruction represent a typical sequence for three years of French language study. Majors and prospective majors should consult the requirements for a B.A. in French above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Maison Française, see the "Language Center" section of this bulletin.

FRENLANG 1,2,3. First-Year French
5 units, Aut, Win, Spr (Ashaolu, O; Dozer-Rabedeau, J; Howard, H, Shashko, T; Samokhina, D; Tamas, J; Staff)

FRENLANG 22,23. Second-Year French
4-5 units, Aut, Win, Spr (Howard, H; Dozer-Rabedeau, J; Staff)

FRENLANG 120. Advanced French Oral Communication
3 units, Aut, Win, Spr (Staff)

FRENLANG 122. Introduction to French Culture and Civilization
3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 123. French Creative Writing
3-4 units, Win (Palumbo-Liu, S)

FRENLANG 124. Advanced French Grammar
3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 126. French Stylistics and Textual Analysis
3-4 units, Spr (Calefas-Strebelle, A)

GENERAL (IN ENGLISH)

These courses, with the subject code FRENGEN, do not require knowledge of French and are open to all students.

FRENGEN 45N. American Writers in 20th-Century Paris—Stanford Introductory Seminar. Preference to freshmen. A crosscultural inquiry into Paris as a part of American culture, a myth, a longing, and source of inspiration. Role of artistic movements (Cubism, Surrealism, Existentialism) and cultural institutions such as the cafés, libraries, and salons in the life and creativity of the expatriate. Birth of their writing selves and existential questioning around issues of national and individual identities. Readings: Gertrude Stein, Hemingway, Fitzgerald, Anaïs Nin, and Baldwin. In English. GER:DB-Hum
3-4 units, Win (Alduy, C)

FRENGEN 122. Literature as Performance—(Same as COMPLIT 122.) Theater as performance and as literature. The historical tension between performance and sexuality in the Western tradition since Greek antiquity. Non-European forms and conventions of performance and theatricality. The modern competition between theater and other forms of performance and media such as sports, film, and television. Sources include: classical Japanese theater; ancient Greek tragedy and comedy; medieval theater in interaction with Christian rituals and its countercultural horizons; the classical age of European theater including Shakespeare, Lope de Vega, and Molière. GER:DB-Hum
5 units, Win (Gumbrecht, H)

FRENGEN 162. The Time and Space of the Historical Avant Garde—(Same as ITALGEN 162.) Avant garde strategies of representation. How avant garde artists reproduced the experience of modern life in works of various media. Focus is on manifestos, prose and poetry, performances, films, and collages. Readings by Apollinaire, Tzara, Breton, Cendrars, Ball, Fondane, Urmuz, Arp, Marinetti, De-Saint Point; films and audio performances by Marcel Janco, Jean Arp, and Hugo Ball.
3-5 units, Aut (Eram, C)

FRENGEN 163. Texts in History: Enlightenment to the Present—(Same as HUMNTIES 163.) Priority to students in the Humanities honors program and French majors. The relationship between intellectual, political, and cultural history, and literary creativity in the modern period. Texts include Voltaire, *Philosophical Letters;* Rousseau, *Second Discourse;* Kant, *What is Enlightenment?* and the *Critique of Judgment;* documents and speeches from the French Revolution; Hölderlin, *The Rhein;* Schlegel, *Dialogue on Poesy;* Balzac, *Père Goriot;* Dostoevsky, *Notes from the Underground;* Sorel, *Reflections on Violence;* T.S. Eliot, *The Waste Land;* Woolf, *Mrs. Dalloway;* Artaud, *Theater and its Double;* and Kane, *Ambiguous Adventure.* GER:DB-Hum
5 units, Spr (Edelstein, D)

FRENGEN 165. Comic and Erotic Literature of the French Renaissance—How 16th-century French writers use humor in their treatment of relationships between the sexes and in their social commentaries. Readings in English translation: François Rabelais, Marguerite de Navarre, and Giovanni Boccaccio. In English. No knowledge of French or Italian required. GER:DB-Hum
4 units, Aut (Sterritt, L)

FRENGEN 180Q. Aspects of Contemporary French Society through Film—Stanford Introductory Seminar. Preference to sophomores. Films depicting important events in French society since WW II, up to current problems of integration of minorities and changing familial, sexual, and political relations. Emphasis on autobiographical films in which historical events and a personal experience within them are recreated by the *metteur en scène* or the author of the script, such as Louis Malle's *Au revoir les enfants*. Films selected for filmic quality and documentary value. GER:DB-Hum
4 units, Spr (Bertrand, M)

FRENGEN 181. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

FRENGEN 192E. Images of Women in French Cinema: 1930-1990—The myth of the feminine idol in French films in historical and cultural context. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER:DB-Hum, EC-Gender

3-5 units, Spr (Apostolidès, J)

FRENGEN 203. Dare (Not) to Know: The Gamble of the French Enlightenment—Focus is on tensions and transformations in the history of the French Enlightenment. How did the social and intellectual projects of the philosophes coexist? Could the modest epistemology of the early Enlightenment resist the temptations of absolute knowledge? Readings from Bayle, Fontenelle, Montesquieu, Condillac, Voltaire, Rousseau, Diderot, Condorcet, Destutt de Tracy, and authors from SULAIR's new Super-Enlightenment database. GER:DB-Hum

3-5 units, Win (Edelstein, D)

FRENGEN 207. Existentialist Fiction: The Literature of Absurdity—(Same as ITALGEN 207.) 20th-century French and Italian novels dealing with the theme of absurdity, including: Pirandello's *The Late Mattia Pascal;* Sartre's *Nausea;* Beckett's *Molloy;* Duras's *The Sailor from Gibraltar;* and Calvino's *Mr Palomar.* GER:DB-Hum

4-5 units, Spr (Harrison, R)

FRENGEN 208. The French New Novel: Fiction and Film—50s and 60s French experimental fiction: how they do away with traditional plot, chronological narrative, and character to focus on objects and investigate the nature of physical and mental perception. Authors include Butor, Duras, Ricardou, Robbe-Grillet, Sarraute, and Simon. Cinematic versions such as *Last Year at Marienbad* and *Hiroshima Mon Amour*. GER:DB-Hum

3-5 units, Spr (Wittman, L)

FRENGEN 221. The History of the Book in Europe—(Same as ITALGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; modernism; and futurism. Course held in Stanford Libraries' Special Collections.

3-5 units, not given this year

FRENGEN 247E. Fictions of the Self—A tradition of pseudo-confidence which critiques, parodies, and offers a substitute for the traditional confessional narrative; works in which talking about oneself constitutes not an act of self-description but a feat of self-construction. Readings: Constant, Proust, Beckett, Pérec, Nabokov.

3-5 units, Aut (Landy, J)

FRENGEN 253E. French Social Thought from Durkheim to Bourdieu—The originality, importance, and relevance of distinctive features of French social thought: reflexive French human sciences where the focus is on the social conditions in which such sciences are possible; epistemological and ontological issues as opposed to empirical realities and the notions of collective representations, social hypocrisy, the collective unconscious, and collective self-deception; and the indispensable role of religious mental structures for the understanding of social cohesion. Readings of Bourdieu, Durkheim, Mauss, Lacan, Lévi-Strauss.

3-5 units, not given this year

FRENGEN 256E. Political Anthropology from Rousseau to Freud—A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. Creating a typology of the ways in which a given anthropology constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud.

3-5 units, alternate years, not given this year

FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Same as STS 211.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology.

3-5 units, alternate years, not given this year

FRENGEN 261. Framing the Aesthetic Experience, 1630-1780—Aesthetics as organization of cognition, experience, and feelings; the beholder framed as cognitive, sensitive subject and as member of an elite community defined culturally and politically. Topics include: the epistemology of confused perception and the poetics of incompleteness; the *je ne sais quoi* and the sublime; the dialectics of pleasure and pain; and taste and decadence. Works by Félibien, Bouhours, Dubos, Boileau, Fénelon, Marivaux, Montesquieu, Diderot, Leibniz, Burke, and Lessing.

3-5 units, Aut (Russo, E)

FRENGEN 263. Love Books of the Middle Ages—(Same as ITALGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, *History of His Calamities* and *Personal Letters;* Andreas Capellanus, *The Art of Courtly Love;* Christine de Pizan, *The Book of the Duke of True Lovers;* Dante, *Vita Nuova;* Chaucer, *Troilus and Criseyde;* Boccaccio, *The Decameron;* and Shakespeare, *Antony and Cleopatra*.

3-5 units, not given this year

FRENGEN 275. Writing Hate: Anti-Semitism and Aesthetics in Modern French Literature and Culture—From the 19th century until WW II. Why were anti-Semites so preoccupied with the beautiful? How does aesthetics structure ideology? Readings may include fiction by the Goncourt brothers, Maupassant, and Drieu la Rochelle; anti-Semitic tracts by Drumont and Céline; and theoretical and critical texts by Plato, Aristotle, Sartre, Kristeva, Lacoue-Labarthe, and Carroll. GER:DB-Hum

3-5 units, Spr (Bell, D)

FRENGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as ITALGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of symbolism and modernism. Readings include theories of decadence and examples of symbolist and modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, not given this year

FRENGEN 290E. The Modern Tradition II: Self-Deception in Literature, Film, and Philosophy—(Same as MTL 334B.) Possibilities of cross-fertilization between continental philosophy (such as Sartre) and analytic philosophy (such as Donald Davidson) by reference to the topic of self-deception or bad faith. Literary works by Molière, Benjamin Constant, Dostoevsky, Camus, Sartre, Borges, and contemporary writers; films by Hitchcock, Losey, and Bergman.

3-5 units, Win (Dupuy, J)

FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies—Differing approaches in the case of advanced technologies, focusing on the convergence of nanotechnology with biotechnology, information technology, and cognitive science. Relationship of these cases to the scientific, technological, industrial, economic, and military race. The necessity for cooperation in the establishment of ethical norms or standards at the international level.

3-5 units, Win (Dupuy, J)

FRENGEN 301E. New Methods and Sources in French and Italian Studies—(Same as ITALGEN 301E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Libraries' gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students' knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, Spr (Sussman, S)

FRENGEN 317. Crowds—(Same as COMPLIT 257C/357C, ITALGEN 317.) The place of human multitudes in the Western sociopolitical imagination from 1789 to the present. Theories of collectivity in works such as Tarde's *Laws of Imitation,* Le Bon's *Psychology of Crowds,* Freud's writings on mass psychology, and Canetti's *Crowds and Power.* Representations of crowds in literature, art, theater, and film. How modern mythologies are informed by premodern precedent and reflect upon the question of multitudes in postindustrial societies. Students write semantic histories and curate a virtual gallery.

3-5 units, Aut (Schnapp, J)

FRENGEN 325. Modern Seminar—(Same as HUMNTIES 325.) The postmodern condition as post-WW II rupture in Western tradition; moral, political, cultural, and aesthetical dimensions. Sources include literature, philosophy, essays, films, and painting. Authors and artists include : Primo Levi, Hannah Arendt, Alain Resnais, Samuel Beckett, Georges Bataille, Michel Foucault, Theodor Adorno, David Riesman, Georges Pérec, Juliet Mitchell, and Francis Bacon.

3-5 units, Win (Apostolidès, J)

FRENGEN 343. Guy Debord: His Life and His Work—(Same as DRAMA 343.) How Debord's intellectual and artistic productions can be connected to their concrete historical context; their contemporary pertinence. Increased academic visibility for his work and ideas.

5 units, Aut (Apostolidès, J)

FRENGEN 354. Racine—One of a series of seminars on the Western literary tradition to provide an updated image of an author's work using biography for historical context. Racine's drama and tragedy emphasizing 17th-century traditions and evolution of performance and the Alexandrin meter constitutive for tragedy in French classical drama. His engagement in other literary genres including as royal historiographer; contemporary intellectual positions and battles including Cartesian varieties of philosophy and the Jansenist attempt at a theological modernization in the Catholic Church.

3-5 units, Win (Gumbrecht, H)

FRENGEN 370. Anthropology of Speed—(Same as COMPLIT 370, ITALGEN 370.) Ideas about accelerated motion; its significance and effects on cultures, from prehistory to the present. Impact of transportation revolutions on beliefs regarding selfhood and society. The rise of forms of intelligence and human skill sets that interact with, resist, or enable such revolutions. Topics include: speed and divinity; the evolution of conventions and techniques for capturing accelerated movement; speed and accident; velocity and liminal states such as inspiration, transport, and intoxication; and cognitive implications of sped-up states and their impact on cultural norms.

3-5 units, Spr (Schnapp, J)

FRENGEN 395. Philosophical Reading Group—(Same as COMPLIT 359A, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Gumbrecht, H)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code FRENLIT.

UNDERGRADUATE

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France—Introduction to the Middle Ages and the Renaissance. The birth of a national literature and its evolution. Literature as addressing cultural, philosophical, and artistic issues which question assumptions on love, ethics, art, and the nature of the self. Readings: epics (*La Chanson de Roland*), medieval romances (*Tristan,* Chrétien de Troyes' *Yvain*), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne). Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

4 units, Win (Alduy, C)

FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France—The literature, culture, and politics of France from Louis XIV to Rousseau. How this period produced the political and philosophical foundations of modernity. Readings include Bodin, Hobbes, Racine, Lafayette, Locke, Voltaire, Diderot, Rousseau, and Beaumarchais. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

4 units, Aut (Apostolidès, J)

FRENLIT 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France—Major literary genres, and social and cultural contexts. Focus is on the emergence of new literary forms such as *surréalisme, nouveau roman,* and *nouveau théâtre*. Topics of colonization, decolonization, and feminism. Readings include Balzac, Baudelaire, Césaire, Colette, and Ionesco. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

4 units, Aut (Boyi, E)

FRENLIT 133. Literature and Society in Africa and the Caribbean—(Same as COMPLIT 141.) Major African and Caribbean writers. Issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean. Topics include colonization and change, quest for identity, tradition and modernity, and new roles and status for women. Readings in fiction and poetry. Authors include Laye Camara, Mariama Ba, and Joseph Zobel. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom, WIM

4 units, Spr (Boyi, E)

FRENLIT 175. Literature of Crisis: Contradiction and Community—How antithetical responses provoked by crisis demonstrate literature's capacity to produce and sustain apparently untenable contradictions; how this paradoxically may make literature a conciliatory force. Focus is on opposed responses to crises in modern France: an epistemological crisis (Balzac and Flaubert), a political crisis (Rostand and Jarry), a crisis of community (Proust and Céline), and a literary crisis (Sartre and Gracq). In French.

3-5 units, Win (Picherit, H)

FRENLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

FRENLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Spr (Staff)

FRENLIT 199. Individual Work—Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.

1-12 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

Note—The prerequisite for the following courses taught in French is one course from the 130 series or equivalent.

FRENLIT 204. Revolutions in Prose: The 19th-Century French Novel—How the French Revolution and its aftershocks were represented in novels; how this political imperative revolutionized literary form. Readings from Stendhal, Hugo, Balzac, Flaubert, Sand, and Zola. GER:DB-Hum
3-5 units, Aut (Edelstein, D)

FRENLIT 209. Colonial Ghosts: The French Novel in the Age of Imperialism—How colonial encounters and elisions haunt works from the margins of the text, shape literary discourses about modernity, and serve or disrupt the novel's totalizing aspirations. Focus is on depictions of N. Africa. Readings may include novels by Balzac, Gautier, Maupassant, Loti, Bertrand, and Camus; and theoretical and critical texts by Freud, Said, Jameson, Behdad, and Dobie. GER:DB-Hum
3-5 units, Win (Bell, D)

FRENLIT 219. The Renaissance Body—The body as locus for desire, pleasure, disease, mortality, sexuality, and gender; and as canon of beauty and reflection of cosmic harmony. How literature responded to the development of an anatomical gaze in arts and medicine; how it staged the aesthetic, religious, philosophical, and moral issues related to such a promotion or deconstruction of the body. Does literature aim at representing the body, or use it as signifier for intellectual, emotional, and political ideas? Readings from Rabelais, Scève, Ronsard, Labé, d'Aubigné, Montaigne, and medical texts.
3-5 units, Aut (Alduy, C)

FRENLIT 243. Nature in 20th-Century French Poetry—Changing views of the natural world, imagined as lost paradise, exotic escape, national landscape, source of spiritual insight, or fragile environment. Authors include Cadou, Valéry, Eluard, Reverdy, Saint-John Perse, Char, Césaire, Segalen, Bonnefoy, and Deguy. In French.
3-5 units, Win (Wittman, L)

FRENLIT 248. Literature, History, and Representation—(Same as COMPLIT 250.) Literary works as historical narratives; texts which envision ways of reconstructing or representing an ancient or immediate past through collective or individual narratives. Narration and narrator; relation between individual and collective history; historical events and how they have shaped the narratives; master narratives; and alternative histories. Reading include Glissant, Césaire, Dadié, Cixous, Pérec, Le Clézio, Mokkedem, Benjamin, de Certeau, and White.
3-5 units, Spr (Boyi, E)

FRENLIT 278. Rethinking Identities in the Era of Globalization—(Same as COMPLIT 246.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.
3-5 units, not given this year

FRENLIT 288. Exile Literature in French: Place, Self, and Writing in French Literature—While some French intellectuals were forced into exile, writers from all over the world have gathered in France to find refuge. Emigrés and immigrés, from and to France, often wrote their most poignant works from a place of emotional longing and geographical distance from their native land. Issues such as national identity, marginality, foreigners' alienation, and the narrative of space. Readings by Du Bellay, Voltaire, Chateaubriand, Hugo, Camus, Kundera, Nancy Huston, and Le Clezio.
3-5 units, Spr (Alduy, C)

FRENLIT 293A. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.
2 units, Spr (Serres, M)

FRENLIT 293B. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.
2 units, not given this year

FRENLIT 299. Individual Work—May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

FRENLIT 399. Individual Work—For students in French working on special projects or engaged in predissertation research.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

French majors are advised to consult the "Literatures, Cultures, and Languages" section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CASA 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau
5 units, Win (Voss, B)

COMPLIT 101. What is Literature?
5 units, Spr (Nightingale, A)

COMPLIT 154. Heidegger on Hölderlin—(Same as GERLIT 154.)
5 units, Aut (Gumbrecht, H)

DLCL 189. Honors Thesis Seminar
5 units, Aut (Surwillo, L)

ITALIAN SECTION

Note—Changes in course offerings are sometimes necessary after this bulletin has gone to print. Students are advised to consult the department bulletin board on a regular basis.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

ITALIAN LANGUAGE COURSES

The following courses in Italian language instruction represent a typical sequence for three years of Italian language study. Majors and prospective majors should consult the requirements for a B.A. in Italian above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Casa Italiana, see the "Language Center" section of this bulletin.

ITALLANG 1,2,3. First-Year Italian
5 units, Aut, Win, Spr (Baldocchi, M; Cellinese, A; Coggeshall, B; Devine, M; McCarty, A; Tempesta G, Staff)

ITALLANG 21,22,23. Second Year Italian
3-4 units, **21:** *Aut (Baldocchi, M),* **22:** *Win (Cellinese, A),* **23:** *Spr (Gelmetti, S)*

ITALLANG 113. Italian Cultural Studies
3-4 units, Aut (Gelmetti, S)

ITALLANG 114. Advanced Stylistics and Composition
3-4 units, Win (Baldocchi, M)

ITALLANG 115. Academic and Creative Writing
3-4 units, Spr (Baldocchi, M)

GENERAL (IN ENGLISH)

These courses, with the subject code ITALGEN, do not require knowledge of Italian and are open to all students.

ITALGEN 30N. Fascism and Culture—(Same as COMPLIT 30N.) Stanford Introductory Seminar. Preference to freshmen. Intellectual and political roots of fascism, its critique of liberal democracy and communism, and legacies. Themes include: fascism versus nazism; collectivism versus individualism; radical right attitudes towards technology and industrialization; and comparisons between mid-20th-century fascisms and subcultures of the new right including Le Pen's Front National and what has been called Islamofascism. Readings from fascist thinkers and theorists; case studies of artists, writers, architechts, and filmmakers who embraced fascism including Ezra Pound, Leni Riefenstahl, F.T. Marinetti, and Mario Sironi. GER:DB-Hum

4 units, Aut (Schnapp, J)

ITALGEN 144. Masters of the Italian Cinema—The aesthetics and cultural politics of the most famous Italian directors, from the neorealist movement to contemporary works. Historical and political contexts; stylistic analysis. Comedy in Italian film. Directors include Ross, Fellini, De Sica, Antonioni, Bertolucci, Pasolini, and Wertmüller.

3-5 units, Aut (Nathan, V)

ITALGEN 162. The Time and Space of the Historical Avant Garde—(Same as FRENGEN 162.) Avant garde strategies of representation. How avant garde artists reproduced the experience of modern life in works of various media. Focus is on manifestos, prose and poetry, performances, films, and collages. Readings by Apollinaire, Tzara, Breton, Cendrars, Ball, Fondane, Urmuz, Arp, Marinetti, De-Saint Point; films and audio performances by Marcel Janco, Jean Arp, and Hugo Ball.

3-5 units, Aut (Eram, C)

ITALGEN 166E. Women's Voices in Contemporary Italian Literature—The canon of Italian literature consists almost exclusively of male authors, yet Italian women writers have been active since the time of Dante. Women's prose fiction of the last 100 years. Issues include: sexual violence in female autobiographies; the experience of motherhood; conflict between maternal love and self-determination; and paths to political awareness. Authors include Sibilla Aleramo, Dacia Maraini, Anna Banti, Francesca Duranti, Fabrizia Ramondino. Eight novels in English translation; students encouraged to read excerpts in Italian. GER:DB-Hum, EC-Gender

4 units, Spr (Springer, C)

ITALGEN 181. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

ITALGEN 207. Existentialist Fiction: The Literature of Absurdity—(Same as FRENGEN 207.) 20th-century French and Italian novels dealing with the theme of absurdity, including: Pirandello's *The Late Mattia Pascal;* Sartre's *Nausea;* Beckett's *Molloy;* Duras's *The Sailor from Gibraltar;* and Calvino's *Mr Palomar.* GER:DB-Hum

4-5 units, Spr (Harrison, R)

ITALGEN 221. The History of the Book in Europe—(Same as FRENGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; modernism; and futurism. Course held in Stanford Libraries' Special Collections.

3-5 units, not given this year

ITALGEN 230. Italian Renaissance Epic: Ariosto—For graduate students and advanced undergraduates. Ariosto's epic poem *Orlando furioso* in the context of the social and political world of Renaissance Italy. Topics include: its relationship to precursor texts and traditions (classical, Arthurian, Carolingian); Ferrarese court culture and the politics of dynastic epic; its relationship to early modern ideologies of gender. Taught in English but requires advanced reading knowledge of Italian.

4-5 units, Spr (Springer, C)

ITALGEN 236E. *Purgatorio/Paradiso*—Reading the second and third canticles of Dante's *Divine Comedy*. Prerequisite: students must have read Dante's *Inferno* in a course or on their own. Recommended: reading knowledge of Italian. GER:DB-Hum

4-5 units, Win (Harrison, R; Jacoff, R)

ITALGEN 263. Love Books of the Middle Ages—(Same as FRENGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, *History of His Calamities* and *Personal Letters;* Andreas Capellanus, *The Art of Courtly Love;* Christine de Pizan, *The Book of the Duke of True Lovers;* Dante, *Vita Nuova;* Chaucer, *Troilus and Criseyde;* Boccaccio, *The Decameron;* and Shakespeare, *Antony and Cleopatra.*

3-5 units, not given this year

ITALGEN 281. Novels into Film—20th-century Italian novels and their film adaptations. Texts include *The Leopard* (Tomasi di Lampedusa/De Sica), *The Garden of the Finzi-Continis* (Bassani, De Sica), *The Conformist* (Moravia/Bertolucci), *Christ Stopped at Eboli* (Levi/Rosi), *Padre/Padrone* (Ledda/Taviani).

4 units, Win (Springer, C)

ITALGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as FRENGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of symbolism and modernism. Readings include theories of decadence and examples of symbolist and modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, not given this year

ITALGEN 301E. New Methods and Sources in French and Italian Studies—(Same as FRENGEN 301E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library's gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students' knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, Spr (Sussman, S)

ITALGEN 317. Crowds—(Same as COMPLIT 257C/357C, FRENGEN 317.) The place of human multitudes in the Western sociopolitical imagination from 1789 and the present. Theories of collectivity in works such as Tarde's *Laws of Imitation,* Le Bon's *Psychology of Crowds,* Freud's writings on mass psychology, and Canetti's *Crowds and Power.* Representations of crowds in literature, art, theater, and film. How modern mythologies are informed by premodern precedent and reflect upon the question of multitudes in postindustrial societies. Students write semantic histories and curate a virtual gallery.

3-5 units, Aut (Schnapp, J)

ITALGEN 353E. F. T. Marinetti and Futurism—(Same as COMPLIT 335.) Futurist artistic and literary theory and practice from its foundation by Marinetti through its avatars around the world. Focus is on readings from Marinetti; attention to writers and visual artists including Apollinaire, Mayakovsky, and Léger. Topics include: machines and culture; the futurist theater of surprise; poetry and performance; visual poetics and war; futurism's ties to bolshevism and fascism; and aeropainting and aeropoetry.

4 units, Spr (Schnapp, J)

ITALGEN 370. Anthropology of Speed—(Same as COMPLIT 370, FRENGEN 370.) Ideas about accelerated motion; its significance and effects on cultures, from prehistory to the present. Impact of transportation revolutions on beliefs regarding selfhood and society. The rise of forms of intelligence and human skill sets that interact with, resist, or enable such revolutions. Topics include: speed and divinity; the evolution of conventions and techniques for capturing accelerated movement; speed and accident; velocity and liminal states such as inspiration, transport, and intoxication; and cognitive implications of sped-up states and their impact on cultural norms.

3-5 units, Spr (Schnapp, J)

ITALGEN 395. Philosophical Reading Group—(Same as COMPLIT 359A, FRENGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Gumbrecht, H)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code ITALLIT.

UNDERGRADUATE

ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca—The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante's *Vita Nuova,* and Petrarca's *Canzoniere;* prose such as stories from Boccaccio's *Decameron*. GER:DB-Hum, WIM

4 units, Aut (Wittman, L)

ITALLIT 128. The Italian Renaissance and the Path to Modernity—The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Prerequisite: 21 or equivalent. GER:DB-Hum, WIM

4 units, Win (Springer, C)

ITALLIT 129. Modern Italian History and Literature—The history of the Italian nation and national literary identity in the 19th and 20th centuries. The relationship between literary texts and their historical context from the Risorgimento to the Resistance. Focus is on the romantic lyric, futurism, fascism, and the changing status of women. Authors include Foscolo, Leopardi, D'Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: 21 or equivalent. GER:DB-Hum, WIM

4 units, Spr (Alberti, G)

ITALLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

ITALLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Spr (Staff)

ITALLIT 199. Individual Work

1-12 units, Aut, Win, Spr (Staff)

ADVANCED LITERATURE

ITALLIT 249. Love and Death in the *Decameron*—The Black Death as the greatest natural disaster in European history, killing more than a quarter of Europe's population in four years. How the plague occasioned one of the masterpieces of western literature, Boccaccio's *Decameron,* which explores a parallel universe ruled not by death, but by love, a physical, sensual force that subverted the idealized conventions of medieval courtly love.

4 units, not given this year

ITALLIT 285. Identity in Modern Italian Fiction—The quest for a modern identity in the 20th-century Italian novel. The construction of subjectivity as it relates to changes brought about by modernity in Italy, such as mass culture, nationalism, industrialization, feminism, war, secularization, migration, and ethnic diversity. Fiction by Svevo, Pirandello, Calvino, Banti, and Tabucchi. In Italian.

3-5 units, Aut (Wittman, L)

ITALLIT 299. Individual Work

1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

ITALLIT 399. Individual Work—For graduate students working on a special project or predissertation research. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

Italian majors are advised to consult the "Division of Literature, Culture, and Languages" section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ARTHIST 412. Problems in Italian Mannerism

5 units, Aut (Staff)

DLCL 189. Honors Thesis Seminar

5 units, Aut (Surwillo, L)

ENGLISH 185. Opera as Cultural History

5 units, Aut (Wyatt, M)

FILMSTUD 130/330. Italian Cinema: Neorealism and Beyond

4 units, Win (Levi, P)

OVERSEAS STUDIES

Courses approved for the French or Italian major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

OSPFLOR 15. Is the Hero Serious or Facetious? Romances of Chivalry in Sixteenth-Century Europe

5 units, Aut (Sberlati, F)

PARIS

OSPPARIS 25. Literature and the City

4 units, Win (Rullier, F)

OSPPARIS 186F. Contemporary African Literature in French

4 units, Aut (Rullier, F)

GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson,* Gerald Gillespie, Walter F. W. Lohnes, Katharina Mommsen, Kurt Müller-Vollmer*
Chair: Theodore M. Andersson
Director of Graduate Studies: Theodore M. Andersson
Director of Undergraduate Studies: Theodore M. Andersson
Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel (on leave, Autumn, Spring), Orrin W. Robinson III
Assistant Professors: Márton Dornbach, Charitini Douvaldzi
Senior Lecturers: William E. Petig (on leave, Spring), Kathryn Strachota (on leave, Winter)
Lecturers: Renate F. Cammin, Sarah Pourciau (Humanities Fellow), Shafiq Shamel
Visiting Professor: Karl Heinz Bohrer (Spring)
Visiting Assistant Professor: Sylke Tempel (Autumn)
Affiliated Academic Staff: Henry Lowood (Curator, Germanic Collections)

Web Site: http://germanstudies.stanford.edu

Courses given in German Studies have the subject code GERGEN and GERLIT. For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin. For a complete list of subject codes, see Appendix.

The department's goal is to provide students with the linguistic and analytic facility to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the contours of the present and past can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and intellectual histories of the German-language traditions. Whether interested in German literature, or the influence of German thought on other fields in the humanities, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are coterminal programs for the B.A. and M.A. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library. Extensive use is made of the language lab as well as the department's own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 130-139 level (introductory surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1, 2, 3, the total requirement for the B.A. is a minimum of 60 units of work; the German and Philosophy option requires 65 units. With the approval of the Director of Undergraduate Studies, appropriate courses offered by other departments can be accepted toward this total, up to a maximum of 25 units.

Internships—Internships in Germany are arranged through the Overseas Studies program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the "English" section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By carefully selecting courses in such disciplines as history, international relations, or economics, students can prepare themselves exceptionally well in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma.

The German and Philosophy major option requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a) three courses at the 130 level
   b) a WIM course
2. GERGEN 181/PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
3. Requirements in Philosophy:
   a) PHIL 80. Prerequisite: introductory philosophy class
   b) a course in the PHIL 180 series
   c) a course in the PHIL 170 series
   d) two courses in the history of philosophy numbered above 100

4. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include the GERLIT 241-243 series, *Deutsche Geistesgeschichte*, and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and undergraduate adviser of the program in philosophical and literary thought.
5. *Capstone:* this year's capstone seminars are COMPLIT 154/GERLIT 154, Heidegger on Hölderlin, and PHIL 173A, Aesthetics: Metaphor across the Arts. One of these courses must be taken in the student's senior year.
6. Units devoted to meeting the department's language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

MINORS

The department offers two minor options.

German Language and Culture—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

German Cultural Studies—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level.

MINOR IN LITERATURE AND MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers undergraduate minor programs in Literature and in Modern Languages. Both of these minors draw on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about the minors and their requirements.

HONORS

Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department and opportunities to start research projects are offered at the Stanford in Berlin Center. In addition to the requirements listed above, the student must submit a proposal for the honors essay to the German faculty by the end of Spring Quarter of the junior year. During this quarter, students may enroll for 2 units of credit in GERLIT 189B for the drafting or revision of the thesis proposal. In Autumn Quarter of the senior year, the student must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in GERLIT 189A while composing the thesis during Winter Quarter. Students who did not enroll in 189B in the junior year may enroll in GERLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis supervisor. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

STANFORD IN BERLIN

Undergraduates interested in Germany are encouraged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the "Undergraduate Degrees" section of this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

MASTER OF ARTS

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY

The requirements for the Ph.D. include:

1. A minimum of 36 graduate units during the first year of graduate study, 45 units for the completion of the M.A., and a minimum of 9 units per quarter during the six quarters following the first year. A total of 135 units is required for the Ph.D.; doctoral candidates are advised to complete at least one course with each member of the department.
2. A reading knowledge of one language other than English and German, normally French. Students in Medieval Studies must also have a reading knowledge of Latin.
3. A master's oral examination, unless the student has an M.A. upon entering the program
4. A qualifying paper
5. A qualifying examination
6. The University oral examination
7. A dissertation

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, students, except those admitted with a master's degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members, two of whom are regular faculty in the department, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate's ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student's faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master's degree from another institution must submit, in lieu of a qualifying paper, a master's thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student's chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure will the department approve the student's admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; APPLLING 201, The Learning and Teaching of Second Languages is required. The teaching requirement is five quarters during the second and third years of study. The fifth and final quarter of teaching may be postponed until the student has worked extensively on the dissertation and may be devoted to a literary topic related to the dissertation. Such courses are subject to departmental review procedures.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

GERMAN LANGUAGE COURSES

The following courses in German language instruction represent a typical sequence for three years of German language study. Majors and prospective majors should consult the requirements for a B.A. in German Studies above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the "Language Center" section of this bulletin.

GERLANG 1,2,3. First-Year German
5 units, Aut, Win, Spr (Strachota, K; Nissler, P; Staff)

GERLANG 21,22. Intermediate German
4 units, **21:***Aut,* **22:** *Win (Petig, W)*

GERLANG 100. *Hundert Deutsche Jahre:* One Hundred German Years
3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study
3-4 units, **101:** *Aut (Urlaub, P),* **102:** *Spr (Engel, A)*

GERLANG 110. German Newspapers
3-4 units, Aut (Strachota, K)

GERLANG 111. Television News from Germany
3-4 units, Win (Urlaub, P)

GENERAL (IN ENGLISH)

These courses, with the subject code GERGEN, do not require knowledge of German and are open to all students.

UNDERGRADUATE

GERGEN 50N. Charlemagne's Germany—Stanford Introductory Seminar. Preference to freshmen. The Carolingian Renaissance. The imprint of Charlemagne on the development of Europe. Who he was, what he accomplished, and how a myth grew up around him. Did he attempt to recreate the Roman Empire? His influence over political design and many branches of modern learning. GER:DB-Hum
3-4 units, Aut (Andersson, T)

GERGEN 104N. Resistance Writings in Nazi Germany—Stanford Introductory Seminar. Preference to sophomores. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer's letters and his *Ethics*, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum
3 units, Aut (Bernhardt, E)

ADVANCED UNDERGRADUATE AND GRADUATE

GERGEN 181. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical

significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Win (Anderson, L; Landy, J)

GERGEN 183/283. Scenarios of Dissolution in the Modern Novel—How do novels capture chaos? 20th-century novels responding to catastrophes such as: the disintegration of the Austro-Hungarian monarchy (Musil, Roth); demise of the Third Reich (Mann); chaotic forces in an oppressive order (Bulgakov); corrosion of imperial confidence through fear of barbarian invaders (Coetzee); and transformation of masses into a mob destroying the body politic from within (Krasznahorkai). GER:DB-Hum
4 units, Spr (Dornbach, M)

GERGEN 205/305. Technologies of the Self—Important moments in the history of the discursive and rhetorical construction of the subject. Emphasis is on tensions between uniqueness and exemplariness, chronology and repetition, narrative and archive, and aesthetics and ethics of retrospection. Works by Augustine, Teresa of Avila, Montaigne, Rousseau, Goethe, Nietzsche, Joyce, Gide, Sartre, Leiris, and Barthes. Theoretical and critical essays including by Lejeune, Starobinski, De Man, Derrida, Marin, Koerner, Foucault, and Beaujour. GER:DB-Hum
3-5 units, Win (Douvaldzi, C)

GERGEN 267/367. Freud and the Apostle Paul—Intersections between Freud's psychoanalysis of society and Paul's political theology. Emphasis is on the issues of law, love, justice, community, and language. Readings include Freud and Paul, and theoretical essays by Taubes, Badiou, Santner, Agamben, Assmann, Zizek, and Boyarin. GER:DB-Hum
3-5 units, Win (Douvaldzi, C)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code GERLIT.

UNDERGRADUATE

At this level, students have several options depending on their interests. After completing GERLANG 3 or the equivalent, students may register for courses at the GERLIT 120-level, which consider special topics in German culture while advancing language learning. Alternatively, GERLANG 21, 22, and 101 emphasize a systematic review of the language, while GERLANG 21W, 22W, and 105 study the language of business and international relations. GERLANG 100, 110, and 111 develop German language skills in the context of media such as film, television, and newspapers. Language instruction courses with the subject code GERLANG are listed in the "Language Center" section of this bulletin.

GERLIT 123N. The Brothers Grimm and Their Fairy Tales—Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the *Kinder-* and *Hausmärchen* of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM
4 units, Spr (Robinson, O)

GERLIT 124. Wotan's Demise: Concepts of Nature in German Culture—Wagner's Ring as a parable for a dichotomy that has characterized the cultural discourse in Germany from the onset of modernity: nature as organic expression of culture versus an alienated, destructive mechanization of the Earth. Historical and contemporary contexts. Sources include literary, secondary, cinematic, and musical materials. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum
4 units, Aut (Tempel, S)

GERLIT 127. The German Thriller—Intermediate readings with discussion and writing practice in German. Sources include Müllner's *Der Kaliber*, and Dürrenmatt's *Der Richter und sein Henker* and *Der Verdacht.* In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum , WIM
4 units, Win (Andersson, T)

GERLIT 128. Goethe: Poetic Vision in the Age of Reason—Goethe's novels, dramas, and poetry as a contribution to modernity and in relation to principles of the European Enlightenment. His notion of *Weltliteratur* (world literature) against the background of romanticism. Readings include poems, *Die Leiden des jungen Werthers, Faust*, poems from the *West-östlicher Divan*, and the novella. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum
4 units, Aut (Shamel, M)

GERLIT 130. Holocaust Memory in the Literary Imagination of Germany and Austria—How literary texts shaped the early memory of the Holocaust in the lands of the perpetrators. Narrative and dramatic strategies of authors in East Germany (Bruno Apitz, Jurek Becker), West Germany (Peter Weiss, Rolf Hochhuth), and Austria (Ilse Aichinger, Christoph Ransmayr) who resisted the official discourse on the Holocaust and contributed to shaping its memory today. Readings in German. Prerequisite: GERLANG 3 or equivalent.
4 units, Spr (Cammin, R)

GERLIT 132. Insights and Outlooks: Confronting the Nazi Past through Literature—Writers such as: autobiographical W. German authors during the 50s, including Heinrich Böll and Günther Grass; the search for the better Germany in antifascist E. Germany, including Franz Fühmann and Christa Wolff; confronting fathers during the student revolution, including Peter Schneider; Jewish identity in the land of the perpetrators, including Peter Weiss and Maxim Biller; and seeking a new Germanness, including Malin Schwedtfeger and Judith Hermann. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM
4 units, Aut (Tempel, S)

GERLIT 133Q. Modernism and Fiction—Stanford Introductory Seminar. Preference to sophomores. Innovative ideas and narrative forms in German modernism. International and specifically German features. Problems of narration. Texts such as Musil's *Törless*, Mann's *Tod in Venedig,* Kafka's *Die Verwandlung,* and Broch's *Pasenow*. Close reading technique. Prerequisite: reading knowledge of German. GER:DB-Hum
4 units, Spr (Berman, R)

GERLIT 136. Twentieth-Century German Short Fiction—Cultural and historic contexts. Writers include Borchert, Böll, Lenz, Brecht, Frisch, and Bachmann. Primarily in German. Prerequisite: GERLANG 3 or equivalent.
4 units, Win (Urlaub, P)

GERLIT 148/248. Heart to Heart: Theories of Expression at the Turns of Two Centuries—Paradigms of expression around 1800 and 1900, from *Empfindsamkeit* (sensibility) to German expressionism. The heart that overflows into speech in the works of Klopstock, Goethe, Tieck, and Kleist, and the reformulation a century later of this idea as avant garde practice and modernist credo. Readings of poets, philosophers, and artists on relationships between inside and out, heart and voice, emotion and language, and self and art. Discussion in English. GER:DB-Hum
3-5 units, Aut (Pourciau, S)

GERLIT 151/251. German Underworlds—German theories about what lies beneath: is it hell or the subterranean foundations that keep the world from collapsing? Cosmic architecture and the question of the inferno in Kant, Novalis, Wagner, Marx, Freud, Kafka, and the films of Fritz Lang. GER:DB-Hum
3-5 units, Win (Pourciau, S)

GERLIT 154. Heidegger on Hölderlin—(Same as COMPLIT 154.) The encounter of Friedrich Hölderlin, a poet with philosophical passions in the first half of the 19th century, and Martin Heidegger, a philosopher who wrote poetically in the 20th century. What Hölderlin's poems and Heidegger's philosophy reveal about the essence and potential of lyrical texts: how neither attributes representational function to poetic texts, but sees them as existential and historical sites in which events can take place. In English; texts also available in German. GER:DB-Hum
5 units, Aut (Gumbrecht, H)

GERLIT 158/258. German Dialects—Linguistic characteristics of dialect areas. History of the study of language variation in Germany; traditional dialect grammars; dialect-geographical revolution; and insights of modern sociolinguistics. Sources include native speakers, professionally-made tapes with transcripts, and secondary readings. GER:DB-Hum
3-4 units, Win (Robinson, O)

GERLIT 163/263. Readings in 19th-Century German Literature—Works by Goethe, Tieck, Kleist, Hoffmann, Heine, Büchner, Grillparzer, Droste-Hülshoff, Stifter, and Keller. Their divergent responses to artistic, ethical, and political challenges of modernity. Prerequisite: GERLANG 3 or equivalent. In German. GER:DB-Hum
4 units, Aut (Dornbach, M)

GERLIT 189A. Honors Research—Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.
5 units, Win (Staff)

GERLIT 189B. Honors Research—Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.
2 units, Spr (Staff)

GERLIT 195/295. The Culture of Reason and its Discontents: Introduction to Modern German Intellectual History—Characteristics of modernity such as rational self-legislation, growing separation of spheres of life, and liberating and disorienting loss of traditional frameworks of meaning. Texts include Kant, Schiller, Marx, Nietzsche, Weber, Adorno, and Horkheimer. Discussion and written work in English. Students may read texts in translation; assistance provided to those reading in German. GER:DB-Hum
4 units, Spr (Dornbach, M)

GERLIT 199. Independent Reading—36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

GERLIT 206/306. Narrative, Visuality, Memory—Moments in the history of the relationship between verbal and visual: the classical ars memoriae; the ekphrasis debates of the 18th century; and the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winkelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, and Proust. GER:DB-Hum
3-5 units, Spr (Douvaldzi, C)

GERLIT 226. Heinrich Heine: The Poet, Critic, and Thinker—For graduate students and advanced undergraduates. Heine's major writings against their 19th-century background and within the context of modern German and European literary history.
3-5 units, Win (Müller-Vollmer, K)

GERLIT 256. Old High German—Introduction to the grammar and the texts of the earliest attested stage of high German.
3-4 units, Win (Robinson, O)

GERLIT 285/385. Thomas Mann—(Same as COMPLIT 214/314.) Key work, including short fiction, major novels, and essays. Mann's relation to naturalism and modernism, the conservative revolution and democracy; his American exile. Engagement with myth and the reception of romanticism, Wagner, and Nietzsche. Music in literature. Mann and Adorno. Readings in German include *Death in Venice, The Magic Mountain,* and *Doctor Faustus*. GER:DB-Hum
3-5 units, Win (Berman, R)

GERLIT 298. Individual Work—Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 299. Present Pasts: History, Fiction, Temporality—(Same as COMPLIT 321.) Relationship among history, memory, and literature in contemporary novels that engage with recent history. Theories of this relationship, including the proposition that Western culture in the second half of the 20th century is characterized by a crisis of temporality and an aversion to or dissatisfaction with traditional conceptions of the past. Readings include: Toni Morrison, J.M. Coetzee, Amos Oz, Orhan Pamuk, and Haruki Murakami; and theoretical works including Adorno, Heidegger, Benjamin, Jameson, Elias, and Huyssen.
5 units, Win (Eshel, A; White, H)

GRADUATE

GERLIT 320. German Romanticism—(Same as COMPLIT 334.) Prose, lyrics, and aesthetic theory of the earlier Jena Romantics and late Romanticism. Why literary Romanticism was later understood as a revolutionary step toward modernity. Readings include *Tieck*, Novalis' *Hymnen an die Nacht*, Schlegel's *Rede über die Mythologie*, Brentano, Eichendorff, and Hoffmann.
3-4 units, Spr (Bohrer, K)

GERLIT 325. Decadence and Vitalism—(Same as COMPLIT 352.) A major motif in European literature from 1890 to 1920, the interdependence of the topics and their ideological and political implications. Readings in Nietzsche, Wilde, H.v.Hofmannsthal, Mann, Chekhov, D'Annunzio, Jünger, Marinetti, D.H. Lawrence, and Musil.
3-4 units, Spr (Bohrer, K)

GERLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as COMPLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.
5 units, Aut (Berman, R)

GERLIT 399. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 400. Dissertation Research—For graduate students in German working on dissertations only.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

German majors are advised to consult the "Literatures, Cultures, and Languages" section of this bulletin for additional offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

DLCL 189. Honors Thesis Seminar
5 units, Aut (Surwillo, L)

ENGLISH 140A. Creative Resistance and the Holocaust
5 units, Win (Felstiner, J)

ENGLISH 304H. Romantic Poetry and Poetics
5 units, Spr (Gigante, D)

MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's *Lord of the Rings*
3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart
3 units, Win (Berger, K)

PHIL 103. 19th-Century Philosophy
4 units, Spr (Staff)

PHIL 125/225. Kant's First *Critique*
4 units, Aut (Anderson, L)

PHIL 127B. Kant's Anthropology and Philosophy of History—(Same as PHIL 227B.)
4 units, Spr (Wood, A)

PHIL 130/230. Hegel's *Elements of Philosophy of Right*
4 units, Aut (Wood, A)

PHIL 135/235. Existentialism
4 units, Spr (Anderson, L)

OVERSEAS STUDIES

These courses are approved for the German major and taught at the campus indicated. Course descriptions can be found in the "Overseas Studies" section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN

OSPBER 11. The Vanishing City: Lost Architecture and the Art of Commemoration in Berlin
4-5 units, Spr (Ebeling, K)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective
5 units, Spr (Junghanns, W)

OSPBER 101A. Contemporary Theater
5 units, Spr (Kramer, K)

HISTORY

Emeriti: (Professors) Carl N. Degler, Peter Duus, Terence Emmons, George M. Fredrickson, Harold L. Kahn, George H. Knoles, Richard W. Lyman, Mark Mancall, Peter Paret, Paul A. Robinson, Paul Seaver, James J. Sheehan, Rixford K. Snyder, Peter Stansky, David B. Tyack, Lyman P. Van Slyke; (*Senior Lecturer*) Joseph J. Corn
Chair: Aron Rodrigue
Professors: Keith M. Baker, Joel Beinin, Barton J. Bernstein, Philippe Buc, Albert Camarillo, Clayborne Carson, Gordon Chang, Paula Findlen, Estelle Freedman, Stephen Haber, Tamar Herzog, David Holloway, David M. Kennedy, Nancy S. Kollmann, Mark E. Lewis, Carolyn Lougee Chappell, Ian Morris, Norman M. Naimark, Robert Proctor, Jack N. Rakove, Richard L. Roberts, Aron Rodrigue, Richard P. Saller, Londa Schiebinger, Richard White, Steven J. Zipperstein
Associate Professors: David R. Como, Jessica Riskin, Matthew H. Sommer, Amir Weiner, Kären E. Wigen
Assistant Professors: Robert Crews, James P. Daughton, Zephyr Frank, Sean Hanretta, Aishwary Kumar, Kathryn Miller, Yumi Moon, Thomas S. Mullaney, Priya Satia, Laura Stokes, Jun Uchida, Caroline Winterer
Professor (Teaching): Herbert Klein
Courtesy Professors: Giovanna Ceserani, Lawrence Friedman, Avner Greif, Amalia Kessler, Larry Kramer, Joseph Manning, Reviel Netz, Walter Scheidel, Joy Williamson, Sam Wineburg, Gavin Wright
Senior Lecturers: Katherine Jolluck, Martin W. Lewis
Acting Assistant Professor: Jovana Knezevic

Department Office: Building 200, Room 113
Mail Code: 94305-2024
Phone: (650) 723-2651
Web Site: http://history.stanford.edu/

Courses given in History have the subject code HISTORY. For a complete list of subject codes, see Appendix.

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, and education.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of History offers several tracks to the B.A. in History. These tracks are not declared on Axess.

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The two tracks with interdisciplinary emphasis (Literature and the Arts, and History of Science and Medicine) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History. Two new tracks with interdisciplinary emphasis are being introduced this year: History and Law, and Public History/Public Service.

All History majors require the following:

1. Completion of a minimum of 58 units and at least 12 courses of at least 3 units each, to include:
   a) one Sources and Methods seminar
   b) two 200-level undergraduate colloquia
   c) at least one other small group course, to be chosen among the department's undergraduate colloquia, research seminars, or Stanford Introductory Seminars.

2. Courses comprising the 58 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
3. At least six courses must be taken from regular faculty members of the Department of History.
4. History's Writing in the Major requirement is satisfied by completing one of the following: a WIM-option colloquium or seminar; an Honors thesis in History; or a 15-page research paper in History written under faculty direction (HISTORY 299W). Work on the research paper must begin no later than Winter Quarter of the senior year (at least two quarters prior to graduation).
5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare a major by the Autumn Quarter of the third year of study (earlier, if possible).

One Directed Writing (299W) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the twelve courses required for the B.A. in History. A maximum of five transfer courses may be applied toward the major. Advanced placement credits do not fulfill any major requirements.

Completion of the major requires planning. In Spring Quarter of the junior year, following consultation with faculty advisers, History majors are required to complete a departmental Degree Progress Review and submit it to the History office.

The department also encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

For information on specific History courses' satisfaction of major requirements, refer to the Department of History course information web site at http://history.stanford.edu/Courses/.

THE GENERAL HISTORY TRACK

In pursuing the above requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. *Breadth*: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period may also count for Fields I-III.
2. *Concentration*: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: Africa, Asia, Eastern Europe and Russia, Europe before 1700, Europe since 1700, Jewish history, Latin America, science and technology, the United States, the Middle East, international history, comparative empires and cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department's undergraduate studies committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities (IHUM) courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY TRACKS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These tracks are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their twelve courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary track. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for the appropriate historical methods courses.

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track. Introduction to the Humanities courses taught by History faculty may apply to HMIEs only insofar as their content is specifically appropriate to the particular methodological or geographic cluster. Courses preapproved for the clusters in interdisciplinary tracks are listed on the History advising web site.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—HISTORY 239E, History, Literature, and Arts in Great Britain (Autumn Quarter), gives students a broad introduction to the study of literary texts in history.

Methodological Cluster—This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the pre-approved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student's geographic concentration.

Geographic Cluster—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

General Requirements—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

HISTORY, SCIENCE, AND MEDICINE

The History, Science, and Medicine (HS&M) track is a collaborative program of the Department of History, the Program in the History and Philosophy of Science, and the Stanford School of Medicine. The major is designed for: (1) students who wish to complement their work in science and/or premedical study with a History track that focuses on science and medicine; (2) students in the humanities and social sciences whose interest in science and medicine is primarily historical and contextual. This major allows students who are contemplating medical school to study the history of medicine and the medical humanities while fulfilling the premedical curriculum.

Gateway Course (1 course)—Students fulfill this requirement by taking the gateway course for HS&M that is offered annually: HISTORY 232F, The Scientific Revolution (Winter Quarter).

Methodological Cluster (3 courses)—These History courses focus on the history of science, technology, and medicine. Courses must be approved by the student's adviser. The choice of courses depends on the student's particular interests (for example, premodern science, medical history and literature, history of technology, medical anthropology).

Geographic Cluster (4 courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (4 courses)—These courses are taken outside the Department of History. The cluster can be defined in any of four ways:

1. two medical humanities courses plus two complementary science courses
2. two courses about science, such the anthropology, sociology, or philosophy of science) plus two complementary science courses
3. four courses in medical humanities
4. two courses in medical humanities and two about science.

In all instances, the Interdisciplinary Cluster must be approved in advance by the student's adviser.

Medical Humanities Course in the Medical School—Majors in the Medical Humanities field of the track in History, Science, and Medicine are expected to take at least one course in the School of Medicine.

General Requirements—Among history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

HISTORY AND LAW

The History and Law (HL) interdisciplinary track is for students who wish to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least three History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies.

Core Courses (3 courses)—Students enroll in at least three History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. These courses include, but are not limited to, the following: HISTORY 57, The Constitution: A Short History; HISTORY 135, History of European Law; HISTORY 222, Honor, Law, and Modernity; HISTORY 245G, Law and Colonialism in Africa; HISTORY 251, Creating the American Republic, HISTORY 251G, Topics in Constitutional History; HISTORY 293, Law and Society in Late Imperial China; and HISTORY 352B, History of American Law (same as LAW 318; open to undergraduates with consent of instructor; semester-long).

Geographical Cluster (5 courses)—Students choose five History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses)—Students choose four courses from outside the History department including courses offered in the School of Law and the School of Education. The faculty coordinator must pre-approve all courses in this cluster.

Small Group Requirements—Students must enroll in one sources and methods course and at least two 200-level small group courses while completing the three core courses and the five-course geographical cluster. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

PUBLIC HISTORY/PUBLIC SERVICE

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in:

1. public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and
2. public service settings in nonprofit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in History department courses that provide a geographic concentration. In addition, students consult with the PH/PS faculty coordinator to select a cluster of service-learning courses, listed annually by the Haas Center for Public Service, that provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway Course (1 course)—HISTORY 201, Introduction to Public History and Public Service, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and nonprofit organizations including local historical societies.

Geographical Cluster (4 courses)—Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses)—Students select four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Haas Center for Public Service. The faculty coordinator must pre-approve all courses in this cluster.

Methodological Cluster (2 courses)—Students must enroll in one Sources and Methods course and one additional 200-level small group course. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

Public Service/Service-learning Internship (1 course)—Students must engage in at least a one quarter internship through a service-learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

MINORS

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. The department ordinarily defines fields in terms of geography or chronology, but it also invites students to pursue thematic topics that can be examined in broadly comparative terms. Students completing the minor may choose to concentrate in such fields as African, American, British, Asian, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in

History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty. One History course from Introduction to the Humanities may count toward the six-course requirement, but not for the field concentration. One directed writing (299W) or directed research (299S) course may count towards the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor. Advanced placement credits do not fulfill any minor requirements.

Students must declare the minor in History no later than the Autumn Quarter of the senior year. They do so via Axess under Declare Major/Minor. Minor declarations are then approved by the Department of History and confirmation is sent via email to the student.

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to the Junior Honors Colloquium, 299H, students normally take 11 to 15 units of Senior Research, to be distributed as best fits their specific project. For students in the honors program, Senior Research units (299A,B,C) are taken in addition to the twelve required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H) offered in Winter Quarter. An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Under exceptional circumstances, students are admitted to the program in the Autumn Quarter of the senior year.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.3 (B+) in the student's previous work in history and in the University. Students completing the thesis with a grade of 'B+' or higher are eligible for honors in History. To enter the honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University's Golden Medals, as well as for departmental James Birdsall Weter prizes.

SECONDARY (HISTORY) TEACHER'S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

COTERMINAL B.A. AND M.A. PROGRAM

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the "Undergraduate Degrees and Programs" section of the this bulletin. Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major). The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the *Guide to Graduate Admission*, available from Graduate Admissions, the Registrar's Office, 630 Serra Street, Suite 120, or at http://gradadmissions.stanford.edu.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

MASTER OF ARTS

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)—The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "School of Education" section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

DOCTOR OF PHILOSOPHY

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 4, 2007. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
    - Europe, 300-1500
    - Europe, 1400-1800
    - Europe since 1700
    - Jewish History
    - Russia
    - Eastern Europe
    - Middle East
    - East Asia before 1600
    - China since 1600
    - Japan since 1600
    - Africa
    - Britain and the British Empire since 1460
    - Latin America
    - The United States (including colonial America)
    - History of Science, Medicine, and Technology
2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
    a) One of the concentrations listed above (other than the student's major concentration).
    b) One of the concentrations listed below, which falls largely outside the student's major concentration:
        - The Ancient Greek World
        - The Roman World
        - Europe, 300-1000
        - Europe, 1000-1400
        - Europe, 1400-1600
        - Europe, 1600-1789
        - Europe, 1700-1871
        - Europe since 1848
        - England, 450-1460
        - Britain and the British Empire, 1460-1714
        - Britain and the British Empire since 1714
        - Russia to 1800
        - Russia since 1800
        - Eastern Europe to 1800
        - Eastern Europe since 1800
        - Jewish History
        - Middle East to 1800
        - Middle East since 1800
        - Africa
        - China before 1600
        - China since 1600
        - Japan before 1600
        - Japan since 1600
        - Latin America to 1825
        - Latin America since 1810
        - The United States (including Colonial America) to 1865
        - The United States since 1850
        - The History of Science, Medicine, and Technology
    c) Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
    d) A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interdisciplinary concentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.
5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.
7. The student is expected to take the University oral examination in the major concentration in the third graduate year.
8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES

The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the "Interdisciplinary Studies in Humanities" section of this bulletin.

FINANCIAL SUPPORT

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

RESOURCES

The above section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' *American Bibliography*, and in the *Short-Title Catalogues* of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on

Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

COURSES

See the *Time Schedule* and http://history.stanford.edu/courses/ for updated information.

Courses are listed in the following order:

Introductory Undergraduate
Undergraduate (by Area or Theme)
Graduate (by Area or Theme)
Overseas Studies Program Courses in History

INTRODUCTORY UNDERGRADUATE

Introductory undergraduate History courses are listed in the following subsection order:

Introduction to the Humanities (IHUM)
Introductory Lectures: 1-99
Stanford Introductory Seminars: 1N-99N, 1Q-99Q
Sources and Methods Seminars: 1S-99S

IHUM (INTRODUCTION TO THE HUMANITIES)

The following Introduction to the Humanities courses are taught by History faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in History are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 4A,B. Mass Violence from Crusades to Genocide—The evolution, varieties, causes, and logic of mass violence in premodern and modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence thoughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER:IHUM-2,3

IHUM 4A: *4 units, Win (Buc, P)*
IHUM 4B: *4 units, Spr (Weiner, A)*

IHUM 6A,B. World History of Science—The broad sweep of global science, from the prehistoric roots of the oldest known technologies, the events of the Scientific Revolution, through recent triumphs in the physical and life sciences. History as unavoidably selective. How science transforms and is transformed by human engagements with technology, religion, art, politics, and moral. GER:IHUM-2,3

IHUM 6A: *4 units, Win (Proctor, R)*
IHUM 6B: *4 units, Spr (Proctor, R)*

INTRODUCTORY LECTURES

HISTORY 31. Science, Technology, and Art: The Worlds of Leonardo—The intersections among science, technology, and society, and an interdisciplinary introduction to Renaissance studies. Why does this 15th-century artist, engineer, and inventor continue to fascinate and inspire innovative, interdisciplinary work? The world of the historical Leonardo, looking at his range of interests and accomplishments (including Mona Lisa, human anatomies, flying machines), and the culture of invention that shaped him. Students think with Leonardo, reconstructing some of his projects. The persistence of the Renaissance as a touchstone for innovation in the 21st century, examining the myth of Leonardo. GER:DB-Hum

5 units, Spr (Rutkin, D)

HISTORY 59. Introduction to Asian American History—The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Chang, G)

HISTORY 70. Culture, Politics, and Society in Latin America—Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Frank, Z)

HISTORY 92A. The Historical Roots of Modern East Asia—Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Sommer, M; Wigen, K)

STANFORD INTRODUCTORY SEMINARS

See http://introsems.stanford.edu/ for applications and information.

HISTORY 30N. Fiction and English Society—Stanford Introductory Seminar. Preference to freshmen. The nature of English society from the mid-18th to mid-20th century through novels. Texts include Henry Fielding's *Joseph Andrews*, Jane Austen's *Mansfield Park*, George Eliot's *Middlemarch*, Charles Dickens' *Hard Times*, E.M. Forster's *Howards End*, Virginia Woolf's *Mrs. Dalloway*, Evelyn Waugh's *A Handful of Dust*. The novels themselves, and how they illuminate the English society. GER:DB-Hum

4 units, Aut (Stansky, P)

HISTORY 34N. The European Witch Hunts—Stanford Introductory Seminar. Preference to freshmen. Witch trials, early modern demonology, and historians' interpretations. What was it about early modernity that fueled witch hunting? Forms of the supernatural in history, whether from the ordered world of organized religion, or frightening, uncontrolled, and dangerous. The idea of witchcraft; the fear that some people harm others supernaturally. Reformation era witch hunts conducted in a period of state building and scientific discovery and in violation of extant laws and procedures.

4 units, Win (Stokes, L)

HISTORY 36N. Gay Autobiography—Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender

4 units, Spr (Robinson, P)

HISTORY 48Q. South Africa: Contested Transitions—Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and way of life for S. Africa. The persistence of the legacies of racism and inequality. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum

3 units, Win (Samoff, J)

HISTORY 51N. The American Enlightenment—Stanford Introductory Seminar. Preference to freshmen. The resonance of Enlightenment ideas in 18th-century America, a laboratory for new political, scientific, and artistic theories; how Americans applied such ideas. Was America a state of nature, and did animals, plants, and people improve or worsen there? What entities, such as children, apes, women, and slaves, were considered unreasonable in the Age of Reason; why? What was the place of religion and feeling? What was the best kind of government, and how could it be discovered? Readings in original texts and material culture.

5 units, Win (Winterer, C)

HISTORY 62N. The Atomic Bomb in Policy and History—Stanford Introductory Seminar. Preference to freshmen. Emphasis is on declassified files from WW II and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have postwar interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci

5 units, Spr (Bernstein, B)

HISTORY 90Q. Buddhist Political and Social Theory—Stanford Introductory Seminar. Preference to sophomores. Historical and textual roots, emphasizing Tibetan, Bhutanese, and Thai Buddhism. Society and polity in Buddhist thought, Buddhist spiritual, social, and political practice. The state, sovereignty, and the individual and society. Law. Buddhist economic theory, Gross National Happiness, and sustainable economy. The Buddhist critique of neoliberalism. GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (Mancall, M)

HISTORY 91Q. Mao Zedong: The Man Who Would Become China—Stanford Introductory Seminar. Preference to sophomores. His life, including early anthropological work, reinterpretation of Marxism, ascendance to power in the Communist Party, theory of guerilla warfare, socioeconomic vision in the early People's Republic, the Great Leap Forward, deification during the Cultural Revolution, and repercussions of his death in 1976.

5 units, Spr (Mullaney, T)

HISTORY 94N. Colonialism and Collaboration—Stanford Introductory Seminar. Preference to freshmen. Roles and problems of collaboration in the rise, sustenance, and fall of empires, and in the politics of occupied regimes and colonies. Focus is on 19th and 20th centuries, including WW II, the Soviet Union, and cases from Africa, Latin America, and S. and E. Asia. Who collaborated, and why; dilemmas they faced. Readings include memoirs, novels, and primary historical sources. GER:EC-Global

4-5 units, Win (Moon, Y)

HISTORY 97N. Modernizing Women in Japan—Stanford Introductory Seminar. Preference to freshmen. Late 19th through 20th century. Women as objects and agents of experiments in social change in the modern world. Research papers using primary sources. Sources include film, fiction, oral history, diaries, journalism, memoirs, and secondary works. GER:EC-Gender

5 units, Aut (Wigen, K)

COGNATE COURSES

CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money

4-5 units, Spr (Netz, R)

SOURCES AND METHODS SEMINARS

Sources and methods seminars introduce the processes of historical investigation and interpretation by providing experience in interpreting documents, constructing a coherent story from them, interpreting their implications, and discovering how it is possible to agree on facts while disagreeing on meaning.

