Values for the second CDW wavevector q_2 in ErTe_3 were cited incorrectly in the body of the paper. These should be $q_2 = 0.313(5) a^*$ and $q_2' = 0.687(5) a^*$ at a temperature of 10 K, and $q_2 = 0.312(5) a^*$ at a temperature of 155 K. Figures and figure captions remain correct.

In Ref. 18, incorrect units were used for values of k_x at which the CDW gap is closed. These values should be $k_x = 0.5 \pi/a$ for CeTe_3 and $k_x = 0.35 \pi/a$ for SmTe_3 .
