

Stanford Workshop in Formal Demography

May 1 – May 4, 2008

http://popstudies.stanford.edu/formal_demography2008

Topics:

Transitions and the theory of transient dynamics

Stochastic projection and forecasts

Intergenerational transfers

Human-environment interactions

This 4-day workshop for advanced students (graduate, postdoc, junior faculty; well-prepared undergrads considered) covers current topics in mathematical demography. We will support (travel, shared housing) for about 20 students. Apply by sending CV, and for students a recommendation letter from faculty advisor, no later than April 11, 2008.
