Postdoctoral Research Associates Wanted

Positions beginning in Fall 2006

The **Minnesota Population Center** (<http://www.pop.umn.edu/>) at the University of Minnesota is seeking Postdoctoral Research Associates to work on several projects to develop new demographic data sources. These projects include:

- The *[Integrated Public Use Microdata Series \(IPUMS-USA\)](#)*, an individual-level database of U.S. censuses from 1850 to 2000, including projects to create samples for 1880, 1900 and 1930; and,
- The *[IPUMS International](#)*, a data series incorporating international census microdata for the period 1960 to the present.

We are especially interested in recruiting outstanding postdocs who could use IPUMS-USA and IPUMS-International data in their own research.

Postdoctoral Research Associates are expected to participate in the intellectual life of the center. For positions on IPUMS-International, we seek candidates with non-U.S. census data experience. For positions on IPUMS-USA, experience with historical census microdata or the IPUMS is recommended, but not necessary. For all positions, we expect candidates to develop research projects using IPUMS data. The salary is competitive, and benefits include medical insurance, dental insurance, and other faculty plan benefits. The position is appointed on an annual basis and renewable for a total of three years.

Applications should include a cover letter, a CV and three letters of recommendation. Please forward applications to Barbara Schwab, Minnesota Population Center, 50 Willey Hall, 225 19th Ave S, Minneapolis, MN 55455 or e-mail mpc-jobs@pop.umn.edu. We will review applications on a rolling basis and continue until all positions are filled. This information is also available at <http://www.pop.umn.edu/employment/research.shtml>.

For more information about the projects, see www.ipums.org.