HISTORY 10S. The Witness in Modern History: Memoir, Reportage, Image—The rise of the witness as icon; debates about its reliability as a historical source. The power of eyewitness accounts to convict the accused, inspire indignation about war and genocide, and attract attention to humanitarian crises. Their notorious unreliability due to exaggeration and misapprehension. Sources include reportage, photography, and documentary film. Case studies include criminal cases, war, poverty, and natural disasters.

5 units, Win (Daughton, J)

HISTORY 14S. Travel in an Age of Religious Crisis: Infidels, Heretics, and Missionaries—Using travel to assess the impact of 16th- and 17th-century religious crises on Europe's discovery of the Americas, Africa, and Asia by Columbus, Vespucci, DaGama, and those who followed them; how that exploration shaped Europe's understanding of its own identity. Sources include journals, letters, and missionary and diplomatic reports.

5 units, Spr (Sutherland, S)

HISTORY 23S. Living and Killing in the Ethnic Borderlands: Eastern Europe, 1914-48—Mass violence and coexistence in the ethnically diverse communities of E. Europe in the first half of the 20th century. How did people conceive of ethnic differences? Under what circumstances did violence erupt? How were ethnic interactions, peaceful and violent, experienced? How have they been remembered and memorialized? Poland, Czechoslovakia, Romania, and Yugoslavia. Empires, Soviet and Nazi policies, the Holocaust, and German expulsions. Memoirs, oral histories, newspapers, novellas, posters, photographs, film, and music.

5 units, Aut (Ward, K)

HISTORY 30S. To Kill the King: Sovereignty, Betrayal, and the End of Monarchy in Early Modern Europe—The dangers of early modern Europe for princes, from those who attained great power to those who met unpleasant ends. Focus is on the executions of Charles I of Britain and Louis XVI of France: did kings possess a sacred character; how was monarchy supposed to function; how did regicide become the abolition of monarchy itself? Authors include Machiavelli and Shakespeare; sources include paintings, newsbooks, tracts, hymns, court records, and speeches.

5 units, Win (Millstone, N)

HISTORY 31S. Jesus and Mohammad: Christian Encounters with Islam in the Early Modern Mediterranean—Christian anxiety at the 15th-century rise of Turkish power. How Europeans, including warriors and spies, understood Muhammad and the Turks from 1450 to 1700. When did they cooperate and when did they fight? How Europe's relationship with Mohammad reflected its troubled relationship with Jesus; who was a Christian in the age of the Reformation? Sources include poetry, artwork, religious tracts, travelogues, letters, and diplomatic correspondence.

5 units, Win (Tazzara, C)

HISTORY 38S. Decadence: The History of a European Preoccupation, 1848-1945—Decadence as a pan-European phenomenon in the cultural crises of the late 19th and 20th centuries. How decadence was championed and derided in conjunction with artistic creativity, individuality, sexuality, and exoticism; how the rhetoric of decadence as degeneration reflects a cultural paradigm shift toward a biological worldview; and how decadence relates to other preoccupations of period such as authenticity and progress. Sources include literature, philosophy, and art.

5 units, Spr (Mann, P)

HISTORY 39S. The Napoleonic Experience, 1798-1815: From the Battle of the Pyramids to Waterloo—Bonaparte and his Grande Armée's campaigns in the Orient and Europe; admiring and horrified reactions in different countries. Sources include peace treaties, soldiers' accounts, Beethoven's music, and Goya's paintings. The experience and legacy of war and peace as the starting point of modern European history.

5 units, Win (Mintzker, Y)

HISTORY 41S. Science and Science Fiction from Christopher Columbus to Frankenstein's Monster—What is a fact; how is it distinguished from fiction? The co-development and eventual divergence of science and science fiction in the early modern world. The history of science and its relationship to literature, travel, nation building, and colonialism. Sources include travelers' accounts, natural histories, scientific illustrations, maps, and novels.

5 units, Aut (Barnett, L)

HISTORY 47S. Health and Healing in Sub-Saharan Africa—Traditional and modern and physical and spiritual systems of health and healing. Focus is on fertility and male and female sexuality. Initiation rites, fertility cults, birth maintenance, abortion, childbirth, and sexually transmitted diseases. African ideals of female sexuality and notions of femininity, masculinity, and political and legal institutions. Sources include: missionary archives; newspapers; diaries, memoirs, and life histories; medical, government, and legal documents; and novels, films, and artifacts.

5 units, Spr (Powers, J)

HISTORY 54S. America's Cold War in Asia from Korea to Vietnam, 1945-1975—How America came to fight its major wars of the Cold War in Korea and Vietnam; who supported and who opposed them. The role of international and domestic politics, culture, ideology, and economics. How they affected the lives of Korean, Vietnamese, and Americans involved. Sources include novels, films, cartoons, periodicals, speeches, letters, and archival documents.

5 units, Aut (Kim, K)

HISTORY 55S. Border Lives, Border Identities: The History of Mexican American Women in the United States—Chicana consciousness from 1900 to the present. The 70s Chicana movement. Topics include: the impact of labor, education, immigration, and sexuality; and Chicanas' roles in feminist, civil rights, and ethnic identity struggles. Primary sources including manifestos, poetry, court cases, film, and art. Stanford archival research. Field trip to San Francisco's Mission District.

5 units, Win (Flores, L)

HISTORY 81S. Iraq Declassified: The History and Historiography of Iraq, 1920-2003—Origins and development of Iraqi political, economic, and social structures. How the Iraqi state came into being; sources of political conflict within it; how American military forces came to occupy it. Emphasis is on British imperialism, the dynamics of anticolonial revolution, and geopolitical implications of oil development. Sources include recently declassified government documents.

5 units, Aut (Wolfe-Hunnicutt, B)

UNDERGRADUATE

Lecture courses (100-199) are surveys of geographical regions and time periods.

Colloquia (200-299) are small-group courses on historical themes, primarily for juniors and seniors majoring in history. Admission is by consent of the instructor. Courses with a suffix 'H' are for honors students only.

Undergraduate research seminars (200S-299S) provide opportunities to research and write a paper using primary sources.

Suffixes A,B,C,D indicate a course sequence. Unless otherwise stated, earlier courses are not prerequisites to later courses, and students need not take an entire sequence. Other letter suffixes, and numbers without suffixes, denote stand-alone courses.

Undergraduate courses are listed in the following subsection order:

International, Global, and Thematic: 100-109, 200-209
Europe Survey: 110A,B,C
Ancient and Medieval Europe: 111-119, 211-219
Eastern Europe, Russia, and Eurasia: 120-129, 220-229
Early Modern and Modern Europe: 130-139, 230-239
History of Science and Technology: 140-144, 240-244
Africa: 145-149, 245-249
United States Survey: 150A,B,C
United States: 151-169, 251-269
Latin America: 170-179, 270-279
Middle East: 180-184, 280-284
Jewish History: 185-189, 285-289
Asia: 190-198, 290-298
Individual Work: 299

INTERNATIONAL, GLOBAL, AND THEMATIC

See also 227A.

HISTORY 102. The History of the International System—World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:DB-SocSci, EC-GlobalCom, WIM

5 units, Win (Sheehan, J)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (Holloway, D)

HISTORY 104. Trials that Made History: Courtroom Martyrs and Villains from the Classical to Modern Period—Socrates, the Knights Templar, Galileo, Salem witchcraft, and the Scopes (monkey) trials. How trials reflect cultural conflicts and political climate. Tensions between individuals and the state and between science and religion that are evident in trials. The role of trials in public discourse. Trial as drama. Reading assignments are interdisciplinary and range from surviving trial transcripts to the work of literary scholars and filmmakers.

5 units, Spr (Miller, K)

HISTORY 105. Gandhi, King, and Nonviolence—(Same as RELIGST 118.) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today.

4 units, Win (Carson, C; Hess, L)

HISTORY 106A. Global Human Geography: Asia and Africa—(Same as INTNLREL 161A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci

5 units, Aut (Lewis, MW)

HISTORY 106B. Global Human Geography: Europe and Americas—(Same as INTNLREL 161B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes. GER:DB-SocSci

5 units, Win (Lewis, M)

HISTORY 201. Public Service through Public History—(Same as 301.) Gateway course for the History and Public Service interdisciplinary track. How public service and the study of history are connected. Opportunities for students to apply history to public service. Theory and practice of public service. GER:DB-SocSci

5 units, Aut (Camarillo, A; McKibben, C)

HISTORY 202. International History and International Relations Theory—(Same as 306E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, not given this year (Holloway, D)

HISTORY 203A. Theories of the State from the Ancient World to the Present—(Same as 303A.) The development and contemporary condition of thinking about the state. Philosophic, rhetorical, and historical contexts. Aristotle's *Politics*; early modern theorists such as Machiavelli, Hobbes, and Rousseau; transformations of the idea through the French Revolution by Sieyes and Hegel; and problematizations of the ideas in the last century by Schmidt and Foucault. GER:DB-Hum

4-5 units, Win (Baker, K; Sheehan, J)

HISTORY 204E. Origins of Totalitarianism—(Same as 307E.) Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities. GER:DB-SocSci

4-5 units, Aut (Weiner, A)

HISTORY 204G. War, Culture, and Society in the Modern Age—(Same as 304G.) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated. WIM

5 units, Aut (Weiner, A)

HISTORY 205B. Quantitative Methods in Historical Research—(Same as 305B.) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required. GER:DB-SocSci

4-5 units, Aut (Klein, H)

HISTORY 206. History and Geography of Contemporary Global Issues—(Same as INTNLREL 163.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of the *New York Times* and *The Economist*. Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM

5 units, Aut (Lewis, MW)

HISTORY 208A. Science and Law in History—(Same as 308A.) How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof. WIM

4-5 units, Spr (Riskin, J)

COGNATE COURSE

LAW 229. Race and the Law

3 units, Win (Banks, R)

EUROPE SURVEY

HISTORY 110A. Europe from Late Antiquity to 1500—Focus is on religion and politics. Issues include: the rise of Christianity and its impact on Rome; transformations of Catholicism and its institutions including the impact of barbarian tribes and the struggle between church and state; antisemitism, heresy, Crusades, and inquisition; courtly love; and scholasticism. GER:DB-Hum

5 units, not given this year

HISTORY 110B. Machiavellian Moments: Europe's History, 1492-1793—Survey of the intellectual and social currents from the voyages of Columbus to the French Revolution. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Lougee Chappell, C)

HISTORY 110C. Introduction to Modern Europe—From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. Political ideologies such as liberalism, socialism, communism, and fascism that Europeans developed in response to revolution, nation building, imperialism, and international competition. GER:DB-Hum

5 units, Aut (Daughton, J)

ANCIENT AND MEDIEVAL EUROPE

HISTORY 212. Holy Wars: Medieval Perspectives—(Same as 312.) Cultural and societal factors at play in Christian holy war from late antiquity to the early modern era. Topics include: the Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor. GER:DB-Hum

4-5 units, Aut (Buc, P)

HISTORY 215. Crusades: Interdisciplinary Approaches—(Same as ENGLISH 103, MEDVLST 165, RELIGST 140.) Causes, meanings, meaningfulness, and commemoration of the Christian expeditions against Muslims, pagans, and heretics. Primary and secondary sources.

3-5 units, Spr (Buc, P; Summit, J; Gelber, H)

HISTORY 216. Medieval Antisemitism—(Same as 316.) The religions based on the New Testament, by virtue of having an old to which to refer the new, entertain a complicated relationship with Judaism. Focus is on the relationship of Christianity to Judaism and Jews under Christian rule during the formative medieval centuries. The formation of anti-Semitism as a factor both in this interaction and the self-identity of Christian communities. The connections between medieval anti-Semitism and modern forms of racism. GER:DB-SocSci

5 units, not given this year (Buc, P)

HISTORY 216A. Muslims and Infidels: Islam and the Crusades—(Same as 316A.) The impact of the Crusades on the Muslim world and consciousness from the Middle Ages and to the present. Primary and secondary sources. Themes include: *jihad*; cultural interaction between Muslims and Christians in the Holy Land; and military, political, and ideological developments in the 12th and 13th centuries. Modern interpretations and debates about jihadist theology and global *jiha*d. GER:DB-Hum

4-5 units, not given this year (Miller, K)

HISTORY 217B. Land of Three Religions: Medieval Spain—(Same as 317B.) The history of the Iberian peninsula from the Islamic conquest of 711 to the Christian expulsion of the Jews in 1492. Focus is on forms of confrontation, confluence, and hostile indifference among medieval Jews, Christians, and Muslims. What were undercurrents of aggression that gave rise to persecution of the other; what elements of commonality among groups gave rise to intellectual advancements? WIM

EASTERN EUROPE, RUSSIA, AND EURASIA

See also 23S, 204E, 204G.

HISTORY 120A. Russia, 988-1762—Culture, politics, and society from the beginnings to Catherine the Great. Orthodox Christianity; Vikings in Kievan Rus; the principality of Moscow and the Muscovite political system; church-state relations; the 15th-16th century Muscovite cultural synthesis in art and architecture and the shattering of that synthesis in the 17th century; the 17th-century schism in the church; cultural revolution and W. European elements under Peter the Great; Moscow versus St. Petersburg, or traditional versus westernized Russia; rise of serfdom; Catherine the Great as enlightened despot. GER:DB-Hum, EC-GlobalCom
4-5 units, not given this year (Kollmann, N)

HISTORY 120B. History of Imperial Russia—From the reign of Catherine the Great to the collapse of the monarchy in war and revolution in 1917. Themes include the ruling strategies of the Romanov dynasty, noble culture, serfdom, the expansion of the empire into Europe and Asia, the intelligentsia and radical movements, industrialization and urbanization, the geopolitics of Eurasia, and the challenges of nationalism and other revolutionary ideologies to autocratic Russia as a multi-religious and multi-ethnic empire. Novels, memoirs, visual images, music, architecture, and other primary sources. GER:DB-Hum
5 units, not given this year (Crews, R)

HISTORY 120C. 20th-Century Russian and Soviet History—The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia. GER:DB-Hum
5 units, not given this year

HISTORY 122. Aristocracies and Absolutism: Early Modern Eastern Europe, 1400-1800—The societies and culture of E. Europe (Byelorussia, Bohemia, Hungary, Poland, Ukraine) in the late medieval and early modern periods. The conflict of aristocratic parliamentary governments with absolutist states (Austria-Hungary, Prussia, Russia). E. Europe's development is contrasted to the Russian historical experience. GER:DB-SocSci
5 units, not given this year

HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008—The reforms under Alexander II and the autocracy's attempts to modernize and maintain Russia's great power status while curbing liberal and radical forces. The 1917 revolution and the Communist system under Lenin and Stalin. The influence of Marxist ideology through the Gorbachev years. What was Russian about the Soviet Union and what is Soviet about post-Soviet Russia.
5 units, Spr (Patenaude, B)

HISTORY 125. 20th-Century Eastern Europe—Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WW I; social movements and the emergence of dictatorships and fascism in the inter-war period. WW II, Stalinism, and destalinization in contemporary E. Europe. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Jolluck, K)

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800—Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century. GER:DB-Hum, EC-Gender, WIM
5 units, not given this year (Kollmann, N)

HISTORY 221B. The Woman Question in Modern Russia—Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:DB-SocSci, EC-Gender
5 units, Aut (Jolluck, K)

HISTORY 221D. Women's Activism in War and Peace—(Same as 321D.) Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina. GER:DB-Hum
4-5 units, Spr (Jolluck, K)

HISTORY 222. Honor, Law, and Modernity—How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state's relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment. GER:DB-Hum
5 units, not given this year (Kollmann, N)

HISTORY 224. Violence, Islam, and the State in Central Asia—(Same as 324.) The uses of violence in projects of empire and national state formation that have competed with Islamic and other political alternatives to shape modern Central Asia from the British and Russian imperial eras through the flight of the Taliban. Shared experiences and geopolitics of the former Soviet republics and Afghanistan. Themes include colonial wars and imperial competition, state formation, mass mobilization, women's emancipation, cultural revolution, developmentalism, anti-Soviet *jihad*, the Taliban movement, and contemporary Islamist, nationalist, and regionalist contests for the state. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year (Crews, R)

HISTORY 224A. Modern Russia, Iran, and Afghanistan—(Same as 324A.) 1800 to the present. The history of interactions between Russia and its Muslim neighbors, and how events in Iran and Afghanistan shaped Russia and the surrounding region. Russian expansion, competition for the Caucasus and the Caspian regions, state modernization, socialist revolutions, the Islamic Republic, the Taliban, and the post-9/11 contest for hegemony in the Caucasus, the Middle East, and Central Asia. GER:DB-SocSci
4-5 units, not given this year (Crews, R)

HISTORY 225. Class and Ethnicity in Modern Eurasia—(Same as 325.) Class and ethnicity in the shaping of the political, social, religious and cultural landscape. The decline and collapse of the Habsburg and Russian Empires; the emergence of national states and multinational unions such as the USSR, the EU, and the CIS; contested borderlands and sovereignty; and the impact of revolutionary regimes and movements. GER:DB-SocSci

5 units, not given this year (Crews, R; Weiner, A)

HISTORY 226E. The Creation and Destruction of Yugoslavia—From the genesis of the Yugoslav idea in the 19th century to the Balkan wars of the 90s: formation of the Yugoslav kingdom during WW I, Yugoslavism, disintegration during WW II occupation, collaboration and resistance movements, the Communist revolution, the Tito-Stalin split, life in socialist Yugoslavia, dissent within Tito's regime, the rise of nationalism in socialist Yugoslavia, and the disintegration of Yugoslavia and ethnic cleansing and genocide in the Balkan Wars of the 90s. GER:DB-SocSci, EC-Global

5 units, Aut (Knezevic, J)

HISTORY 226G. Civilians and War in Modern Europe—(Same as 326G.) From the French Revolution to the present, including the French Revolutionary wars, the Franco-Prussian War, the Balkan wars of 1912-13, WW I and II, the Spanish Civil War, fascist and communist totalitarian regimes, and the Balkan wars of the 90s. Civilians as participants, victims, and bystanders under various conditions of war, including the mobilization of society for total war, occupation, siege, collaboration and resistance, ethnic cleansing, and genocide. GER:DB-SocSci

4-5 units, Spr (Knezevic, J)

HISTORY 226H. Nationalism in the Habsburg Empire, 1848-1918—(Same as 326H.) Was nationalism responsible for the demise of the Habsburg Empire? The development of national identity and national movements. The precepts upon which the multinational empire was based; how these collided with 19th-century nationalism, liberalism, and mass politics. Why Habsburg attempts to reform and modernize failed. Focus is on the decisive role of WW I in the disintegration of the empire. GER:DB-SocSci

4-5 units, Win (Knezevic, J)

HISTORY 227. East European Women and War in the 20th Century—(Same as 327.) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation. GER:DB-SocSci, EC-Gender

5 units, not given this year (Jolluck, K)

HISTORY 227A. The History of Genocide—(Same as 327A.) Multidisciplinary. Causes and consequences; conceptual and legal problems in defining genocide. Focus is on the modern period and cases from around the world.

4-5 units, Win (Naimark, N)

HISTORY 228. Circles of Hell: Poland in World War II—(Same as 328.) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society. GER:DB-SocSci

5 units, not given this year (Jolluck, K)

HISTORY 229. Poles and Jews—(Same as 329.) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today. GER:DB-Hum

4-5 units, Win (Jolluck, K)

EARLY MODERN AND MODERN EUROPE

See also 10S, 14S, 30S, 31S, 38S, 39S, 41S, 204E, and 204G.

HISTORY 126A. The First World War—How did the experience of WW I shape the 20th century? How modern was this mechanized, total war? Did trench warfare, economic blockade, unrestricted submarine warfare, atrocities, occupation, and the Armenian genocide represent a brutalization of warfare? How did mobilization of entire populations affect women and children? How did people mourn and commemorate the victims of mass death? Military, political, cultural, and social approaches. Sources include scholarly texts, literature, and film.

5 units, Aut (Knezevic, J)

HISTORY 132. Ordinary Lives: A Social History of the Everyday in Early Modern Europe—What war meant for foot soldiers and the peasants across whose fields they marched. Ordinary people's lives in the eras of Machiavelli, Shakespeare, the Reformation, and the scientific revolution. Topics include: birth, marriage, and death; city life and peasant culture; lay encounters with religious and intellectual ideas; war and crime; and gender and sexuality.

5 units, Aut (Stokes, L)

HISTORY 133A. Yorkist and Tudor England—English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes. GER:DB-Hum

5 units, not given this year (Como, D)

HISTORY 133B. Revolutionary England: The Stuart Age—From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. GER:DB-Hum

5 units, not given this year (Como, D)

HISTORY 135. History of European Law, Medieval to Contemporary—(Same as 335.) From the fall of the Roman Empire to the establishment of the EU. How law changed over time. Sources and nature of law, organization of legal systems, and relationships between law and society, law and lawmaker, law and the legal professions. GER:DB-SocSci

5 units, not given this year (Herzog, T)

HISTORY 137. The Holocaust—(Same as 337.) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:DB-Hum

4-5 units, Spr (Felstiner, M)

HISTORY 138A. History of Modern Germany, 1866 to the Present—Civil-military relations in Prussia and Germany; the resolution of the German question under Bismarck; the origins, course, and impact of WW I; Germany and Europe under the Nazis; and German-German relations during the Cold War.

5 units, Spr (Kauffman, J)

HISTORY 139. Modern Britain and the Empire—From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:DB-Hum, DB-Hum, EC-GlobalCom

5 units, Win (Satia, P)

HISTORY 232F. The Scientific Revolution—(Same as 332F.) What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe. GER:DB-Hum, WIM

4-5 units, Win (Riskin, J)

HISTORY 232G. When Worlds Collide: The Trial of Galileo—(Same as 332G.) Gateway course for History of Science and Medicine track. The 1633 condemnation by the Catholic Church of Galileo for believing the sun to be the center of the Universe, and its 1992 admission that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo's life and trial and related literature on Renaissance Italy. Historians' interpretations of the trial in relation to its documentation. GER:DB-Hum

4-5 units, not given this year (Findlen, P)

HISTORY 233C. Two British Revolutions—(Same as 333C.) Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II. GER:DB-Hum

4-5 units, not given this year (Como, D)

HISTORY 233F. Political Thought in Early Modern Britain—1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum

5 units, not given this year (Como, D)

HISTORY 234. Paris and Politics, 1600-2006—The emergence of the modern city of lights. Paris as a mirror of French politics: top down, capital to country, center to periphery, noble to bourgeois to people. Sources include maps, art, music, essays, and memoirs.

5 units, not given this year (Lougee-Chappell, C)

HISTORY 236. The Ethics of Imperialism—Can a commitment to liberty, progress, and universal rights be reconciled with imperialism? The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies. GER:DB-Hum

5 units, Aut (Daughton, J)

HISTORY 237B. Teaching the Unteachable: Teaching and Representing the Holocaust—(Same as EDUC 253X.) Theodore Adorno asked whether it was possible to write poetry after Auschwitz; whatever the answer, each year witnesses exponential growth in state-sponsored mandates to teach the Holocaust. How and to what end does catastrophe become curriculum? How to assess what students learn from these efforts. The Nazis' efforts to teach for hate, and contemporary parallels. Historical and educational sources, especially films and memoirs.

3-5 units, Win (Wineburg, S)

HISTORY 239D. Capital and Empire—(Same as 339D, HUMNTIES 191S.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development. GER:DB-SocSci

4-5 units, Spr (Satia, P)

HISTORY 239E. History and the Arts in 20th-Century Britain—Novels, poetry, buildings, images, and music. The works in themselves and what they reveal about the society that produced them. Emphasis is on Bill Brandt's photographs. GER:DB-Hum, WIM

5 units, Aut (Stansky, P)

HISTORY 239F. Empire and Information—(Same as 339F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. GER:DB-Hum, EC-GlobalCom

AFRICA

See also 47S and 48Q.

HISTORY 145A. Africa Until European Conquest—Episodes in African history from the earliest records up until European partition of the continent, focusing on how knowledge about the natural, social, and spiritual worlds was linked to the exercise of power. The effects of technological innovations on states and other forms of social complexity; use of religious beliefs and practices to legitimate or critique authority. The effects of slave trades and imperial conquest on these forms of authority. GER:DB-Hum, EC-GlobalCom

5 units, not given this year (Hanretta, S)

HISTORY 145B. Africa in the 20th Century—The transformations in African societies and cultures from the beginning of colonial rule to the 90s. Case studies of colonialism and its impact on Africans. Debates over modernity, modernization, and tradition. The challenges of postcoloniality. Social changes in the organization of labor, family life, markets, and the built environment. Cultural changes in literature, music, representational art, and political thought. GER:DB-SocSci, EC-GlobalCom, WIM

5 units, Win (Hanretta, S)

HISTORY 149C. Slavery and the Slave Trade—Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

5 units, Spr (Staff)

HISTORY 245E. Health and Society in Africa—(Same as 347E.) The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease. GER:DB-SocSci, EC-GlobalCom

4-5 units, not given this year (Roberts, R)

HISTORY 245G. Law and Colonialism in Africa—(Same as 348D.) Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases are a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority. WIM GER:DB-SocSci

4-5 units, not given this year (Roberts, R)

HISTORY 246S. Research Seminar: African Nationalism and Beyond—(Same as 446A.) African intellectual, political, social and cultural institutions confronting issues of sovereignty, authority, heterarchy, and power during the 19th and 20th centuries.

4-5 units, Win (Hanretta, S)

HISTORY 248. Islam in Africa—(Same as 348.) Relations between African Muslims and the broader Islamic tradition over the last 1200 years. The roots of the Islamic tradition, its adoption, endogenization, and elaboration by African Muslims. The interplay of religion, politics, culture and society, and how tradition exercises influence even while being transformed. The worldviews and lives of African Muslims; how and why those worldviews and experiences changed. GER:DB-Hum, EC-GlobalCom, WIM

4-5 units, Spr (Hanretta, S)

HISTORY 248S. African Societies and Colonial States—(Same as 448A.) The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter. GER:DB-SocSci

4-5 units, not given this year (Roberts, R)

HISTORY 249. History without Documents—(Same as 349.) Can history be written about places and times for which are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art. GER:DB-Hum

4-5 units, not given this year (Hanretta, S)

UNITED STATES SURVEY

HISTORY 150A. Colonial and Revolutionary America—Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Rakove, J)

HISTORY 150B. 19th-Century America—Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul, WIM

5 units, Win (White, R)

HISTORY 150C. The United States in the Twentieth Century—Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Camarillo, A; Chang, G)

THE UNITED STATES

See also 54S, 55S, 59, and 201.

HISTORY 154. 19th-Century U.S. Cultural and Intellectual History, 1790-1860—How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. GER:DB-Hum, EC-AmerCul

5 units, Spr (Winterer, C)

HISTORY 158. The United States Since 1945—Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WW II, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women's movement, the Great Society and backlash, welfare policy, conservatism and liberalism, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan revisionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war. GER:DB-SocSci, EC-AmerCul

4-5 units, Win (Bernstein, B)

HISTORY 158B. History of Education in the United States—(Same as EDUC 201.) How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching.

3-4 units, Spr (Staff)

HISTORY 158C. History of Higher Education in the U.S.—(Same as EDUC 165/265.) Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities.

3-4 units, Aut (Staff)

HISTORY 161. U.S. Women's History, 1890s-1990s—The transformation of Victorian womanhood in the late 19th century, including the workforce participation of immigrant and black women, educational and professional opportunities for middle class white women, impact of wars and depression on 20th-century women's lives, and rebirth of feminism. GER:DB-SocSci, EC-Gender

5 units, Spr (Freedman, E)

HISTORY 163. A History of North American Wests—The history, peoples, and natural systems of a region that has never been contained within a single empire or nation state, but has been united by the movement of peoples, species, and things. Topics include smallpox, horses, gold, salmon, rivers, coal, and oil. WIM

5 units, Aut (White, R)

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle—Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul

4-5 units, Aut (Carson, C)

HISTORY 251. Creating the American Republic—(Same as 352, LAW 246, POLISCI 321.) Concepts and developments in the late 18th-century invention of American Constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. GER:DB-SocSci

5 units, Win (Rakove, J)

HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 355.) For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis. GER:DB-SocSci

4-5 units, Aut (Bernstein, B)

HISTORY 252H. Environmental History of the San Francisco Bay Area—How changing ideas on the relationship between human beings, nature, and cities have shaped the Bay Area. Topics include: historical connection between the Bay Area and surrounding environments; grassroots organizations and environmental justice movements; responses to urbanization and the rise of urban conservation initiatives; and regional agencies and legislation influencing the creation of parks and green space, pollution control measures, public health standards, and urban food networks.

4-5 units, Win (Staff)

HISTORY 254. Popular Culture and American Nature—Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum

5 units, Spr (White, R)

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice—King's religious and political thought, using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*.

5 units, Spr (Staff)

HISTORY 255A. America in Western Civilization—(Same as 355A.) The distinctive American reflection of the Renaissance, Reformation, Enlightenment, Industrial Revolution, and century of total war. Corresponding themes: the imaginative rendering of the New World; religion; politics; the economy; and foreign relations.

4-5 units, Aut (Kennedy, D; Sheehan, J)

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 356.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. GER:DB-SocSci, EC-GlobalCom, WIM

4-5 units, Win (Chang, G)

HISTORY 257. The Politics and Ethics of Modern Science and Technology—(Same as 347, STS 221.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-SocSci

4-5 units, not given this year (Bernstein, B)

HISTORY 258. History of Sexuality in the U.S.—(Same as 358; formerly 265A.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Readings on the social construction of sexuality, primarily U.S., in the 19th and 20th centuries. Topics: reproduction, sexual identities, and race and sexuality. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender

4-5 units, not given this year (Freedman, E)

HISTORY 259A. Poverty and Homelessness in America—Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature.

5 units, not given this year (Camarillo, A)

HISTORY 259B. Poverty and Homelessness in America II—Students participate in an internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through readings and discussions. Prerequisite: interview with instructor. Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Prerequisite: 259A.
3 units, not given this year (Camarillo, A)

HISTORY 260. California's Minority-Majority Cities—Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. GER:DB-SocSci, EC-AmerCul
5 units, Spr (McKibben, C)

HISTORY 265. New Research in Asian American History—(Same as 365.) Narrative material and methodologies. Possible research work. GER:DB-SocSci, EC-AmerCul
4-5 units, not given this year (Chang, G)

COGNATE COURSES

5 units, Spr (Wright, G)

ECON 226. U.S. Economic History
2-5 units, Spr (Staff)

URBANST 161. U.S. Urban History since 1920
5 units, Spr (Kahan, M)

LATIN AMERICA

See also 70.

HISTORY 170. Colonial Latin America—(Same as 370.) 16th-19th centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations. Readings include primary and secondary sources. GER:DB-SocSci
4-5 units, Aut (Herzog, T)

HISTORY 273. The European Expansion—(Same as 373A.) The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
4-5 units, not given this year (Herzog, T)

HISTORY 275F. Social Change in Latin America Since 1900—(Same as 375F, LATINAM 201/301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci, WIM
4-5 units, Aut (Klein, H)

HISTORY 276. Modern Brazil—(Same as 376.) From independence in 1822 to the present. Social and cultural history. Literary and historical sources. WIM
4-5 units, Spr (Frank, Z)

HISTORY 279. Latin American Development: Economy and Society, 1800-2000—(Same as 379.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom, WIM
4-5 units, Spr (Frank, Z)

MIDDLE EAST

See also 31S, 81S, 185G, 215, 286, and 287A.

HISTORY 181B. The Middle East in the 20th Century—(Formerly 187B.) The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula (the *mashrîq*), with attention to Turkey, Iran, and Israel.
5 units, not given this year

HISTORY 181C. Social and Cultural History of Modern Shi'ism—The influence of Shi'ism in colonial and postcolonial Middle Eastern countries such as Iran, Iraq, Lebanon, and Saudi Arabia. Survey of Islamic history and the doctrinal differences among Muslim sects. GER:DB-Hum
5 units, Spr (Kadhim, A)

HISTORY 281A. Twentieth-Century Iraq: A Political and Social History—The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context.
5 units, Win (Kadhim, A)

COGNATE COURSES

CLASSHIS 105. History and Culture of Ancient Egypt
4-5 units, Spr (Manning, J)

JEWISH HISTORY

See also 217B.

HISTORY 185B. Jews in the Modern World—Possible themes: the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe, the transformation of Jewish life in E. Europe under the authoritarian Russian regime, colonialism in the Sephardic world, new ideologies (Reform Judaism and Jewish nationalisms), the persistence and renewal of antisemitism, the destruction of European Jewry under the Nazis, new Jewish centers in the U.S., and the State of Israel. GER:DB-Hum, EC-GlobalCom
5 units, not given this year (Zipperstein, S)

HISTORY 185G. Coexistence and Conflict: Jews in Premodern Christian and Muslim Lands—(Same as 385G.)
4-5 units, Aut (Staff)

HISTORY 286. Jews among Muslims—(Same as 386.) The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries. GER:DB-Hum
4-5 units, Win (Rodrigue, A)

HISTORY 287A. History of the Israeli-Arab Land Conflict—(Same as 387A.) Emphasis is on legal aspects. The Palestinian land ownership system during the Ottoman and British periods. Legislation and national institutions such as the Jewish National Fund and the Jewish Agency. The first decade of Israeli statehood that facilitated the transfer of Palestinian refugee property to Jewish ownership. Aftermath of the1967 War, and settlement policies in E. Jerusalem and the occupied territories. Sociolegal issues underlying the separation wall; the effects of the constitutional revolution in Israel on land struggle.
4-5 units, Spr (Staff)

ASIA

See also 90Q, 91Q, 92A, and 256.

HISTORY 191. East Asia in the Early Buddhist Age—(Same as 391.) Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year (Lewis, ME)

HISTORY 192. China: The Early Empires—How China was transformed as a consequence of its political unification by the Qin dynasty. The geographical reorganization of China in the process of unification. The changing nature of rulership, cities, rural society, military organization, kinship structure, religion, literary practice, law, and relations to the outside world. The nature of empire as a political system. GER:DB-Hum

3-5 units, Spr (Lewis, ME)

HISTORY 193. Late Imperial China—From the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order. GER:DB-Hum

5 units, not given this year (Sommer, M)

HISTORY 195. Modern Korean History—Topics include: the Choson dynasty; 19th-century reforms and rebellions; Korean nationalism; Japanese colonial rule; decolonization; the Korean diaspora; the Cold War in E. Asia; and the Korean War. The division of the country and the separate state building processes. Industrialization and democratization of the South. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Moon, Y)

HISTORY 195C. Modern Japanese History—Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Uchida, J)

HISTORY 196. South Asian Modernities: Colonialism, Community, Nationality—Does modernity in S. Asia unavoidably carry the memory of its colonial experience? Are there indigenous modes of being modern? The region's global connections in the realm of ideas and political thought; developments pertaining to community, culture, violence, and nationality; the political trajectories of India's nationalist struggle; and the implications of anticolonial politics for the character of postcolonial national modernities.

5 units, Spr (Kumar, A)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era—The history of S.E. Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization. GER:DB-Hum

5 units, Win (Lewis, MW)

HISTORY 198. The History of Modern China—Major historical transformations includling the decline of the last imperial dynasty, the formation of the first Chinese republic, WW II, the rise of Communism, China under Mao, post-Mao reforms, and the Beijing Olympics of 2008. GER:DB-SocSci, EC-Global

5 units, Win (Mullaney, T)

HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times—(Same as 391A.) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts. GER:DB-SocSci

4-5 units, not given this year (Mullaney, T)

HISTORY 291B. The City in Imperial China—(Same as 391B.) The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

3-5 units, Win (Lewis, ME)

HISTORY 291C. Chinese Science, Technology, and Medicine through the Ages

5 units, Spr (Mullaney, T)

HISTORY 291E. Maps, Borders, and Conflict in East Asia—(Same as 391E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci

4-5 units, not given this year (Wigen, K)

HISTORY 292D. Japan in Asia, Asia in Japan—(Same as 392D.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia. GER:DB-SocSci

4-5 units, Win (Uchida, J)

HISTORY 293. Law and Society in Late Imperial China—(Same as 392B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum

4-5 units, not given this year (Sommer, M)

HISTORY 294. Violence, Ethics, Colonialism: Gandhi, Liberalism, and the Politics of Friendship—How postcolonial ethics might rearrange conventional histories of communitarian politics, civil society, modernity, and anticolonialism. Liberal theorists such as Mill and Macaulay; rhetoric of contract, freedom, and ethical responsibility; Burke's critique of empire; the Indian question; impeachment of Warren Hastings; and implications of liberalism for colonial politics. Patriotism and native translations of liberalism; Gandhi's hermeneutic departure from individual to community; his politics of friendship and gift; and his inversion of liberal contract and historicism. GER:EC-EthicReas

5 units, Win (Kumar, A)

HISTORY 295J. Chinese Women's History—The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women's studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? GER:DB-Hum, EC-Gender

5 units, Spr (Sommer, M)

COGNATE COURSES

CLASSHIS 106/206. Life and Death in China's Late Antiquity
4-5 units, Win (Hsu, H)

INDIVIDUAL WORK

HISTORY 299A. Senior Research I
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299B. Senior Research II
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299C. Senior Research III
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299H. Junior Honors Colloquium—Required of junior History majors planning to write a History honors thesis during senior year.
5 units, Win (Winterer, C)

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute—May be repeated for credit.
1-4 units, Aut (Staff), Win (Carson, C), Spr (Staff)

HISTORY 299S. Undergraduate Directed Research and Writing—May be repeated for credit.

GRADUATE

Graduate History courses are listed in the following subsection order:

Required Colloquia, Workshops, and Seminars: 300-305, 400-405
International, Global, and Thematic: 306-310, 406-410
Ancient and Medieval Europe: 311-319, 411-419
Eastern Europe, Russia, and Eurasia: 320-329, 320-329
Early Modern and Modern Europe: 330-339
History of Science and Technology: 340-344, 440-444
Africa: 345-349, 445-449
United States: 351-369, 451-469
Latin America: 370-379, 470-479
Middle East: 380-384, 480-484
Jewish History: 385-389, 485-489
Asia: 390-398, 490-498
Individual Study: 399, 499

REQUIRED COLLOQUIA, WORKSHOPS, SEMINARS

HISTORY 304. Approaches to History—Required of first-year History Ph.D. students.
4-5 units, Aut (Baker, K)

HISTORY 305. Graduate Workshop in Teaching—Teaching, lecturing, and curriculum development.
1 unit, Spr (Kollmann, N; Roberts, R)

INTERNATIONAL, GLOBAL, AND THEMATIC

See also 327A and 399A.

HISTORY 301. Public Service through Public History—(Same as 201.) Gateway course for the History and Public Service interdisciplinary track. How public service and the study of history are connected. Opportunities for students to apply history to public service. Theory and practice of public service.
5 units, Aut (Camarillo, A; McKibben, C)

HISTORY 303A. Theories of the State from the Ancient World to the Present—(Same as 203A.)
4-5 units, Win (Baker, K; Sheehan, J)

HISTORY 304G. War, Culture, and Society in the Modern Age—(Same as 204G.)
5 units, Aut (Weiner, A)

HISTORY 305B. Quantitative Methods in Historical Research—(Same as 205B.)
4-5 units, Aut (Klein, H)

HISTORY 306E. International History and International Relations Theory—(Same as 202, POLISCI 316.)
5 units, not given this year (Holloway, D)

HISTORY 307E. Origins of Totalitarianism—(Same as 204E.)
4-5 units, Aut (Weiner, A)

HISTORY 308A. Science and Law in History—(Same as 208A.)
4-5 units, Spr (Riskin, J)

HISTORY 309A. Colonial Force and the Postcolonial Subject—How the subaltern's ambiguous narrative style complicates colonial history and anticolonial politics. How a nationalist rhetoric of ethical calmness is interrupted by insurgent traces. How a complex matrix of speech genres, including mimicry, rumor, testimony, irony, repetition, and soliloquy, disturbs colonial force, law, time, and political ethics. Theorizing resistance, archive, and language. The rhetorical tension among nation, community, and subject. Readings include Abamben, Benjamin, Bhabha, Blanchot, Derrida, Fanon, Kierkegaard, Levinas, Ricoeur, Spivak, Taussig, and subalternists.
4-5 units, Win (Kumar, A)

HISTORY 309E. History Meets Geography—Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.
4-5 units, not given this year (Frank, Z)

HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World—The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.
3-5 units, Aut (Wigen, K)

ANCIENT AND MEDIEVAL EUROPE

HISTORY 311A. Family, Gender, and Production in Ancient Rome—(Same as CLASSGEN 220.) Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.
4-5 units, Win (Saller, R)

HISTORY 312. Holy Wars: Medieval Perspectives—(Same as 212.)
4-5 units, Aut (Buc, P)

HISTORY 313. Core Colloquium in Medieval European History
4-5 units, not given this year (Buc, P)

HISTORY 314. Graduate Core Colloquium in Medieval European History
4-5 units, Win (Miller, K)

HISTORY 316. Medieval Antisemitism—(Same as 216.)
5 units, not given this year (Buc, P)

HISTORY 316A. Muslims and Infidels: Islam and the Crusades—(Same as 216A.)
4-5 units, not given this year (Miller, K)

HISTORY 317B. Land of Three Religions: Medieval Spain—(Same as 217B.)
4-5 units, Win (Miller, K)

HISTORY 414A, B. Medieval History
4-5 units, **A:** *Win,* **B:** *Spr (Buc, P)*

5 units, not given this year (Crews, R; Weiner, A)

HISTORY 326G. Civilians and War in Modern Europe—(Same as 226G.)
4-5 units, Spr (Knezevic, J)

HISTORY 326H. Nationalism in the Habsburg Empire, 1848-1918—(Same as 226H.)
4-5 units, Win (Knezevic, J)

HISTORY 327. East European Women and War in the 20th Century—(Same as 227.)
5 units, not given this year (Jolluck, K)

HISTORY 327A. The History of Genocide—(Same as 227A.)
4-5 units, Win (Naimark, N)

HISTORY 328. Circles of Hell: Poland in World War II—(Same as 228.)
5 units, not given this year (Jolluck, K)

HISTORY 329. Poles and Jews—(Same as 229.)
4-5 units, Win (Jolluck, K)

HISTORY 421A. Early Modern Russia
4-5 units, not given this year (Kollmann, N)

HISTORY 422A. Research Seminar on the History of the Russian Empire
4-5 units, not given this year (Crews, R)

HISTORY 422B. Research Seminar in Imperial Russia
4-5 units, not given this year (Crews, R)

HISTORY 424A,B. The Soviet Civilization—Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.
4-5 units, **A:** *Win,* **B:** *Spr (Weiner, A)*

EARLY MODERN AND MODERN EUROPE

See also 332F.

HISTORY 330. Core Colloquium on Early Modern Europe: Ancient Regime—Topics in the social, political, and religious history of Western Europe, 1550-1789, emphasizing France. May be repeated for credit.
4-5 units, Spr (Lougee Chappell, C)

HISTORY 330A. Core Colloquium on Early Modern Europe—Historiographical survey from the Renaissance to the Enlightenment. Topics include the Reformations, European expansion, state and nation building, invention and scientific discovery, intellectual history, and gender. In-depth reviews determined by student interests.
4-5 units, Aut (Stokes, L)

HISTORY 331B. Core Colloquium on Modern Europe: The 19th Century—The major historical events and historiographical debates of the long 19th century from the French Revolution to WW I.
4-5 units, not given this year (Daughton, J)

HISTORY 331C. Core Colloquium on Modern Europe—The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.
4-5 units, Win (Satia, P)

HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History
4-5 units, Aut (Robinson, P)

HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy—Defining features of the world of Leonardo, Machiavelli, and Michelangelo. Intersections of history, politics, art, and literature. The relationship between the Renaissance and the Reformation.
4-5 units, not given this year (Satia, P)

HISTORY 332C. Graduate Research Seminar: The French Revolution—(Same as 432A.) May be repeated for credit.
4-5 units, Win (Baker, K)

HISTORY 332G. When Worlds Collide: The Trial of Galileo—(Same as 232G.)
4-5 units, not given this year (Satia, P)

HISTORY 333. Religion and Politics in Early Modern England—English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War.
4-5 units, not given this year (Como, D)

HISTORY 333C. Two British Revolutions—(Same as 233C.)
4-5 units, not given this year (Como, D)

HISTORY 335. History of European Law, Medieval to Contemporary—(Same as 135.)
5 units, not given this year (Herzog, T)

HISTORY 336. Modern France
4-5 units, not given this year (Daughton, J)

HISTORY 336E. Violence in History and Theory—Methodological challenges associated with defining and analyzing violence in late-19th- and 20th-century contexts. How people witnessed, coped with, and survived violent episodes. Cases of state violence, ethnic and religious conflict, warfare, genocide, and decolonization. The notion of everyday suffering in the contemporary world. Sources include anthropology, sociology, and history.
4-5 units, Spr (Daughton, J)

HISTORY 337. The Holocaust—(Same as 137.)
4-5 units, Spr (Felstiner, M)

HISTORY 338A. Modern Britain: Facing Europe and Empire, Part I—Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.
4-5 units, not given this year (Satia, P)

HISTORY 338B. Modern Britain, Part II—Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.
4-5 units, not given this year (Satia, P)

HISTORY 339D. Capital and Empire—(Same as 239D, HUMNTIES 191S.)
4-5 units, Spr (Satia, P)

HISTORY 339F. Empire and Information—(Same as 239F.)
4-5 units, not given this year (Satia, P)

HISTORY 432A. Graduate Research Seminar: The French Revolution—(Same as 332C.)
4-5 units, Win (Baker, K)

HISTORY 432B. The Enlightenment and the French Revolution, Part II
4-5 units, Spr (Baker, K)

HISTORY 433A,B. European History
4-5 units, not given this year (Sheehan, J)

HISTORY 438. European History Workshop—All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.
1 unit, Spr (Robinson, P)

HISTORY 439A,B. Graduate Research Seminar: Modern Britain and the British Empire
4-5 units, **A:** *Aut,* **B:** *Win (Satia, P)*

HISTORY OF SCIENCE AND TECHNOLOGY

See also 308A.

HISTORY 332F. The Scientific Revolution—(Same as 232F.)
4-5 units, Win (Riskin, J)

HISTORY 341F. History of the Modern Fact—(Same as 241F.)
4-5 units, not given this year (Riskin, J)

HISTORY 341G. History of the Senses—(Same as 241G, STS 134/234.)
4-5 units, not given this year (Riskin, J)

HISTORY 342A. What is Life? The History of a Question—(Same as 242A, HUMNTIES 191R.)
4-5 units, not given this year

HISTORY 343C. 18th-Century Colonial Science and Medicine—(Same as 243C.)
4-5 units, not given this year (Schiebinger, L)

HISTORY 343G. Tobacco and Health in World History—(Same as 243G.)
4-5 units, Aut (Proctor, R)

HISTORY 443A. Human Origins: History, Evidence, and Controversy—(Same as 243S.)
4-5 units, not given this year (Proctor, R)

HISTORY 444C. The History of the Body in Science, Medicine, and Culture—(Same as 244C.)
4-5 units, not given this year (Schiebinger, L)

AFRICA

HISTORY 345A. Core Colloquium: Precolonial Africa
4-5 units, not given this year (Roberts, R)

HISTORY 345B. Core Colloquium African History: The Colonial Period
4-5 units, not given this year (Roberts, R)

HISTORY 345C. Graduate Core Colloquium: Sub-Saharan Africa—Structure and processes of government in sub-Saharan colonial Africa. Historiography of colonial rule; what it meant for rulers and ruled. Why Europeans were in Africa and how alien societies were governed. Partition and conquest; the role of African intermediaries in governance; colonial administrators, the impact of writing; French, British, and Belgian models of governance; and postcolonialism. The abolition of slavery as a window into early colonialism; labor and late colonialism.
4-5 units, Spr (Staff)

HISTORY 347. The Politics and Ethics of Modern Science and Technology—(Same as 257, STS 221.)
4-5 units, not given this year

HISTORY 347E. Health and Society in Africa—(Same as 245E.)
4-5 units, not given this year (Roberts, R)

HISTORY 348. Islam in Africa—(Same as 248.)
4-5 units, Spr (Hanretta, S)

HISTORY 348D. Law and Colonialism in Africa—(Same as 245G.)
4-5 units, not given this year (Roberts, R)

HISTORY 349. History without Documents—(Same as 249.)
4-5 units, not given this year (Hanretta, S)

HISTORY 445A,B. Research Seminar in African History
4-5 units, not given this year

HISTORY 446A,B. Research Seminar: African Nationalism and Beyond—(Same as 246S.)
4-5 units, **A:** *Win,* **B:** *Spr (Hanretta, S)*

HISTORY 448A,B. African Societies and Colonial States—(Same as 248S.)
4-5 units, not given this year (Roberts, R)

THE UNITED STATES

HISTORY 351A. Core in American History, Part I
4-5 units, Aut (Rakove, J)

HISTORY 351B. Core in American History, Part II
4-5 units, Aut (Winterer, C)

HISTORY 351C. Core in American History, Part III
4-5 units, Win (White, R)

HISTORY 351D. Core in American History, Part IV
4-5 units, Win (Freedman, E)

HISTORY 351E. Core in American History, Part V
4-5 units, Spr (Camarillo, A)

HISTORY 351F. Core in American History, Part VI
4-5 units, Spr (Bernstein, B)

HISTORY 352. Creating the American Republic—(Same as 251, LAW 246, POLISCI 321.)
5 units, Win (Rakove, J)

HISTORY 352B. History of American Law—(Same as LAW 318.) From the colonial period to the present. Topics include: slavery and race relations; the evolution of criminal justice and correctional systems; the growth of the legal profession; and the role of the legal system in the development of the economy. The relationship between developments in law and in the larger society. Undergraduates by consent of instructor.
5 units, Win (Friedman, L)

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 252.)
4-5 units, Aut (Bernstein, B)

HISTORY 355A. America in Western Civilization—(Same as 255A.)
4-5 units, Aut (Kennedy, D; Sheehan, J)

HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 256.)
4-5 units, Win (Chang, G)

HISTORY 358. History of Sexuality in the U.S.—(Same as 258; formerly 265A.)
4-5 units, not given this year (Freedman, E)

HISTORY 365. New Research in Asian American History—(Same as 265.)
4-5 units, not given this year (Chang, G)

HISTORY 366. Theoretical Debates in the History of Education—(Same as EDUC 301B.) How and to what purpose should students be educated in America? What is an appropriate curriculum? Do all students deserve or need the same curriculum?
3-4 units, not given this year

HISTORY 460. America in the World—Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects.
4-5 units, Win (Chang, G)

LATIN AMERICA

HISTORY 370. Colonial Latin America—(Same as 170.)
4-5 units, Aut (Herzog, T)

HISTORY 373A. The European Expansion—(Same as 273.)
4-5 units, not given this year (Herzog, T)

HISTORY 375F. Social Change in Latin America Since 1900—(Same as 275F, LATINAM 201/301.)
4-5 units, Aut (Klein, H)

HISTORY 376. Modern Brazil—(Same as 276.)
4-5 units, Spr (Frank, Z)

HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern—(Same as POLISCI 346S.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.
5 units, Aut (Haber, S)

HISTORY 378E. Political Economy of Development—(Same as POLISCI 440B.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.
5 units, Aut (Haber, S)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000—(Same as 279.)
4-5 units, Spr (Frank, Z)

HISTORY 470A,B. Research Seminar in Latin American Social History—How to use primary sources such as government records, estate inventories, and parish records for social history. 470A: methodological readings in social history and the development of a research project. 470B: research and writing of a seminar paper. Prerequisite: consent of instructor.
4-5 units, **A:** *Aut,* **B:** *Win (Frank, Z)*

MIDDLE EAST

See also 385G, 386, 387A.

HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East—The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.
4-5 units, not given this year (Beinin, J)

JEWISH HISTORY

HISTORY 385A. Core in Jewish History, 17th-19th Centuries
4-5 units, not given this year (Rodrigue, A)

HISTORY 385B. Core in Jewish History, 20th Century
4-5 units, not given this year (Zipperstein, S)

HISTORY 385G. Coexistence and Conflict: Jews in Premodern Christian and Muslim Lands—(Same as 185G.)
4-5 units, Aut (Staff)

HISTORY 386. Jews among Muslims—(Same as 286.)
4-5 units, Win (Rodrigue, A)

HISTORY 387A. History of the Israeli-Arab Land Conflict—(Same as 287A.)
4-5 units, Spr (Staff)

HISTORY 486A,B. Graduate Research Seminar in Jewish History
4-5 units, **A:** *Spr,* **B:** *Sum (Rodrigue, A)*

ASIA

See also 309F.

HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West
4-5 units, not given this year (Mullaney, T)

HISTORY 390A. Major Topics in Modern Chinese History—Historical transformations and the development of key temporal, spatial, and categorical concepts, such as nationhood, citizenship, gender, ethnicity, and revolution, through which historical agents in China framed their actions and imbued them with meaning. May be repeated for credit.
4-5 units, Win (Mullaney, T)

HISTORY 391. East Asia in the Early Buddhist Age—(Same as 191.)
4-5 units, not given this year (Lewis, ME)

HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times—(Same as 291A.)
4-5 units, not given this year (Mullaney, T)

HISTORY 391B. The City in Imperial China—(Same as 291B.)
3-5 units, Win (Lewis, M)

HISTORY 391E. Maps, Borders, and Conflict in East Asia—(Same as 291E.)
4-5 units, not given this year (Wigen, K)

HISTORY 392B. Law and Society in Late Imperial China—(Same as 293.)
4-5 units, not given this year (Sommer, M)

HISTORY 392C. Key Topics in Qing History—Graduate colloquium. Goal is to prepare for Ph.D. oral examinations; M.A. students also welcome. Issues include: the ethnic dimension of Qing imperialism; the imperial state's relationship with the peasantry; economic and demographic dynamics; and the impact of Western imperialism.
4-5 units, not given this year (Sommer, M)

HISTORY 392D. Japan in Asia, Asia in Japan—(Same as 292D.)
4-5 units, Win (Uchida, J)

HISTORY 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire—The legacy of the Qing dynasty in the territorial boundaries claimed by the People's Republic of China including the frontier zones that lie outside China proper. How the Qing acquired and ruled its frontier territories. Growth and migration of the Han Chinese population. How the dynasty's Manchu rulers managed ethnic difference. Consequences of Qing expansionism and ethnic statecraft for subject peoples and for the dynasty itself. At what point and by what processes did the Qing become China.
4-5 units, Spr (Sommer, M)

HISTORY 396D. Modern Japan—Fourth in a four-part core colloquium series for graduate students. Major historical problems and historiographic trends in from the Meiji period to the present. Themes include late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.
4-5 units, Spr (Uchida, J)

HISTORY 492. Society in Ancient and Medieval China—Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.
5 units, not given this year (Lewis, ME)

HISTORY 495A,B. Qing Legal Documents—How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.
4-5 units, **A:** *Win,* **B:** *Spr (Sommer, M)*

INDIVIDUAL STUDY

HISTORY 399A. Design and Methodology for International Field Research—(Same as 299X.)
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 399W. Graduate Directed Reading
1-10 units, Aut, Win, Spr, Sum (Staff)

HISTORY 499X. Graduate Research—Units by arrangement. May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BEIJING

OSPBEIJ 44. Discovering Modern Chinese History in Beijing
4 units, Spr (Zhao, D)

CAPE TOWN

OSPGEN 23. History and Politics of South Africa in Transition
4 units, Spr (Simons, M)

OSPGEN 64. A Decade of Majority Rule: Contested Transitions in South Africa
2 units, Aut (Samoff, J)

FLORENCE

OSPFLOR 33. The Americanization of Italy
4 units, Win (Scarpellini, E)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema
5 units, Win (Campani, E)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society
4 units, Aut (Mammarella, G)

KYOTO

OSPKYOTO 42. Scenes In and Around Kyoto
5 units, Spr (Wigen, K)

MOSCOW

OSPMOSC 20. The Soviet Union in World War II
5 units, Aut (Holloway, D)

OSPMOSC 22. Russia and the World
3 units, Aut (Holloway, D)

OXFORD

OSPOXFRD 20. Biography and History: Literary Biography and the Study of the Past
5 units, Spr (Zipperstein, S)

OSPOXFRD 51. Britain in the Era of the Two World Wars
5 units, Win (Tyack, G)

OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970
5 units, Spr (Jackson, A)

OSPOXFRD 221Y. Art and Society in Britain
4-5 units, Aut (Tyack, G)

PARIS

OSPPARIS 26. France: Present and Future
2 units, Aut (Lougee Chappell, C)

OSPPARIS 27. Paris and Politics
5 units, Aut (Lougee Chappell, C)

OSPPARIS 81. France During the Second World War: Between History and Memory
5 units, Win (Virgili, F)

SANTIAGO

OSPSANTG 18. Africans and Afro-Latinos in the Southern Andes
4-5 units, Spr (Cussen, C)

OSPSANTG 23. Colonial Latin America
5 units, Win (Herzog, T)

OSPSANTG 62. Topics in Chilean History
4-5 units, Win (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America
4-5 units, Aut, Spr (Jaksic, I)

PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Jessica Riskin (History)
Committee-in-Charge: Barton Bernstein (History), Joe Corn (History, emeritus), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)
Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History, Clayman Institute for Gender Research)
Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History, Clayman Institute for Gender Research), Richard White (History), Helen Longino (Philosophy)
Associate Professors: Jessica Riskin (History)
Assistant Professors: Sarah Jain (Anthropology), Caroline Winterer (History), Thomas Mullaney (History)
Professor (Research): Rega Wood (Philosophy)
Senior Lecturer: Joseph Corn (History, emeritus)
Lecturers: Tom Ryckman (Philosophy), Margo Horn , John McCaskey
Other Affiliation: Henry Lowood (Stanford University Libraries), Audrey Shafer (Anesthesiology), Larry Zaroff (Anesthesiology, Biomedical Ethics)
Visiting Scholars: Adrienne Mayor (Classics), Darrel Rutkin

Mail Code: 94305-2024
Email: rrogers@stanford.edu
Web Site: http://HPST.stanford.edu

Courses in History and Philosophy of Science and Technology have the subject code HPS. For a complete list of subject codes, see Appendix.

The Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program focusing on historical and contemporary aspects of science, medicine, and technology. Graduate degrees at the doctoral level are offered through the departments of History and Philosophy; master's degrees are offered through affiliated departments and programs, principally Classics, Anthropology, English, and Modern Thought and Literature. The program's courses span the period from antiquity to the late 20th century, with emphasis on: ancient science; Renaissance science; the scientific revolution; Enlightenment and transatlantic science; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; and gender, science, and technology. These courses are designed for students looking for a humanistic perspective on the sciences and for those trying to understand the relationship of the sciences to humanistic knowledge.

Stanford is surrounded by archives for the recent history of science and technology. Stanford University Libraries has rich holdings in Special Collections for the Scientific Revolution, as well as the modern and contemporary study of science and technology. The University is in close proximity to the California Academy of Sciences, the Exploratorium, the Computer History Museum, and the Tech Museum. Graduate students can take advantage of faculty, classes, and archives at UC Berkeley through Stanford's exchange program.

The core of the community is the colloquium series which brings together faculty and students several times a quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies.

UNDERGRADUATE DEGREES

Students who wish to pursue the history and philosophy of science and technology should consider a major in one of the following: the Department of History which offers an interdisciplinary track in History, Science, and Medicine; the Department of Philosophy which offers a degree field in History and Philosophy of Science; or the Program in Human Biology where a student can craft an individual area of concentration in the History of Science and Medicine. Course work in science, technology, and medicine or in ancient science and philosophy can be arranged with the departments of Anthropology and Classics respectively. Alternatively, students may consult with a member of the committee-in-charge to construct an Individually Designed Major. The major must conform to the requirements for Individually Designed Majors; see the "Individually Designed Majors" section of the bulletin.

GRADUATE DEGREES

Students can pursue a Ph.D. specializing in the history and philosophy of science and technology through the departments of History and Philosophy. Students can pursue an M.A. specializing in the history and philosophy of science and technology through any of the participating departments and programs. In addition, students may also participate in the HPST program on a non-degree basis. Students should consult departmental descriptions for the details of graduate degree requirements specific to their main department. They are also encouraged to design an interdisciplinary component in their program of studies, drawing on the most relevant classes across the humanities, sciences, and engineering which allow them to connect their discipline-specific work to a broader understanding of science and technology as historical and contemporary phenomena. Prospective students should work closely with their advisers in developing this aspect of their program of studies.

COURSES

INTRODUCTORY

HPS 60. Introduction to Philosophy of Science—(Same as PHIL 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerbend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
5 units, Aut (Longino, H)

HPS 61. Science, Religion, and the Birth of Modern Philosophy—(Same as PHIL 61.) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
5 units, Win (Friedman, M)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

PHIL 16N. Values and Objectivity
3 units, Aut (Ryckman, T)

SCIENCE IN HISTORY

This sequence is designed to introduce students to the history of science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

COGNATE COURSES

CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money
4-5 units, Spr (Netz, R)

HISTORY 31. Science, Technology, and Art: The Worlds of Leonardo
5 units, Spr (Rutkin, D)

MEDICINE IN HISTORY

This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

HPS 156. History of Women and Medicine in the United States—Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing. GER:EC-Gender
5 units, Aut (Horn, M)

COGNATE COURSES

HISTORY 243G/343G. Tobacco and Health in World History
4-5 units, Aut (Proctor, R)

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

COGNATE COURSES

PHIL 107/207. Plato and Heraclitus
3 units, not given this year

PHIL 115/215. Foundations of Medieval Psychology
3-5 units, Spr (Wood, R)

PHIL 163/263. Significant Figures in Philosophy of Science
4 units, not given this year

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
4 units, Aut (Ryckman, T)

PHIL 165/265. Philosophy of Physics
4 units, Spr (Ryckman, T)

PHIL 167A/267A. Philosophy of Biology
4 units, not given this year

PHIL 167B/267B. Philosophy, Biology, and Behavior
4 units, Win (Longino, H)

PHIL 184F/284F. Feminist Theories of Knowledge—(Same as FEMST 166.)
4 units, not given this year

PHIL 224. Kant's Philosophy of Physical Science
4 units, Win (Friedman, M)

PHIL 360. Core Seminar in Philosophy of Science
4 units, alternate years, not given this year

PHIL 365. Seminar in Philosophy of Science: Structural Realism
4 units, not given this year

ADVANCED

HISTORICAL PERSPECTIVES ON SCIENCE

The following courses focus on specific episodes in or approaches to the history of science.

