Laurie Zaring 329

Preface

The sixth West Coast Conference on Formal Linguistics (WCCFL 6) was hosted by the Linguistics Department at the University of Arizona in Tucson from March 20–22, 1987. Thirty-four papers were presented on diverse topics ranging from the traditional linguistic fields of phonology, morphology, syntax and semantics to the rapidly developing areas of cognitive and discourse linguistics. Twenty-four of these papers are printed in this volume. Not included are papers presented by Sandra Chung, Abigail Cohn, Jennifer Cole, Paul Gorrel, Hajime Hoji, Christine Kamprath, Chisato Kitagawa and David Lebeaux, Joseph Aoun and Yen-hui Audry Li (presented by Li), Ur Shlonsky, and William Poser.

Thanks go to the contributors to this volume who promptly submitted camera ready copies of their work for publication. Their cooperation has greatly simplified the editing process. Special acknowledgement and thanks are due to Susan Steele, whose skillful direction was a major reason for the success of WCCFL 6, and who has also been generous in providing assistance (gratefully received) to the editor of this volume. WCCFL 6 was supported by the Linguistics Department and the Cognitive Science Program at the University of Arizona through the generosity of Peter Culicover in his roles as Head of Linguistics, Director of Cognitive Science, and Acting Dean of Social and Behavioral Sciences. Finally, thank you to Sandra Fulmer and Sunseek Oh, graduate students in the University of Arizona Linguistics Department, who assisted with many of the organizational details of the conference.
