

**YedaPlus** is a company designed to prepare and assist students with their application to American Universities.

Among our services are preparatory courses for the standardized tests (GRE, GMAT, SAT, TOEFL...), college counseling, workshops for essay and "Statement of purpose" writing, and the like.

**Adda Bein**, one of the managers of the company- A Romanian currently working on her graduate studies at Tel Aviv University has initiated a program called "*RomAid*" whose purpose is to offer Free assistance to Romanian students who are applying to American schools.

We would be happy to donate some time and professional knowledge in order to make sure that the application process is made easier and more efficient.

The main services that we would like to offer are:

\* Assistance in writing, styling and editing the "Statement of Purpose" which is frequently asked by American Universities.

The Statement is an essay which describes the person, his/her academic interests and professional goals.

For the past 3 years Adda has been helping students of wide range of areas (Biology, Psychology, BioTech, Film, Political Science...) with their Essay writing.

\* College Counseling: Students are often confused by the variety of options that are open to them when applying. They could usually use some counseling regarding their best options- while considering important factors such as Area of academic interest, Funding, Geographical area and etc.

Steven Antinucci, Co-founder of YedaPlus ,has had much experience in assisting students with this difficult decision-making.

As a Columbia Mathematics graduate he will be happy to offer some advice and guidance regarding your options.

As noted before, those services are absolutely Free of charge to the selected Students.

We will try to help every applicant, but can guarantee helping at least 2 students each month.