HPS 154. What is Science? Explaining Nature from Pythagoras to Popper—How many great changes in science were accompanied by changes in method. Case studies of scientific practice from ancient Greece to the 20th century; how theory and practice have influenced each other. What kinds of science and technology emerged under different methods; how science influenced ideas about knowledge, discovery, and truth. What is or is not science, such as the debate over intelligent design.
3-5 units, Aut (McCaskey, J)

COGNATE COURSES

FRENGEN 295. Science, Technology, and Society in Europe and the U.S.: Ethical Debates and Controversies
3-5 units, Win (Dupuy, J)

HISTORY 208A/308A. Science and Law in History
4-5 units, Spr (Riskin, J)

HISTORY 232F/332F. The Scientific Revolution
4-5 units, Win (Riskin, J)

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo
4-5 units, not given this year

HISTORY 241F/341F. History of the Modern Fact
4-5 units, not given this year

HISTORY 241G/341G. History of the Senses—(Same as STS 134/234.)
4-5 units, not given this year

HISTORY 241S. Science and Culture Wars
5 units, not given this year

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

HPS 199. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

HPS 201. HPST Colloquium—Several meetings per quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies. Required of students participating in the program. See http://hpst.stanford.edu/colloquia.html for times and locations. May be repeated for credit.
1 unit, Aut, Win, Spr (Riskin, J)

HPS 299. Graduate Individual Work—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

CASA 132. Science, Technology, and Gender
3-5 units, not given this year

HISTORY 243C/343C. 18th-Century Colonial Science and Medicine
4-5 units, not given this year (Schiebinger, L)

HISTORY 243S/443A. Human Origins: History, Evidence, and Controversy
4-5 units, not given this year

HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
4-5 units, not given this year

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts
3 units, Aut (Zaroff, L)

OVERSEAS STUDIES

These courses are approved for the History and Philosophy of Science and Technology major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

FLORENCE

OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought
5 units, Win (Galluzzi, P)

PROGRAM IN HUMAN BIOLOGY

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Luigi Cavalli-Sforza (Genetics), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biological Sciences), Carol Winograd (Medicine)
Director: Carol Boggs (Biological Sciences)
Associate Director: Shirley Feldman (Psychiatry and Behavioral Sciences)
Professors: William H. Durham (Anthropology), Russell D. Fernald (Biological Sciences), Uta Francke (Genetics), Margaret Fuller (Developmental Biology), Lawrence H. Goulder (Economics), H. Craig Heller (Biological Sciences), Richard Klein (Anthropology, Biological Sciences), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopedic Surgery), Roeland Nusse (Developmental Biology), Natalie Rasgon (Psychiatry and Behavioral Sciences), Robert Sapolsky (Biological Sciences), Stephen Schneider (Biological Sciences), Matthew Scott (Developmental Biology), Marcia Stefanick (Medicine), Shripad Tuljapurkar (Biological Sciences), Irving Weissman (Pathology), Jeffrey Wine (Psychology), Paul Wise (Pediatrics), Arthur B. Wolf (Anthropological Sciences)
Associate Professors: Firdaus Dhabhar (Psychiatry and Behavioral Sciences), Anne Fernald (Psychology), Paul Fisher (Neurology and Neurological Sciences, Pediatrics), James Fox (Anthropology), John Rick (Anthropology), Thomas Robinson (Pediatrics, Medicine), Randall Stafford (Medicine), William Talbot (Developmental Biology)
Assistant Professors: Melissa Brown (Anthropology), David DeGusta (Anthropology), Daniel Garza (Orthopedic Surgery, Emergency Medicine), James H. Jones (Anthropology), Norman G. Miller (Medicine), Michael Ramscar (Psychology)
Associate Professors (Research): David Katzenstein (Medicine), David Lyons (Psychiatry and Behavioral Sciences)
Assistant Professor (Research): Christopher Gardner (Medicine)
Professor (Teaching): Carol Boggs (Biological Sciences)
Associate Professors (Teaching): Donald Barr (Sociology), Catherine Heaney (Psychology, Medicine), David Magnus (Pediatrics), Ellen Porzig (Developmental Biology), Robert Siegel (Microbiology and Immunology)
Other Teaching Faculty and Staff: William Abrams, Wesley F. Alles (Medicine), James Boyd, Judy Chu (Education), Gerda Endemann (Biological Sciences), Anne Firth-Murray, Anne Friedlander (Stanford Center on Longevity), Geoffrey Heller, Renu Heller, Katherine Ann Horsburgh (Anthropology), Mary Therese Jacobson (Obstetrics and Gynecology), Michaela Kiernan (Medicine), Nicole Dudukovic Kuhl (Core Course Coordinator), Michael Mastrandrea (Earth Sciences), Lynn Rothschild, Norman Ruby (Biological Sciences), Merritt Ruhlen (Anthropology), Darvin Scott Smith, James Truncer (Anthropology), Katherine E. Williams (Psychiatry and Behavioral Sciences), Jennifer Wolf (Education), Laraine Zappert (Psychiatry and Behavioral Sciences), Larry Zaroff (Anesthesiology, Biomedical Ethics), Abigail Zuger (English)
Course Associates: Dana Goverman, Stacey Kallem, Lauren Rimoin, Andrew Rogers, Joseph Sanford, Isabel Shelton-Mottsmith, Jenny Staves, Michelle Wilson
Advising Chairs: Catherine Heaney, Robert Siegel
Honors Chair: Shirley Feldman

Program Offices: Building 20
Mail Code: 94305-2080
Phone: (650) 725-0336
Email: cacciari@stanford.edu (Student Services)
Web Site: http://humbio.stanford.edu/

Courses given in Program in Human Biology have the subject code HUMBIO. For a complete list of subject codes, see Appendix.

The Program in Human Biology is an interschool, interdepartmental, undergraduate major. The program's mission is to provide an interdisciplinary approach to understanding the human being from biological, behavioral, social, and cultural perspectives.

The program seeks: (a) to provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships, and (b) to explore how this knowledge, in conjunction with studies in other fields, can be applied to formulate and evaluate health, environmental, and other public policies that influence human welfare. To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a roadmap of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at http://humbio.stanford.edu/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 84 units in the major divided among four levels of courses:

1. *Fundamental Program*: at least 38 units, to include
   Human Biology Core (30 units)
   Statistics (4-5 units)
   Internship (HUMBIO 197; 4 units)

   The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See "Required Core" below for more information. HUMBIO 4B fulfills the policy requirement of the major. Statistics may be selected from courses such as STATS 60 or 141, PSYCH 10, SOC 181B, and BIOSCI 141. For questions about other statistics courses that might fulfill this requirement, see the program office. The core and statistics courses must be taken for a letter grade by majors. The internship requirement, an independent field experience project, is graded satisfactory/no credit only.
2. *Foundation Courses*: 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. A maximum of 10 premed units (from the chemistry, physics, and calculus series, and biology lab courses) are allowed.
3. *Area of Concentration*: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. Examples of numerous possible areas of concentration are available in the program's student advisers' office or at http://humbio.stanford.edu/student_areas.html.
4. *Upper-Division Courses:* students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those listed as cognate courses from another department.

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition the director to declare later than Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans. To minor in Human Biology, students must take the core curriculum (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189. These must be taken for a minimum letter grade of 'C-'. Courses that count towards the fulfillment of major requirements may not be counted towards the minor. Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of the Autumn Quarter to graduate the following Spring Quarter).

HONORS PROGRAM

The honors program in Human Biology affords qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including: topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the *Human Biology Honors Handbook,* the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair. Courses of interest to honors students include: HUMBIO 193, Research in Human Biology, and HUMBIO 194, Honors. Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194. Admission to the honors program is by submission of an intention to undertake honors research in early March, followed by the application in April of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology Honors Poster Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate residence for the Human Biology Academic Theme House, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. They also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, the Advising Extravaganza, Beyond Hum Bio, and declaration workshops. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program's faculty advising chairs and the student services coordinator to review the program's policies and specific student inquiries and petitions concerning the program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. AU indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

The faculty and staff of Human Biology prepare a student handbook, on the web at http://humbio.stanford.edu/, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for Human Biology majors.

REQUIRED CORE

Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses.

HUMBIO 2A,B. Genetics, Evolution, and Ecology: Culture, Evolution, and Society

HUMBIO 2A. Genetics, Evolution, and Ecology—Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER:DB-NatSci

5 units, Aut (Boggs, C; Durham, W; Francke, U)

HUMBIO 2B. Culture, Evolution, and Society—Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:DB-SocSci

5 units, Aut (Klein, R; Brown, M)

HUMBIO 3A,B. Cell and Developmental Biology: Behavior, Health, and Development

HUMBIO 3A. Cell and Developmental Biology—The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. GER:DB-NatSci

5 units, Win (Fuller, M; Kaiser, A; Nusse, R; Scott, M; Talbot, W)

HUMBIO 3B. Behavior, Health, and Development—Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. GER:DB-SocSci

5 units, Win (Lyons, D; Fernald, A)

HUMBIO 4A,B. The Human Organism: Environmental and Health Policy Analysis

HUMBIO 4A. The Human Organism—Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER:DB-NatSci

5 units, Spr (Heller, C; Fernald, R)

HUMBIO 4B. Environmental and Health Policy Analysis—Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy. GER:DB-SocSci, WIM

5 units, Spr (Goulder, L; Barr, D)

ADDITIONAL INTRODUCTORY OFFERINGS

HUMBIO 3Y. Practicum in Child Development—Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 3B. (AU)

1 unit, Win (Staff)

HUMBIO 6. Human Origins—(Same as ANTHSCI 6/206, BIOSCI 106.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER:DB-NatSci

5 units, Win (Klein, R)

HUMBIO 14. Introduction to Anthropological Genetics—(Same as ANTHSCI 14.) How genetic methods address anthropological questions. Examples include the evolutionary relationships between humans and the apes, the place of the Neanderthals in human evolution, the peopling of the New World, ancient DNA, the genetics of ethnicity, forensic genetics, genomics, behaviorial genetics, and hereditary diseases. GER:DB-NatSci

3-5 units, Win (Jobin, M), Spr (Horsburgh, K)

HUMBIO 21. Introduction to Brain and Behavior—(Same as BIOSCI 20.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER:DB-NatSci

3 units, alternate years, not given this year (Fernald, R)

HUMBIO 25. Human Ecology of the Amazon—(Same as ANTHSCI 25.) The diversity of peoples and cultures in the Amazon Basin and the ecosystems in which they live. Themes in ecological anthropology of Amazonia including limiting factors, the protein debate, indigenous knowledge and resource management, and anthropogenic modification. Ethnographic, historical, and archeological evidence. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

HUMBIO 27. Traditional Chinese Medicine—The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the five elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

1 unit, Spr (Golianu, B)

HUMBIO 82A. Qualitative Research Methodology—Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

3 units, Win, Spr (Wolf, J)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research—For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

3 units, Aut (Wolf, J)

STANFORD INTRODUCTORY SEMINARS

HUMBIO 84Q. Social Justice, Responsibility, Health—Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

HUMBIO 86Q. Love: An Exploration—Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Win (Murray, A)

HUMBIO 87Q. Women and Aging—(Same as MED 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (Winograd, C)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior—Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER:DB-NatSci

3 units, Aut (Fernald, R)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine—(Same as ORTHO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies. Write-2

3 units, Aut, Spr (Matheson, G)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice—Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.

4 units, Aut (Zaroff, L)

ADVANCED

Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. Courses numbered 100 through 189 fulfill the Human Biology upper-division requirement.

HUMBIO 111. 21st-Century Environmental Problems, Policies, Conflict, and Progress—Interdisciplinary. What environmental problems has society solved and how? What problems resist solutions and why? Ecological, legal, economic, and political analysis. Students work on a policy problem of their own choosing. Prerequisite: Human Biology core or equivalent, or consent of instructor. Recommended: courses in environmental economics, policy, and management.

3 units, Aut (Boyd, J)

HUMBIO 112. Conservation Biology—(Same as BIOSCI 144.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. 4 units if taken with a service learning component. Prerequisite: BIOSCI 101, or BIOSCI 43 or HUMBIO 2A with consent of instructor. GER:DB-NatSci

3-4 units, Win (Boggs, C; Launer, A)

HUMBIO 113. Environmental Performance: Measuring Nature's Benefits—How to measure and report environmental outcomes. Biophysical and economic approaches to performance measurement. How environmental data and models are used in science and public policy. Students develop methods to track and communicate the benefits of nature. Prerequisite: Human Biology core or equivalent, or consent of instructor. Recommended: courses in landscape or conservation ecology, and environmental management and economics.

3 units, Spr (Boyd, J)

HUMBIO 114. Environmental Change and Emerging Infectious Diseases—(Same as ANTHSCI 179/279.) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER:DB-SocSci

3-5 units, Aut (Durham, W; Jones, J)

HUMBIO 116. Controlling Climate Change in the 21st Century—(Same as BIOSCI 147/247, EARTHSYS 147/247.) The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes, and tradable permits; joint implementation, consensus, and division in the EU; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. GER:DB-NatSci

3 units, alternate years, not given this year

HUMBIO 117. Human Behavioral Ecology—(Same as ANTHSCI 163/263.) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci

3-5 units, Aut (Bird, R)

HUMBIO 118. Ecological Anthropology—(Same as ANTHSCI 164/264.) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER:DB-SocSci

3-5 units, not given this year

HUMBIO 119. Demography: Health, Development, Environment—(Same as BIOSCI 102.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biological Sciences or Human Biology core; or consent of instructor. GER:DB-SocSci

3 units, not given this year

HUMBIO 120. Health Care in America: Organizations and Institutions that Shape the Health Care System—Focus on health policy and health care delivery. Options for health care reform. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, not given this year

HUMBIO 120A. American Health Policy—Issues in health care policy making, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of universal health insurance in light of past experience and stakeholder views. Student presentations. Prerequisites: Human Biology core or equivalent, and 120, or consent of instructor. GER:DB-SocSci

3 units, Spr (Heller, G)

HUMBIO 121. Economics of Health Improvement in Developing Countries—(Same as ECON 127, MED 262.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.

5 units, Win (Miller, N)

HUMBIO 122. International Health Policy: Comparative National Health Care Systems—The structure and policies of national health care systems in Europe, Canada, China, and Japan. How other countries have addressed issues of organization, finance, and allocation of scarce health care resources. Limited enrollment. Prerequisite: 120 or consent of instructor.

4 units, Win (Heller, G)

HUMBIO 122S. Social Class, Race, Ethnicity, Health—Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access.

4 units, given next year

HUMBIO 123. Obesity in America: Clinical and Public Health Implications—Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Case studies. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Win (Stafford, R; Kiernan, M)

HUMBIO 124. Fat Nutrition and Current Health Concerns—Relationships between dietary fats and heart disease, cancer, obesity, diabetes, and fitness. Proposed benefits of omega-3 fats and antioxidants. Historical and economic influences on fat nutrition. Prerequisite: 3A; pre- or corequisite: 4A; preference to students who have completed 4A. Recommended: 130.

3 units, Spr (Endemann, G)

HUMBIO 125. Current Controversies in Women's Health—(Same as INDE 256.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Jacobson, M; Stefanick, M)

HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives—Disease prevention and health promotion topics pertinent to different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; obesity, nutrition, and stress; young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness programs; and environmental and international issues. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Stefanick, M)

HUMBIO 127A. Community Health: Assessment and Planning I-Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques. Prerequisite: 4B or equivalent, or consent of instructor.

4 units, alternate years, not given this year

HUMBIO 127B. Community Health: Assessment and Planning II—Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Prerequisite: 4B or equivalent, 127A, or consent of instructor.

4 units, alternate years, not given this year

HUMBIO 128. Community Health Psychology—(Same as PSYCH 101.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

HUMBIO 129. Critical Issues in International Women's Health—Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. Prerequisites: Human Biology core or equivalent or consent of instructor. GER:EC-Gender

4 units, Win (Murray, A)

HUMBIO 129S. International Health—Concepts of health and wellness and major descriptors and determinants of health status. International organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of current and previous programs and projects. Cultural, economic, and political contexts in international health. Prerequisites: Human Biology core or equivalent or consent of instructor.

4 units, Win (Wise, P)

HUMBIO 130. Human Nutrition—The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.

4 units, Spr (Gardner, C)

HUMBIO 131. Interdisciplinary Design for Agile Aging—(Same as CS 379Y, MED 279Y.) Perspectives from computer science, design, social and behavioral sciences, physiology, geriatrics, and biodesign to develop projects that address the potential of people to maintain vitality and mobility as they age. New ways to integrate computer and device technologies with behavioral and social interventions. Focus is on small projects. Enrollment limited. Prerequisite: application.

3-4 units, Win (Winograd, C; Winograd, T; Friedlander, A; Yock, P)

HUMBIO 132. Functional Anatomy of Exercise—Interdisciplinary: physiology, pathology, and biomechanics. Anatomy of the body's major joints in the context of exercise and movement emphasizing adaptations that occur with intensity and nature of exercise, age, and disease. Students work in cooperative groups with students at the Gothenburg School of Sports Science in Sweden to produce original research on an aspect of biomechanics and sport. Sources include the Stanford Human Performance Laboratory. Enrollment limited to 40. Prerequisites: 139 or consent of instructor.

4 units, Spr (Garza, D)

HUMBIO 133. Human Physiology—(Same as BIOSCI 112/212.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biological Sciences or Human Biology core. GER:DB-NatSci
4 units, Win (Garza, D)

HUMBIO 135. Exercise Physiology—How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology core, Biology core, or equivalent, or consent of instructor.
4 units, Aut (Friedlander, A)

HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism—Reading and discussion of scientific research on student-selected topics. Emphasis is on study design. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: 135 and consent of instructor.
3 units, not given this year

HUMBIO 139. Sports Medicine—(Formerly 159.) Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise; and the use of technology in modern sports science. Sources include physiology, nutrition, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, drugs in sport, and aging. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor.
4 units, Aut (Garza, D)

HUMBIO 140. Sex Differences in Human Physiology and Disease—(Same as MED 240, OBGYN 240.) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Consequences of sex hormones and environmental factors that differ between men and women in systems including the musculoskeletal, neurological, cardiovascular, and immunological. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor.
3 units, Win (Stefanick, M)

HUMBIO 141. Human Developmental Biology and Medicine—(Same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.
4 units, not given this year

HUMBIO 142. Adolescent Development—Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisite: 3B or PSYCH 1, or consent of instructor.
4 units, Win (Feldman, S; Chu, J)

HUMBIO 142A. Seminar on Problem Behavior in Adolescence—Why adolescence has such a high casualty rate. Risk and protective factors for problem outcomes; prevention and treatment programs. Focus is on externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sex-related problems (teen pregnancy, date violence, STDs). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.
4 units, Spr (Feldman, S)

HUMBIO 144. Boys' Psychosocial Development—(Same as EDUC 143.) From early childhood through adolescence. Emphasis is on how boys' lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-Gender
4 units, Spr (Chu, J)

HUMBIO 145. Birds to Words: Cognition, Communication, and Language—(Same as PSYCH 137/239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci
4 units, Aut (Fernald, A; Ramscar, M)

HUMBIO 147. Population and Family History in Europe and China—Comparison of social and physical aspects of reproduction. Emphasis is on identifying and explaining differences in age at marriage, acceptable forms of marriage, marital fertility, and illegitimacy. Prerequisite: Human Biology core or equivalent, or consent of instructor.
4 units, Aut (Wolf, A)

HUMBIO 148. Kinship and Marriage—Marriage as the site at which biology and culture meet and contend, and kinship as the variable outcome of the encounter. Comparative examination of societies in Oceania, Africa, and E. Asia. Prerequisite: Human Biology core or equivalent, or consent of instructor.
4 units, Spr (Wolf, A)

HUMBIO 149. Aging: From Biology to Social Policy—(Same as ANTHSCI 171.) What people can expect when they join the ranks of the elderly. Issues include social security, medical care, lifespan, and the cultural, social, and economic consequences of a large elderly population in the U.S. and other countries. Films, service learning component. GER:DB-SocSci
5 units, Win (Barnett, C)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges—Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy initiatives aimed at halting disease transmission. Focus is on World Health Organization tropical disease targets including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiais, and intestinal helminthes. Guest lecturers with expertise in disease control. Prerequisite: Human Biology core or equivalent, or consent of instructor.
4 units, Spr (Smith, D)

HUMBIO 154. Cancer Epidemiology—Epidemiological methods relevant to human research in cancer. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research. Prerequisite: Human Biology core or equivalent, or consent of instructor.
4 units, Win (Fisher, P)

HUMBIO 155B. The Vaccine Revolution—(Same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 155H, 155V (formerly 115A).

6 units, alternate years, not given this year

HUMBIO 155H. Humans and Viruses I—(Same as MI 155H.) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, Aut (Siegel, R)

HUMBIO 156. Global HIV/AIDS—(Same as MED 256.) Public health, policy, and research issues. Resources at Stanford and institutions such as government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Student projects. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Katzenstein, D)

HUMBIO 157. The Stem Cell: Science, Ethics, and Politics—(Same as DBIO 257.) The biology of stem cells. Their role in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisite: 2A,B or consent of instructor.

3 units, Spr (Nusse, R; Fuller, M; Porzig, E)

HUMBIO 158. The Human Genome and Disease—(Same as BIOSCI 109A/209A.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER:DB-NatSci

3 units, Win (Heller, R)

HUMBIO 160. Human Behavioral Biology—(Same as BIOSCI 150/250.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER:DB-NatSci

5 units, Spr (Sapolsky, R), alternate years, not given next year

HUMBIO 161. The Neurobiology of Sleep—(Same as BIOSCI 149/249.) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER:DB-NatSci

4 units, not given this year

HUMBIO 162. The Neuroscience and Psychology of Women's Health—Mental health from the perspectives of neuroscience, psychology, and human physiology. Major depression, bipolar, and obsessive compulsive disorders; how the female reproductive system affects the clinical presentation and course of these disorders. Eating disorders, substance abuse and dependence, and sexual trauma within a biopsychosocial model. Pharmacologic and therapeutic treatment of illnesses. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Win (Williams, K; Rasgon, N; Zappert, L)

HUMBIO 163. Neural Systems and Behavior—(Same as BIOSCI 163/263.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIOSCI 42, HUMBIO 4A, or equivalents. GER:DB-NatSci

4 units, Aut (Fernald, R), alternate years, not given next year

HUMBIO 165. Promoting Behavior Change—(Same as EARTHSYS 165.) How to apply principles of behavioral change to a real world public health problem: climate change and environmental sustainability. Sources include theory, research, and practice from perspectives such as social and cognitive psychology, media and communication, education, behavioral medicine, social marketing, and consumer behavior. Student groups create an intervention to help high school students reduce their environmental footprint. Research performed in local high schools to develop optimally feasible, acceptable, and effective interventions. Prerequisite: Human Biology core or equivalent, or consent of instructor.

4 units, Spr (Robinson, T)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy—Combines academic study with student participation in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Spr (Abrams, W)

HUMBIO 172A. Children, Youth, and the Law—How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, alternate years, not given this year

HUMBIO 172B. Children, Youth, and the Law—How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

5 units, Win (Abrams, W), alternate years, not given next year

HUMBIO 173. Science, Business, Law: How Scientific Discovery and Innovation are Protected and Brought to Market—The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; and how ideas are commercialized and brought to market. What kinds of research, discovery, and innovation are protected; who has rights that can be protected; what kinds of rights can be protected, and the kinds of protections that apply; how inventions are commercialized; and the success and failure of businesses based on scientific discovery. Prerequisite: Human Biology core or equivalent, or consent of instructor.

3 units, Aut (Abrams, W)

HUMBIO 174. Foundations of Bioethics—Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Prerequisite: Human Biology core or equivalent, or consent of instructor. GER:EC-EthicReas
3 units, Win (Magnus, D)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts—The differences between disease as pathology and as the patient's experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying. Prerequisite: Human Biology core or equivalent, or consent of instructor.
3 units, Aut (Zaroff, L)

HUMBIO 175S. Novels and Theater of Illness—Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state. Prerequisite: Human Biology core or equivalent, or consent of instructor.
4 units, Spr (Zaroff, L)

HUMBIO 176. Writing Medicine—(Same as ENGLISH 185A.) Classic and contemporary narrative prose about medicine. Focus is on illness and recovery, and good writing. Topics include being a patient, being a doctor, chronic illness, pain, modern medicine, and the modern hospital. Authors include Didion, Fadiman, Styron, Tolstoy, Williams, and contemporary doctors and patients.
3 units, Win (Zuger, A)

HUMBIO 178. Medical Anthropology—(Same as ANTHSCI 170.) The crosscultural study of the health beliefs and healing systems around the world. How social processes shape human health. GER:DB-SocSci, EC-GlobalCom
3 units, not given this year

HUMBIO 180. Human Osteology—(Same as ANTHSCI 133A/233A.) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER:DB-NatSci
5 units, Win (DeGusta, D)

HUMBIO 181. The Evolution of Human Diet—(Same as ANTHSCI 173A/273A.) Human dietary choices and their consequences from ecological, epidemiological, and evolutionary perspectives. Topics include foraging theory, human community ecology, evidence for evolutionary design in physiological and motivational systems relating to feeding and nutrition, epidemiology of nutritional disorders, subsistence economies and modes of production, reduction diets, and health diets. GER:DB-SocSci
5 units, not given this year

HUMBIO 183. Astrobiology and Space Exploration—Evolution in the context of space and time, focusing on the emergence of life, intelligence, and civilization on Earth and possibly elsewhere. The biological, psychological, sociological, and philosophical issues of human space exploration. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Guest lectures by scientists and astronauts from NASA Ames Research Center, Stanford, SETI, and Bay Area universities. Prerequisite: two college-level science courses such as Human Biology core, or consent of instructor.
3-4 units, Win (Rothschild, L)

HUMBIO 186. Biological Clocks—(Same as BIOSCI 135.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER:DB-NatSci
3 units, Spr (Heller, C; Ruby, N)

HUMBIO 187. Human Diversity: A Linguistic Perspective—(Same as ANTHSCI 112.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom
3 units, Spr (Ruhlen, M)

HUMBIO 189A. The Evolution of Darwin—Intellectual and physical milieus that produced Darwin. Intellectual foundations of the development of the theory of evolution. Darwin's travels aboard the Beagle and within the UK and their impact on his ideas.
3 units, not given this year

HUMBIO 193. Research in Human Biology—Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be repeated for credit; petition required for more than 5 units. Prerequisite: application available in student services office.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 194. Honors—Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.
1-10 units, Aut, Win, Spr (Staff)

HUMBIO 197. Human Biology Internship—Limited to and required of Human Biology majors. The internship is a supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. May be repeated for credit. Prerequisite: Human Biology core.
1-4 units, Aut, Win, Spr (Staff)

HUMBIO 198. Senior Tutorial in Human Biology—Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 199. Directed Reading/Special Projects—Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.
1-4 units, Aut, Win, Spr (Staff)

HUMBIO 200. Teaching of Human Biology—For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 146. Population Studies
1 unit, Win (Feldman, M)

DBIO 202. Assisted Reproductive Technologies—(Same as OBGYN 202.)
1-3 units, Win (Porzig, E; Behr, B)

EDUC 369. Human Cognitive Abilities—(Same as PSYCH 133.)
3 units, not given this year

ME 280. Skeletal Development and Evolution
3 units, Spr (Carter, D)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60.)
5 units, Aut (Longino, H)

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.)
4 units, Win (Jaworska, A)

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.)
5 units, not given this year

POLISCI 133. Ethics and Politics of Public Service—(Same as ETHICSOC 133.)
5 units, Aut (Reich, R)

OVERSEAS STUDIES

Descriptions of these courses are in the "Overseas Studies" section of this bulletin, at http://osp.stanford.edu/, or at the Overseas Studies office, 126 Sweet Hall. Students overseas are also encouraged to participate in internships and independent research.

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems
3 units, Aut (Hoegh-Guldberg, O; Ward, S; Arrigo, K; Anthony, K)

OSPAUSTL 20. Coastal Resource Management
3 units, Aut (Johnstone, R; Chiffings, T)

OSPAUSTL 30. Coastal Forest Ecosystems
3 units, Aut (Hall, J; Duke, N)

CAPE TOWN

OSPGEN 21. Public Health and Primary Health Care in a Changing Community Context
4 units, Spr (Stanton, T)

PARIS

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
4-5 units, Win (Fessler, J)

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

The Individually Designed Major program (IDM) is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. See the "School of Engineering" section of this bulletin for information about the IDM in Engineering.

The program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Proposals for the IDM should be intellectually coherent majors designed by the students themselves with the assistance of faculty members of their choice. The primary adviser must be an Academic Council member. The IDM major requires a minimum of 75 units, all in courses at or above the 100 level, and a minimum GPA of 3.5. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting department or program. IDM students are required to complete a capstone requirement in the form of an honors project. The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year. Detailed information about proposal procedures and the procedure for an honors project is available at the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences, Building 1.

INTERDISCIPLINARY STUDIES IN HUMANITIES

Director: Gregory Freidin

Steering Committee: (Chair) Gregory Freidin (Slavic Languages and Literatures); Lanier Anderson (Philosophy), Jean-Marie Apostolidès (French and Italian, Drama), Keith Baker (History), Helen Brooks (English, Interdisciplinary Studies in Humanities), Carrie Denning (Humanities Honors Program student representative), Al Duncan (Graduate Program in Humanities student representative), Branislav Jakovljevic (Drama), Joshua Landy (French and Italian), Hilton Obenzinger (English, VPUE), Pavle Levi (Art and Art History), Rush Rehm (Drama and Classics), Stephanie Schmidt (Graduate Program in Humanities student representative), Joan Resina (Spanish and Portuguese), Anne Schiff (Humanities Honors Program student representative), Brent Sockness (Religious Studies)

Department Offices: Building 240
Mail Code: 94305-2152
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/group/HSP/GPH/

Courses given in Interdisciplinary Studies in Humanities have the subject code HUMNTIES. For a complete list of subject codes, see Appendix.

Humanities, including humanistic social sciences, concern themselves with human cultures, their histories and varieties of cultural expression, and the analysis of these phenomena. At the basis of the humanities is the awareness of the tradition of humanistic discourse, its arts and letters, philosophical and social thought, and major texts from ancient to modern times. Students in the program are introduced to foundational works in their historical context from the perspective of disciplines such as literary and historical studies including cultural, intellectual, social, and art history, philosophy, religious studies, and the humanistic social sciences. The program's mission is to help students locate their disciplinary perspectives and subject matter within the humanistic tradition at large, to provide them with mentoring and advising, and to make available to them a community of peers pursuing similar interests regardless of disciplinary concentrations.

Interdisciplinary Studies in Humanities is responsible for the following programs:

1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
   a) Interdisciplinary Major
   b) Interdisciplinary Major for Premeds
   c) Interdisciplinary Major in Digital Humanities
   d) Interdisciplinary Major in Philosophical and Literary Thought
3. Graduate Program in Humanities
   a) Master of Arts
   b) Joint Ph.D.

The following programs share the administrative facilities with Interdisciplinary Studies in Humanities:

1. American Studies (see the "American Studies" section of this bulletin)
2. Medieval Studies (see the "Medieval Studies" section of this bulletin)
3. Program in Modern Thought and Literature (see the "Modern Thought and Literature" section of this bulletin)

UNDERGRADUATE PROGRAMS

To declare the major in Humanities, a student must first have been accepted into the Humanities Honors Program. See the "Honors Program" section below.

BACHELOR OF ARTS

THE MAJOR IN INTERDISCIPLINARY STUDIES IN HUMANITIES

A student who is a member of the Humanities Honors Program may choose to pursue the B.A. degree in Humanities through one of four concentration options: (1) the standard student designed thematic concentration; (2) the concentration designed for students who also plan to complete the established premedical curriculum for careers in the health sciences; (3) the concentration in digital humanities; or (4) the concentration in philosophical and literary thought. For all options, the B.A. degree conferred is in Humanities. Each student chooses a field that reflects the focus of study, which is noted on the transcript after degree conferral. Students who complete a thesis with a grade of 'B' or higher receive Honors in Humanities, which is noted on the transcript and on the diploma. More detailed information may be found in the Procedures and Guidelines documents, available at the program office. Admission information and recommended academic schedule follow below.

Each applicant to the major submits a study plan and statement of purpose which outlines the rationale for a particular field of study. The study plan should be worked out in consultation with the student's faculty mentor. Students who wish to major in Humanities should receive approval of their fields from the program before the end of the junior year.

Students may complete fields of study in the following; these fields are declared on Axess and appear on the transcript but not on the diploma.

1. Culture and Politics
2. Digital Humanities (see below)
3. Early Modern Studies
4. Film, Literature, and Society
5. Medieval Studies
6. Modern Thought and Literature
7. Performance, Culture, and Society
8. Philosophical and Literary Thought (see below)
9. Philosophy and the Visual Arts
10. Philosophy, Literature, and Ecology

REQUIREMENTS FOR THE MAJOR

Majors must first enroll in the Humanities Honors Program. With the exception of the premed option, each program of study must include at least 12 courses for a minimum of 60 units over and above the requirements of the Humanities honors program (28-30 units).

INTERDISCIPLINARY MAJOR AND RECOMMENDED ACADEMIC SCHEDULE

The program of study for the thematic concentration includes:

1. A statement of purpose designating the field and outlining the rationale for the program of study.
2. Six courses in one of the three areas: literary, historical, or philosophical study.
3. Three courses in each of the other two areas above.
4. The requirements for the Humanities honors program.

If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three categories. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student's academic adviser; the proposed program must then be approved by the director. Changes in the study plan must be approved by the student's adviser and kept on file in the program office.

For some fields of study, such as film studies or modern thought and literature, specific courses or types of courses may be recommended. Consult the student handbook for such recommendations.

INTERDISCIPLINARY MAJOR FOR PREMEDS

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This program of study gives students a coherent way to organize interdisciplinary interests by theme, nationality, or historical period. In addition, students choosing this track take all the courses usually required by medical schools (two years of organic and inorganic chemistry with labs, one year of physics, one year of biology with labs, and one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines (eight courses and a minimum of 40 units) distributed as follows:

1. A statement of purpose choosing one of the fields listed above.
2. Four courses in the student's chosen field. Generally these four courses address different aspects of literature, history, and philosophy.
3. Three courses in medical ethics, history or philosophy of science, or science and the humanities.
4 One course in the arts.
5. The courses recommended by Undergraduate Advising and Research to fulfill medical school entrance requirements.
6. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN DIGITAL HUMANITIES

The development of new technologies has produced new topics for scholarly discussion in the humanities as well as new forms of cultural expression. The Interdisciplinary Major in Humanities offers a field of study for students who wish to concentrate study in the Digital Humanities with the following course requirements:

1. A statement of purpose outlining a narrowly defined field of study and approved by a digital humanities adviser.
2. HUMNTIES 198 as one of the core seminars for the Humanities honors program.
3. CS 105, Introduction to Computers, or CS 106A, Programming Methodology, or equivalent.
4. Seven humanities courses relevant to the student's focus as articulated in the statement of purpose.
5. Three computer science or technology courses relevant to the student's focus; one course should have a technical focus, and one should deal with societal issues.
6. HUMNTIES 201, Digital Humanities Practicum, in preparation for the student's honors project.
7. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN PHILOSOPHICAL AND LITERARY THOUGHT

The field of study in philosophical and literary thought is available in association with the crossdisciplinary Program for the Study of Philosophical and Literary Thought. Students wishing to major in Humanities with this focus must consult with the director of that program, as well as the director of Interdisciplinary Studies in Humanities. Students prepare a program of study including at least 12 courses in literary, philosophical, and historical study, of which six courses are in philosophical or literary thought, and three in each of the other two categories. Requirements:

1. A statement of purpose defining a focus in philosophical or literary thought.
2. HUMNTIES 181, Philosophy and Literature Gateway, which can be counted toward the course requirements for philosophical study or toward the requirements for literary study.
3. PHIL 80, Mind, Matter, and Meaning.
4. Courses in philosophical study normally include at least one course from the PHIL 170 sequence and one course from the PHIL 180 sequence.
5. Courses in literary study should focus on one national literature.
6. Courses in historical study should include at least one course in the history of philosophy.
7. The requirements of the Humanities honors program.
8. Students in this track are strongly encouraged, where possible, to select one or two Interdisciplinary Core Seminars which are approved as courses of special relevance for philosophical and literary thought.

Interested students should consult the director of undergraduate studies in the Program for the Study of Philosophical and Literary Thought for a listing of courses of special relevance to the study of philosophy and literature (which includes some of the HUMNTIES interdisciplinary core seminars).

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, religious, social, and ethical perspectives.

ADMISSION

Any qualified undergraduate at Stanford, regardless of major, may apply to the Humanities Honors Program. Interested students may obtain information from the program office. Students are encouraged to register for the program at the earliest opportunity and to take HUMNTIES 100, Text and Context in Humanities, in the sophomore year. However, students may join the program as late as the junior year under certain circumstances such as in the case of transfer students. Students enrolled in the crossdisciplinary majors affiliated with the Program for the Study of Philosophical and Literary Thought, whether through the Philosophy major or one of the literature majors, are encouraged to write their honors essays through the Humanities honors program. Students must meet the following entrance requirements before being admitted to the program:

1. Completion of at least two quarters of the Area One requirement, except in the case of transfer students, who are granted an exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence and all Program in Writing and Rhetoric sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese (except first-year language courses); all courses in the departments of Comparative Literature, History, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of HUMNTIES 100, Text and Context in Humanities, 3 units, preferably in the sophomore year.
2. Two different seminars in the series 160-163 or 190-198: 8-10 units, sophomore or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. At least one survey course in intellectual or cultural history, 4-5 units, in a field relevant to the anticipated topic of the senior essay, choosing from the 160-163 series or among courses in history, philosophy, religious studies, literature, and the arts. Students should consult the course list in the program office.
4. In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines germane to their honors essays.
5. Enrollment in 200A, one unit each, Winter and Spring quarters of the junior year.
6. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).
7. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all course work in order to remain in the program.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Master of Arts program within the Graduate Program in Humanities is designed to broaden the student’s academic background and cultural knowledge through a series of seminars that study intellectual history from the classical period to the modern era. Students gain added depth by taking four advanced courses within a defined field of study.

Application is made through the Interdisciplinary Studies in Humanities office. Application procedures and deadlines are available on the web at http://gradadmissions.stanford.edu. The M.A. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The program does not offer financial aid for the master’s program.

REQUIREMENTS

1. Complete graduate-level course work in the five required areas: classical age, the middle ages, Renaissance and early modern period, the Enlightenment, and modernity, with at least three of the five areas to be covered by the GPH seminars (321-325). The remaining two may be covered by GPH seminars or, by petition, by courses in the student’s approved concentration (see below).
2. Complete four graduate-level courses in an approved concentration to be determined in consultation with the director. At least one of these must be a graduate-level research seminar for which a research paper is required. Under “Statement of Purpose” on the application form, the candidate must indicate the field of study (for example, art history, early modern studies, philosophy, etc.) from which the graduate-level courses are drawn. The candidate must also note his or her qualifications for undertaking graduate study in that designated field. Once admitted, the student submits a proposed program of study to the director, specifying the particular courses to be taken. The proposed program is approved on its own merits to ensure that the chosen graduate courses are suited to the M.A. in Humanities.
3. Participate in the program-sponsored Special Colloquium during all quarters of study toward the M.A.
4. Complete HUMNTIES 298, Graduate Program in Humanities Symposium, Spring Quarter. Prior completion of the Symposium Paper may be substituted with special consent.

The minimum number of units for the M.A. degree is 45. Additional elective units may be taken at the option of the student.

Undergraduates wishing to pursue the M.A. as part of a coterminal program should speak with the program administrator about the application procedures for coterminal students.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

JOINT PH.D.

The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from the ancient world to the present. The program's seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, religious, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student's own disciplinary field.

GPH members must be students earning the Ph.D. in an academic department at Stanford. Doctoral students who complete the requirements for their departments and the GPH are awarded joint doctoral degrees.

Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Students complete the five GPH seminars (321-325). The course of study culminates in the GPH student symposium, which is developed and organized by the students in the program.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student's home department.

The following are participating departments in the program: Art and Art History, Classics, Comparative Literature, Drama, Education, English, French and Italian, German Studies, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese. Doctoral students from other departments may participate with permission of their home departments and approval of the Director of Interdisciplinary Studies in Humanities.

REQUIREMENTS

1. Continue satisfactory work in the student's major field, in accordance with department requirements.
2. Complete graduate-level course work in the five required areas: classical age, the middle ages, Renaissance and early modern period, the Enlightenment, and modernity, with at least three of the five areas to be covered by the GPH Seminars (321-325). The remaining two may be covered by GPH seminars or, by petition, by courses in the student's Ph.D. program or cognate field.
3. Participate in the program-sponsored Special Colloquium during the quarters the student is enrolled in the required seminars, up through completion of the Symposium requirement.
4. Participate in the GPH student symposium, usually at the end of the second year of GPH course work (298; registration for units is optional).
5. One quarter of interdisciplinary teaching. Students may apply to TA an undergraduate Humanities course, or may petition to count a departmental teaching assistantship if the course reaches beyond the scope of a single discipline.
6. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.
7. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, approved by the director, as a member of the examining committee.
8. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, approved by the director.

COURSES

See quarterly *Time Schedule* for changes in listings.

HUMNTIES 100. Text and Context in Humanities—Core colloquium. Required of students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of theoretical approaches to major texts. Textual analysis and writing assignments to prepare students to write honors essays. GER:DB-Hum

3 units, Win (Freidin, G)

HUMNTIES 161. Texts in History: Classics from Greece to Rome—(Same as CLASSGEN 163, DRAMA 161R.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's *Iliad* and *Odyssey*, plays of Aeschylus, Sophocles' *Antigone*, Euripides' *Medea*, Thucydides *Peloponnesian War*, Plato's *Symposium*, Aristotle's *Poetics*, Virgil's *Aeneid*, Seneca's *Trojan Women* and *Agamemnon*, and Augustine's *On Christian Doctrine*. GER:DB-Hum

5 units, not given this year (Rehm, R.)

HUMNTIES 162. Texts in History: Medieval to Early Modern—(Same as ENGLISH 184C.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, self, divine, and the physical universe. Interdisciplinary methods of interpretation. Texts include: Aristotle, *On the Soul*; Attar, *The Conference of the Birds*; Dante, *Inferno*; Chaucer, *Canterbury Tales*; Christine de Pizan, *The Book of the City of Ladies*; *Letters of Columbus*; Machiavelli, *The Prince*; Luther, *The Bondage of the Will*; Montaigne, *Essays*; Marlowe, *Doctor Faustus*; poems by John Donne and Lady Mary Wroth; Shakespeare, *Othello*; and works of art. GER:DB-Hum

5 units, Win (Brooks, H)

HUMNTIES 163. Texts in History: Enlightenment to the Present—(Same as FRENGEN 163.) Priority to students in the Humanities honors program and French majors. The relationship between intellectual, political, and cultural history, and literary creativity in the modern period. Texts include Voltaire, *Philosophical Letters*; Rousseau, second *Discourse*; Kant, *What is Enlightenment?* and the *Critique of Judgment*; documents and speeches from the French Revolution; Hölderlin, *The Rhein*; Schlegel, *Dialogue on Poesy*; Balzac, *Père Goriot*; Dostoevsky, *Notes from Underground*; Sorel, *Reflections on Violence*; T.S. Eliot, *The Waste Land*; Woolf, *Mrs. Dalloway*; Artaud, *Theater and its Double*; and Kane, *Ambiguous Adventure*. GER:DB-Hum

5 units, Spr (Edelstein, D)

HUMNTIES 170. Media Studies Internship—Practical experience working with a film or media company for six to eight weeks. Students make arrangements with companies individually and receive the consent of the director of the Humanities Honors Program. Credit awarded for submitting a paper after completing the internship, focused on a topic relevant to the student's studies.

2-3 units, Aut, Win, Spr (Freidin, G), Sum (Staff)

HUMNTIES 175. Individual Work

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 181. Philosophy and Literature—(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENGEN 181, ITALGEN 181, GERGEN 181.) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

HUMNTIES 191-198. Interdisciplinary Core Seminars in Humanities—Students in the Humanities honors program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor's consent.

HUMNTIES 191S. Capital and Empire—(Same as HISTORY 239D/339D.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Walmart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development. GER:DB-SocSci

4-5 units, Spr (Satia, P)

HUMNTIES 193W. Nietzsche, Doestoevsky, and Sartre—(Same as PHIL 193W.) Literary works in which philosophical ideas and issues are put forward, such as prose poems, novels, and plays. Ideas and issues and the dramatic or narrative structures through which they are presented. Texts include: Nietzsche, *Thus Spoke Zarathustra*; Dostoevsky, *The Brothers Karamazov*; and Sartre, *Nausea* and *No Exit*. GER:DB-Hum

4 units, Aut (Wood, A)

HUMNTIES 194G. William Blake: Poet and Painter—(Same as ENGLISH 135E.) Introduction to the illuminated poetry of William Blake, romantic visionary, poet, artist, religious renegade, political revolutionary, philosopher, mythological historiographer, social misfit, and critic. GER:DB-Hum

5 units, Win (Gigante, D)

HUMNTIES 196B. Religion, Reason, and Romanticism—(Same as RELIGST 245.) The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:DB-Hum

5 units, Aut (Sockness, B)

HUMNTIES 197F. Tolstoy's *Anna Karenina* and the Social Thought of Its Time—(Same as SLAVGEN 190/290.) Preference to juniors and seniors in Interdisciplinary Studies in Humanities and Russian majors. A slow reading of *Anna Karenina* in historical and cultural context. The novel as a case study in antagonism between two cultural systems, modernity and tradition, and their distinct ethical orders, assumptions, and codes. Cultural semiotics of Clifford Geertz. Focus is on paradigms and images of society and humanity in Tolstoy's contemporaries including Marx, Mill, Nietzsche, Weber, Durkheim, and Freud. Limited enrollment. See http://www.stanford.edu/~gfreidin/courses/AK/. GER:DB-Hum, EC-EthicReas

4-5 units, not given this year

HUMNTIES 198J. Digital Humanities: Literature and Technology—(Same as ENGLISH 153H.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline.

5 units, Aut (Jockers, M)

HUMNTIES 200A,B,C. Senior Research—Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year with the guidance of a faculty member, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

HUMNTIES 200A. Research Proposal—Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. WIM

1-2 units, Aut, Win, Spr (Staff)

HUMNTIES 200B. Senior Research—Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM at 3 unit level.

1-5 units, Aut, Win, Spr (Staff)

HUMNTIES 200C. Senior Research—Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B. WIM

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 201. Digital Humanities Practicum—For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities.

2-5 units, Aut, Win, Spr (Staff)

GRADUATE

HUMNTIES 275. Individual Work

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 298. Graduate Program in Humanities Symposium—Required of GPH doctoral and master's students. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.

1-3 units, Spr (Freidin, G)

HUMNTIES 299. Interdisciplinary Teaching—For doctoral students in the GPH. Supervised interdisciplinary teaching to satisfy the program teaching requirement.

1-2 units, Aut, Win, Spr (Freidin, G)

HUMNTIES 321. Classical Seminar—(Same as CLASSGEN 321.) Topic this year is interpreting antiquity: methodologies and interpretations of ancient texts. The dialogue between literature and philosophy in Greek and Roman cultures. Sources include Homer, Greek tragedy, Plato, Aristotle, Virgil, Petronius, Augustine, and Nietzsche's *Birth of Tragedy*.

3-5 units, Aut (Nightingale, A)

HUMNTIES 322. Medieval Seminar—(Same as ENGLISH 370A.) The cultural, literary, and artistic evolution of the Middle Ages. The barbarian invasions and the Germanic ethos, the Celtic heritage, and the monastic tradition. Romanesque art and architecture, pilgrimages, and the Crusades. Gothic aesthetics, chivalry and courtly love, scholasticism, and the rise of universities. The late Middle Ages, humanism, and the threshold of the Renaissance. Texts include: *Beowulf*, *Mabinogion*, *Song of Roland*, Chretien de Troyes' *Lancelot* and *Yvain*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, and Chaucer's *Canterbury Tales*.

3-5 units, Win (Steidle, E)

HUMNTIES 323. Renaissance/Early Modern Seminar—Focus is on this period as it records the impact of major historical forces: the advent of printing; the reappropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, the world, and the heavens; and the rise of historiography. Authors: Attar, de Pizan, Pico della Mirandola, Columbus, De Las Casas, Machiavelli, Luther, Montaigne, Marlowe, Donne, Shakespeare, and Galileo.

3-5 units, Spr (Brooks, H)

HUMNTIES 324. Enlightenment Seminar—(Same as MUSIC 324H.) How 18-century opera and literature reflect changing conceptions of the self, reason, and emotion; the proper basis of social and political authority; natural and supernatural justice; women's nature and status. Texts include: Gluck's *Iphigenia in Tauris*; Mozart's *The Marriage of Figaro* and *Don Giovanni*; *Manon Lescaut*; and *Les liaisons dangereuses*.

3-5 units, Aut (Hadlock, H)

HUMNTIES 325. Modern Seminar—(Same as FRENGEN 325.) The postmodern condition as post-WW II rupture in Western tradition; moral, political, cultural, and aesthetical dimensions. Sources include literature, philosophy, essays, films, and painting. Authors and artists include: Primo Levi, Hannah Arendt, Alain Resnais, Samuel Beckett, Georges Bataille, Michel Foucault, Theodor Adorno, David Riesman, Georges Perec, Juliet Mitchell, and Francis Bacon.

3-5 units, Win (Apostolidès, J)

DIVISION OF INTERNATIONAL COMPARATIVE AND AREA STUDIES

Director: Judith Goldstein

Advisory Committee: Keith Baker (History), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Stephen Haber (Political Science), Nicholas Hope (Stanford Institute for Economic Policy Research), Ian Morris (Classics), Jeremy Weinstein (Political Science)

Directors' Committee: Keith Baker (History), Carl Bielefeldt (Religious Studies), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Linda Hess (Religious Studies), Herbert Klein (History), Anjini Kochar (Stanford Institute for Economic Policy Research), Abbas Milani (Hoover), Aron Rodrigue (History), Gabriella Safran (Slavic Languages and Literatures), Kenneth Schultz (Political Science), Vered Shemtov (Language Center), Stephen J. Stedman (Freeman Spogli Institute for International Studies), Chao Fen Sun (Asian Languages), Amir Weiner (History), Jeremy Weinstein (Political Science)

Division Office: Encina Hall West, second floor
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu

The Division of International Comparative and Area Studies (ICA) supports research and teaching in the cultures and societies of the world, and studies the problems facing developing societies as they seek to end their poverty and social and economic inequalities. ICA promotes new centers of teaching excellence in traditional areas of historical and cultural concerns, as well as promoting interdisciplinary activities related to developing new ideas for dealing with fundamental issues of justice, equality, and growth within nation states, cultures, and regions.

The Division of International Comparative and Area Studies is comprised of research centers, degree granting programs, and religion and cultural centers: Center for African Studies*; Center for East Asian Studies*; Center for Latin American Studies*; France-Stanford Center for Interdisciplinary Studies; Center for Russian, East European and Eurasian Studies*; Ford Dorsey Program in International Policy Studies*; International Relations*; Mediterranean Studies Forum; Hamid and Christina Moghadam Program in Iranian Studies; Asian Religions and Cultures; Stanford Center for Buddhist Studies; Sohaib and Sara Abbasi Program in Islamic Studies; Taube Center for Jewish Studies*; Center for European Studies; and the Center for South Asian Studies. Degree granting programs are denoted with an asterisk (*); the Taube Center for Jewish Studies oversees an Individually Designed Major.

CENTER FOR AFRICAN STUDIES

Director: Jeremy Weinstein
Office: Encina Hall West, second floor
Web Site: http://africanstudies.stanford.edu

The Center for African Studies (CAS) is an interdisciplinary research program. CAS offers an undergraduate minor and certificate, and a Master of Arts (M.A.) degree. For further information, see the "Center for African Studies" section of this bulletin.

STANFORD CENTER FOR BUDDHIST STUDIES

Director: Carl Bielefeldt
Office: Encina Commons
Web Site: http://scbs.stanford.edu

The Stanford Center for Buddhist Studies (SCBS) serves to coordinate, support, and develop the University's resources for Buddhist Studies in scholarly research, academic communication, teaching, and public outreach. The center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The center works closely with the Department of Religious Studies, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley. SCBS oversees the Asian Religions and Cultures Initiative (ARC) which is dedicated to the enhancement of Stanford's resources in Asian humanities. ARC consists of research, curricular support, and academic and public events.

CENTER FOR EAST ASIAN STUDIES

Director: Chao Fen Sun
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) seeks to increase interdisciplinary communication among faculty, students, and outside scholars whose research, teaching, or study focuses on East Asia. CEAS offers bachelor's and master's degree programs. It sponsors programs that enhance public knowledge and access to the University's East Asia resources.

For further information, see the "Center for East Asian Studies" section of this bulletin.

CENTER FOR EUROPEAN STUDIES

Directors: Philippe Buc, Amir Weiner
Office: Encina Hall West, second floor
Web Site: http://europeanstudies.stanford.edu/

The Center for European Studies is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security. The center's goal is to develop Stanford's contribution to the study of Europe's history and contemporary position as a global power by bringing together students and scholars from the humanities and the social sciences, policy makers, diplomats, and journalists. The center sponsors visiting professors, intellectuals, and personalities from Europe. Besides research, an important side-product of these exchanges is the development of Stanford undergraduate and graduate courses on themes related to European history, culture, and current events.

FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES

Director: Keith Baker
Office: Building 260, room 105
Web Site: http://francestanford.stanford.edu

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

FORD DORSEY PROGRAM IN INTERNATIONAL POLICY STUDIES

Director: Stephen J. Stedman
Office: Encina Hall West, second floor
Web Site: http://ips.stanford.edu

Ford Dorsey International Policy Studies (IPS) is a two-year master's program that seeks to train the next generation of policy analysts to solve key global problems.

For further information, see the "International Policy Studies" section of this bulletin.

PROGRAM IN INTERNATIONAL RELATIONS

Director: Kenneth Schultz
Office: Encina Hall West, second floor
Web Site: http://internationalrelations.stanford.edu

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the "International Relations" section of this bulletin.

HAMID AND CHRISTINA MOGHADAM PROGRAM IN IRANIAN STUDIES

Director: Abbas Milani
Office: Encina Hall West, second floor
Web Site: http://iranian-studies.stanford.edu

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran's past, present, and future. The program organizes lectures and student research conferences on Iran.

SOHAIB AND SARA ABBASI PROGRAM IN ISLAMIC STUDIES

Director: Robert Gregg
Office: Encina Hall West, second floor
Web Site: http://islamicstudies.stanford.edu

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov
Web Site: http://jewishstudies.stanford.edu

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor and an interdisciplinary major coordinated by the Humanities and Sciences dean's office.

For further information, see the "Taube Center for Jewish Studies" section of this bulletin.

CENTER FOR LATIN AMERICAN STUDIES

Director: Herbert S. Klein
Web Site: http://las.stanford.edu

The Center for Latin American Studies at Stanford University (CLAS) offers academic programs for students, coordinates academic conferences and lectures, and fosters interdisciplinary research for students and faculty through fellowships and funding opportunities. The center offers an undergraduate minor, an interdisciplinary honors certification for undergraduates, and a master's degree.

For further information, see the "Center for Latin American Studies" section of this bulletin.

MEDITERRANEAN STUDIES FORUM

Director: Aron Rodrigue
Office: Encina Hall West, second floor
Web Site: http://mediterraneanstudies.stanford.edu

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of N. Africa, the Levant, the Balkans, and southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Director: Gabriella Safran
Office: Encina Hall West, second floor
Web Site: http://creees.stanford.edu

The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master's program in interdisciplinary area studies.

For further information, see the "Russian, East European and Eurasian Studies" section of this bulletin.

CENTER FOR SOUTH ASIAN STUDIES

Directors: Linda Hess, Anjini Kochar
Office: Encina Hall West, second floor
Web Site: http://southasia.stanford.edu

The Center for South Asian Studies serves to coordinate and develop Stanford's resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

INTERNATIONAL POLICY STUDIES

Director: Stephen Stedman (Freeman Spogli Institute for International Studies)
Executive Committee Co-chairs: Coit D. Blacker (Freeman Spogli Institute for International Studies), Judith L. Goldstein (Political Science)
Executive Committee: Jenny Martinez (School of Law), Michael McFaul (Political Science), Rosamund Naylor (Freeman Spogli Institute for International Studies), Norman Naimark (History), Bruce Owen (Public Policy), Julie Parsonnet (School of Medicine), John Pencaval (Economics), David Victor (Freeman Spogli Institute for International Studies)
Lecturers: Chonira Aturupane, Keith Hansen, Eric Morris
Affiliated Faculty: Mike Armacost (Freeman Spogli Institute for International Studies), Jonathan Bendor (Business), Byron Bland (Freeman Spogli Institute for International Studies), Paul Brest (Law), Jeremy Bulow (Economics), Gordon Chang (History), John Cogan (Hoover Institution), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Lawrence Goulder (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Simon Jackman (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Susanna Loeb (Education), Isabela Mares (Political Science), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Roger G. Noll (Economics, emeritus), Jean Oi (Political Science), Daniel Okimoto (Political Science), William Perry (Management Science and Engineering), Rob Reich (Political Science), Douglas Rivers (Political Science), Richard Roberts (History), Lee Ross (Psychology), Scott D. Sagan (Political Science), Debra Satz (Philosophy), Jeff Strnad (Law), Michael Tomz (Political Science), David Victor (Freeman Spogli Institutute for International Studies), Andrew Walder (Sociology), Jeremy Weinstein (Political Science), Allen Weiner (Law), Ann Wren (Political Science)
Visiting Professor: Edward Miguel

Program Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 723-4547
Web Site: http://ips.stanford.edu

Courses given in International Policy Studies have the subject code IPS. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM

MASTER OF ARTS

International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues that they face in international business and public policy, and to develop skills and knowledge to address those issues. The program allows students to specialize in: international political economy; international security and cooperation; democracy, development, and the rule of law; global health; global justice; or energy, environment, and resources.

IPS requires completion of the core and concentration requirements which amount to 90 units of credit. Additional units are required for students who have not fulfilled prerequisites for these requirements.

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these requirements are ECON 51, 52, and ECON 102A or POLISCI 150A. In addition, students must have completed one advanced undergraduate course in international economics; the Stanford course that meets this requirement is ECON 165.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; a writing sample of at least ten pages; an area of concentration form; and resume. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply or for information on graduate admission, see http://gradadmissions.stanford.edu. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Applications for admission in Autumn Quarter must be filed with supporting credentials by January 8, 2008.

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The coterminal application requires the following supporting materials: two letters of recommendation from University faculty, a writing sample of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Applications must be filed together with supporting materials by January 8.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the items below. These requirements entail 4 units of core courses, 36 units of policy skills, a 10-unit practicum, a 5-unit writing and rhetoric seminar, a 5-unit course in international economics, and an additional 30 units from the concentration curriculum. These courses have the following prerequisites: ECON 51, 52, 102A or POLISCI 150A, and ECON 165.

Core Courses—

1. IPS 200. Issues in International Policies (1 unit)
2. IPS 201. Managing Global Complexity (3 units)

Policy Skills—

1. IPS 204A. Microeconomics (4 units)
2. IPS 204B. Cost-Benefit Analysis and Evaluation (4 units)
3. IPS 205A. Principles of Research Design and Analysis: Methods (4 units)
4. IPS 205B. Principles of Research Design and Analysis: Tools (4 units)
5. IPS 206A. Politics and Collective Action (4 units)
6. IPS 206B. Organizations (4 units)
7. IPS 207A. Judgment and Decision Making (4 units)
8. IPS 207B. Public Policy and Social Psychology: Implications and Applications (4 units)
9. IPS 208. Justice (4 units)
10. IPS 209. Practicum (10 units)

Writing and Rhetoric Seminar—One of the following (5 units):

1. IPS 210. Politics of International Humanitarianism
2. IPS 211. The Transition from War to Peace: Peacebuilding Strategies
3. IPS 212. Issues in Development
4. IPS 219. Roles of Intelligence in U.S. Foreign Policy
5. IPS 314S. Decision Making in U.S. Foreign Policy

International Economics—IPS 202, Topics in International Macroeconomics; or IPS 203, Issues in International Economics (5 units)

Practicum—IPS 209, Practicum (10 units)

Concentration Curriculum—Students are required to complete 30 units of IPS approved courses for their area of concentration (see list below). A gateway course in the area of concentration must be taken prior to enrolling in subsequent courses. A complete list of the courses in these areas is available in the IPS program office.

Democracy, Development, and Rule of Law
Energy, Environment, and Natural Resources
Global Health
Global Justice
International Negotiation and Conflict Management
International Political Economy
International Security and Cooperation

Language Requirement—Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation.

Grade Requirements—All courses to be counted toward the degree, except IPS 200, must be taken for a letter grade.

Financial Aid—Financial aid is available for graduate students entering the IPS program.

COURSES

See the IPS degree requirements in the IPS program office or at http://ips.stanford.edu for updated information on additional courses.

IPS 200. Contemporary Issues in International Policies—For IPS students only. Lecture series. Scholars present their analysis of major international public policy issues. May be repeated for credit.
1 unit, Aut (Stedman, S)

IPS 201. Managing Global Complexity—(Same as POLISCI 212.) The value of major theories and concepts in international relations for understanding and addressing global policy issues. Country case study with policy challenges such as development, democracy promotion, proliferation, and terrorism; the challenge of creating coherent policies that do not run at cross purposes. Case study of a policy challenge that cuts across academic disciplines and policy specializations to provide the opportunity to bring together skills and policy perspectives.
3 units, Spr (Krasner, S; Stedman, S)

IPS 202. Topics in International Macroeconomics—Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets and financial and currency crises.
5 units, Aut (Aturupane, C)

IPS 203. Issues in International Economics—Topics in international trade and international trade policy: trade and growth, regionalism versus multilateralism, the political economy of trade policy, trade and labor, trade and the environment, and trade policies for developing and transition economies. Prerequisite: ECON 165.
5 units, Win (Aturupane, C)

IPS 204A. Microeconomics—(Same as PUBLPOL 201A.) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility.
4 units, Aut (Bulow, J)

IPS 204B. Cost-Benefit Analysis and Evaluation—(Same as PUBLPOL 201B.) Ex ante and ex post evaluation of projects and policies, value of life calculations, and welfare evaluation of public and private decisions. Welfare measures; tradeoffs between efficiency and equity. Second best. Behavioral economics: psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Statistical decision theory. Use of incentives in implementing policies. Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice.
4 units, Spr (Kessler, D)

IPS 205A. Principles of Research Design and Analysis: Methods—(Same as PUBLPOL 203A.) How professionals in non-research fields can be informed consumers of policy-related empirical research. Qualitative and quantitative research techniques and methodological requirements for sound research results. Formulating research questions. Experimental design. Choosing appropriate research strategies. Survey research design. Case study methods. Interviewing and observational techniques. Measurement including financial, cost, national income, and regulatory accounting.
4 units, Aut (Louie, T)

IPS 205B. Principles of Research Design and Analysis: Tools—(Same as PUBLPOL 203B, LAW 366.)Policy analysis tools for government, research institutes, and academic settings, and for empirical issues in litigation, investment banking, consulting, and finance. Multiple regression analysis, multilevel modeling, and Bayesian analysis. Topics include hypothesis testing, regression specification, logistic regression, probit, heteroscedasticity, serial correlation, errors in the variables, instrumental variables, simultaneous equations, generalized linear models, simulation, model checking, causal inference, and missing data imputation. Hands-on analysis using popular statistical packages.
4 units, Win (Strnad, J)

IPS 206A. Politics and Collective Action—(Same as POLISCI 331S, PUBLPOL 204A.) How public policies are formulated and implemented; preference formation. The role of electoral politics, nongovernmental organizations, ideologies, and social protests. The theory of collective action. Principal agent relationships. How elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, trade, and social welfare policy, given their goals and available tactics. How to evaluate policies and policy making processes.
4 units, Win (Satz, D)

IPS 206B. Organizations—(Same as PUBLPOL 204B.) Policy reform and organizational resistance. Organizations include government and other bureaucracies such as not-for-profit schools, universities, hospitals, international organizations, political parties, and agencies. Hubris and policy making, including pathologies of decision making and planning, abuse of intelligence, biased information, overselling to publics, lack of knowledge about context, and unintended consequences.
4 units, Spr (Stedman, S; Eden, L)

IPS 207A. Judgement and Decision Making—(Same as PUBLPOL 205A.) Theories and research on heuristics and biases in human inference, judgement, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Support theory. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.
4 units, Aut (Brest, P)

IPS 207B. Public Policy and Social Psychology: Implications and Applications—(Same as PSYCH 216, PUBLPOL 205B.) Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior.
4 units, Spr (Ross, L)

IPS 208. Justice—(Same as ETHICSOC 171, PHIL 171/271, POLISCI 136S, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.
5 units, Aut (Cohen, J)

IPS 209. Practicum—(Same as PUBLPOL 209.) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis.
5-10 units, given next year

IPS 210. The Politics of International Humanitarian Action—The relationship between humanitarianism and politics in international responses to recent civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Humanitarian and political perspectives. Case studies include Cambodia, northern Iraq (Kurdistan), Bosnia, Rwanda and the Great Lakes region of Africa, and Kosovo.
5 units, Aut (Morris, E)

IPS 211. The Transition from War to Peace: Peacebuilding Strategies—How to find sustainable solutions to intractable conflicts that lead to a settlement. How institutions such as the UN, regional organizations, and NGOs can support a peace process that leads to disarmament, and reconstruction and reconciliation, or co-existence). Case studies.
5 units, Win (Morris, E)

IPS 212. Issues in Development—Current policy issues in development economics and how they relate to sub-Saharan Africa. Economic theories and econometric methods necessary for credible development program evaluation and to explain persistent African economic underdevelopment.
5 units, Spr (Miguel, E)

IPS 219. The Role of Intelligence in U.S. Foreign Policy—How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.
5 units, Spr (Hansen, K)

IPS 230. Democracy, Development, and the Rule of Law—(Same as INTNLREL 114D, POLISCI 114D/314D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Stoner-Weiss, K; McFaul, M)

IPS 240. Issues in International Security and Cooperation—Gateway seminar. Students attend POLISCI 114S lectures. Major threats and global responses to international and regional security. Political and technical issues involved in arms control, the military legacy of the Cold War, regional conflicts, proliferation of advanced weapons capabilities, civil and ethnic wars, and terrorism.

