

Including Files – Continuing Studies CS 22

Using Server Side Includes to Include a File

1. Edit the *index.html* file in the *includes* folder prepared for you by your instructor as follows:

```
<body>
<!--#include file="header.html" -->
<!--#include file="sidebar.html" -->
<!--#include file="main.html" -->
<!--#include file="footer.html" -->
Last modified: <!--#flastmod file="index.html" -->
</body>
```

Using PHP Includes to Include a File

2. Edit the *index.php* file in the *includes* folder prepared for you by your instructor as follows:

```
<body>
<? include("header.html"); ?>
<? include("sidebar.html"); ?>
<? include("main.html"); ?>
<? include("footer.html"); ?>
<? $last_modified = filemtime("index.php"); ?>
Last modified: <? print(date("m/j/y h:I", $last_modified)); ?>
</body>
```

Using JavaScript Includes to Include a File

3. Edit the *index.html* file in the *includes* folder prepared for you by your instructor as follows:

```
<body>
<!--#include file="header.html" -->
<!--#include file="sidebar.html" -->
<!--#include file="main.html" -->
<!--#include file="footer.html" -->
Last modified: <!--#flastmod file="index.html" -->
<script language="JavaScript" src="file.js"></script>
</body>
```

Using Inline Frames to Include a File

4. Edit the *index.html* file in the *includes* folder prepared for you by your instructor as follows:

```
<body>
<!--#include file="header.html" -->
<!--#include file="sidebar.html" -->
<!--#include file="main.html" -->
<!--#include file="footer.html" -->
Last modified: <!--#flastmod file="index.html" -->
<script language="JavaScript" src="file.js"></script>
<iframe src="footer2.html">
<a href="footer2.html">Your browser doesn't support iframes. Click here to go
directly to the included content.</a>
</iframe>
</body>
```
