

Things that Fly

From Leonardo's ideas to modern airplanes and whales, frisbees, wind turbines and race cars.

Join us for 2 hours of fun and learning about aerodynamics using practical tests, computer simulations and elementary physics concepts.

Prof. Iaccarino and his students will lead the discussions and demonstrations; these will take place at Stanford in the Mechanical Engineering Department.

*May 29 @ 2pm - Bldg 300, RM 127
Open to 3th graders and above (max 20 kids)*

*Covington
Auction 2011*