5 units, Win (Crenshaw, M)

IPS 250. International Conflict: Management and Resolution—(Same as LAW 656, POLISCI 210R.) Interdisciplinary. Theoretical insights and practical experience in resolving inter-group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN).

5 units, Win (Holloway, D; Weiner, A; Ross, L; Bland, B)

IPS 299. Directed Reading—IPS students only. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

IPS 314S. Decision Making in U.S. Foreign Policy—(Same as POLISCI 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

COGNATE COURSES

See respective department listings for course descriptions. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 167/267. Social Policy for Sustainable Resource Use—(Same as EARTHSYS 167/267.)

5 units, Spr (Irvine, D)

ANTHSCI 167C/267C. Managing the Commons: Evolving Theories for Sustainable Resource Use—(Same as EARTHSYS 167C/267C.)

5 units, Aut (Irvine, D)

ANTHSCI 170. Medical Anthropology—(Same as HUMBIO 178.)

3 units, not given this year

ANTHSCI 179/279. Environmental Change and Emerging Infectious Diseases—(Same as HUMBIO 114.)

3-5 units, Aut (Durham, W; Jones, J)

BIOSCI 147/247. Controlling Climate Change in the 21st Century—(Same as EARTHSYS 147/247, HUMBIO 116.)

3 units, alternate years, not given this year (Schneider, S)

CASA 152/252. Archaeology: World Cultural Heritage

5 units, alternate years, not given this year

CASA 336. Anthropology of Rights

5 units, alternate years, not given this year

CASA 364. The Anthropology of Development

5 units, not given this year

CEE 142A/242A. Creating Sustainable Development

3 units, Win (Christensen, S)

CEE 265A. Sustainable Water Resources Development

3 units, Aut (Ortolano, L)

CEE 265C. Water Resources Management

3 units, Aut (Findikakis, A)

CEE 265D. Water and Sanitation in Developing Countries

3 units, Win (Davis, J)

COMM 136/236. Democracy and the Communication of Consent—(Same as POLISCI 134.)

5 units, Aut (Fishkin, J)

COMM 236G/336G. Democracy, Justice, and Deliberation

1-5 units, not given this year (Fishikin, J)

COMM 238/338. Democratic Theory: Normative and Empirical Issues

1-5 units, not given this year (Fishikin, J)

COMM 244/344. Democracy, Press, and Public Opinion

1-4 units, not given this year (Fishikin, J)

EARTHSYS 175/275. The California Coast: Science, Policy, and Law—(Same as CEE 175A/275A, LAW 514.)

3-4 units, Win (Caldwell, M; Boehm, A; Sivas, D)

EARTHSYS 180/280. Fundamentals of Sustainable Agriculture—(Same as BIOSCI 180/280.)

3 units, alternate years, not given this year

ECON 106. World Food Economy

5 units, not given this year

ECON 214. Development Economics I

2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics II

2-5 units, Win (DeGiorgi, G)

ECON 217. Development Economics III

2-5 units, not given this year

ECON 243. Economics of Environment

2-5 units, not given this year

ECON 250A. Natural Resource and Energy Economics

2-5 units, not given this year

ECON 250B. Environmental Economics

2-5 units, not given this year

ECON 265. International Economics I

2-5 units, Aut (Fitzgerald, D)

ECON 266. International Economics II

2-5 units, Win (Staiger, R)

FRENLIT 278. Rethinking Identities in the Era of Globalization—(Same as COMPLIT 246.)

3-5 units, not given this year

GES 145/245. Energy Flow and Policy: The Pacific Rim—(Same as EARTHSYS 145/245.)

3 units, alternate years, not given this year (Howell, D)

GES 253. Petroleum Geology and Exploration

3 units, alternate years, not given this year (Graham, S)

HISTORY 102. The History of the International System

5 units, Win (Sheehan, J)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)

5 units, Spr (Holloway, D)

HISTORY 202/306E. International History and International Relations Theory—(Same as POLISCI 316.)
5 units, not given this year (Holloway, D)

HISTORY 204G/304G. War, Culture, and Society in the Modern Age
5 units, Aut (Weiner, A)

HISTORY 224A/324A. Modern Russia, Iran, and Afghanistan
4-5 units, not given this year (Crews, R)

HISTORY 226E. The Creation and Destruction of Yugoslavia
5 units, Aut (Knezevic, J)

HISTORY 226G/326G. Civilians and War in Modern Europe
4-5 units, Spr (Knezevic, J)

HISTORY 227/327. East European Women and War in the 20th Century
5 units, not given this year (Jolluck, K)

HISTORY 257/347. The Politics and Ethics of Modern Science and Technology—(Same as STS 221.)
4-5 units, not given this year (Bernstein, B)

HISTORY 291E/391E. Maps, Borders, and Conflict in East Asia
4-5 units, not given this year (Wigen, K)

HRP 207. Issues and Methods of Health Services and Policy Research
2 units, Aut (Baker, L; McDonald, K; Haberland, C)

HRP 208. Issues and Methods of Health Services and Policy Research 2
2 units, offered occasionally

HRP 212. Crosscultural Medicine
3 units, Spr (Corso, I)

HRP 231. Epidemiology of Infectious Diseases
3 units, alternate years, not given this year

HUMBIO 122. International Health Policy: Comparative National Health Care Systems
4 units, Win (Heller, G)

HUMBIO 122S. Social Class, Race, Ethnicity, Health
4 units, given next year

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges
4 units, Spr (Smith, D)

INTNLREL 140C. The U.S., UN Peacekeeping, and Humanitarian War
5 units, Spr (Patenaude, B)

LAW 220. Regulated Industries
3 units, Win (Victor, D)

LAW 313. Health Law and Policy I—(Same as HRP 210.)
3 units, Aut (Greely, H)

LAW 330. International Human Rights Clinic
3 units, Win (Martinez, J)

LAW 336. International Jurisprudence
3 units, Aut (Stacy, H)

LAW 338. Land Use
3 units, Aut (Caldwell, M; Diamond, S)

LAW 605. International Environmental Law: Climate Change
3 units, Aut (Wara, M)

MED 242. Physicians and Human Rights
1 unit, Win (Laws, A)

MED 243. Biomedical and Social Science Responses to the HIV/AIDS Epidemic
3 units, Spr (Katzenstein, D)

MED 262. Economics of Health Improvement in Developing Countries—(Same as ECON 127, HUMBIO 121.)
5 units, Win (Miller, N)

MGTECON 332. Analysis of Costs, Risks, and Benefits of Health Care—(Same as BIOMEDIN 432, HRP 392.)
4 units, Aut (Garber, A; Owens, D)

MS&E 243. Energy and Environmental Policy Analysis—(Same as IPER 243.)
3 units, Spr (Sweeney, J)

MS&E 248. Economics of Natural Resources
3-4 units, Aut (Sweeney, J)

MS&E 294. Climate Policy Analysis
3 units, Win (Weyant, J), alternate years, not given next year

PHIL 176/276. Political Philosophy: The Social Contract Tradition
4 units, not given this year

PHIL 377. Topics in Democratic Theory—(Same as POLISCI 333.)
3-5 units, not given this year

POLISCI 110B. Strategy, War, and Politics
5 units, not given this year

POLISCI 110D/110Y. War and Peace in American Foreign Policy
5 units, Spr (Schultz, K)

POLISCI 113F. The United Nations and Global Governance
5 units, not given this year

POLISCI 215. Explaining Ethnic Violence
5 units, Aut (Fearon, J)

POLISCI 218. U.S. Relations in Iran
5 units, Aut (Milani, A)

POLISCI 221. Tolerance and Democracy
5 units, Spr (Sniderman, P)

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World
5 units, Aut (Joffe, J)

POLISCI 231S. Contemporary Theories of Justice
5 units, not given this year

POLISCI 232. Civil Society and the Nonprofit Sector—(Same as URBANST 121.)
2-4 units, not given this year

POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
5 units, Spr (Reich, R; Sievers, B)

POLISCI 244R. Political Economy of Disease: AIDS in Historical Perspective
5 units, not given this year

POLISCI 318S. State Building
5 units, Spr (Krasner, S)

POLISCI 340S. Political Economy of Post-Communism
5 units, Spr (McFaul, M)

POLISCI 341T. Comparative Democratization and Regime Change
5 units, not given this year

POLISCI 343R. African Civil Wars in Comparative Perspectives: A Research Seminar
5 units, not given this year

POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern—(Same as HISTORY 378A.)
5 units, Aut (Haber, S)

POLISCI 431. Collective Action in Democratic Athens—(Same as CLASSHIS 431.)
5 units, not given this year

POLISCI 432. Graduate Seminar: Global Justice—(Same as PHIL 372C.)
5 units, not given this year

POLISCI 434. Democracy and the Constitution—(Same as PHIL 374C.)
5 units, not given this year

POLISCI 440B. Political Economy of Development—(Same as HISTORY 378E.)
5 units, Aut (Haber, S)

POLISCI 441. Politics of Development
5 units, Win (Díaz-Cayeros, A)

POLISCI 443S. Political Economy of Reform in China
5 units, Aut (Oi, J)

PSYCH 215. Mind, Culture, and Society
3 units, Win (Markus, H; Steele, C)

PUBLPOL 231. Political Economy of Health Care in the United States—(Same as MGTECON 331, HRP 391.)
4 units, Spr (Kessler, D; Bundorf, M)

SOC 109/209. Sociology of Terrorism
5 units, Spr (Meyersson Milgrom, E)

SOC 110/210. Politics and Society
5 units, Aut (Beck, C)

SOC 118/218. Social Movements and Collective Action
5 units, not given this year

SOC 140/240. Introduction to Social Stratification
5 units, Win (Sandefur, R)

SOC 141/241. Controversies about Inequality
5 units, Spr (Grusky, D)

SOC 147A/247A. Comparative Ethnic Conflict
5 units, Win (Olzak, S)

SOC 314. Economic Sociology
3-5 units, Aut (Granovetter, M)

SOC 314A. Social Norms and Corruption in the Economy
3-5 units, offered occasionally

SOC 345. Seminar in Comparative Race and Ethnic Relations
3-5 units, not given this year

SOC 368. Workshop: China Social Science—(Same as POLISCI 348R.)
1-5 units, Aut, Win, Spr (Walder, A; Zhou, X; Oi, J)

STS 210. Ethics, Science, and Technology
4 units, Spr (McGinn, R), alternate years, not given next year

STS 279. Technology, Policy, and Management in Newly-Industrializing Countries
2-4 units, Spr (Forbes, N), offered occasionally

INTERNATIONAL RELATIONS

Director: Kenneth Schultz (Political Science)

Faculty Committee: Coit D. Blacker (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), James Sheehan (History), Michael Tomz (Political Science)

Affiliated Faculty: David Abernethy (Political Science), Barton Bernstein (History), Gordon Chang (History), Larry J. Diamond (Hoover Institution), Peter Duus (History), Amir Eshel (German Studies), Zephyr Frank (History), Lawrence H. Goulder (Economics), David J. Holloway (History, Political Science), Terry L. Karl (Political Science), David M. Kennedy (History), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Beatriz Magaloni (Political Science), Mark I. Mancall (History), Isabela Mares (Political Science), Robert McGinn (Management Science and Engineering), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Scott Sagan (Political Science), Debra M. Satz (Philosophy), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

Other Affiliation: Jasmina Bojic (International Relations), Christophe Crombez (Freeman Spogli Institute for International Studies), Rafiq Dossani (Freeman Spogli Institute for International Studies), Gili S. Drori (International Relations), John Dunlop (Hoover Institution), Yifat Holzman-Gazit (School of Law), Katherine Jolluck (History), Myung-koo Kang (Freeman Spogli Institute for International Studies), Paul Kapur (Freeman Spogli Institute for International Studies), Martin W. Lewis (History), Pawel Lutomski (International Relations), Kenneth Mcelwain (International Relations), Alice Lyman Miller (Hoover Institution), Thomas O'Keefe (International Relations), Bertrand Patenaude (Hoover Institution), Hamid Shomali (Iranian Studies), Stephen Stedman (Political Science), Richard Steinberg (International Comparative and Area Studies), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

Courses in International Relations have the subject code INTNLREL. For a complete list of subject codes, see Appendix.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among world actors. Students are equipped with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue a study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. Students must spend at least one quarter overseas and show two-year proficiency in a foreign language. Many IR students pursue careers in government, nongovernmental organizations, and business, or go to graduate school in law, business, economics, or political science.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Requirements for the major (70 units) are as follows; IR core courses are lited in items 1-5:

1. POLISCI 1
2. POLISCI 110A or 110B or 110C or 110D or HISTORY 158
3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
4. Two additional upper-division Economics courses from the IR approved course offerings lists
5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60
6. Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one course designated as writing intensive (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of 'C' is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program; non-Stanford programs must be pre-approved by the IR program before the student enrolls in the program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:

1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student's functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Consult the updated course offering lists available in the International Relations office or on the web site for IR approved courses in each track.

Functional specializations are not declared on Axess.

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen, by completing two years of language study or by passing a second-year, third-quarter proficiency exam.

Check the IR office for updated information about the area specialization requirements.

Area specializations are not declared on Axess.

DECLARING THE MAJOR

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

MINORS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLISCI 1
2. Two of these five courses: POLISCI 110A,B,C,D, or HISTORY 158
3. Four courses from one of the three tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe). Consult the updated course offering lists available in the International Relations office or on the web site.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see http://cddrl.stanford.edu/.

Students should submit their honors thesis proposal late in Winter Quarter of the junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

GRADUATE PROGRAM

MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies" section in this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement for International Relations.

CORE

ECONOMICS

ECON 1A. Introductory Economics A
5 units, Aut (Clerici-Arias, M), Win (Makler, C), Sum (Staff)

ECON 1B. Introductory Economics B
5 units, Win (Amador, M), Spr (Cojoc, D), Sum (Staff)

ECON 50. Economic Analysis I
5 units, Aut (Abramitzky, R), Spr (Tendall, M), Sum (Staff)

ECON 51. Economic Analysis II
5 units, Aut (Tendall, M), Win (Einav, L), Sum (Staff)

ECON 52. Economic Analysis III
5 units, Win (Jaimovich, N), Spr (Klenow, P), Sum (Staff)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
5 units, Aut, Win (Steiner, F)

HISTORY

HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein, B)

POLITICAL SCIENCE

POLISCI 1. Introduction to International Relations
5 units, Spr (Tomz, M)

POLISCI 110A. Sovereignty and Globalization
5 units, not given this year

POLISCI 110B. Strategy, War, and Politics
5 units, not given this year

POLISCI 110C/110X. America and the World Economy
5 units, Win (Goldstein, J)

POLISCI 110D/110Y. War and Peace in American Foreign Policy
5 units, Spr (Schultz, K)

POLISCI 150A/350A. Political Methodology I
5 units, Aut (Rivers, D)

STATISTICS

STATS 60. Introduction to Statistical Methods: Precalculus—(Graduate students register for 160; same as PSYCH 10.)
5 units, Aut (Thomas, E), Win (Walther, G), Spr (Boik, J), Sum (Staff)

ADDITIONAL OFFERINGS

The courses listed below fulfill the IR functional specialization track requirements in CPHA, CCAS, and CIPE, and can fulfill the area specialization option in Africa, Europe, Latin America, or Russia/East Europe. See http://internationalrelations.stanford.edu or the International Relations program office for specific course designations. For course descriptions and General Education Requirement (GER) information, see the respective department listings. Additional relevant courses may be offered; for updated information, visit the office or the web site.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 112. International Security in South Asia—Topics include: partition of the Indian subcontinent; characteristics of the Indian and Pakistani militaries; India's war with China; Kashmir dispute; Indo-Pakistani wars and security competition; low intensity conflict in Nepal and Sri Lanka; and nuclear proliferation on the subcontinent.
5 units, Aut (Kapur, S)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as IPS 230, POLISCI 114D/314D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. GER:DB-SocSci
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 116. Politics of Divided Korea—Political and economic transformation. Colonialism and its impacts on modernization; war and social change; the rise and fall of authoritarianism; and economic development and crisis. The industrialization of S. Korea. The nature of modern, industrial S. Korean society consequent upon such rapid economic and social change. N. Korean development and recent threats.
5 units, Aut (Kang, M)

INTNLREL 120. The Organization and Behavior of Democracies—How the rules of the game affect political competition and policy output. How formal political institutions determine who gets into power and how much authority those actors have; how these institutions arise, what they do, and how they can be manipulated. Topics include the influence of electoral rules on partisan competition, why the difference between parliamentary and presidential systems matters, the costs and benefits of federalism, and principal-agent relationships between voters, elected representatives, and bureaucrats. Case studies of actual or simulated new democracy: what kinds of institutions best foster economic growth, minority representation, and political stability.
5 units, Aut (McElwain, K)

INTNLREL 125. Japanese Postwar Politics—How the postwar Japanese experience confirms or defies accepted wisdom in comparative and international politics, focusing on domestic party politics. The causes and consequences of the LDP's single-party dominance, given that the expectation of democratic competition is alternation in power. Electoral politics, conflicts between and within parties, and the distribution of winners and losers. Comparison of Japan with democracies in Asia and Europe. Readings from general theories in comparative politics.
5 units, Win (Mcelwain, K)

INTNLREL 131. Globalization and Organizations—How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces.
5 units, not given this year (Drori, G)

INTNLREL 140A. International Law and International Relations—What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations. WIM
5 units, Aut (Lutomski, P)

INTNLREL 140B. Theories of International Law—Competing theories of international law, including approaches based on natural law, positivism, the Grotian tradition, realism, rational institutionalism, liberalism, social construction, and critical theory; evaluations based upon explanatory power, parsimony, and prescriptive implications. How international legal arguments are made through each theoretical perspective. Primary and secondary materials by international law theorists and political scientists. Term paper.
5 units, Win (Steinberg, R)

INTNLREL 163. History and Geography of Contemporary Global Issues—(Same as HISTORY 206.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of the *New York Times* and *The Economist*. Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM
5 units, Aut (Lewis, MW)

HISTORY

HISTORY 102. The History of the International System—WIM
5 units, Win (Sheehan, J)

HISTORY 120C. 20th-Century Russian and Soviet History
5 units, not given this year

HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008
5 units, Spr (Patenaude, B)

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jolluck, K)

HISTORY 137/337. The Holocaust
4-5 units, Spr (Felstiner, M)

HISTORY 145B. Africa in the 20th Century
5 units, Win (Hanretta, S)

HISTORY 150C. The United States in the Twentieth Century
5 units, Spr (Camarillo, A; Chang, G)

HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein, B)

HISTORY 181B. The Middle East in the 20th Century
5 units, not given this year

HISTORY 195. Modern Korean History
5 units, Aut (Moon, Y)

HISTORY 195C. Modern Japanese History
5 units, Spr (Uchida, J)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era
5 units, Win (Lewis, M)

HISTORY 198. The History of Modern China
5 units, Win (Mullaney, T)

HISTORY 202/306E. International History and International Relations Theory—(Same as POLISCI 316.)
5 units, not given this year (Holloway, D)

HISTORY 224/324. Violence, Islam, and the State in Central Asia
5 units, not given this year (Crews, R)

HISTORY 224A/324A. Modern Russia, Iran, and Afghanistan
4-5 units, not given this year (Crews, R)

HISTORY 228/328. Circles of Hell: Poland in World War II
5 units, not given this year (Jolluck, K)

HISTORY 252/355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
4-5 units, Aut (Bernstein, B)

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
4-5 units, Win (Chang, G)

INTERNATIONAL POLICY STUDIES

IPS 210. The Politics of International Humanitarian Action
5 units, Aut (Morris, E)

IPS 211. The Transition from War to Peace: Peacebuilding Strategies
5 units, Win (Morris, E)

IPS 219. The Role of Intelligence in U.S. Foreign Policy
5 units, Spr (Hansen, K)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

POLITICAL SCIENCE

POLISCI 110B. Strategy, War, and Politics
5 units, not given this year

POLISCI 110D/110Y. War and Peace in American Foreign Policy—WIM
5 units, Spr (Schultz, K)

POLISCI 111D. British Politics
5 units, Spr (Dorfman, G)

POLISCI 113F. The United Nations and Global Governance
5 units, not given this year

POLISCI 114S. International Security in a Changing World
5 units, Win (Sagan, S; Blacker, C)

POLISCI 116. History of Nuclear Weapons—(Same as HISTORY 103E.)
5 units, Spr (Holloway, D)

POLISCI 140L. China in World Politics
5 units, not given this year

POLISCI 144T. Democracies and Dictatorships
5 units, Spr (Magaloni, B)

POLISCI 147. Comparative Democratic Development
5 units, Win (Diamond, L)

POLISCI 147S. Comparative Democratic Politics
5 units, Win (Jusko, K)

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform
5 units, Spr (Oi, J)

POLISCI 149S. Islam and the West
5 units, Spr (Milani, A)

POLISCI 149T. Middle Eastern Politics
5 units, Win (Blaydes, L)

POLISCI 212. Managing Global Complexity—(Same as IPS 201.)
3 units, Spr (Krasner, S; Stedman, S)

POLISCI 217. International Organizations
5 units, Spr (Lipscy, P)

POLISCI 218. U.S. Relations in Iran
5 units, Aut (Milani, A)

POLISCI 245R. Politics in Modern Iran
5 units, Win (Milani, A)

POLISCI 248. Mexican Politics
5 units, Spr (Díaz-Cayeros, A)

POLISCI 248S. Latin American Politics
5 units, Win (Magaloni, B)

POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern—(Same as HISTORY 378A.)
5 units, Aut (Haber, S)

SOCIOLOGY

SOC 167A/267A. Asia-Pacific Transformation

5 units, Win (Shin, G)

COMPARATIVE CULTURE AND SOCIETY (CCAS)

INTNLREL 106. Present Pasts: History and Memory in Culture and Politics—(Same as GERLIT 290.) Theoretical, comparative, and interdisciplinary approach to historical representation and remembrance. Focus is on the uses and abuses of remembering and historiographic accounting for the recent past in culture and politics. Examples include post-WW II Germany and post-1948 Israel. How the memory of 9/11 is played out in contemporary American discourse, including political debates, literature, and popular culture.

5 units, not given this year (Eshel, A)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as IPS 230, POLISCI 114D/314D.) For description, see "Comparative Political and Historical Analysis" subsection above.

5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 136R. Introduction to Global Justice—(Same as POLISCI 136R.) Recent work in political theory on the ethics of international relations. Topics include human rights, global economic justice, and the problem of global poverty.

5 units, Spr (Pasternak, A; de Bres, H)

INTNLREL 140C. The U.S., UN Peacekeeping, and Humanitarian War—The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. WIM

5 units, Spr (Patenaude, B)

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries—Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum

5 units, Aut (Bojic, J)

INTNLREL 141B. Camera as Witness: A Forum for Global Dialogue—Challenges facing filmmakers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum

5 units, not given this year (Bojic, J)

INTNLREL 150. The Arab-Palestinian Minority in Israeli Society—The ethnic and religious composition of Israel. Recent challenges to the primacy of the Jewish core of Israeli society; the status of the Arab-Palestinian minority in Israel. Issues include: the status of the Arabic language; the right to vote and run for office; allocation of state funds to minority projects and local governments; representation in decision making institutions; military service; and the Arab educational system. Political and legal dimensions of the minority status of Arab-Palestinians; impact of domestic Jewish/Palestinian politics on the Israeli/Arab international conflict.

5 units, Win (Holzman-Gazit, Y)

INTNLREL 161A. Global Human Geography: Asia and Africa—(Same as HISTORY 106A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes.

5 units, Aut (Lewis, M.W.)

INTNLREL 161B. Global Human Geography: Europe and Americas—(Same as HISTORY 106B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

5 units, Win (Lewis, MW)

INTNLREL 166. Russia and Islam—Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya.

5 units, Win (Dunlop, J)

AFRICAN STUDIES

AFRICAST 111/211. Education for All? The Global and Local in Public Policy Making in Africa

5 units, Spr (Samoff, J)

ANTHROPOLOGY

CASA 77/277. Japanese Society and Culture

5 units, alternate years, not given this year

ECONOMICS

ECON 143. Ethics in Economics Policy

5 units, not given this year

EDUCATION

EDUC 136/306D. World, Societal, and Educational Change: Comparative Perspectives—(Same as SOC 231.)

4-5 units, Win (Drori, G)

HISTORY

HISTORY 185B. Jews in the Modern World

5 units, not given this year (Zipperstein, S)

HISTORY 221B. The Woman Question in Modern Russia

5 units, Aut (Jolluck, K)

HISTORY 227/327. East European Women and War in the 20th Century

5 units, not given this year (Jolluck, K)

HISTORY 245E/347E. Health and Society in Africa

4-5 units, not given this year (Roberts, R)

HISTORY 248S/448A. African Societies and Colonial States

4-5 units, not given this year (Roberts, R)

HISTORY 295J. Chinese Women's History

5 units, Spr (Sommer, M)

INTERNATIONAL POLICY STUDIES

IPS 210. The Politics of International Humanitarian Action

5 units, Aut (Morris, E)

JAPANESE GENERAL

JAPANGEN 51/251. Japanese Business Culture

3-5 units, Win (Dasher, R)

PHILOSOPHY

PHIL 171/271. Justice—(Same as ETHICSOC 171, IPS 208, POLISCI 136S, PUBLPOL 207.)

5 units, Aut (Cohen, J)

POLITICAL SCIENCE

POLISCI 141. The Global Politics of Human Rights

5 units, not given this year

POLISCI 149S. Islam and the West
5 units, Spr (Milani, A)

POLISCI 215. Explaining Ethnic Violence
5 units, Aut (Fearon, J)

SOCIOLOGY

SOC 110/210. Politics and Society
5 units, Aut (Beck, C)

SOC 111/211. State and Society in Korea
5 units, alternate years, not given this year

SOC 117A/217A. China Under Mao
5 units, Aut (Walder, A)

SCIENCE, TECHNOLOGY, AND SOCIETY

STS 110. Ethics and Public Policy—(Same as MS&E 197, PUBLPOL 103B.)
5 units, Win (McGinn, R)

COMPARATIVE INTERNATIONAL POLITICAL ECONOMY (CIPE)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as IPS 230, POLISCI 114D/314D.) For description, see "Comparative Political and Historical Analysis" subsection above.
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 115. Development Issues in South Asia—Problems and solutions from theoretical and practical perspectives, including village economies and global networks, during the present period of growth.
5 units, Win (Dossani, R)

INTNLREL 117. Varieties of Capitalism in East Asia: Politics and Economic Reforms—Interaction between states and markets in Japan, S. Korea, and China, emphasizing similarities and differences in government reform attempts in response to globalization. Institutional arrangements to spur rapid economic growth. Differences in models of economic development and reforms, institutional settings, and cultural and sociopolitical contexts. How politics has determined the pace and sequence of economic reforms.
5 units, Win (Kang, M)

INTNLREL 118. The Political Economy of Modern Iran—Economic trends and changing priorities under the Pahlavi dynasty, constitutional monarchy, and the Islamic Republic. Development planning and the significance of oil. Fiscal, monetary, and exchange policies. Iran's economic standing in the world, distribution of income, poverty, educational programs, economic resources, and physical and human capital. Upcoming economic challenges.
5 units, Win (Shomali, H)

INTNLREL 122A. The Political Economy of the European Union—EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.
5 units, Win (Crombez, C)

INTNLREL 130. Science, Technology, and Development—Global and sociological perspectives on science and technology expansion, comparing nations and regions. Social features such as gender equity; and social impact economic development strategies such as tech incubators, the triple helix model, and UN initiatives. Democratization, human rights, welfare of local populations, and national security. Policy issues, the digital divide, development debates, commodification of the public good, and notions of social change.
5 units, not given this year (Drori, G)

INTNLREL 133. Introduction to Comparative and International Political Economy—Economic growth and political redistribution in advanced industrialized democracies. Emphasis is on historical and institutional factors that undergird the distribution of economic power, and how tensions between socioeconomic actors play out in the political realm. Topics include: why and how governments tax their citizens; varieties of capitalism; endogenous growth theory; trajectories in the development of the welfare state; why some governments appear to waste more money than others; and how government policy may be constrained in a globalizing world.
5 units, Spr (Mcelwain, K)

INTNLREL 143. Nongovernmental Organizations and Development in Poor Countries—(Same as POLISCI 143.) Relations among nongovernmental organizations, governments, international organizations, and multinational corporations. How NGOs contribute to economic growth, equity, a sustainable environment, peace and order, and democracy in poor countries. Their record on natural disaster and war relief work. How NGOs based in rich countries interact with those based in poor ones. GER:DB-SocSci
5 units, Win (Abernethy, D)

INTNLREL 147. The Political Economy of the Southern Cone of South America—Argentina, Brazil, Paraguay, Uruguay, Bolivia, and Chile. Post-WW II political economy developments and political relations. Impacts of military rule from the 60s into the 80s. Regional and international political developments that led to MERCOSUR in 1991, and subsequent expansion.
5 units, Win (O'Keefe, T)

INTNLREL 148. Economic Integration of the Americas—Current attempts at economic integration throughout the Western Hemisphere, including the Andean Community, the Caribbean Common Market (CARICOM), the Latin American Integration Association (ALADI), MERCOSUR, the North American Free Trade Area (NAFTA), and the Central American Integration System (SICA). Emphasis is on practical applications of integration efforts and nuts-and-bolts issues of how integration efforts function.
5 units, Aut (O'Keefe, T)

INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System—The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.
5 units, Win (Josling, T)

BIOLOGICAL SCIENCES

BIOSCI 147/247. Controlling Climate Change in the 21st Century—(Same as EARTHSYS 147/247, HUMBIO 116.)

5 units, Spr (Rodden, J)

1- AND 2-UNIT OPTIONS

INTNLREL 191. IR Journal
1 unit, Aut, Win, Spr (Schultz, K)

INDEPENDENT STUDY/HONORS

INTNLREL 197. Directed Reading in International Relations—Open only to declared International Relations majors.
3-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 198. Senior Thesis—Open only to declared International Relations majors with approved senior thesis proposals.
2-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries—Restricted to students in the CDDRL option of the International Relations honors program. Goal is to prepare students to do research and/or fieldwork to complete their thesis research. Main currents in democracy and development literature concerning how economic growth and democratization are related; how the rule of law supports these processes in countries undergoing change. Student presentations of thesis questions; student groups develop research problems and designs. May be repeated for credit.
3-5 units, Spr (Stoner-Weiss, K)

INTNLREL 200A. International Relations Honors Field Research—For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.
3 units, Spr (Drori, G)

INTNLREL 200B. International Relations Honors Seminar—Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.
3 units, Aut (Drori, G)

OVERSEAS STUDIES

The following courses taught overseas are approved for the International Relations major; consult the updated course offering lists available in the International Relations office or on the IR website for track information. For course descriptions and additional information, see the "Overseas Studies" section of this bulletin, or http://osp.stanford.edu.

TAUBE CENTER FOR JEWISH STUDIES

Directors: Charlotte Fonrobert, Vered Shemtov

Academic Advisory Committee: Zachary Baker (Stanford University Libraries), Joel Beinin (History), Arnold Eisen (Religious Studies, emeritus), Amir Eshel (German Studies), John Felstiner (English), Charlotte Fonrobert (Religious Studies), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law, Psychology, emeritus), Gabriella Safran (Slavic Languages and Literatures), Vered Shemtov (African and Middle Eastern Languages and Literatures), Peter Stansky (History), Sam Wineburg (Education), Amir Weiner (History), Steven Zipperstein (History)

Offices: Building 360, Room 362G
Mail Code: 94305-2190
Phone: (650) 725-0577
Email: jewish.studies@stanford.edu
Web Site: http://jewishstudies.stanford.edu/

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, religion, literature, language, education and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity, and it coordinates the annual Dorot Travel Grants for summer study in Israel.

Graduate students enroll in the program through the departments of English, History, Comparative Literature, or Religious Studies, or the School of Education, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS

INDIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student's primary adviser, and from one of the Directors of the Taube Center for Jewish Studies. The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year. Details about the written procedures and documents necessary for application for an individually designed major in Jewish Studies can be obtained at the Taube Center for Jewish Studies, Bldg. 360, Main Quad, (650) 725-2789.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

Category	*Units*
History and Society: Students must take one course in each of the three periods: biblical and ancient, medieval and modern, and contemporary	20
Religion: Biblical, rabbinic, medieval, modern	20
Literature: Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish	15
Hebrew Language (second year or beyond): Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level modern Hebrew may apply the 12 units required in this category to more work in another category, with the approval of their primary adviser.	12
Ancillary Courses: Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity	8-10
Total number of units required	75-77

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in declaring an Individually Designed Major in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

MINORS

The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, or the Division of Literatures, Cultures, and Languages and by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:

1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).
3. One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature.) No course credited toward the Jewish Studies minor may be double counted toward major requirements.

COURSES

JEWISH LANGUAGES COURSES

Modern Hebrew, Biblical Hebrew and Yiddish language courses are offered by the Language Center. For descriptions, course numbers and additional information, see the African, Jewish, and Middle Eastern language offerings in the "Language Center" section of this bulletin.

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature
4 units, Aut (Barhoum, K; Shemtov, V)

COMPLIT 218. Sholem Aleichem and Jewish Minority Discourse
5 units, Win (Staff)

COMPLIT 247. The Modern Jewish Literary Complex
5 units, Win (Staff)

DRAMA 155T/255T. Drama of the Holocaust
5 units, Spr (Staff)

ENGLISH 140A. Creative Resistance and the Holocaust
5 units, Win (Felstiner, J)

ENGLISH 201. The Bible and Literature

4-5 units, Spr (Rodrigue, A)

HISTORY 486B. Graduate Research Seminar in Jewish History
4-5 units, Sum (Staff)

RELIGST 5N. Three Sacred Stories of Judaism, Christianity, and Islam
3-4 units, Aut (Gregg, R)

RELIGST 23. Introduction to Judaism
4 units, Aut (Radwin, A)

RELIGST 54. The Roots of Right and Wrong in Christianity, Judaism, and Islam
4 units, Win (Sadeghi, B)

RELIGST 57. Millennium, Messiahs, and Mayhem
4 units, Aut (Levinsky, D)

RELIGST 129. Modern Jewish Thought
4 units, Spr (Lerner, A)

RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries
3-5 units, Win (Gregg, R; Fonrobert, C)

RELIGST 321. The Talmud
4 units, Spr (Fonrobert, C)

RELIGST 226/326. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period
5 units, Win (Malkiel, D)

LANGUAGE CENTER

Director: Elizabeth Bernhardt
Associate Director: Joan Molitoris
Assistant Director: Patricia de Castries

African and Middle Eastern Languages
Senior Lecturers: Khalil Barhoum (Coordinator, and Minor Adviser: Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature)
Lecturers: Salem Aweiss, Estee Greif, Yussuf Hamad (Fulbright Scholar), Jon Levitow, Sangai Mohochi, Gallia Porat, Ramzi Salti

Catalan Language
Lecturers: Joan Molitoris (Coordinator and Associate Director, Language Center), Maria Del Carmen San Juan Pastor

Chinese Language
Coordinator: Chao Fen Sun (Associate Professor, Asian Languages)
Lecturers: Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Huazhi Wang, Hong Zeng, Youping Zhang, Qi Zhu, Xiaoya Zhu

English for Foreign Students
Director and Senior Lecturer: Philip Hubbard (Linguistics)
Lecturers: Carole Mawson, Kenneth Romeo, Constance Rylance, Carol Shabrami, Seth Streichler

French Language
Lecturers: Olubunmi Ashaolu, Jane Dozer-Rabedeau, Heather Howard, Sylvie Palumbo-Liu, Tanya Shashko, Kenric Tsethlikai (Coordinator)

German Language
Coordinator: Elizabeth Bernhardt (Director, Language Center)
Senior Lecturers: William E. Petig (on leave Spring), Kathryn Strachota (on leave Winter)
Lecturers: Paul Nissler, Shafiq Shamel

Italian Language
Senior Lecturer: Maria Devine
Lecturers: Marta Baldocchi, Anna Cellinese, Sara Gelmetti (Coordinator), Alessandra McCarty, Giovanni Tempesta

Japanese Language
Coordinator: Yoshiko Matsumoto (Associate Professor, Asian Languages)
Senior Lecturer: Kazuko M. Busbin
Lecturers: Fumiko Arao, Hisayo O. Lipton, Momoyo K. Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Yoshiko Tomiyama

Korean Language
Lecturers: Hee-Sun Kim (Coordinator), Jinim Park (Fulbright Scholar)

Portuguese Language
Senior Lecturer: Lyris Wiedemann (Coordinator; on leave Autumn)
Lecturers: Ana Isabel Delgado, Karen Sotelino

Slavic Language
Senior Lecturer: Rima Greenhill (on leave)
Lecturers: Eugenia Khassina (Coordinator), Marina Marcos

Spanish Language
Senior Lecturer: Irene Corso
Lecturers: Amy Alexander, Vivian Brates, Loreto Catoira, Citlalli del Carpio, Candy Guzmán, Caridad Kenna, Laura Méndez Barletta, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Nissler, Carimer Ortiz Cuevas, Consuelo Perales, Veronika Reinhold, Kara Sanchez, Ana M. Sierra, María Cristina Urruela, Hae-Joon Won

Special Language Program
Lecturers: Mary Grace Alvarez (Fulbright Scholar), Cathy Haas, Tri Indrawati (Fulbright Scholar), Costantia Manoli (Fulbright Scholar), Mona Sharma (Fulbright Scholar), Eva Prionas (Coordinator, Modern Greek Language and Literature)

Tibetan Language Program
Lecturer and Coordinator: Robert W. Clark

Language Center Offices: Building 30
Mail Code: 94305-2015
Department Phone: (650) 725-9222
Email: patricia@stanford.edu
Web Site: http://language.stanford.edu

Courses given in the Language Center have one of the following subject codes: AMELANG, APPLLING, CATLANG, CHINLANG, EFSLANG, FRENLANG, GERLANG, ITALLANG, JAPANLNG, KORLANG, PORTLANG, SLAVLANG, SPANLANG, SPECLANG, and TIBETLNG. For a complete list of subject codes, see Appendix.

The Stanford Language Center was created to oversee all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

PROFICIENCY IN FOREIGN LANGUAGE NOTATION

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript.

In order for a student to have the proficiency notation appear on the official transcript, the student must:

1. Inform the Language Center at least two quarters prior to graduation that he/she is requesting such a notation.
2. Schedule an Oral Proficiency Interview (OPI) through the Language Center. Since this is a formal oral proficiency interview, at least two quarters of lead time are essential for scheduling this interview. The interview will be conducted by a certified OPI rater.
3. Submit to the Language Center an academic paper written in the foreign language in question of at least five pages (two pages in the Asian languages and Russian).
4. Ask one Stanford University Academic Council faculty member to write a letter on the student's behalf, attesting to a high level of academic writing and composition skill in the foreign language.
5. Receive a rating of 'Advanced Low' on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) oral proficiency scale, except in the non-cognate languages which require an 'Intermediate High' rating.

UNDERGRADUATE PROGRAM

MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Middle Eastern and African languages, and to the cultures and civilizations of the Middle East and Africa. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director's discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Completion of six courses in either Track A, Cultural Studies, or Track B, Language Studies.

2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing Track B, Cultural Studies, must complete the prerequisite of beginning level in the respective language, or demonstrate an equivalent competence.

CULTURAL STUDIES TRACK

Requirements are:

1. Completion of the language prerequisite, or a demonstrated equivalent competence.
2. In the case of Arabic completion of six non-language courses including three from the AME program.
3. In the case of Hebrew and African languages, completion of six non-language related courses. Consult minor adviser for course options.
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

LANGUAGE TRACK

Requirements are:

1. Completion of prerequisite language study at the beginning level, or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level.
3. Completion of three non-language related courses, including one of the AMELANG 161-165 series in the case of Arabic. Consult the minor adviser for course options.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

GRADUATE PROGRAM

Ph.D. MINOR IN APPLIED LINGUISTICS

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of no less than 30 units of unduplicated course work. Course work must include LINGUIST 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a more complete listing of courses which are appropriate for the minor can be found on the Language Center’s web site at http://language.stanford.edu/.

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

1. Second language acquisition in instructed contexts
2. Elements of curricular design for university and college settings
3. The acquisition of second language literacy
4. The use of technology to enhance student performance
5. Linguistics and the teaching of foreign languages
6. Theoretical foundations in the translation of various languages

Subject and Catalog Number	*Units*
APPLLING 201. The Learning and Teaching of Second Languages	3
APPLLING 202. Workshop in Technology	3
APPLLING 203/SPANLIT 300. Issues and Methods in the Teaching of Heritage Languages	3-5
LINGUIST 191/291. Linguistics and the Teaching of English as a Foreign Language	4-5
LINGUIST 140/240. Language Acquisition I	4

EDUCATIONAL AND POLICY APPLICATIONS OF LINGUISTICS TRACK

This concentration is oriented toward a combination of conceptual and research foci regarding language minority populations and their educational welfare. The education of women, low-income, and language minority populations receive primary attention within this concentration.

Subject and Catalog Number	*Units*
EDUC 249. Theory and Issues in the Study of Bilingualism	3-4
EDUC 277. Education of Immigrant Students: Psychological Perspectives	4
EDUC 335X. Language Policy and Planning	3
EDUC 435X. Research Seminar in Applied Linguistics	2-4
LINGUIST 73/273. African American Vernacular English	4
LINGUIST 150. Language in Society	4-5
LINGUIST 159. Language in the U.S.	3-5
LINGUIST 250. Sociolinguistic Theory and Analysis	4-6

COURSES

Offerings in this section are ordered as follows:

Applied Linguistics (APPLLING)
African and Middle Eastern Languages (AMELANG)
Catalan (CATLANG)
Chinese (CHINLANG)
English for Foreign Students (EFSLANG)
French (FRENLANG)
German (GERLANG)
Italian (ITALLANG)
Japanese (JAPANLNG)
Korean (KORLANG)
Portuguese (PORTLANG)
Russian (SLAVLANG)
Spanish (SPANLANG)
Special Languages (SPECLANG)
Tibetan (TIBETLNG)

Students interested in general courses concerning languages, cultures, and literatures, or in advanced study of language and literature should consult the following departments and subject codes:

Asian Languages (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT, KORGEN)
French and Italian (FRENGEN, FRENLIT, ITALGEN, ITALLIT)
German Studies (GERGEN, GERLIT)
Slavic Languages and Literatures (SLAVGEN, SLAVLIT)
Spanish and Portuguese (SPANLIT, PORTLIT)

APPLIED LINGUISTICS (APPLLING)

APPLLING 201. The Learning and Teaching of Second Languages—Learning perspective rather than traditional teaching methods. Focus is on instructional decision making within the context of student intellectual and linguistic development in university settings to different populations. Readings in second-language acquisition.

3 units, Spr (Bernhardt, E)

APPLLING 203. Issues and Methods in the Teaching of Heritage Languages—(Same as EDUC 300, SPANLIT 300.) Teaching Spanish to students raised in Spanish-speaking homes. Language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for developing the academic Spanish language skills of heritage students.

3-5 units, not given this year

APPLLING 204. Second Language and Second Dialect Acquisition—(Same as EDUC 216, SPANLIT 204.) In Spanish.

3-5 units, not given this year

APPLLING 206. Language Use in the Chicano Community—(Same as EDUC 242, SPANLIT 206.) The significance and consequences of language diversity in the culture and society of the U.S. Experiences of non-English background individuals through focus on Spanish-English bilingual communities.

3-5 units, Spr (Valdés, G)

APPLLING 207. Perspectives on the Education of Linguistic Minorities—(Same as EDUC 146X.) Social, political, linguistic, and pedagogical issues associated with educating students who do not speak the language or language variety of the majority society. Focus is on the U.S.; attention to minorities elsewhere. American attitudes toward linguistic and racial minorities. Educational problems of linguistically different children and non-English- or limited-English-speaking children. Approaches to solving problems.

3-5 units, Spr (Valdés, G)

APPLLING 297. Directed Reading—Search for instructor on Axess. May be repeated for credit. Prerequisite: consent of instructor.

1-4 units, Aut, Win, Spr (Staff)

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES (AMELANG)

The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2007-08 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2008-09 academic year should be made by Spring Quarter of this year at the AME program office, email: khalil@stanford.edu.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:

All 'A' suffix courses are taught Autumn.
All 'B' suffix courses are taught Winter.
All 'C' suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except Arabic, Hebrew, and Swahili. In some circumstances, a beginning or intermediate course may be offered in alternate years.

Fulfilling the language requirement—Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for language testing or to request that a language be taught, and for further information on the program, see http://www.stanford.edu/dept/lc/MEL/. Language courses may not be repeated for credit and must be taken in sequence.

AFRICAN LANGUAGES COURSES

AMELANG 100A,B,C. Beginning Amharic
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Tesfamariam, I)*

AMELANG 106A,B,C. Beginning Swahili
4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mohochi, E)*

AMELANG 107A,B,C. Intermediate Swahili
2-4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mohochi, E)*

AMELANG 108A,B,C. Advanced Swahili
2-4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mohochi, E)*

AMELANG 134A,B,C. Beginning Igbo
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ajaelo, G)*

AMELANG 135A,B,C. Intermediate Igbo
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ajaelo, G)*

AMELANG 136A,B,C. Beginning Xhosa
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

AMELANG 138A,B,C. Advanced Xhosa
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Sibanda, G)*

AMELANG 153A,B,C. Beginning Twi
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Nyam, K)*

AMELANG 157A,B,C. Intermediate Zulu
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Sibanda, G)*

AMELANG 158A,B,C. Advanced Zulu
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

AMELANG 186A,B,C. Beginning Yoruba
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ashaolu, O)*

AMELANG 187A,B,C. Intermediate Yoruba
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ashaolu, O)*

MIDDLE EASTERN LANGUAGE AND LITERATURE COURSES

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature—How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer's views. Arab and Jewish (Israeli) culture. GER:DB-Hum, EC-GlobalCom

4 units, Aut (Barhoum, K; Shemtov, V)

AMELANG 144A,B,C. Beginning Persian
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mohammadi, S)*

AMELANG 184A,B,C. Beginning Turkish
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ozisik, N)*

AMELANG 185A,B,C. Intermediate Turkish
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ozisik, N)*

ARABIC LANGUAGE AND LITERATURE COURSES

AMELANG 20A,B. Intensive Beginning Arabic—Stanford graduate students restricted to 9 units register for 220A,B,C.
4 units, **A:** *Sum,* **B:** *Sum (Aweiss, S)*

AMELANG 120A,B,C. Intensive Beginning Arabic—One-year sequence. Emphasis is on reading and writing standard Arabic (*fusha*).
5 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Barhoum, K)*

AMELANG 121A,B,C. Intermediate Arabic—Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications..
2-3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Aweiss, S; Salti, R)*

AMELANG 122A,B,C. Advanced Arabic—Language proficiency through use of complex and compound sentences. Media Arabic, literary works, the Arabic Internet, films, and cultural productions.
2-3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Salti, R)*

AMELANG 162. Arab Women Writers and Issues—Fiction and nonfiction work. The major cultural factors shaping their feminist attitudes. Readings: Fatima Mernissi, Nawal El-Saadawi, Etel Adnan, Fadia Faqir, Alifa Rifaat, and Sahar Khalifeh. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-Gender
4 units, Win (Barhoum, K)

AMELANG 165. The West through Arab Eyes—Events and thinking influencing Arab relations with the West; the impact of common historical events on the Arab side. Texts include: Amin Maalouf's *The Crusades through Arab Eyes;* Edward Said's *Orientalism* and *Covering Islam;* Jack Shaheen's *Reel Bad Arabs;* and Francesco Gabriel's *Arab Historians of the Crusades*. Limited enrollment. GER:EC-GlobalCom
4 units, Spr (Barhoum, K)

AMELANG 196A,B,C. Reading Arabic—For seniors and graduate students who need to acquire reading ability in Arabic for the Ph.D. or for advanced research in their own field.
2-3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

AMELANG 213A,B,C. Beginning Arabic: From Basic Script to Islamic Text—Introduction to Islam through Arabic. Islam as faith, practice, philosophy, and institution; personalities and dynasties.
4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Aweiss, S)*

JEWISH LANGUAGES AND LITERATURE COURSES

AMELANG 50A,B. Reading Hebrew—Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.
2-4 units, **A:** *Win,* **B:** *Spr (Shemtov, V)*

AMELANG 128A,B,C. Beginning Hebrew
5 units, **A:** *Aut,* **B:** *Win (Shemtov, V; Greif, E),* **C:** *Spr (Porat, G)*

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Porat, G)*

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, **A:** *Aut (Porat, G),* **B:** *Win (Shemtov, V),* **C:** *Spr (Porat, G)*

AMELANG 170A,B. Biblical Hebrew—The basic lexicon and grammar of Hebrew of the *Tanakh* or Old Testament.
2-4 units, **A:** *Win,* **B:** *Spr (Porat, G)*

AMELANG 297. Directed Reading in African and Middle Eastern Languages—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

AMELANG 395. Graduate Studies in African and Middle Eastern Languages—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

CATALAN LANGUAGE COURSES

Because the Catalan Language Program does not have a formal placement test, students registering for the first time must see the coordinator for proper placement if they have had any prior training in Catalan. Completion of CATLANG 2A fulfills the University Foreign Language Requirement. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

CATLANG 1A,2A. Accelerated First-Year Catalan—For students with knowledge of another Romance language, preferably Spanish. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Completion of 2A fulfills the University language requirement. Prerequisite: consent of instructor.
5 units, **1A:** *Aut,* **2A:** *Win (San Juan Pastor, M)*

CATLANG 11A, 12A. Accelerated Second-Year Catalan—Sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: consent of instructor.
3-5 units, **11A:** *Spr (San Juan Pastor, M),* **12A:** *not given this year*

CATLANG 199. Individual Work—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

CATLANG 395. Graduate Studies in Catalan—May be repeated for credit. Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

CHINESE LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they have had any training in Chinese before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR LANGUAGE

CHINLANG 1,2,3. First-Year Modern Chinese—Conversation, grammar, reading, elementary composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements.
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Dibello, M; Lin, J; Lin, N; Zhang, X; Zeng, H; Staff)*

CHINLANG 1B,2B,3B. First-Year Modern Chinese for Bilingual Students—For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition.
3 units, **1B:** *Aut,* **2B:** *Win,* **3B:** *Spr (Lin, N; Rozelle, Y)*

CHINLANG 5. Intensive First-Year Modern Chinese—Equivalent to 1,2,3 combined. Five weeks at Stanford and four weeks at Peking University.
7-8 units, Sum (Zeng, H)

CHINLANG 6,7,8. Beginning Conversational Chinese—Three quarter sequence. Basic language skills in Mandarin to function abroad.
2 units, **6:** *Aut,* **7:** *Win,* **8:** *Spr (Rozelle, Y)*

CHINLANG 10,11,12. Beginning Southern Min (Taiwanese) Conversation—Three quarter sequence. Basic language skills for everyday life situations.
2 units, **10:** *Aut,* **11:** *Win,* **12:** *Spr (Lin, N)*

CHINLANG 13A,B,C. Intermediate Southern Min (Taiwanese) Conversation—Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 12 or consent of instructor.
2 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Lin, N)*

CHINLANG 14A,B,C. First-Year Comprehensive Cantonese
5 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Dennig, S)*

CHINLANG 15,16,17. Beginning Cantonese Conversation—Three quarter sequence. Language skills for everyday life.
2 units, **15:** *Aut,* **16:** *Win,* **17:** *Spr (Dennig, S)*

CHINLANG 18, 19,20. Intermediate Cantonese Conversation
2 units, **18:** *Aut,* **19:** *Win,* **20:** *Spr (Dennig, S)*

CHINLANG 20A,B,C. Advanced Cantonese Conversation—Improving Cantonese through Hong Kong movies.
2 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Dennig, S)*

CHINLANG 21,22,23. Second-Year Modern Chinese—Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: 3 or equivalent.
5 units, **21:** *Aut,* **22:** *Win,* **23:** *Spr (Chung, M; Zou, Y)*

CHINLANG 21B,22B,23B. Second-Year Modern Chinese for Bilingual Students—For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21,22,23.
3 units, **21B:** *Aut,* **22B:** *Win,* **23B:** *Spr (Zhu, Q)*

CHINLANG 25. Intensive Second-Year Modern Chinese—Equivalent to 21,22,23 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.
7-8 units, Sum (Chung, M)

CHINLANG 27,28,29. Intermediate Chinese Conversation—Prerequisite: 3 or consent of instructor.
2 units, **27:** *Aut,* **28:** *Win,* **29:** *Spr (Zhang, Y)*

ADVANCED CHINESE

CHINLANG 101,102,103. Third-Year Modern Chinese—Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: 23 or equivalent.
5 units, **101:** *Aut,* **102:** *Win,* **103:** *Spr (Wang, H)*

CHINLANG 101B,102B,103B. Third-Year Modern Chinese for Bilingual Students—For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Equivalent to 101,102,103.
3 units, **101B:** *Aut,* **102B:** *Win,* **103B:** *Spr (Wang, H)*

CHINLANG 105. Intensive Third-Year Modern Chinese—Equivalent to 101,102,103 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.
7-8 units, Sum (Wang, H)

CHINLANG 121,122,123. Advanced Chinese Conversation—Prerequisite: 23 or equivalent.
2 units, **121:** *Aut,* **122:** *Win,* **123:** *Spr (Chung, M)*

CHINLANG 131,132,133. Business Chinese—Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economics. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.
3-4 units, **131:** *Aut,* **132:** *Win,* **133:** *Spr (Wang, H)*

CHINLANG 211,212,213. Fourth-Year Modern Chinese—Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: three years of Chinese.
2-5 units, **211:** *Aut,* **212:** *Win,* **213:** *Spr (Zhu, Q; Staff)*

CHINLANG 231,232,233. Fifth-Year Modern Chinese: Cultural China—Year-long sequence. Rhetorical devices through essays about China's cultural journey in relationship to geographical regions.
2-5 units, **231:** *Aut,* **232:** *Win,* **233:** *Spr (Zhu, Q)*

CHINLANG 394. Graduate Studies in Chinese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

CHINLANG 395. Graduate Studies in Chinese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

ENGLISH FOR FOREIGN STUDENTS

These courses, numbered from 690-698, represent offerings for nonnative English-speaking graduate students in Autumn, Winter, and Spring quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English placement examination. To enroll, students must go to http://efs.stanford.edu for directions on or before the first day of each quarter. Some courses are open to undergraduates by consent of the program; email efs@stanford.edu for information.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

EFSLANG 687X. American Language and Culture, First Session—Closed enrollment. Intensive English language and U.S. culture program. Enrollment limited to 14.
3 units, Sum (Staff)

EFSLANG 687Y. American Language and Culture, Second Session—Closed enrollment. Intensive English language and U.S. culture program. Enrollment limited to 14.
3 units, Sum (Staff)

EFSLANG 690A. Interacting in English—Strategies for communicating effectively in social and academic settings. Informal and formal language used in campus settings, including starting and maintaining conversations, asking questions, making complaints, and contributing ideas and opinions. Simulations and discussions, with feedback on pronunciation, grammar, and usage. Enrollment limited to 14.
1-3 units, Aut, Win, Spr (Staff)

EFSLANG 690B. Academic Discussion—Skills for effective participation in classroom settings, seminars, and research group meetings. Pronunciation, grammar, and appropriateness for specific tasks. Feedback on language and communication style. Enrollment limited to 14. May be repeated once for credit. Prerequisite: 690A or consent of instructor.
1-3 units, Aut (Staff), Win (Rylance, C), Spr (Staff)

EFSLANG 690C. Advanced Interacting in English—Communication skills for extended discourse such as storytelling and presenting supported arguments. Development of interactive listening facility and overall intelligibility and accuracy. Goal is advanced fluency in classroom, professional and social settings. Identification of and attention to individual patterned errors. Prerequisite: 690A or B or consent of instructor. Enrollment limited to 14.
1-3 units, Aut, Win, Spr (Romeo, K)

EFSLANG 691. Oral Presentation—For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for feedback on language accuracy and usage. Enrollment limited to 14. May be repeated once for credit.
1-3 units, Aut, Win, Spr, Sum (Staff)

EFSLANG 692. Speaking and Teaching in English—For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities. Enrollment limited to 14. May be repeated once for credit.
1-3 units, Aut (Mawson, C), Win (Rylance, C), Spr (Staff),
Sum (Shabrami, C)

EFSLANG 693A. Listening Comprehension—Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Computer-based exercises for comprehension of rapid, natural speech. Enrollment limited to 14.
1-3 units, Aut (Rylance, C; Staff)

EFSLANG 693B. Listening and Communication—Listening strategies and vocabulary for understanding English in academic and non-academic contexts. Discussion and interpretation of communicative intent. Computer-based and video exercises; individual project. May be repeated once for credit. Prerequisite: 693A or consent of instructor.
1-3 units, Aut (Hubbard, P; Staff), Win (Shabrami, C; Staff), Spr (Romeo, K; Staff), Sum (Staff)

EFSLANG 694. Communication Strategies in Professional Life—For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: 693A, or consent of instructor. Enrollment limited to 14.
1-3 units, Aut, Spr (Shabrami, C)

EFSLANG 695A. Pronunciation and Intonation—Recognition and practice of American English sounds, stress, and intonation patterns for greater comprehension and intelligibility. Analysis of problem areas. Biweekly tape assignments and tutorials. May be repeated once for credit. Enrollment limted to 14.
1-3 units, Aut, Win (Staff), Spr (Mawson, C), Sum (Staff)

EFSLANG 695B. Advanced Pronunciation and Intonation—Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly recorded assignments and tutorials. Enrollment limited to 14. May be repeated for credit three times. Prerequisite: 695A.
1-3 units, Aut, Win (Staff), Spr (Mawson, C)

EFSLANG 696. Understanding American Humor—Recognizing rhetorical devices, jokes, and character types common to spoken humor in film and television programs. Crosscultural discussion. Prerequisites: 690B, 693B or consent of the instructor. Enrollment limited to 14.
1-3 units, Win (Rylance, C)

EFSLANG 697. Writing Fundamentals—Focus is on improving grammatical accuracy and vocabulary, building fluency, and learning the structure and conventions of English correspondence, reports, and short academic papers. Enrollment limited to 14.
1-3 units, Aut, Win (Staff), Spr (Shabrami, C)

EFSLANG 698A. Writing Academic English—Strategies and conventions. Emphasis is on fluency, organization, documentation, and appropriateness for writing tasks required in course work. Enrollment limited to 14. May be repeated once for credit.
1-3 units, Aut (Rylance, C), Win, Sum (Staff)

EFSLANG 698B. Advanced Graduate Writing—For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and individual conferences. Prerequisite: 698A. Enrollment limited to 14. May be repeated once for credit.
1-3 units, Aut (Hubbard, P), Win (Staff), Spr (Hubbard, P), Sum (Staff)

EFSLANG 698C. Writing and Presenting Research—For advanced graduate students completing major research projects. Revising and editing strategies for preparing papers, conference abstracts, and poster presentations. Adapting content and style to different audiences. Students present their research with participant feedback. Enrollment limited to 14. May be repeated once for credit. Prerequisite: 698B and 691 or consent of instructor.
1-3 units, Aut, Spr (Shabrami, C)

FRENCH LANGUAGE COURSES

FIRST- AND SECOND-YEAR FRENCH

Students who have never studied French before should enroll in FRENLANG 1. Students with previous training in French must take a placement test. All entering students must take Part I (written) of the online placement test during the summer, followed by Part II (oral) to be administered on campus September 19, 2007, in order to be placed in an appropriate course for Autumn Quarter. Consult the Language Center or http://language.stanford.edu/ for further information.

FRENLANG 2A, 3, and 41B, prepare students for intermediate-level proficiency in listening comprehension, speaking, reading, and writing in satisfaction of the University foreign language requirement. Students may continue with second-year French language courses (22 or 23) or higher-level courses upon completion of the first-year sequence and recommendation of the coordinator.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence.

FRENLANG 1,2,3. First-Year French—Proficiency-based. Development of discourse appropriate in French and Francophone contexts.
5 units, Aut, Win, Spr (Ashaolu, O; Dozer-Rabedeau, J; Howard, H, Shashko, T; Samokhina, D; Tamas, J; Staff)

FRENLANG 1A,2A. Intensive First-Year French—Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. 2A fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor.
1A: *5 units, Aut (Ashaolu, O), Win (Shashko, T)*
2A: *5 units, Win (Ashaolu, O), Spr (Howard, H; Shashko, T)*

FRENLANG 5A,B. Intensive First-Year French—Accelerated. Written exercises, compositions, conversational practice, and daily work.
5 units, **A:** *Sum,* **B:** *Sum (Staff)*

FRENLANG 10. Beginning French Oral Communication—For students who have completed 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.
2 units, Aut (Howard, H), Win (Dozer-Rabedeau, J), Spr (Tamas, J)

FRENLANG 15. Intermediate French Oral Communication—For students who have completed the first-year language requirement. May be repeated once for credit.
2 units, Aut (Howard, H), Win (Dozer-Rabedeau, J), Spr (Staff)

FRENLANG 15S. Intermediate Conversation: French in Everyday Life—Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.
2 units, Sum (Staff)

FRENLANG 20A. France and Francophonie—Second-year French conversation based on themes from the regions of France and the Francophone world. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: 22 or equivalent.
2 units, Aut (Staff)

FRENLANG 20B. French Cinema—Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Film viewing in and outside the class in French. May be repeated once for credit. Prerequisite: 22 or equivalent.
2 units, Aut, Win (Staff)

FRENLANG 20C. Contemporary French Language—Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: 22 or equivalent.
2 units, Spr (Staff)

FRENLANG 22,23. Second-Year French—Proficiency-based. Advanced-level skills including past, present, and future narration, description, and defending points of view on social and cultural issues. Topics from cultural comparisons with French and Francophone contexts. Prerequisite: 3 or consent of coordinator.

22: *4-5 units, Aut (Howard, H; Shashko, T), Win (Shashko, T; Streicher, S), Spr (Howard, H; Shashko, T)*
23: *4-5 units, Aut (Dozer-Rabedeau, J), Win (Howard, H), Spr (Dozer-Rabedeau, J; Howard, H)*

FRENLANG 24C. Second-Year French: Literary Texts—Proficiency oriented. Discussion, writing, reading, and listening comprehension based on literary texts. Prerequisite: 23.
3-4 units, Spr (Tsethlikai, K)

FRENLANG 24R. Second-Year French: International Relations, Political Science, and Economics Emphasis—Proficiency-based. Discussion, writing, reading, and listening comprehension based on political, economic, and social topics. Prerequisite: 23.
3-4 units, Win (Howard, H)

FRENLANG 50. Reading French—For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.
4 units, Aut (Howard, H)

FRENLANG 50S. Reading French—Same content as 50.
2-4 units, Sum (Staff)

ADVANCED FRENCH

FRENLANG 120. Advanced French Oral Communication—Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated once for credit. Prerequisites: 23 or equivalent, and consent of instructor.
3 units, Aut, Win, Spr (Staff)

FRENLANG 122. Introduction to French Culture and Civilization—Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.
3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 123. French Creative Writing—Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.
3-4 units, Win (Palumbo-Liu, S)

FRENLANG 124. Advanced French Grammar—Required for students majoring or minoring in French; recommended for students planning to take literature courses. Review of difficulties in French. Grammatical and logical analysis. Prerequisite: 23 or equivalent.
3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 126. French Stylistics and Textual Analysis—For majors and minors. Writing intensive. Control of grammar and syntax in research and argumentative papers. Prerequisite: 124 or placement.
3-4 units, Spr (Calefas-Strebelle, A)

FRENLANG 199. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

FRENLANG 394. Graduate Studies in French Conversation—Prerequisite: consent of the instructor.
1-3 units, Aut, Win, Spr (Staff)

FRENLANG 395. Graduate Studies in French—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

MAISON FRANÇAISE

Other in-house courses may be announced.

