

Postdoctoral Positions in Protein Engineering and Biophysics

Postdoctoral positions are available in the laboratory of Prof. Jennifer Cochran in the Department of Bioengineering at Stanford University. We are looking for motivated individuals who will take a leadership role in the laboratory. Potential projects include engineering proteins and peptides for biomedical applications in regenerative medicine and cancer imaging and therapy. In addition, projects are available involving biophysical characterization and in vivo testing of therapeutically-relevant proteins that have been engineered for enhanced affinity, stability, expression, and/or function. A Ph.D. in Chemistry, Biochemistry, Biophysics, or related field with experimental experience with molecular cloning, protein expression and purification, in vivo models, or biophysical methods is required. Please send CV and three letters of recommendation to:

Dr. Jennifer Cochran
Stanford University
Dept of Bioengineering
318 Campus Dr. West, MC 5439
The James H. Clark Center, W250
Stanford, CA 94305-5439