FRENLANG 60A. Beginning French Conversation—(AU)
1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60B. Intermediate French Conversation—(AU)
1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60C. Advanced French Conversation—(AU)
1 unit, Aut, Win (Staff), Spr (de Castries, P)

FRENLANG 60D. French Viticulture—See http://www.stanford.edu/class/frenlang60d/. Prerequisite: 21 or older. (AU)
1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60E. French Cooking—(AU)
1 unit, Aut (Staff), Win, Spr (de Castries, P)

FRENLANG 60F. Filmmaking—(AU)
1 unit, Win (de Castries, P)

FRENLANG 60K. Thought for the 21st Century—(AU)
1 unit, Spr (de Castries, P)

FRENLANG 60N. French Drama—(AU)
1 unit, Spr (de Castries, P)

FRENLANG 60P. French House Projects—Prerequisite: consent of instructor. (AU)
1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60T. Teaching French Conversation—(AU)
1 unit, Aut, Win, Spr (de Castries, P)

GERMAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST-YEAR GERMAN

GERLANG 1,2,3. First-Year German—Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

1: *5 units, Aut (Petig, W; Strachota, K; Tsui, C), Win (Lee, S), Spr (Strachota, K)*
2: *5 units, Aut (Nissler, P), Win (Nissler, P; Petig, W), Spr (Lee, S)*
3: *5 units, Aut (Lee, S), Win (Nissler, P), Spr (Tsui, C)*

GERLANG 5A,B. Intensive First-Year German—Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.
5 units, **A:** *Sum,* **B:** *Sum (Staff)*

GERLANG 10. Elementary German for Seniors and Graduate Students—Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.
4 units, Win, Sum (Petig, W)

GERLANG 11P. Individually Programmed Beginning German—For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.
1-12 units, Aut (Strachota, K), Win (Shamel, M), Spr (Strachota, K)

INTERMEDIATE GERMAN

At this level, students have several options depending on their interests. After completing 3 or equivalent, students may enroll in 120-level courses which consider topics in German culture while encouraging additional language learning. Alternatively, 21,22 emphasize a systematic review of the language, 21W,22W study the language of business and international relations, and 100-level courses develop advanced language skills along with cultural awareness.

GERLANG 21,22. Intermediate German—Reading short stories, and review of German structure. Discussions in German, short compositions, videos. 22: emphasis on reading and writing skills, and literary texts of major 20th-century writers in historical context.
4 units, **21:** *Aut,* **22:** *Win (Petig, W)*

GERLANG 21S. Intermediate German—Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German; or equivalent of GERLANG 4; or AP German.
4 units, Sum (Petig, W)

GERLANG 21W. Intermediate German I: German for Business and International Relations—Equivalent to 21, but focus is on business and the political and economic geography of Germany. CDs and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: 3.
4 units, Aut (Petig, W)

GERLANG 52. Readings in Humanities—For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.
4 units, Spr (Urlaub, P)

ADVANCED GERMAN

GERLANG 100. *Hundert Deutsche Jahre:* One Hundred German Years—Language skills by introducing 20th-century history and culture of Germany as experienced by ordinary people. Themes include democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings. Extra listening, reading, or speaking for fourth unit.
3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study—Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.
3-4 units, **101:** *Aut (Urlaub, P),* **102:** *Spr (Engel, A)*

GERLANG 110. German Newspapers—For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit.
3-4 units, Aut (Strachota, K)

GERLANG 111. Television News from Germany—For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.
3-4 units, Win (Urlaub, P)

GERLANG 199. Individual Reading—Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 395. Graduate Studies in German—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

GERLANG 399. Independent Study—Prerequisite: consent of instructor.
1-6 units, Aut, Win, Spr, Sum (Staff)

HAUS MITTELEUROPA

Other in-house courses may be announced.

GERLANG 20A. Beginning German Conversation—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20B. Intermediate German Conversation—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20C. Advanced German Conversation—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20E. Fun Facts about Europe—(AU)
1 unit, Win (McQueen, K)

GERLANG 20K. *Küche Mitt* (German Cooking Class)—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20M. *Mitt* Movie Series—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20P. Theme Projects—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

GERLANG 20T. Teaching German Conversation—(AU)
1 unit, Aut, Win, Spr (McQueen, K)

ITALIAN LANGUAGE COURSES

Students who have never studied Italian before should enroll in ITALLANG 1.Students who have had some training in Italian before entering Stanford must take a placement test. Part I (written) of the placement test must be taken online during the summer, followed by Part II (oral), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of ITALLANG 2A, 3, or 41C fulfills the University foreign language requirement. Students may continue with second-year Italian (20, 21, or 21A) or other higher level courses upon recommendation of the coordinator.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR ITALIAN

ITALLANG 1,2,3. First-Year Italian—All-in-Italian communicative and interactive approach. Emphasis is on the development of authentic discourse in appropriate cultural contexts. Reading and listening to authentic materials, written and oral presentations, and conversational practice. Language lab, multimedia, and online activities. 3 fulfills the University language requirement.
5 units, Aut, Win, Spr (Baldocchi, M; Cellinese, A; Coggeshall, B; Devine, M; McCarty, A; Tempesta G, Staff)

ITALLANG 1A,2A. Accelerated First-Year Italian—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: placement tests or consent of instructor.
5 units, **1A:** *Aut (Baldocchi, M), Win (McCarty, A),*
2A: *Win, Spr (Baldocchi, M)*

ITALLANG 5A,B,C. Intensive First-Year Italian—Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials.
5 units, Sum (Staff)

ITALLANG 20. Intermediate Oral Communication: Italy Today—Second-year conversation based on movie clips, slide shows, and other authentic materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: first-year Italian or consent of coordinator.
3 units, Aut, Win, Spr (Tempesta, G)

ITALLANG 21,22,23. Second Year Italian—Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking competence based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.

3-4 units, **21:** *Aut (Baldocchi, M; Devine, M),* **22:** *Win (Cellinese, A; Devine, M),* **23:** *Spr (Cellinese, A)*

ITALLANG 21A,22A. Accelerated Second-Year Italian—Completes second-year sequence in two rather than three quarters. Prerequisite: 2A, 3, or consent of coordinator.

4-5 units, **21A:** *Win (Gelmetti, S), Spr (Wampole, C),* **22A:** *Aut, Spr (Gelmetti, S)*

ITALLANG 50. Reading Italian—Accelerated. For graduate students seeking to meet the University reading requirement for advanced degrees; seniors require consent of instructor. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

3 units, Spr (Devine, M)

THIRD-YEAR ITALIAN

ITALLANG 101. Advanced Oral Communication: Italian Language Through Opera—For Florence returnees or those who have completed second-year Italian. Use of opera excerpts by Leoncavallo, Puccini, Rossini, and Verdi to improve communication skills and review language functions. Emphasis is on listening, speaking, conversation, and debate. Prerequisites: second-year Italian and OSPFLOR 66, or consent of coordinator.

3 units, Aut (Cellinese, A)

ITALLANG 102. Advanced Oral Communication: Italian Language Through Cinema—For Florence returnees or those who have completed second-year Italian. Use of movie sequences by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on speaking, conversation, and debate. Prerequisites: second-year Italian and OSPFLOR 66, or consent of coordinator.

3 units, Win (Gelmetti, S)

ITALLANG 103. Advanced Oral Communication: Italian Language Through Contemporary Music—For Florence returnees or those who have completed second-year Italian. Use of song lyrics and music videos of prominent Italian singers and songwriters to improve communication skills and review language functions. Emphasis is on listening, speaking, conversation, and debate. Prerequisites: second-year Italian and OSPFLOR 66, or consent of coordinator.

3 units, Spr (Gelmetti, S)

ITALLANG 113. Italian Cultural Studies—Literature, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or consent of coordinator.

3-4 units, Aut (Gelmetti, S)

ITALLANG 114. Advanced Stylistics and Composition—Goal is proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: second-year Italian or consent of coordinator.

3-4 units, Win (Baldocchi, M)

ITALLANG 115. Academic and Creative Writing—Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: second-year Italian or consent of coordinator.

3-4 units, Spr (Baldocchi, M)

ITALLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

ITALLANG 394. Graduate Studies in Italian Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

ITALLANG 395. Graduate Studies in Italian—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

CASA ITALIANA

ITALLANG 126. Italy and Italians Today—May be repeated once for credit.

2 units, Aut, Win, Spr (Lummus, D)

JAPANESE LANGUAGE COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written and listening) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR JAPANESE

JAPANLNG 1,2,3. First-Year Modern Japanese—Foundation in grammar, reading, and composition. 150 Kanji characters introduced.

5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Busbin, K)*

JAPANLNG 5. Intensive First-Year Japanese Language—Equivalent to 7B, 8B, and 9B combined. See http://www.stanford.edu/group/japanese/summer.

7-8 units, Sum (Staff)

JAPANLNG 7A,8A,9A. First-Year Japanese Language, Culture, and Communication A—For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji tutorials. See http://www.stanford.edu/group/japanese/jlcca.htm.

3 units, **7A:** *Aut,* **8A:** *Win,* **9A:** *Spr (*Magnani, E*)*

JAPANLNG 7B,8B,9B. First-Year Japanese Language, Culture, and Communication B—First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See http://www.stanford.edu/group/japanese/1stB.htm.

5 units, **7A:** *Aut,* **8A:** *Win,* **9A:***Spr (Lipton, H)*

JAPANLNG 17A,18A,19A. Second-Year Japanese Language, Culture, and Communication A—Continuation of 9A. For students who want to build communication skills in limited time. Prerequisite: 9A or equivalent. See http://www.stanford.edu/group/ll/jlcc/jlcca.htm.

3 units, **17A:** *Aut (Nakamura, K),* **18A:** *Win,* **19A:** *Spr (Arao, F)*

JAPANLNG 17B,18B,19B. Second-Year Japanese Language, Culture, and Communication B—Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 9B. See http://www.stanford.edu/group/japanese/2ndB2.htm.

5 units, **17B:** *Aut,* **18B:** *Win,* **19B:** *Spr (Lowdermilk, M)*

JAPANLNG 20. Intensive Second-Year Japanese—(Same as JAPANLNG 20G.) Equivalent to 17B,18B,19B combined. Prerequisite 9B or equivalent. See http://www.stanford.edu/group/japanese/summer.

7-8 units, Sum (Nakamura, K)

JAPANLNG 21,22,23. Second-Year Modern Japanese—Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.

5 units, **21:** *Aut,* **22:** *Win,* **23:** *Spr (Arao, F)*

JAPANLNG 27,28,29. Intermediate Japanese Conversation—Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.
2 units, **27:** *Aut,* **28:** *Win,* **29:** *Spr (Busbin, K)*

JAPANLNG 51,52,53. Intermediate to Advanced Japanese Conversation—Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program May be able to take concurrently with 17B, 18B, and 19B. Prerequisite: 9K, 19B, or consent of instructor.
2 units, **51:** *Aut,* **52:** *Win,* **53:** *Spr (Lowdermilk, M)*

THIRD-YEAR ADVANCED JAPANESE

JAPANLNG 121,122,123. Advanced Japanese Conversation—Focus is on fine tuning grammatical points, explaining things in Japanese, and fluency. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.
2 units, **121:** *Aut,* **122:** *Win,* **123:** *Spr (Lipton, H)*

JAPANLNG 127B,128B,129B. Third-Year Japanese Language, Culture, and Communication B—Emphasis is on spontaneous conversations and expressing abstract thoughts. Materials include Japanese media, literature, and TV. Cultural and social topics related to Japan and its people. Prerequisite: 19B. See http://www.stanford.edu/group/japanese/3rdB.htm.
5 units, **127B:** *Aut,* **128B:** *Win,* **129B:** *Spr (Tomiyama, Y)*

JAPANLNG 130. Intensive Third-Year Japanese—Equivalent to 127B,128B,129B combined. Prerequisite: 19B or equivalent. See http://www.stanford.edu/group/japanese/summer.
7-8 units, Sum (Staff)

JAPANLNG 211,212,213. Advanced Japanese—Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.
3-5 units, **211:** *Aut,* **212:** *Win,* **213:** *Spr (Nakamura, K)*

JAPANLNG 200. Directed Reading—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

JAPANLNG 394. Graduate Studies in Japanese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

JAPANLNG 395. Graduate Studies in Japanese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

KOREAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR KOREAN

KORLANG 1,2,3. First-Year Korean—Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Kim, H)*

KORLANG 1A,2B. Accelerated First-Year Korean—Completes first-year sequence in two quarters. For students with previous knowledge of Korean or a strong background in listening and speaking skills. Completion of 2B fulfills the University language requirement. Prerequisite: placement tests or consent of instructor.
5 units, **1A:** *Win,* **2B:** *Spr (Kim, H)*

KORLANG 21,22,23. Second-Year Korean—More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.
3-5 units, **21:** *Aut,* **22:** *Win,* **23:** *Spr (Kim, H)*

ADVANCED

KORLANG 110. Korean Pronunciation and Intonation—Goal is intelligibility and fluency. Lab assignments. Prerequisite: 3 or consent of instructor.
2-4 units, Aut (Kim, H)

KORLANG 120B. Korean Culture—Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays and stories. May be repeated for credit. Prerequisites: 103 and consent of instructor.
1-3 units, Win (Kim, H)

KORLANG 130. Reading Korean—Contemporary literature and academic texts. Prerequisite: 103 or consent of instructor.
1-3 units, Aut (Staff)

KORLANG 141. Business Korean—Business-related vocabulary and cultural etiquette. Business letters, mock interviews, and resumes. May be repeated for credit. Prerequisite: 103 or consent of instructor.
2-3 units, Spr (Kim, H)

KORLANG 200. Directed Reading in Korean—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

KORLANG 395. Graduate Studies in Korean—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

PORTUGUESE LANGUAGE COURSES

Because the Portuguese Language Program is in the process of instituting a formal placement test, students registering for the first time in a first- or second-year course must see the coordinator for proper placement if they have had any prior training in Portuguese. Certain Portuguese classes count towards a major in Spanish, and all count for a minor in Portuguese. Consult the Department of Spanish and Portuguese or http://span-port.stanford.edu for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR PORTUGUESE

PORTLANG 1,2,3. First-Year Portuguese—Emphasis is on oral comprehension and proficiency in speaking. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 3 fulfills the University Foreign Language Requirement.
5 units, **1:** *Aut (Sotelino, K),* **2:** *Win (Delgado, A),* **3:** *Spr (Staff)*

PORTLANG 1A,2A. Accelerated First-Year Portuguese—For students with two years of college-level study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement.
3-5 units, **1A:** *Aut (Delgado, A), Win (Wiedemann, L), Spr (Delgado, A),* **2A:** *Aut, Win (Delgado, A), Spr (Wiedemann, L)*

PORTLANG 11A,12A. Accelerated Second-Year Portuguese—Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions Prerequisite: first-year sequence, equivalent, or consent of instructor.
3-5 units, Aut, Win, Spr (Delgado, A)

PORTLANG 50. Reading in Portuguese—For students with superior reading proficiency in Spanish or another Romance Language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees.
3-4 units, Spr (Wiedemann, L)

ADVANCED PORTUGUESE

PORTLANG 101. Reading Brazil—For intermediate or advanced students. Short expository readings, guest lectures, discussions, compositions on Brazilian issues. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions. Prerequisite: 12A or equivalent, or consent of instructor.
3-4 units, Aut (Delgado, A)

PORTLANG 102. Brazil in Text: Advanced Grammar and Composition—For intermediate and advanced students. Further development of academic writing. Short fictional and expository readings, guest lectures, discussions, compositions on Brazilian issues. Emphasis is on building paragraphs, organizing arguments, and justifying positions. May be used as workshop to write papers in Portuguese for another course. May be repeated once for credit. Prerequisite: 12A or equivalent, or consent of instructor.
3-4 units, Win (Wiedemann, L)

PORTLANG 103. Advanced Conversation: Brazil Today—For intermediate and advanced students. Reading and discussions on issues from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary building with emphasis on formal expository writing. Writing practice if desired. Students prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.
3 units, Spr (Wiedemann, L)

PORTLANG 297. Directed Reading—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SLAVIC LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 19, 2007. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

FIRST- AND SECOND-YEAR RUSSIAN

SLAVLANG 1,2,3. First-Year Russian—Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality.
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Leidy, B; Marcos, M,)*

SLAVLANG 5,6,7. Russian for Native Speakers—Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.
2 units, **5:** *Aut,* **6:** *Win,* **7:** *Spr (Marcos, M)*

SLAVLANG 51,52,53. Second-Year Russian—More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills.
5 units, **51:** *Aut,* **52:** *Win,* **53:** *Spr (Khassina, E)*

SLAVLANG 55. Intermediate Russian Conversation—May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.
2 units, Aut (Schupbach, R), Win, Spr (Staff)

SLAVLANG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

THIRD-YEAR AND ADVANCED RUSSIAN

SLAVLANG 111,112,113. Third-Year Russian, First Quarter—A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
4 units, **111:** *Aut,* **112:** *Win,* **113:** *Spr (Erman, I)*

SLAVLANG 177,178,179. Fourth-Year Russian—Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.
3 units, **177:** *Aut,* **178:** *Win,* **179:** *Spr (*Marcos, M*)*

SLAVLANG 181,182,183. Fifth-Year Russian—Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.
3 units, **181:** *Aut,* **182:** *Win,* **183:** *Spr (Khassina, E)*

SLAVLANG 199. Individual Work—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 299. Independent Study
1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SLAVIANSKII DOM

Other in-house courses may be announced.

SLAVLANG 60A. Beginning Russian Conversation—(AU)
1 unit, Aut (Schupbach, R)

SLAVLANG 60B. Intermediate Russian Conversation—(AU)
1 unit, Win (Schupbach, R)

SLAVLANG 60C. Advanced Russian Conversation—(AU)
1 unit, Spr (Schupbach, R)

SLAVLANG 60D. East European Breweries and Brewing—(AU)
1 unit, Win, Spr (Schupbach, R)

SLAVLANG 60F. Slavic Films Series—(AU)
1 unit, Win (Schupbach, R)

SLAVLANG 60P. Slav Dom Theme Projects—(AU)
1 unit, Aut, Win, Spr (Schupbach, R)

SLAVLANG 60T. Teaching Slavic Conversation—(AU)
1 unit, Aut, Win (Schupbach, R), Spr (Staff)

SPANISH LANGUAGE COURSES

Students who have never studied Spanish before should enroll in SPANLANG 1. Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Spanish Language Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer at http://language.stanford.edu/SPANISH, followed by Part II (oral), to be administered on campus September 19, 2007. Students who have passed the language AP exam with a 4 or 5 or the SAT II with a 630 or above are exempted from the written test, but must take the oral on September 19, 2007 in order to determine their correct placement. Students who have taken the Spanish Language Advanced Placement (AP) and received a score of 5 are eligible for 10 units of credit in Spanish. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of SPANLANG 2A, 3, or 41C fulfills the University language requirement.

Students who grew up in homes where Spanish is spoken should take the placement assessment for the special series of courses (21B,22B,23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speakers should complete the questionnaire found at http://language.stanford.edu/HOMEBACKGROUND, and attend the assessment for potential home-background speakers administered on September 19, 2007.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence. Second-year students may alternate between the cultural emphasis (11C,12C,13C) and international relations (11R,12R,13R) series if done so in sequence (11,12,13); however, a student may only take one of each level in these series.

FIRST- AND SECOND-YEAR SPANISH

SPANLANG 1,2,3. First-Year Spanish—Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.
5 units, Aut, Win, Spr (Alexander, A; Catoira, L; Del Carpio, C; Flores, F; Junguito, M; Méndez Barletta, L; Miano, A; Ortiz Cuevas, C; Sánchez, K; Reinhold, V; Urruela, M)

SPANLANG 1A,2A. Accelerated First-Year Spanish—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.
5 units, **1A:** *Aut (Brates, V; Del Carpio, C; Nissler, P; Won, H), Win (Del Carpio, C; Won, H),* **2A:** *Win, Spr (Brates, V; Del Carpio, C; Guzmán, C; Won, H)*

SPANLANG 5A,B,C. Intensive First-Year Spanish—Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 205A,B,C.
5 units, Sum (Staff)

SPANLANG 10. Beginning Oral Communication—Additional pronunciation, vocabulary, and speaking skills. May be repeated once for credit. Prerequisite: one quarter of Spanish, demonstrated oral proficiency above the novice level; may be taken concurrently with 2, 2A, or 3.
2 units, Aut (Alexander, A; Corso, I), Win, Spr (Corso, I; Miano, A)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis—Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.
4-5 units, Aut, Win, Spr (Burgos Jara, C; Catoira, L; Guzmán, C; Kenna, C; Méndez Barletta, L; Molitoris, J; Ortiz Cuevas, C; Perales, O; Schmidt, S; Urruela, M)

SPANLANG 11R,12R,13R. Second-Year Spanish: Emphasis on International Relations—Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.
4-5 units, **11R:** *Aut,* **12R:** *Win,* **13R:** *Spr (Brates, V; Sierra, A)*

SPANLANG 15. Intermediate Oral Communication—Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit. Prerequisite: first-year Spanish and demonstrated oral proficiency above the low intermediate level.
3 units, Aut (Alexander, A; Won, H), Win (Perales, O), Spr (Guzman, C; Nissler, P), Sum (Staff)

SPANLANG 21B,22B,23B. Second-Year Spanish for Heritage Language Students—Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.
3-5 units, **21B:** *Aut (Casas, C),* **22B:** *Win (Casas, C),* **23B:** *Spr (Méndez Barletta, L)*

SPANLANG 25A,B,C. Intensive Second-Year Spanish—Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent. Stanford graduate students restricted to 9 units register for 225A,B,C and take all three courses for a total of 9 units, or two of the courses for a total of 9 units.
4 units, **A:** *Sum,* **B:** *Sum,* **C:** *Sum (Staff)*

SPANLANG 50. Reading Spanish—For students who have already taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'
3 units, Win (Sierra,A)

ADVANCED COURSES

SPANLANG 100. Advanced Oral Communication—For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.
3 units, Aut, Win, Spr (Perales, O)

SPANLANG 101. The Structure of Spanish—Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.
3-5 units, Aut (Valdés, G)

SPANLANG 102. Composition and Writing Workshop—Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM
3-5 units, Aut (Méndez Barletta, L), Spr (Kenna, C)

SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students—For students with a good understanding of written accents, spelling, and syntax. Focus is on the craft of writing with emphasis on brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Writing essays on literary topics. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: 23B or equivalent. WIM
3-5 units, Win (Miano, A)

SPANLANG 121M,122M,123M. Spanish for Medical Students—(Same as HRP 280,281,282.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.
3 units, **121M:** *Aut,* **122M:** *Win,* **123M:** *Spr (Corso, I)*

SPANLANG 131M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students—For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.
3-4 units, Aut, Spr (Sierra, A)

SPANLANG 199. Individual Reading—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

SPANLANG 394. Graduate Studies in Spanish Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

SPANLANG 395. Graduate Studies in Spanish—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

YOST HOUSE

Other in-house courses may be announced.

SPANLANG 60A,B,C. Beginning Spanish Conversation—(AU)
1 unit, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Urruela, M)*

SPANLANG 60K. Cooking Class—(AU)
1 unit, Win (Urruela, M)

SPANLANG 60M. Movie Series—(AU)
1 unit, Win (Urruela, M)

SPANLANG 60P. Yost Lecture Series—(AU)
1 unit, Aut (Urruela, M), Win (Staff), Spr (Urruela, M)

SPANLANG 60T. Teaching Spanish Conversation—(AU)
1 unit, Aut, Win, Spr (Urruela, M)

SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2007-08 are listed below; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2008-09 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:

'A' suffix courses are typically taught Autumn.
'B' suffix courses are typically taught Winter.
'C' suffix courses are typically taught Spring.

Beginning, intermediate, and advanced courses are 3 units except modern Greek and ASL. In some circumstances, a beginning or intermediate course may be offered in alternate years.

For more information, see http://www.stanford.edu/dept/SLP/. Language courses may not be repeated for credit, and must be taken in sequence.

FULFILLING THE LANGUAGE REQUIREMENT

Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

AMERICAN SIGN LANGUAGE COURSES

SPECLANG 178A,B,C. Beginning Sign Language—Comprehension and production skills; cultural awareness. Limited enrollment.
4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Haas, C)*

SPECLANG 179A,B,C. Intermediate Sign Language—Additional functional structures, lexical items, and history. Limited enrollment.
4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Haas, C)*

CENTRAL ASIAN LANGUAGE COURSES

SPECLANG 192A,B,C. Beginning Kazakh—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Kazakh culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Kunanbaeva, A)*

SPECLANG 193A,B,C. Intermediate Kazakh
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

SPECLANG 238A,B,C. Beginning Uzbek
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

SOUTH ASIAN LANGUAGE COURSES

SPECLANG 152A,B,C. Beginning Hindi—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture.
3 units, **A:** *Aut (Mody, S),* **B:** *Win,* **C:** *Spr (Malhotra, P)*

SPECLANG 153A,B,C. Intermediate Hindi
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mody, S)*

SPECLANG 183A,B,C. Beginning Sanskrit
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Porta, F)*

SOUTHEAST ASIAN LANGUAGE COURSES

SPECLANG 144A,B,C. Beginning Tagalog—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Tagalog culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Alvarez, G)*

SPECLANG 145A,B,C. Intermediate Tagalog
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Alvarez, G)*

SPECLANG 150A,B,C. Beginning Vietnamese—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

SPECLANG 151A,B,C. Intermediate Vietnamese
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Ha, P)*

SPECLANG 156A,B,C. Beginning Indonesian—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Indonesian culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Indrawati, T)*

SPECLANG 157A,B,C. Intermediate Indonesian
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Indrawati, T)*

CREOLE LANGUAGE COURSES

SPECLANG 134A. Beginning Haitian Creole—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Haitian culture.
3 units, Spr (Staff)

EUROPEAN LANGUAGE COURSES

SPECLANG 75. Greek Culture, Ideals, and Themes—Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom
3 units, Spr (Prionas, E)

SPECLANG 129A,B,C. Beginning Ukrainian
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Jarboe, L)*

SPECLANG 167A,B,C. Intermediate Czech
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Dusatko, J)*

SPECLANG 167A,B,C. Beginning Polish—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Polish culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Bartoszewski, L)*

SPECLANG 168A,B,C. Intermediate Polish
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Bartoszewski, L)*

SPECLANG 170A,B,C. Beginning Modern Greek—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Greek culture.
4 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Prionas, E)*

SPECLANG 171A,B, C. Intermediate Modern Greek
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Prionas, E)*

SPECLANG172A,B,C. Modern Greek Language through Literature and Film—Accelerated. Vocabulary enrichment through multimedia, online materials.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Prionas, E)*

SPECLANG 173A,B,C. Beginning Hungarian—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Mihalik, A)*

SPECLANG 186A,B,C. Beginning Serbo-Croatian—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Serb and Croat culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Medic, S)*

SPECLANG 188A,B,C. Advanced Serbo-Croatian
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Medic, S)*

SPECLANG 198Q. Modern Greece in Film and Literature—Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis.
3-5 units, Aut (Prionas, E)

SPECLANG 221A,B,C. Beginning Norwegian—Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Norwegian culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Nergaard, A)*

SPECLANG 241A,B,C. Ukrainian for Speakers of a Slavic Language
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Fleishman, E)*

NATIVE AMERICAN LANGUAGE COURSES

SPECLANG 174A,B,C. Beginning Quechua—Speaking, reading, writing, and listening. Quechua culture.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Fajardo, J)*

SPECLANG 247A,B,C. Beginning Lakota
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Staff)*

DIRECTED READING AND GRADUATE STUDIES

SPECLANG 297. Directed Reading—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr, Sum (Staff)

SPECLANG 395. Graduate Studies in Special Language—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr (Staff)

TIBETAN LANGUAGE PROGRAM

Because the Tibetan Language Program does not have a formal placement test, students registering for the first time must see the coordinator for proper placement if they have had any prior training in Tibetan. Completion of TIBETLNG 3 fulfills the University Foreign Language Requirement. Consult the Language Center or http://language.stanford.edu/ for further information. Language courses may not be repeated for credit and must be taken in sequence.

TIBETLNG 1,2,3. First-Year Tibetan—Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.
5 units, **1:** *Aut,* **2:** *Win,* **3:** *Spr (Clark, R)*

TIBETLNG 199. Individual Reading—May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

TIBETLNG 395. Graduate Studies in Tibetan—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

CENTER FOR LATIN AMERICAN STUDIES

Director of the Center: Herbert S. Klein
Associate Director: Megan Gorman
Visiting Professors: Ana María González de Tobia, Milton Hatoum, Cristián Sánchez, Ernesto Schargrodsky, Guillermo Solorzano

Affiliated Faculty and Staff:
Anthropology: Clifford R. Barnett (emeritus), George Collier (emeritus), William H. Durham, James A. Fox, Dominique Irvine, John W. Rick, Ian Robertson
Art and Art History: Barbaro Martinez-Ruiz
Biological Sciences: Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot
Business, School of: Gerard Padró i Miquel
Comparative Literature: Roland Greene, Hans U. Gumbrecht
Dance: Susan Cashion
Earth Sciences, School of: Pamela Matson
Economics: Roger Noll (emeritus), Clark Reynolds (emeritus)
Education, School of: Martin Carnoy, Amado Padilla
Engineering, School of: Adrian Lew, Leonard Ortolano
English: Ramón Saldívar (also Comparative Literature)
Freeman Spogli Institute for International Studies: Rosamond Naylor, David Victor
History: Zephyr Frank, Tamar Herzog, Herbert S. Klein
Hoover Institute: William Ratliff
Human Biology: Anne Firth Murray
Language Center, Special Languages Program: José Carlos Fajardo
Law, School of: Thomas C. Heller
Linguistics: John Rickford
Medicine, School of: Victor F. Froelicher, Evaleen K. Jones, Samuel LeBaron, Grant Miller, Julie Parsonnet, Paul Wise
Political Science: Alberto Díaz-Cayeros, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Michael Tomz
Religious Studies: Thomas Sheehan
Sociology: Alex Inkeles (emeritus), Michael Rosenfeld
Spanish and Portuguese: Caridad Kenna, Alice Miano, Otilia Perales, Michael P. Predmore, Joan Ramon Resina, Jorge Ruffinelli, Ana Sierra, Lisa Surwillo, Guadalupe Valdés (also School of Education), Lyris Wiedemann, Yvonne Yarbro-Bejarano
Stanford University Libraries: Adán Griego, Robert Trujillo

Center Offices: Bolívar House, 582 Alvarado Row
Mail Code: 94305-8545
Department Phone: (650) 723-4444
Web Site: http://las.stanford.edu/

The Center for Latin American Studies (CLAS) supports research and teaching on Latin America by the faculty and students of Stanford in all fields of study. Field research, language training, and interdisciplinary approaches are stressed in the Latin American Studies program, which draws on the strength and diversity of its nationally recognized faculty affiliates and substantial library holdings on Latin America. These resources are enhanced by the Tinker Visiting Professorship in Latin American Studies and the Nabuco Visiting Chair in Brazilian Studies, which bring distinguished Latin American scholars to teach at Stanford each year.

The center's resources include funds used in support of student and faculty activities and classes in and about Latin America, visiting professors and scholars, and various forms of public outreach. CLAS also devotes resources to Iberian and Caribbean studies. The center offers an undergraduate minor, an undergraduate honors program, and a master's degree in Latin American Studies.

UNDERGRADUATE PROGRAMS

Although the University does not offer a B.A. in Latin American Studies, it does offer a minor and an honors program. Stanford also has departmental and interdisciplinary degree programs in which a student may concentrate on Latin America. These include Anthropology, History, Political Science, Spanish and Portuguese, and International Relations. Contact the respective departments for further information.

MINOR

The minor in Latin American Studies is offered to students in any major who wish to develop a complementary concentration on the region. To pursue the minor, students must submit for approval an online proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America such as HISTORY 70 or an approved substitute; 20 additional units at the 100 level or higher which together comprise a coherent focus on a theoretical problem or issue of the region such as culture and identity, political economy, or sustainable development. At least 10 of the 25 units must be completed at Stanford.
2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the honors program.
3. Field experience in Latin America such as study abroad, summer research, or internship is recommended.

Units for a student's major cannot be double-counted towards the minor.

Upon satisfactory completion of all requirements, the center's subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student's transcript.

HONORS PROGRAM

The Honors Program in Latin American Studies is open to majors in any field. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in the preparation of an honors thesis written under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), in the sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student's major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
   a) *A survey course:* HISTORY 70, Culture, Politics, and Society in Latin America. This is normally taken in the sophomore year.
   b) *For breadth:* two 4-5-unit courses at the 100 level or higher with a focus on the region. These courses are normally taken during the sophomore and junior years.
   c) *For depth:* one 4-5-unit course at the 100 level or higher with a focus on the region that explores an issue in depth of particular interest to the student, approved by the honors adviser.
   d) LATINAM 198, Honors Thesis (1-10 units), under the supervision of the student's faculty honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.

   e) LATINAM 201 (same as HISTORY 275F), Social Change in Latin America Since 1900 (5 units). This Autumn Quarter honors seminar must be taken in the senior year.
   f) Additional courses at the 100 level or higher focusing on Latin America to bring the total to 35 units; up to 5 units may come from study of Spanish or Portuguese beyond the seventh quarter.
   g) Of the courses applied to 'b' and 'c' above, 10 units may be completed in Overseas Studies and 5 units may be taken as directed individual study.
2. Fulfill the Foreign Language Requirement (see below).
3. Submit an honors thesis which meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium at the end of May.

More information about the honors program is available at http://las.stanford.edu/programs/honors_detailed.html.

FOREIGN LANGUAGE REQUIREMENT

The minimum requirement for completion of either the minor or honors program is advanced proficiency in Spanish or Portuguese by any one of the following means:

1. Completion of seven quarters of college-level study of Spanish or Portuguese.
2. Completion of a course on Spanish or Portuguese language or literature, or on some other subject but taught in Spanish or Portuguese, at the 100-level or higher, with a letter grade of 'B' (3.0).
3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese.

HONORS COLLEGE

The LAS honors college, sponsored with many other departmental and interdisciplinary honors colleges by the Vice Provost for Undergraduate Education, is an intensive three-week residential program offered directly preceding Autumn Quarter. It affords returning LAS honors students who have completed field work a debriefing and a focused series of presentations by a member of the CLAS-affiliated faculty and other Stanford instructors on adviser interaction, bibliographic resources, writing strategies, statistical analysis, organizational techniques for completing the thesis process, and opportunities to socialize with other honors students in the college, all without cost to the students. Ample time is provided for library research, individual faculty consultations, and data analysis. Applications for honors colleges are available in Spring Quarter prior to the senior year.

SUMMER INTERNSHIP GRANT

Each summer, the center awards grants to a small number of undergraduates to undertake internships in Latin America. Applications include a proposal, academic transcript, and recommendations from a faculty member and one other person knowledgeable about the applicant's abilities. Students from all departments are eligible to apply. See http://las.stanford.edu/funding/undergrad_summer_intgrants.html.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The annual deadline for coterminal applications is January 8.

Coterminal applicants must submit: a 500-word statement of purpose; resume; 10-15 page double-spaced academic writing sample; three letters of recommendation; a Stanford transcript; and scores from the General Test of the Graduate Record Exam. Coterminal applicants must have a minimum GPA of 3.5 and a working knowledge of Spanish or Portuguese at the third-year level.

For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

Requirements for the master's degree are summarized below.

GRADUATE PROGRAMS

MASTER OF ARTS

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, and culture of the region, advanced language training, and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests. Students may obtain a dual professional degree concurrently with the M.A.

ADMISSION

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on the region.

The application deadline is January 8. Applicants submit an online application, including a 500-word statement of purpose, resume, 10-15 page double-spaced academic writing sample, and three letters of recommendation; official transcripts; and Graduate Record Examination scores. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply online or for information on graduate admissions, go to http://gradadmissions.stanford.edu.

To be eligible for a dual degree program with the Graduate School of Business (M.B.A.), School of Law (J.D.), or School of Medicine (M.D.), candidates must apply and be accepted independently to both programs.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the third-year level, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

DEGREE REQUIREMENTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

A description of the M.A. program is also available online at http://www.stanford.edu/group/las/programs/ma.html.

The program requires completion of a minimum of 45 graduate units. Upon entering, each student is assigned a faculty adviser who works with the student to develop a customized program of study.

To receive the M.A. degree in Latin American Studies, students must complete the items below.

1. *Core courses* (15 units): one core five-unit course in each of three fields of specialization:
   a) Culture and Society (CulSoc)—LATINAM 301, Social Change in Latin America Since 1900
   b) Environment and Ecology (Eco)—BIOSCI 175, Tropical Ecology and Conservation
   c) Political Economy (PolEcon)—POLISCI 248S, Latin American Politics.

   These fields (CulSoc, Eco, and PolEcon) are not declared on Axess; they do not appear on the transcript or the diploma.
2. *Cognate courses* (15 units): three courses, one from each of the three fields of specialization listed in '1' above. See http://www.stanford.edu/group/las/programs/macognatecurriculum.html for more information. Cognate courses which fulfill this requirement are indicated in the cognate courses list below with the abbreviations CulSoc, Eco, and PolEcon.
3. *Elective courses* (10-15 units): three elective courses in one of the three fields of specialization (see '1' above) from across the University's offerings.
4. *Language requirement:* at least 3 units of course work on a second Latin American language. Students must take either an advanced third-year language course if they have both Spanish and Portuguese, or take a basic course in the language in which they do not possess competence.

5. *Seminar requirement:* enroll each quarter in LATINAM 200, a 1-unit seminar on Contemporary Issues in Latin American Studies, where invited scholars present lectures on major Latin American themes and topics, followed by questions and discussion.
6. *Thesis option:* students may elect to write a master's thesis; they may register for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements.
7. *Grade requirements:* all courses to be counted toward the degree, except for LATINAM 200, must be taken for a letter grade and receive a grade of 'B' or higher.

FINANCIAL AID

The Center for Latin American Studies has several graduate fellowships as well as limited research and course assistantship positions with the Tinker Visiting Professors each quarter.

DOCTORAL PROGRAMS

Although the University does not offer a Ph.D. in Latin American Studies, Stanford has several departmental programs through which a student may concentrate on Latin America. These include Anthropology, History, Political Science, and Spanish and Portuguese. Contact the respective departments for admission information.

COURSES

LATINAM 197. Directed Individual Research—For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut, Win, Spr (Staff)

LATINAM 198. Honors Thesis—Restricted to those writing an honors thesis in Latin American Studies.
1-10 units, Aut, Win, Spr (Staff)

LATINAM 200. Seminar on Contemporary Issues in Latin American Studies—Required of Latin American Studies master's students each quarter. Guest scholars present analyses of major Latin American themes and topics. May be repeated for credit.
1 unit, Aut, Win, Spr (Klein, H)

LATINAM 201/301. Social Change in Latin America Since 1900—(Same as HISTORY 275F/375F.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci
5 units, Aut (Klein, H)

LATINAM 398. Master's Thesis—Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.
1-10 units, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a minor or honors program. See "Degree Requirements" above for an explanation of the field codes CulSoc, Eco, and PolEcon.

ANTHSCI 103/262C. Cultural Diversity, Ethnicity, and Governance in Indigenous Latin America—CulSoc
3-5 units, Spr (Karp-Toledo, E)

ANTHSCI 106B. Maya Mythology and the *Popol Vuh*—CulSoc
5 units, Win (Fox, J)

ANTHSCI 112. Human Diversity: A Linguistic Perspective—(Same as HUMBIO 187.) CulSoc
3 units, Spr (Ruhlen, M)

ANTHSCI 142/242A. Incas and their Ancestors: Peruvian Archaeology—(Same as ARCHLGY 102B.) CulSoc
3-5 units, Spr (Contreras, D)

ANTHSCI 144/244. Ancient Cities in the New World—CulSoc
3-5 units, Spr (Robertson, I)

ANTHSCI 146A. The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology—CulSoc
3-5 units, Win (Robertson, I)

ANTHSCI 162B/262B. Ethnography and Ethnohistory in the Andean World—CulSoc
3-5 units, Win (Karp-Toledo, E)

ANTHSCI 167C/267C. Managing the Commons: Evolving Theories for Sustainable Resource Use—(Same as EARTHSYS 167C/267C.) Eco
5 units, Aut (Irvine, D)

ANTHSCI 179/279. Environmental Change and Emerging Infectious Diseases—(Same as HUMBIO 114.) CulSoc, Eco
3-5 units, Aut (Durham, W; Jones, J)

BIOSCI 101. Ecology—Eco
3 units, Aut (Vitousek, P; Dirzo, R)

BIOSCI 117. Biology and Global Change—(Same as EARTHSYS 111, GEOPHYS 117.) Eco
4 units, Win (Vitousek, P; Arrigo, K)

BIOSCI 145/245. Behavioral Ecology—Eco
4 units, Spr (Gordon, D)

BIOSCI 175. Tropical Ecology and Conservation—Eco
5 units, Spr (Dirzo, R)

CEE 142A. Creating Sustainable Development—(Same as CEE 242A.) Eco
3 units, Win (Christensen, S)

CEE 171. Environmental Planning Methods—Eco
3 units, Win (Ortolano, L)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective—(Same as CSRE 181S.) CulSoc, PolEcon
5 units, Spr (Palafox, J)

COMM 136/236. Democracy and the Communication of Consent—(Same as POLISCI 134.) PolEcon
4-5 units, Aut (Fishkin, J)

COMPLIT 142. The Literature of the Americas—(Same as ENGLISH 172E) CulSoc
5 units, Aut (Greene, R; Saldívar, R)

ECON 101. Economic Policy Analysis—PolEcon
5 units, Aut (Cojoc, D), Win (Steiner, F), Spr (Rothwell, G)

ECON 118. Development Economics—PolEcon
5 units, Aut (Jayachandran, S)

ECON 122. Economic Development of Latin America—PolEcon
5 units, Win (Schargrodsky, E)

ECON 126. Economics of Health and Medical Care—(Same as BIOMEDIN 156/256, HRP 256.) Eco, PolEcon
5 units, Aut (Bhattacharya, J)

ECON 155. Environmental Economics and Policy—(Same as EARTHSYS 112.) Eco
5 units, Win (Goulder, L)

ECON 165. International Trade and Finance—PolEcon
5 units, Aut (Fitzgerald, D), Win (Staiger, R), Sum (Staff)

ECON 214. Development Economics I—PolEcon
2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics II—PolEcon
2-5 units, Win (DeGiorgi, G)

ECON 220. Political Economy I—PolEcon
2-5 units, Win (Jackson, M)

ECON 221. Political Economy II—PolEcon
2-5 units, Spr (Staff)

ECON 224. Science, Technology, and Economic Growth—Eco
2-5 units, Win (David, P)

ECON 228. Institutions and Organizations in Historical Perspective—PolEcon
2-5 units, Aut (Greif, A)

ECON 265. International Economics I—PolEcon
2-5 units, Aut (Fitzgerald, D)

ECON 266. International Economics II—PolEcon
2-5 units, Win (Staiger, R)

ECON 267. Topics in International Trade—PolEcon
2-5 units, Spr (Staff)

EDUC 122X. From Local to Global: Collaborations for International Environmental Education—(Same as EARTHSYS 123.) Eco
2 units, Aut (Goldman, S; Hoagland, S)

EDUC 149/249. Theory and Issues in the Study of Bilingualism—(Same as SPANLIT 207.) CulSoc
3-5 units, Aut (Valdés, G)

EDUC 222. Resource Allocation in Education—PolEcon
4-5 units, Spr (Carnoy, M)

EDUC 306A. Education and Economic Development—PolEcon
5 units, Aut (Carnoy, M)

ENERGY 101. Energy and the Environment—(Same as EARTHSYS 101.) Eco
3 units, Win (Kovscek, A; Durlofsky, L; Gerritsen, M)

ENERGY 102. Renewable Energy Sources and Greener Energy Processes—(Same as EARTHSYS 102.) Eco
3 units, Spr (Kovscek, A; Gerritsen, M)

ENGLISH 357E. The Avant Garde and the Americas—CulSoc
5 units, Win (Heise, U)

FRENLIT 133. Literature and Society in Africa and the Caribbean—(Same as COMPLIT 141.) CulSoc
4 units, Spr (Boyi, E)

GES 333. Water Policy Colloquium—(Same as CEE 333, IPER 333.) Eco
1 unit, Spr (Freyberg, D)

HISTORY 70. Culture, Politics, and Society in Latin America—CulSoc
5 units, Win (Frank, Z)

HISTORY 170/370. Colonial Latin America—CulSoc
4-5 units, Aut (Herzog, T)

HISTORY 201/301. Public Service through Public History—CulSoc
5 units, Aut (Camarillo, A; McKibben, C)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present—CulSoc
4-5 units, Win (Baker, K; Sheehan, J)

HISTORY 205B/305B. Quantitative Methods in Historical Research—CulSoc
4-5 units, Aut (Klein, H)

HISTORY 217B/317B. Land of Three Religions: Medieval Spain—CulSoc
4-5 units, Win (Miller, K)

HISTORY 276. Modern Brazil—(Same as HISTORY 376) CulSoc
4-5 units, Spr (Frank, Z)

HISTORY 279/379. Latin American Development: Economy and Society, 1800-2000—CulSoc
4-5 units, Spr (Frank, Z)

HISTORY 299X/399A. Design and Methodology for International Field Research—CulSoc
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 470A. Research Seminar in Latin American Social History—CulSoc
4-5 units, Aut (Frank, Z)

HISTORY 470B. Research Seminar in Latin American Social History II—CulSoc
4-5 units, Win (Frank, Z)

HUMBIO 112. Conservation Biology—(Same as BIOSCI 144.) Eco
3-4 units, Win (Boggs, C; Launer, A)

HUMBIO 129. Critical Issues in International Women's Health—Eco
4 units, Win (Murray, A)

HUMBIO 129S. International Health—Eco
4 units, Win (Wise, P)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges—Eco
4 units, Spr (Smith, D)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy—PolEcon, CulSoc
3 units, Spr (Abrams, W)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as IPS 230, POLISCI 114D/314D.) PolEcon
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 148. Economic Integration of the Americas—PolEcon
5 units, Aut (O'Keefe, T)

INTNLREL 161B. Global Human Geography: Europe and Americas—(Same as HISTORY 106B.) CulSoc
5 units, Win (Lewis, M)

INTNLREL 163. History and Geography of Contemporary Global Issues—(Same as HISTORY 206.) CulSoc
5 units, Aut (Lewis, M)

LAW 330. International Human Rights Clinic—PolEcon
3 units, Win (Martinez, J)

LAW 611. International Conflict Resolution Colloquium—(Same as POLISCI 403, PSYCH 283.) PolEcon
2-5 units, Win (Weiner, A)

MED 230. Rethinking International Health—Eco
2-3 units, Win, Spr (Parsonnet, J; Wise, P)

MED 262. Economics of Health Improvement in Developing Countries—(Same as ECON 127, HUMBIO 121.) Eco, PolEcon
5 units, Win (Miller, N)

MS&E 243. Energy and Environmental Policy Analysis—(Same as IPER 243.) Eco, PolEcon
3 units, Spr (Sweeney, J)

POLISCI 114S. International Security in a Changing World—PolEcon
5 units, Win (Sagan, S; Blacker, C)

POLISCI 140. Political Economy of Development—PolEcon
5 units, Win (Díaz-Cayeros, A)

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries—(Same as INTNLREL 143.) PolEcon
5 units, Win (Abernethy, D)

POLISCI 243R. Research Seminar in Democratization and Human Rights—PolEcon
5 units, Aut (Karl, T)

POLISCI 248. Mexican Politics—PolEcon
5 units, Spr (Díaz-Cayeros, A)

POLISCI 248S. Latin American Politics—PolEcon
5 units, Win (Magaloni, B)

POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern—(Same as HISTORY 378A.) PolEcon
5 units, Aut (Haber, S)

POLISCI 440B. Political Economy of Development—(Same as HISTORY 378E.) PolEcon
5 units, Aut (Haber, S)

PORTLIT 193Q. Spaces and Voices of Brazil through Films—CulSoc
3-4 units, Aut (Wiedemann, L)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity—(Same as CSRE 196C, ENGLISH 172D.) CulSoc
5 units, Win (Moya, P; Markus, H)

PUBLPOL 104. Economic Policy Analysis—(Same as ECON 150) PolEcon
5 units, Spr (Staff)

SOC 231. World, Societal, and Educational Change: Comparative Perspectives—(Same as EDUC 136/306D.) CulSoc
4-5 units, Win (Drori, G)

SPANLIT 104N. Race and Slavery in Literature of the Nineteenth-Century Spanish Empire—CulSoc
3-4 units, Aut (Surwillo, L)

SPANLIT 108Q. Latin American Cinema: Politics and Aesthetics—CulSoc
3-4 units, Win (Ruffinelli, J)

SPANLIT 114N. Lyric Poetry—CulSoc
3-5 units, Spr (Predmore, M)

SPANLIT 119N. Buenos Aires, Havana, Mexico City: Modernism and the Latin American City—CulSoc
3-4 units, Win (Staff)

SPANLIT 125. The Forms of Wonder—CulSoc
3-5 units, Win (Arellano, J)

SPANLIT 131. Cultural Perspectives in the Luso-Hispanic Americas—CulSoc
3-5 units, Win (Gallo, R)

SPANLIT 136. Survey of Modern Iberian Literature—CulSoc
3-5 units, Win (Resina, J)

SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis—CulSoc
3-5 units, Spr (Surwillo, L)

SPANLIT 157. Introduction to Medieval and Early Modern Iberian Literatures—(Same as PORTLIT 157.) CulSoc
3-5 units, Aut (Barletta, V)

SPANLIT 161. Survey of Latin American Literature—CulSoc
3-5 units, Spr (Ruffinelli, J)

SPANLIT 193. The Cinema of Pedro Almodóvar—CulSoc
3-5 units, Spr (Resina, J)

SPANLIT 215/315. Nineteenth-Century Spanish Serials—CulSoc
3-5 units, Win (Surwillo, L)

SPANLIT 240. Brazilian and Spanish American Novellas—(Same as PORTLIT 240.) CulSoc
3-5 units, Spr (Hatoum, M)

SPANLIT 242. The Rise of the Latin American Novel and Its Reception in Spain—CulSoc
3-5 units, Spr (Ruffinelli, J)

SPANLIT 244. The Formation of a Nation—(Same as PORTLIT 244.) CulSoc
3-5 units, Win (Costa Lima, L)

SPANLIT 249. Reading Cinema Today—CulSoc
3-5 units, Win (Sánchez, C)

SPANLIT 286/386. The Films of Lourdes Portillo—CulSoc
3-5 units, Aut (Yarbro-Bejarano, Y)

SPANLIT 314. Poetic Form and Performance: The Medieval Iberian Lyric—CulSoc
3-5 units, Win (Barletta, V)

SPANLIT 324. Modern Catalan Literature—CulSoc
3-5 units, Aut (Resina, J)

SPANLIT 336. Early 20th-Century Peninsular Spanish Poetry—CulSoc
3-5 units, Spr (Predmore, M)

SPANLIT 357. The Novel and Latin American Sociopolitical History—(Same as PORTLIT 357.) CulSoc
3-5 units, Win (Lima, L)

OVERSEAS STUDIES

Courses taught overseas can be found in the "Overseas Studies" section of this bulletin, in the Overseas Studies office, 126 Sweet Hall, or at http://osp.stanford.edu/.

SANTIAGO

OSPSANTG 58. Living Chile: A Land of Extremes—CulSoc, Eco
5 units, Aut, Spr (Staff)

OSPSANTG 104X. Modernization and Culture in Latin America—CulSoc
5 units, Aut (Subercaseaux, B)

OSPSANTG 111. Social Heterogeneity in Latin America—CulSoc
5 units, Aut (Valdés, T)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century—PolEcon
5 units, Spr (Correa, G)

OSPSANTG 118X. Artistic Expression in Latin America—CulSoc
5 units, Win (Albornoz, C)

OSPSANTG 129X. Latin America in the International System—PolEcon
4-5 units, Win (Fuentes, C)

OSPSANTG 141X. Politics and Culture in Chile—PolEcon, CulSoc
5 units, Spr (Subercaseaux, B)

OSPSANTG 160X. Latin America in the International Economy—PolEcon
5 units, Win (Di Filippo, A)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—PolEcon
5 units, Aut (Micco, S)

LINGUISTICS

Emeriti: *(Professors)* Clara N. Bush, Shirley Brice Heath, William R. Leben, Elizabeth C. Traugott
Chair: Thomas A. Wasow
Professors: Joan Bresnan (Spring), Eve V. Clark, Penelope Eckert, Martin Kay (Autumn, Spring), Paul Kiparsky (on leave), Beth Levin, Stanley Peters, John R. Rickford, Ivan A. Sag, Thomas A. Wasow
Associate Professors: Daniel Jurafsky, Christopher Manning
Assistant Professors: Arto Anttila, Meghan Sumner
Senior Lecturers: Philip L. Hubbard, Beverley J. McChesney
Lecturer: Vivienne Fong (Winter)
Visiting Professor: Arnold Zwicky
Acting Assistant Professor: Asya Pereltsvaig
Consulting Professors: Ronald Kaplan, Lauri Karttunen, Annie Zaenen
Consulting Associate Professors: Jared Bernstein, Cleo Condoravdi
Affiliated Faculty: Herbert H. Clark, James A. Fox, Kenji Hakuta, Miyako Inoue, Yoshiko Matsumoto, Orrin W. Robinson III, Richard D. Schupbach, Chao Fen Sun

Department Offices: Margaret Jacks Hall, Building 460
Mail Code: 94305-2150
Phone: (650) 723-4284
Email: linguistics@csli.stanford.edu
Web site: http://www-linguistics.stanford.edu

Courses given in Linguistics have the subject code LINGUIST. For a complete list of subject codes, see Appendix.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics), words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the department and the Center for the Study of Language and Information (CSLI), whose members are computer scientists, linguists, philosophers, and psychologists, participate extensively in the activities of the department.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as Anthropology, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

REQUIREMENTS

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

Core Courses—The core courses are:

LINGUIST 1. Introduction to Linguistics
LINGUIST 110. Introduction to Phonetics and Phonology
LINGUIST 120. Introduction to Syntax
LINGUIST 130A. Introduction to Linguistic Meaning, *or* 130B. Introduction to Lexical Semantics
LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)
LINGUIST 160. Introduction to Language Change, *or*, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language

All majors must complete at least five core courses, including LINGUIST 150, Language and Society, which fulfills the Writing in the Major requirement (WIM).

Other Courses—Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies adviser when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student's major program must be approved by the Linguistics undergraduate studies adviser, or approved department adviser.

Students in the major must also take:

1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. (Special arrangements can be made for transfer students and others who start the major late.)

Other Requirements—

1. *Foreign language:* majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

   Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.
2. *Junior research paper:* this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously submitted in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies adviser by the end of the junior year.

AREAS OF CONCENTRATION

Students select one of the following areas of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies chair. These areas of concentration are not declared on Axess, and they do not appear on the transcript or diploma.

General Linguistics—This concentration provides a broad education in Linguistics and is advisable for students interested in advanced degrees in Linguistics. All six core courses are required.

Language and Society—This concentration focuses on the social dimensions of language.

Language Structures—This concentration focuses on the cognitive aspects of language.

Language Specialization—This concentration focuses on linguistics as it pertains to a particular language. To date, Chinese, Japanese, and Spanish language specializations have been pre-approved. Other language specializations can be arranged on an ad hoc basis if appropriate courses are available in the relevant departments.

MINOR

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies adviser. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student's major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following five Linguistics core courses:
   LINGUIST 110. Introduction to Phonetics and Phonology
   LINGUIST 120. Introduction to Syntax
   LINGUIST 130A. Introduction to Linguistic Meaning,
   or LINGUIST 130B. Introduction to Lexical Semantics
   LINGUIST 160. Introduction to Language Change,
   or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Winter Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project which must be approved by the faculty adviser. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 60 units including the 50 units for the major, plus 10 additional units of independent study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199, Independent Study, to work closely with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198, Honors Research, with the student's principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL PROGRAM

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department's web pages.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. The following are additional departmental requirements. Candidates should review the department's *Guidelines for the M.A. Degree in Linguistics* for further particulars concerning these requirements.

1. *Courses:* candidates must complete 45 units of graduate work in Linguistics, including at least four courses in the student's area of specialization. No more than two courses should be at the 100 level.

   Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.
2. *Language:* reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.
3. *Thesis or Thesis Project:* a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

DOCTOR OF PHILOSOPHY

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees" section of this bulletin. Candidates should review the department's *Guidelines for the Degree of Ph.D. in Linguistics*, downloadable at http://www-linguistics.stanford.edu/graduate/phd-guidelines.pdf, for further particulars concerning these requirements.

1. *Language:* candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)

   In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate's native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.
2. *Courses:* a minimum of 135 units of graduate work beyond the bachelor's degree or, 90 units beyond the master's degree. The course requirements detailed in the *Guidelines for the Degree of Ph.D. in Linguistics* guarantee that each student covers a sufficient set of subareas within the field.

   Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B) and all of the basic courses should be completed with at least a 'B.'
3. *Research:* the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by LINGUIST 395A, B, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.
4. *Candidacy:* students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.
5. *Teaching:* at least three quarters serving as teaching assistant in Linguistics courses.

6. *Colloquia:* two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.
7. *Dissertation:*
   - a) a written dissertation proposal is required by the end of the third year.
   - b) oral presentation of the dissertation proposal, preferably as a colloquium.
   - c) approval of the dissertation topic and appointment of a dissertation committee.
   - d) passing a University oral examination on the dissertation and related areas.
   - e) dissertation (up to 15 units of LINGUIST 399).

PH.D. MINOR

1. *Courses:* the candidate must complete 30 units of course work in linguistics at the 100 level or above, including LINGUIST 110, 120, and either 130A or 130B (100-level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in linguistics.
2. *Research Project* (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.
3. The linguistics minor adviser or designee serves on the candidate's University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

Ph.D. Minor in Applied Linguistics—The Department of Linguistics participates in the Applied Linguistics Minor. See the "Language Center" section of this bulletin for full details.

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

01-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-61	Sociolinguistics, Language Variation, Change
62-73	Language and Culture, Structure of a Language
74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-93	Applied Linguistics
94-99	Directed Work, Theses, Dissertations

LINGUIST 1. Introduction to Linguistics—The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER:DB-SocSci

4 units, Aut (Eckert, P; Sag, I), Spr (Pereltsvaig, A)

LINGUIST 37Q. Forensic Linguistics—Stanford Introductory Seminar. Preference to sophomores. The use of linguistic techniques to investigate crimes in which language data forms part of the evidence to authenticate police statements, confessions, threats to harm or kill, and suicide notes. Language data including choice of words, sentence structure, punctuation, spelling, handwriting, and voice identification. Differences between what is said, what is meant, and what is understood. Variations in language use and practice between authors and within the same author. Case studies.

2 units, Spr (Traugott, E)

LINGUIST 44N. Living with Two Languages—Stanford Introductory Seminar. Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism. GER:DB-SocSci

3 units, Spr (Clark, E)

LINGUIST 46Q. Slips of the Tongue—Stanford Introductory Seminar. Preference to sophomores. Linguistic mistakes, using collections of real-life errors as windows on how languages are structured and used.

3 units, Spr (Zwicky, A)

LINGUIST 62N. The Language of Food—Stanford Introductory Seminar. Preference to freshmen. The relationship between food and language around the globe. The vocabulary of food and prepared dishes, and crosslinguistic similarities and differences, historical origins, forms and meanings, and relationship to cultural and social variables. The structure of cuisines viewed as meta-languages with their own vocabularies and grammatical structure. The language of menus; their historical development and crosslinguistic differences.

3 units, Win (Jurafsky, D)

LINGUIST 63N. Translation—Stanford Introductory Seminar. Preference to freshmen. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages? GER:DB-SocSci

3 units, Aut (Kay, M)

LINGUIST 65/265. African American Vernacular English—The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. GER:DB-SocSci, EC-AmerCul

3-5 units, Spr (Rickford, J)

LINGUIST 90. Teaching Spoken English—Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

3-4 units, Spr (Rylance, C)

LINGUIST 104/204. Seminar on Grammar and Usage—(Graduate students register for 204.) Linguistic behaviors as evidence for grammatical models. Inferring categorical grammars from graded data. History of competence/performance debates within generative grammar.

1-4 units, Spr (Wasow, T)

LINGUIST 105/205A. Phonetics—(Graduate students register for 205A.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor. GER:DB-SocSci

4 units, Spr (Sumner, M)

LINGUIST 110. Introduction to Phonetics and Phonology—Differences in the sounds of the world's languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci

4 units, Spr (Anttila, A)

LINGUIST 112/212A. Seminar in Phonology: The Phonology of Syntax—(Graduate students register for 212A.) Variation in the phonology of words according to their contexts within larger expressions. Syntactic, morphological, lexical, and stylistic factors conditioning this variation. The place of these phenomena in a theory of grammar.

2-4 units, Aut (Zwicky, A)

LINGUIST 116. Morphology—A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

4 units, Win (Zwicky, A)

LINGUIST 120. Introduction to Syntax—Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci

4 units, Aut (Wasow, T)

LINGUIST 124A/224A. Introduction to Formal Universal Grammar—(Graduate students register for 224A.) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci

4 units, Spr (Bresnan, J)

LINGUIST 130A. Introduction to Linguistic Meaning—Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, or consent of instructor. GER:DB-SocSci

4 units, Spr (Brasoveanu, A)

LINGUIST 130B. Introduction to Lexical Semantics—Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci

4 units, Win (Fong, V)

LINGUIST 130C. Logic Laboratory—Typically taken in conjunction with 130A/230A.

1 unit, Spr (Brasoveanu, A)

LINGUIST 140/240. Language Acquisition I—(Graduate students register for 240.) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. GER:DB-SocSci

4 units, Aut (Clark, E)

LINGUIST 142. Bilingualism, Language Attrition, and Heritage Languages—Linguistic and sociolinguistic aspects of first language loss among emigrants; consequences for language teaching. GER:DB-SocSci

3-4 units, Spr (Pereltsvaig, A)

LINGUIST 144. Introduction to Cognitive Science—(Same as PHIL 190, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Davies, T)

LINGUIST 150. Language in Society—How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:DB-SocSci, WIM

4 units, Win (Rickford, J)

LINGUIST 152/252. Sociolinguistics and Pidgin Creole Studies—(Graduate students register for 252.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portugese, Chinook, Motu, and Sango.

2-4 units, Spr (Rickford, J)

LINGUIST 156. Language and Gender—The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER:DB-SocSci, EC-Gender

4 units, not given this year (Eckert, P)

LINGUIST 160. Introduction to Language Change—(Same as ANTHSCI 110.) Variation and change as the natural state of language. Differentiation of dialects and languages over time. Determination and classification of historical relationships among languages, and reconstruction of ancestral stages. Types, rates, and explanations of change. Parallels with cultural and genetic evolutionary theory. Implications for the description and explanation of language in general. GER:DB-SocSci

4-5 units, not given this year

LINGUIST 174/274A. Field Methods I—(Graduate students register for 274A.) Hands-on. The methods by which linguists gather raw linguistic data about a language and begin analyzing its structure. Working with a speaker of a language not previously studied by class participants, students develop a description of key aspects of its grammar and examine methodologies for obtaining, storing, and manipulating data.

2-4 units, not given this year

LINGUIST 180. Introduction to Computational Linguistics—Machine translation, web-based question answering, conversational agents, speech recognition and synthesis, parsing, computational semantics and pragmatics. Foundation for other language processing courses; focus is on using available online implementations of algorithms. Prerequisite: CS 106B or X. GER:DB-EngrAppSci

4 units, Aut (Jurafsky, D)

LINGUIST 182/282. Human and Machine Translation—(Graduate students register for 282.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:DB-EngrAppSci

4 units, not given this year (Kay, M)

LINGUIST 187/287. Grammar Engineering—(Graduate students register for 287.) Hands-on. Techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.
1-4 units, Win (Flickinger, D; Oepen, S)

LINGUIST 188/288. Natural Language Understanding—(Graduate students register for 288; same as CS 224U.) Machine understanding of human language. Computational semantics (determination of sense, event structure, thematic role, time, aspect, synonymy/meronymy, causation, compositional semantics, treatment of scopal operators), and computational pragmatics and discourse (coherence relations, anaphora resolution, information packaging, generation). Theoretical issues, online resources, and relevance to applications including question answering, summarization, and textual inference. Prerequisites: one of LINGUIST 180, CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).
2-4 units, Aut (Jurafsky, D; Manning, C)

LINGUIST 191/291. Linguistics and the Teaching of English as a Second/Foreign Language—(Graduate students register for 291.) Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.
4-5 units, Win (Hubbard, P)

LINGUIST 197. Undergraduate Research Seminar—Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.
2 units, Win (Clark, E)

LINGUIST 198. Honors Research
1-15 units, Win, Spr (Staff)

LINGUIST 199. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 200. Foundations of Linguistic Theory—Theories that have shaped 20th-century linguistics; recurrent themes and descriptive practice.
4 units, alternate years, given next year

LINGUIST 205B. Advanced Phonetics—Prerequisite: LINGUIST 205A.
2-4 units, not given this year

LINGUIST 207. Seminar in Phonetics: Phonetic Variation and Speech Perception—How variation is accommodated in current models of speech perception. Systematic and more random types of variation; the effect of variation on perception. How perceptual models need to be altered to accommodate phonetic variation encountered by listeners. May be repeated for credit.
2-4 units, Win (Sumner, M)

LINGUIST 210A. Phonology—Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals.
4 units, Aut (Anttila, A)

LINGUIST 210B. Advanced Phonology—The phonological organization of the lexicon. Topics include lexical phonology, phonological subregularities, gradient phonotactics, and lexical frequency effects.
4 units, Win (Anttila, A)

LINGUIST 211. Metrics—Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. The ideology of normative prosodic discourse in relation to changing poetic practice.
1-4 units, not given this year (Kiparsky, P)

LINGUIST 212B. Seminar in Phonology: Intonation and Stress—May be repeated for credit.
1-4 units, Spr (Leben, W)

LINGUIST 214. Phonology Workshop—May be repeated for credit.
1-2 units, Aut, Win, Spr (Anttila, A)

LINGUIST 216. Morphology—How morphology fits into the lexicon and how the lexicon fits into grammar. Inflection and word-formation: blocking, productivity, analogy. Morphological categories. The interaction of morphology with phonology within the lexicon: level-ordering, prosodic morphology. Review of English morphology and analysis of representative material from languages with richer morphologies.
2-4 units, not given this year

LINGUIST 217. Morphosyntax—The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.
2-4 units, Win (Levin, B)

LINGUIST 221A. Foundations of English Grammar—A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.
1-4 units, not given this year (Sag, I)

LINGUIST 221B. Studies in Universal Grammar—Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.
1-4 units, not given this year

LINGUIST 222A. Foundations of Syntactic Theory I—The role of the verb and lexicon in the determination of sentence syntax. The argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction.
2-4 units, Aut (Levin, B)

LINGUIST 222B. Foundations of Syntactic Theory II—The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.
2-4 units, Win (Sag, I)

LINGUIST 223. Introduction to Minimalist Syntax—Focus is on phrase structure, movement, functional categories, features, the nature of economy conditions, and parametric differences. More general issues of the architecture of the grammar and the nature of crosslinguistic variation.
2-4 units, Win (Pereltsvaig, A)

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar—May be repeated for credit.
1-4 units, not given this year

LINGUIST 225A. Seminar in Syntax—May be repeated for credit.
1-2 units, Spr (Sag, I)

LINGUIST 225B. Seminar in Syntax: Word Order—Recent research on core word order variation. Topics include VO-OV, verb-second, verb-initial, and free word order languages. May be repeated for credit.
1-4 units, Aut (Pereltsvaig, A)

LINGUIST 227C. Projects in Syntax—Group research projects using quantitative syntactic data from texts, recordings, experiments, or historical records. Skills in extracting, graphically exploring, and analyzing naturalistic syntactic data, and in presenting results. May be repeated for credit. Prerequisite: 229A, B, or D, or equivalent.
2-4 units, Spr (Bresnan, J)

LINGUIST 229A. Laboratory Syntax I—Hands-on use of methods for analyzing quantitative syntactic data, including clustering and classification, regression, and mixed models. May be repeated for credit.
1-4 units, not given this year

LINGUIST 229B,C. Laboratory Syntax II, III—Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.
1-4 units, not given this year

LINGUIST 229D. Empirical Syntax Research Seminar—Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.
1-2 units, Aut (Sag, I)

LINGUIST 230A. Introduction to Semantics and Pragmatics—Meaning in natural language. Topics: elementary set theory; propositional logic, predicate logic, and lambda calculus, and their relation to semantic analysis; model theoretic characterizations of meaning and semantic properties of English conjunctions and determiners. Grice's theory of implicature, speech acts, Davidson's theories of logical form, and Montague grammar. Recommended: elementary logic and set theory.
2-4 units, Win (Peters, S)

LINGUIST 230B. Semantics and Pragmatics—Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130A and PHIL 150 and 160.
2-4 units, not given this year

LINGUIST 232A. Lexical Semantics—Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.
2-4 units, Spr (Levin, B)

LINGUIST 232B. Seminar in Lexical Semantics—Topics have included: lexical categories; motion verbs; psych-verbs. May be repeated for credit.
1-4 units, not given this year

LINGUIST 232C. Lexical Semantics Research Seminar—May be repeated for credit. By arrangement.
1-2 units, Aut, Win, Spr (Levin, B)

LINGUIST 236. Seminar in Semantics: Indefinites—Static and dynamic approaches. Their referential versus quantificational status, scopal properties, and interaction with modal anaphora and quantification. Indefinites cross-linguistically, types of indefinites, and their semantic and pragmatic properties. Indefinite-like items in modal, temporal/aspectual, and degree domains. May be repeated for credit.
*1-4 units, Aut (*Brasoveanu, A*)*

LINGUIST 237. Seminar in Semantics: Semantics of Questions and Commands—Semantics of interrogatives and imperatives; propositional semantics of declaratives. Research emphasizing the meaning of questions. May be repeated for credit.
1-4 units, Spr (Peters, S)

LINGUIST 241. Language Acquisition II—May be repeated for credit.
1-4 units, Win (Clark, E)

LINGUIST 245. Experimental Design for Linguistics—Hypothesis formation, confound avoidance, power, general methods, and analysis of results. Students complete a pilot experiment; write-up; peer review; presentation.
4 units, Spr (Sumner, M)

LINGUIST 247. Seminar in Psycholinguistics—(Same as PSYCH 227.) May be repeated for credit.
2-4 units, not given this year

LINGUIST 250. Sociolinguistic Theory and Analysis—Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.
4 units, Aut (Rickford, J)

LINGUIST 251. Sociolinguistic Field Methods—Strengths and weaknesses of the principal methods of data collection in sociolinguistics.
4 units, not given this year

LINGUIST 257. Seminar in Sociolinguistics: Community Studies of Variation—May be repeated for credit.
1-4 units, Win (Eckert, P)

LINGUIST 258. Analysis of Variation—The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.
4 units, Spr (Eckert, P)

LINGUIST 260A. Historical Morphology and Phonology—Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.
4 units, not given this year (Kiparsky, P)

LINGUIST 260B. Historical Morphosyntax—Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.
2-4 units, not given this year (Kiparsky, P)

LINGUIST 280. Natural Language Processing—(Same as CS 224N.) Methods for processing linguistic information and the underlying computational properties of natural languages. Syntactic and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition and interpretation, and representative systems. Prerequisites: CS 121/221 or LINGUIST 180, programming experience, familiarity with logic and probability.
3-4 units, Spr (Manning, C)

LINGUIST 281. Speech Recognition and Synthesis—(Same as CS 224S.) Automatic speech recognition, speech synthesis, and dialogue systems. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: CS 221 or 229.
2-4 units, not given this year (Jurafsky, D)

LINGUIST 289. Quantitative, Probabilistic, and Optimization-Based Explanation in Linguistics—Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.
3-4 units, Aut (Manning, C)

LINGUIST 294. Linguistic Research Discussion Group—Restricted to first-year Linguistics Ph.D. students.
1 unit, Aut (Levin, B)

LINGUIST 390. M.A. Project
1-3 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 394. TA Training Workshop—For second-year graduate students in Linguistics.
1 unit, Aut (Levin, B)

LINGUIST 395A,B,C. Research Workshop I—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, **A:** *Spr (Clark, E),* **B:** *Spr (Anttila, A),* **C:** *Sum (Staff)*

LINGUIST 396. Research Projects in Linguistics—Mentored research project for first-year graduate students in linguistics.
2-3 units, Win (Staff)

LINGUIST 397. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 398. Directed Research
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 399. Dissertation Research
1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CHINLIT 192/292. The History of Chinese
4 units, Aut (Sun, C)

CS 276. Text Retrieval and Web Search
3 units, not given this year

PSYCH 131/262. Language and Thought
4 units, Aut (Clark, H)

DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Division Head: Roland Greene
Division Offices: Building 260, Rooms 114-119
Mail Code: 94305-2005
Phone: (650) 724-1333; Fax: (650) 725-9306
Email: dlcl@stanford.edu
Web Site: http://dlcl.stanford.edu

The Division of Literatures, Cultures, and Languages consists of six academic departments (Asian Languages, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division's departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

MINORS

The Division of Literatures, Cultures, and Languages offers two minors that draw upon courses in literature and language within the division's departments and elsewhere in the University.

Course work in these minors may not duplicate work counted toward language majors or other minors. Advanced Placement credit and transfer credit do not apply to the minors. All courses must be taken for a letter grade. By University policy, no more than 36 units may be awarded in these minors.

Prospective minors should obtain a Minor Declaration form from the DLCL office of undergraduate student services.

MINOR IN LITERATURE

The minor in Literature allows students from any major to develop skills in the interpretation and criticism of literature, while acquiring a familiarity with types of literature from different national traditions and periods. Students must complete 30 units of course work on literature or literary theory. Courses may be in the original language or in translation.

The courses must include a minimum of:

1. One course on literary theory or the history of criticism.
2. One course on literature prior to the eighteenth century.
3. One course on literature reflecting perspectives outside of the European traditions.
4. One course from each of three distinct national or linguistic traditions from among Arabic, Chinese, English (including Anglophone literatures broadly conceived), French, German, Greek, Hebrew, Italian, Japanese, Korean, Latin, Persian, Portuguese, Russian, Spanish, Yiddish, and other national or linguistic traditions when appropriate courses are available. The pre-eighteenth-century course and the non-European course may be counted toward fulfilling this requirement.

5. Courses from two different genres such as poetry, drama, and prose fiction. Theory does not count as a genre.
6. One course requiring a research paper.

Students must consult with the minor adviser for approval of courses to meet these requirements. Second-year foreign language courses are not normally counted unless the syllabus reflects a primary emphasis on the reading of literature. Students are encouraged to acquire second-language skills and to explore courses in related disciplines; such courses, however, are not counted toward the 30 units required for the minor in Literature.

Course work in the minor may not duplicate work counted toward specific language majors or minors. Neither Advanced Placement credit nor transfer credit may be applied to the minor. All courses applied to the minor must be Stanford courses. At least 25 units of the course work must be taken for a letter grade.

The DLCL office of undergraduate student services verifies course work for the minor. The minor in Literature must be approved by a divisional faculty member designated by the DLCL.

MINOR IN MODERN LANGUAGES

The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the directors of undergraduate studies of the respective language departments. Students in any field qualify for the minor by meeting the following requirements:

1. A minimum of 20 units at the intermediate level (second year) or beyond in at least two languages other than English offered by the DLCL. Normally, this involves 12 units in each language.
2. At least one additional course whose subject code ends in -LIT or -GEN in each modern language in '1' above. These courses should be taught by Academic Council members or other senior members of the faculty. In the case of Slavic or Asian languages, the course should be marked as advanced.

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken.

COURSES

DLCL 99. Multimedia Course Lab—Designed to supplement the literature curriculum of existing undergraduate courses in DLCL departments in which a multimedia component may benefit collaborative or individual research projects. Taken for credit at the discretion of the instructor of the departmental literature course.

1 unit, Aut, Win, Spr (Chandler, Z)

DLCL 189. Honors Thesis Seminar—For undergraduate majors in DLCL departments; required for honors students. Planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.

5 units, Aut (Surwillo, L)

DLCL 308. Comparative Literature Colloquium—Participants discuss and critique work presented by graduate students and faculty in the DLCL. Work may include conference or seminar papers, thesis chapters, or works-in-progress. Feedback focuses on writing and argumentation, and more general responses to the subject matter. Meetings open to the public. May be repeated for credit.

2 units, Aut, Win, Spr (Berman, R)

DLCL 309. The Teaching of Literature—Prepares graduate students in DLCL departments to teach literature at the undergraduate level. Topics include: the opportunities and problems of transposing a research project into a feasible course; the logic of syllabi and reading lists; the structuring of a course from week to week; and other matters relevant to first-time teachers of literature. Supervised by the graduate affairs committee of the DLCL.

2 units, Win (Levy, I), Spr (Staff)

DLCL 310. The Development of a Dissertation from Prospectus to Defense—Meets regularly throughout the year to advise and support dissertation-level students as they prepare a prospectus, begin writing, submit chapters, and complete their projects. Focus of the workshop shifts from term to term as appropriate to the participants. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut (Safran, G), Win (Schnapp, J), Spr (Dornbach, M)

DLCL 311. Professional Workshop—Meets regularly throughout the year to discuss issues in the professional study of literature. Topics include the academic job market and the challenges of research and teaching at different types of institutions. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut, Win, Spr (Greene, R)

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Director: Bradley Efron
Associate Director: Susan Holmes
Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Peter W. Glynn (Management Science and Engineering), Gene Golub (Computer Science), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Doron Levy (Mathematics), Parviz Moin (Engineering), Art Owen (Statistics), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), David Siegmund (Statistics), Arthur F. Veinott Jr. (Management Science and Engineering), Nancy R. Zhang (Statistics)
Program Administrator: Helen Tombropoulos

Program Offices: Sequoia Hall, 390 Serra Mall
Mail Code: 94305-4065
Phone: (650) 723-2620
Email: helen@stat.stanford.edu
Web Site: http://www.stanford.edu/group/mathcompsci

Courses given in Mathematical and Computational Science have the subject code MCS. For a complete list of subject codes, see Appendix.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford's mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 72-77 units, distributed as follows:

Mathematics (MATH): 29-31 units	*Qtr. and Units*	
MATH 41. Calculus	A	5
and MATH 42. Calculus	A,W	5
MATH 51. Linear Algebra and Differential Calculus of Several Variables	A,W,S	5
or MATH 51H. Honors Advanced Calculus	A	5
MATH 52. Integral Calculus of Several Variables	A,W,S	5
or MATH 52H. Honors Advanced Calculus	W	5
MATH 53. Ordinary Differential Equations with Linear Algebra	A,W,S	5
or MATH 53H. Honors Advanced Calculus	S	5
MATH 109. Applied Group Theory (WIM)	A	3
or MATH 110. Applied Number Theory and Field Theory (WIM)	S	3
or MATH 120. Modern Algebra (WIM)	A,S	3
MATH 113. Linear Algebra and Matrix Theory	A,W	3

Computer Science (CS): 16-18 units

CS 103X. Discrete Structures (Accelerated)	W	3-4
or CS 103A. Discrete Mathematics for Computer Science	A,W	3
and CS 103B. Discrete Structures	W,S	3
CS 106X. Programming Methodology and Abstractions (Accel.)	A, W	3-5
or CS 106A. Programming Methodology	A,W,S	3-5
and CS 106B. Programming Abstractions	W,S	3-5

And two of the following (CS or CME):

CME 108. Introduction to Scientific Computing	W	3-4
CS 107. Programming Paradigms	A,S	3-5
CS 154. Introduction to Automata and Complexity Theory	A,S	3-4
CS 161. Design and Analysis of Algorithms	A,W	3-4

Management Science and Engineering (MS&E): 8-9 units

MS&E 111. Introduction to Optimization (same as ENGR 62)	A,S	3-4
and MS&E 121. Introduction to Stochastic Modeling	W	4

or three of the following:

MS&E 211. Linear and Nonlinear Optimization	A	3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization	S	3
MS&E 221. Stochastic Modeling	W	3
MS&E 251. Stochastic Decision Models	W	3

Statistics (STATS): (11 units)

STATS 116. Theory of Probability	A,S	3-5
STATS 191. Introduction to Applied Statistics	W	3-4
or STATS 203. Introduction to Regression Models and Analysis of Variance	W	3
STATS 200. Introduction to Statistical Inference	W	3

ELECTIVES (9 UNITS)

Three courses in mathematical and computational science, 100-level or above, at least 3 units each. At least one must be chosen from the following:

	Qtr. and Units	
ECON 102C. Advanced Topics in Econometrics	S	5
ECON 140. Introduction to Financial Economics	W	5
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)	W	5
ECON 179. Experimental Economics	S	5
EE 261. The Fourier Transform and its Applications	A,S	3
MS&E 211. Linear and Nonlinear Optimization	A	3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization	S	3
MS&E 221. Stochastic Modeling	W	3
MS&E 251. Stochastic Decision Models	W	3
MCS 100. Mathematics of Sports (same as STATS 50)	S	3
MATH 106. Functions of a Complex Variable	W	3
MATH 108. Introduction to Combinatorics and its Applications	S	3
MATH 111. Computational Commutative Algebra	W	3
MATH 115. Functions of a Real Variable	A,W	3
MATH 116. Complex Analysis	W	3
MATH 118. Numerical Analysis (not given 2007-08)		3
MATH 131. Partial Differential Equations I	A,W	3
MATH 132. Partial Differential Equations II	S	3
MATH 135. Nonlinear Dynamics and Chaos	S	3
MATH 136. Stochastic Processes	A,W	3
PHIL 151. First-Order Logic	W	4
STATS 202. Data Analysis	A	3
STATS 217. Introduction to Stochastic Processes	W	3

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 302. Numerical Linear Algebra	A	3
CS 108. Object-Oriented Systems Design	A,W	3-4
CS 140. Operating Systems and Systems Programming	A,W	3-4
CS 143. Compilers	A	3-4
CS 157. Logic and Automated Reasoning	A	3-4
CS 161. Design and Analysis of Algorithms	A,W	3-4
CS 194. Software Project (prerequisite CS 108)	S	3
CS 221. Artificial Intelligence: Principles and Techniques	A	3-4
CS 223A. Introduction to Robotics	W	3
CS 223B. Introduction to Computer Vision	W	3
CS 225A. Experimental Robotics	S	3
CS 228. Probabilistic Models in Artificial Intelligence	W	3
CS 229. Machine Learning	A	3
CS 243. Advanced Compiling Techniques	W	3-4
EE 282. Computer Systems Architecture	A	3

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a students's interests.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

MATHEMATICAL AND COMPUTATIONAL SCIENCE BIOLOGY OPTION

Replace MATH 109/110 with either:

	Qtr. and Units	
BIOSCI 221. Methods of Theoretical Population Biology (not given 2007-08)		4
or MATH 135. Nonlinear Dynamic Systems	S	3

Replace STATS 191/203 by

STATS/BIOSCI 141. Biostatistics	A	3-5

Take at least 2 courses from the Biological Sciences core:

BIOSCI 41. Genetics and Biochemistry	A	5
BIOSCI 42. Cell Biology and Animal Physiology	W	5
BIOSCI 43. Plant Biology, Evolution, and Ecology	S	5

Take a third course either from the core or

STATS 166. Statistical Methods in Computational Genetics (WIM)	A	3
BIOSCI 133. Genetics of Prokaryotes (not given 2007-08)		3
BIOSCI 134. Replication of DNA (not given 2007-08)		3
BIOSCI 135. Biological Clocks	S	3
BIOSCI 136. Evolutionary Paleobiology (not given 2007-08)		4
BIOSCI 143/243. Evolution	A	4
BIOSCI 144. Conservation Biology	W	3-4
BIOSCI 160. Developmental Biology	A	4
BIOSCI 203. Advanced Genetics	A	4
BIOSCI 230. Molecular and Cellular Immunology	A	4-5

Honors students should take 3 of the following:

STATS 166. Statistical Methods in Computational Genetics (WIM)	A	3
ANTHSCI 180. Introduction to Anthropological Genetics		5
(not given 2007-08)		5
ANTHSCI 187. The Genetic Structure of Populations	W	5
ANTHSCI 188. Research in Anthropological Genetics	A	5
BIOSCI 113. Fundamentals of Molecular Evolution	S	4
BIOSCI 146. Population Studies	W	1
BIOSCI 221. Methods of Theoretical Population Biology (not given 2007-08)		4
BIOSCI 183A/283A. Population Genetic Theory and Evolution I	W	3

MATHEMATICAL AND COMPUTATIONAL SCIENCE ENGINEERING OPTION

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

The MATH 51-53 series may be replaced by:

	Qtr. and Units	
CME 100/ENGR 154. Vector Calculus for Engineers	A	5
CME 102/ENGR 155A. Ordinary Differential Equations for Engineers	W	5
CME 104/ENGR 155B. Linear Algebra and Partial Differential Equations for Engineers	S	5
MATH 115. Functions of a Real Variable	A,W	3

STATS 116 may be replaced by either one of the following:

STATS 110. Statistical Methods in Engineering and Physical Sciences	A	4-5
or CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers	W	3-4

STATS 191/STATS 203 may be replaced by:

STATS 202. Data Analysis	A	3

Electives; take at least one course from the following list:

MATH 106. Introduction to Theory of Functions of a Complex Variable	W	3
MATH 108. Introduction to Combinatorics Applications	S	3
MATH 116. Complex Analysis	W	3
MATH 118. Numerical Analysis (not given 2007-08)		3
MATH 132. Partial Differential Equations II	S	3
MATH 135. Nonlinear Dynamics and Chaos	S	3
PHIL 151. First-Order Logic	W	4

Take at least two courses from the following list:

ENGR 15. Dynamics	A,S	3
ENGR 20. Introduction to Chemical Engineering	S	3
ENGR 25. Biotechnology	S	3
ENGR 30. Engineering Thermodynamics	A,W	3
ENGR 40. Introductory Electronics	A, S	5
ENGR 50. Introductory Science Materials	W, S	4
ENGR 105. Feedback Control Design	W	3

Take three additional courses from a single engineering department, and two additional courses from any engineering department(s).

MINOR

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics . Four basic courses are required:

CS 106X. Programming Methodology and Abstractions (Accelerated)
  or CS 106A,B. Programming Methodology
MATH 51. Linear Algebra and Differential Calculus of Several Variables
  or MATH 103. Matrix Theory and its Applications
ENGR 62. Introduction to Optimization
  or MS&E 121. Introduction to Stochastic Modeling
STATS 116. Theory of Probability
  or STATS 191. Introduction to Applied Statistics

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

CME 108. Introduction to Scientific Computing
CS 107. Programming Paradigms
CS 154. Introduction to Automata and Complexity Theory
CS 161. Design and Analysis of Algorithms
EE 261. The Fourier Transform and its Applications
ECON 102C. Advanced Topics in Econometrics
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)
ECON 181. Optimization and Economic Analysis
MS&E 211. Linear and Nonlinear Optimization
MS&E 212. Mathematical Programming and Combinatorial Optimization
MS&E 221. Stochastic Modeling
MS&E 251. Stochastic Decision Models
MATH 103. Matrix Theory and Its Applications
MATH 106. Functions of a Complex Variable
MATH 108. Introduction to Combinatorics and its Applications
MATH 109. Applied Group Theory
MATH 110. Applied Number Theory and Field Theory
MATH 115. Functions of a Real Variable
  or MATH 171. Fundamental Concepts of Analysis
MATH 131. Partial Differential Equations I
MATH 132. Partial Differential Equations II
MATH 135. Nonlinear Dynamics and Chaos
MATH 171. Fundamental Concepts of Analysis
PHIL 151. First-Order Logic
STATS 200. Introduction to Statistical Inference
STATS 202. Data Analysis
STATS 203. Introduction to Regression Models and Analysis of Variance
STATS 217. Introduction to Stochastic Processes

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least a 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
   a) an approved higher-level graduate course
   b) participation in a small group seminar
   c) at least 3 units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for approval. Honors work may be concentrated in fields outside the Mathematical and Computational Science programs such as biological sciences, medicine, physics.

COURSES

MCS 100. Mathematics of Sports—(Same as STATS 50.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116.

3 units, Spr (Cover, T)

MATHEMATICS

Emeriti: *(Professors)* Kai Lai Chung, Solomon Feferman, Robert Finn, Samuel Karlin, Joseph Keller, Georg Kreisel, Harold Levine, R. James Milgram, Donald Ornstein, Robert Osserman

Chair: Rafe Mazzeo

Professors: Gregory Brumfiel, Daniel Bump, Gunnar Carlsson, Ralph L. Cohen, Amir Dembo, Persi Diaconis, Yakov Eliashberg, Eleny Ionel, Yitzhak Katznelson, Steven Kerckhoff, Jun Li, Tai-Ping Liu, Rafe Mazzeo, George Papanicolaou, Richard Schoen, Leon Simon, Kannan Soundararajan, Ravi Vakil, Brian White

Associate Professor: Andras Vasy

Assistant Professors: Simon Brendle, Soren Galatius

Szegö Assistant Professors: Laurent Demanet, Larry Guth, Gautam Iyer, Joan Licata, Todor Milanov, Dragos Oprea, Alexandra Pettet, Antoine Toussaint, Denis Trotabas, Leo Tzou

Lecturers: Andrew Blumberg, Christopher Douglas, Victor Eliashberg, Benjamin Lee, Mark Lucianovic, Laurence Nedelec, James Nolen, Richard Siefring, Wojciech Wieczorek

Acting Assistant Professor: Samuel Payne

Courtesy Professors: Renata Kallosh, Grigori Mints

Consulting Professors: Brian Conrey, Keith Devlin, David Hoffman, Wu-chung Hsiang

Visiting Professor: Helmut Hofer

Samelson Fellows: Anthony Licata, Samuel Lisi, Matthew Kahle

Web site: http://math.stanford.edu

Courses given in Mathematics have the subject code MATH. For a complete list of subject codes, see Appendix.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

ADVANCED PLACEMENT FOR FRESHMEN

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student's performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in the Autumn Quarter and 51 in Winter Quarter. Options available in the Spring Quarter include MATH 52, 53, or 103. For proper placement, contact the Department of Mathematics.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The following department requirements are in addition to the University's basic requirements for the bachelor's degree:

MAJOR

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items '1' and '2' above must be approved by the department's director of undergraduate study, acting under guidelines laid down by the department's Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case, students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement '1' by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Committee for Undergraduate Affairs. Application for such approval should be made through the department's director of undergraduate study.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items '1' and '2' above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1—A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

a) either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 111; 115

b) plus any selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 108, 131, 132, 143, 146, 147, 148, 152, 161; CS 137; ECON 50; PHYSICS 41, 43, 45; STATS 115. These courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement '2.'

Example 2—A theoretical program recommended for those contemplating possible later graduate work providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above; see, also, the discussion of the honors program below:

a) either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit)
b) either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106 or 116; 113; 120; 171
c) plus nine or more of the following courses, including at least one from each group: algebra sequence 114, 121, 152, 156; analysis sequence 131, 132, 135, 151, 174A,B, 175; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, 152; MATH 161.

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

*Example 3**—An applied mathematics program:

a) either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 108; 109; 110; 111; 115; 131; STATS 116
b) plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

---

* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

MINOR

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master's or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must include all the math courses 106 or 116, 120, 171 and also must include seven or more additional courses, with at least one from each of the groups: algebra sequence 114, 121, 152, 153, 156; analysis sequence 131, 132, 135, 136, 151, 174A, 174B, 175, 176; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, PHIL 152, and MATH 161.
2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items '1' and '2' above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science" section of this bulletin.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. Students should pay particular attention to the University's course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the "Financial Mathematics" section of this bulletin.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the "School of Education" section of this bulletin or address inquiries to Credential Secretary, School of Education.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination and pass a reading examination in one foreign language, chosen from French, German, or Russian.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

PH.D. MINOR

The student should complete both of the following:*

1. MATH 106 or 116, 131, 132
2. MATH 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

---

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items '1' or '2'.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

INTRODUCTORY AND UNDERGRADUATE

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in linear algebra is 103 or 113. There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51, 52, 53.

MATH 15. Overview of Mathematics—Broad survey of mathematics; its nature and role in society. GER:DB-Math
3 units, Win (Devlin, K)

MATH 19. Calculus—The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math
3 units, Aut (Lee, B), Win, Sum (Staff)

MATH 20. Calculus—Continuation of 19. Prerequisite: 19. GER:DB-Math
3 units, Win (Lee, B), Spr (Staff)

MATH 21. Calculus—Continuation of 20. Prerequisite: 20. GER:DB-Math
4 units, Spr (Lee, B)

MATH 41. Calculus—Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math
5 units, Aut (Lucianovic, M)

MATH 41A. Calculus ACE—Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Lucianovic, M)

MATH 42. Calculus—Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math
5 units, Aut, Win (Butscher, A)

MATH 42A. Calculus ACE—Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut, Win (Butscher, A)

MATH 51. Linear Algebra and Differential Calculus of Several Variables—Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut, Win, Spr, Sum (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE—Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut, Win, Spr (Staff)

MATH 51H. Honors Multivariable Mathematics—For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut (Simon, L)

MATH 52. Integral Calculus of Several Variables—Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51. GER:DB-Math
5 units, Aut (Oprea, D), Win (Demanet, L; Lucianovic, M), Spr (Butscher, A)

MATH 52H. Honors Multivariable Mathematics—Continuation of 51H. Prerequisite: 51H. GER:DB-Math
5 units, Win (Simon, L)

MATH 53. Ordinary Differential Equations with Linear Algebra—Linear ordinary differential equations, applications to oscillations, matrix methods including determinants, eigenvalues and eigenvectors, matrix exponentials, systems of linear differential equations with constant coefficients, stability of non-linear systems and phase plane analysis, numerical methods, Laplace transforms. Integrated with topics from linear algebra (103). Prerequisite: 51. GER:DB-Math

5 units, Aut (Staff), Win (Liu, T), Spr (Guth, L; Siefring, R), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics—Continuation of 52H. Prerequisite: 52H. GER:DB-Math

5 units, Spr (Brendle, S)

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory—Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

3 units, Win (Finn, R)

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles—Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

3 units, Spr (Wieczorek, W)

UNDERGRADUATE AND GRADUATE

Unless stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

MATH 100. Mathematics for Elementary School Teachers—Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.

4 units, Spr (Milgram, R)

MATH 103. Matrix Theory and Its Applications—Linear algebra and matrices, emphasizing the computational and algorithmic aspects and the scientific problems in which matrix theory is applied. Solution of linear equations. Linear spaces and matrices. Orthogonal projection and least squares. Determinants, eigenvalues, and eigenvectors. GER:DB-Math

3 units, Aut (Milanov, T), Win, Spr (Nedelec, L), Sum (Staff)

MATH 106. Functions of a Complex Variable—Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math

3 units, Win (Licata, J), Sum (Brumfiel, G)

MATH 108. Introduction to Combinatorics and Its Applications—Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math

3 units, Spr (Diaconis, P)

MATH 109. Applied Group Theory—Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. GER:DB-Math, WIM

3 units, Aut (Ionel, E)

MATH 110. Applied Number Theory and Field Theory—Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. GER:DB-Math, WIM

3 units, Spr (Brumfiel, G)

MATH 111. Computational Commutative Algebra—Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger's algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math

3 units, Win (Galatius, S)

MATH 113. Linear Algebra and Matrix Theory—Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math

3 units, Aut (Vasy, A), Win (Cohen, R)

MATH 114. Linear Algebra and Matrix Theory II—Advanced topics in linear algebra such as: invariant subspaces; canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; and applications. Prerequisite: 51H or 113. GER:DB-Math

3 units, Spr (Katznelson, Y)

MATH 115. Functions of a Real Variable—The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51. GER:DB-Math

3 units, Aut (Ornstein, D), Win (Toussaint, A), Sum (Brumfiel, G)

MATH 116. Complex Analysis—Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Prerequisites: 52, and 115 or 171. GER:DB-Math

3 units, Win (Li, J)

MATH 120. Modern Algebra—Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. GER:DB-Math, WIM

3 units, Aut (Li, J), Spr (Cohen, R)

MATH 121. Modern Algebra II—Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120. GER:DB-Math

3 units, Win (White, B)

MATH 131. Partial Differential Equations I—First-order equations, classification of second-order equations. Initial-boundary value problems for heat, wave, and related equations. Separation of variables, eigenvalue problems, Fourier series, existence and uniqueness questions. Prerequisite: 53 or equivalent. GER:DB-Math

3 units, Aut, Win (Iyer, G)

MATH 132. Partial Differential Equations II—Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131. GER:DB-Math

3 units, Spr (Nedelec, L)

MATH 135. Nonlinear Dynamics and Chaos—Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent. GER:DB-Math

3 units, Spr (Iyer, G)

MATH 136. Stochastic Processes—(Same as STATS 219.) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk,

Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. GER:DB-Math
3 units, Aut (Ross, K), Win (Dembo, A)

MATH 138. Celestial Mechanics—Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math
3 units, not given this year

MATH 143. Differential Geometry—Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces. GER:DB-Math
3 units, Win (Schoen, R)

MATH 145. Algebraic Geometry—Real algebraic curves, Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116, and 109 or 120. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math
3 units, Spr (Oprea, D)

MATH 146. Analysis on Manifolds—Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H. GER:DB-Math
3 units, Win (Wieczorek, W)

MATH 147. Differential Topology—Smooth manifolds, transversality, Sards' theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math
3 units, Spr (Wieczorek, W)

MATH 148. Algebraic Topology—Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120. GER:DB-Math
3 units, alternate years, not given this year

MATH 151. Introduction to Probability Theory—Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math
3 units, Win (Liu, T)

MATH 152. Elementary Theory of Numbers—Euclid's algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange's theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms. GER:DB-Math
3 units, not given this year

MATH 154. Introduction to Algebraic Number Theory—Core concepts, including number fields, Dedekind domains, unique factorization of ideals, quadratic reciprocity theorems, and Fermat's last theorem for regular prime exponents. Prerequisites: 120, 121. GER:DB-Math
3 units, not given this year

MATH 155. Topics in Elementary Number Theory—Theory of quadratic forms, including the results of Fermat, Lagrange, Gauss, the recent fifteen theorem, and Dirichlet's class number formula. Topics may include continued fractions and Pell's equation, algebraic and transcendental numbers, quadratic fields, Fermat's theorem in some special cases, and an introduction to elliptic curves. Prerequisites: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity. Recommended: 120, 121.
3 units, Aut (Soundararajan, K)

MATH 156. Group Representations—Group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Applications to geometric group actions and to combinatorics. Prerequisites: linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120). GER:DB-Math
3 units, Spr (Milgram, R)

MATH 161. Set Theory—Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. GER:DB-Math
3 units, Win (Feferman, S)

MATH 171. Fundamental Concepts of Analysis—Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. GER:DB-Math, WIM
3 units, Aut (Schoen, R), Spr (Licata, J)

MATH 174A. Topics in Analysis and Differential Equations with Applications—For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. Topics may include: geometric theory of ODE's with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math
3 units, Win (Katznelson, Y)

MATH 174B. Honors Analysis—Continuation of 174A. Topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green's functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 174A. GER:DB-Math
3 units, not given this year

MATH 175. Elementary Functional Analysis—Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math
3 units, Spr (Simon, L)

MATH 180. Introduction to Financial Mathematics—Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116. GER:DB-Math
3 units, Aut (Toussaint, A)

MATH 197. Senior Honors Thesis
1-6 units, Aut, Win, Spr (Staff)

MATH 199. Independent Work—Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.
1-3 units, Aut, Win, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

MATH 205A. Real Analysis—Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.
3 units, Aut (White, B)

MATH 205B. Real Analysis—Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.
3 units, Win (Vasy, A)

MATH 205C. Real Analysis—Continuation of 205B.
3 units, Spr (Katznelson, Y)

MATH 210A. Modern Algebra—Groups, rings, and fields; introduction to Galois theory. Prerequisite: 120 or equivalent.
3 units, Aut (Milgram, R)

MATH 210B. Modern Algebra—Galois theory. Ideal theory, introduction to algebraic geometry and algebraic number theory. Prerequisite: 210A.
3 units, Win (Brumfiel, G)

MATH 210C. Modern Algebra—Continuation of 210B. Representations of groups and noncommutative algebras, multilinear algebra.
3 units, Spr (Bump, D)

MATH 215A. Complex Analysis, Geometry, and Topology—Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.
3 units, Aut (Li, J)

MATH 215B. Complex Analysis, Geometry, and Topology—Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.
3 units, Win (Carlsson, G)

MATH 215C. Complex Analysis, Geometry, and Topology—Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincare duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.
3 units, Spr (Galatius, S)

MATH 216A,B,C. Introduction to Algebraic Geometry—Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit.
3 units, **A:** *Aut,* **B:** *Win,* **C:** *Spr (Vakil, R)*

MATH 217A. Differential Geometry—Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 173 or equivalent.
3 units, Aut (Schoen, R)

MATH 217B. Differential Geometry—Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.
3 units, Win (Brendle, S)

MATH 220. Partial Differential Equations of Applied Mathematics—(Same as CME 303.) First-order partial differential equations, method of characteristics, weak solutions, conservation laws, hyperbolic equations, separation of variables, Fourier series, Kirchoff's formula, Huygen's principle, and hyperbolic systems. Prerequisite: foundation in multivariable calculus and ordinary differential equations.
3 units, Aut (Nolen, J)

MATH 221. Mathematical Methods of Imaging—Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisite: 220.
3 units, Spr (Papanicolaou, G)

MATH 222. Computational Methods for Fronts, Interfaces, and Waves—High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.
3 units, not given this year

MATH 227. Partial Differential Equations and Diffusion Processes—Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.
3 units, Win (Nolen, J)

MATH 232. Topics in Probability: Geometry and Markov Chains—Dirichlet forms; Nash, Sobolev, and log-Sobolev inequalities; and applications to card shuffling and random walk on graphs. May be repeated for credit.
3 units, not given this year

MATH 234. Large Deviations—(Same as STATS 374.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.
3 units, not given this year

MATH 235. Ergodic Theory and Combinatorial Applications—Classical ergodic theory, with applications to combinatorics, including proofs of Szemeredi's theorem and of some extensions of it. May be repeated for credit. Prerequisite: 205A.
3 units, Win (Katznelson, Y)

MATH 236. Introduction to Stochastic Differential Equations—Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.
3 units, Win (Papanicolaou, G)

MATH 237. Stochastic Equations and Random Media—Topics in stochastic differential equations relevant for the analysis of processes in random environments emphasizing asymptotic methods and estimation methods. Examples from financial mathematics including stochastic volatility models, credit default models, and interest rate models that deal with the whole yield curve. Prerequisite: 236 or equivalent. Recommended: knowledge of financial mathematics.
3 units, Spr (Papanicolaou, G)

MATH 238. Mathematical Finance—(Same as STATS 250.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.
3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance—Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.
3 units, Spr (Toussaint, A)

MATH 240. Topics in Financial Mathematics: Fixed Income Models—Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.
3 units, Spr (Toussaint, A)

MATH 244. Riemann Surfaces—Compact Riemann surfaces and algebraic curves; cohomology of sheaves; Serre duality; Riemann-Roch theorem and application; Jacobians; Abel's theorem. May be repeated for credit.
3 units, Spr (Oprea, D)

MATH 245A. Topics in Algebraic Geometry: Moduli Theory—Intersection theory on the moduli spaces of stable curves, stable maps, and stable vector bundles. May be repeated for credit.
3 units, not given this year

MATH 245B. Topics in Algebraic Geometry: *Dessin d'Enfants*—Grothendieck's theory of *dessin d'enfants,* a study of graphs on surfaces and their connection with the absolute Galois group of the rational numbers. Belyi's theorem, representations of the absolute Galois group as automorphisms of profinite groups, Grothendieck-Teichmuller theory, quadratic differentials, and the combinatorics of moduli spaces of surfaces. May be repeated for credit.
3 units, not given this year

MATH 248. Algebraic Number Theory—Introduction to modular forms and L-functions. May be repeated for credit.
1-3 units, not given this year

MATH 249A. Distribution Questions in Number Theory—Rigorous results and conjectures about the distributions of objects of number theoretic interest such as: the spacings between consecutive prime numbers; the spacings between consecutive zeros of the Riemann zeta-function; the class numbers of imaginary quadratic fields; and the values L-functions. Prerequisites: 205A,B,C, or comparable knowledge of probability and Fourier analysis.
3 units, Aut (Soundararajan, K)

MATH 249B. Topics in Number Theory: Class Field Theory and Central Simple Algebras—Algebraic number theory; the development of class field theory emphasizing the role of central simple algebras. May be repeated for credit.
3 units, Win (Bump, D)

MATH 249C. Topics in Number Theory: Class Field Theory and the Langlands Conjectures
3 units, Spr (Bump, D)

MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations—Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.
3 units, not given this year

MATH 256A. Partial Differential Equations—The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.
3 units, Aut (Vasy, A)

MATH 256B. Partial Differential Equations—Continuation of 256A.
3 units, Win (Iyer, G)

MATH 257A,B,C. Symplectic Geometry and Topology—Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.
3 units, **A:** *not given this year,* **B:** *not given this year,* **C:** *Aut (Ionel, E)*

MATH 258. Topics in Geometric Analysis—May be repeated for credit.
3 units, Win (Mazzeo)

MATH 263A,B. Lie Groups and Lie Algebras—Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent.
3 units, not given this year

MATH 266. Computational Signal Processing and Wavelets—Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.
3 units, not given this year

MATH 269A. Gromov-Witten Invariants—Riemann surfaces and their moduli spaces, Deligne-Mumford compactification, line bundles over Riemann surfaces, Riemann-Roch theorem. J-holomorphic curves in symplectic manifolds, gradient trajectories of the action functional. Elliptic boundary value problems for J-holomorphic curves, index formulas, coherent orientation theory, transversality. Gromov compactness theorem for J-holomorphic curves, symplectic topology via theory of holomorphic curves, Floer homology theory. Applications of holomorphic curves to low dimensional topology. Gromov-Witten invariants, quantum cohomology, and associated algebraic structures. Symplectic field theory and its applications.
3 units, Aut (Milanov, T)

MATH 269B. Fredholm Theory in Polyfolds and Symplectic Field Theory I—Fredholm theory in the new class of spaces called polyfolds, with applications to Gromov-Witten theory and more generally to symplectic field theory. May be repeated for credit.
3 units, Win (Hofer, H)

MATH 269C. Fredholm Theory in Polyfolds and Symplectic Field Theory II
3 units, Spr (Hofer, H)

MATH 270. Geometry and Topology of Complex Manifolds—Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.
3 units, Win (Li, J)

MATH 282A. Low Dimensional Topology—The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmuller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.
3 units, not given this year

MATH 282B. Homotopy Theory—Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.
3 units, Win (Carlsson, G)

MATH 282C. Fiber Bundles and Cobordism—Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit.
3 units, Spr (Cohen, R)

MATH 283. Topics in Algebraic and Geometric Topology—May be repeated for credit.
3 units, Win (Cohen, R)

MATH 286. Topics in Differential Geometry—May be repeated for credit.
3 units, Win (Schoen, R), Spr (White, B)

MATH 290B. Finite Model Theory—(Same as PHIL 350B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.
3 units, not given this year

MATH 292A. Set Theory—(Same as PHIL 352A.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, Aut (Staff)

MATH 292B. Set Theory—(Same as PHIL 352B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, Win (Staff)

MATH 293A. Proof Theory—(Same as PHIL 253A/353A.) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.
3 units, not given this year

MATH 295. Computation and Algorithms in Mathematics—Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.
3 units, not given this year

MATH 299. Mathematics of the Brain—Computational models of neurons and neural networks. Ensembles of membrane proteins as statistical molecular computers; extension of the Hodgkin and Huxley theory. The whole brain as a dynamical symbolic system. Context-sensitive associative memory, working memory, and computational universality. Programmable and learning neurocomputers.
3 units, Spr (Eliashberg, Y)

MATH 355. Graduate Teaching Seminar—Required of and limited to first-year Mathematics graduate students.
1 unit, Win (Simon, L; White, B)

MATH 360. Advanced Reading and Research
1-9 units, Aut, Win, Spr, Sum (Staff)

MATH 361. Research Seminar Participation—Participation in a faculty-led seminar which has no specific course number.
1-3 units, Aut, Win (White, B), Spr (Kerckhoff, S), Sum (Staff)

MATH 380-389. Graduate Seminars—By arrangement. May be repeated for credit.

MATH 380. Seminar in Applied Mathematics
1-3 units, Aut, Win, Spr (Staff)

MATH 381. Seminar in Analysis
1-3 units, Aut, Win, Spr (Staff)

MATH 384. Seminar in Geometry
1-3 units, Aut, Win, Spr (Staff)

MATH 385. Seminar in Topology
1-3 units, Aut, Win, Spr (Staff)

MATH 386. Seminar in Algebra
1-3 units, Aut, Win, Spr (Staff)

MATH 387. Seminar in Number Theory
1-3 units, Aut, Win, Spr (Staff)

MATH 388. Seminar in Probability and Stochastic Processes
1-3 units, Aut, Win, Spr (Staff)

MATH 389. Seminar in Mathematical Biology
1-3 units, Aut, Win, Spr (Staff)

MATH 391. Research Seminar in Logic and the Foundations of Mathematics—(Same as PHIL 391.) Contemporary work. May be repeated a total of three times for credit.
1-3 units, Aut, Win, Spr (Mints, G; Feferman, S)

MATH 395. Classics in Geometry and Topology—Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.
3 units, Win, Spr (Staff)

MATH 396. Graduate Progress—Results and current research of graduate and postdoctoral students. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

MATH 397. Physics for Mathematicians—Topics from physics essential for students studying geometry and topology. Topics may include quantum mechanics, quantum field theory, path integral approach and renormalization, statistical mechanics, and string theory. May be repeated for credit.
1 unit, Aut, Win (Staff)

COGNATE COURSES

PHIL 151/252. First-Order Logic
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic
4 units, Spr (Pauly, M)

PHIL 162/262. Philosophy of Mathematics
4 units, Spr (Feferman, S)

STATS 116. Theory of Probability
3-5 units, Aut (Donoho, D), Spr (Wong, W), Sum (Staff)

STATS 310A. Theory of Probability
2-4 units, Aut (Dembo, A)

STATS 310B. Theory of Probability
2-4 units, Win (Siegmund, D)

STATS 310C. Theory of Probability
2-4 units, Spr (Lai, T)

MEDIEVAL STUDIES

Director: Jennifer Summit

Committee in Charge: Philippe Buc, Hester Gelber, Hans Ulrich Gumbrecht, Robert P. Harrison, Nancy S. Kollmann, Seth Lerer, William Mahrt, Bissera Pentcheva, Jennifer Summit, Rega Wood

Affiliated Faculty: George H. Brown (English), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Nancy S. Kollmann (History), Seth Lerer (English, Comparative Literature), Mark E. Lewis (History), William Mahrt (Music), Kathryn Miller (History), Bissera Pentcheva (Art and Art History, on leave), Orrin W. Robinson (German Studies), Jeffrey Schnapp (French and Italian), Jennifer Summit (English), Rega Wood (Philosophy)

Program Offices: Building 240
Mail Code: 94305-2152
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/dept/medieval/

Courses given in Medieval Studies have the subject code MEDVLST. For a complete list of subject codes, see Appendix.

The Medieval Studies Program is administered through Interdisciplinary Studies in Humanities, but the degree is conferred by the Dean of Undergraduate Studies Advisory Committee on Individually Designed Majors. The committee has approved the program as listed below. Students interested in pursuing a Medieval Studies major or minor should visit the program office in Building 240 and consult the Director of Medieval Studies. The major is normally declared by the beginning of the student's third year.

The major combines interdisciplinary breadth with a disciplinary focus. The interdisciplinary emphasis is provided by MEDVLST 165, Crusades: Interdisciplinary Approaches, by upper-division interdisciplinary colloquia, and by the requirement that students take courses in three different areas. Depth is ensured by the requirement that students take at least four courses in one area. A faculty adviser helps each student choose courses that integrate the requirements of breadth and depth. To that end, the following guidelines are provided.

The student should take a minimum of 60 units of course work from the list of Medieval Studies courses or appropriate alternatives approved by the director, including ten courses as follows:

1. The introductory course, MEDVLST 165, Crusades: Interdisciplinary Approaches.
2. Two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.
3. Four courses in one of the following categories:
   a) Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish
   b) History
   c) Art History, Drama, Music
   d) Humanities, Philosophy, Religious Studies (certain Humanities courses may fulfill requirements within other categories)
4. Two courses in a second category from the above list.
5. One course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their programs of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

Medieval Studies has a Writing in the Major (WIM) requirement. It can be fulfilled in one of three ways:

1. Through a course designated as WIM by a department contributing to the Medieval Studies major.
2. Through a paper in a Medieval Studies course.
3. Through an independent paper with a member of the Medieval Studies faculty.

Check with the program office regarding specific requirements for each of these options. Courses used to satisfy Medieval Studies major requirements must be taken for a grade.

MINOR

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the office of Interdisciplinary Studies in Humanities.

Requirements are as follows:

1. *Language:* in addition to the University foreign language requirement, at least a one quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2b.
2. The minor consists of six courses, which include:
   a) MEDVLST 165, Crusades: Interdisciplinary Approaches (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
   b) an additional five courses dealing directly with the Middle Ages. If the student's major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student's major, selected from two or more of the following categories:
      1) Language and Literature
      2) History
      3) Art History, Drama, Music
      4) Humanities, Philosophy, Religious Studies
      5) From among the Medieval Studies faculty listed above, the student chooses an adviser, who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student's major or another minor.

COURSES

MEDVLST 165. Crusades: Interdisciplinary Approaches—(Same as ENGLISH 103, HISTORY 215, RELIGST 140.) Causes, meanings, meaningfulness, and commemoration of the Christian expeditions against Muslims, pagans, and heretics. Primary and secondary sources.
3-5 units, Spr (Buc, P; Summit, J; Gelber, H)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ECON 228. Institutions and Organizations in Historical Perspective
2-5 units, Aut (Greif, A)

ENGLISH 201. The Bible and Literature
5 units, Spr (Parker, P)

ENGLISH 271B. The Other Chaucer
4-5 units, Spr (Lerer, S)

ENGLISH 301B. Medieval Devotion
5 units, Aut (Summit, J)

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France
4 units, Win (Alduy, C)

GERGEN 50N. Charlemagne's Germany
3-4 units, Aut (Andersson, T)

HISTORY 185G/385G. Coexistence and Conflict: Jews in Premodern Christian and Muslim Lands
4-5 units, Aut (Staff)

HISTORY 212/312. Holy Wars: Medieval Perspectives
4-5 units, Aut (Buc, P)

HISTORY 217B/317B. Land of Three Religions: Medieval Spain
4-5 units, Win (Miller, K)

HISTORY 314. Graduate Core Colloquium in Medieval European History
4-5 units, Win (Miller, K)

HUMNTIES 322. Medieval Seminar—(Same as ENGLISH 370A.)
3-5 units, Win (Steidle, E)

ITALGEN 236E. Purgatorio/Paradiso
4-5 units, Win (Harrison, R; Jacoff, R)

MUSIC 40. Music History to 1600
4 units, Aut (Markham, M)

MUSIC 141/241. Studies in Renaissance Music
3-4 units, Spr (Rodin, J)

MUSIC 221. Topics in the History of Theory
3-5 units, Win (Markham, M)

MUSIC 301A. Analysis of Music: Modal
4 units, Aut (Mahrt, W)

MUSIC 310. Research Seminar in Musicology
3-5 units, Aut (Rodin, J).

PHIL 115/215. Problems in Medieval Philosophy
3-5 units, Spr (Wood, R)

RELIGST 8N. Francis of Assisi: An Exemplary Saint
3 units, Aut (Gelber, H)

RELIGST 201/301. Classical Islamic Law—(Same as LAW 586.)
4 units, Win (Sadeki, B)

RELIGST 222. Literature and Society in Medieval Islam
4 units, Aut (Bashir, S)

RELIGST 223. Studying Islam: History, Methods, Debates
4 units, Win (Bashir, S)

RELIGST 226/326. Philosophy and Kabbalah in Jewish Society During the Middle Ages and Early Modern Period
5 units, Win (Malkiel, D)

RELIGST 227/327. The Qur'ân
5 units, Aut (Sadeki, B)

RELIGST 258. Japanese Buddhist Texts
4 units, Win (Bielefeldt, C)

SPANLIT 157. Introduction to Medieval and Early Modern Iberian Literatures—(Same as PORTLIT 157.)
3-5 units, Aut (Barletta, V)

SPANLIT 216. Other Words: Crypto-Muslims in Early Modern Iberia
3-5 units, Spr (Barletta, V)

SPANLIT 314. Poetic Form and Performance: The Medieval Iberian Lyric
3-5 units, Win (Barletta, V)

MODERN THOUGHT AND LITERATURE

Director: Elisabeth Mudimbe-Boyi
Committee in Charge: Elisabeth Mudimbe-Boyi (Chair), Lanier Anderson, Jean-Pierre Dupuy, Shelley Fisher Fishkin, Gregory Freidin, Hans U. Gumbrecht, Ursula Heise, Sean Hanretta, Andrea A. Lunsford, Liisa Malkki (on leave), Barbaro Martinez-Ruiz, Paula Moya, Helen Stacy
Affiliated Faculty: Lanier Anderson (Philosophy), Shahzad Bashir (Religious Studies), Eamonn Callan (Education), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Anthropology), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Amir Eshel (German Studies), Shelley Fisher Fishkin (English), James Ferguson (Anthropology), Gregory Freidin (Slavic Languages and Literatures), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Comparative Literature), Sean Hanretta (History), Ursula Heise (English), Matthew Kohrman (Anthropology), Joshua Landy (French and Italian), Helen Longino (Philosophy), Andrea A. Lunsford (English), Saikat Majumdar (English), Liisa Malkki (Anthropology, on leave), Barbaro Martinez-Ruiz (Art and Art History), Franco Moretti (English, Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), David Palumbo-Liu (Comparative Literature), Arnold Rampersad (English), Richard Roberts (History, on leave), Ramón Saldívar (English, Comparative Literature), Priya Satia (History), Debra Satz (Philosophy), Londa Schiebinger (History), Stephen Sohn (English), Helen Stacy (Law), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English), Sylvia Yanagisako (Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese)
Program Offices: Building 240
Mail Code: 94305-2152
Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/dept/MTL

Courses given in Modern Thought and Literature have the subject code MTL. For a complete list of subject codes, see Appendix.

The Program in Modern Thought and Literature is administered through the office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal B.A./M.A. Program.

UNDERGRADUATE PROGRAMS

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduates interested in completing a major in this field may do so through the undergraduate major in Interdisciplinary Studies in Humanities. This program is designed for students with a commitment to interdisciplinary study in the humanities. Students may devise majors that incorporate modern literature (since the 18th century), cultural history, and critical theory. Students may also create majors in other interdisciplinary concentrations. For course guidelines, see the *Handbook for the Major in Interdisciplinary Studies in Humanities.* Students wishing to declare the major in Interdisciplinary Studies in Humanities must apply for admission to the Humanities honors program and for graduation with honors in Humanities.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

Each year, one or two undergraduates, who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. A Petition for Admission to the Coterminal Program from the Registrar's Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A, 5 units, or another graduate-level seminar offered by a member of the committee in charge and approved by the student's graduate program adviser.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines. It is designed for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program, such as students interested in anthropological or philosophical approaches to literature and culture, gender studies, ethnic studies, or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literary departments.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1. A two quarter introductory seminar, MTL 334A,B, The Modern Tradition I and II (5 units each, Autumn, Winter) followed by MTL 300, The Modern Thought and Literature Colloquium (1 unit, Spring).
2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.
3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student's academic adviser. Course restrictions noted above in item 2 also apply.
4. *Qualifying Paper:* this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.
5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty.

   Students may not take the University oral examination before completion of the foreign language requirement.
7. *Candidacy:* at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper; demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope

and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.

8. *Annual Review:* the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.
9. *University Oral Examination:* this examination, covering the student's areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
10. *Colloquium on the Dissertation Proposal:* sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.
11. *Dissertation:* the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES

The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature and Humanities. For a description of the Humanities program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Division of Literatures, Cultures, and Languages. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 300. Modern Thought and Literature Colloquium—Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels.
1-3 units, Spr (Boyi, E)

MTL 334A. The Modern Tradition I—(Same as LAW 501.) The development over the modern period of ideas about state regulatory power and legal rationality; recent critiques of those ideas. Focus is on justice, legal interpretation, individual agency and moral choice, equality, punishment, legislation, the nation state, and international society. Readings from Sophocles, Grotius, Kant, Rousseau, Hegel, Montesquieu, Wollstonecraft, Austin, Bentham, Marx, Weber, Arendt, Foucault, Said, Spivak, Butler, Habermas, MacKinnon, Rose, and Kennedy.
5 units, Aut (Stacy, H)

MTL 334B. The Modern Tradition II: Self-Deception in Literature, Film, and Philosophy—(Same as FRENGEN 290E.) Possibilities of cross-fertilization between continental philosophy (such as Sartre) and analytic philosophy (such as Donald Davidson) by reference to the topic of self-deception or bad faith. Literary works by Molière, Benjamin Constant, Dostoevsky, Camus, Sartre, Borges, and contemporary writers; films by Hitchcock, Losey, and Bergman.
3-5 units, Win (Dupuy, J)

MTL 390. Qualifying Paper—Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.
1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar—Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the faculty to supervise it. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 398. Research—Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 399. Reading for Orals—Reading in preparation for the University Oral Examination. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

MUSIC

Emeriti: *(Professors)* John M. Chowning, Albert Cohen, George Houle, William H. Ramsey, Leonard G. Ratner, Leland C. Smith; *(Professors, Performance)* Arthur P. Barnes, Marie Gibson; *(Professor, Research)* Max V. Mathews

Chair: Stephen M. Sano

Professors: Karol Berger, Chris Chafe, Brian Ferneyhough (on leave), Thomas Grey (on leave Autumn), Stephen Hinton, Julius O. Smith (on leave Autumn)

Associate Professors: Mark Applebaum, Jonathan Berger, Heather Hadlock, William P. Mahrt (on leave Winter)

Assistant Professors: Jesse Rodin, Ge Wang (subject to Ph.D.)

Professor (Teaching): George Barth (Piano)

Associate Professor (Teaching): Stephen M. Sano (Director of Choral Studies)

Associate Professor (Performance): Jindong Cai (Director of Orchestral Studies)

Senior Lecturers: Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Stephen Harrison (Violoncello), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

Lecturers: Kumaran Arul (Piano), Talya Berger (Theory), Fredrick Berry (Jazz Ensemble), Frances Blaisdell (Flute), Mark Brandenburg (Clarinet), Marjorie Chauvel (Harp), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), Natasha Daniels (Viola), Anthony Doheny (Violin), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), Melody Holmes-Schaefle (Flute), Robert Hubbard (Oboe), Graeme Jennings (Violin), Joyce Johnson-Hamilton (Trumpet), Christopher Jones (Composition, Theory), Jay Kadis (Audio Recording), McDowell Kenley (Trombone), Josh Levine (Composition), Mary Linduska (Voice), Fernando Lopez-Lezcano (CCRMA), Murray Low (Jazz Piano), Janet Maestre (Flute), Anthony Martin (Baroque Violin), James Matheson (Oboe), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Amy Schneider (Voice), Jerome Simas (Clarinet), Livia Sohn (Violin), Harold Stein (Saxophone), Elaine Thornburgh (Harpsichord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Mark Veregge (Percussion), William L. Verplank (Human Computer Interface Design), Hui (Daisy) You (Guzheng), Timothy Zerlang (University Carillonneur, Piano)

Consulting Professors: Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi-Goldberg (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

Visiting Professors: Thomas Rossing (CCRMA), Izaly Zemtsovsky (Music History)

Artists-in-Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin 1), Scott St. John (Violin 2), Lesley Robertson (Viola), Christopher Costanza (Violincello)

Mellon Fellows: James Kennaway (Music History), Michael Markham (Music History)

Department Offices: Braun Music Center, Room 101
Mail Code: 94305-3076
Phone: (650) 723-3811
Email: musicdept@stanford.edu
Web Site: http://music.stanford.edu/

Courses given in Music have the subject code MUSIC. For a complete list of subject codes, see Appendix.

The Department of Music's aims are to provide specialized training for those who plan careers in music as composers, performers, teachers, and research scholars; and to promote the understanding and enjoyment of music in the University at large through its courses and abundant performance offerings.

Varied opportunities for instrumental and vocal study and performance are available to majors and nonmajors alike. Students wishing to obtain individual instruction, to participate in chamber music, or to play in departmental ensembles should note that auditions are held during registration week in Autumn Quarter. While there may be openings in some private studios and ensembles for qualified students during other quarters, it is to the student's advantage to audition in autumn, as most slots are filled for the entire year.

The department is housed in Braun Music Center, Dinkelspiel Auditorium, and The Knoll, including three concert halls for concert and recital productions, two rehearsal halls, a small chamber hall, and a state-of-the-art, heptagonal listening/research room. Pianos, organs, harpsichords, and a variety of early stringed and wind instruments are available for student use. In addition, advanced students may use fine old stringed instruments and bows from the Harry R. Lange Historical Collection (http://music.stanford.edu/DeptInfo/Langecol.html).

The Music Library (http://www-sul.stanford.edu/depts/music/index.html) contains a comprehensive collection of scores, books, and recordings with an emphasis on Western art music. In addition, the Department of Special Collections holds an invaluable collection of musical manuscripts and first and early editions, and the Archive of Recorded Sound has a superb collection of historical recordings of all types.

The Stanford Center for Computer Research in Music and Acoustics (CCRMA) is a multidisciplinary facility where composers and researchers work together using computer-based technology both as an artistic medium and as a research tool. Areas of ongoing interest at CCRMA include: composition, applications hardware, applications software, synthesis techniques and algorithms, physical modeling, real-time controllers, signal processing, digital recording and editing, psychoacoustics and musical acoustics, music manuscripting by computer, and real-time applications.

The CCRMA community consists of administrative and technical staff, faculty, research associates, graduate research assistants, graduate and undergraduate students, visiting scholars, visiting researchers and composers, and industrial affiliates. Center activities include academic courses, seminars, small interest-group meetings, summer workshops, and colloquia. Concerts of computer music are presented several times each year with an annual outdoor computer-music festival in July.

CCRMA houses studios, computing facilities, and a networked system of software that includes programs and tools for editing, viewing, synthesizing, and analyzing sound. For a detailed and up-to-date description of facilities available, see the CCRMA home page at http://ccrma.stanford.edu/.

The Center for Computer-Assisted Research in the Humanities (CCARH), located in Braun Music Center, conducts research focused on constructing computer databases for music and on creating programs that allow student and staff researchers to access, analyze, print, and electronically perform the music. For more information, see the CCARH home page at http://www.ccarh.org/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Prospective majors are urged to consult the undergraduate student services officer in the department as early as possible in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests. All required courses for the B.A. in Music and in the Music, Science, and Technology specialization must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must also carry a letter grade.

1. Students are required to include the following foundation courses in their programs:
   a) theory: MUSIC 21, 22, 23
   b) history: MUSIC 40, 41, 42, and three from the series 140-148 Writing in the Major (WIM) courses (two of which must be taken as 4-unit WIM courses)
   c) analysis: MUSIC 121 and two from 122A, B, or C
2. Additionally, Music majors must fulfill the following two performance requirements:
   a) instruction in instrumental and/or vocal performance: minimum of five quarters, comprising a minimum of 15 units.
   b) ensemble: five quarters (5 units minimum) of work in one or more of the department's organizations or chamber groups. MUSIC 156, "sic": Improvisation Collective, and MUSIC 157, Mariachi Band, do not satisfy this requirement. MUSIC 181 may count for up to two of the ensemble-unit requirements for the Music major. To fulfill the ensemble requirement, Music majors need to participate at least three quarters in the department's traditional large ensembles (MUSIC 159–167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (171).
3. Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21, 22, 23). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in MUSIC 12 concurrently with the music theory core until they are able to pass. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight reading, and the performance of prepared pieces (consult the department undergraduate adviser for details).
4. Majors must also pass an Ear-Training Proficiency examination, which is one of the requirements to complete MUSIC 23. It may be taken by arrangement, demonstrating a student's ability to hear music accurately and to perform it at sight.

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include substantial work on a major in Music while also fulfilling the University General Education Requirements during the freshman and sophomore years. The schedule also includes foreign language study, which is strongly recommended for all Music majors and especially for those expecting to continue into graduate work in any area of music.

	Quarter and Units		
FIRST YEAR	*A*	*W*	*S*
PWR as assigned	4		4
MUSIC 19 (if needed), 21, 22	(3)	4	4
Individual Instruction and/or Ensemble	1-4	1-4	1-4
Introduction to the Humanities	4-5	4-5	4-5
Choice of Foreign Language, General Education Requirement, or Stanford Introductory Seminar	3-5	3-5	3-5
SECOND YEAR			
MUSIC 23, 40, 41, 42	8	4	4
Individual Instruction and/or Ensemble	1-4	1-4	1-4
General Education Requirement, or Stanford Introductory Seminar	3-5	3-5	3-5
Elective	(3)	(3)	(3)
THIRD AND FOURTH YEARS			
MUSIC 121 and two from 122A, B, or C	4	4	4
Three from MUSIC 140-148	4	4	4
Elective	(4)	(4)	(4)
Senior Year: Concentration Project (if selected)	(4)		

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for those students with a strong interest in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. The program entails a research project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.

1. Students in the program are required to include the following courses in their studies:
   a) theory: 21, 22, 23, 121, 151 (WIM) (4 units each); 150 (3 units); 220A,B,C (4 units each); 250A (4 units)
   b) history: two from 40, 41, 42
   c) applied: individual studies in performance (6 units) or 192A,B; and Ensemble or 192C (5 units)
   d) research project: 220D (4 units)
2. Students in Music, Science, and Technology must also pass the Piano and Ear-Training Proficiency examinations required of Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it. Students minoring in Music or in the Music, Science, and Technology specialization must also pass the Piano and Ear-Training Proficiency examinations required of Music majors.

MUSIC	*Units*
MUSIC 21, 22, 23. Elements of Music	12
MUSIC 40, 41, 42. Music-History Survey	12
Choice of one (WIM):	
MUSIC 140-148; 151. Studies in Music History; Psychophysics	4
Two quarters:	
MUSIC 159-171. Ensemble	2
MUSIC 172-177. Individual Instruction	6
Total	36

MUSIC, SCIENCE, AND TECHNOLOGY	
MUSIC 21, 22, 23. Elements of Music	12
MUSIC 150. Musical Acoustics	3
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians (WIM)	4
MUSIC 220A,B. Fundamentals of Computer-Generated Sound	8
MUSIC 192A,B. Theory and Practice of Audio Recording	6
MUSIC 192C. Session Recording (two quarters, 1 or 2 units/qtr.)	3
Total	36

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentrator registers for an independent project (198, 4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Students wishing to pursue the concentration in performance must demonstrate private-lesson-level proficiency on their instrument. Specific guidelines and information on the concentration tracks are available from the Department of Music office and students are urged to select this option no later than the middle of their junior year in order to complete all of the requirements in a timely manner.

HONORS PROGRAM

Honors in Music is awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain departmental standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, and Oxford. See the Overseas Studies Program section of this bulletin for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the M.A., D.M.A., and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission—Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 11 application deadline. All components of the application are due by December 11. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see http://gradadmissions.stanford.edu/).

Department Examinations—All entering graduate students except those in the M.A./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music, and (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins). Teaching assistant assignments and the funding associated with this portion of a graduate student's financial aid package are determined based upon completion of these exams.

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MASTER OF ARTS

Residence—A minimum of 45 academic units is required for the master's degree in Music.

MUSIC

Students in the doctoral programs who enter directly from the bachelor's level may, upon completing 45 units and advancing to candidacy, be recommended for the M.A. degree. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

MUSIC, SCIENCE, AND TECHNOLOGY

This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students having an undergraduate engineering or science degree, or a degree that includes course work in engineering mathematics. Modifications to the required course work listed below may be proposed on a student's behalf by the student's program adviser.

Required are:

	Units
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians	4
MUSIC 154. Composition and Performance of Instrumental Music with Electronics	3
MUSIC 192A. Foundations of Sound-Recording Technology	3
MUSIC 192B. Advanced Sound-Recording Technology	3
MUSIC 220A. Fundamentals of Computer-Generated Sound	4
MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing	4
MUSIC 220C. Research Seminar in Computer-Generated Music	4
MUSIC 250A. HCI Theory and Practice	4
MUSIC 320. Introduction to Digital Audio Signal Processing	4
MUSIC 420. Signal Processing Models in Musical Acoustics	3
MUSIC 421. Audio Applications of the Fast Fourier Transform	3
Elective	6
Total	45

DOCTORAL PROGRAMS

Residence—The candidate must complete a minimum of 135 academic units (see Residency under the "Graduate Degrees" section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. students, and Ph.D. students in the Computer-Based Theory and Acoustics program, are required to have demonstrated a reading knowledge of one language other than English and the ability to translate into idiomatic English. Ph.D. students in Musicology are required to demonstrate proficiency in German and a similar competence in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study).

Qualifying Examination—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis.

Teaching—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching at half time. Music 280 (given in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be required by the department.

Basic Requirements—Doctoral programs in the Department of Music do not require a master's degree as a prerequisite. All students entering directly from the bachelor's degree level are required to take the following course (which is, however, required of all students in musicology, regardless of entering degree level):

	Units
200. Graduate Proseminar	4

All doctoral candidates must take:

301A,B,C. Music Analysis: Modal, Tonal, and Post-Tonal	12

DOCTOR OF MUSICAL ARTS IN COMPOSITION

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable.

Examinations—A written Special Area examination in the candidate's field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. A public lecture/demonstration is also required during the last quarter of residence. It should be one hour in length, treating aspects of the final project.

Requirements—Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty. The final project in composition is an extended work for instruments, voices, electronic media, or a combination of these. MUSIC 323, Doctoral Seminar in Composition (16 units), is a required course.

DOCTOR OF PHILOSOPHY

The Ph.D. in Music can be pursued in two concentrations: Musicology or Computer-Based Music Theory and Acoustics.

Examinations—

1. *Special Areas:* a written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
2. *Ph.D. Orals:* the University oral examination, taken once the dissertation is substantially underway, is an oral presentation and defense of dissertation research methods and results.

Requirements—Besides those requirements listed above, other requirements by concentration are:

MUSICOLOGY	*Units*
221. Topics in the History of Theory	3-5
300A,B. Seminar in Notation	8
310. Research Seminars in Musicology*	24-40
312A,B. Aesthetics and Criticism of Music	8

---

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

COMPUTER-BASED MUSIC THEORY AND ACOUSTICS	
220A,B,C. Computer-Generated Music Seminars	12
220D. Research in Computer Music	12
320. Introduction to Digital Audio Signal Processing	4

JOINT PH.D. IN MUSIC AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Music and Humanities. For a description of the program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Many Music courses have web pages linked to the Music home page. Courses with web sites at press time are noted in their entries below.

GENERAL

MUSIC 2C. Men, Women, and Opera—An introduction to opera through the lenses of gender and sexuality. The doomed heroines of Italian tragic operas by Verdi and Puccini; the battle of the sexes in Mozart's comedies *The Marriage of Figaro* and *Don Giovanni;* and ambiguous representations of masculinity in serious opera from Handel to Rossini, where heroes were played by high-voiced men and crossdressing women. Literary and historical background; feminist and queer critiques of opera's misogynist plots and stereotypes. Students attend an opera performance. GER:DB-Hum, EC-Gender

3 units, not given this year

MUSIC 3G. Music and Culture in Fin de Siècle Vienna, 1880-1914—Music, literature, art, and cultural politics. The relationship between Viennese modernism and its political background including the slow disintegration of the state, the rise of anti-Semitism, and the idea of degeneration. Sources include musicians such as Mahler, Schoenberg, and Strauss, and their contemporaries such as Freud, Klimt, Kokoschka, and Hofmannsthal.

3 units, Aut (Kennaway, J)

MUSIC 8A. Rock, Sex, and Rebellion—Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER:DB-Hum, EC-AmerCul

3 units, not given this year

MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music—Introduction to Russian culture through classical music and folklore, including sacred, secular, oral, and written music. The variety of Russian sung folklore in its traditional context, and how it is reflected in the music of Russian composers including Glinka, Mussorgsky, Rimsky-Korsakov, Tchaikovsky, Skryabin, Stravinsky, Prokofiev, and Shostakovich. Listening assignments include fieldwork data and video recordings. GER:DB-Hum, EC-GlobalCom

3 units, Win (Zemtsovsky, I)

MUSIC 11N-34N. Stanford Introductory Seminars

MUSIC 11N. A View from the Podium: The Art of Conducting—Stanford Introductory Seminar. Preference to freshmen. How a conductor interprets music, realizes a personal vision through the rehearsal process, and communicates with orchestra and audience. Conducting as based on human communication skills. How to apply these lessons to other fields of endeavor. GER:DB-Hum

3 units, Aut (Cai, J)

MUSIC 11Q. The Allure of Chamber Music—Stanford Introductory Seminar. Preference to sophomores. Why is it that an intimate setting for a small group of independent instruments has engendered some of the most expressive works in the history of music? Class attends chamber music concerts, seeking to comprehend the setting in projecting that meaning. Preparation for each concert includes reading, listening, and discussion of the music to be performed; performer interviews when possible. Written reports on the concerts attended. GER:DB-Hum

3 units, Win (Cohen, A)

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China—Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

MUSIC 14N. Women Making Music—Stanford Introductory Seminar. Preference to freshmen. How queer female performers and fans negotiate issues of personal identity, subjectivity, visibility, and politics through composition, musical style, subcultures, and performance spaces. GER:DB-Hum, EC-Gender

3 units, Spr (Hadlock, H)

MUSIC 15N. The Role of Technology in the Arts—Stanford Introductory Seminar. Preference to freshmen. The aesthetic, sociological, and historical aspects of technology as it relates to the arts. Focus is on cinema, the history of recording, and electronic and computer music. Field trips to galleries, shows, museums. Students develop and complete a project on an aspect of art technology. Examples of past projects include historical, technical, and sociological aspects of hip-hop, rave, interactive art installations, computer games, and performance art. GER:DB-Hum

3 units, Spr (Berger, J)

MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's *Lord of the Rings*—Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart—Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

3 units, Win (Berger, K)

MUSIC 17Q. Perspectives in North American Taiko—Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Spr (Sano, S)

MUSIC 34N. The Work of Art as Noun and Verb—Stanford Introductory Seminar. Preference to freshmen. The nature of aesthetic experience for audience and artist across varied media. Luminous art works of the past (the work of art as noun) underscore major paradigm shifts within the history of each medium. Students create original works of art (the work of art as verb) through exercises including musical composition, choreography, poetry, visual art, and photography. Readings, guest lectures, field trips, class dinner, and student presentations. GER:DB-Hum

4 units, Spr (Applebaum, M)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940—From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul

3 units, Win (Berry, F)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present—Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul

3 units, Spr (Berry, F)

MUSIC 20A. Jazz Theory—Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum

3 units, Aut (Nadel, J)

MUSIC 20B. Advanced Jazz Theory—Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum

3 units, alternate years, not given this year

MUSIC 20C. Jazz Arranging and Composition—Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.

3 units, Win (Nadel, J)

MUSIC 127. Instrumentation and Orchestration—Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum

3 units, Aut (Aquilanti, G)

FOUNDATION FOR B.A. MAJOR

Students with training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 19. Introduction to Music Theory—For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum

3 units, Aut, Spr (Berger, T)

MUSIC 21,22,23. Elements of Music—Melody, harmony, counterpoint, and rhythm are studied through analysis, composition, and exercises in practical musicianship. Emphasis is on tonal theory with components in melody, counterpoint, and harmony. Analytical and practical musicianship skills are taught, with analysis and compositional projects in historical styles. Students with previous training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 21. Elements of Music I—Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Concurrent enrollment in MUSIC 12 (Piano) or demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required. Enrollment limited to 40. Prerequisite: pass a basic musical skills proficiency examination on first day of class; students who do not pass may take MUSIC 19. GER:DB-Hum

4 units, Aut (Aquilanti, G), Win (Berger, T)

MUSIC 22. Elements of Music II—Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: 21 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum

4 units, Win (Aquilanti, G), Spr (Berger, T)

MUSIC 23. Elements of Music III—Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course's final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: 22 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum

4 units, Aut (Ulman, E), Spr (Jones, C)

MUSIC 40, 41, 42. Music History—The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings. Pre- or corequisite: 23. GER:DB-Hum

MUSIC 40. Music History to 1600
4 units, Aut (Markham, M)

MUSIC 41. Music History 1600-1830
4 units, Win (Hadlock, H)

MUSIC 42. Music History Since 1830
4 units, Spr (Grey, T)

MUSIC 121. Analysis of Tonal Music—Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Barth, G)

MUSIC 122A. Eighteenth-Century Counterpoint—Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Rodin, J)

MUSIC 122B. Harmonic Materials of 19th Century—Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Spr (Jones, C)

MUSIC 122C. Introduction to 20th-Century Composition—Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Aut (Applebaum, M)

COMPOSITION

MUSIC 123. Undergraduate Seminar in Composition—Current trends in composition. May be repeated for credit. Prerequisites: Music major; 23 or consent of instructor.
3 units, Win (Applebaum, M)

MUSIC 125. Individual Undergraduate Projects in Composition—May be repeated for credit. Prerequisites: music major, and one quarter of 123.
1-3 units, Aut, Win, Spr (Staff)

MUSIC 323. Doctoral Seminar in Composition—Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.
4 units, Aut (Applebaum, M), Win (Ulman, E)

MUSIC 325. Individual Graduate Projects in Composition—May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY AND LITERATURE

MUSIC 140-145. Seminars in Music History—Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit. Music majors may repeat the same seminar in music history only once for credit towards the major and must turn in different papers the second time. Pre- or corequisite: 23. GER:DB-Hum, WIM

MUSIC 140/240. Studies in Medieval Music
3-4 units, alternate years, not given this year

MUSIC 141/241. Studies in Renaissance Music
3-4 units, Spr (Rodin, J)

MUSIC 142/242. Studies in Baroque Music
3-4 units, alternate years, not given this year

MUSIC 143/243. Studies in Classic Music
3-4 units, alternate years, not given this year

MUSIC 144/244. Studies in Romantic Music
3-4 units, Win (Berger, K)

MUSIC 145/245. Studies in Modern Music
3-4 units, Aut (Barth, G), not given next year

MUSIC 221. Topics in the History of Theory—The intersection of music theory and compositional practice in different eras of Western music history. Primary sources in music theory and issues such as notation, rhythm, mode, dissonance treatment, counterpoint, tonality, form, rhetoric, affect and imitation, expression, linear analysis, 12-tone and set theory, in light of relevant repertoire and modern scholarship.
3-5 units, Win (Markham, M)

MUSIC 310. Research Seminar in Musicology—For graduate students. Topics vary each quarter. May be repeated for credit.
3-5 units, Aut (Rodin, J), Win (Hadlock, H), Spr (Berger, K)

MUSIC 312A,B. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche—For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.
4 units, alternate years, not given this year

MUSIC 324H. Enlightenment Seminar—(Same as HUMNTIES 324.) How 18-century opera and literature reflect changing conceptions of the self, reason, and emotion; the proper basis of social and political authority; natural and supernatural justice; women's nature and status. Texts include: Gluck's *Iphigenia in Tauris;* Mozart's *The Marriage of Figaro* and *Don Giovanni; Manon Lescaut;* and *Les liaisons dangereuses*.
3-5 units, Aut (Hadlock, H)

COMPUTER MUSIC AND APPLICATIONS

MUSIC 120. Auditory Remapping of Bioinformatics—Representation of data related to bioinformatics and medical imaging. Physiological and perceptual perspectives. Representations of complexity in sound and types of auditory display applied to representation of data sets. Term project involving developing tools for sonification and/or applying these tools to a representation problem. Recommended: basic knowledge and interest in music, computer programming, or one of the biological sciences.
1-3 units, not given this year

MUSIC 150. Musical Acoustics—The physics of vibrating systems, waves, and wave motion. Time- and frequency-domain analysis of sound. Room acoustics, reverberation, and spatialization. The acoustics of musical instruments: voice, strings, and winds. Emphasis is on the practical aspects of acoustics in making music. Hands-on and computer-based lab. See http://ccrma.stanford.edu/courses/150/. Prerequisites: music performance/composition experience, basic algebra, calculus, and physics. GER:DB-EngrAppSci
3 units, Win (Rossing, T)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians—Concepts and experiments relevant to the use of sound, especially synthesized, in music. Listening to sound examples. Emphasis is on salience and the importance of various auditory phenomena in music. See http://ccrma.stanford.edu/. Prerequisite: basic knowledge of music. GER:DB-Hum, WIM
4 units, Spr (Berger, J)

MUSIC 154. Composition and Performance of Instrumental Music with Electronics—Aesthetic and analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music.
1-3 units, Spr (Wang, G)

MUSIC 192. Theory and Practice of Audio Recording

MUSIC 192A. Foundations of Sound-Recording Technology—For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; and principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci

3 units, Aut (Kadis, J)

MUSIC 192B. Advanced Sound Recording Technology—Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See http://ccrma.stanford.edu/courses/. Prerequisite: 192A. GER:DB-EngrAppSci

3 units, Win (Kadis, J)

MUSIC 192C. Session Recording—Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A,B.

1-2 units, Aut, Win, Spr (Kadis, J)

MUSIC 220A. Fundamentals of Computer-Generated Sound—Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/.

2-4 units, Aut (Chafe, C; Wang, G)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing—The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See http://ccrma.stanford.edu/. Prerequisite: 220A.

2-4 units, Win (Wang, G)

MUSIC 220C. Research Seminar in Computer-Generated Music—Individual projects in composition, psychoacoustics, or signal processing. See http://ccrma.stanford.edu. May be repeated for credit. Prerequisite: 220B.

2-4 units, Spr (Chafe, C)

MUSIC 220D. Research in Computer-Generated Music—Independent research projects in composition, psychoacoustics, or signal processing. See http://ccrma.stanford.edu/. May be repeated for credit. Prerequisite: 220C.

1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 250A. HCI Theory and Practice—HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See http://ccrma.stanford.edu/.

3-4 units, Aut (Gurevich, M), Win (Staff)

MUSIC 253. Musical Information: An Introduction—The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.

1-4 units, Win (Selfridge-Field, E)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation—Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.

1-4 units, Spr (Selfridge-Field, E)

MUSIC 318. Advanced Acoustics—Current topics. May be repeated for credit.

1-5 units, Win (Rossing, T)

MUSIC 319. Research Seminar on Computational Models of Sound Perception—All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See http://ccrma.stanford.edu/courses/.

1-3 units, Aut, Win, Spr (Slaney, M)

MUSIC 320. Introduction to Digital Audio Signal Processing—Digital signal processing for music and audio research. Topics: complex numbers, sinusoids, spectrum representation, sampling and aliasing, digital filters, frequency response, z transforms, transfer-function analysis, and associated Matlab software. See http://ccrma.stanford.edu/courses/320/.

3-4 units, Aut (Abel, J; Berners, D)

MUSIC 420. Signal Processing Models in Musical Acoustics—Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See http://ccrma.stanford.edu/courses/420/. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton's laws of motion; and CS 106B or equivalent programming in C and C++.

3-4 units, Win (Smith, J)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT)—Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (Smith, J)

MUSIC 422. Perceptual Audio Coding—History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See http://ccrma.stanford.edu/.

3 units, Win (Bosi-Goldberg, M)

MUSIC 423. Signal Processing Research—Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See http://ccrma.stanford.edu/courses/423/.

1-4 units, Win, Spr (Smith, J)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects—Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

PERFORMANCE

GROUP INSTRUCTION

Note—Special fee of $100 per quarter for 5G, 12A, B, C (non-majors); 65A, B; 72, 73, 74, 75, 76, 77.

MUSIC 5G. Introduction to Guzheng—Introduction to Chinese music through learning how to play guzheng, a 21-stringed traditional Chinese instrument. The cultural, social, and historical significance of guzheng. 15 guzheng techniques, how to read Chinese music and guzheng notation, and two simple classic guzheng pieces. (AU)
1 unit, Aut, Win, Spr (You, H)

MUSIC 12A,B,C. Introductory Piano Class—(A=level 1; B=level 2; C=level 3)
1 unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 65A,B. Voice Class I,II—Group (7 students to a section) beginning voice for the non-major (A=level 1; B=level 2). May be repeated for credit.
1 unit, Aut, Win, Spr (Giovannetti, C), Sum (Linduska, M)

MUSIC 65C. Voice Class (Majors and Ensemble Members)—For Music majors and non-majors who are members of departmental choral ensembles. May be repeated for credit.
1 unit, Aut, Win, Spr (Wait, G)

MUSIC 72-77. Small-Group, Intermediate-Level Instruction—Minimum enrollment required. May be repeated for credit.

MUSIC 72A. Intermediate Piano Class—For intermediate students. Prerequisites: 12C or equivalent, audition.
1 unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 72B. Organ Class—For beginning organ students who have keyboard skills.
1 unit, Aut, Win, Spr (Morgan, R)

MUSIC 72C. Harpsichord Class—For beginning harpsichord students who have keyboard skills.
1 unit, Aut, Win, Spr (Thornburgh, E)

MUSIC 72D. Jazz Piano Class—By invitation only; priority to majors and jazz-ensemble participants.
1 unit, Aut, Win, Spr (Low, M)

MUSIC 73. Intermediate Voice Class—For intermediate students. Admission by audition.
1 unit, Aut, Win, Spr (Giovannetti, C)

MUSIC 74C. Classical Guitar Class
1 unit, Aut, Win, Spr (Ferguson, C)

MUSIC 74D. Harp Class
1 unit, Aut, Win, Spr (Chauvel, M)

MUSIC 75B. Renaissance Wind Instruments Class—May be repeated for credit.
1 unit, Aut, Win, Spr (Myers, H)

MUSIC 76. Brass Instruments Class
1 unit, Aut, Win, Spr (Kenley, M)

MUSIC 77. Percussion Class
1 unit, Aut, Win, Spr (Veregge, M)

INDIVIDUAL INSTRUCTION

MUSIC 172/272-177/277. Individual Vocal and Instrumental Instruction—270-level courses are for advanced students. Weekly lessons throughout the academic quarter. Special fee of $200 per quarter for majors and $400 for non-majors (fees remain the same for 1, 2, or 3 units). Prospective students must demonstrate, by audition with the appropriate teacher, a minimum proficiency on instrument. Minimum proficiency requirements for each instrument are posted on the bulletin board outside Braun 102 and at http://music.stanford.edu/Academics/Auditions.html. May be repeated for credit.

MUSIC 172/272. Keyboard Instruments

MUSIC 172A/272A. Piano—Private lessons and group master class weekly.
1-3 units, Aut, Win, Spr (Barth, G; Dahl, L; Schultz, T; Weldy, F; Arul, K)

MUSIC 172B/272B. Organ
1-3 units, Aut, Win, Spr (Morgan, R)

MUSIC 172C/272C. Harpsichord
1-3 units, Aut, Win, Spr (Thornburgh, E)

MUSIC 172D/272D. Jazz Piano—By invitation only; priority to majors and jazz-ensemble participants.
1-3 units, Aut, Win, Spr (Low, M)

MUSIC 172E/272E. Fortepiano
1-3 units, Aut, Win, Spr (Barth, G)

MUSIC 172F/272F. Carillon—May be repeated for credit.
1-3 units, Aut, Win, Spr (Zerlang, T)

MUSIC 173/273. Voice
1-3 units, Aut, Win, Spr (Giovannetti, C; Wait, G; Schneider, A)

MUSIC 174/274. Stringed Instruments

MUSIC 174A/274A. Violin
1-3 units, Aut, Win, Spr (Jennings, G; Harms, D; Nuttall, G; St. John, S; Fong, D; Sohn, L; Doheny, A)

MUSIC 174B/274B. Viola
1-3 units, Aut, Win, Spr (Daniels, N; Robertson, L; Harms, D)

MUSIC 174C/274C. Violoncello
1-3 units, Aut, Win, Spr (Harrison, S; Costanza, C)

MUSIC 174D/274D. Contrabass
1-3 units, Aut, Win, Spr (Moyer, B)

MUSIC 174E/274E. Viola Da Gamba
1-3 units, Aut, Win, Spr (Dornenburg, J)

MUSIC 174F/274F. Classical Guitar
1-3 units, Aut, Win, Spr (Ferguson, C)

MUSIC 174G/274G. Harp
1-3 units, Aut, Win, Spr (Chauvel, M)

MUSIC 174H/274H. Baroque Violin
1-3 units, Aut, Win, Spr (Martin, A)

MUSIC 174I/274I. Early Plucked Strings
1-3 units, Aut, Win, Spr (Staff)

MUSIC 175/275. Woodwind Instruments

MUSIC 175A/275A. Flute
1-3 units, Aut, Win, Spr (Blaisdell, F; Hawley, A; Holmes-Schaefle, M; Maestre, J)

MUSIC 175B/275B. Oboe
1-3 units, Aut (Hubbard, R), Win, Spr (Matheson, J)

MUSIC 175C/275C. Clarinet
1-3 units, Aut, Win, Spr (Brandenburg, M; Simas, J)

MUSIC 175D/275D. Bassoon
1-3 units, Aut, Win, Spr (Olivier, R)

MUSIC 175E/275E. Recorder/Renaissance Wind Instruments
1-3 units, Aut, Win, Spr (Myers, H)

MUSIC 175F/275F. Saxophone
1-3 units, Aut, Win, Spr (Stein, H; Henderson, D)

MUSIC 175G/275G. Baroque Flute
1-3 units, Aut, Win, Spr (Staff)

MUSIC 176/276. Brass Instruments

MUSIC 176A/276A. French Horn
1-3 units, Aut, Win, Spr (Ragent, L)

MUSIC 176B/276B. Trumpet
1-3 units, Aut, Win, Spr (Johnson-Hamilton, J)

MUSIC 176C/276C. Trombone
1-3 units, Aut, Win, Spr (Kenley, M)

MUSIC 176D/276D. Tuba
1-3 units, Aut, Win, Spr (Clements, A)

MUSIC 177/277. Percussion
1-3 units, Aut, Win, Spr (Veregge, M)

PERFORMANCE PRACTICES

MUSIC 126. Introduction to Thoroughbass—The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.
1-3 units, Win (Berger, T)

MUSIC 130. Elementary Conducting

MUSIC 130A. Introduction to Conducting—Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.
3 units, alternate years, not given this year

MUSIC 130B. Elementary Orchestral Conducting—Prerequisites: 127 or previous orchestral performance experience, 130A.
3 units, alternate years, not given this year

MUSIC 130C. Elementary Choral Conducting—Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.
3 units, alternate years, not given this year

MUSIC 169A/269A. Seminar in Performance Practices—Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods.
1-4 units, alternate years, not given this year

MUSIC 181. Advanced Voice Performance—Performance class in a workshop setting. Skills including style, diction, interpretation, and expression in art song, oratorio, and opera literature. Repertoire varies and spans more than one quarter. May be repeated for credit. Prerequisite: private-lesson proficiency in voice or consent of instructor.
1 unit, Aut, Win, Spr (Schneider, A)

MUSIC 182. Diction for Singers—The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.
1 unit, Win (Dahl, L)

MUSIC 183. Art Song Interpretation—For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.

MUSIC 183A. German Art Song Interpretation—Including composers from Beethoven and Schubert to Wolf and Strauss.
1 unit, alternate years, not given this year

MUSIC 183B. French Art Song Interpretation—Composers include Fauré, Debussy, Ravel, and Poulenc.
1 unit, Spr (Dahl, L), alternate years, not given next year

MUSIC 230. Advanced Orchestral Conducting—May be repeated for credit. Prerequisite: 130B.
2-4 units, Aut, Win, Spr (Cai, J)

MUSIC 231. Advanced Choral Conducting—May be repeated for credit. Prerequisite: 130C.
2-4 units, Aut, Win, Spr (Sano, S)

ENSEMBLE

An audition is required for admission to any University musical ensemble; audition schedules are posted during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit. Many Department of Music ensembles tour on a regular basis, usually after Commencement in June.

MUSIC 156. "sic": Improvisation Collective—Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required.
1 unit, Win (Applebaum, M)

MUSIC 157. Introduction to Mariachi Ensemble—Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron). May be repeated for credit.
1 unit, Aut, Win, Spr (Rodriguez, R)

MUSIC 158. Soundwire Ensemble—Stanford's Internet2-based Soundwire Ensemble rehearses with the East Coast Tintinnabulate Ensemble directed by Pauline Oliveros, Rensselaer Polytechnic Institute. Concerts, composition, and improvisation projects using resources available when connecting with remote musicians. State-of-the-art audio and video technology developed by ensemble participants. May be repeated for credit.
2-3 units, Aut (Chafe, C; Wang, G)

MUSIC 159. Early Music Singers—Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.
1 unit, Aut (Mahrt, W), Win (Sargent, J), Spr (Mahrt, W)

MUSIC 160. Stanford Symphony Orchestra—70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.
1 unit, Aut, Win, Spr (Cai, J)

MUSIC 160A. Stanford Philharmonia Orchestra—Prerequisite: audition, one year of 160, or consent of instructor. May be repeated for credit.
1 unit, Aut, Win, Spr (Cai, J)

MUSIC 161. University Bands

MUSIC 161A. Stanford Wind Ensemble—40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.
1 unit, Aut, Win, Spr (Aquilanti, G)

MUSIC 161B. Jazz Orchestra—Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.
1 unit, Aut, Win, Spr (Berry, F)

MUSIC 161C. Red Vest Band—A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men's and women's home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit.
1 unit, Win (Aquilanti, G)

MUSIC 162. Symphonic Chorus—100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.
1 unit, Aut, Win, Spr (Sano, S)

MUSIC 163. Memorial Church Choir—Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.
2 units, Aut, Win, Spr (Wait, G)

MUSIC 165. Chamber Chorale—24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music.
1 unit, Aut, Win, Spr (Sano, S)

MUSIC 167. University Singers—Mixed-repertory chorus, performing choral repertoire from all periods of Western art music and other world cultures.
1 unit, Aut, Win, Spr (Morgan, R)

MUSIC 169. Stanford Taiko—Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only.

1 unit, Aut, Win, Spr (Sano, S; Uyechi, L)

MUSIC 170. Collaborative Piano—Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.

1 unit, Aut (Dahl, L)

MUSIC 171. Chamber Music—Small combinations for strings, winds, and keyboard instruments. Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while taking private lessons. Selected string instrument participants are invited to participate in a chamber orchestra, led by members of the St. Lawrence String Quartet, without conductor. Winter Quarter: chamber orchestra in conjunction with chamber chorale performing choral sacred music of the Baroque period, led by members of the St. Lawrence. All new and returning students are required to audition. May be repeated for credit.

1 unit, Aut, Win, Spr (Staff)

UNDERGRADUATE DIRECTED READING AND RESEARCH

MUSIC 197. Undergraduate Teaching Apprenticeship—Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor.

1-2 units, Aut, Win, Spr (Staff)

MUSIC 198. Concentrations Project—For concentration program participants only. Must be taken in senior year.

4 units, Aut, Win, Spr (Staff)

MUSIC 199. Independent Study—For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE RESEARCH AND SPECIAL STUDIES

MUSIC 200. Graduate Proseminar—Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

4 units, Aut (Berger, K; McBride, J)

MUSIC 269B. Research in Performance Practices—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 280. TA Training Course—Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.

1 unit, Spr (Losness, E; Ruviaro, B)

MUSIC 300. Seminar in Notation—Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

MUSIC 300A. Medieval Notation

4 units, Spr (Mahrt, W)

MUSIC 300B. Renaissance Notation

4 units, alternate years, not given this year

MUSIC 301. Analysis of Music—Current trends, issues, and methods.

MUSIC 301A. Analysis of Music: Modal

4 units, Aut (Mahrt, W)

MUSIC 301B. Analysis of Music: Tonal

4 units, Win (Grey, T)

MUSIC 301C. Analysis of Music: Post-Tonal—Current analytical trends, issues, and methods.

4 units, Spr (Ulman, E)

MUSIC 302. Research in Musicology—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 321. Readings in Music Theory—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 322. Directed Readings in German Language—Students create reading lists relevant to their studies in Music in conjunction with instructor. May be repeated for credit.

1 unit, Win (Staff)

MUSIC 341. Ph.D Dissertation—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 399. D.M.A. Final Project—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

HUMNTIES 321. Classical Seminar—(Same as CLASSGEN 321.)

3-5 units, Aut (Nightingale, A)

HUMNTIES 322. Medieval Seminar—(Same as ENGLISH 370A.)

3-5 units, Win (Steidle, E)

HUMNTIES 323. Renaissance/Early Modern Seminar

3-5 units, Spr (Brooks, H)

PHILOSOPHY

Emeriti (Professors): Fred Dretske, Solomon Feferman, Georg Kreisel, Julius Moravcsik, David S. Nivison, Patrick Suppes, James O. Urmson; *(Courtesy Professor):* Denis Phillips
Chair: Kenneth Taylor
Director of Graduate Study: Helen Longino
Director of Undergraduate Study: Chris Bobonich
Professors: Chris Bobonich, Michael Bratman (on leave), Joshua Cohen, John Etchemendy, Dagfinn Føllesdal (Winter), Michael Friedman, Helen Longino, Grigori Mints, John Perry (on leave Autumn), Debra Satz, Brian Skyrms (Spring), Kenneth Taylor, Johan van Benthem (Spring), Thomas Wasow, Allen Wood
Associate Professors: Lanier Anderson, Mark Crimmins (on leave Winter, Spring), Graciela De Pierris (on leave), Krista Lawlor
Assistant Professors: Alexis Burgess, Nadeem Hussain, Agnieszka Jaworska, Marc Pauly, Tamar Schapiro
Professor (Research): Rega Wood (on leave Autumn)
Courtesy Professors: Reviel Netz, Josiah Ober
Lecturers: Katherine Dunlop, Thomas Ryckman
Acting Assistant Professor: David Hills

Department Offices: Building 90
Mail Code: 94305-2155
Department Phone: (650)723-2547
Email: philosophy@csli.stanford.edu
Web Site: http://www-philosophy.stanford.edu

Courses given in Philosophy have the subject code PHIL. For a complete list of subject codes, see Appendix.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people's experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical enquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

There are two ways of majoring in philosophy: the General Program and the Special Program in the History and Philosophy of Science. A student completing either of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM

1. Course requirements, minimum 55 units:
   a) preparation for the major: an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
   b) the core, 24 additional Philosophy units, as follows:
      1) Logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
      2) Philosophy of science: any course from 60, 61, 156, 163-168
      3) Moral and political philosophy: one from 170-173
      4) Metaphysics and epistemology: one from 180-189
      5) History of philosophy: 100 and 102 are required of each major
   c) one undergraduate philosophy seminar from the 194 series.
   d) electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.
2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 55-unit requirement.
3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a field of study in History and Philosophy of Science. This field of study is declared on Axess. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a) one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) 60 or 61
   c) 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or *The Dualist* (196, 197, 198) may not be counted in the requirement. No more than

10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the requirement.

7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

SPECIAL OPTION IN PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an adviser in Philosophy, and students' schedules and overall course of study must be approved in writing by the adviser, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements.

1. Core requirements for the major in Philosophy, including
   a) an introductory course
   b) PHIL 80
   c) the core distribution requirements listed in section 1b of the general program above
2. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.
4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.
6. Capstone seminar in the PHIL 194 series.
7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student's choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature, either through the Philosophy honors program, or through Interdisciplinary Studies in the Humanities.

The following rules also apply to the special option:

1. Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of 'satisfactory' or 'credit' may be counted toward the unit requirement.
2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
3. Courses offered in other departments may be counted toward requirements 3, 5. and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

MINOR

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

1. IHUM 23A and B (The Fate of Reason) may be counted for a maximum of 5 units.
2. At least 10 units must be from courses numbered 100 or above.
3. The 30 units must include one of:
   a) a history of philosophy course numbered 100 or above
   b) two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)
4. One course from any two of the following three areas (PHIL):
   a) Philosophy of science and logic: 60, 61, 156, 163-168; 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) Moral and political philosophy: 20, 30, 170-172
   c) Metaphysics and epistemology: 10, 80, 180-189
5. Units for tutorials, directed reading, and affiliated courses may not be counted.
6. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
7. No more than 6 units completed with grades of 'satisfactory' or 'credit' count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student's record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least 'A-' in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of this essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. The honors essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of 'A-' or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement.

The Department of Philosophy cooperates with the honors component of the "Interdisciplinary Studies in Humanities" as described in that section of this bulletin.

JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS

1. Philosophy (PHIL) courses:
   a) 80
   b) 16 units, including at least one Philosophy course from each of the following areas:
      1) Logic and philosophy of science: 50 (formerly 57), 60, 61, 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
      2) Ethics and value theory: 170-173
      3) Epistemology, metaphysics, and philosophy of language: 180-189
      4) History of philosophy: 100-103
2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

General Major Requirements—Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

Special Concentration—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of 'satisfactory' count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor's degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar's Office. The application deadline for Philosophy is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Prospective graduate students should see http://gradadmissions.stanford.edu for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

MASTER OF ARTS

University requirements for the M.A. are discussed in the "Graduate Degrees" section of this bulletin.

Four programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Admissions—All prospective master's students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is March 28 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the March 28 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master's program and have their advisers' approval, in writing, of program proposals. The master's program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements—Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master's thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of 'B-' or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a 'B-' in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. *Undergraduate Core:* students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master's adviser upon arrival or earlier):
   a) Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
   b) Philosophy of science: any course from 60, 61, 163-167
   c) Moral and political philosophy: one from 170-173
   d) Metaphysics and epistemology: one from 80, 180-189
   e) History of philosophy: two history of philosophy courses numbered 100 or above
2. *Graduate Core:* students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.

   a) Logic and semantics
   b) Philosophy of science and history of science
   c) Ethics, value theory, and moral and political philosophy
   d) Metaphysics, epistemology, and philosophy of language
   e) History of philosophy

   Each master's candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
   a) Philosophy of language
   b) Logic
   c) Philosophy of mind
   d) Metaphysics and epistemology
   e) Philosophy of science

   At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.
2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
   a) Psychology
   b) Linguistics
   c) Computer Science
   d) Education

Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the "General Program" subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.
2. Syntactic theory and generative grammar: 384 and LINGUIST 231.
3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.
4. An approved graduate-level course in mathematical linguistics or automata theory.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees" section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy proficiency requirements must be passed with a letter grade of 'B-' or better (no satisfactory/no credit).

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. *Course requirements*, to be completed during the first two years:
   a) four core graduate courses and seminars in philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
   b) three of the four items listed below:
      1) three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
      2) PHIL 151 (formerly 160A)
   c) PHIL 150 (formerly 159) or the equivalent
   d) A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.
2. *Teaching Assistance:* a minimum of five quarters of teaching assistance, usually during the second and third years. As part of the training for being a teaching assistant, Ph.D. students are required to take PHIL 239 during Spring Quarter of their first and second years.
3. *Candidacy:* to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student's second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department's judgment, the student can complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student's work during the first six quarters and the student's success in fulfilling course requirements.
4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student's adviser.
5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.
6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.
   a) *Dissertation Proposal:* by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
   b) *Departmental Oral:* during Autumn Quarter of the fourth year, students take an oral examination, called the "Departmental Oral," based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit. In cases where such an exam is

deemed inappropriate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Study, signed by the student and the members of the reading committee.
   c) *Fourth-Year Colloquium:* no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student's dissertation research.
   d) *University Oral Exam:* Ph.D. students must submit a completed draft of the dissertation to the three-person reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.

SPECIAL GRADUATE PROGRAMS

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student's first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student's goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from the following:

1. One additional item from the items listed above in requirement 1(a)
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57)

If a student's special program involves substantial course work outside of philosophy, the student may, with the approval of the adviser, petition the department to reduce requirement l(d), the Philosophy unit requirement for the first two years. Normally this requirement is not reduced below 32 units.

PH.D. MINOR

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
   a) 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1) Logic
      2) Philosophy of science
      3) Ethics, value, theory, and moral and political philosophy
      4) Metaphysics, epistemology, and philosophy of language
      5) History of philosophy
   c) Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

INTERDEPARTMENTAL PROGRAMS

GRADUATE PROGRAM IN HUMANITIES

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the "Interdisciplinary Studies in Humanities" section of this bulletin.

GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

Prerequisites—Admitted students should have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in that section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

Courses of Study—The program consists of two years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Six philosophy courses:
   a) two of the following: 360, 370, 380, 381
   b) one course in the history of modern philosophy
   c) two quarters of graduate logic courses from among 350A, 351A, 352A, 353A
   d) at least one additional seminar in the general area of symbolic systems: such as, 354, 358
2. Five cognitive science and computer science courses:
   a) at least two courses in cognitive psychology
   b) two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
   a) graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
   b) one graduate course in computational linguistics, typically LINGUIST 239
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student's proposed dissertation project.

The requirements for the third year are the same as for other third-year graduate students in philosophy: a dissertation proposal, creation of a dissertation committee, and at least three approved graduate courses and seminars. The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

The requirement for the fourth year is the same as for the other graduate students in philosophy: a department oral on an initial draft of part of the dissertation, a fourth year colloquium, and a University oral exam when the dissertation is essentially complete.

JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers (with a strong specialization in ancient languages and philology) or classicists (with a concentration in philosophy).

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students—These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exception: if the student has already taken two courses in modern philosophy, there is no need to take a course in modern philosophy to satisfy proficiency requirement 1.a.2.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the "History and Philosophy of Science and Technology" section of this bulletin.

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS

A limited amount of fellowship support is available for Ph.D. students in philosophy. Students request aid by checking the appropriate box on the application form. Details of this program may be obtained from the department. Note that a condition of financial aid may be teaching assistance that goes beyond the Ph.D. requirement.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. See the quarterly *Time Schedule* for revised listings.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Philosophy department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in Philosophy are advised to consider satisfying their IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 23A,B. The Fate of Reason—Two quarter sequence. The historical fate of Socrates' proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER:IHUM-2,3

IHUM 23A: *4 units, Win (Hussain, N)*
IHUM 23B: *4 units, Spr (Longino, H)*

INTRODUCTORY

These courses acquaint the student with some of the most important problems, positions, and methods in Philosophy. Some are designed to give general preparation for further work in Philosophy. Some apply the philosopher's approach to particular problems and subjects encountered in other areas of study.

PHIL 10. God, Self, and World: An Introduction to Philosophy—Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER:DB-Hum

5 units, Win (Perry, J)

PHIL 12N. Mortal Questions—Stanford Introductory Seminar. Preference to freshmen. Should people fear death? Why does life sometimes seem meaningless? Can people be good or bad by accident? What makes a sexual act perverse? When is warfare immoral? Focus is on Thomas Nagel's *Mortal Questions* as an introduction to contemporary analytic philosophy. GER:DB-Hum

3 units, Aut (Burgess, A)

PHIL 14N. Belief—Stanford Introductory Seminar. Preference to freshmen. Is there anything wrong with believing something without evidence? Is it possible? The nature and ethics of belief, and belief's relation to evidence and truth. How much control do believers have over their belief? GER:DB-Hum

3 units, Win (Lawlor, K)

PHIL 16N. Values and Objectivity—Stanford Introductory Seminar. Preference to freshmen. What is meant by the objectivity of beliefs and attitudes? Can the commitment of science to truthfulness be free of particular perspectives and subjective influence? Is objectivity a matter of degree relative to the kind of inquiry undertaken? Readings from philosophy of science, moral philosophy, and philosophy of mind. GER:DB-Hum

3 units, Aut (Ryckman, T)

PHIL 17N. The Logic of Social Justice—Stanford Introductory Seminar. Preference to freshmen. Social choice theory studies the aggregation of individual preferences into a group preference, including voting procedures, auctions, and fair division procedures. Normative properties such as fairness, non-manipulability, and optimality. Central impossibility results. Student projects analyze real-life social mechanisms such as the Stanford housing draw, or voting systems of different countries. Recommended: AP mathematics or equivalent. GER:DB-SocSci

3 units, Win (Pauly, M)

PHIL 18N. Well-Being—Stanford Introductory Seminar. What makes a life good for the person who lives it? Does well-being depend solely on the quality of the person's experiences? Are things good because people desire them or do people desire them because they are good? Are there objective criteria for assessing the goodness of a life? Readings from historical and contemporary sources. GER:DB-Hum

3 units, Spr (Jaworska, A)

PHIL 20. Introduction to Moral Philosophy—(Same as ETHICSOC 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas

5 units, Spr (Schapiro, T)

PHIL 30. Introduction to Political Philosophy—(Same as ETHICSOC 30, POLISCI 3.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas

5 units, Aut (Hussain, N)

PHIL 50. Introductory Logic—Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments.

4 units, Aut (Morton Galdos, J), Spr (Potochnik, A)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerbend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum

5 units, Aut (Longino, H)

PHIL 61. Science, Religion, and the Birth of Modern Philosophy—(Same as HPS 61.) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum

5 units, Win (Friedman, M)

PHIL 77. Methodology in Ethics: Translating Theory into Practice—(Same as ETHICSOC 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.

4 units, Spr (Staff)

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas

4 units, Win (Jaworska, A)

PHIL 80. Mind, Matter, and Meaning—Central topics in philosophy emphasizing development of analytical writing skills. What are human beings? Are human beings free? How do human minds and bodies interact? What does it all mean? Prerequisite: introductory philosophy course. GER:DB-Hum, WIM

5 units, Win (Lawlor, K), Spr (Burgess, A)

PHIL 81. Philosophy and Literature—Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

HISTORY OF PHILOSOPHY

100-103 are surveys of important figures and movements in Western philosophy. Other courses cover particular periods, movements, and figures in the history of philosophy. Prospective Philosophy majors should take as many as possible during the sophomore year.

PHIL 100. Greek Philosophy—Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:DB-Hum

4 units, Aut (Bobonich, C)

PHIL 101. Medieval Religious Philosophy—(Same as RELIGST 167.) Focus is on God, world, and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and *The Book of the World* as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, and semiotics. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham. GER:DB-Hum

4 units, not given this year

PHIL 102. Modern Philosophy, Descartes to Kant—Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum

4 units, Aut (Dunlop, K)

PHIL 103. 19th-Century Philosophy—Focus is on ethics and the philosophy of history. Works include Mill's *Utilitarianism*, Hegel's *The Philosophy of World History*, Marx's *Economic and Philosophic Manuscripts*, Kierkegaard's *The Sickness Unto Death*, and Nietzsche's *On the Genealogy of Morals*. GER:DB-Hum

4 units, Spr (Staff)

PHIL 113/213. Hellenistic Philosophy—(Graduate students register for 213.) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology.

4 units, Aut (Bobonich, C)

PHIL 115/215. Foundations of Medieval Psychology—(Graduate students register for 215.) Western medieval faculty psychology. Focus on Albert the Great and changes in his views on sensation and understanding and the faculties of sense, imagination, and intellect. Other texts by Albert's student Thomas Aquinas and his predecessors, Richard Rufus and Roger Bacon. Changes in the comparative influence exerted by Avicenna and Averroes on the Western tradition of Aristotelian psychology. May be repeated for credit. See http://rrp.stanford.edu/Albert/news. GER:DB-Hum

3-5 units, Spr (Wood, R)

PHIL 117/217. Descartes—(Graduate students register for 217; formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum

4 units, not given this year

PHIL 118/218. British Empiricism, 1660s-1730s—(Graduate students register for 218.) GER:DB-Hum

4 units, not given this year

PHIL 119/219. Rationalists—(Graduate students register for 219; formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphazing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum

4 units, not given this year

PHIL 122/222. Hume—(Graduate students register for 222; formerly 120/220.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum

4 units, not given this year

PHIL 125/225. Kant's First Critique—(Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum

4 units, Aut (Anderson, L)

PHIL 126B/226B. Kant's Ethical Theory—(Graduate students register for 226B.) Kant's moral philosophy based primarily on the *Groundwork of Metaphysics of Morals*, *Critique of Practical Reason*, and *The Metaphysics of Morals*. GER:DB-Hum

4 units, not given this year

PHIL 127A/227A. Kant's Ethical Theory—(Graduate students register for 227A.) Readings include *Groundwork for the Metaphysics of Morals* and *The Metaphysics of Morals*. GER:DB-Hum

4 units, not given this year

PHIL 127B/227B. Kant's Anthropology and Philosophy of History—(Graduate students register for 227B.) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include *Idea for a Universal History*, *Conjectural Beginning of Human History*, and *Anthropology from a Pragmatic Point of View*. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race. GER:DB-Hum

4 units, Spr (Wood, A)

PHIL 128/228. Fichte's Ethics—(Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience. GER:DB-Hum

4 units, not given this year (Wood, A)

PHIL 130/230. Hegel's Elements of Philosophy of Right—(Graduate students register for 230; formerly 122/222.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum

4 units, Aut (Wood, A)

PHIL 134/234. Phenomenology and Intersubjectivity—(Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum

4 units, not given this year

PHIL 135/235. Existentialism—(Graduate students register for 235; formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum

4 units, Spr (Anderson, L)

PHIL 136/236. History of Analytic Philosophy—(Graduate students register for 236; formerly 147/247.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum

4 units, not given this year

PHIL 137/237. Wittgenstein—(Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his *Philosophical Investigations*. Emphasis is on the relationship between the novel arguments of the *Investigations* and its ways of writing up the results of philosophical questioning. GER:DB-Hum

4 units, not given this year

PHIL 143/243. Quine—(Graduate students register for 243; formerly 183/283.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum

4 units, not given this year

LOGIC AND PHILOSOPHY OF SCIENCE

PHIL 150/250. Basic Concepts in Mathematical Logic—(Graduate students register for 250; formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math

4 units, Aut (Wasow, T)

PHIL 150X. Basic Concepts in Mathematical Logic—Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.

2 units, Aut (Wasow, T)

PHIL 151/251. First-Order Logic—(Graduate students register for 251; formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math

4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic—(Graduate students register for 252.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math

4 units, Spr (Pauly, M)

PHIL 153. Feminist Theories and Methods Across the Disciplines—(Same as FEMST 103/203.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from one of the disciplines in question. GER:EC-Gender

4-5 units, Win (Longino, H)

PHIL 154/254. Modal Logic—(Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151. GER:DB-Math

4 units, Aut (Mints, G)

PHIL 155. General Interest Topics in Mathematical Logic—Propositional calculus, Sudoku puzzles, problem P=NP. Possible worlds, modal logic. Incompleteness, provability logic. Logic of knowledge and belief. May be repeated for credit.
4 units, Spr (Mints, G)

PHIL 156. Popper, Kuhn, and Lakatos—(Same as EDUC 214.) These 20th-century philosophers of science raise fundamental issues dealing with the nature of scientific progress: the rationality of change of scientific belief, science versus non-science, role of induction in science, truth or verisimilitude as regulative ideals. Their impact in the social sciences and applied areas such as educational research. (SSPEP) GER:DB-Hum
3 units, not given this year

PHIL 157/257. Topics in Philosophy of Logic—(Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, not given this year

PHIL 162/262. Philosophy of Mathematics—(Graduate students register for 262; same as MATH 161.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: 151 or consent of instructor.
4 units, Spr (Feferman, S)

PHIL 163/263. Significant Figures in Philosophy of Science—(Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard. GER:DB-Hum
4 units, not given this year

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence—(Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical underdetermination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum
4 units, Aut (Ryckman, T)

PHIL 165/265. Philosophy of Physics—(Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum
4 units, Spr (Ryckman, T)

PHIL 166/266. Probability—(Graduate students register for 266.)
4 units, Spr (Skyrms, B; Diaconis, P)

PHIL 167A/267A. Philosophy of Biology—(Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:DB-Hum
4 units, not given this year

PHIL 167B/267B. Philosophy, Biology, and Behavior—(Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor.
4 units, Win (Longino, H)

PHIL 168/268. Theories of Truth—(Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.
4 units, not given this year

ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

PHIL 170/270. Ethical Theory—(Graduate students register for 270; same as ETHICSOC 170.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas
4 units, Aut (Jaworska, A)

PHIL 171. Justice—(Same as ETHICSOC 171, IPS 208, PHIL 271, POLISCI 136S, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
5 units, Aut (Cohen, J)

PHIL 172/272. History of Modern Ethics—(Graduate students register for 272.) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price.
4 units, Win (Schapiro, T)

PHIL 173A. Aesthetics: Metaphor across the Arts—What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary accounts of metaphor as a verbal device. Arguments for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER:DB-Hum
4 units, Spr (Hills, D)

PHIL 173B/273B. Metaethics—(Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course. GER:DB-Hum
4 units, Spr (Hussain, N)

PHIL 174/274. Freedom and the Practical Standpoint—(Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum
4 units, not given this year

PHIL 175/275. Philosophy of Law—(Graduate students register for 275.) Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: four courses in Philosophy including 80. GER:DB-Hum
4 units, not given this year

PHIL 176/276. Political Philosophy: The Social Contract Tradition—(Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum
4 units, not given this year

PHIL 177. Philosophical Issues Concerning Race and Racism—(Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul
4 units, Win (Satz, D)

PHIL 178. Ethics in Society Honors Seminar—(Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
3 units, Win (Reich, R)

PHIL 179/279. Semantics: Theories of Meaning—(Graduate students register for 279.) What makes ambiguity, polysemy, and context sensitivity needed in natural languages; why this is not the case with formal languages. How to develop semantics for context-sensitive structures.
4 units, not given this year

PHIL 179S/279S. Moral Psychology, Reasons for Action, and Moral Theory—(Graduate students register for 279S.) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.
4 units, not given this year

EPISTEMOLOGY, METAPHYSICS, PHILOSOPHY OF MIND, AND PHILOSOPHY OF LANGUAGE

PHIL 180/280. Metaphysics—Traditional philosophical riddles involving the notion of existence including: the ontological argument for the existence of God; the problem of intuitively true, negative existential statements; the sorites paradox; and the question of why there is anything at all. Conceptual tools philosophers use to address these questions, from nonexistent objects to possible worlds. Meta-metaphysics.
4 units, Aut (Burgess, A)

PHIL 181/281. Philosophy of Language—(Graduate students register for 281.) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.
4 units, Win (Føllesdal, D)

PHIL 182. Truth—Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor.
4 units, Aut (Hills, D)

PHIL 184/284. Theory of Knowledge—(Graduate students register for 284.) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum
4 units, Spr (Lawlor, K)

PHIL 184F/284F. Feminist Theories of Knowledge—(Graduate students register for 284F; same as FEMST 166.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER:DB-Hum, EC-Gender
4 units, not given this year

PHIL 185. Memory—Structure, content, functional role, and epistemic authority of human memories. Sources include philosophical and psychological literature from different schools and historical periods.
4 units, Win (Hills, D)

PHIL 186/286. Philosophy of Mind—(Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.
4 units, Win (Perry, J)

PHIL 187/287. Philosophy of Action—(Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum
4 units, not given this year

PHIL 188. Personal Identity—People seem to remain the same despite the changes they undergo during their lives. Why? The answer can influence one's beliefs about whether people are essentially bodies or minds, and whether one's own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. GER:DB-Hum
4 units, not given this year

PHIL 190. Introduction to Cognitive Science—(Same as LINGUIST 144, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Davies, T)

PHIL 193W. Nietzsche, Doestoevsky, and Sartre—(Same as HUMNTIES 193W.) Literary works in which philosophical ideas and issues are put forward, such as prose poems, novels, and plays. Ideas and issues and the dramatic or narrative structures through which they are presented. Texts include: Nietzsche, *Thus Spoke Zarathustra*; Dostoevsky, *The Brothers Karamazov*; and Sartre, *Nausea* and *No Exit*.
4 units, Aut (Wood, A)

PHIL 194A. Empiricism and the Philosophy of Mind—Priority to majors. 20th-century analytic and early modern philosophy of mind and epistemology. Main text is Wilfrid Sellars's *Empiricism and the Philosophy of Mind*; source materials and commentary. Enrollment limited to 12.
4 units, Aut (Dunlop, K)

PHIL 194B. The Ethics of Belief—Priority to majors. Are beliefs subject to moral evaluation? Can it be right or wrong to believe or disbelieve something? Are people morally required to believe only that for which there is sufficient evidence; or can the good consequences of believing something justify the belief, irrespective of the evidence? Contemporary and historical sources. Enrollment limited to 12.
4 units, Win (Wood, A)

PHIL 194E. Undergraduate Seminar: Ethical Antitheory—May be repeated for credit.
4 units, Win (Hills, D)

PHIL 195A. Unity of Science—Primarily for seniors.
4 units, Spr (Potochnik, A)

PHIL 195B. Donor Seminar: Practical Reasoning—Primarily for seniors. Relationships among action, deliberation, reasons, and rationality. On what basis do people decide what to do? What norms or rules structure reasoning? What constitutes rationality?
4 units, Aut (Morton Galdos, J)

PHIL 196. Tutorial, Senior Year
5 units, Aut, Win, Spr, Sum (Staff)

PHIL 197. Individual Work, Undergraduate—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 198. *The Dualist*—Weekly meeting of the editorial board of *The Dualist*, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)
1 unit, Aut, Win, Spr (Angelides, A)

PHIL 199. Seminar for Prospective Honors Students—Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for honors project. May be repeated for credit.
2 units, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

PHIL 224. Kant's Philosophy of Physical Science—Kant's *Metaphysical Foundations of Natural Science* (1786), published between the first (1781) and second (1787) editions of the *Critique of Pure Reason*, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant's thought. Prerequisite: acquaintance with either Kant's theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.
4 units, Win (Friedman, M)

PHIL 233. Husserl—Husserl's phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.
4 units, not given this year

PHIL 239. Teaching Methods in Philosophy—For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.
1-4 units, Aut (Potochnik, A)

PHIL 240. Individual Work for Graduate Students—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 241. Dissertation Development Seminar—Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.
2-3 units, Sum (Staff)

PHIL 242. The Philosophical and Educational Thought of John Dewey—(Same as EDUC 304.) Dewey's pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including *Democracy and Education*; and his call for a revolution in philosophy in *Reconstruction in Philosophy*. (SSPEP)
4 units, not given this year

PHIL 248. Medieval Latin Paleography—The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle's *Ethics* preserved in a Florentine manuscript.
3-5 units, not given this year

PHIL 258. Minds and Machines—Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel's incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389.
4 units, not given this year

PHIL 312. Aristotle's Psychology—*De Anima* and parts of *Parva Naturalia*.
4 units, Win (Bobonich, C)

PHIL 318. Aristotle's *Ethics*—Topics in Aristotle's ethical theory and related parts of his psychology.
4 units, not given this year

PHIL 322. Hume—Hume's theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.
4 units, not given this year

PHIL 323. Kant's Criticism of Metaphysics—Motivations and strategies of Kant's criticisms of traditional metaphysics in the *Critique of Pure Reason*. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant's analytic/synthetic distinction, focusing on its place in the rejection of metaphysics and in arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first *Critique*, or consent of instructor.
4 units, not given this year

PHIL 332. Nietzsche—Preference to doctoral students. Nietzsche's later works emphasizing *The Gay Science*, *Beyond Good and Evil*, and *On the Genealogy of Morals*. The shape of Nietzsche's philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.
4 units, not given this year

PHIL 335. Topics in Aesthetics—May be repeated for credit.
4 units, not given this year

PHIL 350A. Model Theory—Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150,151, or equivalent.
3 units, not given this year

PHIL 350B. Finite Model Theory—(Same as MATH 290B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.
3 units, not given this year

PHIL 351A. Recursion Theory—Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel's incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.
3 units, not given this year

PHIL 351B. Constructive Mathematics—Effective and non-effective proofs. Background from constructive logic and computability. Elementary constructive analysis, recursive analysis. Constructive models. Foundational issues. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a calculus class.
3 units, not given this year

PHIL 352A,B. Set Theory—(Same as MATH 292A,B) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, **A:** *Aut,* **B:** *Win (Tupailo, S)*

PHIL 353A. Proof Theory—(Same as MATH 293A.) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.
3 units, Aut (Mints, G)

PHIL 353B. Higher-Order Logic—Second-order and general higher-order logic. Expressive power and failure of classical theorems such as axiomatizability, compactness, and Loewenheim-Skolem. Different systems of higher-order logic, including type theory. Proof theory and completeness over general models. History of type theory as an alternative foundation of mathematics. Applications in computer science and linguistics. Prerequisite: 151. Recommended: 152.
3 units, Aut (Pauly, M)

PHIL 354. Topics in Logic—Readings on uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs, uniformity results. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a 100-level MATH course.
3 units, Win (Mints, G)

PHIL 355. Logic and Social Choice—Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference versus judgment aggregation, role of language in social choice, and metatheory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.
4 units, not given this year

PHIL 356. Applications of Modal Logic—Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.
3 units, not given this year

PHIL 358. Rational Agency and Intelligent Interaction—(Same as CS 222.) For advanced undergraduates, and M.S. and beginning Ph.D. students. Logic-based methods for knowledge representation, information change, and games in artificial intelligence and philosophy. Topics: knowledge, certainty, and belief; time and action; belief dynamics; preference and social choice; games; and desire and intention. Prerequisite: propositional and first-order logic. Recommended: modal logic; game theory.
3 units, Spr (Shoham, Y; vanBenthem, J)

PHIL 359. Advanced Modal Logic—Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.
4 units, Spr (vanBenthem, J)

PHIL 360. Core Seminar in Philosophy of Science—Limited to first- and second-year Philosophy Ph.D. students.
4 units, alternate years, not given this year

PHIL 365. Seminar in Philosophy of Science: Structural Realism—This recent version of scientific realism and its differences with standard realism and antirealism. Historical antecedents in Hertz, Poincaré, Russell, Eddington, and Weyl.
4 units, not given this year

PHIL 366. Evolution and Communication
4 units, Spr (Skyrms, B)

PHIL 370. Core Seminar in Ethics—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, Spr (Schapiro, T)

PHIL 372. Problems in Kantian Ethics—May be repeated for credit.
4 units, not given this year

PHIL 372C. Graduate Seminar: Global Justice—(Same as POLISCI 432.) Applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.
5 units, not given this year

PHIL 372D. Graduate Seminar: John Rawls's Political Philosophy—(Same as POLISCI 332.) Leading ideas in *A Theory of Justice, Political Liberalism*, and *The Law of Peoples*.
5 units, Win (Cohen, J)

PHIL 373. Moral Psychology: The Concept of Inclination—The weight placed by Kantian and rationalist moral theories on the distinction between inclination and reason. The concept of inclination as that which inclines but does not determine how people act. How are inclinations related to the people who hold them? Are they expressions of values, or more like internal weather? What is their nature? What does it mean to act from inclination? Are actions on inclination unchosen or just badly chosen? Historical and contemporary sources.
4 units, Aut (Schapiro, T)

PHIL 374. Caring and Practical Reasoning—What is it to care about something; how is caring related to desiring, emotions, and having policies; what is the relationship between caring and the will; why do people care about things; can attention to caring help explain the phenomenon of silencing reasons? Readings from contemporary literature, including Frankfurt, Watson, Bratman, Scanlon, Williams, Helm, and Kolodny. May be repeated for credit.
4 units, Spr (Jaworska, A)

PHIL 374C. Democracy and the Constitution—(Same as POLISCI 434.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery.
5 units, not given this year

PHIL 376. Agency and Personal Identity—How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.
4 units, not given this year

PHIL 377. Topics in Democratic Theory—(Same as POLISCI 333.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
3-5 units, not given this year

PHIL 378. Problems in Medical Ethics—Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer's patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.
4 units, not given this year

PHIL 379. Graduate Seminar in Metaethics—Theories about the meaning of ethical terms and the content of ethical judgements. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.
4 units, Aut (Hussain, N)

PHIL 380. Core Seminar in Metaphysics and Epistemology—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, Aut (Lawlor, K)

PHIL 381. Core Seminar in Philosophy of Language—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, alternate years, not given this year

PHIL 382. Seminar on Reference—Philosophical issues concerning the relationship between linguistic expressions and the objects to which they refer. Is it possible to get one unified theory of reference for different kinds of referring expressions such as proper names, pronouns, demonstratives, and other kinds of indexicals? Unsolved problems and desiderata for a theory of reference?
4 units, Win (Føllesdal, D; Taylor, K)

PHIL 383. Philosophy of Mind Seminar—May be repeated for credit.
4 units, Win (Taylor, K)

PHIL 384. Seminar in Metaphysics and Epistemology—May be repeated for credit.
4 units, Spr (Perry, J)

PHIL 385. Philosophy of Language Seminar: Foundations of Non-factualism—How could a meaningful, declarative sentence fail to say anything true or false? Focus is on Huw Price's *Facts and the Function of Truth*.
4 units, Win (Burgess, A)

PHIL 386B. Subjectivity—Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.
4 units, not given this year

PHIL 386C. Subjectivity—Continuation of 386B.
4 units, not given this year

PHIL 387. Shared Agency—Contemporary work. May be repeated for credit.
4 units, not given this year

PHIL 387S. Practical Reasons and Practical Reasoning—Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.
4 units, not given this year

PHIL 388. Normativity—May be repeated for credit.
4 units, not given this year

PHIL 391. Research Seminar in Logic and the Foundations of Mathematics—(Same as MATH 391.) Contemporary work. May be repeated a total of three times for credit.
1-3 units, Aut, Win, Spr (Mints, G; Feferman, S)

PHIL 450. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 470. Proseminar in Moral Psychology—Restricted to Philosophy doctoral students. May be repeated for credit.
4 units, not given this year

PHIL 500. Advanced Ph.D. Proseminar—Presentation of dissertation work in progress by seminar participants. May be repeated for credit.
1 unit, Aut, Win, Spr (Anderson, L; Taylor, K)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CLASSGEN 22N. Technologies of Civilization: Writing, Number, and Money
4-5 units, Spr (Netz, R)

CLASSGEN 94. Ethics of Pleasure
3-5 units, Spr (Peponi, A)

CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek
4-5 units, Win (Nightingale, A)

CLASSGEN 237. Augustine on the Body—(Same as COMPLIT 337.)
4-5 units, Spr (Nightingale, A)

CLASSGRK 113/213. Advanced Greek: Palaeography
3-5 units, Spr (Netz, R)

CLASSHIS 101. The Greeks
4-5 units, Win (Ober, J; Krotscheck, U)

CLASSHIS 250A,B. Greek Political Economy I,II—(Same as POLISCI 332R.)
4-5 units, **A:** *Win,* **B:** *Spr (Manning, J; Ober, J)*

ETHICSOC 179M. Libertarianism and Its Critics
4 units, Spr (Staff)

HPS 154. What is Science? Explaining Nature from Pythagoras to Popper
3-5 units, Aut (McCaskey, J)

LAW 206. Core Legal Concepts: Thinking Like a Lawyer—(Same as GSBGEN 382.)
3 units, Aut (Kelman, M; Kramer, L)

MATH 161. Set Theory
3 units, Win (Feferman, S)

POLISCI 136R. Introduction to Global Justice—(Same as INTNLREL 136R.)
5 units, Spr (Staff)

POLISCI 331S. Politics and Collective Action—(Same as IPS 206A, PUBLPOL 204A.)
4 units, Win (Satz, D)

PHYSICS

Emeriti: (Professors) Alexander I. Fetter,* Stanley S. Hanna, William A. Little, David M. Ritson, H. Alan Schwettman,* Robert V. Wagoner,* Mason R. Yearian; *(Professors, Research)* Todd I. Smith,* John P. Turneaure; *(Professors, Courtesy)* Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC)

Chair: Patricia Burchat

Director of Graduate Study: Sarah Church

Director of Undergraduate Study: Roger W. Romani

Professors: Roger Blandford, Phil Bucksbaum, Patricia Burchat, Blas Cabrera, Steven Chu (on leave), Savas G. Dimopoulos, Sebastian Doniach, Giorgio Gratta, Shamit Kachru, Steven Kahn, Renata E. Kallosh, Aharon Kapitulnik, Mark Kasevich, Steven A. Kivelson, Robert B. Laughlin, Andrei D. Linde, Peter F. Michelson, Douglas D. Osheroff, Vahé Petrosian, Roger W. Romani, Zhi-Xun Shen, Stephen Shenker, Eva Silverstein, Leonard Susskind, Stanley G. Wojcicki, Shoucheng Zhang

Associate Professors: Tom Abel, Sarah Church, Kathryn Moler

Assistant Professors: Steve Allen, Stefan Funk, David Goldhaber-Gordon, Hari Manoharan, Risa Wechsler

Professors (Research): John A. Lipa, Phillip H. Scherrer

Courtesy Professor: Richard N. Zare

Lecturer: Rick Pam

Consulting Professors: Ralph Devoe, Gerald Fisher, Alan Title

Visiting Professor: Douglas Gough

Web Site: http://www.stanford.edu/dept/physics

Courses in Physics have the subject code PHYSICS. For a complete list of subject codes, see Appendix.

The Russell H. Varian Laboratory of Physics, the new Physics and Astrophysics Building, the nearby W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, sub-wavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the new Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The Stanford Linear Accelerator Center (SLAC) is just a few miles from the Varian Laboratory. SLAC is a high-energy physics lab with a two-mile-long linear accelerator that can accelerate electrons and positrons up to 50 GeV, and produce highly polarized electron beams. The PEP-II asymmetric-energy electron-positron storage ring is used to study CP violation in the B meson system. The Stanford Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site. Construction of the world's first x-ray free electron laser, called the Linac Coherent Light Source, is underway at SLAC. The facility is expected to be operational in 2009.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the "Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes" section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, a new interdisciplinary biological sciences, medicine, and bioengineering laboratory.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the Stanford Linear Accelerator Center (SLAC), provides a focus for theoretical, observational, and instrumental research programs, including the Gamma Ray Large Area Space Telescope (GLAST) and the Large Synoptic Survey Telescope (LSST). Stanford is a member of the Hobby-Eberly Telescope Consortium, operating an innovative 9.2 meter-equivalent telescope at the McDonald Observatory in Texas. The CDMS (cryogenic dark matter search) experiment is operated in an underground laboratory on the Stanford campus and in the Soudan mine in Minnesota. Stanford is taking a lead role in the EXO-200 double-beta decay experiment that is expected to start taking data in 2008 at a deep underground site in southern New Mexico. These are research opportunities for students in this growing interdisciplinary field.

The Stanford Institute for Theoretical Physics is devoted to the investigation of the basic structure of matter (string theory, M-theory, quantum cosmology, condensed matter physics).

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate Physics Laboratories offer facilities for increasingly complex individual work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, theoretical particle physics, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biological Sciences. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology accelerator design, and photon science.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by Tuesday, December 11 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

ENTRY-LEVEL SEQUENCES

The Department of Physics offers three-year, entry-level physics sequences, the PHYSICS 20, 40, and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in the biological sciences. Such students with AP Physics credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory series provide a depth and emphasis on problem solving that is of significant value in biological research, which today involves considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wishing a stronger background in physics, the department offers the

PHYSICS 40 and 60 series. Either of these satisfies the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

BACHELOR OF SCIENCE

A calculus-based entry-level series is required, either PHYSICS 61, 63, 64, 65, 67, or 41, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics. This material is incorporated into the PHYSICS 60 series beginning in 2005-06. Students taking the PHYSICS 60 series in 2005-06 or after do not take PHYSICS 70; instead, they must take one advanced Physics elective (100-level or higher). In addition, the following more advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131; one additional Mathematics course numbered 100 or higher, or PHYSICS 112. MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests: PHYSICS 152, 153A,B, 160, 161, 172, 204 and EE 268. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science such as CS 106. Mathematics and Physics courses taken to satisfy the department's major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also advised to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year.

To help in deciding which introductory sequence is most suitable, students considering a major in Physics may contact the undergraduate program coordinator (elva@stanford.edu) to arrange an advising appointment. Although it is possible to complete the Physics major in three years, students who contemplate starting the major during sophomore year should make an advising appointment to map out their schedule. Students with significant advanced preparation in physic beyond AP Physics C or A-levels should consult with Professor Romani before the start of classes to determine appropriate placement.

For advanced placement advice, see http://registrar.stanford.edu/students/academics/adv_place.htm.

Undergraduates are offered help with physics problems in the Physics Tutoring Center, which is staffed Monday through Friday.

REQUIRED COURSES FOR MAJORS

For sample schedules illustrating how to complete the Physics major, see http://physics.stanford.edu/academics/undergrad.html.

INTRODUCTORY SEQUENCE

Students must complete either the 40 or 60 series as follows:

40 Series:	*Qtr. and Units*	
PHYSICS 41. Mechanics	W	4
PHYSICS 43. Electricity and Magnetism	S	4
PHYSICS 44. Electricity and Magnetism Lab	S	1
PHYSICS 45. Light and Heat	A	4
PHYSICS 46. Light and Heat Lab	A	1
PHYSICS 67. Introduction to Laboratory Physics (recommended for prospective majors in place of 44)	S	2
PHYSICS 70. Foundations of Modern Physics	A	4
60 Series:		
PHYSICS 61. Mechanics and Special Relativity	A	4
PHYSICS 63. Electricity, Magnetism and Waves	W	4
PHYSICS 64. Electromagnetism Lab	W	1
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	S	4
PHYSICS 67. Introduction to Laboratory Physics	S	2
and		
MATH 51, 52, 53. Linear Algebra, Multivariable Calculus, and Ordinary Differential Equations	A,W,S	15
PHYSICS 59. Current Research Topics (recommended)*	A	1

INTERMEDIATE SEQUENCE

PHYSICS 105. Intermediate Laboratory I: Analog Electronics	A	3
PHYSICS 107. Intermediate Laboratory II: Exp. Techniques (WIM)	W	4
PHYSICS 108. Intermediate Laboratory III: Project	W or S	3
PHYSICS 110. Intermediate Mechanics	S	4
PHYSICS 112. Math Methods of Physics (recommended)**	W	4
PHYSICS 113. Computational Physics (recommended)*	S	4
PHYSICS 120,121. Intermediate Electricity and Magnetism	W,S	8
and MATH 131. Partial Differential Equations	A,W	3

ADVANCED SEQUENCE

PHYSICS 130,131. Quantum Mechanics	A,W	8
PHYSICS 134. Advanced Topics in Quantum Mechanics*	S	4
PHYSICS 170,171. Statistical Mechanics	A,W	8
and one advanced Mathematics elective (100 level or higher) *or* PHYSICS 112		
One advanced Physics elective (100 level or higher): required only for students who are not required to take PHYSICS 70		

---

* These courses are not required, but 113 and 134 are recommended for students who intend to complete a Ph.D. in Physics.

** Those wishing to do physics theory in graduate school may wish to take a collection of courses in the Department of Mathematics rather than or in addition to PHYSICS 112.

CONCENTRATIONS IN PHYSICS

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future graduate studies in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

A. APPLIED PHYSICS (Hari Manoharan)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

Solid State:

PHYSICS 172. Solid State Physics
APPPHYS 218. Scattering Physics
APPPHYS 270. Magnetism and Long Range Order in Solids
MATSCI 195. Waves and Diffraction in Solids

Biophysics:

APPPHYS 192. Introductory Biophysics

Lasers:

EE 268. Introduction to Modern Optics
EE 231. Introduction to Lasers
EE 232. Laser Dynamics

Lab Methods:

APPPHYS 207, 208. Laboratory Electronics, Analog and Digital
APPPHYS 304. Lasers Laboratory
APPPHYS 305. Nonlinear Optics Laboratory

B. ASTROPHYSICS (Roger Romani, Sarah Church)

Requirements:

PHYSICS 100. Introduction to Observational and Laboratory Astronomy
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Plus one elective from below or an honors thesis:

PHYSICS 211. Continuum Mechanics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 312. Basic Plasma Physics; prerequisites are PHYSICS 210 and 220)

C. BIOPHYSICS (David Goldhaber-Gordon)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

APPPHYS 192/292. Introductory Biophysics
BIOC 202. Metabolic Biochemistry
BIOPHYS 228. Computational Structure Biology
BIOSCI 141. Biostatistics
BIOSCI 132/232. Advanced Imaging Lab In Biophysics
BIOSCI 135/HUMBIO 182. Biological Clocks
BIOSCI 211. Biophysics of Sensory Transduction
BIOSCI 217. Neuronal Biophysics
CS 273.Algorithms for Structure and Motion In Biology

It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biological Sciences.

D. GEOPHYSICS (Simon Klemperer, Geophysics)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

GEOPHYS 102. Geosphere
GEOPHYS 112. Exploring Geosciences with MATLAB
GEOPHYS 140. Introduction to Remote Sensing
GEOPHYS 150. General Geophysics and Physics of the Earth
GEOPHYS 180. Geophysical Inverse Problems
GEOPHYS 182. Reflection Seismology
GEOPHYS 190. Near-Surface Geophysics
GEOPHYS 262. Rock Physics
GEOPHYS 288. Crustal Deformation

E. THEORETICAL PHYSICS (Andrei Linde)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

PHYSICS 153A,B. Introduction to String Theory
PHYSICS 204. Advanced Seminar in Theoretical Physics
PHYSICS 212. Statistical Mechanics
PHYSICS 232. Special Topics in Quantum Mechanics
PHYSICS 252. Introduction to High Energy Physics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 330,331,332. Quantum Field Theory
PHYSICS 351,352. Elementary Particle Physics
PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
PHYSICS 364. Advanced Gravitation

Notes to students taking this concentration:

1. No more than one of the courses should be taken for CR/NC.
2. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.
3. Students may attend 330 after taking 130, 131. Prior study of special topics in quantum mechanics (134, 232) may be helpful.

INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program (STEP), is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 94-105. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Professor Rachel Lotan, director of the STEP Coterminal Teaching Program in the School of Education (rlotan@stanford.edu).

CORE PHYSICS COURSES:

Mechanics:	Units
PHYSICS 41. Mechanics	
or PHYSICS 61. Mechanics and Special Relativity	4
Heat:	
PHYSICS 45. Light and Heat	
PHYSICS 46. Light and Heat Lab	
or	
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	
PHYSICS 67. Introduction to Laboratory Physics	5-6
Electricity and Magnetism:	
PHYSICS 43. Electricity and Magnetism	
PHYSICS 67. Introduction to Laboratory Physics	
or	
PHYSICS 63. Electricity, Magnetism, and Waves	
PHYSICS 64. Electricity and Magnetism Lab	
and	
PHYSICS 105. Analog Electronics (Lab)	8-9
Wave Motion:	
PHYSICS 107 Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis (WIM)	4
Modern Physics (for students who take 40 series):	
PHYSICS 70. Foundations of Modern Physics	4
Applications:	
PHYSICS 59. Current Research Topics	1
Mathematics (Physics departmental requirement):	
MATH 51,52,53. Linear Algebra, Multivariable Calculus, and Ordinary Differential Equations	
and a course in Statistics (choose one):	
STATS 110. Statistical Methods in Engineering and the Physical Sciences	
STATS 116. Theory of Probability	
STATS 141. Biostatistics	
STATS 166. Computational Biology	
STATS 191. Introduction to Applied Statistics	20
Total	46-48

ADDITIONAL SCIENCE BREADTH COURSES

Life Sciences:	
BIOSCI 41. Genetics, Biochemistry, and Molecular Biology	
BIOSCI 42. Cell Biology and Animal Physiology	
BIOSCI 43. Plant Biology, Evolution and Ecology	
or	
HUMBIO 2A,B, 3A,B, 4A,B	15
Chemistry:	
CHEM 31A and B, or 31X. Chemical Principles	
CHEM 33. Structure and Reactivity	8
Geosciences:	
EARTHSYS 10. Introduction to Earth Systems	
PHYSICS 15. The Nature of the Universe	
or PHYSICS 16. Cosmic Horizon	
or PHYSICS 17. Black Holes	8
General Issues of Science:	
STS 101. Science, Technology, and Contemporary Society	
EDUC 180. Directed Reading in History of Science	
ENGR 103. Public Speaking and Presentation Development	9-12

CONCENTRATION AND DEPTH COURSES

3 courses (100 level or above) in a single area of concentration	9-15
Total units for general science	49-58
Total units for the Physical Science program	94-105

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at http://ed.stanford.edu/suse/programs-degrees/program-co-terminal-step.html. *Note:* the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biological Sciences, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

MINORS

A minor is offered in either Physics or Astronomy. Students who take the 20 or 40 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 series level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of 'C' or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, typically the beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

MINOR IN PHYSICS

An undergraduate minor in Physics requires a minimum of 27 units with the following course work:

Non-Technical—For students whose majors do not require the PHYSICS 40 or 60 series:

	Units
PHYSICS 21, 22, 23, 24, 25, and 26	12
Any combination of Physics courses totaling 15 units or greater	15
Total	27

Technical—For students whose majors require the PHYSICS 40 or 60 series:

	Units
PHYSICS 41, 43/44, 45/46 and PHYSICS 70	18
or	
PHYSICS 61, 63/64, 65/67	15
at least three PHYSICS courses numbered 100 or above	9-12
Total	27-30

MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

Non-Technical—For students whose majors do not require the PHYSICS 40 series:

	Units
PHYSICS 21, 23, 25/26	10
PHYSICS 50 or 100 (Observatory Lab)	3-4
Choose two courses from the following:	
PHYSICS 15, 16, 17	6
Total	19-20 (9-10 in addition to the 20 series)

Technical—For students whose majors require the PHYSICS 40 series:

	Units
PHYSICS 41, 43, 45/46	13
PHYSICS 70	4
PHYSICS 100 (Observatory Lab)	4
Choose two courses from the following:	
PHYSICS 160,* 161,* EE 106*	6
Total	27 (14 in addition to the 40 series)

---

* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, EE 106). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also strongly encouraged to take the electricity and magnetism/optics lab of the appropriate Physics series (24, 44) for 1 additional unit.

To be accepted to the minor program, the student must obtain an adviser from the faculty in the Astronomy Course Program.

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with honors as follows:

1. Students must submit an Honors Program Proposal form to the undergraduate program coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics undergraduate office and must be submitted by November 1 of the academic year in which the student plans to graduate.
2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. The work done in the honors program may not be used as a substitute for regular required courses.
3. A written report and a presentation of the work at its completion are required for honors. By mid-May, the honors candidate is required to present the project at the department's honors presentations. This event is publicized and open to the general public. The expectation is that the student's adviser, second reader, and all other honors candidates attend.
4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student's honors adviser and the second reader for the written thesis. This decision is based on the quality of the student's honors work and other work in physics.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the "Graduate Degrees" section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor's degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) in courses 210 or 211, 212, 220, 221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, plus 290 and 294 and at least one quarter from each of two subject areas (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 212, 220, 221, 230, 231, 290, 294. A grade point average (GPA) of at least 3.0 (B) is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 116, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January following the student's arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

PH.D. MINOR

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

TEACHING CREDENTIALS

For information on teaching credentials, consult the "School of Education" section of this bulletin or address an inquiry to the Credential Administrator, Office of Academic Services, Cubberley Building, School of Education. Also see the earlier section on the Individually Designed Major program in Teaching Physical Science.

COURSES

There are four series of beginning courses. One course from the teen series (15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46) is for students of engineering, chemistry, geology, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

100	undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

00	laboratory
10,20,30	general courses
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

UNDERGRADUATE

WIM indicates that the course satisfies the Writing in the Major requirements.

PHYSICS 15. The Nature of the Universe—The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of the Milky Way galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER:DB-NatSci

3 units Aut (Romani, R), Sum (Staff)

PHYSICS 16. Cosmic Horizons—The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology, and the fate of the cosmos. GER:DB-NatSci

3 units, Win (Linde, A)

PHYSICS 17. Black Holes—Newton's and Einstein's theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER:DB-NatSci

3 units, Spr (Abel, T)

PHYSICS 18. Revolution in Concepts of the Cosmos—The evolution of concepts of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. Enrollment limited to 20.

1 unit, not given this year

PHYSICS 19. How Things Work: An Introduction to Physics—The principles of physics through familiar objects and phenomena, including airplanes, engines, refrigerators, lightning, radio, TV, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER:DB-NatSci

3 units, Aut (Funk, S)

PHYSICS 21. Mechanics and Heat—For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Prerequisite: high school algebra and trigonometry; calculus not required. GER:DB-NatSci

3 units, Aut (Linde, A)

PHYSICS 21S. Mechanics and Heat with Laboratory—Equivalent to 21 and 22. GER:DB-NatSci

4 units, Sum (Fisher, G)

PHYSICS 22. Mechanics and Heat Laboratory—Pre- or corequisite: 21.

1 unit, Aut (Linde, A)

PHYSICS 23. Electricity and Optics—Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER:DB-NatSci

3 units, Win (Wojcicki, S)

PHYSICS 24. Electricity and Optics Laboratory—Focus is on electrodynamics circuits. Pre- or corequisite: 23.

1 unit, Win (Wojcicki, S)

PHYSICS 25. Modern Physics—Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER:DB-NatSci

3 units, Spr (Burchat, P)

PHYSICS 25S. Modern Physics with Laboratory—Equivalent to 25 and 26. GER:DB-NatSci

4 units, Sum (Fisher, G)

PHYSICS 26. Modern Physics Laboratory—Pre- or corequisite: 25.

1 unit, Spr (Burchat, P)

PHYSICS 28. Mechanics, Heat, and Electricity—For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: high school algebra and trigonometry. GER:DB-NatSci

6 units, Sum (Fisher, G)

PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics—Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER:DB-NatSci

6 units, Sum (Fisher, G)

PHYSICS 41. Mechanics—Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER:DB-NatSci

4 units, Win (Susskind, L)

PHYSICS 41N. Mechanics: Insights, Applications, and Advances—Stanford Introductory Seminar. Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41, or advanced placement.

1 unit, Win (Abel, T)

PHYSICS 43. Electricity and Magnetism—Electrostatics, Coulomb's law, electric fields and fluxes, electric potential, properties of conductors, Gauss's law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday's law, Ampere's law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell's equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 or equivialent, and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER:DB-NatSci
4 units, Spr (Osheroff, D)

PHYSICS 43N. Understanding Electromagnetic Phenomena—Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.
1 unit, Spr (Drell, P)

PHYSICS 44. Electricity and Magnetism Lab—Pre- or corequisite: 43.
1 unit, Spr (Osheroff, D)

PHYSICS 45. Light and Heat—Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: 41 or equivalent, and MATH 19 or 41, or consent of instructor. GER:DB-NatSci
4 units, Aut (Gratta, G), Sum (Staff)

PHYSICS 46. Light and Heat Laboratory—Pre- or corequisite: 45.
1 unit, Aut (Gratta, G), Sum (Staff)

PHYSICS 50. Astronomy Laboratory and Observational Astronomy—Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER:DB-NatSci
3 units, Aut (Church, S), Sum (Staff)

PHYSICS 59. Current Research Topics—Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.
1 unit, Aut (Wechsler, R)

PHYSICS 61,63,65. Advanced Freshman Physics—For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequisite; for: 61: MATH 51; for 63: MATH 52; for 65: MATH 53. GER:DB-NatSci

PHYSICS 61. Mechanics and Special Relativity
4 units, Aut (Blandford, R)

PHYSICS 63. Electricity, Magnetism and Wave
4 units, Win (Allen, S)

PHYSICS 65. Thermodynamics and Foundations of Modern Physics
4 units, Spr (Fetter, A)

PHYSICS 64. Advanced Electromagnetism Laboratory—Experimental work in mechanics, electricity and magnetism. Corequisite 63.
1 unit, Win (Allen, S)

PHYSICS 67. Introduction to Laboratory Physics—Methods of experimental design, data collection and analysis, statistics, and curve fitting in a laboratory setting. Experiments drawn from electronics, optics, heat, and particle physics. Intended as preparation for PHYSICS 105, 107, 108. Lecture plus laboratory format. Required for 60 series Physics majors; recommended for 40 series students who intend to major in Physics. Corequisite: 65 or 43.
2 units, Spr (Staff)

PHYSICS 70. Foundations of Modern Physics—Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER:DB-NatSci
4 units, Aut (Kasevich, M)

PHYSICS 83N. Physics in the 21st Century—Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why the sun shines. Cosmology and inflation. GER:DB-NatSci
3 units, Win (Dimopoulos, S)

PHYSICS 84Q. The Rise of Machines—Stanford Introductory Seminar. Preference to sophomores majoring in the physical sciences and engineering. Key experiments in the history of particle physics and astrophysics. Evolution and innovation in detector and accelerator technologies that enabled these experiments. The fundamental structure and interactions of matter.
3 units, Spr (Schindler, R)

PHYSICS 87N. The Physics of One: Nanoscale Science and Technology—Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high-school physics. GER:DB-NatSci
3 units, Win (Manoharan, H)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy—For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of college physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER:DB-NatSci
4 units, Spr (Church, S)

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics—Analog electronics including Ohm's law, passive circuits and transistor and op amp circuits, emphasizing practical circuit design skills to prepare undergraduates for laboratory research. Short design project. Minimal use of math and physics, no electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 or 63.
3 units, Aut (Pam, R)

PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis—Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 or 60 series, and 70 and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM
4 units, Win (Kasevich, M)

PHYSICS 108. Intermediate Physics Laboratory III: Project—Small student groups plan, design, build, and carry out a single experimental project in low-temperature physics. Prerequisites 105, 107.
3 units, Win (Osheroff, D), Spr (Kapitulnik, A)

PHYSICS 110. Intermediate Mechanics—Lagrangian and Hamiltonian mechanics. Principle of least action, Galilean relativity, Lagrangian mechanical systems, Euler-Lagrange equations. Central potential, Kepler's problem, planetary motion. Scattering problems, disintegration, Rutherford scattering cross section. Harmonic motion in the presence of rapidly oscillating field. Poisson's brackets, canonical transformations, Liouville's theorem, Hamilton-Jacoby equation. Prerequisites: 41 or 61, and MATH 53.
4 units, Spr (Kahn, S)

PHYSICS 112. Mathematical Methods of Physics—Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green's functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, MATH 131.
4 units, Win (Gratta, G)

PHYSICS 113. Computational Physics—Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace's equation and Poisson's equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in 110, 121. Previous programming experience not required.
4 units, Spr (Cabrera, B)

PHYSICS 120. Intermediate Electricity and Magnetism—Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell's equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 43 or 63; concurrent or prior registration in MATH 52 and 53. Recommended: concurrent or prior registration in 112.
4 units, Win (Cabrera, B)

PHYSICS 121. Intermediate Electricity and Magnetism—Vector analysis, electrostatic fields, including multipole expansion. Dielectrics, static magnetic fields, magnetic materials. Maxwell's equation. Electromagnetic radiation. Special relativity and transformation between electric and magnetic fields. Plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation and their frequency and angular distributions. Scattering synchrotron and bremsstrahlung processes. Energy loss in water. Wave guides and cavities. Prerequisites: 120; concurrent or prior registration in MATH 131. Recommended: 112.
4 units, Spr (Petrosian, V)

PHYSICS 130,131. Quantum Mechanics—The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.
4 units, **130:** *Aut (Kivelson, S),* **131:** *Win (Wacker, J)*

PHYSICS 134. Advanced Topics in Quantum Mechanics—Variational principle, time-dependent perturbation theory, WKB approximation. Scattering theory: partial wave expansion, Born approximation. Nature of quantum measurement: EPR paradox, Bell's inequality, and Schrödinger's cat paradox. Additional topics may include an introduction to relativistic quantum mechanics or quantum information science. Prerequisites: 130, 131.
4 units, Spr (Moler, K)

PHYSICS 152. Introduction to High Energy Physics—(Graduate students register for 252.) Elementary particles and the fundamental forces. Conservation laws and symmetries. Interaction of elementary particles with matter and detection techniques. The quark model. Weak interactions of quarks and leptons. The standard model of particle physics. Colliders. Connections to cosmology. Prerequisite: 130.
3 units, Win (Roodman, A)

PHYSICS 153A. Introduction to String Theory I: Goals—Facts about physics in extra dimensions. Nonrelativistic strings. Relativistic particles and strings. Light-cone quantization of relativistic strings and the emergence of the critical dimension. Prerequisites: 130, 131.
4 units, not given this year

PHYSICS 153B. Introduction to String Theory II: Open Strings and D-branes—Emergence of gauge theory and connections to particle physics. String thermodynamics and black holes. T-duality, string compactification, and stringy modifications of geometry. Prerequisites: 130, 131, and 153A.
4 units, not given this year

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics—Observed characteristics of stars and the Milky Way galaxy. Physical processes in stars and matter under extreme conditions. Structure and evolution of stars from birth to death. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure, interstellar medium, molecular clouds, HI and HII regions, star formation, and element abundances. Prerequisites: 40 or 60 series, and 70.
3 units, Win (Petrosian, V)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology—Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 or 60 series, and 70.
3 units, Spr (Michelson, P)

PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem—Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.
1-9 units, Aut (Staff)

PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project—Substantial completion of the required computations or data analysis for the research project selected.
1-9 units, Win (Staff)

PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project—Completion of research and writing of a paper presenting methods used and results.
1-9 units, Spr (Staff)

PHYSICS 170,171. Thermodynamics, Kinetic Theory, and Statistical Mechanics—The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, and internal energy; entropy; reversibility; applications to various properties of matter; and absolute zero and low-temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Prerequisites: 45 or 65, and MATH 53. Corequisite: 130,131 for 170,171 respectively.
4 units, **170:** *Aut,* **171:** *Win (Zhang, S)*

PHYSICS 172. Solid State Physics—Crystal structures and bonding in solids. X-ray diffraction. Lattice dynamics and thermal properties. Electronic structure of solids; transport properties of metals; quantum oscillations; charge density waves. Properties and applications of semiconductors. Phenomenology and microscopic theory of superconductivity. Prerequisites: 170, 171.
3 units, Spr (Manoharan, H)

PHYSICS 173B. Concepts in Condensed Matter Physics—Focus is on simple, archetypical examples. Topics include interaction and correlation, emergent order and symmetry breaking, new states of matter, pattern formation, and nonlinear dynamics in material systems. Prerequisite: introductory solid state or condensed matter physics.
1 unit, not given this year

PHYSICS 190. Independent Study—Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major, and consent of instructor.
1-9 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 204A. Seminar in Theoretical Physics—Topics of recent interest may include cosmology, black hole physics, and strong-weak coupling duality transformations.
3 units, Aut (Silverstein, E)

PHYSICS 204B. Seminar in Theoretical Physics—Topics including quantum computing, Berry phase, and quantum Hall effect.
3 units, Win (Doniach, S)

PHYSICS 205. Undergraduate Honors Research—Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

PHYSICS 210. Advanced Particle Mechanics—The Lagrangian and Hamiltonian dynamics of particles. Beyond small oscillations. Phase portraits, Hamilton-Jacoby theory, action-angle variables, adiabatic invariance. Nonlinear dynamical systems, continuous and discrete. Behavior near the fixed points, stability of solutions, attractors, chaotic motion. Transition to continuum mechanics. Prerequisite: 110 or equivalent.
3 units, Aut (Laughlin, R)

PHYSICS 211. Continuum Mechanics—Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.
3 units, Win (Peskin, M)

PHYSICS 212. Statistical Mechanics—Principles, ensembles, statistical equilibrium. Thermodynamic functions, ideal and near-ideal gases. Fluctuations. Mean-field description of phase-transitions and associated critical exponents. One-dimensional Ising model and other exact solutions. Renormalization and scaling relations. Prerequisites: 130, 131, 171, or equivalents.
3 units, Spr (Peskin, M)

PHYSICS 216. Back of the Envelope Physics—Techniques such as scaling and dimensional analysis, useful to make order-of-magnitude estimates of physical effects in different settings. Goals is to promote a synthesis of physics through solving problems, some not included in a standard curriculum. Applications include properties of materials, fluid mechanics, geophysics, astrophysics, and cosmology. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.
3 units, Aut (Madejski, G)

PHYSICS 220. Classical Electrodynamics—Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121, 210, or equivalents; MATH 106 and 132.
3 units, Win (Silverstein, E)

PHYSICS 221. Classical Electrodynamics—Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121 or equivalent; MATH 106 and 132, or PHYSICS 210.
3 units, Spr (Tantawi, S)

PHYSICS 230. Quantum Mechanics—Fundamental concepts. Introduction to Hilbert spaces and Dirac's notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The path integral formulation of quantum statistical mechanics. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems. Prerequisite: 131 or equivalent.
3 units, Aut (Shenker, S)

PHYSICS 231. Quantum Mechanics—Basis for higher level courses on atomic solid state and particle physics. Wigner-Eckart theorem and addition of angular momenta. Approximation methods for time-independent and time-dependent perturbations. Semiclassical and quantum theory of radiation, second quantization of radiation and matter fields. Systems of identical particles and many electron atoms and molecules. Prerequisite: 230.
3 units, Win (Shenker, S)

PHYSICS 232. Quantum Mechanics—Special topics. Elementary excitations in solids (the free electron gas, electronic band structure, phonons). Elementary scattering theory (Born approximation, partial wave analyses, resonance scattering). Relativistic single-particle equations. Dirac equation applied to central potentials, relativistic corrections, and nonrelativistic limits.
3 units, Spr (Dimopoulos, S)

PHYSICS 252. Introduction to High Energy Physics—See 152.
3 units, Win (Roodman, A)

PHYSICS 260. Introduction to Astrophysics and Cosmology—The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: 110, 121, and 171, or equivalents.
3 units, Aut (Petrosian, V)

PHYSICS 262. Introduction to Gravitation—Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Weak field limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisite: 121 or equivalent including special relativity.
3 units, Win (Wagoner, R)

PHYSICS 275. Electrons in Nanostructures—The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, graphen, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, Win (Goldhaber-Gordon, D)

PHYSICS 290. Research Activities at Stanford—Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Michelson, P)

PHYSICS 291. Practical Training—Opportunity for practical training in industrial labs. Arranged by student with the research adviser's approval. A brief summary of activities is required, approved by the research adviser.

3 units, Sum (Staff)

PHYSICS 293. Literature of Physics—Study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 294. Teaching of Physics Seminar—Required of teaching assistants in Physics in the year in which they first teach. Techniques of teaching physics by means of weekly seminars, simulated teaching situations, observation of other teachers, and evaluation of in-class teaching performance.

1 unit, Aut (Pam, R)

PHYSICS 301. Astrophysics Laboratory—Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, alternate years, not given this year

PHYSICS 312. Basic Plasma Physics—For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.

3 units, alternate years, not given this year

PHYSICS 321. Laser Spectroscopy—Theoretical concepts and experimental techniques. Absorption, dispersion, Kramers-Kronig relations, line-shapes. Classical and laser linear spectroscopy. Semiclassical theory of laser atom interaction: time-dependent perturbation theory, density matrix, optical Bloch equations, coherent pulse propagation, multiphoton transitions. High-resolution nonlinear laser spectroscopy: saturation spectroscopy, polarization spectroscopy, two-photon and multiphoton spectroscopy, optical Ramsey spectroscopy. Phase conjugation. Four-wave mixing, harmonic generation. Coherent Raman spectroscopy, quantum beats, ultra-sensitive detection. Prerequisite: 230. Recommended: 231.

3 units, alternate years, not given this year

PHYSICS 323. Laser Cooling and Trapping—Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, Spr (Kasevich, M)

PHYSICS 330. Quantum Field Theory—Quantization of scalar and Dirac fields. Introduction to supersymmetry. Feynman diagrams. Quantum electrodynamics. Elementary electrodynamic processes: Compton scattering; e+e- annihilation. Loop diagrams and electron (g-2). Prerequisites: 130, 131, or equivalents.

3 units, Aut (Kallosh, R)

PHYSICS 331. Quantum Field Theory—Functional integral methods. Local gauge invariance and Yang-Mills fields. Asymptotic freedom. Spontaneous symmetry breaking and the Higgs mechanism. Unified models of weak and electromagnetic interactions. Prerequisite: 330.

3 units, Win (Kallosh, R)

PHYSICS 332. Quantum Field Theory—Theory of renormalization. The renormalization group and applications to the theory of phase transitions. Renormalization of Yang-Mills theories. Applications of the renormalization group of quantum chromodynamics. Perturbation theory anomalies. Applications to particle phenomenology.

3 units, Spr (Dixon, L)

PHYSICS 351. Standard Model of Particle Physics and Beyond—Group theory, symmetries, the standard model of particle physics, gauge hierarchy and the cosmological constant problem as motivations for beyond the standard model, introduction to supersymmetry, technicolor, extra dimension, split SUSY. Corequisite: 230.

3 units, Aut (Dimopoulos, S)

PHYSICS 352. Neutrino Physics—Neutrino masses and mixing. Kinematics tests for neutrino masses. Neutrino interactions, the number of light neutrino species. Solar and atmospheric neutrino anomalies. Artificial neutrino sources: reactors and particle accelerators. Majorana and Dirac neutrinos. Double-beta decay. Neutrinos in supernovae. Relic neutrinos. Neutrino telescopes.

3 units, not given this year

PHYSICS 360. Physics of Astrophysics—Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Win (Romani, R)

PHYSICS 361. Stellar and Galactic Astrophysics—Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean's mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Supernovae and compact sources. Structure of the Milky Way: disk and spiral arms; dark matter and the halo mass; central bulge or bar; and black hole. Prerequisite: 221 or equivalent. Recommended: 260, 360.

3 units, alternate years, not given this year

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology—Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360.

3 units, Spr (Wechsler, R)

PHYSICS 363. Solar and Solar-Terrestrial Physics—Structure, mechanisms, and properties of the Sun's interior and atmosphere. Tools for solar observations; magnetic fields and polarimetry. Solar oscillations and helioseismology. Differential rotation and turbulent convection. Solar MHD, Alfven and magneto-acoustic waves. Solar cycle and dynamo. Magnetic energy release, reconnection, particle acceleration. Solar activity, sunspots, flares, coronal mass ejections; UV, X-ray, and high-energy particle emissions. The interaction of the solar wind with Earth's magnetosphere and its terrestrial effects; space weather. Prerequisite: 221 or equivalent.

3 units, Win (Kosovichev, A)

PHYSICS 364. Advanced Gravitation—Early universe cosmology. Topics at the interface between cosmology and gravity, particle theory, and speculative theories of physics at the Planck scale such as string theory. Inflationary cosmology and generation of density pertubations, models of baryogenesis, big bang nucleosynthesis, and speculations about the Universe at the Planck scale. Experiments in the near future that may extend or revise current notions.

3 units, alternate years, not given this year

PHYSICS 370. Theory of Many-Particle Systems—Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green's functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Prerequisite: 232.

3 units, alternate years, not given this year

PHYSICS 372. Condensed Matter Theory I—(Formerly APPPHYS 372.) Fermi liquid theory, many-body perturbation theory, response function, functional integrals, interaction of electrons with impurities.

3 units, Win (Laughlin, R)

PHYSICS 373. Condensed Matter Theory II—(Formerly APPPHYS 373) Superfluidity and superconductivity. Quantum magnetism. Prerequisite: 372.

3 units, Spr (Laughlin, R)

PHYSICS 376. Superfluidity and Superconductivity—Introduction to superfluid He: two-fluid model, phonons, and rotons, Feynman description, vortices, Bogoliubov theory. Phenomenology of superconductors: London description, Ginzburg-Landau model, type-I vs. type-II materials, Josephson effects, thin films, Kosterlitz-Thouless behavior, electron-phonon coupling. BCS theory: bulk systems, tunneling, strong-coupling materials, dirty and gapless superconductivity, fluctuation effects, Ginzburg criterion. Recommended: APPPHYS 272, 273, or equivalents.

3 units, not given this year

PHYSICS 450. Introduction to String Theory—The worldsheet and spacetime physics of bosonic string theory and superstring theory. May be repeated for credit. Prerequisites: 262, 330, 331, and 332.

3 units, Aut (Kachru, S)

PHYSICS 451. Topics in String Theory—String compactification. String theory and speculative theories of physics beyond the standard model. Introduction to AdS/CFT. May be repeated for credit. Prerequisites: 262, 330, 331, 332, and 450.

3 units, Win (Kachru, S)

PHYSICS 452. Black Holes and the Anti-De-Sitter Space/Conformal Field Theory Correspondence—Quantum mechanics of black holes, and relation to string theory. Implications for particle physics phenomenology, quantum gravity, nuclear physics, cosmology, and pure mathematics. Information theory, Bekenstein Hawking entropy, the holographic principle, and string theory methods such as the AdS/CFT correspondence. Applications to physics and cosmology questions. May be repeated for credit. Prerequisites: 262, 330, 331, and 332.

3 units, Spr (Susskind, L)

PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology—Content varies depending on participant interest. Past topics include: large-scale structure formation, the formation and structure of dark matter halos, and N-body simulations; alternative dark matter models; galaxy clustering, the halo model, and halo occupation statistics; galaxy formation models and galaxy evolution; and constraints on cosmological parameters and galaxy formation from large surveys.

3 units, alternate years, not given this year

PHYSICS 475. Advanced Topics in Condensed Matter Physics—Current literature and advanced topics. Journal club format. Content varies depending on interests of participants. May be repeated for credit. Recommended: APPPHYS 272, 273, or equivalents.

1-3 units, Aut, Win (Zhang, S), offered occasionally

PHYSICS 490. Research—Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

APPPHYS 192/292. Introductory Biophysics
3 units, Spr (Doniach, S), alternate years, not given next year

APPPHYS 207. Laboratory Electronics
3 units, Win (Fox, J)

APPPHYS 208. Laboratory Electronics
3 units, alternate years, not given this year

APPPHYS 215. Numerical Methods for Physicists and Engineers
3 units, Aut (Doniach, S)

APPPHYS 226. Physics of Quantum Information
3 units, alternate years, not given this year

APPPHYS 270. Magnetism and Long Range Order in Solids
3 units, Aut (Fisher, I)

APPPHYS 272,273. Solid State Physics
3 units, **272:** *Win,* **273:** *Spr (Kivelson, S)*

APPPHYS 315. Methods in Computational Biology
3 units, alternate years, not given this year

APPPHYS 324. Introduction to Accelerator Physics
3 units, Spr (Staff), alternate years, not given next year

APPPHYS 383. Introduction to Atomic Processes
3 units, alternate years, not given this year

APPPHYS 387. Quantum Optics and Measurements
3 units, Win (Staff), alternate years, not given next year

APPPHYS 388. Mesoscopic Physics and Nanostructures
3 units, Spr (Staff), alternate years, not given next year

APPPHYS 392. Topics in Molecular Biophysics
3 units, alternate years, not given this year

APPPHYS 473B. Topics in Condensed Matter Physics: Many Body Physics in Quantum Dots
3 units, Aut (Oreg, Y)

EE 106, Planetary Exploration
3 units, Spr (Fraser-Smith, A)

EE 268. Introduction to Modern Optics
3 units, Aut (Byer, R)

GES 222. Planetary Systems: Dynamics and Origins
3-4 units, Aut (Lissauer, J; Marley, M)

POLITICAL SCIENCE

Emeriti: (Professors) David B. Abernethy, Lucius J. Barker, Richard A. Brody, Charles Drekmeier, John W. Lewis, John Manley, James March, Hubert R. Marshall, Robert A. Packenham, Philippe Schmitter, Robert Ward, Hans N. Weiler; *(Senior Lecturer)* Elisabeth Hansot, Daniel Okimoto

Chair: James D. Fearon

Professors: David W. Brady, Joshua Cohen, James D. Fearon, John A. Ferejohn, Morris P. Fiorina, Judith L. Goldstein, Stephen H. Haber, David J. Holloway, Shanto Iyengar (on leave Autumn), Simon D. Jackman, Terry L. Karl, Stephen D. Krasner, Jon A. Krosnick (on leave), David D. Laitin, Terry M. Moe (on leave), Josiah Ober, Jean C. Oi, Jack N. Rakove, Condoleezza Rice (on leave), Douglas Rivers (on leave Winter, Spring), Scott D. Sagan, Paul M. Sniderman, Barry R. Weingast

Associate Professors: Michael A. McFaul, Rob Reich, Jonathan Rodden, Kenneth A. Schultz

Assistant Professors: Alberto Díaz-Cayeros, Beatriz Magaloni, Peter Stone (on leave), Michael R. Tomz, Jonathan Wand (on leave), Jeremy Weinstein, Phillip Lipscy, Karen Jusko, Lisa Blaydes

Professor (Research): Norman Nie

Lecturers: Tammy Frisby, Solomon Major, Andrew R. Rutten, Mary Sprague, Kathryn Stoner-Weiss

Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Larry Diamond, Gerald A. Dorfman, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Roger Noll (emeritus), Debra M. Satz, Stephen J. Stedman

Visiting Professors: Josef Joffe, Abbas Milani, John Wallis

Visiting Associate Professor: Alice Miller

Department Offices: Encina Hall West, Room 100
Mail Code: 94305-6044
Phone: (650) 723-1806
Web Site: http://polisci.stanford.edu

Courses given in Political Science have the subject code POLISCI. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

To receive a B.A. in Political Science, a student must:

1. Submit an application for the Political Science major to the undergraduate administrator and declare on Axess. Forms are available in Encina Hall West, Room 100. For additional information, drop by or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter in junior year.
2. Complete 70 units including:
   - a) 45 Political Science course units to complete breadth requirements.
   - b) a 5-unit methods requirement satisfied by POLISCI 150A, 150B, 150C, 151A, 151B, ECON 102A, or STATS 60. The list of courses satisfying the methods requirement is updated annually by the department. Students should consult the Bulletin for new courses that satisfy this requirement.
   - c) 20 additional Political Science units including no more than 5 units of directed reading. 10 units of ECON 1A,B may substitute for two 5-unit POLISCI courses.
   - d) no more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.
3. Satisfy breadth requirements (45 units): each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses must be completed by the end of sophomore year.

   POLISCI 1. Introduction to International Relations
   POLISCI 2. American National Government and Politics
   POLISCI 3. Introduction to Political Philosophy
   POLISCI 4. Introduction to Comparing Political Systems
   POLISCI 151A. Doing Political Science,
   or POLISCI 151B. Data Analysis for Political Science

   The primary concentration must be completed by fulfilling the depth requirement with at least 30 units (see Statement 4).

   Each major should declare a secondary concentration in another subfield, with at least 15 units in that concentration, including the introductory course for that subfield.
4. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. Subfields include:

   International Relations (1, 110-119, 210-219, 310-319)
   American Politics (2, 120-129, 220-229, 320-329)
   Political Theory (3, 130-139, 230-239, 330-339)
   Comparative Politics (4, 140-149, 240-249, 340-349)
5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course.
6. Take at least one 5-unit, advanced undergraduate seminar in Political Science.
7. Students may apply a maximum of 10 units from Stanford Summer Session or courses outside Stanford. Transfer students are allowed up to 20 units of transfer units or summer session. A maximum of 15 units may be applied towards breadth requirements and 5 towards other Political Science course units. All transfer cases require petitions which must be reviewed and approved by the Director of Undergraduate Studies.
8. Directed reading and Oxford tutorial units require a petition and may only be applied towards related course work units. These units may not be used to fulfill a breadth requirement, and no more than 10 combined units of directed reading and Oxford tutorial units may count toward the required 70 Political Science units.
9. Courses counting toward the 70-unit requirement must be taken for a letter grade, although units in excess of the required 70 may be taken on a credit/no credit basis. A minimum grade of 'C' is required for courses to count towards major requirements.

MINOR

Students must complete their declaration of the minor on Axess no later than the end of the junior year.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or crosslisted in the Department of Political Science. A maximum of 5 units of directed reading may count if supervised by a member of the department.

All units are for a letter grade. A minimum grade point average (GPA) of 2.0 (C) is required for courses to count towards minor requirements.

Concentration—The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two at a more advanced level (numbered above 100). Where a linked set of advanced courses is offered, as with the Political Theory 130A,B,C series, the introductory course need not be taken.

The concentration corresponds to one of the subfields the department already has in place, namely, international relations, American politics, political theory, and comparative politics.

Distribution—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields.

Transfer Work—A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

PRIZES

There are several annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 130A,B,C), a cash prize for the best thesis written in political theory, the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2, and Cottrell Prizes for outstanding students in POLISCI 1, 3, and 4.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.

Applicants must have a 3.5 grade point average (GPA) in Political Science courses, and an adviser who must be a member of the academic council. Students are required to declare their intention to pursue honors on the Major Proposal form. Applications can be obtained from the department office.

Students pursuing honors must complete the following by the end of Spring Quarter of their junior year: Methods requirement (POLISCI 150A,B,C, 151A, 151B, STATS 60, or ECON 102A), WIM requirement, and a completed research paper from an advanced undergraduate seminar or directed reading. Students are required to enroll in one quarter of POLISCI 299Q, Junior Research Seminar, in the junior year. This credit/no-credit course is designed to help students find a manageable thesis topic and adviser.

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in POLISCI 299A,B,C, which covers research and writing directed by the student's adviser. In addition, students must enroll in POLISCI 299R, a 3-unit Autumn Quarter seminar designed to develop research and writing skills. In the Winter Quarter, students must enroll in POLISCI 299S which is a credit/no credit tutorial in which students work with other students and tutors to finish their research.

Most students find themselves in one of two groups: (1) those who already have substantial background in their thesis topic, and can expect to complete the honors program in two or three quarters for a total of 10-15 units completed in POLISCI 299A,B,C; or (2) those who have little or no previous work on the topic, and can expect to complete the program in three quarters with 15 units of work.

To complete the honors program, students must:

1. Complete all requirements for the major.
2. Enroll in one quarter of POLISCI 299Q, 299R, and 299S.
3. Enroll in at least 10 units of POLISCI 299A, B, or C, senior project. Students must take at least two quarters of Senior Project units.
4. Complete a thesis of honors quality, for a grade of 'B+' or better.

Students cannot apply units from the POLISCI 299Q, Junior Research Seminar, POLISCI 299R, Senior Research Seminar, or POLISCI 299S, Senior Honors Tutorial, toward the 70-unit requirement for the major. However, students can apply up to 10 units from POLISCI 299A,B,C Senior Project, toward the 70-unit requirement.

GRADUATE PROGRAMS

Admission—Prospective graduate students should see http://gradadmissions.stanford.edu for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination (GRE). Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission, available at http://registrar.stanford.edu/shared/publications.htm#GradStud. The application deadline is December 4. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

MASTER OF ARTS

The M.A. degree may be pursued as part of a joint degree program with one of the University's professional schools. Students interested in a joint degree should apply for admission to the M.A. program in Political Science during the Autumn Quarter of the first year in the Stanford professional school.

Doctoral candidates may elect to take the M.A. degree when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. Of the remaining 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 100.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed reading and all course work.

The department does not offer a coterminal bachelor's and master's degree.

Doctoral candidates may pursue master's degrees from other departments. Recent examples include but are not restricted to master's degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master's degrees.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees" section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, political institutions, and political theory. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the six divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the five units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work. Students are not permitted to use the following combination of concentrations for the purposes of fulfilling the requirements for the PhD: American politics, political institutions, and methodology. Students wishing to concentrate in American politics, political institutions, and methodology are not prohibited from doing so, but must add another field of concentration to their course of study.
2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student's adviser. All candidates must complete at least 10 units of statistical methods or its equivalent. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.
4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student's adviser a statement of purpose. This statement indicates the student's proposed major concentrations of

study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.

5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expect that students be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the middle of Winter Quarter, since revisions of the paper are often required prior to obtaining faculty approval.
7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser. The dissertation proposal requires approval by the student's dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.
8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.
9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.
10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.
11. The candidate must complete a dissertation satisfactory to the dissertation reading committee.

PH.D. MINOR

Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Courses must be 300 level and above. Grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Summer Quarter—During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. Offerings depend upon available faculty.

The department uses the following course numbering system:

1- 99	Introductory Courses
100-199	Intermediate Undergraduate Lecture Courses
200-299	Advanced Undergraduate Seminar Courses
300-399	Advanced Undergraduate/Graduate Courses
400-500	Graduate Courses

Course information is accurate when the *Stanford Bulletin* goes to press; however, students should be aware that there may be changes and should check the quarterly *Time Schedule* for up-to-date information.

INTRODUCTORY

POLISCI 1. Introduction to International Relations—Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER:DB-SocSci

5 units, Spr (Tomz, M)

POLISCI 2. Introduction to American National Government and Politics—The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci

5 units, Win (Fiorina, M; Frisby, T)

POLISCI 3. Introduction to Political Philosophy—(Same as ETHICSOC 30, PHIL 30.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas

5 units, Aut (Hussain, N)

POLISCI 4. Introduction to Comparing Political Systems—Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Weinstein, J)

POLISCI 16N. Politics of Economic Development—Stanford Introductory Seminar. Preference to freshmen. Why are some countries rich and others poor? What explains the policies that governments adopt, and how do those policies affect economic performance? Readings from political science and economics about Latin America and other regions. GER:DB-SocSci, Write-2

5 units, Spr (Tomz, M)

POLISCI 33Q. Legal Craft and Moral Intuitions—(Same as LAW 107Q.) Stanford Introductory Seminar. Preference to sophomores. The conflict between translating rules for social interaction into legal practices versus deciding what constitutes impermissible harm-causing, coercion, or discrimination. Approaches to this conflict through cases such as: can government forbid wetland development without compensating property owners; why might private nurses or Playboy bunnies but not flight attendants be selected on the basis of gender; why is gender equality in resource distribution provided for college athletes but not math graduate students? GER:DB-SocSci, EC-EthicReas

4 units, Win (Kelman, M)

POLISCI 35Q. Food and Politics—Stanford Introductory Seminar. Preference to sophomores. Topics include the politics of food production and distribution; organic and sustainable farming; federal farm and free trade policies; genetically-modified food; animal ethics; and the political context of famine and obesity. Community-based learning.
2 units, Win (Reich, R)

POLISCI 43N. Oil, Regime Change, and Conflict—Stanford Introductory Seminar. Preference to sophomores. Relationships among dependence on oil export, democratization and authoritarian rule, and rising conflict. Case studies including Venezuela, Nigeria, Iran, Iraq, Chad, and Indonesia. The resource curse: the impact of oil on a country's political economy. The relationship between such economic dependence and regime type. Why oil exporting countries are more prone to conflict and civil war than other countries. Research paper.
5 units, Aut (Karl, T)

POLISCI 44N. Everyday Political Life in the Authoritarian Middle East—Stanford Introductory Seminar. Preference to freshmen. How individuals respond to state policy, use informal channels to influence politics, are subject to forms of repression, and challenge authoritarian government through Islamic and other types of organizations. Focus is on Egypt, Iraq, Syria, Yemen, and Iran.
5 units, Aut (Blaydes, L)

POLISCI 45N. Civil War Narratives—Stanford Introductory Seminar. Preference to freshmen. Focus is on a new statistics-based theory to account for the susceptibility of countries to civil war. How to write a theory-based historical narrative. Students write and present an original historical narrative focusing on how well the theory explains a particular history and new factors to explain civil war onsets. GER:DB-SocSci
5 units, Win (Laitin, D)

INTERMEDIATE UNDERGRADUATE LECTURES

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take POLISCI 1. While not a formal prerequisite for many of the courses listed below, it provides background for more advanced work.

The courses in international relations offered in Political Science can be divided into those dealing with global political, military, and economic problems, and those dealing with the foreign relations of nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in International Relations should refer to the "International Relations" section of this bulletin.

POLISCI 110A. Sovereignty and Globalization—The relationship between globalization and the viability of state sovereignty, the development of international institutions, and the international distribution of wealth and security. GER:DB-SocSci
5 units, not given this year

POLISCI 110B. Strategy, War, and Politics—Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:DB-SocSci
5 units, not given this year

POLISCI 110C. America and the World Economy—(Same as 110X.) (Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM
5 units, Win (Goldstein, J)

POLISCI 110D. War and Peace in American Foreign Policy—(Same as 110Y.) (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, WIM
5 units, Spr (Schultz, K)

POLISCI 110X. America and the World Economy—(Same as 110C.) Does not fulfill WIM requirement. GER:DB-SocSci
5 units, Win (Goldstein, J)

POLISCI 110Y. War and Peace in American Foreign Policy—(Same as 110D.) Does not fulfill the WIM requirement. GER:DB-SocSci
5 units, Spr (Schultz, K)

POLISCI 111. Peace Studies—(Same as PSYCH 165.) Interdisciplinary. The challenges of pursuing peace in a world with many conflicts and rising regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Contributions of academic disciplines to the study of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER:DB-SocSci
5 units, not given this year

POLISCI 111D. British Politics—The impact on the world's oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Dorfman, G)

POLISCI 113F. The United Nations and Global Governance—The role of international institutions and organizations in the areas of health, environment, security, trade, development, and human rights. Evaluation, accountability, participation, legitimacy, and autonomy. GER:DB-SocSci
5 units, not given this year

POLISCI 114D. Democracy, Development, and the Rule of Law—(Graduate students register for 314D; same as IPS 230, INTNLREL 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. GER:DB-SocSci
5 units, Aut (Stoner-Weiss, K; McFaul, M)

POLISCI 114S. International Security in a Changing World—The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci
5 units, Win (Sagan, S; Blacker, C)

POLISCI 116. History of Nuclear Weapons—(Same as HISTORY 103E.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci
5 units, Spr (Holloway, D)

AMERICAN POLITICS

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe—First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one, two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Recommended: 2. GER:DB-SocSci

5 units, not given this year

POLISCI 120B. Parties, Interest Groups, the Media, and Elections—What are the public's powers and constraints in influencing the political process? The role of parties in organizing the electorate and Congress and affecting electoral and policy outcomes. Influence of elections and interest groups in the political process, and their effect on the distribution of power. Media's impact on political participation. GER:DB-SocSci

5 units, Win (Staff)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts—How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:DB-SocSci, WIM

5 units, Spr (Rutten, A)

POLISCI 121. Urban Politics—(Same as SOC 149X/249X, URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor.

5 units, Aut (Bischoff, K)

POLISCI 122. Introduction to American Law—(Same as AMSTUD 179, LAW 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci

3-5 units, Aut (Friedman, L)

POLISCI 123. Politics and Public Policy—(Same as PUBLPOL 101.) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: 2. GER:DB-SocSci

5 units, Aut (Sprague, M)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System—The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci, WIM

5 units, Aut (Rutten, A)

POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties—The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci

5 units, Win (Rutten, A)

POLITICAL THEORY

POLISCI 130A. History of Political Thought I—(Graduate students register for 330A; same as CLASSHIS 133/333.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:SocSci

5 units, not given this year

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(Graduate students register for 330B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:DB-SocSci

5 units, not given this year

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power—(Graduate students register for 330C.) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey. GER:DB-SocSci

5 units, not given this year

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.) The development of children into citizens, focusing on major social institutions responsible for their civic education: schools, families, communities, and civil society. How does each institution develop citizenship? What is the relationship between civic education and the reproduction of social equality or inequality? Do children's rights differ from those of adults? Readings: political theorists on justice, feminist theorists on family and children, court cases on tensions between the state and community interest in education, and social critics on the practice of civic education. GER:DB-SocSci, EC-EthicReas

5 units, not given this year

POLISCI 133. Ethics and Politics of Public Service—(Same as ETHICSOC 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, Aut (Reich, R)

POLISCI 134. Democracy and the Communication of Consent—(Same as COMM 136/236.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci

4-5 units, Aut (Fishkin, J)

POLISCI 136. Philosophical Issues Concerning Race and Racism—(Same as PHIL 177.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul

4 units, Win (Satz, D)

POLISCI 136R. Introduction to Global Justice—(Graduate students register for 336; same as INTNLREL 136R.) Recent work in political theory on the ethics of international relations. Topics include human rights, global economic justice, and the problem of global poverty.
5 units, Spr (Pasternak, A; de Bres, H)

POLISCI 136S. Justice—(Same as ETHICSOC 171, IPS 208, PHIL 171/271, PUBLPOL 207.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
5 units, Aut (Cohen, J)

POLISCI 138. Modern Political Ideologies—Prominent political ideologies that define the terms of contemporary political discourse including liberalism, conservatism, feminism, and anarchism through the intellectual debates generated by the French Revolution. Readings include Price, Burke, Godwin, Wollstonecraft, and Paine.
5 units, not given this year

COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

POLISCI 140. Political Economy of Development—Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Díaz-Cayeros, A)

POLISCI 140L. China in World Politics—The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 141. The Global Politics of Human Rights—The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike, and the rights of women in S. Africa. GER:DB-SocSci
5 units, not given this year

POLISCI 141E. Elections in the U.S. and Canadian Wests: Innovation and Reform—How laws governing elections in western U.S. states and Canadian provinces affect representation, citizenship, and public policy. Emphasis is on the evolution of direct democracy, including the initiative and referendum processes, since state- and provincehood. Is there is a distinctive Western political culture?
5 units, not given this year

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries—(Same as INTNLREL 143.) Relations among nongovernmental organizations, governments, international organizations, and multinational corporations. How NGOs contribute to economic growth, equity, a sustainable environment, peace and order, and democracy in poor countries. Their record on natural disaster and war relief work. How NGOs based in rich countries interact with those based in poor ones. GER:DB-SocSci
5 units, Win (Abernethy, D)

POLISCI 144T. Democracies and Dictatorships—Social scientific findings and debates; cross-sectional approach. What accounts for the emergence of democracy; under what conditions are democracies stable; why are so many developing countries ruled by dictators; why do rulers who destroy their own societies survive for so long; and what accounts for the breakdown of autocratic regimes?
5 units, Spr (Magaloni, B)

POLISCI 146S. Civil War and Violence in Africa—What conditions permit civil war? Why do people join rebel groups? Do outsiders help or hinder the resolution of civil wars? How does the prospect of external intervention influence ongoing civil wars?
5 units, Win (Johnston, P)

POLISCI 147. Comparative Democratic Development—Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Diamond, L)

POLISCI 147S. Comparative Democratic Politics—Do contemporary democracies conform to the ideals of democratic theory? Whose interests are represented in electoral competition? How do electoral rules affect whose interests are represented? What roles do political parties serve? Are political parties effective in representing the interests of their constituents? How do electoral rules structure electoral choice and electoral behavior? Prerequisite: 4.
5 units, Win (Jusko, K)

POLISCI 148. Chinese Politics: The Transformation and the Era of Reform—(Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Oi, J)

POLISCI 148R. Chinese Politics—The politics of the People's Republic of China. The origins of the Communist Revolution, the institutionalization and consequences of communist rule, and attempts to reform the system since 1978. GER:DB-SocSci
5 units, not given this year

POLISCI 148S. The U.S. and Asia During the Cold War—International relations perspective. WW II and its impact on international relations; the efforts of Allied statesmen to design a stable postwar order; the Chinese civil war; the American occupation of Japan; the Korean War; S.E. Asian independence struggles; the American alliance system in the 50s, the Sino-Soviet alliance; Indo-Pakistani conflicts; the Vietnam War; strategic realignment in the 70s; and the legacy of the Cold War on the region's international agenda and American policy priorities. The relevance of the region to the international system. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year (Miller, A)

POLISCI 149S. Islam and the West—Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci
5 units, Spr (Milani, A)

POLISCI 149T. Middle Eastern Politics—Topics in contemporary Middle Eastern politics including institutional sources of underdevelopment, political Islam, electoral authoritarianism, and the political economy of oil.
5 units, Win (Blaydes, L)

POLITICAL METHODOLOGY

POLISCI 150A. Political Methodology I—(Graduate students register for 350A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math

5 units, Aut (Rivers, D)

POLISCI 150B. Political Methodology II—(Graduate students register for 350B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math

5 units, Win (Jackman, S)

POLISCI 150C. Political Methodology III—(Graduate students register for 350C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Jackman, S)

POLISCI 151A. Doing Political Science—For students planning a major in Political Science. Social science methodological approaches including case studies and formal models. The common language, core concepts, and scholarly goals that lie beneath the diversity of means that political scientists use to pursue knowledge. Concepts and their use through the research of Stanford Political Science professors. Guest faculty appearances. Goal is to prepare students to do political science, not just study it. Prerequisite: POLISCI 1, 2, 3, or 4, or consent of instructor. GER:DB-Math

5 units, Win (Jusko, K)

POLISCI 151B. Data Analysis for Political Science—Operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER:DB-Math

5 units, not given this year

POLISCI 152. Introduction to Game Theoretic Methods in Political Science—(Graduate students register for 352.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)
